After all, the practical reason why, when the power is once in the hands of the people, a majority are permitted, and for a long period continue, to rule is not because they are most likely to be in the right, nor because this seems fairest to the minority, but because they are physically the strongest. But a government in which the majority rule in all cases cannot be based on justice, even as far as men understand it. Can there not be a government in which majorities do not virtually decide right and wrong, but conscience?—in which majorities decide only those questions to which the rule of expediency is applicable? Must the citizen ever for a moment, or in the least degree, resign his conscience to the legislator? Why has every man a conscience, then? I think that we should be men first, and subjects afterward. It is not desirable to cultivate a respect for the law, so much as for the right. The only obligation which I have a right to assume is to do at any time what I think right. It is truly enough said, that a corporation has no conscience; but a corporation of conscientious men is a corporation *with* a conscience. Law never made men a whit more just; and, by means of their respect for it, even the well-disposed are daily made the agents of injustice. A common and natural result of an undue respect for law is, that you may see a file of soldiers, colonel, captain, corporal, privates, powder-monkeys, and all, marching in admirable order over hill and dale to the wars, against their wills, ay, against their common sense and consciences, which makes it very steep marching indeed, and produces a palpitation of the heart. They have no doubt that it is a damnable business in which they are concerned; they are all peaceably inclined. Now, what are they? Men at all? or small movable forts and magazines, at the service of some unscrupulous man in power? Visit the Navy-Yard, and behold a marine, such a man as an American government can make, or such as it can make a man with its black arts,—a mere shadow and reminiscence of humanity, a man laid out alive and standing, and already, as one may say, buried under arms with funeral accompaniments, though it may be,—

> "Not a drum was heard, not a funeral note,
> As his corse to the rampart we hurried;
> Not a soldier discharged his farewell shot
> O'er the grave where our hero we buried."

The mass of men serve the state thus, not as men mainly, but as machines, with their bodies. They are the standing army, and the militia, jailors, constables, posse comitatus, etc. In most cases there is no free exercise whatever of the judgment or of the moral sense; but they put themselves on a level with wood and earth and stones; and wooden men can perhaps be manufactured that will serve the purpose as well. Such command no more respect than men of straw or a lump of dirt. They have the same sort of worth only as horses and dogs. Yet such as these even are commonly esteemed good citizens. Others—as most legislators, politicians, lawyers, ministers, and office-holders—serve the state chiefly with their heads; and, as they rarely make any moral distinctions, they are as likely to serve the Devil, without *intending* it, as God. A very few, as heroes, patriots, martyrs, reformers in the great sense, and *men,* serve the

---

67 Not . . . buried, from Charles Wolfe's "The Burial of Sir John Moore" (1817) • 73 posse comitatus, inhabitants summoned by the sheriff to assist in preserving the peace

state with their consciences also, and so necessarily resist it for the most part; and they are commonly treated as enemies by it. A wise man will only be useful as a man, and will not submit to be "clay," and "stop a hole to keep the wind away," but leave that office to his dust at least:—

> I am too high-born to be propertied,
> To be a secondary at control,
> Or useful serving-man and instrument
> To any sovereign state throughout the world."

He who gives himself entirely to his fellow-men appears to them useless and selfish; but he who gives himself partially to them is pronounced a benefactor and philanthropist.

How does it become a man to behave toward this American government to-day? I answer, that he cannot without disgrace be associated with it. I cannot for an instant recognize that political organization as *my* government which is the *slave's* government also.

All men recognize the right of revolution; that is, the right to refuse allegiance to, and to resist, the government, when its tyranny or its inefficiency are great and unendurable. But almost all say that such is not the case now. But such was the case, they think, in the Revolution of '75. If one were to tell me that this was a bad government because it taxed certain foreign commodities brought to its ports, it is most probable that I should not make an ado about it, for I can do without them. All machines have their friction; and possibly this does enough good to counterbalance the evil. At any rate, it is a great evil to make a stir about it. But when the friction comes to have its machine, and oppression and robbery are organized, I say, let us not have such a machine any longer. In other words, when a sixth of the population of a nation which has undertaken to be the refuge of liberty are slaves, and a whole country is unjustly overrun and conquered by a foreign army, and subjected to military law, I think that it is not too soon for honest men to rebel and revolutionize. What makes this duty the more urgent is the fact that the country so overrun is not our own, but ours is the invading army.

Paley, a common authority with many on moral questions, in his chapter on the "Duty of Submission to Civil Government," resolves all civil obligation into expediency; and he proceeds to say, "that so long as the interest of the whole society requires it, that is, so long as the established government cannot be resisted or changed without public inconveniency, it is the will of God that the established government be obeyed, and no longer. . . . This principle being admitted, the justice of every particular case of resistance is reduced to a computation of the quantity of the danger and grievance on the one side, and of the probability and expense of redressing it on the other." Of this, he says, every man shall judge for himself. But Paley appears never to have contemplated those cases to which the rule of expediency does not apply, in which a people, as well as an individual, must do justice, cost what it may. If I have unjustly wrested a plank from a drowning man, I must restore it to him though I drown myself. This, according to Paley, would be inconvenient. But he that would save his life, in such a case, shall lose it. This people must cease to hold slaves, and to make war on Mexico, though it cost them their existence as a people.

In their practice, nations agree with Paley; but does any one think that Massachusetts does exactly what is right at the present crisis?

> "A drab of state, a cloth-o'-silver slut,
> To have her train borne up, and her soul trail in the dirt."

Practically speaking, the opponents to a reform in Massachusetts are not a hundred thousand politicians at the South, but a hundred thousand merchants and farmers here, who are more interested in commerce and agriculture than they are in humanity, and are not prepared to do justice to the slave and to Mexico, *cost what it may.* I quarrel not with far-off foes, but with those who, near at home, coöperate with, and do the bidding of, those far away, and without whom the latter would be harmless. We are accustomed to say, that the mass of

Calhoun and Abbott Lawrence. Patriotism for holidays and summer evenings, with music and rockets, but cotton thread is the Union"

men are unprepared; but improvement is slow, because the few are not materially wiser or better than the many. It is not so important that many should be as good as you, as that there be some absolute goodness somewhere; for that will leaven the whole lump. There are thousands who are *in opinion* opposed to slavery and to the war, who yet in effect do nothing to put an end to them; who, esteeming themselves children of Washington and Franklin, sit down with their hands in their pockets, and say that they know not what to do, and do nothing; who even postpone the question of freedom to the question of free-trade, and quietly read the prices-current along with the latest advices from Mexico, after dinner, and, it may be, fall asleep over them both. What is the price-current of an honest man and patriot to-day? They hesitate, and they regret, and sometimes they petition; but they do nothing in earnest and with effect. They will wait, well disposed, for others to remedy the evil, that they may no longer have it to regret. At most, they give only a cheap vote, and a feeble countenance and God-speed, to the right, as it goes by them. There are nine hundred and ninety-nine patrons of virtue to one virtuous man. But it is easier to deal with the real possessor of a thing than with the temporary guardian of it.

All voting is a sort of gaming, like checkers or backgammon, with a slight moral tinge to it, a playing with right and wrong, with moral questions; and betting naturally accompanies it. The character of the voters is not staked. I cast my vote, perchance, as I think right; but I am not vitally concerned that that right should prevail. I am willing to leave it to the majority. Its obligation, therefore, never exceeds that of expediency. Even voting *for the right* is *doing* nothing for it. It is only expressing to men feebly your desire that it should prevail. A wise man will not leave the right to the mercy of chance, nor wish it to prevail through the power of the majority. There is but little virtue in the action of masses of men. When the majority shall at length vote for the abolition of slavery, it will be because they are indifferent to slavery, or because there is but little slavery left to be abolished by their vote. *They* will then be the only slaves. Only *his* vote can hasten the abolition of slavery who asserts his own freedom by his vote.

I hear of a convention to be held at Baltimore, or elsewhere, for the selection of a candidate for the Presidency, made up chiefly of editors, and men who are politicians by profession; but I think, what is it to any independent, intelligent, and respectable man what decision they may come to? Shall we not have the advantage of his wisdom and honesty, nevertheless? Can we not count upon some independent votes? Are there not many individuals in the country who do not attend conventions? But no: I find that the respectable man, so called, has immediately drifted from his position, and despairs of his country, when his country has more reason to despair of him. He forthwith adopts one of the candidates thus selected as the only *available* one, thus proving that he is himself *available* for any purposes of the demagogue. His vote is of no more worth than that of any unprincipled foreigner or hireling native, who may have been bought. O for a man who is a *man,* and, as my neighbor says, has a bone in his back which you cannot pass your hand through! Our statistics are at fault: the population has been returned too large. How many *men* are there to a square thousand miles in this country? Hardly one. Does not America offer any inducement for men to settle here? The American has dwindled into an Odd Fellow,—one who may be known by the development of his organ of gregariousness, and a manifest lack of intellect and cheerful self-reliance; whose first and chief concern, on coming into the world, is to see that the Almshouses are in good repair; and, before yet he has lawfully donned the virile garb, to collect a fund for the support of the widows and orphans that may be; who, in short, ventures to live only by the aid of the Mutual Insurance company, which has promised to bury him decently.

It is not a man's duty, as a matter of course, to devote himself to the eradication of any, even the most enormous wrong; he may still properly have other concerns to engage him; but it is his duty, at least, to wash his hands of it, and, if he gives it no thought longer, not to give it practically his support. If I devote myself to other pursuits and contemplations, I must first see, at least, that I do not pursue them sitting upon another

---

5 leaven . . . lump. Compare I Corinthians 5 6 "Know ye not that a little leaven leaveneth the whole lump?" • 68 Odd Fellow, a member of a secret fraternity, the Independent Order of Odd Fellows, organized for mutual aid and social enjoyment, and comprising many lodges in England and America • 73 virile garb. The toga virilis, or manly toga, was assumed by Roman boys at the end of their fourteenth year

man's shoulders. I must get off him first, that he may pursue his contemplations too. See what gross inconsistency is tolerated. I have heard some of my townsmen say, "I should like to have them order me out to help put down an insurrection of the slaves, or to march to Mexico;—see if I would go;" and yet these very men have each, directly by their allegiance, and so indirectly, at least, by their money, furnished a substitute. The soldier is applauded who refuses to serve in an unjust war by those who do not refuse to sustain the unjust government which makes the war; is applauded by those whose own act and authority he disregards and sets at naught; as if the state were penitent to that degree that it hired one to scourge it while it sinned, but not to that degree that it left off sinning for a moment. Thus, under the name of Order and Civil Government, we are all made at last to pay homage to and support our own meanness. After the first blush of sin comes its indifference; and from immoral it becomes, as it were, *un*moral, and not quite unnecessary to that life which we have made.

The broadest and most prevalent error requires the most disinterested virtue to sustain it. The slight reproach to which the virtue of patriotism is commonly liable, the noble are most likely to incur. Those who, while they disapprove of the character and measures of a government, yield to it their allegiance and support are undoubtedly its most conscientious supporters, and so frequently the most serious obstacles to reform. Some are petitioning the state to dissolve the Union, to disregard the requisitions of the President. Why do they not dissolve it themselves,—the union between themselves and the state,—and refuse to pay their quota into its treasury? Do not they stand in the same relation to the state that the state does to the Union? And have not the same reasons prevented the state from resisting the Union which have prevented them from resisting the state?

How can a man be satisfied to entertain an opinion merely, and enjoy *it?* Is there any enjoyment in it, if his opinion is that he is aggrieved? If you are cheated out of a single dollar by your neighbor, you do not rest satisfied with knowing that you are cheated, or with saying that you are cheated, or even with petitioning him to pay you your due; but you take effectual steps at once to obtain the full amount, and see that you are never cheated again. Action from principle, the perception and the performance of right, changes things and relations; it is essentially revolutionary, and does not consist wholly with anything which was. It not only divides states and churches, it divides families; ay, it divides the *individual,* separating the diabolical in him from the divine.

Unjust laws exist: shall we be content to obey them, or shall we endeavor to amend them, and obey them until we have succeeded, or shall we transgress them at once? Men generally, under such a government as this, think that they ought to wait until they have persuaded the majority to alter them. They think that, if they should resist, the remedy would be worse than the evil. But it is the fault of the government itself that the remedy *is* worse than the evil. *It* makes it worse. Why is it not more apt to anticipate and provide for reform? Why does it not cherish its wise minority? Why does it cry and resist before it is hurt? Why does it not encourage its citizens to be on the alert to point out its faults, and *do* better than *it* would have them? Why does it always crucify Christ, and excommunicate Copernicus and Luther, and pronounce Washington and Franklin rebels?

One would think, that a deliberate and practical denial of its authority was the only offense never contemplated by government; else, why has it not assigned its definite, its suitable and proportionate penalty? If a man who has no property refuses but once to earn nine shillings for the state, he is put in prison for a period unlimited by any law that I know, and determined only by the discretion of those who placed him there; but if he should steal ninety times nine shillings from the state, he is soon permitted to go at large again.

If the injustice is part of the necessary friction of the machine of government, let it go, let it go· perchance it will wear smooth,—certainly the machine will wear out. If the injustice has a spring, or a pulley, or a rope, or a crank, exclusively for itself, then perhaps you may consider whether the remedy will not be worse than the evil; but if it is of such a nature that it requires you to be the agent of injustice to another, then, I say, break

---

31 requisitions . . . President, President James K. Polk's call for volunteers for the war against Mexico

the law. Let your life be a counter friction to stop the machine. What I have to do is to see, at any rate, that I do not lend myself to the wrong which I condemn.

As for adopting the ways which the state has provided for remedying the evil, I know not of such ways. They take too much time, and a man's life will be gone. I have other affairs to attend to. I came into this world, not chiefly to make this a good place to live in, but to live in it, be it good or bad. A man has not everything to do, but something; and because he cannot do *everything*, it is not necessary that he should do *something* wrong. It is not my business to be petitioning the Governor or the Legislature any more than it is theirs to petition me; and if they should not hear my petition, what should I do then? But in this case the state has provided no way: its very Constitution is the evil. This may seem to be harsh and stubborn and unconciliatory; but it is to treat with the utmost kindness and consideration the only spirit that can appreciate or deserves it. So is all change for the better, like birth and death, which convulse the body.

I do not hesitate to say, that those who call themselves Abolitionists should at once effectually withdraw their support, both in person and property, from the government of Massachusetts and not wait till they constitute a majority of one, before they suffer the right to prevail through them. I think that it is enough if they have God on their side, without waiting for that other one. Moreover, any man more right than his neighbors constitutes a majority of one already.

I meet this American government, or its representative, the state government, directly, and face to face, once a year—no more—in the person of its tax-gatherer; this is the only mode in which a man situated as I am necessarily meets it; and it then says distinctly, Recognize me; and the simplest, most effectual, and, in the present posture of affairs, the indispensablest mode of treating with it on this head, of expressing your little satisfaction with and love for it, is to deny it then. My civil neighbor, the tax-gatherer, is the very man I have to deal with,—for it is, after all, with men and not with parchment that I quarrel,—and he has voluntarily chosen to be an agent of the government. How shall he ever know well what he is and does as an officer of the government, or as a man, until he is obliged to consider whether he shall treat me, his neighbor, for whom he has respect, as a neighbor and well-disposed man, or as a maniac and disturber of the peace, and see if he can get over this obstruction to his neighborliness without a ruder and more impetuous thought or speech corresponding with his action. I know this well, that if one thousand, if one hundred, if ten men whom I could name,—if ten *honest* men only,—if *one* HONEST man, in this State of Massachusetts, *ceasing to hold slaves,* were actually to withdraw from this copartnership, and be locked up in the county jail therefor, it would be the abolition of slavery in America. For it matters not how small the beginning may seem to be: what is once well done is done forever. But we love better to talk about it: that we say is our mission. Reform keeps many scores of newspapers in its service, but not one man. If my esteemed neighbor, the State's ambassador, who will devote his days to the settlement of the question of human rights in the Council Chamber, instead of being threatened with the prisons of Carolina, were to sit down the prisoner of Massachusetts, that State which is so anxious to foist the sin of slavery upon her sister,—though at present she can discover only an act of inhospitality to be the ground of a quarrel with her,—the Legislature would not wholly waive the subject the following winter.

Under a government which imprisons any unjustly, the true place for a just man is also a prison. The proper place to-day, the only place which Massachusetts has provided for her freer and less desponding spirits, is in her prisons, to be put out and locked out of the State by her own act, as they have already put themselves out by their principles. It is there that the fugitive slave, and the Mexican prisoner on parole, and the Indian come to plead the wrongs of his race should find them; on that separate, but more free and honorable ground, where the State places those who are not *with* her, but *against* her,—the only house in a slave State in which a free man can abide with honor. If any think that their influence would be lost there, and their voices no longer afflict the ear of the State, that they would not be as an enemy within its walls, they do not know by how much truth is stronger than error, nor how much more eloquently

62 State's ambassador, Samuel Hoar of Concord, sent to Charleston, South Carolina, in 1844 to protest against the seizure of Negro seamen from Massachusetts, and inhospitably expelled from Charleston by "a committee of leading citizens"

and effectively he can combat injustice who has experienced a little in his own person. Cast your whole vote, not a strip of paper merely, but your whole influence. A minority is powerless while it conforms to the majority; it is not even a minority then; but it is irresistible when it clogs by its whole weight. If the alternative is to keep all just men in prison, or give up war and slavery, the State will not hesitate which to choose. If a thousand men were not to pay their tax-bills this year, that would not be a violent and bloody measure, as it would be to pay them, and enable the State to commit violence and shed innocent blood. This is, in fact, the definition of a peaceable revolution, if any such is possible. If the tax-gatherer, or any other public officer, asks me, as one has done, "But what shall I do?" my answer is, "If you really wish to do anything, resign your office." When the subject has refused allegiance, and the officer has resigned his office, then the revolution is accomplished. But even suppose blood should flow. Is there not a sort of blood shed when the conscience is wounded? Through this wound a man's real manhood and immortality flow out, and he bleeds to an everlasting death. I see this blood flowing now.

I have contemplated the imprisonment of the offender, rather than the seizure of his goods,—though both will serve the same purpose,—because they who assert the purest right, and consequently are most dangerous to a corrupt State, commonly have not spent much time in accumulating property. To such the State renders comparatively small service, and a slight tax is wont to appear exorbitant, particularly if they are obliged to earn it by special labor with their hands. If there were one who lived wholly without the use of money, the State itself would hesitate to demand it of him. But the rich man—not to make any invidious comparison—is always sold to the institution which makes him rich. Absolutely speaking, the more money, the less virtue; for money comes between a man and his objects, and obtains them for him; and it was certainly no great virtue to obtain it. It puts to rest many questions which he would otherwise be taxed to answer; while the only new question which it puts is the hard but superfluous one, how to spend it. Thus his moral ground is taken from under his feet. The opportunities of living are diminished in proportion as what are called the "means" are increased. The best thing a man can do for his culture when he is rich is to endeavor to carry out those schemes which he entertained when he was poor. Christ answered the Herodians according to their condition. "Show me the tribute-money," said he;—and one took a penny out of his pocket;—if you use the money which has the image of Cæsar on it and which he has made current and valuable, that is, *if you are men of the State,* and gladly enjoy the advantages of Cæsar's government, then pay him back some of his own when he demands it. "Render therefore to Cæsar that which is Cæsar's, and to God those things which are God's,"—leaving them no wiser than before as to which was which; for they did not wish to know.

When I converse with the freest of my neighbors, I perceive that, whatever they may say about the magnitude and seriousness of the question, and their regard for the public tranquillity, the long and the short of the matter is, that they cannot spare the protection of the existing government, and they dread the consequences to their property and families of disobedience to it. For my own part, I should not like to think that I ever rely on the protection of the State. But, if I deny the authority of the State when it presents its tax-bill, it will soon take and waste all my property, and so harass me and my children without end. This is hard. This makes it impossible for a man to live honestly, and at the same time comfortably, in outward respects. It will not be worth the while to accumulate property; that would be sure to go again. You must hire or squat somewhere, and raise but a small crop, and eat that soon. You must live within yourself, and depend upon yourself always tucked up and ready for a start, and not have many affairs. A man may grow rich in Turkey even, if he will be in all respects a good subject of the Turkish government. Confucius said: "If a state is governed by the principles of reason, poverty and misery are subjects of shame; if a state is not governed by the principles of reason, riches and honors are the subjects of shame." No: until I want the protection of Massachusetts to be extended to me in some distant Southern port, where my liberty is endangered, or until I am bent solely on building up an estate at home by peaceful enterprise, I can afford to refuse allegiance to Massachusetts, and her right to my property

---

49 Show . . . God's. See Matthew 22:19-21

and life. It costs me less in every sense to incur the penalty of disobedience to the State than it would to obey. I should feel as if I were worth less in that case.

Some years ago, the State met me in behalf of the Church, and commanded me to pay a certain sum toward the support of a clergyman whose preaching my father attended, but never I myself. "Pay," it said, "or be locked up in the jail." I declined to pay. But, unfortunately, another man saw fit to pay it. I did not see why the schoolmaster should be taxed to support the priest, and not the priest the schoolmaster; for I was not the State's schoolmaster, but I supported myself by voluntary subscription. I did not see why the lyceum should not present its tax-bill, and have the State to back its demand, as well as the Church. However, at the request of the selectmen, I condescended to make some such statement as this in writing:—"Know all men by these presents, that I, Henry Thoreau, do not wish to be regarded as a member of any incorporated society which I have not joined." This I gave to the town clerk; and he has it. The State, having thus learned that I did not wish to be regarded as a member of that church, has never made a like demand on me since; though it said that it must adhere to its original presumption that time. If I had known how to name them, I should then have signed off in detail from all the societies which I never signed on to; but I did not know where to find a complete list.

I have paid no poll-tax for six years. I was put into a jail once on this account, for one night; and, as I stood considering the walls of solid stone, two or three feet thick, the door of wood and iron, a foot thick, and the iron grating which strained the light, I could not help being struck with the foolishness of that institution which treated me as if I were mere flesh and blood and bones, to be locked up. I wondered that it should have concluded at length that this was the best use it could put me to, and had never thought to avail itself of my services in some way. I saw that, if there was a wall of stone between me and my townsmen, there was a still more difficult one to climb or break through before they could get to be as free as I was. I did not for a moment feel confined, and the walls seemed a great waste of stone and mortar. I felt as if I alone of all my townsmen had paid my tax. They plainly did not know how to treat me, but behaved like persons who are underbred. In every threat and in every compliment there was a blunder; for they thought that my chief desire was to stand the other side of that stone wall. I could not but smile to see how industriously they locked the door on my meditations, which followed them out again without let or hindrance, and *they* were really all that was dangerous. As they could not reach me, they had resolved to punish my body; just as boys, if they cannot come at some person against whom they have a spite, will abuse his dog. I saw that the State was half-witted, that it was timid as a lone woman with her silver spoons, and that it did not know its friends from its foes, and I lost all my remaining respect for it, and pitied it.

Thus the State never intentionally confronts a man's sense, intellectual or moral, but only his body, his senses. It is not armed with superior wit or honesty, but with superior physical strength. I was not born to be forced. I will breathe after my own fashion. Let us see who is the strongest. What force has a multitude? They only can force me who obey a higher law than I. They force me to become like themselves. I do not hear of *men* being *forced* to live this way or that by masses of men. What sort of life were that to live? When I meet a government which says to me, "Your money or your life," why should I be in haste to give it my money? It may be in a great strait, and not know what to do. I cannot help that. It must help itself; do as I do. It is not worth the while to snivel about it. I am not responsible for the successful working of the machinery of society. I am not the son of the engineer. I perceive that, when an acorn and a chestnut fall side by side, the one does not remain inert to make way for the other, but both obey their own laws, and spring and grow and flourish as best they can, till one, perchance, overshadows and destroys the other. If a plant cannot live according to its nature, it dies; and so a man.

The night in prison was novel and interesting enough. The prisoners in their shirt-sleeves were enjoying a chat and the evening air in the doorway, when I entered. But the jailer said, "Come, boys, it is time to lock up;" and so they dispersed, and I heard the sound of their steps returning into the hollow apartments. My roommate was introduced to me by the jailer as "a first-rate

---

28 I . . . night. H. S. Canby reckons that Thoreau's famous night in jail occurred on the 23rd or 24th of July, 1846 (Thoreau, p 473)

fellow and a clever man." When the door was locked, he showed me where to hang my hat, and how he managed matters there. The rooms were whitewashed once a month; and this one, at least, was the whitest, most simply furnished, and probably the neatest apartment in the town. He naturally wanted to know where I came from, and what brought me there; and, when I had told him, I asked him in my turn how he came there, presuming him to be an honest man, of course; and, as the world goes, I believe he was. "Why," said he, "they accuse me of burning a barn; but I never did it." As near as I could discover, he had probably gone to bed in a barn when drunk, and smoked his pipe there; and so a barn was burnt. He had the reputation of being a clever man, had been there some three months waiting for his trial to come on, and would have to wait as much longer; but he was quite domesticated and contented, since he got his board for nothing, and thought that he was well treated.

He occupied one window, and I the other; and I saw that if one stayed there long, his principal business would be to look out the window. I had soon read all the tracts that were left there, and examined where former prisoners had broken out, and where a grate had been sawed off, and heard the history of the various occupants of that room; for I found that even here there was a history and a gossip which never circulated beyond the walls of the jail. Probably this is the only house in the town where verses are composed, which are afterward printed in a circular form, but not published. I was shown quite a long list of verses which were composed by some young men who had been detected in an attempt to escape, who avenged themselves by singing them.

I pumped my fellow-prisoner as dry as I could, for fear I should never see him again; but at length he showed me which was my bed, and left me to blow out the lamp.

It was like traveling into a far country, such as I had never expected to behold, to lie there for one night. It seemed to me that I never had heard the town-clock strike before, nor the evening sounds of the village; for we slept with the windows open, which were inside the grating. It was to see my native village in the light of the Middle Ages, and our Concord was turned into a Rhine stream, and visions of knights and castles passed before me. They were the voices of old burghers that I heard in the streets. I was an involuntary spectator and auditor of whatever was done and said in the kitchen of the adjacent village-inn,—a wholly new and rare experience to me. It was a closer view of my native town. I was fairly inside of it. I never had seen its institutions before. This is one of its peculiar institutions; for it is a shire town. I began to comprehend what its inhabitants were about.

In the morning, our breakfasts were put through the hole in the door, in small oblong-square tin pans, made to fit, and holding a pint of chocolate, with brown bread, and an iron spoon. When they called for the vessels again, I was green enough to return what bread I had left; but my comrade seized it, and said that I should lay that up for lunch or dinner. Soon after he was let out to work at haying in a neighboring field, whither he went every day, and would not be back till noon; so he bade me good-day, saying that he doubted if he should see me again.

When I came out of prison,—for some one interfered, and paid that tax,—I did not perceive that great changes had taken place on the common, such as he observed who went in a youth and emerged a tottering and gray-headed man; and yet a change had to my eyes come over the scene,—the town, and State, and country,—greater than any that mere time could effect. I saw yet more distinctly the State in which I lived. I saw to what extent the people among whom I lived could be trusted as good neighbors and friends; that their friendship was for summer weather only; that they did not greatly propose to do right; that they were a distinct race from me by their prejudices and superstitions, as the Chinamen and Malays are; that in their sacrifices to humanity they ran no risks, not even to their property; that after all they were not so noble but they treated the thief as he had treated them, and hoped, by a certain outward observance and a few prayers, and by walking in a particular straight though useless path from time to time, to save their souls. This may be to judge my neighbors harshly; for I believe that many of them are not aware that they have such an institution as the jail in their village.

---

1 **clever**, honest, kind, obliging; see Dictionary of American English

• 65 **some . . . tax.** According to one report his Aunt Maria, "putting a shawl over her head, went to the jailer's door, and paid the tax and fees to Ellen Staples, her father the jailer being absent" (Canby, Thoreau, p. 234)

It was formerly the custom in our village, when a poor debtor came out of jail, for his acquaintances to salute him, looking through their fingers, which were crossed to represent the grating of a jail window, "How do ye do?" My neighbors did not thus salute me, but first looked at me, and then at one another, as if I had returned from a long journey. I was put into jail as I was going to the shoemaker's to get a shoe which was mended. When I was let out the next morning, I proceeded to finish my errand, and, having put on my mended shoe, joined a huckleberry party, who were impatient to put themselves under my conduct; and in half an hour,—for the horse was soon tackled,—was in the midst of a huckleberry field, on one of our highest hills, two miles off, and then the State was nowhere to be seen.

This is the whole history of "My Prisons."

I have never declined paying the highway tax, because I am as desirous of being a good neighbor as I am of being a bad subject; and as for supporting schools, I am doing my part to educate my fellow-countrymen now. It is for no particular item in the tax-bill that I refuse to pay it. I simply wish to refuse allegiance to the State, to withdraw and stand aloof from it effectually. I do not care to trace the course of my dollar, if I could, till it buys a man or a musket to shoot with,—the dollar is innocent,—but I am concerned to trace the effects of my allegiance. In fact, I quietly declare war with the State, after my fashion, though I will still make what use and get what advantage of her I can, as is usual in such cases.

If others pay the tax which is demanded of me, from a sympathy with the State, they do but what they have already done in their own case, or rather they abet injustice to a greater extent than the State requires. If they pay the tax from a mistaken interest in the individual taxed, to save his property, or prevent his going to jail, it is because they have not considered wisely how far they let their private feelings interfere with the public good.

This, then, is my position at present. But one cannot be too much on his guard in such a case, lest his action be biased by obstinacy or an undue regard for the opinions of men. Let him see that he does only what belongs to himself and to the hour.

I think sometimes, Why, this people mean well, they are only ignorant; they would do better if they knew how: why give your neighbors this pain to treat you as they are not inclined to? But I think again, This is no reason why I should do as they do, or permit others to suffer much greater pain of a different kind. Again, I sometimes say to myself, When many millions of men, without heat, without ill will, without personal feeling of any kind, demand of you a few shillings only, without the possibility, such is their constitution, of retracting or altering their present demand, and without the possibility, on your side, of appeal to any other millions, why expose yourself to this overwhelming brute force? You do not resist cold and hunger, the winds and the waves, thus obstinately; you quietly submit to a thousand similar necessities. You do not put your head into the fire. But just in proportion as I regard this as not wholly a brute force, but partly a human force, and consider that I have relations to those millions as to so many millions of men, and not of mere brute or inanimate things, I see that appeal is possible, first and instantaneously, from them to the Maker of them, and, secondly, from them to themselves. But if I put my head deliberately into the fire, there is no appeal to fire or to the Maker of fire, and I have only myself to blame. If I could convince myself that I have any right to be satisfied with men as they are, and to treat them accordingly, and not according, in some respects, to my requisitions and expectations of what they and I ought to be, then, like a good Mussulman and fatalist, I should endeavor to be satisfied with things as they are, and say it is the will of God. And, above all, there is this difference between resisting this and a purely brute or natural force, that I can resist this with some effect; but I cannot expect, like Orpheus, to change the nature of the rocks and trees and beasts.

I do not wish to quarrel with any man or nation. I do not wish to split hairs, to make fine distinctions, or set myself up as better than my neighbors. I seek rather, I may say, even an excuse for conforming to the laws of the land. I am but too ready to conform to them. Indeed, I have reason to suspect myself on this head; and each year, as the tax-gatherer comes round, I find myself

---

17 My Prisons. Silvio Pellico (1789-1854), Italian patriot, told the story of his imprisonment by the Austrians in Le mie prigioni (1832), to which Thoreau seems to allude

disposed to review the acts and position of the general and State governments, and the spirit of the people, to discover a pretext for conformity.

> "We must affect our country as our parents,
> And if at any time we alienate
> Our love or industry from doing it honor,
> We must respect effects and teach the soul
> Matter of conscience and religion,
> And not desire of rule or benefit."

I believe that the State will soon be able to take all my work of this sort out of my hands, and then I shall be no better a patriot than my fellow-countrymen. Seen from a lower point of view, the Constitution, with all its faults, is very good; the law and the courts are very respectable; even this State and this American government are, in many respects, very admirable, and rare things, to be thankful for, such as a great many have described them; but seen from a point of view a little higher, they are what I have described them; seen from a higher still, and the highest, who shall say what they are, or that they are worth looking at or thinking of at all?

However, the government does not concern me much, and I shall bestow the fewest possible thoughts on it. It is not many moments that I live under a government, even in this world. If a man is thought-free, fancy-free, imagination-free, that which *is not* never for a long time appearing *to be* to him, unwise rulers or reformers cannot fatally interrupt him.

I know that most men think differently from myself; but those whose lives are by profession devoted to the study of these or kindred subjects content me as little as any. Statesmen and legislators, standing so completely within the institution, never distinctly and nakedly behold it. They speak of moving society, but have no resting-place without it. They may be men of a certain experience and discrimination, and have no doubt invented ingenious and even useful systems, for which we sincerely thank them; but all their wit and usefulness lie within certain not very wide limits. They are wont to forget that the world is not governed by policy and expediency. Webster never goes behind government, and so cannot speak with authority about it. His words are wisdom to those legislators who contemplate no essential reform in the existing government; but for thinkers, and those who legislate for all time, he never once glances at the subject. I know of those whose serene and wise speculations on this theme would soon reveal the limits of his mind's range and hospitality. Yet, compared with the cheap professions of most reformers, and the still cheaper wisdom and eloquence of politicians in general, his are almost the only sensible and valuable words, and we thank Heaven for him. Comparatively, he is always strong, original, and, above all, practical. Still, his quality is not wisdom, but prudence. The lawyer's truth is not Truth, but consistency or a consistent expediency. Truth is always in harmony with herself, and is not concerned chiefly to reveal the justice that may consist with wrong-doing. He well deserves to be called, as he has been called, the Defender of the Constitution. There are really no blows to be given by him but defensive ones. He is not a leader, but a follower. His leaders are the men of '87. "I have never made an effort," he says, "and never propose to make an effort; I have never countenanced an effort, and never mean to countenance an effort, to disturb the arrangement as originally made, by which the various States came into the Union." Still thinking of the sanction which the Constitution gives to slavery, he says, "Because it was a part of the original compact,—let it stand." Notwithstanding his special acuteness and ability, he is unable to take a fact out of its merely political relations, and behold it as it lies absolutely to be disposed of by the intellect,—what, for instance, it behooves a man to do here in America to-day with regard to slavery,—but ventures, or is driven to make some such desperate answer as the following, while professing to speak absolutely, and as a private man,—from which what new and singular code of social duties might be inferred? "The manner," says he, "in which the governments of those States where slavery exists are to regulate it is for their own consideration, under their responsibility to their constituents, to the general laws of propriety, humanity, and justice, and to God. Associations formed elsewhere, springing from a feeling of humanity, or other cause, have nothing whatever to do with it. They have never received any encouragement from me, and they never will."

They who know of no purer sources of truth, who have

---

62 men of '87, the framers of the Constitution, in 1787

traced up its stream no higher, stand, and wisely stand, by the Bible and the Constitution, and drink at it there with reverence and humility; but they who behold where it comes trickling into this lake or that pool, gird up their loins once more, and continue their pilgrimage toward its fountain-head.

No man with a genius for legislation has appeared in America. They are rare in the history of the world. There are orators, politicians, and eloquent men, by the thousand, but the speaker has not yet opened his mouth to speak who is capable of settling the much-vexed questions of the day. We love eloquence for its own sake, and not for any truth which it may utter, or any heroism it may inspire. Our legislators have not yet learned the comparative value of free-trade and of freedom, of union, and of rectitude, to a nation. They have no genius or talent for comparatively humble questions of taxation and finance, commerce and manufactures and agriculture. If we were left solely to the wordy wit of legislators in Congress for our guidance, uncorrected by the seasonable experience and the effectual complaints of the people, America would not long retain her rank among the nations. For eighteen hundred years, though perchance I have no right to say it, the New Testament has been written; yet where is the legislator who has wisdom and practical talent enough to avail himself of the light which it sheds on the science of legislation?

The authority of government, even such as I am willing to submit to,—for I will cheerfully obey those who know and can do better than I, and in many things even those who neither know nor can do so well,—is still an impure one: to be strictly just, it must have the sanction and consent of the governed. It can have no pure right over my person and property but what I concede to it. The progress from an absolute to a limited monarchy, from a limited monarchy to a democracy, is a progress toward a true respect for the individual. Even the Chinese philosopher was wise enough to regard the individual as the basis of the empire. Is a democracy, such as we know it, the last improvement possible in government? Is it not possible to take a step further towards recognizing and organizing the rights of man? There will never be a really free and enlightened State until the State comes to recognize the individual as a higher and independent power, from which all its own power and authority are derived, and treats him accordingly. I please myself with imagining a State at last which can afford to be just to all men, and to treat the individual with respect as a neighbor; which even would not think it inconsistent with its own repose if a few were to live aloof from it, not meddling with it, nor embraced by it, who fulfilled all the duties of neighbors and fellowmen. A State which bore this kind of fruit, and suffered it to drop off as fast as it ripened, would prepare the way for a still more perfect and glorious State, which also I have imagined, but not yet anywhere seen.

1849

From • Walden

Where I Lived, and What I Lived For

Walden, the record of Thoreau's stay at Walden Pond from July 4, 1845, to September 6, 1847, was first published in 1854. It is Thoreau's best book and has come to be universally regarded as a great American classic. The book consists of eighteen chapters, as follows: "Economy," "Where I Lived and What I Lived For," "Reading," "Sounds," "Solitude," "Visitors," "The Bean Field," "The Village," "The Ponds," "Baker Farm," "Higher Laws," "Brute Neighbors," "House-Warming," "Former Inhabitants and Winter Visitors," "Winter Animals," "The Pond in Winter," "Spring," "Conclusion." Although "Thoreau's strength," as H. S. Canby has observed, "was in the sentence and paragraph, not in the ordered whole," F. O. Matthiessen (**American Renaissance**, pp. 168-170) has ingeniously demonstrated "the firmness with which Thoreau binds his successive links" in **Walden**.

"My purpose in going to Walden Pond," Thoreau wrote in the opening chapter, "was not to live cheaply nor to live dearly there, but to transact some private business

with the fewest obstacles." The "private business" consisted chiefly of the study of nature and in reading and writing. "My residence," he added, "was more favourable, not only to thought, but to serious reading, than a university."

At a certain season of our life we are accustomed to consider every spot as the possible site of a house. I have thus surveyed the country on every side within a dozen miles of where I live. In imagination I have bought all the farms in succession, for all were to be bought, and I knew their price. I walked over each farmer's premises, tasted his wild apples, discoursed on husbandry with him, took his farm at his price, at any price, mortgaging it to him in my mind; even put a higher price on it,—took everything but a deed of it,—took his word for his deed, for I dearly love to talk,—cultivated it, and him too to some extent, I trust, and withdrew when I had enjoyed it long enough, leaving him to carry it on. This experience entitled me to be regarded as a sort of real-estate broker by my friends. Wherever I sat, there I might live, and the landscape radiated from me accordingly. What is a house but a *sedes,* a seat?—better if a country seat. I discovered many a site for a house not likely to be soon improved, which some might have thought too far from the village, but to my eyes the village was too far from it. Well, there I might live, I said, and there I did live, for an hour, a summer and a winter life; saw how I could let the years run off, buffet the winter through, and see the spring come in. The future inhabitants of this region, wherever they may place their houses, may be sure that they have been anticipated. An afternoon sufficed to lay out the land into orchard, wood-lot, and pasture, and to decide what fine oaks or pines should be left to stand before the door, and whence each blasted tree could be seen to the best advantage; and then I let it lie, fallow perchance, for a man is rich in proportion to the number of things which he can afford to let alone.

My imagination carried me so far that I even had the refusal of several farms,—the refusal was all I wanted,—but I never got my fingers burned by actual possession. The nearest that I came to actual possession was when I bought the Hollowell place, and had begun to sort my seeds, and collected materials with which to make a wheelbarrow to carry it on or off with; but before the owner gave me a deed of it, his wife—every man has such a wife—changed her mind and wished to keep it, and he offered me ten dollars to release him. Now, to speak the truth, I had but ten cents in the world, and it surpassed my arithmetic to tell, if I was that man who had ten cents, or who had a farm, or ten dollars, or all together. However, I let him keep the ten dollars and the farm too, for I had carried it far enough; or rather, to be generous, I sold him the farm for just what I gave for it, and, as he was not a rich man, made him a present of ten dollars, and still had my ten cents, and seeds, and materials for a wheelbarrow left. I found thus that I had been a rich man without any damage to my poverty. But I retained the landscape, and I have since annually carried off what it yielded without a wheelbarrow. With respect to landscapes,—

> "I am monarch of all I *survey,*
> My right there is none to dispute."

I have frequently seen a poet withdraw, having enjoyed the most valuable part of a farm, while the crusty farmer supposed that he had got a few wild apples only. Why, the owner does not know it for many years when a poet has put his farm in rime, the most admirable kind of invisible fence, has fairly impounded it, milked it, skimmed it, and got all the cream, and left the farmer only the skimmed milk.

The real attractions of the Hollowell farm, to me, were. its complete retirement, being about two miles from the village, half a mile from the nearest neighbor, and separated from the highway by a broad field; its bounding on the river, which the owner said protected it by its fogs from frosts in the spring, though that was nothing to me, the gray color and ruinous state of the house and barn, and the dilapidated fences, which put such an

---

57 **I . . . dispute,** from William Cowper's "Verses supposed to be written by Alexander Selkirk" (1782) By italicizing "survey," Thoreau makes a punning reference to his occupation as surveyor • 63 **a poet . . . rime.** The thought is Emersonian. Compare, for example, in Emerson's "The Apology" (1846):

> One harvest from thy field
> Homeward brought the oxen strong;
> A second crop thine acres yield,
> Which I gather in a song.

interval between me and the last occupant; the hollow and lichen-covered apple trees, gnawed by rabbits, showing what kind of neighbors I should have; but above all, the recollection I had of it from my earliest voyages up the river, when the house was concealed behind a dense grove of red maples, through which I heard the house-dog bark. I was in haste to buy it, before the proprietor finished getting out some rocks, cutting down the hollow apple trees, and grubbing up some young birches which had sprung up in the pasture, or, in short, had made any more of his improvements. To enjoy these advantages I was ready to carry it on; like Atlas, to take the world on my shoulders,—I never heard what compensation he received for that,—and do all those things which had no other motive or excuse but that I might pay for it and be unmolested in my possession of it; for I knew all the while that it would yield the most abundant crop of the kind I wanted, if I could only afford to let it alone. But it turned out as I have said.

All that I could say, then, with respect to farming on a large scale—I have always cultivated a garden—was, that I had had my seeds ready. Many think that seeds improve with age. I have no doubt that time discriminates between the good and the bad; and when at last I shall plant, I shall be less likely to be disappointed. But I would say to my fellows, once for all, As long as possible live free and uncommitted. It makes but little difference whether you are committed to a farm or the county jail.

Old Cato, whose "De Re Rusticâ" is my "Cultivator," says,—and the only translation I have seen makes sheer nonsense of the passage,—"When you think of getting a farm turn it thus in your mind, not to buy greedily; nor spare your pains to look at it, and do not think it enough to go round it once. The oftener you go there the more it will please you, if it is good." I think I shall not buy greedily, but go round and round it as long as I live, and be buried in it first, that it may please me the more at last.

The present was my next experiment of this kind, which I purpose to describe more at length, for convenience putting the experience of two years into one. As I have said, I do not propose to write an ode to dejection, but to brag as lustily as chanticleer in the morning, standing on his roost, if only to wake my neighbors up.

When first I took up my abode in the woods, that is, began to spend my nights as well as days there, which, by accident, was on Independence Day, or the Fourth of July, 1845, my house was not finished for winter, but was merely a defence against the rain, without plastering or chimney, the walls being of rough, weather-stained boards, with wide chinks, which made it cool at night. The upright white hewn studs and freshly planed door and window casings gave it a clean and airy look, especially in the morning, when its timbers were saturated with dew, so that I fancied that by noon some sweet gum would exude from them. To my imagination it retained throughout the day more or less of this auroral character, reminding me of a certain house on a mountain which I had visited a year before. This was an airy and unplastered cabin, fit to entertain a travelling god, and where a goddess might trail her garments. The winds which passed over my dwelling were such as sweep over the ridges of mountains, bearing the broken strains, or celestial parts only, of terrestrial music. The morning wind forever blows, the poem of creation is uninterrupted; but few are the ears that hear it. Olympus is but the outside of the earth everywhere.

The only house I had been the owner of before, if I except a boat, was a tent, which I used occasionally when making excursions in the summer, and this is still rolled up in my garret; but the boat, after passing from hand to hand, has gone down the stream of time. With this more substantial shelter about me, I had made some progress toward settling in the world. This frame, so slightly clad, was a sort of crystallization around me, and reacted on the builder. It was suggestive somewhat as a picture in outlines. I did not need to go outdoors to take the air, for the atmosphere within had lost none of its freshness. It was not so much within-doors as behind a door where I sat, even in the rainiest weather. The Harivansa says, "An abode without birds is like a meat

---

30 Old Cato, Marcus Porcius Cato (234-149 B.C.), Roman patriot • 30 De Re Rusticâ, concerning country life • 30 Cultivator, a farm implement • 43 ode to dejection. Coleridge had written "Dejection: an Ode" (1802), and Shelley had composed "Stanzas Written in Dejection near Naples" (1824) • 72 the boat. The boat which was used in 1839 by Thoreau and his brother John on the famous voyage described in A Week on the Concord and Merrimack Rivers was purchased by Hawthorne in 1842 for seven dollars (see The American Notebooks by Nathaniel Hawthorne • 82 Harivansa, a Sanskrit epic poem of the fifth century A.D.

without seasoning." Such was not my abode, for I found myself suddenly neighbor to the birds; not by having imprisoned one, but having caged myself near them. I was not only nearer to some of those which commonly frequent the garden and the orchard, but to those wilder and more thrilling songsters of the forest which never, or rarely, serenade a villager,—the wood thrush, the veery, the scarlet tanager, the field sparrow, the whip-poor-will, and many others.

I was seated by the shore of a small pond, about a mile and a half south of the village of Concord and somewhat higher than it, in the midst of an extensive wood between that town and Lincoln, and about two miles south of that our only field known to fame, Concord Battle Ground; but I was so low in the woods that the opposite shore, half a mile off, like the rest, covered with wood, was my most distant horizon. For the first week, whenever I looked out on the pond it impressed me like a tarn high up on the side of a mountain, its bottom far above the surface of other lakes, and, as the sun arose, I saw it throwing off its nightly clothing of mist, and here and there, by degrees, its soft ripples or its smooth reflecting surface was revealed, while the mists, like ghosts, were stealthily withdrawing in every direction into the woods, as at the breaking up of some nocturnal conventicle. The very dew seemed to hang upon the trees later into the day than usual, as on the sides of mountains.

This small lake was of most value as a neighbor in the intervals of a gentle rain-storm in August, when, both air and water being perfectly still, but the sky overcast, mid-afternoon had all the serenity of evening, and the wood thrush sang around, and was heard from shore to shore. A lake like this is never smoother than at such a time; and the clear portion of the air above it being shallow and darkened by clouds, the water, full of light and reflections, becomes a lower heaven itself so much the more important. From a hilltop near by, where the wood had been recently cut off, there was a pleasing vista southward across the pond, through a wide indentation in the hills which form the shore there, where their opposite sides sloping toward each other suggested a stream flowing out in that direction through a wooded valley, but stream there was none. That way I looked between and over the near green hills to some distant and higher ones in the horizon, tinged with blue. Indeed, by standing on tiptoe I could catch a glimpse of some of the peaks of the still bluer and more distant mountain ranges in the northwest, those true-blue coins from heaven's own mint, and also of some portion of the village. But in other directions, even from this point, I could not see over or beyond the woods which surrounded me. It is well to have some water in your neighborhood, to give buoyancy to and float the earth. One value even of the smallest well is, that when you look into it you see that earth is not continent but insular. This is as important as that it keeps butter cool. When I looked across the pond from this peak toward the Sudbury meadows, which in time of flood I distinguished elevated perhaps by a mirage in their seething valley, like a coin in a basin, all the earth beyond the pond appeared like a thin crust insulated and floated even by this small sheet of intervening water, and I was reminded that this on which I dwelt was but *dry land.*

Though the view from my door was still more contracted, I did not feel crowded or confined in the least. There was pasture enough for my imagination. The low shrub oak plateau to which the opposite shore arose stretched away toward the prairies of the West and the steppes of Tartary, affording ample room for all the roving families of men. "There are none happy in the world but beings who enjoy freely a vast horizon,"—said Damodara, when his herds required new and larger pastures.

Both place and time were changed, and I dwelt nearer to those parts of the universe and to those eras in history which had most attracted me. Where I lived was as far off as many a region viewed nightly by astronomers. We are wont to imagine rare and delectable places in some remote and more celestial corner of the system, behind the constellation of Cassiopeia's Chair, far from noise and disturbance. I discovered that my house actually had its site in such a withdrawn, but forever new and unprofaned, part of the universe. If it were worth the while to settle in those parts near to the Pleiades or the Hyades, to Aldebaran or Altair, then I was really there, or at an equal remoteness from the life which I had left behind, dwindled and twinkling with as fine a ray to my nearest neighbor, and to be seen only in moonless nights by him. Such was that part of creation where I had squatted;—

"There was a shepherd that did live,
And held his thoughts as high

69 **Tartary,** an indefinite region including Asia and Europe from the Sea of Japan to the Dnieper River • 71 **Damodara,** the Hindu divinity Krishna • 83 **Pleiades . . . Hyades,** constellations • 84 **Aldebaran . . . Altair,** bright stars

As were the mounts whereon his flocks
Did hourly feed him by."

What should we think of the shepherd's life if his flocks always wandered to higher pastures than his thoughts?

Every morning was a cheerful invitation to make my life of equal simplicity, and I may say innocence, with Nature herself. I have been as sincere a worshipper of Aurora as the Greeks. I got up early and bathed in the pond; that was a religious exercise, and one of the best things which I did. They say that characters were engraven on the bathing tub of King Tching-thang to this effect: "Renew thyself completely each day; do it again, and again, and forever again." I can understand that. Morning brings back the heroic ages. I was as much affected by the faint hum of a mosquito making its invisible and unimaginable tour through my apartment at earliest dawn, when I was sitting with door and windows open, as I could be by any trumpet that ever sang of fame. It was Homer's requiem; itself an Iliad and Odyssey in the air, singing its own wrath and wanderings. There was something cosmical about it; a standing advertisement, till forbidden, of the everlasting vigor and fertility of the world. The morning, which is the most memorable season of the day, is the awakening hour. Then there is least somnolence in us; and for an hour, at least, some part of us awakes which slumbers all the rest of the day and night. Little is to be expected of that day, if it can be called a day, to which we are not awakened by our Genius, but by the mechanical nudgings of some servitor, are not awakened by our own newly acquired force and aspirations from within, accompanied by the undulations of celestial music, instead of factory bells, and a fragrance filling the air—to a higher life than we fell asleep from; and thus the darkness bear its fruit, and prove itself to be good, no less than the light. That man who does not believe that each day contains an earlier, more sacred, and auroral hour than he has yet profaned, has despaired of life, and is pursuing a descending and darkening way. After a partial cessation of his sensuous life, the soul of man, or its organs rather, are reinvigorated each day, and his Genius tries again what noble life it can make. All memorable events, I should say, transpire in morning time and in a morning atmosphere. The Vedas say, "All intelligences awake with the morning." Poetry and art, and the fairest and most memorable of the actions of men, date from such an hour. All poets and heroes, like Memnon, are the children of Aurora, and emit their music at sunrise. To him whose elastic and vigorous thought keeps pace with the sun, the day is a perpetual morning. It matters not what the clocks say or the attitudes and labors of men. Morning is when I am awake and there is a dawn in me. Moral reform is the effort to throw off sleep. Why is it that men give so poor an account of their day if they have not been slumbering? They are not such poor calculators. If they had not been overcome with drowsiness, they would have performed something. The millions are awake enough for physical labor; but only one in a million is awake enough for effective intellectual exertion, only one in a hundred millions to a poetic or divine life. To be awake is to be alive. I have never yet met a man who was quite awake. How could I have looked him in the face?

We must learn to reawaken and keep ourselves awake, not by mechanical aids, but by an infinite expectation of the dawn, which does not forsake us in our soundest sleep. I know of no more encouraging fact than the unquestionable ability of man to elevate his life by a conscious endeavor. It is something to be able to paint a particular picture, or to carve a statue, and so to make a few objects beautiful, but it is far more glorious to carve and paint the very atmosphere and medium through which we look, which morally we can do. To affect the quality of the day, that is the highest of arts. Every man is tasked to make his life, even in its details, worthy of the contemplation of his most elevated and critical hour. If we refused, or rather used up, such paltry information as we get, the oracles would distinctly inform us how this might be done.

I went to the woods because I wished to live deliber-

20 **singing . . . wanderings,** the wrath of Achilles in the Iliad, the wanderings of Odysseus in the Odyssey • 44 **Vedas,** the sacred literature of the Hindus • 47 **Memnon.** His statue on the banks of the Nile made a harplike sound at sunrise • 78 **I . . . because.** This paragraph should be compared with the following equally notable passage in the last chapter of *Walden*: "I left the woods for as good a reason as I went there. Perhaps it seemed to me that I had several more lives to live, and could not spare any more time for that one. It is remarkable how easily and insensibly we fall into a particular route, and make a beaten track for ourselves. I had not lived there a week before my feet wore a path from my door to the pondside; and though it is five or six years since I trod it, it is still quite distinct. It is true, I fear, that others may have fallen into it, and so helped to keep it open. The surface of the earth is soft and impressible by the feet of men; and so with the paths which the mind travels. How worn and dusty, then, must be the highways of the world, how deep the ruts of tradition and conformity! I did not wish to take a cabin passage, but rather to go before the mast and on the deck of the world, for there I could best see the moonlight amid the mountains. I do not wish to go below now"

ately, to front only the essential facts of life, and see if I could not learn what it had to teach, and not, when I came to die, discover that I had not lived. I did not wish to live what was not life, living is so dear; nor did I wish to practise resignation, unless it was quite necessary. I wanted to live deep and suck out all the marrow of life, to live so sturdily and Spartan-like as to put to rout all that was not life, to cut a broad swath and shave close, to drive life into a corner, and reduce it to its lowest terms, and, if it proved to be mean, why then to get the whole and genuine meanness of it, and publish its meanness to the world; or if it were sublime, to know it by experience, and be able to give a true account of it in my next excursion. For most men, it appears to me, are in a strange uncertainty about it, whether it is of the devil or of God, and have *somewhat hastily* concluded that it is the chief end of man here to "glorify God and enjoy him forever."

Still we live meanly, like ants; though the fable tells us that we were long ago changed into men; like pygmies we fight with cranes; it is error upon error, and clout upon clout, and our best virtue has for its occasion a superfluous and evitable wretchedness. Our life is frittered away by detail. An honest man has hardly need to count more than his ten fingers, or in extreme cases he may add his ten toes, and lump the rest. Simplicity, simplicity, simplicity! I say, let your affairs be as two or three, and not a hundred or a thousand, instead of a million count half a dozen, and keep your accounts on your thumb-nail. In the midst of this chopping sea of civilized life, such are the clouds and storms and quicksands and thousand-and-one items to be allowed for, that a man has to live, if he would not founder and go to the bottom and not make his port at all, by dead reckoning, and he must be a great calculator indeed who succeeds. Simplify, simplify. Instead of three meals a day, if it be necessary eat but one; instead of a hundred dishes, five; and reduce other things in proportion. Our life is like a German Confederacy, made up of petty states, with its boundary forever fluctuating, so that even a German cannot tell you how it is bounded at any moment. The nation itself, with all its so-called internal improvements, which, by the way, are all external and superficial, is just such an unwieldy and overgrown establishment, cluttered with furniture and tripped up by its own traps, ruined by luxury and heedless expense, by want of calculation and a worthy aim, as the million households in the land; and the only cure for it, as for them, is in a rigid economy, a stern and more than Spartan simplicity of life and elevation of purpose. It lives too fast. Men think that it is essential that the *Nation* have commerce, and export ice, and talk through a telegraph, and ride thirty miles an hour, without a doubt, whether *they* do or not, but whether we should live like baboons or like men, is a little uncertain. If we do not get out sleepers, and forge rails, and devote days and nights to the work, but go to tinkering upon our *lives* to improve *them,* who will build railroads? And if railroads are not built, how shall we get to Heaven in season? But if we stay at home and mind our business, who will want railroads? We do not ride on the railroad; it rides upon us. Did you ever think what those sleepers are that underlie the railroad? Each one is a man, an Irishman, or a Yankee man. The rails are laid on them, and they are covered with sand, and the cars run smoothly over them. They are sound sleepers, I assure you. And every few years a new lot is laid down and run over; so that, if some have the pleasure of riding on a rail, others have the misfortune to be ridden upon. And when they run over a man that is walking in his sleep, a supernumerary sleeper in the wrong position, and wake him up, they suddenly stop the cars, and make a hue and cry about it, as if this were an exception. I am glad to know that it takes a gang of men for every five miles to keep the sleepers down and level in their beds as it is, for this is a sign that they may sometime get up again.

---

16 **chief . . . forever,** an allusion to the Westminster Catechism, formulated by the famous Westminster Assembly in 1643 • 33 **dead reckoning,** the method of finding the position of a ship without the aid of celestial observations, from a record of the courses sailed and the distance made on each course • 37 **German Confederacy.** The German Confederation, set up by the Congress of Vienna in 1815, was loosely formed and inefficient. Modern, unified Germany dates from 1871 • 54 **sleepers,** railroad ties • 57 **railroads . . . Heaven.** Thoreau perhaps remembered Hawthorne's satirical sketch, "The Celestial Railroad" (1843) • 59 **We . . . us.** Emerson had expressed the same thought in the "Ode to Channing" (1846) "Things are in the saddle, And ride mankind." Despite Thoreau's disapproval of the railroad in theory, trains and trainmen had a romantic appeal for him In the chapter on "Sounds" in **Walden,** he wrote· "On this morning of the great Snow, . . . I hear the muffled tone of their engine bell from out the fog bank of their chilled breath, which announces that the cars are coming, without long delay, notwithstanding the veto of a New England northeast snow-storm, and I behold the plowmen covered with snow and rime, their heads peering above the mould-board . . I am refreshed and expanded when the freight train rattles past me, and I smell the stores which go dispensing their odors all the way from Long Wharf to Lake Champlain . . ."

Why should we live with such hurry and waste of life? We are determined to be starved before we are hungry. Men say that a stitch in time saves nine, and so they take a thousand stitches to-day to save nine to-morrow. As for *work,* we haven't any of any consequence. We have the Saint Vitus' dance, and cannot possibly keep our heads still. If I should only give a few pulls at the parish bell-rope, as for a fire, that is, without setting the bell, there is hardly a man on his farm in the outskirts of Concord, notwithstanding that press of engagements which was his excuse so many times this morning, nor a boy, nor a woman, I might almost say, but would forsake all and follow that sound, not mainly to save property from the flames, but, if we will confess the truth, much more to see it burn, since burn it must, and we, be it known, did not set it on fire,—or to see it put out, and have a hand in it, if that is done as handsomely; yes, even if it were the parish church itself. Hardly a man takes a half-hour's nap after dinner, but when he wakes he holds up his head and asks, "What's the news?" as if the rest of mankind had stood his sentinels. Some give directions to be waked every half-hour, doubtless for no other purpose; and then, to pay for it, they tell what they have dreamed. After a night's sleep the news is as indispensable as the breakfast. "Pray tell me anything new that has happened to a man anywhere on this globe,"—and he reads it over his coffee and rolls, that a man has had his eyes gouged out this morning on the Wachito River; never dreaming the while that he lives in the dark unfathomed mammoth cave of this world, and has but the rudiment of an eye himself.

For my part, I could easily do without the post-office. I think that there are very few important communications made through it. To speak critically, I never received more than one or two letters in my life—I wrote this some years ago—that were worth the postage. The penny-post is, commonly, an institution through which you seriously offer a man that penny for his thoughts which is so often safely offered in jest. And I am sure that I never read any memorable news in a newspaper. If we read of one man robbed, or murdered, or killed by accident, or one house burned, or one vessel wrecked, or one steamboat blown up, or one cow run over on the Western Railroad, or one mad dog killed, or one lot of grasshoppers in the winter,—we never need read of another. One is enough. If you are acquainted with the principle, what do you care for a myriad instances and applications? To a philosopher all *news,* as it is called, is gossip, and they who edit and read it are old women over their tea. Yet not a few are greedy after this gossip. There was such a rush, as I hear, the other day at one of the offices to learn the foreign news by the last arrival, that several large squares of plate glass belonging to the establishment were broken by the pressure,—news which I seriously think a ready wit might write a twelve month, or twelve years, beforehand with sufficient accuracy. As for Spain, for instance, if you know how to throw in Don Carlos and the Infanta, and Don Pedro and Seville and Granada, from time to time in the right proportions,—they may have changed the names a little since I saw the papers,—and serve up a bull-fight when other entertainments fail, it will be true to the letter, and give us as good an idea of the exact state or ruin of things in Spain as the most succinct and lucid reports under this head in the newspapers: and as for England, almost the last significant scrap of news from that quarter was the revolution of 1649; and if you have learned the history of her crops for an average year, you never need attend to that thing again, unless your speculations are of a merely pecuniary character. If one may judge who rarely looks into the newspapers, nothing new does ever happen in foreign parts, a French revolution not excepted.

What news! how much more important to know what that is which was never old! "Kieou-he-yu (great dignitary of the state of Wei) sent a man to Khoung-tseu to know his news. Khoung-tseu caused the messenger to be seated near him, and questioned him in these terms: What is your master doing? The messenger answered with respect: My master desires to diminish the number of his faults, but he cannot come to the end of them. The messenger being gone, the philosopher remarked: What

28 Wachito River, Ouachita River in Arkansas, at that time a "frontier" region. A. B. Longstreet's "The Fight" in Georgia Scenes (1835) gives some notion of the brutality of the frontier in the old Southwest • 29 dark . . . cave, a double allusion to the Mammoth Cave of Kentucky and "The dark unfathomed caves" of Gray's elegy • 66 revolution of 1649, the English Civil War, which resulted in the victory of Cromwell and the execution of Charles I in 1649. The statement seems to show marked Puritan and democratic (or anti-royalist) sympathies • 72 French revolution. Since the great revolution of 1789, there had been frequent changes in the French government, the latest having been the revolution of 1848 and the coup d'état of 1851 • 74 Kieou-he-yu . . . messenger, from the Analects of Confucius

a worthy messenger! What a worthy messenger!" The preacher, instead of vexing the ears of drowsy farmers on their day of rest at the end of the week,—for Sunday is the fit conclusion of an ill-spent week, and not the fresh and brave beginning of a new one,—with this one other draggle-tail of a sermon, should shout with thundering voice, "Pause! Avast! Why so seeming fast, but deadly slow?"

Shams and delusions are esteemed for soundest truths, while reality is fabulous. If men would steadily observe realities only, and not allow themselves to be deluded, life, to compare it with such things as we know, would be like a fairy tale and the Arabian Nights' Entertainments. If we respected only what is inevitable and has a right to be, music and poetry would resound along the streets. When we are unhurried and wise, we perceive that only great and worthy things have any permanent and absolute existence, that petty fears and petty pleasures are but the shadow of the reality. This is always exhilarating and sublime. By closing the eyes and slumbering, and consenting to be deceived by shows, men establish and confirm their daily life of routine and habit everywhere, which still is built on purely illusory foundations. Children, who play life, discern its true law and relations more clearly than men, who fail to live it worthily, but who think that they are wiser by experience, that is, by failure. I have read in a Hindoo book, that "there was a king's son, who, being expelled in infancy from his native city, was brought up by a forester, and, growing up to maturity in that state, imagined himself to belong to the barbarous race with which he lived. One of his father's ministers having discovered him, revealed to him what he was, and the misconception of his character was removed, and he knew himself to be a prince. So soul," continues the Hindoo philosopher, "from the circumstances in which it is placed, mistakes its own character, until the truth is revealed to it by some holy teacher, and then it knows itself to be *Brahme*." I perceive that we inhabitants of New England live this mean life that we do because our vision does not penetrate the surface of things. We think that that *is* which *appears* to be. If a man should walk through this town and see only the reality, where, think you, would the "Mill-dam" go to? If he should give us an account of the realities he beheld there, we should not recognize the place in his description. Look at a meeting-house, or a court-house, or a jail, or a shop, or a dwelling-house, and say what that thing really is before a true gaze, and they would all go to pieces in your account of them. Men esteem truth remote, in the outskirts of the system behind the farthest star, before Adam and after the last man. In eternity there is indeed something true and sublime. But all these times and places and occasions are now and here. God himself culminates in the present moment, and will never be more divine in the lapse of all the ages. And we are enabled to apprehend at all what is sublime and noble only by the perpetual instilling and drenching of the reality that surrounds us. The universe constantly and obediently answers to our conceptions; whether we travel fast or slow, the track is laid for us. Let us spend our lives in conceiving then. The poet or the artist never yet had so fair and noble a design but some of his posterity at least could accomplish it.

Let us spend one day as deliberately as Nature, and not be thrown off the track by every nutshell and mosquito's wing that falls on the rails. Let us rise early and fast, or break fast, gently and without perturbation; let company come and let company go, let the bells ring and the children cry,—determined to make a day of it. Why should we knock under and go with the stream? Let us not be upset and overwhelmed in that terrible rapid and whirlpool called a dinner, situated in the meridian shallows. Weather this danger and you are safe, for the rest of the way is down hill. With unrelaxed nerves, with morning vigor, sail by it, looking another way, tied to the mast like Ulysses. If the engine whistles, let it whistle till it is hoarse for its pains. If the bell rings, why should we run? We will consider what kind of music they are like. Let us settle ourselves, and work and wedge our feet downward through the mud and slush of opinion, and prejudice, and tradition, and delusion, and appearance, that alluvion which covers the globe, through Paris and London, through New York and Boston and Concord, through Church and State, through poetry and philosophy and religion, till we come to a hard bottom and rocks in place, which we can call *reality,* and say, This is, and no mistake; and then begin, having a *point d'appui,* below freshet and frost and fire,

38 **Brahme,** compare Emerson's "Brahma" and the introductory note for that poem, p 475 • 76 **Ulysses,** so tied as a defense against the song of the Sirens, in Bk XII of the **Odyssey** • 88 **point d'appui,** a basis of operations

a place where you might found a wall or a state, or set a lamp-post safely, or perhaps a gauge, not a Nilometer, but a Realometer, that future ages might know how deep a freshet of shams and appearances had gathered from time to time. If you stand right fronting and face to face to a fact, you will see the sun glimmer on both its surfaces, as if it were a cimeter, and feel its sweet edge dividing you through the heart and marrow, and so you will happily conclude your mortal career. Be it life or death, we crave only reality. If we are really dying, let us hear the rattle in our throats and feel cold in the extremities; if we are alive, let us go about our business.

Time is but the stream I go a-fishing in. I drink at it; but while I drink I see the sandy bottom and detect how shallow it is. Its thin current slides away, but eternity remains. I would drink deeper; fish in the sky, whose bottom is pebbly with stars. I cannot count one. I know not the first letter of the alphabet. I have always been regretting that I was not as wise as the day I was born. The intellect is a cleaver; it discerns and rifts its way into the secret of things. I do not wish to be any more busy with my hands than is necessary. My head is hands and feet. I feel all my best faculties concentrated in it. My instinct tells me that my head is an organ for burrowing, as some creatures use their snout and fore paws, and with it I would mine and burrow my way through these hills. I think that the richest vein is somewhere hereabouts; so by the divining-rod and thin rising vapors I judge; and here I will begin to mine.

From

The Journals

April 16, 1852

As I turned round the corner of Hubbard's Grove, saw a woodchuck, the first of the season, in the middle of the field, six or seven rods from the fence which bounds the wood, and twenty rods distant. I ran along the fence and cut him off, or rather overtook him, though he started at the same time. When I was only a rod and a half off, he stopped, and I did the same; then he ran again, and I ran up within three feet of him, when he stopped again, the fence being between us. I squatted down and surveyed him at my leisure. His eyes were dull black and rather inobvious, with a faint chestnut iris, with but little expression and that more of resignation than of anger. The general aspect was a coarse grayish brown, a sort of grisel. A lighter brown next the skin, then black or very dark brown and tipped with whitish rather loosely. The head between a squirrel and a bear, flat on the top and dark brown, and darker still or black on the tip of the nose. The whiskers black, two inches long. The ears very small and roundish, set far back and nearly buried in the fur. Black feet, with long and slender claws for digging. It appeared to tremble, or perchance shivered with cold. When I moved, it gritted its teeth quite loud, sometimes striking the under jaw against the other chatteringly, sometimes grinding one jaw on the other, yet as if more from instinct than anger. Whichever way I turned, that way it headed. I took a twig a foot long and touched its snout, at which it started forward and bit the stick, lessening the distance between us to two feet, and still it held all the ground it gained. I played with it tenderly awhile with the stick, trying to open its gritting jaws. Ever its long incisors, two above and two below, were presented. But I thought it would go to sleep if I stayed long enough. It did not sit upright as sometimes, but *standing* on its fore feet with its head down, *i.e.* half sitting, half standing We sat looking at one another about half an hour, till we began to feel mesmeric influences. When I was tired, I moved away, wishing to see him run, but I could not start him. He would not stir as long as I was looking at him or could see him. I walked round him; he turned as fast and fronted me still. I sat down by his side within a foot. I talked to him *quasi* forest lingo, baby-talk, at any

rate in a conciliatory tone, and thought that I had some influence on him. He gritted his teeth less. I chewed checkerberry leaves and presented them to his nose at last without a grit; though I saw that by so much gritting of the teeth he had worn them rapidly and they were covered with a fine white powder, which, if you measured it thus, would have made his anger terrible. He did not mind any noise I might make. With a little stick I lifted one of his paws to examine it, and held it up at pleasure. I turned him over to see what color he was beneath (darker or more purely brown), though he turned himself back again sooner than I could have wished. His tail was also all brown, though not very dark, rat-tail like, with loose hairs standing out on all sides like a caterpillar brush. He had a rather mild look. I spoke to him kindly. I reached checkerberry leaves to his mouth. I stretched my hands over him, though he turned up his head and still gritted a little. I laid my hand on him, but immediately took it off again, instinct not being wholly overcome. If I had had a few fresh bean leaves, thus in advance of the season, I am sure I should have tamed him completely. It was a frizzly tail. His is a humble, terrestrial color like the partridge's, well concealed where dead wiry grass rises above darker brown or chestnut dead leaves,—a modest color. If I had had some food, I should have ended with stroking him at my leisure. Could easily have wrapped him in my handkerchief. He was not fat nor particularly lean. I finally had to leave him without seeing him move from the place. A large, clumsy, burrowing squirrel. *Arctomys,* bearmouse. I respect him as one of the natives. He lies there, by his color and habits so naturalized amid the dry leaves, the withered grass, and the bushes. A sound nap, too, he has enjoyed in his native fields, the past winter. I think I might learn some wisdom of him. His ancestors have lived here longer than mine. He is more thoroughly acclimated and naturalized than I. Bean leaves the red man raised for him, but he can do without them.

June 18, 1855

At 3 P.M., as I walked up the bank by the Hemlocks, I saw a painted tortoise just beginning its hole; then another a dozen rods from the river on the bare barren field near some pitch pines, where the earth was covered with cladonias, cinquefoil, sorrel, etc. Its hole was about two thirds done. I stooped down over it, and, to my surprise, after a slight pause it proceeded in its work, directly under and within eighteen inches of my face. I retained a constrained position for three quarters of an hour or more for fear of alarming it. It rested on its fore legs, the front part of its shell about one inch higher than the rear, and this position was not changed essentially to the last. The hole was oval, broadest behind, about one inch wide and one and three quarters long, and the dirt already removed was quite wet or moistened. It made the hole and removed the dirt with its hind legs only, not using its tail or shell, which last of course could not enter the hole, though there was some dirt on it. It first scratched two or three times with one hind foot; then took up a pinch of the loose sand and deposited it directly behind that leg, pushing it backward to its full length and then deliberately opening it and letting the dirt fall; then the same with the other hind foot. This it did rapidly, using each leg alternately with perfect regularity, standing on the other one the while, and thus tilting up its shell each time, now to this side, then to that. There was half a minute or a minute between each change. The hole was made as deep as the feet could reach, or about two inches. It was very neat about its work, not scattering the dirt about any more than was necessary. The completing of the hole occupied perhaps five minutes.

It then without any pause drew its head completely into its shell, raised the rear a little, and protruded and dropped a wet flesh-colored egg into the hole, one end foremost, the red skin of its body being considerably protruded with it. Then it put out its head again a little, slowly, and placed the egg at one side with one hind foot. After a delay of about two minutes it again drew in its head and dropped another, and so on to the fifth—drawing in its head each time, and pausing somewhat longer between the last. The eggs were placed in the hole without any *particular* care,—only well down flat and [each] out of the way of the next,—and I could plainly see them from above.

After these ten minutes or more, it without pause or turning began to scrape the moist earth into the hole with its hind legs, and, when it had half filled it, it carefully pressed it down with the edges of its hind feet, dancing on them alternately, for some time, as on its knees, tilting from side to side, pressing by the whole

weight of the rear of its shell. When it had drawn in thus all the earth that had been moistened, it stretched its hind legs further back and to each side, and drew in the dry and lichen-clad crust, and then danced upon and pressed that down, still not moving the rear of its shell more than one inch to right or left all the while, or changing the position of the forward part at all. The thoroughness with which the covering was done was remarkable. It persevered in drawing in and dancing on the dry surface which had never been disturbed, long after you thought it had done its duty, but it never moved its fore feet, nor once looked round, nor saw the eggs it had laid. There were frequent pauses throughout the whole, when it rested, or ran out its head and looked about circumspectly, at any noise or motion. These pauses were especially long during the covering of its eggs, which occupied more than half an hour. Perhaps it was hard work.

When it had done, it immediately started for the river at a pretty rapid rate (the suddenness with which it made these transitions was amusing), pausing from time to time, and I judged that it would reach it in fifteen minutes. It was not easy to detect that the ground had been disturbed there. An Indian could not have made his cache more skillfully. In a few minutes all traces of it would be lost to the eye.

The object of moistening the earth was perhaps to enable it to take it up in its hands, and also to prevent its falling back into the hole. Perhaps it also helped to make the ground more compact and harder when it was pressed down.

1852-1855·1906

Prayer

From The Dial for July 1842.

Great God, I ask thee for no meaner pelf
Than that I may not disappoint myself,
That in my action I may soar as high
As I can now discern with this clear eye.

And next in value, which thy kindness lends,
That I may greatly disappoint my friends,
Howe'er they think or hope that it may be,
They may not dream how thou'st distinguished me.

That my weak hand may equal my firm faith,
And my life practise more than my tongue saith;
That my low conduct may not show,
Nor my relenting lines,
That I thy purpose did not know,
Or overrated thy designs.

1842

Rumors from an Æolian Harp

First printed in The Dial for October 1842, the poem was reprinted in the chapter entitled "Monday" in A Week on the Concord and Merrimack Rivers.

There is a vale which none hath seen,
Where foot of man has never been,
Such as here lives with toil and strife,
An anxious and a sinful life.

There every virtue has its birth,
Ere it descends upon the earth,
And thither every deed returns,
Which in the generous bosom burns.

There love is warm, and youth is young,
And poetry is yet unsung,
For Virtue still adventures there,
And freely breathes her native air.

And ever, if you hearken well,
You still may hear its vesper bell,
And tread of high-souled men go by,
Their thoughts conversing with the sky.

1842

The Summer Rain

First printed in **The Dial** for October 1842, "The Summer Rain" was reprinted in the chapter entitled "Thursday" in **A Week on the Concord and Merrimack Rivers.**

My books I'd fain cast off, I cannot read,
  'Twixt every page my thoughts go stray at large
Down in the meadow, where is richer feed,
  And will not mind to hit their proper targe.

Plutarch was good, and so was Homer too,
  Our Shakespeare's life were rich to live again,
What Plutarch read, that was not good nor true,
  Nor Shakespeare's books, unless his books were men.

Here while I lie beneath this walnut bough,
  What care I for the Greeks or for Troy town,
If juster battles are enacted now
  Between the ants upon this hummock's crown?

Bid Homer wait till I the issue learn,
  If red or black the gods will favor most,
Or yonder Ajax will the phalanx turn,
  Struggling to heave some rock against the host.

Tell Shakespeare to attend some leisure hour,
  For now I've business with this drop of dew,
And see you not, the clouds prepare a shower,—
  I'll meet him shortly when the sky is blue.

This bed of herdsgrass and wild oats was spread
  Last year with nicer skill than monarchs use,
A clover tuft is pillow for my head,
  And violets quite overtop my shoes.

And now the cordial clouds have shut all in,
  And gently swells the wind to say all's well;
The scattered drops are falling fast and thin,
  Some in the pool, some in the flower-bell.

I am well drenched upon my bed of oats;
  But see that globe come rolling down its stem,
Now like a lonely planet there it floats,
  And now it sinks into my garment's hem.

Drip, drip the trees for all the country round,
  And richness rare distills from every bough;
The wind alone it is makes every sound,
  Shaking down crystals on the leaves below.

For shame the sun will never show himself,
  Who could not with his beams e'er melt me so;
My dripping locks,—they would become an elf,
  Who in a beaded coat does gayly go.

1842

Smoke

First printed in **The Dial** for April 1843, "Smoke" was reprinted in Chapter XIII of **Walden.**

Light-wingèd smoke, Icarian bird,
Melting thy pinions in thy upward flight,
Lark without song, and messenger of dawn,
Circling above the hamlets as thy nest;
Or else, departing dream, and shadowy form
Of midnight vision, gathering up thy skirts;
By night star-veiling, and by day
Darkening the light and blotting out the sun;
Go thou my incense upward from this hearth,
And ask the Gods to pardon this clear flame.

1843

The Summer Rain • 4 targe, target • 11 battles . . . ants. Thoreau's famous description of the battle between the red and black ants is in Chap. XII of **Walden**

Smoke • 1 Icarian. When Icarus, in Greek mythology, flew too near the sun, the wax of his artificial wings melted, and he fell into the sea and was drowned

Inspiration

Portions of "Inspiration" are found scattered through A Week on the Concord and Merrimack Rivers. The poem should be compared with Emerson's "Merlin," p 469, noting especially the views of poetic composition expressed.

Whate'er we leave to God, God does,
  And blesses us;
The work we choose should be our own,
  God leaves alone.

If with light head erect I sing,
  Though all the Muses lend their force,
From my poor love of anything,
  The verse is weak and shallow as its source.

But if with bended neck I grope
  Listening behind me for my wit,
With faith superior to hope,
  More anxious to keep back than forward it;

Making my soul accomplice there
  Unto the flame my heart hath lit,
Then will the verse forever wear—
  Time cannot bend the line which God hath writ.

Always the general show of things
  Floats in review before my mind,
And such true love and reverence brings,
  That sometimes I forget that I am blind.

But now there comes unsought, unseen,
  Some clear divine electuary,
And I, who had but sensual been,
  Grow sensible, and as God is, am wary.

I hearing get, who had but ears,
  And sight, who had but eyes before,
I moments live, who lived but years,
  And truth discern, who knew but learning's lore.

I hear beyond the range of sound,
  I see beyond the range of sight,
New earths and skies and seas around,
  And in my day the sun doth pale his light.

A clear and ancient harmony
  Pierces my soul through all its din,
As through its utmost melody,—
  Farther behind than they, farther within.

More swift its bolt than lightning is,
  Its voice than thunder is more loud,
It doth expand my privacies
  To all, and leave me single in the crowd.

Walden Pond in Summer

It speaks with such authority,
  With so serene and lofty tone,
That idle Time runs gadding by,
  And leaves me with Eternity alone.

Now chiefly is my natal hour,
  And only now my prime of life;
Of manhood's strength it is the flower,
  'Tis peace's end and war's beginning strife.

It comes in summer's broadest noon,
  By a grey wall or some chance place,
Unseasoning Time, insulting June,
  And vexing day with its presuming face.

Such fragrance round my couch it makes,
  More rich than are Arabian drugs,
That my soul scents its life and wakes
  The body up beneath its perfumed rugs.

Such is the Muse, the heavenly maid,
  The star that guides our mortal course,
Which shows where life's true kernel's laid,
  Its wheat's fine flour, and its undying force.

She with one breath attunes the spheres,
  And also my poor human heart,
With one impulse propels the years
  Around, and gives my throbbing pulse its start.

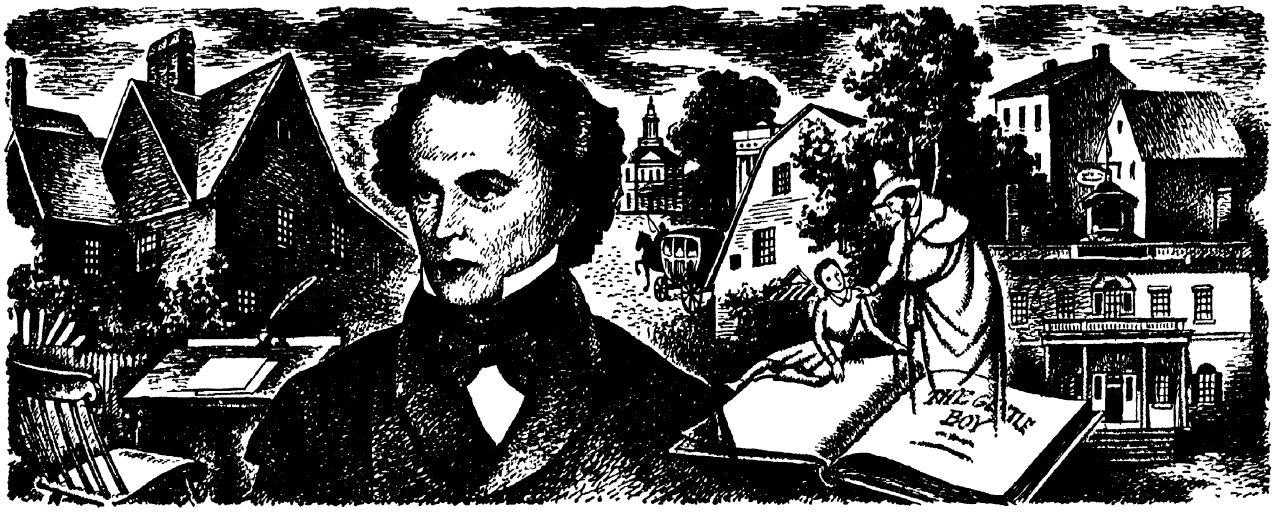
I will not doubt for evermore,
  Nor falter from a steadfast faith,
For though the system be turned o'er,
  God takes not back the word which once He saith.

I will not doubt the love untold
  Which not my worth nor want has bought,
Which wooed me young, and wooes me old,
  And to this evening hath me brought.

My memory I'll educate
  To know the one historic truth,
Remembering to the latest date
  The only true and sole immortal youth.

Be but thy inspiration given,
  No matter through what danger sought,
I'll fathom hell or climb to heaven,
  And yet esteem that cheap which love has bought.

Fame cannot tempt the bard
  Who's famous with his God,
Nor laurel him reward
  Who has his Maker's nod.



1849

Though All the Fates

In the paragraph which precedes the poem, Thoreau tells of talking with some boatmen on the Merrimack who intended, when they reached the coast, possibly to embark for "the China seas." "What grievance," he asks, "has its root among the New Hampshire hills? . . . What is wanting to human life here, that these men should make haste to the antipodes?" (See **A Week on the Concord and Merrimack Rivers.**)

Though all the fates should prove unkind,
Leave not your native land behind.
The ship, becalmed, at length stands still;
The steed must rest beneath the hill;
But swiftly still our fortunes pace,
To find us out in every place.
The vessel, though her masts be firm,
Beneath her copper bears a worm;
Around the cape, across the line,
Till fields of ice her course confine;
It matters not how smooth the breeze,
How shallow or how deep the seas,
Whether she bears Manilla twine,
Or in her hold Madeira wine,
Or China teas, or Spanish hides,
In port or quarantine she rides;
Far from New England's blustering shore,
New England's worm her hulk shall bore,
And sink her in the Indian seas,
Twine, wine, and hides, and China teas.

1849

Nathaniel Hawthorne

1804 • 1864

Nathaniel Hawthorne's first American ancestor, William Hathorne, came to Massachusetts in 1630 and, as a magistrate of the Bay Colony, was active in the 1650's in the persecution of the Quakers. William Hathorne's son, John, was one of the "witch-judges" at Salem in 1692. The seventeenth-century Hathornes were obviously men of importance, though of a sinister kind. The family declined in prominence during the century which followed. Nathaniel Hawthorne's father, a sea captain, died in Dutch Guiana when Nathaniel was only four years of age, leaving at Salem a widow and three children in reduced circumstances. Hawthorne often thought of William Hathorne, "grave, bearded, sable-cloaked and steeple-crowned progenitor," and of John Hathorne, "so conspicuous in the martyrdom of the witches that their blood may fairly be said to have left a stain upon him." He wondered if their sins might have been to blame for his family's decline and if he might have inherited some of their guilt. "I take shame upon myself for their sakes," he wrote in "The Custom House," the prefatory essay to *The Scarlet Letter,* "and pray that any curse incurred by them—as I have heard, and as the dreary and unprosperous condition of the race, for many a long year back, would argue to exist—may be now and henceforth removed." And yet, however much he might deprecate the cruelties of these early progenitors (and however alien and distasteful to them might be a descendant who was "a writer of story-books"), he could not escape his inheritance: "strong traits of their nature," he said, "have intertwined themselves with mine." It is

Panel (l. to r.): The House of the Seven Gables • Hawthorne's study • Nathaniel Hawthorne at the age of 35 • Salem • The Old Manse • Sophia Hawthorne's illustration for "The Gentle Boy" • Salem Custom House

this hereditary sense, no doubt, which explains, at least in part, Hawthorne's preoccupation with the theme of guilt and the somber tone of his stories.

He was graduated from Bowdoin College in 1825. Franklin Pierce was in the class of 1824; Longfellow was a classmate. After graduation, Hawthorne returned to his mother's house in Salem and lived there in comparative seclusion for twelve years. He later thought of himself as having been under a spell of enchantment. In a famous letter to Longfellow, written in 1837, he said: "By some witchcraft or other—for I really cannot assign any reasonable why and wherefore—I have been carried apart from the main current of life, and find it impossible to get back again. Since we last met . . . I have secluded myself from society; and yet I never meant any such thing, nor dreamed what sort of life I was going to lead. I have made a captive of myself and put me into a dungeon; and now I cannot find the key to let myself out—and if the door were open, I should be almost afraid to come out. . . . There is no fate in this world so horrible as to have no share in either its joys or sorrows. For the last ten years, I have not lived, but only dreamed about living." Those years, however, were not wasted. In his solitary chamber, Hawthorne put himself through a rigorous literary discipline. He read and wrote and destroyed much of what he had written. Recovering from a false start in *Fanshawe* (1828), a short novel based upon life at Bowdoin, he discovered the kind of composition in which he was to excel· the moral and psychological tale. After anonymous publication in magazines, his tales were first collected in *Twice-Told Tales* (1837). If these stories, as their author thought later, "have the pale tint of flowers that blossomed in too retired a shade," they illustrate, nevertheless, Hawthorne's characteristic virtues of sharpness of insight and delicacy of treatment.

We need not regret the twelve solitary years; perhaps they were necessary to Hawthorne's development as an artist. The prolongation of the period of solitude, however, might have endangered both his literary growth and his mental health. Hawthorne evidently feared as much, for soon he was attempting, in his own phrase, "to open an intercourse with the world." In 1839-1840 he was "weigher and gauger" in the Boston Custom House; for several months in 1841 he worked in the potato patch and manure pile at Brook Farm. In the meantime, he had fallen in love with Miss Sophia Peabody, whom he married in 1842. Love and marriage more than anything else, he felt, saved him from the fate of the solitary. The idyllic life of the newly married pair at the Old Manse is delightfully recorded in *The American Notebooks.*

Hawthorne returned to Salem in 1845; and in 1846 appeared a second collection of tales, entitled *Mosses from an Old Manse.* This volume, like *Twice-Told Tales,* attracted so few readers that it was with some justice that Hawthorne believed himself to be "the obscurest man of letters in America." Because of his financial needs, he was glad to accept an appointment as surveyor in the Salem Custom House. Inasmuch as he held this appointment as a loyal Democrat under the Democratic administration of James K. Polk, he was dismissed from office in 1849, after three years' service, to make room for a Whig incumbent. The loss of this place was a blow to Hawthorne. But adversity discovers virtue. The three years which followed this "misfortune" were the most productive period of his life. *The Scarlet Letter* (1850), an intense, tragic study of the psychological effects of adultery upon four people, made Hawthorne famous. His fame was enhanced by *The House of the Seven Gables* (1851), a study of the decay of an old Salem family, and *The Blithedale Romance* (1852), a satire, in part, on the socialist community at Brook Farm. *The House of the Seven Gables* was written at Lenox, in the Berkshires, where Hawthorne enjoyed the stimulating companionship of Herman Melville.

From 1853 to 1857 Hawthorne was consul at Liverpool; he had been appointed to that post by his old college friend, Franklin Pierce, then President of the United States. The office was not much to Hawthorne's liking; but he made the most of the opportunity of seeing England, his impressions of which he recorded in the posthumously printed *English Notebooks* and in *Our Old Home* (1863), a collection of essays. He spent 1858-1859 in Italy and employed Italian backgrounds in his last complete novel, *The Marble Faun* (1860) He returned in 1860 to "The Wayside" in Concord, which he had purchased a short time before going abroad. The Civil War darkened his last years. He did not share the abolitionist zeal. "I always thought that the war should have been avoided," he said in 1863, "although since it has broken out, I have longed for military success as much as any man or woman of the North." His personal loyalty to Pierce, whose public opposition to the War

seemed treacherous to many, was little short of heroic (see the dedicatory letter in *Our Old Home*). His last attempts at fiction resulted in some interesting works which were still unfinished at his death *The Ancestral Footstep, Septimius Felton, Doctor Grimshawe's Secret,* and *The Dolliver Romance.*

Critics of Hawthorne have found a good deal to object to, but more to praise. Henry James, while deprecating Hawthorne's "provincialism" and his "abuse of the fanciful element," declared. "No one has had just that vision of life, and no one has had a literary form that more successfully expressed his vision." W. C. Brownell, the severest of Hawthorne's critics, objected to his "placidity" and his obsession with allegory, but found in *The Scarlet Letter* "our chief prose masterpiece." More recently, T. S. Eliot has said (in *The Athenaeum,* April 25, 1919). "Hawthorne had . . . the firmness, the true coldness, the hard coldness of the genuine artist. In consequence, the observation of moral life in *The Scarlet Letter,* in *The House of the Seven Gables,* and even in some of the tales and sketches, has solidity, has permanence, the permanence of art. It will always be of use. . . . The work of Hawthorne is truly a criticism—true because a fidelity of the artist and not a mere conviction of the man—of the Puritan morality, of the Transcendentalist morality, and of the world which Hawthorne knew. It is a criticism as Henry James's work is a criticism of the America of his times, and as the work of Turgenev and Flaubert is a criticism of the Russia and the France of theirs." Of all the writers of New England's flowering, Hawthorne seems the most certain to endure.

The Minister's Black Veil

A Parable

"The Minister's Black Veil" was first published in the **Token** for 1836 and was reprinted in **Twice-Told Tales** in 1837. The story is a fine study of the Puritan conscience. Father Hooper may be regarded as a prototype of Arthur Dimmesdale in **The Scarlet Letter** (see **The American Notebooks by Nathaniel Hawthorne,** pp. xlvii-xlviii)

Dr. William Sprague's **Annals of the American Pulpit** sets forth the story of the Rev. Joseph Moody (1700-1753), to whom Hawthorne refers in a footnote. According to Sprague, Moody wore a handkerchief: Hawthorne has substituted a more symbolic covering—a black veil. The source also differs from the story in its assignment of a reason for the donning of the mask: following the death of his wife, says Sprague, Moody "fell into a state of deep melancholy, left preaching, broke up house-keeping, and wore a handkerchief over his face." And when Moody returned to the pulpit, he "would turn his back to the people, turn up his handkerchief, and read a printed sermon. . . ."

The sexton stood in the porch of Milford meeting-house pulling lustily at the bell-rope. The old people of the village came stooping along the street. Children with bright faces tript merrily beside their parents, or mimicked a graver gait in the conscious dignity of their Sunday clothes. Spruce bachelors looked sidelong at the pretty maidens, and fancied that the Sabbath sunshine made them prettier than on week-days When the throng had mostly streamed into the porch, the sexton began to toll the bell, keeping his eye on the Reverend Mr. 10

A Parable. "Another clergyman in New England, Mr Joseph Moody, of York, Maine, who died about eighty years since, made himself remarkable by the same eccentricity that is here related of the Reverend Mr Hooper In his case, however, the symbol had a different import. In early life he had accidentally killed a beloved friend, and from that day till the hour of his own death he hid his face from men." —Hawthorne

Hooper's door. The first glimpse of the clergyman's figure was the signal for the bell to cease its summons.

"But what has good Parson Hooper got upon his face?" cried the sexton in astonishment.

All within hearing immediately turned about, and beheld the semblance of Mr. Hooper pacing slowly in his meditative way towards the meeting-house. With one accord they started, expressing more wonder than if some strange minister were coming to dust the cushions of Mr. Hooper's pulpit.

"Are you sure it is our parson?" inquired Goodman Gray of the sexton.

"Of a certainty it is good Mr. Hooper," replied the sexton. "He was to have exchanged pulpits with Parson Shute, of Westbury; but Parson Shute sent to excuse himself yesterday, being to preach a funeral sermon."

The cause of so much amazement may appear sufficiently slight. Mr. Hooper, a gentlemanly person of about thirty, though still a bachelor, was dressed with due clerical neatness, as if a careful wife had starched his band, and brushed the weekly dust from his Sunday's garb. There was but one thing remarkable in his appearance. Swathed about his forehead, and hanging down over his face so low as to be shaken by his breath, Mr. Hooper had on a black veil. On a nearer view it seemed to consist of two folds of crape, which entirely concealed his features except the mouth and chin, but probably did not intercept his sight farther than to give a darkened aspect to all living and inanimate things. With this gloomy shade before him, good Mr. Hooper walked onward at a slow and quiet pace, stooping somewhat and looking on the ground, as is customary with abstracted men, yet nodding kindly to those of his parishioners who still waited on the meeting-house steps But so wonder-struck were they that his greeting hardly met with a return.

"I can't really feel as if good Mr. Hooper's face was behind that piece of crape," said the sexton

"I don't like it," muttered an old woman, as she hobbled into the meeting-house. "He has changed himself into something awful only by hiding his face"

"Our parson has gone mad!" cried Goodman Gray, following him across the threshold.

A rumor of some unaccountable phenomenon had preceded Mr. Hooper into the meeting house, and set all the congregation astir. Few could refrain from twisting their heads towards the door; many stood upright and turned directly about; while several little boys clambered upon the seats, and came down again with a terrible racket. There was a general bustle, a rustling of the women's gowns and shuffling of the men's feet, greatly at variance with that hushed repose which should attend the entrance of the minister. But Mr Hooper appeared not to notice the perturbation of his people. He entered with an almost noiseless step, bent his head mildly to the pews on each side, and bowed as he passed his oldest parishioner, a white-haired great-grandsire, who occupied an armchair in the centre of the aisle. It was strange to observe how slowly this venerable man became conscious of something singular in the appearance of his pastor. He seemed not fully to partake of the prevailing wonder till Mr. Hooper had ascended the stairs, and showed himself in the pulpit face to face with his congregation except for the black veil. That mysterious emblem was never once withdrawn. It shook with his measured breath as he gave out the psalm; it threw its obscurity between him and the holy page as he read the Scriptures; and while he prayed, the veil lay heavily on his uplifted countenance. Did he seek to hide it from the dread Being whom he was addressing?

Such was the effect of this simple piece of crape that more than one woman of delicate nerves was forced to leave the meeting-house. Yet perhaps the pale-faced congregation was almost as fearful a sight to the minister as his black veil to them.

Mr Hooper had the reputation of a good preacher, but not an energetic one: he strove to win his people heavenward by mild, persuasive influences, rather than to drive them thither by the thunders of the Word. The sermon which he now delivered was marked by the same characteristics of style and manner as the general series of his pulpit oratory. But there was something either in the sentiment of the discourse itself, or in the imagination of the auditors, which made it greatly the most powerful effort that they had ever heard from their pastor's lips. It was tinged rather more darkly than usual with the gentle gloom of Mr. Hooper's temperament The subject had reference to secret sin, and those sad mysteries which we hide from our nearest and dearest, and would fain conceal from our own consciousness, even forgetting that the Omniscient can detect them. A subtle power was breathed into his words. Each member of the

congregation, the most innocent girl, and the man of hardened breast, felt as if the preacher had crept upon them behind his awful veil, and discovered their hoarded iniquity of deed or thought. Many spread their clasped hands on their bosoms. There was nothing terrible in what Mr. Hooper said, at least, no violence, and yet, with every tremor of his melancholy voice the hearers quaked. An unsought pathos came hand in hand with awe. So sensible were the audience of some unwonted attribute in their minister, that they longed for a breath of wind to blow aside the veil, almost believing that a stranger's visage would be discovered, though the form, gesture, and voice were those of Mr. Hooper.

At the close of the service the people hurried out with indecorous confusion, eager to communicate their pent-up amazement, and conscious of lighter spirits the moment they lost sight of the black veil. Some gathered in little circles, huddled closely together, with their mouths all whispering in the centre; some went homeward alone, wrapt in silent meditation; some talked loudly, and profaned the Sabbath-day with ostentatious laughter. A few shook their sagacious heads, intimating that they could penetrate the mystery; while one or two affirmed that there was no mystery at all, but only that Mr. Hooper's eyes were so weakened by the midnight lamp as to require a shade. After a brief interval, forth came good Mr. Hooper also, in the rear of his flock. Turning his veiled face from one group to another, he paid due reverence to the hoary heads, saluted the middle-aged with kind dignity, as their friend and spiritual guide, greeted the young with mingled authority and love, and laid his hands on the little children's heads to bless them. Such was always his custom on the Sabbath-day. Strange and bewildered looks repaid him for his courtesy. None, as on former occasions, aspired to the honor of walking by their pastor's side. Old Squire Saunders, doubtless by an accidental lapse of memory, neglected to invite Mr. Hooper to his table, where the good clergyman had been wont to bless the food almost every Sunday since his settlement. He returned, therefore, to the parsonage, and, at the moment of closing the door, was observed to look back upon the people, all of whom had their eyes fixed upon the minister. A sad smile gleamed faintly from beneath the black veil, and flickered about his mouth, glimmering as he disappeared.

"How strange," said a lady, "that a simple black veil, such as any woman might wear on her bonnet, should become such a terrible thing on Mr. Hooper's face!"

"Something must surely be amiss with Mr. Hooper's intellects," observed her husband, the physician of the village. "But the strangest part of the affair is the effect of this vagary, even on a sober-minded man like myself. The black veil, though it covers only our pastor's face, throws its influence over his whole person, and makes him ghostlike from head to foot. Do you not feel it so?"

"Truly do I," replied the lady; "and I would not be alone with him for the world. I wonder he is not afraid to be alone with himself!"

"Men sometimes are so," said her husband.

The afternoon service was attended with similar circumstances. At its conclusion, the bell tolled for the funeral of a young lady. The relatives and friends were assembled in the house, and the more distant acquaintances stood about the door, speaking of the good qualities of the deceased, when their talk was interrupted by the appearance of Mr. Hooper, still covered with his black veil. It was now an appropriate emblem. The clergyman stepped into the room where the corpse was laid, and bent over the coffin to take a last farewell of his deceased parishioner. As he stooped, the veil hung straight down from his forehead, so that, if her eyelids had not been closed for ever, the dead maiden might have seen his face Could Mr. Hooper be fearful of her glance, that he so hastily caught back the black veil? A person who watched the interview between the dead and living scrupled not to affirm that, at the instant when the clergyman's features were disclosed, the corpse had slightly shuddered, rustling the shroud and muslin cap, though the countenance retained the composure of death. A superstitious old woman was the only witness of this prodigy. From the coffin Mr. Hooper passed into the chamber of the mourners, and thence to the head of the staircase, to make the funeral prayer. It was a tender and heart-dissolving prayer, full of sorrow, yet so imbued with celestial hopes that the music of a heavenly harp, swept by the fingers of the dead, seemed faintly to be heard among the saddest accents of the minister. The people trembled, though they but darkly understood him, when he prayed that they, and himself, and all of mortal race, might be ready, as he trusted this young maiden had been, for the dreadful hour that should snatch the veil from their faces. The bearers went heavily forth, and the

mourners followed, saddening all the street, with the dead before them, and Mr. Hooper in the black veil behind.

"Why do you look back?" said one in the procession to his partner.

"I had a fancy," replied she, "that the minister and the maiden's spirit were walking hand in hand."

"And so had I at the same moment," said the other.

That night the handsomest couple in Milford village were to be joined in wedlock. Though reckoned a melancholy man, Mr. Hooper had a placid cheerfulness for such occasions which often excited a sympathetic smile where livelier merriment would have been thrown away. There was no quality of his disposition which made him more beloved than this. The company at the wedding awaited his arrival with impatience, trusting that the strange awe which had gathered over him throughout the day would now be dispelled. But such was not the result. When Mr. Hooper came, the first thing that their eyes rested on was the same horrible black veil, which had added deeper gloom to the funeral, and could portend nothing but evil to the wedding. Such was its immediate effect on the guests, that a cloud seemed to have rolled duskily from beneath the black crape and dimmed the light of the candles. The bridal pair stood up before the minister. But the bride's cold fingers quivered in the tremulous hand of the bridegroom, and her deathlike paleness caused a whisper that the maiden who had been buried a few hours before was come from her grave to be married. If ever another wedding were so dismal, it was that famous one where they tolled the wedding knell. After performing the ceremony, Mr. Hooper raised a glass of wine to his lips, wishing happiness to the newmarried couple, in a strain of mild pleasantry that ought to have brightened the features of the guests, like a cheerful gleam from the hearth. At that instant, catching a glimpse of his figure in the looking-glass, the black veil involved his own spirit in the horror with which it overwhelmed all others. His frame shuddered—his lips grew white—he spilt the untasted wine upon the carpet—and rushed forth into the darkness. For the earth, too, had on her black veil.

The next day the whole village of Milford talked of little else than Parson Hooper's black veil. That, and the mystery concealed behind it, supplied a topic for discussion between acquaintances meeting in the street, and good women gossiping at their open windows. It was the first item of news that the tavern-keeper told to his guests. The children babbled of it on their way to school. One imitative little imp covered his face with an old black handkerchief, thereby so affrighting his playmates that the panic seized himself, and he well-nigh lost his wits by his own waggery.

It was remarkable that, of all the busybodies and impertinent people in the parish, not one ventured to put the plain question to Mr. Hooper, wherefore he did this thing. Hitherto, whenever there appeared the slightest call for such interference, he had never lacked advisers, nor shown himself averse to be guided by their judgment. If he erred at all, it was by so painful a degree of self-distrust that even the mildest censure would lead him to consider an indifferent action as a crime. Yet, though so well acquainted with this amiable weakness, no individual among his parishioners chose to make the black veil a subject of friendly remonstrance. There was a feeling of dread, neither plainly confessed nor carefully concealed, which caused each to shift the responsibility upon another, till at length it was found expedient to send a deputation of the church, in order to deal with Mr. Hooper about the mystery before it should grow into a scandal. Never did an embassy so ill discharge its duties. The minister received them with friendly courtesy, but became silent after they were seated, leaving to his visitors the whole burden of introducing their important business. The topic, it might be supposed, was obvious enough. There was the black veil swathed round Mr. Hooper's forehead, and concealing every feature above his placid mouth, on which at times they could perceive the glimmering of a melancholy smile. But that piece of crape, to their imagination, seemed to hang down before his heart, the symbol of a fearful secret between him and them. Were the veil but cast aside they might speak freely of it, but not till then. Thus they sat a considerable time, speechless, confused, and shrinking uneasily from Mr. Hooper's eye, which they felt to be fixed upon them with an invisible glance. Finally, the deputies returned abashed to their constituents, pronouncing the matter too weighty to be handled, except by a

---

31 famous . . . knell. The reference is to another story of Hawthorne's, "The Wedding Knell," which appeared in the same issue of the Token

council of the churches, if indeed it might not require a general synod.

But there was one person in the village unappalled by the awe with which the black veil had impressed all beside herself. When the deputies returned without an explanation, or even venturing to demand one, she, with the calm energy of her character, determined to chase away the strange cloud that appeared to be settling round Mr. Hooper, every moment more darkly than before. As his plighted wife, it should be her privilege to know what the black veil concealed. At the minister's first visit, therefore, she entered upon the subject with a direct simplicity which made the task easier both for him and her. After he had seated himself she fixed her eyes steadfastly upon the veil, but could discern nothing of the dreadful gloom that had so overawed the multitude: it was but a double fold of crape, hanging down from his forehead to his mouth, and slightly stirring with his breath.

"No," said she aloud, and smiling, "there is nothing terrible in this piece of crape, except that it hides a face which I am always glad to look upon. Come, good sir, let the sun shine from behind the cloud. First lay aside your black veil. then tell me why you put it on."

Mr. Hooper's smile glimmered faintly.

"There is an hour to come," said he, "when all of us shall cast aside our veils. Take it not amiss, beloved friend, if I wear this piece of crape till then"

"Your words are a mystery too," returned the young lady. "Take away the veil from them at least."

"Elizabeth, I will," said he, "so far as my vow may suffer me Know, then, this veil is a type and a symbol, and I am bound to wear it ever, both in light and darkness, in solitude and before the gaze of multitudes, and as with strangers, so with my familiar friends. No mortal eye will see it withdrawn. This dismal shade must separate me from the world: even you, Elizabeth, can never come behind it!"

"What grievous affliction hath befallen you," she earnestly inquired, "that you should thus darken your eyes for ever?"

"If it be a sign of mourning," replied Mr. Hooper, "I, perhaps, like most other mortals, have sorrows dark enough to be typified by a black veil."

"But what if the world will not believe that it is the type of an innocent sorrow?" urged Elizabeth. "Beloved and respected as you are, there may be whispers that you hide your face under the consciousness of secret sin. For the sake of your holy office, do away with this scandal!"

The color rose into her cheeks as she intimated the nature of the rumors that were already abroad in the village. But Mr. Hooper's mildness did not forsake him. He even smiled again—that same sad smile, which always appeared like a faint glimmering of light proceeding from the obscurity beneath the veil.

"If I hide my face for sorrow, there is cause enough," he merely replied; "and if I cover it for secret sin, what mortal might not do the same?"

And with this gentle but unconquerable obstinacy did he resist all her entreaties. At length Elizabeth sat silent. For a few moments she appeared lost in thought, considering, probably, what new methods might be tried to withdraw her lover from so dark a fantasy, which, if it had no other meaning, was perhaps a symptom of mental disease. Though of a firmer character than his own, the tears rolled down her cheeks. But in an instant, as it were, a new feeling took the place of sorrow: her eyes were fixed insensibly on the black veil, when, like a sudden twilight in the air, its terrors fell around her. She arose, and stood trembling before him.

"And do you feel it then at last?" said he mournfully.

She made no reply, but covered her eyes with her hand, and turned to leave the room. He rushed forward and caught her arm.

"Have patience with me, Elizabeth!" cried he passionately. "Do not desert me, though this veil must be between us here on earth. Be mine, and hereafter there shall be no veil over my face, no darkness between our souls! It is but a mortal veil—it is not for eternity! Oh! you know not how lonely I am, and how frightened, to be alone behind my black veil. Do not leave me in this miserable obscurity for ever!"

"Lift the veil but once and look me in the face," said she.

"Never! It cannot be!" replied Mr. Hooper.

"Then, farewell!" said Elizabeth.

She withdrew her arm from his grasp and slowly departed, pausing at the door to give one long, shuddering gaze, that seemed almost to penetrate the mystery of the black veil. But even amid his grief Mr. Hooper smiled to think that only a material emblem had separated him from happiness, though the horrors which

it shadowed forth must be drawn darkly between the fondest of lovers.

From that time no attempts were made to remove Mr. Hooper's black veil, or, by a direct appeal, to discover the secret which it was supposed to hide. By persons who claimed a superiority to popular prejudice it was reckoned merely an eccentric whim, such as often mingles with the sober actions of men otherwise rational, and tinges them all with its own semblance of insanity. But with the multitude good Mr. Hooper was irreparably a bugbear. He could not walk the streets with any peace of mind, so conscious was he that the gentle and timid would turn aside to avoid him, and that others would make it a point of hardihood to throw themselves in his way. The impertinence of the latter class compelled him to give up his customary walk at sunset to the burial-ground; for when he leaned pensively over the gate, there would always be faces behind the grave-stones peeping at his black veil. A fable went the rounds that the stare of the dead people drove him thence. It grieved him to the very depth of his kind heart to observe how the children fled from his approach, breaking up their merriest sports while his melancholy figure was yet afar off. Their instinctive dread caused him to feel more strongly than aught else that a preternatural horror was interwoven with the threads of the black crape. In truth, his own antipathy to the veil was known to be so great that he never willingly passed before a mirror, nor stooped to drink at a still fountain, lest in its peaceful bosom he should be affrighted by himself. This was what gave plausibility to the whispers, that Mr. Hooper's conscience tortured him for some great crime too horrible to be entirely concealed, or otherwise than so obscurely intimated. Thus from beneath the black veil there rolled a cloud into the sunshine, an ambiguity of sin or sorrow, which enveloped the poor minister, so that love or sympathy could never reach him. It was said that ghost and fiend consorted with him there. With self-shudderings and outward terrors he walked continually in its shadow, groping darkly within his own soul, or gazing through a medium that saddened the whole world. Even the lawless wind, it was believed, respected his dreadful secret and never blew aside the veil. But still good Mr. Hooper sadly smiled at the pale visages of the worldly throng as he passed by.

Among all its bad influences, the black veil had the one desirable effect of making its wearer a very efficient clergyman. By the aid of his mysterious emblem—for there was no other apparent cause—he became a man of awful power over souls that were in agony for sin. His converts always regarded him with a dread peculiar to themselves, affirming, though but figuratively, that, before he brought them to celestial light, they had been with him behind the black veil. Its gloom, indeed, enabled him to sympathize with all dark affections. Dying sinners cried aloud for Mr. Hooper, and would not yield their breath till he appeared; though ever, as he stooped to whisper consolation, they shuddered at the veiled face so near their own. Such were the terrors of the black veil, even when Death had bared his visage! Strangers came long distances to attend service at his church, with the mere idle purpose of gazing at his figure, because it was forbidden them to behold his face. But many were made to quake ere they departed! Once, during Governor Belcher's administration, Mr. Hooper was appointed to preach the election sermon. Covered with his black veil, he stood before the chief magistrate, the council, and the representatives, and wrought so deep an impression that the legislative measures of that year were characterized by all the gloom and piety of our earliest ancestral sway.

In this manner Mr. Hooper spent a long life, irreproachable in outward act, yet shrouded in dismal suspicions; kind and loving, though unloved, and dimly feared; a man apart from men, shunned in their health and joy, but ever summoned to their aid in mortal anguish. As years wore on, shedding their snows above his sable veil, he acquired a name throughout the New England churches, and they called him Father Hooper. Nearly all his parishioners who were of mature age when he was settled had been borne away by many a funeral: he had one congregation in the church, and a more crowded one in the church-yard; and having wrought so late into the evening, and done his work so well, it was now good Father Hooper's turn to rest.

65 Belcher, Jonathan Belcher (1681-1757), royal governor of Massachusetts (1730-1741) • **66 election sermon,** delivered before the newly elected officers of state. An appointment to preach an election sermon was the highest honor that could be conferred upon a minister in colonial New England. Election sermons were often published (see R. W. G. Vail, "A Check List of New England Election Sermons," **Proceedings of the American Antiquarian Society,** October 1935). Compare the dramatic importance of the election sermon in **The Scarlet Letter**

Several persons were visible by the shaded candlelight in the death-chamber of the old clergyman. Natural connections he had none. But there was the decorously grave though unmoved physician, seeking only to mitigate the last pangs of the patient whom he could not save. There were the deacons, and other eminently pious members of his church. There, also, was the Reverend Mr. Clark, of Westbury, a young and zealous divine, who had ridden in haste to pray by the bedside of the expiring minister. There was the nurse, no hired handmaiden of death, but one whose calm affection had endured thus long in secrecy, in solitude, amid the chill of age, and would not perish, even at the dying hour. Who, but Elizabeth! And there lay the hoary head of good Father Hooper upon the death-pillow, with the black veil still swathed about his brow and reaching down over his face, so that each more difficult gasp of his faint breath caused it to stir. All through life that piece of crape had hung between him and the world: it had separated him from cheerful brotherhood and woman's love, and kept him in that saddest of all prisons, his own heart; and still it lay upon his face, as if to deepen the gloom of his darksome chamber, and shade him from the sunshine of eternity.

For some time previous his mind had been confused, wavering doubtfully between the past and the present, and hovering forward, as it were, at intervals, into the indistinctness of the world to come. There had been feverish turns, which tossed him from side to side, and wore away what little strength he had. But in his most convulsive struggles, and in the wildest vagaries of his intellect, when no other thought retained its sober influence, he still showed an awful solicitude lest the black veil should slip aside. Even if his bewildered soul could have forgotten, there was a faithful woman at his pillow, who, with averted eyes, would have covered that aged face, which she had last beheld in the comeliness of manhood. At length the death-stricken old man lay quietly in the torpor of mental and bodily exhaustion, with an imperceptible pulse, and breath that grew fainter and fainter, except when a long, deep, and irregular inspiration seemed to prelude the flight of his spirit.

The minister of Westbury approached the bedside.

"Venerable Father Hooper," said he, "the moment of your release is at hand. Are you ready for the lifting of the veil that shuts in time from eternity?"

Father Hooper at first replied merely by a feeble motion of his head; then, apprehensive, perhaps, that his meaning might be doubtful, he exerted himself to speak.

"Yea," said he, in faint accents, "my soul hath a patient weariness until that veil be lifted."

"And is it fitting," resumed the Reverend Mr. Clark, "that a man so given to prayer, of such a blameless example, holy in deed and thought, so far as mortal judgment may pronounce; is it fitting that a father in the church should leave a shadow on his memory, that may seem to blacken a life so pure? I pray you, my venerable brother, let not this thing be! Suffer us to be gladdened by your triumphant aspect, as you go to your reward Before the veil of eternity be lifted, let me cast aside this black veil from your face!"

And thus speaking, the Reverend Mr. Clark bent forward to reveal the mystery of so many years. But exerting a sudden energy that made all the beholders stand aghast, Father Hooper snatched both his hands from beneath the bed-clothes, and pressed them strongly on the black veil, resolute to struggle if the minister of Westbury would contend with a dying man.

"Never!" cried the veiled clergyman. "On earth, never!"

"Dark old man!" exclaimed the affrighted minister, "with what horrible crime upon your soul are you now passing to the judgment?"

Father Hooper's breath heaved; it rattled in his throat; but with a mighty effort, grasping forward with his hands, he caught hold of life, and held it back till he should speak. He even raised himself in bed; and there he sat, shivering with the arms of death around him, while the black veil hung down, awful, at the last moment, in the gathered terrors of a lifetime. And yet the faint, sad smile, so often there, now seemed to glimmer from its obscurity, and linger on Father Hooper's lips.

"Why do you tremble at me alone?" cried he, turning his veiled face round the circle of pale spectators. "Trem-

---

83 Why . . . black veil. In his review of Twice-Told Tales, Poe commented on this story as follows "The moral put into the mouth of the dying minister will be supposed to convey the true import of the narrative, and that a crime of dark dye (having reference to the 'young lady') has been committed, is a point which only minds congenial with that of the author will perceive." Poe's interpretation, though allowable, and even plausible, is by no means strictly necessary. Hawthorne here, as in so many places in his fiction, leaves the question open

ble also at each other! Have men avoided me, and women shown no pity, and children screamed and fled, only for my black veil? What but the mystery which it obscurely typifies has made this piece of crape so awful? When the friend shows his inmost heart to his friend; the lover to his best beloved; when man does not vainly shrink from the eye of his Creator, loathsomely treasuring up the secret of his sin; then deem me a monster, for the symbol beneath which I have lived, and die! I look around me, and, lo! on every visage a black veil!"

While his auditors shrank from one another in mutual affright, Father Hooper fell back upon his pillow, a veiled corpse, with a faint smile lingering on the lips. Still veiled, they laid him in his coffin, and a veiled corpse they bore him to the grave. The grass of many years has sprung up and withered on that grave, the burial-stone is moss-grown, and good Mr. Hooper's face is dust; but awful is still the thought that it mouldered beneath the black veil!

1836

The Artist of the Beautiful

"The Artist of the Beautiful" was first published in the Democratic Review in 1844 and was reprinted in Mosses from an Old Manse in 1846. The story may be profitably studied as an allegory of all art, and particularly as an allegory of Hawthorne's art. The delicacy of the true artist's perceptions, his meticulous attention to detail, his devotion to an artistic ideal, his lack of appreciation by a materialistic world, his ultimate satisfaction and reward, not in popular acclaim but in artistic creation itself, are some of the points suggested by the allegory, and all of these points are applicable in Hawthorne's own case.

This story offers an excellent illustration not only of Hawthorne's ideas about art but also of his skill in embodying ideas in story form. Owen Warland, the artist, is an unworldly, sensitive youth, absorbed in artistic creation. Contrasted with this pale youth are intolerant old Peter Hovenden and Robert Danforth, the blacksmith. The descriptions of Danforth are representations of his attributes in terms of physical qualities. He is mighty of arm, shaggy-headed, and "his strong voice fills the shop as with the sound of a bass viol." Danforth's son is a miniature replica of his father, "a young child of strength"—with some of the sagacious shrewdness of his grandfather. The description of the jewel case is symbolical of Owen Warland's search, and the butterfly itself is so described as to indicate that which it symbolizes: "Nature's ideal butterfly was here realized in all its perfection. . . . The rich down was visible upon its wings; the lustre of its eyes seemed instinct with spirit . . . it glistened apparently by its own radiance, and illuminated the finger and outstretched hand on which it perched with a white gleam like that of precious stones."

The narrative sets forth the many difficulties and problems of the artist, each recounted in some detail. It indicates, also, his aims, his aesthetic struggles, the nature of his achievement, and its value to him.

An elderly man, with his pretty daughter on his arm, was passing along the street, and emerged from the gloom of the cloudy evening into the light that fell across the pavement from the window of a small shop. It was a projecting window; and on the inside were suspended a variety of watches, pinchbeck, silver, and one or two of gold, all with their faces turned from the streets, as if churlishly disinclined to inform the wayfarers what o'clock it was. Seated within the shop, sidelong to the window, with his pale face bent earnestly over some

---

6 pinchbeck, an alloy of copper and zinc, used to imitate gold in cheap jewelry

delicate piece of mechanism on which was thrown the concentrated lustre of a shade lamp, appeared a young man.

"What can Owen Warland be about?" muttered old Peter Hovenden, himself a retired watchmaker, and the former master of this same young man whose occupation he was now wondering at. "What can the fellow be about? These six months past I have never come by his shop without seeing him just as steadily at work as now. It would be a flight beyond his usual foolery to seek for the perpetual motion; and yet I know enough of my old business to be certain that what he is now so busy with is no part of the machinery of a watch."

"Perhaps, father," said Annie, without showing much interest in the question, "Owen is inventing a new kind of timekeeper. I am sure he has ingenuity enough."

"Poh, child! He has not the sort of ingenuity to invent anything better than a Dutch toy," answered her father, who had formerly been put to much vexation by Owen Warland's irregular genius. "A plague on such ingenuity! All the effect that ever I knew of it was to spoil the accuracy of some of the best watches in my shop. He would turn the sun out of its orbit and derange the whole course of time, if, as I said before, his ingenuity could grasp anything bigger than a child's toy!"

"Hush, father! He hears you!" whispered Annie, pressing the old man's arm. "His ears are as delicate as his feelings; and you know how easily disturbed they are. Do let us move on."

So Peter Hovenden and his daughter Annie plodded on without further conversation, until in a by-street of the town they found themselves passing the open door of a blacksmith's shop. Within was seen the forge, now blazing up and illuminating the high and dusky roof, and now confining its lustre to a narrow precinct of the coal-strewn floor, according as the breath of the bellows was puffed forth or again inhaled into its vast leathern lungs. In the intervals of brightness it was easy to distinguish objects in remote corners of the shop and the horseshoes that hung upon the wall; in the momentary gloom the fire seemed to be glimmering amidst the vagueness of uninclosed space. Moving about in this red glare and alternate dusk was the figure of the blacksmith, well worthy to be viewed in so picturesque an aspect of light and shade, where the bright blaze struggled with the black night, as if each would have snatched his comely strength from the other. Anon he drew a white-hot bar of iron from the coals, laid it on the anvil, uplifted his arm of might, and was soon enveloped in the myriads of sparks which the strokes of his hammer scattered into the surrounding gloom.

"Now, that is a pleasant sight," said the old watchmaker. "I know what it is to work in gold; but give me the worker in iron after all is said and done. He spends his labor upon a reality. What say you, daughter Annie?"

"Pray don't speak so loud, father," whispered Annie, "Robert Danforth will hear you."

"And what if he should hear me?" said Peter Hovenden. "I say again, it is a good and a wholesome thing to depend upon main strength and reality, and to earn one's bread with the bare and brawny arm of a blacksmith. A watchmaker gets his brain puzzled by his wheels within a wheel, or loses his health or the nicety of his eyesight, as was my case, and finds himself at middle age, or a little after, past labor at his own trade and fit for nothing else, yet too poor to live at his ease. So I say once again, give me main strength for my money. And then, how it takes the nonsense out of a man! Did you ever hear of a blacksmith being such a fool as Owen Warland yonder?"

"Well said, uncle Hovenden!" shouted Robert Danforth from the forge, in a full, deep, merry voice, that made the roof re-echo. "And what says Miss Annie to that doctrine? She, I suppose, will think it a genteeler business to tinker up a lady's watch than to forge a horseshoe or make a gridiron."

Annie drew her father onward without giving him time for reply.

But we must return to Owen Warland's shop, and spend more meditation upon his history and character than either Peter Hovenden, or probably his daughter Annie, or Owen's old school-fellow, Robert Danforth, would have thought due to so slight a subject. From the time that his little fingers could grasp a penknife, Owen had been remarkable for a delicate ingenuity, which sometimes produced pretty shapes in wood, principally figures of flowers and birds, and sometimes seemed to aim at the hidden mysteries of mechanism. But it was always

---

11 **seek . . . motion,** the attempt, often made in times past, to invent a machine perpetually supplying its own motive forces independently of any action from without

for purposes of grace, and never with any mockery of the useful. He did not, like the crowd of school-boy artisans, construct little windmills on the angle of a barn or watermills across the neighboring brook. Those who discovered such peculiarity in the boy as to think it worth their while to observe him closely, sometimes saw reason to suppose that he was attempting to imitate the beautiful movements of Nature as exemplified in the flight of birds or the activity of little animals. It seemed, in fact, a new development of the love of the beautiful, such as might have made him a poet, a painter, or a sculptor, and which was as completely refined from all utilitarian coarseness as it could have been in either of the fine arts. He looked with singular distaste at the stiff and regular processes of ordinary machinery. Being once carried to see a steam-engine, in the expectation that his intuitive comprehension of mechanical principles would be gratified, he turned pale and grew sick, as if something monstrous and unnatural had been presented to him. This horror was partly owing to the size and terrible energy of the iron laborer; for the character of Owen's mind was microscopic, and tended naturally to the minute, in accordance with his diminutive frame and the marvellous smallness and delicate power of his fingers. Not that his sense of beauty was thereby diminished into a sense of prettiness. The beautiful idea has no relation to size, and may be as perfectly developed in a space too minute for any but microscopic investigation as within the ample verge that is measured by the arc of the rainbow. But, at all events, this characteristic minuteness in his objects and accomplishments made the world even more incapable than it might otherwise have been of appreciating Owen Warland's genius. The boy's relatives saw nothing better to be done—as perhaps there was not—than to bind him apprentice to a watchmaker, hoping that his strange ingenuity might thus be regulated and put to utilitarian purposes.

Peter Hovenden's opinion of his apprentice has already been expressed. He could make nothing of the lad. Owen's apprehension of the professional mysteries, it is true, were inconceivably quick; but he altogether forgot or despised the grand object of a watchmaker's business, and cared no more for the measurement of time than if it had been merged into eternity. So long, however, as he remained under his old master's care, Owen's lack of sturdiness made it possible, by strict injunctions and sharp oversight, to restrain his creative eccentricity within bounds; but when his apprenticeship was served out, and he had taken the little shop which Peter Hovenden's failing eyesight compelled him to relinquish, then did people recognize how unfit a person was Owen Warland to lead old blind Father Time along his daily course. One of his most rational projects was to connect a musical operation with the machinery of his watches, so that all the harsh dissonances of life might be rendered tuneful, and each flitting moment fall into the abyss of the past in golden drops of harmony. If a family clock was intrusted to him for repair,—one of those tall, ancient clocks that have grown nearly allied to human nature by measuring out the lifetime of many generations,—he would take upon himself to arrange a dance or funeral procession of figures across its venerable face, representing twelve mirthful or melancholy hours. Several freaks of this kind quite destroyed the young watchmaker's credit with that steady and matter-of-fact class of people who hold the opinion that time is not to be trifled with, whether considered as the medium of advancement and prosperity in this world or preparation for the next. His custom rapidly diminished—a misfortune, however, that was probably reckoned among his better accidents by Owen Warland, who was becoming more and more absorbed in a secret occupation which drew all his science and manual dexterity into itself, and likewise gave full employment to the characteristic tendencies of his genius. This pursuit had already consumed many months.

After the old watchmaker and his pretty daughter had gazed at him out of the obscurity of the street, Owen Warland was seized with a fluttering of the nerves, which made his hand tremble too violently to proceed with such delicate labor as he was now engaged upon.

"It was Annie herself!" murmured he. "I should have known it, by this throbbing of my heart, before I heard her father's voice. Ah, how it throbs! I shall scarcely be able to work again on this exquisite mechanism to-night. Annie! dearest Annie! thou shouldst give firmness to my heart and hand, and not shake them thus; for if I strive to put the very spirit of beauty into form and give it

---

26 **The beautiful . . . rainbow.** Hawthorne perhaps thought of his work in the short tale as exemplifying this principle. The sentence is reminiscent of Ben Jonson's "In small proportions we just beauties see" from "A Pindaric Ode"

motion, it is for thy sake alone. O throbbing heart, be quiet! If my labor be thus thwarted, there will come vague and unsatisfied dreams which will leave me spiritless to-morrow."

As he was endeavoring to settle himself again to his task, the shop door opened and gave admittance to no other than the stalwart figure which Peter Hovenden had paused to admire, as seen amid the light and shadow of the blacksmith's shop. Robert Danforth had brought a little anvil of his own manufacture, and peculiarly constructed, which the young artist had recently bespoken. Owen examined the article and pronounced it fashioned according to his wish.

"Why, yes," said Robert Danforth, his strong voice filling the shop as with the sound of a bass viol, "I consider myself equal to anything in the way of my own trade; though I should have made but a poor figure at yours with such a fist as this," added he, laughing, as he laid his vast hand beside the delicate one of Owen. "But what then? I put more main strength into one blow of my sledge hammer than all that you have expended since you were a 'prentice. Is not that the truth?"

"Very probably," answered the low and slender voice of Owen. "Strength is an earthly monster. I make no pretensions to it. My force, whatever there may be of it, is altogether spiritual."

"Well, but, Owen, what are you about?" asked his old school-fellow, still in such a hearty volume of tone that it made the artist shrink, especially as the question related to a subject so sacred as the absorbing dream of his imagination. "Folks do say that you are trying to discover the perpetual motion."

"The perpetual motion? Nonsense!" replied Owen Warland, with a movement of disgust; for he was full of little petulances. "It can never be discovered. It is a dream that may delude men whose brains are mystified with matter, but not me. Besides, if such a discovery were possible, it would not be worth my while to make it only to have the secret turned to such purposes as are now effected by steam and water power. I am not ambitious to be honored with the paternity of a new kind of cotton machine."

"That would be droll enough!" cried the blacksmith, breaking out into such an uproar of laughter that Owen himself and the bell glasses on his work-board quivered in unison. "No, no, Owen! No child of yours will have iron joints and sinews. Well, I won't hinder you any more. Good night, Owen, and success, and if you need any assistance, so far as a downright blow of hammer upon anvil will answer the purpose, I'm your man."

And with another laugh the man of main strength left the shop.

"How strange it is," whispered Owen Warland to himself, leaning his head upon his hand, "that all my musings, my purposes, my passion for the beautiful, my consciousness of power to create it,—a finer, more ethereal power, of which this earthly giant can have no conception,—all, all, look so vain and idle whenever my path is crossed by Robert Danforth! He would drive me mad were I to meet him often. His hard, brute force darkens and confuses the spiritual element within me; but I, too, will be strong in my own way. I will not yield to him."

He took from beneath a glass a piece of minute machinery, which he set in the condensed light of his lamp, and, looking intently at it through a magnifying glass, proceeded to operate with a delicate instrument of steel. In an instant, however, he fell back in his chair and clasped his hands, with a look of horror on his face that made its small features as impressive as those of a giant would have been.

"Heaven! What have I done?" exclaimed he. "The vapor, the influence of that brute force,—it has bewildered me and obscured my perception. I have made the very stroke—the fatal stroke—that I have dreaded from the first. It is all over—the toil of months, the object of my life. I am ruined!"

And there he sat, in strange despair, until his lamp flickered in the socket and left the Artist of the Beautiful in darkness.

Thus it is that ideas, which grow up within the imagination and appear so lovely to it and of a value beyond whatever men call valuable, are exposed to be shattered and annihilated by contact with the practical. It is requisite for the ideal artist to possess a force of character that seems hardly compatible with its delicacy; he must keep his faith in himself while the incredulous world assails him with its utter disbelief; he must stand up against mankind and be his own sole disciple, both as respects his genius and the objects to which it is directed.

For a time Owen Warland succumbed to this severe but inevitable test. He spent a few sluggish weeks with his head so continually resting in his hands that the

towns-people had scarcely an opportunity to see his countenance. When at last it was again uplifted to the light of day, a cold, dull, nameless change was perceptible upon it. In the opinion of Peter Hovenden, however, and that order of sagacious understandings who think that life should be regulated, like clockwork, with leaden weights, the alteration was entirely for the better. Owen now, indeed, applied himself to business with dogged industry. It was marvellous to witness the obtuse gravity with which he would inspect the wheels of a great old silver watch; thereby delighting the owner, in whose fob it had been worn till he deemed it a portion of his own life, and was accordingly jealous of its treatment. In consequence of the good report thus acquired, Owen Warland was invited by the proper authorities to regulate the clock in the church steeple. He succeeded so admirably in this matter of public interest that the merchants gruffly acknowledged his merits on 'Change; the nurse whispered his praises as she gave the potion in the sick-chamber; the lover blessed him at the hour of appointed interview; and the town in general thanked Owen for the punctuality of dinner time. In a word, the heavy weight upon his spirits kept everything in order, not merely within his own system, but wheresoever the iron accents of the church clock were audible. It was a circumstance, though minute, yet characteristic of his present state, that, when employed to engrave names or initials on silver spoons, he now wrote the requisite letters in the plainest possible style, omitting a variety of fanciful flourishes that had heretofore distinguished his work in this kind.

One day, during the era of this happy transformation, old Peter Hovenden came to visit his former apprentice.

"Well, Owen," said he, "I am glad to hear such good accounts of you from all quarters, and especially from the town clock yonder, which speaks in your commendation every hour of the twenty-four. Only get rid altogether of your nonsensical trash about the beautiful, which I nor nobody else, nor yourself to boot, could ever understand, —only free yourself of that, and your success in life is as sure as daylight. Why, if you go on in this way, I should even venture to let you doctor this precious old watch of mine, though, except my daughter Annie, I have nothing else so valuable in the world."

"I should hardly dare touch it, sir," replied Owen, in a depressed tone; for he was weighed down by his old master's presence.

"In time," said the latter,—"in time, you will be capable of it."

The old watchmaker, with the freedom naturally consequent on his former authority, went on inspecting the work which Owen had in hand at the moment, together with other matters that were in progress. The artist, meanwhile, could scarcely lift his head. There was nothing so antipodal to his nature as this man's cold, unimaginative sagacity, by contact with which everything was converted into a dream except the densest matter of the physical world. Owen groaned in spirit and prayed fervently to be delivered from him.

"But what is this?" cried Peter Hovenden abruptly, taking up a dusty bell glass, beneath which appeared a mechanical something, as delicate and minute as the system of a butterfly's anatomy. "What have we here? Owen! Owen! there is witchcraft in these little chains, and wheels, and paddles. See! with one pinch of my finger and thumb I am going to deliver you from all future peril."

"For Heaven's sake," screamed Owen Warland, springing up with wonderful energy, "as you would not drive me mad, do not touch it! The slightest pressure of your finger would ruin me forever."

"Aha, young man! And is it so?" said the old watchmaker, looking at him with just enough of penetration to torture Owen's soul with the bitterness of worldly criticism. "Well, take your own course; but I warn you again that in this small piece of mechanism lives your evil spirit. Shall I exorcise him?"

"You are my evil spirit," answered Owen, much excited,—"you and the hard, coarse world! The leaden thoughts and the despondency that you fling upon me are my clogs, else I should long ago have achieved the task that I was created for."

Peter Hovenden shook his head, with the mixture of contempt and indignation which mankind, of whom he was partly a representative, deem themselves entitled to feel towards all simpletons who seek other prizes than the dusty one along the highway. He then took his leave, with an uplifted finger and a sneer upon his face that haunted the artist's dreams for many a night afterwards. At the time of his old master's visit, Owen was probably on the point of taking up the relinquished task; but, by this sinister event, he was thrown back into the state whence he had been slowly emerging.

But the innate tendency of his soul had only been accumulating fresh vigor during its apparent sluggishness. As the summer advanced he almost totally relinquished his business, and permitted Father Time, so far as the old gentleman was represented by the clocks and watches under his control, to stray at random through human life, making infinite confusion among the train of bewildered hours. He wasted the sunshine, as people said, in wandering through the woods and fields and along the banks of streams. There, like a child, he found amusement in chasing butterflies or watching the motions of water insects. There was something truly mysterious in the intentness with which he contemplated these living playthings as they sported on the breeze or examined the structure of an imperial insect whom he had imprisoned. The chase of butterflies was an apt emblem of the ideal pursuit in which he had spent so many golden hours; but would the beautiful idea ever be yielded to his hand like the butterfly that symbolized it? Sweet, doubtless, were these days, and congenial to the artist's soul. They were full of bright conceptions, which gleamed through his intellectual world as the butterflies gleamed through the outward atmosphere, and were real to him, for the instant, without the toil, and perplexity, and many disappointments of attempting to make them visible to the sensual eye Alas that the artist, whether in poetry, or whatever other material, may not content himself with the inward enjoyment of the beautiful, but must chase the flitting mystery beyond the verge of his ethereal domain, and crush its frail being in seizing it with material grasp. Owen Warland felt the impulse to give external reality to his ideas as irresistibly as any of the poets or painters who have arrayed the world in a dimmer and fainter beauty, imperfectly copied from the richness of their visions.

The night was now his time for the slow progress of re-creating the one idea to which all his intellectual activity referred itself. Always at the approach of dusk he stole into the town, locked himself within his shop, and wrought with patient delicacy of touch for many hours. Sometimes he was startled by the rap of the watchman, who, when all the world should be asleep, had caught the gleam of lamplight through the crevices of Owen Warland's shutters. Daylight, to the morbid sensibility of his mind, seemed to have an intrusiveness that interfered with his pursuits. On cloudy and inclement days, therefore, he sat with his head upon his hands, muffling, as it were, his sensitive brain in a mist of indefinite musings; for it was a relief to escape from the sharp distinctness with which he was compelled to shape out his thoughts during his nightly toil.

From one of these fits of torpor he was aroused by the entrance of Annie Hovenden, who came into the shop with the freedom of a customer, and also with something of the familiarity of a childish friend. She had worn a hole through her silver thimble, and wanted Owen to repair it.

"But I don't know whether you will condescend to such a task," said she, laughing, "now that you are so taken up with the notion of putting spirit into machinery."

"Where did you get that idea, Annie?" said Owen, starting in surprise.

"Oh, out of my own head," answered she, "and from something that I heard you say, long ago, when you were but a boy and I a little child. But come; will you mend this poor thimble of mine?"

"Anything for your sake, Annie," said Owen Warland, —"anything, even were it to work at Robert Danforth's forge."

"And that would be a pretty sight!" retorted Annie, glancing with imperceptible slightness at the artist's small and slender frame. "Well, here is the thimble"

"But that is a strange idea of yours," said Owen, "about the spiritualization of matter."

And then the thought stole into his mind that this young girl possessed the gift to comprehend him better than all the world besides. And what a help and strength would it be to him in his lonely toil if he could gain the sympathy of the only being whom he loved! To persons whose pursuits are insulated from the common business of life—who are either in advance of mankind or apart from it—there often comes a sensation of moral cold that makes the spirit shiver as if it had reached the frozen solitudes around the pole. What the prophet, the poet, the reformer, the criminal, or any other man with human yearnings, but separated from the multitude by a peculiar lot, might feel, poor Owen felt.

"Annie," cried he, growing pale as death at the thought, "how gladly would I tell you the secret of my pursuit! You, methinks, would estimate it rightly. You, I know, would hear it with a reverence that I must not expect from the harsh material world."

"Would I not? to be sure I would!" replied Annie Hovenden, lightly laughing. "Come; explain to me quickly what is the meaning of this little whirligig, so delicately wrought that it might be a plaything for Queen Mab. See! I will put it in motion."

"Hold!" exclaimed Owen, "hold!"

Annie had but given the slightest possible touch, with the point of a needle, to the same minute portion of complicated machinery which has been more than once mentioned, when the artist seized her by the wrist with a force that made her scream aloud. She was affrighted at the convulsion of intense rage and anguish that writhed across his features. The next instant he let his head sink upon his hands.

"Go, Annie," murmured he; "I have deceived myself, and must suffer for it. I yearned for sympathy and thought, and fancied, and dreamed that you might give it me; but you lack the talisman, Annie, that should admit you into my secrets. That touch has undone the toil of months and the thought of a lifetime! It was not your fault, Annie; but you have ruined me!"

Poor Owen Warland! He had indeed erred, yet pardonably; for if any human spirit could have sufficiently reverenced the processes so sacred in his eyes, it must have been a woman's. Even Annie Hovenden, possibly, might not have disappointed him had she been enlightened by the deep intelligence of love.

The artist spent the ensuing winter in a way that satisfied any persons who had hitherto retained a hopeful opinion of him that he was, in truth, irrevocably doomed to inutility as regarded the world, and to an evil destiny on his own part. The decease of a relative had put him in possession of a small inheritance. Thus freed from the necessity of toil, and having lost the steadfast influence of a great purpose,—great, at least, to him,—he abandoned himself to habits from which it might have been supposed the mere delicacy of his organization would have availed to secure him. But when the ethereal portion of a man of genius is obscured, the earthly part assumes an influence the more uncontrollable, because the character is now thrown off the balance to which Providence had so nicely adjusted it, and which, in coarser natures, is adjusted by some other method. Owen Warland made proof of whatever show of bliss may be found in riot. He looked at the world through the golden medium of wine, and contemplated the visions that bubble up so gayly around the brim of the glass, and that people the air with shapes of pleasant madness, which so soon grow ghostly and forlorn. Even when this dismal and inevitable change had taken place, the young man might still have continued to quaff the cup of enchantments, though its vapor did but shroud life in gloom and fill the gloom with spectres that mocked at him. There was a certain irksomeness of spirit, which, being real, and the deepest sensation of which the artist was now conscious, was more intolerable than any fantastic miseries and horrors that the abuse of wine could summon up. In the latter case he could remember, even out of the midst of his trouble, that all was but a delusion; in the former, the heavy anguish was his actual life.

From this perilous state he was redeemed by an incident which more than one person witnessed, but of which the shrewdest could not explain or conjecture the operation on Owen Warland's mind It was very simple. On a warm afternoon of spring, as the artist sat among his riotous companions with a glass of wine before him, a splendid butterfly flew in at the open window and fluttered about his head.

"Ah," exclaimed Owen, who had drank freely, "are you alive again, child of the sun and playmate of the summer breeze, after your dismal winter's nap? Then it is time for me to be at work!"

And, leaving his unemptied glass upon the table, he departed and was never known to sip another drop of wine.

And now, again, he resumed his wanderings in the woods and fields. It might be fancied that the bright butterfly, which had come so spirit-like into the window as Owen sat with the rude revellers, was indeed a spirit commissioned to recall him to the pure, ideal life that had so etherealized him among men. It might be fancied that he went forth to seek this spirit in its sunny haunts, for still, as in the summer time gone by, he was seen to steal gently up wherever a butterfly had alighted, and lose himself in contemplation of it. When it took flight his eyes followed the winged vision, as if its airy track would show the path to heaven. But what could be the purpose

---

5 **Queen Mab,** "the fairies' midwife," who delivers men of their dreams See the famous description in **Romeo and Juliet,** Act I, Scene iv, ll 53-94 Hawthorne's idea of a "spiritualized mechanism" as presented in this story may have owed something to Shakespeare's description of Queen Mab's chariot

of the unseasonable toil, which was again resumed, as the watchman knew by the lines of lamplight through the crevices of Owen Warland's shutters? The towns-people had one comprehensive explanation of all these singularities. Owen Warland had gone mad! How universally efficacious—how satisfactory, too, and soothing to the injured sensibility of narrowness and dulness—is this easy method of accounting for whatever lies beyond the world's most ordinary scope! From St. Paul's days down to our poor little Artist of the Beautiful, the same talisman had been applied to the elucidation of all mysteries in the words or deeds of men who spoke or acted too wisely or too well. In Owen Warland's case the judgment of his towns-people may have been correct. Perhaps he was mad. The lack of sympathy—that contrast between himself and his neighbors which took away the restraint of example—was enough to make him so. Or possibly he had caught just so much of the ethereal radiance as served to bewilder him, in an earthly sense, by its intermixture with the common daylight.

One evening, when the artist had returned from a customary ramble and had just thrown the lustre of his lamp on the delicate piece of work so often interrupted, but still taken up again, as if his fate were embodied in its mechanism, he was surprised by the entrance of old Peter Hovenden. Owen never met this man without a shrinking of the heart. Of all the world he was most terrible, by reason of a keen understanding which saw so distinctly what it did see, and disbelieved so uncompromisingly in what it could not see. On this occasion the old watchmaker had merely a gracious word or two to say.

"Owen, my lad," said he, "we must see you at my house to-morrow night."

The artist began to mutter some excuse.

"Oh, but it must be so," quoth Peter Hovenden, "for the sake of the days when you were one of the household. What, my boy! don't you know that my daughter Annie is engaged to Robert Danforth? We are making an entertainment, in our humble way, to celebrate the event."

"Ah!" said Owen.

That little monosyllable was all he uttered; its tone seemed cold and unconcerned to an ear like Peter Hovenden's; and yet there was in it the stifled outcry of the poor artist's heart, which he compressed within him like a man holding down an evil spirit. One slight outbreak, however, imperceptible to the old watchmaker, he allowed himself. Raising the instrument with which he was about to begin his work, he let it fall upon the little system of machinery that had, anew, cost him months of thought and toil. It was shattered by the stroke!

Owen Warland's story would have been no tolerable representation of the troubled life of those who strive to create the beautiful, if, amid all other thwarting influences, love had not interposed to steal the cunning from his hand. Outwardly he had been no ardent or enterprising lover; the career of his passion had confined its tumults and vicissitudes so entirely within the artist's imagination that Annie herself had scarcely more than a woman's intuitive perception of it; but, in Owen's view, it covered the whole field of his life. Forgetful of the time when she had shown herself incapable of any deep response, he had persisted in connecting all his dreams of artistical success with Annie's image; she was the visible shape in which the spiritual power that he worshipped, and on whose altar he hoped to lay a not unworthy offering, was made manifest to him. Of course he had deceived himself; there were no such attributes in Annie Hovenden as his imagination had endowed her with. She, in the aspect which she wore to his inward vision, was as much a creature of his own as the mysterious piece of mechanism would be were it ever realized. Had he become convinced of his mistake through the medium of successful love,—had he won Annie to his bosom, and there beheld her fade from angel into ordinary woman,—the disappointment might have driven him back, with concentrated energy, upon his sole remaining object. On the other hand, had he found Annie what he fancied, his lot would have been so rich in beauty that out of its mere redundancy he might have wrought the beautiful into many a worthier type than he had toiled for; but the guise in which his sorrow came to him, the sense that the angel of his life had been snatched away and given to a rude man of earth and iron, who could neither need nor appreciate her ministra-

9 St. Paul's. The reference is to Acts 26 24: ". . . Festus said with a loud voice, Paul, thou art beside thyself; much learning doth make thee mad"

tions,—this was the very perversity of fate that makes human existence appear too absurd and contradictory to be the scene of one other hope or one other fear. There was nothing left for Owen Warland but to sit down like a man that had been stunned.

He went through a fit of illness. After his recovery his small slender frame assumed an obtuser garniture of flesh than it had ever before worn. His thin cheeks became round; his delicate little hand, so spiritually fashioned to achieve fairy task-work, grew plumper than the hand of a thriving infant. His aspect had a childishness such as might have induced a stranger to pat him on the head—pausing, however, in the act, to wonder what manner of child was here. It was as if the spirit had gone out of him, leaving the body to flourish in a sort of vegetable existence. Not that Owen Warland was idiotic. He could talk, and not irrationally. Somewhat of a babbler, indeed, did people begin to think him; for he was apt to discourse at wearisome length of marvels of mechanism that he had read about in books, but which he had learned to consider as absolutely fabulous. Among them he enumerated the Man of Brass, constructed by Albertus Magnus, and the Brazen Head of Friar Bacon; and, coming down to later times, the automata of a little coach and horses, which it was pretended had been manufactured for the Dauphin of France; together with an insect that buzzed about the ear like a living fly, and yet was but a contrivance of minute steel springs. There was a story, too, of a duck that waddled, and quacked, and ate; though, had any honest citizen purchased it for dinner, he would have found himself cheated with the mere mechanical apparition of a duck.

"But all these accounts," said Owen Warland, "I am now satisfied are mere impositions."

Then, in a mysterious way, he would confess that he once thought differently. In his idle and dreamy days he had considered it possible, in a certain sense, to spiritualize machinery, and to combine with the new species of life and motion thus produced a beauty that should attain to the ideal which Nature has proposed to herself in all her creatures, but has never taken pains to realize. He seemed, however, to retain no very distinct perception either of the process of achieving this object or of the design itself.

"I have thrown it all aside now," he would say. "It was a dream such as young men are always mystifying themselves with. Now that I have acquired a little common sense, it makes me laugh to think of it."

Poor, poor and fallen Owen Warland! These were the symptoms that he had ceased to be an inhabitant of the better sphere that lies unseen around us. He had lost his faith in the invisible, and now prided himself, as such unfortunates invariably do, in the wisdom which rejected much that even his eye could see, and trusted confidently in nothing but what his hand could touch This is the calamity of men whose spiritual part dies out of them and leaves the grosser understanding to assimilate them more and more to the things of which alone it can take cognizance; but in Owen Warland the spirit was not dead nor passed away; it only slept.

How it awoke again is not recorded. Perhaps the torpid slumber was broken by a convulsive pain. Perhaps, as in a former instance, the butterfly came and hovered about his head and reinspired him,—as indeed this creature of the sunshine had always a mysterious mission for the artist,—reinspired him with the former purpose of his life. Whether it were pain or happiness that thrilled through his veins, his first impulse was to thank Heaven for rendering him again the being of thought, imagination, and keenest sensibility that he had long ceased to be.

"Now for my task," said he. "Never did I feel such strength for it as now."

Yet, strong as he felt himself, he was incited to toil the more diligently by an anxiety lest death should surprise him in the midst of his labors. This anxiety, perhaps, is common to all men who set their hearts upon anything so high, in their own view of it, that life becomes of importance only as conditional to its accomplishment. So long as we love life for itself, we seldom dread the losing it. When we desire life for the attainment of an object, we recognize the frailty of its texture. But, side by side with this sense of insecurity, there is a vital faith in our invulnerability to the shaft of death while engaged in any task that seems assigned by Provi-

23 **Albertus Magnus** (1193-1280), Bavarian philosopher and schoolman • 23 **Brazen . . . Bacon.** Friar Bacon (1214-1294) was an English philosopher who, according to legend, made a head of brass • 26 **Dauphin,** from 1349 to 1830, the title of the eldest son of the king of France; here the reference is specifically to the son of Louis XVI

dence as our proper thing to do, and which the world would have cause to mourn for should we leave it unaccomplished. Can the philosopher, big with the inspiration of an idea that is to reform mankind, believe that he is to be beckoned from this sensible existence at the very instant when he is mustering his breath to speak the word of light? Should he perish so, the weary ages may pass away—the world's, whose life sand may fall, drop by drop—before another intellect is prepared to develop the truth that might have been uttered then. But history affords many an example where the most precious spirit, at any particular epoch manifested in human shape, has gone hence untimely, without space allowed him, so far as mortal judgment could discern, to perform his mission on the earth. The prophet dies, and the man of torpid heart and sluggish brain lives on. The poet leaves his song half sung, or finishes it, beyond the scope of mortal ears, in a celestial choir. The painter—as Allston did—leaves half his conception on the canvas to sadden us with its imperfect beauty, and goes to picture forth the whole, if it be no irreverence to say so, in the hues of heaven. But rather such incomplete designs of this life will be perfected nowhere. This so frequent abortion of man's dearest projects must be taken as a proof that the deeds of earth, however etherealized by piety or genius, are without value, except as exercises and manifestations of the spirit. In heaven, all ordinary thought is higher and more melodious than Milton's song. Then, would he add another verse to any strain that he had left unfinished here?

But to return to Owen Warland. It was his fortune, good or ill, to achieve the purpose of his life. Pass we over a long space of intense thought, yearning effort, minute toil, and wasting anxiety, succeeded by an instant of solitary triumph: let all this be imagined; and then behold the artist, on a winter evening, seeking admittance to Robert Danforth's fireside circle There he found the man of iron, with his massive substance thoroughly warmed and attempered by domestic influences. And there was Annie, too, now transformed into a matron, with much of her husband's plain and sturdy nature, but imbued, as Owen Warland still believed, with a finer grace, that might enable her to be the interpreter between strength and beauty. It happened, likewise, that old Peter Hovenden was a guest this evening at his daughter's fireside, and it was his well-remembered expression of keen, cold criticism that first encountered the artist's glance.

"My old friend Owen!" cried Robert Danforth, starting up, and compressing the artist's delicate fingers within a hand that was accustomed to gripe bars of iron. "This is kind and neighborly to come to us at last. I was afraid your perpetual motion had bewitched you out of the remembrance of old times."

"We are glad to see you," said Annie, while a blush reddened her matronly cheek. "It was not like a friend to stay from us so long."

"Well, Owen," inquired the old watchmaker, as his first greeting, "how comes on the beautiful? Have you created it at last?"

The artist did not immediately reply, being startled by the apparition of a young child of strength that was tumbling about on the carpet,—a little personage who had come mysteriously out of the infinite, but with something so sturdy and real in his composition that he seemed moulded out of the densest substance which earth could supply. This hopeful infant crawled towards the new-comer, and setting himself on end, as Robert Danforth expressed the posture, stared at Owen with a look of such sagacious observation that the mother could not help exchanging a proud glance with her husband. But the artist was disturbed by the child's look, as imagining a resemblance between it and Peter Hovenden's habitual expression. He could have fancied that the old watchmaker was compressed into this baby shape, and looking out of those baby eyes, and repeating, as he now did, the malicious question:—

"The beautiful, Owen! How comes on the beautiful? Have you succeeded in creating the beautiful?"

"I have succeeded," replied the artist, with a momentary light of triumph in his eyes and a smile of sunshine, yet steeped in such depth of thought that it was almost sadness. "Yes, my friends, it is the truth. I have succeeded."

"Indeed!" cried Annie, a look of maiden mirthfulness peeping out of her face again. "And is it lawful now, to inquire what the secret is?"

"Surely; it is to disclose it that I have come," answered

---

3 **big**, pregnant • 8 **sand**, of the hourglass • 19 **Allston**. Washington Allston (1779-1843) left his picture "Belshazzar's Feast" unfinished at his death

Owen Warland. "You shall know, and see, and touch, and possess the secret! For, Annie,—if by that name I may still address the friend of my boyish years,—Annie, it is for your bridal gift that I have wrought this spiritualized mechanism, this harmony of motion, this mystery of beauty. It comes late, indeed; but it is as we go onward in life, when objects begin to lose their freshness of hue and our souls their delicacy of perception, that the spirit of beauty is most needed. If,—forgive me, Annie,—if you know how to value this gift, it can never come too late."

He produced, as he spoke, what seemed a jewel box. It was carved richly out of ebony by his own hand, and inlaid with a fanciful tracery of pearl, representing a boy in pursuit of a butterfly, which, elsewhere, had become a winged spirit, and was flying heavenward; while the boy, or youth, had found such efficacy in his strong desire that he ascended from earth to cloud, and from cloud to celestial atmosphere, to win the beautiful. This case of ebony the artist opened, and bade Annie place her finger on its edge. She did so, but almost screamed as a butterfly fluttered forth, and, alighting on her finger's tip, sat waving the ample magnificence of its purple and gold-speckled wings, as if in prelude to a flight. It is impossible to express by words the glory, the splendor, the delicate gorgeousness which were softened into the beauty of this object. Nature's ideal butterfly was here realized in all its perfection; not in the pattern of such faded insects as flit among earthly flowers, but of those which hover across the meads of paradise for child-angels and the spirits of departed infants to disport themselves with. The rich down was visible upon its wings; the lustre of its eyes seemed instinct with spirit. The firelight glimmered around this wonder—the candles gleamed upon it, but it glistened apparently by its own radiance, and illuminated the finger and outstretched hand on which it rested with a white gleam like that of precious stones. In its perfect beauty, the consideration of size was entirely lost. Had its wings overreached the firmament, the mind could not have been more filled or satisfied.

"Beautiful! beautiful!" exclaimed Annie. "Is it alive? Is it alive?"

"Alive? To be sure it is," answered her husband. "Do you suppose any mortal has skill enough to make a butterfly, or would put himself to the trouble of making one, when any child may catch a score of them in a summer's afternoon? Alive? Certainly! But this pretty box is undoubtedly of our friend Owen's manufacture; and really it does him credit."

At this moment the butterfly waved its wings anew, with a motion so absolutely lifelike that Annie was startled, and even awestricken; for, in spite of her husband's opinion, she could not satisfy herself whether it was indeed a living creature or a piece of wondrous mechanism.

"Is it alive?" she repeated, more earnestly than before.

"Judge for yourself," said Owen Warland, who stood gazing in her face with fixed attention.

The butterfly now flung itself upon the air, fluttered round Annie's head, and soared into a distant region of the parlor, still making itself perceptible to sight by the starry gleam in which the motion of its wings enveloped it. The infant on the floor followed its course with his sagacious little eyes. After flying about the room, it returned in a spiral curve and settled again on Annie's finger.

"But is it alive?" exclaimed she again; and the finger on which the gorgeous mystery had alighted was so tremulous that the butterfly was forced to balance himself with his wings. "Tell me if it be alive, or whether you created it."

"Wherefore ask who created it, so it be beautiful?" replied Owen Warland. "Alive? Yes, Annie; it may well be said to possess life, for it has absorbed my own being into itself; and in the secret of that butterfly, and in its beauty,—which is not merely outward, but deep as its whole system,—is represented the intellect, the imagination, the sensibility, the soul of an Artist of the Beautiful! Yes; I created it. But"—and here his countenance somewhat changed—"this butterfly is not now to me what it was when I beheld it afar off in the day-dreams of my youth."

"Be it what it may, it is a pretty plaything," said the blacksmith, grinning with childlike delight. "I wonder whether it would condescend to alight on such a great clumsy finger as mine? Hold it hither, Annie."

By the artist's direction, Annie touched her finger's tip to that of her husband; and, after a momentary delay, the butterfly fluttered from one to the other. It preluded a second flight by a similar, yet not precisely the same, waving of wings as in the first experiment; then, ascend-

ing from the blacksmith's stalwart finger, it rose in a gradually enlarging curve to the ceiling, made one wide sweep around the room, and returned with an undulating movement to the point whence it had started.

"Well, that does beat all nature!" cried Robert Danforth, bestowing the heartiest praise that he could find expression for; and, indeed, had he paused there, a man of finer words and nicer perception could not easily have said more. "That goes beyond me, I confess. But what then? There is more real use in one downright blow of my sledge hammer than in the whole five years' labor that our friend Owen has wasted on this butterfly."

Here the child clapped his hands and made a great babble of indistinct utterance, apparently demanding that the butterfly should be given him for a plaything.

Owen Warland, meanwhile, glanced sidelong at Annie, to discover whether she sympathized in her husband's estimate of the comparative value of the beautiful and the practical. There was, amid all her kindness towards himself, amid all the wonder and admiration with which she contemplated the marvelous work of his hands and incarnation of his idea, a secret scorn—too secret, perhaps, for her own consciousness, and perceptible only to such intuitive discernment as that of the artist. But Owen, in the latter stages of his pursuit, had risen out of the region in which such a discovery might have been torture. He knew that the world, and Annie as the representative of the world, whatever praise might be bestowed, could never say the fitting word nor feel the fitting sentiment which should be the perfect recompense of an artist who, symbolizing a lofty moral by a material trifle,—converting what was earthly to spiritual gold,—had won the beautiful into his handiwork. Not at this latest moment was he to learn that the reward of all high performance must be sought within itself, or sought in vain. There was, however, a view of the matter which Annie and her husband, and even Peter Hovenden, might fully have understood, and which would have satisfied them that the toil of years had here been worthily bestowed. Owen Warland might have told them that this butterfly, this plaything, this bridal gift of a poor watchmaker to a blacksmith's wife, was, in truth, a gem of art that a monarch would have purchased with honors and abundant wealth, and have treasured it among the jewels of his kingdom as the most unique and wondrous of them all. But the artist smiled and kept the secret to himself.

"Father," said Annie, thinking that a word of praise from the old watchmaker might gratify his former apprentice, "do come and admire this pretty butterfly."

"Let us see," said Peter Hovenden, rising from his chair, with a sneer upon his face that always made people doubt, as he himself did, in everything but a material existence. "Here is my finger for it to alight upon. I shall understand it better when once I have touched it."

But, to the increased astonishment of Annie, when the tip of her father's finger was pressed against that of her husband, on which the butterfly still rested, the insect drooped its wings and seemed on the point of falling to the floor. Even the bright spots of gold upon its wings and body, unless her eyes deceived her, grew dim, and the glowing purple took a dusky hue, and the starry lustre that gleamed around the blacksmith's hand became faint and vanished.

"It is dying! it is dying!" cried Annie, in alarm.

"It has been delicately wrought," said the artist, calmly. "As I told you, it has imbibed a spiritual essence—call it magnetism, or what you will. In an atmosphere of doubt and mockery its exquisite susceptibility suffers torture, as does the soul of him who instilled his own life into it It has already lost its beauty; in a few moments more its mechanism would be irreparably injured."

"Take away your hand, father!" entreated Annie, turning pale. "Here is my child; let it rest on his innocent hand. There, perhaps, its life will revive and its colors grow brighter than ever."

Her father, with an acrid smile, withdrew his finger. The butterfly then appeared to recover the power of voluntary motion, while its hues assumed much of their original lustre, and the gleam of starlight, which was its most ethereal attribute, again formed a halo round about it. At first, when transferred from Robert Danforth's hand to the small finger of the child, this radiance grew so powerful that it positively threw the little fellow's shadow back against the wall. He, meanwhile, extended his plump hand as he had seen his father and mother do, and watched the waving of the insect's wings with infantine delight. Nevertheless, there was a certain odd expression of sagacity that made Owen Warland feel

---

34 **the reward . . . itself.** Hawthorne here speaks in the tone of Milton's "Lycidas": " 'But not the praise,' Phoebus replied, and touched my trembling ears . . ."

as if here were old Peter Hovenden, partially, and but partially, redeemed from his hard scepticism into childish faith.

"How wise the little monkey looks!" whispered Robert Danforth to his wife.

"I never saw such a look on a child's face," answered Annie, admiring her own infant, and with good reason, far more than the artistic butterfly. "The darling knows more of the mystery than we do."

As if the butterfly, like the artist, were conscious of something not entirely congenial in the child's nature, it alternately sparkled and grew dim. At length it arose from the small hand of the infant with an airy motion that seemed to bear it upward without an effort, as if the ethereal instincts with which its master's spirit had endowed it impelled this fair vision involuntarily to a higher sphere. Had there been no obstruction, it might have soared into the sky and grown immortal. But its lustre gleamed upon the ceiling; the exquisite texture of its wings brushed against that earthly medium; and a sparkle or two, as of stardust, floated downward and lay glimmering on the carpet. Then the butterfly came fluttering down, and, instead of returning to the infant, was apparently attracted towards the artist's hand.

"Not so! not so!" murmured Owen Warland, as if his handiwork could have understood him. "Thou has gone forth out of thy master's heart. There is no return for thee."

With a wavering movement, and emitting a tremulous radiance, the butterfly struggled, as it were, towards the infant, and was about to alight upon his finger; but while it still hovered in the air, the little child of strength, with his grandsire's sharp and shrewd expression in his face, made a snatch at the marvellous insect and compressed it in his hand. Annie screamed. Old Peter Hovenden burst into a cold and scornful laugh. The blacksmith, by main force, unclosed the infant's hand, and found within the palm a small heap of glittering fragments, whence the mystery of beaury had fled forever. And as for Owen Warland, he looked placidly at what seemed the ruin of his life's labor, and which was yet no ruin. He had caught a far other butterfly than this. When the artist rose high enough to achieve the beautiful, the symbol by which he made it perceptible to mortal senses became of little value in his eyes while his spirit possessed itself in the enjoyment of the reality.

Rappaccini's Daughter

"Rappaccini's Daughter" is perhaps Hawthorne's most vivid and forceful study of the tragic isolation of an abnormal personality. The poison in Beatrice's physical nature symbolizes this abnormality, which has been produced by her solitary life. The flowers possibly symbolize her thoughts, solitary thoughts which other people cannot share. The story seems to mean that it is tragic to be so unlike other people that one is cut off from normal relations with them. "There was an awful doom," Hawthorne has Beatrice say, "the effect of my father's fatal love of science, which estranged me from all society of my kind. . . . I would fain have been loved, not feared." The story's interest is enhanced by the latitude of interpretation allowed the reader.

A secondary theme is Hawthorne's distrust of science, which he shared with other writers of the romantic generation, notably with Wordsworth ("A Poet's Epitaph"), Keats ("Lamia"), and Poe ("Sonnet to Science").

"Rappaccini's Daughter" was first published in the **Democratic Review** in 1844 and was reprinted in **Mosses from an Old Manse** in 1846.

A young man, named Giovanni Guasconti, came, very long ago, from the more southern region of Italy, to pursue his studies at the University of Padua. Giovanni, who had but a scanty supply of gold ducats in his pocket,

took lodgings in a high and gloomy chamber of an old edifice which looked not unworthy to have been the palace of a Paduan noble, and which, in fact, exhibited over its entrance the armorial bearings of a family long since extinct. The young stranger, who was not unstudied in the great poem of his country, recollected that one of the ancestors of this family, and perhaps an occupant of this very mansion, had been pictured by Dante as a partaker of the immortal agonies of his Inferno. These reminiscences and associations, together with the tendency to heartbreak natural to a young man for the first time out of his native sphere, caused Giovanni to sigh heavily as he looked around the desolate and ill-furnished apartment.

"Holy Virgin, signor!" cried old Dame Lisabetta, who, won by the youth's remarkable beauty of person, was kindly endeavoring to give the chamber a habitable air, "what a sigh was that to come out of a young man's heart! Do you find this old mansion gloomy? For the love of Heaven, then, put your head out of the window, and you will see as bright sunshine as you have left in Naples."

Guasconti mechanically did as the old woman advised, but could not quite agree with her that the Paduan sunshine was as cheerful as that of southern Italy. Such as it was, however, it fell upon a garden beneath the window and expended its fostering influences on a variety of plants, which seemed to have been cultivated with exceeding care.

"Does this garden belong to the house?" asked Giovanni.

"Heaven, forbid, signor, unless it were fruitful of better pot herbs than any that grow there now," answered old Lisabetta. "No, that garden is cultivated by the own hands of Signor Giacomo Rappaccini, the famous doctor, who, I warrant him, has been heard of as far as Naples. It is said that he distils these plants into medicines that are as potent as a charm Oftentimes you may see the signor doctor at work, and perchance the signora, his daughter, too, gathering the strange flowers that grow in the garden."

The old woman had now done what she could for the aspect of the chamber; and, commending the young man to the protection of the saints, took her departure.

Giovanni still found no better occupation than to look down into the garden beneath his window. From its appearance, he judged it to be one of those botanic gardens which were of earlier date in Padua than elsewhere in Italy or in the world. Or, not improbably, it might once have been the pleasure-place of an opulent family; for there was the ruin of a marble fountain in the centre, sculptured with rare art but so wofully shattered that it was impossible to trace the original design from the chaos of remaining fragments. The water, however, continued to gush and sparkle into the sunbeams as cheerfully as ever A little gurgling sound ascended to the young man's window, and made him feel as if the fountain were an immortal spirit that sung its song unceasingly and without heeding the vicissitudes around it, while one century imbodied it in marble and another scattered the perishable garniture on the soil All about the pool into which the water subsided grew various plants, that seemed to require a plentiful supply of moisture for the nourishment of gigantic leaves, and, in some instances, flowers gorgeously magnificent. There was one shrub in particular, set in a marble vase in the midst of the pool, that bore a profusion of purple blossoms, each of which had the lustre and richness of a gem; and the whole together made a show so resplendent that it seemed enough to illuminate the garden, even had there been no sunshine. Every portion of the soil was peopled with plants and herbs, which, if less beautiful, still bore tokens of assiduous care, as if all had their individual virtues, known to the scientific mind that fostered them. Some were placed in urns, rich with old carving, and others in common garden pots; some crept serpent-like along the ground or climbed on high, using whatever means of ascent was offered them One plant had wreathed itself round a statue of Vertumnus, which was thus quite veiled and shrouded in a drapery of hanging foliage, so happily arranged that it might have served a sculptor for a study.

While Giovanni stood at the window he heard a rustling behind a screen of leaves, and became aware that a person was at work in the garden. His figure soon emerged into view, and showed itself to be that of no common laborer, but a tall, emaciated, sallow, and sickly-looking man, dressed in a scholar's garb of black. He was beyond the middle term of life, with grey hair, a thin, grey beard, and a face singularly marked with in-

---

79 **Vertumnus,** Roman god of the changing year, or the seasons and their products

tellect and cultivation, but which could never, even in his more youthful days, have expressed much warmth of heart.

Nothing could exceed the intentness with which this scientific gardener examined every shrub which grew in his path: it seemed as if he was looking into their inmost nature, making observations in regard to their creative essence, and discovering why one leaf grew in this shape and another in that, and wherefore such and such flowers differed among themselves in hue and perfume. Nevertheless, in spite of this deep intelligence on his part, there was no approach to intimacy between himself and these vegetable existences. On the contrary, he avoided their actual touch or the direct inhaling of their odors with a caution that impressed Giovanni most disagreeably; for the man's demeanor was that of one walking among malignant influences, such as savage beasts, or deadly snakes, or evil spirits, which, should he allow them one moment of license, would wreak upon him some terrible fatality. It was strangely frightful to the young man's imagination to see this air of insecurity in a person cultivating a garden, that most simple and innocent of human toils, and which had been alike the joy and labor of the unfallen parents of the race Was this garden, then, the Eden of the present world? And this man, with such a perception of harm in what his own hands caused to grow,—was he the Adam?

The distrustful gardener, while plucking away the dead leaves or pruning the too luxuriant growth of the shrubs, defended his hands with a pair of thick gloves. Nor were these his only armor. When, in his walk through the garden, he came to the magnificent plant that hung its purple gems beside the marble fountain, he placed a kind of mask over his mouth and nostrils, as if all this beauty did but conceal a deadlier malice; but, finding his task still too dangerous, he drew back, removed the mask, and called loudly, but in the infirm voice of a person affected with inward disease,—

"Beatrice! Beatrice!"

"Here am I, my father. What would you?" cried a rich and youthful voice from the window of the opposite house—a voice as rich as a tropical sunset, and which made Giovanni, though he knew not why, think of deep hues of purple or crimson and of perfumes heavily delectable. "Are you in the garden?"

"Yes, Beatrice," answered the gardener, "and I need your help."

Soon there emerged from under a sculptured portal the figure of a young girl, arrayed with as much richness of taste as the most splendid of the flowers, beautiful as the day, and with a bloom so deep and vivid that one shade more would have been too much. She looked redundant with life, health, and energy; all of which attributes were bound down and compressed, as it were, and girdled tensely, in their luxuriance, by her virgin zone. Yet Giovanni's fancy must have grown morbid while he looked down into the garden; for the impression which the fair stranger made upon him was as if here were another flower, the human sister of those vegetable ones, as beautiful as they, more beautiful than the richest of them, but still to be touched only with a glove, nor to be approached without a mask. As Beatrice came down the garden path, it was observable that she handled and inhaled the odor of several of the plants which her father had most sedulously avoided.

"Here, Beatrice," said the latter, "see how many needful offices require to be done to our chief treasure. Yet, shattered as I am, my life might pay the penalty of approaching it so closely as circumstances demand. Henceforth, I fear, this plant must be consigned to your sole charge."

"And gladly will I undertake it," cried again the rich tones of the young lady, as she bent towards the magnificent plant and opened her arms as if to embrace it. "Yes, my sister, my splendor, it shall be Beatrice's task to nurse and serve thee; and thou shalt reward her with thy kisses and perfumed breath, which to her is as the breath of life."

Then, with all the tenderness in her manner that was so strikingly expressed in her words, she busied herself with such attentions as the plant seemed to require, and Giovanni, at his lofty window, rubbed his eyes and almost doubted whether it were a girl tending her favorite flower, or one sister performing the duties of affection to another. The scene soon terminated. Whether Dr. Rappaccini had finished his labors in the garden, or that his watchful eye had caught the stranger's face, he now took his daughter's arm and retired. Night was already closing in; oppressive exhalations seemed to proceed from the plants and steal upward past the open window, and Giovanni, closing the lattice, went to his couch and dreamed of a rich flower and beautiful girl. Flower and maiden were different, and yet the same, and fraught with some strange peril in either shape.

But there is an influence in the light of morning that tends to rectify whatever errors of fancy, or even of judgment, we may have incurred during the sun's decline, or among the shadows of the night, or in the less wholesome glow of moonshine. Giovanni's first movement, on starting from sleep, was to throw open the window and gaze down into the garden which his dreams had made so fertile of mysteries. He was surprised and a little ashamed to find how real and matter-of-fact an affair it proved to be, in the first rays of the sun which gilded the dew-drops that hung upon leaf and blossom, and, while giving a brighter beauty to each rare flower, brought everything within the limits of ordinary experience. The young man rejoiced that, in the heart of the barren city, he had the privilege of overlooking this spot of lovely and luxuriant vegetation. It would serve, he said to himself, as a symbolic language to keep him in communion with Nature. Neither the sickly and thought-worn Dr. Giacomo Rappaccini, it is true, nor his brilliant daughter, were now visible; so that Giovanni could not determine how much of the singularity which he attributed to both was due to their own qualities and how much to his wonder-working fancy; but he was inclined to take a most rational view of the whole matter.

In the course of the day he paid his respects to Signor Pietro Baglioni, professor of medicine in the university, a physician of eminent repute, to whom Giovanni had brought a letter of introduction. The professor was an elderly personage, apparently of genial nature, and habits that might almost be called jovial. He kept the young man to dinner, and made himself very agreeable by the freedom and liveliness of his conversation, especially when warmed by a flask or two of Tuscan wine. Giovanni, conceiving that men of science, inhabitants of the same city, must needs be on familiar terms with one another, took an opportunity to mention the name of Dr. Rappaccini. But the professor did not respond with so much cordiality as he had anticipated.

"Ill would it become a teacher of the divine art of medicine," said Professor Pietro Baglioni, in answer to a question of Giovanni, "to withhold due and well-considered praise of a physician so eminently skilled as Rappaccini; but, on the other hand, I should answer it but scantily to my conscience were I to permit a worthy youth like yourself, Signor Giovanni, the son of an ancient friend, to imbibe erroneous ideas respecting a man who might hereafter chance to hold your life and death in his hands. The truth is, our worshipful Dr. Rappaccini has as much science as any member of the faculty—with perhaps one single exception—in Padua, or all Italy; but there are certain grave objections to his professional character."

"And what are they?" asked the young man.

"Has my friend Giovanni any disease of body or heart, that he is so inquisitive about physicians?" said the professor, with a smile. "But as for Rappaccini, it is said of him—and I, who know the man well, can answer for its truth—that he cares infinitely more for science than for mankind. His patients are interesting to him only as subjects for some new experiment. He would sacrifice human life, his own among the rest, or whatever else was dearest to him, for the sake of adding so much as a grain of mustard seed to the great heap of his accumulated knowledge."

"Methinks he is an awful man indeed," remarked Guasconti, mentally recalling the cold and purely intellectual aspect of Rappaccini. "And yet, worshipful professor, is it not a noble spirit? Are there many men capable of so spiritual a love of science?"

"God forbid," answered the professor, somewhat testily; "at least, unless they take sounder views of the healing art than those adopted by Rappaccini. It is his theory that all medicinal virtues are comprised within those substances which we term vegetable poisons. These he cultivates with his own hands, and is said even to have produced new varieties of poison, more horribly deleterious than Nature, without the assistance of this learned person, would ever have plagued the world withal. That the signor doctor does less mischief than might be expected with such dangerous substances is undeniable. Now and then, it must be owned, he has effected, or seemed to effect, a marvellous cure; but, to tell you my private mind, Signor Giovanni, he should receive little credit for such instances of success,—they being probably the work of chance,—but should be held strictly accountable for his failures, which may justly be considered his own work."

The youth might have taken Baglioni's opinions with many grains of allowance had he known that there was a professional warfare of long continuance between him and Dr. Rappaccini, in which the latter was generally thought to have gained the advantage. If the reader be

inclined to judge for himself, we refer him to certain black-letter tracts on both sides, preserved in the medical department of the University of Padua.

"I know not, most learned professor," returned Giovanni, after musing on what had been said of Rappaccini's exclusive zeal for science,—"I know not how dearly this physician may love his art; but surely there is one object more dear to him. He has a daughter."

"Aha!" cried the professor, with a laugh. "So now our friend Giovanni's secret is out. You have heard of this daughter, whom all the young men in Padua are wild about, though not half a dozen have ever had the good hap to see her face. I know little of the Signora Beatrice save that Rappaccini is said to have instructed her deeply in his science, and that, young and beautiful as fame reports her, she is already qualified to fill a professor's chair. Perchance her father destines her for mine! Other absurd rumors there be, not worth talking about or listening to. So now, Signor Giovanni, drink off your glass of lachryma."

Guasconti returned to his lodgings somewhat heated with the wine he had quaffed, and which caused his brain to swim with strange fantasies in reference to Dr. Rappaccini and the beautiful Beatrice. On his way, happening to pass by a florist's, he bought a fresh bouquet of flowers.

Ascending to his chamber, he seated himself near the window, but within the shadow thrown by the depth of the wall, so that he could look down into the garden with little risk of being discovered. All beneath his eye was a solitude. The strange plants were basking in the sunshine, and now and then nodding gently to one another, as if in acknowledgment of sympathy and kindred. In the midst, by the shattered fountain, grew the magnificent shrub, with its purple gems clustering all over it; they glowed in the air, and gleamed back again out of the depths of the pool, which thus seemed to overflow with colored radiance from the rich reflection that was steeped in it. At first, as we have said, the garden was a solitude. Soon, however,—as Giovanni had half hoped, half feared, would be the case,—a figure appeared beneath the antique sculptured portal, and came down between the rows of plants, inhaling their various perfumes as if she were one of those beings of old classic fable that lived upon sweet odors. On again beholding Beatrice, the young man was even startled to perceive how much her beauty exceeded his recollection of it; so brilliant, so vivid, was its character, that she glowed amid the sunlight, and, as Giovanni whispered to himself, positively illuminated the more shadowy intervals of the garden path. Her face being now more revealed than on the former occasion, he was struck by its expression of simplicity and sweetness,—qualities that had not entered into his idea of her character, and which made him ask anew what manner of mortal she might be. Nor did he fail again to observe, or imagine, an analogy between the beautiful girl and the gorgeous shrub that hung its gem-like flowers over the fountain,—a resemblance which Beatrice seemed to have indulged a fantastic humor in heightening, both by the arrangement of her dress and the selection of its hues.

Approaching the shrub, she threw open her arms, as with a passionate ardor, and drew its branches into an intimate embrace—so intimate that her features were hidden in its leafy bosom and her glistening ringlets all intermingled with the flowers.

"Give me thy breath, my sister," exclaimed Beatrice; "for I am faint with common air. And give me this flower of thine, which I separate with gentlest fingers from the stem and place it close beside my heart."

With these words the beautiful daughter of Rappaccini plucked one of the richest blossoms of the shrub, and was about to fasten it in her bosom. But now, unless Giovanni's draughts of wine had bewildered his senses, a singular incident occurred. A small orange-colored reptile, of the lizard or chameleon species, chanced to be creeping along the path, just at the feet of Beatrice. It appeared to Giovanni,—but, at the distance from which he gazed, he could scarcely have seen anything so minute, —it appeared to him, however, that a drop or two of moisture from the broken stem of the flower descended upon the lizard's head. For an instant the reptile contorted itself violently, and then lay motionless in the sunshine. Beatrice observed this remarkable phenomenon, and crossed herself, sadly, but without surprise; nor did she therefore hesitate to arrange the fatal flower in her bosom. There it blushed, and almost glimmered with the dazzling effect of a precious stone, adding to her dress and aspect the one appropriate charm which nothing else

---

20 lachryma, a rich, sweet Neapolitan wine

in the world could have supplied. But Giovanni, out of the shadow of his window, bent forward and shrank back, and murmured and trembled.

"Am I awake? Have I my senses?" said he to himself. "What is this being? Beautiful shall I call her, or inexpressibly terrible?"

Beatrice now strayed carelessly through the garden, approaching closer beneath Giovanni's window, so that he was compelled to thrust his head quite out of its concealment in order to gratify the intense and painful curiosity which she excited. At this moment there came a beautiful insect over the garden wall; it had, perhaps, wandered through the city, and found no flowers or verdure among those antique haunts of men until the heavy perfumes of Dr. Rappaccini's shrubs had lured it from afar. Without alighting on the flowers, this winged brightness seemed to be attracted by Beatrice, and lingered in the air and fluttered about her head. Now, here it could not be but that Giovanni Guasconti's eyes deceived him. Be that as it might, he fancied that, while Beatrice was gazing at the insect with childish delight, it grew faint and fell at her feet; its bright wings shivered; it was dead—from no cause that he could discern, unless it were the atmosphere of her breath. Again Beatrice crossed herself and sighed heavily as she bent over the dead insect.

An impulsive movement of Giovanni drew her eyes to the window. There she beheld the beautiful head of the young man—rather a Grecian than an Italian head, with fair, regular features, and a glistening of gold among his ringlets—gazing down upon her like a being that hovered in mid air. Scarcely knowing what he did, Giovanni threw down the bouquet which he had hitherto held in his hand.

"Signora," said he," there are pure and healthful flowers. Wear them for the sake of Giovanni Guasconti."

"Thanks, signor," replied Beatrice, with her rich voice, that came forth as it were like a gush of music, and with a mirthful expression half childish and half woman-like. "I accept your gift, and would fain recompense it with this precious purple flower; but if I toss it into the air it will not reach you. So Signor Guasconti must even content himself with my thanks."

She lifted the bouquet from the ground, and then, as if inwardly ashamed at having stepped aside from her maidenly reserve to respond to a stranger's greeting, passed swiftly homeward through the garden. But few as the moments were, it seemed to Giovanni, when she was on the point of vanishing beneath the sculptured portal, that his beautiful bouquet was already beginning to wither in her grasp. It was an idle thought; there could be no possibility of distinguishing a faded flower from a fresh one at so great a distance.

For many days after this incident the young man avoided the window that looked into Dr. Rappaccini's garden, as if something ugly and monstrous would have blasted his eyesight had he been betrayed into a glance. He felt conscious of having put himself, to a certain extent, within the influence of an unintelligible power by the communication which he had opened with Beatrice. The wisest course would have been, if his heart were in any real danger, to quit his lodgings and Padua itself at once; the next wiser, to have accustomed himself, as far as possible, to the familiar and daylight view of Beatrice—thus bringing her rigidly and systematically within the limits of ordinary experience. Least of all, while avoiding her sight, ought Giovanni to have remained so near this extraordinary being that the proximity and possibility even of intercourse should give a kind of substance and reality to the wild vagaries which his imagination ran riot continually in producing. Guasconti had not a deep heart—or, at all events, its depths were not sounded now; but he had a quick fancy and an ardent southern temperament, which rose every instant to a higher fever pitch. Whether or no Beatrice possessed those terrible attributes, that fatal breath, the affinity with those so beautiful and deadly flowers which were indicated by what Giovanni had witnessed, she had at least instilled a fierce and subtle poison into his system. It was not love, although her rich beauty was a madness to him; nor horror, even while he fancied her spirit to be imbued with the same baneful essence that seemed to pervade her physical frame; but a wild offspring of both love and horror that had each parent in it, and burned like one and shivered like the other. Giovanni knew not what to dread; still less did he know what to hope; yet hope and dread kept a continual warfare in his breast, alternately vanquishing one another and starting up afresh to renew the contest. Blessed are all simple emotions, be they dark or bright! It is the lurid intermixture of the two that produces the illuminating blaze of the infernal regions.

Sometimes he endeavored to assuage the fever of his

spirit by a rapid walk through the streets of Padua or beyond its gates: his footsteps kept time with the throbbings of his brain, so that the walk was apt to accelerate itself to a race. One day he found himself arrested; his arm was seized by a portly personage, who had turned back on recognizing the young man and expended much breath in overtaking him.

"Signor Giovanni! Stay, my young friend!" cried he. "Have you forgotten me? That might well be the case if I were as much altered as yourself."

It was Baglioni, whom Giovanni had avoided ever since their first meeting, from a doubt that the professor's sagacity would look too deeply into his secrets. Endeavoring to recover himself, he stared forth wildly from his inner world into the outer one and spoke like a man in a dream.

"Yes; I am Giovanni Guasconti. You are Professor Pietro Baglioni. Now let me pass!"

"Not yet, not yet, Signor Giovanni Guasconti," said the professor, smiling, but at the same time scrutinizing the youth with an earnest glance. "What! did I grow up side by side with your father? and shall his son pass me like a stranger in these old streets of Padua? Stand still, Signor Giovanni; for we must have a word or two before we part."

"Speedily, then, most worshipful professor, speedily," said Giovanni, with feverish impatience. "Does not your worship see that I am in haste?"

Now, while he was speaking there came a man in black along the street, stooping and moving feebly like a person in inferior health. His face was all overspread with a most sickly and sallow hue, but yet so pervaded with an expression of piercing and active intellect that an observer might easily have overlooked the merely physical attributes and have seen only this wonderful energy. As he passed, this person exchanged a cold and distant salutation with Baglioni, but fixed his eyes upon Giovanni with an intentness that seemed to bring out whatever was within him worthy of notice. Nevertheless, there was a peculiar quietness in the look, as if taking merely a speculative, not a human, interest in the young man.

"It is Dr. Rappaccini!" whispered the professor when the stranger had passed. "Has he ever seen your face before?"

"Not that I know," answered Giovanni, starting at the name.

"He *has* seen you! he must have seen you!" said Baglioni, hastily. "For some purpose or other, this man of science is making a study of you. I know that look of his! It is the same that coldly illuminates his face as he bends over a bird, a mouse, or a butterfly, which, in pursuance of some experiment, he has killed by the perfume of a flower; a look as deep as Nature itself, but without Nature's warmth of love. Signor Giovanni, I will stake my life upon it, you are the subject of one of Rappaccini's experiments!"

"Will you make a fool of me?" cried Giovanni, passionately. "*That,* signor professor, were an untoward experiment."

"Patience! patience!" replied the imperturbable professor. "I tell thee, my poor Giovanni, that Rappaccini has a scientific interest in thee. Thou hast fallen into fearful hands! And the Signora Beatrice,—what part does she act in this mystery?"

But Guasconti, finding Baglioni's pertinacity intolerable, here broke away, and was gone before the professor could again seize his arm. He looked after the young man intently and shook his head.

"This must not be," said Baglioni to himself. "The youth is the son of my old friend, and shall not come to any harm from which the arcana of medical science can preserve him. Besides, it is too insufferable an impertinence in Rappaccini, thus to snatch the lad out of my own hands, as I may say, and make use of him for his infernal experiments. This daughter of his! It shall be looked to. Perchance, most learned Rappaccini, I may foil you where you little dream of it!"

Meanwhile Giovanni had pursued a circuitous route, and at length found himself at the door of his lodgings. As he crossed the threshold he was met by old Lisabetta, who smirked and smiled, and was evidently desirous to attract his attention; vainly, however, as the ebullition of his feelings had momentarily subsided into a cold and dull vacuity. He turned his eyes full upon the withered face that was puckering itself into a smile, but seemed to behold it not. The old dame, therefore, laid her grasp upon his cloak.

"Signor! signor!" whispered she, still with a smile over the whole breadth of her visage, so that it looked not unlike a grotesque carving in wood, darkened by centuries. "Listen, signor! There is a private entrance into the garden!"

"What do you say?" exclaimed Giovanni, turning quickly about, as if an inanimate thing should start into feverish life. "A private entrance into Dr. Rappaccini's garden?"

"Hush! hush! not so loud!" whispered Lisabetta, putting her hand over his mouth. "Yes; into the worshipful doctor's garden, where you may see all his fine shrubbery. Many a young man in Padua would give gold to be admitted among those flowers."

Giovanni put a piece of gold into her hand.

"Show me the way," said he.

A surmise, probably excited by his conversation with Baglioni, crossed his mind, that this interposition of old Lisabetta might perchance be connected with the intrigue, whatever were its nature, in which the professor seemed to suppose that Dr. Rappaccini was involving him. But such a suspicion, though it disturbed Giovanni, was inadequate to restrain him. The instant that he was aware of the possibility of approaching Beatrice, it seemed an absolute necessity of his existence to do so. It mattered not whether she were angel or demon; he was irrevocably within her sphere, and must obey the law that whirled him onward, in ever-lessening circles, towards a result which he did not attempt to foreshadow; and yet, strange to say, there came across him a sudden doubt whether this intense interest on his part were not delusory; whether it were really of so deep and positive a nature as to justify him in now thrusting himself into an incalculable position; whether it were not merely the fantasy of a young man's brain, only slightly or not at all connected with his heart.

He paused, hesitated, turned half about, but again went on. His withered guide led him along several obscure passages, and finally undid a door, through which, as it was opened, there came the sight and sound of rustling leaves, with the broken sunshine glimmering among them. Giovanni stepped forth, and, forcing himself through the entanglement of a shrub that wreathed its tendrils over the hidden entrance, stood beneath his own window in the open area of Dr. Rappaccini's garden.

How often is it the case that, when impossibilities have come to pass and dreams have condensed their misty substance into tangible realities, we find ourselves calm, and even coldly self-possessed, amid circumstances which it would have been a delirium of joy or agony to anticipate! Fate delights to thwart us thus. Passion will choose his own time to rush upon the scene, and lingers sluggishly behind when an appropriate adjustment of events would seem to summon his appearance. So was it now with Giovanni. Day after day his pulses had throbbed with feverish blood at the improbable idea of an interview with Beatrice, and of standing with her, face to face, in this very garden, basking in the Oriental sunshine of her beauty, and snatching from her full gaze the mystery which he deemed the riddle of his own existence. But now there was a singular and untimely equanimity within his breast. He threw a glance around the garden to discover if Beatrice or her father were present, and, perceiving that he was alone, began a critical observation of the plants.

The aspect of one and all of them dissatisfied him; their gorgeousness seemed fierce, passionate, and even unnatural. There was hardly an individual shrub which a wanderer, straying by himself through a forest, would not have been startled to find growing wild, as if an unearthly face had glared at him out of the thicket. Several also would have shocked a delicate instinct by an appearance of artificialness indicating that there had been such commixture, and, as it were, adultery, of various vegetable species, that the production was no longer of God's making, but the monstrous offspring of man's depraved fancy, glowing with only an evil mockery of beauty. They were probably the result of experiment, which in one or two cases had succeeded in mingling plants individually lovely into a compound possessing the questionable and ominous character that distinguished the whole growth of the garden. In fine, Giovanni recognized but two or three plants in the collection, and those of a kind that he well knew to be poisonous. While busy with these contemplations he heard the rustling of a silken garment, and, turning, beheld Beatrice emerging from beneath the sculptured portal.

Giovanni had not considered with himself what should be his deportment; whether he should apologize for his intrusion into the garden, or assume that he was there with the privity at least, if not by the desire, of Dr. Rappaccini or his daughter; but Beatrice's manner placed him at his ease, though leaving him still in doubt by what agency he had gained admittance. She came lightly along the path and met him near the broken fountain. There was surprise in her face, but brightened by a simple and kind expression of pleasure.

"You are a connoisseur in flowers, signor," said Beatrice, with a smile, alluding to the bouquet which he had flung her from the window. "It is no marvel, therefore, if the sight of my father's rare collection has tempted you to take a nearer view. If he were here, he could tell you many strange and interesting facts as to the nature and habits of these shrubs; for he has spent a lifetime in such studies, and this garden is his world."

"And yourself, lady," observed Giovanni, "if fame says true,—you likewise are deeply skilled in the virtues indicated by these rich blossoms and these spicy perfumes. Would you deign to be my instructress, I should prove an apter scholar than if taught by Signor Rappaccini himself."

"Are there such idle rumors?" asked Beatrice, with the music of a pleasant laugh. "Do people say that I am skilled in my father's science of plants? What a jest is there! No; though I have grown up among these flowers, I know no more of them than their hues and perfume; and sometimes methinks I would fain rid myself of even that small knowledge. There are many flowers here, and those not the least brilliant, that shock and offend me when they meet my eye. But pray, signor, do not believe these stories about my science. Believe nothing of me save what you see with your own eyes."

"And must I believe all that I have seen with my own eyes?" asked Giovanni, pointedly, while the recollection of former scenes made him shrink. "No, signora; you demand too little of me. Bid me believe nothing save what comes from your own lips."

It would appear that Beatrice understood him. There came a deep flush to her cheek; but she looked full into Giovanni's eyes, and responded to his gaze of uneasy suspicion with a queenlike haughtiness.

"I do so bid you, signor," she replied. "Forget whatever you may have fancied in regard to me. If true to the outward senses, still it may be false in its essence; but the words of Beatrice Rappaccini's lips are true from the depths of the heart outward. Those you may believe."

A fervor glowed in her whole aspect and beamed upon Giovanni's consciousness like the light of truth itself; but while she spoke there was a fragrance in the atmosphere around her, rich and delightful, though evanescent, yet which the young man, from an indefinable reluctance, scarcely dared to draw into his lungs. It might be the odor of the flowers. Could it be Beatrice's breath which thus embalmed her words with a strange richness, as if by steeping them in her heart? A faintness passed like a shadow over Giovanni and flitted away; he seemed to gaze through the beautiful girl's eyes into her transparent soul, and felt no more doubt or fear.

The tinge of passion that had colored Beatrice's manner vanished; she became gay, and appeared to derive a pure delight from her communion with the youth not unlike what the maiden of a lonely island might have felt conversing with a voyager from the civilized world. Evidently her experience of life had been confined within the limits of that garden. She talked now about matters as simple as the daylight or summer clouds, and now asked questions in reference to the city, or Giovanni's distant home, his friends, his mother, and his sisters—questions indicating such seclusion, and such lack of familiarity with modes and forms, that Giovanni responded as if to an infant. Her spirit gushed out before him like a fresh rill that was just catching its first glimpse of the sunlight and wondering at the reflections of earth and sky which were flung into its bosom. There came thoughts, too, from a deep source, and fantasies of a gemlike brilliancy, as if diamonds and rubies sparkled upward among the bubbles of the fountain. Ever and anon there gleamed across the young man's mind a sense of wonder that he should be walking side by side with the being who had so wrought upon his imagination, whom he had idealized in such hues of terror, in whom he had positively witnessed such manifestations of dreadful attributes,—that he should be conversing with Beatrice like a brother, and should find her so human and so maidenlike. But such reflections were only momentary; the effect of her character was too real not to make itself familiar at once.

In this free intercourse they had strayed through the garden, and now, after many turns among its avenues, were come to the shattered fountain, beside which grew the magnificent shrub, with its treasury of glowing blossoms. A fragrance was diffused from it which Giovanni recognized as identical with that which he had attributed to Beatrice's breath, but incomparably more powerful. As her eyes fell upon it, Giovanni beheld her press her hand to her bosom as if her heart were throbbing suddenly and painfully.

"For the first time in my life," murmured she, addressing the shrub, "I had forgotten thee."

"I remember, signora," said Giovanni, "that you once promised to reward me with one of these living gems for the bouquet which I had the happy boldness to fling to your feet. Permit me now to pluck it as a memorial of this interview."

He made a step towards the shrub with extended hand; but Beatrice darted forward, uttering a shriek that went through his heart like a dagger. She caught his hand and drew it back with the whole force of her slender figure. Giovanni felt her touch thrilling through his fibres.

"Touch it not!" exclaimed she, in a voice of agony. "Not for thy life! It is fatal!"

Then, hiding her face, she fled from him and vanished beneath the sculptured portal. As Giovanni followed her with his eyes, he beheld the emaciated figure and pale intelligence of Dr. Rappaccini, who had been watching the scene, he knew not how long, within the shadow of the entrance.

No sooner was Guasconti alone in his chamber than the image of Beatrice came back to his passionate musings, invested with all the witchery that had been gathering around it ever since his first glimpse of her, and now likewise imbued with a tender warmth of girlish womanhood. She was human; her nature was endowed with all gentle and feminine qualities; she was worthiest to be worshipped; she was capable, surely, on her part, of the height and heroism of love. Those tokens which he had hitherto considered as proofs of a frightful peculiarity in her physical and moral system were now either forgotten, or, by the subtle sophistry of passion transmitted into a golden crown of enchantment, rendering Beatrice the more admirable by so much as she was the more unique. Whatever had looked ugly was now beautiful; or, if incapable of such a change, it stole away and hid itself among those shapeless half ideas which throng the dim region beyond the daylight of our perfect consciousness. Thus did he spend the night, nor fell asleep until the dawn had begun to awake the slumbering flowers in Dr. Rappaccini's garden, whither Giovanni's dreams doubtless led him. Up rose the sun in his due season, and, flinging his beams upon the young man's eyelids, awoke him to a sense of pain. When thoroughly aroused, he became sensible of a burning and tingling agony in his hand—in his right hand—the very hand which Beatrice had grasped in her own when he was on the point of plucking one of the gemlike flowers. On the back of that hand there was now a purple print like that of four small fingers, and the likeness of a slender thumb upon his wrist.

Oh, how stubbornly does love,—or even that cunning semblance of love which flourishes in the imagination, but strikes no depth of root into the heart,—how stubbornly does it hold its faith until the moment comes when it is doomed to vanish into thin mist! Giovanni wrapped a handkerchief about his hand and wondered what evil thing had stung him, and soon forgot his pain in a reverie of Beatrice.

After the first interview, a second was in the inevitable course of what we call fate. A third; a fourth, and a meeting with Beatrice in the garden was no longer an incident in Giovanni's daily life, but the whole space in which he might be said to live; for the anticipation and memory of that ecstatic hour made up the remainder. Nor was it otherwise with the daughter of Rappaccini. She watched for the youth's apearance, and flew to his side with confidence as unreserved as if they had been playmates from early infancy—as if they were such playmates still. If, by any unwonted chance, he failed to come at the appointed moment, she stood beneath the window and sent up the rich sweetness of her tones to float around him in his chamber and echo and reverberate throughout his heart: "Giovanni! Giovanni! Why tarriest thou? Come down!" And down he hastened into that Eden of poisonous flowers.

But, with all this intimate familiarity, there was still a reserve in Beatrice's demeanor, so rigidly and invariably sustained that the idea of infringing it scarcely occurred to his imagination. By all appreciable signs, they loved; they had looked love with eyes that conveyed the holy secret from the depths of one soul into the depths of the other, as if it were too sacred to be whispered by the way; they had even spoken love in those gushes of passion when their spirits darted forth in articulated breath like tongues of long-hidden flame, and yet there had been no seal of lips, no clasp of hands, nor any slightest caress such as love claims and hallows. He had never touched one of the gleaming ringlets of her hair; her garment—so marked was the physical barrier between them—had never been waved against him by a breeze. On the few occasions when Giovanni had seemed tempted to overstep the limit, Beatrice grew so sad, so stern, and withal wore such a look of desolate separation,

shuddering at itself, that not a spoken word was requisite to repel him. At such times he was startled at the horrible suspicions that rose, monster-like, out of the caverns of his heart and stared him in the face; his love grew thin and faint as the morning mist, his doubts alone had substance. But, when Beatrice's face brightened again after the momentary shadow, she was transformed at once from the mysterious, questionable being whom he had watched with so much awe and horror; she was now the beautiful and unsophisticated girl whom he felt that his spirit knew with a certainty beyond all other knowledge.

A considerable time had now passed since Giovanni's last meeting with Baglioni. One morning, however, he was disagreeably surprised by a visit from the professor, whom he had scarcely thought of for whole weeks, and would willingly have forgotten still longer. Given up as he had long been to a pervading excitement, he could tolerate no companions except upon condition of their perfect sympathy with his present state of feeling. Such sympathy was not to be expected from Professor Baglioni.

The visitor chatted carelessly for a few minutes about the gossip of the city and the university, and then took up another topic.

"I have been reading an old classic author lately," said he, "and met with a story that strangely interested me. Possibly you may remember it. It is of an Indian prince, who sent a beautiful woman as a present to Alexander the Great. She was as lovely as the dawn and gorgeous as the sunset; but what especially distinguished her was a certain rich perfume in her breath—richer than a garden of Persian roses. Alexander, as was natural to a youthful conqueror, fell in love at first sight with this magnificent stranger; but a certain sage physician, happening to be present, discovered a terrible secret in regard to her."

"And what was that?" asked Giovanni, turning his eyes downward to avoid those of the professor.

"That this lovely woman," continued Baglioni, with emphasis, "had been nourished with poisons from her birth upward, until her whole nature was so imbued with them that she herself had become the deadliest poison in existence. Poison was her element of life. With that rich perfume of her breath she blasted the very air. Her love would have been poison—her embrace death. Is not this a marvellous tale?"

"A childish fable," answered Giovanni, nervously starting from his chair. "I marvel how your worship finds time to read such nonsense among your graver studies."

"By the by," said the professor, looking uneasily about him, "what singular fragrance is this in your apartment? Is it the perfume of your gloves? It is faint, but delicious; and yet, after all, by no means agreeable. Were I to breathe it long, methinks it would make me ill. It is like the breath of a flower, but I see no flowers in the chamber."

"Nor are there any," replied Giovanni, who had turned pale as the professor spoke, "nor, I think, is there any fragrance except in your worship's imagination. Odors, being a sort of element combined of the sensual and the spiritual, are apt to deceive us in this manner. The recollection of a perfume, the bare idea of it, may easily be mistaken for a present reality."

"Ay; but my sober imagination does not often play such tricks," said Baglioni; "and, were I to fancy any kind of odor, it would be that of some vile apothecary drug, wherewith my fingers are likely enough to be imbued. Our worshipful friend Rappaccini, as I have heard, tinctures his medicaments with odors richer than those of Araby. Doubtless, likewise, the fair and learned Signora Beatrice would minister to her patients with draughts as sweet as a maiden's breath; but woe to him that sips them!"

Giovanni's face evinced many contending emotions. The tone in which the professor alluded to the pure and lovely daughter of Rappaccini was a torture to his soul; and yet the intimation of a view of her character, opposite to his own, gave instantaneous distinctness to a thousand dim suspicions, which now grinned at him like so many demons. But he strove hard to quell them and to respond to Baglioni with a true lover's perfect faith

"Signor professor," said he, "you were my father's friend; perchance, too, it is your purpose to act a friendly part towards his son. I would fain feel nothing towards you save respect and deference; but I pray you to observe, signor, that there is one subject on which we must

24 **author.** The reference is to Sir Thomas Browne's **Pseudodoxia Epidemica**, Bk. VII, Chap 17. Hawthorne had copied in his notebooks "A story there passeth of an Indian King, that sent unto Alexander a fair woman fed with Aconites and other poysons, with this intent, either by converse or copulation complexionally to destroy him" • 68 **odors . . . Araby,** reminiscent of Shakespeare's "perfumes of Arabia," **Macbeth,** Act V, Scene i, l. 57

not speak. You know not the Signora Beatrice. You cannot, therefore, estimate the wrong—the blasphemy, I may even say—that is offered to her character by a light or injurious word."

"Giovanni! my poor Giovanni!" answered the professor, with a calm expression of pity, "I know this wretched girl far better than yourself. You shall hear the truth in respect to the poisoner Rappaccini and his poisonous daughter; yes, poisonous as she is beautiful. Listen; for, even should you do violence to my gray hairs, it shall not silence me. That old fable of the Indian woman has become a truth by the deep and deadly science of Rappaccini and in the person of the lovely Beatrice."

Giovanni groaned and hid his face.

"Her father," continued Baglioni, "was not restrained by natural affection from offering up his child in this horrible manner as the victim of his insane zeal for science; for, let us do him justice, he is as true a man of science as ever distilled his own heart in an alembic. What, then, will be your fate? Beyond a doubt you are selected as the material of some new experiment. Perhaps the result is to be death, perhaps a fate more awful still. Rappaccini, with what he calls the interest of science before his eyes, will hesitate at nothing."

"It is a dream," muttered Giovanni to himself; "surely it is a dream."

"But," resumed the professor, "be of good cheer, son of my friend. It is not yet too late for the rescue Possibly we may even succeed in bringing back this miserable child within the limits of ordinary nature, from which her father's madness has estranged her. Behold this little silver vase! It was wrought by the hands of the renowned Benvenuto Cellini, and is well worthy to be a love gift to the fairest dame in Italy. But its contents are invaluable. One little sip of this antidote would have rendered the most virulent poisons of the Borgias innocuous. Doubt not that it will be as efficacious against those of Rappaccini. Bestow the vase, and the precious liquid within it, on your Beatrice, and hopefully await the result."

Baglioni laid a small, exquisitely wrought silver vial on the table and withdrew, leaving what he had said to produce its effect upon the young man's mind.

"We will thwart Rappaccini yet," thought he, chuckling to himself, as he descended the stairs; "but, let us confess the truth of him, he is a wonderful man—a wonderful man indeed; a vile empiric, however, in his practice, and therefore not to be tolerated by those who respect the good old rules of the medical profession."

Throughout Giovanni's whole acquaintance with Beatrice, he had occasionally, as we have said, been haunted by dark surmises as to her character; yet so thoroughly had she made herself felt by him as a simple, natural, most affectionate, and guileless creature, that the image now held up by Professor Baglioni looked as strange and incredible as if it were not in accordance with his own original conception. True, there were ugly recollections connected with his first glimpses of the beautiful girl; he could not quite forget the bouquet that withered in her grasp, and the insect that perished amid the sunny air, by no ostensible agency save the fragrance of her breath. These incidents, however, dissolving in the pure light of her character, had no longer the efficacy of facts, but were acknowledged as mistaken fantasies, by whatever testimony of the senses they might appear to be substantiated. There is something truer and more real than what we can see with the eyes and touch with the finger. On such better evidence had Giovanni founded his confidence in Beatrice, though rather by the necessary force of her high attributes than by any deep and generous faith on his part. But now his spirit was incapable of sustaining itself at the height to which the early enthusiasm of passion had exalted it; he fell down, grovelling among earthly doubts, and defiled therewith the pure whiteness of Beatrice's image. Not that he gave her up; he did but distrust He resolved to institute some decisive test that should satisfy him, once for all, whether there were those dreadful peculiarities in her physical nature which could not be supposed to exist without some corresponding monstrosity of soul. His eyes, gazing down afar, might have deceived him as to the lizard, the insect, and the flowers; but if he could witness, at the distance of a few paces, the sudden blight of one fresh and healthful flower in Beatrice's hand, there would be room for no further question. With this idea he hastened to the florist's and purchased a bouquet that was still gemmed with the morning dew-drops.

---

34 **Benvenuto Cellini** (1500-1571), Italian author and artist in metal

• 37 **Borgias**, Cesare Borgia (1476-1507), Italian cardinal and military leader, and his sister, Lucrezia Borgia (1480-1519), both were wicked and unscrupulous

It was now the customary hour of his daily interview with Beatrice. Before descending into the garden, Giovanni failed not to look at his figure in the mirror,—a vanity to be expected in a beautiful young man, yet, as displaying itself at that troubled and feverish moment, the token of a certain shallowness of feeling and insincerity of character. He did gaze, however, and said to himself that his features had never before possessed so rich a grace, nor his eyes such vivacity, nor his cheeks so warm a hue of superabundant life.

"At least," thought he, "her poison has not yet insinuated itself into my system. I am no flower to perish in her grasp."

With that thought he turned his eyes on the bouquet, which he had never once laid aside from his hand. A thrill of indefinable horror shot through his frame on perceiving that those dewy flowers were already beginning to droop; they wore the aspect of things that had been fresh and lovely yesterday. Giovanni grew white as marble, and stood motionless before the mirror, staring at his own reflection there as at the likeness of something frightful. He remembered Baglioni's remark about the fragrance that seemed to pervade the chamber. It must have been the poison in his breath! Then he shuddered—shuddered at himself. Recovering from his stupor, he began to watch with curious eye a spider that was busily at work hanging its web from the antique cornice of the apartment, crossing and recrossing the artful system of interwoven lines—as vigorous and active a spider as ever dangled from an old ceiling. Giovanni bent towards the insect, and emitted a deep, long breath. The spider suddenly ceased its toil; the web vibrated with a tremor originating in the body of the small artisan. Again Giovanni sent forth a breath, deeper, longer, and imbued with a venomous feeling out of his heart: he knew not whether he were wicked, or only desperate. The spider made a convulsive gripe with his limbs and hung dead across the window.

"Accursed! accursed!" muttered Giovanni, addressing himself. "Hast thou grown so poisonous that this deadly insect perished by thy breath?"

At that moment a rich, sweet voice come floating up from the garden.

"Giovanni! Giovanni! It is past the hour! Why tarriest thou? Come down!"

"Yes," muttered Giovanni again."She is the only being whom my breath may not slay! Would that it might!"

He rushed down, and in an instant was standing before the bright and loving eyes of Beatrice. A moment ago his wrath and despair had been so fierce that he could have desired nothing so much as to wither her by a glance; but with her actual presence there came influences which had too real an existence to be at once shaken off: recollections of the delicate and benign power of her feminine nature, which had so often enveloped him in a religious calm; recollections of many a holy and passionate outgush of her heart, when the pure fountain had been unsealed from its depths and made visible in its transparency to his mental eye; recollections which, had Giovanni known how to estimate them, would have assured him that all this ugly mystery was but an earthly illusion, and that, whatever mist of evil might seem to have gathered over her, the real Beatrice was a heavenly angel. Incapable as he was of such high faith, still her presence had not utterly lost its magic. Giovanni's rage was quelled into an aspect of sullen insensibility. Beatrice, with a quick spiritual sense, immediately felt that there was a gulf of blackness between them which neither he nor she could pass. They walked on together, sad and silent, and came thus to the marble fountain and to its pool of water on the ground, in the midst of which grew the shrub that bore gem-like blossoms. Giovanni was affrighted at the eager enjoyment—the appetite, as it were—with which he found himself inhaling the fragrance of the flowers.

"Beatrice," asked he, abruptly, "whence came this shrub?"

"My father created it," answered she, with simplicity.

"Created it! created it!" repeated Giovanni. "What mean you, Beatrice?"

"He is a man fearfully acquainted with the secrets of Nature," replied Beatrice; "and, at the hour when I first drew breath, this plant sprang from the soil, the offspring of his science, of his intellect, while I was but his earthly child. Approach it not!" continued she, observing with terror that Giovanni was drawing nearer to the shrub. "It has qualities that you little dream of. But I, dearest Giovanni,—I grew up and blossomed with the plant and was nourished with its breath. It was my sister, and I loved it with a human affection; for, alas!— hast thou not suspected it?—there was an awful doom."

Here Giovanni frowned so darkly upon her that

Beatrice paused and trembled. But her faith in his tenderness reassured her, and made her blush that she had doubted for an instant.

"There was an awful doom," she continued, "the effect of my father's fatal love of science, which estranged me from all society of my kind. Until Heaven sent thee, dearest Giovanni, oh, how lonely was thy poor Beatrice!"

"Was it a hard doom?" asked Giovanni, fixing his eyes upon her.

"Only of late have I known how hard it was," answered she, tenderly. "Oh, yes; but my heart was torpid, and therefore quiet."

Giovanni's rage broke forth from his sullen gloom like a lightning flash out of a dark cloud.

"Accursed one!" cried he, with venomous scorn and anger. "And, finding thy solitude wearisome, thou hast severed me likewise from all the warmth of life and enticed me into thy region of unspeakable horror!"

"Giovanni!" exclaimed Beatrice, turning her large bright eyes upon his face. The force of his words had not found its way into her mind; she was merely thunderstruck.

"Yes, poisonous thing!" repeated Giovanni, beside himself with passion. "Thou hast done it! Thou hast blasted me! Thou hast filled my veins with poison! Thou hast made me as hateful, as ugly, as loathsome and deadly a creature as thyself—a world's wonder of hideous monstrosity! Now, if our breath be happily as fatal to ourselves as to all others, let us join our lips in one kiss of unutterable hatred, and so die!"

"What has befallen me?" murmured Beatrice, with a low moan out of her heart. "Holy Virgin, pity me, a poor heart-broken child!"

"Thou,—dost thou pray?" cried Giovanni, still with the same fiendish scorn. "Thy very prayers, as they come from thy lips, taint the atmosphere with death. Yes, yes; let us pray! Let us to church and dip our fingers in the holy water at the portal! They that come after us will perish as by a pestilence! Let us sign crosses in the air! It will be scattering curses abroad in the likeness of holy symbols!"

"Giovanni," said Beatrice, calmly, for her grief was beyond passion, "why dost thou join thyself with me thus in those terrible words? I, it is true, am the horrible thing thou namest me. But thou,—what hast thou to do, save with one other shudder at my hideous misery to go forth out of the garden and mingle with thy race, and forget that there ever crawled on earth such a monster as poor Beatrice?"

"Dost thou pretend ignorance?" asked Giovanni, scowling upon her. "Behold! this power have I gained from the pure daughter of Rappaccini."

There was a swarm of summer insects flitting through the air in search of the food promised by the flower odors of the fatal garden. They circled round Giovanni's head, and were evidently attracted towards him by the same influence which had drawn them for an instant within the sphere of several of the shrubs. He sent forth a breath among them, and smiled bitterly at Beatrice as at least a score of the insects fell dead upon the ground

"I see it! I see it!" shrieked Beatrice. "It is my father's fatal science! No, no, Giovanni; it was not I! Never! never! I dreamed only to love thee and be with thee a little time, and so to let thee pass away, leaving but thine image in mine heart; for, Giovanni, believe it, though my body be nourished with poison, my spirit is God's creature, and craves love as its daily food. But my father,—he has united us in this fearful sympathy. Yes; spurn me, tread upon me, kill me! Oh, what is death after such words as thine? But it was not I. Not for a world of bliss would I have done it."

Giovanni's passion had exhausted itself in its outburst from his lips. There now came across him a sense, mournful, and not without tenderness, of the intimate and peculiar relationship between Beatrice and himself. They stood, as it were, in an utter solitude, which would be made none the less solitary by the densest throng of human life. Ought not, then, the desert of humanity around them to press this insulated pair closer together? If they should be cruel to one another, who was there to be kind to them? Besides, thought Giovanni, might there not still be a hope of his returning within the limits of ordinary nature, and leading Beatrice, the redeemed Beatrice, by the hand? O, weak, and selfish, and unworthy spirit, that could dream of an earthly union and earthly happiness as possible, after such deep love had been so bitterly wronged as was Beatrice's love by Giovanni's blighting words! No, no; there could be no such hope. She must pass heavily, with that broken heart, across the borders of Time—she must bathe her hurts in some fount of paradise, and forget her grief in the light of immortality, and *there* be well.

But Giovanni did not know it.

"Dear Beatrice," said he, approaching her, while she shrank away as always at his approach, but now with a different impulse, "dearest Beatrice, our fate is not yet so desperate. Behold! there is a medicine, potent, as a wise physician has assured me, and almost divine in its efficacy. It is composed of ingredients the most opposite to those by which thy awful father has brought this calamity upon thee and me. It is distilled of blessed herbs. Shall we not quaff it together, and thus be purified from evil?"

"Give it me!" said Beatrice, extending her hand to receive the little silver vial which Giovanni took from his bosom. She added, with a peculiar emphasis, "I will drink; but do thou await the result."

She put Baglioni's antidote to her lips; and, at the same moment, the figure of Rappaccini emerged from the portal and came slowly towards the marble fountain. As he drew near, the pale man of science seemed to gaze with a triumphant expression at the beautiful youth and maiden, as might an artist who should spend his life in achieving a picture or a group of statuary and finally be satisfied with his success. He paused; his bent form grew erect with conscious power; he spread out his hands over them in the attitude of a father imploring a blessing upon his children; but those were the same hands that had thrown poison into the stream of their lives. Giovanni trembled. Beatrice shuddered nervously, and pressed her hand upon her heart.

"My daughter," said Rappaccini, "thou art no longer lonely in the world. Pluck one of those precious gems from thy sister shrub and bid thy bridegroom wear it in his bosom. It will not harm him now. My science and the sympathy between thee and him have so wrought within his system, that he now stands apart from common men, as thou dost, daughter of my pride and triumph, from ordinary women. Pass on, then, through the world, most dear to one another and dreadful to all besides!"

"My father," said Beatrice, feebly,—and still as she spoke she kept her hand upon her heart,—"wherefore didst thou inflict this miserable doom upon thy child?"

"Miserable!" exclaimed Rappaccini. "What mean you, foolish girl? Dost thou deem it misery to be endowed with marvellous gifts against which no power nor strength could avail an enemy—misery, to be able to quell the mightiest with a breath—misery, to be as terrible as thou art beautiful? Wouldst thou, then, have preferred the condition of a weak woman, exposed to all evil and capable of none?"

"I would fain have been loved, not feared," murmured Beatrice, sinking down upon the ground. "But now it matters not. I am going, father, where the evil which thou hast striven to mingle with my being will pass away like a dream—like the fragrance of these poisonous flowers, which will no longer taint my breath among the flowers of Eden. Farewell, Giovanni! Thy words of hatred are like lead within my heart; but they, too, will fall away as I ascend. Oh, was there not, from the first, more poison in thy nature than in mine?"

To Beatrice,—so radically had her earthly part been wrought upon by Rappaccini's skill,—as poison had been life, so the powerful antidote was death; and thus the poor victim of man's ingenuity and of thwarted nature, and of the fatality that attends all such efforts of perverted wisdom, perished there, at the feet of her father and Giovanni. Just at that moment Professor Pietro Baglioni looked forth from the window, and called loudly, in a tone of triumph mixed with horror, to the thunderstricken man of science,—

"Rappaccini! Rappaccini! and is *this* the upshot of your experiment!"

1844

Preface to "The House of the Seven Gables"

The following Preface is the best example of Hawthorne's criticism of his own writings. The critical points are generally applicable not only to **The House of the Seven Gables** but to his works as a whole. Of particular interest is his distinction between the "Novel" and the "Romance." As examples of the Novel, Hawthorne had in mind no doubt the works of such writers as Thackeray and Trollope. His own works he preferred to call "Romances."

In the preface to the **Scarlet Letter**, Hawthorne has symbolically indicated what he believes is the proper "atmosphere" for the creation of a "Romance": "Moonlight, in a familiar room, falling so white upon the carpet, and showing all its figures so distinctly,—making every object so minutely visible, yet so unlike a morning or noontide visibility,—is a medium the most suitable for a romance-writer to get acquainted with his illusive guests. There is the little domestic scenery of the well-known apartment . . . all . . . details, so completely seen, are so spiritualized by the unusual light, that they seem to lose their actual substance, and become things of intellect. Nothing is too small or too trifling to undergo this change, and acquire dignity thereby. A child's shoe; the doll . . . ; the hobby-horse,—whatever, in a word, has been used or played with, during the day, is now invested with a quality of strangeness and remoteness, though still almost as vividly present as by daylight. Thus, therefore, the floor of our familiar room has become a neutral territory, somewhere between the real world and fairy-land, where the Actual and the Imaginary may meet, and each imbue itself with the nature of the other."

When a writer calls his work a Romance, it need hardly be observed that he wishes to claim a certain latitude, both as to its fashion and material, which he would not have felt himself entitled to assume, had he professed to be writing a Novel. The latter form of composition is presumed to aim at a very minute fidelity, not merely to the possible, but to the probable and ordinary course of man's experience. The former—while, as a work of art, it must rigidly subject itself to laws, and while it sins unpardonably so far as it may swerve aside from the truth of the human heart—has fairly a right to present that truth under circumstances, to a great extent, of the writer's own choosing or creation. If he thinks fit, also, he may so manage his atmospherical medium as to bring out or mellow the lights, and deepen and enrich the shadows, of the picture. He will be wise, no doubt, to make a very moderate use of the privileges here stated, and, especially, to mingle the Marvelous rather as a slight, delicate, and evanescent flavor, than as any portion of the actual substance of the dish offered to the public. He can hardly be said, however, to commit a literary crime, even if he disregard this caution.

In the present work the author has proposed to himself —but with what success, fortunately, it is not for him to judge—to keep undeviatingly within his immunities. The point of view in which this tale comes under the Romantic definition lies in the attempt to connect a bygone time with the very present that is flitting away from us. It is a legend, prolonging itself, from an epoch now gray in the distance down into our own broad daylight, and bringing along with it some of its legendary mist, which the reader, according to his pleasure, may either disregard or allow it to float almost imperceptibly about the characters and events for the sake of a picturesque effect. The narrative, it may be, is woven of so humble a texture as to require this advantage, and, at the same time, to render it the more difficult of attainment.

Many writers lay very great stress upon some definite moral purpose, at which they profess to aim their works. Not to be deficient in this particular, the author has provided himself with a moral;—the truth, namely, that the wrongdoing of one generation lives into the successive ones, and, divesting itself of every temporary advantage, becomes a pure and uncontrollable mischief;—and he would feel it a singular gratification, if this romance

might effectually convince mankind—or, indeed, any one man—of the folly of tumbling down an avalanche of ill-gotten gold, or real estate, on the heads of an unfortunate posterity, thereby to maim and crush them, until the accumulated mass shall be scattered abroad in its original atoms. In good faith, however, he is not sufficiently imaginative to flatter himself with the slightest hope of this kind. When romances do really teach anything, or produce any effective operations, it is usually through a far more subtle process than the ostensible one. The author has considered it hardly worth his while, therefore, relentlessly to impale the story with its moral, as with an iron rod,—or, rather, as by sticking a pin through a butterfly,—thus at once depriving it of life, and causing it to stiffen in an ungainly and unnatural attitude A high truth, indeed, fairly, finely, and skillfully wrought out, brightening at every step, and crowning the final development of a work of fiction, may add an artistic glory, but is never any truer, and seldom any more evident, at the last page than at the first.

The reader may perhaps choose to assign an actual locality to the imaginary events of this narrative. If permitted by the historical connection,—which, though slight, was essential to his plan,—the author would very willingly have avoided anything of this nature. Not to speak of other objections, it exposes the romance to an inflexible and exceedingly dangerous species of criticism, by bringing his fancy-pictures almost into positive contact with the realities of the moment. It has been no part of his object, however, to describe local manners, nor in any way to meddle with the characteristics of a community for whom he cherishes a proper respect and a natural regard. He trusts not to be considered as unpardonably offending, by laying out a street that infringes upon nobody's private rights, and appropriating a lot of land which had no visible owner, and building a house, of materials long in use for constructing castles in the air. The personages of the tale—though they give themselves out to be of ancient stability and considerable prominence—are really of the author's own making, or, at all events, of his own mixing; their virtues can shed no luster, nor their defects redound, in the remotest degree, to the discredit of the venerable town of which they profess to be inhabitants. He would be glad, therefore, if—especially in the quarter to which he alludes—the book may be read strictly as a romance, having a great deal more to do with the clouds overhead than with any portion of the actual soil of the County of Essex.

DOWN EAST HUMORIST: Seba Smith

Seba Smith

1792 • 1868

When, in January 1830, Editor Seba Smith of the *Portland* (Maine) *Courier* decided he should do something to stimulate interest in his languishing newspaper, he invented the humorous character Jack Downing to say his say about contemporary politics. The homespun commentator was such a success that from 1830 down to the eve of the Civil War Smith turned out the "Downing Letters," important in the development of American humor and of a type of political argument destined to prove very significant in our national history.

Jack and the members of the Downing family who exchanged letters with him were both believable and

amusing. Smith's background had equipped him well for writing about Yankees, both authentically and humorously. Born in a Buckfield, Maine, log cabin, reared in Buckfield or other Down East towns until he was twenty-three, he was well acquainted with Yankee ways of thinking, talking, and living. The vividness with which he portrayed Downingville, the lifelikeness of the speech of the Downings, and the verisimilitude of their actions all made his rustics believable. (Emerson notes that his old Concord neighbor, Ezra Ripley, never could be persuaded that Jack was not a living man.) Smith's study at Bowdoin (1815-1818) and his travel in the South probably helped him acquire the objectivity often valuable for humor.

In addition to the appeals of the characterization and the humor, there was the appeal of the political satire. At first Smith had his hero wander into the Maine legislature and write naïvely about state politics. Later he had Jack go to Washington, D. C., and comment on national issues and personalities. Writing of his adventures in the Kitchen Cabinet (unofficial advisers) of Jackson and of his friendships with public men, Downing wittingly or unwittingly said laughable things about the partisan struggles of the day—the fight against the national bank, the nullification struggle, and others. This illiterate but shrewd common man discoursing on national affairs appealed to readers not only in the Jacksonian period which produced him but also in later periods, as he continued his letters during succeeding administrations. Frequently, newspaper wits nominated him for the governorship or the Presidency, and early cartoonists of the day who wanted a symbol for the United States often pictured Jack. Even today, Uncle Sam is simply Jack Downing with whiskers. Jack was the ancestor of a whole series of horse sense humorists, such as Hosea Biglow, Bill Arp, Kin Hubbard, and Will Rogers, who have delighted great masses of Americans and influenced their political thinking.

From

My Thirty Years Out of the Senate

Accompanied by a number of his official and unofficial advisers, President Jackson spent part of the summer of 1833 taking a trip which carried him to several of the

---

Panel (l. to r.)· News of the day • Storytelling session in a New England country store • The Yankee peddler

chief cities of the North. At each stop there were large demonstrations, partly because of the President's personal popularity, partly because of general approval in the North of his recent stand on nullification. Jack Downing, in his letter dated June 10, tells of the reception at Philadelphia. Subsequent letters, here reprinted, offer additional details about the journey.

MAJOR DOWNING SHAKES HANDS FOR THE PRESIDENT AT PHILADELPHIA, WHILE ON THE GRAND TOUR DOWN EAST

Philadelphia, June 10, 1833

To Uncle Joshua Downing, Postmaster, up in Downingville, in the State of Maine, with care and speed

Dear Uncle Joshua:—We are coming on, full chisel. I've been trying, ever since we started, to get a chance to write a little to you; but when we've been on the road I couldn't catch my breath hardly long enough to write my name, we kept flying so fast; and when we made any stop, there was such a jam around us there wasn't elbow room enough for a miskeeter to turn round without knocking his wings off.

I'm most afraid now we shall get to Downingville before this letter does, so that we shall be likely to catch you all in the suds before you think of it. But I understand there is a *fast mail* goes on that way, and I mean to send it by that, so I'm in hopes you'll get it time enough to have the children's faces washed and their heads combed, and the gals get on their clean gowns. And if Sargent Joel *could* have time enough to call out my old Downingville company and get their uniforms brushed up a little, and come down the road as fur as your new barn to meet us, there's nothing that would please the President better. As for victuals, most anything won't come amiss; we are as hungry as bears after traveling a hundred miles a day. A little fried pork and eggs, or a pot of baked beans and an Indian pudding would suit us much better than the soft stuff they give here in these great cities.

The President wouldn't miss of seeing you for anything in the world, and he will go to Downingville if he has legs and arms enough left when he goes to Portland to carry him there. But, for fear that anything should happen that he shouldn't be able to come, you had better meet us in Portland, say about the 22d; and then you can go up to Downingville with us.

This traveling with the President is capital fun, after all, if it wasn't so plaguy tiresome. We come into Baltimore on a railroad, and we flew over the ground like a harrycane. There isn't a horse in this country that could keep up with us, if he should go upon the clean clip. When we got to Baltimore, the streets were filled with folks as thick as the spruce trees down in your swamp. There we found Black Hawk, a little, old, dried up Indian king. And I thought the folks looked at him and the prophet about as much as they did at me and the President. I gave the President a wink that this Indian fellow was taking the shine off us a little; so we concluded we wouldn't have him with us any more, but go on without him.

I can't stop to tell you, in this letter, how we got along to Philadelphy, though we had a pretty easy time some of the way in the steamboats. And I can't stop to tell you of half of the fine things I have seen here. They took us up into a great hall this morning, as big as a meeting-house, and then the folks begun to pour in by thousands to shake hands with the President—Federalists and all, it made no difference. There was such a stream of 'em coming in that the hall was full in a few minutes, and it was so jammed up around the door that they couldn't get out again if they were to die. So they had to knock out some of the windows, and go out t'other way.

The President shook hands with all his might an hour or two, 'till he got so tired he couldn't hardly stand it. I took hold and shook for him once in a while to help him along, but at last he got so tired he had to lay down on a soft bench, covered with cloth, and shake as well as he could; and when he couldn't shake, he'd nod to 'em as they come along And at last he got so beat out, he couldn't only wrinkle his forehead and wink. Then I kind of stood behind him, and reached my arm round under his, and shook for him for about half an hour as tight as I could spring. Then we concluded it was best to adjourn for to-day.

And I've made out to get away up into the garret in the tavern long enough to write this letter. We shall be off tomorrow or next day for York; and if I can possibly get breathing time enough there, I shall write to you again.

Give my love to all the folks in Downingville, and believe me your loving neffu,

MAJOR JACK DOWNING

1833

MAJOR DOWNING DESCRIBES THE VISIT OF THE PRESIDENT AT BOSTON

Boston, Tuesday, June 25, 1833

To the Editor of the Portland Courier

My Dear Old Friend:—I'm keeping house with the President to-day, and bein' he's getting considerable better, I thought I'd catch a chance when he was taking a knap, and write a little to let you know how we get along. This ere sickness of the President has been a bad pull-back to us. He hasn't been able to go out since Sunday afternoon, and I've been watchin' with him this two nights, and if I wasn't as tough as a halter, I should be half dead by this time.

And if the President wasn't tougher than a catamount, he'd kick the bucket before he'd been round to see one half the notions there is in Boston. Poor man, he has a hard time of it; you've no idea how much he has to go through. It's worse than being dragged through forty knot-holes.

To be bamboozled about from four o'clock in the morning till midnight, rain or shine—jammed into one great house to eat a breakfast, and into another great house to eat a dinner, and into another to eat supper, and into two or three others between meals, to eat cooliations, and to have to go out and review three or four regiments of troops, and then to be jammed into Funnel Hall two hours, and shake hands with three or four thousand folks, and then to go into the State House and stand there two or three hours, and see all Boston streaming through it like a river through a saw-mill, and then to ride about the city awhile in a fine painted covered wagon, with four or five horses to draw it, and then ride awhile in one without any cover to it, finney-fined off to the top notch, and then get on to the horses and ride awhile a horseback, and then run into a great picture-room and see more fine pictures than you could shake a stick at in a week, and then go into some grand gentleman's house, and shake hands a half an hour with a flock of ladies, and then after supper go and have a little still kind of a hubbub all alone with three or four hundred particular friends, and talk an hour or two, and take another cooliation, and then go home, and about midnight get ready to go to bed, and up again at four o'clock the next morning and at it. And if this aint enough to tucker a feller out, I don't know what is. The President wouldn't have stood it till this time, if he hadn't sent me and Mr. Van Buren to some of the parties, while he staid at home to rest.

Jack shaking hands for the President.

The President's got so much better, I think we shall be able to start for Salem to-morrow, for we must go through with it now we've begun, as hard work as 'tis. I think we shall get to Portland about the 4th of July; so, if you get your guns and things all ready, you can kill two birds with one stone. I hope you'll be pretty careful there how you point your guns. They pointed 'em so careless at New York that a wad come within six inches of making daylight shine through the President.

Now I think on't, there is the most rascally set of fellers skulking about somewhere in this part of the country that ever I heard of, and I wish you would blow 'em up. They are worse than the pickpockets. I mean them are fellers that's got to writing letters and putting my name to 'em, and sending of 'em to the printers. And I heard there was one sassy feller last Saturday, down to Newburyport, that got on to a horse, and rid about town calling himself Major Jack Down-

ing, and all the soldiers and the folks marched up and shook hands with him, and thought it was me. Isn't it Mr. Shakespeare that says something about "he that steals my munnypus steals trash, but he that steals my name ought to have his head broke?" I wish you would find that story and print it.

Your old friend,

MAJOR JACK DOWNING

1833

THE PRESIDENT AND THE REST OF 'EM TURN A SHORT CORNER AT CONCORD, AND SET THEIR FACES TOWARD WASHINGTON

Concord, Nu Hamsheer, June 30, 1833

To the Editor of the Portland Courier

My Dear Old Friend.—The jig is all up about our going to Portland and Downingville, I've battled the watch with the President this two days about it, and told him he must go there if he had the breath of life in him; and he kept telling me he certainly would, if horses could carry him there.

But the President isn't very well, and that ain't the worst of it; there's been a little difficulty bruin' among us, and the President's got so riled about it, that he's finally concluded to start on his way back to-morrow. I can't help it; but I feel bad enough about it to cry a barrel of tears.

I don't know how they will stan' it in Downingville, when they come to get the news. I'm afraid there will be a master uproar there, for you know they are all great Demokrats. But the stage is jest agoing to start.

In haste, from your friend,

MAJOR JACK DOWNING

1833

COUSIN NABBY DESCRIBES THE UNUTTERABLE DISAPPOINTMENT AT DOWNINGVILLE BECAUSE THE PRESIDENT DIDN'T COME

Downingville, July 8, 1833

To the Editor of the Portland Courier

Respectable Sir:—As Cousin Jack is always so mity budge in writing letters to you, and as he and the President showed us a most provoking trick, and run off like a stream of chalk, back to Washington, without coming here, after they had promised over and over again that they would come, and we had got all slicked up and our clean gownds on, and more good victuals cooked than there ever was in all Downingville before—I say, Mr. Editor, I declare it's too bad; we are all as mad as blazes about it, and I mean to write and tell you all about it, if I live; and if Cousin Jack don't like it, he may lump it; so there now.

Ye see Cousin Jack writ to us that he and the President and some more gentlemen should be here the 4th of July, and we must spring to it and brush up and see how smart we could look, and how many fine things we could show to the President. This was a Saturday before the 4th of July come a Thursday. The letter was to Uncle Joshua, the Postmaster. Most all the folks in Downingville were at the Post-Office waiting when the mail come in, for we expected to hear from Jack.

Uncle Joshua put on his spettacles and opened the mail, and hauled out the papers and letters in a bunch. In a minute I see one to Uncle Joshua with the President's name on the outside; so I knew it was from Jack, for the President always puts his name on Jack's letters. We all cried out to Uncle Joshua to open it, and let us know what was in it. But he's such a provoking odd old man, he wouldn't touch it 'till he got every one of the papers and letters sorted and put up in their places. And then he took it and set down in his armchair, and took out his tobacker box and took a chaw of tobacker, and then he broke open the seal and sot and chawed and read to himself. We all stood tiptoe, with our hearts in our mouths, and he must needs read it over to himself three times, chawing his old quid, and once in a while giving us a knowing wink, before he would tell us what was in it. And he wouldn't tell us arter all, but, says he, "You must all be ready to put the best side out Thursday morning; there'll be business to attend to, such as Downingville never see before."

At that we all turned and run, and such a hubbub as we were in from that time 'till Thursday morning, I guess you never see. Such a washing and scrubbing, and making new clothes and mending old ones, and baking and cooking Every thing seemed to be in a clutter all over the neighborhood. Sargent Joel flew round like a ravin' distracted rooster. He called out his com-

pany every morning before sunrise, and marched 'em up and down the road three hours every day. He sent to the store and got a whole new set of buttons, and had 'em sowed on to his regimental coat, and had a new piece of red put round the collar. And had his trowses washed and his boots greased, and looked as though he might take the shine off of most anything. But the greatest rumpus was at Uncle Joshua's; for they said the President must stay there all night. And Ant Keziah was in such a pucker to have everything nice, I didn't know but she would fly off the handle.

She had every part of the house washed from garret to cellar, and the floors all sanded, and a bunch of green bushes put into all the fire places. And she baked three overn-full of dried punkin pies, besides a few dried huckleberry pies, and cake, and a great pot of pork and beans. But the worst trouble was to fix up the bed so as to look nice; for Ant Keziah declared the President should have as good a night's lodging in her house as he had in New York or Boston. So she put on two feather beds on top the straw bed, and a bran-new calico quilt that she made the first summer after she was married, and never put it on a bed before. And to make it look as nice as the New York beds, she took her red silk gown and ripped it up and made a blanket to spread over the top. And then she hung up some sheets all round the bedroom, and the gals brought in a whole handful of roses and pinks, and pinned 'em up round as thick as flies in August.

After we got things pretty much fixed, Uncle Joshua started off to meet Cousin Jack and the President, and left Sargent Joel to put matters to rights, and told us we must all be ready and be paraded in the road by nine o'clock Thursday morning. Well, Thursday morning come, and we all mustered as soon as it was daylight and dressed up. The children were all washed, and had their clean aprons on and their heads combed, and were put under the care of the schoolmarm, to be paraded along with her scholars.

About eight o'clock, all the village got together down the road as fur as Uncle Joshua's new barn; and Sargent Joel told us how to stand, as he said, in military order. He placed Bill Johnson and Cousin Ephraim out a little ways in front, with each of 'em a great long fowling piece with a smart charge in to fire a salute, and told 'em as soon as the President hove in sight to

The unutterable disappointment at Downingville.

let drive, only to be careful and pint their guns up, so as not to hurt anybody. Then come Sargent Joel and his company; and then come the schoolmarm and the children; and then come all the women and gals over sixteen with Ant Keziah at their head; and then come all the men in town that owned horses riding on horseback; and all the boys that Sargent Joel didn't think was large enough to walk in the procession got up and sot on the fences along by the side of the road.

There we stood 'till about nine o'clock, when, sure enough, we saw somebody come riding out of the woods down the hill. The boys all screamed, ready to split their throats, "Hoorah for Jackson," and Bill Johnson fired off his gun. Cousin Ephraim, who ain't so easily fluttered, held on to his and didn't fire, for he couldn't see anybody but Uncle Joshua on his old gray horse. Along come Uncle Joshua, on a slow trot, and we looked and looked, and couldn't see anybody coming behind him.

Then they all begun to look at one another as wild as hawks, and turn all manner of colors. When Uncle Joshua got up so we could see him pretty plain, he looked as cross as a thunder-cloud. He rid up to Sar-

gent Joel, and says he, "You may all go home about your business, for Jack and the President are half way to Washington by this time."

My stars! what a time there was then. I never see so many folks boiling over mad before. Bill Johnson threw his gun over into the field as much as ten rods, and hopped up and down, and struck his fists together like all possessed. Sargent Joel marched back and forth across the road two or three times, growing redder and redder, till at last he drew out his sword and fetched a blow across a hemlock stump, and snapped it off like a pipe-stem. Ant Keziah fell down in a conniption fit; and it was an hour before we could bring her tu and get her into the house. And when she come to go round the house and see the victuals she had cooked up, and go into the bedroom and see her gown all cut up, she went into conniption fits again. But she's better to-day, and has gone to work to try to patch up her gown again.

I thought I would jest let you know about these things, and if you are a mind to send word on to Cousin Jack and the President, I'm willing. You may tell 'em there aint five folks in Downingville that would hoorah for Jackson now, and hardly one that would vote for him, unless 'tis Uncle Joshua, and he wouldn't if he wasn't afraid of losing the Post-Office.

Your respected friend,

NABBY DOWNING

1833

Melville

Herman Melville

1819 • 1891

Herman Melville, whom John Freeman has called "the most powerful of all the great American writers," was born in New York City in 1819. When he was eleven years of age, his family moved to Albany, where he became a student in the Albany Academy. Two years later his father, a merchant, died in debt. During the seven ensuing years the boy was variously occupied, clerking in a bank and in his brother's store in Albany, working on his uncle's farm at Pittsfield. At the age of twenty, he shipped as a sailor on a merchantman bound for Liverpool. The reasons for his so doing we must take from *Redburn,* which appears to be a pretty literal account of Melville's own experiences: "Sad disappointments in several plans which I had sketched for my future life; the necessity of doing something for myself, united to a naturally roving disposition, had now conspired within me, to send me to sea as a sailor." After a short stay in Liverpool, where he was shocked by the brutality and misery of the great city, he returned with his ship, sobered and matured, one must believe, by this early introduction to a world of violence and crime. Of his life during the next three or four years little is known except that he taught school in Albany and Pittsfield and tried his hand at writing.

The most decisive event of Melville's life came on January 3, 1841, when at the age of twenty-one he shipped at New Bedford on the *Acushnet,* a whaler, for the South Seas. This whale-ship was for him, in the words of Ishmael in *Moby Dick,* "my Yale College and my Harvard." Melville was gone three years and nine

months, returning to Boston in October 1844. For his life during this period one is forced to draw largely upon *Typee, Omoo, White Jacket,* and *Moby Dick,* though Mr. C. R. Anderson has exposed some of the errors (in Mr. Mumford's biography, for example) which result from the unwary use of these fictional works for biographical purposes. The exact details of Melville's wanderings in the Pacific are in large measure still uncertain. But it is known that, after some eighteen months on the *Acushnet,* Melville deserted, July 9, 1842, at the Marquesas Islands. After a month or two among the cannibals he escaped to Tahiti; further travels may have taken him to Japan. Finally, on August 17, 1843, he joined the crew of the frigate *United States* at Honolulu and remained with this ship until his arrival at Boston more than a year later.

The eight or nine years following his return from his voyages were Melville's great productive period. He poured forth a veritable torrent of books: *Typee* (1846), *Omoo* (1847), *Mardi* (1849), *Redburn* (1849), *White Jacket* (1850), *Moby Dick* (1851), and *Pierre* (1852). It was inevitable, perhaps, that there should be a falling off after such extraordinary productivity. Melville seemed to have a premonitory sense of this in 1851, when, at the age of thirty-two, he wrote to Hawthorne: "From my twenty-fifth year I date my life. Three weeks have scarcely passed, at any time between then and now, that I have not unfolded within myself. But I feel that I am now come to the inmost leaf of the bulb, and that shortly the flower must fall to the mold." He lived on for forty years; but he failed to write another book as great as *Moby Dick,* and his productivity steadily diminished: *Israel Potter* (1855); *The Piazza Tales* (1856), which includes "Benito Cereno"; *The Confidence Man* (1857); two volumes of poetry, *Battle Pieces and Aspects of the War* (1866) and *Clarel* (1876); and *Billy Budd,* written near the end of his life and not published until 1924.

Mr. Thorp notes "five determining influences" in Melville's literary career: "the religious orthodoxy of his home, which left its imprint, though he revolted from it; his contact with the brutalities of a sailor's life and with savage societies which impelled him to question the premises of western civilization; his reading in philosophy and belles-lettres, which, though unmethodical, was prodigious between 1846 and 1851 [notably, Rabelais, Sir Thomas Browne, Shakespeare and other Elizabethan dramatists, the Bible, and Carlyle]; his friendships with artists and men of letters in New York who advanced his interests and educated him in his craft; and the sympathy of Hawthorne, which more than any other factor contributed to the fruition of his genius." This last influence is of special interest. From the summer of 1850 till the autumn of 1851, Melville and Hawthorne were near neighbors and frequent companions, the former residing at Pittsfield, the latter at Lenox. Melville was somewhat extravagant in his admiration of his new friend (see his extraordinary letters to Hawthorne, in Thorp's *Melville*); Hawthorne, though reserved and older, gave to Melville a sympathetic understanding such as he had not known before and would never know again. *Moby Dick* was dedicated

---

Panel (l. to r.)· Disaster • The clipper Nightingale • Herman Melville at 45 • Melville in the South Seas

to Hawthorne, and Hawthorne's letter of acknowledgment and appreciation—unfortunately lost, as are all of his letters to Melville—was to Melville a "joy-giving and exultation-breeding letter." After Hawthorne left the Berkshires, their friendly intimacy was interrupted; but in 1856, when Melville was on a recuperative journey to Italy and the Holy Land, the two men met again in England. After this meeting, Hawthorne wrote in his journal the best contemporary characterization of Melville that we have: "We took a pretty long walk together, and sat down in a hollow among the sand hills (sheltering ourselves from the high, cool wind) and smoked a cigar. Melville, as he always does, began to reason of Providence and futurity, and of everything that lies beyond human ken, and informed me that he had 'pretty much made up his mind to be annihilated'; but still he does not seem to rest in that anticipation; and, I think, will never rest until he gets hold of a definite belief. It is strange how he persists—and has persisted ever since I knew him, and probably long before—in wandering to-and-fro over these deserts, as dismal and monotonous as the sand hills amid which we were sitting. He can neither believe, nor be comfortable in his unbelief; and he is too honest and courageous not to try to do one or the other . . . he has a very high and noble nature . . . " *(The English Notebooks).*

Melville began, in *Typee* and *Omoo,* with delightful narratives of travels in the South Seas, written in a simple, straightforward style. There is no allegory here, and no bitterness, except for occasional satirical sallies at the missionaries and the "civilized" nations. *Redburn* and *White Jacket,* also, are simple narratives, though imbued with darker elements: the former delves into the slums of Liverpool; the latter is an angry exposure of the cruelties practiced on board a frigate of the American Navy. The transition to allegory came in *Mardi*—a confused and confusing book, effective in parts, but lacking integration. Melville reached his full stature in *Moby Dick,* a powerful allegory of good and evil. By this time, too, his prose style had changed from one of Defoe-like simplicity to one of magnificent rhythms, which, while recalling Sir Thomas Browne's, were Melville's own. *Pierre,* in which Melville attempted for the first time the structure of the novel, has something of the power of *Moby Dick,* though it is much less successful as literary art. Among the productions after 1852, one may mention "Benito Cereno" (1856) and *Billy Budd* (1890?) as deserving to rank with his best work, always excepting the matchless *Moby Dick. Billy Budd* is of special interest because the book shows that Melville retained his creative power and also because its conclusion may throw some light on Melville's state of mind in his old age. Both Ahab, in *Moby Dick,* and Pierre went down in defeat, and that defeat perhaps was Melville's own. Billy Budd, a handsome young sailor, goes down in defeat also—he is hanged for the accidental killing of a man. But his defeat is not one of defiance, like Ahab's, or of despair, like Pierre's. Just before the trap is sprung, he blesses the Captain, his friend, who, compelled by naval law, has pronounced the death sentence with great reluctance. Mr. Freeman finds here an indication that Melville achieved in his later years an inward peace, a reconciliation with life.

Melville's reputation as one of the very greatest of American writers dates from about 1920. His early works were enjoyed by many readers, most of whom, however, were estranged by the obscurity and pessimism of *Mardi, Moby Dick,* and *Pierre.* After about 1860, Melville was a forgotten author. There were always, to be sure, a few readers, particularly in England, who knew his books; but "oblivion" is hardly too strong a term to describe Melville's fate for a half century and more. The almost total eclipse of his fame is sufficiently attested by the fact that he was given just one sentence in Barrett Wendell's *Literary History of America,* published in 1900: "Herman Melville, with his books about the South Seas, which Robert Louis Stevenson is said to have declared the best ever written, and with his novels of maritime adventure, began a career of literary promise, which never came to fruition." The exciting rediscovery occurred in both England and America about the time of the centenary of Melville's birth. The enthusiasm of the 1920's may be explained in various ways. It is perhaps sufficient here to say that his splendid literary qualities were for the first time recognized by a considerable number of readers and that the postwar mood of disillusionment and despair vibrated sympathetically with the mood of *Moby Dick* and *Pierre.* His fame, tardily established, bids fair to continue with little, if any, abatement.

R. Anderson, Melville in the South Seas, New York, 1939

Benito Cereno

"Benito Cereno" was first printed serially in **Putnam's Monthly Magazine** in October, November, and December 1855, and was reprinted, with minor revisions, in **Piazza Tales** in 1856. Melville derived the principal facts of his narrative from Chapter XVIII of Amasa Delano's **Narrative of Voyages and Travels in the Northern and Southern Hemispheres . . .**, Boston, 1817; but the artistry which made of the facts a literary masterpiece was Melville's own. Delano's chapter is reprinted in Harold H. Scudder's "Melville's 'Benito Cereno' and Captain Delano's Voyages," **Publications of the Modern Language Association**, June 1928, XLIII.

The late Edward J. O'Brien regarded "Benito Cereno" as "the noblest short story in American literature" (**Twenty-Five Finest Short Stories**, New York, 1931). The story is indeed remarkable for its atmosphere and suggestion, its cumulative suspense, its horror, its pictorial qualities, its portrayal of contrasting types of character. Only in **Moby Dick** perhaps is Melville's power more fully revealed.

In the year 1799, Captain Amasa Delano, of Duxbury, in Massachusetts, commanding a large sealer and general trader, lay at anchor with a valuable cargo, in the harbor of St Maria—a small, desert, uninhabited island towards the southern extremity of the long coast of Chili. There he had touched for water.

On the second day, not long after dawn, while lying in his berth, his mate came below, informing him that a strange sail was coming into the bay. Ships were then not so plenty in those waters as now. He rose, dressed, and went on deck.

The morning was one peculiar to that coast. Everything was mute and calm; everything gray. The sea, though undulated into long roods of swells, seemed fixed, and was sleeked at the surface like waved lead that has cooled and set in the smelter's mould. The sky seemed a gray surtout. Flights of troubled gray fowl, kith and kin with flights of troubled gray vapors among which they were mixed, skimmed low and fitfully over the waters, as swallows over meadows before storms. Shadows present, foreshadowing deeper shadows to come.

To Captain Delano's surprise, the stranger, viewed through the glass, showed no colors; though to do so upon entering a haven, however unhabited in its shores, where but a single other ship might be lying, was the custom among peaceful seamen of all nations. Considering the lawlessness and loneliness of the spot, and the sort of stories, at that day, associated with those seas, Captain Delano's surprise might have deepened into some uneasiness had he not been a person of a singularly undistrustful good nature, not liable, except on extraordinary and repeated incentives, and hardly then, to indulge in personal alarms, any way involving the imputation of malign evil in man. Whether, in view of what humanity is capable, such a trait implies, along with a benevolent heart, more than ordinary quickness and accuracy of intellectual perception, may be left to the wise to determine.

But whatever misgivings might have obtruded on first seeing the stranger, would almost, in any seaman's mind, have been dissipated by observing that the ship, in navigating into the harbor, was drawing too near the land; a sunken reef making out off her bow. This seemed to prove her a stranger, indeed, not only to the sealer, but the island; consequently, she could be no wonted freebooter on that ocean. With no small interest, Captain Delano continued to watch her—a proceeding not much facilitated by the vapors partly mantling the hull, through which the far matin light from her cabin streamed equivocally enough; much like the sun—by this time hemisphered on the rim of the horizon, and, apparently, in company with the strange ship, entering the harbor—which, wimpled by the same low, creeping clouds, showed not unlike a Lima intriguante's one sinister eye peering

---

54 Lima, the capital of Peru • 54 intriguante, a woman who carries on an illicit love affair

across the Plaza from the Indian loop-hole of her dusk *saya-y-manta.*

It might have been but a deception of the vapors, but, the longer the stranger was watched the more singular appeared her manoeuvers. Ere long it seemed hard to decide whether she meant to come in or no—what she wanted, or what she was about. The wind, which had breezed up a little during the night, was now extremely light and baffling, which the more increased the apparent uncertainty of her movements.

Surmising, at last, that it might be a ship in distress, Captain Delano ordered his whale-boat to be dropped, and, much to the wary opposition of his mate, prepared to board her, and, at the least, pilot her in. On the night previous, a fishing-party of the seamen had gone a long distance to some detached rocks out of sight from the sealer, and, an hour or two before daybreak, had returned, having met with no small success. Presuming that the stranger might have been long off soundings, the good captain put several baskets of the fish, for presents, into his boat, and so pulled away. From her continuing too near the sunken reef, deeming her in danger, calling to his men, he made all haste to apprise those on board of their situation. But, some time ere the boat came up, the wind, light though it was, having shifted, had headed the vessel off, as well as partly broken the vapors from about her.

Upon gaining a less remote view, the ship, when made signally visible on the verge of the leaden-hued swells, with the shreds of fog here and there raggedly furring her, appeared like a white-washed monastery after a thunderstorm, seen perched upon some dun cliff among the Pyrenees. But it was no purely fanciful resemblance which now, for a moment, almost led Captain Delano to think that nothing less than a ship-load of monks was before him. Peering over the bulwarks were what really seemed, in the hazy distance, throngs of dark cowls; while, fitfully revealed through the open port-holes, other dark moving figures were dimly descried, as of Black Friars pacing the cloisters.

Upon a still nigher approach, this appearance was modified, and the true character of the vessel was plain —a Spanish merchantman of the first class, carrying Negro slaves, amongst other valuable freight, from one colonial port to another. A very large, and, in its time, a very fine vessel, such as in those days were at intervals encountered along that main; sometimes superseded Acapulco treasure-ships, or retired frigates of the Spanish king's navy, which, like superannuated Italian palaces, still, under a decline of masters, preserved signs of former state.

As the whale-boat drew more and more nigh, the cause of the peculiar pipe-clayed aspect of the stranger was seen in the slovenly neglect pervading her. The spars, ropes, and great part of the bulwarks, looked woolly, from long unacquaintance with the scraper, tar, and the brush. Her keel seemed laid, her ribs put together, and she launched, from Ezekiel's Valley of Dry Bones

In the present business in which she was engaged, the ship's general model and rig appeared to have undergone no material change from their original warlike and Froissart pattern However, no guns were seen.

The tops were large, and were railed about with what had once been octagonal net-work, all now in sad disrepair. These tops hung overhead like three ruinous aviaries, in one of which was seen perched on a ratlin, a white noddy, a strange fowl, so called from its lethargic somnambulistic character, being frequently caught by hand at sea. Battered and mouldy, the castellated forecastle seemed some ancient turret, long ago taken by assault, and then left to decay. Toward the stern, two high-raised quarter galleries—the balustrades here and there covered with dry, tindery sea-moss—opening out from the unoccupied state-cabin, whose dead-lights, for all the mild weather, were hermetically closed and calked —these tenantless balconies hung over the sea as if it were the grand Venetian canal. But the principal relic of faded grandeur was the ample oval of the shield-like stern-piece, intricately carved with the arms of Castile and Leon, medallioned about by groups of mythological or symbolical devices; uppermost and central of which was a dark satyr in a mask, holding his foot on the prostrate neck of a writhing figure, likewise masked.

Whether the ship had a figure-head, or only a plain beak, was not quite certain, owing to canvas wrapped about that part, either to protect it while undergoing a re-furbishing, or else decently to hide its decay. Rudely painted or chalked, as in a sailor freak, along the forward side of a sort of pedestal below the canvas, was the sentence, *"Seguid vuestro jefe"* (follow your leader); while upon the tarnished head-boards, near by, appeared, in stately capitals, once gilt, the ship's name "SAN DOMINICK," each letter streakingly corroded with tricklings of copper-spike rust; while, like mourning weeds, dark festoons of sea-grass slimily swept to and fro over the name, with every hearse-like roll of the hull.

As, at last, the boat was hooked from the bow along toward the gangway amidship, its keel, while yet some inches separated from the hull, harshly grated as on a sunken coral reef. It proved a huge bunch of conglobated barnacles adhering below the water to the side like a wen—a token of baffling airs and long calms passed somewhere in those seas.

Climbing the side, the visitor was at once surrounded by a clamorous throng of whites and blacks, but the latter outnumbering the former more than could have been expected, Negro transportation-ship as the stranger in port was. But, in one language, and as with one voice, all poured out a common tale of suffering; in which the Negresses, of whom there were not a few, exceeded the others in their dolorous vehemence. The scurvy, together with a fever, had swept off a great part of their number, more especially the Spaniards. Off Cape Horn, they had narrowly escaped shipwreck; then, for days together, they had lain tranced without wind; their provisions were low; their water next to none; their lips that moment were baked.

While Captain Delano was thus made the mark of all eager tongues, his one eager glance took in all the faces, with every other object about him.

Always upon first boarding a large and populous ship at sea, especially a foreign one, with a nondescript crew such as Lascars or Manilla men, the impression varies in a peculiar way from that produced by first entering a strange house with strange inmates in a strange land. Both house and ship—the one by its walls and blinds, the other by its high bulwarks like ramparts—hoard from view their interiors till the last moment; but in the case of the ship there is this addition: that the living spectacle it contains, upon its sudden and complete disclosure, has, in contrast with the blank ocean which zones it, something of the effect of enchantment. The ship seems unreal; these strange costumes, gestures, and faces, but a shadowy tableau just emerged from the deep, which directly must receive back what it gave.

Perhaps it was some such influence, as above is attempted to be described, which, in Captain Delano's mind, heightened whatever, upon a staid scrutiny, might have seemed unusual; especially the conspicuous figures of four elderly grizzled Negroes, their heads like black, doddered willow tops, who, in venerable contrast to the tumult below them, were couched sphynx-like, one on the starboard cat-head, another on the larboard, and the remaining pair face to face on the opposite bulwarks above the main-chains. They each had bits of unstranded old junk in their hands, and, with a sort of stoical self-content, were picking the junk into oakum, a small heap of which lay by their sides. They accompanied the task with a continuous, low, monotonous chant; droning and druling away like so many gray-headed bag-pipers playing a funeral march.

The quarter-deck rose into an ample elevated poop, upon the forward verge of which, lifted, like the oakum-pickers, some eight feet above the general throng, sat along in a row, separated by regular spaces, the cross-legged figures of six other blacks; each with a rusty hatchet in his hand, which, with a bit of brick and a rag, he was engaged like a scullion in scouring; while between each two was a small stack of hatchets, their rusted edges turned forward awaiting a like operation. Though occasionally the four oakum-pickers would briefly address some person or persons in the crowd below, yet the six hatchet-polishers neither spoke to others, nor breathed a whisper among themselves, but sat intent upon their task, except at intervals, when, with the peculiar love in Negroes of uniting industry with pastime, two-and-two they sideways clashed their hatchets together, like cymbals, with a barbarous din. All six, unlike the generality, had the raw aspect of unsophisticated Africans.

But that first comprehensive glance which took in

---

40 Lascars, East Indian sailors • 58 doddered, having lost their branches because of age or decay • 62 main-chains, attached to the mainmast

those ten figures, with scores less conspicuous, rested but an instant upon them, as, impatient of the hubbub of voices, the visitor turned in quest of whomsoever it might be that commanded the ship.

But as if not unwilling to let nature make known her own case among his suffering charge, or else in despair of restraining it for the time, the Spanish captain, a gentlemanly, reserved-looking, and rather young man to a stranger's eye, dressed with singular richness, but bearing plain traces of recent sleepless cares and disquietudes, stood passively by, leaning against the mainmast, at one moment casting a dreary, spiritless look upon his excited people, at the next an unhappy glance toward his visitor. By his side stood a black of small stature, in whose rude face, as occasionally, like a shepherd's dog, he mutely turned it up into the Spaniard's, sorrow and affection were equally blended.

Struggling through the throng, the American advanced to the Spaniard, assuring him of his sympathies, and offering to render whatever assistance might be in his power. To which the Spaniard returned for the present but grave and ceremonious acknowledgments, his national formality dusked by the saturnine mood of ill-health.

But losing no time in mere compliments, Captain Delano, returning to the gangway, had his basket of fish brought up; and as the wind still continued light, so that some hours at least must elapse ere the ship could be brought to the anchorage, he bade his men return to the sealer, and fetch back as much water as the whale-boat could carry, with whatever soft bread the steward might have, all the remaining pumpkins on board, with a box of sugar, and a dozen of his private bottles of cider.

Not many minutes after the boat's pushing off, to the vexation of all, the wind entirely died away, and the tide turning, began drifting back the ship helplessly seaward. But trusting this would not long last, Captain Delano sought, with good hopes, to cheer up the strangers, feeling no small satisfaction that, with persons in their condition he could—thanks to his frequent voyages along the Spanish main—converse with some freedom in their native tongue.

While left alone with them, he was not long in observing some things tending to heighten his first impressions; but surprise was lost in pity, both for the Spaniards and blacks, alike evidently reduced from scarcity of water and provisions; while long-continued suffering seemed to have brought out the less good-natured qualities of the Negroes, besides, at the same time, impairing the Spaniard's authority over them. But, under the circumstances, precisely this condition of things was to have been anticipated. In armies, navies, cities, or families, in nature herself, nothing more relaxes good order than misery. Still, Captain Delano was not without the idea, that had Benito Cereno been a man of greater energy, misrule would hardly have come to the present pass. But the debility, constitutional or induced by the hardships, bodily and mental, of the Spanish captain, was too obvious to be overlooked. A prey to settled dejection, as if long mocked with hope he would not now indulge it, even when it had ceased to be a mock, the prospect of that day or evening at furthest, lying at anchor, with plenty of water for his people, and a brother captain to counsel and befriend, seemed in no perceptible degree to encourage him. His mind appeared unstrung, if not still more seriously affected. Shut up in these oaken walls, chained to one dull round of command, whose unconditionality cloyed him, like some hypochondriac abbot he moved slowly about, at times suddenly pausing, starting, or staring, biting his lip, biting his finger-nail, flushing, paling, twitching his beard, with other symptoms of an absent or moody mind. This distempered spirit was lodged, as before hinted, in as distempered a frame. He was rather tall, but seemed never to have been robust, and now with nervous suffering was almost worn to a skeleton. A tendency to some pulmonary complaint appeared to have been lately confirmed. His voice was like that of one with lungs half gone—hoarsely suppressed, a husky whisper. No wonder that, as in this state he tottered about, his private servant apprehensively followed him. Sometimes the Negro gave his master his arm, or took his handkerchief out of his pocket for him; performing these and similar offices with that affectionate zeal which transmutes into something filial or fraternal acts in themselves but menial; and which has gained for the Negro the repute of making the most pleasing body-servant in the world, one, too, whom a master need be on no stiffly superior terms with, but may treat with familiar trust; less a servant than a devoted companion.

Marking the noisy indocility of the blacks in general, as well as what seemed the sullen inefficiency of the

whites, it was not without humane satisfaction that Captain Delano witnessed the steady good conduct of Babo.

But the good conduct of Babo, hardly more than the ill-behavior of others, seemed to withdraw the half-lunatic Don Benito from his cloudy languor. Not that such precisely was the impression made by the Spaniard on the mind of his visitor. The Spaniard's individual unrest was, for the present, but noted as a conspicuous feature in the ship's general affliction. Still, Captain Delano was not a little concerned at what he could not help taking for the time to be Don Benito's unfriendly indifference toward himself. The Spaniard's manner, too, conveyed a sort of sour and gloomy disdain, which he seemed at no pains to disguise. But this the American in charity ascribed to the harassing effects of sickness, since, in former instances, he had noted that there are peculiar natures on whom prolonged physical suffering seems to cancel every social instinct of kindness; as if forced to black bread themselves, they deemed it but equity that each person coming nigh them should, indirectly, by some slight or affront, be made to partake of their fare.

But ere long Captain Delano bethought him that, indulgent as he was at the first, in judging the Spaniard, he might not, after all, have exercised charity enough. At bottom it was Don Benito's reserve which displeased him; but the same reserve was shown toward all but his personal attendant Even the formal reports which, according to sea-usage, were at stated times made to him by some petty underling, either a white, mulatto or black, he hardly had patience enough to listen to, without betraying contemptuous aversion His manner upon such occasions was, in its degree, not unlike that which might be supposed to have been his imperial countryman's, Charles V., just previous to the anchoritish retirement of that monarch from the throne.

This splenetic disrelish of his place was evinced in almost every function pertaining to it. Proud as he was moody, he condescended to no personal mandate. Whatever special orders were necessary, their delivery was delegated to his body-servant, who in turn transferred them to their ultimate destination, through runners, alert Spanish boys or slave boys, like pages or pilot-fish within easy call continually hovering around Don Benito. So that to have beheld this undemonstrative invalid gliding about, apathetic and mute, no landsman could have dreamed that in him was lodged a dictatorship beyond which, while at sea, there was no earthly appeal.

Thus, the Spaniard, regarded in his reserve, seemed as the involuntary victim of mental disorder. But, in fact, his reserve might, in some degree, have proceeded from design. If so, then here was evinced the unhealthy climax of that icy though conscientious policy, more or less adopted by all commanders of large ships, which, except in signal emergencies, obliterates alike the manifestation of sway with every trace of sociality, transforming the man into a block, or rather into a loaded cannon, which, until there is call for thunder, has nothing to say.

Viewing him in this light, it seemed but a natural token of the perverse habit induced by a long course of such hard self-restraint, that, notwithstanding the present condition of his ship, the Spaniard should still persist in a demeanor, which, however harmless, or it may be, appropriate, in a well-appointed vessel, such as the San Dominick might have been at the outset of the voyage, was anything but judicious now. But the Spaniard, perhaps, thought that it was with captains as with gods. reserve, under all events, must still be their cue. But probably this appearance of slumbering dominion might have been but an attempted disguise to conscious imbecility—not deep policy, but shallow device. But be all this as it might, whether Don Benito's manner was designed or not, the more Captain Delano noted its pervading reserve, the less he felt uneasiness at any particular manifestation of that reserve toward himself.

Neither were his thoughts taken up by the captain alone Wonted to the quiet orderliness of the sealer's comfortable family of a crew, the noisy confusion of the San Dominick's suffering host repeatedly challenged his eye. Some prominent breaches, not only of discipline but of decency, were observed. These Captain Delano could not but ascribe, in the main, to the absence of those subordinate deck-officers to whom, along with higher duties, is entrusted what may be styled the police department of a populous ship. True, the old oakum-pickers appeared at times to act the part of monitorial constables to their countrymen, the blacks; but though

---

36 Charles V (1500-1558), Holy Roman Emperor and king of Spain • 44 pilot-fish, so named because often seen with a shark, as if acting as a pilot to the shark

occasionally succeeding in allaying trifling outbreaks now and then between man and man, they could do little or nothing toward establishing general quiet. The San Dominick was in the condition of a transatlantic emigrant ship, among whose multitude of living freight are some individuals, doubtless, as little troublesome as crates and bales, but the friendly remonstrances of such with their ruder companions are of not so much avail as the unfriendly arm of the mate. What the San Dominick wanted was, what the emigrant ship has, stern superior officers. But on these decks not so much as a fourth-mate was to be seen.

The visitor's curiosity was roused to learn the particulars of those mishaps which had brought about such absenteeism, with its consequences; because, though deriving some inkling of the voyage from the wails which at the first moment had greeted him, yet of the details no clear understanding had been had. The best account would, doubtless, be given by the captain. Yet at first the visitor was loth to ask it, unwilling to provoke some distant rebuff. But plucking up courage, he at last accosted Don Benito, renewing the expression of his benevolent interest, adding, that did he (Captain Delano) but know the particulars of the ship's misfortunes, he would, perhaps, be better able in the end to relieve them. Would Don Benito favor him with the whole story.

Don Benito faltered; then, like some somnambulist suddenly interfered with, vacantly stared at his visitor, and ended by looking down on the deck. He maintained this posture so long, that Captain Delano, almost equally disconcerted, and involuntarily almost as rude, turned suddenly from him, walking forward to accost one of the Spanish seamen for the desired information. But he had hardly gone five paces, when, with a sort of eagerness, Don Benito invited him back, regretting his momentary absence of mind, and professing readiness to gratify him.

While most part of the story was being given, the two captains stood on the after part of the main-deck, a privileged spot, no one being near but the servant.

"It is now a hundred and ninety days," began the Spaniard, in his husky whisper, "that this ship, well officered and well manned, with several cabin passengers—some fifty Spaniards in all—sailed from Buenos Ayres bound to Lima, with a general cargo, hardware, Paraguay tea and the like—and," pointing forward, "that parcel of Negroes, now not more than a hundred and fifty, as you see, but then numbering over three hundred souls. Off Cape Horn we had heavy gales. In one moment, by night, three of my best officers, with fifteen sailors, were lost, with the main-yard; the spar snapping under them in the slings, as they sought, with heavers, to beat down the icy sail. To lighten the hull, the heavier sacks of mata were thrown into the sea, with most of the water-pipes lashed on deck at the time. And this last necessity it was, combined with the prolonged detentions afterwards experienced, which eventually brought about our chief causes of suffering. When—"

Here there was a sudden fainting attack of his cough, brought on, no doubt, by his mental distress. His servant sustained him, and drawing a cordial from his pocket placed it to his lips. He a little revived. But unwilling to leave him unsupported while yet imperfectly restored, the black with one arm still encircled his master, at the same time keeping his eye fixed on his face, as if to watch for the first sign of complete restoration, or relapse, as the event might prove.

The Spaniard proceeded, but brokenly and obscurely, as one in a dream.

—"Oh, my God! rather than pass through what I have, with joy I would have hailed the most terrible gales; but—"

His cough returned and with increased violence; this subsiding, with reddened lips and closed eyes he fell heavily against his supporter.

"His mind wanders. He was thinking of the plague that followed the gales," plaintively sighed the servant; "my poor, poor master!" wringing one hand, and with the other wiping the mouth. "But be patient, Señor," again turning to Captain Delano, "these fits do not last long; master will soon be himself."

Don Benito reviving, went on; but as this portion of the story was very brokenly delivered, the substance only will here be set down.

It appeared that after the ship had been many days tossed in storms off the Cape, the scurvy broke out, carrying off numbers of the whites and blacks. When at last they had worked round into the Pacific, their spars and sails were so damaged, and so inadequately handled

---

54 water-pipes, large casks of water

by the surviving mariners, most of whom were become invalids, that, unable to lay her northerly course by the wind, which was powerful, the unmanageable ship, for successive days and nights, was blown northwestward, where the breeze suddenly deserted her, in unknown waters, to sultry calms. The absence of the water-pipes now proved as fatal to life as before their presence had menaced it. Induced, or at least aggravated, by the more than scanty allowance of water, a malignant fever followed the scurvy; with the excessive heat of the lengthened calm, making such short work of it as to sweep away, as by billows, whole families of the Africans, and a yet larger number, proportionably, of the Spaniards, including, by a luckless fatality, every remaining officer on board. Consequently, in the smart west winds eventually following the calm, the already rent sails, having to be simply dropped, not furled, at need, had been gradually reduced to the beggar's rags they were now. To procure substitutes for his lost sailors, as well as supplies of water and sails, the captain, at the earliest opportunity, had made for Baldivia, the southernmost civilized port of Chili and South America; but upon nearing the coast the thick weather had prevented him from so much as sighting that harbor. Since which period, almost without a crew, and almost without canvas and almost without water, and, at intervals, giving its added dead to the sea, the San Dominick had been battle-dored about by contrary winds, inveigled by currents, or grown weedy in calms. Like a man lost in woods, more than once she had doubled upon her own track.

"But throughout these calamities," huskily continued Don Benito, painfully turning in the half embrace of his servant, "I have to thank those Negroes you see, who, though to your inexperienced eyes appearing unruly, have, indeed, conducted themselves with less of restlessness than even their owner could have thought possible under such circumstances."

Here he again fell faintly back. Again his mind wandered; but he rallied, and less obscurely proceeded.

"Yes, their owner was quite right in assuring me that no fetters would be needed with his blacks; so that while, as is wont in this transportation, these Negroes have always remained upon deck—not thrust below, as in the Guinea-men—they have, also, from the beginning, been freely permitted to range within given bounds at their pleasure."

Once more the faintness returned—his mind roved—but, recovering, he resumed:

"But it is Babo here to whom, under God, I owe not only my own preservation, but likewise to him, chiefly, the merit is due, of pacifying his more ignorant brethren, when at intervals tempted to murmurings."

"Ah, master," sighed the black, bowing his face, "don't speak of me; Babo is nothing; what Babo has done was but duty."

"Faithful fellow!" cried Captain Delano. "Don Benito, I envy you such a friend; slave I cannot call him."

As master and man stood before him, the black upholding the white, Captain Delano could not but bethink him of the beauty of that relationship which could present such a spectacle of fidelity on the one hand and confidence on the other. The scene was heightened by the contrast in dress, denoting their relative positions. The Spaniard wore a loose Chili jacket of dark velvet; white small-clothes and stockings, with silver buckles at the knee and instep; a high-crowned sombrero, of fine grass; a slender sword, silver mounted, hung from a knot in his sash—the last being an almost invariable adjunct, more for utility than ornament, of a South American gentleman's dress to this hour. Excepting when his occasional nervous contortions brought about disarray, there was a certain precision in his attire, curiously at variance with the unsightly disorder around: especially in the belittered Ghetto, forward of the mainmast, wholly occupied by the blacks.

The servant wore nothing but wide trowsers, apparently, from their coarseness and patches, made out of some old topsail; they were clean, and confined at the waist by a bit of unstranded rope, which, with his composed, deprecatory air at times, made him look something like a begging friar of St. Francis.

However unsuitable for the time and place, at least in the blunt-thinking American's eyes, and however strangely surviving in the midst of all his afflictions, the toilette of Don Benito might not, in fashion at least, have gone beyond the style of the day among South Americans of his class. Though on the present voyage sailing from Buenos Ayres, he had avowed himself a native and resident of Chili, whose inhabitants had not so generally

---

44 Guinea-men, ships trading with Guinea in West Africa

adopted the plain coat and once plebeian pantaloons; but, with a becoming modification, adhered to their provincial costume, picturesque as any in the world. Still, relatively to the pale history of the voyage, and his own pale face, there seemed something so incongruous in the Spaniard's apparel, as almost to suggest the image of an invalid courtier tottering about London streets in the time of the plague.

The portion of the narrative which, perhaps, most excited interest, as well as some surprise, considering the latitudes in question, was the long calms spoken of, and more particularly the ship's so long drifting about. Without communicating the opinion, of course, the American could not but impute at least part of the detentions both to clumsy seamanship and faulty navigation. Eyeing Don Benito's small, yellow hands, he easily inferred that the young captain had not got into command at the hawse-hole but the cabin-window; and if so, why wonder at incompetence, in youth, sickness, and gentility united?

But drowning criticism in compassion, after a fresh repetition of his sympathies, Captain Delano, having heard out his story, not only engaged, as in the first place, to see Don Benito and his people supplied in their immediate bodily needs, but, also, now further promised to assist him in procuring a large permanent supply of water, as well as some sails and rigging; and, though it would involve no small embarrassment to himself, yet he would spare three of his best seamen for temporary deck officers; so that without delay the ship might proceed to Conception, there fully to refit for Lima, her destined port.

Such generosity was not without its effect, even upon the invalid. His face lighted up; eager and hectic, he met the honest glance of his visitor. With gratitude he seemed overcome.

"This excitement is bad for master," whispered the servant, taking his arm, and with soothing words gently drawing him aside.

When Don Benito returned, the American was pained to observe that his hopefulness, like the sudden kindling in his cheek, was but febrile and transient.

Ere long, with a joyless mien, looking up towards the poop, the host invited his guest to accompany him there, for the benefit of what little breath of wind might be stirring.

As, during the telling of the story, Captain Delano had once or twice started at the occasional cymballing of the hatchet-polishers, wondering why such an interruption should be allowed, especially in that part of the ship, and in the ears of an invalid; and moreover, as the hatchets had anything but an attractive look, and the handlers of them still less so, it was, therefore, to tell the truth, not without some lurking reluctance, or even shrinking, it may be, that Captain Delano, with apparent complaisance, acquiesced in his host's invitation. The more so, since, with an untimely caprice of punctilio, rendered distressing by his cadaverous aspect, Don Benito, with Castilian bows, solemnly insisted upon his guest's preceding him up the ladder leading to the elevation; where, one on each side of the last step, sat for armorial supporters and sentries two of the ominous file. Gingerly enough stepped good Captain Delano between them, and in the instant of leaving them behind, like one running the gauntlet, he felt an apprehensive twitch in the calves of his legs.

But when, facing about, he saw the whole file, like so many organ-grinders, still stupidly intent on their work, unmindful of everything beside, he could not but smile at his late fidgety panic.

Presently, while standing with his host, looking forward upon the decks below, he was struck by one of those instances of insubordination previously alluded to. Three black boys, with two Spanish boys, were sitting together on the hatches, scraping a rude wooden platter, in which some scanty mess had recently been cooked. Suddenly, one of the black boys, enraged at a word dropped by one of his white companions, seized a knife, and, though called to forbear by one of the oakum-pickers, struck the lad over the head, inflicting a gash from which blood flowed.

In amazement, Captain Delano inquired what this meant. To which the pale Don Benito dully muttered, that it was merely the sport of the lad.

"Pretty serious sport, truly," rejoined Captain Delano. "Had such a thing happened on board the Bachelor's Delight, instant punishment would have followed."

At these words, the Spaniard turned upon the American one of his sudden, staring, half-lunatic looks; then, relapsing into his torpor, answered, "Doubtless, doubtless, Señor."

18 **hawse-hole,** one of the holes in the bow of a ship, through which a cable passes. The statement means that the captain had had no experience as a common sailor • 30 **Conception,** Concepción, a city on the Chilean coast

Is it, thought Captain Delano, that this hapless man is one of those paper captains I've known, who by policy wink at what by power they cannot put down? I know no sadder sight than a commander who has little of command but the name.

"I should think, Don Benito," he now said, glancing towards the oakum-picker who had sought to interfere with the boys, "that you would find it advantageous to keep all your blacks employed, especially the younger ones, no matter at what useless task, and no matter what happens to the ship. Why, even with my little band, I find such a course indispensable. I once kept a crew on my quarter-deck thrumming mats for my cabin, when, for three days, I had given up my ship—mats, men, and all—for a speedy loss, owing to the violence of a gale, in which we could do nothing but helplessly drive before it."

"Doubtless, doubtless," muttered Don Benito.

"But," continued Captain Delano, again glancing upon the oakum-pickers and then at the hatchet-polishers, near by, "I see you keep some, at least, of your host employed."

"Yes," was again the vacant response.

"Those old men there, shaking their pows from their pulpits," continued Captain Delano, pointing to the oakum-pickers, "seem to act the part of old dominies to the rest, little heeded as their admonitions are at times. Is this voluntary on their part, Don Benito, or have you appointed them shepherds to your flock of black sheep?"

"What posts they fill, I appointed them," rejoined the Spaniard in an acrid tone, as if resenting some supposed satiric reflection.

"And these others, these Ashantee conjurors here," continued Captain Delano, rather uneasily eyeing the brandished steel of the hatchet-polishers, where, in spots, it had been brought to a shine, "this seems a curious business they are at, Don Benito?"

"In the gales we met," answered the Spaniard, "what of our general cargo was not thrown overboard was much damaged by the brine. Since coming into calm weather, I have had several cases of knives and hatchets daily brought up for overhauling and cleaning."

"A prudent idea, Don Benito. You are part owner of ship and cargo, I presume; but not of the slaves, perhaps?"

"I am owner of all you see," impatiently returned Don Benito, "except the main company of blacks, who belonged to my late friend Alexandro Aranda."

As he mentioned this name, his air was heart-broken; his knees shook; his servant supported him.

Thinking he divined the cause of such unusual emotion, to confirm his surmise, Captain Delano, after a pause, said: "And may I ask, Don Benito, whether—since awhile ago you spoke of some cabin passengers—the friend, whose loss so afflicts you, at the outset of the voyage accompanied his blacks?"

"Yes."

"But died of the fever?"

"Died of the fever.—Oh, could I but—"

Again quivering, the Spaniard paused.

"Pardon me," said Captain Delano, lowly, "but I think that, by a sympathetic experience, I conjecture, Don Benito, what it is that gives the keener edge to your grief. It was once my hard fortune to lose, at sea, a dear friend, my own brother, then supercargo. Assured of the welfare of his spirit, its departure I could have borne like a man; but that honest eye, that honest hand—both of which had so often met mine—and that warm heart; all, all—like scraps to the dogs—to throw all to the sharks! It was then I vowed never to have for fellow-voyager a man I loved, unless, unbeknown to him, I had provided every requisite, in case of a fatality, for embalming his mortal part for interment on shore. Were your friend's remains now on board this ship, Don Benito, not thus strangely would the mention of his name affect you."

"On board this ship?" echoed the Spaniard. Then, with horrified gestures, as directed against some spectre, he unconsciously fell into the ready arms of his attendant, who, with a silent appeal toward Captain Delano, seemed beseeching him not again to broach a theme so unspeakably distressing to his master.

This poor fellow now, thought the pained American, is the victim of that sad superstition which associates goblins with the deserted body of man, as ghosts with an abandoned house. How unlike are we made! What to me, in like case, would have been a solemn satis-

---

33 **Ashantee**, a native kingdom in West Africa • **64 supercargo**, an officer in a merchant ship whose duty is to manage the business affairs of the voyage

faction, the bare suggestion, even, terrifies the Spaniard into this trance. Poor Alexandro Aranda! what would you say could you here see your friend—who, on former voyages, when you, for months, were left behind, has, I dare say, often longed, and longed, for one peep at you—now transported with terror at the least thought of having you anyway nigh him.

At this moment, with a dreary grave-yard toll, betokening a flaw, the ship's forecastle bell, smote by one of the grizzled oakum-pickers, proclaimed ten o'clock, through the leaden calm, when Captain Delano's attention was caught by the moving figure of a gigantic black, emerging from the general crowd below, and slowly advancing toward the elevated poop. An iron collar was about his neck, from which depended a chain, thrice wound round his body; the terminating links padlocked together at a broad band of iron, his girdle.

"How like a mute Atufal moves," murmured the servant.

The black mounted the steps of the poop, and, like a brave prisoner, brought up to receive sentence, stood in unquailing muteness before Don Benito, now recovered from his attack.

At the first glimpse of his approach, Don Benito had started, a resentful shadow swept over his face; and, as with the sudden memory of bootless rage, his white lips glued together.

This is some mulish mutineer, thought Captain Delano, surveying, not without a mixture of admiration, the colossal form of the Negro.

"See, he waits your question, master," said the servant.

Thus reminded, Don Benito, nervously averting his glance, as if shunning, by anticipation, some rebellious response, in a disconcerted voice, thus spoke:—

"Atufal, will you ask my pardon now?"

The black was silent.

"Again, master," murmured the servant, with bitter upbraiding eyeing his countryman, "again, master; he will bend to master yet."

"Answer," said Don Benito, still averting his glance, "say but the one word, *pardon,* and your chains shall be off."

Upon this, the black, slowly raising both arms, let them lifelessly fall, his links clanking, his head bowed; as much as to say, "No, I am content."

"Go," said Don Benito, with inkept and unknown emotion.

Deliberately as he had come, the black obeyed.

"Excuse me, Don Benito," said Captain Delano, "but this scene surprises me; what means it, pray?"

"It means that that Negro alone, of all the band, has given me peculiar cause of offence. I have put him in chains; I—"

Here he paused; his hand to his head, as if there were a swimming there, or a sudden bewilderment of memory had come over him; but meeting his servant's kindly glance seemed reassured, and proceeded:—

"I could not scourge such a form. But I told him he must ask my pardon As yet he has not. At my command, every two hours he stands before me."

"And how long has this been?"

"Some sixty days."

"And obedient in all else? And respectful?"

"Yes."

"Upon my conscience, then," exclaimed Captain Delano, impulsively, "he has a royal spirit in him, this fellow."

"He may have some right to it," bitterly returned Don Benito, "he says he was king in his own land."

"Yes," said the servant, entering a word, "those slits in Atufal's ears once held wedges of gold; but poor Babo here, in his own land, was only a poor slave; a black man's slave was Babo, who now is the white's."

Somewhat annoyed by these conversational familiarities, Captain Delano turned curiously upon the attendant, then glanced inquiringly at his master, but, as if long wonted to these little informalities, neither master nor man seemed to understand him.

"What, pray, was Atufal's offence, Don Benito?" asked Captain Delano; "if it was not something very serious, take a fool's advice, and, in view of his general docility, as well as in some natural respect for his spirit, remit him his penalty."

"No, no, master never will do that," here murmured the servant to himself, "proud Atufal must first ask master's pardon. The slave there carries the padlock, but master here carries the key."

His attention thus directed, Captain Delano now noticed for the first time, that, suspended by a slender silken cord, from Don Benito's neck, hung a key. At

once, from the servant's muttered syllables, divining the key's purpose, he smiled and said:—"So, Don Benito—padlock and key—significant symbols, truly."

Biting his lip, Don Benito faltered.

Though the remark of Captain Delano, a man of such native simplicity as to be incapable of satire or irony, had been dropped in playful allusion to the Spaniard's singularly evidenced lordship over the black; yet the hypochondriac seemed in some way to have taken it as a malicious reflection upon his confessed inability thus far to break down, at least, on a verbal summons, the entrenched will of the slave. Deploring this supposed misconception, yet despairing of correcting it, Captain Delano shifted the subject; but finding his companion more than ever withdrawn, as if still sourly digesting the lees of the presumed affront above-mentioned, by-and-by Captain Delano likewise became less talkative, oppressed, against his own will, by what seemed the secret vindictiveness of the morbidly sensitive Spaniard. But the good sailor, himself of a quite contrary disposition, refrained, on his part, alike from the appearance as from the feeling of resentment, and if silent, was only so from contagion.

Presently the Spaniard, assisted by his servant, somewhat discourteously crossed over from his guest; a procedure which, sensibly enough, might have been allowed to pass for idle caprice of ill-humor, had not master and man, lingering round the corner of the elevated skylight, began whispering together in low voices. This was unpleasing. And more: the moody air of the Spaniard, which at times had not been without a sort of valetudinarian stateliness, now seemed anything but dignified; while the menial familiarity of the servant lost its original charm of simple-hearted attachment.

In his embarrassment, the visitor turned his face to the other side of the ship. By so doing, his glance accidentally fell on a young Spanish sailor, a coil of rope in his hand, just stepped from the deck to the first round of the mizzen-rigging. Perhaps the man would not have been particularly noticed, were it not that, during his ascent to one of the yards, he, with a sort of covert intentness, kept his eye fixed on Captain Delano, from whom, presently, it passed, as if by a natural sequence, to the two whisperers.

His own attention thus redirected to that quarter, Captain Delano gave a slight start. From something in Don Benito's manner just then, it seemed as if the visitor had, at least partly, been the subject of the withdrawn consultation going on—a conjecture as little agreeable to the guest as it was little flattering to the host.

The singular alternations of courtesy and ill-breeding in the Spanish captain were unaccountable, except on one of two suppositions—innocent lunacy, or wicked imposture.

But the first idea, though it might naturally have occurred to an indifferent observer, and, in some respects, had not hitherto been wholly a stranger to Captain Delano's mind, yet, now that, in an incipient way, he began to regard the stranger's conduct something in the light of an intentional affront, of course the idea of lunacy was virtually vacated. But if not a lunatic, what then? Under the circumstances, would a gentleman, nay, any honest boor, act the part now acted by his host? The man was an impostor. Some low-born adventurer, masquerading as an oceanic grandee; yet so ignorant of the first requisites of mere gentlemanhood as to be betrayed into the present remarkable indecorum. That strange ceremoniousness, too, at other times evinced, seemed not uncharacteristic of one playing a part above his real level. Benito Cereno—Don Benito Cereno—a sounding name. One, too, at that period, not unknown, in the surname, to supercargoes and sea captains trading along the Spanish Main, as belonging to one of the most enterprising and extensive mercantile families in all those provinces; several members of it having titles; a sort of Castilian Rothschild, with a noble brother, or cousin, in every great trading town of South America. The alleged Don Benito was in early manhood, about twenty-nine or thirty. To assume a sort of roving cadetship in the maritime affairs of such a house, what more likely scheme for a young knave of talent and spirit? But the Spaniard was a pale invalid. Never mind. For even to the degree of simulating mortal disease, the craft of some tricksters had been known to attain. To think that, under the aspect of infantile weakness, the most savage energies might be couched—those velvets of the Spaniard but the silky paw to his fangs.

From no train of thought did these fancies come; not

---

76 Rothschild. The Rothschilds were a family of wealthy bankers who flourished first in Germany and later in England from the eighteenth to the present century

from within, but from without; suddenly, too, and in one throng, like hoar frost; yet as soon to vanish as the mild sun of Captain Delano's good-nature regained its meridian.

Glancing over once more towards his host—whose side-face, revealed above the skylight, was now turned toward him—he was struck by the profile, whose clearness of cut was refined by the thinness incident to ill-health, as well as ennobled about the chin by the beard. Away with suspicion. He was a true off-shoot of a true hidalgo Cereno.

Relieved by these and other better thoughts, the visitor, lightly humming a tune, now began indifferently pacing the poop, so as not to betray to Don Benito that he had at all mistrusted incivility, much less duplicity; for such mistrust would yet be proved illusory, and by the event; though, for the present, the circumstance which had provoked that distrust remained unexplained. But when that little mystery should have been cleared up, Captain Delano thought he might extremely regret it, did he allow Don Benito to become aware that he had indulged in ungenerous surmises. In short, to the Spaniard's black-letter text, it was best, for a while, to leave open margin.

Presently, his pale face twitching and overcast, the Spaniard, still supported by his attendant, moved over towards his guest, when, with even more than his usual embarrassment, and a strange sort of intriguing intonation in his husky whisper, the following conversation began:—

"Señor, may I ask how long you have lain at this isle?"

"Oh, but a day or two, Don Benito."

"And from what port are you last?"

"Canton."

"And there, Señor, you exchanged your seal-skins for teas and silks, I think you said?"

"Yes. Silks, mostly."

"And the balance you took in specie, perhaps?"

Captain Delano, fidgeting a little, answered—

"Yes; some silver; not a very great deal, though."

"Ah—well. May I ask how many men have you, Señor?"

Captain Delano slightly started, but answered—

"About five-and-twenty, all told."

"And at present, Señor, all on board, I suppose?"

"All on board, Don Benito," replied the Captain, now with satisfaction.

"And will be to-night, Señor?"

At this last question, following so many pertinacious ones, for the soul of him Captain Delano could not but look very earnestly at the questioner, who, instead of meeting the glance, with every token of craven discomposure dropped his eyes to the deck; presenting an unworthy contrast to his servant, who, just then, was kneeling at his feet, adjusting a loose shoe-buckle; his disengaged face meantime, with humble curiosity, turned openly up into his master's downcast one.

The Spaniard, still with a guilty shuffle, repeated his question:

"And—and will be to-night, Señor?"

"Yes, for aught I know," returned Captain Delano— "but nay," rallying himself into fearless truth, "some of them talked of going off on another fishing party about midnight."

"Your ships generally go—go more or less armed, I believe, Señor?"

"Oh, a six-pounder or two, in case of emergency," was the intrepidly indifferent reply, "with a small stock of muskets, sealing-spears, and cutlasses, you know."

As he thus responded, Captain Delano again glanced at Don Benito, but the latter's eyes were averted; while abruptly and awkwardly shifting the subject, he made some peevish allusion to the calm, and then, without apology, once more, with his attendant, withdrew to the opposite bulwarks, where the whispering was resumed.

At this moment, and ere Captain Delano could cast a cool thought upon what had just passed, the young Spanish sailor, before mentioned, was seen descending from the rigging. In act of stooping over to spring inboard to the deck, his voluminous, unconfined frock, or shirt, of coarse woolen, much spotted with tar, opened out far down the chest, revealing a soiled under garment of what seemed the finest linen, edged, about the neck, with a narrow blue ribbon, sadly faded and worn. At this moment the young sailor's eye was again fixed on the whisperers, and Captain Delano thought he observed a

---

11 hidalgo, a title denoting a Spanish nobleman • 22 black-letter, a style of type, also known as Gothic or Old English, which was copied by the early printers from a form of manuscript letter current at the time The phrase in this connection connotes strangeness and unfamiliarity • 23 open margin, without marginal gloss or commentary • 33 Canton, in China

lurking significance in it, as if silent signs, of some Freemason sort, had that instant been interchanged.

This once more impelled his own glance in the direction of Don Benito, and, as before, he could not but infer that himself formed the subject of the conference. He paused. The sound of the hatchet-polishing fell on his ears. He cast another swift side-look at the two. They had the air of conspirators. In connection with the late questionings, and the incident of the young sailor, these things now begat such return of involuntary suspicion, that the singular guilelessness of the American could not endure it. Plucking up a gay and humorous expression, he crossed over to the two rapidly, saying:—"Ha, Don Benito, your black here seems high in your trust; a sort of privy-counsellor, in fact."

Upon this, the servant looked up with a good-natured grin, but the master started as from a venomous bite. It was a moment or two before the Spaniard sufficiently recovered himself to reply; which he did, at last, with cold constraint:—"Yes, Señor, I have trust in Babo."

Here Babo, changing his previous grin of mere animal humor into an intelligent smile, not ungratefully eyed his master.

Finding that the Spaniard now stood silent and reserved, as if involuntarily, or purposely giving hint that his guest's proximity was inconvenient just then, Captain Delano, unwilling to appear uncivil even to incivility itself, made some trivial remark and moved off; again and again turning over in his mind the mysterious demeanor of Don Benito Cereno.

He had descended from the poop, and, wrapped in thought, was passing near a dark hatchway, leading down into the steerage, when, perceiving motion there, he looked to see what moved. The same instant there was a sparkle in the shadowy hatchway, and he saw one of the Spanish sailors, prowling there, hurriedly placing his hand in the bosom of his frock, as if hiding something. Before the man could have been certain who it was that was passing, he slunk below out of sight. But enough was seen of him to make it sure that he was the same young sailor before noticed in the rigging.

What was that which so sparkled? thought Captain Delano. It was no lamp—no match—no live coal. Could it have been a jewel? But how come sailors with jewels? —or with silk-trimmed under-shirts either? Has he been robbing the trunks of the dead cabin-passengers? But if so, he would hardly wear one of the stolen articles on board ship here. Ah, ah—if, now, that was, indeed, a secret sign I saw passing between this suspicious fellow and his captain awhile since; if I could only be certain that, in my uneasiness, my senses did not deceive me, then—

Here, passing from one suspicious thing to another, his mind revolved the strange questions put to him concerning his ship.

By a curious coincidence, as each point was recalled, the black wizards of Ashantee would strike up with their hatchets, as in ominous comment on the white stranger's thoughts. Pressed by such enigmas and portents, it would have been almost against nature, had not, even into the least distrustful heart, some ugly misgivings obtruded.

Observing the ship now helplessly fallen into a current, with enchanted sails, drifting with increased rapidity seaward; and noting that, from a lately intercepted projection of the land, the sealer was hidden, the stout mariner began to quake at thoughts which he barely durst confess to himself. Above all, he began to feel a ghostly dread of Don Benito. And yet when he roused himself, dilated his chest, felt himself strong on his legs, and coolly considered it—what did all these phantoms amount to?

Had the Spaniard any sinister scheme, it must have reference not so much to him (Captain Delano) as to his ship (the Bachelor's Delight). Hence the present drifting away of the one ship from the other, instead of favoring any such possible scheme, was, for the time at least, opposed to it. Clearly any suspicion, combining such contradictions, must needs be delusive. Besides, was it not absurd to think of a vessel in distress—a vessel by sickness almost dismanned of her crew—a vessel whose inmates were parched for water—was it not a thousand times absurd that such a craft should, at present, be of a piratical character; or her commander, either for himself or those under him, cherish any desire but for speedy relief and refreshment? But then, might not general distress, and thirst in particular, be affected? And might not that same undiminished Spanish crew, alleged to have perished off to a remnant, be at that very moment lurking in the hold? On heart-broken pretence of entreating

---

86 **affected,** pretended

a cup of cold water, fiends in human form had got into lonely dwellings, nor retired until a dark deed had been done. And among the Malay pirates, it was no unusual thing to lure ships after them into their treacherous harbors, or entice boarders from a declared enemy at sea, by the spectacle of thinly manned or vacant decks, beneath which prowled a hundred spears with yellow arms ready to upthrust them through the mats. Not that Captain Delano had entirely credited such things. He had heard of them—and now, as stories, they recurred. The present destination of the ship was the anchorage. There she would be near his own vessel. Upon gaining that vicinity, might not the San Dominick, like a slumbering volcano, suddenly let loose energies now hid?

He recalled the Spaniard's manner while telling his story. There was a gloomy hesitancy and subterfuge about it. It was just the manner of one making up his tale for evil purposes, as he goes. But if that story was not true, what was the truth? That the ship had unlawfully come into the Spaniard's possession? But in many of its details, especially in reference to the more calamitous parts, such as the fatalities among the seamen, the consequent prolonged beating about, the past sufferings from obstinate calms, and still continued suffering from thirst; in all these points, as well as others, Don Benito's story had corroborated not only the wailing ejaculations of the indiscriminate multitude, white and black, but likewise—what seemed impossible to be counterfeit—by the very expression and play of every human feature, which Captain Delano saw. If Don Benito's story was, throughout, an invention, then every soul on board, down to the youngest Negress, was his carefully drilled recruit in the plot: an incredible inference. And yet, if there was ground for mistrusting his veracity, that inference was a legitimate one.

But those questions of the Spaniard. There, indeed, one might pause. Did they not seem put with much the same object with which the burglar or assassin, by daytime, reconnoitres the walls of a house? But, with ill purposes, to solicit such information openly of the chief person endangered, and so, in effect, setting him on his guard; how unlikely a procedure was that. Absurd, then, to suppose that those questions had been prompted by evil designs. Thus, the same conduct, which, in this instance, had raised the alarm, served to dispel it. In short, scarce any suspicion or uneasiness, however apparently reasonable at the time, which was not now, with equal apparent reason, dismissed.

At last, he began to laugh at his former forebodings; and laugh at the strange ship for, in its aspect someway siding with them, as it were; and laugh, too, at the odd-looking blacks, particularly those old scissors-grinders, the Ashantees; and those bed-ridden old knitting women, the oakum-pickers; and almost at the dark Spaniard himself, the central hobgoblin of all.

For the rest, whatever in a serious way seemed enigmatical, was now good-naturedly explained away by the thought that, for the most part the poor invalid scarcely knew what he was about; either sulking in black vapors, or putting idle questions without sense or object. Evidently, for the present, the man was not fit to be entrusted with the ship. On some benevolent plea withdrawing the command from him, Captain Delano would yet have to send her to Conception in charge of his second mate, a worthy person and good navigator—a plan not more convenient for the San Dominick than for Don Benito; for, relieved from all anxiety, keeping wholly to his cabin, the sick man, under the good nursing of his servant, would probably, by the end of the passage, be in a measure restored to health, and with that he should also be restored to authority.

Such were the American's thoughts They were tranquilizing. There was a difference between the idea of Don Benito's darkly pre-ordaining Captain Delano's fate, and Captain Delano's lightly arranging Don Benito's. Nevertheless, it was not without something of relief that the good seaman presently perceived his whale-boat in the distance. Its absence had been prolonged by unexpected detention at the sealer's side, as well as its returning trip lengthened by the continual recession of the goal.

The advancing speck was observed by the blacks. Their shouts attracted the attention of Don Benito, who, with a return of courtesy, approaching Captain Delano, expressed satisfaction at the coming of some supplies, slight and temporary as they must necessarily prove.

Captain Delano responded; but while doing so, his attention was drawn to something passing on the deck below: among the crowd climbing the landward bulwarks, anxiously watching the coming boat, two blacks, to all appearances accidentally incommoded by one of the sailors, violently pushed him aside, which the sailor

someway resenting, they dashed him to the deck, despite the earnest cries of the oakum-pickers.

"Don Benito," said Captain Delano quickly, "do you see what is going on there? Look!"

But, seized by his cough, the Spaniard staggered, with both hands to his face, on the point of falling. Captain Delano would have supported him, but the servant was more alert, who, with one hand sustaining his master, with the other applied the cordial. Don Benito restored, the black withdrew his support, slipping aside a little, but dutifully remaining within call of a whisper. Such discretion was here evinced as quite wiped away, in the visitor's eyes, any blemish of impropriety which might have attached to the attendant, from the indecorous conferences before mentioned; showing, too, that if the servant were to blame, it might be more the master's fault than his own, since, when left to himself, he could conduct thus well.

His glance called away from the spectacle of disorder to the more pleasing one before him, Captain Delano could not avoid again congratulating his host upon possessing such a servant, who, though perhaps a little too forward now and then, must upon the whole be invaluable to one in the invalid's situation.

"Tell me, Don Benito," he added, with a smile—"I should like to have your man here, myself—what will you take for him? Would fifty doubloons be any object?"

"Master wouldn't part with Babo for a thousand doubloons," murmured the black, overhearing the offer, and taking it in earnest, and, with the strange vanity of a faithful slave, appreciated by his master, scorning to hear so paltry a valuation put upon him by a stranger. But Don Benito, apparently hardly yet completely restored, and again interrupted by his cough, made but some broken reply.

Soon his physical distress became so great, affecting his mind, too, apparently, that, as if to screen the sad spectacle, the servant gently conducted his master below.

Left to himself, the American, to while away the time till his boat should arrive, would have pleasantly accosted some one of the few Spanish seamen he saw; but recalling something that Don Benito had said touching their ill conduct, he refrained; as a ship-master indisposed to countenance cowardice or unfaithfulness in seamen.

While, with these thoughts, standing with eye directed forward toward that handful of sailors, suddenly he thought that one or two of them returned the glance and with a sort of meaning. He rubbed his eyes, and looked again; but again seemed to see the same thing. Under a new form, but more obscure than any previous one, the old suspicions recurred, but, in the absence of Don Benito, with less of panic than before. Despite the bad account given of the sailors, Captain Delano resolved forthwith to accost one of them. Descending the poop, he made his way through the blacks, his movement drawing a queer cry from the oakum-pickers, prompted by whom, the Negroes, twitching each other aside, divided before him; but, as if curious to see what was the object of this deliberate visit to their Ghetto, closing in behind, in tolerable order, followed the white stranger up. His progress thus proclaimed as by mounted kings-at-arms, and escorted as by a Caffre guard of honor, Captain Delano, assuming a good-humored, off-handed air, continued to advance; now and then saying a blithe word to the Negroes, and his eye curiously surveying the white faces, here and there sparsely mixed in with the blacks, like stray white pawns venturously involved in the ranks of the chess-men opposed.

While thinking which of them to select for his purpose, he chanced to observe a sailor seated on the deck engaged in tarring the strap of a large block, a circle of blacks squatted round him inquisitively eyeing the process.

The mean employment of the man was in contrast with something superior in his figure. His hand, black with continually thrusting it into the tar-pot held for him by a Negro, seemed not naturally allied to his face, a face which would have been a very fine one but for its haggardness. Whether this haggardness had aught to do with criminality, could not be determined; since, as intense heat and cold, though unlike, produce like sensations, so innocence and guilt, when, through casual association with mental pain, stamping any visible impress, use one seal—a hacked one.

---

18 conduct. According to Bartlett's Dictionary of Americanisms (1848), quoted in the Dictionary of American English, the intransitive use of the verb "conduct" without the reflexive pronoun was common in New England, both in speech and in writing. Bartlett deplored the usage as an "offensive barbarism" • 62 kings-at-arms, the chief heraldic officers of England • 63 Caffre, Kafir, a tribe of South Africa

Not again that this reflection occurred to Captain Delano at the time, charitable man as he was. Rather another idea. Because observing so singular a haggardness combined with a dark eye, averted as in trouble and shame, and then, again recalling Don Benito's confessed ill opinion of his crew, insensibly he was operated upon by certain general notions which, while disconnecting pain and abashment from virtue, invariably link them with vice.

If, indeed, there be any wickedness on board this ship, thought Captain Delano, be sure that man there has fouled his hand in it, even as now he fouls it in the pitch. I don't like to accost him. I will speak to this other, this old Jack here on the windlass.

He advanced to an old Barcelona tar, in ragged red breeches and dirty nightcap, cheeks trenched and bronzed, whiskers dense as thorn hedges. Seated between two sleepy-looking Africans, this mariner, like his younger shipmate, was employed upon some rigging—splicing a cable—the sleepy-looking blacks performing the inferior function of holding the outer parts of the ropes for him.

Upon Captain Delano's approach, the man at once hung his head below its previous level; the one necessary for business. It appeared as if he desired to be thought absorbed, with more than common fidelity, in his task. Being addressed, he glanced up, but with what seemed a furtive, diffident air, which sat strangely enough on his weather-beaten visage, much as if a grizzly bear, instead of growling and biting, should simper and cast sheep's eyes. He was asked several questions concerning the voyage—questions purposely referring to several particulars in Don Benito's narrative, not previously corroborated by those impulsive cries greeting the visitor on first coming on board. The questions were briefly answered, confirming all that remained to be confirmed of the story. The Negroes about the windlass joined in with the old sailor; but, as they became talkative, he by degrees became mute, and at length quite glum, seemed morosely unwilling to answer more questions, and yet, all the while, this ursine air was somehow mixed with his sheepish one.

Despairing of getting into unembarrassed talk with such a centaur, Captain Delano, after glancing round for a more promising countenance, but seeing none, spoke pleasantly to the blacks to make way for him; and so, amid various grins and grimaces, returned to the poop, feeling a little strange at first, he could hardly tell why, but upon the whole with regained confidence in Benito Cereno.

How plainly, thought he, did that old whiskerando yonder betray a consciousness of ill desert. No doubt, when he saw me coming, he dreaded lest I, apprised by his Captain of the crew's general misbehavior, came with sharp words for him, and so down with his head. And yet—and yet, now that I think of it, that very old fellow, if I err not, was one of those who seemed so earnestly eyeing me here awhile since. Ah, these currents spin one's head around almost as much as they do the ship. Ha, there now's a pleasant sort of sunny sight; quite sociable, too.

His attention had been drawn to a slumbering Negress, partly disclosed through the lace-work of some rigging, lying, with youthful limbs carelessly disposed, under the lee of the bulwarks, like a doe in the shade of a woodland rock. Sprawling at her lapped breasts, was her wide-awake fawn, stark naked, its black little body half lifted from the deck, crosswise with its dam's; its hands, like two paws, clambering upon her; its mouth and nose ineffectually rooting to get at the mark; and meantime giving a vexatious half-grunt, blending with the composed snore of the Negress.

The uncommon vigor of the child at length roused the mother. She started up, at a distance facing Captain Delano. But as if not at all concerned at the attitude in which she had been caught, delightedly she caught the child up, with maternal transports, covering it with kisses.

There's naked nature, now; pure tenderness and love, thought Captain Delano, well pleased.

This incident prompted him to remark the other Negresses more particularly than before. He was gratified with their manners; like most uncivilized women, they seemed at once tender of heart and tough of constitution; equally ready to die for their infants or fight for them. Unsophisticated as leopardesses; loving as doves. Ah! thought Captain Delano, these, perhaps, are some of the very women whom Ledyard saw in Africa, and gave such a noble account of.

---

15 Barcelona, a seaport in Spain • 87 Ledyard, John Ledyard (1751-1788), American traveler

These natural sights somehow insensibly deepened his confidence and ease. At last he looked to see how his boat was getting on; but it was still pretty remote. He turned to see if Don Benito had returned; but he had not.

To change the scene, as well as to please himself with a leisurely observation of the coming boat, stepping over into the mizzen-chains, he clambered his way into the starboard quarter-gallery—one of those abandoned Venetian-looking water-balconies previously mentioned—retreats cut off from the deck. As his foot pressed the half-damp, half-dry sea-mosses matting the place, and a chance phantom cats-paw—an islet of breeze, unheralded, unfollowed—as this ghostly cats-paw came fanning his cheek; as his glance fell upon the row of small, round dead-lights—all closed like coppered eyes of the coffined—and the state-cabin door, once connecting with the gallery, even as the dead-lights had once looked out upon it, but now calked fast like a sarcophagus lid; and to a purple-black, tarred-over panel, threshold, and post; and he bethought him of the time, when that state-cabin and this state-balcony had heard the voices of the Spanish king's officers, and the forms of the Lima viceroy's daughters had perhaps leaned where he stood—as these and other images flitted through his mind, as the cats-paw through the calm, gradually he felt rising a dreamy inquietude, like that of one who alone on the prairie feels unrest from the repose of the noon.

He leaned against the carved balustrade, again looking off toward his boat; but found his eye falling upon the ribbon grass, trailing along the ship's waterline, straight as a border of green box; and parterres of sea-weed, broad ovals and crescents, floating nigh and far, with what seemed long formal alleys between, crossing the terraces of swells, and sweeping round as if leading to the grottoes below. And overhanging all was the balustrade by his arm, which, partly stained with pitch and partly embossed with moss, seemed the charred ruin of some summer-house in a grand garden long running to waste.

Trying to break one charm, he was but becharmed anew. Though upon the wide sea, he seemed in some far inland country; prisoner in some deserted chateau, left to stare at empty grounds, and peer out at vague roads, where never wagon or wayfarer passed.

But these enchantments were a little disenchanted as his eye fell on the corroded main-chains. Of an ancient style, massy and rusty in link, shackle and bolt, they seemed even more fit for the ship's present business than the one for which she had been built.

Presently he thought something moved nigh the chains. He rubbed his eyes, and looked hard. Groves of rigging were about the chains; and there, peering from behind a great stay, like an Indian from behind a hemlock, a Spanish sailor, a marlingspike in his hand, was seen, who made what seemed an imperfect gesture toward the balcony, but immediately, as if alarmed by some advancing step along the deck within, vanished into the recesses of the hempen forest, like a poacher.

What meant this? Something the man had sought to communicate, unbeknown to any one, even to his captain. Did the secret involve aught unfavorable to his captain? Were those previous misgivings of Captain Delano's about to be verified? Or, in his haunted mood at the moment, had some random, unintentional motion of the man, while busy with the stay, as if repairing it, been mistaken for a significant beckoning?

Not unbewildered, again he gazed off for his boat. But it was temporarily hidden by a rocky spur of the isle. As with some eagerness he bent foward, watching for the first shooting view of its beak, the balustrade gave way before him like charcoal. Had he not clutched an outreaching rope he would have fallen into the sea The crash, though feeble, and the fall, though hollow, of the rotten fragments, must have been overheard. He glanced up. With sober curiosity peering down upon him was one of the old oakum-pickers, slipped from his perch to an outside boom; while below the old Negro, and, invisible to him, reconnoitering from a port-hole like a fox from the mouth of its den, crouched the Spanish sailor again. From something suddenly suggested by the man's air, the mad idea now darted into Captain Delano's mind, that Don Benito's plea of indisposition, in withdrawing below, was but a pretense: that he was engaged there maturing his plot, of which the sailor, by some means gaining an inkling, had a mind to warn the stranger against; incited, it may be, by gratitude for a kind word on first boarding the ship. Was it from foreseeing some possible interference like this, that Don Benito had, beforehand, given such a bad character of his sailors, while praising the Negroes; though, indeed, the former seemed as docile as the latter the contrary? The whites, too, by nature, were the shrewder race. A man with some evil design, would he not be likely to

speak well of that stupidity which was blind to his depravity, and malign that intelligence from which it might not be hidden? Not unlikely, perhaps. But if the whites had dark secrets concerning Don Benito, could then Don Benito be any way in complicity with the blacks? But they were too stupid. Besides, who ever heard of a white so far a renegade as to apostatize from his very species almost, by leaguing in against it with Negroes? These difficulties recalled former ones. Lost in their mazes, Captain Delano, who had now regained the deck, was uneasily advancing along it, when he observed a new face; an aged sailor seated cross-legged near the main hatchway. His skin was shrunk up with wrinkles like a pelican's empty pouch; his hair frosted; his countenance grave and composed. His hands were full of ropes, which he was working into a large knot. Some blacks were about him obligingly dipping the strands for him, here and there, as the exigencies of the operation demanded.

Captain Delano crossed over to him, and stood in silence surveying the knot; his mind, by a not uncongenial transition, passing from its own entanglements to those of the hemp. For intricacy such a knot he had never seen in an American ship, or indeed any other. The old man looked like an Egyptian priest, making Gordian knots for the temple of Ammon. The knot seemed a combination of double-bowline-knot, treble-crown-knot, back-handed-well-knot, knot-in-and-out-knot, and jamming-knot.

At last, puzzled to comprehend the meaning of such a knot, Captain Delano addressed the knotter:—

"What are you knotting there, my man?"

"The knot," was the brief reply, without looking up.

"So it seems; but what is it for?"

"For some one else to undo," muttered back the old man, plying his fingers harder than ever, the knot being now nearly completed.

While Captain Delano stood watching him, suddenly the old man threw the knot toward him, saying in broken English,—the first heard in the ship,—something to this effect: "Undo it, cut it, quick." It was said lowly, but with such condensation of rapidity, that the long, slow words in Spanish, which had preceded and followed, almost operated as covers to the brief English between.

For a moment, knot in hand, and knot in head, Captain Delano stood mute; while, without further heeding him the old man was now intent upon other ropes. Presently there was a slight stir behind Captain Delano. Turning, he saw the chained Negro, Atufal, standing quietly there. The next moment the old sailor rose, muttering, and, followed by his subordinate Negroes, removed to the forward part of the ship, where in the crowd he disappeared.

An elderly Negro, in a clout like an infant's, and with a pepper and salt head, and a kind of attorney air, now approached Captain Delano. In tolerable Spanish, and with a good-natured, knowing wink, he informed him that the old knotter was simple-witted, but harmless; often playing his odd tricks. The Negro concluded by begging the knot, for of course the stranger would not care to be troubled with it. Unconsciously, it was handed to him. With a sort of congé, the Negro received it, and, turning his back, ferreted into it like a detective custom-house officer after smuggled laces. Soon, with some African word, equivalent to pshaw, he tossed the knot overboard.

All this is very queer now, thought Captain Delano, with a qualmish sort of emotion; but, as one feeling incipient sea-sickness, he strove, by ignoring the symptoms, to get rid of the malady Once more he looked off for his boat. To his delight, it was now again in view, leaving the rocky spur astern.

The sensation here experienced, after at first relieving his uneasiness, with unforeseen efficacy soon began to remove it. The less distant sight of that well-known boat—showing it, not as before, half blended with the haze, but with outline defined, so that its individuality, like a man's, was manifest; that boat, *Rover* by name, which, though now in strange seas, had often pressed the beach of Captain Delano's home, and, brought to its threshold for repairs, had familiarly lain there, as a Newfoundland dog; the sight of that household boat evoked a thousand trustful associations, which, contrasted with previous suspicions, filled him not only with lightsome confidence, but somehow with half humorous self-reproaches at his former lack of it.

"What, I, Amasa Delano—Jack of the Beach, as they called me when a lad—I, Amasa; the same that, duck-satchel in hand, used to paddle along the waterside to

---

25 Gordian knot, in classical mythology, an intricate knot tied by Gordius and cut by Alexander the Great with his sword • 26 Ammon, Amen, an Egyptian deity

the school-house made from the old hulk—I, little Jack of the Beach, that used to go berrying with cousin Nat and the rest; I to be murdered here at the ends of the earth, on board a haunted pirate-ship by a horrible Spaniard? Too nonsensical to think of! Who would murder Amasa Delano? His conscience is clean. There is some one above. Fie, fie, Jack of the Beach! you are a child indeed; a child of the second childhood, old boy; you are beginning to dote and drule, I'm afraid."

Light of heart and foot, he stepped aft, and there was met by Don Benito's servant, who, with a pleasing expression, responsive to his own present feelings, informed him that his master had recovered from the effects of his coughing fit, and had just ordered him to go present his compliments to his good guest, Don Amasa, and say that he (Don Benito) would soon have the happiness to rejoin him.

There now, do you mark that? again thought Captain Delano, walking the poop. What a donkey I was. This kind gentleman who here sends me his kind compliments, he, but ten minutes ago, dark-lantern in hand, was dodging round some old grind-stone in the hold, sharpening a hatchet for me, I thought. Well, well; these long calms have a morbid effect on the mind, I've often heard, though I never believed it before. Ha! glancing towards the boat; there's *Rover;* good dog; a white bone in her mouth. A pretty big bone though, seems to me.—What? Yes, she has fallen afoul of the bubbling tide-rip there. It sets her the other way, too, for the time. Patience.

It was now about noon, though, from the grayness of everything, it seemed to be getting toward dusk.

The calm was confirmed. In the far distance, away from the influence of land, the leaden ocean seemed laid out and leaded up, its course finished, soul gone, defunct. But the current from landward, where the ship was, increased; silently sweeping her further and further toward the tranced waters beyond.

Still, from his knowledge of those latitudes, cherishing hopes of a breeze, and a fair and fresh one, at any moment, Captain Delano, despite present prospects, buoyantly counted upon bringing the San Dominick safely to anchor ere night. The distance swept over was nothing; since, with a good wind, ten minutes' sailing would retrace more than sixty minutes' drifting. Meantime, one moment turning to mark *Rover* fighting the tide-rip, and the next to see Don Benito approaching, he continued walking the poop.

Gradually he felt a vexation arising from the delay of his boat; this soon merged into uneasiness; and at last— his eye falling continually, as from a stage-box into the pit, upon the strange crowd before and below him, and, by-and-by, recognizing there the face—now composed to indifference—of the Spanish sailor who had seemed to beckon from the main-chains—something of his old trepidations returned.

Ah, thought he—gravely enough—this is like the ague: because it went off, it follows not that it won't come back.

Though ashamed of the relapse, he could not altogether subdue it; and so, exerting his good-nature to the utmost, insensibly he came to a compromise.

Yes, this is a strange craft; a strange history, too, and strange folks on board. But—nothing more.

By way of keeping his mind out of mischief till the boat should arrive, he tried to occupy it with turning over and over, in a purely speculative sort of way, some lesser peculiarities of the captain and crew. Among others, four curious points recurred:

First, the affair of the Spanish lad assailed with a knife by the slave boy; an act winked at by Don Benito. Second, the tyranny in Don Benito's treatment of Atufal, the black; as if a child should lead a bull of the Nile by the ring in his nose. Third, the trampling of the sailor by the two Negroes; a piece of insolence passed over without so much as a reprimand. Fourth, the cringing submission to their master of all the ships' underlings, mostly blacks; as if by the least inadvertence they feared to draw down his despotic displeasure.

Coupling these points, they seemed somewhat contradictory. But what then, thought Captain Delano, glancing toward his now nearing boat—what then? Why, Don Benito is a very capricious commander. But he is not the first of the sort I have seen; though it's true he rather exceeds any other. But as a nation—continued he in his reveries—these Spaniards are all an odd set; the very word Spaniard has a curious, conspirator, Guy-Fawkish twang to it. And yet, I dare say, Spaniards in

---

87 Guy-Fawkish. On November 5, 1605, Guy Fawkes attempted to set fire to barrels of gunpowder which had been placed under the English Houses of Parliament

the main are as good folks as any in Duxbury, Massachusetts. Ah, good! At last *Rover* has come.

As, with its welcome freight, the boat touched the side, the oakum-pickers, with venerable gestures, sought to restrain the blacks, who, at the sight of three gurried water-casks in its bottom, and a pile of wilted pumpkins in its bow, hung over the bulwarks in disorderly raptures.

Don Benito, with his servant, now appeared; his coming, perhaps, hastened by hearing the noise. Of him Captain Delano sought permission to serve out the water, so that all might share alike, and none injure themselves by unfair excess. But sensible, and, on Don Benito's account, kind as this offer was, it was received with what seemed impatience; as if aware that he lacked energy as a commander, Don Benito, with the true jealousy of weakness, resented as an affront any interference. So, at least, Captain Delano inferred.

In another moment the casks were being hoisted in, when some of the eager Negroes accidentally jostled Captain Delano, where he stood by the gangway; so that, unmindful of Don Benito, yielding to the impulse of the moment, with good-natured authority he bade the blacks stand back; to enforce his words making use of a half-mirthful, half-menacing gesture. Instantly the blacks paused, just where they were, each Negro and Negress suspended in his or her posture, exactly as the word had found them—for a few seconds continuing so—while, as between the responsive posts of a telegraph, an unknown syllable ran from man to man among the perched oakum-pickers. While the visitor's attention was fixed by this scene, suddenly the hatchet-polishers half rose, and a rapid cry came from Don Benito.

Thinking that at the signal of the Spaniard he was about to be massacred, Captain Delano would have sprung for his boat, but paused, as the oakum-pickers dropping down into the crowd with earnest exclamations, forced every white and every Negro back, at the same moment, with gestures friendly and familiar, almost jocose, bidding him, in substance, not be a fool. Simultaneously the hatchet-polishers resumed their seats, quietly as so many tailors, and at once, as if nothing had happened, the work of hoisting in the casks was resumed, whites and blacks singing at the tackle.

Captain Delano glanced toward Don Benito. As he saw his meagre form in the act of recovering itself from reclining in the servant's arms, into which the agitated invalid had fallen, he could not but marvel at the panic by which himself had been surprised on the darting supposition that such a commander, who, upon a legitimate occasion, so trivial, too, as it now appeared, could lose all self-command, was, with energetic iniquity, going to bring about his murder.

The casks being on deck, Captain Delano was handed a number of jars and cups by one of the steward's aids, who, in the name of his captain, entreated him to do as he had proposed—dole out the water. He complied, with republican impartiality as to this republican element, which always seeks one level, serving the oldest white no better than the youngest black; excepting, indeed, poor Don Benito, whose condition, if not rank, demanded an extra allowance. To him, in the first place, Captain Delano presented a fair pitcher of the fluid; but, thirsting as he was for it, the Spaniard quaffed not a drop until after several grave bows and salutes. A reciprocation of courtesies which the sight-loving Africans hailed with clapping hands.

Two of the less wilted pumpkins being reserved for the cabin table, the residue were minced up on the spot for the general regalement. But the soft bread, sugar, and bottled cider, Captain Delano would have given the whites alone, and in chief Don Benito; but the latter objected; which disinterestedness not a little pleased the American; and so mouthfuls all around were given alike to whites and blacks; excepting one bottle of cider, which Babo insisted upon setting aside for his master.

Here it may be observed that as, on the first visit of the boat, the American had not permitted his men to board the ship, neither did he now; being unwilling to add to the confusion of the decks.

Not uninfluenced by the peculiar good-humor at present prevailing, and for the time oblivious of any but benevolent thoughts, Captain Delano, who, from recent indications, counted upon a breeze within an hour or two at furthest, dispatched the boat back to the sealer, with orders for all the hands that could be spared immediately to set about rafting casks to the watering-place and filling them. Likewise he bade word be carried to his chief officer, that if, against present expectation, the ship was not brought to anchor by sunset, he need

---

5 **gurried**, fouled with gurry, or the offal of fish

be under no concern; for as there was to be a full moon that night, he (Captain Delano) would remain on board ready to play the pilot, come the wind soon or late.

As the two captains stood together, observing the departing boat—the servant, as it happened, having just spied a spot on his master's velvet sleeve, and silently engaged rubbing it out—the American expressed his regrets that the San Dominick had no boats; none, at least, but the unseaworthy old hulk of the long-boat, which, warped as a camel's skeleton in the desert, and almost as bleached, lay pot-wise inverted amidships, one side a little tipped, furnishing a subterraneous sort of den for family groups of the blacks, mostly women and small children; who, squatting on old mats below, or perched above in the dark dome, on the elevated seats, were descried, some distance within, like a social circle of bats, sheltering in some friendly cave; at intervals, ebon flights of naked boys and girls, three or four years old, darting in and out of the den's mouth.

"Had you three or four boats now, Don Benito," said Captain Delano, "I think that, by tugging at the oars, your Negroes here might help along matters some Did you sail from port without boats, Don Benito?"

"They were stove in the gales, Señor."

"That was bad. Many men, too, you lost then. Boats and men. Those must have been hard gales, Don Benito."

"Past all speech," cringed the Spaniard.

"Tell me, Don Benito," continued his companion with increased interest, "tell me, were these gales immediately off the pitch of Cape Horn?"

"Cape Horn?—who spoke of Cape Horn?"

"Yourself did, when giving me an account of your voyage," answered Captain Delano, with almost equal astonishment at this eating of his own words, even as he ever seemed eating his own heart, on the part of the Spaniard. "You yourself, Don Benito, spoke of Cape Horn," he emphatically repeated.

The Spaniard turned, in a sort of stooping posture, pausing an instant, as one about to make a plunging exchange of elements, as from air to water.

At this moment a messenger-boy, a white, hurried by, in the regular performance of his function carrying the last expired half-hour forward to the forecastle, from the cabin time-piece, to have it struck at the ship's large bell.

"Master," said the servant, discontinuing his work on the coat sleeve, and addressing the rapt Spaniard with a sort of timid apprehensiveness, as one charged with a duty, the discharge of which, it was foreseen, would prove irksome to the very person who had imposed it, and for whose benefit it was intended, "master told me never mind where he was, or how engaged, always to remind him, to a minute, when shaving-time comes. Miguel has gone to strike the half-hour afternoon. It is *now,* master. Will master go into the cuddy?"

"Ah—yes," answered the Spaniard, starting, as from dreams into realities; then turning upon Captain Delano, he said that ere long he would resume the conversation.

"Then if master means to talk more to Don Amasa," said the servant, "why not let Don Amasa sit by master in the cuddy, and master can talk, and Don Amasa can listen, while Babo here lathers and strops."

"Yes," said Captain Delano, not unpleased with this sociable plan, "yes, Don Benito, unless you had rather not, I will go with you."

"Be it so, Señor."

As the three passed aft, the American could not but think it another strange instance of his host's capriciousness, this being shaved with such uncommon punctuality in the middle of the day. But he deemed it more than likely that the servant's anxious fidelity had something to do with the matter; inasmuch as the timely interruption served to rally his master from the mood which had evidently been coming upon him.

The place called the cuddy was a light deck-cabin formed by the poop, a sort of attic to the large cabin below. Part of it had formerly been the quarters of the officers; but since their death all the partitionings had been thrown down, and the whole interior converted into one spacious and airy marine hall; for absence of fine furniture and picturesque disarray of odd appurtenances, somewhat answering to the wide, cluttered hall of some eccentric bachelor-squire in the country, who hangs his shooting-jacket and tobacco-pouch on deer antlers, and keeps his fishing-rod, tongs, and walking-stick in the same corner.

The similitude was heightened, if not originally suggested, by glimpses of the surrounding sea; since, in one aspect, the country and the ocean seem cousins-german.

The floor of the cuddy was matted. Overhead, four or five old muskets were stuck into horizontal holes along the beams. On one side was a claw-footed old table

lashed to the deck; a thumbed missal on it, and over it a small, meagre crucifix attached to the bulk-head. Under the table lay a dented cutlass or two, with a hacked harpoon, among some melancholy old rigging, like a heap of poor friars' girdles. There were also two long, sharp-ribbed settees of Malacca cane, black with age, and uncomfortable to look at as inquisitors' racks, with a large, misshapen arm-chair, which, furnished with a rude barber's crotch at the back, working with a screw, seemed some grotesque engine of torment. A flag locker was in one corner, open, exposing various colored bunting, some rolled up, others half unrolled, still others tumbled. Opposite was a cumbrous washstand, of black mahogany, all of one block, with a pedestal, like a font, and over it a railed shelf, containing combs, brushes, and other implements of the toilet. A torn hammock of stained grass swung near; the sheets tossed, and the pillow wrinkled up like a brow, as if whoever slept here slept but illy, with alternate visitations of sad thoughts and bad dreams.

The further extremity of the cuddy, overhanging the ship's stern, was pierced with three openings, windows or port-holes, according as men or cannon might peer, socially or unsocially, out of them. At present neither men nor cannon were seen, though huge ring-bolts and other rusty iron fixtures of the woodwork hinted of twenty-four-pounders.

Glancing toward the hammock as he entered, Captain Delano said, "You sleep here, Don Benito?"

"Yes, Señor, since we got into mild weather."

"This seems a sort of dormitory, sitting-room, sail-loft, chapel, armory, and private closet all together, Don Benito," added Captain Delano, looking round.

"Yes, Señor; events have not been favorable to much order in my arrangements."

Here the servant, napkin on arm, made a motion as if waiting his master's good pleasure. Don Benito signified his readiness, when, seating him in the Malacca arm-chair, and for the guest's convenience drawing opposite one of the settees, the servant commenced operations by throwing back his master's collar and loosening his cravat.

There is something in the Negro which, in a peculiar way, fits him for avocations about one's person. Most Negroes are natural valets and hair-dressers; taking to the comb and brush congenially as to the castinets, and flourishing them apparently with almost equal satisfaction. There is, too, a smooth tact about them in this employment, with a marvelous, noiseless, gliding briskness, not ungraceful in its way, singularly pleasing to behold, and still more so to be the manipulated subject of. And above all is the great gift of good-humor. Not the mere grin or laugh is here meant. Those were unsuitable. But a certain easy cheerfulness, harmonious in every glance and gesture; as though God had set the whole Negro to some pleasant tune.

When to this is added the docility arising from the unaspiring contentment of a limited mind, and that susceptibility of blind attachment sometimes inhering in indisputable inferiors, one readily perceives why those hypochondriacs, Johnson and Byron—it may be something like the hypochondriac, Benito Cereno—took to their hearts, almost to the exclusion of the entire white race, their serving men, the Negroes, Barber and Fletcher. But if there be that in the Negro which exempts him from the inflicted sourness of the morbid or cynical mind, how, in his most prepossessing aspects, must he appear to a benevolent one? When at ease with respect to exterior things, Captain Delano's nature was not only benign, but familiarly and humorously so. At home, he had often taken rare satisfaction in sitting in his door, watching some free man of color at his work or play. If on a voyage he chanced to have a black sailor, invariably he was on chatty, and half-gamesome terms with him. In fact, like most men of a good, blithe heart, Captain Delano took to Negroes, not philanthropically, but genially, just as other men to Newfoundland dogs.

Hitherto the circumstances in which he found the San Dominick had repressed the tendency. But in the cuddy, relieved from his former uneasiness, and, for various reasons, more sociably inclined than at any previous period of the day, and seeing the colored servant, napkin on arm, so debonair about his master, in a business so familiar as that of shaving, too, all his old weakness for Negroes returned.

Among other things, he was amused with an odd instance of the African love of bright colors and fine shows, in the black's informally taking from the flag-locker a great piece of bunting of all hues, and lavishly tucking it under his master's chin for an apron.

The mode of shaving among the Spaniards is a little different from what it is with other nations. They have

a basin, specifically called a barber's basin, which on one side is scooped out, so as accurately to receive the chin, against which it is closely held in lathering; which is done, not with a brush, but with soap dipped in the water of the basin and rubbed on the face.

In the present instance salt-water was used for lack of better; and the parts lathered were only the upper lip, and low down under the throat, all the rest being cultivated beard.

The preliminaries being somewhat novel to Captain Delano he sat curiously eying them, so that no conversation took place, nor, for the present, did Don Benito appear disposed to renew any.

Setting down his basin, the Negro searched among the razors, as for the sharpest, and having found it, gave it an additional edge by expertly stropping it on the firm, smooth, oily skin of his open palm; he then made a gesture as if to begin, but midway stood suspended for an instant, one hand elevating the razor, the other professionally dabbling among the bubbling suds on the Spaniard's lank neck. Not unaffected by the close sight of the gleaming steel, Don Benito nervously shuddered; his usual ghastliness was heightened by the lather, which lather, again, was intensified in its hue by the contrasting sootiness of the Negro's body. Altogether the scene was somewhat peculiar, at least to Captain Delano, nor, as he saw the two thus postured, could he resist the vagary, that in the black he saw a headsman, and in the white a man at the block. But this was one of those antic conceits, appearing and vanishing in a breath, from which, perhaps, the best regulated mind is not always free.

Meantime the agitation of the Spaniard had a little loosened the bunting from around him, so that one broad fold swept curtain-like over the chair-arm to the floor, revealing, amid a profusion of armorial bars and ground-colors—black, blue and yellow—a closed castle in a blood-red field diagonal with a lion rampant in a white.

"The castle and the lion," exclaimed Captain Delano—"why, Don Benito, this is the flag of Spain you use here. It's well it's only I, and not the King, that sees this," he added with a smile, "but"—turning toward the black,—"it's all one, I suppose, so the colors be gay;" which playful remark did not fail somewhat to tickle the Negro.

"Now, master," he said, readjusting the flag, and pressing the head gently further back into the crotch of the chair; "now, master," and the steel glanced nigh the throat.

Again Don Benito faintly shuddered.

"You must not shake so, master. See, Don Amasa, master always shakes when I shave him. And yet master knows I never yet have drawn blood, though it's true, if master will shake so, I may some of these times. Now, master," he continued. "And now, Don Amasa, please go on with your talk about the gale, and all that; master can hear, and between times, master can answer."

"Ah yes, these gales," said Captain Delano; "but the more I think of your voyage, Don Benito, the more I wonder, not at the gales, terrible as they must have been, but at the disastrous interval following them. For here, by your account, have you been these two months and more getting from Cape Horn to St. Maria, a distance which I myself, with a good wind, have sailed in a few days. True, you had calms, and long ones, but to be becalmed for two months, that is, at least, unusual. Why, Don Benito, had almost any other gentleman told me such a story, I should have been half disposed to a little incredulity."

Here an involuntary expression came over the Spaniard, similar to that just before on the deck, and whether it was the start he gave, or a sudden gawky roll of the hull in the calm, or a momentary unsteadiness of the servant's hand, however it was, just then the razor drew blood, spots of which stained the creamy lather under the throat; immediately the black barber drew back his steel, and remaining in his professional attitude, back to Captain Delano, and face to Don Benito, held up the trickling razor, saying, with a sort of half humorous sorrow, "See, master—you shook so—here's Babo's first blood."

No sword drawn before James the First of England, no assassination in that timid King's presence, could have produced a more terrified aspect than was now presented by Don Benito.

Poor fellow, thought Captain Delano, so nervous he can't even bear the sight of barber's blood; and this unstrung, sick man, is it credible that I should have imagined he meant to spill all my blood, who can't endure the sight of one little drop of his own? Surely, Amasa Delano, you have been beside yourself this day. Tell it not when you get home, sappy Amasa. Well, well, he looks like a murderer, doesn't he? More like as if himself were to be done for. Well, well, this day's experience shall be a good lesson.

Meantime, while these things were running through

the honest seaman's mind, the servant had taken the napkin from his arm, and to Don Benito had said—"But answer Don Amasa, please, master, while I wipe this ugly stuff off the razor, and strop it again."

As he said the words, his face was turned half round, so as to be alike visible to the Spaniard and the American, and seemed, by its expression, to hint, that he was desirous, by getting his master to go on with the conversation, considerately to withdraw his attention from the recent annoying accident. As if glad to snatch the offered relief, Don Benito resumed, rehearsing to Captain Delano, that not only were the calms of unusual duration, but the ship had fallen in with obstinate currents; and other things he added, some of which were but repetitions of former statements, to explain how it came to pass that the passage from Cape Horn to St. Maria had been so exceedingly long; now and then mingling with his words, incidental praises, less qualified than before, to the blacks, for their general good conduct. These particulars were not given consecutively, the servant, at convenient times, using his razor, and so, between the intervals of shaving, the story and panegyric went on with more than usual huskiness.

To Captain Delano's imagination, now again not wholly at rest, there was something so hollow in the Spaniard's manner, with apparently some reciprocal hollowness in the servant's dusky comment of silence, that the idea flashed across him, that possibly master and man, for some unknown purpose, were acting out, both in word and deed, nay, to the very tremor of Don Benito's limbs, some juggling play before him Neither did the suspicion of collusion lack apparent support, from the fact of those whispered conferences before mentioned. But then, what could be the object of enacting this play of the barber before him? At last, regarding the notion as a whimsy, insensibly suggested, perhaps, by the theatrical aspect of Don Benito in his harlequin ensign, Captain Delano speedily banished it.

The shaving over, the servant bestirred himself with a small bottle of scented waters, pouring a few drops on the head, and then diligently rubbing; the vehemence of the exercise causing the muscles of his face to twitch rather strangely.

His next operation was with comb, scissors and brush; going round and round, smoothing a curl here, clipping an unruly whisker-hair there, giving a graceful sweep to the temple-lock, with other impromptu touches evincing the hand of a master; while, like any resigned gentleman in barber's hands, Don Benito bore all, much less uneasily, at least, than he had done the razoring; indeed, he sat so pale and rigid now, that the Negro seemed a Nubian sculptor finishing off a white statue-head.

All being over at last, the standard of Spain removed, tumbled up, and tossed back into the flag-locker, the Negro's warm breath blowing away any stray hair which might have lodged down his master's neck; collar and cravat readjusted; a speck of lint whisked off the velvet lapel; all this being done; backing off a little space, and pausing with an expression of subdued self-complacency, the servant for a moment surveyed his master, as, in toilet at least, the creature of his own tasteful hands.

Captain Delano playfully complimented him upon his achievement; at the same time congratulating Don Benito.

But neither sweet waters, nor shampooing, nor fidelity, nor sociality, delighted the Spaniard Seeing him relapsing into forbidding gloom, and still remaining seated, Captain Delano, thinking that his presence was undesired just then, withdrew, on pretense of seeing whether, as he had prophesied, any signs of a breeze were visible.

Walking forward to the mainmast, he stood awhile thinking over the scene and not without some undefined misgivings, when he heard a noise near the cuddy, and turning, saw the Negro, his hand to his cheek. Advancing, Captain Delano perceived that the cheek was bleeding. He was about to ask the cause, when the Negro's wailing soliloquy enlightened him.

"Ah, when will master get better from his sickness; only the sour heart that sour sickness breeds made him serve Babo so; cutting Babo with the razor, because, only by accident, Babo had given master one little scratch; and for the first time in so many a day, too. Ah, ah, ah," holding his hand to his face.

Is it possible, thought Captain Delano; was it to wreak in private his Spanish spite against this poor friend of his, that Don Benito, by his sullen manner, impelled me to withdraw? Ah, this slavery breeds ugly passions in man.—Poor fellow!

He was about to speak in sympathy to the Negro, but with a timid reluctance he now re-entered the cuddy.

---

51 Nubian, one of the Negro tribe of Nubia, in eastern Africa

Presently master and man came forth; Don Benito leaning on his servant as if nothing had happened.

But a sort of love-quarrel, after all, thought Captain Delano.

He accosted Don Benito, and they slowly walked together. They had gone but a few paces, when the steward —a tall, rajah-looking mulatto, orientally set off with a pagoda turban formed by three or four Madras handkerchiefs wound about his head, tier on tier—approaching with a salaam, announced lunch in the cabin

On their way thither, the two captains were preceded by the mulatto, who, turning round as he advanced, with continual smiles and bows, ushered them on, a display of elegance which quite completed the insignificance of the small bare-headed Babo, who, as if not unconscious of inferiority, eyed askance the graceful steward. But in part, Captain Delano imputed his jealous watchfulness to that peculiar feeling which the full-blooded African entertains for the adulterated one. As for the steward, his manner, if not bespeaking much dignity of self-respect, yet evidenced his extreme desire to please, which is doubly meritorious, as at once Christian and Chesterfieldian.

Captain Delano observed with interest that while the complexion of the mulatto was hybrid, his physiognomy was European—classically so.

"Don Benito," whispered he, "I am glad to see this usher-of-the-golden-rod of yours; the sight refutes an ugly remark once made to me by a Barbados planter, that when a mulatto has a regular European face, look out for him; he is a devil. But see, your steward here has features more regular than King George's of England, and yet there he nods, and bows, and smiles; a king, indeed—the king of kind hearts and polite fellows. What a pleasant voice he has, too!"

"He has, Señor."

"But, tell me, has he not, so far as you have known him, always proved a good, worthy fellow?" said Captain Delano, pausing, while with a final genuflexion the steward disappeared into the cabin; "come, for the reason just mentioned, I am curious to know."

"Francesco is a good man," rather sluggishly responded Don Benito, like a sort of phlegmatic appreciator, who would neither find fault nor flatter.

"Ah, I thought so. For it were strange, indeed, and not very creditable to us white-skins, if a little of our blood mixed with the African's, should, far from improving the latter's quality, have the sad effect of pouring vitriolic acid into black broth; improving the hue, perhaps, but not the wholesomeness."

"Doubtless, doubtless, Señor, but"—glancing at Babo —"not to speak of Negroes, your planter's remark I have heard applied to the Spanish and Indian intermixtures in our provinces. But I know nothing about the matter," he listlessly added.

And here they entered the cabin.

The lunch was a frugal one. Some of Captain Delano's fresh fish and pumpkins, biscuit and salt beef, the reserved bottle of cider, and the San Dominick's last bottle of Canary.

As they entered, Francesco, with two or three colored aids, was hovering over the table giving the last adjustments. Upon perceiving their master they withdrew, Francesco making a smiling congé, and the Spaniard, without condescending to notice it, fastidiously remarking to his companion that he relished not superfluous attendance.

Without companions, host and guest sat down, like a childless married couple, at opposite ends of the table, Don Benito waving Captain Delano to his place, and, weak as he was, insisting upon that gentleman being seated before himself

The Negro placed a rug under Don Benito's feet, and a cushion behind his back, and then stood behind, not his master's chair, but Captain Delano's. At first, this a little surprised the latter But it was soon evident that, in taking his position, the black was still true to his master; since by facing him he could the more readily anticipate his slightest want.

"This is an uncommonly intelligent fellow of yours, Don Benito," whispered Captain Delano across the table.

"You say true, Señor"

During the repast, the guest again reverted to parts of Don Benito's story, begging further particulars here and there. He inquired how it was that the scurvy and fever should have committed such wholesale havoc upon the whites, while destroying less than half of the blacks. As if this question reproduced the whole scene of plague before the Spaniard's eyes, miserably reminding him of his solitude in a cabin where before he had had so many friends and officers round him, his hand shook, his face became hueless, broken words escaped; but directly the sane memory of the past seemed replaced by insane terrors of the present. With starting eyes he stared before

him at vacancy. For nothing was to be seen but the hand of his servant pushing the Canary over toward him. At length a few sips served partially to restore him. He made random reference to the different constitutions of races, enabling one to offer more resistance to certain maladies than another. The thought was new to his companion.

Presently Captain Delano, intending to say something to his host concerning the pecuniary part of the business he had undertaken for him, especially—since he was strictly accountable to his owners—with reference to the new suit of sails, and other things of that sort; and naturally preferring to conduct such affairs in private, was desirous that the servant should withdraw; imagining that Don Benito for a few minutes could dispense with his attendance. He, however, waited awhile; thinking that, as the conversation proceeded, Don Benito, without being prompted, would perceive the propriety of the step.

But it was otherwise. At last catching his host's eye, Captain Delano, with a slight backward gesture of his thumb, whispered, "Don Benito, pardon me, but there is an interference with the full expression of what I have to say to you."

Upon this the Spaniard changed countenance; which was imputed to his resenting the hint, as in some way a reflection upon his servant. After a moment's pause, he assured his guest that the black's remaining with them could be of no disservice; because since losing his officers he had made Babo (whose original office, it now appeared, had been captain of the slaves) not only his constant attendant and companion, but in all things his confidant.

After this, nothing more could be said; though, indeed, Captain Delano could hardly avoid some little tinge of irritation upon being left ungratified in so inconsiderable a wish, by one, too, for whom he intended such solid services. But it is only his querulousness, thought he; and so filling his glass he proceeded to business.

The price of the sails and other matters was fixed upon. But while this was being done, the American observed that, though his original offer of assistance had been hailed with hectic animation, yet now when it was reduced to a business transaction, indifference and apathy were betrayed. Don Benito, in fact, appeared to submit to hearing the details more out of regard to common propriety, than from any impression that weighty benefit to himself and his voyage was involved.

Soon, his manner became still more reserved. The effort was vain to seek to draw him into social talk. Gnawed by his splenetic mood, he sat twitching his beard, while to little purpose the hand of his servant, mute as that on the wall, slowly pushed over the Canary.

Lunch being over, they sat down on the cushioned transom; the servant placing a pillow behind his master. The long continuance of the calm had now affected the atmosphere. Don Benito sighed heavily, as if for breath.

"Why not adjourn to the cuddy," said Captain Delano; "there is more air there." But the host sat silent and motionless.

Meantime his servant knelt before him with a large fan of feathers. And Francesco coming in on tiptoes, handed the Negro a little cup of aromatic waters, with which at intervals he chafed his master's brow; smoothing the hair along the temples as a nurse does a child's. He spoke no word. He only rested his eye on his master's as if, amid all Don Benito's distress, a little to refresh his spirit by the silent sight of fidelity.

Presently the ship's bell sounded two o'clock; and through the cabin-windows a slight rippling of the sea was discerned; and from the desired direction.

"There," exclaimed Captain Delano, "I told you so, Don Benito, look!"

He had risen to his feet, speaking in a very animated tone, with a view the more to rouse his companion. But though the crimson curtain of the stern-window near him that moment fluttered against his pale cheek, Don Benito seemed to have even less welcome for the breeze than the calm.

Poor fellow, thought Captain Delano, bitter experience has taught him that one ripple does not make a wind, any more than one swallow a summer. But he is mistaken for once. I will get his ship in for him, and prove it.

Briefly alluding to his weak condition, he urged his host to remain quietly where he was, since he (Captain Delano) would with pleasure take upon himself the responsibility of making the best use of the wind.

Upon gaining the deck, Captain Delano started at the unexpected figure of Atufal, monumentally fixed at the threshold, like one of those sculptured porters of black marble guarding the porches of Egyptian tombs.

But this time the start was, perhaps, purely physical. Atufal's presence, singularly attesting docility even in sullenness, was contrasted with that of the hatchet-polish-

ers, who in patience evinced their industry; while both spectacles showed, that lax as Don Benito's general authority might be, still, whenever he chose to exert it, no man so savage or colossal but must, more or less, bow.

Snatching a trumpet which hung from the bulwarks, with a free step Captain Delano advanced to the forward edge of the poop, issuing his orders in his best Spanish. The few sailors and many Negroes, all equally pleased, obediently set about heading the ship toward the harbour.

While giving some directions about setting a lower stu'n'-sail, suddenly Captain Delano heard a voice faithfully repeating his orders. Turning, he saw Babo, now for the time acting, under the pilot, his original part of captain of the slaves. This assistance proved valuable. Tattered sails and warped yards were soon brought into some trim. And no brace or halyard was pulled but to the blithe songs of the inspirited Negroes.

Good fellows, thought Captain Delano, a little training would make fine sailors of them. Why see, the very women pull and sing, too. These must be some of those Ashantee Negresses that make such capital soldiers, I've heard. But who's at the helm? I must have a good hand there.

He went to see.

The San Dominick steered with a cumbrous tiller, with large horizontal pullies attached. At each pulley-end stood a subordinate black, and between them, at the tiller-head, the responsible post, a Spanish seaman, whose countenance evinced his due share in the general hopefulness and confidence at the coming of the breeze.

He proved the same man who had behaved with so shame-faced an air on the windlass.

"Ah,—it is you, my man," exclaimed Captain Delano —"well, no more sheep's-eyes now;—look straight forward and keep the ship so. Good hand, I trust? And want to get into the harbor, don't you?"

The man assented with an inward chuckle, grasping the tiller-head firmly. Upon this, unperceived by the American, the two blacks eyed the sailor intently.

Finding all right at the helm, the pilot went forward to the forecastle, to see how matters stood there.

The ship now had way enough to breast the current. With the approach of evening the breeze would be sure to freshen.

Having done all that was needed for the present, Captain Delano, giving his last orders to the sailors, turned aft to report affairs to Don Benito in the cabin perhaps additionally incited to rejoin him by the hope of snatching a moment's private chat while his servant was engaged upon deck.

From opposite sides, there were, beneath the poop two approaches to the cabin; one further forward than the other, and consequently communicating with a longer passage. Marking the servant still above, Captain Delano taking the nighest entrance—the one last named, and at whose porch Atufal still stood—hurried on his way, till arrived at the cabin threshold, he paused an instant, little to recover from his eagerness. Then, with the words of his intended business upon his lips, he entered. As he advanced toward the seated Spaniard, he heard another footstep, keeping time with his. From the opposite door a salver in hand, the servant was likewise advancing.

"Confound the faithful fellow," thought Captain Delano; "what a vexatious coincidence."

Possibly, the vexation might have been something different, were it not for the brisk confidence inspired by the breeze. But even as it was, he felt a slight twinge from a sudden indefinite association in his mind of Babo with Atufal.

"Don Benito," said he, "I give you joy; the breeze will hold, and will increase. By the way, your tall man at time-piece, Atufal, stands without. By your order, course?"

Don Benito recoiled, as if at some bland satirical touch delivered with such adroit garnish of apparent good breeding as to present no handle for retort.

He is like one flayed alive, thought Captain Delano where may one touch him without causing a shrink?

The servant moved before his master, adjusting cushion; recalled to civility, the Spaniard stiffly replied "You are right. The slave appears where you saw him according to my command; which is, that if at the given hour I am below, he must take his stand and abide my coming."

"Ah now, pardon me, but that is treating the poor fellow like an ex-king indeed. Ah, Don Benito," smiling "for all the license you permit in some things, I fear lest at bottom, you are a bitter hard master."

Again Don Benito shrank; and this time, as the good sailor thought, from a genuine twinge of his conscience

Again conversation became constrained. In vain Captain Delano called attention to the now perceptible m

tion of the keel gently cleaving the sea; with lack-lustre eye, Don Benito returned words few and reserved.

By-and-by, the wind having steadily risen, and still blowing right into the harbour, bore the San Dominick swiftly on. Rounding a point of land, the sealer at distance came into open view.

Meantime Captain Delano had again repaired to the deck, remaining there some time. Having at last altered the ship's course, so as to give the reef a wide berth, he returned for a few moments below.

I will cheer up my poor friend, this time, thought he.

"Better and better, Don Benito," he cried as he blithely re-entered: "there will soon be an end to your cares, at least for awhile. For when, after a long, sad voyage, you know, the anchor drops into the haven, all its vast weight seems lifted from the captain's heart. We are getting on famously, Don Benito. My ship is in sight. Look through this side-light here; there she is; all a-taunt-o! The Bachelor's Delight, my good friend. Ah, how this wind braces one up. Come, you must take a cup of coffee with me this evening. My old steward will give you as fine a cup as ever any sultan tasted. What say you, Don Benito, will you?"

At first, the Spaniard glanced feverishly up, casting a longing look toward the sealer, while with mute concern his servant gazed into his face. Suddenly the old ague of coldness returned, and dropping back to his cushions he was silent.

"You do not answer. Come, all day you have been my host; would you have hospitality all on one side?"

"I cannot go," was the response.

"What? It will not fatigue you. The ships will lie together as near as they can, without swinging foul. It will be little more than stepping from deck to deck; which is but as from room to room. Come, come, you must not refuse me."

"I cannot go," decisively and repulsively repeated Don Benito.

Renouncing all but the last appearance of courtesy, with a sort of cadaverous sullenness, and biting his thin nails to the quick, he glanced, almost glared, at his guest, as if impatient that a stranger's presence should interfere with the full indulgence of his morbid hour. Meantime the sound of the parted waters came more and more gurglingly and merrily in at the windows; as reproaching him for his dark spleen; as telling him that, sulk as he might, and go mad with it, nature cared not a jot; since, whose fault was it, pray?

But the foul mood was now at its depth, as the fair wind at its height.

There was something in the man so far beyond any mere unsociality or sourness previously evinced, that even the forbearing good-nature of his guest could no longer endure it. Wholly at a loss to account for such demeanor, and deeming sickness with eccentricity, however extreme, no adequate excuse, well satisfied, too, that nothing in his own conduct could justify it, Captain Delano's pride began to be roused. Himself became reserved. But all seemed one to the Spaniard. Quitting him, therefore, Captain Delano once more went to the deck.

The ship was now within less than two miles of the sealer. The whale-boat was seen darting over the interval.

To be brief, the two vessels, thanks to the pilot's skill, ere long in neighborly style lay anchored together.

Before returning to his own vessel, Captain Delano had intended communicating to Don Benito the smaller details of the proposed services to be rendered. But, as it was, unwilling anew to subject himself to rebuffs, he resolved, now that he had seen the San Dominick safely moored, immediately to quit her, without further allusion to hospitality or business. Indefinitely postponing his ulterior plans, he would regulate his future actions according to future circumstances. His boat was ready to receive him; but his host still tarried below. Well, thought Captain Delano, if he has little breeding, the more need to show mine. He descended to the cabin to bid a ceremonious, and, it may be, tacitly rebukeful adieu. But to his great satisfaction, Don Benito, as if he began to feel the weight of that treatment with which his slighted guest had, not indecorously, retaliated upon him, now supported by his servant, rose to his feet, and grasping Captain Delano's hand, stood tremulous; too much agitated to speak. But the good augury hence drawn was suddenly dashed, by his resuming all his previous reserve, with augmented gloom, as, with half-averted eyes, he silently reseated himself on his cushions. With a corresponding return of his own chilled feelings, Captain Delano bowed and withdrew.

He was hardly midway in the narrow corridor, dim as a tunnel, leading from the cabin to the stairs, when a sound, as of the tolling for execution in some jail-yard, fell on his ears. It was the echo of the ship's flawed bell,

striking the hour, drearily reverberated in this subterranean vault. Instantly, by a fatality not to be withstood, his mind, responsive to the portent, swarmed with superstitious suspicions. He paused. In images far swifter than these sentences, the minutest details of all his former distrusts swept through him.

Hitherto, credulous good-nature had been too ready to furnish excuses for reasonable fears. Why was the Spaniard, so superfluously punctilious at times, now heedless of common propriety in not accompanying to the side his departing guest? Did indisposition forbid? Indisposition had not forbidden more irksome exertion that day. His last equivocal demeanor recurred. He had risen to his feet, grasped his guest's hand, motioned toward his hat; then, in an instant, all was eclipsed in sinister muteness and gloom. Did this imply one brief, repentant relenting at the final moment, from some iniquitous plot, followed by remorseless return to it? His last glance seemed to express a calamitous, yet acquiescent farewell to Captain Delano forever. Why decline the invitation to visit the sealer that evening? Or was the Spaniard less hardened than the Jew, who refrained not from supping at the board of him whom the same night he meant to betray? What imported all those day-long enigmas and contradictions, except they were intended to mystify, preliminary to some stealthy blow? Atufal, the pretended rebel, but punctual shadow, that moment lurked by the threshold without. He seemed a sentry, and more. Who, by his own confession, had stationed him there? Was the Negro now lying in wait?

The Spaniard behind—his creature before; to rush from darkness to light was the involuntary choice.

The next moment, with clenched jaw and hand, he passed Atufal, and stood unharmed in the light. As he saw his trim ship lying peacefully at her anchor, and almost within ordinary call; as he saw his household boat, with familiar faces in it, patiently rising and falling on the short waves by the San Dominick's side; and then, glancing about the decks where he stood, saw the oakum-pickers still gravely plying their fingers; and heard the low, buzzing whistle and industrious hum of the hatchet-polishers, still bestirring themselves over their endless occupation; and more than all, as he saw the benign aspect of nature, taking her innocent repose in the evening; the screened sun in the quiet camp of the west shining out like the mild light from Abraham's tent; as his charmed eye and ear took in all these, with the chained figure of the black, the clenched jaw and hand relaxed. Once again he smiled at the phantoms which had mocked him, and felt something like a tinge of remorse, that, by harbouring them even for a moment, he should, by implication, have betrayed an atheist doubt of the ever-watchful Providence above.

There was a few minutes' delay, while, in obedience to his orders, the boat was being hooked along to the gangway. During this interval, a sort of saddened satisfaction stole over Captain Delano, at thinking of the kindly offices he had that day discharged for a stranger. Ah, thought he, after good actions one's conscience is never ungrateful, however much so the benefited party may be.

Presently, his foot, in the first act of descent into the boat, pressed the first round of the side-ladder, his face presented inward upon the deck. In the same moment, he heard his name courteously sounded; and, to his pleased surprise, saw Don Benito advancing—an unwonted energy in his air, as if, at the last moment, intent upon making amends for his recent discourtesy. With instinctive good feeling, Captain Delano, withdrawing his foot, turned and reciprocally advanced. As he did so, the Spaniard's nervous eagerness increased, but his vital energy failed; so that, the better to support him, the servant, placing his master's hand on his naked shoulder, and gently holding it there, formed himself into a sort of crutch.

When the two captains met, the Spaniard again fervently took the hand of the American, at the same time casting an earnest glance into his eyes, but, as before, too much overcome to speak.

I have done him wrong, self-reproachfully thought Captain Delano; his apparent coldness has deceived me; in no instance has he meant to offend.

Meantime, as if fearful the continuance of the scene might too much unstring his master, the servant seemed anxious to terminate it. And so, still presenting himself as a crutch, and walking between the two captains, he advanced with them toward the gangway; while still, as if full of kindly contrition, Don Benito would not let go the hand of Captain Delano, but retained it in his, across the black's body.

---

22 **the Jew . . . betray,** an allusion to Judas' betrayal of Jesus. See Matthew 26

Soon they were standing by the side, looking over into the boat, whose crew turned up their curious eyes. Waiting a moment for the Spaniard to relinquish his hold, the now embarrassed Captain Delano lifted his foot, to overstep the threshold of the open gangway; but still Don Benito would not let go his hand. And yet, with an agitated tone, he said, "I can go no further; here I must bid you adieu. Adieu, my dear, dear Don Amasa. Go—go!" suddenly tearing his hand loose, "go, and God guard you better than me, my best friend."

Not unaffected, Captain Delano would now have lingered; but catching the meekly admonitory eye of the servant, with a hasty farewell he descended into his boat, followed by the continual adieus of Don Benito, standing rooted in the gangway.

Seating himself in the stern, Captain Delano, making a last salute, ordered the boat shoved off. The crew had their oars on end. The bowsmen pushed the boat a sufficient distance for the oars to be lengthwise dropped. The instant that was done, Don Benito sprang over the bulwarks, falling at the feet of Captain Delano; at the same time, calling toward his ship, but in tones so frenzied, that none in the boat could understand him. But, as if not equally obtuse, three sailors, from three different and distant parts of the ship, splashed into the sea, swimming after their captain, as if intent upon his rescue.

The dismayed officer of the boat eagerly asked what this meant. To which Captain Delano, turning a disdainful smile upon the unaccountable Spaniard, answered that, for his part, he neither knew nor cared; but it seemed as if Don Benito had taken it into his head to produce the impression among his people that the boat wanted to kidnap him. "Or else—give way for your lives," he wildly added, starting at a clattering hubbub in the ship, above which rang the tocsin of the hatchet-polishers; and seizing Don Benito by the throat he added, "this plotting pirate means murder!" Here, in apparent verification of the words, the servant, a dagger in his hand, was seen on the rail overhead, poised, in the act of leaping, as if with desperate fidelity to befriend his master to the last, while, seemingly to aid the black, the three white sailors were trying to clamber into the hampered bow. Meantime, the whole host of Negroes, as if inflamed at the sight of their jeopardized captain, impended in one sooty avalanche over the bulwarks.

All this, with what preceded, and what followed, occurred with such involutions of rapidity, that past, present, and future seemed one.

Seeing the Negro coming, Captain Delano had flung the Spaniard aside, almost in the very act of clutching him and, by the unconscious recoil, shifting his place, with arms thrown up, so promptly grappled the servant in his descent, that with dagger presented at Captain Delano's heart, the black seemed of purpose to have leaped there as to his mark. But the weapon was wrenched away, and the assailant dashed down into the bottom of the boat, which now, with disentangled oars, began to speed through the sea.

At this juncture, the left hand of Captain Delano, on one side, again clutched the half-reclined Don Benito, heedless that he was in a speechless faint, while his right foot, on the other side, ground the prostrate Negro, and his right arm pressed for added speed on the after oar, his eye bent forward, encouraging his men to their utmost.

But here, the officer of the boat, who had at last succeeded in beating off the towing sailors, and was now, with face turned aft, assisting the bowsman at his oar, suddenly called to Captain Delano, to see what the black was about; while a Portuguese oarsman shouted to him to give heed to what the Spaniard was saying.

Glancing down at his feet, Captain Delano saw the freed hand of the servant aiming with a second dagger—a small one, before concealed in his wool—with this he was snakishly writhing up from the boat's bottom, at the heart of his master, his countenance lividly vindictive, expressing the centred purpose of his soul; while the Spaniard, half-choked, was vainly shrinking away, with husky words, incoherent to all but the Portuguese.

That moment, across the long-benighted mind of Captain Delano, a flash of revelation swept, illuminating in unanticipated clearness his host's whole mysterious demeanor, with every enigmatic event of the day, as well as the entire past voyage of the San Dominick. He smote Babo's hand down, but his own heart smote him harder. With infinite pity he withdrew his hold from Don Benito. Not Captain Delano, but Don Benito, the black, in leaping into the boat, had intended to stab.

Both the black's hands were held, as, glancing up towards the San Dominick, Captain Delano, now with the scales dropped from his eyes, saw the Negroes, not in misrule, not in tumult, not as if frantically concerned

for Don Benito, but with mask torn away, flourishing hatchets and knives, in ferocious piratical revolt. Like delirious black dervishes, the six Ashantees danced on the poop. Prevented by their foes from springing into the water, the Spanish boys were hurrying up to the topmost spars, while such of the few Spanish sailors, not already in the sea, less alert, were descried, helplessly mixed in, on deck, with the blacks.

Meantime Captain Delano hailed his own vessel, ordering the ports up, and the guns run out. But by this time the cable of the San Dominick had been cut; and the fag-end, in lashing out, whipped away the canvas shroud about the beak, suddenly revealing, as the bleached hull swung round toward the open ocean, death for the figurehead, in a human skeleton; chalky comment on the chalked words below, *"Follow your leader."*

At the sight, Don Benito, covering his face, wailed out: "'Tis he, Aranda! my murdered, unburied friend!"

Upon reaching the sealer, calling for ropes, Captain Delano bound the Negro, who made no resistance, and had him hoisted to the deck. He would then have assisted the now almost helpless Don Benito up the side; but Don Benito, wan as he was, refused to move, or be moved, until the Negro should have been first put below out of view. When, presently assured that it was done, he no more shrank from the ascent.

The boat was immediately dispatched back to pick up the three swimming sailors. Meantime, the guns were in readiness, though, owing to the San Dominick having glided somewhat astern of the sealer, only the aftermost one could be brought to bear. With this, they fired six times; thinking to cripple the fugitive ship by bringing down her spars. But only a few inconsiderable ropes were shot away. Soon the ship was beyond the gun's range, steering broad out of the bay; the blacks thickly clustering round the bowsprit, one moment with taunting cries toward the whites, the next with upthrown gestures hailing the now dusky moors of ocean—cawing crows escaped from the hand of the fowler.

The first impulse was to slip the cables and give chase. But, upon second thoughts, to pursue with whale-boat and yawl seemed more promising.

Upon inquiring of Don Benito what firearms they had on board the San Dominick, Captain Delano was answered that they had none that could be used; because, in the earlier stages of the mutiny, a cabin-passenger, since dead, had secretly put out of order the locks of what few muskets there were. But with all his remaining strength, Don Benito entreated the American not to give chase, either with ship or boat; for the Negroes had already proved themselves such desperadoes, that, in case of a present assault, nothing but a total massacre of the whites could be looked for. But, regarding this warning as coming from one whose spirit had been crushed by misery, the American did not give up his design.

The boats were got ready and armed. Captain Delano ordered his men into them. He was going himself when Don Benito grasped his arm.

"What! have you saved my life, Señor, and are you now going to throw away your own?"

The officers also, for reasons connected with their interests and those of the voyage, and a duty owing to the owners, strongly objected against their commander's going. Weighing their remonstrances a moment, Captain Delano felt bound to remain; appointing his chief mate —an athletic and resolute man, who had been a privateer's-man—to head the party. The more to encourage the sailors, they were told, that the Spanish captain considered his ship as good as lost; that she and her cargo, including some gold and silver, were worth more than a thousand doubloons. Take her, and no small part should be theirs. The sailors replied with a shout.

The fugitives had now almost gained an offing. It was nearly night; but the moon was rising. After hard, prolonged pulling, the boats came up on the ship's quarters, at a suitable distance laying upon their oars to discharge their muskets. Having no bullets to return, the Negroes sent their yells. But upon the second volley, Indian-like, they hurtled their hatchets. One took off a sailor's fingers. Another struck the whale-boat's bow, cutting off the rope there, and remaining stuck in the gunwale like a woodman's axe. Snatching it, quivering from its lodgment, the mate hurled it back. The returned gauntlet now stuck in the ship's broken quarter-gallery, and so remained.

The Negroes giving too hot a reception, the whites kept a more respectful distance. Hovering now just out of reach of the hurtling hatchets, they, with a view to the

---

73 offing, a good distance from the shore where there is deep water and no need of a pilot

close encounter which must soon come, sought to decoy the blacks into entirely disarming themselves of their most murderous weapons in a hand-to-hand fight, by foolishly flinging them, as missiles, short of the mark, into the sea. But ere long, perceiving the stratagem, the Negroes desisted, though not before many of them had to replace their lost hatchets with handspikes; an exchange which, as counted upon, proved, in the end, favorable to the assailants.

Meantime, with a strong wind, the ship still clove the water; the boats alternately falling behind, and pulling up, to discharge fresh volleys.

The fire was mostly directed toward the stern, since there, chiefly, the Negroes, at present, were clustering. But to kill or maim the Negroes was not the object. To take them, with the ship, was the object. To do it, the ship must be boarded; which could not be done by boats while she was sailing so fast.

A thought now struck the mate. Observing the Spanish boys still aloft, high as they could get, he called to them to descend to the yards, and cut adrift the sails. It was done. About this time, owing to causes hereafter to be shown, two Spaniards, in the dress of sailors, and conspicuously showing themselves, were killed; not by volleys, but by deliberate marksman's shots; while, as it afterward appeared, by one of the general discharges, Atufal, the black, and the Spaniard at the helm likewise were killed. What now, with the loss of the sails, and loss of leaders, the ship became unmanageable to the Negroes.

With creaking masts, she came heavily round to the wind; the prow slowly swinging into view of the boats, its skeleton gleaming in the horizontal moonlight, and casting a gigantic ribbed shadow upon the water. One extended arm of the ghost seemed beckoning the whites to avenge it.

"Follow your leader!" cried the mate; and, one on each bow, the boats boarded. Sealing-spears and cutlasses crossed hatchets and handspikes. Huddled upon the long-boat amidships, the Negresses raised a wailing chant, whose chorus was the clash of the steel.

For a time, the attack wavered; the Negroes wedging themselves to beat it back; the half-repelled sailors, as yet unable to gain a footing, fighting as troopers in the saddle, one leg sideways flung over the bulwarks, and one without, plying their cutlasses like carters' whips. But in vain. They were almost overborne, when rallying themselves into a squad as one man, with a huzza, they sprang inboard, where, entangled, they involuntarily separated again. For a few breaths' space there was a vague, muffled, inner sound, as of submerged sword-fish rushing hither and thither through shoals of black-fish. Soon, in a reunited band, and joined by the Spanish seamen, the whites came to the surface, irresistibly driving the Negroes toward the stern. But a barricade of casks and sacks from side to side, had been thrown up by the mainmast. Here the Negroes faced about, and though scorning peace or truce, yet fain would have had respite. But, without pause, overleaping the barrier, the unflagging sailors again closed. Exhausted, the blacks now fought in despair. Their red tongues lolled, wolf-like, from their black mouths. But the pale sailors' teeth were set; not a word was spoken; and, in five minutes more, the ship was won.

Nearly a score of the Negroes were killed. Exclusive of those by the balls, many were mangled; their wounds—mostly inflicted by the long-edged sealing-spears—resembling those shaven ones of the English at Preston Pans, made by the poled scythes of the Highlanders. On the other side, none were killed, though several were wounded; some severely, including the mate. The surviving Negroes were temporarily secured, and the ship towed back into the harbor at midnight, once more lay anchored.

Omitting the incidents and arrangements ensuing, suffice it that, after two days spent in refitting, the ships sailed in company for Conception in Chili, and thence for Lima in Peru; where, before the vice-regal courts, the whole affair, from the beginning, underwent investigation.

Though, midway on the passage, the ill-fated Spaniard, relaxed from constraint, showed some signs of regaining health with free-will; yet, agreeably to his own foreboding, shortly before arriving at Lima, he relapsed, finally becoming so reduced as to be carried ashore in arms. Hearing of his story and plight, one of the many religious institutions of the City of Kings opened an hospitable refuge to him, where both physician and priest were his nurses, and a member of the order volunteered to be his

68 **Preston Pans.** At the battle of Prestonpans in 1745, the Scotch Highlanders supported the Young Pretender against the English

one special guardian and consoler, by night and by day.

The following extracts, translated from one of the official Spanish documents, will, it is hoped, shed light on the preceding narrative, as well as, in the first place, reveal the true port of departure and true history of the San Dominick's voyage, down to the time of her touching at the island of St. Maria.

But, ere the extracts come, it may be well to preface them with a remark.

The document selected, from among many others, for partial translation, contains the deposition of Benito Cereno; the first taken in the case. Some disclosures therein were, at the time, held dubious for both learned and natural reasons. The tribunal inclined to the opinion that the deponent, not undisturbed in his mind by recent events, raved of some things which could never have happened. But subsequent depositions of the surviving sailors, bearing out the revelations of their captain in several of the strangest particulars, gave credence to the rest. So that the tribunal, in its final decision, rested its capital sentences upon statements which, had they lacked confirmation, it would have deemed it but duty to reject.

I, DON JOSE DE ABOS AND PADILLA, His Majesty's Notary for the Royal Revenue, and Register of this Province, and Notary Public of the Holy Crusade of this Bishopric, etc.

Do certify and declare, as much as is requisite in law, that, in the criminal cause commenced the twenty-fourth of the month of September, in the year seventeen hundred and ninety-nine, against the Negroes of the ship San Dominick, the following declaration before me was made:

Declaration of the first witness, DON BENITO CERENO.

The same day, and month, and year, His Honor, Doctor Juan Martinez de Rozas, Councilor of the Royal Audience of this Kingdom, and learned in the law of this Intendency, ordered the captain of the ship San Dominick, Don Benito Cereno, to appear; which he did in his litter, attended by the monk Infelez; of whom he received the oath, which he took by God, our Lord, and a sign of the Cross; under which he promised to tell the truth of whatever he should know and should be asked;—and being interrogated agreeably to the tenor of the act commencing the process, he said, that on the twentieth of May last, he set sail with his ship from the port of Valparaiso, bound to that of Callao; loaded with the produce of the country besides thirty cases of hardware and one hundred and sixty blacks, of both sexes, mostly belonging to Don Alexandro Aranda, gentleman, of the city of Mendoza; that the crew of the ship consisted of thirty-six men, besides the persons who went as passengers; that the Negroes were in part as follows: . . .

[*Here, in the original, follows a list of some fifty names, descriptions, and ages, compiled from certain recovered documents of Aranda's, and also from recollections of the deponent, from which portions only are extracted.*]

—One, from about eighteen to nineteen years, named José, and this was the man that waited upon his master, Don Alexandro, and who speaks well the Spanish, having served him four or five years; . . . A mulatto, named Francesco, the cabin steward, of a good person and voice, having sung in the Valparaiso churches, native of the province of Buenos Ayres, aged about thirty-five years. A smart Negro, named Dago, who had been for many years a grave-digger among the Spaniards, aged forty-six years. . . . Four old Negroes, born in Africa, from sixty to seventy, but sound, caulkers by trade, whose names are as follows:—the first was named Muri, and he was killed (as was also his son named Diamelo); the second, Nacta; the third, Yola, likewise killed; the fourth, Ghofan, and six full-grown Negroes, aged from thirty to forty-five, all raw, and born among the Ashantees—Matiluqui, Yan, Lecbe, Mapenda, Yambaio, Akim; four of whom were killed; . . . a powerful Negro named Atufal, who being supposed to have been a chief in Africa, his owner set great store by him. . . . And a small Negro of Senegal, but some years among the Spaniards, aged about thirty, which Negro's name was Babo; . . . that he does not remember the names of the others, but that still expecting the residue of Don Alexandro's papers will be found, will then take due account of them all, and remit to the court; . . . and thirty-nine women and children of all ages.

[*The catalogue over, the deposition goes on:*]

. . . That all the Negroes slept upon deck, as is customary in this navigation, and none wore fetters, because the owner, his friend Aranda, told him that they were all tractable; . . . that on the seventh day after leaving port, at three o'clock in the morning, all the Spaniards being asleep except the two officers on the watch, who were the boatswain, Juan Robles, and the carpenter, Juan Bautista Gayete, and the helmsman and his boy, the Negroes revolted suddenly, wounded dangerously the boatswain and the carpenter, and

---

52 [Here . . . extracted.] The brackets and bracketed material are Melville's throughout • 76 Senegal, a province in West Africa

successively killed eighteen men of those who were sleeping upon deck, some with hand-spikes and hatchets, and others by throwing them alive overboard, after tying them; that of the Spaniards upon deck, they left about seven, as he thinks, alive and tied, to manoeuvre the ship, and three or four more who hid themselves, remained also alive. Although in the act of revolt the Negroes made themselves masters of the hatchway, six or seven wounded went through it to the cockpit, without any hindrance on their part; that in the act of revolt, the mate and another person, whose name he does not recollect, attempted to come up through the hatchway, but being quickly wounded, were obliged to return to the cabin; that the deponent resolved at break of day to come up the companion-way, where the Negro Babo was, being the ringleader, and Atufal, who assisted him, and having spoken to them, exhorted them to cease committing such atrocities, asking them, at the same time, what they wanted and intended to do, offering, himself, to obey their commands; that, notwithstanding this, they threw, in his presence, three men, alive and tied, overboard, that they told the deponent to come up, and that they would not kill him; which having done, the Negro Babo asked him whether there were in those seas any Negro countries where they might be carried, and he answered them, No, that the Negro Babo afterward told him to carry them to Senegal, or to the neighbouring islands of St. Nicholas; and he answered, that this was impossible, on account of the great distance, the necessity involved of rounding Cape Horn, the bad condition of the vessel, the want of provisions, sails, and water; but that the Negro Babo replied to him he must carry them in any way; that they would do and conform themselves to everything the deponent should require as to eating and drinking; that after a long conference, being absolutely compelled to please them, for they threatened to kill all the whites if they were not, at all events, carried to Senegal, he told them that what was most wanting for the voyage was water; that they would go near the coast to take it and thence they would proceed on their course; that the Negro Babo agreed to it; and the deponent steered toward the intermediate ports, hoping to meet some Spanish or foreign vessel that would save them; that within ten or eleven days they saw the land, and continued their course by it in the vicinity of Nasca; that the deponent observed that the Negroes were now restless and mutinous, because he did not effect the taking in of water, the Negro Babo having required, with threats, that it should be done, without fail, the following day; he told him he saw plainly that the coast was steep, and the rivers designated in the maps were not to be found, with other reasons suitable to the circumstances; that the best way would be to go to the island of Santa Maria, where they might water easily, it being a solitary island, as the foreigners did; that the deponent did not go to Pisco, that was near, nor make any other port of the coast, because the Negro Babo had intimated to him several times, that he would kill all the whites the very moment he should perceive any city, town, or settlement of any kind on the shores to which they should be carried: that having determined to go to the island of Santa Maria, as the deponent had planned, for the purpose of trying whether, on the passage or near the island itself, they could find any vessel that should favor them, or whether he could escape from it in a boat to the neighbouring coast of Arruco, to adopt the necessary means he immediately changed his course, steering for the island; that the Negroes Babo and Atufal held daily conferences, in which they discussed what was necessary for their design of returning to Senegal, whether they were to kill all the Spaniards, and particularly the deponent; that eight days after parting with the coast of Nasca, the deponent being on the watch a little after day-break, and soon after the Negroes had their meeting, the Negro Babo came to the place where the deponent was, and told him that he had determined to kill his master, Don Alexandro Aranda, both because he and his companions could not otherwise be sure of their liberty, and that to keep the seamen in subjection, he wanted to prepare a warning of what road they should be made to take did they or any of them oppose him, and that, by means of the death of Don Alexandro, that warning would best be given; but, that what this last meant, the deponent did not at the time comprehend, nor could not, further than that the death of Don Alexandro was intended; and moreover the Negro Babo proposed to the deponent to call the mate Raneds, who was sleeping in the cabin, before the thing was done, for fear, as the deponent understood it, that the mate, who was a good navigator, should be killed with Don Alexandro and the rest; that the deponent, who was the friend, from youth of Don Alexandro, prayed and conjured, but all was useless; for the Negro Babo answered him that the thing could not be prevented, and that all the Spaniards risked their death if they should attempt to frustrate his will in this matter, or any other; that, in this conflict, the deponent called the mate, Raneds, who was forced to go apart, and immediately the Negro Babo commanded the Ashantee Matiluqui and the Ashantee Lecbe to go and commit the murder; that those two went down with hatchets to the berth of Don Alexandro; that, yet half alive and mangled, they dragged him on deck; that they were going to throw him overboard in that state, but the Negro Babo stopped them, bidding the murder be completed on the deck before him, which was done, when, by his orders, the body

was carried below, forward; that nothing more was seen of it by the deponent for three days; . . . that Don Alonzo Sidonia, an old man, long resident at Valparaiso, and lately appointed to a civil office in Peru, whither he had taken passage, was at the time sleeping in the berth opposite Don Alexandro's; that awakening at his cries, surprised by them, and at the sight of the Negroes with their bloody hatchets in their hands, he threw himself into the sea through a window which was near him and was drowned, without it being in the power of the deponent to assist or take him up; . . . that, a short time after killing Aranda, they brought upon deck his german-cousin, of middle-age, Don Francisco Masa, of Mendoza, and the young Don Joaquin, Marques de Aramboalaza, then lately from Spain, with his Spanish servant Ponce, and the three young clerks of Aranda, José Mozairi, Lorenzo Bargas, and Hermenegildo Gandix, all of Cadiz; that Don Joaquin and Hermenegildo Gandix, the Negro Babo, for purposes hereafter to appear, preserved alive; but Don Francisco Masa, José Mozairi, and Lorenzo Bargas, with Ponce the servant, besides the boatswain, Juan Robles, the boatswain's mates, Manuel Viscaya and Roderigo Hurta, and four of the sailors, the Negro Babo ordered to be thrown alive into the sea, although they made no resistance, nor begged for anything else but mercy; that the boatswain, Juan Robles, who knew how to swim, kept the longest above water, making acts of contrition, and, in the last words he uttered, charged this deponent to cause mass to be said for his soul to our Lady of Succour: . . . that, during the three days which followed, the deponent, uncertain what fate had befallen the remains of Don Alexandro, frequently asked the Negro Babo where they were, and, if still on board, whether they were to be preserved for interment ashore, entreating him so to order it; that the Negro Babo answered nothing till the fourth day, when at sunrise, the deponent coming on deck, the Negro Babo showed him a skeleton, which had been substituted for the ship's proper figurehead—the image of Christopher Colon, the discoverer of the New World; that the Negro Babo asked him whose skeleton that was, and whether, from its whiteness, he should not think it a white's; that, upon discovering his face, the Negro Babo, coming close, said words to this effect: "Keep faith with the blacks from here to Senegal, or you shall in spirit, as now in body, follow your leader," pointing to the prow; . . . that the same morning the Negro Babo took by succession each Spaniard forward, and asked him whose skeleton that was, and whether, from its whiteness, he should not think it a white's; that each Spaniard covered his face; that then to each the Negro Babo repeated the words in the first place said to the deponent; . . . that they (the Spaniards), being then assembled aft, the Negro Babo harangued them, saying that he had now done all; that the deponent (as navigator for the Negroes) might pursue his course, warning him and all of them that they should, soul and body, go the way of Don Alexandro, if he saw them (the Spaniards) speak or plot anything against them (the Negroes)—a threat which was repeated every day; that, before the events last mentioned, they had tied the cook to throw him overboard, for it is not known what thing they heard him speak, but finally the Negro Babo spared his life, at the request of the deponent; that a few days after, the deponent, endeavoring not to omit any means to preserve the lives of the remaining whites, spoke to the Negroes peace and tranquillity, and agreed to draw up a paper, signed by the deponent and the sailors who could write, as also by the Negro Babo, for himself and all the blacks, in which the deponent obliged himself to carry them to Senegal, and they not to kill any more, and he formally to make over to them the ship, with the cargo, with which they were for that time satisfied and quieted. . . . But the next day, the more surely to guard against the sailors' escape, the Negro Babo commanded all the boats to be destroyed but the long-boat, which was unseaworthy, and another, a cutter in good condition, which knowing it would yet be wanted for towing the water casks, he had it lowered down into the hold.

[*Various particulars of the prolonged and perplexed navigation ensuing here follow, with incidents of a calamitous calm, from which portion one passage is extracted, to wit:*]

—That on the fifth day of the calm, all on board suffering much from the heat, and want of water, and five having died in fits, and mad, the Negroes became irritable, and for a chance gesture, which they deemed suspicious—though it was harmless—made by the mate, Raneds, to the deponent in the act of handing a quadrant, they killed him; but that for this they were afterwards sorry, the mate being the only remaining navigator on board, except the deponent.

—That omitting other events, which daily happened, and which can only serve uselessly to recall past misfortunes and conflicts, after seventy-three days' navigation, reckoned from the time they sailed from Nasca, during which they navigated under a scanty allowance of water, and were afflicted with the calms before mentioned, they at last arrived at the island of Santa Maria, on the seventeenth of the month of August, at about six o'clock in the afternoon, at which hour they cast anchor very near the American ship, Bache-

---

2 days; . . . The dots indicating omissions are Melville's throughout

lor's Delight, which lay in the same bay, commanded by the generous Captain Amasa Delano; but at six o'clock in the morning, they had already descried the port, and the Negroes became uneasy, as soon as at distance they saw the ship, not having expected to see one there; that the Negro Babo pacified them, assuring them that no fear need be had; that straightway he ordered the figure on the bow to be covered with canvas, as for repairs, and had the decks a little set in order; that for a time the Negro Babo and the Negro Atufal conferred; that the Negro Atufal was for sailing away, but the Negro Babo would not, and, by himself, cast about what to do; that at last he came to the deponent, proposing to him to say and do all that the deponent declares to have said and done to the American captain; . . . that the Negro Babo warned him that if he varied in the least, or uttered any word, or gave any look that should give the least intimation of the past events or present state, he would instantly kill him, with all his companions, showing a dagger, which he carried hid, saying something which, as he understood it, meant that that dagger would be alert as his eye; that the Negro Babo then announced the plan to all his companions, which pleased them; that he then, the better to disguise the truth, devised many expedients, in some of them uniting deceit and defense; that of this sort was the device of the six Ashantees before named, who were his bravoes; that them he stationed on the break of the poop, as if to clean certain hatchets (in cases, which were part of the cargo), but in reality to use them, and distribute them at need, and at a given word he told them; that, among other devices, was the device of presenting Atufal, his right hand man, as chained, though in a moment the chains could be dropped; that in every particular he informed the deponent what part he was expected to enact in every device, and what story he was to tell on every occasion, always threatening him with instant death if he varied in the least: that, conscious that many of the Negroes would be turbulent, the Negro Babo appointed the four aged Negroes, who were calkers, to keep what domestic order they could on the decks; that again and again he harangued the Spaniards and his companions, informing them of his intent, and of his devices, and of the invented story that this deponent was to tell; charging them lest any of them varied from that story; that these arrangements were made and matured during the interval of two or three hours, between their first sighting the ship and the arrival on board of Captain Amasa Delano; that this happened at about half-past seven o'clock in the morning, Captain Amasa Delano coming in his boat, and all gladly receiving him; that the deponent, as well as he could force himself, acting then the part of principal owner, and a free captain of the ship, told Captain Amasa Delano, when called upon, that he came from Buenos Ayres, bound to Lima, with three hundred Negroes; that off Cape Horn, and in a subsequent fever, many Negroes had died; that also, by similar casualties, all the sea officers and the greatest part of the crew had died.

[*And so the deposition goes on, circumstantially recounting the fictitious story dictated to the deponent by Babo, and through the deponent imposed upon Captain Delano; and also recounting the friendly offers of Captain Delano, with other things, but all of which is here omitted. After the fictitious story, etc., the deposition proceeds:*]

—that the generous Captain Amasa Delano remained on board all the day, till he left the ship anchored at six o'clock in the evening, deponent speaking to him always of his pretended misfortunes, under the forementioned principles, without having had it in his power to tell a single word, or give him the least hint, that he might know the truth and state of things; because the Negro Babo, performing the office of an officious servant with all the appearance of submission of the humble slave, did not leave the deponent one moment; that this was in order to observe the deponent's actions and words, for the Negro Babo understands well the Spanish; and besides, there were thereabouts some others who were constantly on the watch, and likewise understood the Spanish; . . . that upon one occasion, while deponent was standing on the deck conversing with Amasa Delano, by a secret sign the Negro Babo drew him (the deponent) aside, the act appearing as if originating with the deponent; that then, he being drawn aside, the Negro Babo proposed to him to gain from Amasa Delano full particulars about his ship, and crew, and arms; that the deponent asked "For what?" that the Negro Babo answered he might conceive; that, grieved at the prospect of what might overtake the generous Captain Amasa Delano, the deponent at first refused to ask the desired questions, and used every argument to induce the Negro Babo to give up this new design; that the Negro Babo showed the point of his dagger; that, after the information had been obtained the Negro Babo again drew him aside, telling him that that very night he (the deponent) would be captain of two ships instead of one, for that, great part of the American's ship's crew being to be absent fishing, the six Ashantees, without any one else, would easily take it; that at this time he said other things to the same purpose; that no entreaties availed; that before Amasa Delano's coming on board, no hint had been given

touching the capture of the American ship: that to prevent this project the deponent was powerless; . . . —that in some things his memory is confused, he cannot distinctly recall every event; . . . —that as soon as they had cast anchor at six of the clock in the evening, as has before been stated, the American Captain took leave, to return to his vessel; that upon a sudden impulse, which the deponent believes to have come from God and his angels, he, after the farewell had been said, followed the generous Captain Amasa Delano as far as the gunwale, where he stayed, under the pretense of taking leave, until Amasa Delano should have been seated in his boat; that on shoving off, the deponent sprang from the gunwale into the boat, and fell into it, he knows not how, God guarding him; that—

[*Here, in the original, follows the account of what further happened at the escape, and how the San Dominick was retaken, and of the passage to the coast; including in the recital many expressions of "eternal gratitude" to the "generous Captain Amasa Delano." The deposition then proceeds with recapitulatory remarks, and a partial renumeration of the Negroes, making record of their individual part in the past events, with a view to furnishing, according to command of the court, the data whereon to found the criminal sentences to be pronounced. From this portion is the following:*]

—That he believes that all the Negroes, though not in the first place knowing to the design of revolt, when it was accomplished, approved it. . . . That the Negro, José, eighteen years old, and in the personal service of Don Alexandro, was the one who communicated the information to the Negro Babo, about the state of things in the cabin, before the revolt; that this is known, because, in the preceding midnight, he used to come from his berth, which was under his master's, in the cabin, to the deck where the ringleader and his associates were, and had secret conversations with the Negro Babo, in which he was several times seen by the mate; that, one night, the mate drove him away twice; . . . that this same Negro José was the one who, without being commanded to do so by the Negro Babo, as Lecbe and Matiluqui were, stabbed his master, Don Alexandro, after he had been dragged half-lifeless to the deck; . . . that the mulatto steward, Francesco, was of the first band of revolters, that he was, in all things, the creature and tool of the Negro Babo; that, to make his court, he, just before a repast in the cabin, proposed, to the Negro Babo, poisoning a dish for the generous Captain Amasa Delano; this is known and believed, because the Negroes have said it; but that the Negro Babo, having another design, forbade Francesco; . . . that the Ashantee Lecbe was one of the worst of them; for that, on the day the ship was retaken, he assisted in the defense of her, with a hatchet in each hand, with one of which he wounded, in the breast, the chief mate of Amasa Delano, in the first act of boarding; this all knew, that, in sight of the deponent, Lecbe struck, with a hatchet, Don Francisco Masa when, by the Negro Babo's orders, he was carrying him to throw him overboard, alive; besides participating in the murder, before mentioned, of Don Alexandro Aranda, and others of the cabin-passengers, that, owing to the fury with which the Ashantees fought in the engagement with the boats, but this Lecbe and Yan survived; that Yan was bad as Lecbe; that Yan was the man who, by Babo's command, willingly prepared the skeleton of Don Alexandro, in a way the Negroes afterward told the deponent, but which he, so long as reason is left him, can never divulge; that Yan and Lecbe were the two who, in a calm by night, riveted the skeleton to the bow; this also the Negroes told him; that the Negro Babo was he who traced the inscription below it, that the Negro Babo was the plotter from first to last; he ordered every murder, and was the helm and keel of the revolt; that Atufal was his lieutenant in all, but Atufal, with his own hand, committed no murder, nor did the Negro Babo; . . . that Atufal was shot, being killed in the fight with the boats, ere boarding, . . . that the Negresses, of age, were knowing to the revolt, and testified themselves satisfied at the death of their master, Don Alexandro, that, had the Negroes not restrained them, they would have tortured to death, instead of simply killing, the Spaniards slain by command of the Negro Babo; that the Negresses used their utmost influence to have the deponent made away with; that, in the various acts of murder, they sang songs and danced—not gaily, but solemnly; and before the engagement with the boats, as well as during the action, they sang melancholy songs to the Negroes, and that this melancholy tone was more inflaming than a different one would have been, and was so intended; that all this is believed because the Negroes have said it

—that of the thirty-six men of the crew, exclusive of the passengers (all of whom are now dead), which the deponent had knowledge of, six only remained alive, with four cabin-boys and ship-boys, not included with the crew, . . . —that the negroes broke an arm of one of the cabin-boys and gave him strokes with hatchets.

[*Then follow various random disclosures referring to various periods of time. The following are extracted:*]

—That during the presence of Captain Amasa Delano on board, some attempts were made by the sailors, and one by Hermenegildo Gandix, to convey hints to him of the true

state of affairs; but that these attempts were ineffectual, owing to fear of incurring death, and, furthermore, owing to the devices which offered contradictions to the true state of affairs, as well as owing to the generosity and piety of Amasa Delano, incapable of sounding such wickedness; . . . that Luys Galgo, a sailor about sixty years of age, and formerly of the king's navy, was one of those who sought to convey tokens to Captain Amasa Delano; but his intent, though undiscovered, being suspected, he was, on a pretense, made to retire out of sight, and at last into the hold, and there was made away with. This the negroes have since said; . . . that one of the ship-boys feeling, from Captain Amasa Delano's presence, some hopes of release, and not having enough prudence, dropped some chanceword respecting his expectations, which being overheard and understood by a slave-boy with whom he was eating at the time, the latter struck him on the head with a knife, inflicting a bad wound, but of which the boy is now healing; that likewise, not long before the ship was brought to anchor, one of the seamen, steering at the time, endangered himself by letting the blacks remark some expression in his countenance, arising from a cause similar to the above; but this sailor, by his heedful after conduct, escaped; . . . that these statements are made to show the court that from the beginning to the end of the revolt, it was impossible for the deponent and his men to act otherwise than they did; . . . —that the third clerk, Hermenegildo Gandix, who before had been forced to live among the seamen, wearing a seaman's habit, and in all respects appearing to be one for the time, he, Gandix, was killed by a musket ball fired through mistake from the boats before boarding, having in his fright run up the mizzen-rigging, calling to the boats—"don't board," lest upon their boarding the Negroes should kill him; that this inducing the Americans to believe he some way favored the cause of the Negroes, they fired two balls at him, so that he fell wounded from the rigging, and was drowned in the sea; . . . —that the young Don Joaquin, Marques de Aramboalaza, like Hermenegildo Gandix, the third clerk, was degraded to the office and appearance of a common seaman; that upon one occasion, when Don Joaquin shrank, the Negro Babo commanded the Ashantee Lecbe to take tar and heat it, and pour it upon Don Joaquin's hands; . . . —that Don Joaquin was killed owing to another mistake of the Americans, but one impossible to be avoided, as upon the approach of the boats, Don Joaquin, with a hatchet tied edge out and upright to his hand, was made by the Negroes to appear on the bulwarks; whereupon, seen with arms in his hands and in a questionable attitude, he was shot for a renegade seaman; . . . —that on the person of Don Joaquin was found secreted a jewel, which, by papers that were discovered, proved to have been meant for the shrine of our Lady of Mercy in Lima; a votive offering, beforehand prepared and guarded, to attest his gratitude, when he should have landed in Peru, his last destination, for the safe conclusion of his entire voyage from Spain; . . . —that the jewel, with the other effects of the late Don Joaquin, is in the custody of the brethren of the Hospital de Sacerdotes, awaiting the disposition of the honorable court; . . . —that, owing to the condition of the deponent, as well as the haste in which the boats departed for the attack, the Americans were not forewarned that there were, among the apparent crew, a passenger and one of the clerks, disguised by the Negro Babo; . . . —that, besides the Negroes killed in the action, some were killed after the capture and re-anchoring at night, when shackled to the ring-bolts on deck; that these deaths were committed by the sailors, ere they could be prevented. That so soon as informed of it, Captain Amasa Delano used all his authority, and, in particular with his own hand, struck down Martinez Gola, who, having found a razor in the pocket of an old jacket of his, which one of the shackled Negroes had on, was aiming it at the Negro's throat; that the noble Captain Amasa Delano also wrenched from the hand of Bartholomew Barlo, a dagger secreted at the time of the massacre of the whites, with which he was in the act of stabbing a shackled Negro, who, the same day, with another Negro, had thrown him down and jumped upon him; . . . —that, for all the events, befalling through so long a time, during which the ship was in the hands of the Negro Babo, he cannot here give account, but that, what he has said is the most substantial of what occurs to him at present, and is the truth under the oath which he has taken; which declaration he affirmed and ratified, after hearing it read to him.

He said that he is twenty-nine years of age, and broken in body and mind; that when finally dismissed by the court, he shall not return home to Chili, but betake himself to the monastery on Mount Agonia without; and signed with his honor, and crossed himself, and for the time, departed as he came, in his litter, with the monk Infelez, to the Hospital de Sacerdotes.

BENITO CERENO

DOCTOR ROZAS.

If the deposition have served as the key to fit into the lock of the complications which precede it, then, as a vault whose door has been flung back, the San Dominick's hull lies open to-day.

Hitherto the nature of this narrative besides rendering

the intricacies in the beginning unavoidable, has more or less required that many things, instead of being set down in the order of occurrence, should be retrospectively, or irregularly given; this last is the case with the following passages, which will conclude the account:

During the long, mild voyage to Lima, there was, as before hinted, a period during which the sufferer a little recovered his health, or, at least in some degree, his tranquillity. Ere the decided relapse which came, the two captains had many cordial conversations—their fraternal unreserve in singular contrast with former withdrawments.

Again and again, it was repeated, how hard it had been to enact the part forced on the Spaniard by Babo.

"Ah, my dear friend," Don Benito once said, "at those very times when you thought me so morose and ungrateful, nay when, as you now admit, you half thought me plotting your murder, at those very times my heart was frozen; I could not look at you, thinking of what, both on board this ship and your own, hung, from other hands, over my kind benefactor. And as God lives, Don Amasa, I know not whether desire for my own safety alone could have nerved me to that leap into your boat, had it not been for the thought that, did you, unenlightened, return to your ship, you, my best friend, with all who might be with you, stolen upon, that night, in your hammocks, would never in this world have wakened again. Do but think how you walked this deck, how you sat in this cabin, every inch of ground mined into honeycombs under you. Had I dropped the least hint, made the least advance toward an understanding between us, death, explosive death—yours as mine—would have ended the scene."

"True, true," cried Captain Delano, starting, "you saved my life, Don Benito, more than I yours; saved it, too, against my knowledge and will."

"Nay, my friend," rejoined the Spaniard, courteous even to the point of religion, "God charmed your life, but you saved mine. To think of some things you did—those smilings and chattings, rash pointings and gesturings. For less than these, they slew my mate, Raneds; but you had the Prince of Heaven's safe conduct through all ambuscades."

"Yes, all is owing to Providence, I know; but the temper of my mind that morning was more than commonly pleasant, while the sight of so much suffering, more apparent than real, added to my good-nature, compassion, and charity, happily interweaving the three. Had it been otherwise, doubtless, as you hint, some of my interferences might have ended unhappily enough. Besides, those feelings I spoke of enabled me to get the better of momentary distrust, at times when acuteness might have cost me my life, without saving another's. Only at the end did my suspicions get the better of me, and you know how wide of the mark they then proved."

"Wide indeed," said Don Benito, sadly; "you were with me, all day; stood with me, sat with me, talked with me, looked at me, ate with me, drank with me; and yet your last act was to clutch for a monster, not only an innocent man, but the most pitiable of all men. To such degree many malign machinations and deceptions impose. So far may even the best men err, in judging the conduct of one with the recesses of whose condition he is not acquainted. But you were forced to it; and you were in time undeceived. Would that, in both respects, it was so ever, and with all men."

"You generalize, Don Benito; and mournfully enough. But the past is passed; why moralize upon it? Forget it. See, yon bright sun has forgotten it all, and the blue sea, and the blue sky; these have turned over new leaves."

"Because they have no memory," he dejectedly replied; "because they are not human."

"But these mild trades that now fan your cheek, Don Benito, do they not come with a human-like healing to you? Warm friends, steadfast friends are the trades."

"With their steadfastness they but waft me to my tomb, Señor," was the foreboding response.

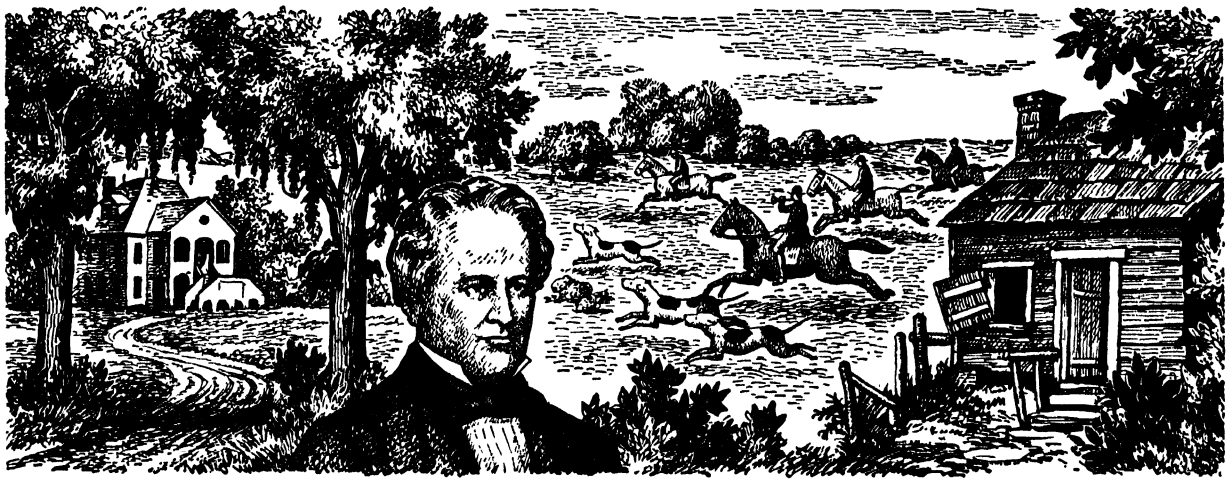
"You are saved," cried Captain Delano, more and more astonished and pained; "you are saved: what has cast such a shadow upon you?"

"The Negro."

There was silence, while the moody man sat, slowly and unconsciously gathering his mantle about him, as if it were a pall.

There was no more conversation that day.

But if the Spaniard's melancholy sometimes ended in muteness upon topics like the above, there were others upon which he never spoke at all; on which, indeed, all his old reserves were piled. Pass over the worst and, only to elucidate, let an item or two of these be cited. The dress so precise and costly, worn by him on the day whose events have been narrated, had not willingly been put on. And that silver-mounted sword, apparent symbol of des-



potic command, was not, indeed, a sword, but the ghost of one. The scabbard, artificially stiffened, was empty.

As for the black—whose brain, not body, had schemed and led the revolt, with the plot—his slight frame, inadequate to that which it held, had at once yielded to the superior muscular strength of his captor, in the boat. Seeing all was over, he uttered no sound, and could not be forced to. His aspect seemed to say, since I cannot do deeds, I will not speak words. Put in irons in the hold, with the rest, he was carried to Lima. During the passage, Don Benito did not visit him. Nor then, nor at any time after, would he look at him. Before the tribunal he refused. When pressed by the judges he fainted. On the testimony of the sailors alone rested the legal identity of Babo.

Some months after, dragged to the gibbet at the tail of a mule, the black met his voiceless end. The body was burned to ashes; but for many days, the head, that hive of subtlety, fixed on a pole in the Plaza, met, unabashed, the gaze of the whites; and across the Plaza looked towards St. Bartholomew's church, in whose vaults slept then, as now, the recovered bones of Aranda: and across the Rimac bridge looked toward the monastery, on Mount Agonia without; where, three months after being dismissed by the court, Benito Cereno, borne on the bier, did, indeed, follow his leader.

1856

NOVELISTS OF THE OLD SOUTH: Kennedy, Simms

John Pendleton Kennedy

1795 • 1870

Kennedy was a literary amateur; to him, as to William Byrd, writing was a gentlemanly accomplishment rather than a profession. His activities were many and varied. The son of well-to-do and socially prominent parents in Baltimore, he received his formal education in a private preparatory school and at Baltimore College. He participated briefly in the War of 1812 at the Battle of Bladensburg, studied law in Baltimore, and was elected to

the Maryland legislature. For three terms (1838-1844), he was a Whig member of Congress, where he staunchly advocated the benefits of internal improvements and of the protective tariff. He was appointed secretary of the Navy by President Fillmore, and had an active part in organizing Commodore Perry's expedition to Japan in 1852. In the meantime, as a result of his marriage to the daughter of a wealthy manufacturer in Baltimore, he had become more and more closely identified with the business life of that city. He was a public-spirited citizen and the recipient of many offices and honors.

It is surprising that, in the midst of such political, business, and social activity, Kennedy should have found time to write as much as he did. His writings, like his public activities, were extremely varied. He wrote several political works: *Annals of Quodlibet* (1840), a satire on Jacksonian democracy; *A Defense of the Whigs* (1843); and *Letters of Mr. Paul Ambrose on the Great Rebellion in the United States* (1865), a plea for the settlement of sectional differences and the preservation of the Union. He wrote the biography of his friend (and the biographer of Patrick Henry) in the two-volume *Memoirs of the Life of William Wirt* (1849). He is remembered in literature, however, not for his political and biographical productions, but for three fictional works, "unlike enough," says Parrington, "to have been written by different men": *Swallow Barn* (1832), a collection of sketches of plantation life in Virginia; *Horse-Shoe Robinson* (1835), a historical romance of South Carolina in the American Revolution; and *Rob of the Bowl* (1838), a romance of colonial Maryland.

Opinion may reasonably differ as to which of these three works is the best. Parrington preferred the "light and whimsical cavalier romance" of *Rob of the Bowl*. *Horse-Shoe Robinson* presents a more substantial action, culminating in the Battle of King's Mountain; it challenges comparison with Simms' *The Partisan*, which was published in the same year and deals with the same materials. *Swallow Barn* is a pleasant portrayal of social life and manners in the Virginia of the 1820's: a portrayal, in the words of the author's Preface, of "the mellow, bland, and sunny luxuriance of her old-time society." Kennedy was admirably qualified to paint such a picture: his mother was from Virginia and he himself had spent much of his youth in the Old Dominion; and his residence in Baltimore gave him just the right detachment. If he seems to have seen only what was fair in that old-time society, one must remember that the narrator, Mark Littleton, was honor-bound, after having enjoyed the bountiful hospitality of Swallow Barn, to report nothing except the good.

Swallow Barn, ed. J. B. Hubbell, New York, 1929 • **Horse-Shoe Robinson**, ed. E. E. Leisy, New York, 1927 • V. L. Parrington, "John Pendleton Kennedy," **The Romantic Revolution in America**, New York, 1927

From

Swallow Barn

Swallow Barn is an authentic, if somewhat romantic, account of life among the landed gentry of Virginia in the 1820's, as observed and reported by the author, who appears in the book as Mark Littleton, a guest at Swallow Barn. The following chapters, which describe the house and its master, will suggest the tone of Kennedy's book.

The life at the fictional Swallow Barn is less elegant than at William Byrd's Westover; Swallow Barn indeed seems rather plain and homespun in comparison. The provincialism of Meriwether, who seldom traveled beyond the confines of Virginia, contrasts sharply, too, with the cosmopolitanism of Byrd, who was as much at home in London as in Williamsburg. And Kennedy's style is less polished than Byrd's, for Byrd had taken the Restoration Wits—Wycherly and Congreve—as his models, while Kennedy followed the plainer models of Goldsmith and Irving.

Despite the interesting differences, however, Kennedy and Byrd are the most distinguished representatives of the Virginia tradition in literature before the Civil War, and Kennedy in **Swallow Barn** carried on the Byrd tradi-

tion. At Swallow Barn as at Westover a century earlier, one finds leisureliness and hospitality, an agrarian economy, a love of good living, a civilized society with Episcopal overtones—a way of life, in short, modeled after that of the landed gentry of England. Whatever one may think of the justification of such a society in a democratic world, many of the great Virginians of the eighteenth and nineteenth centuries belonged to such a society, and made substantial contributions to human freedom as well as to the amenities of living.

One of the books in Meriwether's library was a folio edition of Captain John Smith's "Travels and Adventures." After reading the book during the whole of a rainy day at Swallow Barn, Mark Littleton expressed great admiration for its author, and "marvelled," he said, "why our countrymen, and especially those of Virginia, have not taken more pains to exalt the memory of Smith." Littleton liked particularly Smith's dedication of his book to the Duchess of Richmond: "What a fine knightly tone is there," he exclaimed, "in this commendation of the graces of his mistress, and what a world of adventure does it suggest!" Kennedy himself in Swallow Barn caught something of the "knightly tone" characteristic of earlier Virginia writers.

Parrington justly said of Kennedy's book: "Nowhere else does the plantation life of the Old Dominion in the days before its decline appear so vividly as in these pages." Kennedy in his preface distinguished the chief characteristics of the life described as: "its good fellowship, its hearty and constitutional companionableness, the thriftless gaiety of the people, their dogged but amiable invincibility of opinion, and that overflowing hospitality which knows no ebb."

Chapter I

SWALLOW BARN

Swallow Barn is an aristocratical old edifice which sits, like a brooding hen, on the southern bank of the James River. It looks down upon a shady pocket or nook, formed by an indentation of the shore, from a gentle acclivity thinly sprinkled with oaks whose magnificent branches afford habitation to sundry friendly colonies of squirrels and woodpeckers.

This time-honored mansion was the residence of the family of Hazards. But in the present generation, the spells of love and mortgage have translated the possession to Frank Meriwether, who having married Lucretia, the eldest daughter of my late Uncle Walter Hazard, and lifted some gentlemanlike incumbrances which had been sleeping for years upon the domain, was thus inducted into the proprietary rights. This adjacency of his own estate gave a territorial feature to this alliance, of which the fruits were no less discernible in the multiplication of Negroes, cattle, and poultry, than in a flourishing clan of Meriwethers.

The main building is more than a century old. It is built with thick brick walls, but one story in height, and surmounted by a double-faced or hipped roof, which gives the idea of a ship bottom upwards. Later buildings have been added to this, as the wants or ambition of the family have expanded. These are all constructed of wood, and seem to have been built in defiance of all laws of congruity, just as convenience required. But they form altogether an agreeable picture of habitation, suggesting the idea of comfort in the ample space they fill, and in their conspicuous adaptation to domestic uses.

The hall door is an ancient piece of walnut, which has grown too heavy for its hinges, and by its daily travel has furrowed the floor in a quadrant, over which it has an uneasy journey. It is shaded by a narrow porch, with a carved pediment upheld by massive columns of wood, somewhat split by the sun. An ample court-yard, inclosed by a semicircular paling, extends in front of the whole pile, and is traversed by a gravel road leading from a rather ostentatious iron gate, which is swung between two pillars of brick surmounted by globes of cut stone. Between the gate and the house a large willow spreads its arched and pendent drapery over the grass. A bridle rack stands within the inclosure, and near it a ragged horse-nibbled plum-tree—the current belief being that a plum-tree thrives on ill usage—casts its skeleton shadow on the dust.

Some Lombardy poplars, springing above a mass of shrubbery, partially screen various supernumerary buildings at a short distance in the rear of the mansion. Amongst these is to be seen the gable end of a stable, with the date of its erection stiffly emblazoned in black bricks near the upper angle, in figures set in after the fashion of the work on a girl's sampler. In the same quarter a pigeon-box, reared on a post and resembling a huge

tee-totum, is visible, and about its several doors and windows a family of pragmatical pigeons are generally strutting, bridling, and bragging at each other from sunrise until dark.

Appendant to this homestead is an extensive tract of land which stretches some three or four miles along the river, presenting alternately abrupt promontories mantled with pine and dwarf oak, and small inlets terminating in swamps. Some sparse portions of forest vary the landscape, which, for the most part, exhibits a succession of fields clothed with Indian corn, some small patches of cotton or tobacco plants, with the usual varieties of stubble and fallow grounds. These are inclosed by worm fences of shrunken chestnut, where lizards and ground-squirrels are perpetually running races along the rails.

A few hundred steps from the mansion, a brook glides at a snail's pace towards the river, holding its course through a wilderness of laurel and alder, and creeping around islets covered with green mosses. Across this stream is thrown a rough bridge, which it would delight a painter to see; and not far below it an aged sycamore twists its roots into a grotesque framework to the pure mirror of a spring, which wells up its cool waters from a bed of gravel and runs gurgling to the brook. There it aids in furnishing a cruising ground to a squadron of ducks who, in defiance of all nautical propriety, are incessantly turning up their sterns to the skies. On the grass which skirts the margin of the spring, I observe the family linen is usually spread out by some three or four Negro women, who chant shrill music over their wash-tubs, and seem to live in ceaseless warfare with sundry little besmirched and bow-legged blacks, who are never tired of making somersets, and mischievously pushing each other on the clothes laid down to dry.

Beyond the bridge, at some distance, stands a prominent object in the perspective of this picture,—the most venerable appendage to the establishment—a huge barn with an immense roof hanging almost to the ground, and thatched a foot thick with sunburnt straw, which reaches below the eaves in ragged flakes. It has a singularly drowsy and decrepit aspect. The yard around it is strewed knee-deep with litter, from the midst of which arises a long rack resembling a chevaux de frise, which is ordinarily filled with fodder. This is the customary lounge of half a score of oxen and as many cows, who sustain an imperturbable companionship with a sickly wagon, whose parched tongue and drooping swingle-trees, as it stands in the sun, give it a most forlorn invalid character; whilst some sociable carts under the sheds, with their shafts perched against the walls, suggest the idea of a set of gossiping cronies taking their ease in a tavern porch. Now and then a clownish hobble-de-hoy colt, with long fetlocks and disordered mane, and a thousand burs in his tail, stalks through this company. But as it is forbidden ground to all his tribe, he is likely very soon to encounter a shower of corn-cobs from some of the Negro men; upon which contingency he makes a rapid retreat across the bars which imperfectly guard the entrance to the yard, and with an uncouth display of his heels bounds away towards the brook, where he stops and looks back with a saucy defiance; and after affecting to drink for a moment, gallops away with a braggart whinny to the fields.

Chapter II

A COUNTRY GENTLEMAN

The master of this lordly domain is Frank Meriwether. He is now in the meridian of life—somewhere about forty-five. Good cheer and an easy temper tell well upon him. The first has given him a comfortable, portly figure, and the latter a contemplative turn of mind, which inclines him to be lazy and philosophical.

He has some right to pride himself on his personal appearance, for he has a handsome face, with a dark blue eye and a fine intellectual brow. His head is growing scant of hair on the crown, which induces him to be somewhat particular in the management of his locks in that locality, and these are assuming a decided silvery hue.

It is pleasant to see him when he is going to ride to the Court House on business occasions. He is then apt to make his appearance in a coat of blue broadcloth, as-

---

1 **tee-totum**, a child's toy, somewhat like a top, twirled by the fingers • 13 **worm fences**, fences made with rails in a zigzag pattern • 43 **chevaux de frise**. See note, p. 298 • 47 **swingle-tree**, or single-tree, is the pivoted bar to which the traces of a harnessed horse are fixed • 52 **hobble-de-hoy**, an awkward, gawky youth between boy and man

tonishingly glossy, and with an unusual amount of plaited ruffle strutting through the folds of a Marseilles waistcoat. A worshipful finish is given to this costume by a large straw hat, lined with green silk. There is a magisterial fulness in his garments which betokens condition in the world, and a heavy bunch of seals, suspended by a chain of gold, jingles as he moves, pronouncing him a man of superfluities.

It is considered rather extraordinary that he has never set up for Congress: but the truth is, he is an unambitious man, and has a great dislike to currying favor—as he calls it. And, besides, he is thoroughly convinced that there will always be men enough in Virginia willing to serve the people, and therefore does not see why he should trouble his head about it. Some years ago, however, there was really an impression that he meant to come out. By some sudden whim, he took it into his head to visit Washington during the session of Congress, and returned, after a fortnight, very seriously distempered with politics. He told curious anecdotes of certain secret intrigues which had been discovered in the affairs of the capital, gave a clear insight into the views of some deep-laid combinations, and became, all at once, painfully florid in his discourse, and dogmatical to a degree that made his wife stare. Fortunately, this orgasm soon subsided, and Frank relapsed into an indolent gentleman of the opposition; but it had the effect to give a much more decided cast to his studies, for he forthwith discarded the "Richmond Whig" from his newspaper subscription, and took to "The Enquirer," like a man who was not to be disturbed by doubts. And as it was morally impossible to believe all that was written on both sides, to prevent his mind from being abused, he from this time forward took a stand against the re-election of Mr. Adams to the Presidency, and resolved to give an implicit faith to all alleged facts which set against his administration. The consequence of this straightforward and confiding deportment was an unexpected complimentary notice of him by the Executive of the State. He was put into the commission of the peace, and having thus become a public man against his will, his opinions were observed to undergo some essential changes. He now thinks that a good citizen ought neither to solicit nor decline office; that the magistracy of Virginia is the sturdiest pillar which supports the fabric of the Constitution; and that the people, "though in their opinions they may be mistaken, in their sentiments they are never wrong;"—with some such other dogmas as, a few years ago, he did not hold in very good repute. In this temper, he has of late embarked on the millpond of county affairs, and notwithstanding his amiable character and his doctrinary republicanism, I am told he keeps the peace as if he commanded a garrison, and administers justice like a Cadi.

He has some claim to supremacy in this last department; for during three years he smoked segars in a lawyer's office in Richmond, which enabled him to obtain a bird's-eye view of Blackstone and the Revised Code. Besides this, he was a member of a Law Debating Society, which ate oysters once a week in a cellar; and he wore, in accordance with the usage of most promising law students of that day, six cravats, one over the other, and yellow-topped boots, by which he was recognized as a blood of the metropolis. Having in this way qualified himself to assert and maintain his rights, he came to his estate, upon his arrival at age, a very model of landed gentlemen. Since that time his avocations have had a certain literary tincture; for having settled himself down as a married man, and got rid of his superfluous foppery, he rambled with wonderful assiduity through a wilderness of romances, poems, and dissertations, which are now collected in his library, and, with their battered blue covers, present a lively type of an army of continentals at the close of the war, or a hospital of invalids. These have all, at last, given way to the newspapers—a miscellaneous study very attractive and engrossing to country gentlemen. This line of study has rendered Meriwether a most perilous antagonist in the matter of legislative proceedings.

A landed proprietor, with a good house and a host of servants, is naturally a hospitable man. A guest is one of his daily wants. A friendly face is a necessary of life, without which the heart is apt to starve, or a luxury without

---

34 Mr. Adams, John Quincy Adams, sixth President of the United States (1825-1829) • 53 Cadi, a Mohammedan magistrate • 57 Blackstone, the famous Commentaries of Sir William Blackstone (1723-1780), English jurist. In his "Speech for Conciliation with the Colonies" (1775), Edmund Burke commented on the popularity of this work in America: "I hear that they have sold nearly as many of Blackstone's Commentaries in America as in England" • 63 a blood, a man of spirit and fashion • 72 continentals, American soldiers in the Revolutionary War

which it grows parsimonious. Men who are isolated from society by distance, feel these wants by an instinct, and are grateful for the opportunity to relieve them. In Meriwether, the sentiment goes beyond this. It has, besides, something dialectic in it. His house is open to every body, as freely almost as an inn. But to see him when he has had the good fortune to pick up an intelligent, educated gentleman,—and particularly one who listens well!—a respectable, assentatious stranger!—All the better if he has been in the Legislature, or better still, if in Congress. Such a person caught within the purlieus of Swallow Barn, may set down one week's entertainment as certain —inevitable, and as many more as he likes—the more the merrier. He will know something of the quality of Meriwether's rhetoric before he is gone.

Then again, it is very pleasant to see Frank's kind and considerate bearing towards his servants and dependents. His slaves appreciate this, and hold him in most affectionate reverence, and, therefore, are not only contented, but happy under his dominion.

Meriwether is not much of a traveller. He has never been in New England, and very seldom beyond the confines of Virginia. He makes now and then a winter excursion to Richmond, which, I rather think, he considers as the centre of civilization; and towards autumn, it is his custom to journey over the mountain to the Springs, which he is obliged to do to avoid the unhealthy season in the tide-water region. But the upper country is not much to his taste, and would not be endured by him if it were not for the crowds that resort there for the same reason which operates upon him; and I may add,—though he would not confess it—for the opportunity this concourse affords him for discussion of opinions.

He thinks lightly of the mercantile interest, and, in fact, undervalues the manners of the large cities generally. He believes that those who live in them are hollow-hearted and insincere, and wanting in that substantial intelligence and virtue, which he affirms to be characteristic of the country. He is an ardent admirer of the genius of Virginia, and is frequent in his commendation of a toast in which the state is compared to the mother of the Gracchi:—indeed, it is a familiar thing with him to speak of the aristocracy of talent as only inferior to that of the landed interest,—the idea of a freeholder inferring to his mind a certain constitutional pre-eminence in all the virtues of citizenship, as a matter of course.

The solitary elevation of a country gentleman, well to do in the world, begets some magnificent notions. He becomes as infallible as the Pope; gradually acquires a habit of making long speeches; is apt to be impatient of contradiction, and is always very touchy on the point of honor. There is nothing more conclusive than a rich man's logic any where, but in the country, amongst his dependents, it flows with the smooth and unresisted course of a full stream irrigating a meadow, and depositing its mud in fertilizing luxuriance. Meriwether's sayings, about Swallow Barn, import absolute verity. But I have discovered that they are not so current out of his jurisdiction. Indeed, every now and then, we have quite obstinate discussions when some of the neighboring potentates, who stand in the same sphere with Frank, come to the house; for these worthies have opinions of their own, and nothing can be more dogged than the conflict between them. They sometimes fire away at each other with a most amiable and unconvincable hardihood for a whole evening, bandying interjections, and making bows, and saying shrewd things with all the courtesy imaginable. But for unextinguishable pertinacity in argument, and utter impregnability of belief, there is no disputant like your country-gentleman who reads the newspapers. When one of these discussions fairly gets under weigh, it never comes to an anchor again of its own accord; —it is either blown out so far to sea as to be given up for lost, or puts into port for distress for want of documents, —or is upset by a call for the boot-jack and slippers—which is something like the previous question in Congress.

If my worthy cousin be somewhat over-argumentative as a politician, he restores the equilibrium of his character by a considerate coolness in religious matters. He piques himself upon being a high-churchman, but is not the most diligent frequenter of places of worship, and very seldom permits himself to get into a dispute upon points of faith. If Mr. Chub, the Presbyterian tutor in the family, ever succeeds in drawing him into this field, as he occasionally has the address to do, Meriwether is sure to fly the course; he gets puzzled with scripture names, and

---

41 the Gracchi, brothers and reforming statesmen in Rome in the second century B.C. • 76 the previous question, in parliamentary practice, the question whether the main issue shall be voted on at once without further debate • 80 high-churchman, a member of the party of the Episcopal Church which attaches much importance to forms and ceremonies

makes some odd mistakes between Peter and Paul, and then generally turns the parson over to his wife, who, he says, has an astonishing memory.

He is somewhat distinguished as a breeder of blooded horses; and, ever since the celebrated race between Eclipse and Henry, has taken to this occupation with a renewed zeal, as a matter affecting the reputation of the state. It is delightful to hear him expatiate upon the value, importance, and patriotic bearing of this employment, and to listen to all his technical lore touching the mystery of horse-craft. He has some fine colts in training, which are committed to the care of a pragmatical old Negro, named Carey, who, in his reverence for the occupation, is the perfect shadow of his master. He and Frank hold grave and momentous consultations upon the affairs of the stable, in such a sagacious strain of equal debate, that it would puzzle a spectator to tell which was the leading member in the council. Carey thinks he knows a great deal more upon the subject than his master, and their frequent intercourse has begot a familiarity in the old Negro which is almost fatal to Meriwether's supremacy. The old man feels himself authorized to maintain his positions according to the freest parliamentary form, and sometimes with a violence of asseveration that compels his master to abandon his ground, purely out of faint-heartedness. Meriwether gets a little nettled by Carey's doggedness, but generally turns it off in a laugh. I was in the stable with him, a few mornings after my arrival, when he ventured to expostulate with the venerable groom upon a professional point, but the controversy terminated in its customary way. "Who sot you up, Master Frank, to tell me how to fodder that 'ere cretur, when I as good as nursed you on my knee?"

"Well, tie up your tongue, you old mastiff," replied Frank, as he walked out of the stable, "and cease growling, since you will have it your own way;"—and then, as we left the old man's presence, he added, with an affectionate chuckle—"a faithful old cur, too, that snaps at me out of pure honesty; he has not many years left, and it does no harm to humor him!"

1832

William Gilmore Simms

1806 • 1870

"By far the most virile and interesting figure of the Old South" is Parrington's just estimate of William Gilmore Simms. Though born in the most aristocratic of Southern cities, Charleston, South Carolina, Simms did not belong to the aristocracy. The death of his mother and his father's removal to Mississippi left the boy to the care of an impoverished grandmother. His schooling was irregular; for a time, he was apprenticed to a druggist. At the age of eighteen, he visited his father in Mississippi, where he saw the mixed life of the frontier. After his return to Charleston, he first experimented in poetry and journalism and then turned to the writing of fiction, his first novel appearing in 1833. Two years later he achieved a popular success with *The Yemassee.* For a good while his works were more favorably received in the North than in his native city, where an eighteenth-century classical taste in literature persisted longer than almost anywhere else. By marriage in 1836 he connected himself with the planter aristocracy and acquired the country estate, midway between Charleston and Augusta, known as "The Woodlands."

In the 1850's he became the leader of a group of younger writers in Charleston, which included the poets Paul Hamilton Hayne and Henry Timrod; he was in-

strumental, together with the other members of the group, in founding the distinguished though short-lived *Russell's Magazine* (1857-1860). In the 1850's, also, he became an active opponent of abolitionism and contributed to the Southern manifesto, *The Pro-Slavery Argument* (Charleston, 1853).

Simms was a prolific writer: Trent's "partial bibliography" lists eighty separate publications, thirty-five of which are classified as "romances, novelettes, and collected stories." His best writing includes three kinds of fiction: (1) the "border romance," of which *Guy Rivers* (1834), *Richard Hurdis* (1838), and *The Border Beagles* (1840) are examples; (2) the romance of Indian warfare, of which *The Yemassee* (1835) is the best illustration; and (3) the romance of the American Revolution, the kind in which he was most prolific and most successful. From the many titles in the last category, the following may be selected: *The Partisan* (1835), *Mellichampe* (1836), and *Katharine Walton* (1851), which form a trilogy; and *Woodcraft* (1854) and *The Forayers* (1855), which present Simms' best comic character, Captain Porgy.

Simms has not been much read in the present century, but there is reason to believe that with the better study of American literature his worth will be increasingly recognized. The late Professor Trent, in our only full-length biography of Simms, summarized his merits as follows: "The romances of Simms deal with an eventful period, when a young people was struggling for its rights. They show how high and low, rich and poor, were animated by a common patriotism, how they suffered for the cause they espoused, how they triumphed through their bravery and faith. They make the reader familiar with great characters like Marion, and with historic events of no little importance to a nation destined to greatness. Moreover, they are full of the freshness of swamp and forest, of the languorous charm of Southern climate and scenery. They are full of the heroic deeds of common, unlettered men. . . . No one will ever do the same work as well, and it was worth doing."

The Yemassee, ed. Alexander Cowie, New York, 1937 (The other romances are out of print) • William P. Trent, **William Gilmore Simms**, Boston, 1892 • V. L. Parrington, "William Gilmore Simms," **The Romantic Revolution in America**, New York, 1927

From

The Forayers

The time of **The Forayers** is the summer of 1781; the place, the vicinity of Orangeburg, about one hundred miles northwest of Charleston, in South Carolina. Against this background, Simms tells a vigorous and enormously complicated story of adventures in love and battle. The action centers upon the changing fortunes of his hero, Willie Sinclair, who is a major in Marion's troop of cavalry. He is the almost superhuman hero of romance, scouting the enemy, fighting the outlaws who plunder the countryside, and, of course, making love to the heroine. Sinclair's father is a Loyalist who bitterly resents his son's support of the Patriot cause. A picturesque outlaw, Hell-Fire Dick, and a capable villain, Inglehardt, add appreciably to the hero's difficulties. Simms' story, unfinished at the end of the book (the heroine has just been mysteriously abducted), is continued and completed in **Eutaw: a Sequel to the Forayers** (1856).

The selection given here is an interlude which has only a slight connection with the main action of the novel. The British army under Lord Rawdon has just entered Orangeburg; the American forces commanded by General Nathanael Greene have taken a position a few miles away. During this brief respite from fighting, the Falstaffian Captain Porgy, of Marion's men, entertains at dinner a distinguished company. Our hero is not an invited guest, though he intrudes at the end of the banquet with a private message for General Marion. The account of Porgy's hospitality shows us Simms in one of his most zestful moods.

Chapter XLIII

THE FROG CONCERT AND CAMPAIGN

The army of Greene were taking rest for the first time for several days, at the close of that which witnessed their insulting demonstrations before the garrison of

Orangeburg. We have seen that their camp lay only four miles from that village:—a mellow sunset overspread the scene, and gentle breezes from the west cooled off sweetly the heat of a day, the ardency of which had severely tried all parties. The utmost languor for a while pervaded the encampment. The troops lay about upon the grass, under the trees, with half-shut eyes, enjoying that dreamy sensation which supervenes after fatigue, and before recuperation—mind and body in concert, as it were, for mutual restoration. But few of the groups visible in our foreground, were capable of exertion, and but few, indeed, of those whom we do not see, were any more equal to it than those immediately before our eyes. Here and there, some important adjutant, ensign, or corporal, might be found, restlessly employed, giving orders about the use of moonshine. Troopers who had thrown their chief burdens on the loins of their horses, were, perhaps, the most lively; and groups of these were to be seen, busy in consuming the last drops of sunshine and Jamaica at command, while flirting the cards at "old sledge" from well-thumbed and greasy packs of "pictures," pitching quoits, or grooming horses. We confess that Marion's men were the chief sinners after this fashion; his boys of Santee, Pedee, Waccamaw, and the parish country generally, having a sort of natural calling for the fine arts, were busy with cards and coppers at every rest: Cards and dice constituted so many fine arts in their hands. It was the boast of some of them that they could extract all sorts of music, fun, and philosophy, from the four aces.

To this general rest and languor of the army, there were, however, some striking exceptions. The command of Marion stretched toward the Caw-caw. In the woods of this region, an hour before sunset, there might be seen a squad of twenty troopers, dark, bronzed, half-naked young savages, following with some interest, the speech and movements of a large, broad-shouldered, and great-bellied personage, wearing the uniform—somewhat doubtful, indeed, because of rents, stains, and deficiencies—of a captain of dragoons. He was on foot, and by no means active of movement, though taking his steps with the confidence of a war-horse, and the solid firmness of an elephant. He was a fine-looking fellow, in spite of the too great obtrusion upon the sight of his abdominal territory, a region which he, nevertheless, endeavored to circumscribe within reasonable bounds by a girthing of leather, only half covered with a crimson sash, which no doubt had the desired effect in some degree, though at some sacrifice of the wearer's comforts. His face was full almost as the moon at full, of a ruddy brown, his head massive, chin large and prominent eyes, bright but small, and mouth eager with animation. His nose was decidedly intellectual. At his elbow stood a Negro, jacket off, and arms akimbo, who followed the motions of his superior with a mixed air of deference and assurance. Around these two the troopers were gathered. Before the group, slaughtered and skinned, hanging from a tree, was one of the lean beeves of the country—a poor skinny beast, weighing some two hundred pounds, gross, bone, meat, skin, offal! Near at hand stood a small, rickety, covered wagon, the contents of which we may conjecture. It was one of Marion's recent captures from the convoy of Stewart; and contained, no doubt, some resources, the value of which may be guessed from the mysterious looks which were, every now and then, cast upon it by passing groups of thirsty dragoons, the very glances of whom are apt to burst locks, and consume stores.

Our captain was busy with the commissariat of the brigade—not as the head of it, by no means, but as premier—head-counsellor, and legal and moral adviser.

"I tell you, Fickling, it will never do. Tell me there were no better beeves to be had! You have just taken what they please to give you. You are too modest. It is the infirmity of your family, whenever the interest is not absolutely and directly your own. We do this business of foraging for all the army, yet it seems that the meanest share is always to fall to us. Tell me nothing of Colonel Lee. He has an independent legion; let him pick up his own beeves. As for the field-officers, I do not see that their official position confers upon them any right to better tastes and appetites than a poor captain of partisan cavalry. I thank my stars that I have tastes which are as well cultivated as any brigadier or colonel in the army. And shall my tastes be defrauded, because these epauletted buffalos are greedy, and you are mealy-mouthed? Why the devil don't you assert yourself, man, and assist

---

20 Jamaica, rum from Jamaica in the West Indies • 20 old sledge, card game better known as "seven-up" • 24 Santee . . . Waccamaw, rivers in South Carolina • 82 partisan, pertaining to a detached body of troops engaged in making forays and harassing an enemy

us, as you should, when the distribution of the beef takes place? You are a fool, Fickling, for your submission! Colonel Lee's man steps before you, and says, 'Colonel Lee;' and Colonel Washington's man starts up, and says, 'Colonel Washington'—and these, and a score of others, even while they speak, clap hands on the best pieces, and choose the fattest flanks; and when all are served, you steal up, with finger in your mouth, and murmur, 'Is anything left for General Marion?' Is that the way to do business? I tell you, 'No, sir!' Your true way is to take the best that offers—lay bold hands on it—nay, thrust it through with your naked sabre, and say, 'Marion's brand!' Do the thing as you should, with the proper look and manner, and not a rapscallion in the army, representing no matter what division, dare lay hands on it after that! If they do, let me be at your elbow next time, with two or three fellows of my choosing!"

"But, Captain Porgy—"

"But me no buts, Mr. Fickling. I'll have you out of your office, if you do not but against this sort of distribution. You are to provide us; and, if you do not comprehend that our soldiers are just as deserving of good food as any continentals in the service, you are not fit for our service, and I'll have you out of it. General Marion himself submits quite too much to this sort of treatment. If there is a fine horse in the brigade, it is immediately wanted for some one of Lee's dragoons—some d—d henchman or bugleman—and off the colonel goes to Greene and tells him that his legion wants horses, and that Marion has enough and to spare, and we are called upon to dismount, and provide other people. Yet are we kept day and night on the trot—off to-day for the Pon-pon and Savannah, to-morrow for the Pedee—now running down tories, now cattle; seeking information, scouting, spying, called out at all hours; and how is this to be done, if we are to give up our horses. The brigade has covered all this low country, from the Pedee to the Savannah, for three years and more, and the best that is got in the forays that we alone make, are served out to these hungry feeders. I won't submit to it. They shall neither have my horses nor my cattle; and if you take any more such beef as this, Fickling, when better is to be had, we'll turn you, neck and heels, out of your department."

"But, Captain Porgy—"

"See to it!"

"But—"

"See to it! That's all! I say no more—to you!—Tom!"

"Sah!"

"Get our share of that carrion! See what you can do with it. We must have soup, I suppose. Make a pilaw. We have plenty of pepper now. You can hardly get a decent steak from the beast. But do what you can. I must see after something more. We are to have company to-night. I have asked the great men, the big-wigs, the governor, Generals Marion and Sumter, the colonels of the brigade, Maham, Singleton, and a few others. Have everything ready by ten o'clock. Did you succeed in getting any melons?"

"I empty one patch, maussa."

"Whose?"

"I dunn know quite 'zackly, but he's a fiel' jes' yer on de back ob de village. De melons is quite 'spectable."

"Ripe?"

"As de sunshine kin make 'em."

"Good! Do as much stealing in an honest way as you can! D—n the patriotism that can't eat stolen fruits!"

"Wha' else you guine hab, maussa."

"Who knows what I can get? I must look. There ought to be frogs here in abundance, and of good size Not such as we can find in a rice reserve, Tom, but passable in war-time, and delicate enough for hot weather. I shall look out for a young alligator or two."

"Dat'll do! Gi' me two young alligator tail, and de frog, and I gi' you fus' rate tuttle soup and ball, and steak"

"Must have a ragout, Tom. Have you seen no pigs about, Tom!"

"Nebber yer de fus' squeak, maussa."

"Well"—with a grunt—"we must do as we can. Come, boys, are you ready?"

"Ay, ay, captain!" from a score of voices; and a dozen active young fellows presented themselves, armed with wooden spears and knives.

"Where's George Dennison?"

A voice answered from the foot of a tree.

"Come along, George; don't be lazy. What you shall see this evening will enable you to beat Homer in a

---

19 **But . . . buts.** Quoted from Henry Fielding's **Rape Upon Rape, or The Justice Caught in His Own Trap** (1730), Act II, Scene XI • 51 **pilaw,** rice boiled with meat

new epic, in which cranes and frogs shall figure to posterity."

And, following the corpulent captain, the whole party pushed down to the swamp.

"There's a battalion for you, George Dennison. Not a rascal under six feet—half a dozen nearer seven. I chose them specially for the expedition. They are our cranes, and are all eager for the war."

"And the frogs are sounding for the conflict. Hear their tongues, already. The concert for the evening is begun. Hear the chirruping overture:—

"'Fry bacon—tea-table!
Coyong! coyong! coyong!
Supper on table—supper on table,
Eat if you're able!
Blood an' 'ounds—blood an' 'ounds.'

"By the way, captain, a frog concert, would not be a bad speculation in the great cities of Europe. How a score or two of musical fellows, who had once or twice slept in our swamps, or lingered after sunset along our rice-fields, would make capital out of it! And such a sensation. What a hurly-burly, subdued to order, they could make of it."

"No doubt! The notes and tones occupy every note of the *gamut!* It is a rare original music. But the secret would lie in making the music tributary to satire. The frogs should furnish a running commentary on the follies and vices of society as in Aristophanes, only adapted to our times. It would task art admirably to work out of it an opera—the Loves of the Frogs! Little Squeaka, the dreaming sentimental damsel, just emerging into society —coming out; in her train some half a dozen Jockos—minnows of fashion, that sing in a love-lisp always—Therubina! ah! Therubina! Oh the rich fun of such a farcical! Of what a delightful variety would the affair admit! The lover, the villain, the priest, the mother—all the usual varieties, not forgetting Arlecchino. Of course, the frogs are not less fortunate than their betters. They have a Jack Pudding among them. The squirrels have I know."

"Don't forget the duenna! Hear her falsetto, squeaking through a score of crevices in her broken teeth:—

"'On your knees, O,
Not a sneeze, O,
Don't you hear your mother coming?
'To be kissed, O,
By the priest, O,
Is the saintliest sort of mumming

"'O, alack, O,
Such a smack, O,
Makes the very echoes jealous;'
'But it proves, O,
Holy loves, O,
Most particularly zealous.'

"'Hark that drumming!'
'Mother coming!'
'And that pother?'
''Tis your father!'
'Awful sounds, O!'
'Blood and 'ounds, O!'—

"In full fresco swells the chorus,
From the motley group before us;
Sighing, swelling,
Barking, belling—
Such a moaning, such intoning,
So much groaning, honing, droning,
Calling, falling, bawling, drawling,
Speaking, shrieking, squeezing, squeaking,

"All subsiding to a quiver,
And a shiver,
Only to ascend, in thunder,
Rolling up and roaring under—
Blood and 'ounds, O! blood and 'ounds, O!
Awful sounds, breaking bounds,
Setting all the woods a-shaking,
Setting all the bog a-quaking,
All the swampy empire waking,
With the eternal blood and 'ounds, O

"Rending, raging,
Battle waging,
'Yond all musical assuaging—

---

28 **Aristophanes.** The reference is to **The Frogs**, a satirical comedy by Aristophanes (448-330 B.C.) • 37 **Arlecchino**, a blundering servant in Italian masked comedy

O'er all mortal sounds uproarious,
O'er all mortal sense victorious,
Like the diapason glorious,—
That through pipes and stops,
Shrieks, and bounds, and hops,
Foams, and frisks, and frolics,
Rolls and rages, rocks and rollicks,
Feeding every mortal stopper, ah!
Of the grand Italian opera!"

Thus it was that the rustic poet of the partisans, gave forth extempore an embodiment of the music of the frog-pondians.

"Hurrah!" cried Porgy, "hurrah, Geordie—why, man, you are native, to frog manor born, with all the pipes and bellows of the swamp in your own wind-bags; or to requite you in your own coin:—

"Worthy venison,
Geordie Dennison,
You will soon require a stopper, O,
Scaring off with greater clamor,
Every leap-frog from his amour,
Turning every mother's son of 'em
Making fun of 'em,—
To a hopper off, from a hopper, O!"

And thus doggrelizing as they went, the two led their laughing cohort down into the swamp.

The Caw-caw was in full concert. Bull and bell, squeak and shriek, moan and groan All the artistes were in exercise, engaged, no doubt, in some rehearsal, preparatory to some great ceremonial—the bridal, possibly, of the young princess of the pondians.

Porgy and his corps, with their pointed spears of wood, wooden forks, baskets, and knives, stole down into the lagunes. What a picture for the stage! What an action for the burlesque drama! But the matter was a serious one enough for one of the parties. Long will the frogs of that ilk remember with wailing the raid of the cranes of that day. Could you have seen those long, gaunt backwoodsmen, each with shaft, prong, or trident, striding hither and thither in the bog, and lake, striding right and left, poised above their great-eyed enemies, and plunging forward to grapple the wounded and squalling victim before he should sheer off, or, as George Dennison said afterward, describing the affair in sonorous heroics:—

"Could you have seen that theatre of frogs,
As each in due delight and bog immersed,
Sprawled out, at length, in slime and sandy bed;
Great legs of green or brown outstretching wide;
Great arms thrown out as if embracing heaven;
With eyes dilating, big as Bullace grapes,
Upturned, and gloating as with rapturous rage;
Great flattened jaws, that, ever and anon,
Distending with voluminous harmonies,
Sent forth their correspondences of sound,
In due obedience to the choragus,
Who still, at proper intervals, pour'd out
The grand refrain—sonorous, swelling still,
Till, at the last, the apex diapason
Was caught, was won, in glorious 'Blood and 'ounds!' "

It was a war of shallow waters. Habitual croakers are only justified when they perish. They have nothing to complain of. They always seem to anticipate their fate, and this seems to prove it only just execution after judgment—which, of course, is legal and becoming. Our partisans had grown expert in this sort of warfare. The Caw-caw swamp was a region in which the frogs held populous communities and cities, and—you know the proverb—"Thick grass is easier cut than thin." It was a massacre! Every spearman could count his score or two of slain, and, really, a very pretty spectacle they made when, emerging from the swamp, each carried his victims aloft, transfixed upon a sharp and slender rod, run through at the neck, eyes wider than ever, and legs and arms spread about in all directions. Nor was this all. No less than three young alligators and three times as many terrapins were surprised and captured, almost without a struggle, and borne off in triumph to the camp! The wailing in the Caw-caw that night was not greatly lessened by the loss of so many sonorous voices, since we may reasonably suppose that maternal suffering sent up such extra clamors for the absence of precious young ones, as more than atoned for the diminished forces of the community.

"On your lives, boys, not a word of what we have been doing," said Captain Porgy. They all swore to keep faith.

---

34 **lagunes,** lagoons • 50 **Bullace,** a kind of plum

"There are thousands of clever people in the world," he added, "who require to be surprised into happiness. Some of my guests, to-night, are probably of this description. I shall teach them a new pleasure—nay, a new moral in a new pleasure—teach them how absurd it is to despise any of the gifts of Providence."

And, following out this policy, it was with great secrecy that the spoils of the frog campaign were conveyed to his quarters, and delivered over to the custody of Tom, his cook. Tom, we may add, like every sensible cook, made a sufficient mystery of his art to keep prying curiosity away from the kitchen whenever he was engaged in any of his culinary combinations. Let us leave these for other parties, and for proceedings of more imposing consequence if less attractive performance. We shall seek to be present when supper is on the table.

Chapter XLV

DOINGS IN THE APOLLO CHAMBER

Our partisan division of the army, with their horses, occupied no small extent of territory. Our Captain Porgy, himself, with his little personal equipage, demanded considerable space. He was the person always to secure that "ample room and verge enough," which, as he himself said, were essential to his individual girth. "My breadth of belt," he was wont to say, "implies a fair field; and, having that, I ask no favors." Besides being of social habits, his mess was always a large one. Among his immediate associates, retainers rather, he kept not only his cook, but his poet; the one almost as necessary as the other. Then, he never was without a guest, and whenever his commissariat was particularly well supplied, he was sure to have a full table. Such an idea as a good table, without an adequate number of guests to enjoy it, seemed to him a thing vile, unreasonable, inhuman, and utterly unchristian. We have seen that, particularly fortunate in his foray among the green-jacketed denizens of the Caw-caw, he had made arrangements for a larger circle than usual. His own tastes and purposes requiring it, Captain Porgy usually chose his own ground whenever tents were to be pitched. He had a great eye to proper localities.

"The open woods, on the south and west," was his rule. "Let the swamp and thicket cover my back on the east. That east wind has been of evil tendency from the earliest periods of time. The Bible speaks of it. A bad-tempered person, soured and surly, growling always, and insufferable from bile and conceit, is said to fill his bowels with the east wind. It has a bad effect on the best bowels. Give me just opening enough on the east for the purposes of draught, but let your tent be open to the full pressure of the winds from south and west. You need, in our climate, an eastern opening at the dinner-hour, dining at three, or thereabout; but beware of it after the sun has set. Don't sleep with the east wind blowing upon you. If you do, face it—let your feet receive it first. Every wind that blows has a specific quality. The east, northeast, and southeast, are all or more or less pernicious, muddy, insidious, hateful. Our natural winds in midsummer are from the south and west. The south persuades you to languor, pleasantly relaxes, discourages the exertion which would be too exhaustive for the season. The west is the agitator, the thunder-storm wind, that purges and purifies; the northwest is the cleaning wind, that sweeps up the sky, and brushes off all its cobwebs. Each wind having thus a specific mission, it is wonderful that men who build know so little of the means of ventilation. Now, you see, I choose my ground with an open pine-forest in front, that is south and west and northwest. I take care that the land slopes down from me in all these directions. If there be hill, swamp, or dense thicket, I put them, with the devil, behind me. I have here chosen the very pleasantest spot in the whole encampment. There is not one of these continental officers who knows anything of the subject. Yet, to the health of an army, a difference of fifty yards in the location of a camp, is very frequently all the difference between life and death!"

And, in that broad, terrace-like spread of wood and thicket, he had chosen the most agreeable region. The pine-woods opened at his feet, and spread away almost interminably, giving the necessary degree of shade, yet leaving free passage for the wind.

"Free circulation, Geordie Dennison," said he, as with hands outspread he seemed to welcome the gentle play of the breezes reeking up from the southwest—"that is the secret of health—free circulation for the winds, the

---

Apollo Chamber. An Elizabethan reminiscence· Ben Jonson used to meet his followers in the Apollo Room at the Devil Tavern • **17 partisan division,** Marion's men • **21 ample . . . enough,** from Thomas Gray's "The Bard," l. 51

waters, and the blood. It is stagnation that is death. This is the reason why a pine-forest is more healthy than any other. It is the only forest that suffers free play to the winds. Hence you hear the music in a pine-forest which you hear in no other. The breezes pour through, and swell up, until all the tree-tops become so many organ-pipes. The vulgar notion is that there is some virtue in the odor of the pines to neutralize malaria. But this is all nonsense. Pine-woods that have a dense undergrowth, are not more healthy than any other. It is the shape of the tree, a tall column, without lateral branches, naked a hundred feet high, and arching above, umbrella fashion, into a grand ceiling, which shuts out the intense heat of the sun, and suffers free exercise to the breeze. Here it plays with delight and impunity. In the dense thickets it trickles only, and finally stagnates; and hence the fevers of uncleared lands. Bays, swamps, ponds, are unhealthy, not because of the water which they contain, but because of the dense thickets which they nurture. The hottest place in the world in midsummer, is a deep forest or thicket, with a close undergrowth. Fools talk of decaying vegetation as the secret of disease; yet when our fevers are raging most, vegetation has not begun to decay. Gardens, fields, forests, are never more fresh and beautiful, never more vigorous and verdant, than when death seems lurking under every flower, like some venomous reptile watching for and creeping to the ear of the unconscious sleeper. But, Geordie Dennison, boy, once suppose that the air is stagnant in any locality, and you need not suppose the necessity for its impregnation by any deleterious agent. A stagnant atmosphere is, *per se,* malaria. And that fact that we can assign a distinct locality for the disease—that we can say with confidence, to sleep here is death, while you may sleep with safety within half a mile—establishes the fact conclusively that the atmosphere is localized—no matter by what cause —though even that is a matter which I have considered also—and once let the atmosphere be fixed, and it is only in degree that it differs from that of an old sink or well. It is putrid, and to inhale it is a danger. You can not impregnate with miasma any region, where the winds are allowed to penetrate freely from three points of the compass, and where they do penetrate. When we are very sickly, you will always find a pressure of winds, daily from a single quarter, for a long-continued period of time. The atmosphere loses its equilibrium, as it were; the winds lack their *balance;* and running one course only, they run into a *cul de sac,* as water that can not escape, rises to a level with its source, becomes a pond, and stagnates. A thunder-storm purifies, not from its electricity, as some contend, but because it is a storm. All storms purify because they agitate. They disperse the local atmosphere over a thousand miles of space, and restore its equilibrium."

"But, Captain Porgy, were it not better that you should be thinking of your supper and company, instead of philosophizing here about the atmosphere?"

"It is because I am thinking of my company and supper, Master Geordie, that I do philosophize about the atmosphere. A wholesome atmosphere is half of a good supper. We can eschew the water. We need not drink that, if we can find any other liquor; but make what wry faces we will, the atmosphere we must drink, even though we know it to be impregnated with poison. Better drink the vilest ditch-water a thousand times. That may disorder the stomach, but the other must vitiate the lungs and so directly disease the blood and the heart. I am trying to teach you, sir, that in giving a good supper or dinner to your friends, you are to serve it up in properly-ventilated apartments."

"Well, we have it airy enough here."

"True; but had it been left to anybody else, ten to one you would have had our tents pitched in a villanous thicket where we never could have got a breath of air. Look, now, at the Legion encamped on the left; they are in a bottom, the breeze passing clean over their heads. Their camp-master had no idea of what was the duty to be done, beyond the simply getting room enough for the horses and wagons of some three hundred men. Sir, the partisan cavalry have never been so healthy as when I have been permitted to select the ground for their bivouac."

"That's true!"

"To be sure it's true; and you see the fruits of it in the pleasant sleeps that we enjoy, and the hardy elasticity with which we travel. There never was any people so exposed as ours have been, night and day, in all weathers, and the most wearisome marches, that have ever enjoyed such admirable health. And they owe it to me, sir—to me,

---

48 cul de sac, literally, bottom of a bag; a passage with only one outlet

Geordie Dennison—yet, d—n 'em, they are not half so grateful for this blessing as for my soups and suppers. They would readily compound to drink any quantity of malaria, if they could swallow a pint of my rum-punch after it."

"Ah, they regard the rum-punch as the antidote, and there is nothing unreasonable, therefore, in their practice. But, captain, the hour latens."

"*Latens!* By what right do you use that word?"

"It's a good word, captain."

"So it is; but I never heard it used before."

"Very likely; but would you permit that argument to be used against any new dish that Tom should put on the table to-night!"

"No, sir; no, Geordie, you are right. You could not have answered me better if you had argued a thousand years. And I will remember the word;—so, as the hour *latens,* Geordie, get up and help me with these tables. I must summon Frampton and Millhouse. We shall need their knives and hatchets. I have invited thirty-one guests, Geordie, not counting you and Lance; we three will make the number thirty-four. There's no such table to be spread in camp to-night. Think of it;—a simple captain of militia giving a supper to thirty guests, and upon such short commons as are allowed us. Half of the poor devils in camp think it monstrous impudent of me to give a supper at all—and to thirty persons——"

"They can't guess how it's to be done."

"No! indeed! the blockheads! But their vexation increases when they find my guests all outranking myself. The envious rascals! Beware of envy, Geordie—it is the dirtiest, sneakingest, meanest little passion in the world, the younger brother of vanity, furnishing all the venom to its sleek-skinned and painted senior."

"And you are to have the governor, captain?"

"Ay, he accepts. John Rutledge is a great fellow, without affectation, Geordie—no pretender—one of the few men who really do *think.* The greater number, even when they greatly rank, only repeat each other—they do not think. Thought, George Dennison, is really confined to a very few. Men, as a race, are not thinking animals. They are gregarious and imitative. They go in droves and follow a leader, whom they contrive after a while to mimic after a monkey fashion. Thought is always an individual. But—where is that boy Frampton? Sound your whistle, George."

The whistle was sounded.

"Now help me with these poles. There are forty cut. We must have crotch-sticks—two, four, six, eight, ten, twelve—it will require twenty-four; we must make our tables solid."

Lance Frampton now appeared, followed by half a dozen young troopers, bearing slim green poles upon their shoulders, forked sticks, and all the appliances necessary to the construction of the rustic tables and seats of the company. Long practice had made all of them familiar with the rude sort of manufacture which was required. The crotch-sticks were soon driven upright into the ground, in frequent parallels; cross pieces were laid in the crotchets of these, and the poles were stretched along, forming a crossed table with four ends, for so many dignitaries, and capable to accommodate forty guests with ease. Of a similar, but stouter fashion, were the seats for the guests. It was surprising how soon the area was filled—how soon the mechanical preparations for the feast were fashioned. The amphitheatre beneath the pines was ample. Porgy, as he boasted, had the proper eye for locality. When reared and steadied, stanchioned and strengthened, the tables were covered with great oak-leaves, green, looking very clean, nice, and fresh—a verdant tablecloth.

"Now, see that you have torches, Lance; for, though we have a glorious moon, we need torches for the dark corners. Many of the guests will bring their Negroes to wait. But we shall need some waiters besides. Engage some of these young chaps. They shall sweep the platters clean. Forget nothing, boy. We are to have big wigs to supper, remember. Geordie, come with me to *our* wagon. I think we shall astonish these epauleted gentry to-night."

And the two turned off to another part of the wood where stood the little wagon already described—a sort of covered box—a thing which one man might have rolled, but to which a couple of stout hackneys were harnessed, when taken.

"Little," said Porgy, as he unlocked the cover of the vehicle, "little did stuttering Pete dream what he lost and we gained when we cut off the four wagons of Stewart. His eyes opened only upon the big wagons. He never gave a look at the one little one upon which I fastened—as if the most precious commodities were not always packed in the smallest compass! Yet, look there, Geordie."

The poet looked in:—

"Lemons, captain."

"Ay, lemons and white sugar, and nutmegs, and cloves, and spices of all sorts, and an anchor of Geneva, and a box of cocoa, and a bag of coffee, and a good supply of old Jamaica, and, see you that keg?—tongues, beef-tongues, English beef-tongues. Now please you to read the name on the cover; ay! Lord Rawdon's own prog, by the pipers, specially selected for his table and palate. We shall astonish these wooden-headed continentals to-night, Geordie! won't we? You thought me mad, didn't you, when I invited so many? But I knew what I was about. They shall stare, they shall sup, though they lament for ever, after the acquisition of such a taste as their vulgar fortunes can never hereafter satisfy. But mum! Not a word in anticipation."

And Porgy closed the wagon with haste and locked it, as half a dozen troopers lounged carelessly by, looking, with some curiosity as they passed, to the proceedings of the two.

"Stay here, Geordie, and keep watch till I return. I must put Millhouse on duty over this wagon, or there will be a Flemish account of its contents when supper's called. The morals of the dragoon service, imply theft as a necessity. A good scout has all the capabilities of a good pickpocket."

And, moralizing as he went, Porgy hurried off for succor. Dennison was relieved by Millhouse, a one-armed trooper of iron aspect, and as stubborn of purpose as a mule. The wagon was safe in his keeping as long as his left arm could lift sabre or pistol—and he was duly armed with both.

The next visit of our host was to Tom, the cook, who had a precinct of his own, some twenty-five yards from the spot where the tables had been spread. The terrapin soup was discussed, the *ragout;* the stew; the boiled tongues; nothing escaped attention. Then, a survey was taken of the crockery; the bowls, plates, dishes; the knives and forks; the spoons of iron, the drinking vessels of delph, tin, or calabash. These commodities were too frail of character, not to need the greatest care and attention; and every feast given by our captain, mortified him with the slenderness of his resources. But there was no remedy. If half a dozen good bowls of delph, and platters of tin, could be provided for the more distinguished guests, the rest might surely be satisfied with clean calabashes. We will suppose our captain satisfied in respect to these things. He was in the midst of the examination, however, venting his annoyances at his limited resources, in uneasy exclamations, when a messenger from Rutledge brought him the note from that personage apprizing him that Greene and Lee would appear among his guests. The governor wrote:—

"I shall take the liberty, my dear Captain Porgy, of bringing with me a couple of additional guests, in General Greene and Colonel Lee, knowing that your provision will not only be ample, but that the taste which usually presides over your banquets will give to our friends from Rhode Island and Virginia such a notion of the tastes of Apicius and Lucullus, as certainly never yet dawned upon them in their own half-civilized regions. Your own courtesy will do the rest and will, I trust, sufficiently justify the confidence with which I have insisted upon their coming. "Yours,

"JOHN RUTLEDGE."

"Humph!" exclaimed Porgy, "I should not have ventured to ask General Greene, not that I stand in awe of his epaulettes, but it is so rare to find a *parvenu* who would not hold such an invitation from a poor captain of militia, to be a piece of impertinence and presumption. Our own folks know me too well to exhibit any such *gaucherie.* As for Lee, he is a popinjay! I should never ask him myself; but have no objection that he should occasionally appear among gentlemen who can teach him, by example, how gentlemen can be good fellows without any loss of dignity.—Geordie—your pen and a scrap of paper. I hope I diminish none of your verses by consuming your foolscap."

The pen and paper were had, and our captain wrote:—

"Governor Rutledge can take no liberty for the propriety of which his name is not a sufficient guaranty. Captain Porgy will be most happy to welcome any guests whom he may think proper to bring."

This written, he handed it to the messenger. It was

---

4 anchor of Geneva, ten gallon container of Holland gin • 23 Flemish account, an account showing a loss or deficit • 36 ragout, a highly seasoned dish made of pieces of meat stewed with vegetables • 60 Apicius (d. 37 A D), notorious Roman epicure under Tiberius • 60 Lucullus (d. 57 B C.), wealthy Roman general famous for his banquets • 68 parvenu, one newly risen to position, an upstart • 72 gaucherie, clumsiness

then that Greene's cook uncovered a small tumbril or box in a wheelbarrow, containing the uncooked provisions which had been destined for his own table. Porgy looked at the bloody and livid meats with unqualified disgust.

"But," said he *sotto voce,* "we can't reject them. Here, Tom."

The cook appeared, apron in front and knife in hand.

"Tom, take charge of these provisions. They are sent by the general—General Greene, do you hear? Use them. Cook them. Turn them into soup, hash, steak, what you will!" then, as the messengers of Rutledge and Greene disappeared—"but d—m you, boy, don't let them show themselves upon my table. The meat is villanously butchered. That alone should condemn it. Make it up for some of these young fellows that have been working for us. And—Tom—"

"Well, maussa—talk quick."

"Don't forget the balls. Let there be a plenty in the soup."

"Psho, maussa, enty I know."

"Enough! Begone!"

The active mind of our corpulent captain began to grow restless. He had seen to everything that he could think of, and grew peevish from nothing to do. Suddenly he stuck his fingers into his hair.

"No! the vessels for the punch; Geordie. By heavens, I had almost forgotten. Let us after the punchbowls, and then for the manufacture. *You* are good at that; a poet should be. Curious problem, Geordie—the affinity between poetry and the bottle."

"Not at all. It only implies the ardency of the poet. It is so with the orator. You never saw poet or orator yet, that was not ardent and fond of the juices of the grape."

"Not the didactic orders, surely. But how is it, then, that Bacchus is not your deity instead of Apollo?"

"Because Apollo, with virtues of his own, includes those of Bacchus. He is a ripener of Bacchus, and loves not the wine less, nor is less the true god of it, because he employs a vintner. I see no difficulty in the matter."

"And, perhaps, there is none. Yet what would Apollo say, or Bacchus even, to such a punchbowl as ours."

And he pointed to an enormous calabash, holding a couple of gallons at the least, that, duly valued and taken care of, had survived all the vicissitudes of the campaign.

"They would, either of them, feel that there was wholesome propriety in the vessel. It is one which Ceres has presented for the occasion, to a kindred deity. Boon nature has provided where vulgar art has failed. It would be much more staggering to either of the ancient gods to try them with the Jamaica, instead of the blood of Tuscany."

"Ah! they never got such liquor on Olympus. Their nectar was a poor wishy-washy sort of stuff, of not more body than some of those thin vaporing French and German liquors, of which we have had a taste occasionally. Their wine of Tuscany, nay, the Falernian of Horace, would not take rank now-a-days with the juices of the common corn, prepared according to our process. Drinking whiskey or Jamaica, Nero might have been a fool, a wretch, a murderer—might fire his city or butcher his mother—might have committed any crime, but cowardice! Whiskey or Jamaica might have saved Rome from Gaul and Vandal. The barbarians, be sure, drank the most potent beverages."

"A notion deserving of study. We drink deep now-a-days. Will our descendants beat us? Will they laugh at our potations, which rarely leave a gentleman on his legs after midnight?"

"Ah! say nothing of our progeny. Do not build upon the degenerates. It may be that the milksops will fancy it bad taste, nay, even immoral, on the part of their ancestors, to have swallowed Jamaica or whiskey at all. In proportion as their heads are weak, will they pronounce ours vicious, and just because we have a certain amount of strength in our virtue—a certain quality of brawn and blood and muscle, to keep our sentiment from etherealizing—growing into mere thin air—will they presume to stroke their beards in self-complaisant satisfaction, thanking God that such poor *publicans,* have given way to a more saintly race of sinners. I am half inclined to thank my stars that, when I disappear, the race of Porgy will not be continued in the person of one who prides himself upon having no head—for a bottle!"

---

49 Ceres, Roman goddess of growing vegetation • 58 Falernian, Italian sweet wine • 81 publicans . . . sinners, an allusion to the parable of the Pharisee and the publican. See Luke 18:9-14

"Yes! save us from all degenerate children. But, captain, will this *one* calabash of punch suffice for forty? Impossible! Two gallons among forty! Never in the world! Why, sir, there are three generals, and one governor, a score of colonels, and others of inferior rank, who are emulous of great men's virtues. Two gallons to forty such persons."

"Oh! don't stop to calculate. Luckily there are two calabashes."

And the little wagon yielded up the desired article.

"Make it rich, Geordie."

"Captain Porgy, when they drink of this liquor, each man will feel that his will has been made. He will feel that he has no more care in life—will fold his robes about him for flight."

"Or fall! Well, give us a taste. I profess to be a very competent judge of what a good Jamaica punch should be."

Smacks his lips.

"The proportions are good: the acid has yielded to the embrace of the sugar with the recognition of a perfect faith, and both succumb to the spirit, as with the recognition of a perfect deity. Next to poetry, Geordie, you are an adept at punch."

Geordie somewhat proudly:—

"Yes, captain, on this score I feel safe. I am not always certain of my verses. I sometimes feel that they lack the sweet and the ardent—but I am never doubtful of the perfect harmony that prevails among all the elements when I manufacture punch."

Porgy quaffs off the contents of the *dipper*.

"Geordie, you are a benefactor. When this war ceases, you shall partake my fortunes. You shall live with me; and, between punch and poetry, we will make the latter end of life a felicitous *finale* to a very exciting drama. By the way, Geordie, talking of poetry and punch reminds me. You must be prepared with something good to-night. I shall have you out. You shall give us some heroic ballad. I know you have not been drowsing in that thicket for nothing. Have you got anything ready?"

"I *have* been doing a trifle, but—"

"None of your buts. Get aside, and memorize it. These two vessels of punch, meanwhile, we will put under lock and key, and yield to the guardianship of Sergeant Millhouse."

Chapter XLVI

HOW PORGY FEASTED THE CAPTAINS

With vulgar people, a dinner party is the occasion of much fuss and fidgeting. The vulgar egotism is always on the *qui vive* lest something should go wrong—lest something should be wanting to the proper effect—lest, in brief, some luckless excess or deficiency should certainly convey to the guest the secret of those deficiencies, in taste, manners, experiences, and resources, which would, if known, be fatal to the claims of good breeding and high ton which the host is most anxious to establish. Those, on the contrary, who feel assured on such points are apt to take the events of a dinner-table coolly and with comparative indifference. A blunder or a deficiency of steward or servant, occasions little or no concern; is never allowed to disturb the equilibrium of the master, who takes for granted that such small matters will be ascribed, by every sensible guest, to the right cause, and for the opinion of all other persons he cares not a button.

The result of this equanimity is to enable him to keep *his mind "in hand"* for the entertainment of his company. He is able to observe and to minister with promptness and full resource, as his wits are not disordered by any feverish workings of his *amour propre*. He sees what is wanting at a glance; supplies the deficiency with a nod; his servants are duly taught in the value of his nod and glance; and the skill of the host, by which the guests are diverted, enables Jack and Gill to wipe up the water which they have spilt so awkwardly, in their uphill progress, without attracting any notice—without filling the scene with most admired disorder.

Our host *knows* his company, and conjures up the special topic which appeals directly to the tastes or the fancies of each. He is vigilant even while he seems most at ease; when his indifference is most apparent, it is made to cover a becoming solicitude for the comfort of the humblest person present. He provides himself with the proper cue to all your prejudices and affections, as by a divine instinct, so that he steers clear of the one,

---

48 on . . . vive, on the alert • 54 high ton, fashion or style • 68 amour propre, self-esteem

and shapes his course directly for the other; and when the waters are unluckily ruffled, by some bull-headed companion, who treads on his neighbor's toes without even suspecting that he has corns, our host is at hand to pour oil upon the troubled waters, and soothe to calm the temper which is ruffled. He contrives, at the same time, that the offender shall be taught the nature of his offence, without being brought up to the halberds and set in pillory,

"Pour encourager les autres."

There was nothing doubtful about the *aplomb* of Captain Porgy. Having prepared his feast according to the full extent of his resources; drilled his awkward squad to the utmost of his capacity and their susceptibilities; seen that they were in sufficient numbers for proper attendance; and made, in brief, all his preparations, he gave himself no further concern, but prepared to receive his guests, with the easy good nature, the frank politeness, the smiling grace, of an old-school gentleman. And it is quite an error to talk, as we are apt to do, of the formality of the old-school gentleman. The gentleman of two hundred or one hundred years ago, differed very slightly in his bearing from the same class at the present day. In due degree as his ceremonials ran into formalities, did he lose the character of the gentleman. In no period was mere form and buckram ever confounded, by sensible people, with politeness and refinement.

Never was gentleman more perfectly at ease in crowded assembly, yet more solicitous of the claims of all about him, than our corpulent captain. His shrewd good sense, nice tastes, playful humors, and frank spirit, all harmonizing happily, enabled him to play the host generally to the equal satisfaction of all his company. He had the proper welcome for each as he drew nigh; the proper word, which set each person at his ease, and prepared him for the development of all his conversational resources.

Among the first of his guests to appear were Governor Rutledge and General Greene. "The really great," said Porgy to Lance Frampton who stood behind him, "never keep the table waiting."

The approach to the scene was through a great natural avenue of lofty green pines, through which the moon was peeping curiously with a bright smile, a disinterested spectator of the proceedings. Music timed the approaches of the guests, the army band having been secured for the evening. Porgy welcomed his guests at the entrance of the area in which his tables had been spread.

"General Greene, Captain Porgy," said Rutledge. Greene took the outstretched hand of the host, saying:—

"What I have heard of you, Captain Porgy, makes me trespass without fear of the consequences."

"And what I know of General Greene enables me to welcome him with every hope of the consequences. I am very grateful to Governor Rutledge for doing that which, as a poor captain of militia, I should scarcely have ventured to do myself."

"I knew my customers both, my dear captain," said Rutledge, "and knew how little was necessary to render the regular and volunteer service grateful to each other."

"Be seated, gentlemen," said Porgy, "while I put myself on duty for a while;" and he resumed his place at the opening of the avenue, while Sumter, Marion, and the rest severally presented themselves, were welcomed and conducted to the interior by young Frampton, who did the duties of an aid. Colonel Lee was among the latest to appear.

"My dear Porgy," said he condescendingly—"I am late; but the cavalry of the legion is on vigilant duty to-night, and a good officer you know—eh!"

And he left it to our host to conceive the rest.

"Col. Lee may be forgiven, if late among his friends, when we know that his enemies rarely reproach him for a like remissness."

The grace of Porgy's manner happily blended with the grave dignity of his address. Lee smiled at the compliment:—

"Always ready, Porgy—never to be outdone in the play of compliment, or the retort courteous;" and while speaking he was ushered in with other visitors.

The company was at length assembled. The music ceased. A single bugle sounded from the amphitheatre, and the guests disposed themselves without confusion under the whispered suggestions of Lieutenant Framp-

---

8 halberds, a frame made with halberds (a long-handled, pointed weapon in use in the sixteenth century) to which soldiers were tied to be flogged • 10 Pour . . . autres, to encourage the others. The quotation is from Voltaire's Candide (1759): "Dans ce pays-ci il est bon de tuer de temps en temps un amiral pour encourager les autres" (In this country it is well to kill an admiral now and then to encourage the others)

ton. Porgy took his place at the head of the table, standing, till all were seated.

"Gentlemen," said he, "be pleased to find places at the board. Colonel Singleton, you are my *vis-a-vis*. Governor Rutledge will you honor me by sitting at my right. General Greene, I have presumed to assign you the seat at my left."

Right and left of Singleton, Marion and Sumter were placed. At one end of the table crossing the centre of the board, Colonel Lee was seated, Colonel Maham occupied the other. Carrington, Horry, Mellichampe, St. Julien, and others found places between these several termini. Scarcely had they been seated when four great calabash tureens were placed severally at the extremities, the odorous vapors from which appealed gratefully to every nostril in company.

"Turtle soup!" was the delighted murmur.

"And lemons!"

And as the smoking vessels were set before the governor and General Greene, the former exclaimed:—

"Faith, Captain Porgy, your last voyage to the West Indies seems to have been a highly prosperous adventure."

"In truth," said Greene, "I am half inclined to think that there must have been some such enterprise, of which General Marion has forgotten to apprize me."

"I begin seriously to suspect him," said Rutledge. "The fact is that General Marion is so fond of secret enterprises, and audacious ones—does things with so much despatch, and thinks it so easy to do the impossible, that I half believe he has made a three nights' run for the Havana, or sent off a favorite squad on a sortie in that direction. Say, general, is it not so? Let us know the truth of it. You found, among your captures at Georgetown, some ready-rigged sloop or schooner, and sent her out on a cruise in anticipation of this very occasion."

"Nay, governor, the merits of the enterprise, such as it was and the fruits thereof, are due entirely to our host. It was his adventure wholly, though we share the spoils."

"But, where—where—where—" began Peter Horry, stuttering, "where the devil did he—did he—get 'em—turtles and lemons! I don't—don't—understand it—at all."

"Better not press the inquiry, Horry," said Singleton with a sly smile upon the company—"the discovery will hardly add to your own laurels."

"How—my laurels! What—what—I want to—to know—have my laurels—to do—to do—with the matter?"

"Let's have it, Colonel Singleton," said Rutledge eagerly. "Out with the story. Colonel Horry is so seldom to be caught napping that I shall rejoice to have one story at his expense."

"Ay, ay, the story, Singleton," from a dozen voices around the board.

"Tell—tell—tell, if you will," stuttered Horry—"only be sure, and tell—the—the—truth, and shame—you know who."

"The adventure illustrates the military character of the two gentlemen most admirably," said Singleton. "Colonel Horry is a gentleman of large eyes and grapples with objects of magnitude always. It is Captain Porgy's pleasure to be discriminating and select. The lemons and a variety of other edibles are furnished, unwillingly, I grant you, by Lord Rawdon himself. They form a part of the supplies brought up by Colonel Stewart. In dashing at Stewart's convoy, Horry passed a mean little wagon in the rear, as quite unworthy his regards. He swept off as you know three or four others of considerable value to the army. But the very littleness of this wagon which Horry had despised, fixed the regards of our host. He quietly possessed himself of it, and was rewarded with the private stores designed for Lord Rawdon himself." The story produced a laugh at the expense of Horry.

"Who—who—who—the devil," said he, "would have thought—of—of—anything good in—that rickety concern? I'd like to know, Captain Porgy, what you got besides the lemons?"

"White sugars, coffee, tea, spices, Spanish sweetmeats, preserved ginger, three kegs of Jamaica, and a goodly variety besides!"

"The d—l!—and—and—I to miss 'em all."

"But you got loads of bacon and flour, Horry."

"Several bales of blankets."

"Ay, and a bathing-tub and complete set of chamber crockery!"

"What," said Rutledge, "was there a bathing-tub and chamber crockery?"

"Yes, indeed."

"Who could have wanted that, I wonder?"

---

4 vis-a-vis, one who sits opposite, face to face

"Some young ensign of the buffs or blues," said Porgy, "whose mother was duly considerate of the young man's skin in a warm climate. You should have discovered Colonel Horry's visage when that wagon was burst open and the contents revealed. The bathing-tub and furniture filled the wagon."

"What did he say, Porgy? Tell us that!"

"Say! Ah! What was it, colonel? Deliver it yourself: nobody can repeat it half so well."

"Re—re—peat it yourself, if you can!" said Horry stuttering and dipping up his soup with increased rapidity.

"Out with it, Captain Porgy. Horry's speech."

Porgy nodded to Singleton, who answered:—

"I heard it, and as Horry permits will deliver it. He said, stamping his feet in a rage: 'Throw out the d——d basins, and break up the blasted tub. Who would have thought of any fellow being such a bloody booby as to bring a bathing-tub and chamber crockery into a pond and bush country?"

And slightly imitating the stammer of Horry so as to give a lively idea of his manner, Singleton set the table in a roar. When the laugh had subsided:—

"But did he break up the crockery, Porgy?"

"Every bowl and basin. He was merciless. You never saw such havoc. His broadsword played elephant in the crockery shop to perfection, and the dragoons, delighted with the humors of their colonel, went into the work of demolition with a rush."

"I had—no—no—no use for the d——d—d——d—d——d things," said Horry; "and I was—de—de—de—termined to give the d——d puppy that owned them a lesson."

"Ha! ha! ha!"

"But where did the turtles come from?"

"From the genius of my cook, Tom," said Porgy. "The turtle are terrapin from the Caw-caw."

"Not the alligator terrapin, captain, I hope," said Sumter. "I could never bring myself to eat any of that order."

"You have done it on this occasion," said Porgy.

"And very effectually too, general," said Singleton, "since I have helped you to a second supply, and you seem in a fair way to need a third."

Sumter looked a little blank.

"Do not be discomfited, general," said Porgy, "since I took the precaution to have all their tails cut off before they were hashed up for the soup."

"But what did you do with the tails?"

"Ah! they were made into balls, with a due proportion of beef and bacon."

"You have caught me beyond escape, captain, since I confess to have done as much execution on the balls as on the soup."

"And you are surprised into a wisdom, general, that has cured you of the prejudices of twenty years! What we call the alligator terrapin is the best of the tribe—the fattest, richest, best flavored. It requires only that skill in the dressing which my man Tom supplies."

The bugle sounded. Sergeant Millhouse marshalled the waiters to their stations, and the emptied vessels were removed. With another blast of the bugle, new dishes were set on the table.

"A noble-looking fish," said Greene. "What fish is this, Captain Porgy?"

"The greatest delicacy of a fresh-water river, this is the Edisto blue cat—for very nice people a most discouraging name.—Gentlemen, look to yourselves. Here is boiled fish, such as George the Third can not procure; dressed in a style which would not discredit the table of our great ally, the king of France. Men of *goût* will of course prefer the boiled—for the undeveloped taste, the fry is abundant. There are perch and trout in those several dishes. They are all fresh from the Edisto within five hours."

"Your troopers have been busy, captain."

"Ay, sir, and my cook. He was fortunate in his search along the river this morning, to come upon three or four fish-traps, which he emptied without leave. Governor, the melted butter is beside you. By-the-way, those naval biscuit are also from the stores of my Lord Rawdon.—General, do not dream of defiling that fish with vinegar. It is an abomination in this case. The fish only entreats the butter, and the dressing is complete."

The eye of Porgy swept the table. The guests discussed the fish with the relish of starving men. There was a cessation. The finger of Porgy was lifted. Millhouse's bugle gave tongue, and the fish was superseded with a variety of dishes.

---

65 Edisto, river in South Carolina • 69 goût, taste • 83 discussed, tried the quality of, by consuming. Compare Scott, in Guy Mannering (1815): "A tall, stout, country-looking man was busy discussing huge slices of cold boiled beef"

"General Greene—Governor Rutledge—suffer me to persuade you both to the ragout which is before me."

"What is it, captain?"

"Try it, general. It is the alerta—the green alerta—a sort of chicken you will find it, but far superior. The stew is of the *lagarta,* according to the Spaniards, and a dish quite as rare as exquisite on table. Gentlemen, interspersed with these dishes you will find more familiar, but inferior ones. There are hams and tongues, both from the stores of Lord Rawdon, and, in fact, most of this course will be found of foreign character. You will please ask me for no more revelations touching my mode of procuring supplies, as I have no wish to expose the breaking of any more crockery. It is not every one of our partisans who can bear, with so much equanimity as Colonel Horry, the story of his own acquisitions, and how made."

"This—what do you call it?" said Greene.

"Alerta!"

"Is delicious!"

"And nothing could be more savory than this stew, Captain Porgy."

"Yes, indeed, governor—the Spaniards have the merit of the discovery. But gentlemen, with this course, it is time to spiritualize the feast."

The speaker's finger was uplifted, and two enormous bowls of punch were set down at the two ends of the table.

"Gentlemen, we owe a great deal to the providence of Lord Rawdon."

"And the improvidence of Horry," whispered Rutledge, "for, of a verity, had he captured these spoils, he would never have made the same use of them as our host has done."

"Sir," said Porgy with solemnity, "he would have wasted them—naked, upon his dragoons.—Gentlemen, you will please fill for a sentiment. Colonel Singleton, see that your end of the table charges duly."

"We are ready, captain."

Porgy rising:—

"Gentlemen, our first regular sentiment: 'The cause of Liberty—the cause of the American continent—the cause of all continents wherever man has a living soul!'"

"Music." And the bands struck up.

"Captain Porgy," said Lee, "send me, if you please, a second supply of that dish which you call the alerta. I don't know what sort of bird it is, but the savor is that of young pigeons. It is wonderfully nice."

"I agree with you, Lee," said Colonel Williams, "though I have no more idea what the bird is than of the mansions of the moon. Let me trouble you also, Captain Porgy."

"I must also trespass, captain," said Carrington. "Ordinarily, I seldom suffer myself to eat of dishes of which I know nothing; but these foreign meats come to us under good guaranties, though half the time without a name at all."

"Unless French, which is so much Greek to me," said Maham. "Captain, that *lagarta* stew is princely."

"No crowned head in Europe enjoys the like. Shall I help you, Colonel Maham?"

"Thank you, yes. But I thought you called it foreign."

"So it is—in one sense; but this is not imported. It is wholly domestic."

"Well, foreign or domestic, it is first rate," said Greene. "I will try a little more of it, Captain Porgy."

"Ah! general,"—with a smile—"suffer me to say that it is only in the militia service, after all, that the taste properly refines. Governor, shall I serve you?"

"Thank you, I will mince a little of your *lagarta,* captain," and a sly glance of Rutledge apprized the captain of his suspicions. But the face of Porgy made no revelations.

"Gentlemen," said Singleton, at the other end of the table, "fill your glasses."

"Ready, all," said Porgy.

Singleton rose, and gave:—

"South Carolina—almost freed from the footsteps of the foreign tyrant, and rising to the full assertion of her own sovereignty!"

A brilliant burst from John Rutledge, brief, but like a fiery tongue speaking to the soul, followed this sentiment; and the music rose into a triumphant peal as his voice died away upon the echoes. Other sentiments succeeded other speeches; Rutledge, Greene, Marion, Sumter, Lee, were all duly honored with toasts, and all responded, each after his own fashion, all unaffectedly, simply, and with the proper earnestness of soldiers. And the punch

---

4 **alerta,** Spanish word meaning "on the alert"; here used for "frog"
• 6 **lagarta,** alligator

flowed anew into fresh goblets, and the merriment grew high, and some of the grave barons began to sing in snatches, and the volunteer toasts filled up the pauses in the conversation. Meanwhile, a score of melons were placed upon the board, and the preserved fruits from the West Indies, guava and ginger, were crowded upon the board, and provoked new merriment at the expense of Rawdon, who lost, and Horry who refused to find the prize.

And while they gashed deeply the purple centres of the melons, Rutledge suddenly said to Porgy:—

"And now, captain, that you have had your triumph, that all present have borne testimony in the least equivocal manner to the merits of your feast, I would fain know of what those foreign dishes were compounded, of which, knowing nothing, all have partaken so freely. Hams and tongues, fresh from Britain, designed for my Lord Rawdon's own table, have been sent away from yours uncut—proof of homage, the most profound, to yet preferable meats. Pray tell us, then, what were the elements of your *lagarta* and your *alerta*—your *ragouts* and stews."

"Ay, ay," seconded the company, "let us know. What were the birds?"

"I should really be pleased to know, Captain Porgy," said General Greene, bowing, "touching those birds."

"There need be no mystery in it now, general, since, as Governor Rutledge says, the feast has triumphed. But I am afraid I shall too greatly confound you, when I state that the dishes contained no birds at all. The stew of *alerta* was compounded chiefly of the race which helped Homer in the construction of an epic—a race which Milton describes as the—

"'Small infantry
Warred on by cranes.'"

"You surely do not mean *frogs,* Captain Porgy?" cried Lee, with affected horror in his accents.

"Your guess is a sagacious one, and worthy of the legion, Colonel Lee."

"Good heavens! and is it come to this, that the soldiers of liberty should be reduced to the necessity of frog-eating?"

"Necessity, Colonel Lee!" exclaimed Rutledge. "By heavens, sir, it should be matter of taste and preference, sir, if only in due deference to our great Gallic ally; but, of a truth, sir, after to-day's feast, it should be a new argument in behalf of liberty, that she has brought us to such rare fine feeding and such improved tastes."

"And the other dish, Captain Porgy," demanded Sumter, "the stew with the Spanish name?"

"The name speaks for itself—*lagarta.* It is of the great lizard family—the cayman—in vulgar speech, the alligator. But the specimens employed, gentlemen, were mere juveniles; young vagabonds, whose affectionate parents had hardly suffered them out of sight before. They had probably never fed on larger prey than their neighbors of the alerta family."

"One question, Captain Porgy," said Carrington; "be so good as to inform me, if, among your several unfamiliar dishes, I have had the happiness to eat of the rattlesnake, the viper, the moccasin, or the boa-constrictor?"

"Alas! colonel, I grieve to say that you have not. I should have been pleased to have got a couple of young chicken-snakes, but I was not fortunate in the search. We got glimpse of a few runners [black-snakes], but they were quite too swift of foot for the hunters. The chicken-snake is of unexceptionable tenderness; the runner is a little too muscular, if not previously well sodden; but, unless near a hencoop, or a corncrib, it is not easy to find the chicken-snake. I repeat my regrets that I could not secure this delicacy for my table. But another time, Colonel Carrington, should you sup with me, I will make a special effort in your behalf."

"I thank you, sir; do not suffer your regrets to disturb you. For that matter, I am half doubtful whether your *alerta* and *lagarta,* of which I have, in my ignorance, partaken somewhat too freely, will continue to lie lightly on my soul or stomach."

"Have no fears, sir; and the better to secure their repose, do me the honor, sir, of a bowl of punch with me. Gentlemen, I entreat the whole table to our companionship."

And the vessels were filled and emptied.

"And now, gentlemen," continued the host, "I give you—The poets, who minister at once to Apollo, to Bacchus, and to Mars, and beg to introduce you to the

32 Homer. See Iliad, Bk. III, l. 6 • 33 Milton. The quotation is from Paradise Lost, Bk I, ll. 575-576 • 45 Gallic ally, France • 66 [black-snakes], Simms' brackets

only representative of the faculty in our squadron, Mr. George Dennison, my ensign. If I mistake not, he has been this day as busy with the muse, as I with my cook; and, if we will suffer him, he will bring us gifts from Parnassus not unworthy of those which we have enjoyed from the provision-wagon of Lord Rawdon."

"In which Horry, going from Dan to Beersheba, could see nothing."

"Having a taste for baths, warming-pans, and chamber-furniture."

"'Nough of that—that—Singleton! I—I—I'm a sinner be—be—beyond salvation, if I ever pass a little mean-looking wagon again, without seeing what's in it."

"But—Mr. Dennison," said Rutledge.

"George! Geordie!" said Porgy, good-humoredly. The poet, hitherto the only silent person at table, now rose—a tall, slender person, of bright, lively eye, mouth full of expression, Grecian nose, and great forehead rising up like a tower. His cheeks were flushed, his frame trembled, and there was an evident quivering of the lip which was discernible to every eye about him. Dennison sang the verses, which he wrote, in a clear, military voice, shrill like a clarion. There was, perhaps, no great deal of music in his composition, but enough for the present purpose, and of the kind best suited, perhaps, for a military gathering—bold, free, eager and full of animation. His ballad had been the work of that very afternoon.

He had no prefaces. But, waiting till the music hushed, and the voices, he then began:—

The Battle Feast

To the dark and bloody feast,
  Haste ye battle vultures, haste;
There is banquet, man and beast,
  For your savage taste:
Never on such costly wassail
  Did ye flesh your beaks before;
Come, ye slaves of Hesse Cassel,
  To be sold no more!

Small your cost to George of Britain,
  One and sixpences sterling down
Yet for this, ye sorry chapmen,
  Each will lose his crown;
Freedom knows no price for valor,
  Yours is measured by the groat,
Britain pays in gold and silver,
  We in steel and shot.

Recreants, ye from Scottish Highlands,
  Lately rebels to the throne
Of that brutal foreign despot,
  Now, whose sway ye own;
Ye are welcome to the banquet,
  Which is spread for all who come,
Where the eater is the eaten,
  And the deathsman goes to doom.

And ye braggart sons of Erin,
  Loathing still the sway ye bear,
Groaning in the very fetters,
  Ye would make us wear;
Ever writhing, ever raging,
  'Neath the bonds ye can not break—
Here the bloody banquet woos ye,
  Gather and partake!

Stoop, ye vultures, to the issue,
  It will be ere set of sun!
Mark whose valor bides the longest,
  Blood of price or blood of none.
Comes the Tartan of Glenorchy,
  Comes the sullen Saxon boor,
Comes the light-heeled German yager
  Crowding to the shore!

"We are not sure that Master George Dennison is altogether right in this statement of the hire of the Hessian per head, but the difference is immaterial, whether in poetry or history."—Simms • 40 chapmen, merchants, traders • 46 Recreants . . . Highlands. "The exiled rebels of '45, when settled in America, almost wholly proved adherents of that monarch whom, as followers of the Stuarts, they opposed to the knife. The disasters of '45 cured them of all propensity to rebellion. Even the Macdonalds, the famous Hector—Flora who saved the Pretender—all became loyal to George the Third in America, and fought against the patriots."—Simms • 66 Tartan of Glenorchy, Scotch Highlander. "Tartan" is Scotch plaid • 68 yager, or jäger, a German rifleman, originally a hunter

Who shall meet them by the water
On the mountain, in the vale,
Meet them with the stroke of slaughter
Till the right arm fail?
Wherefore ask? Yon pealing summons
Finds fit answer, sharp and soon,
Answer fit for peers and commons,
Yager and dragoon.

Lo! the soul that makes a nation,
Which, from out the ranks of toil,
Upward springs in day of peril,
Soul to save the soil!
Comes a high and mighty aspect,
From the shores of Powhatan;—
Lo! in him the nation's hero,
Glorious perfect man!

Follows, rugged as his mountains,
Daring man from Bennington;
Blacksmith stout from Narraganset,
Good where deeds are done:
Comes the keen-eyed Santee rifle,
Sleepless still and swift as flame,
Rowel rashing, bullet winging
Man of deadly aim.

Stoop, ye vultures, to the issue,
Stoop, and scour the bloody plain
Flesh your beaks where fat the carnage,
Mountains up the slain:
Whose the skull your talon rendeth
Eye, within your dripping beak,
Speechless tongue that loosely lolleth
On divided cheek!

In the tartan of Glenorchy,
Scarlet of the Saxon boor,
Gray frock of the Hessian yager
Strewn from mount to shore,
Read the fate of hireling valor,
Read the doom of foreign foe,
Know that he who smites for freedom,
Ever strikes the deadly blow!

It was in the midst of the compliments of the party to the poet, that Willie Sinclair stole in to the table, and plucked the sleeve of Marion, who rose quickly and quietly, and went out with him in silence. The company sat at the table some time longer.

"Why your poet seems a genuine Birserker, Captain Porgy. This chant was worthy to be sung in the hall of Odin. Does he fight as bravely as he sings."

"Every bit, sir, and he goes into battle with the same convulsive sort of tremor with which he begins to sing or to recite. But that passes off in a few moments, and then he fairly rages. In fact, sir, it is not easy for him to arrest himself, and he sometimes shows himself rather too savage in strife—with rather too great an appetite for blood."

"You are as fortunate, Captain Porgy, in your poet as your cook; I would I could persuade them from you!—Who?—Do you say?"

These last words were spoken to Lieutenant Frampton, who had whispered something into Rutledge's ear.

"Colonel Sinclair, your excellency. He waits you without, along with General Marion."

"Instantly"—and, watching his opportunity, while beakers were filling, Rutledge stole away. Greene followed his example, so did Sumter and the elder officers; the young ones remained, and soon Captain Porgy, his veneration no longer active, was in full flight, keeping the table in a roar, with merry jest, jibe, and story, till the hours grew something smaller than the stars, and the moon had a hooded, downcast looking visage, as if she had seen or heard something to shock her modesty. Let us leave the revellers while they make a final onslaught upon the punchbowls.

The reference is to Nathanael Greene • **23 Rowel**, a small wheel attached to spurs, with radiating sharp points • **23 rashing**, cutting • **24 Man . . . aim**, an allusion to the American Revolutionary generals, Thomas Sumter and Francis Marion • **42 Willie Sinclair**. The hero of the book makes this brief appearance at Captain Porgy's banquet. See introductory note, p. 596

Singers of the West

In the new country being opened up by the emigrants, new songs were made which caught the spirit of the times in various ways. The four which follow show something of their variety: one was made for a political campaign, one was written by a composer of popular songs who was just starting his career in Cincinnati, two were the works of forgotten movers or settlers. All were ballads or ballad-like songs, and all, with the possible exception of "The Wolverine's Song," had widespread oral currency.

The Wolverine's Song

Most memorable, perhaps, of all Presidential campaigns before 1860 was the one of 1840, in which Harrison and Tyler, "Tippecanoe and Tyler, too," were elected. The Whig party, after having done badly in the local elections of 1839, met in December of that year and managed to nominate William Henry Harrison, hero of the battle of Tippecanoe, for the Presidency and John Tyler as his running mate. For several months Harrison's chances seemed hopeless. Then an opposition newspaper in Baltimore printed an attack on Harrison which hooted at his boorishness: "Give him a barrel of hard cider and a pension of two thousand a year, and, our word for it, he will sit the remainder of his days in a log cabin by the side of a sea coal fire and study moral philosophy."

Harrison was well-to-do and well-educated, but instead of pointing this out, his supporters made the remarks about his ignorance the basis of a campaign playing up Harrison as a Western Indian fighter and log-cabin settler. The General discarded his high silk hat for a broad-brimmed one, and all the publicity about him made him the symbol of the log-cabin, hard-cider West.

"The chief means of popular excitement," said a Harrison campaigner, "were the glee clubs, which never before

Panel (l. to r.): Conestoga wagons, moving westward • A house-raising in the new territory • Forty-Niners

or since have been so effectively used." Said a Van Buren supporter: "Songs rang in my ears wherever I went, morning, noon, and night. . . . Men, women and children did nothing but sing. It worried, annoyed, dumfounded, crushed the Democrats, but there was no use trying to escape." One of the hundreds of such pieces, the song which follows, taken from **The Log Cabin Minstrel**, appeals to the "Wolverines"—the Michigan men.

Ye hard fisted, log cabin, Wolverine boys,
Whom slander and ridicule never annoys,
Now come up to the scratch, for your country demands
The prayers of your hearts and the work of your hands;
For a race of vile "soap-locks" and ruffle-gay knaves
Have seized on our birthrights, and made us all slaves!
Come, then, to the rescue—be fearless and true,
And we'll put them to flight with Old Tippecanoe!
Make way for Tippecanoe!
He's death on a Tory, that Tippecanoe!

They call him a Granny—they say he is poor,
And lives in a Cabin befitting a boor!
And they say that he never drinks Port or Champagne,
But Cider as hard as his dwelling is plain!—
Well, what if he does? Still, his table is spread
With such as his purse will afford; and a bed—
Though coarser than Martin Van Buren's, 'tis true,
Is kept for the stranger by Tippecanoe!
Huzza for Tippecanoe!
He's death on a Tory, that Tippecanoe!

We know that Van Buren can ride in his coach,
With servants, forbidding the vulgar's approach,
We know that his fortune such things will allow,
And we know that our candidate follows the plough;
But what if he does? Who was bolder to fight
In his country's defence on that perilous night
When nought save his valor sufficed to subdue
Our foes at the battle of Tippecanoe?
Huzza for Tippecanoe!
He dropped the red Locos at Tippecanoe!

They call him a coward, the dastardly slaves!
Whose courage preserved them from infantile graves,
And gave them that life which they ignobly spend
Traducing their own and their Country's best friend.
But slander and ridicule ne'er can efface
That long-settled, well-settled, deep-settled trace
Of gratitude, marked on the heart that is true!
He's after you, Matty, that Tippecanoe!
Make way for Tippecanoe!
He's death on a Tory, that Tippecanoe!

1840

---

5 **soap-locks**, hair made shiny and curly with the aid of soap • 8 **Tippecanoe**, a two-hour battle in November 1811, during which the force of eleven hundred men under Harrison defeated the Indians led by Tecumseh. Harrison thus won his nickname • 30 **Locos**, abbreviation for Locofoco, a nickname of a wing of the anti-Whig Democratic party, 1835-1837 • 32 **Whose . . . graves.** The inspired poet exaggerated somewhat the results of Harrison's victory over the Indians

Oh! Susanna

Stephen Collins Foster 1826 • 1864

"My Old Kentucky Home," "Swanee River," "Jeanie with the Light Brown Hair," "Old Black Joe"—these were only a few of the songs by Stephen Collins Foster, the most popular song writer in American history. Foster was born of Scotch-Irish parents in Pittsburgh, July 4, 1826. Though he was scantily educated, he discovered in the late 1840's his extraordinary gifts as a composer. Introduced, as a rule, by singers in minstrel shows, Foster's ballad-like compositions often became nationally famous, and many are still remembered and sung.

Foster was living in Cincinnati when his song "Oh! Susanna" was introduced in 1847 by singers in Andrew's Eagle Ice-Cream Saloon in Pittsburgh. Within less than two years at least twenty editions had been published by various publishers, and several minstrel troupes were singing it wherever they stopped.

The song was becoming tremendously popular in January 1848, when gold was discovered in California. For the great throng of Forty-Niners who crossed the continent westward, this was the favorite song. The nonsense rhymes had no relevance whatever to the gold rush, but the amusing words and the jaunty tune made the song unforgettable.

I come from Alabama
Wid my banjo on my knee.
I'm gwan to Louisiana,
My true love for to see.
It rain'd all night the day I left,
The weather it was dry,
The sun so hot I froze to death,
Susanna, don't you cry.

Chorus

Oh! Susanna Oh! don't you cry for me,
I've come from Alabama wid my banjo on my knee.

I jumped aboard de telegraph,
And trabbelled down de ribber,
De 'lectric fluid magnified,
And killed five hundred nigger.
De bullgine bust, de horse run off,
I really thought I'd die,
I shut my eyes to hold my breath,
Susanna, don't you cry.

I had a dream de odder night,
When eb'ry ting was still;
I thought I saw Susanna,
A-coming down de hill.
The buckwheat cake war in her mouth,
The tear was in her eye,
Says I, I'm coming from de South,
Susanna, don't you cry.

I soon will be in New Orleans,
And den I'll look all round,
And when I find Susanna,
I'll fall upon the ground.
But if I do not find her,
Dis darkie'll surely die,
And when I'm dead and buried,
Susanna, don't you cry.

1847·1848

Sweet Betsy from Pike

Pike County, Missouri, was the birthplace of many of the earliest emigrants to cross the plains, and the type of emigrants from this county was peculiar enough so that Westerners soon were talking of "Pikes." In 1855 the California humorist Phoenix, describing a migrating train from Pike County, said: "Each family consists of a man in butternut-colored clothing driving the oxen; a wife in butternut-colored clothing riding in the wagon, holding a butternut baby, and seventeen butternut children running promiscuously about the establishment; all are barefoot, dusty, and smell unpleasantly." In time "Pike" became the term for similar specimens not only from Missouri but also from other Middle Western or Southern states. "The Pike," said Bayard Taylor, "is the Anglo-Saxon relapsed into semi-barbarism . . . long, lathy, sallow . . . he takes naturally to whisky . . . has the 'shakes' his life long at home . . . distrusts men in 'store clothes.' . . ." An anonymous singer, in the 1850's, invented the following account of the travels Westward of two such poor whites. The chorus is the same as in the first stanza except in the instances where changed choruses appear.

Did you ever hear tell of Sweet Betsy from Pike,
Who crossed the wide prairies with her lover Ike,
And two yoke of cattle, a large yaller dog,
A tall, shanghai rooster, and one spotted hog.

Chorus

Saying, "Good-bye, Pike County, farewell for a while;
We'll come back again when we've panned out our pile."

One evening quite early they camped on the Platte,
'Twas near by the road on a green shady flat;
Where Betsy, quite tired, lay down for repose,
While with wonder Ike gazed on his Pike County rose.

They soon reached the desert, where Betsy gave out,
And down on the sand she lay rolling about;
While Ike in great terror looked on in surprise,
Saying, "Betsy, get up, you'll get sand in your eyes."

Chorus

Saying, "Good-bye, Pike County, farewell for a while;
I'd go back tonight, if it was but a mile."

Sweet Betsy got up in a great deal of pain,
And declared she'd go back to Pike County again;
Then Ike heaved a sigh and they fondly embraced,
And she traveled around with his arm round her waist.

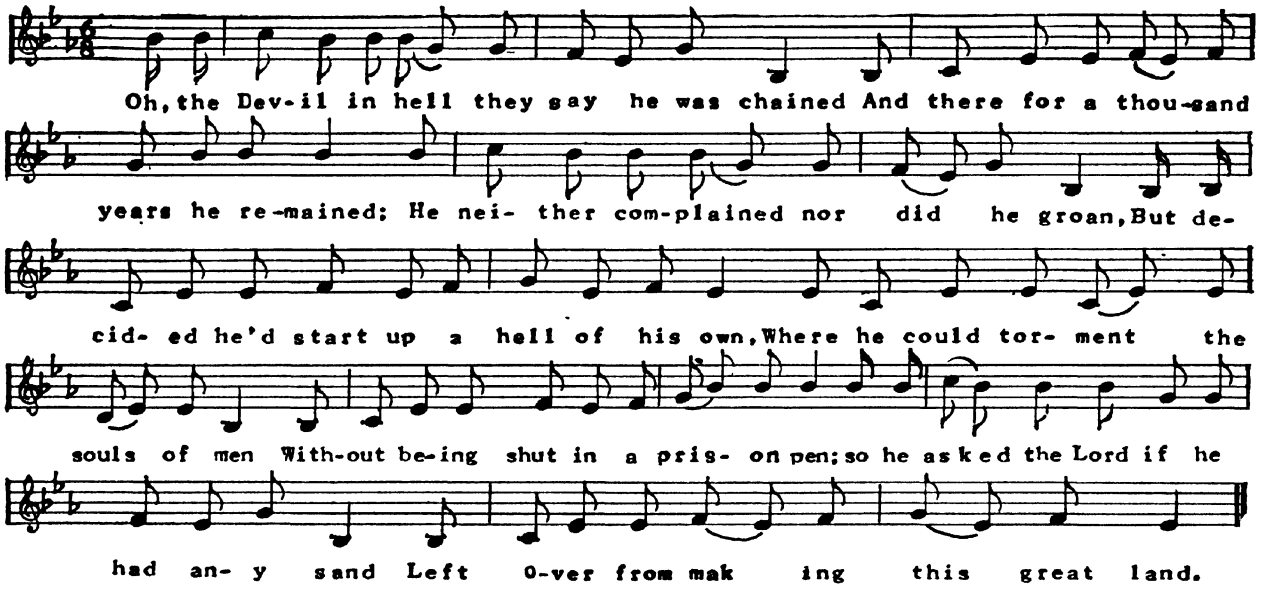
The Injuns came down in a wild yelling horde,
And Betsy was skeered they would scalp her adored;
Behind the front wagon wheel Betsy did crawl,
And there she fought Injuns with musket and ball.

The alkali desert was burning and bare,
And Isaac's soul shrank from the death that lurked there:
"Dear old Pike County, I'll go back to you."
Says Betsy, "You'll go by yourself if you do."

The wagon tipped over with a terrible crash,
And out on the prairie rolled all sorts of trash;
A few baby clothes done up with great care
Looked rather suspicious; but 'twas all on the square.

The shanghai ran off and the cattle all died,
The last piece of bacon that morning was fried;
Poor Ike got discouraged, and Betsy got mad,
The dog wagged his tail and looked wonderfully sad.

They swam the wide rivers and crossed the tall peaks,
And camped on the prairie for weeks upon weeks.
Starvation and cholera and hard work and slaughter.
They reached California spite of hell and high water.



Long Ike and sweet Betsy got married of course,
But Ike getting jealous obtained a divorce;
And Betsy well satisfied, said with a shout:
"Good-bye, you big lummox, I'm glad you backed out!"

Chorus

Saying, "Good-bye, dear Isaac, farewell for a while,
But come back in time to replenish my pile."

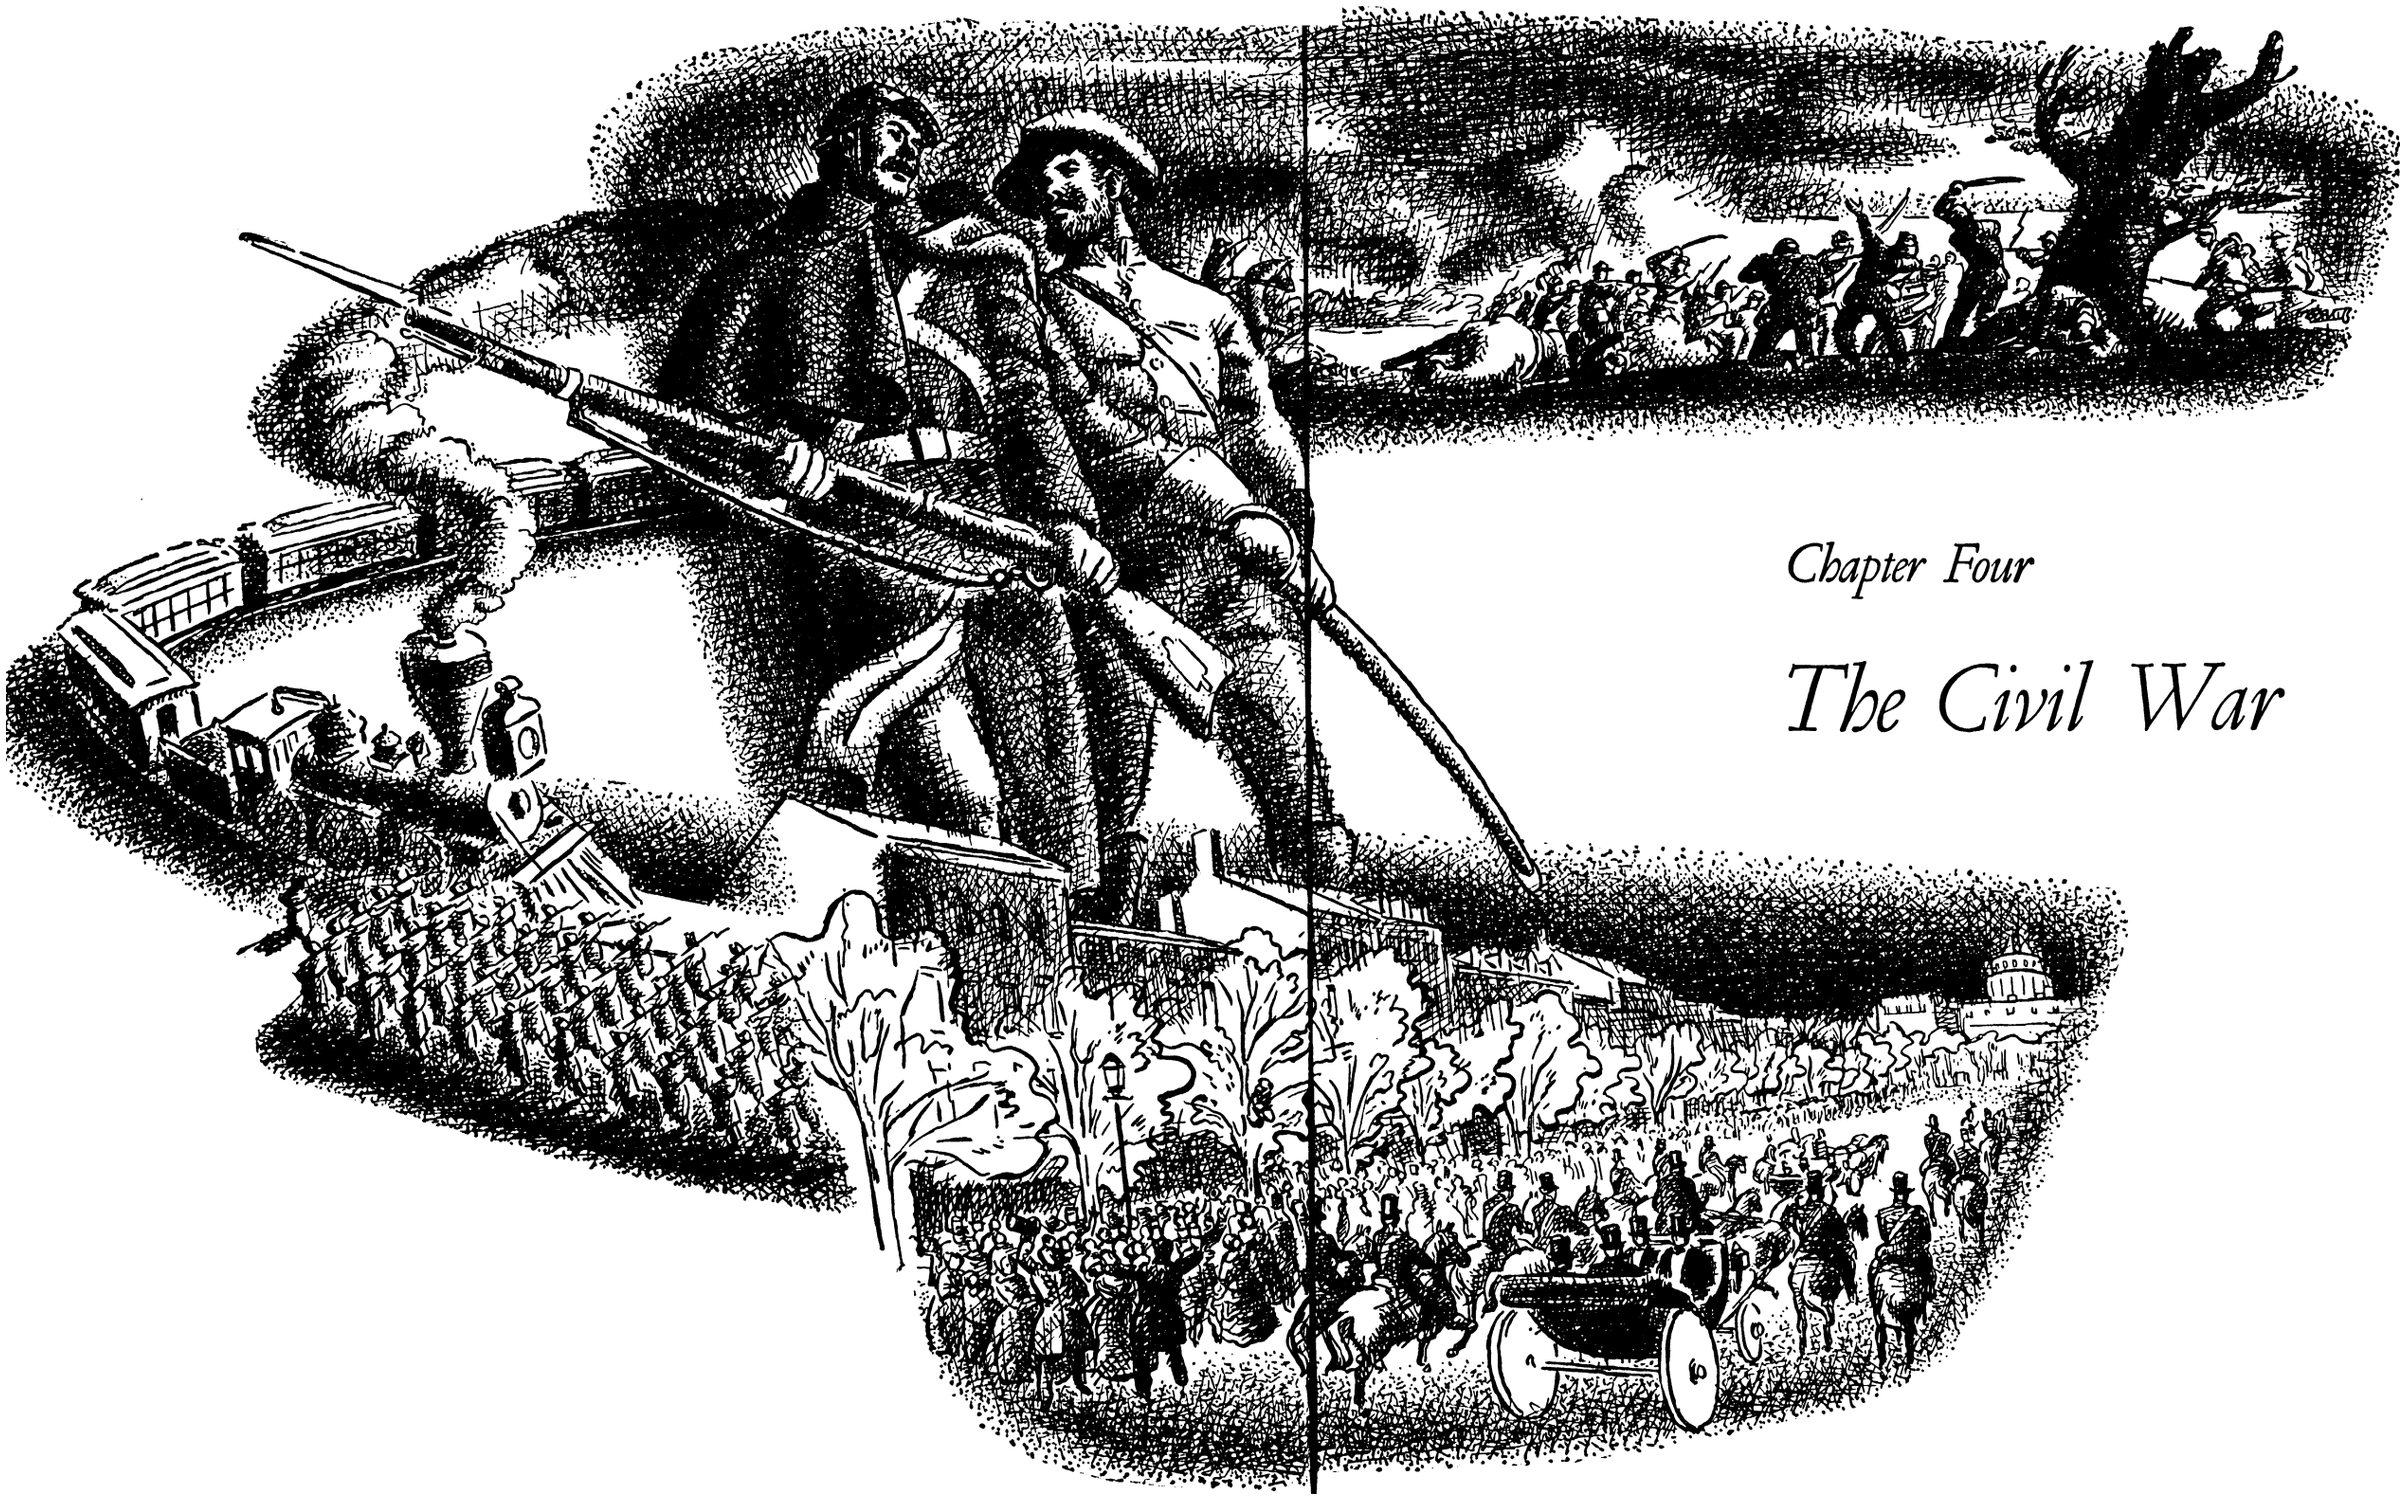
1855?

Hell in Texas

The year gold was discovered in California, Texas was ceded by Mexico to the United States. The great stretch of territory thus secured had several climates, some of which were fairly distressing. In "Hell in Texas," a ballad composer told in rollicking words a fanciful story of the way Texas got some of its least attractive features.

Oh, the Devil in hell they say he was chained,
And there for a thousand years he remained;
He neither complained nor did he groan,
But decided he'd start up a hell of his own,
Where he could torment the souls of men
Without being shut in a prison pen;
So he asked the Lord if He had any sand
Left over from making this great land.

The Lord He said, "Yes, I have plenty on hand,
But it's away down south on the Rio Grande,
And, to tell you the truth, the stuff is so poor
I doubt if 'twill do for hell any more."
The Devil went down and looked over the truck,
And he said if it came as a gift he was stuck,
For when he'd examined it carefully and well
He decided the place was too dry for a Hell.



But the Lord just to get the stuff off His hands
He promised the Devil He'd water the land,
For he had some old water that was of no use,
A regular bog hole that stunk like the deuce.
So the grant it was made and the deed it was given;
The Lord He returned to His place up in heaven.
The Devil soon saw he had everything needed
To make up a hell and so he proceeded.

He scattered tarantulas over the roads,
Put thorns on the cactus and horns on the toads,
He sprinkled the sands with millions of ants
So the man that sits down must wear soles on his pants.

He lengthened the horns of the Texas steer,
And added an inch to the jack rabbit's ear;
He put water puppies in all of the lakes,
And under the rocks he put rattlesnakes.

He hung thorns and brambles on all of the trees,
He mixed up the dust with jiggers and fleas;
The rattlesnake bites you, the scorpion stings,
The mosquito delights you by buzzing his wings.
The heat in the summer's a hundred and ten,
Too hot for the Devil and too hot for men;
And all who remained in that climate soon bore
Cuts, bites, stings, and scratches, and blisters galore.

He quickened the buck of the bronco steed,
And poisoned the feet of the centipede;
The wild boar roams in the black chaparral;
It's a hell of a place that we've got for a hell.
He planted red pepper beside of the brooks;
The Mexicans use them in all that they cook.
Just dine with a Greaser and then you will shout,
"I've hell on the inside as well as the out!"

Chapter Four

The Civil War

Chapter 4

The Civil War

1850 · 1865

OVER THE CARNAGE ROSE PROPHETIC A VOICE.

"Over the carnage rose prophetic a voice,
Be not dishearten'd, affection shall solve the problems of freedom yet,
Those who love each other shall become invincible,
They shall yet make Columbia victorious." —Whitman

I. Intellectual Currents

THE IRREPRESSIBLE CONFLICT

The Civil War was the bloodiest conflict which the world had seen up to that time, and it struck a blow which was almost fatal to the American Union. The issues were complex and confused. On the Northern side, the primary objective of the abolitionists was the destruction of slavery as an institution, while the aim of the nationalists was the preservation of the Union. On the Southern side, many fought to defend slavery—an institution whose rights had been guaranteed by the Constitution—while others believed that the basic issue was the vindication of the sovereignty of the individual state. Beneath these immediate issues lay the conflict between two radically different forms of society: the democratic, industrial economy of the North and the aristocratic, agrarian economy of the South.

Although the causes of conflict were deeply imbedded in the American past, a series of dramatic events in the 1850's precipitated the outbreak of war in 1861.

The Fugitive Slave Law of 1850, which compelled the return of runaway slaves to their owners, fanned the fires of abolitionism. Emerson declared that he would not obey it; Thoreau actually helped at least one fugitive slave to escape into Canada, and the gentle-souled Whitman implied in one of his poems that he would aid all such fugitives with his "firelock" if the occasion should arise. A decisive incident occurred in Boston in 1854, when an infuriated mob organized by the Anti-Slavery Society attempted to rescue Anthony Burns, a fugitive slave, from the police, and United States troops intervened to enforce the law.

The rival efforts of Northerners and Southerners to control Kansas, where the issue of slavery was to be decided by popular vote, resulted in bloody strife in that territory in 1855. In a famous speech called "The Crime Against Kansas," Senator Charles Sumner of Massachusetts spoke too harshly of Senator Butler of South Carolina; whereupon Butler's young kinsman, Preston Brooks, assaulted Sumner on the floor of the Senate and inflicted an injury from which Sumner never fully recovered. The controversy over Kansas hastened the or-

ganization, in 1856, of the Republican party on a platform opposing the extension of slavery.

Sectional bitterness was increased still further in 1857 by the Dred Scott decision of Chief Justice Taney. Having been taken by his owner into a free state and then brought back into a slave state, Dred sued for his freedom. The Supreme Court denied his petition, declaring that since a Negro was not a citizen, he did not have access to the courts. The decision was attacked by Lincoln in his great debates with Stephen A. Douglas. Still more dramatic and more far-reaching in its effects was the attempt of John Brown, a fanatical abolitionist, to foment an insurrection of slaves in Virginia. After having captured the federal arsenal at Harper's Ferry in October 1859, he was arrested by a company of marines under Colonel Robert E. Lee, and was later tried and executed. Emerson and Thoreau spoke out in Brown's defense, while Southerners were horrified by the threat of a black uprising. The "martyrdom" of Brown contributed enormously to the rise of sectional feeling. He became the subject of a stirring battle song (p. 663) which Northern soldiers were to sing during the war: "John Brown's body lies a-moldering in the grave,/His soul is marching on!"

The election to the Presidency in 1860 of the Republican nominee, Abraham Lincoln, precipitated the secession movement in the South. The new party was exclusively the party of the North; political lines were more completely sectional than ever before. Since Lincoln had declared that "this government cannot endure permanently half slave and half free," and the Republican party vigorously opposed the extension of slavery, Southern extremists believed that they were forced to choose between abolition and secession. South Carolina seceded from the Union in December 1860, and by February 1861, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas had followed her example. Shortly thereafter, the Confederate States of America was organized in Montgomery, Alabama, with Jefferson Davis as president. On April 12, 1861, the Confederate batteries in Charleston harbor fired on the federal garrison in Fort Sumter. Soon after this decisive event marking the opening of the war, Virginia, Arkansas, Tennessee, and North Carolina joined the Confederacy.

The choice between state and nation was a difficult one for many Southerners to make. The old constitutional argument that the states were older than the Union (true of course of only the original thirteen) and that the Union consequently derived its authority from the states was no doubt intellectually convincing to some. But loyalty is based in the emotions rather than in the intellect. The most distinguished officer of the Confederate army, Robert E. Lee, resigned his commission in the United States Army when Virginia seceded because, as he put it, "I have been unable to make up my mind to raise my hand against my native state, my relatives, my children, and my home." A New England writer, Hawthorne, expressed sympathy with Lee's view when he said, with a touch of irony: "If a man loves his own State and is content to be ruined with her, let us shoot him if we can, but allow him an honorable burial in the soil he fights for."

At the outset of the war, the South believed that cotton alone was a guarantee of victory; that if deprived of cotton, the textile industry—and therefore the entire economy—of the North and of England would collapse. The Southern expectation was not realized. England, though on the point of doing so in 1862, never recognized the Confederacy. The issue was to be decided by arms alone, and the overwhelming superiority of the North in population and resources permitted little doubt of the eventual outcome. It is hardly necessary here to recount the shifting tides of battle during the four years of war. The turning point came in July 1863, when Lee was defeated at Gettysburg and Vicksburg capitulated after a long siege. The surrender of Lee to Grant at Appomattox on April 9, 1865, in effect terminated the war. The assassination of Lincoln five days later plunged the nation into the turmoil of reconstruction, which for the South proved to be more trying in many ways than the war itself.

ATTACKERS and DEFENDERS of SLAVERY

From the foregoing brief survey it is clear that slavery was the great issue before the American people, and it is not surprising that slavery was the subject of much of the literature, both Northern and Southern, during the decade which preceded the Civil War.

In the North, the two chief representatives of anti-slavery literature were John Greenleaf Whittier (p. 635) and Mrs. Harriet Beecher Stowe. Both writers were motivated by a sincere devotion to the cause of human

freedom. Whittier's poems were characterized by a fiery intensity rarely equalled even in polemical verse. His "Ichabod" (p. 638) was a scorching condemnation of Webster for his support of the Fugitive Slave Law:

> Let not the land once proud of him
> Insult him now,
> Nor brand with deeper shame his dim,
> Dishonored brow.

A better, though equally partisan, poem was his "Massachusetts to Virginia" (p. 636), with its swinging rhythm and its impressive roll-call of the Massachusetts counties. If the author's zeal caused him to forget that New Englanders had once been actively engaged in the slave trade, as when he said to Virginia,

> But that one dark loathsome burden ye must stagger with alone,
> And reap the bitter harvest which ye yourselves have sown!

the poem was none the less effective both as an indictment of the South and as a summons to action at home. Mrs. Stowe's *Uncle Tom's Cabin,* published in 1852, reached a larger number of readers than did all of Whittier's poems combined; indeed, the novel immediately became, and remained for many years, a best seller. It was dramatized and was long successful on the stage. Mrs. Stowe's appeal was more sentimental than Whittier's; her book emphasized the pathos of the traffic in Christian souls.

Among the early defenders of slavery was John Pendleton Kennedy, the Baltimore novelist (p. 589). Although he has been considered as a creator of romantic fiction, it should be recalled here that in *Swallow Barn,* published in 1832, he presented a reassuring picture of the friendly relations which existed between master and slaves on a Virginia plantation.

The abolitionist attacks of the 1840's and 1850's called forth a more elaborate and more vigorous defense. Calhoun pointed out that slavery was a necessary part of the Southern economy and that its abolition would destroy the South:

> The Southern States are an aggregate, in fact, of communities, not of individuals. Every plantation is a little community, with the master at its head, who concentrates in himself the united interests of capital and labor, of which he is the common representative. These small communities aggregated make the State in all, whose action, labor, and capital is equally represented and perfectly harmonized. Hence the harmony, the union, the stability of that section.

With the rising tide of sectional feeling, Southern apologists carried the argument to still greater extremes. William Gilmore Simms doubtless spoke for a substantial body of Southern opinion when he declared in 1852 that "slavery is a wisely devised institution of heaven devised for the benefit, improvement, and safety, morally, socially, and physically, of a barbarous and inferior race, who would otherwise perish by famine or by filth, by the sword, by disease, by waste, and destinies forever gnawing, consuming, and finally destroying."

The final step in the Southern defense carried the war to the enemy. The condition of the slaves on Southern plantations, it was argued, was infinitely better than that of the workers, or wage-slaves, in Northern factories and mines. William J. Grayson's *The Hireling and the Slave* (p. 642), published in 1854, pointed the contrast in Pope-like couplets: in Northern industrial communities,

> Gaunt Famine prowls around his pauper prey,
> And daily sweeps his ghastly hosts away;
> Unburied corpses taint the summer air,
> And crime and outrage revel with despair . . .

while on the Southern plantation,

> Warm social joys surround the Negro's cot,
> The evening dance its merriment imparts,
> Love, with its rapture, fills their youthful hearts,
> And placid age, the task of labor done,
> Enjoys the summer shade, the winter sun.

A middle position between the extremes of Northern abolitionism and Southern eulogy was taken by Webster and Lincoln. Throughout the controversy the aim of both men was not to destroy slavery but to preserve the Union, and both incurred the ill will of the abolitionists. Although they believed that slavery was an evil and op-

posed its extension, they were willing to respect its constitutional rights in the slave states if thereby the Union might be saved. Webster's desire for his country was best expressed in the noble peroration, "Liberty and Union, one and inseparable, now and forever." Lincoln's attitude as late as August 1862 was expressed in the famous letter to Horace Greeley (p. 672): "My paramount object in this struggle is to save the Union, and is not either to save or to destroy slavery. . . . What I do about slavery and the colored race, I do because I believe it helps to save the Union." The Emancipation Proclamation, announced on January 1, 1863, was a shrewd political weapon as well as a great humanitarian document. It united the cause of the Negro with that of the Union and gave to the Civil War in the eyes of the world the dignity of a crusade for human liberty.

THE LITERATURE of the WAR YEARS

Much of our best literature dealing with the Civil War was not written until many years later—Stephen Crane's *Red Badge of Courage* in 1895, for example, and Stephen Vincent Benét's *John Brown's Body* in 1928. During the war itself, the memorable literature on the subject of the war was small in amount: a few poems by Whittier and Timrod, several popular songs, the great speeches of Lincoln, and Whitman's fine collection of poems, *Drum-Taps.*

Since Whittier's work as propagandist had been largely accomplished before the outbreak of the war, he was content during its course to write an occasional poem. In "Barbara Frietchie" (p. 639) he celebrated an instance of loyalty to "the old flag" in the border state of Maryland, though it was a loyalty which he and other abolitionists had done much to undermine. In "Laus Deo" (p. 640) he rejoiced at the passage of the constitutional amendment abolishing slavery. The amendment marked the final triumph of the cause for which he had labored, with energy and self-sacrifice, for thirty years.

While Whittier did his best work before and after the war, actual hostilities had the magical effect on Henry Timrod (p 651), the Southern poet, of calling forth poems far superior to anything else he ever wrote. "Ethnogenesis" (p. 652) and "The Cotton Boll" (p. 653) are compositions which entitle Timrod to a higher rank among our poets than he has yet been accorded. In these poems he reiterated many of the traditional Southern arguments: the Constitution recognized slavery, and the Bible did not prohibit it; the bondslave of the South was treated more humanely than the wage slave of the North; Southern cotton was necessary to the prosperity and happiness of the world. In eloquent, moving verse he described his conception of the South's mission and of the Southern character. The exportation of cotton under a system of free trade, he thought, would bind the nations together in lasting peace. The Southern character and its influence on the rest of the world were typified for him in the Gulf Stream, which ". . . through the cold, untempered ocean pours its genial streams."

The war also called forth Lincoln's finest utterances. The *First Inaugural* (p. 667) faced the difficult situation already created by the secession of seven Southern states. Lincoln asserted that the Union was indissoluble, and that no force other than that necessary to hold federal property and collect federal duties would be used against the erring states. He concluded with an appeal "to the better angels of our nature." *The Gettysburg Address* (p. 673), second only to the Declaration of Independence, is our most classic expression of the American democratic ideal; it was so phrased as to be always applicable. America was "conceived in liberty and dedicated to the proposition that all men are created equal." Americans should "highly resolve . . . that this nation, under God, shall have a new birth of freedom; and that government of the people, by the people, and for the people, shall not perish from the earth." Delivered a little more than a month before Lee's surrender and the author's death, the *Second Inaugural* (p. 675) regarded the war as the righteous judgment of God on both North and South for the sin of slavery. The task before us, he said, was to proceed, "with malice toward none, with charity for all . . . to bind up the nation's wounds . . . to do all which may achieve and cherish a just and lasting peace among ourselves, and with all nations." Lincoln's humane and wise view of postwar policy made his death a tragic loss to the South.

Walt Whitman (p. 676) had brought out three editions of *Leaves of Grass* (p. 677) before the war began and had laid down his basic principles in those volumes. He espoused Emerson's doctrine of the divinity of man, and, prompted by his larger and warmer sympathies, applied it literally and concretely to all men. He espoused, too, Emerson's belief in a transcendental intuition, which fused perhaps indistinguishably in his mind with an inherited Quaker belief in the inner light. His

Quaker inheritance (which possibly was fully as important as the Emersonian influence) contributed also to his independence, his sense of brotherhood with all men, and his love of peace. His mysticism, which became more emphasized in his later life, seems a blend of Emerson, the Quakers, and the Orient. His celebration of the body, however, was derived from none of these sources: it shocked Emerson particularly and drove him to opposition.

Whitman was a great equalitarian—his very catalogues were symbols of the equalizing power of his democracy. The "Myself" of "Song of Myself," his longest poem, was Everyman. The experiences related in his poems were partly actual and partly imaginary. So great was his faculty of empathy that he could project himself into the personalities of others in a very real sense and thus become "the hounded slave" or "the mashed fireman." He took his stand for absolute equality; he desired nothing for himself which others could not have in the same measure. It was natural that such a complete democrat should oppose slavery, and equally natural that such a sensitive sympathizer with all men should not bear arms against the slave owner. The war wrought no change in Whitman's basic ideas and attitudes. He was still "the caresser of life," still "a Southerner soon as a Northerner." His war poems reveal no partisan rage like Whittier's or Timrod's, nor were they concerned with the issues of the war. He felt a profound compassion for all soldiers and the mothers of soldiers, whether Yankee or Rebel.

Aside from polemics and sectional rancor, with which he was not at all concerned, Whitman's *Drum-Taps* (p. 704) affords the richest account of the war to be found in our poetry. One group of poems conveys the excitement of the early enlistments—the scholar is torn from his school; the bridegroom, from his bride. Another group pictures military scenes as sharply as a camera, and more suggestively—the cavalrymen slumping in their saddles while the horses drink from a stream, the shadowy forms of men and horses around the campfire on a mountainside. Other poems describe hospital scenes with modern realism or reveal the poignant suffering of the mother just notified of her son's death.

Though the war contributed little to Whitman's ideas, and changed not at all his fundamental attitudes, it stimulated the poet and clarified and spiritualized his poetry. He was never again to sing so lustily (and as some thought, sensually) of the "jolly bodily phase." His poetry became more mystical. His greatest poem reflects these changes. "When Lilacs Last in the Door-yard Bloom'd" (p. 709) was written as an elegy on the death of Lincoln. Due emphasis is given to the grief of the poet, memorialized by "lilac and star and bird"; due emphasis is given also to the sorrow of the nation, the funeral procession, and the tolling of bells. But these details are the background of the poet's mystical exaltation in the hymn to death. In the poem's burning core, America and the war and Lincoln are forgotten.

Except in such moments of mystical release, Whitman never forgot America. "Thou Mother with Thy Equal Brood" (p. 720) celebrated the restoration of the Union and the new solidarity of "these states." "Democratic Vistas" revealed an acute concern for the evils, more and more apparent, in our rapidly developing industrialism. But in the poems after the Civil War, Whitman returned with an increasing frequency and a growing intensity to the mood of the Lincoln poem in his ultimate quest of a "passage to India." R.S.

II. Literary Trends

Varied though they are, the selections in this chapter are alike in being works intended to persuade. The appeals made during the bitter controversy about slavery and kindred matters, and during the consequent war, urged moderation or fierce opposition. And the poems of Walt Whitman, though they did not deal with slavery, eloquently preached the poet's doctrines about the individual and society. It was only natural that all such writings, since they were meant to influence opinions and beliefs, not only conformed to ways of thinking and feeling then current, but also took forms particularly likely to appeal to the tastes of the day. Some of the authors, nevertheless, created literature which was to have other than historical interest long after the controversy had ended.

Works dealing with the slavery controversy, naturally, were quite likely to reflect the spirit of the times by

being intemperate. Objective historians have, of course, made clear that neither side was blameless—that neither North nor South had a monopoly upon virtue. As was all too human, the people on each side felt that they were wholly right and their opponents wholly wrong. "Both [parties]," Lincoln observed in his *Second Inaugural*, "read the same Bible, and pray to the same God; and each invokes his aid against the other." Each party asked such aid with superb confidence that God and right were on its side and the forces of evil on the other. This belief often found expression in literary productions strongly tinged with melodrama—productions in which one group of characters was pictured as too villainous, another group too innocent, to remain quite believable to readers of later, less impassioned times. The acrimony and the anger which then seemed inevitable were eventually to appear extreme to readers far in time from the contest.

Modern readers are likely, also, to perceive a rather quaint quality in the two extremes of literary style which the taste of the day obviously approved. One extreme sort was literary, learned, allusive, usually solemn, often highly ornate and figurative. Such a style is represented in the passage in Grayson's *The Hireling and the Slave* which portrays child laborers in the North:

> There, unconcerned, the philanthropic eye
> Beholds each phase of human misery;
> Sees the worn child compelled in mines to slave
> Through narrow seams of coal, a living grave,
> Driven from the breezy hill, the sunny glade,
> By ruthless hearts, the drudge of labor made,
> Unknown the boyish sport, the hours of play,
> Stripped of the common boon, the light of day,
> Harnessed like brutes, like brutes to tug, and strain
> And drag, on hands and knees, the loaded wain . . . .

Such ink-stained phrases as "the philanthropic eye," "the breezy hill, the sunny glade," "unknown the boyish sport," "the common boon," and "the loaded wain" give the verse a tone which would be disastrous to a poem written to sway readers today. At the other extreme was a vernacular style, unlearned, earthy, humorous, homely in any figures of speech which it happened to employ. This style is represented by a passage expressing ideas somewhat similar to those of Grayson—the comment of W. T. Thompson's homespun humorous character, Major Jones, upon the sad plight of the charwomen of Philadelphia:

> The servant galls was scrubbin the doresteps of the houses and washin off the pavements in front of 'em. I looked at 'em as I rode along in the hack, and I couldn't help feelin sorry to see such butiful, rosy-cheeked white galls, down in the dirt and slop in the streets, doin work that is only fit for niggers. They say here they aint nothin but slewers—but I seed sum that I would tuck for respectable white galls if I had seed 'em in Georgia.

Here, in a style which was the Southern counterpart of Hosea Biglow's Yankee versifying, the author used ungrammatical phrases, misspellings, and words which, if they were found in argumentative writings today, would prejudice many against the author. Many of the works of the period just before and during the war, modern readers may feel, went too far—in passages or in wholes —in the direction of highfalutin language or of the vulgar language of democracy. We of the present period tend to prefer writings which, like those of Emerson and Thoreau—or of Lincoln—avoided both extremes.

Whether moderns like the two styles or not, they should have little trouble understanding the attitudes to which the two ways of writing appealed—attitudes which have coexisted for a long time. One attitude was that bookish learning provided the best clues to truth and virtue; the other was that experience and common sense taught men best what was true and virtuous. As far back as the 1720's and 1730's, the two kinds of appeal had been illustrated by Cotton Mather and Benjamin Franklin. The ideal author, Mather said, "could not have writ as he does if he had not read very much in his time." "And his composures," Mather went on, "are not only a cloth of gold but stuck with as many jewels as the gown of a Russian ambassador." Franklin's Widow Silence Dogood and Poor Richard, by contrast, depended upon the teachings of experience rather than the teachings of books, and tended to use the simple language of farm folk and mechanics. Later, the Jeffersonian aristocrat and the Jacksonian common man provided a similar contrast. In recent times, the opposing attitudes have again been exemplified—on the one hand by "brain trusters" and theorists in government, and on the other by "practical" men who have been chiefly schooled by

experience. The contrasting styles, in other words, dramatically represent two continuous American attitudes.

ORATORY

The chief instrument for dispute in the period, by general agreement at the time, was oratory. Rightly or wrongly, it was still assumed that nothing so swayed public opinion as speeches. The function now jointly performed by books, the newspapers, moving pictures, and the radio was then chiefly performed by speakers addressing public meetings or legislative bodies.

To be sure, all oratory—even the best—is likely to lose much of its force when, instead of being spoken, it is translated into print. The excitement of the occasion and the reactions of the audience are lost, as are any impressions made by the physical appearance of the speaker and by the sound of his voice. Those who saw massive, dark-browed Daniel Webster and heard his thunderous voice always were tremendously impressed (there was a saying that no human being was ever really so great as Webster appeared to be), and all who wrote of him in retrospect were sure that his great presence had much to do with his forensic power. Similarly, speeches delivered by even lesser men lost much of their power when they became printed instead of uttered words.

But modern readers find that there are barriers above and beyond the usual ones to appreciation of the oratory of the mid-century. The most formidable barrier is the style—or rather styles—of spoken discourse. In this field of literature, as in others, there were at the time two extremes. One was discoverable in the talks of local politicians delivered to neighbors and, at times, in the speeches of national figures. This extreme was parodied in an unsigned skit which went the rounds of the newspapers in the 1840's; it purported to be a speech of Candidate Earth, who wanted his backwoods neighbors to elect him sheriff. Said he:

> Now, gentlemen, don't you think they ought to make me sheriff? I say, if Bob Black has floated farther on a log, killed more Injuns, or stayed longer under water than I have, elect him; if not, I say what has he done to qualify him for the office of sheriff? Did any of you ever know him to call for a quart? I never did; I have known him to call for several half-pints in the course of a day, but I never did know him to step forward manfully and say, "Give us a quart of your best." Then I say again, what has Bob Black done to qualify him for sheriff?

In similar (though probably even less literate) language, Davy Crockett and other backwoods candidates regularly appealed for votes. And the very simplicity of the diction, its very freedom from adornment, recommended the speakers to constituents who believed they prized horse sense above "book larnin'." The other extreme was represented not only in the orations of men still remembered for their eloquence—Daniel Webster, Wendell Phillips, Henry Clay—but also of a number who have been pretty well forgotten: John Randolph, George McDuffie, Seargent S. Prentiss, William C. Preston, Thomas Corwin, and others. Often the style used by these men was to the style of Candidate Earth as the style of Grayson was to that of Major Jones.

At the time, even when their words were not heard but read, these orators were extraordinarily effective. Time after time, they moved audiences to scornful laughter, to tears, to cheers, and constantly they molded public opinion both in the centers of learning and in the backwoods territory of Candidate Earth. (Whether they admitted it or not, backwoods folk were awed by learning.) The usually calm Professor George Ticknor of Harvard supplied an instance when, the evening after he had heard a speech by Webster, he wrote an account of his reactions in a letter: "Three or four times I thought my temples would burst with the gush of blood . . . . When I came out I was almost afraid to come near him [Webster]. It seemed to me as if he was like the mount that might not be touched and that burned with fire. I was beside myself, and am so still." As one reads other comments upon orations of the period, one sees that this picture of the transported speaker and awestruck listeners is quite common.

Eloquence, many believed, was essentially like poetry. Irresistibly it mastered the speaker. "True eloquence," said Webster in 1826, in his speech on Adams and Jefferson, "comes, if it come at all, like the outbreaking of a fountain from the earth, or the bursting forth of volcanic fires, with spontaneous, original, native force." And the inspiration which so mastered the

speaker communicated itself to the audience. "By eloquence," said Bryant in his *Lectures on Poetry*—also in 1826, "I understand those appeals to our moral perceptions that produce emotion as soon as they are uttered. It is in these that the orator is himself affected with the feelings he would communicate, that his eyes glisten, and his frame seems to dilate, and his voice acquires an unwonted melody, and his sentences arrange themselves into a sort of measure and harmony, and the listener is chained in involuntary and breathless attention."

Some of the most admired passages in the oratory of the day, in consequence, were remarkably figurative and rhythmic—poetic prose of a fairly deep purple hue. Particularly admired, for instance, was the conclusion of Webster's most celebrated speech in the Senate, the "Reply to Hayne" of 1830:

> When my eyes shall be turned to behold for the last time the sun in heaven, may I not see him shining on the broken and dishonored fragments of a once glorious Union; on States dissevered, discordant, belligerent; on a land rent with civil feuds, or drenched, it may be, in fraternal blood! Let their last feeble and lingering glance rather behold the gorgeous ensign of the republic, now known and honored throughout the earth, still full high advanced, its arms and trophies streaming in their original lustre, not a stripe erased or polluted, nor a single star obscured, bearing for its motto, no such miserable interrogatory as "What is all this worth?" nor those other words of delusion and folly, "Liberty first and Union afterwards"; but everywhere, spread all over it in characters of living light, blazing on all its ample folds, as they float over the sea and the land, and in every wind under the whole heavens, that other sentiment, dear to every true American heart,—Liberty *and* Union, now and for ever, one and inseparable!

Customarily many who commended the great oratory of the day cited this passage or similar ones. Our appreciation for such flights is tepid. The reason, of course, is that there has been a change in taste during the last century.

In the years before the Civil War, there were already some portents of the change in taste which eventually was to take place. In 1857, Edward G. Parker, in his book *The Golden Age of American Oratory*, indicated that the age which he had in mind was then, after exactly a hundred years, about to end. He saw two reasons for its conclusion. First, what he called "the age of chivalry" was closing and, said he, "A brazen age, anti-sentimental, succeeds; an age when sordid, calculating interest rather than conscious merit dares to run after reason." Secondly, "the growing taste of our people for reading" was bringing into prominence a new kind of persuasive composition—"accurate rhetorical composition, rather than the dashing vigor and vivacious sparkle of spontaneous oratory."

Whether for the reasons he suggested or not, Parker's prophecy about the changes in American taste was, in general, to come true. Even as he wrote, some at least had begun to lose their liking for what Parker characterized as "the oratory of America . . . bursting from the lips of Prophets" and to prefer, as he feared they might, "the less contagious influences of logic, and figures and facts." By 1850, Webster, for instance, had developed what students of his work call his "mature style"—a style which, compared with his earliest efforts, had greatly gained in simplicity. Edwin P. Whipple, in "Daniel Webster as a Master of English Style" (1879), wrote: "The mature style of Webster is perfect of its kind, being in words the express image of his mind and character,—plain, terse, clear, forcible; and rising to the level of lucid statement and argument into passages of superlative eloquence only when his whole nature is stirred by some grand sentiment. . . ." Although there are passages of eloquence in Webster's great speech of March 7, 1850, most of the address is devoted to his version of history, to arguments justifying his attitude, set forth massively to be sure, but for the most part somewhat simply and somewhat moderately—at least for the times—and the address is excellently organized. Only in the most famous passage in the speech—that on "peaceable secession" does Webster's eminence in the florid school of oratory become obvious. John C. Calhoun, generally ranked below Webster at the time, may be preferred by most readers today. The reason was suggested by a comment made upon his style by a critic of oratory in 1849. "Mr. Calhoun," E. L. Magoon wrote in *Living Orators in America*, "flaunts in no gaudy rhetorical robes of scarlet

and gold, but comes into the forum clothed in the simplest garb, with firm hands grasping the reins of fancy, and intent only on giving a reason for the faith that is in him." Readers today admire the relatively simple dress and the tight grip upon the reins, and find Calhoun's logic and his clarity admirable.

LINCOLN

Although modern readers can endure reading the speeches of Webster and Calhoun, they will probably find more moving the work of the one speaker of the Golden Age of Oratory who, by general consent, has become a classic author—Abraham Lincoln. At least four of Lincoln's speeches—*Farewell to Springfield, First Inaugural, Gettysburg Address,* and *Second Inaugural Address* (see pp. 666-676)—whether one agrees or disagrees with their interpretation of history, were great utterances. Even though they are set down in print and read years after their delivery, these works have the stamp of great literature upon them.

A student of Lincoln's collected speeches will find that a surprising amount of his work is not slightly below but far below these masterpieces in excellence. His first speech, delivered in 1832 when, as a gangling, ill-dressed youth of twenty-three, he was running for the state legislature, went this way:

> I presume you-all know who I am. I am humble Abe Lincoln. I have been solicited by many friends to become a candidate for the legislature. My politics are short and sweet like the old woman's dance. I am in favor of a national bank. I am in favor of the internal improvements system, and a high protective tariff. These are my sentiments and political principles. If elected I shall be thankful. If not it will be all the same.

The speech, to be sure, is somewhat better than that of Candidate Earth, but clearly its eloquence is in a similar style. And many of Lincoln's later speeches, among them the historic debates with Douglas, now appear to have little more than a certain homespun straightforwardness, well adapted to public debate, to recommend them. At times, by contrast, especially during his early career, Lincoln indulged in spread-eagle melodramatic oratory as tawdry as any produced by speakers at the time. There was, for instance, a campaign speech of 1840, in which he said:

> I know that the great volcano at Washington, aroused and directed by the spirit that reigns there, is belching forth the lava of political corruption in a current broad and deep, which is sweeping with frightful velocity over the whole length and breadth of the land, bidding fair to leave unscathed no green spot or living thing; while on its bosom are riding, like demons on the wave of hell, the imps of the evil spirit, and fiendishly taunting all who dare to resist its destroying course with the hopelessness of their efforts; and knowing this, I cannot deny that all may be swept away. Broken by it, I, too, may be; bow to it, I never will. The probability that we may fall in the struggle ought not to deter us from the support of a cause we believe to be just. It shall not deter me. If ever I feel the soul within me elevate and expand to those dimensions not wholly unworthy of its Almighty Architect, it is when I contemplate the cause of my country, deserted by all the world beside, and I standing up boldly alone, hurling defiance at her victorious oppressors.

Clearly the figurative language here used was meant to appeal to the current taste for purple passages. But Lincoln did manage, at least in his later years, to achieve greatness as a composer of speeches. Many of his contemporaries did not particularly appreciate him. At the Gettysburg dedication, the speech generally admired was not Lincoln's but a two-hour showpiece, orotund, florid, full of allusions to ancient history, which was intoned by Edward Everett. The day after the dedication, November 20, 1863, many newspapers enthusiastically praised Everett's oration, but not until February 1865 did any commentator note, in print, that Lincoln's short speech had been a great utterance—and that commentator was an Englishman.

Just why Lincoln managed to steer away as he did from both the crude utterances of a small-town politician and the fustian elegance of the popular orator is something of a problem. The very fact that he, unlike many of the leaders of the day, was self-schooled probably was important. While others among his contemporaries had studied the classical rules and examples of

oratory in college, Lincoln had learned his art chiefly in frontier political debates and in clashes in law courts. Because he relied upon the teachings of experience, he shared the democratic belief in common sense and its direct expression, and that fact, too, was significant. Literary influences upon Lincoln, nevertheless, were important, and fortunately some of the most notable were those of authors who achieved forceful expression by means of simplicity and restraint—Robert Burns, William Shakespeare, and the translators of the Bible into the King James version. Finally, Lincoln's own character and feeling as they developed during the trying years of his Presidency were powerfully influential upon his thought and the form of its expression. As Edward Dewitt Jones remarks, somewhat flossily, in his study of orators, *Lords of Speech,* "The graces of an orator's presence, the charm of his voice and manner, are ephemeral; while the grandeur of his thoughts, the magnanimity of his soul and the soundness of his reasoning live after him. It is the substance of his speeches, together with the chaste beauty of a style which matches the sheer beauty of his spirit, that lifts Abraham Lincoln into the small and elect company of the world's supreme masters of public speech." Lincoln, despite the intemperance of the times in which he lived, was a temperate man and an extremely sincere man. He was also something of a poet. His utterances, therefore, could outlast both the crude mouthings of the folksy politicians and the highly ornate orations of less temperate, less sincere, and less poetic speakers of the age.

POETRY

Two passages of verse by James Russell Lowell, one published in 1845, the other in 1846, show how one author active in this period could use both the high style and the low style of poetry in persuasive compositions. Lines in "The Present Crisis" (1845) read:

> Slavery, the earth-born Cyclops, fellest of the giant brood,
> Son of brutish Force and Darkness, who have drenched the earth with blood,
> Famished in his self-made desert, blinded by our purer day,
> Gropes in yet unblasted regions for his miserable prey;—
> Shall we guide his gory fingers where our helpless children play?

The first of the *Biglow Papers,* the next year, had this stanza:

> Aint it cute to see a Yankee
> Take sech everlastin' pains,
> All to git the Devil's thankee
> Helpin' on 'em weld their chains?
> Wy, it's jest ez clear ez figgers,
> Clear ez one an' one make two,
> Chaps that make black slaves o' niggers
> Want to make wite slaves o' you.

Few other authors could switch at will, as their contemporary Lowell could, from one extreme of style to the other. In general the writers of the Civil War period tended toward one or the other of the two styles of popular appeal.

Some of the popular songs show how both styles might be adapted to a single tune, "John Brown's Body" and "The Battle Hymn of the Republic" (p. 662), for instance, as well as the two versions of "Dixie" (p. 660). Grayson and Timrod, although they heatedly disagreed about the definition of poetry, both followed the literary rather than the illiterate tradition in their verse. Grayson modeled his versification after what he called the "School of Dryden and Pope," writing his most representative poetry in heroic couplets. "I have faith," he wrote in his unpublished "Autobiography," "in the ancient classical models, the masters directly or indirectly of all the great poets of modern times." Timrod, by contrast, frankly acknowledged indebtedness to such authors as Milton, Wordsworth, and Tennyson. In some poems (see "Charleston," p. 657, and "Ode," p. 659), he used the simple ballad stanza or a slight adaptation; in perhaps more ("Ethnogenesis" and "The Cotton Boll") he employed the irregular ode form which had been employed by Wordsworth and Tennyson with marked success. But Grayson, disciple of Neoclassical poets, and Timrod, disciple of nineeteenth-century poets and Milton, were alike in using diction of a highly literary nature.

Whittier tried at times to write formidably literary verse, and his use of dialect in poetry was infrequent. Nevertheless, at his most effective he was a writer of songs which were relatively simple—almost in the man-

ner of folk songs—both in metrical form and in the kind of words used. The Quaker poet's country rearing, his brief schooling, and his particular admiration for the artless songs of Robert Burns all led him to write unpretentious poems. Never, it appears, did he give much consideration to matters of technique. His aim, as he stated it, was

> To paint, forgetful of the tricks of art,
> With pencil dipped alone in colors of the heart.

As a rule, therefore, no sign appeared of his striving for novelty of effect. All his life, his favorite measures were ballad measure, octosyllabics, and iambic pentameter—quite conventional forms of verse, and he used a vocabulary and figures of speech which were far from complex. His were "journalistic" poems which, because of their almost rustic directness and simplicity, appealed greatly to many untutored readers.

Whittier's songs resemble most other poems of the period, both literary and unliterary, proslavery and antislavery, in their depiction of the friends and the foes of the poet. Sure that his Quaker inner light had shown him what attitudes to take, Whittier conceived of the abolitionists as engaged in a "moral warfare," girded "in God's own might" and "in conflict with unholy powers," and he constantly pictured the struggle in such terms. Vouchsafed similar visions, as they believed, other poets on both sides were similarly intemperate. The author of a famous version of "Dixie" urged Southerners to battle "Till the spoilers are defeated,/Till the Lord's work is completed." Julia Ward Howe saw the Northern army clothed in righteousness and proclaimed that "God was marching on." Timrod saw the enemy as "the Goth," and confidently expected the Lord to release the Confederacy from "the great burthen of our country's wrong." For both North and South, it was as clear-cut as that. Such were the signs of bitter partisanship in many melodramatic poems.

WALT WHITMAN, WAR-BORN POET

Although, like other poets, he was a controversialist, Walt Whitman made no contribution worth noting to the argument about slavery. His poems about the Civil War are concerned with the experiences and the sufferings shared by men and women of both sides. However, Whitman found himself as a poet in the years when the nation was deeply engaged in the controversy about slavery, and he himself saw his own wartime experiences as the "final reasons-for-being" of his mature songs. Hence, despite the fact that he lived on and wrote on for many years after Appomattox, Whitman was in a very real sense a war-born poet. His poetry, though it seemed strange to readers when it first appeared, was, we now can see, molded by the literature being produced at the time he began to write. For instance, Emerson's poetry obviously left its mark. Perhaps even more important, the oratory and the styles of the 1840's and 1850's left their imprint upon the form of Whitman's poetry.

Whitman was like the orators of the day in that he wanted to preach to men the ways of righteous thinking and living. In notebooks which he filled when he was working toward the writing of *Leaves of Grass,* he voiced his determination to "elevate, enlarge, purify, deepen and make happy the attributes of the body and soul of man." Furthermore, as he considered how he would deliver this message to his countrymen, evidently he was not sure, for some time, whether his medium was to be oratory or poetry. His considering oratory was hardly surprising, since the accepted medium for social or religious preachments was the oration or the sermon, and he was fascinated all his life by public speaking and public speakers. Possibly his inability to succeed as an orator was an important factor leading to his final decision to become a poet. In his early New York days, so he said, Whitman "haunted the courts to witness notable trials, and . . . heard all the famous actors and actresses." Over the years, he listened to Webster, Garrison, Beecher, Clay, Everett, and Phillips, as well as less famous orators. His "Poem of Joys" contains an interesting description of the great speaker swaying his audience:

> O the orator's joys!
> To inflate the chest—to roll the thunder of the voice out from the ribs and throat,
> To make the people rage, weep, hate, desire, with yourself,
> To lead America—to quell America with a great tongue.

speare by Booth and Forrest which were then fashionable, and he himself loved to intone sonorous lines from the dramas while riding Broadway omnibuses, tramping with friends, and strolling by the seashore. He knew and greatly admired, too, literature which approximated the oratorical effect he wanted—the lecture-essays of Emerson, the songs of Ossian, translations of Greek and Latin dramas and epics, the exhortatory parts of the Bible, and their adaptations and paraphrases in sermons.

In the notes that Whitman wrote for his early works, there were passages which might have done for either lectures or poems. One scrap of paper bears the caption "Poem—Religious," and then, underneath this title is written "or lecture on Religion"; and one note, though it was headed "lecture," eventually was utilized as part of a poem. As a reciter of his own poetry, he attempted (though unfortunately with questionable success) to use the resonant tones, the modulations, the gesticulations of an old-school public speaker. As late as 1888, in his final Preface, he spoke of his art as a "new and national declamatory expression." There can be little question that the methods of oratory were important in shaping Whitman's style. In a note on "style" for his projected lectures he wrote: "besides direct addressing *to You* another leading trait of Lectures may well be—strong assertion —('I say') it is so?)—launched out with fire, or emphasis, or enthusiasm, or anger." This oratorical device occurs frequently in the poems, as in the line, "And I say to any man or woman, Let your soul stand cool and composed before a million universes." Other oratorical devices which are used time after time include apostrophes, rhetorical questions, aphorisms, exclamations, alliterative phrases, and parenthetical asides. Often the phrasal order is that of oratory—lines which loosely balance on both sides of a pause, or series of parallel structures all of which contribute to a periodic sentence. (See, for example, the opening stanza of "Out of the Cradle Endlessly Rocking," p. 700.) Such devices, in Whitman's poems, pretty regularly perform functions of rhymes and stanzas in more conventional poems: they hold lines together and set off units of thought.

The scheme of *Leaves of Grass* as a whole and the schemes of individual poems, moreover, have noteworthy resemblances to oratory. Whitman evidently hoped that the dynamic presence of a great orator—that it would, as he said, "possess, more than any other known book, the magnetism of living flesh and blood, sitting near the reader, & looking & talking." Like the collected works of a great orator, it would convey, in addition to the personality of the speaker, his gospel, developed and modulated in a number of individual compositions on varied topics. There is evidence, in the whole book, that Whitman attempted to unfold his beliefs in this fashion. In quite a few of the poems, too, there are organizations typically used by orators as well as by some poets—ideas developed by analogy, by passages of narrative, by comparison and contrast, and quite a number which are developed in the style of Emerson's lectures and poems.

But although eventually Whitman's poems, in their form, thus resembled oratory, even as he conceived of them they differed from oratory. In one of his self-criticisms the poet found fault with his method of composing and delivering lectures. "The trouble," he said, "is often the endeavor (from the habit of forming the rhythmic style of *Leaves of Grass*) involuntarily to preserve a sort of rhythm in the Lecture sentences,—It seems to me this rhythm, for them, is not only not necessary, but is often dangerous to their character-requirements—which, for speaking purposes, need to be abrupt. . . ." Whitman conceived of his free verse poems as "chants," more rhythmical than spoken discourses and corresponding, in some ways, to the arias or recitatives of operas. Toward his free verse, after starting as a quite conventional poet, he worked his way slowly. According to Emory Holloway, in his Introduction to *The Uncollected Prose and Poetry of Walt Whitman,* "he began versifying with the simplest of forms . . . then made use of more difficult stanza forms . . .; next he wrote a little blank verse . . . ; then he made private experiments with some of the very material he was to work over, through several years, for the 1855 edition of *Leaves of Grass*. . . ." When this first edition appeared, concludes Holloway, his verse was disciplined, "poise and sweeping rhythm were added, and a standard of line length was adopted which would fit the bold but delicate burden of his song." What he evolved was a form blending prose and poetry, which carried still further liberating tendencies in poetry which had been initiated by a num-

ber of his predecessors including, notably, Emerson and Thoreau. His lines, characteristically, corresponded to the grammatical-phrasings or at least the thought-phrasings of speech. His rhythms were, as he put it, "in a loose and free metre of his own, of an irregular length of lines, apparently lawless at first perusal, although on closer examination a certain regularity appears, like the recurrence of lesser and larger waves on the sea-shore, rolling in without intermission, and fitfully rising and falling." And he found, as later poets were to find, that patterns of repeated vowel and consonant sounds could do much to unify parts and wholes.

Whitman not only broke away from some of the conventions of versification; he also broke away from some of the conventions of style. He was distressed by "stock poetical touches" and by ornamentation as such in poetry. "*No ornaments!*" he sternly enjoined himself, "especially no ornamental adjectives, unless they have come molten hot, and imperiously prove themselves. No ornamental similes at all—not one. *perfect transparent clearness. . . .*" His dislike for what he called "drawing room poetry" led him, in general, to use relatively simple words and to avoid an excess of figurative language. His feelings about common speech led him to interject it into a style not then thought hospitable to it. Most orators who employed the more literary style, as we have seen, tended to disdain the use of words in the vernacular. Whitman, however, from the early days of his career, appreciated the force of humble speech, and praised such speech for growing out of human life. In his youth, he was an avid searcher after colloquial and slang phrases with life to them, and his early prose is dotted with expressions such as "loaded down to the guards," "they do say," "some pumpkins," and "a great place and *no* mistake." "Slang," he wrote, "profoundly consider'd, is the lawless germinal element, below all words and sentences, and behind all poetry, and proves a certain perennial rankness and protestantism in speech . . . an attempt of common humanity to escape from bald literalism, and express itself illimitably, which in highest walks produces poets and poems." He reveled in nicknames for men of different states (Kentucky Corn Crackers, Michigan Wolverines, Connecticut Wooden Nutmegs, etc.); in original place-names (Hog-eye, Lick-skillet, Rake-pocket, and Steal-easy, Texas, for instance); in the racy and imaginative phrases of bus drivers, laborers, railroad men, and boatmen. The result was that with the rolling periods and some of the more elegant diction characteristic of oratory, Whitman intermingled localisms, bits of slang, common talk. In Section 6 of "Song of Myself," for instance, along with sonorous and dignified lines comparable to those of oratory, occur lines like these:

> Or I guess it [the grass] is the handkerchief of the Lord,
> A scented gift and remembrancer designedly dropt. . . .
>
> * * *
>
> Kanuck, Tuckahoe, Congressman, Cuff. . . .
>
> * * *
>
> And now it seems to me the beautiful uncut hair of graves.
>
> * * *
>
> The smallest sprout shows there is really no death. . . .

To mingle such homely phrasings, as Whitman typically did, with the highfalutin style of heightened oratory represented a daring experiment.

These details about the form of Whitman's poetry suggest that in several ways he was a culmination of some important literary tendencies of his period. They may perhaps do more—suggest to modern readers ways of approach to him. They imply that he should be read differently from most poets—as a man with a message, as a chanting orator, as an experimenter with a form which blends poetry with prose and mingles the words of everyday talk with those of more formal literature. He should be read not only as a wartime poet of the past but also as a pioneer breaking a trail toward modern poetic achievements. W.B.

John Greenleaf Whittier

1807 • 1892

The background of John Greenleaf Whittier in more than one way helped make him one of the most effective battlers for abolition. Born on a farm near Haverhill, Massachusetts, educated in country schools, long a worker on his father's farm and at the cobbler's bench, he saw things through the eyes of a common man and his words were drawn from nature rather than art. From Robert Burns, his first and most important model, he learned a simple style of versifying which pleased ordinary readers. A member of a religious sect which had contributed many great opponents of the slave system, Whittier followed the promptings of his Quaker inner light to work zealously for reform.

For several decades Whittier devoted a large share of his energy to the antislavery cause. He was successful in practical politics, winning his own election to the Massachusetts legislature in 1835, acting as a lobbyist at the State House, and giving assistance to political leaders who were helpful to abolitionism. As a pamphleteer and as an editor of various periodicals, notably of the *National Era* (1845-1860), he attacked slavery ferociously. Finally, as a poet he composed fiery or touching songs which spoke directly to hosts of readers. His propagandistic verse, though far from great as poetry, was admirable as rhetoric. After broadside or newspaper publication, this work was brought together chiefly in *Poems Written During the Progress of the Abolition Question . . .* (1837), *Voices of Freedom*

Panel (l. to r.): Plantation life • Senate debate on the slavery question • In the cotton fields

(1846), *Songs of Labor and Other Poems* (1850), and *In War Time and Other Poems* (1863).

After the war, Whittier turned to a field of work in which he had already shown proficiency—the portrayal of New England. It was as a local colorist that he did his most distinguished writing. (See Chapter 5 for this phase of his career.)

The Complete Poetical and Prose Works, 7 vols, Boston, 1888-1889
• Whitman Bennett, Whittier, Bard of Freedom, Chapel Hill, 1941

The Moral Warfare

When Freedom, on her natal day,
Within her war-rocked cradle lay,
An iron race around her stood,
Baptized her infant brow in blood;
And, through the storm which round her swept,
Their constant ward and watching kept.

Then, where our quiet herds repose
The roar of baleful battle rose,
And brethren of a common tongue
To mortal strife as tigers sprung,
And every gift on Freedom's shrine
Was man for beast, and blood for wine!

Our fathers to their graves have gone;
Their strife is past, their triumph won;
But sterner trials wait the race
Which rises in their honored place;
A moral warfare with the crime
And folly of an evil time.

So let it be. In God's own might
We gird us for the coming fight,
And, strong in Him whose cause is ours
In conflict with unholy powers,
We grasp the weapons He has given,—
The Light, and Truth, and Love of Heaven.

1838

Massachusetts to Virginia

Whittier printed the following explanatory note with a later edition of the poem: "Written on reading an account of the proceedings of the citizens of Norfolk, Virginia, in reference to George Latimer, the alleged fugitive slave, who was seized in Boston without warrant at the request of James B. Grey, of Norfolk, claiming to be his master. The case caused great excitement North and South, and led to the presentation of a petition to Congress, signed by more than fifty thousand citizens of Massachusetts, calling for such laws and proposed amendments to the Constitution as should relieve the Commonwealth from all further participation in the crime of oppression. George Latimer himself was finally given free papers for the sum of four hundred dollars."

"Massachusetts to Virginia" is one of the most stirring of Whittier's poems against slavery. The use of place names, rich in association, is particularly effective.

The blast from Freedom's Northern hills, upon its Southern way,
Bears greeting to Virginia from Massachusetts Bay;
No word of haughty challenging, nor battle bugle's peal,
Nor steady tread of marching files, nor clang of horsemen's steel.

No trains of deep-mouthed cannon along our highways go;
Around our silent arsenals untrodden lies the snow;
And to the land-breeze of our ports, upon their errands far,
A thousand sails of commerce swell, but none are spread for war.

We hear thy threats, Virginia! thy stormy words and high
Swell harshly on the Southern winds which melt along our sky;
Yet, not one brown, hard hand foregoes its honest labor here,
No hewer of our mountain oaks suspends his axe in fear.

Wild are the waves which lash the reefs along St. George's bank;
Cold on the shores of Labrador the fog lies white and dank;

---

13 St. George's bank, off Newfoundland

Through storm, and wave, and blinding mist, stout are the hearts which man
The fishing-smacks of Marblehead, the sea-boats of Cape Ann.

The cold north light and wintry sun glare on their icy forms,
Bent grimly o'er their straining lines or wrestling with the storms;
Free as the winds they drive before, rough as the waves they roam,
They laugh to scorn the slaver's threat against their rocky home.

What means the Old Dominion? Hath she forgot the day
When o'er her conquered valleys swept the Briton's steel array?
How side by side, with sons of hers, the Massachusetts men
Encountered Tarleton's charge of fire, and stout Cornwallis, then?

Forgets she how the Bay State, in answer to the call
Of her old House of Burgesses, spoke out from Faneuil Hall?
When, echoing back her Henry's cry, came pulsing in each breath
Of Northern winds the thrilling sounds of "Liberty or Death!"

What asks the Old Dominion? If now her sons have proved
False to their fathers' memory, false to the faith they loved;
If she can scoff at Freedom, and its great charter spurn,
Must we of Massachusetts from truth and duty turn?

We hunt your bondmen, flying from Slavery's hateful hell;
Our voices, at your bidding, take up the bloodhound's yell;
We gather, at your summons, above our fathers' graves,
From Freedom's holy altar-horns to tear your wretched slaves!

Thank God! not yet so vilely can Massachusetts bow;
The spirit of her early time is with her even now;
Dream not because her Pilgrim blood moves slow and calm and cool,
She thus can stoop her chainless neck, a sister's slave and tool!

All that a sister State should do, all that a free State may,
Heart, hand, and purse we proffer, as in our early day;
But that one dark loathsome burden ye must stagger with alone,
And reap the bitter harvest which ye yourselves have sown!

Hold, while ye may, your struggling slaves, and burden God's free air
With woman's shriek beneath the lash, and manhood's wild despair;
Cling closer to the "cleaving curse" that writes upon your plains
The blasting of Almighty wrath against a land of chains.

Still shame your gallant ancestry, the cavaliers of old,
By watching round the chambles where human flesh is sold;
Gloat o'er the newborn child, and count his market value, when
The maddened mother's cry of woe shall pierce the slaver's den!

Lower than plummet soundeth, sink the Virginia name,
Plant, if ye will, your fathers' graves with rankest weeds of shame;
Be, if ye will, the scandal of God's fair universe;
We wash our hands forever of your sin and shame and curse.

A voice from lips whereon the coal from Freedom's shrine hath been,

---

16 **Marblehead . . . Cape Ann**, on the Massachusetts coast • 24 **Tarleton . . . Cornwallis**, commanders of the British army in Virginia in the American Revolution • 26 **Faneuil Hall**, in Boston, is famous as the scene of patriotic meetings • 27 **Henry's cry**, an allusion to Patrick Henry's "Speech in the Virginia Convention of Delegates," March 23, 1775 • 31 **great charter**, translating England's Magna Charta, refers here to the Declaration of Independence • 36 **altar-horns**, an allusion to I Kings 1 50-53, where Adonijah, fearing King Solomon, "caught hold on the horns of the altar," and was spared • 44 **which . . . sown** seems less than fair in view of Massachusetts' and New England's participation in the slave trade in colonial times • 47 **cleaving curse**, a reference to Deuteronomy 13 17: "And there shall cleave nought of the cursed thing to thine hand" • 50 **shambles**, strictly, a place where butcher's meat is sold or animals are slaughtered for meat • 53 **Lower . . . soundeth** echoes **The Tempest**, Act, III, sc iii, ll 101-102: "I'll seek him deeper than e'er plummet sounded/And with him there lie mudded" • 57 **lips . . . coal.** Compare Isaiah 6:6-7: "Then flew one of the seraphims unto me, having a live coal in his hand, which he had taken with the tongs from off the altar: And he laid it upon my mouth, and said, Lo, this hath touched thy lips; and thine iniquity is taken away, and thy sin purged"

Thrilled, as but yesterday, the hearts of Berkshire's mountain men:
The echoes of that solemn voice are sadly lingering still
In all our sunny valleys, on every wind-swept hill.

And when the prowling man-thief came hunting for his prey
Beneath the very shadow of Bunker's shaft of gray,
How, through the free lips of the son, the father's warning spoke;
How, from its bonds of trade and sect, the Pilgrim city broke!

A hundred thousand right arms were lifted up on high,
A hundred thousand voices sent back their loud reply;
Through the thronged towns of Essex the startling summons rang,
And up from bench and loom and wheel her young mechanics sprang!

The voice of free, broad Middlesex, of thousands as of one,
The shaft of Bunker calling to that of Lexington;
From Norfolk's ancient villages, from Plymouth's rocky bound
To where Nantucket feels the arms of ocean close her round;

From rich and rural Worcester, where through the calm repose
Of cultured vales and fringing woods the gentle Nashua flows,
To where Wachuset's wintry blasts the mountain larches stir,
Swelled up to Heaven the thrilling cry of "God save Latimer!"

And sandy Barnstable rose up, wet with the salt sea spray;
And Bristol sent her answering shout down Narragansett Bay!
Along the broad Connecticut old Hampden felt the thrill,
And the cheer of Hampshire's woodmen swept down from Holyoke Hill.

The voice of Massachusetts! Of her free sons and daughters,
Deep calling unto deep aloud, the sound of many waters!
Against the burden of that voice what tyrant power shall stand?
No fetters in the Bay State! No slave upon her land!

Look to it well, Virginians! In calmness we have borne,
In answer to our faith and trust, your insult and your scorn;
You've spurned our kindest counsels; you've hunted for our lives;
And shaken round our hearths and homes your manacles and gyves!

We wage no war, we lift no arm, we fling no torch within
The fire-damps of the quaking mine beneath your soil of sin;
We leave ye with your bondmen, to wrestle, while ye can,
With the strong upward tendencies and god-like soul of man!

But for us and for our children, the vow which we have given
For freedom and humanity is registered in heaven,
No slave-hunt in our borders,—no pirate on our strand!
No fetters in the Bay State,—no slave upon our land!

1843

Ichabod

In his collected poems Whittier supplied the following note to "Ichabod": "This poem was the outcome of the surprise and grief and forecast of evil consequences which I felt on reading the seventh of March speech of Daniel Webster in support of the 'compromise' and the Fugitive Slave Bill. No partisan or personal enmity dictated it. On the contrary my admiration of the splendid personality and intellectual power of the great senator was never stronger than when I laid down his speech, and, in one of the saddest moments of my life, penned my protest . . . in tones of stern and sorrowful rebuke."

The title is taken from I Samuel 4:21: "And she named the child Ichabod, saying, the glory is departed from Israel."

So fallen! so lost! the light withdrawn
Which once he wore!
The glory from his gray hairs gone
Forevermore!

Revile him not,—the Tempter hath
A snare for all;
And pitying tears, not scorn and wrath,
Befit his fall!

Oh, dumb be passion's stormy rage,
When he who might
Have lighted up and led his age,
Falls back in night.

Scorn! would the angels laugh, to mark
A bright soul driven,
Fiend-goaded, down the endless dark,
From hope and heaven!

Let not the land once proud of him
Insult him now,
Nor brand with deeper shame his dim,
Dishonored brow.

But let its humbled sons, instead,
From sea to lake,
A long lament, as for the dead,
In sadness make.

Of all we loved and honored, naught
Save power remains,—
A fallen angel's pride of thought,
Still strong in chains.

All else is gone; from those great eyes
The soul has fled:
When faith is lost, when honor dies,
The man is dead!

Then, pay the reverence of old days
To his dead fame;
Walk backward, with averted gaze,
And hide the shame!

1850

Barbara Frietchie

The story of "Barbara Frietchie" was told to Whittier in a letter by a Mrs. Southworth of Georgetown, D. C., whose account Whittier regarded as authentic. The historical authenticity of the narrative has been denied by Allen Tate, who remarks in his **Stonewall Jackson**: "Among the women . . . whom General Jackson never saw, was an old woman named Barbara Frietchie." But whether fact or myth, the story became in Whittier's hands one of the most successful ballads of the Civil War.

"Barbara Frietchie" was first printed in the **Atlantic Monthly**, October 1863.

Up from the meadows rich with corn,
Clear in the cool September morn,

The clustered spires of Frederick stand
Green-walled by the hills of Maryland.

Round about them orchards sweep,
Apple and peach tree fruited deep,

Fair as the garden of the Lord
To the eyes of the famished rebel horde,

On that pleasant morn of the early fall
When Lee marched over the mountain-wall;

Over the mountains winding down,
Horse and foot, into Frederick town.

Forty flags with their silver stars,
Forty flags with their crimson bars,

Flapped in the morning wind: the sun
Of noon looked down, and saw not one.

Up rose old Barbara Frietchie then,
Bowed with her fourscore years and ten;

Bravest of all in Frederick town
She took up the flag the men hauled down;

In her attic window the staff she set,
To show that one heart was loyal yet.

Up the street came the rebel tread,
Stonewall Jackson riding ahead.

Under his slouched hat left and right
He glanced; the old flag met his sight.

"Halt!"—the dust-brown ranks stood fast.
"Fire!"—out blazed the rifle-blast.

It shivered the window, pane and sash;
It rent the banner with seam and gash.

Quick, as it fell, from the broken staff
Dame Barbara snatched the silken scarf.

She leaned far out on the window-sill,
And shook it forth with a royal will.

"Shoot, if you must, this old gray head,
But spare your country's flag," she said.

A shade of sadness, a blush of shame,
Over the face of the leader came;

The nobler nature within him stirred
To life at that woman's deed and word;

"Who touches a hair of yon gray head
Dies like a dog! March on!" he said.

All day long through Frederick street
Sounded the tread of marching feet:

All day long that free flag tost
Over the heads of the rebel host.

Ever its torn folds rose and fell
On the loyal winds that loved it well;

And through the hill-gaps sunset light
Shone over it with a warm good-night.

Barbara Frietchie's work is o'er,
And the Rebel rides on his raids no more.

Honor to her! and let a tear
Fall, for her sake, on Stonewall's bier.

Over Barbara Frietchie's grave,
Flag of Freedom and Union, wave!

Peace and order and beauty draw
Round thy symbol of light and law;

And ever the stars above look down
On thy stars below in Frederick town!

1863

Laus Deo

Whittier supplied the following note to this poem: "On hearing the bells ring on the passage of the constitutional amendment abolishing slavery. The resolution was adopted by Congress, January 31, 1865. The ratification by the requisite number of states was announced December 18, 1865."

The Latin title means "Praise be to God." Writing with Hebraic fervor, Whittier drew extensively (as the footnotes will point out) upon the imagery and phraseology of the Old Testament.

It is done!
Clang of bell and roar of gun
Send the tidings up and down.
How the belfries rock and reel!
How the great guns, peal on peal,
Fling the joy from town to town!

Ring, O Bells!
Every stroke exulting tells
Of the burial hour of crime.
Loud and long, that all may hear,
Ring for every listening ear
Of Eternity and Time!

Let us kneel:
God's own voice is in that peal,
And this spot is holy ground.
Lord, forgive us! What are we,
That our eyes this glory see,
That our ears have heard the sound!

For the Lord
On the whirlwind is abroad;
In the earthquake He has spoken;
He has smitten with His thunder

---

19 Lord . . . whirlwind. Compare Job 38:1: "Then the Lord answered Job out of the whirlwind"

The iron walls asunder,
And the gates of brass are broken!

Loud and long
Lift the old exulting song;
Sing with Miriam by the sea,
He has cast the mighty down;
Horse and rider sink and drown;
"He hath triumphed gloriously!"

Did we dare,
In our agony of prayer,
Ask for more than He has done?
When was ever His right hand
Over any time or land
Stretched as now beneath the sun?

How they pale,
Ancient myth and song and tale,
In this wonder of our days,
When the cruel rod of war
Blossoms white with righteous law,
And the wrath of man is praise!

Blotted out!
All within and all about
Shall a fresher life begin;

Freer breathe the universe
As it rolls its heavy curse
On the dead and buried sin!

It is done!
In the circuit of the sun
Shall the sound thereof go forth.
It shall bid the sad rejoice,
It shall give the dumb a voice,
It shall belt with joy the earth!

Ring and swing,
Bells of joy! On morning's wing
Send the song of praise abroad!
With a sound of broken chains
Tell the nations that He reigns,
Who alone is Lord and God!

1865

William J. Grayson

1788 • 1863

Of the hundreds of books and pamphlets which make up proslavery literature the most readable today are probably those by William J. Grayson. As one of his biographers has said, Grayson "was a very temperate advocate of state rights, and a very amiable defender of Southern institutions." Calhoun doubtless had a sharper mind when it came to political analysis, and other Southern leaders loomed larger than Grayson in their day: William Harper (*Memoir on Slavery,* 1838), Thomas R. Dew (*Essay on Slavery,* 1849), George Fitzhugh (*Sociology for the South,* 1854), and Albert Taylor Bledsoe (*Essay on Liberty and Slavery,* 1856), to name a few

examples. Grayson, however, succeeded in condensing most of the favorite Southern arguments into short space and reasonably attractive form, so that he provides perhaps the most convenient view of the defense of the institution which nearly split the Union.

Grayson was a down-state South Carolinian, born in Beaufort District in 1788. From Columbia College, later the University of South Carolina, where he was graduated in 1809, he proceeded to law and politics. He sat in the state legislature, served two terms in the national House of Representatives, and from 1841 until 1853 was Collector of the Port of Charleston. In the conservative literary circles of Charleston he had a leading place as a contributor to the newspapers and to such magazines as *DeBow's Review* and the *Southern Literary Messenger.* Unlike Calhoun he rejected secession as an instrument to obtain what the South wanted, and a letter to Governor Seabrook, published in 1850, helped to halt a strong movement for separation. His Unionist sentiment, however, did not keep him from defending slavery, first in a series of essays published in the Charleston *Courier* and reprinted as *Letters to Curtius* (1851) and then in the poem for which he is best known today, *The Hireling and the Slave* (1854). He was also the author of a number of pamphlets and a biography of his friend and college classmate, James Louis Petigru. The last-named book appeared in 1866, three years after Grayson's death; he who reads it now can find between the lines its author's deep grief at the tragedy of the Civil War.

Like most of his Charleston contemporaries Grayson was somewhat old-fashioned in his literary tastes, happier with Dryden and Pope than with most of the poets of his own time. For reasons which he gives in his Preface he chose to write his best-remembered poem in heroic couplets. As a poet he can scarcely merit much attention. His ideas, however, were those of a class and a time which the serious student, observing the South of the present day, cannot afford to ignore. As Parrington has said, Grayson was "an intelligent and humane writer who might be blind to certain evils in slavery but whose eyes were open to the social ills that grew rankly in the muck of industrialism." Southern agrarianism still has its force as one of the recurrent protests against mechanization in American life. Its roots are to be found in the views of the planter aristocracy which Grayson ably represented.

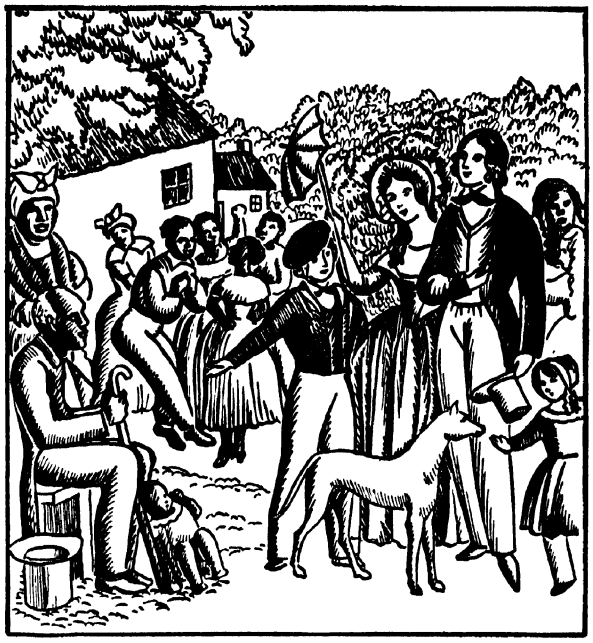
From



The Hireling and the Slave

Grayson's most ambitious poem consists of nearly sixteen hundred lines in heroic couplets, together with the Preface reprinted here and more than twenty pages of explanatory notes (of which the longest have been omitted). He argues that the state of the slave is essentially the same as that of the pauperized workman of England; both are forced to labor hard for their subsistence. The hireling, however, does not always obtain his reward, being subject to starvation, vice, brutality, military service, and expulsion from his home—evils which the slave ordinarily escapes. Part I describes the miserable condition of the free laborer and attacks the meddling of abolitionists. The portion here reprinted is that directed at Harriet Beecher Stowe, together with the concluding summary of the advantages of the slave system of economy. Part II is largely an account of the pleasures of plantation life, of which the first portion is selected here. Its pictures of cabin life, Christmas pleasures, dancing, and church worship are the type of thing which Southern writers of the postwar era recalled with nostalgia. Note that Grayson appealed strongly to nationalistic, anti-British feeling. In lines 743-758 of Part I he effectively presents the ruling-class philosophy, with its emphasis upon order and industry. The vitriolic treatment of Mrs. Stowe and the contemptuous allusions to "Utopian" reformers are significant revelations of the Southern mind in the 1850's.

The malignant abuse lavished on the slaveholders of America by writers in this country and England can be accounted for but in one way consistently with any degree of charitable consideration for the slanderers. They have no knowledge of the thing abused. They substitute an ideal of their own contriving for the reality. They regard slavery as a system of chains, whips, and tortures. They consider its abuses as its necessary condition, and a cruel master its fair representative. Mr. Clarkson took up the subject, originally, as a fit one for a college exercise in rhetoric, and it became a rhetorical exercise for life to himself and his followers. With these people the cruelty of slavery is an affair of tropes and figures. But they have dealt so long in metaphorical fetters and prisons, that they have brought themselves to believe that the Negroes work in chains and live in dungeons.

To prove the evils of slavery, they collect, from all quarters, its abuses, and show the same regard for fairness and common sense as they would do to gather all the atrocities of their own country committed by husbands and wives, parents and children, masters and servants, priest and people, and denounce these several relations in life in consequence of their abuses.

The laborer suffers wrong and cruelty in England, but they say it is against the law, against public opinion; he may apply to the courts for redress; these are open to him. Cruelty to the slave is equally against the law. It is equally condemned by public opinion; and as to the courts of law being open to the pauper hireling, we may remember the reply of Sheridan to a similar remark, Yes, and so are the London hotels: justice and a good dinner at a public house are equally within his reach. If, in consequence of the evils incident to hireling labor—because there are severe, heartless, grinding employers, and miserable, starving hirelings, it were proposed to abolish hireling labor, it would be quite as just and logical as the argument to abolish slavery because there are sufferings among slaves, and hard hearts among masters. The cruelty or suffering is no more a necessary part of the one system than of the other. Notwithstanding its abuses and miseries, the hireling system works beneficially with white laborers; and so also, notwithstanding hard masters, slavery, among a Christian people, is advantageous to the Negro. But to establish the

"Slave Labor," from an old cartoon. The companion picture, "Free Labor," appears on page 649.

hireling system with Africans would be as wise as to endeavor to bestow the constitutional government of England on Ashantee or Dahomey. In both cases there would be an equal amount of abstract truth and practical absurdity.

Slavery is that system of labor which exchanges subsistence for work, which secures a life-maintenance from the master to the slave, and gives a life-labor from the slave to the master. The slave is an apprentice for life, and owes his labor to his master; the master owes support, during life, to the slave. Slavery is the Negro system of labor. He is lazy and improvident. Slavery makes all work, and it insures homes, food, and clothing for all. It permits no idleness, and it provides for sickness, infancy, and old age. It allows no tramping or skulking, and it knows no pauperism.

This is the whole system substantially. All cruelty is an abuse; does not belong to the institution; is now pun-

---

Text: The Hireling and Slave, Chicora, and Other Poems, Charleston, 1856, the second edition of the title poem • **10 Clarkson,** Thomas Clarkson (1760-1846), English abolitionist, whose interest in slavery was roused by the subject set for a Latin essay competition at Cambridge, 1785 • **31 Sheridan,** Richard Brinsley Sheridan (1751-1816), English dramatist and statesman, famous for his championship of the poor • **48 Ashantee or Dahomey,** Negro kingdoms in West Africa, now colonial dependencies of Great Britain and France, respectively

ished, and may be in time prevented. The abuses of slavery are as open to all reforming influences as those of any other civil, social, or political condition. The improvement in the treatment of the slave is as marked as in that of any other laboring class in the world. If it be true of the English soldier or sailor that his condition has been ameliorated in the last fifty years, it is quite as true of the Negro.

If slavery is subject to abuses, it has its advantages also. It establishes more permanent, and, therefore, kinder relations between capital and labor. It removes what Stuart Mill calls "the widening and imbittering feud between the class of labor and the class of capital." It draws the relation closer between master and servant. It is not an engagement for days or weeks, but for life. There is no such thing with slavery as a laborer for whom nobody cares or provides. The most wretched feature in hireling labor is the isolated, miserable creature who has no home, no work, no food, and in whom no one is particularly interested. *This is seen among hirelings only.*

The sale of slaves is thought to be a great evil to the slave. But what is it substantially more than a transfer of labor from one employer to another? Is this an evil to the laborer? Would it be considered an evil by the European hireling if the laws required every master, before he dismissed his workmen, to secure to them another employer? Would it be an evil to the hireling to be certain of obtaining work—to be safe from the misery of having no employer, no work, while he is starving for bread? The sale of the slave is the form in which the laws secure the slave from this misery of the hireling—secure to him a certainty of employment and a certainty of subsistence. The hireling has neither

I do not say that slavery is the best system of labor, but only that it is the best for the Negro in this country In a nation composed of the same race or similar races, where the laborer is intelligent, industrious, and provident, money-wages may be better than subsistence. Even under all advantages there are great defects in the hireling system, for which, hitherto, no statesman has discovered an adequate remedy. In hireling states there are thousands of idlers, trampers, poachers, smugglers, drunkards, and thieves, who make theft a profession. There are thousands who suffer for want of food and clothing, from inability to obtain them. For these two classes—those who will not work, and those who cannot—there is no sufficient provision. Among slaves there are no trampers, idlers, smugglers, poachers, and none suffer from want. Every one is made to work, and no one is permitted to starve. Slavery does for the Negro what European schemers in vain attempt to do for the hireling. It secures work and subsistence for all. It secures more order and subordination also. The master is a Commissioner of the Poor on every plantation, to provide food, clothing, medicine, houses, for his people. He is a police-officer to prevent idleness, drunkeness, theft, or disorder. I do not mean by formal appointment of law, but by virtue of his relation to his slaves. There is, therefore, no starvation among slaves. There are, comparatively, few crimes. If there are paupers in slave states, they are the hirelings of other countries, who have run away from their homes. Pauperism began with them when serfage was abolished.

But you must confess, it is said, that slavery is an evil. True enough; in the same sense in which the hireling's hard labor is an evil. But the poet tells us that there are worse things in the world than hard labor, "withouten that would come a heavier bale," and so there are worse things for the Negro than slavery in a Christian land. Archbishop Hughes, in his late visit to Cuba, asked the Africans if they wished to return to their native country; the answer was always *no.* If the African is happier here than in his own country, can we say that, for him, the establishment of slavery is an evil? If the master is contented with his part in the system, with what reason can we regard it as an evil, so far as he is concerned? Slaves and masters are equally satisfied. The discontented are those who are neither.

What more can be required of slavery, in reference to the Negro, than has been done? It has made him, from

12 Mill, John Stuart Mill (1806-1873), English writer on politics and economics. His Principles of Political Economy (1848) contains numerous comments to this effect, but the editors have not located the exact sentence quoted • 54 order and subordination. "One of the best arrangements for the relief of the hireling laborer is the provision made in France of houses where the children of laborers are taken in when the laborers go to work in the morning, are carefully attended during the day, and restored to the parents on their return at night. A similar provision for the care of children is found on every plantation "—Grayson • 67 the poet, James Thomson (1700-1748), in The Castle of Indolence (1748) • 71 Hughes, John Hughes (1797-1864), first archbishop of the Roman Catholic archdiocese of New York

a savage, an orderly and efficient laborer; it supports him in comfort and peace; it restrains his vices; it improves his mind, morals, and manners; it instructs him in Christian knowledge.

But the quarrel is with the master, and the design is to calumniate and injure him. And why this attack on the master? Who, among its pretended friends, will dare to say that they have done for the African race what the slaveholders of North America have done and are doing? What Abolitionist has bestowed on the Negro the same enduring patience, the same useful education, the same care and attendance? Who among them has done, or given, or sacrificed as much? Under the master's care, the miserable black savage has been fed, clothed, instructed in useful arts, and made an important contributor to the business and enjoyments of the world. What have the Abolitionists done, what have they given, for the Negro race? They use the slave for the purposes of self-glorification only, indifferent about his present or future condition. They are ambitious to bring about a great social revolution—what its effects may be they do not care to inquire.

All Christians believe that the affairs of the world are directed by Providence for wise and good purposes. The coming of the Negro to North America makes no exception to the rule. His transportation was a rude mode of emigration; the only practicable one in his case; not attended with more wretchedness than the emigrant ship often exhibits even now, notwithstanding the passenger law. What the purpose of his coming is we may not presume to judge. But we can see much good already resulting from it—good to the Negro in his improved condition; to the country whose rich fields he has cleared of the forest, and made productive in climates unfit for the labor of the white man; to the Continent of Africa in furnishing, as it may ultimately, the only means for civilizing its people.

The end of slavery, then, would seem to be, present good to the slave himself, to the country in which he labors and the world at large, and future good to his race. Whether Mr. Clarkson or Lord Carlisle approve or disapprove of the mode in which it has pleased divine Providence to bring all this about, the event will probably be the same. It may be doubted whether these gentlemen and their friends could have administered the affairs of the world more wisely, whatever our opinion may be of their wisdom or benevolence. As they will never have the power to try, this must remain among the other unsettled questions that perplex the ingenuity of mankind.

There is, however, a plain, practicable mode in which these anti-slavery zealots may confer freedom on thousands, year after year, without offense to any party. The plan is simple and easy. Let them show their sympathy for the Negro, not by eloquent speeches, but more eloquent acts; not with sentiment, but with sovereigns. They can buy any number of Negroes and carry them where they please. For such a purpose the government would not object. Efficient laborers are wanted in the West Indies. Here is a ready way to procure them. They may, in this manner, bestow freedom on many of the slaves of America, confer a benefit on their colonies, and gratify their own excited sensibilities with something more profound than unprofitable words. They feel profoundly for the Negro; let them feel to the amount of a million a year. This would be better than bringing Coolies from Asia and Negroes from Africa by a system of very doubtful character. It would convince the world that their sympathy is an honest one, and not the offspring of vanity or arrogance.

An ingenious lady of South Carolina, in a very admirable letter, has made a similar proposal to the Duchess of Sutherland. But Her Grace is a near relation of the priest in the fable, who refused a half crown to a suppliant, but was ready enough to give him a blessing. The Abolitionists all belong to this benevolent class of world-menders, who are willing at all times to help every body, if it cost them no more than pretty phrases.

In the remarks made in reference to the condition of the hireling in Europe—of England especially—I have no feeling but compassion for the unfortunate paupers, and intend no reproach to their country. I venerate

---

41 Lord Carlisle, G. W. F. Howard (1802-1864), seventh Earl of Carlisle. He was one of the philanthropists to whom Mrs. Stowe sent copies of Uncle Tom's Cabin and who entertained her when she visited England in 1853 • 73 Duchess of Sutherland, Harriet Elizabeth Georgiana Leveson-Gower (1806-1868), wife of the second Duke of Sutherland. After reading Uncle Tom's Cabin she led a group of prominent Englishwomen in the framing of An Affectionate and Christian Address (1853), a petition signed by over 500,000 women urging their American sisters to work for the abolition of slavery

England as the great mother of nations, as our teacher in law, literature, civil and political liberty. The facts relating to the poverty, vice, brutality, and ignorance of the British laborer are taken, as may be seen from the notes attached, from English authorities; they can be multiplied a hundred fold. In adverting to them, I have merely desired to show that there is a poor and suffering class in all countries, the richest and most civilized not excepted—laborers who get their daily bread by daily work, and that the slave is as well provided for as any other. The poor we shall have with us always; and whether the poor hireling or the poor slave is most the object of pity or subject of distress, is the only question proposed, and the true one at issue.

In comparing their several conditions, no contempt is implied, certainly none intended for the situation of the hireling poor. All honest labor is worthy of honor, that of the faithful slave not less so than any other. Moralists are accustomed to weigh the advantages and evils of the highest and lowest, the palace and cottage; what forbids us to do so with the good and ill of the two humblest stations of civilized life?

It may be thought unnecessary to invite public attention again to the subject of slavery. But if the subject be trite, it is also of incalculable and unceasing interest. I have endeavored to diversify the mode, if not the matter of the argument, by throwing the remarks offered into verse. I have done so, not only for the reason assigned, but with the additional purpose of offering some variety to the poetic forms that are almost universally prevalent. The poetry of the day is, for the most part, subtile and transcendental in its character. Every sentiment, reflection, or description is wrought into elaborate modes of expression from remote and fanciful analogies. The responses of the Muses have become as mystical and sometimes as obscure as those of more ancient oracles, and disdain the older and homelier forms of English verse.

It has occurred to me that a return to the more sober style of an earlier period may not be an unreasonable experiment on the public taste. The fashion in dress and furniture now and then goes back a century or two; why not the fashion of verse? The school of Dryden and Pope is not entirely forgotten. May we not imitate the poetry of Queen Anne's time as well as the tables and chairs? The common measure of that period, applied to a didactic subject, may diversify the dishes presented to the public, and provide for its appetite the same kind of relief that bread and butter or beef and pudding would offer after a long indulgence in more refined and elaborate dishes. The most fastidious appetite may tolerate an occasional change of diet, and exchange dainties now and then for plainer fare.

FROM PART FIRST

There Stowe, with prostituted pen, assails
One half her country in malignant tales;
Careless, like Trollope, whether truth she tells,
And anxious only how the libel sells,
To slander's mart she furnishes supplies,
And feeds its morbid appetite for lies
On fictions fashioned with malicious art,
The venal pencil, and malignant heart,
With fact distorted, inference unsound,
Creatures in fancy, not in nature found—
Chaste Quadroon virgins, saints of sable hue,
Martyrs, than zealous Paul more tried and true,
Demoniac masters, sentimental slaves,
Mulatto cavaliers, and Creole knaves—
Monsters each portrait drawn, each story told!
What then? The book may bring its weight in gold;
Enough! upon the crafty rule she leans,
That makes the purpose justify the means,
Concocts the venom, and, with eager gaze,
To Glasgow flies for patron, pence, and praise,
And for a slandered country finds rewards
In smiles or sneers of duchesses and lords.

For profits and applauses poor as these,
To the false tale she adds its falser Keys

603 **Trollope,** Mrs Frances M. Trollope (1780-1863), English writer, author of **Domestic Manners of the Americans** (1832), a book much resented in the United States • 620 **To Glasgow . . . praise.** "Among her profits for Uncle Tom, Mrs Stowe received a penny apiece subscription in Scotland from the laboring people, who starve sometimes for the want of potatoes"—Grayson • 622 **In smiles . . . lords.** In a long note Grayson suggests that Mrs. Stowe has overlooked cannibalism as a charge against the slaveholders "It will be as authentic as the rest of her facts, and as readily believed by her Northern and European readers" • 624 **Keys.** "Mrs Stowe has published what she calls a Key to her tale It is a compilation of all the slanders and crimes among slaveholders; just as she would write a story denouncing matrimony, and make a Key, from the courts or gossiping chronicles, of all the cruelties, murders, and adulteries of husbands and wives, representing the crimes as the normal condition of the relation."—Grayson

Of gathered slanders—her ignoble aim,
With foes to traffic in her country's shame.

Strange power of nature, from whose efforts flow
Such diverse forms as Nightingale and Stowe!
One glares a torch of discord; one a star
Of blessing shines amid the wrecks of war;
One prone to libel; one to deeds of love;
The vulture-spirit one, and one the dove;
In various joys their various natures deal,
One leaves her home to wound it, one to heal;
That to expose its sorrows, not deplore;
To help and cheer, this seeks a foreign shore.

Far from her country, where Marmora flows,
On Mercy's errand England's daughter goes,
To tend the suffering sick with woman's care,
To snatch the bleeding soldier from despair;
Bend o'er his couch, his languid head sustain,
With tender hand assuage the pangs of pain,
Watch o'er the dying moments of the brave,
And smooth, at least, his passage to the grave;
Love's labor this, and—her's no common fame!
With the heart's homage millions bless her name.

Not such with Stowe, the wish or power to please,
She finds no joys in gentle deeds like these;
A moral scavenger, with greedy eye,
In social ills her coarser labors lie;
On fields where vice eludes the light of day,
She hunts up crimes as beagles hunt their prey;
Gleans every dirty nook—the felon's jail,
And hangman's mem'ry, for detraction's tale,
Snuffs up pollution with a pious air,
Collects a rumor here, a slander there;
With hatred's ardor gathers Newgate spoils,
And trades for gold the garbage of her toils.

In sink and sewer thus, with searching eye,
Through mud and slime unhappy wretches pry;
In fetid puddles dabble with delight,
Search every filthy gathering of the night;
Fish from its depths, and to the spacious bag
Convey with care the black, polluted rag;
With reeking waifs secure the nightly bed,
And turn their noisome stores to daily bread.

These use the Negro, a convenient tool,
That yields substantial gain or party rule,
Gives what without it they could never know,
To Chase distinction, courtly friends to Stowe,
To Parker, themes for miracles of rant,
And Beecher, blesses with new gifts of cant.
The master's task has been the black to train,
To form his mind, his passions to restrain;
With anxious care and patience to impart
The knowledge that subdues the savage heart,
To give the Gospel lessons that control
The rudest breast, and renovate the soul—
Who does, or gives as much, of all who raise
Their sland'rous cry for foreign pence or praise;
Of all the knaves who clamor and declaim
For party power or philanthropic fame,
Or use the Negro's fancied wrongs and woes
As pretty themes for maudlin verse or prose?

Taught by the master's efforts, by his care
Fed, clothed, protected many a patient year,
From trivial numbers now to millions grown,
With all the white man's useful arts their own,
Industrious, docile, skilled in wood and field,
To guide the plow, the sturdy axe to wield,
The Negroes schooled by slavery embrace
The highest portion of the Negro race;
And none the savage native will compare,
Of barbarous Guinea, with its offspring here.

If bound to daily labor while he lives,
His is the daily bread that labor gives;
Guarded from want, from beggary secure,
He never feels what hireling crowds endure,
Nor knows, like them, in hopeless want to crave,
For wife and child, the comforts of the slave,
Or the sad thought that, when about to die,
He leaves them to the cold world's charity,

---

628 **Nightingale, Florence** Nightingale (1820-1910), who attained world-wide renown by organizing the British military hospital system in the Crimean War (1854-1856) • 637 **Marmora,** the inland sea on which Istanbul is situated, between the Dardanelles and the Bosporus • 670 **Chase,** Salmon P Chase (1808-1873), antislavery leader who was governor of Ohio at the time Grayson wrote • 671 **Parker,** Theodore Parker (1810-1860), Boston clergyman, an active agent in assisting slaves to escape from the South • 672 **Beecher,** Henry Ward Beecher (1813-1887), Brooklyn clergyman, brother of Mrs. Stowe, and long active in the antislavery crusade

And sees them slowly seek the poor-house door—
The last, vile, hated refuge of the poor.

Still Europe's saints, that mark the motes alone
In other's eyes, yet never see their own,
Grieve that the slave is never taught to write,
And reads no better than the hireling white;
Do their own plowmen no instruction lack,
Have whiter clowns more knowledge than the black?
Has the French peasant, or the German boor,
Of learning's treasure any larger store;
Have Ireland's millions, flying from the rule
Of those who censure, ever known a school?
A thousand years and Europe's wealth impart
No means to mend the hireling's head or heart;
They build no schools to teach the pauper white,
Their toiling millions neither read nor write;
Whence, then, the idle clamor when they rave
Of schools and teachers for the distant slave?

And why the soft regret, the coarse attack,
If Justice punish the offending black?
Are whites not punished? When Utopian times
Shall drive from earth all miseries and crimes,
And teach the world the art to do without
The cat, the gauntlet, and the brutal knout,
Banish the halter, galley, jails, and chains,
And strip the law of penalties and pains;
Here, too, offense and wrong they may prevent,
And slaves, with hirelings, need no punishment:
Till then, what lash of slavery will compare
With the dread scourge that British soldiers bear?
What gentle rule, in Britain's Isle, prevails,
How rare her use of gibbets, stocks, and jails!
How much humaner than a master's whip,
Her penal colony and convict ship!
Whose code of law can darker pages show,
Where blood for smaller misdemeanors flow?
The trifling theft or trespass, that demands
For slaves light penance from a master's hands,
Where Europe's milder punishments are known,
Incurs the penalty of death alone.

And yet the master's lighter rule insures
More order than the sternest code secures;
No mobs of factious workmen gather here,
No strikes we dread, no lawless riots fear;
Nuns, from their convent driven, at midnight fly,
Churches, in flames, ask vengeance from the sky,
Seditious schemes in bloody tumults end,
Parsons incite, and senators defend,
But not where slaves their easy labors ply,
Safe from the snare, beneath a master's eye;
In useful tasks engaged, employed their time,
Untempted by the demagogue to crime,
Secure they toil, uncursed their peaceful life,
With labor's hungry broils and wasteful strife.
No want to goad, no faction to deplore,
The slave escapes the perils of the poor.

FROM PART SECOND

Where hireling millions toil, in doubt and fear,
For food and clothing all the weary year,
Content and grateful if their masters give
The boon they beg—to labor and to live;
While dreamers task their idle wits to find
A short-hand method to enrich mankind,
And Fourier's scheme or Owen's plans entice
Expectant thousands with some deep device
For raising wages, for abating toil,
And reaping crops from ill-attended soil:
If, while the anxious multitudes appear,
Now glad with hope, now yielding to despair,
A seraph form, descending from the skies,
In mercy sent, should meet their wond'ring eyes,

---

704 **refuge . . . poor.** "None submit to entering the poor-house except in extreme want. Some are hardly able to walk before they will apply.—London Labor, etc."—Grayson • 720 **schools . . . slave.** Grayson cites some statements regarding illiteracy in Great Britain and France and insists that slaves learn to read if they wish and are able to do so • 730 **punishment.** In 1846, says Grayson, 2468 persons were whipped in England. His note compares such punishment with that of slaves • 747 **Nuns . . . fly.** "A convent was destroyed by the mob near Boston. Churches, there and elsewhere have been burned by rioters. Violence and outrage are increasing yearly at the North. In Boston, lately, an officer of the federal government was murdered, while in the discharge of his duty, by a gang of white and black ruffians, instigated by men of wealth and by clergymen."—Grayson. The allusions are to the burning of an Ursuline convent in Charlestown in 1834 and to the Anthony Burns affair of 1854. Anti-Catholic feeling was strong at the time Grayson wrote, and violent interference with the enforcement of the Fugitive Slave Law was common • 756 **strife.** "The late Preston strike lost to the parties—masters and workmen—over two millions of dollars, and ended where it began."—Grayson. A seven months' lockout of the cotton-spinners at Preston, in Lancashire, England, in 1853-1854, is here referred to • 765 **Fourier's . . . plans,** allusions to the socialism of F. M. C. Fourier (1772-1837), whose ideas were adopted at Brook Farm and elsewhere in the 1840's, and of Robert Owen (1771-1858), who in 1824-1828 had attempted to found an ideal community at New Harmony, Indiana

And, smiling, offer to each suppliant there
The promised good that fills the laborer's prayer—
Food, clothing, freedom from the wants, the cares,
The pauper hireling ever feels or fears;
And, at their death, these blessings to renew,
That wives and children may enjoy them too,
That, when disease or age their strength impairs,
Subsistence and a home should still be theirs—
What wonder would the gracious boon impart,
What grateful rapture swell the peasant's heart!
How freely would the hungry list'ners give
A life-long labor thus secure to live!

And yet the life, so unassailed by care,
So blessed with moderate work, with ample fare,
With all the good the starving pauper needs,
The happier slave on each plantation leads;
Safe from harassing doubts and annual fears,
He dreads no famine in unfruitful years;
If harvests fail from inauspicious skies,
The master's providence his food supplies;
No paupers perish here for want of bread,
Or lingering live, by foreign bounty fed;
No exiled trains of homeless peasants go,
In distant climes, to tell their tales of woe:
Far other fortune, free from care and strife,
For work, or bread, attends the Negro's life,
And Christian slaves may challenge as their own,
The blessings claimed in fabled states alone—
The cabin home, not comfortless, though rude,
Light daily labor, and abundant food,
The sturdy health that temperate habits yield,
The cheerful song that rings in every field,
The long, loud laugh, that freemen seldom share,
Heaven's boon to bosoms unapproached by care,
And boisterous jest and humor unrefined,
That leave, though rough, no painful sting behind;
While, nestling near, to bless their humble lot,
Warm social joys surround the Negro's cot,
The evening dance its merriment imparts,
Love, with his rapture, fills their youthful hearts,
And placid age, the task of labor done,
Enjoys the summer shade, the winter sun,
And, as through life no pauper want he knows,
Laments no poor-house penance at its close.

Safe in Ambition's trumpet call to strife,
No conscript fears harass his quiet life,

While the crushed peasant bleeds—a worthless thing,
The broken toy of emperor or king;
Calm in his peaceful home, the slave prepares
His garden-spot, and plies his rustic cares;
The comb and honey that his bees afford,
The eggs in ample gourd compactly stored,
The pig, the poultry, with a chapman's art,
He sells or barters at the village mart,
Or, at the master's mansion, never fails
An ampler price to find and readier sales.

There, when December's welcome frosts recall
The friends and inmates of the crowded hall,
To each glad nursling of the master's race
He brings his present, with a cheerful face
And offered hand—of warm, unfeigning heart,
In all his master's joys he claims a part,
And, true as clansman to the Highland chief,
Mourns every loss, and grieves in all his grief;
When Christmas now, with its abundant cheer
And thornless pleasure, speeds the parting year,
He shares the common joy—the early morn
Wakes hunter, clamorous hound, and echoing horn,
Quick steps are heard, the merry season named,
The loiterers caught, the wonted forfeit claimed,
In feasts maturing busy hands appear,
And jest and laugh assail the ready ear;
Whose voice, than his, more gayly greets the dawn,

Whose foot so lightly treads the frosty lawn,
Whose heart as merrily, where mirth prevails,
On every side the joyous season hails?
Around the slaughtered ox—a Christmas prize,
The slaves assembling stand with eager eyes,
Rouse, with their dogs, the porker's piercing cry,
Or drag its squealing tenant from the sty;
With smile and bow receive their winter dues,
The strong, warm clothing and substantial shoes,
Blankets adorned with stripes of border red,
And caps of wool that warm the woollier head;
Then clear the barn, the ample area fill,
In the gay jig display their vigorous skill;
No dainty steps, no mincing measures here—
Ellsler's trained graces—seem to float in air,
But hearts of joy and nerves of living steel,
On floors that spring beneath the bounding reel;
Proud on his chair, with magisterial glance
And stamping foot, the fiddler rules the dance;
Draws, if he nods, the still unwearied bow,
And gives a joy no bearded bands bestow;
The triple holiday, on angel wings,
With every fleeting hour a pleasure brings;
No ennui clouds, no coming cares annoy,
Nor wants nor sorrows check the Negro's joy.

His, too, the Christian privilege to share
The weekly festival of praise and prayer;
For him the Sabbath shines with holier light,
The air grows balmier, and the sky more bright;
Winter's brief suns with warmer radiance glow,
With softer breath the gales of autumn blow,
Spring with new flowers more richly strews the ground,
And summer spreads a fresher verdure round;
The early shower is past; the joyous breeze
Shakes patt'ring rain-drops from the rustling trees,
And with the sun, the fragrant offerings rise
From Nature's censers to the bounteous skies;
With cheerful aspect, in his best array,
To the far forest church he takes his way;
With kind salute the passing neighbor meets,
With awkward grace the morning traveler greets,
And joined by crowds, that gather as he goes,
Seeks the calm joy the Sabbath morn bestows.
There no proud temples to devotion rise,
With marble domes that emulate the skies,
But bosomed deep in ancient trees, that spread
Their limbs o'er mouldering mansions of the dead,
Moss-cinctured oaks and solemn pines between,
Of modest wood, the house of God is seen,
By shaded springs, that from the sloping land
Bubble and sparkle through the silver sand,
Where high o'er arching laurel blossoms blow,
Where fragrant bays breathe kindred sweets below,
And elm and ash their blended arms entwine
With the bright foliage of the mantling vine:
In quiet chat, before the hour of prayer,
Masters and slaves in scattered groups appear;
Loosed from the carriage, in the shades around,
Impatient horses neigh and paw the ground;
No city discords break the silence here,
No sounds unmeet offend the listener's ear;
But rural melodies of flocks and birds,
The lowing, far and faint, of distant herds,
The mocking-bird, with minstrel pride elate,
The partridge whistling for its absent mate,
The thrush's solitary notes prolong,
Bold, merry blackbirds swell the general song;
The crested cardinal, of scarlet hue,
The jay, with restless wing of softer blue,
The cawing crow—upon the loftiest pine
Cautious and safe—their various voices join.

When now the pastor lifts his earnest eyes,
And hands outstretched, a suppliant to the skies,
No rights of pomp or pride beguile the soul,
No organs peal, no clouds of incense roll,
But, line by line, untutored voices raise,
Like the wild birds, their simple notes of praise,
And hearts of love, with true devotion, bring
Incense more pure to Heaven's eternal King;
On glorious themes their humble thoughts employ,
And rise transported with no earthly joy;
The blessing said, the service o'er, again
Their swelling voices raise the sacred strain;
Lingering, they love to sing of Jordan's shore,
Where sorrows cease, and toil is known no more. . . .

1853?•1854

---

860 Ellsler, Fanny Elssler (1810-1884), Austrian dancer who toured the United States in 1841 • 929 Jordan's shore. "In these country churches, where sometimes three or four hundred slaves assemble with a dozen whites, the delight of the Negroes is in their spiritual songs and hymns. . . . The Sunday service is a source of infinite enjoyment to them and they conduct themselves with perfect decorum and attention."—*Grayson*

Henry Timrod

1828 • 1867

"No writer of equal stature in this country," Professor E. W. Parks justly observes, "has received so little attention" as Henry Timrod, the "Laureate of the Confederacy."

Timrod attended the Coates School in Charleston, South Carolina—his birthplace—and studied for a year and a half at the University of Georgia. After trying the law in the office of James Louis Petigru in Charleston, he turned to tutoring in planters' families. Later he was a contributor to *Russell's Magazine* (1857-1860), a journal of literary promise published in Charleston and edited by his friend Paul Hamilton Hayne. Upon the outbreak of the Civil War, Timrod enlisted in the Confederate army, but because of ill health was able to serve less than a year. Undertaking, after a partial recuperation, the work of a war correspondent, he observed at close range the battle of Shiloh. In 1864 he edited a newspaper in Columbia, South Carolina; this position ended abruptly when Columbia was taken by Sherman's army. The three remaining years of his life were a losing struggle against poverty and disease. His poems were collected, with a memoir, by Paul Hamilton Hayne in 1873.

Timrod's early verses were imitative of Wordsworth. The war called forth his latent originality and inspired his best poems. These poems, though romantic in their ardor, are remarkable for certain classical qualities; indeed, it is the fusion of romantic and classical elements that gives to Timrod's poetry a special distinction. To quote Professor Parks again: "Although sincerity and throbbing emotion beat through his words in passionate undertones, the passion never carries the verse into formlessness of thought or reference. Instead an almost classic coolness and restraint appears, from first to last, in his war poems. . . . He saw a poem as a whole, yet as composed of lines, and his best poems combine a clear distinction of line with a sense of rounded completeness." Other noteworthy merits of Timrod's verse are the mastery of the sustained, or epic, simile (see, particularly, the simile of the Cornwall mine in "The Cotton Boll"), and the classic purity of his diction.

Poems of Henry Timrod, ed. P. H. Hayne, New York, 1873 • J. B. Hubbell, **The Last Years of Henry Timrod**, Durham, North Carolina, 1941 • E. W. Parks, "Southern Poetry," **Segments of Southern Thought**, Athens, Georgia, 1938

Ethnogenesis

Written During the Meeting of the First Southern Congress, at Montgomery, February, 1861

The following poem was first printed, with the title "Ode, on the Meeting of the Southern Congress," in the Charleston Mercury, September 26, 1861. The title "Ethnogenesis," which was substituted when the poem was reprinted in the Charleston Courier, January 31, 1862, is a Greek coinage meaning "the birth of a nation." At once ardent and restrained, the poem expresses the patriotic spirit of the newly formed Confederate States of America.

I

Hath not the morning dawned with added light?
And shall not evening call another star
Out of the infinite regions of the night,
To mark this day in Heaven? At last, we are
A nation among nations; and the world
Shall soon behold in many a distant port
  Another flag unfurled!
Now, come what may, whose favor need we court?
And, under God, whose thunder need we fear?
  Thank him who placed us here
Beneath so kind a sky—the very sun
Takes part with us; and on our errands run
All breezes of the ocean; dew and rain
Do noiseless battle for us; and the Year,
And all the gentle daughters in her train,
March in our ranks, and in our service wield
Long spears of golden grain!
A yellow blossom as her fairy shield,
June flings her azure banner to the wind,
  While in the order of their birth
Her sisters pass, and many an ample field
Grows white beneath their steps, till now, behold,
  Its endless sheets unfold
THE SNOW OF SOUTHERN SUMMERS! Let the earth
Rejoice! beneath those fleeces soft and warm
  Our happy land shall sleep
  In a repose as deep
As if we lay intrenched behind
Whole leagues of Russian ice and Arctic storm!

II

And what if, mad with wrongs themselves have wrought,
  In their own treachery caught,
  By their own fears made bold,
  And leagued with him of old,
Who long since in the limits of the North
Set up his evil throne, and warred with God—
What if, both mad and blinded in their rage,
Our foes should fling us down their mortal gage,
And with a hostile step profane our sod!
We shall not shrink, my brothers, but go forth
To meet them, marshaled by the Lord of Hosts,
And overshadowed by the mighty ghosts
Of Moultrie and Eutaw—who shall foil
Auxiliars such as these? Nor these alone,
  But every stock and stone
  Shall help us; but the very soil,
And all the generous wealth it gives to toil,
And all for which we love our noble land,
Shall fight beside, and through us; sea and strand,
  The heart of woman, and her hand,
Tree, fruit, and flower, and every influence,
  Gentle, or grave, or grand;
  The winds in our defence
Shall seem to blow; to us the hills shall lend
  Their firmness and their calm;
And in our stiffened sinews we shall blend
  The strength of pine and palm!

III

Nor would we shun the battle-ground,
  Though weak as we are strong;
Call up the clashing elements around,
  And test the right and wrong!

24 Snow refers to cotton, of the importance of which to the South Timrod had an exaggerated conception. Contrast Lanier's later protest in "Corn" against the tyranny of "coquette cotton" • 34 limits . . . North. When Satan (according to Milton) revolted in Heaven against God, he withdrew with his followers to the North. See particularly Paradise Lost, Bk. V, l. 755: "At length into the limits of the North/They came . . ." • 42 Moultrie and Eutaw. The repulse of the British at Sullivan's Island, June 28, 1776, was led by General William Moultrie, for whom the fort on the island was later named. Eutaw Springs was the scene of an American attack on a British outpost, September 8, 1781. Hence, the "mighty ghosts" are the ghosts of Revolutionary patriots who fought at these places • 44 stock and stone, every senseless thing

On one side, creeds that dare to teach
What Christ and Paul refrained to preach;
Codes built upon a broken pledge,
And Charity that whets a poniard's edge;
Fair schemes that leave the neighboring poor
To starve and shiver at the schemer's door,
While in the world's most liberal ranks enrolled,
He turns some vast philanthropy to gold;
Religion, taking every mortal form
But that a pure and Christian faith makes warm,
Where not to vile fanatic passion urged,
Or not in vague philosophies submerged,
Repulsive with all Pharisaic leaven,
And making laws to stay the laws of Heaven!
And on the other, scorn of sordid gain,
Unblemished honor, truth without a stain,
Faith, justice, reverence, charitable wealth,
And, for the poor and humble, laws which give,
Not the mean right to buy the right to live,
  But life, and home, and health!
To doubt the end were want of trust in God,
    Who, if he has decreed
  That we must pass a redder sea
Than that which rang to Miriam's holy glee,
  Will surely raise at need
  A Moses with his rod!

IV

But let our fears—if fears we have—be still,
And turn us to the future! Could we climb
Some mighty Alp, and view the coming time,
The rapturous sight would fill
  Our eyes with happy tears!
Not only for the glories which the years
Shall bring us; not for lands from sea to sea,
And wealth, and power, and peace, though these shall be;
But for the distant peoples we shall bless,
And the hushed murmurs of a world's distress:
For, to give labor to the poor,
  The whole sad planet o'er,
And save from want and crime the humblest door,
Is one among the many ends for which
  God makes us great and rich!
The hour perchance is not yet wholly ripe
When all shall own it, but the type
Whereby we shall be known in every land
Is that vast gulf which lips our Southern strand,
And through the cold, untempered ocean pours
Its genial streams, that far off Arctic shores
May sometimes catch upon the softened breeze
Strange tropic warmth and hints of summer seas.

1861

The Cotton Boll

First printed in the Charleston Mercury, September 3, 1861, "The Cotton Boll" is Timrod's most successful poem. It is remarkable, among other things, for its fluency and precision, its eloquence and restraint, and its mastery of the expanded or epic simile and a varied, flexible meter.

While I recline
At ease beneath
This immemorial pine,
Small sphere!
(By dusky fingers brought this morning here
And shown with boastful smiles),
I turn thy cloven sheath,
Through which the soft white fibres peer,
That, with their gossamer bands,
Unite, like love, the sea-divided lands,
And slowly, thread by thread,
Draw forth the folded strands,
Than which the trembling line,
By whose frail help yon startled spider fled
Down the tall spear-grass from his swinging bed,

Ethnogenesis • 61 creeds . . . preach. Timrod asserts that the creed of the abolitionists has no Biblical authority • 63 pledge refers to the protection of slavery under the Constitution • 65 neighboring poor, the underpaid workers in Northern factories • 75 the other, the other side, meaning the South • 83 redder sea. The reference is to the crossing of the Red Sea by the Israelites and their subsequent rejoicing, recorded in Exodus 14:15. It is interesting to note that Whittier, speaking for the North, used the same Biblical story in "Laus Deo" • 95 distant . . . bless, presumably through the exportation of cotton • 105 gulf, the Gulf Stream

The Cotton Boll • 5 dusky fingers, of a Negro slave

Is scarce more fine;
And as the tangled skein
Unravels in my hands,
Betwixt me and the noonday light,
A veil seems lifted, and for miles and miles
The landscape broadens on my sight,
As, in the little boll, there lurked a spell
Like that which, in the ocean shell,
With mystic sound,
Breaks down the narrow walls that hem us round,
And turns some city lane
Into the restless main,
With all his capes and isles!

Yonder bird,
Which floats, as if at rest,
In those blue tracts above the thunder, where
No vapors cloud the stainless air,
And never sound is heard,
Unless at such rare time
When, from the City of the Blest,
Rings down some golden chime,
Sees not from his high place
So vast a cirque of summer space
As widens round me in one mighty field,
Which, rimmed by seas and sands,
Doth hail its earliest daylight in the beams
Of gray Atlantic dawns;
And, broad as realms made up of many lands,
Is lost afar
Behind the crimson hills and purple lawns
Of sunset, among plains which roll their streams
Against the Evening Star!
And lo!
To the remotest point of sight,
Although I gaze upon no waste of snow,
The endless field is white;
And the whole landscape glows,
For many a shining league away,
With such accumulated light
As Polar lands would flash beneath a tropic day!
Nor lack there (for the vision grows,
And the small charm within my hands—
More potent even than the fabled one,
Which oped whatever golden mystery
Lay hid in fairy wood or magic vale,
The curious ointment of the Arabian tale—
Beyond all mortal sense
Doth stretch my sight's horizon, and I see,
Beneath its simple influence,
As if with Uriel's crown,
I stood in some great temple of the Sun,
And looked, as Uriel, down!)
Nor lack there pastures rich and fields all green
With all the common gifts of God,
For temperate airs and torrid sheen
Weave Edens of the sod;
Through lands which look one sea of billowy gold
Broad rivers wind their devious ways;
A hundred isles in their embraces fold
A hundred luminous bays;
And through yon purple haze
Vast mountains lift their plumèd peaks cloud-crowned;
And, save where up their sides the ploughman creeps,
An unhewn forest girds them grandly round,
In whose dark shades a future navy sleeps!
Ye Stars, which, though unseen, yet with me gaze
Upon this loveliest fragment of the earth!
Thou Sun, that kindlest all thy gentlest rays
Above it, as to light a favorite hearth!
Ye Clouds, that in your temples in the West
See nothing brighter than its humblest flowers!
And you, ye Winds, that on the ocean's breast
Are kissed to coolness ere ye reach its bowers!
Bear witness with me in my song of praise,
And tell the world that, since the world began
No fairer land hath fired a poet's lays,
Or given a home to man!

But these are charms already widely blown!
His be the meed whose pencil's trace
Hath touched our very swamps with grace,
And round whose tuneful way
All Southern laurels bloom,
The Poet of "The Woodlands," unto whom

---

22 As, as if • 61 ointment . . . tale, in the story describing the adventures of Haroun Al Raschid in the Arabian Nights • 65 Uriel, regent of the Sun, described in Milton's Paradise Lost, Bk. III • 98 Poet . . . Woodlands, a reference to William Gilmore Simms (1806-1870) and his country estate near Charleston. Simms wrote a good many poems (including a poem entitled "The Edge of the Swamp"), though he is best known for his prose romances

Alike are known
The flute's low breathing and the trumpet's tone,
And the soft west wind's sighs;
But who shall utter all the debt,
O Land wherein all powers are met
That bind a people's heart,
The world doth owe thee at this day,
And which it never can repay,
Yet scarcely deigns to own!
Where sleeps the poet who shall fitly sing
The source wherefrom doth spring
That mighty commerce which, confined
To the mean channels of no selfish mart,
Goes out to every shore
Of this broad earth, and throngs the sea with ships
That bear no thunders; hushes hungry lips
In alien lands;
Joins with a delicate web remotest strands;
And gladdening rich and poor,
Doth gild Parisian domes,
Or feed the cottage-smoke of English homes,
And only bounds its blessings by mankind!
In offices like these, thy mission lies,
My Country! and it shall not end
As long as rain shall fall and Heaven bend
In blue above thee; though thy foes be hard
And cruel as their weapons, it shall guard
Thy hearth-stones as a bulwark; make thee great
In white and bloodless state;
And haply, as the years increase—
Still working through its humbler reach
With that large wisdom which the ages teach—
Revive the half-dead dream of universal peace!
As men who labor in that mine
Of Cornwall, hollowed out beneath the bed
Of ocean, when a storm rolls overhead,
Hear the dull booming of the world of brine
Above them, and a mighty muffled roar
Of winds and waters, yet toil calmly on,
And split the rock, and pile the massive ore,
Or carve a niche, or shape the archèd roof;
So I, as calmly, weave my woof
Of song, chanting the days to come,
Unsilenced, though the quiet summer air
Stirs with the bruit of battles, and each dawn
Wakes from its starry silence to the hum
Of many gathering armies. Still,
In that we sometimes hear,
Upon the Northern winds, the voice of woe
Not wholly drowned in triumph, though I know
The end must crown us, and a few brief years
Dry all our tears,
I may not sing too gladly. To Thy will
Resigned, O Lord! we cannot all forget
That there is much even Victory must regret.
And, therefore, not too long
From the great burthen of our country's wrong
Delay our just release!
And, if it may be, save
These sacred fields of peace
From stain of patriot or of hostile blood!
Oh, help us, Lord! to roll the crimson flood
Back on its course, and while our banners wing
Northward, strike with us! till the Goth shall cling
To his own blasted altar-stones, and crave
Mercy; and we shall grant it, and dictate
The lenient future of his fate
There, where some rotting ships and crumbling quays
Shall one day mark the Port which ruled the Western seas.

1861

Carolina

First printed in the Charleston Courier, March 8, 1862, and reprinted there, November 12 of the same year, "Carolina" is perhaps the most fervid of all the patriotic lyrics written during the Civil War.

I

The despot treads thy sacred sands,
Thy pines give shelter to his bands,
Thy sons stand by with idle hands,
Carolina!

---

133 Cornwall, on the southwest coast of England • 162 Goth. Timrod uses this uncomplimentary name to refer to the people of the North • 167 Port, New York

He breathes at ease thy airs of balm,
He scorns the lances of thy palm;
Oh! who shall break thy craven calm,
Carolina!
Thy ancient fame is growing dim,
A spot is on thy garment's rim;
Give to the winds thy battle hymn,
Carolina!

II

Call on thy children of the hill,
Wake swamp and river, coast and rill,
Rouse all thy strength and all thy skill,
Carolina!
Cite wealth and science, trade and art,
Touch with thy fire the cautious mart,
And pour thee through the people's heart,
Carolina!
Till even the coward spurns his fears,
And all thy fields and fens and meres
Shall bristle like thy palm with spears,
Carolina!

III

Hold up the glories of thy dead;
Say how thy elder children bled,
And point to Eutaw's battle-bed,
Carolina!
Tell how the patriot's soul was tried,
And what his dauntless breast defied;
How Rutledge ruled and Laurens died,
Carolina!
Cry! till thy summons, heard at last,
Shall fall like Marion's bugle-blast
Re-echoed from the haunted Past,
Carolina!

IV

I hear a murmur as of waves
That grope their way through sunless caves,
Like bodies struggling in their graves,
Carolina!
And now it deepens; slow and grand
It swells, as, rolling to the land,
An ocean broke upon thy strand,
Carolina!
Shout! let it reach the startled Huns!
And roar with all thy festal guns!
It is the answer of thy sons,
Carolina!

V

They will not wait to hear thee call;
From Sachem's Head to Sumter's wall
Resounds the voice of hut and hall,
Carolina!
No! thou hast not a stain, they say,
Or none save what the battle-day
Shall wash in seas of blood away,
Carolina!
Thy skirts indeed the foe may part,
Thy robe be pierced with sword and dart,
They shall not touch thy noble heart,
Carolina!

VI

Ere thou shalt own the tyrant's thrall
Ten times ten thousand men must fall;
Thy corpse may hearken to his call,
Carolina!
When, by thy bier, in mournful throngs
The women chant thy mortal wrongs,
'Twill be their own funereal songs,
Carolina!
From thy dead breast by ruffians trod
No helpless child shall look to God;
All shall be safe beneath thy sod,
Carolina!

VII

Girt with such wills to do and bear,
Assured in right, and mailed in prayer,
Thou wilt not bow thee to despair,
Carolina!

---

17 **Cite**, summon or call • 27 **Eutaw's battle-bed.** See note, p. 652 • 31 **Rutledge**, John Rutledge (1739-1800), governor of South Carolina • 31 **Laurens**, John Laurens (1754-1782), Revolutionary soldier and South Carolinian, killed in battle • 34 **Marion**, Francis Marion (1732-1795), Revolutionary general and South Carolinian • 45 **Huns**, here applied to the soldiers of the North • 50 **Sachem's . . . wall**, that is, from the mountains to the sea • 74 **mailed . . . prayer**, reminiscent of St. Paul's Christian armor, described in Ephesians 6

Throw thy bold banner to the breeze!
Front with thy ranks the threatening seas
Like thine own proud armorial trees,
Carolina!
Fling down thy gauntlet to the Huns,
And roar the challenge from thy guns;
Then leave the future to thy sons,
Carolina!

1862

Fort Sumter

Charleston

"Charleston" was first printed in the Charleston Mercury, December 13, 1862.

Calm as that second summer which precedes
The first fall of the snow,
In the broad sunlight of heroic deeds
The City bides the foe.

As yet, behind their ramparts stern and proud,
Her bolted thunders sleep—
Dark Sumter, like a battlemented cloud,
Looms o'er the solemn deep.

No Calpe frowns from lofty cliff or scar
To guard the holy strand;
But Moultrie holds in leash her dogs of war
Above the level sand.

And down the dunes a thousand guns lie couched
Unseen beside the flood—
Like tigers in some Orient jungle crouched
That wait and watch for blood.

Meanwhile, through streets still echoing with trade,
Walk grave and thoughtful men
Whose hands may one day wield the patriot's blade
As lightly as the pen.

And maidens with such eyes as would grow dim
Over a bleeding hound
Seem each one to have caught the strength of him
Whose sword she sadly bound.

Thus girt without and garrisoned at home,
Day patient following day,
Old Charleston looks from roof and spire and dome
Across her tranquil bay.

Ships, through a hundred foes, from Saxon lands
And spicy Indian ports
Bring Saxon steel and iron to her hands
And Summer to her courts.

But still, along yon dim Atlantic line,
The only hostile smoke
Creeps like a harmless mist above the brine
From some frail, floating oak.

Shall the Spring dawn, and she, still clad in smiles
And with an unscathed brow,
Rest in the strong arms of her palm-crowned isles
As fair and free as now?

We know not; in the temple of the Fates
God has inscribed her doom;
And, all untroubled in her faith, she waits
The triumph or the tomb.

1862

Spring

"Spring" was first printed in the Charleston Southern Illustrated News, April 4, 1863

Spring, with that nameless pathos in the air
Which dwells with all things fair,
Spring, with her golden suns and silver rain,
Is with us once again.

Out in the lonely woods the jasmine burns
Its fragrant lamps, and turns
Into a royal court with green festoons
The banks of dark lagoons.

In the deep heart of every forest tree
The blood is all aglee,
And there's a look about the leafless bowers
As if they dreamed of flowers.

Yet still on every side we trace the hand
Of Winter in the land,
Save where the maple reddens on the lawn,
Flushed by the season's dawn;

Or where, like those strange semblances we find
That age to childhood bind,
The elm puts on, as if in Nature's scorn,
The brown of Autumn corn.

As yet the turf is dark, although you know
That, not a span below,
A thousand germs are groping through the gloom,
And soon will burst their tomb.

Already, here and there, on frailest stems
Appear some azure gems,
Small as might deck, upon a gala day,
The forehead of a fay.

In gardens you may note amid the dearth
The crocus breaking earth;
And near the snowdrop's tender white and green,
The violet in its screen.

But many gleams and shadows need must pass
Along the budding grass,
And weeks go by, before the enamored South
Shall kiss the rose's mouth.

Still there's a sense of blossoms yet unborn
In the sweet airs of morn;
One almost looks to see the very street
Grow purple at his feet.

At times a fragrant breeze comes floating by,
And brings, you know not why,
A feeling as when eager crowds await
Before a palace gate

Some wondrous pageant; and you scarce would start,
If from a beech's heart,
A blue-eyed Dryad, stepping forth, should say,
"Behold me! I am May!"

Ah! who would couple thoughts of war and crime
With such a blessèd time!
Who in the west wind's aromatic breath
Could hear the call of Death!

Yet not more surely shall the Spring awake
The voice of wood and brake,
Then she shall rouse, for all her tranquil charms,
A million men to arms.

There shall be deeper hues upon her plains
Than all her sunlit rains,
And every gladdening influence around,
Can summon from the ground.

Oh! standing on this desecrated mould,
Methinks that I behold,
Lifting her bloody daisies up to God,
Spring kneeling on the sod,

And calling, with the voice of all her rills,
Upon the ancient hills
To fall and crush the tyrants and the slaves
Who turn her meads to graves.

1863

Ode

Mr. Parks says of the poem: "Timrod's 'Ode' has the supreme artistic merit of throbbing with vibrant emotion in its effect upon the reader, yet of possessing a classic coolness of phrase which might have been carved from stone. The poet indulges in no histrionic exhibitionism, but this controlled and inevitable verse leaves nothing to be said." The poem has been often compared with William Collins' "How Sleep the Brave."

The "Ode" was first printed in the Charleston Courier as "Ode Sung on the Occasion of Decorating the Graves of the Confederate Dead, at Magnolia Cemetery, Charleston, S. C."

Sleep sweetly in your humble graves,
  Sleep, martyrs of a fallen cause;
Though yet no marble column craves
  The pilgrim here to pause.

In seeds of laurel in the earth,
  The blossom of your fame is blown,
And somewhere, waiting for its birth,
  The shaft is in the stone!

Meanwhile, behalf the tardy years
  Which keep in trust your storied tombs,
Behold! your sisters bring their tears,
  And these memorial blooms.

Small tributes! but your shades will smile
  More proudly on these wreaths today,
Than when some cannon-moulded pile
  Shall overlook this Bay.

Stoop, angels, hither from the skies!
  There is no holier spot of ground
Than where defeated valor lies,
  By mourning beauty crowned!

1866

Civil War Singers

Compared with Revolutionary War songs, those chanted by soldiers and civilians during the Civil War had somewhat less courtliness, less of the British manner about them. The colloquial language, however, which had begun to influence much popular literature, was an element in remarkably few: words and phrases were still likely to be oratorical. The meters of many were determined by the older tunes for which they were written—"The Star-Spangled Banner," "The Campbells Are Coming," "Hearts of Oak," and so on. Although there were exceptions—"The Battle Hymn of the Republic" and "Maryland," for instance—those best remembered were distinguished less for their sentiment and phrasing than for their rhythms and their tunes. Quite a large number continued to be popular down into modern times.

F. F. Browne, Bugle Echoes, a Collection of Poems of the Civil War, Northern and Southern, New York, 1886 • G E Eggleston, American War Ballads and Lyrics, 2 vols , New York, 1889 • E. A. Dolph, Sound Off! Soldier Songs, New York, 1929

Dixie

Daniel Decatur Emmett 1815 • 1904

On Broadway, in 1859, "Dixie," the most stirring tune associated with the war, had its first public performance The author and composer of the first of many versions was Daniel Decatur Emmett, who was born, the son of an Irish blacksmith of Southern origin, in Mt. Vernon, Ohio, in 1815. Emmett had the most elementary sort of education before, at seventeen, he entered the United States army. He served for three years as a fifer. Discharged, he traveled with circus bands and in time became a composer and singer in minstrel troupes. It was for Bryant's Minstrels that he composed his famous song, a "walk-around," rendered by the whole company. The composition was introduced to the South by a chorus in John Brougham's New Orleans production of Pocahontas shortly before the war began. The Confederate regiments of Louisiana marched to a military version of the song, and soon its use in Southern armies was widespread. The nonsense words as well as the lively tune evidently had great appeal.

I wish I was in de land ob cotton,
Old times dar am not forgotten;
  Look away! Look away! Look away! Dixie Land!
In Dixie Land whar I was born in,
Early on one frosty mornin',
  Look away! Look away! Look away! Dixie Land!

Chorus

Den I wish I was in Dixie! Hooray! Hooray!
In Dixie's Land we'll take our stand, to lib an' die in Dixie.
Away! away! away down South in Dixie.
Away! away! away down South in Dixie.

Ole missus marry "Will-de-weaber";
Willum was a gay deceaber,
  Look away, look away, look away, Dixie Land!
But when he put his arm around her,
He smiled as fierce as a forty-pounder;
  Look away, look away, look away, Dixie Land!

His face was sharp as a butcher's cleaber;
But dat did not seem to greab her;
  Look away, look away, look away, Dixie Land!
Ole missus acted de foolish part,
And died for a man dat broke her heart,
  Look away, look away, look away, Dixie Land!

Now here's a health to de next ole missus,
An' all the gals dat want to kiss us;
  Look away, look away, look away, Dixie Land!
But if you want to drive 'way sorrow,
Come hear dis song tomorrow;
  Look away, look away, look away, Dixie Land!

Dar's buckwheat cakes and Injin batter,
Makes you fat or a little fatter,
  Look away, look away, look away, Dixie Land!
Den hoe it down an' scratch your grabble,
To Dixie's land I'm bound to trabble;
  Look away, look away, look away, Dixie Land!

1859

Dixie

Albert Pike 1809 • 1891

The best-known "literary" version of "Dixie" was written by Albert Pike, born and educated in Massachusetts but transplanted to the South as a young man. Pike was a newspaper editor and a lawyer who had a commission in the Confederate army. His words for the song were popular during the war, but in time they dropped from general memory in favor of Emmett's humbler version written to the same tune.

Southrons, hear your country call you!
Up! lest worse than death befall you!
  To arms! to arms! to arms! in Dixie!

Lo! all beacon fires are lighted,
Let our hearts be now united!
To arms! to arms! to arms! in Dixie!

Chorus

Advance the flag of Dixie!
Hurrah! Hurrah!
For Dixie's land we'll take our stand,
To live or die for Dixie!
To arms! To arms!
And conquer peace for Dixie!
To arms! To arms!
And conquer peace for Dixie!

Hear the Northern thunders mutter!
Northern flags in South winds flutter!
To arms! to arms! to arms! in Dixie!
Send them back your fierce defiance!
Stamp upon the cursed alliance!
To arms! to arms! to arms! in Dixie!

Fear no danger! shun no labor!
Lift up rifle, pike and sabre!
To arms! to arms! to arms! in Dixie!
Shoulder pressing close to shoulder,
Let the odds make each heart bolder!
To arms! to arms! to arms! in Dixie!

How the South's great heart rejoices,
At your cannon's ringing voices;
To arms! to arms! to arms! in Dixie!
For faith betrayed and pledges broken,
Wrongs inflicted, insults spoken!
To arms! to arms! to arms! in Dixie!

Strong as lions, swift as eagles,
Back to their kennels hunt these beagles!
To arms! to arms! to arms! in Dixie!
Cut the unequal bonds asunder!
Let them hence each other plunder!
To arms! to arms! to arms! in Dixie!

Swear upon your country's altar,
Never to give up or falter;
To arms! to arms! to arms! in Dixie!
Till the spoilers are defeated,
Till the Lord's work is completed.
To arms! to arms! to arms! in Dixie!

Halt not till our Federation,
Secures among earth's Powers its station!
To arms! to arms! to arms! in Dixie!
Then at peace and crowned with glory,
Hear your children tell the story!
To arms! to arms! to arms! in Dixie!

If the loved ones weep in sadness,
Victory soon shall bring them gladness.
To arms! to arms! to arms! in Dixie!
Exultant pride soon banish sorrow;
Smiles chase tears away tomorrow.
To arms! to arms! to arms! in Dixie!

1861

My Maryland

James Ryder Randall 1839 • 1908

Upon hearing of the attack by the Massachusetts troops on his native city, Baltimore, James Ryder Randall wrote "My Maryland." At the time he composed the poem, Randall was a teacher in Louisiana, unacceptable for military duty because of poor health. He turned from teaching to journalism, and was in newspaper work until his death in 1908.

"My Maryland" appeared first in the New Orleans Delta, but shortly it was reprinted in newspapers throughout the South. The tune for which the verses were designed was the German song "Tannenbaum, O Tannenbaum."

The despot's heel is on thy shore,
Maryland!
His torch is at thy temple door,
Maryland!
Avenge the patriotic gore
That flecked the streets of Baltimore,
And be the battle-queen of yore,
Maryland! My Maryland!

Hark, to an exiled son's appeal,
Maryland!
My Mother-State, to thee I kneel,
Maryland!
For life and death, for woe and weal,
Thy peerless chivalry reveal,
And gird thy beautious limbs with steel!
Maryland! My Maryland!

Thou wilt not cower in the dust,
Maryland!
Thy beaming sword shall never rust,
Maryland!
Remember Carroll's sacred trust,
Remember Howard's warlike thrust,
And all thy slumberers with the just,
Maryland! My Maryland!

Come! 'tis the red dawn of the day,
Maryland!
Come! with thy panoplied array,
Maryland!
With Ringgold's spirit for the fray,
With Watson's blood at Monterey,
With fearless Lowe and dashing May,
Maryland! My Maryland!

Dear Mother! burst the tyrant's chain,
Maryland!
Virginia should not call in vain,
Maryland!
She meets her sisters on the plain—
"Sic semper," 'tis the proud refrain
That baffles minions back amain,
Maryland!
Arise, in majesty again,
Maryland! My Maryland!

Come! for thy shield is bright and strong,
Maryland!
Come! for thy dalliance does thee wrong,
Maryland!
Come! to thine own heroic throng,
That stalks with Liberty along,
And ring thy dauntless Slogan-song,
Maryland! My Maryland!

I see the blush upon thy cheek,
Maryland!
For thou wast ever bravely meek,
Maryland!
But lo! there surges forth a shriek
From hill to hill, from creek to creek—
Potomac calls to Chesapeake,
Maryland! My Maryland!

Thou wilt not yield the Vandal toll,
Maryland!
Thou wilt not crook to his control,
Maryland!
Better the fire upon thee roll,
Better the shot, the blade, the bowl,
Than crucifixion of the soul,
Maryland! My Maryland!

I hear the distant thunder-hum,
Maryland!
The Old Line's bugle, fife, and drum,
Maryland!
She is not dead, nor deaf, nor dumb—
Huzza! she spurns the Northern scum!
She breathes—she burns! she'll come! she'll come!
Maryland! My Maryland!

1861

Battle Hymn of the Republic

Julia Ward Howe 1819 • 1910

This poem was written by Mrs. Howe to accompany a well-established tune, that of the doggerel song, "John Brown's Body." Interestingly, this latter song had fitted its words to a Southern revival hymn, "Say, Brothers, Will

---

21 **Carroll,** Charles Carroll, a citizen of Maryland, the last surviving signer of the Declaration of Independence • 22 **Howard,** John Eager Howard, a military leader in the Revolution • 29 **Ringgold . . . Watson . . . Lowe . . . May,** Marylanders who fought with distinction in the Mexican War • 38 **Sic semper,** the opening words of the motto of Virginia, **Sic semper tyrannis** — Thus always to tyrants • 57 **Potomac . . . Chesapeake,** extreme boundaries of Maryland

You Meet Us?" popular throughout the United States in the 1850's. Soldiers of a Massachusetts regiment stationed in Boston worked out the words for "John Brown's Body" in 1861; when they sang them while marching through New York in July of the same year, the song began to have wide currency. The opening lines of the song were:

John Brown's body lies a-mold'ring in the grave,
John Brown's body lies a-mold'ring in the grave,
John Brown's body lies a-mold'ring in the grave,
His soul is marching on!

Chorus

Glory! Glory Hallelujah!
Glory! Glory Hallelujah!
Glory! Glory Hallelujah!
His soul is marching on.

Mrs. Howe, a Bostonian and descendant of a distinguished colonial family, had won distinction before the war as a supporter of women's suffrage and other reforms, including abolition. She wrote her poem one night after she had been stirred by a visit to an army camp near Washington, D. C. Unlike Pike's "improvement" on the words of "Dixie," her words replaced the initial ones in popular memory. "The Battle Hymn of the Republic" first was published in the **Atlantic Monthly**, February 1862

Mine eyes have seen the glory of the coming of the Lord:
He is trampling out the vintage where the grapes of wrath are stored;
He hath loosed the fateful lightning of his terrible swift sword;
His truth is marching on.

Chorus

Glory! glory! Hallelujah!
Glory! glory! Hallelujah!
Glory! glory! Hallelujah!
His truth is marching on!

I have seen him in the watch-fires of a hundred circling camps;
They have builded him an altar in the evening dews and damps;
I can read his righteous sentence by the dim and flaring lamps:
His day is marching on.

I have read a fiery gospel, writ in burnished rows of steel:
"As ye deal with my contemners, so with you my grace shall deal;
Let the Hero, born of woman, crush the serpent with his heel,
Since God is marching on."

He has sounded forth the trumpet that shall never call retreat;
He is sifting out the hearts of men before his judgment-seat;
Oh, be swift, my soul, to answer him! be jubilant, my feet!
Our God is marching on.

In the beauty of the lilies Christ was born across the sea,
With a glory in his bosom that transfigures you and me:
As he died to make men holy, let us die to make men free,
While God is marching on.

1861·1862

Three Hundred Thousand More

James Sloan Gibbons 1810 • 1892

On July 16, 1862, shortly after Lincoln had issued a call for three hundred thousand additional volunteers, this poem was published anonymously in the New York **Evening Post**. William Cullen Bryant was credited with its authorship, but eventually it was attributed to Gibbons, a Quaker editor and abolitionist. Stephen Collins Foster wrote a musical setting, the most successful of his war songs.

We are coming, Father Abraham, three hundred thousand more,
From Mississippi's winding stream and from New England's shore;
We leave our plows and workshops, our wives and children dear,

With hearts too full for utterance, with but a silent tear;
We dare not look behind us, but steadfastly before:
We are coming, Father Abraham, three hundred thousand more!

If you look across the hill-tops that meet the northern sky,
Long moving lines of rising dust your vision may descry;
And now the wind, an instant, tears the cloudy veil aside,
And floats aloft our spangled flag in glory and in pride,
And bayonets in the sunlight gleam, and bands brave music pour:
We are coming, Father Abraham, three hundred thousand more!

If you look all up our valleys where the growing harvests shine,
You may see our sturdy farmer boys fast forming into line;
And children from their mother's knees are pulling at the weeds,
And learning how to reap and sow against their country's needs;
And a farewell group stands weeping at every cottage door:
We are coming, Father Abraham, three hundred thousand more!

You have called us, and we're coming, by Richmond's bloody tide
To lay us down, for Freedom's sake, our brothers' bones beside,
Or from foul treason's savage grasp to wrench the murderous blade,
And in the face of foreign foes its fragments to parade.
Six hundred thousand loyal men and true have gone before:
We are coming, Father Abraham, three hundred thousand more!

1862

Abraham Lincoln

1809 • 1865

An autobiography which Lincoln wrote in 1859 tells the main details of his early life in his characteristic style. It reads, in part:

"I was born February 12, 1809, in Hardin County, Kentucky. My parents were both born in Virginia, of undistinguished families. . . . My mother, who died in my tenth year, was of a family of the name of Hanks. . . . My father, at the death of his father, was but six years of age, and he grew up literally without education. He removed from Kentucky to what is now Spencer County, Indiana, in my eighth year . . . It was a wild region, with many bears and other wild animals still in the woods. There I grew up. There were some schools, so called, but no qualification was ever required of a teacher beyond 'readin', writin', and cipherin',' to the rule of three. . . . There was absolutely nothing to excite ambition for education. Of course, when I came of age, I did not know much. Still, somehow, I could read, write, and cipher to the rule of three, but that was all. I have not been to school since. The little advance I now have upon this store of education, I have picked up from time to time under the pressure of necessity.

"I was raised to farm work, which I continued till I was twenty-two At twenty-one I came to Illinois, Macon County. Then I got to New Salem . . . where I remained a year as a sort of clerk in a store. Then came The Black Hawk War, and I was elected a captain of volunteers, a success which gave me more pleasure than any I have had since. I went the campaign, was elected, ran for the legislature the same year (1832), and was beaten—the only time I ever have been beaten by the people. The next and three succeeding biennial elections I was elected to the legislature. I was not a candidate afterward. During this legislative period I had studied law, and removed to Springfield to practice it In 1846 I was once elected to the lower House of Congress. Was not a candidate for reelection. From 1849 to 1854, both inclusive, practised law more assiduously than ever before . . . I was losing interest in politics when the repeal of the Missouri Compromise aroused me again. What I have done since then is pretty well known.

"If any personal description of me is thought desirable, it may be said I am, in height, six feet four inches,

nearly; lean in flesh, weighing on an average one hundred and eighty pounds; dark complexion, with coarse black hair and gray eyes. No other marks or brands recollected."

Lincoln's account breaks off at the time of the repeal of the Missouri Compromise (1854), a political move which caused him to return to public life when the Republican party was founded. In 1858 the Lincoln-Douglas debates, on the subject of popular sovereignty, attracted nation-wide attention and led to Lincoln's becoming a dark-horse candidate for the Presidential nomination. He was nominated in 1860, subsequently elected, and began to serve in 1861, as the Civil War was starting. His wartime leadership was rewarded by his reelection in 1864. He was shot to death by John Wilkes Booth, in a Washington theater, about a month after his second inaugural.

One reason for his countrymen's idolizing Lincoln as they have is suggested in his claim, in his autobiography, that he had little book learning. Americans loved to think of him as a typical practical citizen Joe Gillespie, an old friend, praised him in these words "He had passed through all the grades of society when he reached the Presidency, and he had found common sense a sure reliance and he put it into practice He acted all through his career upon just such principles as every man of good sense would approve. . . . Lincoln was a great common man." His ways of thinking were, indeed, much like those of ordinary Americans who distrust abstractions and rely upon experience and sound logic to help solve problems.

Yet Lincoln and many of his friends and worshipers probably underestimated the extent of his education. From boyhood, he was passionately fond of reading. He read the Bible, *Pilgrim's Progress,* and such fine writers as Milton, Gibbon, Voltaire, Paine, Hawthorne, and others with great appreciation He knew much of Shakespeare and could recite long passages from the great plays. Finally, he had the urge to write well. As a young man, he wrote quite a number of poems. Of one poem which he read in 1846, he said, "I would give all I am worth and go in debt to be able to write so fine a piece. . . ." He took great pains with his writing Mentor Graham, his teacher, said, "I have known him . . . to study for hours the best way of three to express an idea." Such care is evident in his most famous utterances—most of them masterpieces of American oratory.

Collected Works of Abraham Lincoln, ed. John Nicolay and John Hay, 2 vols, New York, 1894 • Carl Sandburg, **Abraham Lincoln: the Prairie Years**, New York, 1926 • Carl Sandburg, **Abraham Lincoln: the War Years**, New York, 1939 • Nathaniel Stephenson, "Lincoln," **Cambridge History of American Literature**, New York, 1931

Farewell Address at Springfield, Illinois

Lincoln had been elected President in November 1860. The following month, South Carolina had seceded. By February 8, 1861, five additional states had seceded, and the Confederate government had been formed. Because it had been rumored that Lincoln would never be allowed to reach Washington alive, precautions had been taken to ensure his safety on the journey.

Such was the situation when, on February 11, the Presidential party went to the railroad station in Springfield to depart for Washington. There were dense clouds overhead, and a chilly drizzle of rain fell through the gray mist. From the platform of a car on the train, Lincoln spoke to the thousand townspeople who stood in the rain.

My Friends· No one, not in my situation, can appreciate my feeling of sadness at this parting. To this place, and the kindness of these people, I owe everything Here I have lived a quarter of a century, and have passed from a young to an old man Here my children have been born, and one is buried. I now

leave, not knowing when or whether ever I may return, with a task before me greater than that which rested upon Washington. Without the assistance of that Divine Being who ever attended him, I cannot succeed. With that assistance, I cannot fail. Trusting in Him who can go with me, and remain with you, and be everywhere for good, let us confidently hope that all will yet be well. To His care commending you, as I hope in your prayers you will commend me, I bid you an affectionate farewell.

1861

First Inaugural Address

"The 4th of March has come and gone," wrote a Washington clerk, "and we have a live, Republican President. And, what is perhaps more singular, during the whole day we saw no one who appeared to manifest the least dislike to his living." The account reflects the general fear in Washington on the day of the inauguration in 1861. During the parade and during the address, riflemen on rooftops along the Avenue and in windows of the Capitol Building watched the crowd for signs of violence. In addition to the fear for Lincoln's life, there was the tense feeling of a nation on the verge of war.

The speech, like most inaugurals, was addressed not only to the audience at Washington but also to a wider one For the North, which half feared that he might be a waverer like his predecessor, Lincoln clearly stated his belief that the Union could not be dissolved and firmly defined the duty of the government in the face of a threat of dissolution. For the South, he made his account of the controversy dispassionate and offered in the closing lines the appeal for a continuance of peace. The address was revised in accordance with suggestions made by his advisers Browning and Seward, who chiefly urged more temperance of tone. The most notable indication of Lincoln's artistry is his rephrasing of the final paragraph from the form originally written out by Secretary of State Seward. (See footnote, p. 672.)

Fellow Citizens of the United States: In compliance with a custom as old as the government itself, I appear before you to address you briefly, and to take in your presence the oath prescribed by the Constitution of the United States to be taken by the President "before he enters on the execution of his office."

I do not consider it necessary at present for me to discuss those matters of administration about which there is no special anxiety or excitement.

Apprehension seems to exist among the people of the Southern states that by the accession of a Republican administration their property and their peace and personal security are to be endangered. There has never been any reasonable cause for such apprehension. Indeed, the most ample evidence to the contrary has all the while existed and been open to their inspection. It is found in nearly all the published speeches of him who now addresses you I do but quote from one of those speeches when I declare that "I have no purpose, directly or indirectly, to interfere with the institution of slavery in the states where it exists. I believe I have no lawful right to do so, and I have no inclination to do so." Those who nominated and elected me did so with full knowledge that I had made this and many similar declarations, and had never recanted them. And, more than this, they placed in the platform for my acceptance, and as a law to themselves and to me, the clear and emphatic resolution which I now read:

"*Resolved,* That the maintenance inviolate of the rights of the states, and especially the right of each state to order and control its own domestic institutions ac-

---

7 **I do not consider . . . .** This paragraph was written and inserted after the main part of the address had been composed • 10 **Apprehension seems . . . .** Marginal marks indicated that this paragraph was to receive special emphasis in reading

cording to its own judgment exclusively, is essential to that balance of power on which the perfection and endurance of our political fabric depend, and we denounce the lawless invasion by armed force of the soil of any state or territory, no matter under what pretext, as among the gravest of crimes."

I now reiterate these sentiments; and, in doing so, I only press upon the public attention the most conclusive evidence of which the case is susceptible, that the property, peace, and security of no section are to be in any wise endangered by the now incoming administration. I add, too, that all the protection which, consistently with the Constitution and the laws, can be given, will be cheerfully given to all the states when lawfully demanded, for whatever cause—as cheerfully to one section as to another.

There is much controversy about the delivering up of fugitives from service or labor. The clause I now read is as plainly written in the Constitution as any other of its provisions:

"No person held to service or labor in one state, under the laws thereof, escaping into another, shall in consequence of any law or regulation therein be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due."

It is scarcely questioned that this provision was intended by those who made it for the reclaiming of what we call fugitive slaves; and the intention of the lawgiver is the law. All members of Congress swear their support to the whole Constitution—to this provision as much as to any other. To the proposition, then, that slaves whose cases come within the terms of this clause "shall be delivered up," their oaths are unanimous. Now, if they would make the effort in good temper, could they not with nearly equal unanimity frame and pass a law by means of which to keep good that unanimous oath?

There is some difference of opinion whether this clause should be enforced by national or by state authority; but surely that difference is not a very material one. If the slave is to be surrendered, it can be of but little consequence to him or to others by which authority it is done. And should anyone in any case be content that his oath shall go unkept on a merely unsubstantial controversy as to how it shall be kept?

Again, in any law upon this subject, ought not all the safeguards of liberty known in civilized and humane jurisprudence to be introduced, so that a free man be not, in any case, surrendered as a slave? And might it not be well at the same time to provide by law for the enforcement of that clause in the Constitution which guarantees that "the citizen of each state shall be entitled to all privileges and immunities of citizens in the several states"?

I take the official oath today with no mental reservations, and with no purpose to construe the Constitution or laws by any hypercritical rules. And while I do not choose now to specify particular acts of Congress as proper to be enforced, I do suggest that it will be much safer for all, both in official and private stations, to conform to and abide by all those acts which stand unrepealed, than to violate any of them, trusting to find impunity in having them held to be unconstitutional.

It is seventy-two years since the first inauguration of a president under our national Constitution During that period fifteen different and greatly distinguished citizens have, in succession, administered the executive branch of the government. They have conducted it through many perils, and generally with great success. Yet, with all this scope of precedent, I now enter upon the same task for the brief constitutional term of four years under great and peculiar difficulty. A disruption of the federal Union, heretofore only menaced, is now formidably attempted.

I hold that, in contemplation of universal law and of the Constitution, the union of these states is perpetual. Perpetuity is implied, if not expressed, in the fundamental law of all national governments. It is safe to assert that no government proper ever had a provision in its organic law for its own termination. Continue to execute all the express provisions of our national Constitution, and the Union will endure forever—it being

---

17 There is much controversy . . . . Marginal marks show that this was another paragraph to be given emphasis • 50 And might . . . states. This sentence was added after the first draft • 56 I take the official oath . . . . This paragraph was originally marked for emphatic delivery, but the mark was crossed out • 59 choose, originally, "think proper" • 66 It . . . years . . . . This was marked for oral emphasis, but the mark was deleted • 75 heretofore only menaced . . . and the rest of the sentence, replaced an earlier, longer phrasing

impossible to destroy it except by some action not provided for in the instrument itself.

Again, if the United States be not a government proper, but an association of states in the nature of contract merely, can it, as a contract, be peaceably unmade by less than all the parties who made it? One party to a contract may violate it—break it, so to speak; but does it not require all to lawfully rescind it?

Descending from these general principles, we find the proposition that, in legal contemplation the Union is perpetual confirmed by the history of the Union itself. The Union is much older than the Constitution It was formed, in fact, by the Articles of Association in 1774. It was matured and continued by the Declaration of Independence in 1776 It was further matured, and the faith of all the then thirteen states expressly plighted and engaged that it should be perpetual, by the Articles of Confederation in 1778. And, finally, in 1787 one of the declared objects for ordaining and establishing the Constitution was "to form a more perfect Union."

But if the destruction of the Union by one or by a part only of the states be lawfully possible, the Union is less perfect than before the Constitution, having lost the vital element of perpetuity.

It follows from these views that no state upon its own mere motion can lawfully get out of the Union, that resolves and ordinances to that effect are legally void; and that acts of violence, within any state or states, against the authority of the United States, are insurrectionary or revolutionary, according to circumstances.

I therefore consider that, in view of the Constitution and the laws, the Union is unbroken and to the extent of my ability I shall take care, as the Constitution itself expressly enjoins upon me, that the laws of the Union be faithfully executed in all the states. Doing this I deem to be only a simple duty on my part, and I shall perform it so far as practicable, unless my rightful masters, the American people, shall withhold the requisite means, or in some authoritative manner direct the contrary. I trust this will not be regarded as a menace, but only as the declared purpose of the Union that it will constitutionally defend and maintain itself

In doing this there needs to be no bloodshed or violence; and there shall be none, unless it be forced upon the national authority. The power confided to me will be used to hold, occupy, and possess the property and places belonging to the government, and to collect the duties and imposts; but beyond what may be necessary for these objects, there will be no invasion, no using of force against or among the people anywhere. Where hostility to the United States, in any interior locality, shall be so great and universal as to prevent competent resident citizens from holding the federal offices, there will be no attempt to force obnoxious strangers among the people for that object. While the strict legal right may exist in the government to enforce the exercise of these offices, the attempt to do so would be so irritating, and so nearly impracticable withal, that I deem it better to forego for the time the uses of such offices.

The mails, unless repelled, will continue to be furnished in all parts of the Union. So far as possible, the people everywhere shall have that sense of perfect security which is most favorable to calm thought and reflection. The course here indicated will be followed unless current events and experience shall show a modification or change to be proper, and in every case and exigency my best discretion will be exercised according to circumstances actually existing, and with a view and a hope of a peaceful solution of the national troubles and the restoration of fraternal sympathies and affections.

That there are persons in one section or another who seek to destroy the Union at all events, and are glad of any pretext to do it, I will neither affirm nor deny, but if there be such, I need address no word to them. To those, however, who really love the Union may I not speak?

Before entering upon so grave a matter as the destruction of our national fabric, with all its benefits, its memories, and its hopes, would it not be wise to ascertain precisely why we do it? Will you hazard so desperate a step while there is any possibility that any portion of the ills you fly from have no real existence? Will you,

---

31 I therefore consider . . . . This paragraph was added to the original draft • 45 The power confided . . . An earlier version read: "All the power at my disposal will be used to reclaim the public property and places which have fallen, to hold, occupy and possess these and all other properties and places belonging to the government" Browning suggested the use of the less threatening version. The sentence nevertheless was considered by contemporaries the most warlike utterance in the speech • 72 That there are persons . . . . Marginal marks indicated that Lincoln was to emphasize this paragraph

while the certain ills you fly to are greater than all the real ones you fly from—will you risk the commission of so fearful a mistake?

All profess to be content in the Union if all constitutional rights can be maintained. Is it true, then, that any right, plainly written in the Constitution, has been denied? I think not. Happily the human mind is so constituted that no party can reach to the audacity of doing this. Think, if you can, of a single instance in which a plainly written provision of the Constitution has ever been denied. If by the mere force of numbers a majority should deprive a minority of any clearly written constitutional right, it might, in a moral point of view, justify revolution—certainly would if such a right were a vital one. But such is not our case. All the vital rights of minorities and of individuals are so plainly assured to them by affirmations and negations, guarantees and prohibitions, in the Constitution, that controversies never arise concerning them. But no organic law can ever be framed with a provision specifically applicable to every question which may occur in practical administration. No foresight can anticipate, nor any document of reasonable length contain, express provisions for all possible questions. Shall fugitives from labor be surrendered by national or by state authority? The Constitution does not expressly say. *May* Congress prohibit slavery in the territories? The Constitution does not expressly say. *Must* Congress protect slavery in the territories? The Constitution does not expressly say.

From questions of this class spring all our constitutional controversies, and we divide upon them into majorities and minorities. If the minority will not acquiesce, the majority must, or the government must cease. There is no other alternative; for continuing the government is acquiescence on one side or the other.

If a minority in such case will secede rather than acquiesce, they make a precedent which in turn will divide and ruin them; for a minority of their own will secede from them whenever a majority refuses to be controlled by such minority. For instance, why may not any portion of a new confederacy a year or two hence arbitrarily secede again, precisely as portions of the present Union now claim to secede from it? All who cherish disunion sentiments are now being educated to the exact temper of doing this.

Is there such perfect identity of interests among the states to compose a new Union, as to produce harmony only, and prevent renewed secession?

Plainly, the central idea of secession is the essence of anarchy. A majority held in restraint by constitutional checks and limitations, and always changing easily with deliberate changes of popular opinions and sentiments, is the only true sovereign of a free people. Whoever rejects it does, of necessity, fly to anarchy or to despotism. Unanimity is impossible; the rule of a minority, as a permanent arrangement, is wholly inadmissible; so that, rejecting the majority principle, anarchy or despotism in some form is all that is left.

I do not forget the position, assumed by some, that constitutional questions are to be decided by the Supreme Court; nor do I deny that such decisions must be binding, in any case, upon the parties to a suit, as to the object of that suit, while they are also entitled to very high respect and consideration in all parallel cases by all other departments of the government. And while it is obviously possible that such decisions may be erroneous in any given case, still the evil effect following it, being limited to that particular case, with the chance that it may be overruled and never become a precedent for other cases, can better be borne than could the evils of a different practice. At the same time, the candid citizen must confess that if the policy of the government, upon vital questions affecting the whole people, is to be irrevocably fixed by decisions of the Supreme Court, the instant they are made, in ordinary litigation between parties in personal actions, the people will have ceased to be their own rulers, having to that extent practically resigned their government into the hands of that eminent tribunal. Nor is there in this view any assault upon the court or the judges. It is a duty from which they may not shrink to decide cases properly brought before them, and it is no fault of theirs if others seek to turn their decisions to political purposes.

One section of our country believes slavery is right, and ought to be extended, while the other believes it is wrong, and ought not be extended. This is the only substantial dispute. The fugitive-slave clause of the Constitution, and the law for the suppression of the foreign slave-trade, are each as well enforced, perhaps, as any law can ever be in a community where the moral sense of the people imperfectly supports the law itself. The great body of the people abide by the dry legal obligation

in both cases, and a few break over in each. This, I think, cannot be perfectly cured; and it would be worse in both cases after the separation of the sections than before. The foreign slave-trade, now imperfectly suppressed, would be ultimately revived, without restriction, in one section, while fugitive slaves, now only partially surrendered, would not be surrendered at all by the other.

Physically speaking, we cannot separate. We cannot remove our respective sections from each other, nor build an impassable wall between them. A husband and wife may be divorced, and go out of the presence and beyond the reach of each other; but the different parts of our country cannot do this. They cannot but remain face to face, and intercourse, either amicable or hostile, must continue between them. Is it possible, then, to make that intercourse more advantageous or more satisfactory after separation than before? Can aliens make treaties easier than friends can make laws? Can treaties be more faithfully enforced between aliens than laws can among friends? Suppose you go to war, you cannot fight always; and when, after much loss on both sides, and no gain on either, you cease fighting, the identical old questions as to terms of intercourse are again upon you.

This country, with its institutions, belongs to the people who inhabit it. Whenever they shall grow weary of the existing government, they can exercise their constitutional right of amending it, or their revolutionary right to dismember or overthrow it. I cannot be ignorant of the fact that many worthy and patriotic citizens are desirous of having the national Constitution amended. While I make no recommendation of amendments, I fully recognize the rightful authority of the people over the whole subject, to be exercised in either of the modes prescribed in the instrument itself; and I should, under existing circumstances, favor rather than oppose a fair opportunity being afforded the people to act upon it. I will venture to add that to me the convention mode seems preferable, in that it allows amendments to originate with the people themselves, instead of only permitting them to take or reject propositions originated by others not especially chosen for the purpose, and which might not be precisely such as they would wish to either accept or refuse. I understand a proposed amendment to the Constitution—which amendment, however, I have not seen—has passed Congress, to the effect that the federal government shall never interfere with the domestic institutions

of the states, including that of persons held to service. To avoid misconstruction of what I have said, I depart from my purpose not to speak of particular amendments so far as to say that, holding such a provision to now be implied constitutional law, I have no objections to its being made express and irrevocable.

The chief magistrate derives all his authority from the people, and they have conferred none upon him to fix terms for the separation of the states. The people themselves can do this also if they choose; but the executive, as such, has nothing to do with it. His duty is to administer the present government, as it came to his hands, and to transmit it, unimpaired by him, to his successor.

Why should there not be a patient confidence in the ultimate justice of the people? Is there any better or equal hope in the world? In our present differences is either party without faith of being in the right? If the Almighty Ruler of Nations, with His eternal truth and justice, be on your side of the North, or on yours of the South, that truth and that justice will surely prevail by the judgment of this great tribunal of the American people.

By the frame of the government under which we live, this same people have wisely given their public servants but little power for mischief; and have, with equal wisdom, provided for the return of that little to their own hands at very short intervals. While the people retain their virtue and vigilance, no administration, by any extreme of wickedness or folly, can very seriously injure the government in the short space of four years.

My countrymen, one and all, think calmly and well upon this whole subject. Nothing valuable can be lost by taking time. If there be an object to hurry any of you in hot haste to a step which you would never take

---

77 My countrymen . . . . The paragraph was marked for oral emphasis

deliberately, that object will be frustrated by taking time; but no good object can be frustrated by it. Such of you as are now dissatisfied, still have the old Constitution unimpaired, and, on the sensitive point, the laws of your own framing under it; while the new administration will have no immediate power, if it would, to change either. If it were admitted that you who are dissatisfied hold the right side in the dispute, there still is no single good reason for precipitate action. Intelligence, patriotism, Christianity, and a firm reliance on Him who has never yet forsaken this favored land, are still competent to adjust in the best way all our present difficulty.

In your hands, my dissatisfied fellow-countrymen, and not in mine, is the momentous issue of civil war. The government will not assail you. You can have no conflict without being yourselves the aggressors. You have no oath registered in heaven to destroy the government, while I shall have the most solemn one to "preserve, protect, and defend it."

I am loath to close. We are not enemies, but friends. We must not be enemies. Though passion may have strained, it must not break our bonds of affection. The mystic chords of memory, stretching from every battlefield and patriot grave to every living heart and hearthstone all over this broad land, will yet swell the chorus of the Union when again touched, as surely they will be, by the better angels of our nature.

1861

---

21 I am loath . . . . This, at Seward's suggestion, replaced a more aggressive conclusion: "You can forbear the assault upon it [the Government], I cannot shrink from the defense of it. With you, and not with me, is the solemn question of 'shall it be peace, or a sword?' " Seward, wanting "some words of affection, some of calm and cheerful confidence," suggested "I close. We are not we must not be aliens or enemies but fellow countrymen and brethren. Although passion has strained our bonds of affection too hardly they must not, I am sure they will not be broken. The mystic chords which proceeding from so many battle fields and so many patriot graves pass through all the hearts and all the hearths in this broad continent of ours will yet again harmonize in their ancient music when breathed upon by the guardian angel of the nation"

Open Letter to Horace Greeley

Horace Greeley, famous and influential editor of the New York Tribune, in the issue of August 19, 1862, published an editorial—"The Prayer of 20,000,000 People." It urged complete emancipation of the slaves and indicated doubt concerning Lincoln's policies. Actually, the "Emancipation Proclamation" had already been written, and Lincoln was only waiting for a Union victory which would make politic its publication. The letter which Lincoln wrote in answer to Greeley's attack contains a clear and eloquent statement of the President's policy.

Executive Mansion, Washington,
August 22, 1862

Hon. Horace Greeley.

Dear Sir: I have just read yours of the 19th, addressed to myself through the New York *Tribune.* If there be in it any statements or assumptions of fact which I may know to be erroneous, I do not, now and here, controvert them. If there be in it any inferences which I may believe to be falsely drawn, I do not, now and here, argue against them. If there be perceptible in it an impatient and dictatorial tone, I waive it in deference to an old friend whose heart I have always supposed to be right.

As to the policy I "seem to be pursuing," as you say, I have not meant to leave any one in doubt.

I would save the Union. I would save it the shortest way under the Constitution. The sooner the national authority can be restored, the nearer the Union will be "the Union as it was." If there be those who would not save the Union unless they could at the same time save slavery, I do not agree with them. If there be those who would not save the Union unless they could at the same

time destroy slavery, I do not agree with them. My paramount object in this struggle is to save the Union, and is not either to save or to destroy slavery. If I could save the Union without freeing any slave, I would do it; and if I could save it by freeing all the slaves, I would do it; and if I could save it by freeing some and leaving others alone, I would also do that. What I do about slavery and the coloured race, I do because I believe it helps to save the Union; and what I forbear, I forbear because I do not believe it would help to save the Union. I shall do less whenever I shall believe what I am doing hurts the cause, and I shall do more whenever I shall believe doing more will help the cause. I shall try to correct errors when shown to be errors, and I shall adopt new views so fast as they shall appear to be true views.

I have here stated my purpose according to my view of official duty; and I intend no modification of my oft-expressed personal wish that all men everywhere could be free.

Yours,

A. LINCOLN

1862

The Gettysburg Address

In September 1863, the dedication of the Gettysburg National Cemetery was planned for the following October 23, but when Edward Everett, a renowned orator of the day, wrote that he could not prepare his oration in so short a time, the date was moved along to November 19. The request that Lincoln speak was an afterthought: the committee asked him, "as Chief Executive," to set apart the grounds "by a few appropriate remarks."

Busy with military and civil duties, the President found little time for composing his brief speech and actually did some work on it the night before its delivery. Lincoln, many of his friends, and most newsmen at the ceremonies thought it was not much of an address; but Everett wrote on November 20: "I should be glad if I could flatter myself that I came as near to the central idea of the occasion in two hours as you did in two minutes." Later, Americans were to come to regard the address as one of the noblest utterances in American history.

The simplicity of the diction, the impressive rhythm, and the majesty of the thought of the address account for much of its appeal. Important, too, is an ordering of the material more complex than at first evident. The treatment of the past, then the present, and, finally, the future is strengthened throughout by a subtle analogy of birth, death, and rebirth. In mentioning the continent, then the nation, then the battlefield, then a portion of the battlefield, Lincoln parallels in a sense the movement which begins with the great accomplishment of the founding fathers, then narrows down to the futile ceremonies at Gettysburg. He thus prepares for a triumphant conclusion which from another view enlarges the true significance of the occasion by noting the vast accomplishment of the heroic dead for the nation and for all the earth.

Four score and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting-place for those who here

---

1 **Four score and seven years ago . . . .** Scholars have noted that Robert Toombs of Georgia in 1850 began a speech. "Sixty years ago our fathers joined together to form a more perfect Union and establish justice . . . . We have now met to put that government on trial . . . In my judgment the verdict is such as to give hope to the friends of liberty throughout the world." Lincoln, speaking to a crowd of serenaders, four and a half months before the dedication, had mentioned the founding of the republic "eighty odd years since" • 8 **We have come . . .** originally read, "We are met . . ."

gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But in a larger sense we cannot dedicate, we cannot consecrate, we cannot hallow this ground. The brave men, living and dead, who struggled here have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us,—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion; that we here highly resolve that these dead shall not have died in vain; that this nation, under God, shall have a new birth of freedom; and that government of the people, by the people, and for the people, shall not perish from the earth.

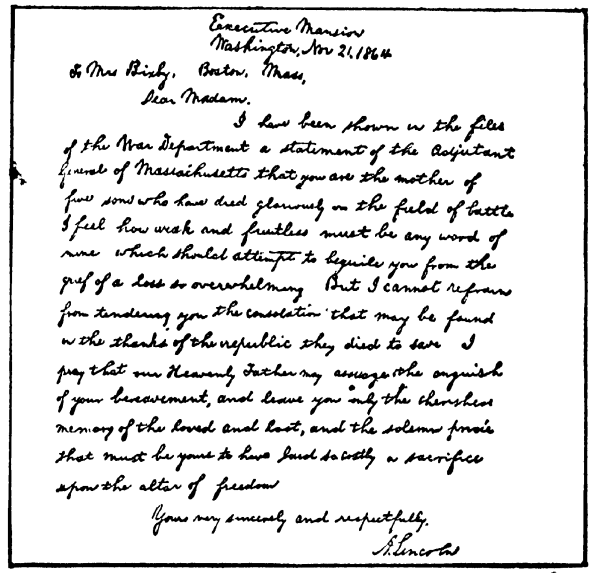
1863

1 **It is altogether fitting . . . .** The sentence replaced an earlier phrasing, "This we may, in all propriety do" • 16 **under God.** The phrase was not in the copy from which Lincoln read; he apparently inserted it orally while reading • 17 **a new birth of freedom.** The **Chicago Times** criticized this phrase as a misrepresentation of "the motives of men who were slain at Gettysburg." "They gave their lives," said the paper, "to maintain the old government, and the only Constitution and Union." Thus some, at least, saw Lincoln voicing in this phrase his "odious abolition doctrines"

Letter to Mrs. Bixby

This letter was written to a woman who purportedly had heard news of the death of five of her sons on the battlefield. James Bryce, a great English scholar and an admirer of Lincoln, called it "perhaps the most impressive" of Lincoln's letters, and added, "It is short, and it deals with a theme on which hundreds of letters were written daily. But I do not know where the nobility of self-sacrifice for a great cause, and of the consolation which the thought of a sacrifice so made may bring, is set forth with such simple and pathetic beauty."

Executive Mansion
Washington, Nov. 21, 1864



To Mrs. Bixby, Boston, Mass.

Dear Madam. I have been shown in the files of the War Department a statement of the Adjutant-General of Massachusetts that you are the mother of five sons who have died gloriously on the field of battle. I feel how weak and fruitless must be any word of mine which should attempt to beguile you from the grief of a loss so overwhelming. But I cannot refrain from tendering you the consolation that may be found in the thanks of the republic they died to save. I pray that our Heavenly Father may assuage the anguish of your bereavement, and leave you only the cherished memory of the loved and lost, and the solemn pride that must be yours to have laid so costly a sacrifice upon the altar of freedom.

Yours very sincerely and respectfully,

A. LINCOLN

1864

Executive Mansion
Washington, Nov 21, 1864

To Mrs Bixby, Boston, Mass,

Dear Madam.

I have been shown in the files of the War Department a statement of the Adjutant General of Massachusetts that you are the mother of five sons who have died gloriously on the field of battle I feel how weak and fruitless must be any word of mine which should attempt to beguile you from the grief of a loss so overwhelming But I cannot refrain from tendering you the consolation that may be found in the thanks of the republic they died to save I pray that our Heavenly Father may assuage the anguish of your bereavement, and leave you only the cherished memory of the loved and lost, and the solemn pride that must be yours to have laid so costly a sacrifice upon the altar of freedom

Yours very sincerely and respectfully.

A. Lincoln

Second Inaugural Address

"What think you of the inaugural?" wrote Charles Francis Adams, Jr., to his father, shortly after its delivery, March 4, 1865. "That rail-splitting lawyer is one of the wonders of the day. Once at Gettysburg and now again on a greater occasion he has shown a capacity for rising to the demands of the hour. . . . This inaugural strikes me in its grand simplicity and directness as being for all time the historical keynote of this war. . . ."

Mr. Carl Sandburg indicated the situation at the time the address was delivered when he said in his biography of Lincoln: "On Grant now menacing Lee before Richmond, on Sherman thrusting agony into the vitals of South Carolina—on these final struggles depended the length of the storm not yet spent. And on what the Chief Magistrate might have to say, on his words now, such had become his stature and place, depended much of the face of events and the character of what was to happen when the war was over. This no one understood more deeply and sensitively than Lincoln as he wrote his second inaugural address."

Fellow-Countrymen: At this second appearing to take the oath of the presidential office, there is less occasion for an extended address than there was at the first. Then a statement, somewhat in detail, of a course to be pursued, seemed fitting and proper. Now, at the expiration of four years, during which public declarations have been constantly called forth on every point and phase of the great contest which still absorbs the attention and engrosses the energies of the nation, little that is new could be presented. The progress of our arms, upon which all else chiefly depends, is as well known to the public as to myself; and it is, I trust, reasonably satisfactory and encouraging to all. With high hope for the future, no prediction in regard to it is ventured.

On the occasion corresponding to this four years ago, all thoughts were anxiously directed to an impending civil war. All dreaded it—all sought to avert it. While the inaugural address was being delivered from this place, devoted altogether to saving the Union without war, insurgent agents were in the city seeking to destroy it without war—seeking to dissolve the Union, and divide effects, by negotiation. Both parties deprecated war; but one of them would make war rather than let the nation survive, and the other would accept war rather than let it perish. And the war came.

One eighth of the whole population were colored slaves, not distributed generally over the Union, but localized in the southern part of it. These slaves constituted a peculiar and powerful interest. All knew that this interest was, somehow, the cause of the war. To strengthen, perpetuate, and extend this interest was the object for which the insurgents would rend the Union, even by war; while the government claimed no right to do more than to restrict the territorial enlargement of it.

Neither party expected for the war the magnitude or the duration which it has already attained. Neither anticipated that the cause of the conflict might cease with, or even before, the conflict itself should cease. Each looked for an easier triumph and a result less fundamental and astounding. Both read the same Bible, and pray to the same God; and each invokes his aid against the other. It may seem strange that any man should dare to ask a just God's assistance in wringing their bread from the sweat of other men's faces; but let us judge not, that we be not judged. The prayers of both could not be answered—that of neither has been answered fully.

The Almighty has his own purposes. "Woe unto the world because of offenses! for it must needs be that offenses come; but woe to that man by whom the offense cometh." If we shall suppose that American slavery is one of those offenses which in the providence of God, must needs come, but which, having continued through his appointed time, he now wills to remove, and that he gives to both North and South this terrible war, as the woe due to those by whom the offense came, shall we discern therein any departure from those divine attributes which the believers in a living God always ascribe to him? Fondly do we hope—fervently do we pray—that

this mighty scourge of war may speedily pass away. Yet, if God wills that it continue until all the wealth piled by the bondman's two hundred and fifty years of unrequited toil shall be sunk, and until every drop of blood drawn with the lash shall be paid by another drawn with the sword, as was said three thousand years ago, so still it must be said, "The judgments of the Lord are true and righteous altogether."

With malice toward none; with charity for all; with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in; to bind up the nation's wounds; to care for him who shall have borne the battle, and for his widow and his orphan—to do all which may achieve and cherish a just and lasting peace among ourselves, and with all nations.

1865

WHITMAN

Walt Whitman

1819 • 1892

Eighteen fifty-five was a year of epoch-making importance in the history of American literature, for in that year appeared the first edition of Walt Whitman's *Leaves of Grass.* Emerson read the book, and wrote enthusiastically to its author: "I greet you at the beginning of a great career, which yet must have had a long foreground somewhere for such a start." Whitman was thirty-six when the *Leaves* first appeared; there had been a long foreground of preparation, the best record of which is found in his autobiographical prose work, *Specimen Days.*

The son of a carpenter, Whitman was born on Long Island (which he preferred to call by its Indian name,

---

Panel (l. to r.): Brooklyn and the ferry in the 1850's • Walt Whitman at 36 • Jamaica Village, Long Island, where Whitman taught school

Paumanok), and spent his early life on Long Island and in Brooklyn and New York. "All along the island and its shores," he tells us in *Specimen Days,* "I spent intervals many years, all seasons, sometimes riding, sometimes boating, but generally afoot, absorbing fields, shores, marine incidents, characters, the bay-men, farmers, pilots. . . ." He went frequently to Coney Island, "at that time, a long, bare, unfrequented shore, which I had all to myself, and where I loved, after bathing, to race up and down the hard sand, and declaim Homer or Shakespeare to the surf and sea-gulls by the hour." He attended the public schools of Brooklyn, read omnivorously, listened to Elias Hicks, a Quaker preacher (the Quaker influence is important in Whitman; his mother's family were Quakers). Other early experiences included participating in a debating society, working in printing offices, and teaching country schools on Long Island and "boarding round." "This latter," he said, "I consider one of my best experiences and deepest lessons in human nature behind the scenes." He enjoyed the ferry boats and their pilots, the Broadway omnibuses and their drivers He had an enormous enthusiasm, moreover, for the theater; he lists in *Specimen Days* the names of plays and actors, of operas and singers, familiar to him in those formative years. In the 1840's he was connected with various newspapers, including the Brooklyn *Daily Eagle,* which he edited in 1846-1847. His knowledge of American life was further enlarged in 1848 by a leisurely journey down the Ohio and Mississippi to New Orleans, a stay of two or three months in that city, and the return journey by way of Chicago and the Great Lakes. (Some biographers have believed—the evidence is not convincing—that while in New Orleans, Whitman had a passionate and transforming love affair.) Upon his return to Brooklyn, he resumed journalistic work and assisted his father in the building of houses. All of these experiences, and many more, in Whitman's expressive phrase, "entered into the gestation of *Leaves of Grass.*" What the decisive influence was which made of Whitman the poet of the *Leaves*—if, indeed, any such influence can ever be posited—no one knows, though it seems reasonable to believe that his reading of Emerson (the essay "The Poet," for example) must have had a quickening effect.

Whitman was not a soldier in the Civil War, but he was none the less one of the war's real heroes. He served indefatigably as a volunteer nurse in the Washington hospitals, distributing knickknacks among the soldiers, writing letters home, radiating cheerfulness and the will to live. He records typical cases in *Specimen Days:* "J.G. lies in bed 52, Ward I; is of Company B, 7th Pennsylvania. I gave him a small sum of money, some tobacco and envelopes. . . . Bed 3, Ward E, Armory, has a great hankering for pickles, something pungent. After consulting the doctor, I gave him a small bottle of horse-radish; also some apples; also a book. . . . Marcus Small, Company K, 7th Maine, sick with dysentery and typhoid fever. . . . I write a letter for him home to East Livermore, Maine." He was supplied with funds, he tells us, "by good women and men in Boston, Salem, Providence, Brooklyn, and New York." He also visited the camp hospitals of the Army of the Potomac in Virginia. Some of his best poems (*Drum-Taps,* 1865) came out of these war experiences. His hitherto magnificent health, however, suffered under the strain and exposure. In the summer of 1864 he was ill with "hospital malaria," from the effects of which he never fully recovered. In 1873 he had a paralytic stroke, and he continued a partial invalid during the remaining nineteen years of his life.

Some ten editions of *Leaves of Grass* were published during Whitman's lifetime. In each succeeding edition, new poems were added and the old poems were considerably revised. His poems were strenuously objected to because of their "formlessness," and still more because of their frank treatment of sex. Emerson tried to persuade Whitman, before the publication of the third edition of the *Leaves* in 1860, to omit the more offensive passages, but Whitman was too well grounded in the Emersonian doctrine of "self-reliance" to heed Emerson's advice. In 1865 Whitman was dismissed by Secretary Harlan from a clerkship in the Department of the Interior on the charge that he was the author of an "indecent book," and W. D. O'Connor wrote his famous defense, *The Good Gray Poet.* The objections to Whitman's "formlessness" and "sensuality" have, no doubt, a measure of validity even today. It is to be noted, however, that his later work is less open to these objections. A study of Whitman's poetic development reveals an increasing mastery of form. Moreover, the later verses are less physical. "I am the poet of the Body and I am the poet of the Soul," he proclaimed in the "Song of Myself" (1855), and he was always both. But the em-

phasis in the earlier work is upon the flesh, "the jolly bodily phase," and in the later, upon the spirit. In "When Lilacs Last in the Dooryard Bloom'd" (1865), this lover of the body wrote a lyrical hymn to Death, "the strong deliveress." In "Passage to India" (1871), the soul is mystically released from the prison house of the flesh.

Whitman was the poet of America and American democracy. He attempted to embrace the whole of America —an impossible task for a poet. But Whitman succeeded as well in that direction, perhaps, as it is poetically possible to do. He celebrated the westward course of empire. He found his subjects among all sorts and conditions: his catalogues symbolize the equalizing processes of democracy. He asserted "the majesty and reality of the American people *en masse.*" He envisaged, in "Thou Mother with Thy Equal Brood" (1872), an artistic and moral growth:

> Thee in thy own musicians, singers, artists,
> unborn yet, but certain,
> Thee in thy moral wealth and civilization
> (until which thy proudest material civilization must remain in vain) . . .
> I prophesy.

Above all, he saw America as a nation of free individuals. Newton Arvin's view that Whitman desired a "socialist" state is difficult to accept. Despite his fondness for the phrase *en masse*, his poetry everywhere exalts the individual. To Whitman as to Emerson, the individual was supreme:

> All forces have been steadily employed to complete and delight me;
> Now on this spot I stand with my robust soul.

Whitman's poetry was original and revolutionary and indisputably American. He broke with the conventions and traditions of English verse. Of the composition of his poems he said, "I had great trouble in leaving out the stock 'poetical' touches, but succeeded at last." He employed free rhythms, which are comparable with those of the Old Testament. There have been, and are still, sharp differences of opinion as to the absolute merit of his work as poetry. Intellectual critics object to his emotionalism and vagueness; formal critics, to his lack of close structure; academic critics, to his apotheosis of the uncultivated. But there can be no question of his power and influence. (His influence has been particularly noticeable in the work of poets like Lindsay and Sandburg.) Even if one reads his poems with certain critical reservations, one responds, as did Thoreau, to Whitman's "alarum or trumpet-note ringing through the American camp" and feels the peculiar magnetic force of

> Camerado, this is no book;
> Who touches this, touches a man.

Preface to 1855 Edition of "Leaves of Grass"

The following Preface epitomizes better than any other single selection Whitman's philosophy and his aims in literature. Parts of the Preface were later incorporated, with only minor changes, in the poem "By Blue Ontario's Shore."

America does not repel the past or what it has produced under its forms or amid other politics or the idea of castes or the old religions . . . accepts the lesson with calmness . . . is not so impatient as has been supposed that the slough still sticks to opinions and manners and literature while the life which served its requirements has passed into the new life of the new forms . . . perceives that the corpse is slowly borne from the eating and sleeping rooms of the house . . . perceives that it

3 religions. . . . The dots are Whitman's throughout and do not indicate omissions

vaits a little while in the door . . . that it was fittest for ts days . . . that its action has descended to the stalwart nd wellshaped heir who approaches . . . and that he hall be fittest for his days.

The Americans of all nations at any time upon the arth have probably the fullest poetical nature. The Jnited States themselves are essentially the greatest oem. In the history of the earth hitherto the largest and nost stirring appear tame and orderly to their ampler argeness and stir. Here at last is something in the doings f man that corresponds with the broadcast doings of he day and night. Here is not merely a nation but a eeming nation of nations. Here is action untied from trings necessarily blind to particulars and details magnificently moving in vast masses. Here is the hospitality vhich forever indicates heroes. . . . Here are the roughs nd beards and space and ruggedness and nonchalance hat the soul loves. Here the performance disdaining the rivial unapproached in the tremendous audacity of its rowds and groupings and the push of its perspective preads with crampless and flowing breadth and showers ts prolific and splendid extravagance. One sees it must ndeed own the riches of the summer and winter, and need never be bankrupt while corn grows from the ground or the orchards drop apples or the bays contain ish or men beget children upon women.

Other states indicate themselves in their deputies . . . but the genius of the United States is not best or most n its executives or legislatures, nor in its ambassadors or authors or colleges or churches or parlors, nor even in ts newspapers or inventors . . . but always most in the common people. Their manners speech dress friendships —the freshness and candor of their physiognomy—the picturesque looseness of their carriage . . . their deathess attachment to freedom—their aversion to anything ndecorous or soft or mean—the practical acknowledgnent of the citizens of one state by the citizens of all other states—the fierceness of their roused resentment—heir curiosity and welcome of novelty—their self-esteem nd wonderful sympathy—their susceptibility to a slight —the air they have of persons who never knew how it elt to stand in the presence of superiors—the fluency of heir speech—their delight in music, the sure symptom of manly tenderness and native elegance of soul . . . their good temper and open-handedness—the terrible significance of their elections—the President's taking off his hat to them not they to him—these too are unrhymed poetry. It awaits the gigantic and generous treatment worthy of it.

The largeness of nature or the nation were monstrous without a corresponding largeness and generosity of the spirit of the citizen. Not nature nor swarming states nor streets and steamships nor prosperous business nor farms nor capital nor learning may suffice for the ideal of man . . . nor suffice the poet. No reminiscences may suffice either. A live nation can always cut a deep mark and can have the best authority the cheapest . . . namely from its own soul. This is the sum of the profitable uses of individuals or states and of present action and grandeur and of the subjects of poets.—As if it were necessary to trot back generation after generation to the eastern records! As if the beauty and sacredness of the demonstrable must fall behind that of the mythical! As if men do not make their mark out of any times! As if the opening of the western continent by discovery and what has transpired since in North and South America were less than the small theatre of the antique or the aimless sleepwalking of the middle ages! The pride of the United States leaves the wealth and finesse of the cities and all returns of commerce and agriculture and all the magnitude of geography or shows of exterior victory to enjoy the breed of full sized men or one full sized man unconquerable and simple.

The American poets are to enclose old and new for America is the race of races. Of them a bard is to be commensurate with a people. To him the other continents arrive as contributions . . . he gives them reception for their sake and his own sake. His spirit responds to his country's spirit . . . he incarnates its geography and natural life and rivers and lakes. Mississippi with annual freshets and changing chutes, Missouri and Columbia and Ohio and Saint Lawrence with the falls and beautiful masculine Hudson, do not embouchure where they spend themselves more than they embouchure into him. The blue breadth over the inland sea of Virginia and Maryland and the sea off Massachusetts and Maine and over Manhattan bay and over Champlain and Erie and over Ontario and Huron and Michigan and Superior, and over

---

83 embouchure, used here as a verb meaning to pour or empty. The word is properly a noun meaning "mouth"

the Texan and Mexican and Floridian and Cuban seas and over the seas off California and Oregon, is not tallied by the blue breadth of the waters below more than the breadth of above and below is tallied by him. When the long Atlantic coast stretches longer and the Pacific coast stretches longer he easily stretches with them north or south. He spans between them also from east to west and reflects what is between them. On him rise solid growths that offset the growths of pine and cedar and hemlock and liveoak and locust and chestnut and cypress and hickory and limetree and cottonwood and tuliptree and cactus and wildvine and tamarind and persimmon . . . and tangles as tangled as any canebreak or swamp . . . and forests coated with transparent ice and icicles hanging from the boughs and crackling in the wind . . . and sides and peaks of mountains . . . and pasturage sweet and free as savannah or upland or prairie . . . with flights and songs and screams that answer those of the wild-pigeon and highhold and orchard-oriole and coot and surf-duck and redshouldered-hawk and fish-hawk and white-ibis and indianhen and cat-owl and water-pheasant and qua-bird and pied-sheldrake and blackbird and mockingbird and buzzard and condor and night-heron and eagle. To him the hereditary countenance descends both mother's and father's. To him enter the essences of the real things and past and present events—of the enormous diversity of temperature and agriculture and mines—the tribes of red aborigines—the weather-beaten vessels entering new ports or making landings on rocky coasts—the first settlements north or south—the rapid stature and muscle—the haughty defiance of '76, and the war and peace and formation of the constitution . . . the union always surrounded by blatherers and always calm and impregnable—the perpetual coming of immigrants —the wharf-hem'd cities and superior marine—the unsurveyed interior—the loghouses and clearings and wild animals and hunters and trappers . . . the free commerce —the fisheries and whaling and gold-digging—the endless gestation of new states--the convening of Congress every December, the members duly coming up from all climates and the uttermost parts . . . the noble character of the young mechanics and of all free American workmen and workwomen . . . the general ardor and friendliness and enterprise—the perfect equality of the female with the male . . . the large amativeness—the fluid movement of the population—the factories and mercantile life and laborsaving machinery—the Yankee swap—the New-York firemen and the target excursion—the southern plantation life—the character of the northeast and of the northwest and southwest—slavery and the tremulous spreading of hands to protect it, and the stern opposition to it which shall never cease till it ceases or the speaking of tongues and the moving of lips cease. For such the expression of the American poet is to be transcendant and new. It is to be indirect and not direct or descriptive or epic. Its quality goes through these to much more. Let the age and wars of other nations be chanted and their eras and characters be illustrated and that finish the verse. Not so the great psalms of the republic. Here the theme is creative and has vista. Here comes one among the well-beloved stonecutters and plans with decision and science and sees the solid and beautiful forms of the future where there are now no solid forms.

Of all nations the United States with veins full of poetical stuff most need poets and will doubtless have the greatest and use them the greatest. Their Presidents shall not be their common referee so much as their poets shall. Of all mankind the great poet is the equable man. Not in him but off from him things are grotesque or eccentric or fail of their sanity. Nothing out of its place is good and nothing in its place is bad. He bestows on every object or quality its fit proportions neither more nor less. He is the arbiter of the diverse and he is the key. He is the equalizer of his age and land . . . he supplies what wants supplying and checks what wants checking. If peace is the routine out of him speaks the spirit of peace, large, rich, thrifty, building vast and populous cities, encouraging agriculture and the arts and commerce—lighting the study of man, the soul, immortality—federal, state or municipal government, marriage, health, free trade, inter-travel by land and sea . . . nothing too close, nothing too far off . . . the stars not too far off. In war he is the most deadly force of the war. Who recruits him recruits horse and foot . . . he fetches parks of

---

19 highhold, woodpecker • 19 coot, a ducklike bird • 22 qua-bird, the heron • 45 amativeness, the capacity for physical love, a term from phrenology. For Whitman's interest in phrenology, see Edward Hungerford, "Walt Whitman and his Chart of Bumps," American Literature, January 1931

ecomes slothful and heavy he knows how to arouse it . . . he can make every word he speaks draw blood. Whatever stagnates in the flat of custom or obedience ir legislation he never stagnates. Obedience does not naster him, he masters it. High up out of reach he stands urning a concentrated light . . . he turns the pivot with iis finger . . . he baffles the swiftest runners as he stands nd easily overtakes and envelops them. The time traying toward infidelity and confections and persiflage ie withholds by his steady faith . . . he spreads out his lishes . . . he offers the sweet firmfibred meat that grows nen and women. His brain is the ultimate brain. He is io arguer . . . he is judgment. He judges not as the udge judges but as the sun falling around a helpless hing. As he sees the farthest he has the most faith. His houghts are the hymns of the praise of things. In the alk on the soul and eternity and God off of his equal plane he is silent. He sees eternity less like a play with prologue and denouement . . . he sees eternity in men nd women . . . he does not see men and women as lreams or dots. Faith is the antiseptic of the soul . . . it ervades the common people and preserves them . . . hey never give up believing and expecting and trusting. There is that indescribable freshness and unconciousness about an illiterate person that humbles and nocks the power of the noblest expressive genius. The poet sees for a certainty how one not a great artist may e just as sacred as the greatest artist. . . . The power to lestroy or remould is freely used by him but never the power of attack. What is past is past. If he does not expose superior models and prove himself by every step ie takes he is not what is wanted. The presence of the greatest poet conquers . . . not parleying or struggling or any prepared attempts. Now he has passed that way see after him! there is not left any vestige of despair or misanthropy or cunning or exclusiveness or the ignominy of a nativity or color or delusion of hell or the necessity of hell . . . and no man thenceforward shall be degraded for ignorance or weakness or sin.

The greatest poet hardly knows pettiness or triviality. If he breathes into any thing that was before thought small it dilates with the grandeur and life of the universe. He is a seer . . . he is individual . . . he is complete in himself . . . the others are as good as he, only he sees it and they do not. He is not one of the chorus . . . he or regulation. What the eyesight does to the rest he does to the rest. Who knows the curious mystery of the eyesight? The other senses corroborate themselves, but this is removed from any proof but its own and foreruns the identities of the spiritual world. A single glance of it mocks all the investigations of man and all the instruments and books of the earth and all reasoning. What is marvelous? what is unlikely? what is impossible or baseless or vague? after you have once just opened the space of a peachpit and given audience to far and near and to the sunset and had all things enter with electric swiftness softly and duly without confusion or jostling or jam.

The land and sea, the animals fishes and birds, the sky of heaven and the orbs, the forests mountains and rivers, are not small themes . . . but folks expect of the poet to indicate more than the beauty and dignity which always attach to dumb real objects . . . they expect him to indicate the path between reality and their souls. Men and women perceive the beauty well enough . . . probably as well as he. The passionate tenacity of hunters, woodmen, early risers, cultivators of gardens and orchards and fields, the love of healthy women for the manly form, seafaring persons, drivers of horses, the passion for light and the open air, all is an old varied sign of the unfailing perception of beauty and of a residence of the poetic in outdoor people. They can never be assisted by poets to perceive . . . some may but they never can. The poetic quality is not marshalled in rhyme or uniformity or abstract addresses to things nor in melancholy complaints or good precepts, but is the life of these and much else and is in the soul. The profit of rhyme is that it drops seeds of a sweeter and more luxuriant rhyme, and of uniformity that it conveys itself into its own roots in the ground out of sight. The rhyme and uniformity of perfect poems show the free growth of metrical laws and bud from them as unerringly and loosely as lilacs or roses on a bush, and take shapes as compact as the shapes of chestnuts and oranges and melons and pears, and shed the perfume impalpable to form. The fluency and ornaments of the finest poems or music or orations or recitations are not independent but dependent. All beauty comes from beautiful blood and a beautiful brain. If the greatnesses are in conjunction in a man or woman it is enough . . . the fact will prevail

through the universe . . . but the gaggery and gilt of a million years will not prevail. Who troubles himself about his ornaments or fluency is lost. This is what you shall do: Love the earth and sun and the animals, despise riches, give alms to every one that asks, stand up for the stupid and crazy, devote your income and labor to others, hate tyrants, argue not concerning God, have patience and indulgence toward the people, take off your hat to nothing known or unknown or to any man or number of men, go freely with powerful uneducated persons and with the young and with the mothers of families, read these leaves in the open air every season of every year of your life, re-examine all you have been told at school or church or in any book, dismiss whatever insults your own soul, and your very flesh shall be a great poem and have the richest fluency not only in its words but in the silent lines of its lips and face and between the lashes of your eyes and in every motion and joint of your body. . . . The poet shall not spend his time in unneeded work. He shall know that the ground is always ready plowed and manured . . . others may not know it but he shall. He shall go directly to the creation. His trust shall master the trust of everything he touches . . . and shall master all attachment.

The known universe has one complete lover and that is the greatest poet. He consumes an eternal passion and is indifferent which chance happens and which possible contingency of fortune or misfortune and persuades daily and hourly his delicious pay. What balks or breaks others is fuel for his burning progress to contact and amorous joy. Other proportions of the reception of pleasure dwindle to nothing to his proportions. All expected from heaven or from the highest he is rapport with in the sight of the daybreak or a scene of the winterwoods or the presence of children playing or with his arm round the neck of a man or woman His love above all love has leisure and expanse . . . he leaves room ahead of himself. He is no irresolute or suspicious lover . . . he is sure . . . he scorns intervals. His experience and the showers and thrills are not for nothing. Nothing can jar him . . . suffering and darkness cannot—death and fear cannot. To him complaint and jealousy and envy are corpses buried and rotten in the earth . . . he saw them buried. The sea is not surer of the shore or the shore of the sea than he is of the fruition of his love and of all perfection and beauty.

The fruition of beauty is no chance of hit or miss . . . it is inevitable as life . . . it is exact and plumb as gravitation. From the eyesight proceeds another eyesight and from the hearing proceeds another hearing and from the voice proceeds another voice eternally curious of the harmony of things with man. To these respond perfections not only in the committees that were supposed to stand for the rest but in the rest themselves just the same. These understand the law of perfection in masses and floods . . . that its finish is to each for itself and onward from itself . . . that it is profuse and impartial . . . that there is not a minute of the light or dark nor an acre of the earth or sea without it—nor any direction of the sky nor any trade or employment nor any turn of events. This is the reason that about the proper expression of beauty there is precision and balance . . . one part does not need to be thrust above another. The best singer is not the one who has the most lithe and powerful organ . . . the pleasure of poems is not in them that take the handsomest measure and similes and sound.

Without effort and without exposing in the least how it is done the greatest poet brings the spirit of any or all events and passions and scenes and persons some more and some less to bear on your individual character as you hear or read. To do this well is to compete with the laws that pursue and follow time. What is the purpose must surely be there and the clue of it must be there . . . and the faintest indication is the indication of the best and then becomes the clearest indication. Past and present and future are not disjoined but joined. The greatest poet forms the consistence of what is to be from what has been and is. He drags the dead out of their coffins and stands them again on their feet . . . he says to the past, Rise and walk before me that I may realize you. He learns the lesson . . . he places himself where the future becomes present. The greatest poet does not only dazzle his rays over character and scenes and passions . . . he finally ascends and finishes all . . . he exhibits the pinnacles that no man can tell what they are for or what is beyond . . . he glows a moment on the extremest verge. He is most wonderful in his last half-hidden smile or frown . . . by that flash of the moment of parting the one that sees it shall be encouraged or terrified after-

---

1 gaggery, joking ridicule

wards for many years. The greatest poet does not moralize or make applications of morals . . . he knows the soul. The soul has that measureless pride which consists in never acknowledging any lessons but its own. But it has sympathy as measureless as its pride and the one balances the other and neither can stretch too far while it stretches in company with the other. The inmost secrets of art sleep with the twain. The greatest poet has lain close betwixt both and they are vital in his style and thoughts.

The art of art, the glory of expression and the sunshine of the light of letters is simplicity. Nothing is better than simplicity . . . nothing can make up for excess or for the lack of definiteness. To carry on the heave of impulse and pierce intellectual depths and give all subjects their articulations are powers neither common nor very uncommon. But to speak in literature with the perfect rectitude and insouciance of the movements of animals and the unimpeachableness of the sentiment of trees in the woods and grass by the roadside is the flawless triumph of art. If you have looked on him who has achieved it you have looked on one of the masters of the artists of all nations and times. You shall not contemplate the flight of the graygull over the bay or the mettlesome action of the blood horse or the tall leaning of sunflowers on their stalk or the appearance of the sun journeying through heaven or the appearance of the moon afterward with any more satisfaction than you shall contemplate him. The greatest poet has less a marked style and is more the channel of thoughts and things without increase or diminution, and is the free channel of himself. He swears to his art, I will not be meddlesome, I will not have in my writing any elegance or effect or originality to hang in the way between me and the rest like curtains. I will have nothing hang in the way, not the richest curtains. What I tell I tell for precisely what it is. Let who may exalt or startle or fascinate or soothe I will have purposes as health or heat or snow has and be as regardless of observation. What I experience or portray shall go from my composition without a shred of my composition. You shall stand by my side and look in the mirror with me.

The old red blood and stainless gentility of great poets will be proved by their unconstraint. A heroic person walks at his ease through and out of that custom or precedent or authority that suits him not. Of the traits of the brotherhood of writers savans music inventors and artists nothing is finer than silent defia advancing from new free forms. In the need of po philosophy politics mechanism science behaviour, craft of art, an appropriate native grand-opera, sl craft, or any craft, he is greatest forever and forever contributes the greatest original practical example. cleanest expression is that which finds no sphere wo of itself and makes one.

The messages of great poets to each man and wo are, Come to us on equal terms, Only then can you derstand us, We are no better than you, What we enc you enclose, What we enjoy you may enjoy. Did suppose there could be only one Supreme? We afl there can be unnumbered Supremes, and that one c not countervail another any more than one eyes countervails another . . . and that men can be gooc grand only of the consciousness of their suprem within them. What do you think is the grandeu storms and dismemberments and the deadliest ba and wrecks and the wildest fury of the elements the power of the sea and the motion of nature anc the throes of human desires and dignity and hate love? It is that something in the soul which says, R on, Whirl on, I tread master here and everywhere, Ma of the spasms of the sky and of the shatter of the Master of nature and passion and death, And of all te and all pain.

The American bards shall be marked for gener and affection and for encouraging competitors. . . . T shall be kosmos . . . without monopoly or secrecy glad to pass any thing to any one . . . hungry for eq night and day. They shall not be careful of riches privilege they shall be riches and privilege . . . shall perceive who the most affluent man is. The affluent man is he that confronts all the shows he see equivalents out of the stronger wealth of himself. American bard shall delineate no class of persons one or two out of the strata of interests nor love nor truth most nor the soul most nor the body most and not be for the eastern states more than the wes or the northern states more than the southern

Exact science and its practical movements are checks on the greatest poet but always his encou ment and support. The outset and remembrance there . . . there are the arms that lifted him first

brace him best . . . there he returns after all his goings and comings. The sailor and traveler . . . the atomist chemist astronomer geologist phrenologist spiritualist mathematician historian and lexicographer are not poets, but they are the lawgivers of poets and their construction underlies the structure of every perfect poem. No matter what rises or is uttered they sent the seed of the conception of it . . . of them and by them stand the visible proofs of souls . . . always of their father-stuff must be begotten the sinewy races of bards. If there shall be love and content between the father and the son and if the greatness of the son is the exuding of the greatness of the father there shall be love between the poet and the man of demonstrable science. In the beauty of poems are the tuft and final applause of science.

Great is the faith of the flush of knowledge and of the investigation of the depths of qualities and things. Cleaving and circling here swells the soul of the poet yet is president of itself always. The depths are fathomless and therefore calm. The innocence and nakedness are resumed . . . they are neither modest not immodest. The whole theory of the special and supernatural and all that was twined with it or educed out of it departs as a dream. What has ever happened . . . what happens and whatever may or shall happen, the vital laws enclose all . . . they are sufficient for any case and for all cases . . . none to be hurried or retarded . . . any miracle of affairs or persons inadmissible in the vast clear scheme where every motion and every spear of grass and the frames and spirits of men and women and all that concerns them are unspeakably perfect miracles all referring to all and each distinct and in its place. It is also not consistent with the reality of the soul to admit that there is anything in the known universe more divine than men and women.

Men and women and the earth and all upon it are simply to be taken as they are, and the investigation of their past and present and future shall be unintermitted and shall be done with perfect candor. Upon this basis philosophy speculates ever looking toward the poet, ever regarding the eternal tendencies of all toward happiness never inconsistent with what is clear to the senses and to the soul. For the eternal tendencies of all toward happiness make the only point of sane philosophy. Whatever comprehends less than that . . . whatever is less than the laws of light and of astronomical motion . . . or less than the laws that follow the thief the liar the glutton and the drunkard through this life and doubtless afterward . . . or less than vast stretches of time or the slow formation of density or the patient upheaving of strata—is of no account. Whatever would put God in a poem or system of philosophy as contending against some being or influence, is also of no account. Sanity and ensemble characterise the great master . . . spoilt in one principle all is spoilt. The great master has nothing to do with miracles. He sees health for himself in being one of the mass . . . he sees the hiatus in singular eminence. To the perfect shape comes common ground. To be under the general law is great for that is to correspond with it. The master knows that he is unspeakably great and that all are unspeakably great . . . that nothing for instance is greater than to conceive children and bring them up well . . . that to be is just as great as to perceive or tell.

In the make of the great masters the idea of political liberty is indispensable. Liberty takes the adherence of heroes wherever men and women exist . . . but never takes any adherence or welcome from the rest more than from poets. They are the voice and exposition of liberty. They out of ages are worthy the grand idea . . . to them it is confided and they must sustain it. Nothing has precedence of it and nothing can warp or degrade it. The attitude of great poets is to cheer up slaves and horrify despots. The turn of their necks, the sound of their feet, the motions of their wrists, are full of hazard to the one and hope to the other. Come nigh them awhile and though they neither speak or advise you shall learn the faithful American lesson. Liberty is poorly served by men whose good intent is quelled from one failure or two failures or any number of failures, or from the casual indifference or ingratitude of the people, or from the sharp show of the tushes of power, or the bringing to bear soldiers and cannon or any penal statutes. Liberty relies upon itself, invites no one, promises nothing, sits in calmness and light, is positive and composed, and knows no discouragement. The battle rages with many a loud alarm and frequent advance and retreat . . . the enemy triumphs . . . the prison, the handcuffs, the iron necklace and anklet, the scaffold, garrote and leadballs do their work . . . the cause is asleep . . the strong throats are choked with their own blood . . . the young men drop their eyelashes toward the ground when they pass each other . . . and is liberty

gone out of that place? No never. When liberty goes it is not the first to go nor the second nor third to go . . . it waits for all the rest to go . . . it is the last . . . When the memories of the old martyrs are faded utterly away . . . when the large names of patriots are laughed at in the public halls from the lips of the orators . . . when the boys are no more christened after the same but christened after tyrants and traitors instead . . . when the laws of the free are grudgingly permitted and laws for informers and blood-money are sweet to the taste of the people . . . when I and you walk abroad upon the earth stung with compassion at the sight of numberless brothers answering our equal friendship and calling no man master—and when we are elated with noble joy at the sight of slaves . . . when the soul retires in the cool communion of the night and surveys its experience and has much extasy over the word and deed that put back a helpless innocent person into the gripe of the gripers or into any cruel inferiority . . . when those in all parts of these states who could easier realize the true American character but do not yet—when the swarms of cringers, suckers, doughfaces, lice of politics, planners of sly involutions for their own preferment to city offices or state legislatures or the judiciary or congress or the presidency, obtain a response of love and natural deference from the people whether they get the offices or no . . . when it is better to be a bound booby and rogue in office at a high salary than the poorest free mechanic or farmer with his hat unmoved from his head and firm eyes and a candid and generous heart . . . and when servility by town or state or the federal government or any oppression on a large scale or small scale can be tried on without its own punishment following duly after in exact proportion against the smallest chance of escape . . . or rather when all life and all the souls of men and women are discharged from any part of the earth—then only shall the instinct of liberty be discharged from that part of the earth.

As the attributes of the poets of the kosmos concentre in the real body and soul and in the pleasure of things they possess the superiority of genuineness over all fiction and romance. As they emit themselves facts are showered over with light . . . the daylight is lit with more volatile light . . . also the deep between the setting and rising sun goes deeper many fold. Each precise object or condition or combination or process exhibits a beauty . . . the multiplication table its—old age its—the carpenter's trade its—the grand-opera its . . . the hugehulled cleanshaped New-York clipper at sea under steam or full sail gleams with unmatched beauty . . . the American circles and large harmonies of government gleam with theirs . . . and the commonest definite intentions and actions with theirs. The poets of the kosmos advance through all interpositions and coverings and turmoils and stratagems to first principles. They are of use . . . they dissolve poverty from its need and riches from its conceit. You large proprietor they say shall not realize or perceive more than any one else. The owner of the library is not he who holds a legal title to it having bought and paid for it. Any one and every one is owner of the library who can read the same through all the varieties of tongues and subjects and styles, and in whom they enter with ease and take residence and force toward paternity and maternity, and make supple and powerful and rich and large. . . . These American states strong and healthy and accomplished shall receive no pleasure from violations of natural models and must not permit them. In paintings or mouldings or carvings in mineral or wood, or in the illustrations of books or newspapers, or in any comic or tragic prints, or in the patterns of woven stuffs or anything to beautify rooms or furniture or costumes, or to put upon cornices or monuments or on the prows or sterns of ships, or to put anywhere before the human eye indoors or out, that which distorts honest shapes or which creates unearthly beings or places or contingencies is a nuisance and revolt. Of the human form especially it is so great it must never be made ridiculous. Of ornaments to a work nothing outre can be allowed . . . but those ornaments can be allowed that conform to the perfect facts of the open air and that flow out of the nature of the work and come irrepressibly from it and are necessary to the completion of the work. Most works are most beautiful without ornament. . . . Exaggerations will be revenged in human physiology. Clean and vigorous children are jetted and conceived only in those communities where the models of natural forms are public every day. . . .

---

22 suckers . . . doughfaces, an interesting example of Whitman's use of slang. Doughfaces were Northern Congressmen who did not oppose Negro slavery in the South, or its extension into the Southwest (see Dictionary of American English) • 47 its, exhibits its beauty • 79 outre, or outré, uncommon, bizarre

Great genius and the people of these states must never be demeaned to romances. As soon as histories are properly told there is no more need of romances.

The great poets are also to be known by the absence in them of tricks and by the justification of perfect personal candor. Then folks echo a new cheap joy and a divine voice leaping from their brains: How beautiful is candor! All faults may be forgiven of him who has perfect candor. Henceforth let no man of us lie, for we have seen that openness wins the inner and outer world and that there is no single exception, and that never since our earth gathered itself in a mass have deceit or subterfuge or prevarication attracted its smallest particle or the faintest tinge of a shade—and that through the enveloping wealth and rank of a state or the whole republic of states a sneak or sly person shall be discovered and despised . . . and that the soul has never been once fooled and never can be fooled . . . and thrift without the loving nod of the soul is only a fœtid puff . . . and there never grew up in any of the continents of the globe nor upon any planet or satellite or star, nor upon the asteroids, nor in any part of ethereal space, nor in the midst of density, nor under the fluid wet of the sea, nor in the condition which precedes the birth of babes, nor at any time during the changes of life, nor in that condition that follows what we term death, nor in any stretch of abeyance or action afterward of vitality, nor in any process of formation or reformation anywhere, a being whose instinct hated the truth.

Extreme caution or prudence, the soundest organic health, large hope and comparison and fondness for women and children, large alimentiveness and destructiveness and causality, with a perfect sense of the oneness of nature and the propriety of the same spirit applied to human affairs . . . these are called up of the float of the brain of the world to be parts of the greatest poet from his birth out of his mother's womb and from her birth out of her mother's. Caution seldom goes far enough. It has been thought that the prudent citizen was the citizen who applied himself to solid gains and did well for himself and his family and completed a lawful life without debt or crime. The greatest poet sees and admits these economies as he sees the economies of food and sleep, but has higher notions of prudence than to think he gives much when he gives a few slight attentions at the latch of the gate. The premises of the prudence of life are not the hospitality of it or the ripeness and harvest of it. Beyond the independence of a little sum laid aside for burial-money, and of a few clap-boards around and shingles overhead on a lot of American soil owned, and the easy dollars that supply the year's plain clothing and meals, the melancholy prudence of the abandonment of such a great being as a man is to the toss and pallor of years of moneymaking with all their scorching days and icy nights and all their stifling deceits and underhanded dodgings, or infinitesimals of parlors, or shameless stuffing while others starve . . . and all the loss of the bloom and odor of the earth and of the flowers and atmosphere and of the sea and of the true taste of the women and men you pass or have to do with in youth or middle age, and the issuing sickness and desperate revolt at the close of a life without elevation or naivete, and the ghastly chatter of a death without serenity or majesty, is the great fraud upon modern civilization and forethought, blotching the surface and system which civilization undeniably drafts, and moistening with tears the immense features it spreads and spreads with such velocity before the reached kisses of the soul . . . Still the right explanation remains to be made about prudence. The prudence of the mere wealth and respectability of the most esteemed life appears too faint for the eye to observe at all when little and large alike drop quietly aside at the thought of the prudence suitable for immortality. What is wisdom that fills the thinness of a year or seventy or eighty years to wisdom spaced out by ages and coming back at a certain time with strong reinforcements and rich presents and the clear faces of wedding-guests as far as you can look in every direction running gaily toward you? Only the soul is of itself . . . all else has reference to what ensues. All that a person does or thinks is of consequence. Not a move can a man or woman make that affects him or her in a day or a month or any part of the direct lifetime or the hour of death but the same affects him or her onward afterward

---

2 **demeaned to romances**, debased to the standard of conduct set forth in romantic fiction • 32 **alimentiveness**, capacity for eating and drinking, a term from phrenology • 32 **destructiveness and causality**, also phrenological terms. Destructiveness means a capacity for excited interest in scenes of destructive violence such as storms, fires, and battles; causality, a sense of cause and effect

through the indirect lifetime. The indirect is always as great and real as the direct. The spirit receives from the body just as much as it gives to the body. Not one name of word or deed . . . not of venereal sores or discolorations . . . not the privacy of the onanist . . . not of the putrid veins of gluttons or rum drinkers . . . not peculation or cunning or betrayal or murder . . . no serpentine poison of those that seduce women . . . not the foolish yielding of women . . . not prostitution . . . not any depravity of young men . . . not of the attainment of gain by discreditable means . . . not any nastiness of appetite . . . not any harshness of officers to men or judges to prisoners or fathers to sons or sons to fathers or husbands to wives or bosses to their boys . . . not of greedy looks or malignant wishes . . . nor any of the wiles practised by people upon themselves . . . ever is or ever can be stamped on the programme but it is duly realized and returned, and that returned in further performances . . . and they returned again. Nor can the push of charity or personal force ever be any thing else than the profoundest reason, whether it brings arguments to hand or no. No specification is necessary . . . to add or subtract or divide is in vain. Little or big, learned or unlearned, white or black, legal or illegal, sick or well, from the first inspiration down the windpipe to the last expiration out of it, all that a male or female does that is vigorous and benevolent and clean is so much sure profit to him or her in the unshakable order of the universe and through the whole scope of it forever. If the savage or felon is wise it is well . . . if the greatest poet or savan is wise it is simply the same . . . if the President or chief justice is wise it is the same . . . if the young mechanic or farmer is wise it is no more or less . . . if the prostitute is wise it is no more nor less. The interest will come round . . . all will come round. All the best actions of war and peace . . . all help given to relatives and strangers and the poor and old and sorrowful and young children and widows and the sick, and to all shunned persons . . . all furtherance of fugitives and of the escape of slaves . . . all the self-denial that stood steady and aloof on wrecks and saw others take the seats of the boats . . . all offering of substance or life for the good old cause, or for a friend's sake or opinion's sake . . . all pains of enthusiasts scoffed at by their neighbors . . . all the vast sweet love and precious suffering of mothers . . . all honest men baffled in strifes recorded or unrecorded . . . all the grandeur and good of the few ancient nations whose fragments of annals we inherit . . . and all the good of the hundreds of far mightier and more ancient nations unknown to us by name or date or location . . . all that was ever manfully begun, whether it succeeded or not . . . all that has at any time been well suggested out of the divine heart of man or by the divinity of his mouth or by the shaping of his great hands . . . and all that is well thought or done this day on any part of the surface of the globe . . . or on any of the wandering stars or fixed stars by those there as we are here . . . or that is henceforth to be well thought or done by you whoever you are, or by any one—these singly and wholly inured at their time and inure now and will inure always to the identities from which they sprung or shall spring. . . . Did you guess any of them lived only its moment? The world does not so exist . . . no parts palpable or impalpable so exist . . . no result exists now without being from its long antecedent result, and that from its antecedent, and so backward without the farthest mentionable spot coming a bit nearer to the beginning than any other spot. . . . Whatever satisfies the soul is truth. The prudence of the greatest poet answers at last the craving and glut of the soul, is not contemptuous of less ways of prudence if they conform to its ways, puts off nothing, permits no let-up for its own case or any case, has no particular sabbath or judgment-day, divides not the living from the dead or the righteous from the unrighteous, is satisfied with the present, matches every thought or act by its correlative, knows no possible forgiveness or deputed atonement . . . knows that the young man who composedly periled his life and lost it has done exceeding well for himself, while the man who has not periled his life and retains it to old age in riches and ease has perhaps achieved nothing for himself worth mentioning . . . and that only that person has no great prudence to learn who has learnt to prefer real longlived things, and favors body and soul the same, and perceives the indirect assuredly following the direct, and what evil or good he does leaping onward and waiting to meet him again—and who in his spirit in any emergency whatever neither hurries or avoids death.

The direct trial of him who would be the greatest poet is to-day. If he does not flood himself with the

immediate age as with vast oceanic tides . . . and if he does not attract his own loud body and soul to himself and hang on its neck with incomparable love and plunge his semitic muscle into its merits and demerits . . . and if he be not himself the age transfigured . . . and if to him is not opened the eternity which gives similitude to all periods and locations and processes and animate and inanimate forms, and which is the bond of time, and rises up from its inconceivable vagueness and infiniteness in the swimming shape of to-day, and is held by the ductile anchors of life, and makes the present spot the passage from what was to what shall be, and commits itself to the representation of this wave of an hour and this one of the sixty beautiful children of the wave—let him merge in the general run and wait his developement. . . . Still the final test of poems or any character or work remains. The prescient poet projects himself centuries ahead and judges performer or performance after the changes of time. Does it live through them? Does it still hold on untired? Will the same style and the direction of genius to similar points be satisfactory now? Has no new discovery in science or arrival at superior planes of thought and judgment and behaviour fixed him or his so that either can be looked down upon? Have the marches of tens and hundreds and thousands of years made willing detours to the right hand and the left hand for his sake? Is he beloved long and long after he is buried? Does the young man think often of him? and the young woman think often of him? and do the middle-aged and the old think of him?

A great poem is for ages and ages in common and for all degrees and complexions and all departments and sects and for a woman as much as a man and a man as much as a woman. A great poem is no finish to a man or woman but rather a beginning. Has anyone fancied he could sit at last under some due authority and rest satisfied with explanations and realize and be content and full? To no such terminus does the greatest poet bring . . . he brings neither cessation or sheltered fatness and ease. The touch of him tells in action. Whom he takes he takes with firm sure grasp into live regions previously unattained . . . thenceforward is no rest . . . they see the space and ineffable sheen that turn the old spots and lights into dead vacuums. The companion of him beholds the birth and progress of stars and learns one of the meanings. Now there shall be a man cohered out of tumult and chaos . . . the elder encourages the younger and shows him how . . . they two shall launch off fearlessly together till the new world fits an orbit for itself and looks unabashed on the lesser orbits of the stars and sweeps through the ceaseless rings and shall never be quiet again.

There will soon be no more priests. Their work is done. They may wait awhile . . . perhaps a generation or two . . . dropping off by degrees. A superior breed shall take their place . . . the gangs of kosmos and prophets en masse shall take their place. A new order shall arise and they shall be the priests of man, and every man shall be his own priest. The churches built under their umbrage shall be the churches of men and women. Through the divinity of themselves shall the kosmos and the new breed of poets be interpreters of men and women and of all events and things. They shall find their inspiration in real objects to-day, symptoms of the past and future . . . They shall not deign to defend immortality or God or the perfection of things or liberty or the exquisite beauty and reality of the soul. They shall arise in America and be responded to from the remainder of the earth.

The English language befriends the grand American expression . . . it is brawny enough and limber and full enough. On the tough stock of a race who through all change of circumstances was never without the idea of political liberty, which is the animus of all liberty, it has attracted the terms of daintier and gayer and subtler and more elegant tongues. It is the powerful language of resistance . . . it is the dialect of common sense. It is the speech of the proud and melancholy races and of all who aspire. It is the chosen tongue to express growth faith self-esteem freedom justice equality friendliness amplitude prudence decision and courage. It is the medium that shall well nigh express the inexpressible.

No great literature nor any like style of behaviour or oratory or social intercourse or household arrangements or public institutions or the treatment by bosses of employed people, nor executive detail or detail of the army or navy, nor spirit of legislation or courts or police or tuition or architecture or songs or amuse-

---

56 gangs, without the usual unfavorable connotation

ments or the costumes of young men, can long elude the jealous and passionate instinct of American standards. Whether or no the sign appears from the mouths of the people, it throbs a live interrogation in every freeman's and freewoman's heart after that which passes by or this built to remain. Is it uniform with my country? Are its disposals without ignominious distinctions? Is it for the evergrowing communes of brothers and lovers, large, well-united, proud beyond the old models, generous beyond all models? Is it something grown fresh out of the fields or drawn from the sea for use to me to-day here? I know that what answers for me an American must answer for any individual or nation that serves for a part of my materials. Does this answer? or is it without reference to universal needs? or sprung of the needs of the less developed society of special ranks? or old needs of pleasure overlaid by modern science and forms? Does this acknowledge liberty with audible and absolute acknowledgement, and set slavery at naught for life and death? Will it help breed one goodshaped and wellhung man, and a woman to be his perfect and independent mate? Does it improve manners? Is it for the nursing of the young of the republic? Does it solve readily with the sweet milk of the nipples of the breasts of the mother of many children? Has it too the old ever-fresh forbearance and impartiality? Does it look with the same love on the last born and those hardening toward stature, and on the errant, and on those who disdain all strength of assault outside of their own?

The poems distilled from other poems will probably pass away. The coward will surely pass away. The expectation of the vital and great can only be satisfied by the demeanor of the vital and great. The swarms of the polished deprecating and reflectors and the polite float off and leave no remembrance. America prepares with composure and goodwill for the visitors that have sent word. It is not intellect that is to be their warrant and welcome. The talented, the artist, the ingenious, the editor, the statesman, the erudite . . . they are not unappreciated . . . they fall in their place and do their work. The soul of the nation also does its work. No disguise can pass on it . . . no disguise can conceal from it. It rejects none, it permits all. Only toward as good as itself and toward the like of itself will it advance half-way. An individual is as superb as a nation when he has the qualities which make a superb nation. The soul of the largest and wealthiest and proudest nation may well go half-way to meet that of its poets. The signs are effectual. There is no fear of mistake. If the one is true the other is true. The proof of a poet is that his country absorbs him as affectionately as he has absorbed it.

1855

One's-Self I Sing

"One's-Self I Sing" strikes at once the keynote of much of Whitman's poetry: his democratic society is composed of "simple separate persons."

"One's-Self I Sing" is the first poem in the standard edition of Leaves of Grass issued in 1902 by Whitman's literary executors, Richard Maurice Bucke, Thomas B. Harned, and Horace L. Traubel, and the sequence of poems in the following selections follows the sequence of that edition. The first date appended to this and other poems by Whitman is that of earliest publication. The second date is that of the poem's first appearance in final form. It should be noted that Whitman constantly revised his work, that most of his poems exist in several intermediary stages, and that the versions presented here show the poems as they were finally revised by the poet.

One's-Self I sing, a simple separate person,
Yet utter the word Democratic, the word En-Masse.

Of physiology from top to toe I sing,
Not physiognomy alone nor brain alone is worthy for the Muse,
I say the Form complete is worthier far,
The Female equally with the Male I sing.

Of Life immense in passion, pulse, and power,
Cheerful, for freest action form'd under the laws divine,
The Modern Man I sing.

1867-1871

Once I Pass'd Through a Populous City

It has been often supposed that the following poem refers to a love affair in New Orleans in 1848. Whitman's poems, however, can never be safely taken as literal autobiography, and the evidence in support of such a romance is far from conclusive. For the best account of the subject, see Emory Holloway's Whitman, pp. 39-71.

Once I pass'd through a populous city imprinting my brain for future use with its shows, architecture, customs, traditions,
Yet now of all that city I remember only a woman I casually met there who detain'd me for love of me,
Day by day and night by night we were together—all else has long been forgotten by me,
I remember I say only that woman who passionately clung to me,
Again she holds me by the hand, I must not go,
I see her close beside me with silent lips sad and tremulous.

1860•1867

For You O Democracy

Better than any other single phrase, perhaps, "the love of comrades" expresses Whitman's concept of the true basis of a democratic society.

Come, I will make the continent indissoluble,
I will make the most splendid race the sun ever shone upon,
I will make divine magnetic lands,
With the love of comrades,
With the life-long love of comrades.

I will plant companionship thick as trees along all the rivers of America, and along the shores of the great lakes, and all over the prairies,
I will make inseparable cities with their arms about each other's necks,
By the love of comrades,
By the manly love of comrades.

For you these from me, O Democracy, to serve you ma femme!
For you, for you I am trilling these songs.

1860•1881

Song of the Open Road

1

Afoot and light-hearted I take to the open road,
Healthy, free, the world before me,
The long brown path before me leading wherever I choose.

Henceforth I ask not good-fortune, I myself am good-fortune,
Henceforth I whimper no more, postpone no more, need nothing,
Done with indoor complaints, libraries, querulous criticisms,
Strong and content I travel the open road.

The earth, that is sufficient,
I do not want the constellations any nearer,
I know they are very well where they are,
I know they suffice for those who belong to them.
(Still here I carry my old delicious burdens,
I carry them, men and women, I carry them with me wherever I go,
I swear it is impossible for me to get rid of them,
I am fill'd with them; and I will fill them in return.)

2

You road I enter upon and look around, I believe you are not all that is here,
I believe that much unseen is also here.

Once I Passed . . . City 2 a woman. In an early manuscript version of this poem, the lover was a man See Emory Holloway, **Uncollected Poetry and Prose of Walt Whitman, II, 102**

Here the profound lesson of reception, nor preference nor denial,
The black with his woolly head, the felon, the diseas'd, the illiterate person, are not denied;
The birth, the hasting after the physician, the beggar's tramp, the drunkard's stagger, the laughing party of mechanics,
The escaped youth, the rich person's carriage, the fop, the eloping couple,
The early market-man, the hearse, the moving of furniture into the town, the return back from the town,
They pass, I also pass, any thing passes, none can be interdicted,
None but are accepted, none but shall be dear to me.

3

You air that serves me with breath to speak!
You objects that call from diffusion my meanings and give them shape!
You light that wraps me and all things in delicate equable showers!
You paths worn in the irregular hollows by the roadsides!
I believe you are latent with unseen existences, you are so dear to me.

You flagg'd walks of the cities! You strong curbs at the edges!
You ferries! you planks and posts of wharves! you timberlined sides! you distant ships!
You rows of houses! you window-pierc'd façades! you roofs!
You porches and entrances! you copings and iron guards!
You windows whose transparent shells might expose so much!
You doors and ascending steps! you arches!
You gray stones of interminable pavements! you trodden crossings!
From all that has touch'd you I believe you have imparted to yourselves, and now would impart the same secretly to me,
From the living and the dead you have peopled your impassive surfaces, and the spirits thereof would be evident and amicable with me.

4

The earth expanding right hand and left hand,
The picture alive, every part in its best light,
The music falling in where it is wanted, and stopping where it is not wanted,
The cheerful voice of the public road, the gay fresh sentiment of the road.

O highway I travel, do you say to me *Do not leave me?*
Do you say *Venture not—if you leave me you are lost?*
Do you say *I am already prepared, I am well-beaten and undenied, adhere to me?*

O public road, I say back I am not afraid to leave you, yet I love you,
You express me better than I can express myself,
You shall be more to me than my poem.

I think heroic deeds were all conceiv'd in the open air, and all free poems also,
I think I could stop here myself and do miracles,
I think whatever I shall meet on the road I shall like, and whoever beholds me shall like me,
I think whoever I see must be happy.

5

From this hour I ordain myself loos'd of limits and imaginary lines,
Going where I list, my own master total and absolute,
Listening to others, considering well what they say,
Pausing, searching, receiving, contemplating,
Gently, but with undeniable will, divesting myself of the holds that would hold me.
I inhale great draughts of space,
The east and the west are mine, and the north and the south are mine.

I am larger, better than I thought,
I did not know I held so much goodness.

All seems beautiful to me,
I can repeat over to men and women You have done such good to me I would do the same to you,
I will recruit for myself and you as I go,
I will scatter myself among men and women as I go,
I will toss a new gladness and roughness among them,

Whoever denies me it shall not trouble me,
Whoever accepts me he or she shall be blessed and shall bless me.

6

Now if a thousand perfect men were to appear it would not amaze me,
Now if a thousand beautiful forms of women appear'd it would not astonish me.

Now I see the secret of the making of the best persons,
It is to grow in the open air and to eat and sleep with the earth.

Here a great personal deed has room,
(Such a deed seizes upon the hearts of the whole race of men,
Its effusion of strength and will overwhelms law and mocks all authority and all argument against it.)

Here is the test of wisdom,
Wisdom is not finally tested in schools,
Wisdom cannot be pass'd from one having it to another not having it,
Wisdom is of the soul, is not susceptible of proof, is its own proof,
Applies to all stages and objects and qualities and is content,
Is the certainty of the reality and immortality of things, and the excellence of things;
Something there is in the float of the sight of things that provokes it out of the soul.
Now I re-examine philosophies and religions,
They may prove well in lecture-rooms, yet not prove at all under the spacious clouds and along the landscape and flowing currents.

Here is realization,
Here is a man tallied—he realizes here what he has in him,
The past, the future, majesty, love—if they are vacant of you, you are vacant of them.

Only the kernel of every object nourishes;
Where is he who tears off the husks for you and me?
Where is he that undoes stratagems and envelopes for you and me?

Here is adhesiveness, it is not previously fashion'd, it is apropos;
Do you know what it is as you pass to be loved by strangers?
Do you know the talk of those turning eye-balls?

7

Here is the efflux of the soul,
The efflux of the soul comes from within through embower'd gates, ever provoking questions,
These yearnings why are they? these thoughts in the darkness why are they?
Why are there men and women that while they are nigh me the sunlight expands my blood?
Why when they leave me do my pennants of joy sink flat and lank?
Why are there trees I never walk under but large and melodious thoughts descend upon me?
(I think they hang there winter and summer on those trees and always drop fruit as I pass;)
What is it I interchange so suddenly with strangers?
What with some driver as I ride on the seat by his side?
What with some fisherman drawing his seine by the shore as I walk by and pause?
What gives me to be free to a woman's and man's good-will? what gives them to be free to mine?

8

The efflux of the soul is happiness, here is happiness,
I think it pervades the open air, waiting at all times,
Now it flows unto us, we are rightly charged.
Here rises the fluid and attaching character,
The fluid and attaching character is the freshness and sweetness of man and woman,
(The herbs of the morning sprout no fresher and sweeter every day out of the roots of themselves, than it sprouts fresh and sweet continually out of itself.)
Toward the fluid and attaching character exudes the sweat of the love of young and old,
From it falls distill'd the charm that mocks beauty and attainments,
Toward it heaves the shuddering longing ache of contact.

---

91 adhesiveness, the capacity for friendship and social attraction, a term from phrenology. Specifically, in Whitman, the term ordinarily refers to what he calls in "For You O Democracy" "the manly love of comrades," and is to be distinguished from "amativeness," which is the love for the opposite sex

9

Allons! whoever you are come travel with me!
Traveling with me you find what never tires.

The earth never tires,
The earth is rude, silent, incomprehensible at first, Nature is rude and incomprehensible at first,
Be not discouraged, keep on, there are divine things well envelop'd,
I swear to you there are divine things more beautiful than words can tell.

Allons! we must not stop here,
However sweet these laid-up stores, however convenient this dwelling we cannot remain here,
However shelter'd this port and however calm these waters we must not anchor here,
However welcome the hospitality that surrounds us we are permitted to receive it but a little while.

10

Allons! the inducements shall be greater,
We will sail pathless and wild seas,
We will go where winds blow, waves dash, and the Yankee clipper speeds by under full sail.
Allons! with power, liberty, the earth, the elements,
Health, defiance, gayety, self-esteem, curiosity;
Allons! from all formules!
From your formules, O bat-eyed and materialistic priests.

The stale cadaver blocks up the passage—the burial waits no longer.

Allons! yet take warning!
He traveling with me needs the best blood, thews, endurance,
None may come to the trial till he or she bring courage and health,
Come not here if you have already spent the best of yourself,
Only those may come who come in sweet and determin'd bodies,
No diseas'd person, no rum-drinker or venereal taint is permitted here.

(I and mine do not convince by arguments, similes, rhymes, We convince by our presence.)

11

Listen! I will be honest with you,
I do not offer the old smooth prizes, but offer rough new prizes,
These are the days that must happen to you:
You shall not heap up what is call'd riches,
You shall scatter with lavish hand all that you earn or achieve,
You but arrive at the city to which you are destin'd, you hardly settle yourself to satisfaction before you are call'd by an irresistible call to depart,
You shall be treated to the ironical smiles and mockings of those who remain behind you,
What beckonings of love you receive you shall only answer with passionate kisses of parting,
You shall not allow the hold of those who spread their reach'd hands toward you.

12

Allons! after the great Companions, and to belong to them!
They too are on the road—they are the swift and majestic men—they are the greatest women,
Enjoyers of calms of seas and storms of seas,
Sailors of many a ship, walkers of many a mile of land,
Habitués of many distant countries, habitués of far-distant dwellings,
Trusters of men and women, observers of cities, solitary toilers,
Pausers and contemplators of tufts, blossoms, shells of the shore,
Dancers at wedding-dances, kissers of brides, tender helpers of children, bearers of children,
Soldiers of revolts, standers by gaping graves, lowerers-down of coffins,
Journeyers over consecutive seasons, over the years, the curious years each emerging from that which preceded it,
Journeyers as with companions namely their own diverse phases,
Forth-steppers from the latent unrealized baby-days,
Journeyers gayly with their own youth, journeyers with their bearded and well-grain'd manhood,
Journeyers with their womanhood, ample, unsurpass'd, content,
Journeyers with their own sublime old age of manhood or womanhood,

114 Allons! Let's go!

Old age, calm, expanded, broad with the haughty breadth of the universe,
Old age, flowing free with the delicious near-by freedom of death.

13

Allons! to that which is endless as it was beginningless,
To undergo much, tramps of days, rests of nights,
To merge all in the travel they tend to, and the days and nights they tend to,
Again to merge them in the start of superior journeys,
To see nothing anywhere but what you may reach it and pass it,
To conceive no time, however distant, but what you may reach it and pass it,
To look up or down no road but it stretches and waits for you, however long but it stretches and waits for you,
To see no being, not God's or any, but you also go thither,
To see no possession but you may possess it, enjoying all without labor or purchase, abstracting the feast yet not abstracting one particle of it,
To take the best of the farmer's farm and the rich man's elegant villa, and the chaste blessings of the well-married couple, and the fruits of orchards and flowers of gardens,
To take to your use out of the compact cities as you pass through,
To carry buildings and streets with you afterward wherever you go,
To gather the minds of men out of their brains as you encounter them, to gather the love out of their hearts,
To take your lovers on the road with you, for all that you leave them behind you.
To know the universe itself as a road, as many roads, as roads for traveling souls.

All parts away for the progress of souls,
All religion, all solid things, arts, governments—all that was or is apparent upon this globe or any globe, falls into niches and corners before the procession of souls along the grand roads of the universe.
Of the progress of the souls of men and women along the grand roads of the universe, all other progress is the needed emblem and sustenance.

Forever alive, forever forward,
Stately, solemn, sad, withdrawn, baffled, mad, turbulent, feeble, dissatisfied,
Desperate, proud, fond, sick, accepted by men, rejected by men,
They go! they go! I know that they go, but I know not where they go,
But I know that they go toward the best—toward something great.

Whoever you are, come forth! or man or woman come forth!
You must not stay sleeping and dallying there in the house, though you built it, or though it has been built for you.

Out of the dark confinement! out from behind the screen!
It is useless to protest, I know all and expose it.

Behold through you as bad as the rest,
Through the laughter, dancing, dining, supping, of people,
Inside of dresses and ornaments, inside of those wash'd and trimm'd faces,
Behold a secret silent loathing and despair.

No husband, no wife, no friend, trusted to hear the confession,
Another self, a duplicate of every one, skulking and hiding it goes,
Formless and wordless through the streets of the cities, polite and bland in the parlors,
In the cars of railroads, in steamboats, in the public assembly,
Home to the houses of men and women, at the table, in the bedroom, everywhere,
Smartly attired, countenance smiling, form upright, death under the breast-bones, hell under the skull-bones,
Under the broadcloth and gloves, under the ribbons and artificial flowers,
Keeping fair with the customs, speaking not a syllable of itself,
Speaking of any thing else but never of itself.

14

Allons! through struggles and wars!
The goal that was named cannot be countermanded.

Have the past struggles succeeded?
What has succeeded? yourself? your nation? Nature?
Now understand me well—it is provided in the essence of things that from any fruition of success, no matter what, shall come forth something to make a greater struggle necessary.

My call is the call of battle, I nourish active rebellion,
He going with me must go well arm'd,
He going with me goes often with spare diet, poverty, angry enemies, desertions.

15

Allons! the road is before us!
It is safe—I have tried it—my own feet have tried it well—be not detain'd!
Let the paper remain on the desk unwritten, and the book on the shelf unopen'd!
Let the tools remain in the workshop! let the money remain unearn'd!
Let the school stand! mind not the cry of the teacher!
Let the preacher preach in his pulpit! let the lawyer plead in the court, and the judge expound the law.

Camerado, I give you my hand!
I give you my love more precious than money,
I give you myself before preaching or law;
Will you give me yourself? will you come travel with me?
Shall we stick by each other as long as we live?

1856-1881

Crossing Brooklyn Ferry

Whitman wrote in Specimen Days: "Living in Brooklyn or New York city . . . my life . . . was curiously identified with Fulton ferry, already becoming the greatest of its sort in the world for general importance, volume, variety, rapidity, and picturesqueness. Almost daily ('50 to '60) I cross'd on the boats, often up in the pilot-houses where I could get a full sweep, absorbing shows, accompaniments, surroundings. What oceanic currents, eddies, underneath—the great tides of humanity also, with ever-shifting movements! Indeed, I have always had a passion for ferries; to me they afford inimitable, streaming, never-failing, living poems. The river and bay scenery, all about New York island, any time of a fine day—the hurrying, splashing sea-tides—the changing panorama of steamers, all sizes, often a string of big ones outward bound to distant ports—the myriads of white sail'd schooners, sloops, skiffs, and the marvellously beautiful yachts—the majestic Sound boats as they rounded the Battery and came along towards 5, afternoon, eastward bound—the prospect off toward Staten Island, or down the Narrows, or the other way up the Hudson—what refreshment of spirit such sights and experiences gave me years ago (and many a time since)! My old pilot friends, the Balsirs, Johnny Cole, Ira Smith, William White, and my young ferry friend, Tom Gere—how well I remember them all!"

1

Flood-tide below me! I see you face to face!
Clouds of the west—sun there half an hour high—I see you also face to face.

Crowds of men and women attired in the usual costumes, how curious you are to me!
On the ferry-boats the hundreds and hundreds that cross, returning home, are more curious to me than you suppose,
And you that shall cross from shore to shore years hence are more to me, and more in my meditations, than you might suppose.

2

The impalpable sustenance of me from all things at all hours of the day,
The simple, compact, well-join'd scheme, myself disintegrated, every one disintegrated yet part of the scheme,
The similitudes of the past and those of the future,
The glories strung like beads on my smallest sights and hearings, on the walk in the street and the passage over the river,
The current rushing so swiftly and swimming with me far away,

The others that are to follow me, the ties between me and them,
The certainty of others, the life, love, sight, hearing of others.
Others will enter the gates of the ferry and cross from shore to shore,
Others will watch the run of the flood-tide,
Others will see the shipping of Manhattan north and west, and the heights of Brooklyn to the south and east,
Others will see the islands large and small;
Fifty years hence, others will see them as they cross, the sun half an hour high,
A hundred years hence, or ever so many hundred years hence, others will see them,
Will enjoy the sunset, the pouring-in of the flood-tide, the falling-back to the sea of the ebb-tide.

3

It avails not, time nor place—distance avails not,
I am with you, you men and women of a generation, or ever so many generations hence,
Just as you feel when you look on the river and sky, so I felt,
Just as any of you is one of a living crowd, I was one of a crowd,
Just as you are refresh'd by the gladness of the river and the bright flow, I was refresh'd,
Just as you stand and lean on the rail, yet hurry with the swift current, I stood yet was hurried,
Just as you look on the numberless masts of ships and the thick-stemm'd pipes of steamboats, I look'd.

I too many and many a time cross'd the river of old,
Watched the Twelfth-month sea-gulls, saw them high in the air floating with motionless wings, oscillating their bodies,
Saw how the glistening yellow lit up parts of their bodies and left the rest in strong shadow,
Saw the slow-wheeling circles and the gradual edging toward the south,
Saw the reflection of the summer sky in the water,
Had my eyes dazzled by the shimmering track of beams,
Look'd at the fine centrifugal spokes of light round the shape of my head in the sunlit water,
Look'd on the haze on the hills southward and southwestward,
Look'd on the vapor as it flew in fleeces tinged with violet,
Look'd toward the lower bay to notice the vessels arriving,
Saw their approach, saw aboard those that were near me,
Saw the white sails of schooners and sloops, saw the ships at anchor,
The sailors at work in the rigging or out astride the spars,
The round masts, the swinging motion of the hulls, the slender serpentine pennants,
The large and small steamers in motion, the pilots in their pilot-houses,
The white wake left by the passage, the quick tremulous whirl of the wheels,
The flags of all nations, the falling of them at sunset,
The scallop-edged waves in the twilight, the ladled cups, the frolicsome crests and glistening,
The stretch afar growing dimmer and dimmer, the gray walls of the granite storehouses by the docks,
On the river the shadowy group, the big steam-tug closely flank'd on each side by the barges, the hay-boat, the belated lighter,
On the neighboring shore the fires from the foundry chimneys burning high and glaringly into the night,
Casting their flicker of black contrasted with wild red and yellow light over the tops of houses, and down into the clefts of streets.

4

These and all else were to me the same as they are to you,
I loved well those cities, loved well the stately and rapid river,
The men and women I saw were all near to me,
Others the same—others who look back on me because I look'd forward to them,
(The time will come, though I stop here to-day and to-night.)

---

28 Twelfth-month. In the 1856 edition, Whitman wrote "December"; he substituted "Twelfth-month" in the edition of 1860 and retained it in subsequent editions. His preference for so naming the months is usually attributed to the Quaker influence • 46 hay-boat, boat for transporting hay (see Dictionary of American English)

5

What is it then between us?
What is the count of the scores or hundreds of years between us?
Whatever it is, it avails not—distance avails not, and place avails not,
I too lived, Brooklyn of ample hills was mine,
I too walk'd the streets of Manhattan island, and bathed in the waters around it,
I too felt the curious abrupt questionings stir within me.
In the day among crowds of people sometimes they came upon me,
In my walks home late at night or as I lay in my bed they came upon me,
I too had been struck from the float forever held in solution,
I too had receiv'd identity by my body,
That I was I knew was of my body, and what I should be I knew I should be of my body.

6

It is not upon you alone the dark patches fall,
The dark threw its patches down upon me also,
The best I had done seem'd to me blank and suspicious,
My great thoughts as I supposed them, were they not in reality meagre?
Nor is it you alone who know what it is to be evil,
I am he who knew what it was to be evil,
I too knitted the old knot of contrariety,
Blabb'd, blush'd, resented, lied, stole, grudg'd,
Had guile, anger, lust, hot wishes I dared not speak,
Was wayward, vain, greedy, shallow, sly, cowardly, malignant,
The wolf, the snake, the hog, not wanting in me,
The cheating look, the frivolous word, the adulterous wish, not wanting,
Refusals, hates, postponements, meanness, laziness, none of these wanting,
Was one with the rest, the days and haps of the rest,
Was call'd by my nighest name by clear loud voices of young men as they saw me approaching or passing,
Felt their arms on my neck as I stood, or the negligent leaning of their flesh against me as I sat,
Saw many I loved in the street or ferry-boat or public assembly, yet never told them a word,
Lived the same life with the rest, the same old laughing, gnawing, sleeping,
Play'd the part that still looks back on the actor or actress,
The same old role, the role that is what we make it, as great as we like,
Or as small as we like, or both great and small.

7

Closer yet I approach you,
What thought you have of me now, I had as much of you —I laid in my stores in advance,
I consider'd long and seriously of you before you were born.

Who was to know what should come home to me?
Who knows but I am enjoying this?
Who knows, for all the distance, but I am as good as looking at you now, for all you cannot see me?

8

Ah, what can ever be more stately and admirable to me than mast-hemm'd Manhattan?
River and sunset and scallop-edg'd waves of flood-tide?
The sea-gulls oscillating their bodies, the hay-boat in the twilight, and the belated lighter?

What gods can exceed these that clasp me by the hand, and with voices I love call me promptly and loudly by my nighest name as I approach?

What is more subtle than this which ties me to the woman or man that looks in my face?
Which fuses me into you now, and pours my meaning into you?

We understand then do we not?
What I promis'd without mentioning it, have you not accepted?
What the study could not teach—what the preaching could not accomplish is accomplish'd, is it not?

9

Flow on, river! flow with the flood-tide, and ebb with the ebb-tide!
Frolic on, crested and scallop-edg'd waves!

---

79 nighest, shortest

Gorgeous clouds of the sunset! drench with your splendor me, or the men and women generations after me!
Cross from shore to shore, countless crowds of passengers!
Stand up, tall masts of Mannahatta! stand up, beautiful hills of Brooklyn!
Throb, baffled and curious brain! throw out questions and answers!
Suspend here and everywhere, eternal float of solution!
Gaze, loving and thirsting eyes, in the house or street or public assembly!
Sound out, voices of young men! loudly and musically call me by my nighest name!
Live, old life! play the part that looks back on the actor or actress!
Play the old role, the role that is great or small according as one makes it!
Consider, you who peruse me, whether I may not in unknown ways be looking upon you;
Be firm, rail over the river, to support those who lean idly, yet haste with the hasting current;
Fly on, sea-birds! fly sideways, or wheel in large circles high in the air;
Receive the summer sky, you water, and faithfully hold it till all downcast eyes have time to take it from you!
Diverge, fine spokes of light, from the shape of my head, or any one's head, in the sunlit water!
Come on, ships from the lower bay! pass up or down, white-sail'd schooners, sloops, lighters!
Flaunt away, flags of all nations! be duly lower'd at sunset!
Burn high your fires, foundry chimneys! cast black shadows at nightfall! cast red and yellow light over the tops of the houses!
Appearances, now or henceforth, indicate what you are,
You necessary film, continue to envelop the soul,
About my body for me, and your body for you, be hung our divinest aromas,
Thrive, cities—bring your freight, bring your shows, ample and sufficient rivers,
Expand, being than which none else is perhaps more spiritual,
Keep your places, objects than which none else is more lasting.
You have waited, you always wait, you dumb, beautiful ministers,
We receive you with free sense at last, and are insatiate henceforward,
Not you any more shall be able to foil us, or withhold yourselves from us,
We use you, and do not cast you aside—we plant you permanently within us,
We fathom you not—we love you—there is perfection in you also,
You furnish your parts toward eternity,
Great or small, you furnish your parts toward the soul.
1856-1881

Pioneers! O Pioneers!

"Pioneers! O Pioneers!" is the chief celebration in American poetry of the Westward movement. From the standpoint of sober fact, the poem romanticizes its subject too much: those who remained in the older settlements were not necessarily more "gluttonous" (l. 93) than those who moved forward, the pioneers seem now to have felled too many of the "primeval forests" (l. 25), and mere "restlessness" (l. 37) is not always a virtue. But Whitman's purpose was to celebrate, not criticize, and he caught admirably, in "Pioneers! O Pioneers!" the spirit and momentum of a mass movement which embraced large sections of Europe as well as the entire American continent.

The student should read, in conjunction with Whitman's poem, Frederick Jackson Turner's "The Significance of the Frontier in American History" (1893).

Come my tan-faced children,
Follow well in order, get your weapons ready,
Have you your pistols? have you your sharp-edged axes?
Pioneers! O pioneers!

For we cannot tarry here,
We must march my darlings, we must bear the brunt of danger,
We the youthful sinewy races, all the rest on us depend,
Pioneers! O pioneers!

O you youths, Western youths,
So impatient, full of action, full of manly pride and friendship,
Plain I see you Western youths, see you tramping with the foremost,
Pioneers! O pioneers!

Have the elder races halted?
Do they droop and end their lesson, wearied over there beyond the seas?
We take up the task eternal, and the burden and the lesson,
Pioneers! O pioneers!

All the past we leave behind,
We debouch upon a newer mightier world, varied world,
Fresh and strong the world we seize, world of labor and the march,
Pioneers! O pioneers!

We detachments steady throwing,
Down the edges, through the passes, up the mountains steep,
Conquering, holding, daring, venturing as we go the unknown ways,
Pioneers! O pioneers!

We primeval forests felling,
We the rivers stemming, vexing we and piercing deep the mines within,
We the surface broad surveying, we the virgin soil upheaving,
Pioneers! O pioneers!

Colorado men are we,
From the peaks gigantic, from the great sierras and the high plateaus,
From the mine and from the gully, from the hunting trail we come,
Pioneers! O pioneers!

From Nebraska, from Arkansas,
Central inland race are we, from Missouri, with the continental blood intervein'd,
All the hands of comrades clasping, all the Southern, all the Northern,
Pioneers! O pioneers!

O resistless restless race!
O beloved race in all! O my breast aches with tender love for all!
O I mourn and yet exult, I am rapt with love for all,
Pioneers! O pioneers!

Raise the mighty mother mistress,
Waving high the delicate mistress, over all the starry mistress, (bend your heads all,)
Raise the fang'd and warlike mistress, stern, impassive, weapon'd mistress,
Pioneers! O pioneers!

See my children, resolute children,
By those swarms upon our rear we must never yield or falter,
Ages back in ghostly millions frowning there behind us urging,
Pioneers! O pioneers!

On and on the compact ranks,
With accessions ever waiting, with the places of the dead quickly fill'd,
Through the battle, through defeat, moving yet and never stopping,
Pioneers! O pioneers!

O to die advancing on!
Are there some of us to droop and die? has the hour come?
Then upon the march we fittest die, soon and sure the gap is fill'd,
Pioneers! O pioneers!

All the pulses of the world,
Falling in they beat for us, with the Western movement beat,
Holding single or together, steady moving to the front, all for us,
Pioneers! O pioneers!

Life's involv'd and varied pageants,
All the forms and shows, all the workmen at their work,

---

26 stemming, damming up • 26 vexing, shaking, disturbing

All the seamen and the landsmen, all the masters with their slaves,
Pioneers! O pioneers!

All the hapless silent lovers,
All the prisoners in the prisons, all the righteous and the wicked,
All the joyous, all the sorrowing, all the living, all the dying,
Pioneers! O pioneers!

I too with my soul and body,
We, a curious trio, picking, wandering on our way,
Through these shores amid the shadows, with the apparitions pressing,
Pioneers! O pioneers!

Lo, the darting bowling orb!
Lo, the brother orbs around, all the clustering suns and planets,
All the dazzling days, all the mystic nights with dreams,
Pioneers! O pioneers!

These are of us, they are with us,
All for primal needed work, while the followers there in embryo wait behind,
We to-day's procession heading, we the route for travel clearing,
Pioneers! O pioneers!

O you daughters of the West!
O you young and elder daughters! O you mothers and you wives!
Never must you be divided, in our ranks you move united,
Pioneers! O pioneers!

Minstrels latent on the prairies!
(Shrouded bards of other lands, you may rest, you have done your work,)
Soon I hear you coming warbling, soon you rise and tramp amid us,
Pioneers! O pioneers!

Not for delectations sweet,
Not the cushion and the slipper, not the peaceful and the studious,
Not the riches safe and palling, not for us the tame enjoyment,
Pioneers! O pioneers!

Do the feasters gluttonous feast?
Do the corpulent sleepers sleep? have they lock'd and bolted doors?
Still be ours the diet hard, and the blanket on the ground,
Pioneers! O pioneers!

Has the night descended?
Was the road of late so toilsome? did we stop discouraged nodding on our way?
Yet a passing hour I yield you in your tracks to pause oblivious,
Pioneers! O pioneers!

Till with sound of trumpet,
Far, far off the daybreak call—hark! how loud and clear I hear it wind,
Swift! to the head of the army!—swift! spring to your places,
Pioneers! O pioneers!

1865-1881

Out of the Cradle Endlessly Rocking

" 'Out of the Cradle Endlessly Rocking' is certainly among the half-dozen finest of Whitman's longer poems, and one of the finest lyrics of the nineteenth century. The sea always moved Whitman, and more than any other physical fact lifted him above the world of assertions and opinions into that of imagination and vision" (John Bailey, Whitman, p. 165).

Out of the cradle endlessly rocking,
Out of the mocking-bird's throat, the musical shuttle,
Out of the Ninth-month midnight,
Over the sterile sands and the fields beyond, where the child leaving his bed wander'd alone, bareheaded, barefoot,
Down from the shower'd halo,

Up from the mystic play of shadows twining and twisting as if they were alive,
Out from the patches of briers and blackberries,
From the memories of the bird that chanted to me,
From your memories sad brother, from the fitful risings and fallings I heard,
From under that yellow half-moon late-risen and swollen as if with tears,
From those beginning notes of yearning and love there in the mist,
From the thousand responses of my heart never to cease,
From the myriad thence-arous'd words,
From the word stronger and more delicious than any,
From such as now they start the scene revisiting,
As a flock, twittering, rising, or overhead passing,
Borne hither, ere all eludes me, hurriedly,
A man, yet by these tears a little boy again,
Throwing myself on the sand, confronting the waves,
I, chanter of pains and joys, uniter of here and hereafter,
Taking all hints to use them, but swiftly leaping beyond them,
A reminiscence sing.
Once Paumanok,
When the lilac-scent was in the air and Fifth-month grass was growing,
Up this seashore in some briers,
Two feather'd guests from Alabama, two together,
And their nest, and four light-green eggs spotted with brown,
And every day the he-bird to and fro near at hand,
And every day the she-bird crouch'd on her nest, silent, with bright eyes,
And every day I, a curious boy, never too close, never disturbing them,
Cautiously peering, absorbing, translating.

Shine! shine! shine!
Pour down your warmth, great sun!
While we bask, we two together.

Two together!
Winds blow south, or winds blow north,
Day come white, or night come black,
Home, or rivers and mountains from home,
Singing all time, minding no time,
While we two keep together.

Till of a sudden,
May-be kill'd, unknown to her mate,
One forenoon the she-bird crouch'd not on the nest,
Nor return'd that afternoon, nor the next,
Nor ever appear'd again.

And thenceforward all summer in the sound of the sea,
And at night under the full of the moon in calmer weather,
Over the hoarse surging of the sea,
Or flitting from brier to brier by day,
I saw, I heard at intervals the remaining one the he-bird,
The solitary guest from Alabama.

Blow! blow! blow!
Blow up sea-winds along Paumanok's shore;
I wait and I wait till you blow my mate to me.

Yes, when the stars glisten'd,
All night long on the prong of a moss-scallop'd stake,
Down almost amid the slapping waves,
Sat the lone singer wonderful causing tears.
He call'd on his mate,
He pour'd forth the meanings which I of all men know.

Yes my brother I know,
The rest might not, but I have treasur'd every note,
For more than once dimly down to the beach gliding,
Silent, avoiding the moonbeams, blending myself with the shadows,
Recalling now the obscure shapes, the echoes, the sounds and sights after their sorts,
The white arms out in the breakers tirelessly tossing,
I, with bare feet, a child, the wind wafting my hair,
Listen'd long and long.

Listen'd to keep, to sing, now translating the notes,
Following you my brother.

Soothe! soothe! soothe!
Close on its wave soothes the wave behind,

---

23 Paumanok. Whitman preferred to call Long Island by its Indian name

And again another behind embracing and lapping, every one close,
But my love soothes not me, not me.

Low hangs the moon, it rose late,
It is lagging—O I think it is heavy with love, with love.

O madly the sea pushes upon the land,
With love, with love.

O night! do I not see my love fluttering out among the breakers?
What is that little black thing I see there in the white?

Loud! loud! loud!
Loud I call to you, my love!
High and clear I shoot my voice over the waves,
Surely you must know who is here, is here,
You must know who I am, my love.

Low-hanging moon!
What is that dusky spot in your brown yellow?
O it is the shape, the shape of my mate!
O moon do not keep her from me any longer.

Land! land! O land!
Whichever way I turn, O I think you could give me my mate back again if you only would,
For I am almost sure I see her dimly whichever way I look.

O rising stars!
Perhaps the one I want so much will rise, will rise with some of you.

O throat! O trembling throat!
Sound clearer through the atmosphere!
Pierce the woods, the earth,
Somewhere listening to catch you must be the one I want.

Shake out carols!
Solitary here, the night's carols!
Carols of lonesome love! death's carols!
Carols under that lagging, yellow, waning moon!
O under that moon where she droops almost down into the sea!
O reckless despairing carols.

But soft! sink low!
Soft! let me just murmur,
And do you wait a moment you husky-nois'd sea,
For somewhere I believe I heard my mate responding to me,
So faint, I must be still, be still to listen,
But not altogether still, for then she might not come immediately to me.

Hither my love!
Here I am! here!
With this just-sustain'd note I announce myself to you,
This gentle call is for you my love, for you.

Do not be decoy'd elsewhere,
That is the whistle of the wind, it is not my voice,
That is the fluttering, the fluttering of the spray,
Those are the shadows of leaves.

O darkness! O in vain!
O I am very sick and sorrowful.
O brown halo in the sky near the moon, drooping upon the sea!
O troubled reflection in the sea!
O throat! O throbbing heart!
And I singing uselessly, uselessly all the night.

O past! O happy life! O songs of joy!
In the air, in the woods, over fields,
Loved! loved! loved! loved! loved!
But my mate no more, no more with me!
We two together no more.

The aria sinking,
All else continuing, the stars shining,
The winds blowing, the notes of the bird continuous echoing.
With angry moans the fierce old mother incessantly moaning,
On the sands of Paumanok's shore gray and rustling,
The yellow half-moon enlarged, sagging down, drooping, the face of the sea almost touching,
The boy ecstatic, with his bare feet the waves, with his hair the atmosphere dallying,
The love in the heart long pent, now loose, now at last tumultuously bursting,

The aria's meaning, the ears, the soul, swiftly depositing,
The strange tears down the cheeks coursing,
The colloquy there, the trio, each uttering,
The undertone, the savage old mother incessantly crying,
To the boy's soul's questions sullenly timing, some drown'd secret hissing,
To the outsetting bard.

Demon or bird! (said the boy's soul,)
Is it indeed toward your mate you sing? or is it really to me?
For I, that was a child, my tongue's use sleeping, now I have heard you,
Now in a moment I know what I am for, I awake,
And already a thousand singers, a thousand songs, clearer, louder and more sorrowful than yours,
A thousand warbling echoes have started to life within me, never to die.

O you singer solitary, singing by yourself, projecting me,
O solitary me listening, never more shall I cease perpetuating you,
Never more shall I escape, never more the reverberations,
Never more the cries of unsatisfied love be absent from me,
Never again leave me to be the peaceful child I was before what there in the night,
By the sea under the yellow and sagging moon,
The messenger there arous'd, the fire, the sweet hell within,
The unknown want, the destiny of me.

O give me the clew! (it lurks in the night here somewhere,)
O if I am to have so much, let me have more!

A word then, (for I will conquer it,)
The word final, superior to all,
Subtle, sent up—what is it?—I listen;
Are you whispering it, and have been all the time, you sea waves?
Is that it from your liquid rims and wet sands?

Whereto answering, the sea,
Delaying not, hurrying not,
Whisper'd me through the night, and very plainly before daybreak,
Lisp'd to me the low and delicious word death,
And again death, death, death, death,
Hissing melodious, neither like the bird nor like my arous'd child's heart,
But edging near as privately for me rustling at my feet,
Creeping thence steadily up to my ears and laving me softly all over,
Death, death, death, death, death.

Which I do not forget,
But fuse the song of my dusky demon and brother,
That he sang to me in the moonlight on Paumanok's gray beach,
With the thousand responsive songs at random,
My own songs awakened from that hour,
And with them the key, the word up from the waves,
The word of the sweetest song and all songs,
That strong and delicious word which, creeping to my feet,
(Or like some old crone rocking the cradle, swathed in sweet garments, bending aside,)
The sea whisper'd me.

1859·1881

When I Heard the Learn'd Astronomer

When I heard the learn'd astronomer,
When the proofs, the figures, were ranged in columns before me,
When I was shown the charts and diagrams, to add, divide, and measure them,
When I sitting heard the astronomer where he lectured with much applause in the lecture-room,
How soon unaccountable I became tired and sick,
Till rising and gliding out I wander'd off by myself,
In the mystical moist night-air, and from time to time,
Look'd up in perfect silence at the stars.

1865·1867

First O Songs for a Prelude

This poem and seven poems which follow ("Beat! Beat! Drums!" "Cavalry Crossing a Ford," "Bivouac on a Mountain Side," "By the Bivouac's Fitful Flame," "Come Up from the Fields Father," "The Wound-Dresser," "Give Me the Splendid Silent Sun") were among the poems which first appeared in Drum-Taps in 1865. The poems of Drum-Taps were later incorporated in the inclusive work Leaves of Grass.

First O songs for a prelude,
Lightly strike on the stretch'd tympanum pride and joy in my city,
How she led the rest to arms, how she gave the cue,
How at once with lithe limbs unwaiting a moment she sprang,
(O superb! O Manhattan, my own, my peerless!
O strongest you in the hour of danger, in crisis! O truer than steel!)
How you sprang—how you threw off the costumes of peace with indifferent hand,
How your soft opera-music changed, and the drum and fife were heard in their stead,
How you led to the war, (that shall serve for our prelude, songs of soldiers,)
How Manhattan drum-taps led.

Forty years had I in my city seen soldiers parading,
Forty years as a pageant, till unawares the lady of this teeming and turbulent city,
Sleepless amid her ships, her houses, her incalculable wealth,
With her million children around her, suddenly,
At dead of night, at news from the south,
Incens'd struck with clinch'd hand the pavement.

A shock electric, the night sustain'd it,
Till with ominous hum our hive at daybreak pour'd out its myriads.
From the houses then and the workshops, and through all the doorways,
Leapt they tumultuous, and lo! Manhattan arming.

To the drum-taps prompt,
The young men falling in and arming,
The mechanics arming, (the trowel, the jack-plane, the blacksmith's hammer, tost aside with precipitation,)
The lawyer leaving his office and arming, the judge leaving the court,
The driver deserting his wagon in the street, jumping down, throwing the reins abruptly down on the horses' backs,
The salesman leaving the store, the boss, book-keeper, porter, all leaving;
Squads gather everywhere by common consent and arm,
The new recruits, even boys, the old men show them how to wear their accoutrements, they buckle the straps carefully,
Outdoors arming, indoors arming, the flash of the musket-barrels,
The white tents cluster in camps, the arm'd sentries around, the sunrise cannon and again at sunset,
Arm'd regiments arrive every day, pass through the city, and embark from the wharves,
(How good they look as they tramp down to the river, sweaty, with their guns on their shoulders!
How I love them! how I could hug them, with their brown faces and their clothes and knapsacks cover'd with dust!)
The blood of the city up—arm'd! arm'd! the cry everywhere,
The flags flung out from the steeples of churches and from all the public buildings and stores,
The tearful parting, the mother kisses her son, the son kisses his mother,
(Loth is the mother to part, yet not a word does she speak to detain him,)
The tumultuous escort, the ranks of policemen preceding, clearing the way,
The unpent enthusiasm, the wild cheers of the crowd for their favorites,
The artillery, the silent cannons bright as gold, drawn along, rumble lightly over the stones,
(Silent cannons, soon to cease your silence,
Soon unlimber'd to begin the red business;)
All the mutter of preparation, all the determin'd arming,

---

42 unlimber'd, detached from the limber or forepart of a gun carriage, and so made ready for firing

The hospital service, the lint, bandages and medicines,
The women volunteering for nurses, the work begun for in earnest, no mere parade now;
War! an arm'd race is advancing! the welcome for battle, no turning away;
War! be it weeks, months, or years, an arm'd race is advancing to welcome it.

Mannahatta a-march—and it's O to sing it well!
It's O for a manly life in the camp.

And the sturdy artillery,
The guns bright as gold, the work for giants, to serve well the guns,
Unlimber them! (no more as the past forty years for salute or courtesies merely,
Put in something now besides powder and wadding.)
And you lady of ships, you Mannahatta,
Old matron of this proud, friendly, turbulent city,
Often in peace and wealth you were pensive or covertly frown'd amid all your children,
But now you smile with joy exulting old Mannahatta.

1865·1867

Beat! Beat! Drums!

Beat! beat! drums!—blow! bugles! blow!
Through the windows—through doors—burst like a ruthless force,
Into the solemn church, and scatter the congregation,
Into the school where the scholar is studying,
Leave not the bridegroom quiet—no happiness must he have now with his bride,

Nor the peaceful farmer any peace, ploughing his field or gathering his grain,
So fierce you whirr and pound you drums—so shrill you bugles blow.

Beat! beat! drums!—blow! bugles! blow!
Over the traffic of cities—over the rumble of wheels in the streets;
Are beds prepared for sleepers at night in the houses? no sleepers must sleep in those beds,
No bargainers' bargains by day—no brokers or speculators—would they continue?
Would the talkers be talking? would the singer attempt to sing?
Would the lawyer rise in the court to state his case before the judge?
Then rattle quicker, heavier drums—you bugles wilder blow.

Beat! beat! drums!—blow! bugles! blow!
Make no parley—stop for no expostulation,
Mind not the timid—mind not the weeper or prayer,
Mind not the old man beseeching the young man,
Let not the child's voice be heard, nor the mother's entreaties,
Make even the trestles to shake the dead where they lie awaiting hearses,
So strong you thump O terrible drums—so loud you bugles blow.

1865·1867

Cavalry Crossing a Ford

A line in long array where they wind betwixt green islands,
They take a serpentine course, their arms flash in the sun—hark to the musical clank,
Behold the silvery river, in it the splashing horses loitering stop to drink,
Behold the brown-faced men, each group, each person a picture, the negligent rest on the saddles,
Some emerge on the opposite bank, others are just entering the ford—while,
Scarlet and blue and snowy white,
The guidon flags flutter gayly in the wind.

1865·1871

Bivouac on a Mountain Side

I see before me now a traveling army halting,
Below a fertile valley spread, with barns and the orchards of summer,

Behind, the terraced sides of a mountain, abrupt, in places rising high,
Broken, with rocks, with clinging cedars, with tall shapes dingily seen,
The numerous camp-fires scatter'd near and far, some away up on the mountain,
The shadowy forms of men and horses, looming, large-sized, flickering,
And over all the sky—the sky! far, far out of reach, studded, breaking out, the eternal stars.

1865·1871

By the Bivouac's Fitful Flame

By the bivouac's fitful flame,
A procession winding around me, solemn and sweet and slow—but first I note,
The tents of the sleeping army, the fields' and woods' dim outline,
The darkness lit by spots of kindled fire, the silence,
Like a phantom far or near an occasional figure moving,
The shrubs and trees, (as I lift my eyes they seem to be stealthily watching me,)
While wind in procession thoughts, O tender and wondrous thoughts,
Of life and death, of home and the past and loved, and of those that are far away;
A solemn and slow procession there as I sit on the ground,
By the bivouac's fitful flame.

1865·1867

Come Up from the Fields Father

Come up from the fields father, here's a letter from our Pete,
And come to the front door mother, here's a letter from thy dear son.

Lo, 'tis autumn,
Lo, where the trees, deeper green, yellower and redder,
Cool and sweeten Ohio's villages with leaves fluttering in the moderate wind,
Where apples ripe in the orchards hang and grapes on the trellis'd vines,
(Smell you the smell of the grapes on the vines?
Smell you the buckwheat where the bees were lately buzzing?)

Above all, lo, the sky so calm, so transparent after the rain, and with wondrous clouds,
Below too, all calm, all vital and beautiful, and the farm prospers well.

Down in the fields all prospers well,
But now from the fields come father, come at the daughter's call,
And come to the entry mother, to the front door come right away.

Fast as she can she hurries, something ominous, her steps trembling,
She does not tarry to smooth her hair nor adjust her cap.
Open the envelope quickly,
O this is not our son's writing, yet his name is sign'd,
O a strange hand writes for our dear son, O stricken mother's soul!
All swims before her eyes, flashes with black, she catches the main words only,
Sentences broken, *gunshot wound in the breast, cavalry skirmish, taken to hospital,*
At present low, but will soon be better.

Ah now the single figure to me,
Amid all teeming and wealthy Ohio with all its cities and farms,
Sickly white in the face and dull in the head, very faint,
By the jamb of a door leans.

Grieve not so, dear mother, (the just-grown daughter speaks through her sobs,
The little sisters huddle around speechless and dismay'd,)
See, dearest mother, the letter says Pete will soon be better.

Alas poor boy, he will never be better, (nor may-be needs to be better, that brave and simple soul,)
While they stand at home at the door he is dead already,
The only son is dead.

But the mother needs to be better,
She with thin form presently drest in black,
By day her meals untouch'd, then at night fitfully sleeping, often waking,
In the midnight waking, weeping, longing with one deep longing,
O that she might withdraw unnoticed, silent from life escape and withdraw,
To follow, to seek, to be with her dear dead son.

1865-1867

The Wound-Dresser

1

An old man bending I come among new faces,
Years looking backward resuming in answer to children,
Come tell us old man, as from young men and maidens that love me,
(Arous'd and angry, I'd thought to beat the alarum, and urge relentless war,
But soon my fingers fail'd me, my face droop'd and I resign'd myself,
To sit by the wounded and soothe them, or silently watch the dead;)
Years hence of these scenes, of these furious passions, these chances,
Of unsurpass'd heroes, (was one side so brave? the other was equally brave;)
Now be witness again, paint the mightiest armies of earth,
Of those armies so rapid so wondrous what saw you to tell us?
What stays with you latest and deepest? of curious panics,
Of hard-fought engagements or sieges tremendous what deepest remains?

2

O maidens and young men I love and that love me,
What you ask of my days those the strangest and sudden your talking recalls,
Soldier alert I arrive after a long march cover'd with sweat and dust,
In the nick of time I come, plunge in the fight, loudly shout in the rush of successful charge,
Enter the captur'd works—yet lo, like a swift-running river they fade,
Pass and are gone they fade—I dwell not on soldiers' perils or soldiers' joys,
(Both I remember well—many of the hardships, few the joys, yet I was content.)
But in silence, in dreams' projections,
While the world of gain and appearance and mirth goes on,
So soon what is over forgotten, and waves wash the imprints off the sand,
With hinged knees returning I enter the doors, (while for you up there,
Whoever you are, follow without noise and be of strong heart.)

Bearing the bandages, water and sponge,
Straight and swift to my wounded I go,
Where they lie on the ground after the battle brought in.
Where their priceless blood reddens the grass the ground,
Or to the rows of the hospital tent, or under the roof'd hospital,
To the long rows of cots up and down each side I return,
To each and all one after another I draw near, not one do I miss,
An attendant follows holding a tray, he carries a refuse pail,
Soon to be fill'd with clotted rags and blood, emptied, and fill'd again.

I onward go, I stop,
With hinged knees and steady hand to dress wounds,
I am firm with each, the pangs are sharp yet unavoidable,

One turns to me his appealing eyes—poor boy! I never knew you,
Yet I think I could not refuse this moment to die for you, if that would save you.

3

On, on I go, (open doors of time! open hospital doors!)
The crush'd head I dress, (poor crazed hand tear not the bandage away,)
The neck of the cavalry-man with the bullet through and through I examine,
Hard the breathing rattles, quite glazed already the eye, yet life struggles hard,
(Come sweet death! be persuaded O beautiful death!
In mercy come quickly.)
From the stump of the arm, the amputated hand,
I undo the clotted lint, remove the slough, wash off the matter and blood,
Back on his pillow the soldier bends with curv'd neck and side falling head,
His eyes are closed, his face is pale, he dares not look on the bloody stump,
And has not yet look'd on it.

I dress a wound in the side, deep, deep,
But a day or two more, for see the frame all wasted and sinking,
And the yellow-blue countenance see.

I dress the perforated shoulder, the foot with the bullet-wound,
Cleanse the one with a gnawing and putrid gangrene, so sickening, so offensive,
While the attendant stands behind aside me holding the tray and pail.

I am faithful, I do not give out,
The fractur'd thigh, the knee, the wound in the abdomen,
These and more I dress with impassive hand, (yet deep in my breast a fire, a burning flame.)

4

Thus in silence in dreams' projections,
Returning, resuming, I thread my way through the hospitals,
The hurt and wounded I pacify with soothing hand,
I sit by the restless all the dark night, some are so young,
Some suffer so much, I recall the experience sweet and sad,
(Many a soldier's loving arms about this neck have cross'd and rested,
Many a soldier's kiss dwells on these bearded lips.)

1865-1881

Give Me the Splendid Silent Sun

1

Give me the splendid silent sun with all his beams full-dazzling,
Give me juicy autumnal fruit ripe and red from the orchard,
Give me a field where the unmow'd grass grows,
Give me an arbor, give me the trellis'd grape,
Give me fresh corn and wheat, give me serene-moving animals teaching content,
Give me nights perfectly quiet as on high plateaus west of the Mississippi, and I looking up at the stars,
Give me odorous at sunrise a garden of beautiful flowers where I can walk undisturb'd,
Give me for marriage a sweet-breath'd woman of whom I should never tire,
Give me a perfect child, give me away aside from the noise of the world a rural domestic life,
Give me to warble spontaneous songs recluse by myself, for my own ears only,
Give me solitude, give me Nature, give me again O Nature your primal sanities!

These demanding to have them, (tired with ceaseless excitement, and rack'd by the war-strife,)
These to procure incessantly asking, rising in cries from my heart,
While yet incessantly asking still I adhere to my city,
Day upon day and year upon year O city, walking your streets,
Where you hold me enchain'd a certain time refusing to give me up,

Yet giving to make me glutted, enrich'd of soul, you give me forever faces;
(O I see what I sought to escape, confronting, reversing my cries,
I see my own soul trampling down what it ask'd for.)

2

Keep your splendid silent sun,
Keep your woods O Nature, and the quiet places by the woods,
Keep your fields of clover and timothy, and your corn-fields and orchards,
Keep the blossoming buckwheat fields where the Ninth month bees hum;
Give me faces and streets—give me these phantoms incessant and endless along the trottoirs!
Give me interminable eyes—give me women—give me comrades and lovers by the thousand!
Let me see new ones every day—let me hold new ones by the hand every day!
Give me such shows—give me the streets of Manhattan!
Give me Broadway, with the soldiers marching—give me the sound of the trumpets and drums!
(The soldiers in companies or regiments—some starting away, flush'd and reckless,
Some, their time up, returning with thinn'd ranks, young, yet very old, worn, marching, noticing nothing;)
Give me the shores and wharves heavy-fringed with black ships!
O such for me! O an intense life, full to repletion and varied!
The life of the theatre, bar-room, huge hotel, for me!
The saloon of the steamer! the crowded excursion for me! the torchlight procession!
The dense brigade bound for the war, with high piled military wagons following;
People, endless, streaming, with strong voices, passions, pageants,
Manhattan streets with their powerful throbs, with beating drums as now,
The endless and noisy chorus, the rustle and clank of muskets, (even the sight of the wounded,)
Manhattan crowds, with their turbulent musical chorus!
Manhattan faces and eyes forever for me.

1865-1867

When Lilacs Last in the Dooryard Bloom'd

Though Lincoln is not mentioned by name in "When Lilacs Last in the Dooryard Bloom'd," his death in April 1865 was the occasion of its composition. It is, by common consent, the greatest of the many poems about Lincoln in American literature; and in the judgment of John Bailey, perhaps the most judicious of Whitman's critics, the lyric within the poem (beginning "Come lovely and soothing death") is "one of the great lyrics of the world." The poem was first printed in **Sequel to Drum-Taps** in 1865.

Whitman and Lincoln never met formally or talked together, though Whitman wrote in **Specimen Days** for August 12, 1863: "I see the President almost every day, as I happen to live where he passes to and from his lodgings out of town. . . . We have got so that we exchange bows, and very cordial ones." And the story is related (in Bucke's **Life of Whitman**) that Lincoln, seeing Whitman walk by the White House, asked who he was, and upon being told, said: "Well, he looks like a man."

"Of all the days of the war," Whitman recorded in **Specimen Days**, "there are two especially I can never forget. Those were the day following the news, in New York and Brooklyn, of that first Bull Run defeat, and the day of Abraham Lincoln's death. I was home in Brooklyn on both occasions. The day of the murder we heard the news very early in the morning. Mother prepared breakfast —and other meals afterward—as usual; but not a mouthful was eaten all day by either of us. We each drank half a cup of coffee; that was all. Little was said. We got every newspaper morning and evening, and the frequent extras of that period, and pass'd them silently to each other."

1

When lilacs last in the dooryard bloom'd,
And the great star early droop'd in the western sky in the night,

---

24 **trottoirs**, a French word meaning sidewalks; one of many amusing examples of Whitman's fondness for foreign words, despite his assertion in the Preface of the grand sufficiency of the English language

I mourn'd, and yet shall mourn with ever-returning spring.

Ever-returning spring, trinity sure to me you bring,
Lilac blooming perennial and drooping star in the west,
And thought of him I love.

2

O powerful western fallen star!
O shades of night—O moody, tearful night!
O great star disappear'd—O the black murk that hides the star!
O cruel hands that hold me powerless—O helpless soul of me!
O harsh surrounding cloud that will not free my soul.

3

In the dooryard fronting an old farm-house near the whitewash'd palings,
Stands the lilac-bush tall-growing with heart-shaped leaves of rich green,
With many a pointed blossom rising delicate, with the perfume strong I love,
With every leaf a miracle—and from this bush in the dooryard,
With delicate-color'd blossoms and heart-shaped leaves of rich green,
A sprig with its flower I break.

4

In the swamp in secluded recesses,
A shy and hidden bird is warbling a song.
Solitary the thrush,
The hermit withdrawn to himself, avoiding the settlements,
Sings by himself a song.

Song of the bleeding throat,
Death's outlet song of life, (for well dear brother I know,
If thou wast not granted to sing thou would'st surely die.)

5

Over the breast of the spring, the land, amid cities,
Amid lanes and through old woods, where lately the violets peep'd from the ground, spotting the gray debris,
Amid the grass in the fields each side of the lanes, passing the endless grass,
Passing the yellow-spear'd wheat, every grain from its shroud in the dark-brown fields uprisen,
Passing the apple-tree blows of white and pink in the orchards,
Carrying a corpse to where it shall rest in the grave,
Night and day journeys a coffin.

6

Coffin that passes through lanes and streets,
Through day and night with the great cloud darkening the land,
With the pomp of the inloop'd flags with the cities draped in black,
With the show of the States themselves as of crape-veil'd women standing,
With processions long and winding and the flambeaus of the night,
With the countless torches lit, with the silent sea of faces and the unbared heads,
With the waiting depot, the arriving coffin, and the sombre faces,
With dirges through the night, with the thousand voices rising strong and solemn,
With all the mournful voices of the dirges pour'd around the coffin,
The dim-lit churches and the shuddering organs—where amid these you journey,
With the tolling tolling bells' perpetual clang,
Here, coffin that slowly passes,
I give you my sprig of lilac.

7

(Nor for you, for one alone,
Blossoms and branches green to coffins all I bring,
For fresh as the morning, thus would I chant a song for you O sane and sacred death.

All over bouquets of roses,
O death, I cover you over with roses and early lilies,
But mostly and now the lilac that blooms the first,
Copious I break, I break the sprigs from the bushes,

---

30 blows, blossoms • 32 journeys a coffin. The funeral train crossed the continent to Springfield, Illinois, where Lincoln was buried

With loaded arms I come, pouring for you,
For you and the coffins all of you O death.)

8

O western orb sailing the heaven,
Now I know what you must have meant as a month since I walk'd,
As I walk'd in silence the transparent shadowy night,
As I saw you had something to tell as you bent to me night after night,
As you droop'd from the sky low down as if to my side, (while the other stars all look'd on,)
As we wander'd together the solemn night, (for something I know not what kept me from sleep,)
As the night advanced, and I saw on the rim of the west how full you were of woe,
As I stood on the rising ground in the breeze in the cool transparent night,
As I watch'd where you pass'd and was lost in the netherward black of the night,
As my soul in its trouble dissatisfied sank, as where you sad orb,
Concluded, dropt in the night, and was gone.

9

Sing on there in the swamp,
O singer bashful and tender, I hear your notes, I hear your call,
I hear, I come presently, I understand you,
But a moment I linger, for the lustrous star has detain'd me,
The star my departing comrade holds and detains me.

10

O how shall I warble myself for the dead one there I loved?
And how shall I deck my song for the large sweet soul that has gone?
And what shall my perfume be for the grave of him I love?

Sea-winds blown from east and west,
Blown from the Eastern sea and blown from the Western sea, till there on the prairies meeting,
These and with these and the breath of my chant,
I'll perfume the grave of him I love.

11

O what shall I hang on the chamber walls?
And what shall the pictures be that I hang on the walls,
To adorn the burial-house of him I love?

Pictures of growing spring and farms and homes,
With the Fourth-month eve at sundown, and the gray smoke lucid and bright,
With floods of the yellow gold of the gorgeous, indolent, sinking sun, burning, expanding the air,
With the fresh sweet herbage under foot, and the pale green leaves of the trees prolific,
In the distance the flowing glaze, the breast of the river, with a wind-dapple here and there,
With ranging hills on the banks, with many a line against the sky, and shadows,
And the city at hand with dwellings so dense, and stacks of chimneys,
And all the scenes of life and the workshops, and the workmen homeward returning.

12

Lo, body and soul—this land,
My own Manhattan with spires, and the sparkling and hurrying tides, and the ships,
The varied and ample land, the South and the North in the light, Ohio's shores and flashing Missouri,
And ever the far-spreading prairies cover'd with grass and corn.
Lo, the most excellent sun so calm and haughty,
The violet and purple morn with just-felt breezes,
The gentle soft-born measureless light,
The miracle spreading bathing all, the fulfill'd noon,
The coming eve delicious, the welcome night and the stars,
Over my cities shining all, enveloping man and land.

13

Sing on, sing on you gray-brown bird,
Sing from the swamps, the recesses, pour your chant from the bushes,
Limitless out of the dusk, out of the cedars and pines.

Sing on dearest brother, warble your reedy song,
Loud human song, with voice of uttermost woe.

O liquid and free and tender!
O wild and loose to my soul—O wondrous singer!
You only I hear—yet the star holds me, (but will soon depart,)
Yet the lilac with mastering odor holds me.

14

Now while I sat in the day and look'd forth,
In the close of the day with its light and the fields of spring, and the farmers preparing their crops,
In the large unconscious scenery of my land with its lakes and forests,
In the heavenly aerial beauty, (after the perturb'd winds and the storms,)
Under the arching heavens of the afternoon swift passing, and the voices of children and women,
The many-moving sea-tides, and I saw the ships how they sail'd,
And the summer approaching with richness, and the fields all busy with labor,
And the infinite separate houses, how they all went on, each with its meals and minutia of daily usages,
And the streets how their throbbings throbb'd, and the cities pent—lo, then and there,
Falling upon them all and among them all, enveloping me with the rest,
Appear'd the cloud, appear'd the long black trail,
And I knew death, its thought, and the sacred knowledge of death.

Then with the knowledge of death as walking one side of me,
And the thought of death close-walking the other side of me,
And I in the middle as with companions, and as holding the hands of companions,
I fled forth to the hiding receiving night that talks not,
Down to the shores of the water, the path by the swamp in the dimness,
To the solemn shadowy cedars and ghostly pines so still.

And the singer so shy to the rest receiv'd me,
The gray-brown bird I know receiv'd us comrades three,
And he sang the carol of death, and a verse for him I love.
From deep secluded recesses,
From the fragrant cedars and the ghostly pines so still,
Came the carol of the bird.

And the charm of the carol rapt me,
As I held as if by their hands my comrades in the night,
And the voice of my spirit tallied the song of the bird.

Come lovely and soothing death,
Undulate round the world, serenely arriving, arriving,
In the day, in the night, to all, to each,
Sooner or later delicate death.

Prais'd be the fathomless universe,
For life and joy, and for objects and knowledge curious,
And for love, sweet love—but praise! praise! praise!
For the sure-enwinding arms of cool-enfolding death.

Dark mother always gliding near with soft feet,
Have none chanted for thee a chant of fullest welcome?
Then I chant it for thee, I glorify thee above all,
I bring thee a song that when thou must indeed come, come unfalteringly.

Approach strong deliveress,
When it is so, when thou hast taken them I joyously sing the dead,
Lost in the loving floating ocean of thee,
Laved in the flood of thy bliss O death.

From me to thee glad serenades,
Dances for thee I propose saluting thee, adornments and feastings for thee,
And the sights of the open landscape and the high-spread sky are fitting,
And life and the fields, and the huge and thoughtful night.

The night in silence under many a star,
The ocean shore and the husky whispering wave whose voice I know,
And the soul turning to thee O vast and well-veil'd death,
And the body gratefully nestling close to thee.

Over the tree-tops I float thee a song,
Over the rising and sinking waves, over the myriad fields and the prairies wide,

Over the dense-pack'd cities all and the teeming wharves and ways,
I float this carol with joy, with joy to thee O death.

15

To the tally of my soul,
Loud and strong kept up the gray-brown bird,
With pure deliberate notes spreading filling the night.

Loud in the pines and cedars dim,
Clear in the freshness moist and the swamp-perfume,
And I with my comrades there in the night.

While my sight that was bound in my eyes unclosed,
As to long panoramas of visions.

And I saw askant the armies,
I saw as in noiseless dreams hundreds of battle-flags,
Borne through the smoke of the battles and pierc'd with missiles I saw them,
And carried hither and yon through the smoke, and torn and bloody,
And at last but a few shreds left on the staffs, (and all in silence,)
And the staffs all splinter'd and broken.

I saw battle-corpses, myriads of them,
And the white skeletons of young men, I saw them,
I saw the debris and debris of all the slain soldiers of the war,
But I saw they were not as was thought,
They themselves were fully at rest, they suffer'd not,
The living remain'd and suffer'd, the mother suffer'd,
And the wife and the child and the musing comrade suffer'd,
And the armies that remain'd suffer'd.

16

Passing the visions, passing the night,
Passing, unloosing the hold of my comrades' hands,
Passing the song of the hermit bird and the tallying song of my soul,
Victorious song, death's outlet song, yet varying ever-altering song,
As low and wailing, yet clear the notes, rising and falling, flooding the night,
Sadly sinking and fainting, as warning and warning, and yet again bursting with joy,
Covering the earth and filling the spread of the heaven,
As that powerful psalm in the night I heard from recesses,
Passing, I leave thee lilac with heart-shaped leaves,
I leave thee there in the door-yard, blooming, returning with spring.

I cease from my song for thee,
From my gaze on thee in the west, fronting the west, communing with thee,
O comrade lustrous with silver face in the night.

Yet each to keep and all, retrievements out of the night,
The song, the wondrous chant of the gray-brown bird,
And the tallying chant, the echo arous'd in my soul,
With the lustrous and drooping star with the countenance full of woe,
With the holders holding my hand nearing the call of the bird,
Comrades mine and I in the midst, and their memory ever to keep, for the dead I loved so well,
For the sweetest, wisest soul of all my days and lands—and this for his dear sake,
Lilac and star and bird twined with the chant of my soul,
There in the fragrant pines and the cedars dusk and dim.

1865·1881

There Was a Child Went Forth

There was a child went forth every day,
And the first object he look'd upon, that object he became,
And that object became part of him for the day or a certain part of the day,
Or for many years or stretching cycles of years.

The early lilacs became part of this child,
And grass and white and red morning-glories, and white and red clover, and the song of the phœbe-bird,

And the Third-month lambs and the sow's pink-faint litter, and the mare's foal and the cow's calf,
And the noisy brood of the barnyard or by the mire of the pond-side,
And the fish suspending themselves so curiously below there, and the beautiful curious liquid,
And the water-plants with their graceful flat heads, all became part of him.

The field-sprouts of Fourth-month and Fifth-month became part of him,
Winter-grain sprouts and those of the light-yellow corn, and the esculent roots of the garden,
And the apple-trees cover'd with blossoms and the fruit afterward, and wood-berries, and the commonest weeds by the road,
And the old drunkard staggering home from the out-house of the tavern whence he had lately risen,
And the schoolmistress that pass'd on her way to the school,
And the friendly boys that pass'd, and the quarrelsome boys,
And the tidy and fresh-cheek'd girls, and the barefoot Negro boy and girl,
And all the changes of city and country wherever he went.

His own parents, he that had father'd him and she that had conceiv'd him in her womb and birth'd him,
They gave this child more of themselves than that,
They gave him afterward every day, they became part of him.

The mother at home quietly placing the dishes on the supper-table,
The mother with mild words, clean her cap and gown, a wholesome odor falling off her person and clothes as she walks by,
The father, strong, self-sufficient, manly, mean, anger'd, unjust,
The blow, the quick loud word, the tight bargain, the crafty lure,
The family usages, the language, the company, the furniture, the yearning and swelling heart,
Affection that will not be gainsay'd, the sense of what is real, the thought if after all it should prove unreal,
The doubts of day-time and the doubts of night-time, the curious whether and how,
Whether that which appears so is so, or is it all flashes and specks?
Men and women crowding fast in the streets, if they are not flashes and specks what are they?
The streets themselves and the façades of houses, and goods in the windows,
Vehicles, teams, the heavy-plank'd wharves, the huge crossing at the ferries,
The village on the highland seen from afar at sunset, the river between,
Shadows, aureola and mist, the light falling on roofs and gables of white or brown two miles off,
The schooner near by sleepily dropping down the tide, the little boat slack-tow'd astern,
The hurrying tumbling waves, quick-broken crests, slapping,
The strata of color'd clouds, the long bar of maroon-tint away solitary by itself, the spread of purity it lies motionless in,
The horizon's edge, the flying sea-crow, the fragrance of salt marsh and shore mud,
These became part of that child who went forth every day, and who now goes, and will always go forth every day.

1855·1871

Miracles

"Romanticism" is many-sided, but one of its chief aspects in nineteenth-century poetry was described by Theodore Watts-Dunton, the friend of Swinburne, as "the renascence of wonder." Wordsworth's purpose, according to Coleridge, was to direct the attention to "the loveliness and the wonders of the world before us; an inexhaustible treasure, but for which, in consequence of the film of familiarity and selfish solicitude, we have eyes, yet see not, ears that hear not, and hearts that neither feel nor understand." Similarly, Emerson (in "Woodnotes") char-

7 Third-month. The 1855 version had "March-born"; "Third-month" was substituted in the version of 1860 • 19 he . . . father'd. The 1855 version read "he that had propelled the fatherstuff at night, and fathered him"; the present reading dates from the 1860 edition The student should consult Holloway's "Inclusive Edition" of Leaves of Grass for a complete list of Whitman's many revisions

acterized the poet as "Wonderer at all he meets." In "Miracles" and in countless other places in his writings Whitman expresses this distinctively romantic view of the world.

Why, who makes much of a miracle?
As to me I know of nothing else but miracles,
Whether I walk the streets of Manhattan,
Or dart my sight over the roofs of houses toward the sky,
Or wade with naked feet along the beach just in the edge of the water,
Or stand under trees in the woods,
Or talk by day with any one I love, or sleep in the bed at night with any one I love,
Or sit at table at dinner with the rest,
Or look at strangers opposite me riding in the car,
Or watch honey-bees busy around the hive of a summer forenoon,
Or animals feeding in the fields,
Or birds, or the wonderfulness of insects in the air,
Or the wonderfulness of the sundown, or of stars shining so quiet and bright,
Or the exquisite delicate thin curve of the new moon in spring;
These with the rest, one and all, are to me miracles,
The whole referring, yet each distinct and in its place.

To me every hour of the light and dark is a miracle,
Every cubic inch of space is a miracle,
Every square yard of the surface of the earth is spread with the same,
Every foot of the interior swarms with the same.

To me the sea is a continual miracle,
The fishes that swim—the rocks—the motion of the waves—the ships with men in them,
What stranger miracles are there?

1856-1881

Passage to India

"Passage to India" is the most transcendental of Whitman's poems, the most notable expression of mysticism in his writings. He begins by celebrating the physical explorations of man. Columbus, in discovering America, was seeking a water-route to India. The completion of the American transcontinental railroad, the Atlantic cable, and the Suez Canal had accomplished the "rondure" of the earth and brought India nearer to the Western world. But these physical voyages and explorations are mere symbols, in man's development, of spiritual voyages and explorations. Since Oriental religious thought, preëminently, has been concerned with the problem of spiritual reality, "Passage to India" suggests the soul's confronting of the "aged fierce enigmas." The solution of these enigmas becomes possible only in the mystic union of the soul with God:

. . . the Elder Brother found,
The Younger melts in fondness in his arms.

In the end the soul achieves "passage to more than India," perhaps in a double sense: to more than a physical India, and to a spiritual realization which transcends even the highest teachings of the Brahmins.

The poem recalls Emerson's and Thoreau's interest in the Oriental scriptures.

1

Singing my days,
Singing the great achievements of the present,
Singing the strong light works of engineers,
Our modern wonders, (the antique ponderous Seven outvied,)
In the Old World the east the Suez canal,
The New by its mighty railroad spann'd,
The seas inlaid with eloquent gentle wires;
Yet first to sound, and ever sound, the cry with thee O soul,
The Past! the Past! the Past!

The Past—the dark unfathom'd retrospect!
The teeming gulf—the sleepers and the shadows!

Passage to India • **4 Seven.** The Seven Wonders of the ancient world were: the pyramids of Egypt, the Pharos (lighthouse on the island of Pharos) of Alexandria, the walls and hanging gardens of Babylon, the temple of Diana at Ephesus, the statue of Jupiter by Phidias, the mausoleum erected by Artemisia at Halicarnassus, the Colossus of Rhodes • **5 Suez canal,** completed in 1867, formally opened in 1869 • **6 railroad.** The Union Pacific Railroad was completed in 1869 • **7 wires.** The laying of the first permanently successful Atlantic cable was completed in 1866

The past—the infinite greatness of the past!
For what is the present after all but a growth out of the past?
(As a projectile form'd, impell'd, passing a certain line, still keeps on,
So the present, utterly form'd, impell'd by the past.)

2

Passage O soul to India!
Eclaircise the myths Asiatic, the primitive fables

Not you alone proud truths of the world,
Nor you alone ye facts of modern science,
But myths and fables of eld, Asia's, Africa's fables,
The far-darting beams of the spirit, the unloos'd dreams,
The deep diving bibles and legends,
The daring plots of the poets, the elder religions;
O you temples fairer than lilies pour'd over by the rising sun!
O you fables spurning the known, eluding the hold of the known, mounting to heaven!
You lofty and dazzling towers, pinnacled, red as roses, burnish'd with gold!
Towers of fables immortal fashion'd from mortal dreams!
You too I welcome and fully the same as the rest!
You too with joy I sing.

Passage to India!
Lo, soul, seest thou not God's purpose from the first?
The earth to be spann'd, connected by network,
The races, neighbors, to marry and be given in marriage,
The oceans to be cross'd, the distant brought near,
The lands to be welded together.

A worship new I sing,
You captains, voyagers, explorers, yours,
You engineers, you architects, machinists, yours,
You, not for trade or transportation only,
But in God's name, and for thy sake O soul.

3

Passage to India!
Lo soul for thee of tableaus twain.
I see in one the Suez canal initiated, open'd,
I see the procession of steamships, the Empress Eugenie's leading the van,
I mark from on deck the strange landscape, the pure sky, the level sand in the distance,
I pass swiftly the picturesque groups, the workmen gather'd,
The gigantic dredging machines.

In one again, different, (yet thine, all thine, O soul, the same,)
I see over my own continent the Pacific railroad surmounting every barrier,
I see continual trains of cars winding along the Platte carrying freight and passengers,
I hear the locomotives rushing and roaring, and the shrill steam-whistle,
I hear the echoes reverberate through the grandest scenery in the world,
I cross the Laramie plains, I note the rocks in grotesque shapes, the buttes,
I see the plentiful larkspur and wild onions, the barren, colorless, sage-deserts,
I see in glimpses afar or towering immediately above me the great mountains, I see the Wind river and the Wahsatch mountains,
I see the Monument mountain and the Eagle's Nest, I pass the Promontory, I ascend the Nevadas,
I scan the noble Elk mountain and wind around its base,
I see the Humboldt range, I thread the valley and cross the river,
I see the clear waters of lake Tahoe, I see forests of majestic pines,
Or crossing the great desert, the alkaline plains, I behold enchanting mirages of waters and meadows,
Marking through these and after all, in duplicate slender lines,
Bridging the three or four thousand miles of land travel,
Tying the Eastern to the Western sea,
The road between Europe and Asia.

---

17 Eclaircise, explain, clarify • 44 Eugénie, wife of Napoleon III and the empress of the French, who was on board the ship at the head of a procession whose passage marked the formal opening of the canal in November 1869 • 50 Platte. The Platte River flows through Nebraska into the Missouri River • 53 Laramie plains, in Wyoming • 53 buttes, isolated small mountains or hills, with steep sides and turretlike formations • 55 Wind river, a mountain range in Wyoming • 55 Wahsatch mountains. The Wasatch Range is in Utah • 56 Eagle's Nest, in Colorado • 57 Elk mountain, in Wyoming • 58 Humboldt range, in Nevada • 59 lake Tahoe, in Nevada and California

(Ah Genoese thy dream! thy dream!
Centuries after thou art laid in thy grave,
The shore thou foundest verifies thy dream.)

4

Passage to India!
Struggles of many a captain, tales of many a sailor dead,
Over my mood stealing and spreading they come,
Like clouds and cloudlets in the unreach'd sky.

Along all history, down the slopes,
As a rivulet running, sinking now, and now again to the surface rising,
A ceaseless thought, a varied train—lo, soul, to thee, thy sight, they rise,
The plans, the voyages again, the expeditions;
Again Vasco de Gama sails forth,
Again the knowledge gain'd, the mariner's compass,
Lands found and nations born, thou born America.
For purpose vast, man's long probation fill'd,
Thou rondure of the world at last accomplish'd.

5

O vast Rondure, swimming in space,
Cover'd all over with visible power and beauty,
Alternate light and day and the teeming spiritual darkness,
Unspeakable high processions of sun and moon and countless stars above,
Below, the manifold grass and waters, animals, mountains, trees,
With inscrutable purpose, some hidden prophetic intention,
Now first it seems my thought begins to span thee.

Down from the gardens of Asia descending radiating,
Adam and Eve appear, then their myriad progeny after them,
Wandering, yearning, curious, with restless explorations,
With questionings, baffled, formless, feverish, with never-happy hearts,
With that sad incessant refrain, *Wherefore unsatisfied soul?* and *Whither O mocking life?*

Ah who shall soothe these feverish children?
Who justify these restless explorations?
Who speak the secret of impassive earth?
Who bind it to us? what is this separate Nature so unnatural?
What is this earth to our affections? (unloving earth, without a throb to answer ours,
Cold earth, the place of graves.)

Yet soul be sure the first intent remains, and shall be carried out,
Perhaps even now the time has arrived.
After the seas are all cross'd, (as they seem already cross'd,)
After the great captains and engineers have accomplish'd their work,
After the noble inventors, after the scientists, the chemist, the geologist, ethnologist,
Finally shall come the poet worthy that name,
The true son of God shall come singing his songs.

Then not your deeds only O voyagers, O scientists and inventors, shall be justified,
All these hearts as of fretted children shall be sooth'd,
All affection shall be fully responded to, the secret shall be told,
All these separations and gaps shall be taken up and hook'd and link'd together,
The whole earth, this cold, impassive, voiceless earth, shall be completely justified,
Trinitas divine shall be gloriously accomplish'd and compacted by the true son of God, the poet,
(He shall indeed pass the straits and conquer the mountains,
He shall double the cape of Good Hope to some purpose,)
Nature and Man shall be disjoin'd and diffused no more,
The true son of God shall absolutely fuse them.

6

Year at whose wide-flung door I sing!
Year of the purpose accomplish'd!
Year of the marriage of continents, climates and oceans!

---

65 Genoese, Columbus, who, when he discovered America, was seeking a "passage to India" • 76 Vasco de Gama, Vasco da Gama, in 1498 discovered the water route to India around the Cape of Good Hope • 80 rondure, roundness • 111 Trinitas, the Holy Trinity

(No mere doge of Venice now wedding the Adriatic,)
I see O year in you the vast terraqueous globe given and giving all,
Europe to Asia, Africa join'd, and they to the New World,
The lands, geographies, dancing before you, holding a festival garland,
As brides and bridegrooms hand in hand.

Passage to India!
Cooling airs from Caucasus, far, soothing cradle of man,
The river Euphrates flowing, the past lit up again.
Lo soul, the retrospect brought forward,
The old, most populous, wealthiest of earth's lands,
The streams of the Indus and the Ganges and their many affluents,
(I my shores of America walking to-day behold, resuming all,)
The tale of Alexander on his warlike marches suddenly dying,
On one side China and on the other side Persia and Arabia,
To the south the great seas and the bay of Bengal,
The flowing literatures, tremendous epics, religions, castes,
Old occult Brahma interminably far back, the tender and junior Buddha,
Central and southern empires and all their belongings, possessors,
The wars of Tamerlane, the reign of Aurungzebe,
The traders, rulers, explorers, Moslems, Venetians, Byzantium, the Arabs, Portuguese,
The first travelers famous yet, Marco Polo, Batouta the Moor,
Doubts to be solv'd, the map incognita, blanks to be fill'd,
The foot of man unstay'd, the hands never at rest,
Thyself O soul that will not brook a challenge.
The mediæval navigators rise before me,
The world of 1492, with its awaken'd enterprise,
Something swelling in humanity now like the sap of the earth in spring,
The sunset splendor of chivalry declining.

And who art thou sad shade?
Gigantic, visionary, thyself a visionary,
With majestic limbs and pious beaming eyes,
Spreading around with every look of thine a golden world,
Enhuing it with gorgeous hues.

As the chief histrion,
Down to the footlights walks in some great scena,
Dominating the rest I see the Admiral himself,
(History's type of courage, action, faith,)
Behold him sail from Palos leading his little fleet,
His voyage behold, his return, his great fame,
His misfortunes, calumniators, behold him a prisoner, chain'd,
Behold his dejection, poverty, death.
(Curious in time I stand, noting the efforts of heroes,
Is the deferment long? bitter the slander, poverty, death?
Lies the seed unreck'd for centuries in the ground? lo, to God's due occasion,
Uprising in the night, it sprouts, blooms,
And fills the earth with use and beauty.)

7

Passage indeed O soul to primal thought,
Not lands and seas alone, thy own clear freshness,
The young maturity of brood and bloom,
To realms of budding bibles.

O soul, repressless, I with thee and thou with me,
Thy circumnavigation of the world begin,
Of man, the voyage of his mind's return,
To reason's early paradise,
Back, back to wisdom's birth, to innocent intuitions,
Again with fair creation.

8

O we can wait no longer,
We too take ship O soul,

---

119 **doge . . . Adriatic.** When Venice was a city-state, the doge or chief magistrate annually symbolized the "marriage" of Venice to the sea, and her dependence upon sea-borne commerce, by tossing a gold ring into the Adriatic • 126 **Euphrates,** river in southwest Asia • 129 **Indus . . . Ganges,** rivers in India • 130 **resuming,** making a résumé of • 137 **Tamerlane** (1333-1405), Mongol conqueror • 137 **Aurungzebe** (1619-1707), emperor of Hindustan • 139 **Marco Polo** (1254-1323), Venetian traveler in China • 139 **Batouta the Moor** (1303-1377), traveler in Asia and Africa • 140 **incognita,** unknown • 152 **histrion,** actor • 153 **scena,** a scene in opera (of which Whitman was very fond) • 154 **Admiral,** Columbus • 156 **Palos,** Spanish seaport • 162 **unreck'd,** unheeded, made no account of

Joyous we too launch out on trackless seas,
Fearless for unknown shores on waves of ecstasy to sail,
Amid the wafting winds, (thou pressing me to thee, I thee to me, O soul,)
Caroling free, singing our song of God,
Chanting our chant of pleasant exploration.

With laugh and many a kiss,
(Let others deprecate, let others weep for sin, remorse, humiliation,)
O soul thou pleasest me, I thee.

Ah more than any priest O soul we too believe in God,
But with the mystery of God we dare not dally.
O soul thou pleasest me, I thee,
Sailing these seas or on the hills, or waking in the night,
Thoughts, silent thoughts, of Time and Space and Death, like waters flowing,
Bear me indeed as through the regions infinite,
Whose air I breathe, whose ripples hear, lave me all over,
Bathe me O God in thee, mounting to thee,
I and my soul to range in range of thee.

O Thou transcendent,
Nameless, the fibre and the breath,
Light of the light, shedding forth universes, thou centre of them,
Thou mightier centre of the true, the good, the loving,
Thou moral, spiritual fountain—affection's source—thou reservoir,
(O pensive soul of me—O thirst unsatisfied—waitest not there?
Waitest not haply for us somewhere there the Comrade perfect?)
Thou pulse—thou motive of the stars, suns, systems,
That, circling, move in order, safe, harmonious,
Athwart the shapeless vastnesses of space,
How should I think, how breathe a single breath, how speak, if, out of myself,
I could not launch, to those, superior universes?

Swiftly I shrivel at the thought of God,
At Nature and its wonders, Time and Space and Death,
But that I, turning, call to thee O soul, thou actual Me,
And lo, thou gently masterest the orbs,
Thou matest Time, smilest content at Death,
And fillest, swellest full the vastnesses of Space.

Greater than stars or suns,
Bounding O soul thou journeyest forth;
What love than thine and ours could wider amplify?
What aspirations, wishes, outvie thine and ours O soul?
What dreams of the ideal? what plans of purity, perfection, strength,
What cheerful willingness for others' sake to give up all?
For others' sake to suffer all?

Reckoning ahead O soul, when thou, the time achiev'd,
The seas all cross'd, weather'd the capes, the voyage done,
Surrounded, copest, frontest God, yieldest, the aim attain'd,
As fill'd with friendship, love complete, the Elder Brother found,
The Younger melts in fondness in his arms.

9

Passage to more than India!
Are thy wings plumed indeed for such far flights?
O soul, voyagest thou indeed on voyages like those?
Disportest thou on waters such as those?
Soundest below the Sanscrit and the Vedas?
Then have thy bent unleash'd.

Passage to you, your shores, ye aged fierce enigmas!
Passage to you, to mastership of you, ye strangling problems!
You, strew'd with the wrecks of skeletons, that, living, never reach'd you.

Passage to more than India!
O secret of the earth and sky!
Of you O waters of the sea! O winding creeks and rivers!
Of you O woods and fields! of you strong mountains of my land!
Of you O prairies! of you gray rocks!
O morning red! O clouds! O rain and snows!
O day and night, passage to you!

---

183 **deprecate**, pray to be delivered from • 221 **copest**, meets, encounters • 228 **Sanscrit . . . Vedas.** Sanskrit is the ancient language in which the Vedas, the sacred books of the Hindus, were written

O sun and moon and all you stars! Sirius and Jupiter!
Passage to you!

Passage, immediate passage! the blood burns in my veins!
Away O soul! hoist instantly the anchor!
Cut the hawsers—haul out—shake out every sail!
Have we not stood here like trees in the ground long enough?
Have we not grovel'd here long enough, eating and drinking like mere brutes?
Have we not darken'd and dazed ourselves with books long enough?

Sail forth—steer for the deep waters only,
Reckless O soul, exploring, I with thee, and thou with me,
For we are bound where mariner has not yet dared to go,
And we will risk the ship, ourselves and all.

O my brave soul!
O farther farther sail!
O daring joy, but safe! are they not all the seas of God?
O farther, farther, farther sail!

1871

Thou Mother with Thy Equal Brood

This poem was read by Whitman at the commencement of Dartmouth College, June 26, 1872. As read on that occasion, the poem began with what is now Section 2 and was known by the title "As a Strong Bird on Pinions Free." Section 1 was added in the 1881 edition.

In a Preface to the poem, Whitman wrote: "The Four Years' War is over—and in the peaceful, strong, exciting, fresh occasions of today, and of the future, that strange, sad war is hurrying even now to be forgotten. The camp, the drill, the lines of sentries, the prisons, the hospitals—(ah! the hospitals!)—all have passed away—all seem now like a dream. A new race, a young and lusty generation, already sweeps in with oceanic currents, obliterating the war, and all its scars, its mounded graves, and all its reminiscences of hatred, conflict, death. So let it be obliterated. I say the life of the present and the future makes undeniable demands upon us each and all, south, north, east, west. To help put the United States (even if only in imagination) hand in hand, in one unbroken circle in a chant—to rouse them to the unprecedented grandeur of the part they are to play, and are even now playing—to the thought of their great future, and the attitude conform'd to it—especially their great esthetic, moral, scientific future (of which their vulgar material and political present is but as the preparatory tuning of instruments by an orchestra), these, as hitherto, are still, for me, among my hopes, ambitions."

1

Thou Mother with thy equal brood,
Thou varied chain of different States, yet one identity only,
A special song before I go I'd sing o'er all the rest,
For thee, the future.

I'd sow a seed for thee of endless Nationality,
I'd fashion thy ensemble including body and soul,
I'd show away ahead thy real Union, and how it may be accomplish'd.

The paths to the house I seek to make,
But leave to those to come the house itself.

Belief I sing, and preparation;
As Life and Nature are not great with reference to the present only,
But greater still from what is yet to come,
Out of that formula for thee I sing.

2

As a strong bird on pinions free,
Joyous, the amplest spaces heavenward cleaving,
Such be the thought I'd think of thee America,
Such be the recitative I'd bring for thee.

The conceits of the poets of other lands I'd bring thee not,
Nor the compliments that have served their turn so long,

Passage to India • 240 Sirius, the brightest star • 240 Jupiter, the largest planet

Nor rhyme, nor the classics, nor perfume of foreign court or indoor library;
But an odor I'd bring as from forests of pine in Maine, or breath of an Illinois prairie,
With open airs of Virginia or Georgia or Tennessee, or from Texas uplands, or Florida's glades,
Or the Saguenay's black stream, or the wide blue spread of Huron,
With presentment of Yellowstone's scenes, or Yosemite,
And murmuring under, pervading all, I'd bring the rustling sea-sound,
That endlessly sounds from the two Great Seas of the world.

And for thy subtler sense subtler refrains dread Mother,
Preludes of intellect tallying these and thee, mind-formulas fitted for thee, real and sane and large as these and thee,
Thou! mounting higher, diving deeper than we knew, thou transcendental Union!
By thee fact to be justified, blended with thought,
Thought of man justified, blended with God,
Through thy idea, lo, the immortal reality!
Through thy reality, lo, the immortal idea!

3

Brain of the New World, what a task is thine,
To formulate the Modern—out of the peerless grandeur of the modern,
Out of thyself, comprising science, to recast poems, churches, art,
(Recast, maybe discard them, end them—maybe their work is done, who knows?)
By vision, hand, conception, on the background of the mighty past, the dead,
To limn with absolute faith the mighty living present.

And yet thou living present brain, heir of the dead, the Old World brain,
Thou that lay folded like an unborn babe within its folds so long,
Thou carefully prepared by it so long—haply thou but unfoldest it, only maturest it,
It to eventuate in thee—the essence of the by-gone time contain'd in thee,
Its poems, churches, arts, unwitting to themselves, destined with reference to thee;
Thou but the apples, long, long, long a-growing,
The fruit of all the Old ripening to-day in thee.

4

Sail, sail thy best, ship of Democracy,
Of value is thy freight, 'tis not the Present only,
The Past is also stored in thee,
Thou holdest not the venture of thyself alone, not of the Western continent alone,
Earth's *résumé* entire floats on thy keel O ship, is steadied by thy spars,
With thee Time voyages in trust, the antecedent nations sink or swim with thee,
With all their ancient struggles, martyrs, heroes, epics, wars, thou bear'st the other continents,
Theirs, theirs as much as thine, the destination-port triumphant;
Steer then with good strong hand and wary eye O helmsman, thou carriest great companions,
Venerable priestly Asia sails this day with thee,
And royal feudal Europe sails with thee.

5

Beautiful world of new superber birth that rises to my eyes,
Like a limitless golden cloud filling the western sky,
Emblem of general maternity lifted above all,
Sacred shape of the bearer of daughters and sons,
Out of thy teeming womb thy giant babes in ceaseless procession issuing,
Acceding from such gestation, taking and giving continual strength and life,
World of the real—world of the twain in one,
World of the soul, born by the world of the real alone, led to identity, body, by it alone,
Yet in beginning only, incalculable masses of composite precious materials,
By history's cycles forwarded, by every nation, language, hither sent,
Ready, collected here, a freer, vast, electric world, to be constructed here,

---

23 Saguenay, a river which flows through the province of Quebec into the St. Lawrence

(The true New World, the world of orbic science, morals, literatures to come,)
Thou wonder world yet undefined, unform'd, neither do I define thee,
How can I pierce the impenetrable blank of the future?
I feel thy ominous greatness evil as well as good,
I watch thee advancing, absorbing the present, transcending the past,
I see thy light lighting, and thy shadow shadowing, as if the entire globe,
But I do not undertake to define thee, hardly to comprehend thee,
I but thee name, thee prophesy, as now,
I merely thee ejaculate!

Thee in thy future,
Thee in thy only permanent life, career, thy own unloosen'd mind, thy soaring spirit,
Thee as another equally needed sun, radiant, ablaze, swift-moving, fructifying all,
Thee risen in potent cheerfulness and joy, in endless great hilarity,
Scattering for good the cloud that hung so long, that weigh'd so long upon the mind of man,
The doubt, suspicion, dread, of gradual, certain decadence of man;
Thee in thy larger, saner brood of female, male—thee in thy athletes, moral, spiritual, South, North, West, East,
(To thy immortal breasts, Mother of All, thy every daughter, son, endear'd alike, forever equal,)
Thee in thy own musicians, singers, artists, unborn yet, but certain,
Thee in thy moral wealth and civilization, (until which thy proudest material civilization must remain in vain,)
Thee in thy all-supplying, all-enclosing worship—thee in no single bible, saviour, merely,
Thy saviours countless, latent within thyself, thy bibles incessant within thyself, equal to any, divine as any,
(Thy soaring course thee formulating, not in thy two great wars, nor in thy century's visible growth,
But far more in these leaves and chants, thy chants, great Mother!)
Thee in an education grown of thee, in teachers, studies, students, born of thee,
Thee in thy democratic fêtes en-masse, thy high original festivals, operas, lecturers, preachers,
Thee in thy ultimata, (the preparations only now completed, the edifice on sure foundations tied,)
Thee in thy pinnacles, intellect, thought, thy topmost rational joys, thy love and godlike aspiration,
In thy resplendent coming literati, thy full-lung'd orators, thy sacerdotal bards, kosmic savans,
These! these in thee, (certain to come,) to-day I prophesy.

6

Land tolerating all, accepting all, not for the good alone, all good for thee,
Land in the realms of God to be a realm unto thyself,
Under the rule of God to be a rule unto thyself.
(Lo, where arise three peerless stars,
To be thy natal stars my country, Ensemble, Evolution, Freedom,
Set in the sky of Law.)

Land of unprecedented faith, God's faith,
Thy soil, thy very subsoil, all upheav'd,
The general inner earth so long so sedulously draped over, now hence for what it is boldly laid bare,
Open'd by thee to heaven's light for benefit or bale.
Not for success alone,
Not to fair-sail unintermitted always,
The storm shall dash thy face, the murk of war and worse than war shall cover thee all over,
(Wert capable of war, its tugs and trials? be capable of peace, its trials,

---

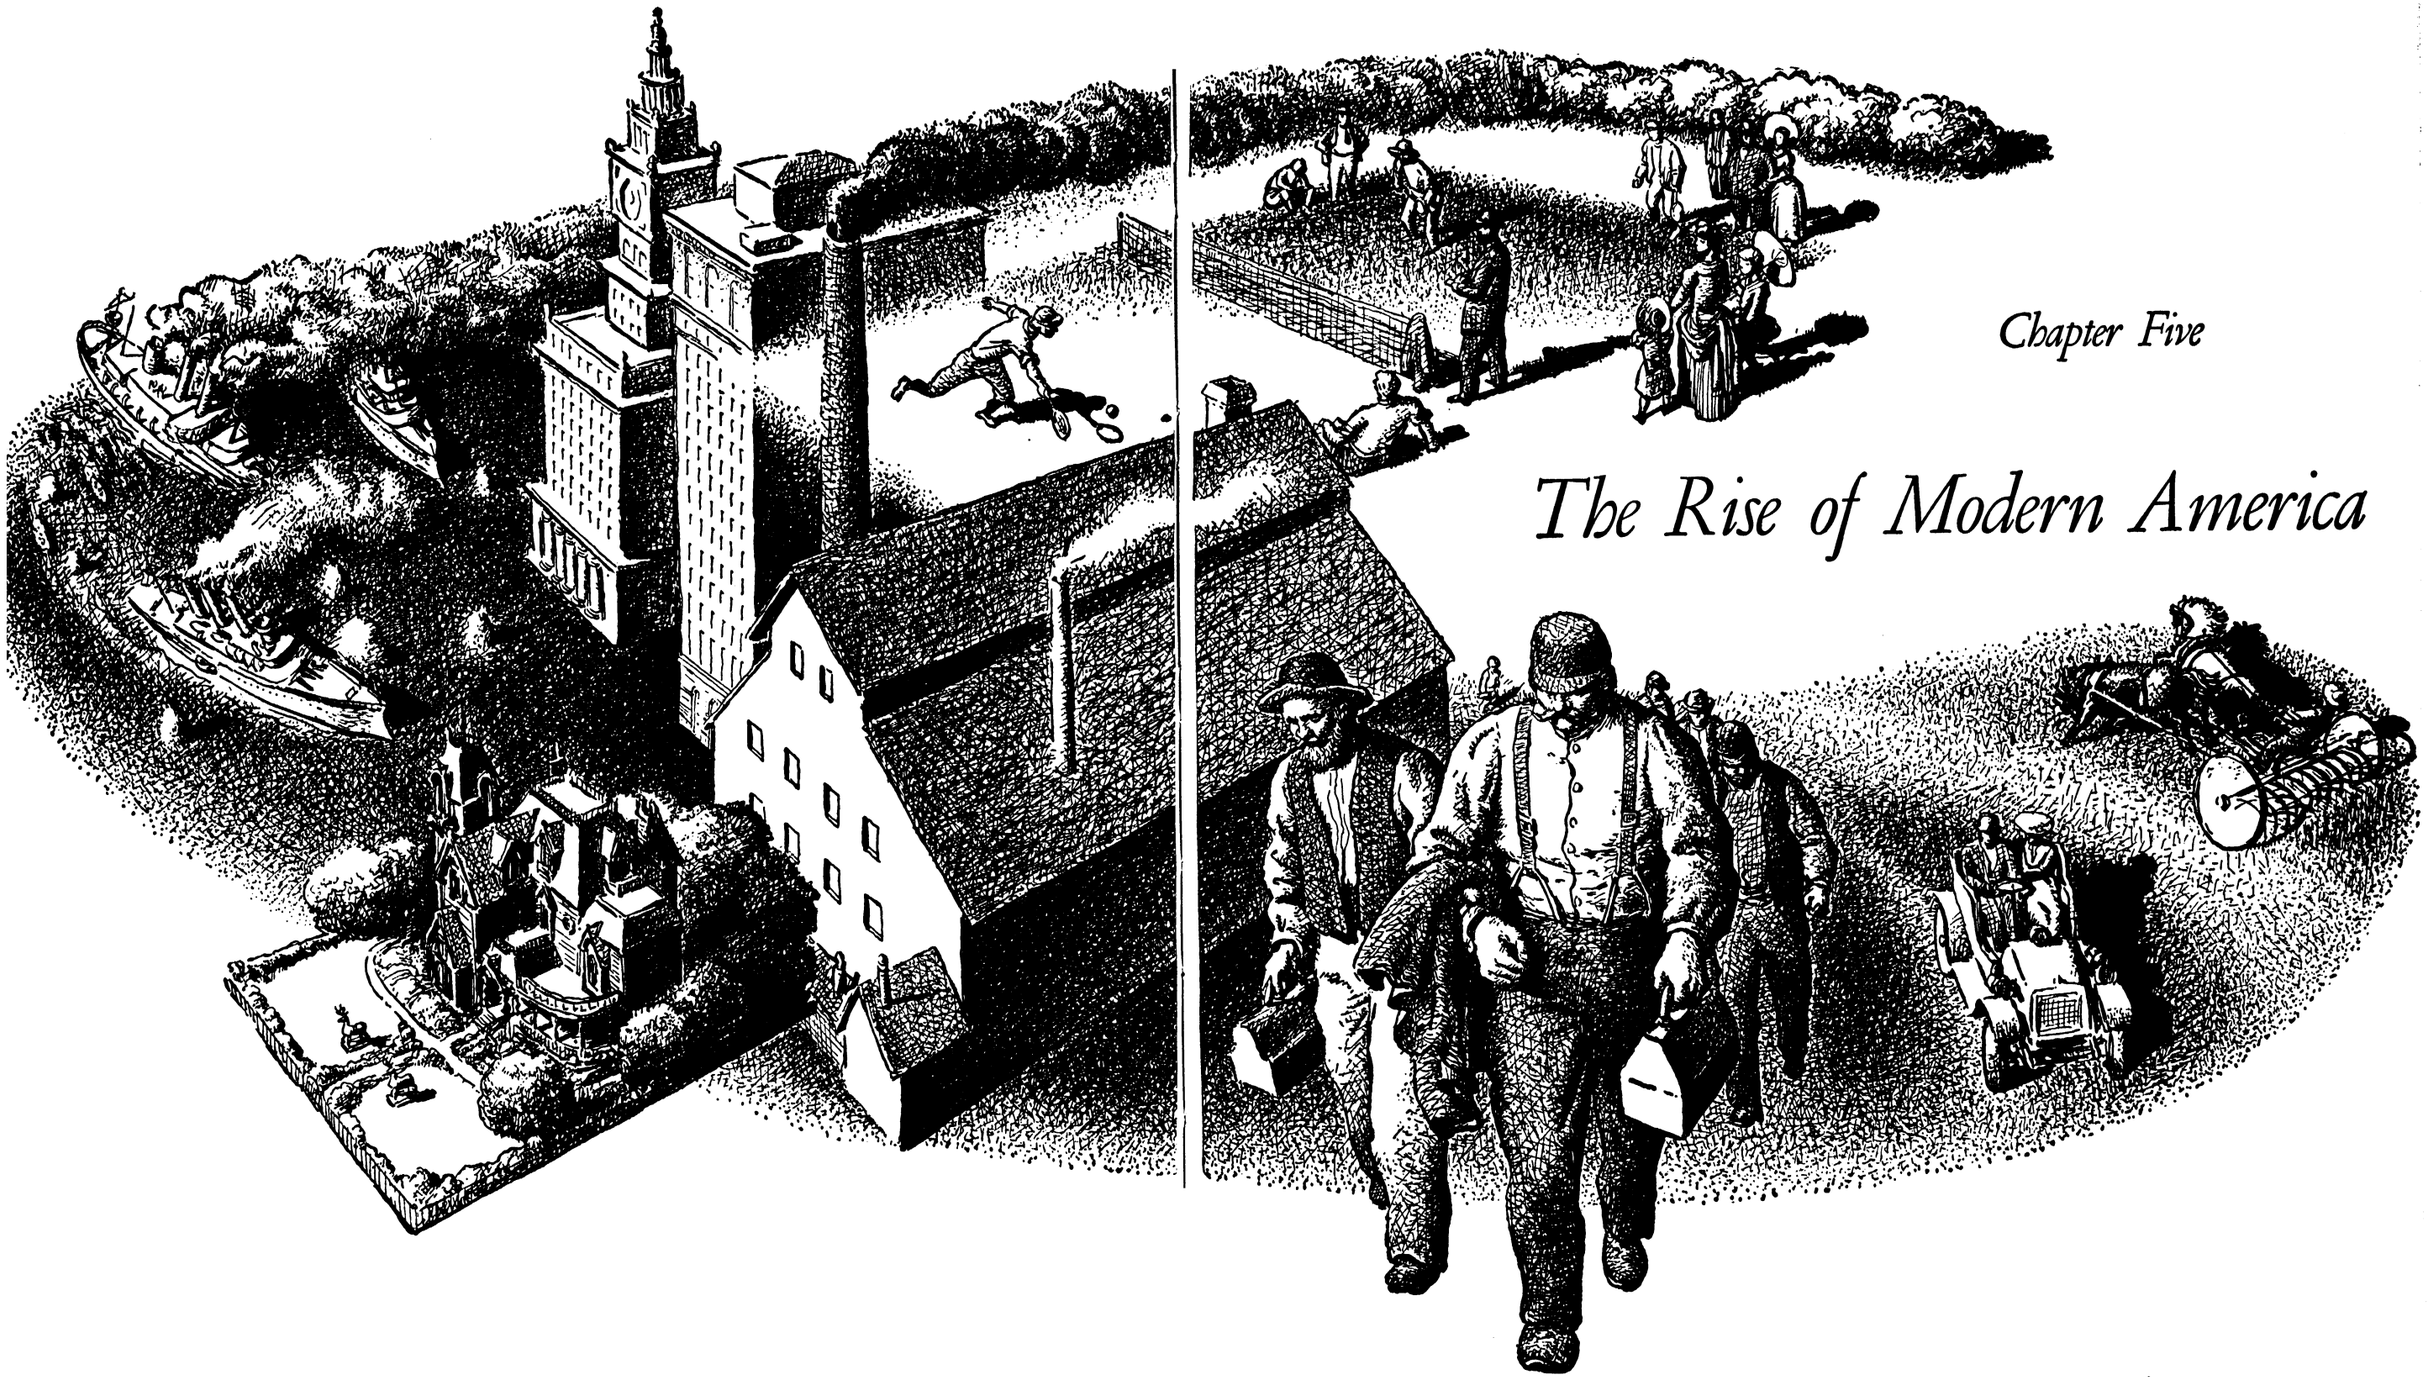
89 **thy bibles.** Whitman's prophecy recalls Emerson's in the concluding paragraph of **The Divinity School Address:** "I look for the hour when that supreme Beauty which ravished the souls of those Eastern men, and chiefly of those Hebrews, and through their lips spoke oracles to all time, shall speak in the West also" • 91 **these . . . chants.** Whitman was never modest about his poems • 96 **orators.** Whitman had an old-fashioned fondness for oratory For the influence of oratory and oratorical considerations upon his poetry, see "Three Analogies for a Poem," in F. O. Matthiessen's **American Renaissance** • 96 **sacerdotal bards** echoes Emerson's statement in his essay on Shakespeare (in **Representative Men**): "The world still wants its poet-priest . . ."

For the tug and mortal strain of nations come at last in prosperous peace, not war;)
In many a smiling mask death shall approach beguiling thee, thou in disease shalt swelter,
The livid cancer spread its hideous claws, clinging upon thy breasts, seeking to strike thee deep within,
Consumption of the worst, moral consumption, shall rouge thy face with hectic,
But thou shalt face thy fortunes, thy diseases, and surmount them all,
Whatever they are to-day and whatever through time they may be,
They each and all shall lift and pass away and cease from thee,
While thou, Time's spirals rounding, out of thyself, thyself still extricating, fusing,
Equable, natural, mystical Union thou, (the mortal with immortal blent,)
Shalt soar toward the fulfilment of the future, the spirit of the body and the mind,
The soul, its destinies.

The soul, its destinies, the real real,
(Purport of all these apparitions of the real;)
In thee America, the soul, its destinies,
Thou globe of globes! thou wonder nebulous!
By many a throe of heat and cold convuls'd, (by these thyself solidifying,)
Thou mental, moral orb—thou New, indeed new, Spiritual World!
The Present holds thee not—for such vast growth as thine,
For such unparallel'd flight as thine, such brood as thine,
The FUTURE only holds thee and can hold thee.

1872·1881

To a Locomotive in Winter



Whitman's treatment of the locomotive may be profitably contrasted with Emily Dickinson's in "I Like to See It Lap the Miles" and compared with Thomas Wolfe's in many passages in his novels.

Thee for my recitative,
Thee in the driving storm even as now, the snow, the winterday declining.
Thee in thy panoply, thy measur'd dual throbbing and thy beat convulsive,
Thy black cylinder body, golden brass and silvery steel,
Thy ponderous side-bars, parallel and connecting rods, gyrating, shuttling at thy sides,
Thy metrical, now swelling pant and roar, now tapering in the distance,
Thy great protruding head-light fix'd in front,
Thy long, pale, floating vapor-pennants, tinged with delicate purple,
The dense and murky clouds out-belching from thy smokestack,
Thy knitted frame, thy springs and valves, the tremulous twinkle of thy wheels,
Thy train of cars behind, obedient, merrily following,
Through gale or calm, now swift, now slack, yet steadily careering;
Type of the modern—emblem of motion and power—pulse of the continent,
For once come serve the Muse and merge in verse, even as here I see thee,
With storm and buffeting gusts of wind and falling snow,
By day thy warning ringing bell to sound its notes,
By night thy silent signal lamps to swing.

Fierce-throated beauty!
Roll through my chant with all thy lawless music, thy swinging lamps at night,
Thy madly-whistled laughter, echoing, rumbling like an earthquake, rousing all,
Law of thyself complete, thine own track firmly holding,
(No sweetness debonair of tearful harp or glib piano thine,)
Thy trills of shrieks by rocks and hills return'd,
Launch'd o'er the prairies wide, across the lakes,
To the free skies unpent and glad and strong.

1876·1881

Thou Mother . . . Brood • 124 apparitions, outward appearances
To a Locomotive . . . • 3 panoply, full suit of plane armor

"As a strong bird on pinions free,
Joyous, the amplest spaces heavenward cleaving . . . ."
—Whitman

"Are we the eagle nation Milton saw . . . ?" —Moody

I. Intellectual Currents

REUNION

The Civil War, which terminated when Lee surrendered to Grant at Appomattox in April 1865, left the nation sadly disrupted. The restoration of unity—at best a long and difficult process—was made longer and more difficult by the Era of Reconstruction, which imposed the rule of ill-qualified Negroes and of carpetbaggers and scalawags upon the Southern states and maintained this rule by the presence of federal troops. When President Hayes withdrew the troops in 1877, reconstruction governments collapsed and the "tragic era" ended.

Much ill-feeling was engendered on both sides by sectional controversy, civil war, and tyrannical misrule. On the other hand, many forces were working inexorably for the restoration of national unity. The states were bound together by a common language, common traditions, and a close interdependence of economic interests. The establishment of schools and colleges in the South by Northern philanthropy contributed much to the growing unity of feeling; the abandonment by the national government after 1883 of the attempt to control race relations in the South contributed still more. Not the least of the unifying influences was our postwar literature. Some writers preached the gospel of union Others contributed less directly but none the less effectively to the same end by exemplifying in the local color story the admirable qualities to be found in the rank and file of people in various regions.

Among those who celebrated unity and reunion, three writers stand out above the others: Lowell in New England, Whitman in the Middle Atlantic States, and Lanier in the South. On July 3, 1875, Lowell read in Cambridge his poem "Under the Old Elm," which celebrated the hundredth anniversary of Washington's taking command of the American army. After paying eloquent tribute to the greatness of Washington, the poet held out the hand of reconciliation and friendship to his home state.

Virginia gave us this imperial man . . .
She gave us this unblemished gentleman:

What shall we give her back but love and praise
As in the dear old unestrangèd days
Before the inevitable wrong began?
Mother of states and undiminished men,
Thou gavest us a country, giving him,
And we owe alway what we owed thee then . . .
A great man's memory is the only thing
With influence to outlast the present whim
And bind us as when here he knit our golden ring.

A great man's memory. Lowell was right. The common memory of Washington helped to restore national unity after the schismatic years. Mount Vernon soon became a national shrine. So important to a nation's well-being is the principle enunciated by Lowell that in the years to follow, other great Americans, such as Jefferson, Lincoln, and Lee, irrespective of sectional differences, were to become national heroes.

Whitman's plea for reunion took the characteristic form of an inspiring prophecy of the future greatness of the United States. This greatness would be the achievement of states which are "varied" and "different" and at the same time united in "one identity." In the famous poem ("As a Strong Bird on Pinions Free," later changed to "Thou Mother with Thy Equal Brood," p. 720) read at Dartmouth College in 1872, Whitman expressed unbounded confidence in the future progress of America—a progress which would be not only political and material, but scientific, aesthetic, and moral as well:

Thee in an education grown of thee, in teachers, studies, students, born of thee,
Thee in thy democratic fêtes en-masse, thy high original festivals, operas, lecturers, preachers . . .
Thee in thy pinnacles, intellect, thought, thy topmost rational joys, thy love and godlike aspiration,
In thy resplendent coming literati, thy full-lung'd orators, thy sacerdotal bards, kosmic savans,
These! these in thee, (certain to come,) to-day I prophesy.

It was a vision calculated to make men forget the quarrels of the past and unite in the achievement of a splendid civilization.

Although Sidney Lanier (p. 1008) fought through the Civil War, there was no bitterness in his soul. He saw clearly that the South could not attain well-being in isolation and estrangement from the North. In the centennial year of 1876, he attempted in two poems to draw the sections together in loving harmony: "The Psalm of the West" and "The Centennial Meditation of Columbia," the second of which was sung at the Philadelphia Exposition by a great chorus with orchestral accompaniment. Both poems employ the historical approach: a backward glance over the events which have brought us to this good hour should awaken a new sense of pride and responsibility. In "The Psalm of the West" Lanier surveyed the early voyages to the New World (the eight sonnets on Columbus are especially notable), the settling of New England, the progress of the Revolutionary War from Lexington to Yorktown, and the Civil War between "Heart-strong South" and "Head-strong North." The "Psalm" concluded with a prophecy of America's future glory as ardent as Whitman's. The "Centennial Meditation" suggested more briefly the same historical evolution and concluded likewise with a prophecy which was also a prayer for America's future:

Long as thine Art shall love true love,
Long as thy Science truth shall know,
Long as thine Eagle harms no Dove,
Long as thy Law by law shall grow,
Long as thy God is God above,
Thy brother every man below,
So long, dear Land of all my love,
Thy name shall shine, thy fame shall glow.

If the three writers just considered aided the process of reunion by emphasizing the solidarity of a new and glorious America, the fictionists of the local color school contributed to the same end with perhaps even greater effectiveness by drawing attention to the innate virtues of Americans everywhere. During the two or three decades following the Civil War, our most popular form of literature was the regional short story. Bret Harte (p. 810) and Hamlin Garland (p. 948) in the West, George Washington Cable (p. 817), Joel Chandler Harris (p. 826), and Mary Noailles Murfree in the South, Sarah Orne Jewett (p. 833) and Mary E. Wilkins Freeman in New England—all portrayed with tender sympathy the lives of the inhabitants of their respective

regions. One effect of this body of literature was to reassure Southern readers that there was much natural goodness in the North, and Northern readers that there was much natural goodness in the South. Only the most stubborn of hard feelings could persist under such an emollient.

Consider, for example, the reputedly flinty New England character as seen in the soft light of Miss Jewett's tales. Describing a family reunion on the Maine coast, Miss Jewett wrote in *The Country of the Pointed Firs*: "Each heart is warm and every face shines with the ancient light. Such a day as this has transfiguring powers, and easily makes friends of those who have been cold-hearted, and gives to those who are dumb their chance to speak, and lends some beauty to the plainest face." Beneath the plain, taciturn, and cold exterior of the New England character, Miss Jewett assured her readers, could be discovered, on propitious occasions, beauty, ampleness of speech, and warmth of heart. These were the points on which non-New Englanders were likely to entertain serious doubts. It is reasonable to suppose that Miss Jewett's stories substantially increased the amount of good feeling in America toward New England.

Or take the character of the Southern highlander—reputedly wild and lawless—as seen through the sympathetic eyes of Miss Murfree. She saw that friendliness, charity, the domestic virtues can be found in abundance in the hill and mountain country of the South. It is a natural goodness, produced not by schools and the higher civilization, but by Nature herself, and therefore the more worthy of recognition and admiration. "The grace of culture is, in its way, a fine thing," Miss Murfree said in one of the stories in *In the Tennessee Mountains,* "but the best that art can do—the polish of a gentleman—is hardly equal to the best that Nature can do in her higher moods."

Or look (to mention only one more example) at the Southern planter—by report brutal and tyrannical—as he is reflected in the genial pages of *Uncle Remus* (p. 827). More effectively than any other single writer, Joel Chandler Harris reassured the world of the essential kindliness which had existed between master and slave on the ante-bellum plantation and implied that not even emancipation and reconstruction could destroy the friendly relations of the two races. Harris' stories had an effect similar to that produced in one of his tales by Mr. Benjermun Ram's fiddling:

> W'en ole man Benjermun Ram sorter let up wid he fiddlin', he don't see no Brer Wolf, en he don't year no ole Miss Wolf. Den he look in de back room, no Wolf dar. Den he look in de back po'ch; no Wolf dar. Den he look in de closet en de cubbard; no Wolf ain't dar yit.

The infectious laughter of Uncle Remus and the pervasive good humor and kindliness expressed by Harris did much toward putting to flight (as Benjermun Ram put to flight Brer Wolf and Miss Wolf) the ill-will which persisted in partisans both North and South in the postwar years.

It is not too much to say that the writers of the period contributed greatly to the reëstablishment of national unity. The local color stories, in particular, were for many readers a fresh and exciting discovery of America, and the writers of this school might have taken for their motto the words spoken by Senator Lamar of Mississippi in his eulogy of Charles Sumner: "My countrymen, know one another and you will love one another."

The remarkable extent to which reunion had been achieved by the end of the century was dramatically demonstrated in the war with Spain, in which Northerners and Southerners fought side by side and ex-Confederate generals held positions of command. World War I and World War II were to afford even more impressive evidence of the growing solidarity of the American nation.

SOCIAL and ECONOMIC PROBLEMS

Industry and Agriculture Expand

American social and economic life changed radically and rapidly during the years between 1865 and 1914. The railroad was a typical achievement of the age, and powerful in its influence on economic and social life. In 1865 there were only thirty-five thousand miles of track in the United States; by 1900 this mileage increased to nearly two hundred thousand. The Westinghouse air brake and other inventions improved the efficiency of railroad transportation. Enormous land grants by the

government financed the building of the transcontinental lines: the Union Pacific, the Northern Pacific, and the Santa Fe, all of which had reached the Pacific Coast by 1884. If the cost in land grants was high, the railroads made substantial returns by peopling and developing the region west of the Mississippi. The roads, however, often abused their power, and the Interstate Commerce Act of 1887 marked the beginning of federal regulation.

The railroad was only one factor in the economic revolution which followed the Civil War. A great transportation system presupposed commodities to transport, and these were supplied by an expanding industry and an expanding agriculture.

Industrial expansion was stimulated by a variety of factors: the exploitation of our resources in iron, coal, and oil; the development of improved machinery; the procurement of cheap labor through immigration; and the government's policy of protecting infant industries by high tariffs and allowing a free hand to business. There were many marvels of scientific invention: Andrew Carnegie was using the improved Bessemer process in the manufacture of steel by 1875; Alexander Graham Bell demonstrated the telephone at the Philadelphia Centennial Exposition in 1876; Thomas A. Edison and others made possible the dynamo, which was exhibited at the World's Columbian Exposition in Chicago in 1893 and which, as Henry Adams declared, "gave to history a new phase." Expanding industry required an abundance of labor, and this was supplied by a growing stream of immigrants, who, at the turn of the century, came in larger proportions from the southern and eastern than (as they had done previously) from the northern and western European countries. They were motivated in part by hardships at home, but even more by inducements proffered by agents of American business. Immigration continued without drastic reduction until 1921.

Under these favorable conditions, our rapidly expanding industry soon got out of hand, and toward the end of the century it became increasingly apparent that some form of government regulation was necessary. Trusts and monopolies—the Standard Oil Company and the United States Steel Corporation, for example—exceeded reasonable bounds. The railroads of the entire country were controlled by only a half-dozen small groups of men. A disproportionate part of the wealth of the nation became concentrated in the pockets of a relatively few people. Big business had formed a corrupt alliance with politics. Abuses were rampant. Attempts at regulation and reform—at first ineffective—began with the Sherman Anti-Trust Act of 1890, and in response to growing social criticism became more effective after the turn of the century: among other things, the powers of the Interstate Commerce Commission were increased, and in 1906 a Pure Food and Drugs Act heralded a new era in the responsibilities of business to society.

Agriculture also underwent a revolution during the post-Civil War years. Vast new lands in the West were opened to farming. New machines—reapers, binders, threshers—and new scientific devices—fertilizers, insecticides, improved strains—greatly increased the yield of the land. The methods of big business invaded the farm: the cash crop supplanted subsistence farming. But fewer people were needed to do the work, thanks to the improved machinery; the financial returns were precarious; and migration from the farms to the cities grew steadily.

Growth of Cities

Perhaps the most conspicuous change of all was the rapid growth of cities, fed by immigrants from abroad and by farm and village folk from the American countryside. In 1860 one sixth of our population was urban; in 1900, one third. Between 1880 and 1900 the population of Chicago grew from a half million to a million and a half, and the number of American cities with a population of one hundred thousand or more increased from nineteen to thirty-six. City life gained, while country life suffered, in prestige. It was supposed by thousands of young Americans that a better life, somehow, could be lived in the city than in the country, and the bigger the city, the better the life. Many novels of the time—especially those of Theodore Dreiser (p. 997)—show the error of this supposition. The sudden growth of great urban centers created new social and economic problems. Municipal government broke down under the strain. The evils of the slums appeared for the first time in American life

Labor Organizes

The new industry exploited labor, and it was inevitable that labor should organize to combat the exploitation.

A beginning was made by the Knights of Labor, founded in 1869; but the movement did not gain appreciable strength until 1886, when the American Federation of Labor was organized under the leadership of Samuel Gompers. The A. F. of L. continued to gain steadily until 1920, when it reached a peak of more than four million members. As organized labor grew in strength, industrial conflicts increased in number and intensity. The first of these was the railroad strike of 1877. Others worthy of note are the Pullman strike of 1894 and the strike in the Pennsylvania coal fields in 1902. Strikes have often been an effective weapon, and much has been accomplished to improve the lot of labor by social legislation. Since the Massachusetts "Ten Hour Act for Women and Children in Factories" in 1874, much progress has been made in the working conditions, hours, and wages of labor. Early reform legislation was often declared unconstitutional on the disingenuous principle that "a person has the right to sell his labor upon such terms as he deems proper." But after 1900, more liberal judges, like Louis D. Brandeis, were instrumental in reversing many of the decisions which had blocked social reform.

THE LITERATURE of SOCIAL CRITICISM

St. Paul said that "the love of money is the root of all evil," and the history of America after the Civil War exhibits the truth or near-truth of that statement. Perhaps never before was a nation so engrossed in the business of making money. Perhaps never before was materialism so rampant, or so much pride taken in material achievements.

The writers of the period pointed out forcefully the evils of this crass materialism. In *Democratic Vistas* Walt Whitman warned his readers that material wealth alone would not make a nation great:

> I hail with joy the oceanic, variegated, intense practical energy, the demand for facts, even the business materialism of the current age, our States. But wo to the age or land in which these things, movements, stopping at themselves, do not tend to ideas. As fuel to flame, and flame to the heavens, so must wealth, science, materialism—even this democracy of which we make so much—unerringly feed the highest mind, the soul.

Lanier in "The Symphony" (p. 1012) pleaded eloquently for a Christian and chivalric code in place of the unfeeling relations between employer and employed:

> 'Thou Trade! thou king of the modern days!
> Change thy ways,
> Change thy ways;
> Let the sweaty laborers file
> A little while,
> A little while,
> Where Art and Nature sing and smile.
> Trade! is thy heart all dead, all dead?
> And hast thou nothing but a head?
> I'm all for heart,' the flute-voice said.

In "these cold, merchantable days," the poet wrote, even the love of the sexes is tainted by mercenary motives:

> Now, comes a suitor with sharp prying eye—
> Says *Here, you Lady, if you'll sell, I'll buy*:
> *Come, heart for heart—a trade? What! weeping? why?*
> Shame on such wooers' dapper mercery!

While Whitman and Lanier were voicing their spiritual protests, Mark Twain (p. 846) was ridiculing mercilessly the get-rich-quick schemes of his money-mad countrymen In *The Gilded Age*—a book whose name has been given to the Grant era (1869-1877) and by extension to the twenty or thirty years following the Civil War—the author presented at once hilariously and devastatingly Colonel Sellers' designs for money-making. At one and the same time, Sellers was scheming to corner the corn and hog crops, buy up the wildcat banks, and market an "Optic Liniment" (his own concoction) throughout the world. He and his associates attempted to sell a large tract of worthless land ("the Tennessee land") to the government. Despite skillful lobbying in Washington, they failed, though by a narrow margin, and the book ends with the moral that sober industry and contentment with a modest income honestly earned are infinitely preferable to frantic schemes to get rich quick. It was a good moral, but one which the author himself never learned, and one which millions of Americans had not learned as late as 1929.

The Gilded Age also exposed political corruption in the national capital, where votes were bought and sold. Henry Adams (p. 1051) in his novel *Democracy* (1880) turned a censorious eye on similar political phenomena. He portrays a distinguished United States senator, the leader of his party, who accepted a bribe of $100,000. His reasons were good "political" ones, but they did not satisfy Adams' heroine, whose break with the senator parallels Adams' own withdrawal from the corrupt politics of the Gilded Age. But Adams remained a fascinated observer and refused to surrender his belief in democracy despite its current evil manifestations. "I grant it is an experiment," he said through one of the characters in the novel, "but it is the only direction society can take that is worth its taking. . . . Every other possible step is backward."

Our writers were not long content with a general censure of materialism and political corruption. Growing ills awakened the social conscience and called forth specific indictments which became increasingly prominent in the literature of the late nineteenth and early twentieth centuries. Prepared by his own experience on an Iowa farm and indoctrinated in the economic theories of Henry George, Hamlin Garland in *Main-Travelled Roads* (p. 948) exposed, with strong emotional appeal, the hardships and injustices suffered by the farmers in the Iowa-Wisconsin country. An angry and anger-rousing book, *Main-Travelled Roads* suggests the gathering strength of the Populist Movement and helps explain the spectacular rise of William Jennings Bryan in 1896. An important phase in the history of the railroad's exploitation of the farmer is presented in Frank Norris' *The Octopus* (p. 975), which powerfully portrays the struggle between the Southern Pacific Railroad (the "octopus") and the wheat farmers of California. The triumphant force is neither the railroad nor the farmers, but the wheat, which Norris represents in both *The Octopus* (1901) and *The Pit* (1903) as more powerful than any man or combination of men.

Criticisms of Industrialism

With the opening of the new century, the exposure of injustices and abuses in our national life became the most popular of literary subjects. In politics, the 1900's were the era of Theodore Roosevelt's progressivism and "trust-busting"; in literature, the era of the "muckrakers." Literature was dedicated to the exposé, and scores of books revealed all sorts of malpractices to an indignant public. Perhaps the greatest of the muckraking books was Upton Sinclair's *The Jungle,* which dealt graphically with the life of a Lithuanian immigrant employed in the Chicago stockyards. This sturdy young man is gradually broken, and his family completely ruined, by the inhuman cruelties of the stockyards. The book's exposure of unsanitary practices in the processing of meat undoubtedly hastened the enactment of the Pure Food and Drugs Act.

The leader among the muckrakers was Lincoln Steffens, whose *Shame of the Cities* brought to a focus the problems created by the sudden emergence of great urban communities and contributed to the movement for municipal reform. Steffens' book drew attention to the corruption in city government and attempted to fix the blame on certain prominent citizens. The growing problems of the Big City had been noticed before Steffens and were to be further exposed after his notable book. As early as 1890 William Dean Howells (p. 888) had exhibited, somewhat conservatively, the grime and squalor of New York City in *A Hazard of New Fortunes* (p. 890). Less conservatively, Stephen Crane's *Maggie: A Girl of the Streets* (1893) exposed the ugly life of New York's Bowery. In *Sister Carrie* (1900) and *Jennie Gerhardt* (1911) Theodore Dreiser told affectingly of the hard lot of the underpaid working girl in the big cities of the Middle West. Henry Blake Fuller in *The Cliff-Dwellers* (1893) and Robert Herrick in *The Common Lot* (1904) underscored the degrading effect on Chicago's social life of greed and cutthroat competition. Possibly the apogee of the literary attack on the Big City as a monster of corruption and vice was reached in David Graham Phillips' *Susan Lenox* (1917), whose heroine encounters (and miraculously survives) nearly all the evils of our modern Babylons.

The most prominent and commanding figure in the new industrial scene was the captain of industry. The years following the Civil War saw the amassing of unprecedented private fortunes. Financiers like Jay Cooke, the first great American banker; John D. Rockefeller, the Oil King; Andrew Carnegie, monopolist of iron and steel; and Jay Gould, Commodore Vanderbilt, and Collis P. Huntington, railroad magnates, became the real rulers

of America. The reputations of these great entrepreneurs are now tarnished; their money was often acquired unethically; they have been called, with a good deal of justice, the "robber barons."

The type early attracted the attention of our novelists, but the literary treatment was for a good many years comparatively gentle. In Howells' *The Rise of Silas Lapham* (1884), Lapham, a wealthy Boston paint manufacturer, is crude but honest. At the great crisis of his career, he loses his business rather than accept a price for properties which is greater than he knows them to be worth. Howells would have defended his portrait of Lapham by saying that the great majority of American financiers were honest, that robber barons were the exception, not the rule. In *A Hazard of New Fortunes,* Dryfoos, the millionaire, is much less amiable in his domestic and social relations than Lapham, but Howells represents him as reasonably ethical. "He's hard," declares a character in the story whose testimony we can accept, "and he'd push an advantage, but I don't believe he would take an unfair one. He's speculated and made money every time, but I never heard of his wrecking a railroad or belonging to any swindling company or grinding monopoly. He does chance it in stocks, but he's always played on the square." Despite the "robber barons," Howells thought that the ethics of American business were fundamentally sound. Henry James' (p. 918) acquaintance with American financiers and their ways was less intimate than Howells'. Living abroad, James had the opportunity of knowing only those prosperous and emancipated Americans who took a vacation in Europe. His Christopher Newman (*The American,* 1877) and Adam Verver (*The Golden Bowl,* 1904) are men of integrity and charm. Although James does not enter at all into their business careers—a subject on which he is always vague—we see Newman and Verver behaving decently and even magnanimously. Newman is devoted to culture in a limited way; Verver has built in "American City" a museum of art which he has filled with priceless treasures. Both are men of honor as well as of cultural aspirations.

The balance has never been struck between the portraits drawn by Howells and James and the authentic careers of the "robber barons." Were all successful businessmen in the Gilded Age boors and scoundrels? Some social historians have implied as much. But the modern reader—unless he is a cynic—is still free to believe that the Gilded Age produced Laphams and Newmans as well as Cookes and Goulds.

The emphasis of the muckrakers on the exposé resulted in much less flattering portrayals of the American businessman after the turn of the century. The most elaborate study of the type was made by Dreiser in two voluminously documented novels, *The Financier* (1912) and *The Titan* (1914), in both of which the business career of Frank Cowperwood more closely approximates the unsavory records of the barons. The literary pendulum was to swing back to a more favorable picture of the American millionaire in *Dodsworth* (1929), where Sinclair Lewis' hero (recalling James' Newman in many ways) is a thoroughly admirable person despite his wealth.

The Reformers

While emphasizing the blight of materialism upon the soul, and the injustices and abuses of the new industrial order, the literature of social criticism was not entirely destructive; there were constructive elements as well. Specific utopias were proposed. The greatest and most influential of these was Edward Bellamy's *Looking Backward* (p. 1038) "Not since *Uncle Tom's Cabin,*" declares V. L. Parrington, "had an American novel reached so many readers." Believing that economic inequality was the cause of all social ills, Bellamy described a Socialist utopia in which the wealth was distributed with exact equality among its members. A benevolent state controlled public and private economy in the minutest detail; it assigned members to tasks according to their aptitudes; it provided incentives through special recognition of public service. A planned and cooperative society produced sufficient wealth to permit the early retirement of its members and the free enjoyment of cultural pursuits. *Looking Backward* has made many converts to Socialism. Other writers of the period also proposed the Socialist solution: among them, Howells in *A Traveller from Altruria* (1893) and Upton Sinclair in *The Jungle*—after the incredible woes of the stockyards, Sinclair's hero embraces Socialism and becomes an active worker for the cause.

The great body of the literature dealing with social problems, however, proposes not a radical alteration of the American system of free enterprise, but reforms and

ameliorations. If men would be honest and fair, if they would be satisfied with a modest income, if they would spend their money unselfishly, if they would be Christians imbued with the spirit of the Sermon on the Mount—then all would be well: this is the burden of many writers who have concerned themselves with the subject. Charles M. Sheldon's *In His Steps* (1896), which had an amazing sale of more than fifteen million copies, recommended that everyone when confronted by a problem should ask himself, "What would Jesus do?" Less popular and better writers also emphasized the importance of the Christian attitude. Robert Herrick advised in *The Common Lot* (1904) a quiet withdrawal from the market place into a Wordsworthian simplicity. William Vaughn Moody (p. 1031), the first of our poets to examine the new social problems with critical insight, urged in "Gloucester Moors" (1900) the necessity of a social conscience among the more fortunate members of society. The results of the Machine Age, he pointed out in "The Brute" (1900), had been disappointing: contrary to expectations, the Machine (the "brute") had not brought prosperity and leisure to all, but only to "the strong and cunning few." The solution lay, Moody thought, not in the rejection of the Machine (as some nineteenth-century Romantics had believed), but in a better control of the Machine and a fairer distribution of the wealth which it produces:

> For the Brute must bring the good time on . . .
> He must loose the curse of Adam from the worn neck of the race.
> He must give each man his portion, each his pride and worthy place.

Substantial progress was to be made in the new century toward the realization of these aims.

THE FRONTIER VERSUS EUROPE: A QUESTION of VALUES

The Freedom of the Frontier

"Westward the course of empire takes its way," wrote Bishop Berkeley in his "Verses on the Prospect of Planting Arts and Learning in America" published in 1752. The Westward movement in America was a fulfillment of the prophecy beyond anything which the good bishop could have foreseen. Before the end of the eighteenth century, pioneers had crossed the Alleghenies; by the middle of the nineteenth century, they had settled the Mississippi Valley as far as Texas and the upper reaches of the Missouri and had invaded California and Oregon; by the end of the century, only the Rocky Mountains and the arid tracts of Arizona and Nevada remained unsettled; and by the beginning of World War I, there was no more frontier. The "epic of America" before 1914 was in no small part the epic of the ever advancing frontier. The treatment of the frontier in literature has been of two kinds: romantic, and realistic and critical. In the nineteenth century the romantic treatment predominated; the realistic and critical treatment did not prevail until after World War I.

Whitman sounded the dominant nineteenth-century note in "Pioneers! O Pioneers!" (p. 698). Whitman's pioneers were heroes—"tan-faced children," "youthful and sinewy," armed with "pistols and sharp-edged axes."

> We primeval forests felling,
> We the rivers stemming, vexing we and piercing deep the mines within,
> We the surface broad surveying, we the virgin soil upheaving,
> Pioneers! O Pioneers!

(A century later it was to appear that the pioneers had done too thorough a job in upheaving the soil and felling the forests.) They were "impatient" and "full of action"—a "resistless, restless race." Such was Whitman's glorification of the Westward movement. Other poets of the nineteenth century—Emerson and Lowell in New England, Lanier in the South, and Joaquin Miller in the West—echoed Whitman's praise and admiration of the pioneer.

The distinguished historian Frederick Jackson Turner was almost as romantic as the poets in his treatment of the subject in "The Significance of the Frontier in American History" written in 1893. "Stand at Cumberland Gap," he wrote, "and watch the procession of civilization, marching single file—the buffalo following the trail to the salt springs, the Indian, the fur trader and hunter, the cattle raiser, the pioneer farmer—and the frontier has passed by. Stand at South Pass in the Rockies a century later and see the same procession with wider intervals between." Turner defined the frontier

as "the line of most rapid and effective Americanization." The American character was largely formed by the frontier; frontier traits became the traits most distinctive of America:

> To the frontier the American intellect owes its striking characteristics. That coarseness and strength combined with acuteness and inquisitiveness; that practical, inventive turn of mind, quick to find expedients; that masterful grasp of material things, lacking in the artistic but powerful to effect great ends; that restless, nervous energy, that dominant individualism, working for good and for evil, and withal that buoyancy and exuberance which comes with freedom—these are the traits of the frontier, or traits called out elsewhere because of the existence of the frontier.

Turner's sentences are almost a prose paraphrase of Whitman.

When we come to the literature written by frontiersmen, we find much that is sordid and unattractive in the life described, but the total effect is still romantic. Frontier life was vital, expansive, exuberant; it was in the full tide of growth; here was no Indian summer, no sere and yellow leaf.

The life portrayed in the books by Mark Twain's precursors—Davy Crockett's *Autobiography* (1834, p. 771), A. B. Longstreet's *Georgia Scenes* (1835), W. T. Thompson's *Major Jones's Courtship* (1843), Johnson H. Hooper's *Some Adventures of Captain Simon Suggs* (1845), J. G. Baldwin's *The Flush Times of Alabama and Mississippi* (1853), G. W. Harris' *Sut Lovingood* (1867, p. 775)—contains much that is vulgar, brutal, and unprincipled. The bloody athletic contests described by Longstreet, the low chicanery of Simon Suggs, the rough practical jokes of Sut Lovingood may repel the delicate reader. But there is no denying the vitality, the sturdy strength and individualism, and, above all, the high spirits and love of fun. Life on the frontier must have been good to produce so much solid enjoyment; perhaps no other early settlements in the world's history have been enlivened by such hilarity. The literary apex of the hilarity was *Sut Lovingood;* nowhere else, even in our own literature, will one find quite so much of that quality, or the qualities it connotes—good health and an inexhaustible enjoyment of physical living. Sut Lovingood and his fellows were a remarkably healthy and uninhibited race.

Lincoln liked to read the Southwestern Yarnspinners, for he was one of them; and from their writings runs a straight line of genealogical descent to the great works of Mark Twain: *Roughing It* (p. 854), in which he told with gusto the tall tales of his sojourn in the Far West, and *Life on the Mississippi* (p. 866), *The Adventures of Tom Sawyer,* and *The Adventures of Huckleberry Finn* (p. 873), in which he immortalized the Mississippi from Hannibal to New Orleans. Mark Twain did not omit the seamy side of the Mississippi River region in the 1850's—the squalor, the vulgarity, the lawlessness; but this aspect is almost forgotten by the reader because there was so much that was splendid and exhilarating. The splendor was symbolized for Mark Twain in the steamboat, and "the boat *was* rather a handsome sight!" The exhilaration was owing to the unrestricted freedom of the frontier world, an abandon symbolized by Huck and Jim on the raft—Huck free, Jim on the road to liberty. As our civilization grew older and more complex—as it matured, in short—Mark Twain felt that its members were more and more restricted. Writing in middle life, he remembered with nostalgia the unrestrained spirit of his early world:

> I never felt easy till the raft was two miles below there and out in the middle of the Mississippi. Then we hung up our signal lantern, and judged that we was free and safe once more. I hadn't had a bite to eat since yesterday, so Jim he got out some corn-dodgers and buttermilk, and pork and cabbage and greens—there ain't nothing in the world so good when it's cooked right—and whilst I eat my supper we talked and had a good time. I was powerful glad to get away from the feuds, and so was Jim to get away from the swamp. We said there warn't no home like a raft, after all. Other places do seem so cramped up and smothery, but a raft don't. You feel mighty free and easy and comfortable on a raft.

The frontier love of freedom found enduring expression in the statesmanship of Lincoln and the writings of Mark Twain.

The Westward movement was a powerful driving force which settled the American continent; but there has been another, a counter-force, less powerful but insistent, which has operated throughout our history. As Ferner Nuhn pointed out in *The Wind Blew from the East,* there has been in American life and literature from the beginning "the everpresent pullback toward modes of culture that lie in our past . . . the desire to retrace the racial steps . . . the nostalgic tradition." The Atlantic seaboard has felt drawn constantly to Europe; the Middle West and the Far West, to the Atlantic seaboard. In colonial times, Increase Mather and William Byrd—each in his own way—enjoyed London. In the nineteenth century, Irving and Longfellow and Lowell assimilated the culture of Europe, and Hawthorne felt acutely the ancestral ties to "our old home." Among our major writers, only Thoreau and Whitman—those staunch Americans—never traveled abroad. In the latter half of the century, the Eastward pull began to be felt in the newly settled West: Howells and Garland were drawn from their Western habitats to Boston by the lodestone of the East; Mark Twain settled in Hartford.

The counter-pull has produced two kinds of literary subjects: comparisons of the Eastern and the Western parts of the United States, and comparisons of Europe and America. Although the first subject may be found here and there in our literature (*A Hazard of New Fortunes* transplants several Midwesterners to the East and suggests some comparisons of the two sections, Moody's *The Great Divide* studies the contrasting moralities of New England and the West), it does not attain the importance of the second: Europe versus America is one of the more significant themes in American literature.

Mark Twain treated Europe with unorthodox scorn in *The Innocents Abroad* (p. 851). He had a frontiersman's hatred of tyranny, and Europe to him meant the twofold tyranny of church and state, of priests and kings. The best thing that had ever happened in Europe, he thought, was the French Revolution, and he regretted that it had not done its work more thoroughly. He could not enjoy the great art of Florence when he recalled the sycophantic attitude of the artists toward the Medicis. Not only in *Innocents Abroad* but in other works as well (*A Connecticut Yankee at King Arthur's Court, Life on the Mississippi, Huckleberry Finn*) he lashed out against feudalism and its survivals wherever he found them, whether in Europe or in Walter Scott's novels or in the ante-bellum South. It was primarily Mark Twain's love of freedom and his sense of the dignity of the common man which blinded him to the glories of Europe.

Two great contemporaries of Mark Twain were not so blinded: Henry James spent most of his life in England because he felt that "it takes an old civilization to set a novelist in motion"; Henry Adams, the historian, was drawn to medieval France as an example of "unity," against which he set the "multiplicity" of the modern world.

Though James admired the "items of high civilization" which he professed to find in Europe and failed to find in America, he wrote in large part about Americans—Americans in Europe. In novel after novel (*The American, The Portrait of a Lady, The Ambassadors, The Golden Bowl*) he shows us Americans, admirable though unsophisticated, in the process of exposure to European influences. These influences make for social and aesthetic enrichment; they are, at the same time, often questionable morally. James' innocent Americans —Christopher Newman, Isabel Archer, Lambert Strether, Maggie Verver, in, respectively, the four novels just named—are shocked by the evil which they discover in Europe. But they do not succumb to the evil; indeed, they are triumphant over it. Lesser Americans in James' stories may be corrupted by Europe or may remain impervious to its culture, but his American heroes and heroines, though not always happy or successful, emerge from their European experiences culturally enriched and strong of soul. Perhaps James meant to suggest that the ideal civilization would combine the freshness and moral strength of America with the rich culture of the Old World.

Henry Adams was not interested in the richness of contemporary Europe so much as in the richness of its medieval past. In his attempt to establish historical lines of force—his "dynamic theory of history"—by which he might explain the modern world and perhaps predict its future course, Adams centered his interest in twelfth-century France and in the Cathedral of Chartres as the epitome of that time and place. In Chartres he found the perfect symbol of unity. In that distant age, the Virgin, in whose worship Chartres was built, exerted a dominat-

ing influence over men of all degrees. She was the greatest force of the age—energizing, controlling, comforting, beatifying.

If the Virgin was the symbol of medieval unity, the dynamo, Adams thought, was the symbol of modern multiplicity. The Virgin was a unifying spiritual force; the dynamo was obviously a force, but neither spiritual nor unifying. As religion decayed, enormous, incalculable forces unleashed by science—steam power, electricity, radioactivity—threatened to destroy mankind. It was a serious question, Adams thought in the *Education,* whether there was enough intelligence and moral character in the world to control these new forces and use them for man's welfare. The release of atomic energy makes the question an even more serious one today. *The Education of Henry Adams* (p. 1053) is perhaps the best statement in our literature of the background of our present problems.

In *Mont-Saint-Michel and Chartres* (1904) Adams, the disillusioned intellectual, surrendered to the spell of Chartres and the Virgin:

> One sees her personal presence on every side. Anyone can feel it who will only consent to feel like a child. Sitting here any Sunday afternoon, while the voices of the children are chanting in the choir—your mind held in the grasp of the strong lines and shadows of the architecture; your eyes flooded with the autumn tones of the glass; your ears drowned with the purity of the voices; one sense reacting upon another until sensation reaches the limit of its range—you, or any other lost soul, could, if you cared to look and listen, feel a sense beyond the human ready to reveal a sense divine that would make that world once more intelligible, and would bring the Virgin to life again, in all the depths of feeling which she shows here—in lines, vaults, chapels, colours, legends, chants—more eloquent than the prayerbook, more beautiful than the autumn sunlight.

Europe to Adams was a bright example of something eminently valuable—possibly essential to man's prosperity and happiness—which the modern world has lost.

Europe retained a good deal of prestige throughout the nineteenth century and after, despite *Innocents Abroad* and the frontier school; but European prestige lost ground steadily as the twentieth century advanced, despite a growing disposition of Americans to be critical of frontier values.

SCIENCE and RELIGION

The march of science in the nineteenth century profoundly affected religious thought. Geology established the antiquity of the earth, thus discrediting the chronology of Genesis. Evolution, as set forth in Darwin's *The Origin of Species* in 1859, saw man as the result of a slow development from simpler forms of animal life, thus challenging the Christian belief in his special creation. Astronomical science seemed to point to an infinite universe, in the face of which man appeared insignificant. Before the end of the period 1865-1914, sociological, biological, and psychological investigations still further reduced man's importance and autonomy. William Graham Sumner argued that human behavior was largely determined by "folkways," the mores of one's environment. Biology emphasized the determining influence of physical inheritance, of glandular secretions; psychology, the determining influence of automatic responses to stimuli. So effective was the combined onslaught of the sciences that by the end of the period, man appeared to be—from the scientific point of view—little more than an ingenious mechanism. Modern science seemed to leave no room for the soul, or God, or the transcendental perception of truth—for those religious beliefs, in short, which had motivated most Americans for nearly three centuries and which had found eloquent expression in the writings of Edwards, Emerson, and Whitman. The inspired view of the psalmist—"What is man that thou are mindful of him? . . . For thou hast made him a little lower than the angels, and hast crowned him with glory and honor"—became little short of absurd to the scientific mind. All phenomena, we were to suppose, were naturalistic phenomena, and were explicable on purely naturalistic, as opposed to spiritual or transcendental, grounds.

Early Resistance to Science

The scientific movement did not capture our literature immediately, and, as one might expect, the poets offered a sturdier resistance than other writers. Although Whit-

man accepted the evolutionary idea, it was the Emersonian (which was in turn the Lamarckian) concept, rather than the concept of Darwin, which emphasized the struggle for survival. For Whitman, as for Emerson, the evolutionary idea exalted man by enlarging his future possibilities:

> My feet strike an apex of the apices of the stairs,
> On every step bunches of ages, and larger bunches between the steps,
> All below duly travel'd, and still I mount and mount.

As the scientific movement advanced in the post-Civil War years, Whitman became not less but more Transcendental. His Transcendentalism reached its highest points in the late poems, "Passage to India" (p. 715):

> O my brave soul!
> O farther farther sail!

and the "Prayer of Columbus" (1876):

> Shadowy vast shapes smile through the air and sky,
> And on the distant waves sail countless ships,
> And anthems in new tongues I hear saluting me.

Lanier was a spiritually minded person who had no intention of surrendering his Christian faith to the new science. But partly as a natural reaction against his strict Calvinistic upbringing in Macon, partly through the influence of his professor of science, James Woodrow, at Oglethorpe, and partly because of the liberal atmosphere at Johns Hopkins, he welcomed science with an open mind. His copy of Darwin, we are told, was copiously annotated. He made a special study of the physics of sound in connection with his investigation of prosody in *The Science of English Verse.* Science, then, was an unmixed good. An intelligent man, he thought, must be, above all else, "catholic" ("The Marshes of Glynn," p. 1019): he must eschew the narrowness of creed and cultivate breadth. The ideal soul is characterized by its "loves," its points of receptivity, and excludes neither science nor any other good thing ("My Springs"):

> And home-loves and high glory-loves,
> And science-love and story-loves.

He was aware (in "The Mocking Bird") that science might have its limitations:

> Sweet Science, this large riddle read me plain:
> How may the death of that dull insect be
> The life of yon trim Shakspere in the tree?

He admitted (in "Acknowledgement") that possibly his age was dazzled by the new science: "blinking at o'er bright science." These, however, were small reservations in Lanier's mind; no writer of the period was more hospitable to science. Lanier's eager search for truth was thoroughly admirable. But one cannot avoid a suspicion of indiscrimination and naïveté. Lanier did not recognize the contradictions involved; like more able thinkers than himself in the 1870's, he advocated the reconciliation of religion and science. Unlike some other reconcilers, he was apparently unaware that such a reconciliation would entail a diminution of Christian doctrine.

The breadth which Lanier extolled and exemplified seemed vicious to the greatest of the New England poets of the time, Emily Dickinson (p. 1021). In liberalism, she thought, lurked an insidious and fatal danger to religion. Religion was being watered down to the point of insipidity. Her satire of the liberal clergyman—and she must have had in mind the popular advocates of reconciliation between the old religion and the new science—is a telling indictment: "He preached upon 'breadth' till it argued him narrow. . . ." Miss Dickinson was scarcely touched by the scientific movement. Her religion was the older Puritanism, modified somewhat by Emersonian Transcendentalism. For her, the things of religion still lay beyond the realm of scientific demonstration; they were still the objects of faith:

> I never spoke with God,
> Nor visited in heaven;
> Yet certain am I of the spot
> As if the chart were given.

If religious faith transcends the world of science, so does

the individual life, on occasion, transcend the mechanisms with which science strives to hem it in:

> We never know how high we are
> Till we are called to rise;
> And then, if we are true to plan,
> Our statures touch the skies.

The "plan" Miss Dickinson refers to is not the scientist's, but God's.

The Spread of Mechanistic Philosophy

Lanier died in 1881; Emily Dickinson, in 1886; Whitman, in 1892; and with them died in American literature a religious faith untroubled by science. By the end of the century, our poets and prose writers were feeling the full impact of the scientific movement.

Stephen Crane (p. 960) inferred from the biological struggle for survival and the astronomical immensity of the universe that man is unimportant.

> A man said to the universe
> "Sir, I exist!"
> "However," replied the universe,
> "The fact has not created in me
> A sense of obligation."

"A high cold star on a winter's night" ("The Open Boat," p. 961) is the symbol of the indifference of Nature and Nature's God. It seemed ironical to Crane, who found intense irony everywhere in human experience, that the discoverer of the universe should be dwarfed by his discovery, that the chief spiritual result of man's scientific achievements should be the conviction of his own insignificance.

Mark Twain, late in life, became a convert to the mechanistic philosophy. Partly through the influence of the new agnosticism as expounded by Robert G. Ingersoll and others, and partly, perhaps, in the attempt to stifle the deep-seated feeling that his literary performance had not been in keeping with his creative powers, he declared and attempted to prove that "man is a machine." In *What Is Man?* (1906) he summarized his argument as follows:

> To me, Man is a machine, made up of many mechanisms, the moral and mental ones acting automatically in accordance with the impulses of an interior Master who is built out of born-temperament and an accumulation of multitudinous outside influences and trainings; a machine whose one function is to secure the spiritual contentment of the Master, be his desires good or be they evil; a machine whose will is absolute and must be obeyed; and always *is* obeyed.

What Is Man? was a strange and contradictory book to come from the author of *Huckleberry Finn.* Was that wonderful Western freedom—that of Tom and Huck and the steamboat pilot, the American freedom which showed no "embarrassment even in the presence of travelling foreign princes" and which Europe had almost perished for the lack of—was that freedom, scientifically considered, only an illusion? To believe so was to deny the thesis of his great books. It is small wonder that Mark Twain's last years were embittered.

If to Henry Adams man himself was something more than a machine, man at least seemed to be impelled along lines of force. "Modern politics," he said in the *Education,* "is a struggle not of men but of forces. The men become every year more and more creatures of force, massed about central power-houses." He began to "see lines of force all about him, where he had always seen lines of will," and thus "before knowing it," he confessed, "the mind stepped into the mechanical theory of the universe." The future which Adams envisioned for the race was not too hopeful. There was a fair possibility of man's being engulfed in the new forces: "In the earlier stages of progress, the forces to be assimilated were simple and easy to absorb, but, as the mind of man enlarged its range, it enlarged the field of complexity, and must continue to do so, even into chaos, until the reservoirs of sensuous or supersensuous energies are exhausted, or cease to affect him, or until he succumbs to their excess."

Like Adams, Theodore Dreiser believed that men were creatures of force. With the turn of the century, the mechanistic philosophy began to appear in the naturalistic novel, which soon became its chief literary vehicle. Many naturalistic novelists felt a profound sympathy with the unfortunate members of modern society, who appeared to be the helpless and blameless victims of forces beyond their control. The mechanistic philosophy

afforded a means of complete exoneration: if a person was dominated by chemical forces from within and social forces from without, he was not morally responsible for his acts or culpable for his misdeeds. In accordance with this view Dreiser wrote his great naturalistic novels: *Sister Carrie, Jennie Gerhardt, The Financier, The Titan,* and *An American Tragedy.* "All of us," declared Lester Kane in *Jennie Gerhardt,* "are more or less pawns. We're moved about like chessmen by circumstances over which we have no control." The world seemed utterly without purpose to Dreiser:

> In distant ages a queer thing had come to pass. There had started on its way in the form of evolution a minute cellular organism which had apparently reproduced itself by division, had early learned to combine itself with others, to organize itself into bodies, strange forms of fish, animals and birds, and had finally learned to organize itself into man. Man, on his part, composed as he was of self-organizing cells, was pushing himself forward into comfort and different aspects of existence by means of union and organization with other men. Why? Heaven only knew.

The obvious tendency through Crane, Mark Twain, Adams, and Dreiser was a growing pessimism.

Mechanistic materialism, so prominent in the literature of the 1900's, was not unchallenged after its apparent triumph. Josiah Royce expounded at Harvard an idealism reminiscent of Emerson's. William James, another Harvard professor, brother of the novelist and America's first great authority in the new science of psychology, emphasized in *The Varieties of Religious Experience* (1902) the energizing power of religious faith. This power could hardly be accounted for, he thought, in terms of a mechanistic universe. The creative individual need not succumb to Adams' lines of force or Dreiser's weight of circumstance. James set up the pragmatic test of truth: "The ultimate test for us of what a truth means is the conduct it dictates or inspires." And, finally, Herrick among the novelists and Moody among the poets in the first decade of the century presented the religious view. But despite these dissenting voices, it appeared likely that the determinism of mechanistic science would continue to gain in popular and literary acceptance.

THE NEW IMPERIALISM

Throughout the nineteenth century, expansionist doctrines had been urged sporadically. Certain prominent Americans had advocated in the name of "manifest destiny" the desirability of annexing the entire North American continent. Out of this agitation had come the war with Mexico and the acquisition of large territories in the Southwest in 1845-1853 and the purchase of Alaska in 1867. But this expansion could hardly be called flagrantly imperialistic since, Alaska excepted, the new territory seemed necessary to round out our natural boundaries.

The Cuban Revolution of 1895 afforded a plausible excuse for American intervention, and the quick victory over Spain in 1898 stimulated imperialistic sentiments. The spectacular and exciting events of the war—Dewey's victory in Manila Bay, the crushing defeat of Cevera's squadron as it attempted to escape from Santiago, the charge of Roosevelt's Rough Riders up San Juan Hill —evoked a dubious mixture of patriotism and jingoism. After the defeat of Spain, the Filipinos resisted our rule and General Miles' army put down the insurrection. Many thoughtful Americans were alarmed at the new imperialistic policy upon which our nation seemed to be embarking. The crisis called forth protests from persons as various as William Jennings Bryan, Jane Addams, Charles W. Eliot, Finley Peter Dunne, and William Vaughn Moody.

Through the inimitable "Observations of Mr. Dooley," Dunne (p. 1046) satirized the whole imperialistic policy:

> "An there ye ar-re, Hinnissy. I hope this here lucid story will quite the waggin tongues iv scandal an' that people will let th' Ph'lippeens stew in their own happiness."
>
> "But sure they might do something f'r thim," said Mr. Hennessy.
>
> "They will," said Mr. Dooley. "They'll give thim a measure iv freedom."
>
> "But whin?"
>
> "Whin they'll stand still long enough to be measured . . . ."

Moody lashed out against the conquest of the Philip-

pines in one of the most impassioned poems of our literature, "An Ode in Time of Hesitation" (p. 1032):

> Are we the eagle nation Milton saw
> Mewing its mighty youth,
> Soon to possess the mountain winds of truth,
> And be a swift familiar of the sun . . .
> Or have we but the talons and the maw,
> And for the abject likeness of our heart
> Shall some less lordly bird be set apart?—
> Some gross-billed wader where the swamps are fat?
> Some gorger in the sun? Some prowler with the bat?

But neither the humor of Dunne nor the Miltonic fervor of Moody could stem the tide—we took the Philippines. The immediate outcome notwithstanding, the protests need not be regarded as futile: they may very well have had the effect of making our rulers more careful, for our record in administering the Islands proved to be creditable.

Secretary of State Hay made partial amends to the anti-imperialists by his Chinese policy, and Moody's tone changed from condemnation in the "Ode" to pride in "The Quarry." Having declared the policy of the "Open Door," Hay backed it up by thwarting the obvious intention of the European powers to use the Boxer Rebellion as a favorable opportunity for the dismemberment of China. The American eagle—no longer a "gross-billed wader"—now appeared in a heroic rôle. When China—backward, helpless, unaware (the description of China in the poem is extraordinarily fine)—was about to be pounced upon by the "brutes of prey," the "grand circler," uttering a cry of warning, drove them away:

> . . . stiller-tongued, with eyes somewhat askance,
> They settled to the slot and disappeared.

A distinguished historian has recently declared that " 'The Quarry' is worth all of the literature of imperialism together."

The United States emerged from the war with Spain a world power. National pride centered to an unprecedented degree (except possibly during the War of 1812) in the Navy. Alfred T. Mahan's *Influence of Sea Power upon History,* whose doctrine was espoused by Theodore Roosevelt, helped to make us navy-minded; the victories over Spain raised naval patriotism to a high pitch; Theodore Roosevelt dramatized the rôle of the "big stick" by sending the fleet around the world in 1907. But the great majority of Americans were not imperialists at heart. By 1910 pacifism seemed to be gathering strength: Bryan, thrice Democratic candidate for the Presidency, advocated disarmament; David Starr Jordan, president of Stanford, argued that war was the reversal of evolution—the survival of the unfit; William James attempted to discover "a moral equivalent of war." Not deeply affected by the flare-up of 1898-1900, the national temperament preferred peace with isolation. As the period neared its close, little did Americans dream that events in Europe would soon draw them, whether willing or not, into a vigorous participation in world affairs.

R. S.

II. Literary Trends

"The eight years in America from 1860 to 1868," wrote Charles Dudley Warner and his collaborator, Mark Twain, in *The Gilded Age* (1873), "uprooted institutions that were centuries old, changed the politics of a people, transformed the social life of half the country, and wrought so profoundly upon the entire national character that the influence cannot be measured short of two or three generations." Although many writers continued to follow older patterns, these changes in American life brought changes in at least some forms of the literature. Some changes adapted forms to the tastes of the growing middle-class reading public. Others helped in the expression of the nostalgia, the puzzlement, or the distress of people living in a transitional period.

Authors continued to write old-fashioned essays, but this form began to date as it was crowded from magazines by journalistic articles. By the end of the period, muckraking reports by Lincoln Steffens and others had become much more typical. A great deal of poetry—some of it weak and imitative, some redeemed by individual qualities of its creators—was poured into prewar molds. But the period saw the rise to prominence of much popular

written by more literate poets who consciously tried to please the growing group of readers who enjoyed poetry in dialect. Preëminently, though, this was an age of fiction, and fiction changed more than any other type of literature.

OLDER PATTERNS of POETRY

Much poetry—"literary" poetry as contrasted with folk songs and folk poetry—showed remarkably few effects of the changing intellectual climate. Poetry in general somehow lost its vitality for many intelligent readers; it awaited a rebirth, portents of which began to appear in the final years of the period. This was partly because many poets—Bryant, Longfellow, Holmes, Lowell, Emerson, and Whittier—whose careers had begun in an earlier period, continued to satisfy and to determine tastes after the war. It was partly because these established artisans and their British contemporaries were imitated in innocuous, genteel poems by hosts of inferior poets—Richard Henry Stoddard (1825-1903), Bayard Taylor (1825-1878), Edmund Clarence Stedman (1833-1903), Thomas Bailey Aldrich (1836-1907), and Richard Watson Gilder (1849-1909), to name but a few. Even on a higher level, Moody, who had important things to say and who said them with real eloquence, was well satisfied with established verse forms. Crane was a minor, though arresting, exception in his use of free verse. With the exception of Whitman, who was generally ignored, even the leading poets of the period—Sidney Lanier and Emily Dickinson—usually shaped their poetry to conform with accepted schemes. Each, however, sang with a noteworthy difference.

Sidney Lanier: Musician and Poet

Sidney Lanier, in his conception of poetry, was much closer to prewar New England poets than he was to Walt Whitman. "Whitman," he charged, "is poetry's butcher. Huge raw collops slashed from the rump of poetry, and never mind gristle—is what Whitman feeds our souls with." In his lectures on *The English Novel* Lanier devoted a good deal of time, a bit irrelevantly, to attacks upon Whitman's heresies. And when Lanier himself wrote free verse, as he frequently did, he did not think of publishing it. Instead, he conceived of himself as writing not poems artistic clothing before they were fit to appear in public. Whitman, he held, had been at his best when writing "O Captain, My Captain" because in it he had "abandoned his theory of formlessness and written in form." Like the Brahmins, Lanier saw the poet achieving greatness when he used his supreme artistry to fuse beauty and truth. "Art, to be free," he wrote, "is not to be independent of form but to be master of many forms."

Lanier's departures from conventional versification came, therefore, less because he disagreed with the older poets than because he had individual tastes and talents. Because, even better than Emerson, he knew and loved the Elizabethans, he tended to use many images and conceits which were Elizabethan in their daring. Because he was a musician and a lover of the forms of music, in several poems, notably "The Symphony," he employed organizations analogous to those of musical compositions. And also because he was a musician, he tended, as he showed in his *Science of English Verse,* to think of poetic rhythms as essentially the same as musical rhythms. The result of this belief was that, though he kept within the limits which he had defined, he was a master of more complex modulations of meter, of more artful handlings of vowels and consonants for melody, than any of his predecessors, save Poe, had been.

Emily Dickinson: Meaning in Miniatures

Emily Dickinson, despite the fact that only a few of her poems were published before 1890, actually was almost contemporaneous, as a writer, with her idol, Ralph Waldo Emerson (1803-1882): she began to write poetry, it appears, in the mid-fifties and continued until her death in 1866. She was probably as innocent of theories about technique as any poet could possibly be, as her test for poetry shows—"If I read a book and it makes my body so cold no fire can ever warm me, I know that is poetry. If I feel physically as if the top of my head were taken off, I know that is poetry." In all probability when such an impressionistic critic conceived of what she was doing, she did not self-consciously consider herself a rebel against established forms. Like Lanier, therefore, when she diverged from conventional procedures, she did so less because she had new theories than because, even for a poet, she was an unusual personality.

One belief of Emerson which his admirer in Amherst did share and enunciate was that a task for the poet was, as Emerson put it, to "embrace the common, . . . explore and sit at the feet of the familiar, the low." "Give me," said Emerson, "insight into to-day, and you may have the antique and future worlds." Miss Dickinson saw the poet as one who distills attars "from the familiar species that perished by the door." So in stanzas ordinarily like those of Emerson and, incidentally, like those of church hymns, she tried to tell (again as Emerson phrased it) the "meaning" of "the meal in the firkin; the milk in the pan; . . . the glance of the eye . . . every trifle bristling with the polarity that ranges it instantly on an eternal law. . . ."

The common, for her, included a household group of men, women, and children; New England nature in the small range of nearby fields, and the rooms of a house as they were known to a housekeeper. She saw these with eyes focused to minute details—with intimate knowledge comparable to a nun's knowledge of each stone and lichen in her narrow cell. And when she announced what the details in her world of miniatures meant, the revelations were very personal ones—the discoveries of a mind which was both serious and playful, both mystical and whimsical. Novel imagery was the result, much of it predicted by nothing else in literature so well as by the poem "Huswifery" by seventeenth-century Edward Taylor, which had told of faith by employing conceits derived from household tasks.

"I'll Tell You How the Sun Rose" (p. 1029) is in some ways typical. Like a large share of poems by this introspective recluse, it begins with the first personal pronoun, and goes on to record highly individual insights into a common experience. In the second line she playfully interprets the sunrise in terms of feminine fineries—"A ribbon at a time"—a conceit paralleled, in the next stanza, by the image of ladylike hills "untying their bonnets." A comparison of the light with darting squirrels, two details of the commonplace scene—steeples "swimming" in "amethyst" and bobolinks bursting into song—then the soft soliloquy of the watcher, give the effect of the dawn. The end of the day is impressionistically represented, in the next two stanzas, by figures which involve children climbing a stile and a "dominie" putting up pasture bars and leading away his flock. All the details come from ordinary observations, and their very commonplaceness gives the interpretation a unique appeal.

Though this poem is less intense in thought and feeling than many by Miss Dickinson, its imagery is fairly representative. As Henry W. Wells remarks in *The American Way of Poetry,* "Children playing in the garret or asleep in their beds at dawn, New England customs at Thanksgiving, apples snug in the cellar through the winter, the loud ticking of the clock at night, signs on chimneys and doors, needle and thread, the little girl shut in the closet and told to be still—such images take on the most piquant and unexpected emotional meanings. . . . Her microscope requires only one clover and one bee to make a prairie; one flake of snow debating whether it will cross a rut suffices her to create at once a mood and a winter's day." The fusion of such homespun imagery with the thoughts and whimsies of a poet made Emily Dickinson's work a new thing.

Folk Songs and Folk Poetry

One of the glories of the period 1865-1914 was the discovery, by many, of one aspect in particular of our rich native folklore—the folk songs. The scholars active before and after 1914 did not, to be sure, create the songs. The ballads had been made by humble, uneducated folk, and the scholars merely collected them and made them known. Even before the war there had been some interest in such lore, indicated by sporadic studies. Notably, young Francis James Child (1825-1896), newly appointed to the Harvard faculty, had been inspired, by study in Germany in the 1840's, to carry on research in British balladry. His lifelong work, climaxed by his five-volume collection, *English and Scottish Popular Ballads* (1882-1898), made such work "respectable" and aroused the interest of many scholars in the subject. Postwar interest in sectional life and in national history stimulated new enthusiasm for research. By the end of the period, therefore, knowledge about folk songs had increased tremendously.

During the war and the years after it, the songs which had been chanted by soldiers were collected in such volumes as *Songs of Soldiers* (1864), *Poetry of the Civil War* (1866), and *Southern Poems of the War* (1867). At least some of the verses drawn together in such volumes were of folk origin. Concurrently, several writers

began to introduce the public to Negro spirituals in magazine articles such as "Negro Spirituals" (*Atlantic Monthly,* 1867) and in books such as *Slave Songs of the United States* (1867), *Jubilee Songs* (1872), and *Cabin and Plantation Songs* (1875). The last two volumes contained versions of folk songs as sung by the students of two newly founded institutions, Fisk and Hampton.

In the following decades, more songs of the people came slowly to light. In 1880, for example, when Joel Chandler Harris issued his first collection of Uncle Remus stories, themselves valuable as folklore, he included a number of plantation songs as he heard them sung in Georgia. In 1883 a fine study, *Games and Songs of American Children,* was published by W. W. Newell. The American Folk-Lore Society began in 1888 the regular publication of its *Journal,* which from time to time published, along with other lore, folk songs as they were sung by the Negroes, the folk of New England, or the Southern mountaineers. Other learned journals printed occasional articles. Stedman and Hutchinson included several sections of folk songs in their anthology, *A Library of American Literature* (1887-1890). In 1894, Alfred M. Williams included in his *Studies in Folk-Song and Popular Poetry* not only the ballads of other nations but also Civil War songs and American sea-chanteys. In 1908 a new vein was opened when N. Howard Thorp, Southwestern cowhand and himself a maker of ballads, published a little pamphlet, *Songs of the Cowboys,* a collection in which he stated, whenever possible, exactly where, when, and from whom he had picked up each. Two years later John Lomax, who had learned at Harvard to prize the ballads he had heard as a boy and a youth in Texas, published a better-known collection, *Cowboy Songs and Frontier Ballads.*

During the year between these two collections, a folk song very different from cowboy ballads swept the country, carried from coast to coast by vaudeville singers and gramophone records. This was "Casey Jones" (p. 763), a railroad song which had been composed years before by some anonymous lyricist to celebrate "a brave engineer," and which was published, in a somewhat refined version, by T. L. Siebert and E. Newton. During 1909, too, a writer in the *Journal of American Folk-Lore,* Louise Rand Bascom, published the opening lines of another railroad song, as heard in North Carolina: "Johnie Henry was a hard-workin' man,/He died with his hammer in his hand." These, she said, were all the words of the song she had heard. A few years later (1913) in "Songs and Rhymes from the South," an article in the same publication, E. C. Perrow printed fragments or complete versions of songs about this same John Henry which he had collected in east Tennessee, Indiana, Mississippi, and Kentucky. All these, as well as others to be recorded later, were apparently based upon the exploits of a giant Negro who had driven steel for the Chesapeake and Ohio Big Bend Tunnel in West Virginia in the early 1870's.

This record of a few milestones tells only the beginnings of the American study of folk songs which, in the modern period, was to engage the attention of both careful scholars and lovers of poetry and music. Two rather different reasons for the awakened interest in such lore may be suggested. The study of folklore, thanks largely to the efforts of Child and his students, had become both respectable and scientific, and collectors had been initiated into the mysteries of study. For another thing, in those days when life was beginning to show its present pace and complexity, there was an attraction in the arts and cultures of the primitive, unlearned folk who sang such songs. Their traditional creations, at least, were not marred by the harassing problems of a transitional period.

The makers of the songs, naturally, plied their art for reasons which had nothing to do with either the science of ballad collecting or the distress of city folk during a time of change. Their songs came directly from their own experiences, their way of living, their feelings. To express what they had to say, they fitted poetic words of the only kind they knew to music of the only sort with which they were familiar. Thus the Negroes amalgamated the old-time hymns which whites had taught them with African rhythms which had been passed along to them by their enslaved forebears; and the isolated whites of the mountains or the prairies fashioned their compositions after the example of current songs or of ballads which had been brought to America from England or Scotland by early settlers.

These folk songs probably had few appeals to a sizable group which thought that poetry had to be elegant, genteel, and ornamental. Appreciation of balladry was

from one another. One audience, like the makers of the songs, was, in some ways, naïve—shy on book knowledge, although probably learned in the emotions and behavior of real men and women. Such an audience appreciated the songs much as had their original audiences. The other audience was highly sophisticated—one which could perceive the historical value of balladry as a cultural expression, and one which could appreciate simplicity of style, suggestiveness of detail, and music which, though it differed from the music currently fashionable, had a beauty of its own.

Some poets who were not folk poets took hints about writing from the ballad makers and wrote what might be called not folk songs but "folk poetry." Some of these—Whittier, for instance—used ballad verse or metrical forms resembling it, and employed language with ballad-like simplicity. Others, in various parts of the country, wrote dialect verse.

In the South a number of poets continued the tradition which had been started before the war by Stephen Collins Foster, and wrote poetry echoing Negro melodies and employing Negro dialect. Irwin Russell (1853-1879) of Mississippi, in his *Christmas Night in the Quarters* (1878), produced a masterpiece of this genre, a sympathetic mingling of the Negroes' religion and humor in authentic dialect. Hayne and Lanier, as well as other less famous Southerners, also wrote poetry using Negro dialect. During the period, too, Paul Laurence Dunbar (1872-1906) in *Lyrics of Lowly Life* (1896) showed himself to be, as Howells held, the first writer of pure African descent "to feel the Negro life aesthetically and to express it lyrically."

The most popular dialect poetry, however, was written in the Far West and the Middle West. Outstanding were John Hay (1838-1905), author of *Pike County Ballads;* Bret Harte, whose most famous poem in this style was the popular "Plain Language from Truthful James" (p. 816), and James Whitcomb Riley (1849-1916), whose first book was *The Old Swimmin' Hole and 'Leven More Poems* (1883). At their best, such poems caught some of the flavor of rural life and some of the tang of American speech; they had wholesome humor and sentiment. At their worst, they were maudlin in their sentimental nostalgia for the "olden times." At both their reflections of the tastes and the expressions of the feelings of the period. The extraordinary success of such writings showed that a large class of readers had come into being who were happy to buy the writings of even "humbler poets" than those Longfellow had praised—poets whose "simple and heartfelt lays" were, indeed, extraordinarily simple.

HUMOR

The period 1865-1914 is noteworthy as one during which humor perceptibly contributed to the development of fiction and merged with that type of literature. Thus our most admired humorist to date, Mark Twain, whose works were written in this period, was praised not only for making people laugh but also for writing great fiction. His mingling, in some of his work, of the techniques of comedy with the techniques of the short story and the novel was typical: many authors found the procedures of some of the humorists useful in creating postwar fiction. Some humor, by contrast, moved further and further from fiction, in the end becoming almost divorced from it.

In the years before the Civil War, magazines and newspapers—"exchanges"—came from all over the country to the office of the little Hannibal, Missouri, newspaper run by Mark's brother, Orion Clemens. Young Samuel Clemens, in the days when he was learning the printer's trade, read humorous writings in these publications and set some of them up in type. Some of the humor was that of New England—sketches and stories of Yankee characters like Jack Downing. More often it was the fine brand of humor then being produced in the part of the country with which he was familiar, the old Southwest—Tennessee, Georgia, Alabama, Louisiana, Mississippi, Arkansas, and Missouri.

Southwestern Yarnspinners

One important thing about much of this Southwestern humor was its relationship to a favorite frontier pastime, yarnspinning. Traveling across country, moving down river, resting at night by campfires, household firesides, or by glowing stoves, the people of the section (like rural folk elsewhere in the country) found that good stories helped pass time pleasantly. Able storytellers were greatly admired, and political figures like Davy Crockett and

Abe Lincoln who were masters of the art could win votes by spinning yarns for their constituents. So the art of oral narration flourished on the frontier.

The stories ranged all the way from wild fantasy to fairly straightforward accounts of everyday happenings. Some fireside yarns were playful lies comparable to their modern survivors, "fish stories" or Walt Disney animated cartoons. Their tellers, like Ovid Bolus, described in Baldwin's *The Flush Times of Alabama and Mississippi,* "lied with a relish . . . lied with a coming appetite, growing with what it fed on . . . lied from the delight of invention and the charm of fictitious narrative." They lied about the astonishing fertility of the soil, about encounters with huge beasts, as did Jim Doggett in "The Big Bear of Arkansas" (p. 781). Almost as often, in some parts of the country, they imaginatively exaggerated the poverty of the soil, telling of land so poor that birds flying across it had to carry rations, so poor that if a buyer couldn't read he was likely to learn to his sorrow that the seller had got rid of two sections instead of the one contracted for.

Such lies about land, climate, and beasts were inventive and fantastic, and so were those about certain mythical heroes—gigantic comic demigods capable, so the stories asserted, of superhuman deeds. Among these were Mike Fink, keelboat King on Western rivers; Davy Crockett, hunter, congressman, and warrior; John Henry, the Negro steeldriver; Pecos Bill, the rootin-tootin Texas cowboy; Paul Bunyan, mighty logger of the whole north country from Maine to Washington. Some of the tall tales which gifted truth-stretchers recounted about a few of these worthies began to get into print as early as the 1820's. Mike Fink, for instance, was introduced in a short story in the *Western Souvenir* in 1828, and between that date and 1914 stories about him were told in a hundred varied publications—books, magazines, almanacs, and newspapers. Davy Crockett, who became prominent about the same time, was yarned about in even more publications. As the period ended, Paul Bunyan stories began to appear, and after 1914 all three heroes were to be celebrated by a number of authors.

The printed yarns about these men and others of their ilk were definitely influenced by the forms of the oral tales. Many details were products of the soaring frontier imagination; some of them were indeed fantastic (see the almanac stories of Davy Crockett, p. 773). But the incongruity which made the tales comic was the incongruity between the actual and the impossible. Thus though whole sequences of events were completely impossible, happening was made to arise from happening in an elaborately logical fashion. An earthy dialect style rather than the majestic language of inspired poetry matter-of-factly recounted astonishing feats. Details painstakingly rendered—highly authentic details—gave added verisimilitude. Sometimes, even touches which were quite vulgar heightened contrasts between the earthy and the unearthly. A few lines after Jim Doggett had poetically evoked a giant bear of Arkansas which "loomed like a black mist," Jim was shamefacedly telling about losing his pants. And frequently, though the tale was impossible by any sane standards, the character of the teller, and his motives for inventing his lie, were most plausibly rendered. The playfulness of tall tales was underlined, in short, by the constant reminders of actuality.

Even more of actuality entered into stories of another sort told by Western firesides and eventually translated into print—comic tales about more commonplace frontier characters and happenings. Several reasons for authenticity in such narratives may be cited. There was a desire on the part of some sophisticated storytellers and writers to show that they, like eighteenth-century British humorists, could detachedly perceive and appreciate "originals" and "eccentrics." Again, there was a wish, on the part of many, to write history—as A. B. Longstreet put it, in his pioneer book, *Georgia Scenes,* ". . . to supply a chasm in history which has always been overlooked—the manners, customs, amusements, wit, dialect, as they appear in all grades of society to an eye and ear witness. . . ." Finally, of course, there was a desire to entertain one's fellows. Lawyers, for instance, riding the circuits, said Samuel A. Hammett, in 1853, "living as they do in the thinly inhabited portion of our land, and among a class of persons generally their inferiors in point of education . . . are apt to seek for amusement in listening to the droll stories and odd things always to be heard at the country store or bar-room."

Whatever their motivation, authors who wrote such tales managed among them to record in extraordinary detail many aspects of frontier life. Franklin J. Meine, in his excellent anthology, *Tall Tales of the Southwest,*

lists a group of subjects that is strikingly inclusive—local customs, games, courtships, weddings, law circuits, political life, hunting, travel, medicine, gambling, religion, fights, and oddities in character. As Bernard De Voto claims, in *Mark Twain's America,* "No aspect of the life in the simpler America is missing from this literature." The details about backgrounds, costumes, mores, and dialect are plentiful and vivid. Regardless of their crudities and exaggerations, such authors as Crockett, Thorpe, Thompson, and G. W. Harris represent the first American achievement of what later was called "realism."

Although some humorists, for instance Finley Peter Dunne, continued the older style, humor in general after the Civil War followed two channels. That which was generally classified as "humor" lost much of its prewar localized quality—tended in fact to become divorced from fiction. Professional humorists such as Josh Billings (p. 791) and Artemus Ward (p. 788) managed to appeal to larger audiences than ante-bellum humorists had by replacing much of the humor of regional scene and individualized characters with humor which depended almost exclusively upon expression; and background, character, and plot became unimportant. Characters became generalized so that it was practically impossible for readers to tell where they lived (except somewhere on the North American continent) and whether they were good or bad, wise or foolish. The source of laughter, rather, was a style—ludicrously assembled sentences, words badly spelled, malapropisms, puns, and the like. This, then, was the first type of humor that developed after the war. The second type merged with a kind of fiction which flourished between about 1868 and 1900—local color.

LOCAL COLOR

In the decade following the end of the Civil War, Whittier and Harriet Beecher Stowe of New England, Bret Harte of the Far West, Edward Eggleston and Mark Twain of the Middle West, and George Washington Cable of the Deep South all won enthusiastic praise for their depictions of life and character in their particular corners of the country. This was the beginning of a great movement in fiction in the United States. In 1894, critic Edward E. Hale, Jr., could write, in *The Dial,* "Everybody writes 'local' stories nowadays; it is as natural as whooping cough." There was a slight exaggeration in this statement, but certainly at least a vast number of authors were so engaged. Joel Chandler Harris of Georgia, Sarah Orne Jewett of Maine, and O. Henry of Texas and New York City are only a few of scores who wrote local color fiction.

Directly or indirectly, much of this writing was influenced by the prewar humor of New England or the old Southwest. It seems probable that Edward Eggleston learned much of his art from such dialect humorists as Jack Downing, Hosea Biglow, and various Southwestern practitioners. Joel Chandler Harris, too, and O. Henry (p. 842) knew American humor well, and actually wrote a good deal of it themselves, before they began to write fiction. And it is noteworthy that Bret Harte, who was so successful that many fictionists paid him the tribute of imitation, definitely believed that the humorous story of "bar-rooms, gatherings in the 'country store,' and . . . public meetings" was "the parent of the American 'short story.' "

Naturally, it was not so simple as that. Many influences which had shaped our fiction in the past continued to shape it. The genial essays of Irving, sentimental novels, the writings of Scott, Cooper, Dickens, and others left their imprint. Yet the prewar humorous story was influential in ways which Harte suggested when he described it: "It was concise and condensed, yet suggestive . . . delightfully extravagant—or a miracle of understatement. It voiced not only the dialect, but the habits of thought of a people or locality. . . . It went directly to the point." Many details in this formula applied to representative local color stories.

So far as the local colorists, in their narratives, lived up to this description, they tended to be recorders of actuality. Several thought of themselves as merely reflectors of life. Typical was Mrs. Stowe's claim that in her New England local color fiction she tried to "make her mind as still and passive as a looking-glass, or a mountain lake," in order that she might reflect "New England life and character." "My studies for this object," she said, "have been . . . taken from real characters, real scenes, and real incidents." But perhaps because of the example set by romantic fictionists, perhaps, also, because of the nostalgia which most writers felt for the past, local colorists tended to write not of the scene of

the day but of a day that was ended. So Mrs. Stowe wrote of the New England of her childhood, Harte of the California of the Gold Rush, and others of happy antebellum plantations. The mists of time blurred the mirrors somewhat, and the local colorists as a rule avoided the sordid and the tragic in favor of geniality, sentiment, and pathos.

MARK TWAIN: HUMORIST and LOCAL COLORIST

Reared on the frontier and instructed in writing by prewar Yankee and Southwestern humorists, Mark Twain came into national prominence in the years when postwar professional humorists and local colorists were flourishing. In his varied writings the student of humor may see evidence of the influences of all these schools. But since Samuel L. Clemens happened to be a genius, he frequently managed to surpass his teachers.

Most of Twain's ephemeral works and passages are the creations of a "Funny Man" who was working rather too hard to get laughs. At their worst such creations were typified by the "Thomas Jefferson Snodgrass Letters," which he wrote in the late fifties, newspaper screeds soon forgotten and not reprinted until they were dug up by scholars as specimens of his youthful efforts. The style was like that of Artemus Ward and his cohorts of the postwar period—a style notable for cacography and for outlandish expressions. Later, Clemens, like other humorists of the school, refined this style somewhat—dropping bad spelling, for instance—in various sketches and in parts of his travel books. Often, in using the later style, he was quite funny. At its best, nevertheless, this type of humor never marked his highest reaches. And now and then—as in some later chapters of *Huckleberry Finn*—burlesque and buffoonery struck discordant notes.

The artistry of the frontier oral story, by contrast, was one of Twain's most important assets. Having lived in the frontier town of Hannibal, traveled around the whole country, and worked on river boats and in mining camps, he had, by 1865, heard as well as read a great number of humorous stories told by master storytellers. He knew, as he said in "How to Tell a Story," that ". . . the humorous story is strictly a work of art, high and delicate art—and only an artist can tell it." He knew important aspects of the technique: "The humorous story is told gravely; the teller does his best to conceal the fact that there is anything funny about it. . . ." Again, "To string incongruities and absurdities together in a wandering and sometimes purposeless way, and seem innocently unaware that they are absurdities, is basis of the American art. . . ." Finally, he knew how the introductory framework of an enclosed narrative, as well as the language and thoughts of the yarnspinner, might be made to reveal the narrator as an appealing or amusing character. When, therefore, Clemens heard the "Jumping Frog" story unfolded by a mining-camp fireside in 1865, he was able to write it out in a masterly form (p. 848). And when later, in "Baker's Blue-Jay Yarn" (p. 863) and elsewhere, he created tall tales in the style of "The Big Bear of Arkansas," his were even better than the antebellum masterpiece.

Twain's travel books and to some extent his novels were combinations of similar brief narratives with longer chronological accounts. As Mr. De Voto remarks, in *Mark Twain's America,* "He took the humorous anecdote, combined it with autobiographical reminiscence, and so achieved the narrative form best adapted to his mind. . . . *The Innocents Abroad* is structurally an autobiographical narrative. Descriptive passages . . . interrupt the narrative from time to time but its steady progress is accomplished by means of stories. Some of them are brief, unelaborated anecdotes, in no way different from the type out of which they proceed, but others already show Mark's perception that this form can be utilized for more intricate effects. . . . The same framework produces *Roughing It, A Tramp Abroad, Life on the Mississippi,* and *Following the Equator.*" Similarly in novels such as *The Gilded Age* and *Huckleberry Finn* Twain constructed mosaics made up of anecdotal units.

Just as anyone familiar with humor sees these resemblances, so anyone familiar with local color writing notes resemblances to writings of that type. The material for all of Twain's best narratives was his boyhood home, Hannibal, or the great river which rolled before it. More accurately, the stuff of his best works was not the actuality but his memory of the scenes and of the life he had known in childhood and youth. Memory, somehow, had blurred away most sordid and unlovely details, leaving an idyll to be set forth in nostalgic fiction. The localized details and the longing for times past were completely typical of local color fiction.

Two skills in particular give Twain's best fiction, long or short, much of its distinction: ability to characterize and ability to use words in a masterly fashion. Other humorists in America before Twain had managed, at best, to create only a few memorable characters. Twain dotted his pages with them with a prodigality comparable to that of Chaucer or Dickens. And he had such descriptive skill, such a knack for portraying actions, such an accurate ear for speech that he could make both characters who appeared for a few lines and characters whose stories occupied many pages come alive for readers. As a stylist, also, he was outstanding. He took great pains with style; it is remarkable that a large share of his remarks about literature touch knowingly upon this aspect of writing. Some of his reasons for praising a sentence which he quotes are illuminating: "For compactness, simplicity, and vigor of expression, I will 'back' that sentence against any in literature." He praises a letter from his daughter Susan for "clearness of statement, directness, felicity of expression, photographic ability in setting forth an incident—style—good style—no barnacles on it in the way of unnecessary, retarding words." He came close to living up to the ideal implied by these comments. He wrote very much as he talked, transferring to the printed page the natural rhythms of unpretentious speech, both when he set down his own thoughts and when he quoted the words of characters. His words were simple; almost always they were distinctly American; and he used them economically. Perhaps even more important, without any appearance of being "literary," he was able to find words which gave full scope to his exuberant, poetic imagination. It makes some sense, therefore, to claim, as some critics do, that Mark Twain was the first great stylist who wrote purely in the American language.

VARIED TYPES of REALISM

Comic tall tales, by juxtaposing the workaday world with the world of fantasy, made fun of imaginative excesses, and even the most extravagant American humor was in some ways anti-romantic. Since funny character sketches drew many details directly from actuality, some of the humor led the way toward fiction which was concerned with ordinary characters and scenes. Local color writing, which had a similar concern, also departed to some extent from the romantic fiction of the ante-bellum period. Scholars, therefore, see in both humorous writing and local color writing a trend toward "realism" which culminated, toward the end of the century, in numerous realistic and naturalistic fictional works.

The term "realism," like its counterpart "romanticism," is a vague term which has been variously defined. The group pursuing it in this period differed in theory and practice. They generally agreed, probably, that realistic fiction truly presented "actuality"—"real life"—and that it was concerned with the near, rather than the distant, in time and place. Most realists, therefore, believed that the probability of happenings in novels might properly be tested, not by rules set up by the inventor of an imaginative world but by what was likely in the actions of living men and women. Alice might properly dwindle to a minute size in Wonderland, but not in a realistic novel, since there the laws of physics and of biology as well as the stern limitations of heredity and environment were constantly operative. So far there was agreement; but disagreement naturally arose when authors tried to define "actuality." Where was the "real" to be found—in the world itself, in the inductively discovered scientific truths about the nature of the world, in the impression which the world made upon the observer's mind, or in a combination of these? The methods of authors depended upon their answer to this question and upon their ability to portray what they considered to be reality.

Clemens clearly indicated how he thought art should portray actuality when, in a newspaper letter of 1867, he thus criticized a painting by Bierstadt: "Now, to sum up the picture's merits, those snow-peaks are correct—they look natural; the valley is correct and natural; the pine trees clinging to the bluff on the right, and the grove on the left, and the boulders, are all like nature. . . . But when I got around to the atmosphere, I was obliged to say 'This man has imported this atmosphere . . . from some foreign country, because nothing like it was ever seen in California.' " Steadfastly Twain believed that the artist in colors or in words did his work best when he was "true to nature," accurately and honestly recording what he saw. "There is nothing," he wrote in a personal letter of 1868, "that makes me prouder than to be regarded by intelligent people as 'authentic.' " So far as he could, therefore, he made his fiction an exact transcript of life. Only because his memory changed things, because his

notions of propriety changed things, and because he was something of a poet did he (to use his own terms) "import" the "atmosphere" in his best narratives.

William Dean Howells, Twain's close friend, had at the start of his career a similar conception of the task of the fictionist. Fiction, Howells also thought, should be lifelike. Moreover, it should concern itself only with the most ordinary facets of life. A passage in *Their Wedding Journey* (1872) concerning the people in a railway car suggests the attitude: "It was in all respects an ordinary carful of human beings, and it was perhaps the more worthy to be studied on that account. As in literature the true artist will shun the use even of real events if they are of an improbable character, so the sincere observer of man will not desire to look upon his heroic or occasional phases, but will seek him in his habitual moods of vacancy and tiresomeness. To me, at any rate, he is at such times very precious. . . ." Since he followed this formula, the literalness of Howells' transcripts in his early writings was significant. But he recognized certain limitations—limitations which kept his literalness from being complete. It is important to recall that he first glimpsed the possibilities of realism while reading the comedies of Carlo Goldoni and that he was extremely fond, all his life, of the witty novels of Jane Austen. Like these two writers, he tended to concern himself, at the start of his career, more with the comedies of human experience than with the tragedies. In addition, because he believed that American life, typically, was relatively pure, and because he held that, even if it were not, it was wrong for an American novelist "to deal with certain facts of life which are not usually talked of before young people, and especially young ladies," he rather prudishly limited his treatment of sex.

When Hamlin Garland met Howells in Cambridge, Massachusetts, in 1885, Garland had, so Howells said later, "convictions flatteringly like mine." As Garland made clear in *Crumbling Idols* (1894, p. 955), he believed in what a French critic had dubbed "veritism." The true artist, he held, "must consciously stand alone before nature and before life" and must sincerely set down "the drama of the average type of character." In two ways, however, he departed from the early Howells. In the first place, Garland was moderately frank in his consideration of sex. ("I am old-fashioned," wrote Howells of this tendency in 1912, "and I have moments when I could wish that the author had not been of such unsparing conscience.") In the second place, Garland, under the tutelage of a group of assorted nineteenth-century thinkers, acquired the belief that "to fiction is given the task of subtilely embodying the splendid creed" of improvement—social, moral, and philosophical. "It is safe to say," he prophesied in *Crumbling Idols,* "that the fiction of the future will grow more democratic in outlook and more individualistic in method. . . . The higher art would seem to be the art that perceives and states the relations of things, giving atmosphere and relative values as they appear to the sight." Hence, *Main-Travelled Roads* not only pictured some of the harsher aspects of Middlewestern farm life; it also crusaded against conditions and suggested remedies.

By the time this first collection of Garland's stories appeared, Howells, too, had come to believe that fiction should have an element—one of great importance—which had been lacking in his early fiction. His first encounter—at fifty—with Tolstoy's writings had, as Howells indicated in *My Literary Passions,* brought about a change in his thinking. "He," wrote Howells, "has been to me that final consciousness which he speaks of so easily in his essay on Life. I came in it to the knowledge of myself in ways that I had not dreamt before, and began at last to discern my relations to the race, without which we are nothing. The supreme art in literature had its highest effect in making me set art forever below humanity. . . ." What this meant was that Howells, in *Annie Kilburn* (1889), *A Hazard of New Fortunes* (1890), *The World of Chance* (1893), and his other mature novels became a novelist of social purpose—selecting characters not only because they were typical but also because their characteristics and their stories preached sermons about society and economics.

NATURALISM

Just as the line between some local color fiction and some realism is hard to draw, it is difficult to distinguish clearly and surely between realism and some "naturalism," another "ism" about which there was, in this period, a great deal of discussion. In general, the American naturalists—Crane, Norris, Dreiser, and others—took at least some of their cues from a group of authors, led by Emile

Zola (1840-1902), who were important in France after 1880. The characteristics of the French group have been admirably summarized by Professors Nitze and Dargan in their *History of French Literature*: "Naturalism . . . is an excessive form of Realism and is usually considered as possessing the following characteristics. First, it allows a still larger variety of subjects, emphasizing the lower and coarser forms of life; it presents this material in a form which is often revolting; it rejects ideality, it minimizes heart-interest and plot interest in favor of 'facts' and notations; it magnifies the study of the industries and seeks to apply to fiction the processes of the natural sciences; from these, taken in their application to heredity and environment, it draws its conception of life—deterministic, fatalistic, essentially pessimistic. The laws of brute Nature are viewed as grimly controlling the destinies of helpless and hopeless men." An interesting fact about this accurate description of a literary method is that it deals more with the philosophical views of novelists than with their fictional technique. The reason may well be that, for the naturalistic writers, "actuality" is located not merely in life itself but also in the philosophical interpretation of life. For Zola, art was nature, yes, but nature as it was interpreted by the artist. In a fashion comparable to that of the scientist, theoretically, the naturalist exposed his sensibility to life and then "scientifically" worked with characters and actions known through his experience. But the vast difference between the artist and the scientist whom he thought he was imitating was that the artist, unable really to prove his hypotheses in the laboratory, took them for granted and merely illustrated them from his experience.

American naturalists resembled their French prototypes in treating subjects barred even from realistic writings, in treating lower forms of life—thus differing from realists in their details. Also each American naturalist, on the basis of his own reading and his own thinking, created characters and plots illustrative of his own peculiar "scientific" convictions. Thus Dreiser, believing that men's actions were "chemical compulsions," pictured situations and happenings which made clear that characters had no control over their actions. Believing, further, that "the race was to the swift and the battle to the strong," he devised plots which showed weak characters conquered by ruthless and mighty opponents. Norris, excitedly perceiving both unconquerable forces of Nature and the relentless man-made power of the soulless railroad, devised in *The Octopus* a plot which showed Force at work: "Men were mere nothings, mere animalculae, mere ephemerides that fluttered and fell and were forgotten between dawn and dusk. . . . Men were nought, death was nought, life was nought. Force only existed—Force that brought men into the world—Force that crowded them out to make way for the succeeding generation—Force that made the wheat grow—Force that garnered it from the soil to give place to the succeeding crop." And Stephen Crane showed the hero of *The Red Badge of Courage* discovering naturalistic truths on the blood-drenched field of battle, or showed the correspondent in "The Open Boat" becoming aware of the complete indifference of Nature to puny men.

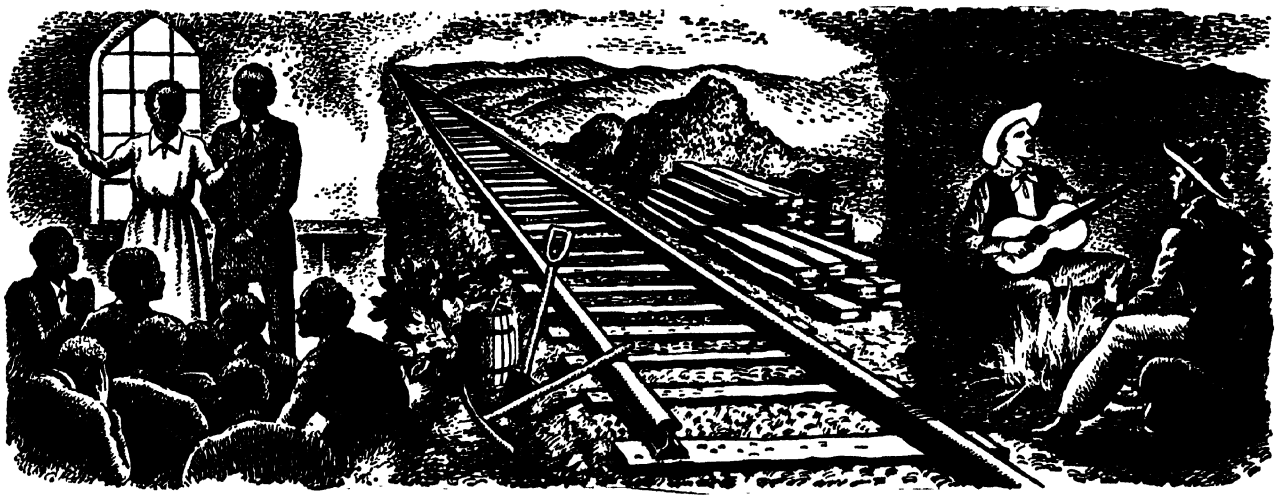
Dreiser, unlike some of the French naturalists, had a good deal of contempt for niceties of style. Not so Norris and Crane. Norris used a great deal of symbolism, some of it rather explicit—readers may feel a bit obvious. (The slaughter of the sheep, p. 975, is an example.) Crane, rather more subtle as a poet, was sometimes less labored in his handling of symbolism, but much of it came into his work—usually in the form of images seen through the eyes and interpreted by the minds of his characters. Such images both pictured and interpreted details. The correspondent in "The Open Boat," for instance, thus saw a wind-tower on the tantalizing beach: "This tower was a giant, standing with its back to the plight of the ants. It represented in a degree, to the correspondent, the serenity of nature amid the struggle of the individual—nature in the wind, and nature in the vision of men. She did not seem cruel to him then, nor beneficent, nor treacherous, nor wise. But she was indifferent, flatly indifferent." Touches similar to this were to give significance, later, to backgrounds and actions in the writing of such diverse authors as Willa Cather, Ernest Hemingway, and John Steinbeck.

HENRY JAMES

To Stephen Crane, probably the most intuitive artist of the period, thoughts and feelings of characters, then, were important. To Henry James, probably the most conscious artist, they were even more important. As his "The Art of Fiction" (p. 920) shows, James was a careful thinker

about the nature of reality, the nature of art, and the relationship between the two. His belief was that "reality," as a story presented it, was twice translated, once through the author's experiencing of it, again through the artistic representation of it. Both the initial impression and the execution were important.

For him a novel "in its broadest definition" was "a personal, a direct impression of life: that, to begin with, constitutes its value, which is greater or less according to the intensity of the impression." For a person with the kind of sensitivity needed in writing great fiction, he went on, "Experience is never limited, and it is never complete; it is an immense sensibility, a kind of huge spider-web of the finest silken threads suspended in the chamber of consciousness, and catching every air-borne particle in its tissue." Since "impressions were experience," James did not hesitate to advise the novice, "Try to be one of the people on whom nothing is lost!"



But having gained such a sensitive and complete impression of life, the artist, James contended, also had the problem of giving his fiction "that air of reality [solidity of specification]" which he felt was "the supreme virtue of the novel—the merit on which all its other merits . . . helplessly and submissively depend." James was aware throughout his career that to achieve this end through artistry was a highly complicated and delicate business. A brilliant series of Prefaces which he wrote, in his maturity, for the volumes of his collected works showed in detail how, during his artistic lifetime, he struggled with problems of form to give his writings exactly the intended "effects."

Such a conception of fiction clearly sets James off from those practitioners who believed that the best fiction was the exact reproduction of life as well as from those who believed that it was an embodiment of naturalistic generalizations about life. Since he saw reality—even generalizations about reality—as a series of impressions, and since he saw fiction as the artistic rendition of such impressions, his sort of realism was essentially a complicated psychological process. In his writings, more than in others, therefore, one sees the impact of the newer psychology in which Henry James' brother, William, was a leading authority. One sees, too, progress in the development of a technique which had been notably advanced even before James by George Eliot in England and Gustave Flaubert in France—the technique of making new psychological insights a vital part of fiction.

How James' notions led him to shape the form of a narrative is shown in some of their details in his 1907 Preface to *Roderick Hudson* (1876), wherein he told how that book had been written. After a "story idea" had come to him, the chief difficulty, he suggested, was to decide exactly how to limit "developments" so as to interrelate them. "Up to what point," he asked himself, "is such and such a development *indispensable* to interest? . . . When, for the complete expression of one's subject, does a particular relation stop—giving way to some other not concerned in that expression?" The complexity of experience made this problem difficult: "Really, universally, relations stop nowhere, and the exquisite problem of the artist is eternally but to draw, by a geometry of his own, the circle within which they shall happily *appear* to do so." Selection and arrangement therefore were absolutely necessary. He needed to hit upon exactly the right details of background he needed (though later he felt he had failed, in this particular book) to devise an adequate time scheme; he needed—and this was very important—to find a "centre, the point of command of all the rest." In this story, such a center was the impression of the whole action received by someone other than Hudson. "From this centre the subject has been treated, from this centre the interest has spread, and so, whatever else it may do or may not do, the thing has acknowledged a principle of composition and continues at least to hang together. . . . The centre of interest throughout. . . is Rowland Mallet's consciousness—which I had of course to make sufficiently acute to enable it, like a set and lighted scene, to hold the play." James believed that what Mallet saw, felt, or guessed could, if properly rendered, be made to give the story unity, movement, and meaning. Though James gave details about a number of additional procedures, this summary traces a main line of his typical thought about his artistry.

An author with such concerns obviously was bound to write narratives which differed greatly from those by most of James' contemporaries. James, naturally, was horrified by what he saw as the formlessness of many fictional works. He believed, as he said in "The Art of Fiction," that ". . . a novel is a living thing, all one and continuous, like any other organism, and in proportion as

lives it will be found, I think, that in each of the parts is ɔmething of the other parts." And he learned that quite ften his most useful step in achieving the selectivity and ıe arrangement necessary for such an organic entity was ıe location of the story in the mind of some character—a ɔnsciousness, like Rowland's, say, "connected intimately ·ith the general human exposure, and thereby bedimmed ıd befooled and bewildered, anxious, restless, fallible," ı short "not *too* acute," but endowed, nevertheless, "with ıch intelligence that the appearances reflected in it, and ɔnstituting together there the situation and the 'story,' should become by that fact intelligible." Thus the sensitive author had, in the story, a sensitive counterpart whose limitations and perceptions both bounded and filled in the pattern. Working in such a fashion, James became a leader in calling attention to the importance of the "fictional point of view"—to the values to be derived from letting a narrative unfold as it was experienced by some character. Psychology thus became of central importance in his fiction, and its hitherto unexploited potentialities for writers were suggested to a great number of authors who followed James. W. B.

The many ways of living in America between the Civil War and 1914 influenced various makers of folk songs. Groups had their own individual favorites, and they kept these anonymous creations alive by singing them again and again. Since the forms of these works were not frozen in print, what typically happens to folk songs happened to them: words or even lines were changed, and sometimes whole stanzas disappeared. Early settlers had brought to America a number of Scotch and English ballads which were still being sung and admired by their descendants. The American songs had many qualities of these older ballads: intriguing uses of incremental repetitions and refrains, dramatic ways of unfolding happenings, ways of leaping over some details and of presenting others with minute care.

Whittier, among the famous literary men, and four or five scholars were about the only Americans who paid much heed to these American songs until the 1860's. But in the period following the war, and in the twentieth century the growing interest of Americans in our social and literary history caused many literary men and scholars to become active as students of the folklore.

J. A. Lomax and Alan Lomax, **American Ballads and Folk Songs**, New York, 1934 • Louise Pound, **American Ballads and Songs**, New York, 1922 • Carl Sandburg, **The American Songbag**, New York, 1930 • F. H. Hubbard, **Railroad Avenue**, New York, 1945 • (In addition to these books, a number of recordings of folk songs will be of great value—those made by such singers as Burl Ives, Paul Robeson, Marian Anderson, Carl Sandburg, and John Jacob Niles, as well as the recordings of nonprofessional folk singers issued by the Archive of American Folk Song of the Library of Congress)

Spirituals

The Negroes were the makers of the spirituals—religious songs which, as a rule, translated Biblical tales or Christian sentiments into the idiom of the race. Details about the origins of the songs are not known, but two things seem likely: that the camp meetings of Southern whites in pre-Civil War days suggested both words and ways of singing, and that both the sense of rhythm and the racial experiences of the Negroes molded the songs. Unable to express their feelings directly, the Negroes often interpreted their own experiences in Biblical stories and lyrics.

"Go Down, Moses," for example—used as Harriet Tubman's signal of safety as she, a former slave, helped many other Negroes escape to freedom—translated the bondage of Israel into a parallel of their own enslavement. Hundreds of spirituals were composed, and most of them have noble themes simply and sincerely developed and fitted to moving tunes. Even more than other folk songs, these must be heard to be appreciated.

Go Down, Moses

When Israel was in Egypt's land,
Let my people go!
Oppress'd so hard dey could not stand,
Let my people go!

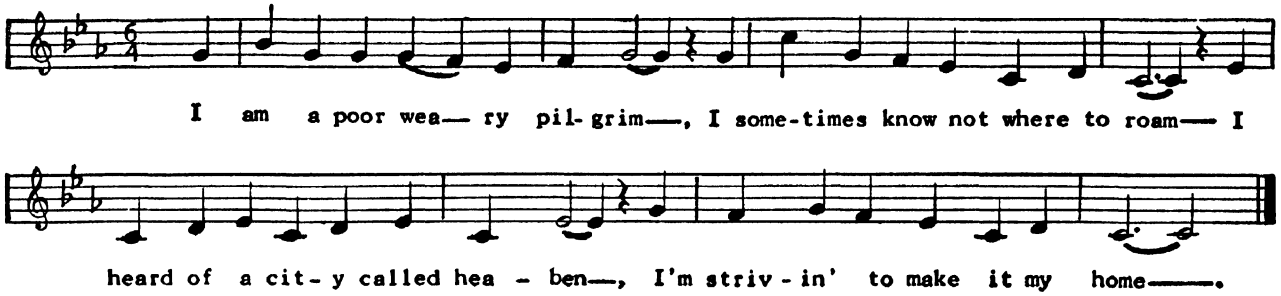
Chorus

Go down, Moses,
Way down in Egypt's land.
Tell ole Pha-roah,
Let my people go!

Thus say de Lawd, bold Moses said,
Let my people go!
If not I'll smite your first-born dead,
Let my people go!

No more shall dey in bondage toil,
Let my people go!
Let dem come out wid Egypt's spoil,
Let my people go!

Lay Dis Body Down



I know moon-rise, I know star-rise,
Lay dis body down;
I walk in de moonlight, I walk in de starlight,
To lay dis body down.

I walk in de graveyard, I walk troo de graveyard,
To lay dis body down.

I'll lie in de grass and stretch out my arms—
Lay dis body down.

I go to de judgment in de evenin' of de day,
When I lay dis body down;
And my soul and your soul will meet in de day
When I lay dis body down.

Poor Pilgrim

I am a poor weary pilgrim,
    I sometimes know not where to roam—
I heard of a city called heaben,
    I'm strivin' to make it my home.

Sometimes I'm both tossed and driven,
    I sometimes know not where to roam,
I heard of a city called heaben,
    I'm strivin' to make it my home.

My friends and relations forsake me,
    And troubles roll round me so high,
I thought ob de kind voice of Jesus
    Sayin' "Poor pilgrim, I'm always nigh."

Joshua Fit de Battle ob Jerico

Joshua fit de battle ob Jerico—Jerico—Jerico—
Joshua fit de battle ob Jerico,
And de walls came a-tumblin' down.

"Good mornin', Brudder Pilgrim,
Pray tell me where you boun';
O tell me where you travelin' to
'Cause dis enchanted groun'."

"My name it is Poor Pilgrim,
To Canaan I am boun';
Travelin' through dis wilderness
'Cause dis enchanted groun'."

You may talk about yo' King ob Gideon,
You may talk about yo' man ob Saul,
Dere's none like good ole Joshua,
At de battle ob Jerico.

Up to de walls ob Jerico
He marched wid spear in han',
"Go blow dem ram horns," Joshua cried,
"Kase de battle am in my han'."

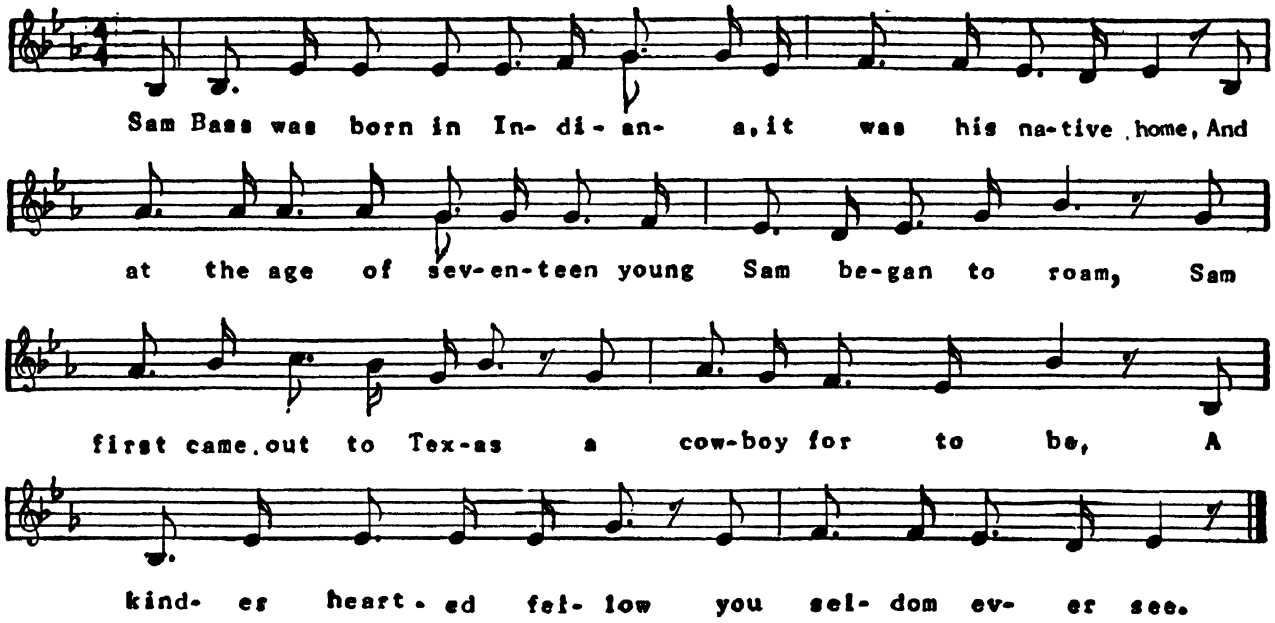
Den de lam' ram sheep-horns begin to blow,
Trumpets begin to soun',
Joshua commanded de chillun to shout,
An' de walls came a-tumblin' down.

Dat mornin'—
Joshua fit de battle ob Jerico—Jerico—Jerico,
Joshua fit de battle ob Jerico,
An' de walls came a-tumblin' down.

Nobody Knows de Trouble I've Seen

Nobody knows de trouble I've seen;
Nobody knows but Jesus.
Nobody knows de trouble I've seen;
Oh yes, Lord.

Sometimes I'm up, sometimes I'm down;
Oh yes, Lord.
Sometimes I'm almost to de groun';
Oh yes, Lord.



Although you see me gettin' 'long so,
Oh, yes, Lord.
I got my troubles here below—
Oh yes, Lord.

Nobody knows de trouble I've seen;
Nobody knows but Jesus.
Nobody knows de trouble I've seen;
Oh yes, Lord.

Cowboy Songs

Rich in ballad lore, the cowboys of the plains in some of their songs told of the work of the cowboy—caring for cattle in the wintertime, rounding them up in the spring, driving them up the trail to market. Many songs were used for practical purposes, to stir up the cattle or to quiet them when they were nervous at night. Others told stories of adventures or of love affairs, and the old stuff of balladry took on new coloring because of the way men lived in the cow country. Since many of the cowhands came from the Southern uplands, where old British ballads were preserved by singing, many cowboy tunes are reminiscent of the older ones. But since Americans had developed tunes of a different sort, several mutations—modifications of the older tunes—were frequent. "Oh Bury Me Not on the Lone Prairie" offers an example of such a modified old melody, in this case a parody of a sentimental ballad entitled "The Ocean Burial." The simple guitar accompaniment to many of these songs accentuates the distinctive rhythm of cowboy ballads.

Of the songs that follow, "Whoopee Ti Yi Yo" tells of the spring roundup; "Good-by, Old Paint" is addressed to a good pony; "The Old Chisholm Trail" recounts the hardships of a drive up the trail; "Sam Bass" unfolds the history of a Western bad man; and "Blood on the Saddle" tells of the gory death of a cowboy killed when a bronco rolled on him in a rodeo.

Sam Bass was born in Indiana, it was his native home,
And at the age of seventeen young Sam began to roam,
Sam first came out to Texas a cowboy for to be,—
A kinder-hearted fellow you seldom ever see.

Sam used to deal in race stock, one called the Denton mare,
He matched her in scrub races, and took her to the fair.
Sam used to coin the money and spent it just as free,
He always drank good whiskey wherever he might be.

Sam left the Collins ranch in the merry month of May
With a herd of Texas cattle the Black Hills for to see,
Sold out in Custer City and then got on a spree,—
A harder set of cowboys you seldom ever see.

On their way back to Texas they robbed the U.P. train,
And then split up in couples and started out again.
Joe Collins and his partner were overtaken soon,
With all their hard-earned money they had to meet their doom.

Sam made it back to Texas all right side up with care;
Rode into the town of Denton with all his friends to share.
Sam's life was short in Texas; three robberies did he do,
He robbed all the passenger, mail, and express cars too.

Sam had four companions—four bold and daring lads—
They were Richardson, Jackson, Joe Collins, and Old Dad;
Four more bold and daring cowboys the rangers never knew,
They whipped the Texas rangers and ran the boys in blue.

Sam had another companion, called Arkansas for short,
Was shot by a Texas ranger by the name of Thomas Floyd;
Oh, Tom is a big six-footer and thinks he's mighty fly,
But I can tell you his racket,—he's a deadbeat on the sly.

Jim Murphy was arrested, and then released on bail;
He jumped his bond at Tyler and took the train for Terrell;

But Mayor Jones had posted Jim and that was all a stall,
'Twas only a plan to capture Sam before the coming fall.

Sam met his fate at Round Rock, July the twenty-first,
They pierced poor Sam with rifle balls and then emptied his purse.
Poor Sam he is a corpse and six foot under clay,
And Jackson's in the bushes trying to get away.

Jim had borrowed Sam's good gold and didn't want to pay,
The only shot he saw was to give poor Sam away.
He sold out Sam and Barnes and left their friends to mourn,—
Oh, what a scorching Jim will get when Gabriel blows his horn.

And so he sold out Sam and Barnes and left their friends to mourn,
Oh, what a scorching Jim will get when Gabriel blows his horn.
Perhaps he's got to heaven, there's none of us can say,
But if I'm right in my surmise he's gone the other way.

Good-by, Old Paint

My foot in the stirrup, my pony won't stan',
Good-by, old Paint, I'm a-leavin' Cheyenne.
I'm a-leavin' Cheyenne, I'm off for Montan';
Good-by, old Paint, I'm a-leavin' Cheyenne.

I'm a-ridin' old Paint, I'm a-leadin' old Dan;
Good-by, old Paint, I'm a-leavin' Cheyenne.
With my feet in the stirrups, my bridle in my hand;
Good-by, old Paint, I'm a-leavin' Cheyenne.

Old Paint's a good pony, he paces when he can;
Good-by, little Annie, I'm off for Cheyenne.
Oh, hitch up your horses and feed 'em some hay,
And seat yourself by me as long as you stay.

My hosses ain't hungry, they won't eat your hay;
My wagon is loaded and rollin' away.
I'm a-ridin', old Paint, I'm a-leadin' old Dan,
I'm a-goin' to Montan' to throw the hoolihan.

They feed in the coulees, they water in the draw,
Their tails are all matted, their backs are all raw.
Old Bill Jones had two daughters and a song;
One went to Denver, the other went wrong.

Good-by, Old Paint • 2 Paint is a corruption of pinto, meaning a piebald or mottled pony • 16 throw the hoolihan, to knock a steer down by leaping on his horns

His wife died in a pool-room fight,
And still he sings from morning till night.
I'm a rambler and a gambler and far from my home,
And those that don't like me can leave me alone.

Oh, whiskey and beer, they are nothing to me,
They killed my old Dad, now they can try me.
I'll tell you the truth, not lyin' or jokin',
I'd rather be in jail than to be heart-broken.

Oh, when I die take my saddle from the wall,
Put it on my pony, lead him from the stall,
Tie my bones to his back, turn our faces to the west,
And we'll ride the prairie that we love the best.

Whoopee Ti Yi Yo, Git Along, Little Dogies

As I was a-walking one morning for pleasure,
I spied a cow-puncher a-riding along;
His hat was throwed back and his spurs were a-jinglin',
As he approached me a-singin' this song:

Chorus

Whoopee ti yi yo, git along, little dogies,
It's your misfortune and none of my own;
Whoopee ti yi yo, git along, little dogies,
For you know Wyoming will be your new home.

Early in the springtime we'll round up the dogies,
Slap on their brands, and bob off their tails;
Round up our horses, load up the chuck wagon,
Then throw those dogies upon the trail.

It's whooping and yelling and driving the dogies,
Oh, how I wish you would go on;
It's whooping and punching and go on, little dogies,
For you know Wyoming will be your new home.

Some of the boys goes up the trail for pleasure,
But that's where they git it most awfully wrong;
For you haven't any idea the trouble they give us
When we go driving them dogies along.

When the night comes on and we hold them on the bed-ground,
These little dogies that roll on so slow;
Roll up the herd and cut out the strays,
And roll the little dogies that never rolled before.

Your mother she was raised way down in Texas,
Where the jimson weed and sand-burrs grow;
Now we'll fill you up on prickly pear and cholla
Till you are ready for the trail to Idaho.

Oh, you'll be soup for Uncle Sam's Injuns;
"It's beef, heap beef," I hear them cry.
Git along, git along, git along, little dogies,
You're going to be beef steers by and by.

The Old Chisholm Trail

Come along, boys, and listen to my tale,
I'll tell you of my troubles on the old Chisholm trail.

Chorus

Come ti yi youpy, youpy yea, youpy yea,
Coma ti yi youpy, youpy yea.

I started up the trail October twenty-third,
I started up the trail with the 2-U herd.

Oh, a ten-dollar hoss and a forty-dollar saddle,
And I'm goin' to punchin' Texas cattle.

I woke up one morning on the old Chisholm trail,
Rope in my hand and a cow by the tail.

I'm up in the mornin' afore daylight
And afore I sleep the moon shines bright.

My hoss throwed me off at the creek called Mud,
My hoss throwed me off round the 2-U herd.

Last time I saw him he was going 'cross the level
A-kicking up his heels and a-running like the devil.

It's cloudy in the west, a-looking like rain,
And my damned old slicker's in the wagon again.

No chaps, no slicker, and it's pouring down rain,
And I swear, by God, I'll never night-herd again.

Last night I was on guard and the leader broke the ranks,
I hit my horse down the shoulders and I spurred him in the flanks.

The wind commenced to blow, and the rain began to fall,
Hit looked, by grab, like we was goin' to lose 'em all.

My slicker's in the wagon and I'm gittin' mighty cold,
And these longhorn sons-o'-guns are gittin' hard to hold.

Saddle up, boys, and saddle up well,
For I think these cattle have scattered to hell.

With my blanket and my gun and my rawhide rope,
I'm a-slidin' down the trail in a long, keen lope.

I don't give a damn if they never do stop;
I'll ride as long as an eight-day clock.

We rounded 'em up and put 'em on the cars,
And that was the last of the old Two Bars.

Oh, it's bacon and beans most every day—
I'd as soon be a-eatin' prairie hay.

I went to the boss to draw my roll,
He had it figgered out I was nine dollars in the hole.

I'll sell my outfit just as soon as I can,
I won't punch cattle for no damned man.

With my knees in the saddle and my seat in the sky,
I'll quit punching cows in the sweet by-and-by.

Fare you well, old trail-boss, I don't wish you any harm,
I'm quittin' this business to go on the farm.

Blood on the Saddle

There was bul-lud on the saddle—
And bul-lud all araound,
An' a great big puddle
Of bul-lud on the graound.

Oh, a cowboy lay in it,
All covered with gore,
An' he never will ride on
Any broncos no more.

Oh, pity the cowboy,
All bul-luddy and red;
Oh, a bronco fell on him,
An' mashed in his head.

There was bul-lud on the saddle—
And bul-lud all araound,
An' a great big puddle
Of bul-lud on the graound.

1 **bul-lud,** the lingering pronunciation of "blood." The ballad mocks the distressing but widespread habit of savoring sanguinary details in an accident

On the Railroad

For city and country people alike, in the days before widespread automobile travel, the railroads were routes to adventure, lines of communication with the rest of the world. In a small town the most exciting daily event was the arrival of the limited. Among the people along the tracks there was much railroad lore, and naturally the hobos, the construction gangs, and the roundhouse workers had their own songs. In **American Ballads and**

Folk Songs, edited by John A. Lomax and Alan Lomax, the section called "Working on the Railroad" included seventeen such songs. Some of these are "Steel Laying Holler," "Tie Tamping Chant," and "The Wreck of the C. & O." The first song given here celebrates a mythically strong Negro steel-driving man, and "Casey Jones" tells the story of an engineer who was brave but had a fickle helpmate.

John Henry

John Henry was a li'l baby, uh-huh,
Sittin' on his mama's knee, oh, yeah,
Said: "De Big Bend Tunnel on de C. & O. road
Gonna cause de death of me,
Lawd, Lawd, gonna cause de death of me."

John Henry, he had a woman,
Her name was Mary Magdalene,
She would go to de tunnel and sing for John,
Jes' to hear John Henry's hammer ring,
Lawd, Lawd, jes' to hear John Henry's hammer ring.

John Henry had a li'l woman,
Her name was Lucy Ann,
John Henry took sick an' had to go to bed,
Lucy Ann drove steel like a man,
Lawd, Lawd, Lucy Ann drove steel like a man.

Cap'n says to John Henry,
"Gonna bring me a steam drill 'round,
Gonna take dat steam drill out on de job,
Gonna whop dat steel on down,
Lawd, Lawd, gonna whop dat steel on down."

John Henry tol' his cap'n,
Lightnin' was in his eye:
"Cap'n, bet yo' las' red cent on me,
Fo' I'll beat it to de bottom or I'll die,
Lawd, Lawd, I'll beat it to de bottom or I'll die."

Sun shine hot an' burnin',
Wer'n't no breeze a-tall,
Sweat ran down like water down a hill,
Dat day John Henry let his hammer fall,
Lawd, Lawd, dat day John Henry let his hammer fall.

John Henry went to de tunnel,
An' dey put him in de lead to drive;
De rock so tall an' John Henry so small,
Dat he lied down his hammer an' he cried,
Lawd, Lawd, dat he lied down his hammer an' he cried.

John Henry started on de right hand,
De steam drill started on de lef'—
"Before I'd let dis steam drill beat me down,
I'd hammer my fool self to death,
Lawd, Lawd, I'd hammer my fool self to death."

White man tol' John Henry,
"Nigger, damn yo' soul,
You might beat dis steam an' drill of mine,
When de rocks in dis mountain turn to gol',
Lawd, Lawd, when de rocks in dis mountain turn to gol'."

John Henry said to his shaker,
"Nigger, why don' you sing?
I'm throwin' twelve poun's from my hips on down,
Jes' listen to de col' steel ring,
Lawd, Lawd, jes' listen to de col' steel ring."

Oh, de captain said to John Henry,
"I b'lieve this mountain's sinkin' in."
John Henry said to his captain, oh my!
"Ain' nothin' but my hammer suckin' win',
Lawd, Lawd, ain' nothin' but my hammer suckin' win'."

John Henry tol' his shaker,
"Shaker, you better pray,

3 **Big Bend Tunnel,** the largest tunnel on the Chesapeake and Ohio Railroad, constructed in West Virginia, 1870-1873 • 46 **shaker,** drill holder

For, if I miss dis six-foot steel,
Tomorrow'll be yo' buryin' day,
Lawd, Lawd, tomorrow'll be yo' buryin' day."

John Henry tol' his captain,
"Looka yonder what I see—
Yo' drill's done broke an' yo' hole's done choke,
An' you cain' drive steel like me,
Lawd, Lawd, an' you cain' drive steel like me."

De man dat invented de steam drill,
Thought he was mighty fine.
John Henry drove his fifteen feet,
An' de steam drill only made nine,
Lawd, Lawd, an' de steam drill only made nine.

De hammer dat John Henry swung,
It weighed over nine pound;
He broke a rib in his lef'-han' side,
An' his intrels fell on de groun',
Lawd, Lawd, an' his intrels fell on de groun'.

John Henry was hammerin' on de mountain,
An' his hammer was strikin' fire,
He drove so hard till he broke his pore heart,
An' he lied down his hammer an' he died,
Lawd, Lawd, he lied down his hammer an' he died.

All de womens in de Wes',
When dey heared of John Henry's death,
Stood in de rain, flagged de eas'-boun' train,
Goin' where John Henry fell dead,
Lawd, Lawd, goin' where John Henry fell dead.

John Henry's lil mother,
She was all dressed in red,
She jumped in bed, covered up her head,
Said she didn' know her son was dead,
Lawd, Lawd, didn' know her son was dead.

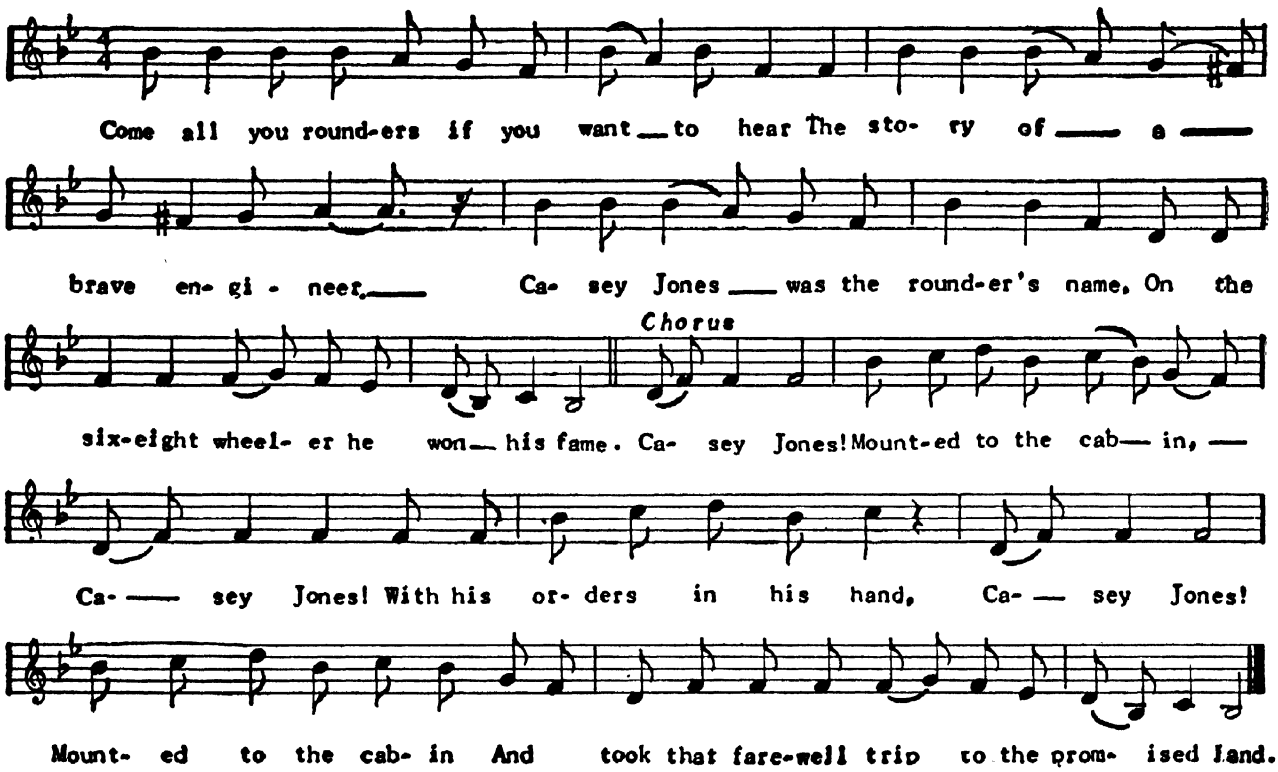
John Henry had a pretty lil woman,
An' de dress she wo' was blue,
An' de las' words she said to him:
"John Henry, I've been true to you,
Lawd, Lawd, John Henry, I've been true to you."

"Oh, who's gonna shoe yo' lil feetses,
An' who's gonna glub yo' han's,
An' who's gonna kiss yo' rosy, rosy lips,
An' who's gonna be yo' man,
Lawd, Lawd, an' who's gonna be yo' man?"

"Oh, my mama's gonna shoe my lil feetses,
An' my papa's gonna glub my lil han's,
An' my sister's gonna kiss my rosy, rosy lips,
An' I don' need no man,
Lawd, Lawd, an' I don' need no man."

Dey took John Henry to de graveyard,
An' dey buried him in de san',
An' every locomotive come roarin' by,
Says, "Dere lays a steel-drivin' man,
Lawd, Lawd, dere lays a steel-drivin' man."

Casey Jones



Come all you rounders if you want to hear
The story of a brave engineer.
Casey Jones was the rounder's name,
On the six-eight wheeler he won his fame.

The caller called Casey at half-past four;
He kissed his wife at the station door;
He mounted to the cabin with his orders in his hand,
And took a farewell trip to that promised land.

Chorus

Casey Jones! Mounted to the cabin,
Casey Jones! With his orders in his hand,
Casey Jones! Mounted to the cabin
And took that farewell trip to the promised land.

"Put in your water and shovel in your coal;
Put your head out the window, watch them drivers roll.
I'll run her till she leaves the rail,
'Cause I'm eight hours late with that western mail."

He looked at his watch and his watch was slow;
He looked at the water and the water was low;
He turned to the fireman and then he said,
"We're going to reach Frisco, if we'll all be dead."

Chorus

Casey Jones! Going to reach Frisco,
Casey Jones! If we'll all be dead.
Casey Jones! Going to reach Frisco,
We're going to reach Frisco, but we'll all be dead.

Casey pulled up that Reno hill,
He tooted for the crossing; it was awful shrill.
The switchman knew by the engine's moans
That the man at the throttle was Casey Jones.

He pulled up within two miles of the place;
Number Four stared him right in the face;
Turned to the fireman, said, "Boy, you'd better jump,
'Cause there's two locomotives that's going to bump."

Chorus

Casey Jones! Two locomotives!
Casey Jones! That's a-going to bump!
Casey Jones! Two locomotives!
There's two locomotives that's a-going to bump.

Casey mumbled just before he died,
"There's two more railroads that I'd like to ride."
Fireman said, "What can they be?"
"The Southern Pacific and the Santa Fe."

Mrs. Jones sat on her bed a-sighing,
Just received a message that poor Casey was dying,
Said, "Go to bed, children, and hush your crying,
'Cause you got another papa on the Salt Lake Line."

Chorus

Mrs. Casey Jones! Got another papa!
Mrs. Casey Jones! On the Salt Lake Line!
Mrs. Casey Jones! Got another papa!
You've got another papa on the Salt Lake Line.

Hallelujah, I'm a Hobo

The hobos of the United States have contributed to American folk music several fine songs, ranging from the carefree "Hallelujah, Bum Again" and "We Are Four Bums" to the rather wistful "Wanderin'." Some of these songs were set to modifications of popular tunes and ballads. Others were mockingly sung to the music of the revival hymns which the hobos heard in mission shelters. Among these were "Hallelujah, Bum Again," which employs the tune of "Hallelujah, Thine the Glory," and "Pie in the Sky," which is based on "In the Sweet Bye and Bye."

In "The Big Rock Candy Mountain," an imaginative singer describes his vision of a far-off land where fine weather, abundant food and drink, and an absence of policemen combine to make a hobo's paradise.

The Big Rock Candy Mountain

One ev'ning as the sun went down
And the jungle fire was burning,
Down the track came a hobo, humming,
And he said, "Boys, I'm not turning.
I'm headed for a land that's far away,
Beside the crystal fountain.
I'll see you all this coming fall
On the Big Rock Candy Mountain."

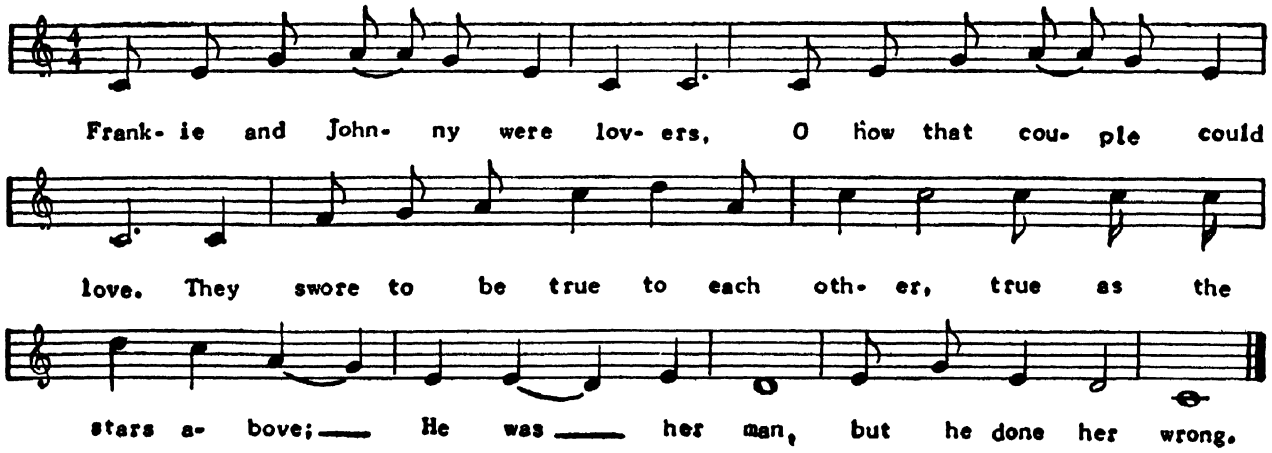
Chorus

In the Big Rock Candy Mountain,
There's a land that's fair and bright,
Where the handouts grow on bushes
And you sleep out ev'ry night,
Where the boxcars all are empty
And the sun shines ev'ry day—
Oh, the birds and the bees and the cigaret trees,
The rock-and-rye springs where the whangdoodle sings,
On the Big Rock Candy Mountain.

On the Big Rock Candy Mountain,
All the cops have wooden legs,
And the bulldogs all have rubber teeth,
And the hens lay softboiled eggs.
The farmers' trees are full of fruit,
And the barns are full of hay.
Oh, I'm bound to go where there ain't no snow,
Where the sleet don't fall and the wind don't blow,
On the Big Rock Candy Mountain.

On the Big Rock Candy Mountain,
You never change your socks,
And the little streams of alkyhol
Come trickling down the rocks.
The shacks all have to tip their hats
And the railroad bulls are blind,
There's a lake of stew and of whisky, too,
You can paddle all around in a big canoe,
On the Big Rock Candy Mountain.

On the Big Rock Candy Mountain,
The jails are made of tin,
And you can bust right out again
As soon as they put you in.
There ain't no shorthandled shovels,
No axes, saws or picks—
I'm a-going to stay where you sleep all day—
Oh, they boiled in oil the inventor of toil
On the Big Rock Candy Mountain.



Oh, come with me, and we'll go see
The Big Rock Candy Mountain.

In the Slums

Like many such songs, this one is sung in many versions and has an origin about which there is much dispute. One authority claims that the song originated as early as 1840, and another places it in 1850. In 1942, however, a Mrs. Frankie Baker claimed during the course of a suit that she was the original Frankie and that the incident upon which the song was founded had taken place in 1900. In spite of her claim, Mrs. Baker lost the suit when various scholars testified that "Frankie and Johnny" certainly had been sung before the end of the nineteenth century.

Regardless of its origin, this ballad about a tragedy in the Negro slums of St. Louis, by what it takes for granted and by what it casually mentions, reveals a notion of etiquette, a concept of elegance, and a moral code which represent a way of life. Note, for instance, Frankie's pious grief for the man she has murdered. The variations in the refrain are admirable examples of an old artistic device of the folk song.

Frankie and Johnny

Frankie and Johnny were lovers, O, how that couple could love.
Swore to be true to each other, true as the stars above.
He was her man, but he done her wrong.

Frankie she was his woman, everybody knows.
She spent one hundred dollars for a suit of Johnny's clothes.
He was her man, but he done her wrong.

Frankie and Johnny went walking, Johnny in his bran' new suit,
"O good Lawd," says Frankie, "but don't my Johnny look cute?"
He was her man, but he done her wrong.

Frankie went down to Memphis; she went on the evening train.
She paid one hundred dollars for Johnny a watch and chain.
He was her man, but he done her wrong.

Frankie went down to the corner, to buy a glass of beer;
She says to the fat bartender, "Has my loving man been here?
He was my man, but he done me wrong."

"Ain't going to tell you no story, ain't going to tell you no lie,
I seen your man 'bout an hour ago with a girl named Alice Fry.
If he's your man, he's doing you wrong."

Frankie went back to the hotel, she didn't go there for fun,
Under her long red kimono she toted a forty-four gun.
He was her man, but he done her wrong.

Frankie went down to the hotel, looked in the window so high,
There was her lovin' Johnny a-lovin' up Alice Fry;
He was her man, but he done her wrong.

Frankie threw back her kimono; took out the old forty-four;
Roota-toot-toot, three times she shot, right through that hotel door.
She shot her man, 'cause he done her wrong.

Johnny grabbed off his Stetson. "O good Lawd, Frankie, don't shoot."
But Frankie put her finger on the trigger, and the gun went roota-toot-toot.
He was her man, but she shot him down.

"Roll me over easy, roll me over slow,
Roll me over easy, boys, 'cause my wounds are hurting me so,
I was her man, but I done her wrong."

With the first shot Johnny staggered; with the second shot he fell;
When the third bullet hit him, there was a new man's face in hell.
He was her man, but he done her wrong.

Frankie heard a rumbling away down under the ground.
Maybe it was Johnny where she had shot him down.
He was her man, and she done him wrong.

"Oh, bring on your rubber-tired hearses, bring on your rubber-tired hacks,
They're takin' my Johnny to the buryin' groun' but they'll never bring him back.
He was my man, but he done me wrong."

The judge he said to the jury, "It's plain as plain can be.
This woman shot her man, so it's murder in the second degree.
He was her man, though he done her wrong."

Now it wasn't murder in the second degree, it wasn't murder in the third.
Frankie simply dropped her man, like a hunter drops a bird.
He was her man, but he done her wrong.

"Oh, put me in that dungeon. Oh, put me in that cell.
Put me where the northeast wind blows from the southeast corner of hell.
I shot my man 'cause he done me wrong."

Frankie walked up to the scaffold, as calm as a girl could be,
She turned her eyes to heaven and said, "Good Lord, I'm coming to thee.
He was my man, and I done him wrong."

Homesteadin'

According to a Nebraskan, the following song was an adaptation by Emery Miller of a popular song—"The Little Old Log Cabin in the Lane"—written by one Will S. Hays. Miller was a Nebraska settler of the 1880's. "Early settlers," writes Carl Sandburg, "noticed log cabins were scarcer as timber land thinned out going further west. On the windy, open prairies of the Great Plains, the best house to be had on short order was of sod. A cellar was dug first; long slices of turf were piled around the cellar lines; wooden crosspoles held the sod roof." This song is typical of several which jocosely and lugubriously lament the hardships of pioneer life. It is still current.

The Little Old Sod Shanty on the Claim

I am looking rather seedy now while holding down my claim,
And my victuals are not always of the best;
And the mice play shyly round me as I nestle down to rest,
In my little old sod shanty in the West.
Yet I rather like the novelty of living in this way,
Though my bill of fare is always rather tame,
But I'm happy as a clam on the land of Uncle Sam,
In my little old sod shanty on my claim.

Chorus

The hinges are of leather and the windows have no glass,
While the board roof lets the howling blizzards in,
And I hear the hungry kiyote as he slinks up through the grass,
Round my little old sod shanty on my claim.

O when I left my eastern home, a bachelor so gay,
To try and win my way to wealth and fame,
I little thought that I'd come down to burning twisted hay
In the little old sod shanty on my claim.
My clothes are plastered o'er with dough, I'm looking like a fright,
And everything is scattered round the room,
But I wouldn't give the freedom that I have out in the West
For the table of the Eastern man's old home.

Still I wish that some kind-hearted girl would pity on me take,
And relieve me from the mess that I am in;
The angel, how I'd bless her if this her home she'd make
In the little old sod shanty on my claim.
And we would make our fortunes on the prairies of the West,
Just as happy as two lovers we'd remain;
We'd forget the trials and troubles we endured at the first,
In the little old sod shanty on our claim.

And if kindly fate should bless us with now and then an heir,
To cheer our hearts with honest pride of fame,
O then we'd be contented for the toil that we had spent
In the little old sod shanty on our claim.
When time enough had lapsed and all of those little brats
To noble man- and womanhood had grown,
It wouldn't seem half so lonely as around us we should look,
And see the little old sod shanty on our claim.

David Crockett

1786 • 1836

In the days when Tennessee was still part of the Far West, David Crockett was born and reared in a Tennessee frontier log cabin. His schooling was meager, totaling altogether about one hundred days; but his lack of book learning did not keep him from becoming, in time, a United States congressman and a hero of the folk. Davy won followers in the period of coonskin democracy because, as a hunter, an Indian fighter, and a commoner who relied on good horse sense, he had abilities and ways particularly admired by his neighbors. His motto—"Be sure you're right, and then go ahead"—caught in a few words the spirit of the times.

Davy learned to farm and to hunt in boyhood. After fighting in the Creek War under Jackson (1813-1814), he was twice elected to the state legislature (1821-1823) and twice to Congress (1827-1831, 1833-1835). Newspapers of the day made much of his rough, homespun humor, and books about him—some by others, some by Davy himself—swelled his fame. When a Western critic read Crockett's autobiography, *Narrative of the Life of David Crockett of West Tennessee* (1834), he noticed that "the events are such . . . as we have seen acted over and over, and heard repeatedly recited by the firesides of our hardy backwoodsmen." The comment suggests Crockett's importance in literary history. His accounts did much to bring in the fireside yarn, with its authentic rendering of Western ways of living, thinking, talking, and narrating, as an eventual literary influence upon authors such as Harte (p. 810) and Clemens (p. 846).

Furthermore, during Crockett's lifetime, and particularly after his heroic death in the Alamo in 1836, tall tales about him circulated in yarnspinning sessions and in print. He was pictured in such tales as a comic demigod, doing superhuman deeds imagined by exuberant storytellers. These tales combined imagination of the sort one finds in poetry with enough robust humor to make them palatable to ordinary men. They are related to the earlier whoppers of the frontiersmen, the later yarns of Mark Twain, and the present-day fantastic moving pictures of Walt Disney.

An Autobiography of Davy Crockett (containing Crockett's Narrative, A Tour of the North and Down East, 1834, and most of Colonel Crockett's Exploits and Adventures in Texas, 1836), ed. Hamlin Garland, New York, 1923 • Davy Crockett: American Comic Legend, ed. R. M. Dorson, New York, 1939 • Constance Rourke, Davy Crockett, New York, 1934

Bear Hunting

In the morning I left my son at the camp, and we started on towards the harricane; and when we had went about a mile, we started a very large bear, but we got along mighty slow on account of the cracks in the earth occasioned by the earthquakes. We, however, made out to keep in hearing of the dogs for about three miles, and then we come to the harricane. Here we had to quit our horses, as old Nick himself couldn't have got through it without sneaking it along in the form that he put on, to make a fool of our old grandmother Eve. By this time several of my dogs had got tired and come back; but we went ahead on foot for some little time in the harricane, when we met a bear coming straight to us, and not more than twenty or thirty yards off. I started my tired dogs after him, and McDaniel pursued them, and I went on to where my other dogs were. I had seen the track of the bear they were after, and I knowed he was a screamer. I followed on to about the middle of the harricane, but my dogs pursued him so close, that they made him climb an old stump about twenty feet high. I got in shooting distance of him and fired, but I was all over in such a flutter from fatigue and running, that I couldn't hold steady; but, however, I broke his shoulder, and he fell. I run up and loaded my gun as quick as possible, and shot him again and killed him. When I went to take out my knife to butcher him, I found I had lost it in coming through the harricane. The vines and briers was so thick that I would sometimes have to get down and crawl like a varment to get through at all; and a vine had, as I supposed, caught in the handle and pulled it out. While I was standing and studying what to do, my friend came to me. He had followed my trail through the harricane, and had found my knife, which was mighty good news to me; as a hunter hates the worst in the world to lose a good dog, or any part of his hunting-tools. I now left McDaniel to butcher the bear, and I went after our horses, and brought them as near as the nature of case would allow. I then took our bags, and went back to where he was; and when we had skin'd the bear, we fleeced off the fat and carried it to our horses at several loads. We then packed it up on our horses, and had a heavy pack of it on each one. We now started and went on till about sunset, when I concluded we must be near our camp; so I hollered and my son answered me, and we moved on in the direction to the camp. We had gone but a little way when I heard my dogs make a warm start again; and I jumped down from my horse and gave him up to my friend, and told him I would follow them. He went on to the camp, and I went ahead after my dogs with all my might for a considerable distance, till at last night came on. The woods were very rough and hilly, and all covered over with cane.

I now was compel'd to move on more slowly; and was frequently falling over logs, and into the cracks made by the earthquakes, so that I was very much afraid I would break my gun. However I went on about three miles, when I came to a good big creek, which I waded. It was very cold, and the creek was about knee-deep; but I felt no great inconvenience from it just then, as I was all over wet with sweat from running, and I felt hot enough. After I got over the creek and out of the cane, which was very thick on all our creeks, I listened for my dogs. I found they had either treed or brought the bear to a stop, as they continued barking in the same place. I pushed on as near in the direction to the noise as I could, till I found the hill was too steep for me to climb, and so I backed and went down the creek some distance till I came to a hollow, and then took up that, till I come to a place where I could climb up the hill. It was mighty dark, and was difficult to see my way or any thing else. When I got up the hill, I found I had passed the dogs; and so I turned and went to them. I found, when I got there, they had treed the bear in a large forked poplar, and it was setting in the fork.

I could see the lump, but not plain enough to shoot with any certainty, as there was no moonlight; and so I set in to hunting for some dry brush to make me a

light; but I could find none, though I could find that the ground was torn mightily to pieces by the cracks.

At last I thought I could shoot by guess, and kill him; so I pointed as near the lump as I could, and fired away. But the bear didn't come; he only clomb up higher and got out on a limb, which helped me to see him better. I now loaded up again and fired, but this time he didn't move at all. I commenced loading for a third fire, but the first thing I knowed, the bear was down among the dogs, and they were fighting all around me. I had my big butcher in my belt, and I had a pair of dressed buckskin breeches on. So I took out my knife, and stood, determined, if he should get hold of me, to defend myself in the best way I could. I stood there for some time, and could now and then see a white dog I had, but the rest of them, and the bear, which were dark coloured, I couldn't see at all, it was so miserable dark. They still fought around me, and sometimes within three feet of me; but, at last, the bear got down into one of the cracks, that the earthquakes had made in the ground, about four feet deep, and I could tell the biting end of him by the hollering of my dogs. So I took my gun and pushed the muzzle of it about, till I thought I had it against the main part of his body, and fired; but it happened to be only the fleshy part of his foreleg. With this, he jumped out of the crack, and he and the dogs had another hard fight around me, as before. At last, however, they forced him back into the crack again, as he was when I had shot.

I had laid down my gun in the dark, and I now began to hunt for it; and while hunting, I got hold of a pole, and I concluded I would punch him awhile with that. I did so, and when I would punch him, the dogs would jump in on him, when he would bite them badly, and they would jump out again. I concluded, as he would take punching so patiently, it might be that he would lie still enough for me to get down in the crack, and feel slowly along till I could find the right place to give him a dig with my butcher. So I got down, and my dogs got in before him and kept his head towards them, till I got along easily up to him; and placing my hand on his rump, felt for his shoulder, just behind which I intended to stick him. I made a lounge with my long knife, and fortunately stuck him right through the heart; at which he just sank down, and I crawled out in a hurry. In a little time my dogs all come out too, and seemed satisfied, which was the way they always had of telling me that they had finished him.

I suffered very much that night with cold, as my leather breeches, and every thing else I had on, was wet and frozen. But I managed to get my bear out of this crack after several hard trials, and so I butchered him, and laid down to try to sleep. But my fire was very bad, and I couldn't find any thing that would burn well to make it any better; and I concluded I should freeze, if I didn't warm myself in some way by exercise. So I got up, and hollered a while, and then I would just jump up and down with all my might, and throw myself into all sorts of motions. But all this wouldn't do; for my blood was now getting cold, and the chills coming all over me. I was so tired, too, that I could hardly walk; but I thought I would do the best I could to save my life, and then, if I died, nobody would be to blame. So I went to a tree about two feet through, and not a limb on it for thirty feet, and I would climb up it to the limbs, and then lock my arms together around it, and slide down to the bottom again. This would make the insides of my legs and arms feel mighty warm and good. I continued this till daylight in the morning, and how often I clomb up my tree and slid down I don't know, but I reckon at least a hundred times.

In the morning I got my bear hung up so as to be safe, and then set out to hunt for my camp. I found it after a while, and McDaniel and my son were very much rejoiced to see me get back, for they were about to give me up for lost. We got our breakfasts, and then secured our meat by building a high scaffold, and covering it over. We had no fear of its spoiling, for the weather was so cold that it couldn't.

We now started after my other bear, which had caused me so much trouble and suffering; and before we got him, we got a start after another, and took him also. We went on to the creek I had crossed the night before and camped, and then went to where my bear was, that I had killed in the crack. When we examined the place, McDaniel said he wouldn't have gone into it, as I did, for all the bears in the woods.

We took the meat down to our camp and salted it and also the last one we had killed; intending, in the morning, to make a hunt in the harricane again.

We prepared for resting that night, and I can assure the reader I was in need of it. We had laid down by our

fire, and about ten o'clock there came a most terrible earthquake, which shook the earth so, that we were rocked about like we had been in a cradle. We were very much alarmed; for though we were accustomed to feel earthquakes, we were now right in the region which had been torn to pieces by them in 1812, and we thought it might take a notion and swallow us up, like the big fish did Jonah.

In the morning we packed up and moved to the harricane, where we made another camp, and turned out that evening and killed a very large bear, which made *eight* we had now killed in this hunt.

The next morning we entered the harricane again, and in little or no time my dogs were in full cry. We pursued them, and soon came to a thick cane-brake, in which they had stop'd their bear. We got up close to him, as the cane was so thick that we couldn't see more than a few feet. Here I made my friend hold the cane a little open with his gun till I shot the bear, which was a mighty large one. I killed him dead in his tracks. We got him out and butchered him, and in a little time started another and killed him, which now made *ten* we had killed; and we know'd we couldn't pack any more home, as we had only five horses along; therefore we returned to the camp and salted up all our meat, to be ready for a start homeward next morning.

The morning came, and we packed our horses with the meat, and had as much as they could possibly carry, and sure enough cut out for home. It was about thirty miles, and we reached home the second day. I had now accommodated my neighbour with meat enough to do him, and had killed in all, up to that time, fifty-eight bears, during the fall and winter.

As soon as the time come for them to quit their houses and come out again in the spring, I took a notion to hunt a little more, and in about one month I killed forty-seven more, which made one hundred and five bears I had killed in less than one year from that time.

1834

From

The Crockett Almanacs

Between 1835 and 1856 there appeared in various cities—Nashville, New York, Boston, Philadelphia, and others—almanacs put out by various publishers and called the **Crockett Almanacs.** Like others, these almanacs contained data about the calendar year; unlike most others, they contained many tall tales, usually written as if in the language of Crockett or his unlearned frontier neighbors.

Whether Crockett had anything to do with the earliest almanacs is not known, and certainly before long the tales were concocted by journalists, some of whom knew a good deal about frontier life and some of whom knew very little. The stories in the periodicals, however, all were purportedly told by the famous frontiersman. At their best these almanac humorists, whoever they were, caught the qualities of good yarnspinning sessions. The style was that of lively fireside talk, homely, relatively simple, but concrete, vigorous, full of conceits. The materials were typical combinations of earthy, even vulgar, reality with the unearthly inventions of soaring imaginations. The sort of literature in the almanacs, in other words, foreshadowed the widespread use of the American language of informal talk in print and the fantastic inventions of T. B. Thorpe, Joel Chandler Harris, Mark Twain, and Walt Disney. "A Sensible Varmint" and "Death of Crockett" are from Turner and Fisher almanacs, "Crockett's Morning Hunt" from a Cozans almanac; all appeared in New York.

A SENSIBLE VARMINT

Almost every body that knows the forest, understands parfectly well that Davy Crockett never loses powder and ball, havin' ben brought up to believe it a sin to throw away amminition, and that is the benefit of a vartuous eddikation. I war out in the forest one arternoon, and had jist got to a place called the Great Gap, when I seed a rackkoon setting all alone upon a tree.

I clapped the breech of Brown Betty to my shoulder, and war jist going to put a piece of lead between his shoulders, when he lifted one paw, and sez he, "Is your name Crockett?"

Sez I, "You are rite for wonst, my name is Davy Crockett."

Davy and the sensible varmint.

"Then," sez he, "you needn't take no further trouble, for I may as well come down without another word." And the cretur walked rite down from the tree, for he considered himself shot.

I stoops down and pats him on the head, and sez I, "I hope I may be shot myself before I hurt a hair of your head, for I never had sich a compliment in my life."

"Seeing as how you say that," sez he, "I'll jist walk off for the present, not doubting your word a bit, d'ye see, but lest you should kinder happen to change your mind."

1841

DEATH OF CROCKETT

Thar's a great rejoicin' among the bears of Kaintuck, and the alligators of the Massissippi rolls up thar shining ribs to the sun, and has grown so fat and lazy that they will hardly move out of the way for a steamboat. The rattlesnakes come up out of thar holes and frolic within ten foot of the clearings, and the foxes goes to sleep in the goose-pens. It is bekase the rifle of Crockett is silent forever, and the print of his moccasins is found no more in our woods. His old fox-skin cap hangs up in the cabin, and every hunter, whether he are a Puke, a Wolverine, or a Sucker, never looks at it without turnin' away his head and droppin' a salt tear.

Luke Wing entered the cabin the other day and took down old Killdevil to look at it. The muzzle was half stopped up with rust, and a great green spider run out of it and made his escape in the cracks of the wall. The varmints of the forest will fear it no more. His last act to defend it, war when the poor gallant Kurnill drew a bead on a pesky Mexican and brought him down. Crockett went to put "Big Butcher" into another, and the feller on the ground turned half over, and stuck a knife into him. Another come up behind and run his bayonet into Crockett's back, for the cretur would as soon have faced a hindred live mammoths as to have faced Crockett at any time.

Down fell the Kurnill like a lion struck by thunder and lightning. He never spoke again. It war a great loss to the country, and the world, and to ole Kaintuck in particklar. Thar were never known such a member of Congress as Crockett, and never will be agin. The painters and bears will miss him, for he never missed them.

He died like a member o' Congress ought to die. While he war about to do his country some sarvice, and raise her name as high as her mountains, he war cut down in the prime o' life, and at a time when he war most wanted. His screams and yells are heard no more, and the whole country are clouded with a darkness for the gallant Kurnill. He war an ornament to the forest, and war never known to refuse his whiskey to a stranger. When he war alive, it war most beautiful to hear his scream coming through the forest; it would turn and twist itself into some of the most splendifferous knots, and then untie itself and keep on till it got clar into nowhere.

---

27 Puke, Wolverine, Sucker, natives, respectively, of Missouri, Michigan, and Illinois

But he are a dead man now, and if you want to see old Kaintuck's tears, go thar, and speak o' her gallant Kurnill, and thar's not a human but what will turn away and go behind some tree and dry up thar tears. He are dead now, and may he rest forever and a day arter.

1847

CROCKETT'S MORNING HUNT

One January morning it was so all-screwen-up cold that the forest trees war so stiff that they couldn't shake, and the very day-break froze fast as it war tryin' to dawn. The tinder-box in my cabin would no more ketch fire than a sunk raft at the bottom o' the sea. Seein' that daylight war so far behind time, I thought creation war in a fair way for freezin' fast.

"So," thinks I, "I must strike a leetle fire from my fingers, light my pipe, travel out a few leagues, and see about it."

Then I brought my knuckles together like two thunder clouds, but the sparks froze up afore I could begin to collect 'em—so out I walked, and endeavored to keep myself unfriz by goin' at a hop, step and jump gait, and whistlin' the tune of "fire in the mountains!" as I went along in three double quick time. Well, arter I had walked about twenty-five miles up the peak o' Daybreak Hill, I soon discovered what war the matter. The airth had actually friz fast in her axis, and couldn't turn round; the sun had got jammed between two cakes o' ice under the wheels, an' thar he had bin shinin' and workin' to get loose, till he friz fast in his cold sweat.

"C-r-e-a-t-i-o-n!" thought I, "this are the toughest sort o' suspension, and it mustn't be endured—somethin' must be done, or human creation is done for."

It war then so antedeluvian and premature cold that my upper and lower teeth an' tongue war all collapsed together as tight as a friz oyster. I took a fresh twenty pound bear off o' my back that I'd picked up on the road, an' beat the animal agin the ice till the hot ile began to walk out on him at all sides. I then took an' held him over the airth's axes, an' squeezed him till I thaw'd 'em loose, poured about a ton on it over the sun's face, give the airth's cog-wheel one kick backward, till I got the sun loose—whistled "Push along, keep movin'!" an' in about fifteen seconds the airth gin a grunt, and begun movin'—the sun walked up beautiful, salutin' me with sich a wind o' gratitude that it made me sneeze. I lit my pipe by the blaze o' his top-knot, shouldered my bear, an' walked home, introducin' the people to fresh daylight with a piece of sunrise in my pocket, with which I cooked my bear steaks, an' enjoyed one o' the best breakfasts I had tasted for some time. If I didn't, jist wake some mornin' and go with me to the office o' sunrise!

1853

George Washington Harris

1814 • 1869

At the age of five, George Washington Harris was taken from his birthplace in Allegheny City, Pennsylvania, to Knoxville, Tennessee. For forty years he lived in this sleepy village, coming to know intimately the life of its peaceful valley. He left its "Knobs" and mountains only when the economic stirrings preceding the Civil War forced him away.

For a number of years Harris wrote humorous sketches for the New York *Spirit of the Times*. After 1854 his stories couched in the quaint language of his comic character, Sut Lovingood, obtained, according to one discerning critic of that period, "a circulation and popularity, throughout the country, which no similar productions, in modern times, have enjoyed." Sut, as a

self-confessed "nat'ral born durn'd fool," delivered blows at the foibles of mankind from the vantage point of this "unassailable position."

In a typical Lovingood story, the characters whom Sut disliked were comically portrayed and then, in all probability, physically maltreated. Sut's notion of the height of humor was a man whom he disliked surrounded by a knot of angry hornets and trying vainly to get away in a hurry. What Harris is admired for by modern enthusiasts about his yarns is his ability to put oral tales with all the art of their comic movement and all the poetry of their style onto the printed page.

Sut Lovingood Yarns, New York, 1867 • Walter Blair, **Native American Humor (1800-1900)**, Cincinnati, 1937 • F. J. Meine, **Tall Tales of the Southwest**, New York, 1938 • (Numerous tales published only in newspapers have been found recently by Donald Day and F. J. Meine, who plan to bring them all together in a book)

Mrs. Yardley's Quilting

Thar's one durn'd nasty muddy job, an' I is jis' glad enuf tu take a ho'n ur two, on the straingth ove hit."

"What have you been doing, Sut?"

"Helpin tu salt ole Missis Yardley down."

"What do you mean by that?"

"Fixin her fur rotten cumfurtably, kiverin her up wif sile, tu keep the buzzards frum cheatin the wurms."

"Oh, you have been helping to bury a woman."

"That's hit, by golly! Now why the devil can't I 'splain mysef like yu? I ladles out my words at randum, like a calf kickin at yaller-jackids; yu jis' rolls em out tu the pint, like a feller a-layin bricks—every one fits. How is it that bricks fits so clost enyhow? Rocks wont ni du hit."

"Becaze they'se all ove a size," ventured a man with a wen over his eye.

"The devil yu say, hon'ey-head! haint reapin-mersheens ove a size? I'd like to see two ove em fit clost. Yu wait ontil yu sprouts tuther ho'n, afore yu venters tu 'splain mix'd questions. George, did yu know ole Missis Yardley?"

"No."

"Well, she wer a curious 'oman in her way, an' she wore shiney specks. Now jis' listen: Whenever yu see a ole 'oman ahine a par ove *shiney* specks, yu keep yer eye skinn'd; they am dang'rus in the extreme. Thar is jis' no knowin what they ken du. I hed one a-stradil ove me onst, fur kissin her gal. She went fur my har, an' she went fur my skin, ontil I tho't she ment tu kill me, an' wud a-dun hit, ef my hollerin hadent fotch ole Dave Jordan, a *bacheler,* tu my aid. He, like a durn'd fool, cotch her by the laig, an' drug her back'ards ofen me. She jis' kivered him, an' I run, by golly! The nex time I seed him he wer bald headed, an' his face looked like he'd been a-fitin wildcats.

"Ole Missis Yardley wer a great noticer ove littil things, that nobody else ever seed. She'd say right in the middil ove sumbody's serious talk: 'Law sakes! thar goes that yaller slut ove a hen, a-flingin straws over her shoulder; she's arter settin now, an' haint laid but seven aigs. I'll disapint *her,* see ef I don't; I'll put a punkin in her ne's, an' a feather in her nose. An' bless my soul! jis' look at that cow wif the wilted ho'n, a-flingin up dirt an' a-smellin the place whar hit cum frum, wif the rale ginuine still-wurim twis' in her tail, too, what upon the face ove the yeath kin she be arter now, the ole fool? watch her, Sally. An' sakes alive! jis' look at that ole sow; she's a-gwine in a fas' trot, wif her empty bag a-floppin agin her sides. Thar, she hes stop't, an's a-listenin! massy on us! what a long yearnis grunt she gin; hit cum frum way back ove her kidneys. Thar she goes agin; she's arter no good, sich kerryin on means no good.'

"An' so she wud gabble, no odds who wer a-listenin. She looked like she mout been made at fust 'bout four foot long, an' the common thickness ove wimen when they's at tharsefs, an' then had her har tied tu a stump, a par ove steers hitched to her heels, an' then straiched out a-mos' two foot more—mos' ove the straichin cumin outen her laigs an' naik. Her stockins, a-hangin on the clothes-line tu dry, looked like a par ove sabre scabbards, an' her naik looked like a dry beef shank smoked, an' mout been ni ontu es tough. I never felt hit mysef, I didn't, I jis' jedges by looks. Her darter Sal wer bilt at fust 'bout the laingth ove her mam, but wer never straiched eny by a par ove steers an' she wer fat enuf tu

kill; she wer taller lyin down than she wer a-standin up. Hit wer her who gin me the 'hump shoulder.' Jis' look at me; haint I'se got a tech ove the dromedary back thar bad? haint I humpy? Well, a-stoopin tu kiss that squatty lardstan ove a gal is what dun hit tu me. She wer the fairest-lookin gal I ever seed. She allers wore thick woolin stockins 'bout six inches too long fur her laig; they rolled down over her garters, lookin like a par ove life-presarvers up thar. I tell yu she wer a tarin gal enyhow. Luved kissin, wrastlin, an' biled cabbige, an' hated tite clothes, hot weather, an' suckit-riders. B'leved strong in married folk's ways, cradles, an' the remishun ove sins, an' didn't b'leve in corsets, fleas, peaners, nur the fashun plates."

"What caused the death of Mrs. Yardley, Sut?"

"Nuffin, only her heart stop't beatin 'bout losin a nine dimunt quilt. True, she got a skeer'd hoss tu run over her, but she'd a-got over that ef a quilt hadn't been mix'd up in the catastrophy. Yu see quilts wer wun ove her speshul gifts; she run strong on the bed-kiver question. Irish chain, star ove Texas, sun-flower, nine dimunt, saw teeth, checker board, an' shell quilts; blue, an' white, an' yaller an' black coverlids, an' callickercumfurts reigned triumphan' 'bout her hous'. They wer packed in drawers, layin in shelfs full, wer hung four dubbil on lines in the lof, packed in chists, piled on cheers, an' wer everywhar, even ontu the beds, an' wer changed every bed-makin. She told everybody she cud git tu listen tu hit that she ment tu give every durn'd one ove them tu Sal when she got married. Oh, lordy! what es fat a gal es Sal Yardley cud ever du wif half ove em, an' sleepin wif a husbun at that, is more nor I ever cud see through. Jis' think ove her onder twenty layer ove quilts in July, an' yu in thar too. Gewhillikins! George, look how I is sweatin' now, an' this is December. I'd 'bout es lief be shet up in a steam biler wif a three hundred pound bag ove lard, es tu make a bisiness ove sleepin wif that gal—'twould kill a glass-blower.

"Well, tu cum tu the serious part ove this conversashun, that is how the old quilt-mersheen an' coverlid-loom cum tu stop operashuns on this yeath. She hed narrated hit thru the neighborhood that nex Saterday she'd gin a quiltin—three quilts an' one cumfurt tu tie. 'Goblers, fiddils, gals, an' whisky,' wer the words she sent tu the men-folk, an' more tetchin ur wakenin words never drap't ofen an 'oman's tongue. She sed tu the gals, 'Sweet toddy, huggin, dancin, an' huggers in 'bundunce.' Them words struck the gals rite in the pit ove the stumick, an' spread a ticklin sensashun bof ways, ontil they scratched thar heads wif one han, an' thar heels wif tuther.

"Everybody, he an' she, what wer baptized b'levers in the righteousnes ove quiltins wer thar, an' hit jis' so happen'd that everybody in them parts, frum fifteen summers tu fifty winters, wer unannamus b'levers. Strange, warn't hit? Hit wer the bigges' quiltin ever Missis Yardley hilt, an' she hed hilt hundreds; everybody wer thar, 'scept the constibil an' suckit-rider, two dam easily-spared pussons; the numbers ni ontu even too; jis' a few more boys nur gals; that made hit more exhitin, fur hit gin the gals a chance tu kick an' squeal a littil, wifout runnin eny risk ove not gittin kissed at all, an' hit gin reasonabil grouns fur a few scrimmages amung the he's. Now es kissin an' fitin am the pepper an' salt ove all soshul getherins, so hit wer more espishully wif this ove ours. Es I swung my eyes over the crowd, George, I thought quiltins, managed in a morril an' sensibil way, truly am good things—good fur free drinkin, good fur free eatin, good fur free huggin, good fur free dancin, good fur free fitin, an' goodest ove all fur poperlatin a country fas'.

"Thar am a fur-seein wisdum in quiltins, ef they hes proper trimmins: 'vittils, fiddils, an' sperrits in 'bundunce.' One holesum quiltin am wuf three old pray'r-meetins on the poperlashun pint, purtickerly ef hits hilt in the dark ove the moon, an' runs intu the night a few hours, an' April ur May am the time chosen. The moon don't suit quiltins whar everybody is well acquainted an' already fur along in courtin. She dus help pow'ful tu begin a courtin match onder, but when hit draws ni ontu a head, nobody wants a moon but the ole mammys.

"The mornin cum, still, saft, sunshiney; cocks crowin, hens singin, birds chirpin, tuckeys gobblin—jis' the day tu sun quilts, kick, kiss, squeal, an' make love.

"All the plow-lines an' clothes-lines wer straiched tu every post an' tree. Quilts purvailed. Durn my gizzard ef two acres roun that ar house warn't jis' one solid quilt, all out a-sunnin, an' tu be seed. They dazzled the eyes, skeered the hosses, gin wimen the heart-burn, an' perdominated.

"To'ards sundown the he's begun tu drap in. Yearnis' needil-drivin cummenced tu lose groun; threads broke ofen, thimbils got los', an' quilts needed anuther roll.

Gigglin, winkin, whisperin, smoofin ove har, an' gals a-ticklin one anuther, wer a-gainin every inch ove groun what the needils los'. Did yu ever notis, George, at all sushul getherins, when the he's begin tu gather, that the young she's begin tu tickil one anuther an' the ole maids swell thar tails, roach up thar backs, an' sharpen thar nails ontu the bed-posts an' door jams, an' spit an' groan sorter like cats a-courtin? Dus hit mean *rale* rath, ur is hit a dare tu the he's, sorter kivered up wif the outside signs ove danger? I honestly b'leve that the young shes' ticklin means, 'Cum an' take this job ofen our hans.' But that swellin I jis' don't onderstan; dus yu? Hit looks skeery, an' I never tetch one ove em when they am in the swellin way. I may be mistaken'd 'bout the ticklin bisiness too; hit may be dun like a feller chaws poplar bark when he haint got eny terbacker, a-sorter better nur nun make-shif. I dus know one thing tu a certainty: that is, when the he's take hold the ticklin quits, an' ef yu gits one ove the ole maids out tu hersef, then she subsides an' is the smoofes, sleekes, saft thing yu ever seed, an' dam ef yu can't hear her purr, jis' es plain!

"But then, George, gals an' ole maids haint the things tu fool time away on. Hits widders, by golly, what am the rale sensibil, steady-goin, never-skeerin, never-kickin, willin, sperrited, smoof pacers. They cum clost up tu the hoss-block, standin still wif thar purty silky years playin, an' the naik-veins a-throbbin, an' waits fur the word, which ove course yu gives, arter yu finds yer feet well in the stirrup, an' away they moves like a cradil on cushioned rockers, ur a spring buggy runnin in damp san'. A tetch ove the bridil, an' they knows yu wants em tu turn, an' they dus hit es willin es ef the idear wer thar own. I be dod rabbited ef a man can't 'propriate happiness by the skinful ef he is in contack wif sumbody's widder, an' is smart. Gin me a willin widder, the yeath over: what they don't know, haint worth larnin. They hes all been tu Jamakey an' larnt how sugar's made, an' knows how tu sweeten wif hit; an' by golly, they is always ready tu use hit. All yu hes tu du is tu find the spoon, an' then drink cumfort till yer blind. Nex tu good sperrits an' my laigs, I likes a twenty-five year ole widder, wif roun ankils, an' bright eyes, honestly an' squarly lookin intu yurn, an' sayin es plainly es a partrige sez 'Bob White,' 'Don't be afraid ove me; I hes been thar; yu know hit ef yu hes eny sense, an' thar's no use in eny humbug, ole feller—cum ahead!"

"Ef yu onderstans widder nater, they ken save yu a power ove troubil, onsartinty, an' time, an' ef yu is interprisin yu gits mons'rous well paid fur hit. The very soun ove thar littil shoe-heels speak full trainin, an' hes a knowin click as they tap the floor; an' the rustil ove thar dress sez, 'I dar yu tu ax me.'

"When yu hes made up yer mind tu court one, jis' go at hit like hit wer a job ove rail-maulin. Ware yer workin close, use yer common, every-day moshuns an' words, an' abuv all, fling away yer cinamint ile vial an' burn all yer love songs. No use in tryin tu fool em, fur they sees plum thru yu, a durn'd sight plainer than they dus thru thar veils. No use in a pasted shut; she's been thar. No use in borrowin a cavortin fat hoss; she's been thar. No use in har-dye; she's been thar. No use in cloves, tu kill whisky breff; she's been thar. No use in buyin clost curtains fur yer bed, fur she has been thar. Widders am a speshul means, George, fur ripenin green men, killin off weak ones, an makin 'ternally happy the soun ones.

"Well, es I sed afore, I flew the track an' got ontu the widders. The fellers begun tu ride up an' walk up, sorter slow, like they warn't in a hurry, the durn'd 'saitful raskils, hitchin thar critters tu enything they cud find. One red-comb'd, long-spurr'd, dominecker feller, frum town, in a red an' white gridiron jackid an' patent leather gaiters, hitched his hoss, a wild, skeery, wall-eyed devil, inside the yard palins, tu a cherry tree lim'. Thinks I, that hoss hes a skeer intu him big enuf tu run intu town, an' perhaps beyant hit, ef I kin only tetch hit off; so I sot intu thinkin.

"One aind ove a long clothes-line, wif nine dimunt quilts ontu hit, wer tied tu the same cherry tree that the hoss wer. I tuck my knife and socked hit thru every quilt, 'bout the middil, an' jis' below the rope, an' tied them thar wif bark, so they cudent slip. Then I went tu the back aind, an' ontied hit frum the pos', knottin in a hoe-handil, by the middil, tu keep the quilts frum slippin off ef my bark strings failed, an' laid hit on the groun. Then I went tu the tuther aind: thar wer 'bout ten foot tu spar, a-lyin on the groun arter tyin tu the tree. I tuck hit atwix Wall-eye's hine laigs, an' tied hit fas' tu bof stirrups, an' then cut the cherry tree lim'

---

72 dominecker, an uncomplimentary allusion to the youth's resemblance to a rooster of the American breed called Dominickers

betwix his bridil an' the tree, almos' off. Now, mine yu thar wer two ur three uther ropes full ove quilts atween me an' the hous', so I wer purty well hid frum thar. I jis' tore off a palin frum the fence, an' tuck hit in bof hans, an' arter raisin hit 'way up yander, I fotch hit down, es hard es I cud, flatsided to'ards the groun, an' hit acksidentally happen'd tu hit Wall-eye, 'bout nine inches ahead ove the root ove his tail. Hit landed so hard that hit made my hans tingle, an' then busted intu splinters. The first thing I did, wer tu feel ove mysef, on the same spot whar hit hed hit the hoss. I cudent help duin hit tu save my life, an' I swar I felt sum ove Wall-eye's sensashun, jis' es plain. The fust thing he did, wer tu tare down the lim' wif a twenty foot jump, his head to'ards the hous'. Thinks I, now yu hev dun hit, yu durn'd wall-eyed fool! tarin down that lim' wer the beginin ove all the troubil, an' the hoss did hit hissef; my conshuns felt clar es a mountin spring, an' I wer in a frame ove mine tu obsarve things es they happen'd, an' they soon begun tu happen purty clost arter one anuther rite then, an' thar, an' tharabouts, clean ontu town, thru hit, an' still wer a-happenin, in the woods beyant thar ni ontu eleven mile frum ole man Yardley's gate, an' four beyant town.

"The fust line ove quilts he tried tu jump, but broke hit down; the nex one he ran onder; the rope cotch ontu the ho'n ove the saddil, broke at bof ainds, an' went along wif the hoss, the cherry tree lim' an' the fust line ove quilts, what I hed proverdensally tied fas' tu the rope. That's what I calls foresight, George. Right furnint the frunt door he cum in contack wif ole Missis Yardley hersef, an' anuther ole 'oman; they wer a-holdin a nine dimunt quilt spread out, a-'zaminin hit, an' a-praisin hits purfeckshuns. The durn'd onmanerly, wall-eyed fool run plum over Missis Yardley, frum ahine, stompt one hine foot through the quilt, takin hit along, a-kickin ontil he made hits corners snap like a whip. The gals screamed, the men hollered wo! an' the ole 'oman wer toted intu the hous' limber es a wet string, an' every word she sed wer, 'Oh, my preshus nine dimunt quilt!'

"Wall-eye busted thru the palins, an' Dominicker sed 'im, made a mortal rush fur his bitts, wer too late fur them, but in good time fur the strings ove flyin quilts, got tangled amung em, an' the gridiron jackid patren wer los' tu my sight amung star an' Irish chain quilts; he went frum that quiltin at the rate ove thuty miles tu the hour. Nuffin lef on the lot ove the hole consarn, but a nine biler hat, a par ove gloves, an' the jack ove hearts.

"What a onmanerly, suddin way ove leavin places sum folks hev got, enyhow.

"Thinks I, well, that fool hoss, tarin down that cherry tree lim', hes dun sum good, enyhow; hit hes put the ole 'oman outen the way fur the balance ove the quiltin, an' tuck Dominicker outen the way an' outen danger, fur that gridiron jackid wud a-bred a scab on his nose afore midnite; hit wer morrily boun tu du hit.

"Two months arterwards, I tracked the route that hoss tuck in his kalamatus skeer, by quilt rags, tufts ove cotton, bunches ove har, (human an' hoss,) an' scraps ove a gridiron jackid stickin ontu the bushes, an' plum at the aind ove hit, whar all sign gin out, I foun a piece ove watch chain an' a hosses head. The places what know'd Dominicker, know'd 'im no more.

"Well, arter they'd tuck the ole 'oman up stairs an' camfired her tu sleep, things begun tu work agin. The widders broke the ice, an' arter a littil gigilin, goblin, an' gabblin, the kissin begun. *Smack!*—'Thar, now,' a widder sed that. *Pop!*—'Oh, don't!' *Pfip!*—'Oh, yu quit!' *Plosh!*—'Go *way* yu awkerd critter, yu kissed me in the eye!' anuther widder sed that. *Bop!* 'Now yu ar satisfied, I recon, big mouf!' *Vip!*—'That haint fair!' *Spat!*—'Oh, lordy! May, cum pull Bill away; he's a-tanglin my har.' *Thut!*—'I jis' d-a-r-e yu tu du that agin!' a widder sed that, too. Hit sounded all 'roun that room like poppin co'n in a hot skillet, an' wer pow'ful sujestif.

"Hit kep on ontil I be durn'd ef *my* bristils didn't begin tu rise, an' sumthin like a cold buckshot wud run down the marrow in my back-bone 'bout every ten secons, an' then run up agin, tolerabil hot. I kep a swallerin wif nuthin tu swaller, an' my face felt swell'd; an' yet I wer fear'd tu make a bulge. Thinks I, I'll ketch one out tu hersef torreckly, an' then I guess we'll rastil. Purty soon Sal Yardley started fur the smoke-'ous, so I jis' gin my head a few short shakes, let down one ove my wings a-trailin, an' sirkiled roun her wif a side twis' in my naik, steppin sidewise, an' a-fetchin up my hinmos' foot wif a sorter jerkin slide at every step. Sez I, 'Too coo-took a-too.' She onderstood hit, an stopt, sorter spreadin her shoulders. An' jis' es I hed pouch'd out my mouf, an' wer a-reachin forrid wif hit, for the

article hitsef, sunthin interfared wif me, hit did. George, wer yu ever ontu yer hans an' knees, an' let a hell-tarin big, mad ram, wif a ten-yard run, but yu yearnis'ly, jis' onst, right squar ontu the pint ove yer back-bone?"

"No, you fool; why do you ask?"

"Kaze I wanted tu know ef yu cud hev a realizin' noshun ove my shock. Hits scarcely worth while tu try tu make yu onderstan the case by words only, onless yu hev been tetched in that way. Gr-eat golly! the fust thing I felt, I tuck hit tu be a back-ackshun yeathquake; an' the fust thing I seed wer my chaw'r terbacker a-flyin over Sal's head like a skeer'd bat. My mouf wer pouch'd out, ready fur the article hitsef, yu know, an' hit went outen the roun hole like the wad outen a pop-gun—thug! an' the fust thing I know'd, I wer a flyin over Sal's head too, an' a-gainin on the chaw'r terbacker fast. I wer straitened out strait, toes hinemos', middil finger-nails foremos', an' the fust thing I hearn wer, 'Yu dam Shanghi!' Great Jerus-a-lam! I lit ontu my all fours jis' in time tu but the yard gate ofen hits hinges, an' skeer loose sum more hosses—kep on in a four-footed gallop, clean acrost the lane afore I cud straiten up, an' yere I cotch up wif my chaw'r terbacker, stickin flat agin a fence-rail. I hed got so good a start that I thot hit a pity tu spile hit, so I jis' jump'd the fence an' tuck thru the orchurd. I tell yu I dusted these yere close, fur I tho't hit wer arter me.

"Arter runnin a spell, I ventered tu feel roun back thar, fur sum signs ove what hed happened tu me. George, arter two pow'ful hard tugs, I pull'd out the vamp an' sole ove one ove ole man Yardley's big brogans, what he hed los' amung my coat-tails. Dre'ful, dre'ful! Arter I got hit away frum thar, my flesh went fas' asleep, frum abuv my kidneys tu my knees; about now, fur the fust time, the idear struck me, what hit wer that hed interfar'd wif me, an' los' me the kiss. Hit wer ole Yardley hed kicked me. I walked fur a month like I wer straddlin a thorn hedge. Sich a shock, at sich a time, an' on sich a place—jis' think ove hit! hit am tremenjus, haint hit? The place feels num, right now."

"Well, Sut, how did the quilting come out?"

"How the hell du yu 'speck me tu know? I warn't thar eny more."

1867

Thomas Bangs Thorpe

1815 • 1878

Although he was the author of the most famous tall tale of the pre-Civil War Southwest, "The Big Bear of Arkansas," Thomas Bangs Thorpe was born in the East—in Westfield, Massachusetts, in 1815. He left Wesleyan University, in Middletown, Connecticut, in 1836, when ill health made it necessary for him to move to a milder climate, and settled down in Baton Rouge, Louisiana. In Louisiana and other parts of what was then the Far West, Thorpe gathered material for both paintings and writings which won a fine reputation for him.

Thorpe had a varied career. He painted various frontier scenes and numerous portraits, among the most admired of which were one of Jenny Lind and one of his friend, Zachary Taylor. He edited several newspapers and wrote a number of sketches which were widely reprinted. He was in the army during the Mexican War. After the

war, he returned to the East—to New York, where he was an editor until his death in 1878.

The Mysteries of the Backwoods; or Sketches of the Southwest including Character, Scenery and Rural Sports (1846) and *The Hive of the Bee Hunter* (1854) were Thorpe's best books—both of them collections of sketches detailing life in the backwoods. "The Big Bear of Arkansas," this author's masterpiece, first appeared in a great publication of masculine humor of the day, *The Spirit of the Times*, in 1841. Like many other pieces published in that journal, this narrative shows how the art of the oral tale gave shape and substance to narrative in print.

F. J. Meine, "Thomas Bangs Thorpe," Dictionary of American Biography, New York, 1935 • Walter Blair, Native American Humor (1800-1900), Cincinnati, 1937

The Big Bear of Arkansas

In 1839 John Neal, an Eastern critic and fiction writer quite prominent at the time, published the article "Story-Telling" in the New York Mirror. "Of all the stories I meet with," he testified, "none are so delightful to me as those I over-hear on board a steam-boat or a stage-coach . . . live stories, brimful of energy and vivacity." Thorpe's "Big Bear," published a couple of years later, conveyed much of the life and the gusto of a good yarn spun in the social hall of a steamboat.

If, as many good critics agree, the essence of humor is incongruity, Thorpe's narrative contains that essence. One notes the disparity, for instance, between the various worlds in the story—worlds which are identified with various groups and various scenes. Contrasted are the heterogeneous world of the steamboat, realistically portrayed in the "literary" words of the author; the fashionable world of New Orleans, satirically described in the homely words of Jim Doggett; and the comic, wildly fantastic world of Shirt-tail Bend in Arkansas, imaginatively revealed by Jim's poetical invention. Each of these worlds has its own elements of amusement, and the juxtaposition underlines and contrasts these elements.

As Jim—a fascinating character in his own right—tells his tall tale, he becomes more and more imaginative. The "creation state" of Arkansas, as he pictures it, is astonishing compared with any other part of America, and Shirt-tail Bend is astonishing even for Arkansas. Ordinary bear hunts in Jim's section are truly extraordinary, but the great hunt here described is even more wonderful. And as the account of the Big Bear proceeds, even that monster takes on more and more of a supernatural aspect.

Just at the moment Jim's fancy soars into the empyrean, a homely detail—the loss of the valiant hunter's "inexpressibles"—contrasts his imaginative flight with mundane reality. But Jim, having started to soar, is carried along by his imaginings. At the end his yarn, which has started as a jest, has become so real to its creator that he is tremendously impressed by it.

A steamboat on the Mississippi frequently, in making her regular trips, carries between places varying from one to two thousand miles apart; and as these boats advertise to land passengers and freight at "all intermediate landings," the heterogeneous character of the passengers of one of these up-country boats can scarcely be imagined by one who has never seen it with his own eyes. Starting from New Orleans in one of these boats, you will find yourself associated with men from every state in the Union, and from every portion of the globe; and a man of observation need not lack for amusement or instruction in such a crowd, if he will take the trouble to read the great book of character so favourably opened before him. Here may be seen jostling together the wealthy Southern planter, and the pedlar of tin-ware from New England—the Northern merchant, and the Southern jockey—a venerable bishop, and a desperate gambler,—the land speculator, and the

honest farmer—professional men of all creeds and characters—Wolvereens, Suckers, Hoosiers, Buckeyes, and Corn-crackers, beside a "plentiful sprinkling" of the half-horse and half-alligator species of men, who are peculiar to "old Mississippi," and who appear to gain a livelihood simply by going up and down the river. In the pursuit of pleasure or business, I have frequently found myself in such a crowd.

On one occasion, when in New Orleans, I had occasion to take a trip of a few miles up the Mississippi, and I hurried on board the well-known "high-pressure-and-beat-everything" steamboat *Invincible,* just as the last note of the last bell was sounding; and when the confusion and bustle that is natural to a boat's getting under way had subsided, I discovered that I was associated in as heterogeneous a crowd as was ever got together. As my trip was to be of a few hours' duration only, I made no endeavours to become acquainted with my fellow passengers, most of whom would be together many days. Instead of this, I took out of my pocket the "latest paper," and more critically than usual examined its contents; my fellow passengers at the same time disposed themselves in little groups. While I was thus busily employed in reading, and my companions were more busily employed in discussing such subjects as suited their humours best, we were startled most unexpectedly by a loud Indian whoop, uttered in the "social hall," that part of the cabin fitted off for a bar; then was to be heard a loud crowing, which would not have continued to have interested us—such sounds being quite common in that place of spirits—had not the hero of these windy accomplishments stuck his head into the cabin and hallooed out, "Hurra for the Big Bar of Arkansaw!" and then might be heard a confused hum of voices, unintelligible, save in such broken sentences as 'horse," "screamer," "lightning is slow" etc. As might have been expected, this continued interruption attracted the attention of every one in the cabin; all conversation dropped, and in the midst of this surprise the "Big Bar" walked into the cabin, took a chair, put his feet on the stove, and looking back over his shoulder, passed the general and familiar salute of "Strangers, how are you?" He then expressed himself as much at home as if he had been at "the Forks of Cypress," and "perhaps a little more so." Some of the company at this familiarity looked a little angry, and some astonished; but in a moment every face was wreathed in a smile. There was something about the intruder that won the heart on sight. He appeared to be a man enjoying perfect health and contentment: his eyes were as sparkling as diamonds, and good-natured to simplicity. Then his perfect confidence in himself was irresistibly droll. "Perhaps," said he, "gentlemen," running on without a person speaking, "perhaps you have been to New Orleans often; I never made *the first visit before,* and I don't intend to make another in a crow's life. I am thrown away in that ar place, and useless, that ar a fact. Some of the gentlemen thar called me *green*—well, perhaps I am, said I, *but I arn't so at home;* and if I ain't off my trail much, the heads of them perlite chaps themselves wern't much the hardest; for according to my notion, they were real *know-nothings,* green as a pumpkin-vine—couldn't, in farming, I'll bet, raise a crop of turnips; and as for shooting, they'd miss a barn if the door was swinging, and that, too, with the best rifle in the country. And then they talked to me 'bout hunting, and laughed at my calling the principal game in Arkansaw poker, and high-low-jack. 'Perhaps,' said I, 'you prefer chickens and rolette'; at this they laughed harder than ever, and asked me if I lived in the woods, and didn't know what *game* was? At this I rather think I laughed. 'Yes,' I roared, and says, 'Strangers, if you'd asked me *how we got our meat* in Arkansaw, I'd a told you at once, and given you a list of varmints that would make a caravan, beginning with the bar, and ending off with the cat; that's *meat* though, not game.' Game, indeed, that's what city folks call it; and with them it means chippen-birds and shite-pokes; maybe such trash live in my diggens, but I arn't noticed them yet; a bird any way is too trifling. I never did shoot at but one, and I'd never forgiven myself for that, had it weighed less than forty pounds. I wouldn't draw a rifle on any thing less than that; and when I meet with another wild turkey of the same weight I will drap him."

"A wild turkey weighing forty pounds!" exclaimed twenty voices in the cabin at once.

"Yes, strangers, and wasn't it a whopper? You see,

2 **Wolvereens, Suckers.** See note, p. 774 • 2 **Hoosiers, Buckeyes, Corn-crackers,** natives, respectively, of Indiana, Ohio, and Kentucky • 78 **chippen-birds and shite-pokes,** chipping sparrows and green herons

the thing was so fat that it couldn't fly far; and when he fell out of the tree, after I shot him, on striking the ground he bust open behind, and the way the pound gobs of tallow rolled out of the opening was perfectly beautiful."

"Where did all that happen?" asked a cynical-looking Hoosier.

"Happen! happened in Arkansaw: where else could it have happened, but in the creation state, the finishing-up country—a state where the *sile* runs down to the centre of the 'arth, and government gives you a title to every inch of it? Then its airs—just breathe them, and they will make you snort like a horse. It's a state without a fault, it is."

"Excepting mosquitoes," cried the Hoosier.

"Well, stranger, except them; for it ar a fact that they are rather *enormous,* and do push themselves in somewhat troublesome. But, stranger, they never stick twice in the same place; and give them a fair chance for a few months, and you will get as much above noticing them as an alligator. They can't hurt my feelings, for they lay under the skin; and I never knew but one case of injury resulting from them, and that was to a Yankee; and they take worse to foreigners, anyhow, than they do to natives. But the way they used that fellow up! first they punched him until he swelled up and busted; then he su-per-a-ted, as the doctor called it, until he was as raw as beef; then he took the ager, owing to the warm weather, and finally he took a steamboat and left the country. He was the only man that ever took mosquitoes to heart that I know of. But mosquitoes is natur, and I never find fault with her. If they ar large, Arkansaw is large, her varmints ar large, her trees ar large, her rivers ar large, and a small mosquito would be of no more use in Arkansaw than preaching in a canebrake."

This knock-down argument in favour of big mosquitoes used the Hoosier up, and the logician started on a new track, to explain how numerous bear were in his "diggins," where he represented them to be "about as plenty as blackberries, and a little plentifuler."

Upon the utterance of this assertion, a timid little man near me inquired if the bear in Arkansaw ever attacked the settlers in numbers.

"No," said our hero, warming with the subject, "no, stranger, for you see it ain't the natur of bar to go in droves; but the way they squander about in pairs and single ones is edifying. And then the way I hunt them the old black rascals know the crack of my gun as well as they know a pig's squealing. They grow thin in our parts, it frightens them so, and they do take the noise dreadfully, poor things. That gun of mine is perfect *epidemic among bar;* if not watched closely, it will go off as quick on a warm scent as my dog Bowie-knife will: and then that dog—whew! why the fellow thinks that the world is full of bar, he find them so easy. It's lucky he don't talk as well as think; for with his natural modesty, if he should suddenly learn how much he is acknowledged to be ahead of all other dogs in the universe, he would be astonished to death in two minutes. Strangers, the dog knows a bar's way as well as a horse-jockey knows a woman's; he always barks at the right time, bites at the exact place, and whips without getting a scratch. I never could tell whether he was made expressly to hunt bar, or whether bar was made expressly for him to hunt; any way, I believe they were ordained to go together as naturally as Squire Jones says a man and woman is, when he moralizes in marrying a couple. In fact, Jones once said, said he, 'Marriage according to law is a civil contract of divine origin; it's common to all countries as well as Arkansaw, and people take to it as naturally as Jim Doggett's Bowie-knife takes to bar.'"

"What season of the year do your hunts take place?" inquired a gentlemanly foreigner, who, from some peculiarities of his baggage, I suspected to be an Englishman, on some hunting expedition, probably at the foot of the Rocky Mountains.

"The season for bar hunting, stranger," said the man of Arkansaw, "is generally all the year round, and the hunts take place about as regular. I read in history that varmints have their fat season, and their lean season. That is not the case in Arkansaw, feeding as they do upon the *spontenacious* productions of the sile, they have one continued fat season the year round; though in winter things in this way is rather more greasy than in summer, I must admit. For that reason bar with us run in warm weather, but in winter, they only waddle. Fat, fat! it's an enemy to speed; it tames everything that has plenty of it. I have seen wild turkeys, from its influence, as gentle as chickens. Run a bar in this fat condition, and the way it improves the critter for eating is amazing; it sort of mixes the ile up with the meat, until you can't tell t'other from which. I've done this often. I

recollect one perty morning in particular, of putting an old fellow on the stretch, and considering the weight he carried, he run well. But the dogs soon tired him down, and when I came up with him wasn't he in a beautiful sweat—I might say fever; and then to see his tongue sticking out of his mouth a feet, and his sides sinking and opening like bellows, and his cheeks so fat he couldn't look cross. In this fix I blazed at him, and pitch me naked into a briar path if the steam didn't come out of the bullet-hole ten foot in a straight line. The fellow, I reckon, was made on the high-pressure system, and the lead sort of bust his biler."

"That column of steam was rather curious, or else the bear must have been *warm,*" observed the foreigner, with a laugh.

"Stranger, as you observe, that bar was WARM, and the blowing off of the steam show'd it, and also how hard the varmint had been run. I have no doubt if he had kept on two miles farther his insides would have been stewed; and I expect to meet with a varmint yet of extra bottom, who will run himself into a skinful of bar's grease: it is possible, much onlikelier things have happened."

"Whereabouts are these bears so abundant?" inquired the foreigner, with increasing interest.

"Why, stranger, they inhabit the neighbourhood of my settlement, one of the prettiest places on old Mississippi—a perfect location, and no mistake; a place that had some defects until the river made the 'cut-off' at 'Shirt-tail bend,' and that remedied the evil, as it brought my cabin on the edge of the river—a great advantage in wet weather, I assure you, as you can now roll a barrel of whiskey into my yard in high water from a boat, as easy as falling off a log. It's a great improvement, as toting it by land in a jug, as I used to do, *evaporated* it too fast, and it became expensive. Just stop with me, stranger, a month or two, or a year if you like, and you will appreciate my place. I can give you plenty to eat; for beside hog and hominy, you can have bar-ham, and bar-sausages, and a mattrass of bar-skins to sleep on, and a wildcatskin, pulled off hull, stuffed with corn-shucks for a pillow. That bed would put you to sleep if you had the rheumatics in every joint in your body. I call that ar bed a *quietus.* Then look at my land—the government ain't got another such a piece to dispose of. Such timber, and such bottom land, why you can't preserve any thing natural you plant in it unless you pick it young, things thar will grow out of shape so quick. I once planted in those diggins a few potatoes and beets; they took a fine start, and after that an ox team couldn't have kept them from growing. About that time I went off to old Kentuck on bisiness, and did not hear from them things in three months, when I accidentally stumbled on a fellow who had stopped at my place, with an idea of buying me out. 'How did you like things?' said I. 'Pretty well,' said he; 'the cabin is convenient, and the timber land is good; but that bottom land ain't worth the first red cent.' 'Why?' said I. ' 'Cause,' said he. ' 'Cause what?' said I. ' 'Cause it's full of cedar stumps and Indian mounds,' said he, *'and it can't be cleared.'* 'Lord,' said I, 'Them ar "cedar stumps" is beets, and them ar "Indian mounds" ar tater hills.' As I expected, the crop was overgrown and useless; the sile is too rich, *and planting in Arkansaw is dangerous.* I had a good-sized sow killed in that same bottom land. The old thief stole an ear of corn, and took it down where she slept at night to eat. Well, she left a grain or two on the ground, and lay down on them; before morning the corn shot up, and the percussion killed her dead. I don't plant any more; natur intended Arkansaw for a hunting ground, and I go according to natur."

The questioner who thus elicited the description of our hero's settlement, seemed to be perfectly satisfied and said no more; but the "Big Bar of Arkansaw" rambled on from one thing to another with a volubility perfectly astonishing, occasionally disputing with those around him, particularly with a "live Sucker" from Illinois, who had the daring to say that our Arkansaw friend's stories "smelt rather tall."

In this manner the evening was spent; but conscious that my own association with so singular a personage would probably end before morning, I asked him if he would not give me a description of some particular bear hunt; adding that I took great interest in such things, though I was no sportsman. The desire seemed to please him, and he squared himself round towards me, saying, that he could give me an idea of a bar hunt that was never beat in this world, or in any other. His manner was so singular, that half of his story consisted in his excellent way of telling it, the great peculiarity of which was the happy manner he had of emphasizing the prominent parts of his conversation. As near as I can

"'. . . the dogs . . . got around him, and pulled him about. . . .'"

recollect, I have italicized them, and given the story in his own words.

"Stranger," said he, "in bar hunts *I am numerous,* and which particular one, as you say, I shall tell, puzzles me. There was the old she devil I shot at the Hurricane last fall—then there was the old hog thief I popped over at the Bloody Crossing, and then—Yes, I have it! I will give you an idea of a hunt, in which the greatest bar was killed that ever lived, *none excepted;* about an old fellow that I hunted more or less for two or three years; and if that ain't a particular bar hunt, I ain't got one to tell. But in the first place, stranger, let me say, I am pleased with you, because you ain't ashamed to gain information by asking, and listening, and that's what I say to Countess's pups every day when I'm home; and I have got great hopes of them ar pups, because they are continually *nosing* about; and though they stick it sometimes in the wrong place, they gain experience any how, and may learn something useful to boot. Well, as I was saying about this big bar, you see when I and some more first settled in our region, we were drivin to hunting naturally; we soon liked it, and after that we found it an easy matter to make the thing our business. One old chap who had pioneered 'afore us, gave us to understand that we had settled in the right place. He dwelt upon its merits until it was affecting, and showed us, to prove his assertions, more marks on the sassafras trees than I ever saw on a tavern door 'lection time. 'Who keeps that ar reckoning?' said I. 'The bar,' said he. 'What for?' said I. 'Can't tell,' said he; 'but so it is; the bar bite the bark and wood too, at the highest point from the ground they can reach, and you can tell, by the marks,' said he, 'the length of the bar to an inch.' 'Enough,' said I; 'I've learned something here a'ready, and I'll put it in practice.'

"Well, stranger, just one month from that time I killed a bar, and told its exact length before I measured it, by those very marks; and when I did that, I swelled up considerable—I've been a prouder man ever since. So I went on, larning something every day, until I was reckoned a buster, and allowed to be decidedly the best bar hunter in my district; and that is a reputation as much harder to earn than to be reckoned first man in Congress, as an iron ramrod is harder than a toadstool. Did the varmints grow over-cunning by being fooled with by green-horn hunters, and by this means get troublesome, they send for me as a matter of course; and thus I do my own hunting, and most of my neighbours'. I walk into the varmints though, and it has become about as much the same to me as drinking. It is told in two sentences—a bar is started, and he is killed. The thing is somewhat monotonous now—I know just how much they will run, where they will tire, how much they will growl, and what a thundering time I will have in getting them home. I could give you this history of the chase with all particulars at the commencement, I know the signs so well—*Stranger, I'm certain.* Once I met with a match though, and I will tell you about it; for a common hunt would not be worth relating.

"On a fine fall day, long time ago, I was trailing about for bar, and what should I see but fresh marks on the sassafras trees, about eight inches above any in the forests that I knew of. Says I, 'them marks is a hoax, or it indicates the d———t bar that was ever grown.' In fact, stranger, I couldn't believe it was real, and I went on. Again I saw the same marks, at the same height, and *I knew the thing lived.* That conviction came home to my soul like an earthquake. Says I, 'here

is something a-purpose for me: that bar is mine, or I give up the hunting business.' The very next morning what should I see but a number of buzzards hovering over my cornfield. 'The rascal has been there,' said I, 'for that sign is certain:' and, sure enough, on examining, I found the bones of what had been as beautiful a hog the day before, as was ever raised by a Buckeye. Then I tracked the critter out of the field to the woods, and all the marks he left behind, showed me that he was *the bar.*

"Well, stranger, the first fair chase I ever had with that big critter, I saw him no less than three distinct times at a distance. the dogs run him over eighteen miles and broke down, my horse gave out, and I was as nearly used up as a man can be, made on *my* principle, *which is patent.* Before this adventure, such things were unknown to me as possible; but, strange as it was, that bar got me used to it before I was done with him, for he got so at last, that he would leave me on a long chase *qutte easy.* How he did it, I never could understand. That a bar runs at all, is puzzling, but how this one could tire down and bust up a pack of hounds and a horse, that were used to overhauling everything they started after in no time, was past my understanding Well, stranger, that bar finally got so sassy, that he used to help himself to a hog off my premises whenever he wanted one; the buzzards followed after what he left, and so between *bar and buzzard,* I rather think I was *out of pork.*

"Well, missing that bar so often took hold of my vitals, and I wasted away. The thing had been carried too far, and it reduced me in flesh faster than an ager. I would see that bar in every thing I did, *he hunted me,* and that, too, like a devil, which I began to think he was. While in this fix, I made preparations to give him a last brush, and be done with it. Having completed every thing to my satisfaction, I started at sunrise, and to my great joy, I discovered from the way the dogs run, that they were near him; finding his trail was nothing, for that had become as plain to the pack as a turnpike road. On we went, and coming to an open country, what should I see but the bar very leisurely ascending a hill, and the dogs close at his heels, either a match for him in speed, or else he did not care to get out of their way—I don't know which. But wasn't he a beauty, though? I loved him like a brother.

"On he went, until he came to a tree, the limbs of which formed a crotch about six feet from the ground. Into this crotch he got and seated himself, the dogs yelling all around it; and there he sat eyeing them as quiet as a pond in low water. A green-horn friend of mine, in company, reached shooting distance before me, and blazed away, hitting the critter in the centre of his forehead. The bar shook his head as the ball struck it, and then walked down from that tree as gently as a lady would from a carriage. 'Twas a beautiful sight to see him do that—he was in such a rage that he seemed to be as little afraid of the dogs as if they had been sucking pigs; and the dogs warn't slow in making a ring around him at a respectful distance, I tell you; even Bowie-knife, himself, stood off. Then the way his eyes flashed—why the fire of them would have singed a cat's hair; in fact that bar was in a *wrath all over.* Only one pup came near him, and he was brushed out so totally with the bar's left paw, that he entirely disappeared; and that made the old dogs more cautious still. In the meantime, I came up, and taking deliberate aim as a man should do, at his side, just back of his foreleg, *if my gun did not snap,* call me a coward, and I won't take it personal. Yes, stranger, *it snapped,* and I could not find a cap about my person. While in this predicament, I turned round to my fool friend—says I, 'Bill,' says I, 'you're an ass—you're a fool—you might as well have tried to kill that bar by barking the tree under his belly, as to have done it by hitting him in the head. Your shot has made a tiger of him, and blast me, if a dog gets killed or wounded when they come to blows, I will stick my knife into your liver, I will—' my wrath was up. I had lost my caps, my gun had snapped, the fellow with me had fired at the bar's head, and I expected every moment to see him close in with the dogs, and kill a dozen of them at least. In this thing I was mistaken, for the bar leaped over the ring formed by the dogs, and giving a fierce growl, was off—the pack, of course, in full cry after him. The run this time was short, for coming to the edge of a lake the varmint jumped in, and swam to a little island in the lake, which it reached just a moment before the dogs. 'I'll have him now,' said I, for I had found my caps in the *lining of my coat*—so, rolling a log into the lake, I paddled myself across to the island, just as the dogs had cornered the bar in a thicket. I rushed up and fired—

at the same time the critter leaped over the dogs and came within three feet of me, running like mad; he jumped into the lake, and tried to mount the log I had just deserted, but every time he got half his body on it, it would roll over and send him under; the dogs, too, got around him, and pulled him about, and finally Bowie-knife clenched with him, and they sunk into the lake together. Stranger, about this time, I was excited, and I stripped off my coat, drew my knife, and intended to have taken a part with Bowie-knife myself, when the bar rose to the surface. But the varmint staid under—Bowie-knife came up alone, more dead than alive, and with the pack came ashore. 'Thank God,' said I, 'the old villain has got his deserts at last.' Determined to have the body, I cut a grape-vine for a rope, and dove down where I could see the bar in the water, fastened my queer rope to his leg, and fished him, with great difficulty, ashore. Stranger, may I be chawed to death by young alligators, if the thing I looked at wasn't a *she bar, and not the old critter after all.* The way matters got mixed on that island was onaccountably curious, and thinking of it made me more than ever convinced that I was hunting the devil himself. I went home that night and took to my bed—the thing was killing me. The entire team of Arkansaw in barhunting, acknowledged himself used up, and the fact sunk into my feelings like a snagged boat will in the Mississippi. I grew as cross as a bar with two cubs and a sore tail. The thing got out 'mong my neighbours, and I was asked how come on that individu-al that never lost a bar when once started? and if that same individ-u-al didn't wear telescopes when he turned a she bar, of ordinary size, into an old he one, a little larger than a horse? 'Perhaps,' said I, 'friends'—getting wrathy—'perhaps you want to call somebody a liar.' 'Oh, no,' said they, 'we only heard such things as being *rather common* of late, but we don't believe one word of it; oh, no,'—and then they would ride off and laugh like so many hyenas over a dead nigger. It was too much, and I determined to catch that bar, go to Texas, or die,—and I made my preparations accordin'. I had the pack shut up and rested. I took my rifle to pieces and iled it. I put caps in every pocket about my person, *for fear of the lining.* I then told my neighbours, that on Monday morning—naming the day—I would start THAT BAR, and bring him home with me, or they might divide my settlement among them, the owner having disappeared. Well, stranger, on the morning previous to the great day of my hunting expedition, I went into the woods near my house, taking my gun and Bowie-knife along, just *from habit,* and there sitting down also from habit, what should I see, getting over my fence, but *the bar!* Yes, the old varmint was within a hundred yards of me, and the way he walked *over that fence*—stranger, he loomed up like a *black mist,* he seemed so large, and he walked right towards me. I raised myself, took deliberate aim, and fired. Instantly the varmint wheeled, gave a yell, and *walked through the fence* like a falling tree would through a cobweb I started after, but was tripped up by my inexpressibles, which either from habit, or the excitement of the moment, were about my heels, and before I had really gathered myself up, I heard the old varmint groaning in a thicket near by, like a thousand sinners, and by the time I reached him he was a corpse. Stranger, it took five niggers and myself to put that carcase on a mule's back, and old long-ears waddled under the load, as if he was foundered in every leg of his body, and with a common whopper of a bar, he would have trotted off, and enjoyed himself. 'Twould astonish you to know how big he was: I made a *bedspread of his skin* and the way it used to cover my bar mattress, and leave several feet on each side to tuck up, would have delighted you. It was in fact a creation bar, and if it had lived in Samson's time, and had met him, in a fair fight, it would have licked him in the twinkling of a dice-box. But, strangers, I never like the way I hunted, and *missed him.* There is something curious about it, I could never understand,—and I never was satisfied at his giving in so easy at last. Perhaps, he had heard of my preparations to hunt him the next day, so he jist come in, like Capt. Scott's coon, to save his wind to grunt with in dying; but that ain't likely. My private opinion is, that that bar was an *unhuntable bar, and died when his time come."*

When the story was ended, our hero sat some minutes with his auditors in a grave silence; I saw there was a mystery to him connected with the bear whose death

---

81 Capt. Scott's coon. Oral lore pictured Captain Scott as such a great hunter that when he approached a raccoon, the animal shouted down to him, "Don't shoot! I'm a-comin' down." The same tall story was told about Davy Crockett (see p. 773)

he had just related, that had evidently made a strong impression on his mind. It was also evident that there was some superstitious awe connected with the affair,—a feeling common with all "children of the wood," when they meet with any thing out of their everyday experience. He was the first one, however, to break the silence, and jumping up, he asked all present to "liquor" before going to bed,—a thing which he did, with a number of companions, evidently to his heart's content.

Long before day, I was put ashore at my place of destination, and I can only follow with the reader, in imagination, our Arkansas friend, in his adventures at the "Forks of Cypress" on the Mississippi.

1841

LITERARY COMEDIANS: Browne, Shaw

Charles Farrar Browne (Artemus Ward)

1834 • 1867

Beginning as a printer's devil, Charles Farrar Browne, like Samuel L. Clemens, drifted into humorous writing and lecturing and was, at the end of his life, fabulously well known. He was born in Waterford, Maine, in 1834. As a young man, he was apprenticed to a printer in Lancaster, New Hampshire. From there he went to other printing shops, first in New England, later in the Middle West. In time he moved from his printer's case to the editorial desks of various newspapers.

Browne was an editor of the Cleveland, Ohio, *Plain Dealer* in 1858 when some playful letters he composed started him on his way to fame. Artemus Ward, the purported author of the letters, introduced himself as the illiterate, humorless owner of an itinerant waxworks and menagerie. From various towns he wrote requests for publicity or accounts of his adventures while traveling. After these pieces had won a large following for him, Browne went to New York to work on the comic magazine *Vanity Fair*. In 1861 he embarked on a highly remunerative career as a comic lecturer, and during the next several years he attracted large audiences in lecture halls everywhere in this country and, eventually, in Egyptian Hall in London. He died in England in 1867.

Browne, in contrast with such earlier comic authors as Seba Smith and William Tappan Thompson, became a full-time humorist. To keep his readers and his lecture audiences laughing, he perfected all sorts of tricks which amused—bad spellings and queer sentences, phrases, and words. Since the emphasis on laughable diction was so great, Browne tried less and less to depict a clear-cut character, and in time Artemus Ward was hard to distinguish from his creator. They stood for the same things and got laughs by employing the same devices. Browne was typical of a majority of the humorists of his day—professional funnymen, literary comedians who exploited the humor of diction rather than the humor of character. Although these humorists have lost some of their appeal because the taste for poor grammar and distorted spelling in humor has largely abated, their writings are interesting as social documents and as works foreshadowing much of the "free association humor" of such twentieth-century authors as Benchley, Thurber, and Perelman.

Artemus Ward, His Book

ONE OF MR. WARD'S BUSINESS LETTERS

To the Editor of the———

Sir—I'm movin along—slowly along—down tords your place. I want you should rite me a letter, sayin how is the show bizniss in your place. My show at present consists of three moral Bares, a Kangaroo (a amoozin little Raskal—t' would make you larf yerself to deth to see the little cuss jump up and squeal) wax figgers of G. Washington Gen. Tayler John Bunyan Capt. Kidd and Dr. Webster in the act of killin Dr. Parkman, besides several miscellanyus moral wax statoots of celebrated piruts & murderers, &c., ekalled by few & exceld by none. Now Mr. Editor, scratch orf a few lines sayin how is the show bizniss down to your place. I shall hav my hanbills dun at your offiss. Depend upon it. I want you should git my hanbills up in flamin stile. Also git up a tremenjus excitemunt in yr. paper 'bowt my onparaleld Show. We must fetch the public sumhow. We must wurk on their feelins. Cum the moral on 'em strong. If it's a temprance community tell 'em I sined the pledge fifteen minits arter Ise born, but on the contery ef your peple take their tods, say Mister Ward is as Jenial a feller as we ever met, full of conwiviality, & the life an sole of the Soshul Bored. Take, don't you? If you say anythin abowt my show say my snaiks is as harmliss as the new born Babe. What a interestin study it is to see a zewological animil like a snaik under perfeck subjecshun! My kangaroo is the most larfable little cuss I ever saw. All for 15 cents. I am anxyus to skewer your infloounce. I repeet in regard to them hanbills that I shall git 'em struck orf up to your printin office. My perlitercal sentiments agree with yourn exactly. I know thay do, becawz I never saw a man whoos didn't.

Respectively yures,

A. Ward.

P.S.—You scratch my back & Ile scratch your back.

1858·1862

INTERVIEW WITH PRESIDENT LINCOLN

I hav no politics. Nary a one. I'm not in the bisiness. If I was I spose I should holler versiffrusly in the streets at nite and go home to Betsy Jane smellen of coal ile and gin, in the mornin. I should go to the Poles arly. I should stay there all day. I should see to it that my nabers was thar. I should git carriges to take the kripples, the infirm and the indignant thar. I should be on guard agin frauds and sich. I should be on the look out for the infamus lise of the enemy, got up jest be4 elecshun for perlitical effeck. When all was over and my candydate was elected, I should move heving & arth—so to speak—until I got orfice, which if I didn't git a orfice I should turn round and abooze the Administration with all my mite and maine. But I'm not in the bisness. I'm in a far more respectful bisniss nor what pollertics is. I wouldn't giv two cents to be a Congresser. The wuss insult I ever received was when sertin citizens of Baldinsville axed me to run fur the Legislater. Sez I, My frends, dostest think I'd stoop to that there?" They turned as white as a sheet. I spoke in my most orfullest tones, & they knowd I wasn't to be trifled with. They slunked out of site to onct.

There4, havin no politics, I made bold to visit Old Abe at his humstid in Springfield. I found the old feller in his parler, surrounded by a perfeck swarm of orfice seekers. Knowin he had been capting of a flat boat on the roarin Mississippy I thought I'd address him in sailor lingo, so sez I "Old Abe, ohoy! Let out yer mainsuls, reef hum the forecastle & throw yer jib-poop overboard! Shiver my timbers, my harty!" [N. B. This is ginuine mariner langwidge. I know, becawz I've seen sailor plays acted out by them New York theater fellers.] Old Abe lookt up quite cross & sez, "Send in yer petition by & by. I can't possibly look at it now. Indeed, I can't. It's onpossible sir."

"Mr. Linkin, who do you spect I air?" sed I.

"A orfice-seeker, to be sure?" sed he.

"Wall, sir," sed I, "yous never more mistaken in your life. You hain't gut a orfiss I'd take under no circumstances. I'm A. Ward. Wax figgers is my perfeshun. I'm the father of Twins, and they look like me—*both of them.* I cum to pay a frendly visit to the President eleck of the United States. If so be you wants to see me say so—if not, say so, & I'm orf like a jug handle."

"Mr. Ward, sit down. I am glad to see you, Sir."

"Repose in Abraham's Buzzum!" sed one of the orfice seekers, his idee bein to git orf a goak at my expense.

"Wall," sez I, "ef all you fellers repose in that there Buzzum thare'll be mity poor nussin for sum of you!" whereupon Old Abe buttoned his weskit clear up and blusht like a maidin of sweet 16. Jest at this pint of the conversation another swarm of the orfice-seekers arrove & cum pilin into the parler. Sum wanted post orfices, sum wanted collectorships sum wantid furrin missions, and all wanted sumthin. I thought Old Abe would go crazy. He hadn't more than had time to shake hands with 'em, before another tremenjis crowd cum porein onto his premises. His house and dooryard was now perfeckly overflowed with orfice seekers, all clameruss for a immejit interview with Old Abe. One man from Ohio, who had about seven inches of corn whisky into him, mistook me for Old Abe and addrest me as "The Prahayrie Flower of the West!" Thinks I *you* want a offiss putty bad. Another man with a gold heded cane and a red nose told Old Abe he was "a seckind Washington & the Pride of the Boundliss West."

Sez I, "Square, you wouldn't take a small postoffis if you could git it, would you?"

Sez he, "A patrit is abuv them things, sir!"

"There's a putty big crop of patrits this season, ain't there Squire?" sez I, when *another* crowd of offiss seekers pored in. The house, door-yard, barn & woodshed was now all full, and when another crowd cum I told 'em not to go away for wan't of room as the hog-pen was still empty. One patrit from a small town in Michygan went up on top the house, got into the chimney and slid down into the parler where Old Abe was endeverin to keep the hungry pack of orfice-seekers from chawin him up alive without benefit of clergy. The minit he reached the fire-place he jumpt up, brusht the soot out of his eyes, and yelled: "Don't make eny pintment at the Spunkville postoffiss till you've read my papers. All the respectful men in our town is signers to that there dockyment!"

"Good God!" cride Old Abe, "they cum upon me from the skize—down the chimneys, and from the bowels of the yearth!" He hadn't more'n got them words out of his delikit mouth before two fat offiss-seekers from Wisconsin, in endeverin to crawl atween his legs for the purpuss of applyin for the toll-gate-ship at Milwawky, upsot the President eleck & he would hev gone sprawlin into the fire-place if I hadn't caught him in these arms. But I hadn't more'n stood him up strate before another man cum crashin down the chimney, his head strikin me vilently agin the inards and prostratin my voluptoous form onto the floor.

"Mr. Linkin," shoutid the infatooated being, "my papers is signed by every clergyman in our town, and likewise the skoolmaster!"

Artemus Ward interviews President Lincoln.

Sez I, "you egrejis ass," gittin up & brushin the dust from my eyes, "I'll sign your papers with this bunch of bones, if you don't be a little more keerful how you make my bread basket a depot in the futer. How do you like that air perfumery?" sez I, shuving my fist under his nose. "Them's the kind of papers I'll giv you! Them's the paper's you want!"

"But I workt hard for the ticket; I toiled night and day! The patrit should be rewarded!"

"Virtoo," sed I, holdin' the infatooated man by the coat-collar, "Virtoo, sir, is its own reward. Look at me!" He did look at me, and qualed be4 my gase. "The fact is," I continued, lookin' round on the hungry crowd, "there is scacely a offiss for every ile lamp carrid round durin' this campane. I wish thare was. I wish thare was

furrin missions to be filled on varis lonely Islands where eppydemics rage incessantly, and if I was in Old Abe's place I'd send every mother's son of you to them. What air you here for?" I continnered, warmin up considerable, "can't you giv Abe a minit's peace? Don't you see he's worrid most to death! Go home, you miserable men, go home & till the sile! Go to peddlin tinware—go to choppin wood—go to bilin' sope—stuff sassengers—black boots—git a clerkship on sum respectable manure cart—go round as original Swiss Bell Ringers—becum 'origenal and only' Campbell Minstrels—go to lecturin at 50 dollars a nite—imbark in the peanut bizniss—*write for the Ledger*—saw off your legs and go round givin concerts, with techin appeals to a charitable public, printed on your handbills—anything for a honest living, but don't come round here drivin Old Abe crazy by your outrajis cuttings up! Go home. Stand not upon the order of your goin' but go to onct! If in five minits from this time," sez I pullin' out my new sixteen dollar huntin cased watch, and brandishin' it before their eyes, "Ef in five minits from this time a single sole of you remains on these here premises, I'll go out to my cage near by, and let my Boy Constructor loose! & ef he gits amung you, you'll think old Solferino has cum again and no mistake!" You ought to hev seen them scamper, Mr. Fair. They run orf as tho Satun his self was arter them with a red hot ten pronged pitchfork. In five minits the premises was clear.

"How kin I ever repay you, Mr. Ward, for your kindness?" sed Old Abe, advancin and shakin me warmly by the hand. "How kin I ever repay you, sir?"

"By givin the whole country a good, sound administration. By poerin' ile upon the troubled waturs, North and South. By pursooin' a patriotic, firm, and just course, and then if any State wants to secede, let 'em Sesesh!"

"How 'bout my Cabinit, Mister Ward?" sed Abe.

"Fill it up with Showmen sir! Showmen is devoid of politics. They hain't got any principles! They know how to cater for the public. They know what the public wants, North & South Showmen, sir, is honest men. Ef you doubt their literary ability, look at their posters, and see small bills! Ef you want a Cabinit as is a Cabinit fill it up with showmen, but don't call on me. The moral wax figger perfeshun musn't be permitted to go down while there's a drop of blood in these vains! A. Linkin, I wish you well! Ef Powers or Walcutt wus to pick out a model for a beautiful man, I scarcely think they'd sculp you; but ef you do the fair thing by your country you'll make as putty a angel as any of us! A. Linkin, use the talents which Nature has put into you judishusly and firmly, and all will be well. A. Linkin, adoo!"

He shook me cordyully by the hand—we exchanged picters, so we could gaze upon each others' liniments when far away from one another—he at the hellum of the ship of State, and I at the hellum of the show bizniss—admittance only 15 cents.

1861·1862

Henry Wheeler Shaw (Josh Billings)

1818 • 1885

"He was Aesop and Ben Franklin, condensed and abridged." So Bill Arp, a contemporary of Henry Wheeler Shaw, described Shaw's creation, Josh Billings. Believing that "you have got to be wise before you can be witty," Shaw adapted to the days of the literary comedian the materials and techniques of earlier aphorists and moralizers. Americans, long fond of horse sense spiced with humor, naturally found such a writer most appealing.

Shaw was born in Lanesboro, Massachusetts, April 21, 1818. He prepared for college at Lenox Academy, and then attended Hamilton College for about two years before he was expelled for a prank. At seventeen he migrated to the West, where he traveled widely, stopping off now and then to do odd jobs. He was, at various times, a farmer, a coal operator, and a proprietor of an Ohio River steamboat before he returned to the East and settled down to be a real estate operator and an auctioneer in Poughkeepsie, New York. In the late 1850's, when some of his comic writings for newspapers were widely reprinted, he got off to a start as a successful funnyman. He moved to New York City and remained there the rest of his life.

Lectures and the publication of his work in newspapers, magazines, and books—*Josh Billings, His Sayings* (1865), *Josh Billings on Ice and Other Things* (1868)—added to his fame. Beginning in 1869, he published an annual series titled *Josh Billings' Farmer's Allminax* which sold more than a hundred thousand copies almost every year for a decade.

Billings was famous not for stories but for essays or single sentences packed with amusingly phrased common sense. His kinship with Poor Richard was obvious, but his cacography showed that his writing was also related to that of such a contemporary as Artemus Ward. In his hayfield cogitations on beasts and men, in addition to a flair for comic and well-ordered sentences, he had, as Max Eastman has observed, a gift for setting down "a series of verbal pictures" expressing his ideas. This talent for concreteness is evident in such a sentence as "Pride lives on itself, it is like a raccoon in the winter, kept fat by sucking its claws." It is also evident in the selections which follow.

Josh Billings, His Works Complete, New York, 1888 • Cyril Clemens, Josh Billings, Yankee Humorist, Webster Groves, Missouri, 1932

Essa on the Muel

The muel iz haf hoss and haf Jackass, and then kums tu a full stop, natur diskovering her mistake.

Tha weigh more, akordin tu their heft, than enny other kreetur, except a crowbar.

Tha kant hear enny quicker, nor further than the hoss, yet their ears are big enuff for snow shoes.

You kan trust them with enny one whose life aint worth enny more than the muels. The only wa tu keep them in a paster, is tu turn them into a medder jineing, and let them jump out.

Tha are reddy for use, just as soon as they will du tu abuse.

Tha haint got enny friends, and will live on huckle berry brush, with an ockasional chanse at Kanada thistels.

Tha are a modern invenshun, i dont think the Bible deludes tu them at tall.

Tha sel for more money than enny other domestik animile. Yu kant tell their age by looking into their mouth, enny more than you kould a Mexican kannons. Tha never hav no dissease that a good club wont heal.

If tha ever die tha must kum rite tu life agin, for i never herd noboddy sa "ded muel."

Tha are like sum men, verry korrupt at harte; ive known them tu be good muels for 6 months, just tu git a good chanse to kick sumbody.

I never owned one, nor never mean to, unless thare is a United Staits law passed, requiring it.

The only reason why tha are pashunt, is bekause tha are ashamed ov themselfs.

I have seen eddikated muels in a sirkus.

Tha kould kick, and bite, tremenjis. I would not sa what I am forced tu sa again the muel, if his birth want an outrage, and man want tu blame for it.

Enny man who is willing tu drive a muel, ought to be exempt by law from running for the legislatur.

Tha are the strongest creeturs on earth, and heaviest ackording tu their sise; I herd tell ov one who fell oph from the tow path, on the Eri kanawl, and sunk as soon as he touched bottom, but he kept rite on towing the boat tu the nex stashun, breathing thru his ears, which stuck out ov the water about 2 feet 6 inches; i didn't see this did, but an auctioneer told me ov it, and i never knew an auctioneer tu lie unless it was absolutely convenient.

1860

Hoss Sense

There is nothing that has bin diskovered yet, that iz as skarse as good Hoss sense, about 28 hoss power.

I don't mean race hoss, nor trotting hoss sense, that kan run a mile in 1:28 and then brake down; nor trot in 2:13, and good for nothing afterwards, only to brag on; but I mean the all-day hoss sense, that iz good for 8 miles an hour, from rooster crowing in the morning, until the cows cum home at night, klean tew the end ov the road.

I hav seen fast sense, that was like sum hosses, who could git so far in one day that it would take them two days tew git back, on a litter. I don't mean this kind nuther.

Good hard-pan sense iz the thing that will wash well, wear well, iron out without wrinkling, and take starch without kracking.

Menny people are hunting after uncommon sense, but they never find it a good deal; uncommon sense iz ov the nature of genius, and all genius iz the gift of God, and kant be had, like hens eggs, for the hunting.

Good, old-fashioned common sense iz one ov the hardest things in the world to out-wit, out-argy, or beat in enny way, it iz az honest az a loaf ov good domestik bread, alwus in tune either hot from the oven or 8 days old.

Common sense kan be improved upon by edukashun —genius kan be too, sum, but not much.

Edukashun gauls genius like a bad setting harness.

Common sense iz like biled vittles, it is good right from the pot, and it is good nex day warmed up.

If every man waz a genius, mankind would be az bad oph az the heavens would be, with every star a comet, things would git hurt badly, and noboddy tew blame.

Common sense iz instinkt, and instinkt don't make enny blunders mutch, no more than a rat duz, in coming out, or going intew a hole, he hits the hole the fust time, and just fills it.

Genius iz always in advance ov the times, and makes sum magnificent hits, but the world owes most ov its tributes to good hoss sense.

1873?

John Greenleaf Whittier

1807 • 1892

Even during the years when he had been active as an abolitionist (see pp. 635-641), Whittier had written a good deal of verse and prose portraying the life and lore of his native district, Essex County in Massachusetts. "His mind," as Van Wyck Brooks has said, "was steeped in local associations, tales of witches, tales of the Indian wars, the gossip of wandering farm hands and gypsies." He had used such materials in *Legends of New England* (1831), *Mogg Megone* (1836), *Lays of My Home and Other Poems* (1843), *Margaret Smith's Journals* (1849), and *Home Ballads, Poems and Lyrics* (1860).

After the end of the Civil War, Whittier devoted more of his energies to writing regional poetry, publishing his most admired poem, *Snow-Bound* (1866), as well as *The Tent of the Beach and Other Poems* (1867), *Among the Hills and Other Poems* (1869), *Ballads of New England* (1870), and other less notable volumes of verse.

In his poetic local color writing, Whittier belonged to the tradition represented before his birth by the poet of Scottish rural life, Robert Burns, and carried on today by Robert Frost. His achievement was to record in simple verse the sort of life lived in New England before his day and during his lifetime. At times—particularly in his idyllic reminiscence, "The Barefoot Boy"—he was sentimental; but on many occasions he created authentic and detailed depictions of Yankee life. (For bibliographical note, see p. 636.)

The Barefoot Boy

Blessings on thee, little man,
Barefoot boy, with cheek of tan!
With thy turned-up pantaloons,
And thy merry whistled tunes;
With thy red lip, redder still
Kissed by strawberries on the hill;
With the sunshine on thy face,
Through thy torn brim's jaunty grace,
From my heart I give thee joy,—
I was once a barefoot boy!
Prince thou art,—the grown-up man
Only is republican.
Let the million-dollared ride!
Barefoot, trudging at his side,
Thou hast more than he can buy
In the reach of ear and eye,—
Outward sunshine, inward joy:
Blessings on thee, barefoot boy!

O for boyhood's painless play,
Sleep that wakes in laughing day,
Health that mocks the doctor's rules,
Knowledge never learned of schools,
Of the wild bee's morning chase,
Of the wild-flower's time and place,
Flight of fowl and habitude
Of the tenants of the wood,
How the tortoise bears his shell,
How the woodchuck digs his cell,
And the ground-mole sinks his well;
How the robin feeds her young,
How the oriole's nest is hung;

Where the whitest lilies blow,
Where the freshest berries grow,
Where the groundnut trails its vine,
Where the wood-grape's clusters shine;
Of the black wasp's cunning way,
Mason of his walls of clay,
And the architectural plans
Of gray hornet artisans!—
For, eschewing books and tasks,
Nature answers all he asks;
Hand in hand with her he walks,
Face to face with her he talks,
Part and parcel of her joy,—
Blessings on the barefoot boy!

O for boyhood's time of June,
Crowding years in one brief moon,
When all things I heard or saw,
Me, their master, waited for.
I was rich in flowers and trees,
Humming-birds and honey-bees;
For my sport the squirrel played,
Plied the snouted mole his spade;
For my taste the blackberry cone
Purpled over hedge and stone,
Laughed the brook for my delight
Through the day and through the night,
Whispering at the garden wall,
Talked with me from fall to fall;
Mine the sand-rimmed pickerel pond,
Mine the walnut slopes beyond,
Mine, on bending orchard trees,
Apples of Hesperides!
Still as my horizon grew,
Larger grew my riches too,
All the world I saw or knew
Seemed a complex Chinese toy,
Fashioned for a barefoot boy!

O for festal dainties spread,
Like my bowl of milk and bread,—
Pewter spoon and bowl of wood,
On the door-stone, gray and rude!
O'er me, like a regal tent,
Cloudy-ribbed, the sunset bent,
Purple-curtained, fringed with gold,
Looped in many a wind-swung fold;
While for music came the play
Of the pied frog's orchestra;
And, to light the noisy choir,
Lit the fly his lamp of fire.
I was monarch: pomp and joy
Waited on the barefoot boy!

Cheerily, then, my little man,
Live and laugh, as boyhood can!
Though the flinty slopes be hard,
Stubble-speared the new-mown sward,
Every morn shall lead thee through
Fresh baptisms of the dew;
Every evening from thy feet
Shall the cool wind kiss the heat:
All too soon these feet must hide
In the prison cells of pride,
Lose the freedom of the sod,
Like a colt's for work be shod,
Made to tread the mills of toil,
Up and down in ceaseless moil:
Happy if their track be found
Never on forbidden ground;
Happy if they sink not in
Quick and treacherous sands of sin.
Ah! that thou couldst know thy joy,
Ere it passes, barefoot boy!

1856

Skipper Ireson's Ride

This poem, Whittier said in a letter of 1880, twenty-three years after its publication, "was founded solely on a fragment of rhyme which I heard from one of my early schoolmasters, a native of Marblehead. I supposed the story to which it referred dated back at least a century. I knew nothing of the participators, and the narrative of the ballad was pure fancy." The letter was addressed to Samuel Roads, Jr., who, in his **History of Marblehead**, had stated that Ireson's crew, rather than the Captain, actually had been responsible for the abandonment of the vessel. Whittier was indebted to James Russell Lowell, then editor of the **Atlantic**, for the suggestion that the quoted refrain be phrased in Cape Ann dialect.

Of all the rides since the birth of time,
Told in story or sung in rhyme,—
On Apuleius's Golden Ass,
Or one-eyed Calendar's horse of brass,
Witch astride of a human back,
Islam's prophet on Al-Borák,—
The strangest ride that ever was sped
Was Ireson's, out from Marblehead!
  Old Floyd Ireson, for his hard heart,
  Tarred and feathered and carried in a cart
    By the women of Marblehead!

Body of turkey, head of owl,
Wings a-droop like a rained-on fowl,
Feathered and ruffled in every part,
Skipper Ireson stood in the cart.
Scores of women, old and young,
Strong of muscle, and glib of tongue,
Pushed and pulled up the rocky lane,
Shouting and singing the shrill refrain:
  "Here's Flud Oirson, fur his horrd horrt,
  Torr'd an' futherr'd an' corr'd in a corrt
    By the women o' Morble'ead!"

Wrinkled scolds with hands on hips,
Girls in bloom of cheek and lips,
Wild-eyed, free-limbed, such as chase
Bacchus round some antique vase,
Brief of skirt, with ankles bare,
Loose of kerchief and loose of hair,
With conch-shells blowing and fish-horns' twang,
Over and over the Maenads sang.
  "Here's Flud Oirson, fur his horrd horrt,
  Torr'd an' futherr'd an' corr'd in a corrt
    By the women o' Morble'ead!"

Small pity for him!—He sailed away
From a leaking ship, in Chaleur Bay,—
Sailed away from a sinking wreck,
With his own town's-people on her deck!
"Lay by! lay by!" they called to him.
Back he answered, "Sink or swim!
Brag of your catch of fish again!"
And off he sailed through the fog and rain!
  Old Floyd Ireson, for his hard heart,
  Tarred and feathered and carried in a cart
    By the women of Marblehead!

Fathoms deep in dark Chaleur
That wreck shall lie forevermore.
Mother and sister, wife and maid,
Looked from the rocks of Marblehead
Over the moaning and rainy sea,—
Looked for the coming that might not be!
What did the winds and the sea-birds say
Of the cruel captain who sailed away?—
  Old Floyd Ireson, for his hard heart,
  Tarred and feathered and carried in a cart
    By the women of Marblehead!

Through the street, on either side,
Up flew windows, doors swung wide;
Sharp-tongued spinsters, old wives gray,
Treble lent the fish-horn's bray.
Sea-worn grandsires, cripple-bound,
Hulks of old sailors run aground,
Shook head, and fist, and hat, and cane,
And cracked with curses the hoarse refrain.
  "Here's Flud Oirson, fur his horrd horrt,
  Torr'd an' futherr'd an' corr'd in a corrt
    By the women o' Morble'ead!"

Sweetly along the Salem road
Bloom of orchard and lilac showed.
Little the wicked skipper knew
Of the fields so green and the sky so blue.
Riding there in his sorry trim,
Like an Indian idol glum and grim,
Scarcely he seemed the sound to hear
Of voices shouting, far and near:
  "Here's Flud Oirson, fur his horrd horrt,
  Torr'd an' futherr'd an' corr'd in a corrt
    By the women o' Morble'ead!"

"Hear me, neighbors!" at last he cried,—
"What to me is this noisy ride?
What is the shame that clothes the skin

---

3 Apuleius's Golden Ass, the ass into which a young man was transformed in Lucius Apuleius' Roman satire, **Metamorphoses** (155 A D ?) • **4 Calendar,** the story of "The Third Calendar" in **The Arabian Nights** • **6 Islam's . . . Al-Borák.** Mohammed, the prophet of Islam, was carried to the seventh heaven on a winged white animal called Al-Borák • **26 Bacchus,** god of wine, is frequently portrayed on antique vases • **30 Maenads,** also called Bacchantes, the feminine followers of the god • **35 Chaleur Bay,** inlet of the Gulf of St. Lawrence

To the nameless horror that lives within?
Waking or sleeping, I see a wreck,
And hear a cry from a reeling deck!
Hate me and curse me,—I only dread
The hand of God and the face of the dead!"
  Said old Floyd Ireson, for his hard heart,
  Tarred and feathered and carried in a cart
    By the women of Marblehead!

Then the wife of the skipper lost at sea
Said, "God has touched him!—why should we?"
Said an old wife mourning her only son,
"Cut the rogue's tether and let him run!"
So with soft relentings and rude excuse,
Half scorn, half pity, they cut him loose,
And gave him a cloak to hide him in,
And left him alone with his shame and sin.
  Poor Floyd Ireson, for his hard heart,
  Tarred and feathered and carried in a cart
    By the women of Marblehead!

1857

Telling the Bees

Samuel T. Pickard, Whittier's biographer, notes that the description at the beginning of this poem contains many details concerning the poet's own birthplace. The approach, the "gap in the old wall," "the stepping-stones," the garden and its daffodils, the red-barred gate, the poplars, the cattle-yard were all parts of the scene. But the story is wholly imaginative: Whittier's sister Mary was still living when the poem was written.

Here is the place; right over the hill
  Runs the path I took:
You can see the gap in the old wall still,
  And the stepping-stones in the shallow brook.

There is the house, with the gate red-barred,
  And the poplars tall;
And the barn's brown length, and the cattle-yard,
  And the white horns tossing above the wall.

There are the beehives ranged in the sun;
  And down by the brink
Of the brook are her poor flowers, weed o'errun,
  Pansy and daffodil, rose and pink.

A year has gone, as the tortoise goes,
  Heavy and slow;
And the same rose blows, and the same sun glows,
  And the same brook sings of a year ago.

There's the same sweet clover-smell in the breeze,
  And the June sun warm
Tangles his wings of fire in the trees,
  Setting, as then, over Fernside farm.

I mind me how with a lover's care
  From my Sunday coat
I brushed off the burrs, and smoothed my hair,
  And cooled at the brookside my brow and throat.

Since we parted, a month had passed,—
  To love, a year;
Down through the beeches I looked at last
  On the little red gate and the well-sweep near.

I can see it all now,—the slantwise rain
  Of light through the leaves,
The sundown's blaze on her window-pane,
  The bloom of her roses under the eaves.

Just the same as a month before,—
  The house and the trees,
The barn's brown gable, the vine by the door,—
  Nothing changed but the hives of bees.

Before them, under the garden wall,
  Forward and back,
Went drearily singing the chore-girl small,
  Draping each hive with a shred of black.

Trembling, I listened: the summer sun
  Had the chill of snow;
For I knew she was telling the bees of one
  Gone on the journey we all must go!

Then I said to myself, "My Mary weeps
  For the dead to-day:
Haply her blind old grandsire sleeps
  The fret and the pain of his age away."

But her dog whined low; on the doorway sill,
With his cane to his chin,
The old man sat; and the chore-girl still
Sung to the bees stealing out and in.

And the song she was singing ever since
In my ear sounds on:—
"Stay at home, pretty bees, fly not hence!
Mistress Mary is dead and gone!"

1857

Snow-Bound

A Winter Idyl

Of this poem, Whittier wrote a friend, "It is a winter idyl —a picture of an old-fashioned farmer's fireside in winter— and if it were not mine I should call it pretty good." This memorial poem, written shortly after the death of two persons—his sister and his mother—whom the poet had loved very much, was a loving re-creation of the scenes and personalities of the poet's boyhood.

Despite his faith in the excellence of the poem, Whittier was astonished at the public reception. Because it was a poem which all could understand and because it expressed sentiments shared by many Americans, it sold widely. It is still generally considered the best poem of its kind ever written in America.

Whittier wrote this note on the poem: "The inmates of the family at the Whittier homestead who are referred to . . . were my father, mother, my brother and two sisters, and my uncle and aunt, both unmarried. In addition, there was the district school-master, who boarded with us. The 'not unfeared, half-welcome guest' was Harriet Livermore . . . a young woman of fine natural ability, enthusiastic, eccentric, with slight control over her violent temper, which sometimes made her religious profession doubtful. . . . She early embraced the doctrine of the Second Advent, and felt it her duty to proclaim the Lord's speedy coming."

To the Memory of the Household It Describes, This Poem Is Dedicated by the Author

"As the Spirits of Darkness be stronger in the dark, so Good Spirits which be Angels of Light are augmented not only by the Divine light of the Sun, but also by our common VVood Fire: and as the Celestial Fire drives away dark spirits, so also this our Fire of VVood doth the same."—

COR AGRIPPA, Occult Philosophy, *Book I. ch. v.*

"Announced by all the trumpets of the sky,
Arrives the snow; and, driving o'er the fields,
Seems nowhere to alight; the whited air
Hides hills and woods, the river and the heaven,
And veils the farm-house at the garden's end.
The sled and traveller stopped, the courier's feet
Delayed, all friends shut out, the housemates sit
Around the radiant fireplace, enclosed
In a tumultuous privacy of storm."—

EMERSON, The Snow-Storm.

The sun that brief December day
Rose cheerless over hills of gray,
And, darkly circled, gave at noon
A sadder light than waning moon.
Slow tracing down the thickening sky
Its mute and ominous prophecy,
A portent seeming less than threat,
It sank from sight before it set.
A chill no coat, however stout,
Of homespun stuff could quite shut out,
A hard, dull bitterness of cold,
That checked, mid-vein, the circling race
Of life-blood in the sharpened face,
The coming of the snow-storm told.
The wind blew east; we heard the roar.
Of Ocean on his wintry shore,
And felt the strong pulse throbbing there
Beat with low rhythm our inland air.

Meanwhile we did our nightly chores,—
Brought in the wood from out of doors,
Littered the stalls, and from the mows
Raked down the herd's-grass for the cows:
Heard the horse whinnying for his corn;
And, sharply clashing horn on horn,
Impatient down the stanchion rows
The cattle shake their walnut bows;

---

15 wind blew east, from the east. The home was about fifteen miles west of the ocean • 22 herd's-grass, timothy • 26 walnut bows were fastened around the necks of the cows and affixed to the stanchions

While, peering from his early perch
Upon the scaffold's pole of birch,
The cock his crested helmet bent
And down his querulous challenge sent.

Unwarmed by any sunset light
The gray day darkened into night,
A night made hoary with the swarm
And whirl-dance of the blinding storm,
As zigzag wavering to and fro
Crossed and recrossed the wingéd snow:
And ere the early bedtime came
The white drift piled the window-frame,
And through the glass the clothes-line posts
Looked in like tall and sheeted ghosts.

So all night long the storm roared on:
The morning broke without a sun;
In tiny spherule traced with lines
Of Nature's geometric signs,
In starry flake, and pellicle,
All day the hoary meteor fell;
And, when the second morning shone,
We looked upon a world unknown,
On nothing we could call our own.
Around the glistening wonder bent
The blue walls of the firmament,
No cloud above, no earth below,—
A universe of sky and snow!
The old familiar sights of ours
Took marvellous shapes; strange domes and towers
Rose up where sty or corn-crib stood,
Or garden-wall, or belt of wood;
A smooth white mound the brush-pile showed,
A fenceless drift what once was road;
The bridle-post an old man sat
With loose-flung coat and high cocked hat;
The well-curb had a Chinese roof;
And even the long sweep, high aloof,
In its slant splendor, seemed to tell
Of Pisa's leaning miracle.

A prompt, decisive man, no breath
Our father wasted: "Boys, a path!"
Well pleased, (for when did farmer boy
Count such a summons less than joy?)
Our buskins on our feet we drew;
With mittened hands, and caps drawn low,
To guard our necks and ears from snow,
We cut the solid whiteness through.
And, where the drift was deepest, made
A tunnel walled and overlaid
With dazzling crystal: we had read
Of rare Aladdin's wondrous cave,
And to our own his name we gave,
With many a wish the luck were ours
To test his lamp's supernal powers.
We reached the barn with merry din,
And roused the prisoned brutes within.
The old horse thrust his long head out,
And grave with wonder gazed about;
The cock his lusty greeting said,
And forth his speckled harem led;
The oxen lashed their tails, and hooked,
And mild reproach of hunger looked;
The hornéd patriarch of the sheep,
Like Egypt's Amun roused from sleep,
Shook his sage head with gesture mute,
And emphasized with stamp of foot.

All day the gusty north-wind bore
The loosening drift its breath before;
Low circling round its southern zone,
The sun through dazzling snow-mist shone.
No church-bell lent its Christian tone
To the savage air, no social smoke
Curled over woods of snow-hung oak.
A solitude made more intense
By dreary-voicéd elements,
The shrieking of the mindless wind,
The moaning tree-boughs swaying blind,
And on the glass the unmeaning beat
Of ghostly finger-tips of sleet.
Beyond the circle of our hearth
No welcome sound of toil or mirth
Unbound the spell, and testified
Of human life and thought outside.
We minded that the sharpest ear

65 Pisa's . . . miracle, the leaning tower of Pisa • 77 Aladdin's . . . cave refers to the story in The Arabian Nights of Aladdin and his magic lamp • 90 Amun, or Ammon, an Egyptian god who had the head of a ram

The buried brooklet could not hear,
The music of whose liquid lip
Had been to us companionship,
And, in our lonely life, had grown
To have an almost human tone.

As night drew on, and, from the crest
Of wooded knolls that ridged the west,
The sun, a snow-blown traveller, sank
From sight beneath the smothering bank,
We piled, with care, our nightly stack
Of wood against the chimney-back,—
The oaken log, green, huge, and thick,
And on its top the stout back-stick;
The knotty forestick laid apart,
And filled between with curious art
The ragged brush; then, hovering near,
We watched the first red blaze appear,
Heard the sharp crackle, caught the gleam
On whitewashed wall and sagging beam,
Until the old, rude-furnished room
Burst, flower-like, into rosy bloom;
While radiant with a mimic flame
Outside the sparkling drift became,
And through the bare-boughed lilac-tree
Our own warm hearth seemed blazing free.
The crane and pendent trammels showed,
The Turks' heads on the andirons glowed;
While childish fancy, prompt to tell
The meaning of the miracle,
Whispered the old rhyme: *"Under the tree,*
When fire outdoors burns merrily,
There the witches are making tea."

The moon above the eastern wood
Shone at its full; the hill-range stood
Transfigured in the silver flood,
Its blown snows flashing cold and keen,
Dead white, save where some sharp ravine
Took shadow, or the sombre green
Of hemlocks turned to pitchy black
Against the whiteness at their back.
For such a world and such a night
Most fitting that unwarming light,
Which only seemed where'er it fell
To make the coldness visible.

Shut in from all the world without,
We sat the clean-winged hearth about,
Content to let the north-wind roar
In baffled rage at pane and door,
While the red logs before us beat
The frost-line back with tropic heat;
And ever, when a louder blast
Shook beam and rafter as it passed,
The merrier up its roaring draught
The great throat of the chimney laughed,
The house-dog on his paws outspread
Laid to the fire his drowsy head,
The cat's dark silhouette on the wall
A couchant tiger's seemed to fall;
And, for the winter fireside meet,
Between the andirons' straddling feet,
The mug of cider simmered slow,
The apples sputtered in a row,
And, close at hand, the basket stood
With nuts from brown October's wood.

What matter how the night behaved?
What matter how the north-wind raved?
Blow high, blow low, not all its snow
Could quench our hearth-fire's ruddy glow
O Time and Change!—with hair as gray
As was my sire's that winter day,
How strange it seems, with so much gone
Of life and love, to still live on!
Ah, brother! only I and thou
Are left of all that circle now,—
The dear home faces whereupon
That fitful firelight paled and shone.
Henceforward, listen as we will,
The voices of that hearth are still;
Look where we may, the wide earth o'er
Those lighted faces smile no more.
We tread the paths their feet have worn,
We sit beneath their orchard trees,
We hear, like them, the hum of bees
And rustle of the bladed corn;
We turn the pages that they read,

137 **The Turks' heads.** The ornamented tops of the uprights resembled Turkish fezzes • 160 **frost-line,** the cold point at which the radiation of heat from the fire ended • 183 **brother,** Matthew Franklin Whittier (1812-1883)

Their written words we linger o'er,
But in the sun they cast no shade,
No voice is heard, no sign is made,
No step is on the conscious floor!
Yet Love will dream, and Faith will trust,
(Since He who knows our need is just,)
That somehow, somewhere, meet we must.
Alas for him who never sees
The stars shine through his cypress-trees!
Who, hopeless, lays his dead away,
Nor looks to see the breaking day
Across the mournful marbles play!
Who hath not learned in hours of faith
The truth to flesh and sense unknown,
That Life is ever lord of Death,
And Love can never lose its own!

We sped the time with stories old,
Wrought puzzles out, and riddles told,
Or stammered from our school-book lore
"The Chief of Gambia's golden shore."
How often since, when all the land
Was clay in Slavery's shaping hand,
As if a trumpet called, I've heard
Dame Mercy Warren's rousing word:
"Does not the voice of reason cry,
Claim the first right which Nature gave
From the red scourge of bondage fly,
Nor deign to live a burdened slave!"
Our father rode again his ride
On Memphremagog's wooded side;
Sat down again to moose and samp
In trapper's hut and Indian camp;
Lived o'er the old idyllic ease
Beneath St. François' hemlock-trees;
Again for him the moonlight shone
On Norman cap and bodiced zone;
Again he heard the violin play
Which led the village dance away,
And mingled in its merry whirl
The grandam and the laughing girl.
Or, nearer home, our steps he led
Where Salisbury's level marshes spread
Mile-wide as flies the laden bee;
Where merry mowers, hale and strong,
Swept, scythe on scythe, their swaths along
The low green prairies of the sea.
We shared the fishing off Boar's Head,
And round the rocky Isles of Shoals
The hake-broil on the drift-wood coals;
The chowder on the sand-beach made,
Dipped by the hungry, steaming hot,
With spoons of clam-shell from the pot.
We heard the tales of witchcraft old,
And dream and sign and marvel told
To sleepy listeners as they lay
Stretched idly on the salted hay,
Adrift along the winding shores,
When favoring breezes deigned to blow
The square sail of the gundalow
And idle lay the useless oars.

Our mother, while she turned her wheel
Or run the new-knit stocking-heel,
Told how the Indian hordes came down
At midnight on Cocheco town,
And how her own great-uncle bore
His cruel scalp-mark to fourscore.
Recalling, in her fitting phrase,
So rich and picturesque and free,
(The common unrhymed poetry
Of simple life and country ways,)
The story of her early days,—
She made us welcome to her home;
Old hearths grew wide to give us room;
We stole with her a frightened look
At the gray wizard's conjuring-book,

---

215 **The Chief . . . shore.** This line and ll. 220-223 are from "The African Chief" by Sarah Wentworth Morton. Whittier incorrectly attributed them • 224 **father,** John Whittier (1760-1830). As a young man, he had made the trip which he recalls here • 225 **Memphremagog,** a lake in Canada and Vermont • 226 **samp,** corn-meal mush • 229 **St. François,** a river north of Lake Memphremagog • 237 **Salisbury,** a town in northern Massachusetts near the Whittier farm • 242 **Boar's Head,** a promontory on the New England coast between Salisbury and Portsmouth • 243 **Isles of Shoals,** a group of islands near the Boar's Head • 244 **hake,** a fish • 254 **gundalow,** a large, flat-bottomed scow • 256 **mother,** Abigail Hussey Whittier (1781-1857) • 259 **Cocheco,** or Cochecho, a town near Dover, New Hampshire • 270 **conjuring-book.** Whittier's mother, the poet said, "described strange people who lived on the Piscataqua and Cocheco, among whom was Bantam the sorcerer. I have in my possession the wizard's 'conjuring book,' which he solemnly opened when consulted. It is a copy of Cornelius Agrippa's **Magic** printed in 1651." A quotation from this tome precedes the poem

The fame whereof went far and wide
Through all the simple country side;
We heard the hawks at twilight play,
The boat-horn on Piscataqua,
The loon's weird laughter far away;
We fished her little trout-brook, knew
What flowers in wood and meadow grew,
What sunny hillsides autumn-brown
She climbed to shake the ripe nuts down,
Saw where in sheltered cove and bay
The ducks' black squadron anchored lay,
And heard the wild geese calling loud
Beneath the gray November cloud.

Then, haply, with a look more grave,
And soberer tone, some tale she gave
From painful Sewel's ancient tome,
Beloved in every Quaker home,
Of faith fire-winged by martyrdom,
Or Chalkley's Journal, old and quaint,—
Gentlest of skippers, rare sea-saint!—
Who, when the dreary calms prevailed,
And water-butt and bread-cask failed,
And cruel, hungry eyes pursued
His portly presence mad for food,
With dark hints muttered under breath
Of casting lots for life or death,
Offered, if Heaven withheld supplies,
To be himself the sacrifice.
Then, suddenly, as if to save
The good man from his living grave,
A ripple on the water grew,
A school of porpoise flashed in view.
"Take, eat," he said, "and be content;
These fishes in my stead are sent
By Him who gave the tangled ram
To spare the child of Abraham."

Our uncle, innocent of books,
Was rich in lore of fields and brooks,
The ancient teachers never dumb
Of Nature's unhoused lyceum.
In moons and tides and weather wise,
He read the clouds as prophecies,
And foul or fair could well divine,
By many an occult hint and sign,
Holding the cunning-warded keys
To all the woodcraft mysteries;
Himself to Nature's heart so near
That all her voices in his ear
Of beast or bird had meanings clear,
Like Apollonius of old,
Who knew the tales the sparrows told,
Or Hermes who interpreted
What the sage cranes of Nilus said;
A simple, guileless, childlike man,
Content to live where life began;
Strong only on his native grounds,
The little world of sights and sounds
Whose girdle was the parish bounds,
Whereof his fondly partial pride
The common features magnified,
As Surrey hills to mountains grew
In White of Selborne's loving view,—
He told how teal and loon he shot,
And how the eagle's eggs he got,
The feats on pond and river done,
The prodigies of rod and gun;
Till, warming with the tales he told,
Forgotten was the outside cold,
The bitter wind unheeded blew,
From ripening corn the pigeons flew,
The partridge drummed i' the wood, the mink
Went fishing down the river-brink.
In fields with bean or clover gay,
The woodchuck, like a hermit gray,
Peered from the doorway of his cell;
The muskrat plied the mason's trade,
And tier by tier his mud-walls laid;

---

274 **Piscataqua**, a New England river which runs its course chiefly in Maine and New Hampshire • 286 **Sewel's . . . tome.** Willem Sewel (1650-1725) wrote the **History of the Christian People Called Quakers.** Whittier read an American edition published in Philadelphia in 1823 • 289 **Chalkley's Journal**, published in 1747, was by the Quaker preacher Thomas Chalkley (1675-1741) • 305 **the tangled ram.** See Genesis 22.13: "And Abraham lifted up his eyes, and looked, and behold behind him a ram caught in a thicket by his horns: and Abraham went and took the ram, and offered him up for a burnt offering in the stead of his son" • 307 **uncle**, Moses Whittier • 320 **Apollonius**, Greek mystic of Tyana, first century A.D. • 322 **Hermes**, Hermes Trismegistus, an Egyptian god to whom were attributed third-century books on medicine, ritual, and mystic subjects • 332 **White**, Gilbert White (1720-1793), an English naturalist, author of the **Natural History and Antiquities of Selborne**

And from the shagbark overhead
  The grizzled squirrel dropped his shell.

Next, the dear aunt, whose smile of cheer
And voice in dreams I see and hear,—
The sweetest woman ever Fate
Perverse denied a household mate,
Who, lonely, homeless, not the less
Found peace in love's unselfishness,
And welcome wheresoe'er she went,
A calm and gracious element,
Whose presence seemed the sweet income
And womanly atmosphere of home,—
Called up her girlhood memories,
The huskings and the apple-bees,
The sleigh-rides and the summer sails,
Weaving through all the poor details
And homespun warp of circumstance
A golden woof-thread of romance.
For well she kept her genial mood
And simple faith of maidenhood;
Before her still a cloud-land lay,
The mirage loomed across her way;
The morning dew, that dried so soon
With others, glistened at her noon;
Through years of toil and soil and care,
From glossy tress to thin gray hair,
All unprofaned she held apart
The virgin fancies of the heart.
Be shame to him of woman born
Who hath for such but thought of scorn.

There, too, our elder sister plied
Her evening task the stand beside;
A full, rich nature, free to trust,
Truthful and almost sternly just,
Impulsive, earnest, prompt to act,
And make her generous thought a fact,
Keeping with many a light disguise
The secret of self-sacrifice.
O heart sore-tried! thou hast the best
That Heaven itself could give thee,—rest,
Rest from all bitter thoughts and things!
  How many a poor one's blessing went
  With thee beneath the low green tent
Whose curtain never outward swings!

As one who held herself a part
Of all she saw, and let her heart
  Against the household bosom lean,
Upon the motley-braided mat
Our youngest and our dearest sat,
Lifting her large, sweet, asking eyes,
  Now bathed within the fadeless green
And holy peace of Paradise.
Oh, looking from some heavenly hill,
  Or from the shade of saintly palms,
  Or silver reach of river calms,
Do those large eyes behold me still?
With me one little year ago:—
The chill weight of the winter snow
  For months upon her grave has lain;
And now, when summer south-winds blow
  And brier and harebell bloom again,
I tread the pleasant paths we trod,
I see the violet-sprinkled sod
Whereon she leaned, too frail and weak
The hillside flowers she loved to seek,
Yet following me where'er I went
With dark eyes full of love's content.
The birds are glad; the brier-rose fills
The air with sweetness; all the hills
Stretch green to June's unclouded sky;
But still I wait with ear and eye
For something gone which should be nigh,
A loss in all familiar things,
In flower that blooms, and bird that sings.
And yet, dear heart! remembering thee,
  Am I not richer than of old?
Safe in thy immortality,
  What change can reach the wealth I hold?
  What chance can mar the pearl and gold
Thy love hath left in trust with me?
And while in life's late afternoon,
  Where cool and long the shadows grow,
I walk to meet the night that soon
  Shall shape and shadow overflow,
I cannot feel that thou art far,

---

350 **aunt**, Mercy Evans Hussey, who died in 1846 • 378 **elder sister**, Mary Whittier Caldwell (1806-1860) • 396 **Our youngest**, Elizabeth Whittier, who was the poet's closest companion until her death in 1864

Since near at need the angels are;
And when the sunset gates unbar,
  Shall I not see thee waiting stand,
And, white against the evening star,
  The welcome of thy beckoning hand?

Brisk wielder of the birch and rule,
The master of the district school
Held at the fire his favored place,
Its warm glow lit a laughing face
Fresh-hued and fair, where scarce appeared
The uncertain prophecy of beard.
He teased the mitten-blinded cat,
Played cross-pins on my uncle's hat,
Sang songs, and told us what befalls
In classic Dartmouth's college halls.
Born the wild Northern hills among,
From whence his yeoman father wrung
By patient toil subsistence scant,
Not competence and yet not want,
He early gained the power to pay
His cheerful, self-reliant way;
Could doff at ease his scholar's gown
To peddle wares from town to town;
Or through the long vacation's reach
In lonely lowland districts teach,
Where all the droll experience found
At stranger hearths in boarding round,
The moonlit skater's keen delight,
The sleigh-drive through the frosty night,
The rustic party, with its rough
Accompaniment of blind-man's-buff,
And whirling plate, and forfeits paid,
His winter task a pastime made.
Happy the snow-locked homes wherein
He tuned his merry violin,
Or played the athlete in the barn,
Or held the good dame's winding yarn,
Or mirth-provoking versions told
Of classic legends rare and old,
Wherein the scenes of Greece and Rome
Had all the commonplace of home,
And little seemed at best the odds
'Twixt Yankee pedlers and old gods;
Where Pindus-born Araxes took
The guise of any grist-mill brook,
And dread Olympus at his will
Became a huckleberry hill.

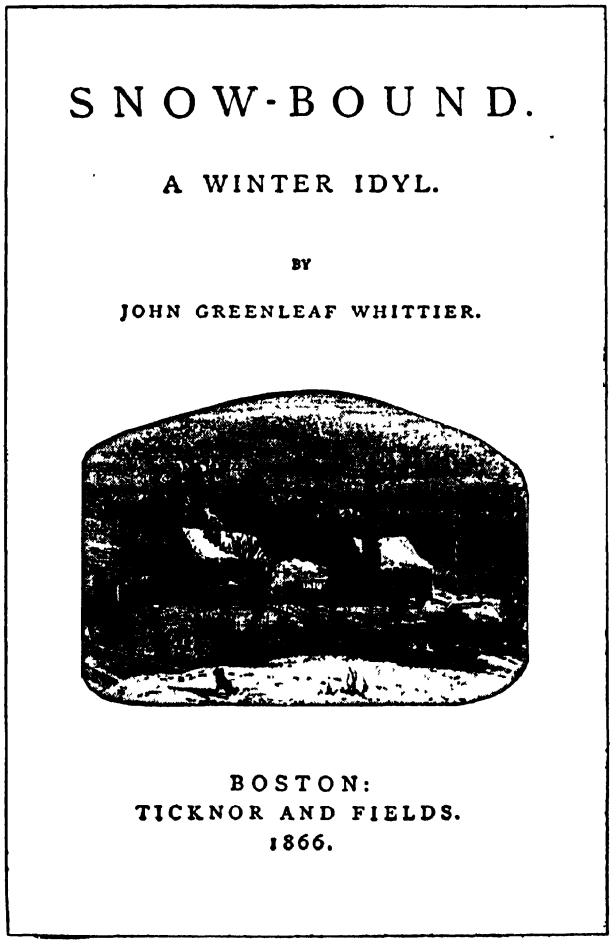
A careless boy that night he seemed;
  But at his desk he had the look
And air of one who wisely schemed,
  And hostage from the future took
  In trainèd thought and lore of book.
Large-brained, clear-eyed,—of such as he
Shall Freedom's young apostles be,
Who, following in War's bloody trail,
Shall every lingering wrong assail;
All chains from limb and spirit strike,
Uplift the black and white alike;
Scatter before their swift advance
The darkness and the Ignorance,
The pride, the lust, the squalid sloth,
Which nurtured Treason's monstrous growth,
Made murder pastime, and the hell
Of prison-torture possible;
The cruel lie of caste refute,
Old forms remould, and substitute
For Slavery's lash the freeman's will,
For blind routine, wise-handed skill;
A school-house plant on every hill,
Stretching in radiate nerve-lines thence
The quick wires of intelligence;
Till North and South together brought
Shall own the same electric thought,
In peace a common flag salute,
And, side by side in labor's free
And unresentful rivalry,
Harvest the fields wherein they fought.

Another guest that winter night
Flashed back from lustrous eyes the light.
Unmarked by time, and yet not young,
The honeyed music of her tongue
And words of meekness scarcely told
A nature passionate and bold,
Strong, self-concentred, spurning guide,
Its milder features dwarfed beside

439 master, George Haskell (1799-1876) • 445 cross-pins, a game in which the object was to cause pins lying in a hat to cross by tapping the hat • 476 Araxes, or Arakthos, a river in Greece which originates in the Pindus mountain range • 510 Another guest, Harriet Livermore

Her unbent will's majestic pride.
She sat among us, at the best,
A not unfeared, half-welcome guest,
Rebuking with her cultured phrase
Our homeliness of words and ways.
A certain pard-like, treacherous grace
  Swayed the lithe limbs and dropped the lash,
  Lent the white teeth their dazzling flash;
  And under low brows, black with night,
  Rayed out at times a dangerous light;
The sharp heat-lightnings of her face
Presaging ill to him whom Fate
Condemned to share her love or hate.
A woman tropical, intense
In thought and act, in soul and sense,
She blended in a like degree
The vixen and the devotee,
Revealing with each freak or feint
  The temper of Petruchio's Kate,
The raptures of Siena's saint.
Her tapering hand and rounded wrist
Had facile power to form a fist;
The warm, dark languish of her eyes
Was never safe from wrath's surprise.
Brows saintly calm and lips devout
Knew every change of scowl and pout;
And the sweet voice had notes more high
And shrill for social battle-cry.

Since then what old cathedral town
Has missed her pilgrim staff and gown,
What convent-gate has held its lock
Against the challenge of her knock!
Through Smyrna's plague-hushed thoroughfares,
Up sea-set Malta's rocky stairs,
Gray olive slopes of hills that hem
Thy tombs and shrines, Jerusalem,
Or startling on her desert throne
The crazy Queen of Lebanon
With claims fantastic as her own,
Her tireless feet have held their way;
And still, unrestful, bowed, and gray,
She watches under Eastern skies,
  With hope each day renewed and fresh,
  The Lord's quick coming in the flesh,
Whereof she dreams and prophesies!



Where'er her troubled path may be,
  The Lord's sweet pity with her go!
The outward wayward life we see,
  The hidden springs we may not know.
Nor is it given us to discern
  What threads the fatal sisters spun,
  Through what ancestral years has run
The sorrow with the woman born,
What forged her cruel chain of moods,
What set her feet in solitudes,
  And held the love within her mute,
What mingled madness in the blood,
  A life-long discord and annoy,
  Water of tears with oil of joy,
And hid within the folded bud
  Perversities of flower and fruit.
It is not ours to separate
The tangled skein of will and fate,
To show what metes and bounds should stand
Upon the soul's debatable land,
And between choice and Providence
Divide the circle of events;
  But He who knows our frame is just,
Merciful and compassionate,
And full of sweet assurances
And hope for all the language is,
  That He remembereth we are dust!

At last the great logs, crumbling low,
Sent out a dull and duller glow,
The bull's-eye watch that hung in view
Ticking its weary circuit through,
Pointed with mutely warning sign
Its black hand to the hour of nine.
That sign the pleasant circle broke:
My uncle ceased his pipe to smoke,
Knocked from its bowl the refuse gray,
And laid it tenderly away,
Then roused himself to safely cover
The dull red brands with ashes over.
And while, with care, our mother laid

---

536 **Petruchio's Kate**, in Shakespeare's *The Taming of the Shrew*, the violent-tempered heroine, Kate, who was subdued by Petruchio • 568 **fatal sisters**, the three Fates of Greek mythology who spun the thread of life, measured it, and snapped it off

The work aside, her steps she stayed
One moment, seeking to express
Her grateful sense of happiness
For food and shelter, warmth and health,
And love's contentment more than wealth,
With simple wishes (not the weak,
Vain prayers which no fulfilment seek,
But such as warm the generous heart,
O'er-prompt to do with Heaven its part)
That none might lack, that bitter night,
For bread and clothing, warmth and light.

Title page of the first edition, 1866.

Within our beds awhile we heard
The wind that round the gables roared,
With now and then a ruder shock,
Which made our very bedsteads rock.
We heard the loosened clapboards tost,
The board-nails snapping in the frost;
And on us, through the unplastered wall,
Felt the light sifted snow-flakes fall.
But sleep stole on, as sleep will do
When hearts are light and life is new;
Faint and more faint the murmurs grew,
Till in the summer-land of dreams
They softened to the sound of streams,
Low stir of leaves, and dip of oars,
And lapsing waves on quiet shores.

Next morn we wakened with the shout
Of merry voices high and clear;
And saw the teamsters drawing near
To break the drifted highways out.
Down the long hillside treading slow
We saw the half-buried oxen go,
Shaking the snow from heads uptost,
Their straining nostrils white with frost.
Before our door the straggling train
Drew up, an added team to gain.
The elders threshed their hands a-cold,
  Passed, with the cider-mug, their jokes
  From lip to lip; the younger folks
Down the loose snow-banks, wrestling, rolled,
Then toiled again the cavalcade
  O'er windy hill, through clogged ravine,
  And woodland paths that wound between
Low drooping pine-boughs winter-weighed.
From every barn a team afoot,
At every house a new recruit,
Where, drawn by Nature's subtlest law
Haply the watchful young men saw
Sweet doorway pictures of the curls
And curious eyes of merry girls,
Lifting their hands in mock defence
Against the snow-ball's compliments,
And reading in each missive tost
The charm with Eden never lost.

We heard once more the sleigh-bells' sound;
  And, following where the teamsters led,
The wise old Doctor went his round,
Just pausing at our door to say,
In the brief autocratic way
Of one who, prompt at Duty's call,
Was free to urge her claim on all,

That some poor neighbor sick abed
At night our mother's aid would need.
For, one in generous thought and deed,
What mattered in the sufferer's sight
The Quaker matron's inward light,
The Doctor's mail of Calvin's creed?
All hearts confess the saints elect
Who, twain in faith, in love agree,
And melt not in an acid sect
The Christian pearl of charity!

So days went on: a week had passed
Since the great world was heard from last.
The Almanac we studied o'er,
Read and reread our little store
Of books and pamphlets, scarce a score;
One harmless novel, mostly hid
From younger eyes, a book forbid,
And poetry, (or good or bad,
A single book was all we had,)
Where Ellwood's meek, drab-skirted Muse,
A stranger to the heathen Nine,
Sang, with a somewhat nasal whine,
The wars of David and the Jews.
At last the floundering carrier bore
The village paper to our door.
Lo! broadening outward as we read,
To warmer zones the horizon spread;
In panoramic length unrolled
We saw the marvels that it told.
Before us passed the painted Creeks,
And daft McGregor on his raids
In Costa Rica's everglades.
And up Taygetos winding slow
Rode Ypsilanti's Mainote Greeks,
A Turk's head at each saddle-bow!
Welcome to us its week-old news,
Its corner for the rustic Muse,
Its monthly gauge of snow and rain,
Its record, mingling in a breath
The wedding knell and dirge of death;
Jest, anecdote, and love-lorn tale,
The latest culprit sent to jail;
Its hue and cry of stolen and lost,
Its vendue sales and goods at cost,
And traffic calling loud for gain.
We felt the stir of hall and street,
The pulse of life that round us beat;
The chill embargo of the snow
Was melted in the genial glow;
Wide swung again our ice-locked door,
And all the world was ours once more!

Clasp, Angel of the backward look
And folded wings of ashen gray
And voice of echoes far away,
The brazen covers of thy book;
The weird palimpsest old and vast,
Wherein thou hid'st the spectral past;
Where, closely mingling, pale and glow
The characters of joy and woe;
The monographs of outlived years,
Or smile-illumed or dim with tears,
Green hills of life that slope to death,
And haunts of home, whose vistaed trees
Shade off to mournful cypresses
With the white amaranths underneath.
Even while I look, I can but heed
The restless sands' incessant fall,
Importunate hours that hours succeed,
Each clamorous with its own sharp need,
And duty keeping pace with all.
Shut down and clasp the heavy lids;
I hear again the voice that bids
The dreamer leave his dream midway
For larger hopes and graver fears:
Life greatens in these later years,
The century's aloe flowers to-day!

Yet, haply, in some lull of life,
Some Truce of God which breaks its strife,
The worldling's eyes shall gather dew,
Dreaming in throngful city ways

---

683 **Ellwood,** Thomas Ellwood (1639-1714), who wrote *Davideis,* a pedestrian poem of King David's life • 693 **Creeks,** an Indian tribe. Probably the story told of their removal to an Indian reservation in 1821 • 694 **daft McGregor,** Sir Gregor McGregor, who in the 1820's tried to establish a colony in Costa Rica • 696 **Taygetos . . . Greeks.** Taygetos is a mountain in Greece near Maina, a district which was noted for its robbers and pirates. During the Greek struggle for independence from Turkey (1821-1833), the Greek General Ypsilanti sent a force of these mountaineers up Mount Taygetos against the Turks

Of winter joys his boyhood knew;
And dear and early friends—the few
Who yet remain—shall pause to view
These Flemish pictures of old days;
Sit with me by the homestead hearth,
And stretch the hands of memory forth
To warm them at the wood-fire's blaze!
And thanks untraced to lips unknown
Shall greet me like the odors blown
From unseen meadows newly mown,
Or lilies floating in some pond,
Wood-fringed, the wayside gaze beyond;
The traveller owns the grateful sense
Of sweetness near, he knows not whence,
And, pausing, takes with forehead bare
The benediction of the air.

1866

From *Among the Hills*

In its first form, "Among the Hills," this poem appeared in the Atlantic, January 1868. Before the volume **Among the Hills and Other Poems** appeared in December of the same year, Whittier made numerous changes. Says Pickard: "The inspiration . . . came to him in the summer of 1867. It is a tender and romantic love-story in verse, idealizing New England farm life; with a prelude which furnishes the darker shades needed to make the picture a faithful reproduction of the rural scenes he intended to portray. . . . In its original form there were sixty-four lines in the Prelude, and it did not deal with the prosaic and disagreeable side of farm life, as does the Prelude in its present form, which consists of one hundred and fifty-six lines. . . . The whole tenor of the Prelude is changed, so as to make it a new poem . . . The ballad proper enlarges upon the sweet story originally told, making three hundred and forty-four lines instead of one hundred and sixty-eight, as at first."

Modern readers may find the poem itself, not included here, rather too sweet for their taste. The Prelude, however, is clearly a forerunner of modern poems and stories which emphasize the drabness and the flinty quality of life on New England farms.

PRELUDE

Along the roadside, like the flowers of gold
That tawny Incas for their gardens wrought,
Heavy with sunshine droops the golden-rod,
And the red pennons of the cardinal-flowers
Hang motionless upon their upright staves.
The sky is hot and hazy, and the wind,
Wing-weary with its long flight from the south,
Unfelt; yet, closely scanned, yon maple leaf
With faintest motion, as one stirs in dreams,
Confesses it. The locust by the wall
Stabs the noon-silence with his sharp alarm.
A single hay-cart down the dusty road
Creaks slowly, with its driver fast asleep
On the load's top. Against the neighboring hill,
Huddled along the stone wall's shady side,
The sheep show white, as if a snowdrift still
Defied the dog-star. Through the open door
A drowsy smell of flowers—gray heliotrope,
And white sweet clover, and shy mignonette—
Comes faintly in, and silent chorus lends
To the pervading symphony of peace.

No time is this for hands long overworn
To task their strength: and (unto Him be praise
Who giveth quietness!) the stress and strain
Of years that did the work of centuries
Have ceased, and we can draw our breath once more
Freely and full. So, as yon harvesters
Make glad their nooning underneath the elms
With tale and riddle and old snatch of song,
I lay aside grave themes, and idly turn
The leaves of memory's sketch-book, dreaming o'er
Old summer pictures of the quiet hills,
And human life, as quiet, at their feet.

And yet not idly all. A farmer's son,
Proud of field-lore and harvest craft, and feeling
All their fine possibilities, how rich
And restful even poverty and toil

Snow-Bound • 747 **Flemish pictures.** The Flemish School (the van Eycks, Rubens, Van Dyck, and others) was noted for its detailed depiction of domestic scenes

Among the Hills • 2 **tawny Incas,** a Peruvian tribe of Indians noted for their handiwork in gold

Become when beauty, harmony, and love
Sit at their humble hearth as angels sat
At evening in the patriarch's tent, when man
Makes labor noble, and his farmer's frock
The symbol of a Christian chivalry
Tender and just and generous to her
Who clothes with grace all duty; still, I know
Too well the picture has another side,—
How wearily the grind of toil goes on
Where love is wanting, how the eye and ear
And heart are starved amidst the plenitude
Of nature, and how hard and colorless
Is life without an atmosphere. I look
Across the lapse of half a century,
And call to mind old homesteads, where no flower
Told that the spring had come, but evil weeds,
Nightshade and rough-leaved burdock in the place
Of the sweet doorway greeting of the rose
And honeysuckle, where the house walls seemed
Blistering in sun, without a tree or vine
To cast the tremulous shadow of its leaves
Across the curtainless windows from whose panes
Fluttered the signal rags of shiftlessness;
Within, the cluttered kitchen-floor, unwashed
(Broom-clean I think they called it); the best room
Stifling with cellar damp, shut from the air
In hot midsummer, bookless, pictureless
Save the inevitable sampler hung
Over the fireplace, or a mourning piece,
A green-haired woman, peony-cheeked, beneath
Impossible willows; the wide-throated hearth
Bristling with faded pine-boughs half concealing
The piled-up rubbish at the chimney's back;
And, in sad keeping with all things about them,
Shrill, querulous women, sour and sullen men,
Untidy, loveless, old before their time,
With scarce a human interest save their own
Monotonous round of small economies,
Or the poor scandal of the neighborhood;
Blind to the beauty everywhere revealed,
Treading the May-flowers with regardless feet;
For them the song-sparrow and the bobolink
Sang not, nor winds made music in the leaves;
For them in vain October's holocaust
Burned, gold and crimson, over all the hills,
The sacramental mystery of the woods.
Church-goers, fearful of the unseen Powers,
But grumbling over pulpit-tax and pew-rent,
Saving, as shrewd economists, their souls
And winter pork with the least possible outlay
Of salt and sanctity; in daily life
Showing as little actual comprehension
Of Christian charity and love and duty,
As if the Sermon on the Mount had been
Out dated like a last year's almanac:
Rich in broad woodlands and in half-tilled fields,
And yet so pinched and bare and comfortless,
The veriest straggler limping on his rounds,
The sun and air his sole inheritance,
Laughed at a poverty that paid its taxes,
And hugged his rags in self-complacency!

Not such should be the homesteads of a land
Where whoso wisely wills and acts may dwell
As king and lawgiver, in broad-acred state,
With beauty, art, taste, culture, books, to make
His hours of leisure richer than a life
Of fourscore to the barons of old time,
Our yeoman should be equal to his home
Set in the fair, green valleys, purple walled,
A man to match his mountains, not to creep
Dwarfed and abased below them. I would fain
In this light way (of which I needs must own
With the knife-grinder of whom Canning sings,
"Story, God bless you! I have none to tell you!")
Invite the eye to see and the heart to feel
The beauty and the joy within their reach,—
Home, and home loves, and the beatitudes
Of nature free to all. Haply in years
That wait to take the places of our own,
Heard where some breezy balcony looks down
On happy homes, or where the lake in the moon
Sleeps dreaming of the mountains, fair as Ruth,
In the old Hebrew pastoral, at the feet
Of Boaz, even this simple lay of mine
May seem the burden of a prophecy,
Finding its late fulfillment in a change
Slow as the oak's growth lifting manhood up
Through broader culture, finer manners, love,
And reverence, to the level of the hills.

---

39 angels . . . tent, probably a reference to Genesis 18 • 110 knife-grinder . . . sings, in "The Friend of Humanity and the Knife-Grinder," a parody written by George Canning

O Golden Age, whose light is of the dawn,
And not of sunset, forward, not behind,
Flood the new heavens and earth, and with thee bring
All the old virtues, whatsoever things
Are pure and honest and of good repute,
But add thereto whatever bard has sung
Or seer has told of when in trance and dream
They saw the Happy Isles of prophecy!
Let Justice hold her scale, and Truth divide
Between the right and wrong; but give the heart
The freedom of its fair inheritance,
Let the poor prisoner, cramped and starved so long,
At Nature's table feast his ear and eye
With joy and wonder; let all harmonies
Of sound, form, color, motion, wait upon
The princely guest, whether in soft attire
Of leisure clad, or the coarse frock of toil,
And, lending life to the dead form of faith,
Give human nature reverence for the sake
Of One who bore it, making it divine
With the ineffable tenderness of God;
Let common need, the brotherhood of prayer,
The heirship of an unknown destiny,
The unsolved mystery round about us, make
A man more precious than the gold of Ophir.
Sacred, inviolate, unto whom all things
Should minister, as outward types and signs
Of the eternal beauty which fulfils
The one great purpose of creation, Love,
The sole necessity of Earth and Heaven!

1868

151 **Ophir,** a region mentioned in the Old Testament as a source of gold and jewels

Bret Harte

1836 • 1902

"The writer of the epic of the gold rush," Francis Bret Harte, lived in California only during the period from 1854 to 1871. The rest of his life he lived in the East or abroad. Yet his stay in California gave him his most important material for poetry and for fiction which won remarkable popularity for him.

Harte was born in Albany, New York, August 25, 1836. He had a rather sketchy education. After his widowed mother moved the family to San Francisco, he joined them—in 1854—on the Pacific Coast. There he taught school, worked in the mines for a short time, served as a Wells Fargo Express messenger, and eventually became a printer. Developing his skill as a writer, he in time worked into various editorial jobs on some of the California magazines.

In 1868 he published "The Luck of Roaring Camp" in the newly founded *Overland Monthly,* of which he was editor. When the issue containing the story reached the East, the story was an immediate sensational success. Other stories in the same vein augmented Harte's popularity, and a poem, "Plain Language from Truthful James," was another extraordinary hit, read and quoted by everyone. In 1871, with an impressive contract from the *Atlantic Monthly* in his pocket, Harte started East, leaving the Far West permanently. His journey across the continent was a triumphant progress, and he was hailed in the East as a new genius.

The part of his life which came after this journey was pretty much of an anticlimax. A few more stories—"The Outcasts of Poker Flat," and "Tennessee's Partner,"

and "How Santa Claus Came to Simpson's Bar," for instance—and some of his many poems were up to the early standard, but his work became repetitious, and, in the end, not much more than the working out of a formula. In 1878 he went abroad on a consular appointment to Germany. From 1888 until his death in 1902 he lived in England.

Harte believed that his art derived from that of American humor, and much of the comedy he mingles with pathos is obviously related to the humorous writings of pre-Civil War humorists. From the same group he evidently learned much about the picturing in fiction of the teeming life of a frontier section. From Dickens, his favorite author, he also apparently learned a great deal—particularly a way of merging his background into a story and a way of making characters memorable by giving them grotesque or unexpected traits. From post-war humorists, he borrowed various tricks of phrasing. His fame derived in part from the skill with which he blended these elements in his stories, in part from the interest the public had in the picturesque life of the latest American frontier.

An element in Harte's writings which also helped their popularity was a novel twist which he used again and again in the time-worn plot of sacrifice. In earlier sentimental stories, sweet and gracious characters habitually had made touching sacrifices in behalf of weak or wicked characters. Harte reversed the rôle of the rougher characters, and showed prostitutes, gamblers, or other besmirched men and women of the mining camps bravely making sacrifices. In "The Luck of Roaring Camp" the old formula of "innocent character saves ignoble character" is reversed when the rough Kentuck sacrifices his life to rescue little Tom Luck. In "Tennessee's Partner" the person for whom the sacrifice is made is, of course, a typical rascal of the old-fashioned sort; but the partner who is the hero shows the tenderness which lurks beneath a tough exterior.

Harte's great success is important in American literary history because of the impetus it gave to local color writing, which in time was to acquaint the public with life in most of the other sections of the country. The unconventional morality—for the time—of his fiction prepared the way for characterizations and scenes in later fiction which increasingly departed from prudish standards.

Tennessee's Partner

I do not think that we ever knew his real name. Our ignorance of it certainly never gave us any social inconvenience, for at Sandy Bar in 1854 most men were christened anew. Sometimes these appellatives were derived from some distinctiveness of dress, as in the case of "Dungaree Jack;" or from some peculiarity of habit, as shown in "Saleratus Bill," so called from an undue proportion of that chemical in his daily bread; or from some unlucky slip, as exhibited in "The Iron Pirate," a mild, inoffensive man, who earned that baleful title by his unfortunate mispronunciation of the term "iron pyrites." Perhaps this may have been the beginning of a rude heraldry; and I am constrained to think that it was because a man's real name in that day rested solely upon his own unsupported statement. "Call yourself Clifford, do you?" said Boston, addressing a timid newcomer with infinite scorn; "hell is full of such Cliffords!" He then introduced the unfortunate man, whose name happened to be really Clifford, as "Jaybird Charley,"—an unhallowed inspiration of the moment that clung to him ever after.

But to return to Tennessee's Partner, whom we never knew by any other than this relative title. That he had ever existed as a separate and distinct individuality we only learned later. It seems that in 1853 he left Poker Flat to go to San Francisco, ostensibly to procure a wife. He never got any farther than Stockton. At that place he was attracted by a young person who waited upon the table at the hotel where he took his meals. One morning he said something to her which caused her to smile not unkindly, to somewhat coquettishly break a plate of toast over his upturned, serious simple face, and to retreat to the kitchen. He followed her, and emerged a few moments later, covered with more toast and victory.

That day week they were married by a justice of the peace, and returned to Poker Flat. I am aware that something more might be made of this episode, but I prefer to tell it as it was current at Sandy Bar,—in the gulches and bar-rooms,—where all sentiment was modified by a strong sense of humor.

Of their married felicity but little is known, perhaps for the reason that Tennessee, then living with his partner, one day took occasion to say something to the bride on his own account, at which, it is said, she smiled not unkindly and chastely retreated,—this time as far as Marysville, where Tennessee followed her, and where they went to house-keeping without the aid of a justice of the peace. Tennessee's Partner took the loss of his wife simply and seriously, as was his fashion. But to everybody's surprise, when Tennessee one day returned from Marysville, without his partner's wife,—she having smiled and retreated with somebody else,—Tennessee's Partner was the first man to shake his hand and greet him with affection. The boys who had gathered in the canon to see the shooting were naturally indignant. Their indignation might have found vent in sarcasm but for a certain look in Tennessee's Partner's eyes that indicated a lack of humorous appreciation. In fact, he was a grave man, with a steady application to practical detail which was unpleasant in a difficulty.

Meanwhile a popular feeling against Tennessee had grown up on the Bar. He was known to be a gambler, he was suspected to be a thief. In these suspicions Tennessee's Partner was equally compromised; his continued intimacy with Tennessee after the affair above quoted could only be accounted for on the hypothesis of a copartnership of crime. At last Tennessee's guilt became flagrant. One day he overtook a stranger on his way to Red Dog. The stranger afterward related that Tennessee beguiled the time with interesting anecdote and reminiscence, but illogically concluded the interview in the following words: "And now, young man, I'll trouble you for your knife, your pistols, and your money. You see your weppings might get you into trouble at Red Dog, and your money's a temptation to the evilly disposed. I think you said your address was San Francisco. I shall endeavor to call." It may be stated here that Tennessee had a fine flow of humor, which no business preoccupation could wholly subdue.

This exploit was his last. Red Dog and Sandy Bar made common cause against the highwayman. Tennessee was hunted in very much the same fashion as his prototype, the grizzly. As the toils closed around him, he made a desperate dash through the Bar, emptying his revolver at the crowd before the Arcade Saloon, and so on up Grizzly Canon; but at its farther extremity he was stopped by a small man on a gray horse. The men looked at each other a moment in silence. Both were fearless, both self-possessed and independent, and both types of a civilization that in the seventeenth century would have been called heroic, but in the nineteenth simply "reckless."

"What have you got there?—I call," said Tennessee quietly.

"Two bowers and an ace," said the stranger as quietly, showing two revolvers and a bowie-knife.

"That takes me," returned Tennessee; and, with this gambler's epigram, he threw away his useless pistol and rode back with his captor.

It was a warm night. The cool breeze which usually sprang up with the going down of the sun behind the chaparral-crested mountain was that evening withheld from Sandy Bar. The little canon was stifling with heated resinous odors, and the decaying driftwood on the Bar sent forth faint sickening exhalations. The feverishness of day and its fierce passions still filled the camp. Lights moved restlessly along the bank of the river, striking no answering reflection from its tawny current. Against the blackness of the pines the windows of the old loft above the express-office stood out staringly bright; and through their curtainless panes the loungers below could see the forms of those who were even then deciding the fate of Tennessee. And above all this, etched on the dark firmament, rose the Sierra, remote and passionless, crowned with remoter passionless stars.

The trial of Tennessee was conducted as fairly as was consistent with a judge and jury who felt themselves to some extent obliged to justify, in their verdict, the previous irregularities of arrest and indictment. The law of Sandy Bar was implacable, but not vengeful. The excitement and personal feeling of the chase were over; with Tennessee safe in their hands, they were ready to listen patiently to any defense, which they were already satisfied was insufficient. There being no doubt in their

own minds, they were willing to give the prisoner the benefit of any that might exist. Secure in the hypothesis that he ought to be hanged on general principles, they indulged him with more latitude of defense than his reckless hardihood seemed to ask. The Judge appeared to be more anxious than the prisoner, who, otherwise unconcerned, evidently took a grim pleasure in the responsibility he had created. "I don't take any hand in this yer game," had been his invariable but good-humored reply to all questions. The Judge—who was also his captor—for a moment vaguely regretted that he had not shot him "on sight" that morning, but presently dismissed this human weakness as unworthy of the judicial mind. Nevertheless, when there was a tap at the door, and it was said that Tennessee's Partner was there on behalf of the prisoner, he was admitted at once without question. Perhaps the younger members of the jury, to whom the proceedings were becoming irksomely thoughtful, hailed him as a relief.

For he was not, certainly, an imposing figure. Short and stout, with a square face, sunburned into a preternatural redness, clad in a loose duck "jumper" and trousers streaked and splashed with red soil, his aspect under any circumstances would have been quaint, and was now even ridiculous. As he stooped to deposit at his feet a heavy carpetbag he was carrying, it became obvious, from partially developed legends and inscriptions, that the material with which his trousers had been patched had been originally intended for a less ambitious covering. Yet he advanced with great gravity, and after shaking the hand of each person in the room with labored cordiality, he wiped his serious perplexed face on a red bandana handkerchief, a shade lighter than his complexion, laid his powerful hand upon the table to steady himself, and thus addressed the Judge:—

"I was passin' by," he began, by way of apology, "and I thought I'd just step in and see how things was gettin' on with Tennessee thar,—my pardner. It's a hot night. I disremember any sich weather before on the Bar."

He paused a moment, but nobody volunteering any other meteorological recollection, he again had recourse to his pocket-handkerchief, and for some moments mopped his face diligently.

"Have you anything to say on behalf of the prisoner?" said the Judge finally.

"Thet's it," said Tennessee's Partner, in a tone of relief. "I come yar as Tennessee's pardner,—knowing him nigh on four year, off and on, wet and dry, in luck and out o' luck. His ways ain't aller my ways, but thar ain't any p'ints in that young man, thar ain't any liveliness as he's been up to, as I don't know. And you sez to me, sez you,—confidential-like, and between man and man, —sez you, 'Do you know anything in his behalf?' and I sez to you, sez I,—confidential-like, as between man and man,—'What should a man know of his pardner?' "

"Is this all you have to say?" asked the Judge impatiently, feeling, perhaps, that a dangerous sympathy of humor was beginning to humanize the court.

"Thet's so," continued Tennessee's Partner. "It ain't for me to say anything agin' him. And now, what's the case? Here's Tennessee wants money, wants it bad, and does n't like to ask it of his old pardner. Well, what does Tennessee do? He lays for a stranger, and he fetches that stranger; and you lays for *him*, and you fetches *him;* and the honors is easy. And I put it to you, bein' a fa'r-minded man, and to you, gentlemen all, as fa'r-minded men, ef this is n't so."

"Prisoner," said the Judge, interrupting, "have you any questions to ask this man?"

"No! no!" continued Tennessee's Partner hastily. "I play this yer hand alone. To come down to the bedrock, it's just this. Tennessee, thar, has played it pretty rough and expensive-like on a stranger, and on this yer camp. And now, what's the fair thing? Some would say more, some would say less. Here's seventeen hundred dollars in coarse gold and a watch,—it's about all my pile,—and call it square!" And before a hand could be raised to prevent him he had emptied the contents of the carpetbag upon the table.

For a moment his life was in jeopardy. One or two men sprang to their feet, several hands groped for hidden weapons, and a suggestion to "throw him from the window" was only overridden by a gesture from the Judge. Tennessee laughed. And apparently oblivious of the excitement, Tennessee's Partner improved the opportunity to mop his face again with his handkerchief.

When order was restored, and the man was made to understand, by the use of forcible figures and rhetoric, that Tennessee's offense could not be condoned by money, his face took a more serious and sanguinary hue, and

those who were nearest to him noticed that his rough hand trembled slightly on the table. He hesitated a moment as he slowly returned the gold to the carpetbag, as if he had not yet entirely caught the elevated sense of justice which swayed the tribunal, and was perplexed with the belief that he had not offered enough. Then he turned to the Judge, and saying, "This yer is a lone hand, played alone, and without my pardner," he bowed to the jury and was about to withdraw, when the Judge called him back:—

"If you have anything to say to Tennessee, you had better say it now."

For the first time that evening the eyes of the prisoner and his strange advocate met. Tennessee smiled, showed his white teeth, and saying, "Euchred, old man!" held out his hand. Tennessee's Partner took it in his own, and saying, "I just dropped in as I was passin' to see how things was gettin' on," let the hand passively fall, and adding that "it was a warm night," again mopped his face with his handkerchief, and without another word withdrew.

The two men never again met each other alive. For the unparalleled insult of a bribe offered to Judge Lynch —who, whether bigoted, weak, or narrow, was at least incorruptible—firmly fixed in the mind of that mythical personage any wavering determination of Tennessee's fate; and at the break of day he was marched, closely guarded, to meet it at the top of Marley's Hill.

How he met it, how cool he was, how he refused to say anything, how perfect were the arrangements of the committee, were all duly reported, with the addition of a warning moral and example to all future evil-doers, in the "Red Dog Clarion," by its editor, who was present, and to whose vigorous English I cheerfully refer the reader. But the beauty of that midsummer morning, the blessed amity of earth and air and sky, the awakened life of the free woods and hills, the joyous renewal and promise of Nature, and above all, the infinite serenity that thrilled through each, was not reported, as not being a part of the social lesson. And yet, when the weak and foolish deed was done, and a life, with its possibilities and responsibilities, had passed out of the misshapen thing that dangled between earth and sky, the birds sang, the flowers bloomed, the sun shone, as cheerily as before; and possibly the "Red Dog Clarion" was right.

Tennessee's Partner was not in the group that surrounded the ominous tree. But as they turned to disperse, attention was drawn to the singular appearance of a motionless donkey-cart halted at the side of the road. As they approached, they at once recognized the venerable "Jenny" and the two-wheeled cart as the property of Tennessee's Partner, used by him in carrying dirt from his claim; and a few paces distant the owner of the equipage himself, sitting under the buckeye-tree, wiping the perspiration from his glowing face. In answer to an inquiry, he said he had come for the body of the "diseased," "if it was all the same to the committee." He didn't wish to "hurry anything"; he could "wait." He was not working that day; and when the gentlemen were done with the "diseased," he would take him. "Ef thar is any present," he added, in his simple, serious way, "as would care to jine in the fun'l, they kin come." Perhaps it was from a sense of humor, which I have already intimated was a feature of Sandy Bar,—perhaps it was from something even better than that, but two thirds of the loungers accepted the invitation at once.

It was noon when the body of Tennessee was delivered into the hands of his partner. As the cart drew up to the fatal tree, we noticed that it contained a rough oblong box,—apparently made from a section of sluicing,—and half filled with bark and the tassels of pine. The cart was further decorated with slips of willow and made fragrant with buckeye-blossoms. When the body was deposited in the box, Tennessee's Partner drew over it a piece of tarred canvas, and gravely mounting the narrow seat in front, with his feet upon the shafts, urged the little donkey forward. The equipage moved slowly on, at that decorous pace which was habitual with Jenny even under less solemn circumstances. The men—half curiously, half jestingly, but all good-humoredly—strolled along beside the cart, some in advance, some a little in the rear of the homely catafalque. But whether from the narrowing of the road or some present sense of decorum, as the cart passed on, the company fell to the rear in couples, keeping step, and otherwise assuming the external show of a formal procession. Jack Folinsbee, who had at the outset played a funeral march in dumb show upon an imaginary trombone, desisted from a lack of sympathy and appreciation,—not having, perhaps, your true humorist's capacity to be content with the enjoyment of his own fun.

The way led through Grizzly Canon, by this time clothed in funereal drapery and shadows. The redwoods, burying their moccasined feet in the red soil, stood in Indian file along the track, trailing an uncouth benediction from their bending boughs upon the passing bier. A hare, surprised into helpless inactivity, sat upright and pulsating in the ferns by the roadside as the cortege went by. Squirrels hastened to gain a secure outlook from higher boughs; and the blue-jays, spreading their wings, fluttered before them like outriders, until the outskirts of Sandy Bar were reached, and the solitary cabin of Tennessee's Partner.

Viewed under more favorable circumstances, it would not have been a cheerful place. The unpicturesque site, the rude and unlovely outlines, the unsavory details, which distinguish the nest-building of the California miner were all here with the dreariness of decay superadded. A few paces from the cabin there was a rough inclosure, which, in the brief days of Tennessee's Partner's matrimonial felicity, had been used as a garden, but was now overgrown with fern. As we approached it, we were surprised to find that what we had taken for a recent attempt at cultivation was the broken soil about an open grave.

The cart was halted before the inclosure, and rejecting the offers of assistance with the same air of simple self-reliance he had displayed throughout, Tennessee's Partner lifted the rough coffin on his back, and deposited it unaided within the shallow grave. He then nailed down the board which served as a lid, and mounting the little mound of earth beside it, took off his hat and slowly mopped his face with his handkerchief. This the crowd felt was a preliminary to speech, and they disposed themselves variously on stumps and boulders, and sat expectant.

"When a man," began Tennessee's Partner slowly, "has been running free all day, what's the natural thing for him to do? Why, to come home. And if he ain't in a condition to go home, what can his best friend do? Why, bring him home. And here's Tennessee has been running free, and we brings him home from his wandering." He paused and picked up a fragment of quartz, rubbed it thoughtfully on his sleeve, and went on: "It ain't the first time that I've packed him on my back, as you see'd me now. It ain't the first time that I brought him to this yer cabin when he could n't help himself; it ain't the first time that I and Jinny have waited for him on yon hill, and picked him up and so fetched him home, when he could n't speak and did n't know me. And now that it's the last time, why"—he paused and rubbed the quartz gently on his sleeve—"you see it's sort of rough on his pardner. And now, gentlemen," he added abruptly, picking up his longhandled shovel, "the fun'l's over and my thanks, and Tennessee's thanks, to you for your trouble."

Resisting any proffers of assistance, he began to fill in the grave, turning his back upon the crowd, that after a few moments' hesitation gradually withdrew. As they crossed the little ridge that hid Sandy Bar from view, some, looking back, thought they could see Tennessee's Partner, his work done, sitting upon the grave, his shovel between his knees, and his face buried in his red bandana handkerchief. But it was argued by others that you couldn't tell his face from his handkerchief at that distance, and this point remained undecided

In the reaction that followed the feverish excitement of that day, Tennessee's Partner was not forgotten. A secret investigation had cleared him of any complicity in Tennessee's guilt, and left only a suspicion of his general sanity. Sandy Bar made a point of calling on him, and proffering various uncouth but well-meant kindnesses But from that day his rude health and great strength seemed visibly to decline; and when the rainy season fairly set in, and the tiny grass-blades were beginning to peep from the rocky mound above Tennessee's grave, he took to his bed.

One night, when the pines beside the cabin were swaying in the storm and trailing their slender fingers over the roof, and the roar and rush of the swollen river were heard below, Tennessee's Partner lifted his head from the pillow, saying, "It is time to go for Tennessee; I must put Jinny in the cart," and would have risen from his bed but for the restraint of his attendant. Struggling, he still pursued his singular fancy: "There, now, steady, Jinny,—steady, old girl. How dark it is! Look out for the ruts,—and look out for him, too, old gal. Sometimes, you know, when he's blind drunk, he drops down right in the trail. Keep on straight up to the pine on the top of the hill. Thar! I told you so!—thar he is,—coming this way, too, —all by himself, sober, and his face a-shining. Tennessee! Pardner!"

And so they met.

1869

Plain Language from Truthful James

Written in 1870 and published in September of the same year, this poem, known to many as "The Heathen Chinee," had a success comparable with that of "The Luck." Newspapers in every part of the country printed it; it was issued as a broadside; song versions were published; and several lithograph illustrations found ready buyers. According to George R. Stewart, "It was said that President Grant had intended to take up the Chinese problem in his message to Congress, but refrained after the poem had made the whole matter the occasion of hilarity."

Harte was rather distressed by the fame of the poem, partly because he felt that some people, failing to perceive its irony, used it to justify a prejudice against the Chinese; partly because he thought it was a bad poem. Today it seems a rather pleasant bit of nonsense, amusing because of the story it tells and because of the galloping meter. The metrics, Harte said, were influenced by Swinburne's **Atalanta in Calydon.**

Which I wish to remark,
  And my language is plain,
That for ways that are dark
  And for tricks that are vain,
The heathen Chinee is peculiar,
  Which the same I would rise to explain.

Ah Sin was his name;
  And I shall not deny,
In regard to the same,
  What the name might imply;
But his smile it was pensive and childlike,
  As I frequent remarked to Bill Nye.

It was August the third,
  And quite soft was the skies;
Which it might be inferred
  That Ah Sin was likewise;
Yet he played it that day upon William
  And me in a way I despise.

Which we had a small game,
  And Ah Sin took a hand;
It was Euchre. The same
  He did not understand;
But he smiled as he sat by the table,
  With the smile that was childlike and bland.

Yet the cards they were stocked
  In a way that I grieve,
And my feelings were shocked
  At the state of Nye's sleeve,
Which was stuffed full of aces and bowers,
  And the same with intent to deceive.

But the hands that were played
  By that heathen Chinee,
And the points that he made,
  Were quite frightful to see,—
Till at last he put down a right bower,
Which the same Nye had dealt unto me.

". . . his smile it was pensive and childlike . . ."

Then I looked up at Nye,
And he gazed upon me;
And he rose with a sigh,
And said, "Can this be?
We are ruined by Chinese cheap labor,"—
And he went for that heathen Chinee.

In the scene that ensued
I did not take a hand,
But the floor it was strewed
Like the leaves on the strand
With the cards that Ah Sin had been hiding,
In the game "he did not understand."

In his sleeves which were long,
He had twenty-four jacks,—
Which was coming it strong,
Yet I state but the facts;
And we found on his nails, which were taper,
What is frequent in tapers,—that's wax.

Which is why I remark,
And my language is plain,
That for ways that are dark
And for tricks that are vain,
The heathen Chinee is peculiar,—
Which the same I am free to maintain.

1870

George Washington Cable

1844 • 1925

George Washington Cable's father came from an old slaveholding family in Virginia; his mother was a native of New England and a strict Puritan. There were thus conflicting strains in his inheritance, the influences of which can be traced in his life and writings.

Cable was born in New Orleans, where his father was a not too successful merchant. From the age of fourteen George helped, by miscellaneous jobs, to support the family left destitute by the death of his father. During the Civil War he served with a troop of Mississippi cavalry and was severely wounded. For more than ten years after the war, he was clerk and bookkeeper for a cotton firm in New Orleans. During the clerking and bookkeeping years, however, he read much, delved into the old French and Spanish records of New Orleans, and (because, as he said, it seemed a pity that such rich materials should go to waste) began to write. His first story, " 'Sieur George," appeared in *Scribner's Monthly* in 1873. Other stories of romantic New Orleans followed and were collected in *Old Creole Days* (1879). He worked the Creole vein further in *The Grandissimes* (1880) and in *Madame Delphine* (1881). Despite the success of these and other similar books, Cable—his Puritan inheritance asserting itself—turned reformer, and in *The Silent South* (1885) zealously advocated reforms in racial relations. The book made him so unpopular in the South that he moved to Northampton, Massachusetts. His later works are of interest chiefly to the social historian.

Cable deserves to be remembered as the literary discoverer of New Orleans and as the facile recorder of his discoveries there. Like many other writers of local color fiction, he was a romantic realist and was inclined to play up picturesqueness and the moral ending: the established standards of the *genre* seem to have required that a story be at once edifying and exotic. If Cable's edification is sometimes a little forced, his exoticism is at least based on fact. The New Orleans of the early nineteenth cen-

tury was a colorful *mélange* of races, and therefore of languages and of mores. With a sensitive, skillful talent, Cable caught, and preserved in several of his early pieces, this extraordinary life and color. At his best, he has, as Professor Pattee has said, a "Gallic brilliance" unique in American literature. The question of the complete accuracy of Cable's pictures may well be left to the historical specialist, for the pictures themselves have a verisimilitude quite sufficient for the purposes of good literature.

Lucy Cable Biklé, George W. Cable, His Life and Letters, New York, 1928 • F. L. Pattee, "The New Romance," A History of American Literature Since 1870, New York, 1915 • E. L. Tinker, "Cable and the Creoles," American Literature, January 1934

Belles Demoiselles Plantation

A Creole is a white person who is descended from the French or Spanish settlers of Louisiana and the Gulf States, and who preserves their characteristic speech and culture. "The title [of Creole]," to quote Cable's own definition, "... came early to include any native of French or Spanish descent whose non-alliance with the slave race entitled him to social rank."

"Belles Demoiselles Plantation" is discursive and almost plotless (the dénouement seems reminiscent of "The Fall of the House of Usher") and the conclusion is too sentimental for modern taste. But the story is excellent in its rendering of locale and manners. With many deft touches Cable conveys the hauteur, the grace, the French gaiety of his Creole characters.

First printed in Scribner's Monthly, April 1874, the story was reprinted in Old Creole Days, 1879.

The original grantee was Count——, assume the name to be De Charleu; the old Creoles never forgive a public mention. He was the French king's commissary. One day, called to France to explain the lucky accident of the commissariat having burned down with his account-books inside, he left his wife, a Choctaw Comptesse, behind.

Arrived at court, his excuses were accepted, and that tract granted him where afterwards stood Belles Demoiselles Plantation. A man cannot remember every thing! In a fit of forgetfulness he married a French gentlewoman, rich and beautiful, and 'brought her out.' However, 'All's well that ends well'; a famine had been in the colony, and the Choctaw Comptesse had starved, leaving nought but a half-caste orphan family lurking on the edge of the settlement, bearing our French gentlewoman's own new name, and being mentioned in Monsieur's will.

And the new Comptesse—she tarried but a twelvemonth, left Monsieur a lovely son, and departed, led out of this vain world by the swamp-fever.

From this son sprang the proud Creole family of De Charleu. It rose straight up, up, up, generation after generation, tall, branchless, slender, palm-like; and finally, in the time of which I am to tell, flowered with all the rare beauty of a century-plant, in Artemise, Innocente, Felicité, the twins Marie and Martha, Leontine and little Septima; the seven beautiful daughters for whom their home had been fitly named Belles Demoiselles.

The Count's grant had once been a long Pointe, round which the Mississippi used to whirl, and seethe, and foam, that it was horrid to behold. Big whirlpools would open and wheel about in the savage eddies under the low bank, and close up again, and others open, and spin, and disappear. Great circles of muddy surface would boil up from hundreds of feet below, and gloss over, and seem to float away,—sink, come back again under water, and with only a soft hiss surge up again, and again drift off,

Belles Demoiselles, beautiful young ladies • 12 brought . . . out, brought her from France to Louisiana • 14 starved, died of starvation (the etymological meaning of the word is "to die")

and vanish. Every few minutes the loamy bank would tip down a great load of earth upon its besieger, and fall back a foot,—sometimes a yard,—and the writhing river would press after, until at last the Pointe was quite swallowed up, and the great river glided by in a majestic curve, and asked no more; the bank stood fast, the 'caving' became a forgotten misfortune, and the diminished grant was a long, sweeping, willowy bend, rustling with miles of sugarcane.

Coming up the Mississippi in the sailing craft of those early days, about the time one first could descry the white spires of the old St. Louis Cathedral, you would be pretty sure to spy, just over to your right under the levee, Belles Demoiselles Mansion, with its broad veranda and red painted cypress roof, peering over the embankment, like a bird in the nest, half hid by the avenue of willows which one of the departed De Charleus,—he that married a Marot,—had planted on the levee's crown.

The house stood unusually near the river, facing eastward, and standing foursquare, with an immense veranda about its sides, and a flight of steps in front spreading broadly downward, as we open arms to a child. From the veranda nine miles of river were seen; and in their compass, near at hand, the shady garden full of rare and beautiful flowers; farther away broad fields of cane and rice, and the distant quarters of the slaves, and on the horizon everywhere a dark belt of cypress forest.

The master was old Colonel De Charleu,—Jean Albert Henri Joseph De Charleu-Marot, and 'Colonel' by the grace of the first American governor. Monsieur,—he would not speak to any one who called him 'Colonel,'—was a hoary-headed patriarch. His step was firm, his form erect, his intellect strong and clear, his countenance classic, serene, dignified, commanding, his manners courtly, his voice musical,—fascinating. He had had his vices,—all his life; but had borne them, as his race do, with a serenity of conscience and a cleanness of mouth that left no outward blemish on the surface of the gentleman. He had gambled in Royal Street, drunk hard in Orleans Street, run his adversary through in the dueling-ground at Slaughter-house Point, and danced and quarrelled at the St. Philippe Street Theatre quadroon balls. Even now, with all his courtesy and bounty, and a hospitality which seemed to be entertaining angels, he was bitter-proud and penurious, and deep down in his hard-finished heart loved nothing but himself, his name, and his motherless children. But these!—their ravishing beauty was all but excuse enough for the unbounded idolatry of their father. Against these seven goddesses he never rebelled. Had they even required him to defraud old De Carlos—

I can hardly say.

Old De Carlos was his extremely distant relative on the Choctaw side. With this single exception, the narrow thread-like line of descent from the Indian wife, diminished to a mere strand by injudicious alliances, and deaths in the gutters of old New Orleans, was extinct. The name, by Spanish contact, had become De Carlos; but this one surviving bearer of it was known to all, and known only, as Injin Charlie.

One thing I never knew a Creole to do. He will not utterly go back on the ties of blood, no matter what sort of knots those ties may be. For one reason, he is never ashamed of his or his father's sins; and for another,—he will tell you—he is 'all heart!'

So the different heirs of the De Charleu estate had always strictly regarded the rights and interests of the De Carloses, especially their ownership of a block of dilapidated buildings in a part of the city, which had once been very poor property, but was beginning to be valuable. This block had much more than maintained the last De Carlos through a long and lazy lifetime, and, as his household consisted only of himself, and an aged and crippled Negress, the inference was irresistible that he 'had money.' Old Charlie, though by *alias* an 'Injin,' was plainly a dark white man, about as old as Colonel De Charleu, sunk in the bliss of deep ignorance, shrewd, deaf, and, by repute at least, unmerciful.

The Colonel and he always conversed in English. This rare accomplishment, which the former had learned from his Scotch wife,—the latter from up-river traders,—they found an admirable medium of communication, answering, better than French could, a similar purpose to that of the stick which we fasten to the bit of one horse and breast-gear of another, whereby each keeps his distance. Once in a while, too, by way of jest, English found its way among the ladies of Belles Demoiselles, always signifying that their sire was about to have business with old Charlie.

---

12 **St. Louis Cathedral** in New Orleans was completed in 1794 • 30 **first . . . governor.** Louisiana was acquired from France in 1803

Now a long-standing wish to buy out Charlie troubled the Colonel. He had no desire to oust him unfairly; he was proud of being always fair; yet he did long to engross the whole estate under one title. Out of his luxurious idleness he had conceived this desire, and thought little of so slight an obstacle as being already somewhat in debt to old Charlie for money borrowed, and for which Belles Demoiselles was, of course, good, ten times over. Lots, buildings, rents, all, might as well be his, he thought, to give, keep, or destroy. 'Had he but the old man's heritage. Ah! he might bring that into existence which his *belles demoiselles* had been begging for, "since many years;" a home,—and such a home,—in the gay city. Here he should tear down this row of cottages, and make his garden wall; there that long rope-walk should give place to vine-covered arbors; the bakery yonder should make way for a costly conservatory; that wine warehouse should come down, and the mansion go up. It should be the finest in the state. Men should never pass it, but they should say—"the palace of the De Charleus; a family of grand descent, a people of elegance and bounty, a line as old as France, a fine old man, and seven daughters as beautiful as happy; whoever dare attempt to marry there must leave his own name behind him!"

'The house should be of stones fitly set, brought down in ships from the land of "les Yankees," and it should have an airy belvedere, with a gilded image tip-toeing and shining on its peak, and from it you should see, far across the gleaming folds of the river, the red roof of Belles Demoiselles, the country-seat. At the big stone gate there should be a porter's lodge, and it should be a privilege even to see the ground.'

Truly they were a family fine enough, and fancy-free enough to have fine wishes, yet happy enough where they were, to have had no wish but to live there always.

To those, who, by whatever fortune, wandered into the garden of Belles Demoiselles some summer afternoon as the sky was reddening towards evening, it was lovely to see the family gathered out upon the tile pavement at the foot of the broad front steps, gayly chatting and jesting, with that ripple of laughter that comes so pleasingly from a bevy of girls. The father would be found seated in their midst, the centre of attention and compliment, witness, arbiter, umpire, critic, by his beautiful children's unanimous appointment, but the single vassal, too, of seven absolute sovereigns.

Now they would draw their chairs near together in eager discussion of some new step in the dance, or the adjustment of some rich adornment. Now they would start about him with excited comments to see the eldest fix a bunch of violets in his button-hole. Now the twins would move down a walk after some unusual flower, and be greeted on their return with the high pitched notes of delighted feminine surprise.

As evening came on they would draw more quietly about their paternal centre. Often their chairs were forsaken, and they grouped themselves on the lower steps, one above another, and surrendered themselves to the tender influences of the approaching night. At such an hour the passer on the river, already attracted by the dark figures of the broad-roofed mansion, and its woody garden standing against the glowing sunset, would hear the voices of the hidden group rise from the spot in the soft harmonies of an evening song; swelling clearer and clearer as the thrill of music warmed them into feeling, and presently joined by the deeper tones of the father's voice; then, as the daylight passed quite away, all would be still, and he would know that the beautiful home had gathered its nestlings under its wings.

And yet, for mere vagary, it pleased them not to be pleased.

'Arti!' called one sister to another in the broad hall, one morning,—mock amazement in her distended eyes,—'something is goin' to took place!'

'Comm-e-n-t?'—long-drawn perplexity.

'Papa is goin' to town!'

The news passed up stairs.

'Inno!'—one to another meeting in a doorway,—'something is goin' to took place!'

'Qu'est-ce-que c'est!'—vain attempt at gruffness.

'Papa is goin' to town!'

The unusual tidings were true. It was afternoon of the same day that the Colonel tossed his horse's bridle to his groom, and stepped up to old Charlie, who was sitting on his bench under a China-tree, his head, as was his fashion, bound in a Madras handkerchief. The 'old man'

---

26 les Yankees, the Yankees • 27 belvedere, an open, roofed gallery or loggia on the top of a house for the purpose of commanding a view • 33 fancy-free, free from the power of love. was plainly under the effect of spirits, and smiled a deferential salutation without trusting himself to his feet.

'Eh, well Charlie!'—the Colonel raised his voice to suit his kinsman's deafness,—'how is those times with my friend Charlie?'

'Eh?' said Charlie, distractedly.

'Is that goin' well with my friend Charlie?'

'In de house,—call her,'—making a pretence of rising.

'*Non, non!* I don't want,' the speaker paused to breathe—' 'ow is collection?'

'Oh!' said Charlie, 'every day he make me more poorer!'

'What do you hask for it?' asked the planter indifferently, designating the house by a wave of his whip.

'Ask for w'at?' said Injin Charlie.

'De *house!* What you ask for it?'

'I don't believe,' said Charlie.

'What you would *take* for it!' cried the planter.

'Wait for w'at?'

'What you would *take* for the whole block?'

'I don't want to sell him!'

'I'll give you *ten thousand dollah* for it.'

'Ten t'ousand dollah for dis house? Oh, no, dat is no price. He is blame good old house,—dat old house.' (Old Charlie and the Colonel never swore in presence of each other.) 'Forty years dat old house didn't had to be paint! I easy can get fifty t'ousand dollah for dat old house.'

'Fifty thousand picayunes; yes,' said the Colonel.

'She's a good house. Can make plenty money,' pursued the deaf man.

'That's what makes you so rich, eh, Charlie?'

'*Non,* I don't make nothing. Too blame clever, me, dat's de troub'. She's a good house,—make money fast like a steamboat,—make a barrel full in a week! Me, I lose money all de days. Too blame clever.'

'Charlie!'

'Eh?'

'Tell me what you'll take.'

'Make? I don't make *nothing.* Too blame clever.'

'What will you *take?*'

'Oh! I got enough already,—half drunk now.'

'What will you take for the 'ouse?'

'You want to buy her?'

'I don't know,'—(shrug),—'may*be,*—if you sell it cheap.'

'She's a bully old house.'

There was a long silence. By and by old Charlie commenced—

'Old Injin Charlie is a low-down dog.'

'*C'est vrai, oui!*' retorted the Colonel in an undertone.

'He's got Injin blood in him.'

The Colonel nodded assent.

'But he's got some blame good blood, too, ain't it?'

The Colonel nodded impatiently.

'*Bien!* Old Charlie's Injin blood says, "sell de house, Charlie, you blame old fool!" *Mais,* old Charlie's good blood says, "Charlie! if you sell dat old house, Charlie, you low-down old dog, Charlie, what de Compte De Charleu make for you grace-granmuzzer, de dev' can eat you, Charlie, I don't care." '

'But you'll sell it anyhow, won't you, old man?'

'No!' And the *no* rumbled off in muttered oaths like thunder out on the Gulf. The incensed old Colonel wheeled and started off.

'Curl!' (Colonel) said Charlie, standing up unsteadily.

The planter turned with an inquiring frown.

'I'll trade with you!' said Charlie.

The Colonel was tempted. ' 'Ow'l you trade?' he asked.

'My house for yours!'

The old Colonel turned pale with anger. He walked very quickly back, and came close up to his kinsman.

'Charlie!' he said.

'Injin Charlie,'—with a tipsy nod.

But by this time self-control was returning. 'Sell Belles Demoiselles to you?' he said in a high key, and then laughed 'Ho, ho, ho!' and rode away.

A cloud, but not a dark one, overshadowed the spirits of Belles Demoiselles' plantation. The old master, whose beaming presence had always made him a shining Saturn, spinning and sparkling within the bright circle of his daughters, fell into musing fits, started out of frowning reveries, walked often by himself, and heard business from his overseer fretfully.

No wonder. The daughters knew his closeness in trade, and attributed to it his failure to negotiate for

29 picayune, small coin worth five or six cents • 33 clever, good-natured, obliging • 51 C'est vrai, oui! That is indeed true! • 56 Bien! Well! • 57 Mais, but • 60 you grace-granmuzzer, your great-grandmother • 60 dev', devil • 80 Saturn, a reference to the planet and its encircling rings

the Old Charlie buildings,—so to call them. They began to depreciate Belles Demoiselles. If a north wind blew, it was too cold to ride. If a shower had fallen, it was too muddy to drive. In the morning the garden was wet. In the evening the grasshopper was a burden. *Ennui* was turned into capital; every headache was interpreted a premonition of ague; and when the native exuberance of a flock of ladies without a want or a care burst out in laughter in the father's face, they spread their French eyes, rolled up their little hands, and with rigid wrists and mock vehemence vowed and vowed again that they only laughed at their misery, and should pine to death unless they could move to the sweet city. 'Oh! the theatre! Oh! Orleans Street! Oh! the masquerade! the Place d'Armes! the ball!' and they would call upon Heaven with French irreverence, and fall into each other's arms, and whirl down the hall singing a waltz, end with a grand collision and fall, and, their eyes streaming merriment, lay the blame on the slippery floor, that would some day be the death of the whole seven.

Three times more the fond father, thus goaded, managed, by accident,—business accident,—to see old Charlie and increase his offer, but in vain. He finally went to him formally.

'Eh?' said the deaf and distant relative. 'For what you want him, eh? Why you don't stay where you halways be 'appy? Dis is a blame old rat-hole,—good for old Injin Charlie,—da's all. Why you don't stay where you be halways 'appy? Why you don't buy somewheres else?'

'That's none of your business,' snapped the planter. Truth was, his reasons were unsatisfactory even to himself.

A sullen silence followed. Then Charlie spoke:

'Well, now, look here; I sell you old Charlie's house.'

'*Bien!* and the whole block,' said the Colonel.

'Hold on,' said Charlie. 'I sell you de 'ouse and de block. Den I go and git drunk, and go to sleep; de dev' comes along and says, "Charlie! old Charlie, you blame low-down old dog, wake up! What you doin' here? Where's de 'ouse what Monsieur le Compte give your grace-gran-muzzer? Don't you see dat fine gentyman, De Charleu, done gone and tore him down and make him over new, you blame old fool, Charlie, you low-down old Injin dog!"'

'I'll give you forty thousand dollars,' said the Colonel.

'For de 'ouse?'

'For all.'

The deaf man shook his head.

'Forty-five!' said the Colonel.

'What a lie? For what you tell me "What a lie?" I don't tell you no lie.'

'*Non, non!* I give you *forty-five!*' shouted the Colonel.

Charlie shook his head again.

'Fifty!'

He shook it again.

The figures rose and rose to—

'Seventy-five!'

The answer was an invitation to go away and let the owner alone, as he was, in certain specified respects, the vilest of living creatures, and no company for a fine gentyman.

The 'fine gentyman' longed to blaspheme,—but before old Charlie!—in the name of pride, how could he? He mounted and started away.

'Tell you what I'll make wid you,' said Charlie.

The other, guessing aright, turned back without dismounting, smiling.

'How much Belles Demoiselles hoes me now?' asked the deaf one.

'One hundred and eighty thousand dollars,' said the Colonel, firmly.

'Yass,' said Charlie. 'I don't want Belles Demoiselles.'

The old Colonel's quiet laugh intimated it made no difference either way.

'But me,' continued Charlie, 'me,—I'm got le Compte De Charleu's blood in me, any'ow,—a litt' bit, any'ow, ain't it?'

The Colonel nodded that it was.

'*Bien!* If I go out of dis place and don't go to Belles Demoiselles, de peoples will say,—dey will say, "Old Charlie he been all doze time tell a blame *lie!* He ain't no kin to his old grace-gran-muzzer, not a blame bit! He don't got nary drop of De Charleu blood to save his blame low-down old Injin soul!" No, sare! What I want wid money, den? No, sare! My place for yours!'

He turned to go into the house, just too soon to see the Colonel make an ugly whisk at him with his riding-whip. Then the Colonel, too, moved off.

---

5 grasshopper . . . burden. Compare Ecclesiastes 12:5: ". . . and the grasshopper shall be a burden, and desire shall fail"

Two or three times over, as he ambled homeward, laughter broke through his annoyance, as he recalled old Charlie's family pride and the presumption of his offer. Yet each time he could but think better of—not the offer to swap, but the preposterous ancestral loyalty. It was so much better than he could have expected from his 'low-down' relative, and not unlike his own whim withal —the proposition which went with it was forgiven.

This last defeat bore so harshly on the master of Belles Demoiselles, that the daughters, reading chagrin in his face, began to repent. They loved their father as daughters can, and when they saw their pretended dejection harassing him seriously they restrained their complaints, displayed more than ordinary tenderness, and heroically and ostentatiously concluded there was no place like Belles Demoiselles. But the new mood touched him more than the old, and only refined his discontent. Here was a man, rich without the care of riches, free from any real trouble, happiness as native to his house as perfume to his garden, deliberately, as it were with premeditated malice, taking joy by the shoulder and bidding her be gone to town, whither he might easily have followed, only that the very same ancestral nonsense that kept Injin Charlie from selling the old place for twice its value prevented him from choosing any other spot for a city home.

But by and by the charm of nature and the merry hearts around him prevailed; the fit of exalted sulks passed off, and after a while the year flared up at Christmas, flickered, and went out.

New Year came and passed; the beautiful garden of Belles Demoiselles put on its spring attire; the seven fair sisters moved from rose to rose; the cloud of discontent had warmed into invisible vapor in the rich sunlight of family affection, and on the common memory the only scar of last year's wound was old Charlie's sheer impertinence in crossing the caprice of the De Charleus. The cup of gladness seemed to fill with the filling of the river.

How high that river was! Its tremendous current rolled and tumbled and spun along, hustling the long funeral flotillas of drift,—and how near shore it came! Men were out day and night, watching the levee. On windy nights even the old Colonel took part, and grew light-hearted with occupation and excitement, as every minute the river threw a white arm over the levee's top, as though it would vault over. But all held fast, and, as the summer drifted in, the water sunk down into its banks and looked quite incapable of harm.

On a summer afternoon of uncommon mildness, old Colonel Jean Albert Henri Joseph De Charleu-Marot, being in a mood for revery, slipped the custody of his feminine rulers and sought the crown of the levee, where it was his wont to promenade. Presently he sat upon a stone bench,—a favorite seat. Before him lay his broad-spread fields, near by, his lordly mansion; and being still, —perhaps by female contact,—somewhat sentimental, he fell to musing on his past. It was hardly worthy to be proud of. All its morning was reddened with mad frolic, and far toward the meridian it was marred with elegant rioting. Pride had kept him well-nigh useless, and despised the honors won by valor; gaming had dimmed prosperity; death had taken his heavenly wife, voluptuous ease had mortgaged his lands; and yet his house still stood, his sweet-smelling fields were still fruitful, his name was fame enough; and yonder and yonder, among the trees and flowers, like angels walking in Eden, were the seven goddesses of his only worship.

Just then a slight sound behind him brought him to his feet. He cast his eyes anxiously to the outer edge of the little strip of bank between the levee's base and the river. There was nothing visible. He paused, with his ear toward the water, his face full of frightened expectation. Ha! There came a single plashing sound, like some great beast slipping into the river, and little waves in a wide semi-circle came out from under the bank and spread over the water!

'My God!'

He plunged down the levee and bounded through the low weeds to the edge of the bank. It was sheer, and the water about four feet below. He did not stand quite on the edge, but fell upon his knees a couple of yards away, wringing his hands, moaning and weeping, and staring through his watery eyes at a fine, long crevice just discernible under the matted grass, and curving outward on either hand toward the river.

'My God!' he sobbed aloud; 'my God!' and even while he called, his God answered. the tough Bermuda grass stretched and snapped, the crevice slowly became a gape, and softly, gradually, with no sound but the closing of the water at last, a ton or more of earth settled into the boiling eddy and disappeared.

At the same instant a pulse of the breeze brought from the garden behind, the joyous, thoughtless laughter of the fair mistresses of Belles Demoiselles.

The old Colonel sprang up and clambered over the levee. Then forcing himself to a more composed movement, he hastened into the house and ordered his horse.

'Tell my children to make merry while I am gone,' he left word. 'I shall be back to-night,' and the horse's hoofs clattered down a by-road leading to the city.

'Charlie,' said the planter, riding up to a window, from which the old man's nightcap was thrust out, 'what you say, Charlie,—my house for yours, eh, Charlie—what you say?'

'Ello!' said Charlie; 'from where you come from dis time of to-night?'

'I come from the Exchange in St. Louis Street.' (A small fraction of the truth)

'What you want?' said matter-of-fact Charlie.

'I come to trade.'

The low-down relative drew the worsted off his ears. 'Oh! yass,' he said with an uncertain air.

'Well, old man Charlie, what you say: my house for yours,—like you said,—eh, Charlie?'

'I dunno,' said Charlie; 'it's nearly mine now. Why you don't stay dare youse'f?'

'*Because I don't want!*' said the Colonel savagely. 'Is dat reason enough for you? You better take me in de notion, old man, I tell you,—yes!'

Charlie never winced; but how his answer delighted the Colonel! Quoth Charlie:

'I don't care—I take him!—*mais*, possession give right off.'

'Not the whole plantation, Charlie; only'—

'I don't care,' said Charlie; 'we easy can fix dat. *Mais*, what for you don't want to keep him? I don't want him. You better keep him.'

'Don't you try to make no fool of me, old man,' cried the planter.

'Oh, no!' said the other. 'Oh, no! but you make a fool of yourself, ain't it?'

The dumbfounded Colonel stared; Charlie went on:

'Yass! Belles Demoiselles is more wort' dan tree block like dis one. I pass by dare since two weeks. Oh, pritty Belles Demoiselles! De cane was wave in de wind, de garden smell like a bouquet, de white-cap was jump up and down on de river; seven *belles demoiselles* was ridin' on horses. "Pritty, pritty, pritty!" says old Charlie. Ah! *Monsieur le père*, 'ow 'appy, 'appy, 'appy!

'Yass!' he continued—the Colonel still staring—'le Compte De Charleu have two familie. One was low-down Choctaw, one was high up *noblesse*. He gave the low-down Choctaw dis old rat-hole; he give Belles Demoiselles to you gran-fozzer; and now you don't be *satisfait*. What I'll do wid Belles Demoiselles? She'll break me in two years, yass. And what you'll do wid old Charlie's house, eh? You'll tear her down and make you'se'f a blame old fool. I rather wouldn't trade!'

The planter caught a big breathful of anger, but Charlie went straight on:

'I rather wouldn't, *mais* I will do it for you;—just the same, like Monsieur le Compte would say, "Charlie, you old fool, I want to shange houses wid you." '

So long as the Colonel suspected irony he was angry, but as Charlie seemed, after all, to be certainly in earnest, he began to feel conscience-stricken. He was by no means a tender man, but his lately-discovered misfortune had unhinged him, and this strange, undeserved, disinterested family fealty on the part of Charlie touched his heart. And should he still try to lead him into the pitfall he had dug? He hesitated,—no, he would show him the place by broad daylight, and if he chose to overlook the 'caving bank,' it would be his own fault;—a trade's a trade.

'Come,' said the planter, 'come at my house to-night; to-morrow we look at the place before breakfast, and finish the trade.'

'For what?' said Charlie.

'Oh, because I got to come in town in the morning.'

'I don't want,' said Charlie. 'How I'm goin' to come dere?'

'I git you a horse at the liberty stable.'

'Well—anyhow—I don't care—I'll go.' And they went.

When they had ridden a long time, and were on the road darkened by hedges of Cherokee rose, the Colonel called behind him to the 'low-down' scion:

'Keep the road, old man.'

'Eh?'

'Keep the road.'

'Oh, yes; all right; I keep my word; we don't goin' to play no tricks, eh?'

---

49 Monsieur le père, the father • 54 satisfait, satisfied • 81 liberty stable, livery stable, where horses and vehicles are kept for hire

But the Colonel seemed not to hear. His ungenerous design was beginning to be hateful to him. Not only old Charlie's unprovoked goodness was prevailing; the eulogy on Belles Demoiselles had stirred the depths of an intense love for his beautiful home. True, if he held to it, the caving of the bank, at its present fearful speed, would let the house into the river within three months; but were it not better to lose it so, than sell his birthright? Again,—coming back to the first thought,—to betray his own blood! It was only Injin Charlie; but had not the De Charleu blood just spoken out in him? Unconsciously he groaned.

After a time they struck a path approaching the plantation in the rear, and a little after, passing from behind a clump of live-oaks, they came in sight of the villa. It looked so like a gem, shining through its dark grove, so like a great glow-worm in the dense foliage, so significant of luxury and gayety, that the poor master, from an over-flowing heart, groaned again.

'What?' asked Charlie.

The Colonel only drew his rein, and, dismounting mechanically, contemplated the sight before him. The high, arched doors and windows were thrown wide to the summer air; from every opening the bright light of numerous candelabra darted out upon the sparkling foliage of magnolia and bay, and here and there in the spacious verandas a colored lantern swayed in the gentle breeze. A sound of revel fell on the ear, the music of harps; and across one window, brighter than the rest, flitted, once or twice, the shadows of dancers. But oh! the shadows flitting across the heart of the fair mansion's master!

'Old Charlie,' said he, gazing fondly at his house, 'You and me is both old, eh?'

'Yaas,' said the stolid Charlie.

'And we has both been bad enough in our time, eh, Charlie?'

Charlie, surprised at the tender tone, repeated 'Yaas.'

'And you and me is mighty close?'

'Blame close, yaas.'

'But you never know me to cheat, old man!'

'No,'—impassively.

'And do you think I would cheat you now?'

'I dunno,' said Charlie. 'I don't believe.'

'Well, old man, old man,'—his voice began to quiver,—'I sha'n't cheat you now. My God!—old man, I tell you—you better not make the trade!'

'Because for what?' asked Charlie in plain anger; but both looked quickly toward the house! The Colonel tossed his hands wildly in the air, rushed forward a step or two, and giving one fearful scream of agony and fright, fell forward on his face in the path. Old Charlie stood transfixed with horror. Belles Demoiselles, the realm of maiden beauty, the home of merriment, the house of dancing, all in the tremor and glow of pleasure, suddenly sunk, with one short, wild wail of terror—sunk, sunk, down, down, down, into the merciless, unfathomable flood of the Mississippi.

Twelve long months were midnight to the mind of the childless father; when they were only half gone, he took his bed; and every day, and every night, old Charlie, the 'low-down,' the 'fool,' watched him tenderly, tended him lovingly, for the sake of his name, his misfortunes, and his broken heart. No woman's step crossed the floor of the sick-chamber, whose western dormer-windows overpeered the dingy architecture of old Charlie's block; Charlie and a skilled physician, the one all interest, the other all gentleness, hope, and patience—these only entered by the door; but by the window came in a sweet-scented evergreen vine, transplanted from the caving bank of Belles Demoiselles. It caught the rays of sunset in its flowery net and let them softly in upon the sick man's bed; gathered the glancing beams of the moon at midnight, and often wakened the sleeper to look, with his mindless eyes, upon their pretty silver fragments strewn upon the floor.

By and by there seemed—there was—a twinkling dawn of returning reason. Slowly, peacefully, with an increase unseen from day to day, the light of reason came into the eyes, and speech became coherent; but withal there came a failing of the wrecked body, and the doctor said that monsieur was both better and worse.

One evening, as Charlie sat by the vine-clad window with his fireless pipe in his hand, the old Colonel's eyes fell full upon his own, and rested there.

'Charl—,' he said with an effort, and his delighted nurse hastened to the bedside and bowed his best ear There was an unsuccessful effort or two, and then he whispered, smiling with sweet sadness,—

'We didn't trade.'

The truth, in this case, was a secondary matter to Charlie; the main point was to give a pleasing answer. So he nodded his head decidedly, as who should say—'Oh yes, we did, it was a bona-fide swap!' but when he

saw the smile vanish, he tried the other expedient and shook his head with still more vigor, to signify that they had not so much as approached a bargain, and the smile returned.

Charlie wanted to see the vine recognized He stepped backward to the window with a broad smile, shook the foliage, nodded and looked smart.

'I know,' said the Colonel, with beaming eyes, '—many weeks.'

The next day—

'Charl—'

The best ear went down.

'Send for a priest.'

The priest came, and was alone with him a whole afternoon. When he left, the patient was very haggard and exhausted, but smiled and would not suffer the crucifix to be removed from his breast.

One more morning came. Just before dawn Charlie, lying on a pallet in the room, thought he was called, and came to the bedside.

'Old man,' whispered the failing invalid, 'is it caving yet?'

Charlie nodded.

'It won't pay you out.'

'Oh, dat makes not'ing,' said Charlie. Two big tears rolled down his brown face. 'Dat makes not'in'.'

The Colonel whispered once more:

'Mes belles demoiselles! in paradise,—in the garden—I shall be with them at sunrise;' and so it was.

Joel Chandler Harris

1848 • 1908

Writing in *Life on the Mississippi* in 1883, Mark Twain called Joel Chandler Harris "the only master" of the Negro dialect. Twain himself was something of a master in this kind; but Harris' supremacy, then and even now, may well pass unquestioned

Harris was born near Eatonton, Georgia. His mother, deserted by his father, took in sewing for a living. Between the ages of thirteen and seventeen (these were the Civil War years) Harris lived on the nearby plantation of Joseph Addison Turner and helped Turner print a weekly paper. At this time, he got an education by working on the paper and by reading in Turner's excellent library; he also became intimately acquainted with the life of the Southern plantation and especially with the speech and folklore of the Negroes After the war he worked for brief periods on newspapers in Macon, New Orleans, and Savannah In 1876 he joined the staff of the Atlanta *Constitution,* and for twenty-four years, through editorials, book reviews, feature articles, and the Uncle Remus stories (the last especially, of course), he helped mightily to make the *Constitution* the most influential newspaper ever published in the South. The stories of Uncle Remus were first collected in *Uncle Remus: His Song and Sayings* in 1880. Their popularity, both South and North, was so great that new volumes followed: *Nights with Uncle Remus* (1883), *Uncle Remus and His Friends* (1892), *Told by Uncle Remus* (1905), and still others.

Recent historical critics have stressed Harris' aim in the Uncle Remus stories of reconciling the North and the South "With Harris," says Professor Buck, "the desire to reconcile amounted almost to a passion." Harris "must have worked consciously," Professor Wade believes, "to make those stories propagandist in nature He must have realized that his propaganda, through Uncle Remus, had proved effective, and he could tell himself with all justice that much sectional rancour had evaporated before that old man's wit."

From

Uncle Remus: His Songs and Sayings

Uncle Remus is Harris' version of the ante-bellum Negro who remained loyal to his master during the Civil War and after, and Harris' writings assure the reader of the kindly relations between the races on a Southern plantation.

The tales themselves belong to the folklore of the Negro race, though analogues can be found in the beast fables once popular in the literatures of Europe. Abundant humor is provided by the incongruity in the fact that the behavior of the animals closely approximates that of human beings. Uncle Remus' hero, Brer Rabbit (as Harris pointed out), "is the weakest and most harmless of all animals," and yet "is victorious in contests with the bear, the wolf, and the fox. It is not virtue that triumphs, but helplessness; it is not malice, but mischievousness." Historical critics have seen in Uncle Remus and his stories an embodiment of the "primitive outlook" of the ante-bellum Southern Negro.

UNCLE REMUS INITIATES THE LITTLE BOY

One evening recently, the lady whom Uncle Remus calls "Miss Sally" missed her little seven-year-old. Making search for him through the house and through the yard, she heard the sound of voices in the old man's cabin, and, looking through the window, saw the child sitting by Uncle Remus. His head rested against the old man's arm, and he was gazing with an expression of the most intense interest into the rough, weather-beaten face, that beamed so kindly upon him. This is what "Miss Sally" heard:

"Bimeby, one day, arter Brer Fox bin doin' all dat he could fer ter ketch Brer Rabbit, en Brer Rabbit bin doin' all he could fer ter keep 'im fum it, Brer Fox say to hisse'f dat he'd put up a game on Brer Rabbit, en he ain't mo'n got de wuds out'n his mouf twel Brer Rabbit come a lopin' up de big road, lookin' des ez plump, en ez fat, en ez sassy ez a Moggin hoss in a barley-patch.

"'Hol' on dar, Brer Rabbit,' sez Brer Fox, sezee.

"'I ain't got time, Brer Fox,' sez Brer Rabbit, sezee, sorter mendin' his licks.

"'I wanter have some confab wid you, Brer Rabbit,' sez Brer Fox, sezee.

"'All right, Brer Fox, but you better holler fum whar you stan'. I'm monstus full er fleas dis mawnin',' sez Brer Rabbit, sezee.

"'I seed Brer B'ar yistiddy,' sez Brer Fox, sezee, 'en he sorter rake me over de coals kaze you en me ain't make frens en live naberly, en I tole 'im dat I'd see you.'

"Den Brer Rabbit scratch one year wid his off hinefoot sorter jub'usly, en den he ups en sez, sezee:

"'All a settin', Brer Fox. Spose'n you drap roun' termorrer en take dinner wid me. We ain't got no great doin's at our house, but I speck de ole 'oman en de chilluns kin sorter scramble roun' en git up sump'n fer ter stay yo' stummuck.'

"'I'm 'gree'ble, Brer Rabbit,' sez Brer Fox, sezee.

"'Den I'll 'pen' on you,' sez Brer Rabbit, sezee.

"Nex' day, Mr. Rabbit an' Miss Rabbit got up soon, 'fo' day, en raided on a gyarden like Miss Sally's out dar, en got some cabbiges, en some roas'n years, en some sparrer-grass, en dey fix up a smashin' dinner. Bimeby one er de little Rabbits, playin' out in de back-yard, come runnin' in hollerin', 'Oh, ma! oh, ma! I seed Mr. Fox a comin'!' En den Brer Rabbit he tuck de chilluns by der years en make um set down, en den him en Miss Rabbit sorter dally roun' waitin' for Brer Fox. En dey keep on waitin', but no Brer Fox ain't come. Atter'while Brer Rabbit goes to de do', easy like, en peep out, en dar, stickin' out fum behime de cornder, wuz de tip-een' er Brer Fox tail. Den Brer Rabbit shut de do' en sot down, en put his paws behime his years en begin fer ter sing:

"'De place wharbouts you spill de grease,
Right dar youer boun' ter slide,
An' whar you fine a bunch er ha'r,
You'll sholy fine de hide.'

"Nex' day, Brer Fox sont word by Mr. Mink, en skuze hisse'f kaze he wuz too sick fer ter come, en he ax Brer Rabbit fer ter come en take dinner wid him, en Brer Rabbit say he wuz 'gree'ble.

"Bimeby, w'en de shadders wuz at der shortes', Brer Rabbit he sorter brush up en santer down ter Brer Fox's house, en w'en he got dar, he yer somebody groanin', en he look in de do' en dar he see Brer Fox settin' up in a rockin' cheer all wrop up wid flannil, en he look mighty weak. Brer Rabbit look all 'roun', he did, but he ain't see no dinner. De dishpan wuz settin' on de table, en close by wuz a kyarvin' knife.

"'Look like you gwineter have chicken fer dinner, Brer Fox,' sez Brer Rabbit, sezee.

"'Yes, Brer Rabbit, deyer nice, en fresh, en tender,' sez Brer Fox, sezee.

"Den Brer Rabbit sorter pull his mustarsh, en say: 'You ain't got no calamus root, is you, Brer Fox? I done got so now dat I can't eat no chicken 'ceppin she's seasoned up wid calamus root.' En wid dat Brer Rabbit lipt out er de do' and dodge 'mong de bushes, en sot dar watchin' fer Brer Fox; en he ain't watch long, nudder, kaze Brer Fox flung off de flannil en crope out er de house en got whar he could close in on Brer Rabbit, en bimeby Brer Rabbit holler out: 'Oh, Brer Fox! I'll des put yo' calamus root out yer on dish yer stump. Better come git it while hit's fresh,' and wid dat Brer Rabbit gallop off home. En Brer Fox ain't never kotch 'im yit, en w'at's mo', honey, he ain't gwineter."

HOW MR. RABBIT SAVED HIS MEAT

"One time," said Uncle Remus, whetting his knife slowly and thoughtfully on the palm of his hand, and gazing reflectively in the fire—"one time Brer Wolf—"

"Why, Uncle Remus!" the little boy broke in, "I thought you said the Rabbit scalded the Wolf to death a long time ago."

The old man was fairly caught and he knew it; but this made little difference to him. A frown gathered on his usually serene brow as he turned his gaze upon the child—a frown in which both scorn and indignation were visible. Then all at once he seemed to regain control of himself. The frown was chased away by a look of Christian resignation.

"Dar now! W'at I tell you?" he exclaimed as if addressing a witness concealed under the bed. "Ain't I done tole you so? Bless grashus! ef chilluns ain't gittin' so dey knows mo'n ole fokes, en dey'll spute longer you en spute longer you, ceppin der ma call um, w'ich I speck twon't be long 'fo' she will, en den I'll set yere by de chimbly-cornder en git some peace er mine. W'en ole Miss wuz livin'," continued the old man, still addressing some imaginary person, "hit 'uz mo'n enny her chilluns 'ud dast ter do ter come 'sputin' longer me, en Mars John'll tell you de same enny day you ax 'im."

"Well, Uncle Remus, you know you said the Rabbit poured hot water on the Wolf and killed him," said the little boy.

The old man pretended not to hear. He was engaged in searching among some scraps of leather under his chair, and kept on talking to the imaginary person. Finally, he found and drew forth a nicely plaited whip-thong with a red snapper all waxed and knotted.

"I wuz fixin' up a w'ip fer a little chap," he continued, with a sigh, "but, bless grashus! 'fo' I kin git 'er done, de little chap done grow'd up twel he know mo'n I duz."

The child's eyes filled with tears and his lips began to quiver, but he said nothing; whereupon Uncle Remus immediately melted.

"I 'clar' to goodness," he said, reaching out and taking the little boy tenderly by the hand, "ef you ain't de ve'y spit en image er ole Miss w'en I brung 'er de las' news er de war. Hit's des like skeerin' up a ghos' w'at you ain't fear'd un."

Then there was a pause, the old man patting the little child's hand caressingly.

"You ain't mad, is you, honey?" Uncle Remus asked finally, "kaze ef you is, I'm gwine out yere en butt my head 'gin de do' jam'."

But the little boy wasn't mad. Uncle Remus had conquered him and he had conquered Uncle Remus in pretty much the same way before. But it was some time before Uncle Remus would go on with the story. He had to be coaxed. At last, however, he settled himself back in the chair and began:

"Co'se, honey, hit mout er bin ole Brer Wolf, er hit mout er bin er n'er Brer Wolf; it mout er bin 'fo' he got

---

46 spute longer, contradict • 72 fear'd un, afraid of • 85 er n'er, another

Uncle Remus.

kotch up wid, er it mout er bin atterwards. Ez de tale were gun to me des dat away I gin it unter you. One time Brer Wolf wuz comin' 'long home fum a fishin' frolic. He s'anter 'long de road, he did, wid his string er fish 'cross his shoulder, wen fus news you know ole Miss Pa'tridge, she hop outer de bushes en flutter 'long right at Brer Wolf nose. Brer Wolf he say ter hisse'f dat ole Miss Pa'tridge tryin' fer ter toll 'im 'way fum her nes', en wid dat he lay his fish down en put out inter de bushes whar ole Miss Pa'tridge come fum, en 'bout dat time Brer Rabbit, he happen 'long. Dar wuz de fishes, en dar wuz Brer Rabbit, en w'en dat de case w'at you speck a sorter innerpen'ent man like Brer Rabbit gwine do? I kin tell you dis, dat dem fishes ain't stay whar Brer Wolf put um at, en w'en Brer Wolf come back dey wuz gone.

"Brer Wolf, he sot down en scratch his head, he did, en study en study, en den hit sorter rush inter his mine dat Brer Rabbit bin 'long dar, en den Brer Wolf, he put out fer Brer Rabbit house, en w'en he git dar he hail 'im. Brer Rabbit, he dunno nuthin' tall 'bout no fishes. Brer Wolf he up'n say he bleedzd ter b'leeve Brer Rabbit got dem fishes. Brer Rabbit 'ny it up en down, but Brer Wolf stan' to it dat Brer Rabbit got dem fishes. Brer Rabbit, he say dat if Brer Wolf b'leeve he got de fishes, den he give Brer Wolf lief fer ter kill de bes' cow he got. Brer Wolf, he tuck Brer Rabbit at his word, en go off ter de pastur' en drive up de cattle en kill Brer Rabbit bes' cow.

"Brer Rabbit, he hate mighty bad fer ter lose his cow, but he lay his plans, en he tell his chilluns dat he gwineter have dat beef yit. Brer Wolf, he bin tuck up by de patter-rollers 'fo' now, en he mighty skeerd un um, en fus news you know, yer come Brer Rabbit hollerin' en tellin' Brer Wolf dat de patter-rollers comin'.

" 'You run en hide, Brer Wolf,' sez Brer Rabbit, sezee, 'en I'll stay yer en take keer er de cow twel you gits back,' sezee.

"Soon's Brer Wolf hear talk er de patter-rollers, he scramble off inter de underbresh like he bin shot out'n a gun. En he want mo'n gone 'fo' Brer Rabbit, he whirl in en skunt de cow en salt de hide down, en den he tuck'n cut up de kyarkiss en stow it 'way in de smoke-'house, en den he tuck'n stick de een' er de cow-tail in de groun'. Atter he gone en done all dis, den Brer Rabbit he squall out fer Brer Wolf:

" 'Run yer, Brer Wolf! Run yer! Yo' cow gwine in de groun'! Run yer!'

"W'en ole Brer Wolf got dar, w'ich he come er scootin', dar wuz Brer Rabbit hol'in' on ter de cow-tail, fer ter keep it fum gwine in de groun'. Brer Wolf, he kotch holt, en dey 'gin a pull er two en up come de tail. Den Brer Rabbit, he wink his off eye en say, sezee:

" 'Dar! de tail done pull out en de cow gone,' sezee.

"But Brer Wolf he wer'n't de man fer ter give it up dat away, en he got 'im a spade, en a pick-axe, en a shovel, en he dig en dig fer dat cow twel diggin' wuz pas' all endu'unce, en ole Brer Rabbit he sot up dar in his front po'ch en smoke his seegyar. Eve'y time ole Brer Wolf stuck de pick-axe in de clay, Brer Rabbit, he giggle ter his chilluns:

" 'He diggy, diggy, diggy, but no meat dar! He diggy, diggy, diggy, but no meat dar!'

---

2 gun, given or told • 22 bleedzd, obliged • 32 patter-rollers, probably the night patrollers who determined whether Negro slaves were illegally at large • 40 want, wasn't • 41 skunt, skinned

"Kaze all de time de cow wuz layin' pile up in his smoke-'ouse, en him en his chilluns wuz eatin' fried beef en inguns eve'y time dey mouf water.

"Now den, honey, you take dis yer w'ip," continued the old man, twining the leather thong around the little boy's neck, "en scamper up ter de big 'ouse en tell Miss Sally fer ter gin you some un it de nex' time she fine yo' tracks in de sugar-bairl."

MR. RABBIT MEETS HIS MATCH AGAIN

"Dere wuz nudder man dat sorter play it sharp on Brer Rabbit," said Uncle Remus, as, by some mysterious process, he twisted a hog's bristle into the end of a piece of thread—an operation which the little boy watched with great interest. "In dem days," continued the old man, "de beastesses kyar'd on marters same ez fokes. Dey went inter fahmin', en I speck ef de troof wuz ter come out, dey kep' sto', en had der camp-meetin' times en der bobbycues w'en de wedder wuz 'greeble."

Uncle Remus evidently thought that the little boy wouldn't like to hear of any further discomfiture of Brer Rabbit, who had come to be a sort of hero, and he was not mistaken.

"I thought the Terrapin was the only one that fooled the Rabbit," said the little boy, dismally.

"Hit's des like I tell you, honey. Dey ain't no smart man, 'cep' w'at dey's a smarter. Ef ole Brer Rabbit hadn't er got kotch up wid, de nabers 'ud er tuck 'im for a h'ant, en in dem times dey bu'nt witches 'fo' you could squinch yo' eyeballs Dey did dat."

"Who fooled the Rabbit this time?" the little boy asked.

When Uncle Remus had the bristle "sot" in the thread, he proceeded with the story:

"One time Brer Rabbit en ole Brer Buzzard 'cluded dey'd sorter go snacks, en crap tergedder. Hit wuz a mighty good year, en de truck tu'n out monstus well, but bimeby, w'en de time come fer dividjun, hit come ter light dat ole Brer Buzzard ain't got nuthin'. De crap wuz all gone, en dey want nuthin' dar fer ter show fer it. Brer Rabbit, he make like he in a wuss fix'n Brer Buzzard, en he mope 'roun', he did, like he fear'd dey gwineter sell 'im out.

"Brer Buzzard, he ain't sayin' nuthin', but he keep up a monstus thinkin', en one day he come 'long en holler en tell Brer Rabbit dat he done fine rich gole-mine des 'cross de river.

"'You come en go 'longer me, Brer Rabbit,' sez Brer Tukky Buzzard, sezee. 'I'll scratch en you kin grabble, en 'tween de two un us we'll make short wuk er dat gole-mine,' sezee.

"Brer Rabbit, he wuz high up fer de job, but he study en study, he did, how he gwineter git 'cross de water, kaze ev'y time he git his foot wet all de fambly kotch cole. Den he up'n ax Brer Buzzard how he gwine do, en Brer Buzzard he up'n say dat he kyar Brer Rabbit 'cross, en wid dat ole Brer Buzzard, he squot down, he did, en spread his wings, en Brer Rabbit, he mounted, en up dey riz." There was a pause.

"What did the Buzzard do then?" asked the little boy.

"Dey riz," continued Uncle Remus, "en w'en dey lit, dey lit in de top er de highest sorter pine, en de pine w'at dey lit in wuz growin' on er ilun, en de ilun wuz in de middle er de river, wid de deep water runnin' all 'roun'. Dey ain't mo'n lit 'fo' Brer Rabbit, he know w'ich way de win' 'uz blowin', en by de time ole Brer Buzzard got hisse'f ballunce on a lim', Brer Rabbit, he up'n say, sezee:

"'W'iles we er res'n here, Brer Buzzard, en bein's you bin so good, I got sump'n fer ter tell you,' sezee. 'I got a gole-mine er my own, one w'at I make myse'f, en I speck we better go back ter mine 'fo' we bodder 'longer yone,' sezee.

"Den ole Brer Buzzard, he laff, he did, twel he shake, en Brer Rabbit, he sing out:

"'Hole on, Brer Buzzard! Don't flop yo' wings w'en you laff, kaze den ef you duz, sump'n 'ill drap fum up yer, en my gole-mine won't do you no good, en needer will yone do me no good.'

"But 'fo' dey got down fum dar, Brer Rabbit done tole all 'bout de crap, en he hatter promus fer ter 'vide fa'r en squar. So Brer Buzzard, he kyar 'im back, en Brer Rabbit he walk weak in de knees a mont' atter-wuds."

Nights with Uncle Remus

MR. BENJAMIN RAM AND HIS WONDERFUL FIDDLE

I 'speck you done year tell er ole man Benjermun Ram," said Uncle Remus, with a great affectation of indifference, after a pause.

"Old man who?" asked the little boy.

"Old man Benjermun Ram. I 'speck you done year tell er him too long 'go ter talk 'bout."

"Why, no, I haven't, Uncle Remus!" exclaimed the little boy, protesting and laughing. "He must have been a mighty funny old man."

"Dat's ez may be," responded Uncle Remus, sententiously. "Fun deze days wouldn't er counted fer fun in dem days; en many's de time w'at I see folks laughin'," continued the old man, with such withering sarcasm that the little boy immediately became serious,—"many's de time w'at I sees um laughin' en laughin', w'en I lay dey ain't kin tell w'at deyer laughin' at deyse'f. En 'tain't der laughin' w'at pesters me, nudder,"—relenting a little,—"hit's dish yer ev'lastin' snickle en giggle, giggle en snickle."

Having thus mapped out, in a dim and uncertain way, what older people than the little boy might have been excused for accepting as a sort of moral basis, Uncle Remus proceeded:

"Dish yer Mr. Benjermun Ram, w'ich he done come up inter my min', was one er deze yer ole-timers. Dey tells me dat he 'uz a fiddler fum away back yander—one er dem ar kinder fiddlers w'at can't git de chune down fine 'less dey pats der foot. He stay all by he own-alone se'f 'way out in de middle un a big new-groun', en he sech a handy man fer ter have at a frolic dat de yuther creeturs like 'im mighty well, en w'en dey tuck a notion fer ter shake der foot, w'ich de notion tuck'n' struck um eve'y once in a w'ile, nuthin' 'ud do but dey mus' sen' fer ole man Benjermun Ram en he fiddle; en dey do say," continued Uncle Remus, closing his eyes in a sort of ecstasy, "dat w'en he squar' hisse'f back in a cheer, en git in a weavin' way, he kin des snatch dem old-time chunes fum who lay de rail. En den, w'en de frolic wuz done, dey'd all fling in, dem yuther creeturs would, en fill up a bag er peas fer ole Mr. Benjermun Ram fer ter kyar home wid 'im.

"One time, des 'bout Christmas, Miss Meadows en Miss Motts en de gals, dey up 'n' say dat dey'd sorter gin a blow-out, en dey got wud ter ole man Benjermun Ram w'ich dey 'speckted 'im fer ter be on han'. W'en de time come fer Mr. Benjermun Ram fer ter start, de win' blow cole en de cloud 'gun ter spread out 'cross de elements—but no marter fer dat; ole man Benjermun Ram tuck down he walkin'-cane, he did, en tie up de fiddle in a bag, en sot out fer Miss Meadows. He thunk he know de way, but hit keep on gittin' col'er, en col'er, en mo' cloudy, twel bimeby, fus' news you know, ole Mr. Benjermun Ram done lose de way. Ef he'd er kep' on down de big road fum de start, it moughter bin diffunt, but he tuck a nigh-cut, en he ain't git fur 'fo' he done los' sho' 'nuff. He go dis away, en he go dat away, en he go de yuther way, yit all de same he wus done los'. Some folks would er sot right flat down whar dey wus en study out de way, but ole man Benjermun Ram ain't got wrinkle on he hawn fer nothin', kaze he done got de name er ole Billy Hardhead long 'fo' dat. Den ag'in, some folks would er stop right still in der tracks en holler en bawl fer ter see ef dey can't roust up some er de neighbors, but ole Mr. Benjermun Ram, he des stick he jowl in de win', he did, en he march right on des 'zackly like he know he ain't gwine de wrong way. He keep on, but 'twan't long 'fo' he 'gun ter feel right lonesome, mo' speshually w'en hit come up in he min' how Miss Meadows en de galls en all de comp'ny be bleedz ter do de bes' dey kin bidout any fiddlin'; en hit kinder make he marrer git cole w'en he study 'bout how he gotter sleep out dar in de woods by hisse'f.

"Yit, all de same, he keep on twel de dark 'gun ter drap down, en den he keep on still, en bimeby he come ter a little rise whar dey wuz a clay-gall. W'en he git dar he stop en look 'roun', he did, en 'way off down in de holler, dar he see a light shinin', en w'en he see dis, ole

---

29 new-groun', newly cleared ground • 38 fum . . . rail, from the foundation or beginning • 44 wud, word • 60 hawn, horn • 75 clay-gall, a bare patch that has resisted erosion

man Benjermun Ram tuck he foot in he han', en make he way todes it des lak it de ve'y place w'at he bin huntin'. 'Twan't long 'fo' he come ter de house whar de light is, en, bless you soul, he don't make no bones er knockin'. Den somebody holler out:

"'Who dat?'

"'I'm Mr. Benjermun Ram, en I done lose de way, en I come fer ter ax you ef you can't take me in fer de night,' sezee.

"In common," continued Uncle Remus, "ole Mr. Benjermun Ram wuz a mighty rough-en-spoken somebody, but you better b'leeve he talk monst'us perlite dis time.

"Den some un on t'er side er de do' ax Mr. Benjermun Ram fer ter walk right in, en wid dat he open de do' en walk in, en make a bow like fiddlin' folks does w'en dey goes in comp'ny; but he ain't no sooner made he bow en look 'roun' twel he 'gun ter shake en shiver lak he done bin stricken wid de swamp ager, kaze, settin' right dar 'fo' de fier wuz ole Brer Wolf, wid his toofies showin' up all w'ite en shiny like dey wuz bran new. Ef ole Mr. Benjermun Ram ain't bin so ole en stiff I boun' you he'd er broke en run, but 'mos' 'fo' he had time fer ter study 'bout gittin' 'way, ole Brer Wolf done bin jump up en shet de do' en fassen' 'er wid a great big chain. Ole Mr. Benjermun Ram he know he in fer't, en he tuck'n put on a bol' face ez he kin, but he des nat'ally hone fer ter be los' in de woods some mo'. Den he make 'n'er low bow, en he hope Brer Wolf and all his folks is well, en den he say, sezee, dat he des drap in fer ter wom hisse'f, en 'quire uv de way ter Miss Meadows', en ef Brer Wolf be so good ez ter set 'im in de road ag'in, he be off putty soon en be much 'blige in de bargains.

"'Tooby sho', Mr. Ram,' sez Brer Wolf, sezee, w'iles he lick he chops en grin; 'des put yo' walkin'-cane in de cornder over dar, en set yo' bag down on de flo', en make yo'se'f at home,' sezee. 'We ain't got much,' sezee, 'but w'at we is got is yone w'iles you stays, en I boun' we'll take good keer un you,' sezee; en wid dat Brer Wolf laugh en show his toofies so bad dat ole man Benjermun Ram come mighty nigh havin' 'n'er ager

"Den Brer Wolf tuck'n' flung 'n'er lighter'd-knot on de fier, en den he slip inter de back room, en present'y, w'iles ole Mr. Benjermun Ram wuz settin' dar shakin' in he shoes, he year Brer Wolf whispun' ter he ole 'oman:

"'Ole 'oman! ole 'oman! Fling 'way yo' smoke meat—fresh meat fer supper! Fling 'way yo' smoke meat—fresh meat fer supper!'

"Den ole Miss Wolf, she talk out loud, so Mr. Benjermun Ram kin year:

"'Tooby sho' I'll fix 'im some supper. We er 'way off yer in de woods, so fur fum comp'ny dat goodness knows I'm mighty glad ter see Mr. Benjermun Ram.'

"Den Mr. Benjermun Ram year ole Miss Wolf whettin' 'er knife on a rock—*shirrah! shirrah! shirrah!*—en ev'y time he year de knife say *shirrah!* he know he dat much nigher de dinner-pot. He know he can't git 'way, en w'iles he settin' dar studyin', hit 'come 'cross he min' dat he des mought ez well play one mo' chune on he fiddle 'fo' de wuss come ter de wuss. Wid dat he ontie de bag en take out de fiddle, en 'gun ter chune 'er up—*plink, plank, plunk, plink! plunk, plank, plink, plunk!*"

Uncle Remus's imitation of the tuning of a fiddle was marvellous enough to produce a startling effect upon a much less enthusiastic listener than the little boy. It was given in perfect good faith, but the serious expression on the old man's face was so irresistibly comic that the child laughed until the tears ran down his face. Uncle Remus very properly accepted this as a tribute to his wonderful resources as a story-teller, and continued, in great good-humor:

"W'en ole Miss Wolf year dat kinder fuss, co'se she dunner w'at is it, en she drap 'er knife en lissen. Ole Mr. Benjermun Ram ain't know dis, en he keep on chunin' up—*plank, plink, plunk, plank!* Den ole Miss Wolf, she tuck'n' hunch Brer Wolf wid'er elbow, en she say, sez she:

"'Hey, ole man! w'at dat?'

"'Den bofe un um cock up der years en lissen, en des 'bout dat time, ole Mr. Benjermun Ram he sling de butt er de fiddle up und' he chin, en struck up one er dem ole-time chunes."

"Well, what tune was it, Uncle Remus?" the little boy asked, with some display of impatience.

"Ef I ain't done gone en fergit dat chune off'n my min'," continued Uncle Remus; "hit sorter went like dat ar song 'bout 'Sheep shell co'n wid de rattle er his ho'n;' en yit hit mout er been dat ar yuther one 'bout 'Roll de key, ladies, roll dem keys.' Brer Wolf

en ole Miss Wolf, dey lissen en lissen, en de mo' w'at dey lissen de skeerder dey git, twel bimeby dey tuck ter der heels en make a break fer de swamp at de back er de house des lak de patter-rollers wuz atter um.

"W'en ole man Benjermun Ram sorter let up wid he fiddlin', he don't see no Brer Wolf, en he don't year no ole Miss Wolf. Den he look in de back room; no Wolf dar. Den he look in de back po'ch; no Wolf dar. Den he look in de closet en de cubberd; no Wolf aint dar yit. Den ole Mr. Benjermun Ram, he tuck 'n' shot all de do's en lock um, en he s'arch 'roun' en he fine some peas en fodder in de lof', w'ich he et um fer he supper, en den he lie down front er de fier en sleep soun' ez a log.

"Nex' mawnin' he 'uz up en stirrin' monst'us soon, en he put out fum dar, en he fine de way ter Miss Meadows' time 'nuff fer ter play at de frolic. W'en he git dar, Miss Meadows en de gals, dey run ter de gate fer ter meet 'im, en dis un tuck he hat, en dat un tuck he cane, en t'er 'n tuck he fiddle, en den dey up 'n' say:

"'Law, Mr. Ram! whar de name er goodness is you bin? We so glad you come. Stir 'roun' yer, folks, en git Mr. Ram a cup er hot coffee.'

"Dey make a mighty big ter-do 'bout Mr. Benjermun Ram, Miss Meadows en Miss Motts en de gals did, but 'twix' you en me en de bedpos', honey, dey'd er had der frolic wh'er de ole chap 'uz dar er not, kaze de gals done made 'rangements wid Brer Rabbit fer ter pat fer um, en in dem days Brer Rabbit wuz a patter, mon. He mos' sho'ly wuz."

1883

Sarah Orne Jewett

1849 • 1909

"If I were asked to name three American books," wrote Willa Cather in 1925, "which have the possibility of a long, long life, I would say at once, *The Scarlet Letter, Huckleberry Finn,* and *The Country of the Pointed Firs.* I can think of no others that confront time and change so serenely."

Sarah Orne Jewett, the author of *The Country of the Pointed Firs,* was born in the village of South Berwick, in the southwest corner of Maine, just ten miles from the seacoast. Although she became a cosmopolitan person, traveling in Europe and spending a good deal of time with friends in Boston (Annie Fields, Howells, Thomas Bailey Aldrich, and others), South Berwick was her lifelong home and she always returned there to write. Like all good regionalists, she believed with Whittier that

> . . . he who wanders widest lifts
> No more of beauty's jealous veils
> Than he who from his doorway sees
> The miracle of flowers and trees.

Her formal schooling was irregular and fragmentary. Her real education for writing came from riding and talking with her father, a country doctor, as he visited his many patients in the fishing villages and on the upland farms, and from reading in her father's library.

Although she read widely in the modern English and Continental novel (in Jane Austen, Thackeray, Flaubert, Tolstoy), she was influenced especially by Mrs. Stowe's account of life along the Maine coast and by Howells, who had emphasized, in *A Chance Acquaintance,* the "pleasure in finding out the small graces and beauties of the poverty-stricken subjects." Her first story appeared in the *Atlantic Monthly* in 1869, when she was only twenty. In 1877 was published *Deephaven,* a collection of stories and sketches about a Maine village, nominally Deephaven but really South Berwick. Miss Jewett wrote many such sketches and stories, which appeared at frequent intervals in the *Atlantic* and were collected from time to time in book form: *Country By-Ways* (1881), *A White Heron and Other Stories* (1886), *A Native of Winby and Other Tales* (1893), *The Country of the Pointed Firs* (1896) are a partial list.

"The thing that teases the mind over and over for years," Miss Jewett once said, "and at last gets itself put down rightly on paper—whether little or great, it belongs to Literature." Her work shows the knowledge that comes only with long saturation, and the fine selective process of the artist. Her stories of New England are the best that have been written since Hawthorne. They are not as great as Hawthorne's (Miss Cather's praise, quoted earlier, is a little extravagant), because Miss Jewett lacks Hawthorne's grasp, his tragic power. She deals with the gentle, the amiable, the picturesque, and, at times, the trivial, and she sometimes fails to make their significance convincing But her work is authentic literary art: she adds a delicate grace to the New England spareness. Her best writing has been justly called "a miracle in pastel shades."

The Best Stories of Sarah Orne Jewett (selected and arranged with a preface by Willa Cather), 2 vols , Boston, 1925 • F. O. Matthiessen, **Sarah Orne Jewett,** Boston, 1929

The Courting of Sister Wisby

Discursive and plotless, "The Courting of Sister Wisby" finds ample literary justification in its portrayal of New England life and manners. The author herself is present in the story, and the characters are seen from her point of view. Although the critical reader may detect the faintest suggestion of condescension toward "dear old Mrs. Goodsoe" and the others and an air of exhibiting them as interesting "specimens," Miss Jewett's treatment is firmly based upon an intimate knowledge and a genuine sympathy.

The story was printed in The King of Folly Island and Other People, 1888.

All the morning there had been an increasing temptation to take an out-door holiday, and early in the afternoon the temptation outgrew my power of resistance. A far-away pasture on the long southwestern slope of a high hill was persistently present to my mind, yet there seemed to be no particular reason why I should think of it. I was not sure that I wanted anything from the pasture, and there was no sign, except the temptation, that the pasture wanted anything of me But I was on the farther side of as many as three fences before I stopped to think again where I was going, and why.

There is no use in trying to tell another person about that afternoon unless he distinctly remembers weather exactly like it. No number of details concerning an Arctic ice-blockade will give a single shiver to a child of the tropics. This was one of those perfect New England days in late summer, when the spirit of autumn takes a first stealthy flight, like a spy, through the ripening country-side, and, with feigned sympathy for those who droop with August heat, puts her cool cloak of bracing air about leaf and flower and human shoulders. Every living thing grows suddenly cheerful and strong; it is only when you catch sight of a horror-stricken little maple in swamp soil—a little maple that has second sight

and fore-knowledge of coming disaster to her race—only then does a distrust of autumn's friendliness dim your joyful satisfaction.

In midwinter there is always a day when one has the first foretaste of spring; in late August there is a morning when the air is for the first time autumn-like. Perhaps it is a hint to the squirrels to get in their first supplies for the winter hoards, or a reminder that summer will soon end, and everybody had better make the most of it. We are always looking forward to the passing and ending of winter, but when summer is here it seems as if summer must always last. As I went across the fields that day, I found myself half lamenting that the world must fade again, even that the best of her budding and bloom was only a preparation for another springtime, for an awakening beyond the coming winter's sleep.

The sun was slightly veiled; there was a chattering group of birds, which had gathered for a conference about their early migration. Yet, oddly enough, I heard the voice of a belated bobolink, and presently saw him rise from the grass and hover leisurely, while he sang a brief tune. He was much behind time if he were still a housekeeper; but as for the other birds who listened, they cared only for their own notes. An old crow went sagging by, and gave a croak at his despised neighbor, just as a black reviewer croaked at Keats—so hard it is to be just to one's contemporaries. The bobolink was indeed singing out of season, and it was impossible to say whether he really belonged most to this summer or to the next. He might have been delayed on his northward journey; at any rate, he had a light heart now, to judge from his song, and I wished that I could ask him a few questions—how he liked being the last man among the bobolinks, and where he had taken singing lessons in the South.

Presently I left the lower fields, and took a path that led higher, where I could look beyond the village to the northern country mountainward. Here the sweet fern grew thick and fragrant, and I also found myself heedlessly treading on pennyroyal. Nearby, in a field corner, I long ago made a most comfortable seat by putting a stray piece of board and bit of rail across the angle of the fences. I have spent many a delightful hour there, in the shade and shelter of a young pitch-pine and a wild-cherry tree, with a lovely outlook toward the village, just far enough away beyond the green slopes and tall elms of the lower meadows. But that day I still had the feeling of being outward bound, and did not turn aside nor linger. The high pasture land grew more and more enticing.

I stopped to pick some blackberries that twinkled at me like beads among their dry vines, and two or three yellow-birds fluttered up from the leaves of a thistle and then came back again, as if they had complacently discovered that I was only an overgrown yellow-bird, in strange disguise but perfectly harmless. They made me feel as if I were an intruder, though they did not offer to peck at me, and we parted company very soon. It was good to stand at last on the great shoulder of the hill. The wind was coming in from the sea, there was a fine fragrance from the pines, and the air grew sweeter every moment. I took new pleasure in the thought that in a piece of wild pasture land like this one may get closest to Nature, and subsist upon what she gives of her own free will. There have been no drudging, heavy-shod ploughmen to overturn the soil, and vex it into yielding artificial crops. Here one has to take just what Nature is pleased to give, whether one is a yellow-bird or a human being. It is very good entertainment for a summer wayfarer, and I am asking my reader now to share the winter provision which I harvested that day. Let us hope that the small birds are also faring well after their fashion, but I give them an anxious thought while the snow goes hurrying in long waves across the buried fields, this windy winter night.

I next went farther down the hill, and got a drink of fresh cool water from the brook, and pulled a tender sheaf of sweet flag beside it. The mossy old fence just beyond was the last barrier between me and the pasture which had sent an invisible messenger earlier in the day, but I saw that somebody else had come first to the rendezvous: there was a brown gingham cape-bonnet and a sprigged shoulder-shawl bobbing up and down, a little way off among the junipers. I had taken such uncommon pleasure in being alone that I instantly felt a sense of disappointment; then a warm glow of pleasant satisfaction rebuked my selfishness. This could be no one but dear old Mrs. Goodsoe, the friend of my childhood

---

26 black . . . Keats, an allusion to the contemptuous review of Keats' "Endymion" by John Wilson Croker in the *Quarterly Review* for April 1818

and fond dependence of my maturer years. I had not seen her for many weeks, but here she was, out on one of her famous campaigns for herbs, or perhaps just returning from a blueberrying expedition. I approached with care, so as not to startle the gingham bonnet; but she heard the rustle of the bushes against my dress, and looked up quickly, as she knelt, bending over the turf. In that position she was hardly taller than the luxuriant junipers themselves.

"I'm a-gittin' in my mulleins," she said briskly, "an' I've been thinking o' you these twenty times since I come out o' the house. I begun to believe you must ha' forgot me at last."

"I have been away from home," I explained. "Why don't you get in your pennyroyal too? There's a great plantation of it beyond the next fence but one."

"Pennyr'yal!" repeated the dear old woman, with an air of compassion for inferior knowledge; "'tain't the right time, darlin'. Pennyr'yal's too rank now. But for mulleins this day is prime. I've got a dreadful graspin' fit for 'em this year; seems if I must be goin' to need 'em extry. I feel like the squirrels must when they know a hard winter's comin'." And Mrs. Goodsoe bent over her work again, while I stood by and watched her carefully cut the best fullgrown leaves with a clumsy pair of scissors, which might have served through at least half a century for herb-gathering. They were fastened to her apron-strings by a long piece of list.

"I'm going to take my jack-knife and help you," I suggested, with some fear of refusal. "I just passed a flourishing family of six or seven heads that must have been growing on purpose for you."

"Now be keerful, dear heart," was the anxious response; "choose 'em well. There's odds in mulleins same's there is in angels. Take a plant that's all run up to stalk, and there ain't but little goodness in the leaves. This one I'm at now must ha' been stepped on by some creatur and blighted of its bloom, and the leaves is han'some! When I was small I used to have a notion that Adam an' Eve must a took mulleins for their winter wear. Ain't they just like flannel, for all the world? I've had experience, and I know there's plenty of sickness might be saved to folks if they'd quit horse-radish and such fiery, exasperating things, and use mullein drarves in proper season. Now I shall spread these an' dry 'em nice on my spare floor in the garrit, an' come to steam 'em for use along in the winter there'll be the vally of the whole summer's goodness in 'em, sartin." And she snipped away with the dull scissors while I listened respectfully, and took great pains to have my part of the harvest present a good appearance.

"This is most too dry a head," she added presently, a little out of breath. "There! I can tell you there's win'rows o' young doctors, bilin' over with book-larnin', that is truly ignorant of what to do for the sick, or how to p'int out those paths that well people foller toward sickness. Book-fools I call 'em, them young men, an' some on 'em never'll live to know much better, if they git to be Methuselahs. In my time every middle-aged woman who had brought up a family had some proper ideas of dealin' with complaints. I won't say but there was some fools amongst *them,* but I'd rather take my chances, unless they'd forsook herbs and gone to dealin' with patent stuff. Now my mother really did sense the use of herbs and roots. I never see anybody that come up to her. She was a meek-looking woman, but very understandin' mother was."

"Then that's where you learned so much yourself, Mrs. Goodsoe," I ventured to say.

"Bless your heart, I don't hold a candle to her; 'tis but little I can recall of what she used to say. No, her l'arnin' died with her," said my friend, in a self-deprecating tone. "Why, there was as many as twenty kinds of roots alone that she used to keep by her, that I forgot the use of; an' I'm sure I shouldn't know where to find most of 'em, any. There was an herb"—*airb* she called it—"an herb called masterwort, that she used to get way from Pennsylvany; and she used to think everything of noble-liverwort, but I never could seem to get the right effects from it as she could. Though I don't know as she ever really did use masterwort where somethin' else wouldn't a served. She had a cousin married out in Pennsylvany that used to take pains to get it to her every year or two, and so she felt 't was important to have it. Some set more by such things as come from a distance, but I

28 list, a strip of cloth • 34 odds, difference, inequality • 35 angels. There are nine ranks of angels in the generally accepted hierarchy: in descending order, Seraphim, Cherubim, Thrones, Dominions or Dominations, Virtues, Powers, Principalities, Archangels, and Angels • 44 drarves, draws, young shoots or sprouts • 47 vally, value • 53 win'rows, windrows, rows of hay raked up to dry • 59 Methuselah, according to Genesis 5:27, lived to be 969 years old

rec'lect mother always used to maintain that folks was meant to be doctored with the stuff that grew right about 'em; 'twas sufficient, an' so ordered. That was before the whole population took to livin' on wheels, the way they do now. 'Twas never my idee that we was meant to know what's goin' on all over the world to once. There's goin' to be some sort of a set-back one o' these days, with these telegraphs an' things, an' letters comin' every hand's turn, and folks leavin' their proper work to answer 'em. I may not live to see it. 'Twas allowed to be difficult for folks to get about in old times, or to git word across the country, and they stood in their lot an' place, and weren't all just alike, either, same as pine-spills."

We were kneeling side by side now, as if in penitence for the march of progress, but we laughed as we turned to look at each other.

"Do you think it did much good when everybody brewed a cracked quart mug of herb-tea?" I asked, walking away on my knees to a new mullein.

"I've always lifted my voice against the practice, far's I could," declared Mrs. Goodsoe; "an' I won't deal out none o' the herbs I save for no such nonsense. There was three houses along our road—I call no names—where you couldn't go into the livin' room without findin' a mess o' herb-tea drorin' on the stove or side o' the fireplace, winter or summer, sick or well. One was thoroughwut, one would be camomile, and the other, like as not, yellow dock; but they all used to put in a little new rum to git out the goodness, or keep it from spilin'." (Mrs. Goodsoe favored me with a knowing smile.) "Land, how mother used to laugh! But poor creatures, they had to work hard, and I guess it never done 'em a mite o' harm; they was all good herbs. I wish you could hear the quawkin' there used to be when they was indulged with a real case o' sickness. Everybody would collect from far an' near; you'd see 'em coming along the road and across the pastures then; everybody clamorin' that nothin' would do no kind o' good but her choice o' teas or drarves to the feet. I wonder there was a babe lived to grow up in the whole lower part o' the town; an' if nothin' else 'peared to ail 'em, word was passed about that 'twas likely Mis' So-and-So's last young one was goin' to be foolish. Land, how they'd gather! I know one day the doctor come to Widder Peck's and the house was crammed so't he could scercely git inside the door; and he says, just as polite, 'Do send for some of the neighbors!' as if there wa'n't a soul to turn to, right or left. You'd ought to seen 'em begin to scatter."

"But don't you think the cars and telegraphs have given people more to interest them, Mrs. Goodsoe? Don't you believe people's lives were narrower then, and more taken up with little things?" I asked, unwisely, being a product of modern times.

"Not one mite, dear," said my companion stoutly. "There was as big thoughts then as there is now; these times was born o' them. The difference is in folks themselves; but now, instead o' doin' their own housekeepin' and watchin' their own neighbors—though that was carried to excess—they git word that a niece's child is ailin' the other side o' Massachusetts, and they drop everything and git on their best clothes, and off they jiggit in the cars. 'Tis a bad sign when folks wear out their best clothes faster 'n they do their everyday ones. The other side o' Massachusetts has got to look after itself by rights. An' besides that, Sunday-keepin's all gone out o' fashion. Some lays it to one thing an' some another, but some o' them old ministers that folks are all a-sighin' for did preach a lot o' stuff that wa'n't nothin' but chaff; 'twa'n't the word o' God out o' either Old Testament or New. But everybody went to meetin' and heard it, and come home, and was set to fightin' with their next door neighbor over it. Now I'm a believer, and I try to live a Christian life, but I'd as soon hear a surveyor's book read out, figgers an' all, as try to get any simple truth out o' most sermons. It's them as is most to blame."

"What was the matter that day at Widow Peck's?" I hastened to ask, for I knew by experience that the good, clear-minded soul beside me was apt to grow unduly vexed and distressed when she contemplated the state of religious teaching.

"Why, there wa'n't nothin' the matter, only a gal o' Miss Peck's had met with a dis'pintment and had gone into screechin' fits. 'Twas a rovin' creatur' that had come along hayin' time, and he'd gone off an' forsook her betwixt two days; nobody ever knew what become of him. Them Pecks was 'Good Lord, anybody!' kind o' gals, and took up with whoever they could get. One of 'em married Heron, the Irishman; they lived in that little house that was burnt this summer, over on the edge o' the plains.

---

13 pine-spills, pine needles • 25 drorin', drawing

He was a good-hearted creatur', with a laughin' eye and a clever word for everybody. He was the first Irishman that ever came this way, and we was all for gettin' a look at him, when he first used to go by. Mother's folks was what they call Scotch-Irish, though; there was an old race of 'em settled about here. They could foretell events, some on 'em, and had second sight. I know folks used to say mother's grandmother had them gifts, but mother was never free to speak about it to us. She remembered her well, too."

"I suppose that you mean old Jim Heron, who was such a famous fiddler?" I asked with great interest, for I am always delighted to know more about that rustic hero, parochial Orpheus that he must have been!

"Now, dear heart, I suppose you don't remember him, do you?" replied Mrs. Goodsoe, earnestly. "Fiddle! He'd about break your heart with them tunes of his, or else set your heels flying up the floor in a jig, though you was minister o' the First Parish and all wound up for a funeral prayer. I tell ye there ain't no tunes sounds like them used to. It used to seem to me summer nights when I was comin' along the plains road, and he set by the window playin', as if there was a bewitched human creatur' in that old red fiddle o' his. He could make it sound just like a woman's voice tellin' somethin' over and over, as if folks could help her out o' her sorrows if she could only make 'em understand. I've set by the stone-wall and cried as if my heart was broke, and dear knows it wa'n't in them days. How he would twirl off them jigs and dance tunes! He used to make somethin' han'some out of 'em in fall an' winter, playin' at huskins and dancin' parties; but he was unstiddy by spells, as he got along in years, and never knew what it was to be forehanded. Everybody felt bad when he died; you couldn't help likin' the creatur'. He'd got the gift—that's all you could say about it.

"There was a Mis' Jerry Foss, that lived over by the brook bridge, on the plains road, that had lost her husband early, and was left with three child'n. She set the world by 'em, and was a real pleasant, ambitious little woman, and was workin' on as best she could with that little farm, when there come a rage o' scarlet fever, and her boy and two girls was swept off and laid dead within the same week. Every one o' the neighbors did what they could, but she'd had no sleep since they was taken sick, and after the funeral she set there just like a piece o' marble, and would only shake her head when you spoke to her. They all thought her reason would go; and 'twould certain, if she couldn't have shed tears. An' one o' the neighbors—'twas like mother's sense, but it might have been somebody else—spoke o' Jim Heron. Mother an' one or two o' the women that knew her best was in the house with her. 'T was right in the edge o' the woods and some of us younger ones was over by the wall on the other side of the road where there was a couple of old willows—I remember just how the brook damp felt—and we kept quiet's we could, and some other folks come along down the road, and stood waitin' on the little bridge, hopin' somebody'd come out, I suppose, and they'd git news. Everybody was wrought up, and felt a good deal for her, you know. By an' by Jim Heron come stealin' right out o' the shadows an' set down on the doorstep, an' 'twas a good while before we heard a sound; then, oh, dear me! 'twas what the whole neighborhood felt for that mother all spoke in the notes, an' they told me afterwards that Mis' Foss's face changed in a minute, and she come right over an' got into my mother's lap—she was a little woman—an' laid her head down, and there she cried herself into a blessed sleep. After a while one o' the other women stole out an' told the folks, and we all went home. He only played that one tune.

"But there!" resumed Mrs. Goodsoe, after a silence, during which my eyes were filled with tears. "His wife always complained that the fiddle made her nervous. She never 'peared to think nothin' o' poor Heron after she'd once got him."

"That's often the way," said I, with harsh cynicism, though I had no guilty person in my mind at the moment; and we went straying off, not very far apart, up through the pasture. Mrs. Goodsoe cautioned me that we must not get so far off that we could not get back the same day. The sunshine began to feel very hot on our backs, and we both turned toward the shade. We had already collected a large bundle of mullein leaves, which were carefully laid into a clean, calico apron, held together by the four corners, and proudly carried by me, though my companion regarded them with anxious eyes. We sat down together at the edge of the pine woods, and Mrs.

---

14 parochial Orpheus. The lyre of Orpheus, in Greek mythology, could charm beasts and make trees and rocks move. "Parochial" means restricted to a parish, provincial

Goodsoe proceeded to fan herself with her limp cape-bonnet.

"I declare, how hot it is! The east wind's all gone again," she said. "It felt so cool this forenoon that I overburdened myself with as thick a petticoat as any I've got. I'm despri't afeared of having a chill, now that I ain't so young as once. I hate to be housed up."

"It's only August, after all," I assured her unnecessarily, confirming my statement by taking two peaches out of my pocket, and laying them side by side on the brown pine needles between us.

"Dear sakes alive!" exclaimed the old lady, with evident pleasure. "Where did you get them, now? Doesn't anything taste twice better out-o'-doors? I ain't had such a peach for years. Do le's keep the stones, an' I'll plant 'em; it only takes four years for a peach pit to come to bearing, an' I guess I'm good for four years, 'thout I meet with some accident."

I could not help agreeing, or taking a fond look at the thin little figure, and her wrinkled brown face and kind, twinkling eyes. She looked as if she had properly dried herself, by mistake, with some of her mullein leaves, and was likely to keep her goodness, and to last the longer in consequence. There never was a truer, simple-hearted soul made out of the old-fashioned country dust than Mrs. Goodsoe. I thought, as I looked away from her across the wide country, that nobody was left in any of the farmhouses so original, so full of rural wisdom and reminiscence, so really able and dependable, as she. And nobody had made better use of her time in a world foolish enough to sometimes under-value medicinal herbs.

When we had eaten our peaches we still sat under the pines, and I was not without pride when I had poked about in the ground with a little twig, and displayed to my crony a long fine root, bright yellow to the eye, and a wholesome bitter to the taste.

"Yis, dear, goldthread," she assented indulgently. "Seems to me there's more of it than anything except grass an' hardhack. Good for canker, but no better than two or three other things I can call to mind; but I always lay in a good wisp of it, for old times' sake. Now, I want to know why you should a bit it, and took away all the taste o' your nice peach? I was just thinkin' what a han'some entertainment we've had. I've got so I 'sociate certain things with certain folks, and goldthread was somethin' Lizy Wisby couldn't keep house without, no ways whatever. I believe she took so much it kind o' puckered her disposition."

"Lizy Wisby?" I repeated inquiringly.

"You knew her, if ever, by the name of Mis' Deacon Brimblecom," answered my friend, as if this were only a brief preface to further information, so I waited with respectful expectation. Mrs. Goodsoe had grown tired out in the sun, and a good story would be an excuse for sufficient rest. It was a most lovely place where we sat, half-way up the long hillside; for my part, I was perfectly contented and happy. "You've often heard of Deacon Brimblecom?" she asked, as if a great deal depended upon his being properly introduced.

"I remember him," said I. "They called him Deacon Brimfull, you know, and he used to go about with a witchhazel branch to show people where to dig wells."

"That's the one," said Mrs. Goodsoe, laughing. "I didn't know's you could go so far back. I'm always divided between whether you can remember everything I can, or are only a babe in arms."

"I have a dim recollection of there being something strange about their marriage," I suggested, after a pause, which began to appear dangerous. I was so much afraid the subject would be changed.

"I can tell you all about it," I was quickly answered. "Deacon Brimblecom was very pious accordin' to his lights in his early years. He lived way back in the country then, and there come a rovin' preacher along, and set everybody up that way all by the ears. I've heard the old folks talk it over, but I forget most of his doctrine, except some of his followers was persuaded they could dwell among the angels while yet on airth, and this Deacon Brimfull, as you call him, felt sure he was called by the voice of a spirit bride. So he left a good, deservin' wife he had, an' four children, and built him a new house over to the other side of the land he'd had from his father. They didn't take much pains with the buildin', because they expected to be translated before long, and then the spirit brides and them folks was goin' to appear and divide up the airth amongst 'em, and the world's folks and onbelievers was goin' to serve 'em or be sent to torments. They had meetin's about in the school-

houses, an' all sorts o' goin's on; some on 'em went crazy, but the deacon held on to what wits he had, an' by an' by the spirit bride didn't turn out to be much of a housekeeper an' he had always been used to good livin' so he sneaked home ag'in. One o' mother's sisters married up to Ash Hill, where it all took place; that's how I come to have the particulars."

"Then how did he come to find his Eliza Wisby?" I inquired. "Do tell me the whole story; you've got mullein leaves enough."

"There's all yisterday's at home, if I haven't," replied Mrs. Goodsoe. "The way he come a-courtin' o' Sister Wisby was this: she went a-courtin' o' him.

"There was a spell he lived to home, and then his poor wife died, and he had a spirit bride in good earnest, an' the child'n was placed about with his folks and hers, for they was both out o' good families; and I don't know what come over him, but he had another pious fit that looked for all the world like the real thing. He hadn't no family cares, and he lived with his brother's folks, and turned his land in with theirs. He used to travel to every meetin' an' conference that was within reach of his old sorrel hoss's feeble legs; he j'ined the Christian Baptists that was just in their early prime, and he was a great exhorter, and got to be called deacon, though I guess he wa'n't deacon, 'less it was for a spare hand when deacon timber was scercer'n usual. An' one time there was a four-days' protracted meetin' to the church in the lower part of the town. 'Twas a real solemn time; somethin' more'n usual was goin' forward, an' they collected from the whole country round. Women folks liked it, an' the men too; it give 'em a change, an' they was quartered round free, same as conference folks now. Some on 'em, for a joke, sent Silas Brimblecom up to Lizy Wisby's, though she'd give out she couldn't accommodate nobody, because of expectin' her cousin's folks. Everybody knew 'twas a lie; she was amazin' close considerin' she had plenty to do with. There was a streak that wa'n't just right somewheres in Lizy's wits, I always thought. She was very kind in case o' sickness, I'll say that for her.

"You know where the house is, over there on what they call Windy Hill? There the deacon went, all unsuspectin', and 'stead o' Lizy's resentin' of him she put in her own hoss, and they come back together to evenin' meetin'. She was prominent among the sect herself, an' he bawled and talked, and she bawled and talked, an' took up more'n the time allotted in the exercises, just as if they was showin' off to each other what they was able to do at expoundin'. Everybody was laughin' at 'em after the meetin' broke up, and that next day an' the next, an' all through, they was constant, and seemed to be havin' a beautiful occasion. Lizy had always give out she scorned the men, but when she got a chance at a particular one 'twas altogether different, and the deacon seemed to please her somehow or 'nother, and—There! you don't want to listen to this old stuff that's past an' gone?"

"Oh, yes, I do," said I.

"I run on like a clock that's onset her striking hand," said Mrs. Goodsoe mildly. "Sometimes my kitchen timepiece goes on half the forenoon, and I says to myself the day before yisterday I would let it be a warnin', and keep it in mind for a check on my own speech. The next news that was heard was that the deacon an' Lizy—well, opinions differed which of 'em had spoke first, but them fools settled it before the protracted meetin' was over, and give away their hearts before he started for home. They considered 'twould be wise, though, considerin' their short acquaintance, to take one another on trial a spell; 'twas Lizy's notion, and she asked him why he wouldn't come over and stop with her till spring, and then, if they both continued to like, they could git married any time 'twas convenient. Lizy, she come and talked it over with mother, and mother disliked to offend her, but she spoke pretty plain; and Lizy felt hurt, an' thought they was showin' excellent judgment, so much harm come from hasty unions and folks comin' to a realizin' sense of each other's failin's when 'twas too late.

"So one day our folks saw Deacon Brimfull a-ridin' by with a gre't coopful of hens in the back o' his wagon, and bundles o' stuff tied on top and hitched to the exes underneath; and he riz a hymn just as he passed the house, and was speedin' the old sorrel with a willer switch. 'Twas most Thanksgivin' time, an' sooner'n she expected him. New Year's was the time she set; but he thought he'd come while the roads was fit for wheels. They was out to meetin' together Thanksgivin' Day, an' that used to be a gre't season for marryin'; so the young folks nudged each other, and some on 'em ventured to speak to the couple as they come down the aisle. Lizy carried

80 exes, axles

it off real well; she wa'n't afraid o' what nobody said or thought, and so home they went. They'd got out her yaller sleigh and her hoss; she never would ride after the deacon's poor old creatur', and I believe it died long o' the winter from stiffenin' up.

"Yes," said Mrs. Goodsoe, emphatically, after we had silently considered the situation for a short space of time, "yes, there was consider'ble talk, now I tell you! The raskil boys pestered 'em just about to death for a while. They used to collect up there an' rap on the winders, and they'd turn out all the deacon's hens 'long at nine o'clock o' night, and chase 'em all over the dingle; an' one night they even lugged the pig right out o' the sty, and shoved it into the back entry, an' run for their lives. They'd stuffed its mouth full o' somethin', so it couldn't squeal till it got there. There wa'n't a sign o' nobody to be seen when Lizy hasted out with the light, and she an' the deacon had to persuade the creatur' back as best they could; 'twas a cold night, and they said it took 'em till towards mornin'. You see the deacon was just the kind of a man that a hog wouldn't budge for; it takes a masterful man to deal with a hog. Well, there was no end to the works nor the talk, but Lizy left 'em pretty much alone. She did 'pear kind of dignified about it, I must say!"

"And then, were they married in the spring?"

"I was tryin' to remember whether it was just before Fast Day or just after," responded my friend, with a careful look at the sun, which was nearer the west than either of us had noticed. "I think likely 'twas along in the last o' April, any way some of us looked out o' the window one Monday mornin' early, and says, 'For goodness' sake! Lizy's sent the deacon home again!' His old sorrel havin' passed away, he was ridin' in Ezry Welsh's hoss-cart, with his hen-coop and more bundles than he had when he come, and looked as meechin' as ever you see. Ezry was drivin', and he let a glance fly swiftly round to see if any of us was lookin' out; an' then I declare if he didn't have the malice to turn right in towards the barn, where he see my oldest brother, Joshuay, an' says he real natural, 'Joshuay, just step out with your wrench. I believe I hear my kingbolt rattlin' kind o' loose.' Brother, he went out an' took in the sitooation, an' the deacon bowed kind of stiff. Joshuay was so full o' laugh, and Ezry Welsh, that they couldn't look one another in the face. There wa'n't nothing ailed the kingbolt, you know, an' when Josh riz up he says, 'Goin' up country for a spell, Mr. Brimblecom?'

"'I be,' says the deacon, lookin' dreadful mortified and cast down.

"'Ain't things turned out well with you an' Sister Wisby?' says Joshuay. 'You had ought to remember that the woman is the weaker vessel.'

"'Hang her, let her carry less sail, then!' the deacon bu'st out, and he stood right up an' shook his fist there by the hen-coop, he was so mad; an' Ezry's hoss was a young creatur' an' started up and set the deacon right over backwards into the chips. We didn't know but he'd broke his neck; but when he see the women folks runnin' out he jumped up quick as a cat, an' clim' into the cart, an' off they went. Ezry said he told him that he couldn't git along with Lizy, she was so fractious in thundery weather; if there was a rumble in the daytime she must go right to bed an' screech, and if 'twas night she must git right up an' go an' call him out of a sound sleep. But everybody knew he'd never a gone home unless she'd sent him.

"Somehow they made it up ag'in, him an' Lizy, and she had him back. She'd been countin' all along on not havin' to hire nobody to work about the gardin an' so on, an' she said she wa'n't goin' to let him have a whole winter's board for nothin'. So the old hens was moved back, and they was married right off fair an' square, an' I don't know but they got along well as most folks. He brought his youngest girl down to live with 'em after a while, an' she was a real treasure to Lizy; everybody spoke well o' Phœbe Brimblecom. The deacon got over his pious fit, and there was consider'ble work in him if you kept right after him. He was an amazin' cider-drinker, and he airnt the name you know him by in his latter days. Lizy never trusted him with nothin', but she kep' him well. She left everything she owned to Phœbe, when she died, 'cept somethin' to satisfy the law. There, they're all gone now; seems to me sometimes, when I get thinkin', as if I'd lived a thousand years!"

I laughed, but I found Mrs. Goodsoe's thoughts had taken a serious turn.

12 dingle, small ravine or valley • 36 meechin', miching, lying hidden, skulking • 53 woman . . . vessel, an allusion to I Peter 3:7: "Likewise, ye husbands . . . giving honour unto the wife, as unto the weaker vessel . . ." • 80 airnt, earned

"There, I come by some old graves down here in the lower edge of the pasture," she said as we rose to go. "I couldn't help thinking how I should like to be laid right out in the pasture ground, when my time comes; it looked sort o' comfortable, and I have ranged these slopes so many summers. Seems as if I could see right up through the turf and tell when the weather was pleasant, and get the goodness o' the sweet fern. Now, dear, just hand me my apernful o' mulleins out o' the shade. I hope you won't come to need none this winter, but I'll dry some special for you."

"I'm going by the road," said I, "or else by the path across the meadows, so I will walk as far as the house with you. Aren't you pleased with my company?" for she demurred at my going the least bit out of the way.

So we strolled toward the little gray house, with our plunder of mullein leaves slung on a stick which we carried between us. Of course I went in to make a call, as if I had not seen my hostess before; she is the last maker of muster-gingerbread, and before I came away I was kindly measured for a pair of mittens.

"You'll be sure to come an' see them two peach-trees after I get 'em well growin'?" Mrs. Goodsoe called after me when I had said good-by, and was almost out of hearing down the road.

1888

William Sydney Porter (O. Henry)

1862 • 1910

William Sydney Porter—at one time somewhat extravagantly called "the American De Maupassant"—was born in Greensboro, North Carolina. After clerking in a drug store, he went to Texas, where he lived on a ranch and later was a bank teller in Austin. Accused of embezzlement, he fled to Central America only to return because of his wife's illness and (after trial and conviction) to serve a term of three years (1897-1900) in the federal penitentiary at Columbus, Ohio. While in the penitentiary, he began to write short stories for the magazines under the pen name of "O. Henry." The last ten years of his life were spent in New York producing many stories which proved to be enormously popular all over the United States.

O. Henry's stories are not great literature. They rely for their interest chiefly upon ingenuity of plot—the "surprise ending"—the achievement of which depends too much upon accident and coincidence The style is marked by a journalistic smartness. His work, however, has a social significance. In *The Four Million,* he described aspects of life in New York which previous writers had missed. "In spite of his preposterous absurdities," says Ludwig Lewisohn, "he caught the tang of, let us say, Herald Square in 1907. A perished, amusing moment is somehow captured and held fast."

C. A Smith, O. Henry (biography), Garden City, 1916 • Ludwig Lewisohn, Expression in America, New York, 1932

From • The Four Million

The Furnished Room

"The Furnished Room" is taken from O. Henry's famous collection of stories about New York City, **The Four Million**, published in 1909.

The story is thoroughly characteristic in its use of coincidence and surprise, its picturesque detail, its facile, journalistic style. As Lewisohn has observed, "O. Henry discovered the hall bedroom."

Restless, shifting, fugacious as time itself is a certain vast bulk of the population of the red brick district of the lower West Side. Homeless, they have a hundred homes. They flit from furnished room to furnished room, transients forever—transients in abode, transients in heart and mind. They sing "Home, Sweet Home" in ragtime; they carry their *lares et penates* in a bandbox; their vine is entwined about a picture hat; a rubber plant is their fig tree.

Hence the houses of this district, having had a thousand dwellers, should have a thousand tales to tell, mostly dull ones no doubt, but it would be strange if there could not be found a ghost or two in the wake of all these vagrant guests.

One evening after dark a young man prowled among these crumbling red mansions, ringing their bells. At the twelfth he rested his lean hand-baggage upon the step and wiped the dust from his hat-band and forehead. The bell sounded faint and far away in some remote, hollow depths.

To the door of this, the twelfth house whose bell he had rung, came a housekeeper who made him think of an unwholesome surfeited worm that had eaten its nut to a hollow shell and now sought to fill the vacancy with edible lodgers.

He asked if there was a room to let.

"Come in," said the housekeeper. Her voice came from her throat; her throat seemed lined with fur. "I have the third floor back, vacant since a week back. Should you wish to look at it?"

The young man followed her up the stairs. A faint light from no particular source mitigated the shadows of the halls. They trod noiselessly upon a stair carpet that its own loom would have forsworn. It seemed to have become vegetable, to have degenerated in that rank, sunless air to lush lichen or spreading moss that grew in patches to the staircase and was viscid under the foot like organic matter. At each turn of the stairs were vacant niches in the wall. Perhaps plants had once been set within them. If so they had died in that foul and tainted air. It may be that statues of the saints had stood there, but it was not difficult to conceive that imps and devils had dragged them forth in the darkness and down to the unholy depths of some furnished pit below.

"This is the room," said the housekeeper, from her furry throat. "It's a nice room. It ain't often vacant. I had some most elegant people in it last summer—no trouble at all, and paid in advance to the minute. The water's at the end of the hall. Sprowls and Mooney kept it three months. They done a vaudeville sketch. Miss B'retta Sprowls—you may have heard of her—Oh, that was just the stage names—right there over the dresser is where the marriage certificate hung, framed. The gas is here, and you see there is plenty of closet room. It's a room everybody likes It never stays idle long"

"Do you have many theatrical people rooming here?" asked the young man.

"They comes and goes. A good proportion of my lodgers is connected with the theatres. Yes, sir, this is the theatrical district. Actor people never stays long anywhere. I get my share. Yes, they comes and they goes."

He engaged the room, paying for a week in advance. He was tired, he said, and would take possession at once. He counted out the money. The room had been made ready, she said, even to towels and water. As the housekeeper moved away he put, for the thousandth time, the question that he carried at the end of his tongue.

"A young girl—Miss Vashner—Miss Eloise Vashner—do you remember such a one among your lodgers? She would be singing on the stage, most likely. A fair girl, of medium height and slender, with reddish, gold hair and a dark mole near her left eyebrow."

"No, I don't remember the name. Them stage people has names they changes as often as their rooms. They

comes and they goes. No, I don't call that one to mind."

No. Always no. Five months of ceaseless interrogation and the inevitable negative. So much time spent by day in questioning managers, agents, schools and choruses; by night among the audiences of theatres from all-star casts down to music halls so low that he dreaded to find what he most hoped for. He who had loved her best had tried to find her. He was sure that since her disappearance from home this great, water-girt city held her somewhere, but it was like a monstrous quicksand, shifting its particles constantly, with no foundation, its upper granules of to-day buried to-morrow in ooze and slime.

The furnished room received its latest guest with a first glow of pseudo-hospitality, a hectic, haggard, perfunctory welcome like the specious smile of a demirep. The sophistical comfort came in reflected gleams from the decayed furniture, the ragged brocade upholstery of a couch and two chairs, a foot-wide cheap pier glass between two windows, from one or two gilt picture frames and a brass bedstead in a corner.

The guest reclined, inert, upon a chair, while the room, confused in speech as though it were an apartment in Babel, tried to discourse to him of its diverse tenantry.

A polychromatic rug like some brilliant-flowered rectangular, tropical islet lay surrounded by a billowy sea of soiled matting. Upon the gray-papered wall were those pictures that pursue the homeless one from house to house—The Huguenot Lovers, The First Quarrel, The Wedding Breakfast, Psyche at the Fountain. The mantel's chastely severe outline was ingloriously veiled behind some pert drapery drawn rakishly askew like the sashes of the Amazonian ballet. Upon it were some desolate flotsam cast aside by the room's marooned when a lucky sail had borne them to a fresh port—a trifling vase or two, pictures of actresses, a medicine bottle, some stray cards out of a deck.

One by one, as the characters of a cryptograph become explicit, the little signs left by the furnished room's procession of guests developed a significance. The threadbare space in the rug in front of the dresser told that lovely woman had marched in the throng. Tiny finger prints on the wall spoke of little prisoners trying to feel their way to sun and air. A splattered stain, raying like the shadow of a bursting bomb, witnessed where a hurled glass or bottle had splintered with its contents against the wall. Across the pier glass had been scrawled with a diamond in staggering letters the name "Marie."

It seemed that the succession of dwellers in the furnished room had turned in fury—perhaps tempted beyond forbearance by its garish coldness—and wreaked upon it their passions. The furniture was chipped and bruised; the couch, distorted by bursting springs, seemed a horrible monster that had been slain during the stress of some grotesque convulsion. Some more potent upheaval had cloven a great slice from the marble mantel. Each plank in the floor owned its particular cant and shriek as from a separate and individual agony. It seemed incredible that all this malice and injury had been wrought upon the room by those who had called it for a time their home; and yet it may have been the cheated home instinct surviving blindly, the resentful rage at false household gods that had kindled their wrath. A hut that is our own we can sweep and adorn and cherish.

The young tenant in the chair allowed these thoughts to file, softshod, through his mind, while there drifted into the room furnished sounds and furnished scents. He heard in one room a tittering and incontinent, slack laughter; in others the monologue of a scold, the rattling of dice, a lullaby, and one crying dully; above him a banjo tinkled with spirit. Doors banged somewhere; the elevated trains roared intermittently; a cat yowled miserably upon a back fence. And he breathed the breath of the house—a dank savour rather than a smell —a cold, musty effluvium as from underground vaults mingled with the reeking exhalations of linoleum and mildewed and rotten woodwork.

Then suddenly, as he rested there, the room was filled with the strong, sweet odour of mignonette. It came as upon a single buffet of wind with such sureness and fragrance and emphasis that it almost seemed a living visitant. And the man cried aloud: "What, dear?" as if he had been called, and sprang up and faced about. The rich odour clung to him and wrapped him around. He reached out his arms for it, all his senses for the time confused and commingled. How could one be peremptorily called by an odour? Surely it must have been a sound. But, was it not the odour that had touched, that had caressed him?

"She has been in this room," he cried, and he sprang to wrest from it a token, for he knew he would recognize the smallest thing that had belonged to her or that she had touched. This enveloping scent of mignonette, the odour that she had loved and made her own—whence came it?

The room had been but carelessly set in order. Scattered upon the flimsy dresser scarf were half a dozen hairpins—those discreet, indistinguishable friends of womankind, feminine of gender, infinite of mood, and uncommunicative of tense. These he ignored, conscious of their triumphant lack of identity. Ransacking the drawers of the dresser he came upon a discarded, tiny, ragged handkerchief. He pressed it to his face. It was racy and insolent with heliotrope; he hurled it to the floor. In another drawer he found odd buttons, a theatre programme, a pawnbroker's card, two lost marshmallows, a book on the divination of dreams. In the last was a woman's black satin hair-bow, which halted him, poised between ice and fire. But the black satin hair-bow also is femininity's demure, impersonal, common ornament, and tells no tales.

And then he traversed the room like a hound on the scent, skimming the walls, considering the corners of the bulging matting on his hands and knees, rummaging mantel and tables, the curtains and hangings, the drunken cabinet in the corner, for a visible sign, unable to perceive that she was there beside, around, against, within, above him, clinging to him, wooing him, calling him so poignantly through the finer senses that even his grosser ones became cognisant of the call. Once again he answered loudly: "Yes, dear!" and turned, wild-eyed, to gaze on vacancy, for he could not yet discern form and colour and love and outstretched arms in the odour of mignonette. Oh, God! whence that odour, and since when have odours had a voice to call? Thus he groped.

He burrowed in crevices and corners, and found corks and cigarettes. These he passed in passive contempt. But once he found in a fold of the matting a half-smoked cigar, and this he ground beneath his heel with a green and trenchant oath. He sifted the room from end to end. He found dreary and ignoble small records of many a peripatetic tenant; but of her whom he sought, and who may have lodged there, and whose spirit seemed to hover there, he found no trace.

And then he thought of the housekeeper.

He ran from the haunted room downstairs and to a door that showed a crack of light. She came out to his knock. He smothered his excitement as best he could.

"Will you tell me, madam," he besought her, "who occupied the room I have before I came?"

"Yes, sir. I can tell you again. 'Twas Sprowls and Mooney, as I said. Miss B'retta Sprowls it was in the theatres, but Missis Mooney she was. My house is well known for respectability. The marriage certificate hung, framed, on a nail over——"

"What kind of a lady was Miss Sprowls—in looks, I mean?"

"Why, black-haired, sir, short, and stout, with a comical face. They left a week ago Tuesday."

"And before they occupied it?"

"Why, there was a single gentleman connected with the draying business. He left owing me a week. Before him was Missis Crowder and her two children, that stayed four months; and back of them was old Mr. Doyle, whose sons paid for him. He kept the room six months. That goes back a year, sir, and further I do not remember."

He thanked her and crept back to his room. The room was dead. The essence that had vivified it was gone. The perfume of mignonette had departed. In its place was the old, stale odour of mouldy house furniture, of atmosphere in storage.

The ebbing of his hope drained his faith. He sat staring at the yellow, singing gaslight. Soon he walked to the bed and began to tear the sheets into strips. With the blade of his knife he drove them tightly into every crevice around windows and door. When all was snug and taut he turned out the light, turned the gas full on again, and laid himself gratefully upon the bed.

. . . . .

It was Mrs. McCool's night to go with the can for beer. So she fetched it and sat with Mrs. Purdy in one of those subterranean retreats where housekeepers foregather and the worm dieth seldom.

"I rented out my third floor, back, this evening," said Mrs. Purdy across a fine circle of foam. "A young man took it. He went up to bed two hours ago."

"Now, did ye, Mrs. Purdy, ma'am?" said Mrs. McCool, with intense admiration. "You do be a wonder for rentin' rooms of that kind. And did ye tell him, then?" she concluded in a husky whisper, laden with mystery.

"Rooms," said Mrs. Purdy, in her furriest tones, "are furnished for to rent. I did not tell him, Mrs McCool."

" 'Tis right ye are, ma'am; 'tis by renting rooms we kape alive. Ye have the rale sense for business, ma'am. There be many people will rayjict the rentin' of a room

37 peripatetic, walking about, itinerant • 77 worm dieth seldom, a humorous adaptation of Mark 9:44: "Where their worm dieth not, and the fire is not quenched." The Biblical worm of remorse becomes a symbol of thirst which is seldom "quenched."

if they be tould a suicide has been after dyin' in the bed of it."

"As you say, we has our living to be making," remarked Mrs. Purdy.

"Yis, ma'am; 'tis true. 'Tis just one wake ago this day I helped ye lay out the third floor, back A pretty slip of a colleen she was to be killin' herself wid the gas—a swate little face she had, Mrs. Purdy, ma'am."

"She'd a-been called handsome, as you say," said Mrs. Purdy, assenting but critical, "but for that mole she had a-growin' by her left eyebrow. Do fill up your glass again, Mrs. McCool."

1909

CLEMENS

Samuel L. Clemens (Mark Twain)

1835 • 1910

Perhaps the happiest circumstance in Samuel Langhorne Clemens' life, as far as rich material for literature was concerned, was that he spent his boyhood years in Hannibal, Missouri. Just about in the center of the United States, this little town had the mile-wide Mississippi rolling before it, and on the other sides were countryside, prairie, and forest. The river, the farm, and the out-of-doors of his boyhood were part and parcel not only of Clemens' life but also of his great books.

A life full of wide experience preceded and included his career as an author. In turn a printer's devil, journeyman printer, steamboat pilot, soldier, miner, newspaper reporter, traveling correspondent, lecturer, author, editor, and publisher, he had enough "careers" to give several authors materials for books

Panel (l. to r.) Clemens' boyhood home, Hannibal, Missouri—"and the mile-wide Mississippi rolling before it" • Samuel Clemens at 50 • His study at Quarry Farm, Elmira, New York

Clemens became a printer's apprentice during his boyhood in Hannibal. Having learned to set type, he wandered eastward as far as New York, picking up printing jobs in one city after another. Then, back in the Middle West in the fifties, he learned the pilot's trade and spent some of his happiest years steering boats up and down the Mississippi. (When, later, he adopted a pseudonym, it was an expression used by steamboatmen when testing the depth of the channel.) The job of piloting lasted through the boom days of river trade which were cut off by the Civil War. In 1861, after brief service in the Confederate army, he went out to the Far West. There, he took some fliers in mining stock, did some prospecting, and finally got into journalism of the masculine humorous sort which flourished in the Far West.

The journalistic work, in Nevada and California, launched him on his career as a humorist. Pieces he had written in the Far West were printed in the East, and one of his tales, "The Celebrated Jumping Frog of Calaveras County," first heard in a mining camp, won national acclaim in 1865. Travel letters about a trip to Europe and the Holy Land, published in newspapers in 1867 and put into book form as *The Innocents Abroad* (1869), established him as an outstandingly popular humorist. *Roughing It* (1872), *The Gilded Age* (in collaboration with Charles Dudley Warner, 1873), *The Adventures of Tom Sawyer* (1876), *A Tramp Abroad* (1880), *The Prince and the Pauper* (1882), *Life on the Mississippi* (1883), *The Adventures of Huckleberry Finn* (1884), and *A Connecticut Yankee in King Arthur's Court* (1889) were all widely purchased. The success of various books made work other than writing unnecessary, but Clemens, a son of the boomtime frontier who had a love for speculation and a childlike reverence for wealth, tried to swell a generous income by making investments. Having invested some of his royalties from his first popular book in a Buffalo newspaper, Clemens was an editor for a time. He financed many inventions and get-rich schemes, and eventually set up as a large-scale publisher of books —his own as well as those by other authors.

In Buffalo and Hartford, abroad and in New York, he lived lavishly on his excellent income. His Hartford mansion, for instance, was a massive, showy structure incorporating a number of costly features, and his monthly expenditures for living and entertaining were huge. In 1893, when the author-businessman was fifty-eight, some important financial investments proved unwise, his publishing house failed, and he faced financial ruin. Refusing to accept bankruptcy, he paid off his debts dollar for dollar, earning enough to do so by making a lecture trip around the world and by publishing *Tom Sawyer Abroad* and *Pudd'nhead Wilson* (1894), *Joan of Arc* (1896), and *Following the Equator* (1897). His last great books, published posthumously, were *The Mysterious Stranger* (1916), and his *Autobiography* (1924, 1940).

In all of Twain's writings, his personality was an important element. Those who knew the humorist best emphasize the fact that his character had extraordinarily varied facets. Olivia Langdon, whom he married in 1870, loved him not only for his chivalry and his tenderness, but also for his tendency, freely indulged, to tease her and the children unmercifully. Close associates saw him, on alternate visits, as an outrageous prankster and a gloomy pessimist. Surprisingly, his intimate friend, Howells, thought that a certain delicacy was an intrinsic trait. "Among the half-dozen . . . personalities that each of us becomes," Howells wrote, "I should say that Clemens's central and final personality was something exquisite. His casual acquaintances might know him, perhaps, from his fierce intensity, his wild pleasure in shocking people . . . as anything but exquisite, and yet that was what in the last analysis he was. . . . One could not know him well without realizing him the most serious, the most humane, the most conscientious of men."

The first works by Twain to attract national attention—"The Jumping Frog" and *Innocents Abroad*—represented two aspects of his work. The former was a tall tale much like those Sam Clemens, as a boyish printer's devil, had seen in newspapers or had heard told in yarnspinning sessions. Its affiliations with "The Big Bear" or other Southwestern tall tales are obvious. A large share of *Innocents Abroad* was popular humor similar, in important ways, to the kind of humor which had been flourishing when Clemens had set up as a humorist—the humor of such professional "Funny Men" as Artemus Ward and Josh Billings. After he had hit upon his mature technique, the two methods—that of the old Southwestern humorists and that of the funny men—were intermingled in most of his writings. The

travel books, for example, increasingly gained in variety and interest by alternating literary-comedian material with anecdotes.

When, in his fiction, the training Twain had had as a professional humorist caused him to mingle buffoonery and burlesque with materials inhospitable to the broadest comedy, his writings tended to suffer from unevenness of tone. His masterpiece, *Huckleberry Finn,* for instance, particularly in the chapters concerning the rescue of Jim, contained passages of broad humor and parody which frequently clashed in tone with the style of the long oral tale used throughout the volume. But this book, like others which showed him at his best, triumphed over such faults. It triumphed, for one thing, because, taking a hint from local colorists of the day, and recalling his varied past, Clemens freighted his pages with vivid regional details which were instinct with life. Moreover, although he was as contemptuous of poetry as Shakespeare's rough soldier Hotspur, like Hotspur, Clemens was an interesting combination of masculinity and poetic sensibility, and his style revealed both qualities. More than any other classic fictionist he wrote the American language, but he also manifested a knack —comparable to the skill of the best poets—for finding the best words to represent scenes, actions, and emotions. In addition, he had genius for creating memorable characters like Colonel Sellers, Tom Sawyer, Huck, and Huck's Pappy, and for breathing the breath of life into them.

Clemens thought that another thing that helped him survive other humorists was the philosophy he expressed in his writings. "Philosophy" is too highfalutin a word, perhaps, for the notions, hunches, and prejudices which this emotional and often cantankerous individual expressed in his books. Yet the attitudes of this highly American author give his writings an element of interest over and above that supplied by their artistry and the peculiar quirks of his own personality. He reveals the nostalgia for the old America, the distrust of religion, the zeal for political and social reform, and the pessimism which were being voiced by other authors, particularly in the period from 1865 to 1900.

All these qualities have helped Twain overcome the handicap any American author must overcome if he starts writing what his countrymen are likely to call "mere humor." Although critics still now and then reach up to pat him condescendingly on the head, it now seems reasonably certain that Mark Twain will grow in stature with the passage of time. Increasingly, Clemens' countrymen appreciate the charm of his personality, the breadth and depth of his richly native experiences, the unostentatious artistry revealed by his best writings. More and more, Americans are agreeing with Howells' estimate of him as "sole and incomparable, the Lincoln of our literature."

The Celebrated Jumping Frog of Calaveras County

On December 4, 1864, Clemens arrived for a visit at Jim Gillis' cabin on Jackass Hill, in the Tuolumne district. On pleasant days, Clemens worked at pocket mining. On rainy days the author, Gillis, and neighboring miners sat around the stove in the dilapidated tavern at Angel's Camp and told stories. One afternoon Ben Coon, a former Illinois river pilot, spun a yarn which had been going the rounds of the camps and the newspapers—the one about the jumping frog.

In time the humorist told the story to his friend, Artemus Ward. Ward, liking it, asked him to write it out for use in a forthcoming book, **Artemus Ward's Travels.** Arriving too late for inclusion in the volume, it was printed, instead, in the **Saturday Press,** November 18, 1865. The piece, an immediate hit, was reprinted in newspapers throughout the country.

The teller of the tale at Angel's Camp, Clemens said later, "was entirely serious, for he was dealing with what for him were austere facts; . . . he saw no humor in the tale, neither did his listeners; neither he nor they ever smiled or laughed; in my time I have not attended a more solemn conference." In writing his own version,

Clemens perhaps tried to reproduce the ludicrous elements in this scene by having humorless Simon Wheeler tell his comic narrative to an equally humorless, painfully bored listener. Based on an oral narrative, the tale in many ways —especially in its "humanization" of animals—shows its relationship to the frontier humor which the humorist had enjoyed as a boy.

In compliance with the request of a friend of mine, who wrote me from the East, I called on good-natured, garrulous old Simon Wheeler, and inquired after my friend's friend, *Leonidas W.* Smiley, as requested to do, and I hereunto append the result. I have a lurking suspicion that *Leonidas W.* Smiley is a myth; that my friend never knew such a personage; and that he only conjectured that, if I asked old Wheeler about him, it would remind him of his infamous *Jim* Smiley, and he would go to work and bore me nearly to death with some exasperating reminiscence of him as long and tedious as it should be useless to me. If that was the design, it succeeded.

I found Simon Wheeler dozing comfortably by the bar-room stove of the dilapidated tavern in the decayed mining camp of Angel's, and I noticed that he was fat and bald-headed, and had an expression of winning gentleness and simplicity upon his tranquil countenance. He roused up and gave me good-day. I told him a friend of mine had commissioned me to make some inquiries about a cherished companion of his boyhood named *Leonidas W.* Smiley—*Rev. Leonidas W.* Smiley—a young minister of the Gospel, who he had heard was at one time a resident of Angel's Camp. I added that, if Mr. Wheeler could tell me anything about this Rev. Leonidas W. Smiley, I would feel under many obligations to him.

Simon Wheeler backed me into a corner and blockaded me there with his chair, and then sat me down and reeled off the monotonous narrative which follows this paragraph. He never smiled, he never frowned, he never changed his voice from the gentle-flowing key to which he tuned the initial sentence, he never betrayed the slightest suspicion of enthusiasm; but all through the interminable narrative there ran a vein of impressive earnestness and sincerity, which showed me plainly that, so far from his imagining that there was anything ridiculous or funny about his story, he regarded it as a really important matter, and admired its two heroes as men of transcendent genius in *finesse.* I let him go on in his own way, and never interrupted him once:

"Rev. Leonidas W. H'm, Reverend Le—well, there was a feller here once by the name of *Jim* Smiley, in the winter of '49—or may be it was the spring of '50—I don't recollect exactly, somehow, though what makes me think it was one or the other is because I remember the big flume wasn't finished when he first came to the camp; but any way, he was the curiosest man about always betting on any thing that turned up you ever see, if he could get any body to bet on the other side; and if he couldn't, he'd change sides. Any way that suited the other man would suit him—any way just so's he got a bet, *he* was satisfied. But still he was lucky, uncommon lucky; he most always come out winner. He was always ready and laying for a chance; there couldn't be no solit'ry thing mentioned but that feller'd offer to bet on it, and take any side you please, as I was just telling you. If there was a horse-race, you'd find him flush, or you'd find him busted at the end of it; if there was a dog-fight, he'd bet on it, if there was a cat-fight, he'd bet on it; if there was a chicken-fight, he'd bet on it; why, if there was two birds setting on a fence, he would bet you which one would fly first; or if there was a camp-meeting, he would be there reg'lar, to bet on Parson Walker, which he judged to be the best exhorter about there, and so he was, too, and a good man. If he even seen a straddle-bug start to go anywheres, he would bet you how long it would take him to get wherever he was going to, and if you took him up, he would foller that straddle-bug to Mexico but what he would find out where he was bound for and how long he was on the road. Lots of the boys here has seen that Smiley, and can tell you about him. Why, it never made no difference to *him*—he would bet on *any* thing—the dangdest feller. Parson Walker's wife laid very sick once, for a good while, and it seemed as if they warn't going to save her; but one morning he come in, and Smiley asked how she was, and he said she was considerable better—thank the Lord for his inf'nite mercy—and coming on so smart that, with the blessing of Prov'dence, she'd get well yet; and Smiley, before he thought, says, "Well, I'll resk two-and-a-half that she don't, anyway."

Thish-yer Smiley had a mare—the boys called her the fifteen-minute nag, but that was only in fun, you

know, because, of course, she was faster than that—and he used to win money on that horse, for all she was so slow and always had the asthma, or the distemper, or the consumption, or something of that kind. They used to give her two or three hundred yards start, and then pass her under way, but always at the fag-end of the race she'd get excited and desperate-like, and come cavorting and straddling up, and scattering her legs around limber, sometimes in the air, and sometimes out to one side amongst the fences, and kicking up m-o-r-e dust, and raising m-o-r-e racket with her coughing and sneezing and blowing her nose—and always fetch up at the stand just about a neck ahead, as near as you could cipher it down.

And he had a little small bull pup, that to look at him you'd think he wa'nt worth a cent, but to set around and look ornery, and lay for a chance to steal something. But as soon as money was up on him, he was a different dog; his under-jaw'd begin to stick out like the fo'castle of a steamboat, and his teeth would uncover, and shine savage like the furnaces And a dog might tackle him, and bully-rag him, and bite him, and throw him over his shoulder two or three times, and Andrew Jackson—which was the name of the pup—Andrew Jackson would never let on but what *he* was satisfied, and hadn't expected nothing else—and the bets being doubled and doubled on the other side all the time, till the money was all up, and then all of a sudden he would grab that other dog jest by the j'int of his hind leg and freeze to it—not chaw, you understand, but only jest grip and hang on till they throwed up the sponge, if it was a year. Smiley always come out winner on that pup, till he harnessed a dog once that didn't have no hind legs, because they'd been sawed off by a circular saw, and when the thing had gone along far enough, and the money was all up, and he come to make a snatch for his pet holt, he saw in a minute how he'd been imposed on, and how the other dog had him in the door, so to speak, and he 'peared surprised, and then he looked sorter discouraged-like, and didn't try no more to win the fight, and so he got shucked out bad. He give Smiley a look, as much as to say his heart was broke, and it was *his* fault, for putting up a dog that hadn't no hind legs for him to take holt of, which was his main dependence in a fight, and then he limped off a piece and laid down and died. It was a good pup, was that Andrew Jackson, and would have made a name for hisself if he'd lived, for the stuff was in him, and he had genius—I know it, because he hadn't had no opportunities to speak of, and it don't stand to reason that a dog could make such a fight as he could under them circumstances, if he hadn't no talent. It always makes me feel sorry when I think of that last fight of his'n, and the way it turned out.

Well, thish-yer Smiley had rat-tarriers, and chicken cocks, and tom-cats, and all them kind of things, till you couldn't rest, and you couldn't fetch nothing for him to bet on but he'd match you. He ketched a frog one day, and took him home, and said he calk'lated to edercate him; and so he never done nothing for three months but set in his back yard and learn that frog to jump. And you bet he *did* learn him, too. He'd give him a little punch behind, and the next minute you'd see that frog whirling in the air like a doughnut—see him turn one summerset, or may be a couple, if he got a good start, and come down flat-footed and all right, like a cat. He got him up so in the matter of catching flies, and kept him in practice so constant, that he'd nail a fly every time as far as he could see him. Smiley said all a frog wanted was education, and he could do most anything—and I believe him. Why, I've seen him set Dan'l Webster down here on this floor—Dan'l Webster was the name of the frog—and sing out, "Flies, Dan'l, flies!" and quicker'n you could wink, he'd spring straight up, and snake a fly off'n the counter there, and flop down on the floor again as solid as a gob of mud, and fall to scratching the side of his head with his hind foot as indifferent as if he hadn't no idea he'd been doin' any more'n any frog might do. You never see a frog so modest and straightfor'ard as he was, for all he was so gifted. And when it come to fair and square jumping on a dead level, he could get over more ground at one straddle than any animal of his breed you ever see. Jumping on a dead level was his strong suit, you understand; and when it come to that, Smiley would ante up money on him as long as he had a red. Smiley was monstrous proud of his frog, and well he might be, for fellers that had traveled and been everywheres, all said he laid over any frog that ever *they* see.

Well, Smiley kept the beast in a little lattice box, and he used to fetch him down town sometimes and lay for a bet. One day a feller—a stranger in the camp, he was —come across him with his box, and says:

"What might it be that you've got in the box?"

And Smiley says, sorter indifferent like, "It might be a parrot, or it might be a canary, may be, but it ain't—it's only just a frog."

And the feller took it, and looked at it careful, and turned it round this way and that, and says, "H'm—so 'tis. Well, what's *he* good for?"

"Well," Smiley says, easy and careless, "he's good enough for *one* thing, I should judge—he can outjump ary frog in Calaveras county."

The feller took the box again, and took another long, particular look, and give it back to Smiley, and says, very deliberate, "Well, I don't see no p'ints about that frog that's any better'n any other frog."

"May be you don't," Smiley says. "May be you understand frogs, and maybe you don't understand 'em; may be you've had experience, and may be you ain't only a amature, as it were. Anyways I've got *my* opinion, and I'll risk forty dollars he can outjump any frog in Calaveras county."

And the feller studied a minute, and then says, kinder sad like, "Well, I'm only a stranger here, and I ain't got no frog; but if I had a frog, I'd bet you."

And then Smiley says, "That's all right—that's all right—if you'll hold my box a minute, I'll go and get you a frog." And so the feller took the box, and put up his forty dollars along with Smiley's, and set down to wait.

So he set there a good while thinking and thinking to hisself, and then he got the frog out and prized his mouth open and took a teaspoon and filled him full of quail shot—filled him pretty near up to his chin—and set him on the floor. Smiley he went to the swamp and slopped around in the mud for a long time, and finally he ketched a frog, and fetched him in, and give him to this feller, and says:

"Now, if you're ready, set him alongside of Dan'l, with his fore-paws just even with Dan'l, and I'll give the word." Then he says, "One—two—three—jump!" and him and the feller touched up the frogs from behind, and the new frog hopped off, but Dan'l give a heave, and hysted up his shoulders—so—like a Frenchman, but it wan't no use—he couldn't budge; he was planted as solid as an anvil, and he couldn't no more stir than if he was anchored out. Smiley was a good deal surprised, and he was disgusted too, but he didn't have no idea what the matter was, of course.

The feller took the money and started away; and when he was going out at the door, he sorter jerked his thumb

"'—he 'pears to look mighty baggy, somehow!'"

over his shoulders—this way—at Dan'l, and says again, very deliberate, "Well, *I* don't see no p'ints about that frog that's any better'n any other frog."

Smiley he stood scratching his head and looking down at Dan'l a long time, and at last he says, "I do wonder what in the nation that frog throw'd off for—I wonder if there ain't something the matter with him—he 'pears to look mighty baggy, somehow." And he ketched Dan'l by the nap of the neck, and lifted him up and says, "Why, blame my cats, if he don't weigh five pound!" and turned him upside down, and he belched out a double handful of shot. And then he see how it was, and he was the maddest man—he set the frog down and took out after that feller, but he never ketched him. And—

(Here Simon Wheeler heard his name called from the front yard, and got up to see what was wanted.) And turning to me as he moved away, he said: "Just set where you are, stranger, and rest easy—I ain't going to be gone a second."

But, by your leave, I did not think that a continuation of the history of the enterprising vagabond *Jim* Smiley would be likely to afford me much information concerning the *Rev. Leonidas W.* Smiley, and so I started away.

At the door I met the sociable Wheeler returning, and he buttonholed me and recommenced:

"Well, thish-yer Smiley had a yaller one-eyed cow that didn't have no tail, only jest a short stump like a bannanner, and—"

"Oh! hang Smiley and his afflicted cow!" I muttered, good-naturedly, and bidding the old gentleman good-day, I departed.

1865

From

The Innocents Abroad

With a band of nineteenth-century pilgrims, Clemens made a trip abroad between June 8 and November 19, 1867. During the journey he sent accounts from various stopping places to some American newspapers. These accounts, which had been well liked by readers, were revised and published in the book The Innocents Abroad in 1869. Within a year, some sixty-seven thousand copies were sold. The humorist's fame was established.

The book, as its Preface proclaimed, had as its purpose "to suggest to the reader how he would be likely to see Europe and the East if he looked at them with his own eyes instead of the eyes of those who traveled in those countries before him." Previous travelers, guidebooks in hand, had been overawed by the antiquity and the romance of the Old World; this author was determined to judge for himself. The passage which follows was among the most admired in the book. In it, the naive tourists were satirized. "The Old Masters," perhaps the most famous chapter in the volume, shows Clemens writing as a sensible man, sickened by the ecstasies and idiocies of tourists who depend upon guidebooks to suggest how they shall react to works of art. The way Clemens built up his devastating attack on "The Last Supper," after an ingratiating start, offers an interesting study in rhetorical method. Elsewhere in the book, he wrote as if he himself were a sentimental, credulous traveler, believing everything he was told—no matter how preposterous—and trying to pump up appropriate emotions for the occasion. (The title has been inserted by the editors.)

Chapter XIX
THE OLD MASTERS

Here, in Milan, in an ancient tumble-down ruin of a church, is the mournful wreck of the most celebrated painting in the world—"The Last Supper," by Leonardo da Vinci. We are not infallible judges of pictures, but of course we went there to see this wonderful painting, once so beautiful, always so worshipped by masters in art, and forever to be famous in song and story. And the first thing that occurred was the infliction on us of a placard fairly reeking with wretched English. Take a morsel of it:

> "Bartholomew (that is the first figure on the left hand side at the spectator), uncertain and doubtful about what he thinks to have heard, and upon which he wants to be assured by himself at Christ and by no others."

Good, isn't it? And then Peter is described as "argumenting in a threatening and angrily condition at Judas Iscariot."

This paragraph recalls the picture. "The Last Supper" is painted on the dilapidated wall of what was a little chapel attached to the main church in ancient times, I suppose. It is battered and scarred in every direction, and stained and discolored by time, and Napoleon's horses kicked the legs off most the disciples when they (the horses, not the disciples,) were stabled there more than a half century ago.

I recognized the old picture in a moment—the Saviour with bowed head seated at the centre of a long, rough table with scattering fruits and dishes upon it, and six disciples on either side in their long robes, talking to each other—the picture from which all engravings and all copies have been made for three centuries. Perhaps no living man has ever known an attempt to paint the Lord's Supper differently. The world seems to have become settled in the belief, long ago, that it is not possible for human genius to outdo this creation of Da Vinci's. I suppose painters will go on copying it as long as any of the original is left visible to the eye. There were a dozen easels in the room, and as many artists transferring the great picture to their canvases. Fifty proofs of steel engravings and lithographs were scattered around, too. And as usual, I could not help noticing how superior the copies were to the original, that is, to my inexperienced eye Wherever you find a Raphael, a Rubens, a Michael Angelo, a Caracci, or a Da Vinci (and we see them every day,) you find artists copying them, and the copies are always the handsomest. Maybe the originals were handsome when they were new, but they are not now

This picture is about thirty feet long, and ten or twelve high, I should think, and the figures are at least life size. It is one of the largest paintings in Europe.

The colors are dimmed with age, the countenances are scaled and marred, and nearly all expression is gone from them; the hair is a dead blur upon the wall, and

there is no life in the eyes. Only the attitudes are certain.

People come here from all parts of the world, and glorify this masterpiece. They stand entranced before it with bated breath and parted lips, and when they speak, it is only in the catchy ejaculations of rapture:

"O, wonderful!"

"Such expression!"

"Such grace of attitude!"

"Such dignity!"

"Such faultless drawing!"

"Such matchless coloring!"

"Such feeling!"

"What delicacy of touch!"

"What sublimity of conception!"

"A vision! A vision!"

I only envy those people; I envy them their honest admiration, if it be honest—their delight, if they feel delight. I harbor no animosity toward any of them. But at the same time the thought *will* intrude itself upon me, how can they see what is not visible? What would you think of a man who looked at some decayed, blind, toothless, pock-marked Cleopatra, and said: "What matchless beauty! What soul! What expression!" What would you think of a man who gazed upon a dingy, foggy sunset, and said: "What sublimity! What feeling! What richness of coloring!" What would you think of a man who stared in ecstasy upon a desert of stumps and said: "Oh, my soul, my beating heart, what a noble forest is here!"

You would think that those men had an astonishing talent for seeing things that had already passed away. It was what I thought when I stood before the "Last Supper" and heard men apostrophizing wonders, and beauties and perfections which had faded out of the picture and gone, a hundred years before they were born. We can imagine the beauty that was once in an aged face; we can imagine the forest if we see the stumps; but we can not absolutely *see* these things when they are not there. I am willing to believe that the eye of the practiced artist can rest upon the "Last Supper" and renew a lustre where only a hint of it is left, supply a tint that has faded away, restore an expression that is gone; patch, and color, and add, to the dull canvas until at last its figures shall stand before him aglow with the life, the feelings, the freshness, yea, with all the noble beauty that was theirs when first they came from the hand of the master. But *I* can not work this miracle. Can those other uninspired visitors do it, or do they only happily imagine they do?

After reading so much about it, I am satisfied that the "Last Supper" was a very miracle of art once. But it was three hundred years ago.

It vexes me to hear people talk so glibly of "feeling," "expression," "tone," and those other easily acquired and inexpensive technicalities of art that make such a fine show in conversations concerning pictures. There is not one man in seventy-five hundred that can tell what a pictured face is intended to express. There is not one man in five hundred that can go into a court-room and be sure that he will not mistake some harmless innocent of a juryman for the black-hearted assassin on trial. Yet such people talk of "character" and presume to interpret "expression" in pictures. There is an old story that Matthews, the actor, was once lauding the ability of the human face to express the passions and emotions hidden in the breast. He said the countenance could disclose what was passing in the heart plainer than the tongue could.

"Now," he said, "observe my face—what does it express?"

"Despair!"

"Bah, it expresses peaceful resignation! What does *this* express?"

"Rage!"

"Stuff! it means terror! This!"

"Imbecility!"

"Fool! It is smothered ferocity! Now *this!*"

"Joy!"

"Oh, perdition! *Any* ass can see it means insanity!"

Expression! People coolly pretend to read it who would think themselves presumptuous if they pretended to interpret the hieroglyphics on the obelisks of Luxor—yet they are fully as competent to do the one thing as the other. I have heard two very intelligent critics speak of Murillo's Immaculate Conception (now in the museum at Seville) within the past few days. One said

"Oh, the Virgin's face is full of the ecstasy of a joy that is complete—that leaves nothing more to be desired on earth!"

The other said:

"Ah, that wonderful face is so humble, so pleading— it says as plainly as words could say it 'I fear; I tremble; I am unworthy. But Thy will be done; sustain Thou Thy servant!' "

The reader can see the picture in any drawing-room;

it can be easily recognized; the Virgin (the only young and really beautiful Virgin that was ever painted by one of the old masters, some of us think,) stands in the crescent of the new moon, with a multitude of cherubs hovering about her, and more coming, her hands are crossed upon her breast, and upon her uplifted countenance falls a glory out of the heavens. The reader may amuse himself, if he chooses, in trying to determine which of these gentlemen read the Virgin's "expression" aright, or if either of them did it.

Any one who is acquainted with the old masters will comprehend how much the Last Supper is damaged when I say that the spectator can not really tell, now, whether the disciples are Hebrews or Italians. These ancient painters never succeeded in denationalizing themselves. The Italian artists painted Italian Virgins, the Dutch painted Dutch Virgins, the Virgins of the French painters were Frenchwomen—none of them ever put into the face of the Madonna that indescribable something which proclaims the Jewess, whether you find her in New York, in Constantinople, in Paris, Jerusalem, or in the Empire or Morocco. I saw in the Sandwich Islands, once, a picture, copied by a talented German artist from an engraving in one of the American illustrated papers. It was an allegory, representing Mr. Davis in the act of signing a secession act or some such document. Over him hovered the ghost of Washington in warning attitude, and in the background a troop of shadowy soldiers in Continental uniform were limping with shoeless, bandaged feet through a driving snow-storm. Valley Forge was suggested, of course. The copy seemed accurate, and yet there was a discrepancy somewhere. After a long examination I discovered what it was—the shadowy soldiers were all Germans! Jeff Davis was a German! Even the hovering ghost was a German ghost! The artist had unconsciously worked his nationality into the picture. To tell the truth, I am getting a little perplexed about John the Baptist and his portraits. In France I finally grew reconciled to him as a Frenchman; here he is unquestionably an Italian. What next? Can it be possible that the painters make John the Baptist a Spaniard in Madrid and an Irishman in Dublin?

1869

25 Mr. Davis, Jefferson Davis (1808-1889), president of the Confederate States of America

---

From

Roughing It

Published in 1871, Roughing It, for its subject matter, went back a few years in Clemens' life to the period when he had gone to the Far West. Informatively and amusingly, he recounted his journey across country and his Western adventures. The following chapter shows how the author, by alternating exposition and description with humorous anecdotes, secured variety.

Chapter III

JACKASS RABBITS AND SAGEBRUSH

About an hour and a half before daylight we were bowling along smoothly over the road—so smoothly that our cradle only rocked in a gentle, lulling way, that was gradually soothing us to sleep, and dulling our consciousness—when something gave away under us! We were dimly aware of it, but indifferent to it. The coach stopped We heard the driver and conductor talking together outside, and rummaging for a lantern, and swearing because they could not find it—but we had no interest in whatever had happened, and it only added to our comfort to think of those people out there at work in the murky night, and we snug in our nest with the curtains drawn. But presently, by the sounds, there seemed to be an examination going on, and then the driver's voice said:

"By George, the thoroughbrace is broke!"

This startled me broad awake—as an undefined sense of calamity is always apt to do. I said to myself: "Now, a thoroughbrace is probably part of a horse; and doubtless a vital part, too, from the dismay in the driver's voice. Leg, maybe—and yet how could he break his leg waltzing along such a road as this? No, it can't be his leg That is impossible, unless he was reaching for the driver. Now, what can be the thoroughbrace of a horse, I wonder? Well, whatever comes, I shall not air my ignorance in this crowd, anyway."

Just then the conductor's face appeared at a lifted curtain, and his lantern glared in on us and our wall of

mail matter. He said:

"Gents, you'll have to turn out a spell. Thoroughbrace is broke."

We climbed out into a chill drizzle, and felt ever so homeless and dreary. When I found that the thing they called a "Thoroughbrace" was the massive combination of bolts and springs which the coach rocks itself in, I said to the driver:

"I never saw a thoroughbrace used up like that, before, that I can remember How did it happen?"

"Why, it happened by trying to make one coach carry three days' mail—that's how it happened," said he. "And right here is the very direction which is wrote on all the newspaper-bags which was to be put out for the Injuns for to keep 'em quiet. It's most uncommon lucky, becuz it's so nation dark I should 'a' gone by unbeknowns if that air thoroughbrace hadn't broke."

I knew that he was in labor with another of those winks of his, though I could not see his face, because he was bent down at work; and wishing him a safe delivery, I turned to and helped the rest get out the mail-sacks. It made a great pyramid by the roadside when it was all out. When they had mended the thoroughbrace we filled the two boots again, but put no mail on top, and only half as much inside as there was before. The conductor bent all the seats back down, and then filled the coach just half full of mail-bags from end to end. We objected loudly to this, for it left us no seats. But the conductor was wiser than we, and said a bed was better than seats, and, moreover, this plan would protect his thoroughbraces. We never wanted any seats after that. The lazy bed was infinitely preferable. I had many an exciting day, subsequently, lying on it reading the statutes and the dictionary, and wondering how the characters would turn out.

The conductor said he would send back a guard from the next station to take charge of the abandoned mail-bags, and we drove on.

It was now just dawn, and as we stretched our cramped legs full length on the mail sacks, and gazed out through the windows across the wide wastes of greensward clad in cool, powdery mist, to where there was an expectant look in the eastern horizon, our perfect enjoyment took the form of a tranquil and contented ecstasy. The stage whirled along at a spanking gait, the breeze flapping curtains and suspended coats in a most exhilarating way; the cradle swayed and swung luxuriously, the pattering of the horses' hoofs, the cracking of the driver's whip, and his "Hi-yi! g'lang!" were music; the spinning ground and the waltzing trees appeared to give us a mute hurrah as we went by, and then slack up and look after us with interest, or envy, or something; and as we lay and smoked the pipe of peace and compared all this luxury with the years of tiresome city life that had gone before it, we felt that there was only one complete and satisfying happiness in the world, and we had found it.

After breakfast, at some station whose name I have forgotten, we three climbed up on the seat behind the driver, and let the conductor have our bed for a nap. And by and by, when the sun made me drowsy, I lay down on my face on top of the coach, grasping the slender iron railing, and slept for an hour more. That will give one an appreciable idea of those matchless roads Instinct will make a sleeping man grip a fast hold of the railing when the stage jolts, but when it only swings and sways, no grip is necessary. Overland drivers and conductors used to sit in their places and sleep thirty or forty minutes at a time, on good roads, while spinning along at the rate of eight or ten miles an hour. I saw them do it, often. There was no danger about it; a sleeping man *will* seize the irons in time when the coach jolts. These men were hard worked, and it was not possible for them to stay awake all the time.

By and by we passed through Marysville, and over the Big Blue and Little Sandy thence about a mile, and entered Nebraska. About a mile further on, we came to the Big Sandy—one hundred and eighty miles from St. Joseph.

As the sun was going down, we saw the first specimen of an animal known familiarly over two thousand miles of mountain and desert—from Kansas clear to the Pacific Ocean—as the "jackass rabbit." He is well named. He is just like any other rabbit, except that he is from one-third to twice as large, has longer legs in proportion to his size, and has the most preposterous ears that ever were mounted on any creature *but* a jackass. When he is sitting quiet, thinking about his sins, or is absent-minded or unapprehensive of danger, his majestic ears project above him conspicuously; but the breaking of a twig will scare him nearly to death, and then he tilts his ears back gently and starts for home. All you can see, then, for the next minute, is his long gray form stretched out straight and "streaking it" through the low sage-brush, head erect, eyes right, and ears just canted a little to the rear, but

showing you where the animal is, all the time, the same as if he carried a jib. Now and then he makes a marvelous spring with his long legs, high over the stunted sage-brush, and scores a leap that would make a horse envious. Presently, he comes down to a long, graceful "lope," and shortly he mysteriously disappears. He has crouched behind a sage-brush, and will sit there and listen and tremble until you get within six feet of him, when he will get under way again. But one must shoot at this creature once, if he wishes to see him throw his heart into his heels, and do the best he knows how. He is frightened clear through, now, and he lays his long ears down on his back, straightens himself out like a yard-stick every spring he makes, and scatters miles behind him with an easy indifference that is enchanting.

Our party made this specimen "hump himself," as the conductor said. The Secretary started him with a shot from the Colt; I commenced spitting at him with my weapon; and all in the same instant the old "Allen's" whole broadside let go with a rattling crash, and it is not putting it too strong to say that the rabbit was frantic! He dropped his ears, set up his tail, and left for San Francisco at a speed which can only be described as a flash and a vanish! Long after he was out of sight we could hear him whiz.

I do not remember where we first came across "sage-brush," but as I have been speaking of it I may as well describe it. This is easily done, for if the reader can imagine a gnarled and venerable live oak tree reduced to a little shrub two feet high, with its rough bark, its foliage, its twisted boughs, all complete, he can picture the "sage-brush" exactly. Often, on lazy afternoons in the mountains I have lain on the ground with my face under a sage-brush, and entertained myself with fancying that the gnats among its foliage were lilliputian birds, and that the ants marching and countermarching about its base were lilliputian flocks and herds, and myself some vast loafer from Brobdingnag waiting to catch a little citizen and eat him.

It is an imposing monarch of the forest in exquisite miniature, is the "sage-brush." Its foliage is a grayish green, and gives that tint to desert and mountain. It smells like our domestic sage, and "sage-tea" made from it tastes like the sage-tea which all boys are so well acquainted with. The sage-brush is a singularly hardy plant, and grows right in the midst of deep sand, and among barren rocks, where nothing else in the vegetable world would try to grow, except "bunch-grass." The sage-bushes grow from three to six or seven feet apart, all over the mountains and deserts of the Far West, clear to the borders of California. There is not a tree of any kind in the deserts, for hundreds of miles—there is no vegetation at all in a regular desert, except the sage-brush and its cousin the "greasewood," which is so much like the sage-brush that the difference amounts to little. Camp-fires and hot suppers in the deserts would be impossible but for the friendly sage-brush. Its trunk is as large as a boy's wrist (and from that up to a man's arm), and its crooked branches are half as large as its trunk—all good, sound, hard wood, very like oak.

When a party camps, the first thing to be done is to cut sage-brush; and in a few minutes there is an opulent pile of it ready for use. A hole a foot wide, two feet deep, and two feet long, is dug, and sage-brush chopped up and burned in it till it is full to the brim with glowing coals, then the cooking begins, and there is no smoke, and consequently no swearing. Such a fire will keep all night, with very little replenishing, and it makes a very sociable camp-fire, and one around which the most impossible reminiscences sound plausible, instructive, and profoundly entertaining.

Sage-brush is very fair fuel, but as a vegetable it is a distinguished failure. Nothing can abide the taste of it but the jackass and his illegitimate child, the mule. But their testimony to its nutritiousness is worth nothing, for they will eat pine knots, or anthracite coal, or brass filings, or lead pipe, or old bottles, or anything that comes handy, and then go off looking as grateful as if they had had oysters for dinner Mules and donkeys and camels have appetites that anything will relieve temporarily, but nothing satisfy. In Syria, once, at the headwaters of the Jordan, a camel took charge of my overcoat while the tents were being pitched, and examined it with a critical eye, all over, with as much interest as if he had an idea of getting one made like it; and then, after he was done figuring on it as an article of apparel, he began to contemplate it as an article of diet He put his foot on it, and lifted one of the sleeves out with his teeth, and chewed and chewed at it, gradually taking it in, and all the while opening and closing his eyes in a kind of religious ecstasy, as if he had never tasted anything as good as an overcoat before in his life. Then he smacked his lips once or twice, and reached after the other sleeve. Next he tried the velvet collar, and smiled

a smile of such contentment that it was plain to see that he regarded that as the daintiest thing about an overcoat. The tails went next, along with some percussion caps and cough candy, and some fig-paste from Constantinople. And then my newspaper correspondence dropped out, and he took a chance in that—manuscript letters written for the home papers. But he was treading on dangerous ground, now. He began to come across solid wisdom in those documents that was rather weighty on his stomach; and occasionally he would take a joke that would shake him up till it loosened his teeth; it was getting to be perilous times with him, but he held his grip with good courage and hopefully, till at last he began to stumble on statements that not even a camel could swallow with impunity. He began to gag and gasp, and his eyes to stand out, and his forelegs to spread, and in about a quarter of a minute he fell over as stiff as a carpenter's workbench, and died a death of indescribable agony. I went and pulled the manuscript out of his mouth, and found that the sensitive creature had choked to death on one of the mildest and gentlest statements of fact that I ever laid before a trusting public.

I was about to say, when diverted from my subject, that occasionally one finds sage-bushes five or six feet high, and with a spread of branch and foliage in proportion, but two or two and a half feet is the usual height.

1872

From

Old Times on the Mississippi

Out for a long walk in the woods with his friend the Rev. Joseph Twichell in 1874, Clemens got to reminiscing about "old Mississippi days of steamboating glory and grandeur as I saw them . . . from the pilot-house." "What a virgin subject to hurl into a magazine!" said Twichell. When Clemens wrote about the experience to his friend William Dean Howells, editor of the Atlantic, Howells urged him to write a series of reminiscences. "Old Times on the Mississippi" appeared in seven installments between January and July 1875. In 1883 the articles, augmented with new material, were published as Life on the Mississippi, in which "A Daring Deed" became Chapter VII and "Continued Perplexities" became Chapter IX.

The following passages are part of Clemens' account of his apprenticeship as a pilot. The first paragraph—a transitional paragraph—is omitted from "A Daring Deed."

A DARING DEED

The pilot-house was full of pilots, going down to "look at the river." What is called the "upper river" (the two hundred miles between St. Louis and Cairo, where the Ohio comes in) was low; and the Mississippi changes its channel so constantly that the pilots used to always find it necessary to run down to Cairo to take a fresh look, when their boats were to lie in port a week; that is, when the water was at a low stage. A deal of this "looking at the river" was done by poor fellows who seldom had a berth, and whose only hope of getting one lay in their being always freshly posted and therefore ready to drop into the shoes of some reputable pilot, for a single trip, on account of such pilot's sudden illness, or some other necessity. And a good many of them constantly ran up and down inspecting the river, not because they ever really hoped to get a berth, but because (they being guests of the boat) it was cheaper to "look at the river" than stay ashore and pay board. In time these fellows grew dainty in their tastes, and only infested boats that had an established reputation for setting good tables. All visiting pilots were useful, for they were always ready and willing, winter or summer, night or day, to go out in the yawl and help buoy the channel or assist the boat's pilots in any way they could. They were likewise welcomed because all pilots are tireless talkers, when gathered together, and as they talk only about the river they are always understood and are always interesting. Your true pilot cares nothing about anything on earth but the river, and his pride in his occupation surpasses the pride of kings.

We had a fine company of these river inspectors along this trip. There were eight or ten, and there was abundance of room for them in our great pilot-house. Two or three of them wore polished silk hats, elaborate shirtfronts, diamond breastpins, kid gloves, and patent-leather boots. They were choice in their English, and bore themselves with a dignity proper to men of solid

means and prodigious reputation as pilots. The others were more or less loosely clad, and wore upon their heads tall felt cones that were suggestive of the days of the Commonwealth.

I was a cipher in this august company, and felt subdued, not to say torpid. I was not even of sufficient consequence to assist at the wheel when it was necessary to put the tiller hard down in a hurry; the guest that stood nearest did that when occasion required—and this was pretty much all the time, because of the crookedness of the channel and the scant water. I stood in a corner; and the talk I listened to took the hope all out of me. One visitor said to another.

"Jim, how did you run Plum Point, coming up?"

"It was in the night, there, and I ran it the way one of the boys on the *Diana* told me; started out about fifty yards above the wood-pile on the false point, and held on the cabin under Plum Point till I raised the reef—quarter less twain—then straightened up for the middle bar till I got well abreast the old one-limbed cottonwood in the bend, then got my stern on the cottonwood, and head on the low place above the point, and came through a-booming—nine and a half."

"Pretty square crossing, an't it?"

"Yes, but the upper bar's working down fast."

Another pilot spoke up and said

"I had better water than that, and ran it lower down; started out from the false point—mark twain—raised the second reef abreast the big snag in the bend, and had quarter less twain."

One of the gorgeous ones remarked:

"I don't want to find fault with your leadsmen, but that's a good deal of water for Plum Point, it seems to me."

There was an approving nod all around as this quiet snub dropped on the boaster and "settled" him. And so they went on talk-talk-talking Meantime, the thing that was running in my mind was, "Now, if my ears hear aright, I have not only to get the names of all the towns and islands and bends, and so on, by heart, but I must even get up a warm personal acquaintanceship with every old snag and one-limbed cottonwood and obscure wood-pile that ornaments the banks of this river for twelve hundred miles; and more than that, I must actually know where these things are in the dark, unless these guests are gifted with eyes that can pierce through two miles of solid blackness. I wish the piloting business was in Jericho and I had never thought of it."

At dusk Mr. Bixby tapped the big bell three times (the signal to land), and the captain emerged from his drawing-room in the forward end of the "texas," and looked up inquiringly. Mr. Bixby said.

"We will lay up here all night, captain."

"Very well, sir."

That was all. The boat came to shore and was tied up for the night. It seemed to me a fine thing that the pilot could do as he pleased, without asking so grand a captain's permission. I took my supper and went immediately to bed, discouraged by my day's observations and experiences. My late voyage's note-booking was but a confusion of meaningless names It had tangled me all up in a knot every time I had looked at it in the daytime. I now hoped for respite in sleep, but no, it reveled all through my head till sunrise again, a frantic and tireless nightmare

Next morning I felt pretty rusty and low-spirited. We went booming along, taking a good many chances, for we were anxious to "get out of the river" (as getting out to Cairo was called) before night should overtake us But Mr. Bixby's partner, the other pilot, presently grounded the boat, and we lost so much time getting her off that it was plain the darkness would overtake us a good long way above the mouth. This was a great misfortune, especially to certain of our visiting pilots, whose boats would have to wait for their return, no matter how long that might be It sobered the pilot-house talk a good deal. Coming up-stream, pilots did not mind low water or any kind of darkness, nothing stopped them but fog. But down-stream work was different; a boat was too nearly helpless, with a stiff current pushing behind her; so it was not customary to run down-stream at night in low water.

There seemed to be one small hope, however: if we could get through the intricate and dangerous Hat Island crossing before night, we could venture the rest, for we would have plainer sailing and better water. But it would be insanity to attempt Hat Island at night. So there was a deal of looking at watches all the rest of the day, and a constant ciphering upon the speed we were making; Hat Island was the eternal subject, sometimes hope was high and sometimes we were delayed in a bad crossing, and down it went again. For hours all

hands lay under the burden of this suppressed excitement; it was even communicated to me, and I got to feeling so solicitous about Hat Island, and under such an awful pressure of responsibility, that I wished I might have five minutes on shore to draw a good, full, relieving breath, and start over again. We were standing no regular watches. Each of our pilots ran such portions of the river as he had run when coming upstream, because of his greater familiarity with it; but both remained in the pilot-house constantly.

An hour before sunset Mr. Bixby took the wheel, and Mr. W. stepped aside. For the next thirty minutes every man held his watch in his hand and was restless, silent, and uneasy. At last somebody said, with a doomful sigh:

"Well, yonder's Hat Island—and we can't make it."

All the watches closed with a snap, everybody sighed and muttered something about its being "too bad, too bad—ah, if we could *only* have got here half an hour sooner!" and the place was thick with the atmosphere of disappointment. Some started to go out, but loitered, hearing no bell-tap to land. The sun dipped behind the horizon, the boat went on. Inquiring looks passed from one guest to another; and one who had his hand on the door-knob and had turned it, waited, then presently took away his hand and let the knob turn back again. We bore steadily down the bend. More looks were exchanged, and nods of surprised admiration —but no words. Insensibly the men drew together behind Mr. Bixby, as the sky darkened and one or two dim stars came out. The dead silence and sense of waiting became oppressive. Mr Bixby pulled the cord, and two deep, mellow notes from the big bell floated off on the night. Then a pause, and one more note was struck. The watchman's voice followed, from the hurricane-deck:

"Labboard lead, there! Stabboard lead!"

The cries of the leadsmen began to rise out of the distance, and were gruffly repeated by the word-passers on the hurricane-deck.

"M-a-r-k three! M-a-r-k three! Quarter-less-three! Half twain! Quarter twain! M-a-r-k twain! Quarter-less—"

Mr. Bixby pulled two bell-ropes, and was answered by faint jinglings far below in the engine-room, and our speed slackened. The steam began to whistle through the gauge-cocks. The cries of the leadsmen went on—and it is a weird sound, always, in the night. Every pilot in the lot was watching now, with fixed eyes, and talking under his breath. Nobody was calm and easy but Mr. Bixby. He would put his wheel down and stand on a spoke, and as the steamer swung into her (to me) utterly invisible marks—for we seemed to be in the midst of a wide and gloomy sea—he would meet and fasten her there. Out of the murmur of half-audible talk, one caught a coherent sentence now and then—such as:

"There; she's over the first reef all right!"

After a pause, another subdued voice:

"Her stern's coming down just *exactly* right, by *George!*"

"Now she's in the marks; over she goes!"

Somebody else muttered:

"Oh, it was done beautiful—*beautiful!*"

Now the engines were stopped altogether, and we drifted with the current. Not that I could see the boat drift, for I could not, the stars being all gone by this time. This drifting was the dismalest work; it held one's heart still. Presently I discovered a blacker gloom than that which surrounded us. It was the head of the island. We were closing right down upon it. We entered its deeper shadow, and so imminent seemed the peril that I was likely to suffocate; and I had the strongest impulse to do *something,* anything, to save the vessel. But still Mr. Bixby stood by his wheel, silent, intent as a cat, and all the pilots stood shoulder to shoulder at his back.

"She'll not make it!" somebody whispered.

The water grew shoaler and shoaler, by the leadsman's cries, till it was down to:

"Eight-and-a-half! E-i-g-h-t feet! E-i-g-h-t feet! Seven-and—"

Mr. Bixby said warningly through his speaking-tube to the engineer:

"Stand by, now!"

"Ay, ay, sir!"

"Seven-and-a-half! Seven feet! *Six*-and—"

We touched bottom! Instantly Mr. Bixby set a lot of bells ringing, shouted through the tube, *"Now,* let her have it—every ounce you've got!" then to his partner, "Put her hard down! snatch her! snatch her!" The boat rasped and ground her way through the sand, hung upon the apex of disaster a single tremendous instant,

and then over she went! And such a shout as went up at Mr. Bixby's back never loosened the roof of a pilot-house before!

There was no more trouble after that. Mr. Bixby was a hero that night; and it was some little time, too, before his exploit ceased to be talked about by river-men.

Fully to realize the marvelous precision required in laying the great steamer in her marks in that murky waste of water, one should know that not only must she pick her intricate way through snags and blind reefs, and then shave the head of the island so closely as to brush the overhanging foliage with her stern, but at one place she must pass almost within arm's reach of a sunken and invisible wreck that would snatch the hull timbers from under her if she should strike it, and destroy a quarter of a million dollars' worth of steamboat and cargo in five minutes, and maybe a hundred and fifty human lives into the bargain.

The last remark I heard that night was a compliment to Mr. Bixby, uttered in soliloquy and with unction by one of our guests. He said:

"By the Shadow of Death, but he's a lightning pilot!"

CONTINUED PERPLEXITIES

I promptly put such a strain on my memory that by and by even the shoal water and the countless crossing-marks began to stay with me. But the result was just the same. I never could more than get one knotty thing learned before another presented itself. Now I had often seen pilots gazing at the water and pretending to read it as if it were a book; but it was a book that told me nothing. A time came at last, however, when Mr. Bixby seemed to think me far enough advanced to bear a lesson on water-reading So he began:

"Do you see that long, slanting line on the face of the water? Now, that's a reef. Moreover, it's a bluff reef. There is a solid sand-bar under it that is nearly as straight up and down as the side of a house. There is plenty of water close up to it, but mighty little on top of it. If you were to hit it you would knock the boat's brains out. Do you see where the line fringes out at the upper end and begins to fade away?"

"Yes, sir."

"Well, that is a low place; that is the head of the reef. You can climb over there, and not hurt anything. Cross over, now, and follow along close under the reef—easy water there—not much current."

I followed the reef along till I approached the fringed end. Then Mr. Bixby said:

"Now get ready. Wait till I give the word. She won't want to mount the reef; a boat hates shoal water. Stand by—wait—*wait*—keep her well in hand *Now* cramp her down! Snatch her! snatch her!"

He seized the other side of the wheel and helped to spin it around until it was hard down, and then we held it so. The boat resisted, and refused to answer for a while, and next she came surging to starboard, mounted the reef, and sent a long, angry ridge of water foaming away from her bows.

"Now watch her; watch her like a cat, or she'll get away from you. When she fights strong and the tiller slips a little, in a jerky, greasy sort of way, let up on her a trifle; it is the way she tells you at night that the water is too shoal; but keep edging her up, on the bar now; there is a bar under every point, because the water that comes down around it forms an eddy and allows the sediment to sink. Do you see those fine lines on the face of the water that branch out like the ribs of a fan? Well, those are little reefs; you want to just miss the ends of them, but run them pretty close. Now look out—look out! Don't you crowd that slick, greasy-looking place; there ain't nine feet there; she won't stand it. She begins to smell it; look sharp, I tell you! Oh, blazes, there you go! Stop the starboard wheel! Quick! Ship up to back! Set her back!"

The engine bells jingled and the engines answered promptly, shooting white columns of steam far aloft out of the 'scape-pipes, but it was too late The boat had "smelt" the bar in good earnest; the foamy ridges that radiated from her bows suddenly disappeared, a great dead swell came rolling forward, and swept ahead of her, she careened far over to larboard, and went tearing away toward the shore as if she were about scared to death. We were a good mile from where we ought to have been when we finally got the upper hand of her again.

During the afternoon watch the next day, Mr. Bixby asked me if I knew how to run the next few miles. I said:

"Go inside the first snag above the point, outside the next one, start out from the lower end of Higgins's woodyard, make a square crossing, and—"

"That's all right. I'll be back before you close up on the next point."

But he wasn't. He was still below when I rounded it and entered upon a piece of the river which I had some misgivings about. I did not know that he was hiding behind a chimney to see how I would perform. I went gaily along, getting prouder and prouder, for he had never left the boat in my sole charge such a length of time before. I even got to "setting" her and letting the wheel go entirely, while I vaingloriously turned my back and inspected the stern marks and hummed a tune, a sort of easy indifference which I had prodigiously admired in Bixby and other great pilots. Once I inspected rather long, and when I faced to the front again my heart flew into my mouth so suddenly that if I hadn't clapped my teeth together I should have lost it. One of those frightful bluff reefs was stretching its deadly length right across our bows! My head was gone in a moment; I did not know which end I stood on; I gasped and could not get my breath; I spun the wheel down with such rapidity that it wove itself together like a spider's web; the boat answered and turned square away from the reef, but the reef followed her! I fled, but still it followed, still it kept—right across my bows! I never looked to see where I was going, I only fled The awful crash was imminent. Why didn't that villain come? If I committed the crime of ringing a bell I might get thrown overboard. But better that than kill the boat. So in blind desperation, I started such a rattling "shivaree" down below as never had astounded an engineer in this world before, I fancy. Amidst the frenzy of the bells the engines began to back and fill in a curious way, and my reason forsook its throne—we were about to crash into the woods on the other side of the river. Just then Mr. Bixby stepped calmly into view on the hurricane-deck. My soul went out to him in gratitude. My distress vanished; I would have felt safe on the brink of Niagara with Mr. Bixby on the hurricane-deck. He blandly and sweetly took his toothpick out of his mouth between his fingers, as if it were a cigar—we were just in the act of climbing an overhanging big tree, and the passengers were scudding astern like rats—and lifted up these commands to me ever so gently:

"Stop the starboard! Stop the larboard! Set her back on both!"

The boat hesitated, halted, pressed her nose among the boughs a critical instant, then reluctantly began to back away.

"Stop the larboard! Come ahead on it! Stop the starboard! Come ahead on it! Point her for the bar!"

I sailed away as serenely as a summer's morning. Mr. Bixby came in and said, with mock simplicity:

"When you have a hail, my boy, you ought to tap the big bell three times before you land, so that the engineers can get ready."

I blushed under the sarcasm, and said I hadn't had any hail.

"Ah! Then it was for wood, I suppose The officer of the watch will tell you when he wants to wood up."

I went on consuming, and said I wasn't after wood

"Indeed? Why, what could you want over here in the bend, then? Did you ever know of a boat following a bend up-stream at this stage of the river?"

"No, sir—and I wasn't trying to follow it. I was getting away from a bluff reef."

"No, it wasn't a bluff reef; there isn't one within three miles of where you were."

"But I saw it It was as bluff as that one yonder."

"Just about. Run over it!"

"Do you give it as an order?"

"Yes. Run over it!"

"If I don't, I wish I may die."

"All right; I am taking the responsibility."

I was just as anxious to kill the boat, now, as I had been to save it before. I impressed my orders upon my memory, to be used at the inquest, and made a straight break for the reef. As it disappeared under our bows I held my breath, but we slid over it like oil.

"Now, don't you see the difference? It wasn't anything but a *wind* reef. The wind does that."

"So I see. But it is exactly like a bluff reef How am I ever going to tell them apart?"

"I can't tell you. It is an instinct. By and by you will just naturally *know* one from the other, but you never will be able to explain why or how you know them apart."

It turned out to be true. The face of the water, in time, became a wonderful book—a book that was a dead language to the uneducated passenger, but which told its mind to me without reserve, delivering its most cherished secrets as clearly as if it uttered them with a voice. And it was not a book to be read once and thrown

aside, for it had a new story to tell every day. Throughout the long twelve hundred miles there was never a page that was void of interest, never one that you could leave unread without loss, never one that you would want to skip, thinking you could find higher enjoyment in some other thing. There never was so wonderful a book written by man; never one whose interest was so absorbing, so unflagging, so sparklingly renewed with every reperusal. The passenger who could not read it was charmed with a peculiar sort of faint dimple on its surface (on the rare occasions when he did not overlook it altogether); but to the pilot that was an *italicized* passage; indeed, it was more than that, it was a legend of the largest capitals, with a string of shouting exclamation-points at the end of it, for it meant that a wreck or a rock was buried there that could tear the life out of the strongest vessel that ever floated. It is the faintest and simplest expression the water ever makes, and the most hideous to a pilot's eye. In truth, the passenger who could not read this book saw nothing but all manner of pretty pictures in it, painted by the sun and shaded by the clouds, whereas to the trained eye these were not pictures at all, but the grimmest and most dead-earnest of reading-matter.

Now when I had mastered the language of this water, and had come to know every trifling feature that bordered the great river as familiarly as I knew the letters of the alphabet, I had made a valuable acquisition. But I had lost something, too. I had lost something which could never be restored to me while I lived. All the grace, the beauty, the poetry, had gone out of the majestic river! I still kept in mind a certain wonderful sunset which I witnessed when steamboating was new to me. A broad expanse of the river was turned to blood; in the middle distance the red hue brightened into gold, through which a solitary log came floating, black and conspicuous; in one place a long, slanting mark lay sparkling upon the water; in another the surface was broken by boiling, tumbling rings, that were as many-tinted as an opal; where the ruddy flush was faintest, was a smooth spot that was covered with graceful circles and radiating lines, ever so delicately traced, the shore on our left was densely wooded, and the somber shadow that fell from this forest was broken in one place by a long, ruffled trail that shone like silver, and high above the forest wall a clean-stemmed dead tree waved a single leafy bough that glowed like a flame in the unobstructed splendor that was flowing from the sun. There were graceful curves, reflected images, woody heights, soft distances, and over the whole scene, far and near, the dissolving lights drifted steadily, enriching it every passing moment with new marvels of coloring.

I stood like one bewitched. I drank it in, in a speechless rapture. The world was new to me, and I had never seen anything like this at home. But as I have said, a day came when I began to cease from noting the glories and the charms which the moon and the sun and the twilight wrought upon the river's face; another day came when I ceased altogether to note them. Then, if that sunset scene had been repeated, I should have looked upon it without rapture, and should have commented upon it, inwardly, after this fashion: "This sun means that we are going to have wind to-morrow; that floating log means that the river is rising, small thanks to it; that slanting mark on the water refers to a bluff reef which is going to kill somebody's steamboat one of these nights, if it keeps on stretching out like that; those tumbling 'boils' show a dissolving bar and a changing channel there; the lines and circles in the slick water over yonder are a warning that that troublesome place is shoaling up dangerously; that silver streak in the shadow of the forest is the 'break' from a new snag, and he has located himself in the very best place he could have found to fish for steamboats; that tall dead tree, with a single living branch, is not going to last long, and then how is a body ever going to get through this blind place at night without the friendly old landmark?"

No, the romance and beauty were all gone from the river. All the value any feature of it had for me now was the amount of usefulness it could furnish toward compassing the safe piloting of a steamboat. Since those days, I have pitied doctors from my heart. What does the lovely flush in a beauty's cheek mean to a doctor but a "break" that ripples above some deadly disease? Are not all her visible charms sown thick with what are to him the signs and symbols of hidden decay? Does he ever see her beauty at all, or doesn't he simply view her professionally, and comment upon her unwholesome condition all to himself? And doesn't he sometimes wonder whether he has gained most or lost most by learning his trade?

From

A Tramp Abroad

Baker's Blue-Jay Yarn

This selection is part of Chapter II and all of Chapter III of A Tramp Abroad (1880). The storyteller is modeled after Jim Gillis, the old character at whose hut Clemens was a delighted visitor for a time in the sixties.

Notable in the handling is the transition from the actual world of the Neckar hills to the fantastic world where blue-jays talk. Notable, too, as Mr. De Voto remarks, are the origin and the artistry of this mock oral tale: "Its material comes from the Negro's bestiary, interstitial with the life of his [Clemens'] boyhood in Hannibal; and in this way the humor rises from fantasy, from the imaginative myth-making of the slaves and the frontier. But also, Jim Baker, the narrator, exists; he is a creation from the world of reality. He lives, and no fantasy has gone into his creation, but only the sharp perception of an individual. His patient, explanatory mind actually works before our eyes and no one can doubt him. His speech has been caught so cunningly that its rhythms produce complete conviction. Fantasy is thus an instrument of realism and the humor of Mark Twain merges into the fiction that is his highest reach."

If any particular piece of humor is typical of the American brand, this is the one. Here, in admirable proportions, are combined the satirical philosophy of the horse-sense school, the realistic portrayal of earthy characters, and the fantasy blended of poetry and vulgarity which runs through much of our humor.

One never tires of poking about in the dense woods that clothe all these lofty Neckar hills to their tops. The great deeps of a boundless forest have a beguiling and impressive charm in any country; but German legends and fairy tales have given these an added charm. They have peopled all that region with gnomes, and dwarfs, and all sorts of mysterious and uncanny creatures. At the time I am writing of, I had been reading so much of this literature that sometimes I was not sure but I was beginning to believe in the gnomes and fairies as realities.

One afternoon I got lost in the woods about a mile from the hotel, and presently fell into a train of dreamy thought about animals which talk, and kobolds, and enchanted folk, and the rest of the pleasant legendary stuff; and so, by stimulating my fancy, I finally got to imagining I glimpsed small flitting shapes here and there down the columned aisles of the forest. It was a place which was peculiarly meet for the occasion. It was a pine wood, with so thick and soft a carpet of brown needles that one's footfall made no more sound than if he were treading on wool; the tree-trunks were as round and straight and smooth as pillars, and stood close together; they were bare of branches to a point about twenty-five feet above ground, and from there upward so thick with boughs that not a ray of sunlight could pierce through. The world was bright with sunshine outside, but a deep and mellow twilight reigned in there, and also a silence so profound that I seemed to hear my own breathings.

When I had stood ten minutes, thinking and imagining, and getting my spirit in tune with the place, and in the right mood to enjoy the supernatural, a raven suddenly uttered a hoarse croak over my head. It made me start; and then I was angry because I started. I looked up, and the creature was sitting on a limb right over me, looking down at me. I felt something of the same sense of humiliation and injury which one feels when he finds that a human stranger has been clandestinely inspecting him in his privacy and mentally commenting upon him. I eyed the raven, and the raven eyed me. Nothing was said during some seconds. Then the bird stepped a little way along his limb to get a better point of observation, lifted his wings, stuck his head far down below his shoulders toward me, and croaked again —a croak with a distinctly insulting expression about it. If he had spoken in English he could not have said any more plainly than he did say in raven, "Well, what do *you* want here?" I felt as foolish as if I had been caught in some mean act by a responsible being, and reproved for it. However, I made no reply; I would not bandy

words with a raven. The adversary waited a while, with his shoulders still lifted, his head thrust down between them, and his keen bright eye fixed on me; then he threw out two or three more insults, which I could not understand, further than that I knew a portion of them consisted of language not used in church.

I still made no reply. Now the adversary raised his head and called. There was an answering croak from a little distance in the wood,—evidently a croak of inquiry. The adversary explained with enthusiasm, and the other raven dropped everything and came. The two sat side by side on the limb and discussed me as freely and offensively as two great naturalists might discuss a new kind of bug. The thing became more and more embarrassing. They called in another friend. This was too much. I saw that they had the advantage of me, and so I concluded to get out of the scrape by walking out of it. They enjoyed my defeat as much as any low white people could have done. They craned their necks and laughed at me (for a raven *can* laugh, just like a man), they squalled insulting remarks after me as long as they could see me. They were nothing but ravens—I knew that,—what they thought about me could be a matter of no consequence,—and yet when even a raven shouts after you, "What a hat!" "Oh, pull down your vest!" and that sort of thing, it hurts you and humiliates you and there is no getting around it with fine reasoning and pretty arguments.

Animals talk to each other, of course. There can be no question about that; but I suppose there are very few people who can understand them I never knew but one man who could. I knew he could, however, because he told me so himself. He was a middle-aged, simple-hearted miner who had lived in a lonely corner of California, among the woods and mountains, a good many years, and had studied the ways of his only neighbors, the beasts and the birds, until he believed he could accurately translate any remark which they made. This was Jim Baker. According to Jim Baker, some animals have only a limited education, and use only very simple words, and scarcely ever a comparison or a flowery figure; whereas, certain other animals have a large vocabulary, a fine command of language and a ready and fluent delivery; consequently these latter talk a great deal; they like it; they are conscious of their talent, and they enjoy "showing off." Baker said, that after long and careful observation, he had come to the conclusion that the bluejays were the best talkers he had found among birds and beasts. Said he:

"There's more *to* a bluejay than any other creature. He has got more moods, and more different kinds of feelings than other creatures; and, mind you, whatever a bluejay feels, he can put into language. And no mere commonplace language, either, but rattling, out-and-out book-talk—and bristling with metaphor, too—just bristling! And as for command of language—why *you* never see a bluejay get stuck for a word. No man ever did. They just boil out of him! And another thing: I've noticed a good deal, and there's no bird, or cow, or anything that uses as good grammar as a bluejay. You may say a cat uses good grammar. Well, a cat does—but you let a cat get excited once; you let a cat get to pulling fur with another cat on a shed, nights, and you'll hear grammar that will give you the lockjaw. Ignorant people think it's the *noise* which fighting cats make that is so aggravating, but it ain't so; it's the sickening grammar they use. Now I've never heard a jay use bad grammar but very seldom; and when they do, they are as ashamed as a human; they shut right down and leave.

"You may call a jay a bird. Well, so he is, in a measure—because he's got feathers on him, and don't belong to no church, perhaps; but otherwise he is just as much a human as you be. And I'll tell you for why. A jay's gifts, and instincts, and feelings, and interests, cover the whole ground. A jay hasn't got any more principle than a Congressman. A jay will lie, a jay will steal, a jay will deceive, a jay will betray; and four times out of five, a jay will go back on his solemnest promise. The sacredness of an obligation is a thing which you can't cram into no bluejay's head. Now, on top of all this, there's another thing; a jay can out-swear any gentleman in the mines. You think a cat can swear. Well, a cat can; but you give a bluejay a subject that calls for his reserve-powers, and where is your cat? Don't talk to *me*—I know too much about this thing. And there's yet another thing; in the one little particular of scolding—just good, clean, out-and-out scolding—a bluejay can lay over anything, human or divine. Yes, sir, a jay is everything that a man is. A jay can cry, a jay can laugh, a jay can feel shame, a jay can reason and plan and discuss, a jay likes gossip and scandal, a jay has got a sense of humor, a jay knows when he is an ass just as well as you do—maybe better. If a jay ain't human, he

better take in his sign, that's all. Now I'm going to tell you a perfectly true fact about some bluejays.

"When I first begun to understand jay language correctly, there was a little incident happened here. Seven years ago, the last man in this region but me moved away. There stands his house,—been empty ever since; a log house, with a plank roof—just one big room, and no more; no ceiling—nothing between the rafters and the floor. Well, one Sunday morning I was sitting out here in front of my cabin, with my cat, taking the sun, and looking at the blue hills, and listening to the leaves rustling so lonely in the trees, and thinking of the home away yonder in the states, that I hadn't heard from in thirteen years, when a bluejay lit on that house, with an acorn in his mouth, and says, 'Hello, I reckon I've struck something.' When he spoke, the acorn dropped out of his mouth and rolled down the roof, of course, but he didn't care; his mind was all on the thing he had struck. It was a knot-hole in the roof. He cocked his head to one side, shut one eye and put the other one to the hole, like a 'possum looking down a jug; then he glanced up with his bright eyes, gave a wink or two with his wings—which signifies gratification, you understand,—and says, 'It looks like a hole, it's located like a hole,—blamed if I don't believe it *is* a hole!'

"Then he cocked his head down and took another look; he glances up perfectly joyful, this time; winks his wings and his tail both, and says, 'Oh, no, this ain't no fat thing, I reckon! If I ain't in luck!—why it's a perfectly elegant hole!' So he flew down and got that acorn, and fetched it up and dropped it in, and was just tilting his head back, with the heavenliest smile on his face, when all of a sudden he was paralyzed into a listening attitude and that smile faded gradually out of his countenance like breath off'n a razor, and the queerest look of surprise took its place. Then he says, 'Why, I didn't hear it fall!' He cocked his eye at the hole again, and took a long look; raised up and shook his head; stepped around to the other side of the hole and took another look from that side; shook his head again. He studied a while, then he just went into the *de*tails—walked round and round the hole and spied into it from every point of the compass. No use. Now he took a thinking attitude on the comb of the roof and scratched the back of his head with his right foot a minute, and finally says, 'Well, it's too many for *me*, that's certain; must be a mighty long hole; however, I ain't got no time to fool around here, I got to 'tend to business; I reckon it's all right—chance it, anyway.'

"So he flew off and fetched another acorn and dropped it in, and tried to flirt his eye to the hole quick enough to see what become of it, but he was too late. He held his eye there as much as a minute; then he raised up and sighed, and says, 'Confound it, I don't seem to understand this thing, no way; however, I'll tackle her again.' He fetched another acorn, and done his level best to see what become of it, but he couldn't. He says, 'Well, *I* never struck no such a hole as this before; I'm of the opinion it's a totally new kind of a hole.' Then he begun to get mad. He held in for a spell, walking up and down the comb of the roof and shaking his head and muttering to himself; but his feelings got the upper hand of him, presently, and he broke loose and cussed himself black in the face. I never see a bird take on so about a little thing. When he got through he walks to the hole and looks in again for half a minute; then he says, 'Well, you're a long hole, and a deep hole, and a mighty singular hole altogether—but I've started in to fill you, and I'm d—d if I *don't* fill you, if it takes a hundred years!'

"And with that, away he went. You never see a bird work so since you was born. He laid into his work like a nigger, and the way he hove acorns into that hole for about two hours and a half was one of the most exciting and astonishing spectacles I ever struck. He never stopped to take a look any more—he just hove 'em in and went for more. Well, at last he could hardly flop his wings, he was so tuckered out. He comes a-drooping down, once more, sweating like an ice-pitcher, drops his acorn in and says, '*Now* I guess I've got the bulge on you by this time!' So he bent down for a look. If you'll believe me, when his head come up again he was just pale with rage. He says, 'I've shoveled acorns enough in there to keep the family thirty years, and if I can see a sign of one of 'em I wish I may land in a museum with a belly full of sawdust in two minutes!'

"He just had strength enough to crawl up on to the comb and lean his back agin the chimbly, and then he collected his impressions and begun to free his mind. I see in a second that what I had mistook for profanity in the mines was only just the rudiments, as you may say.

"Another jay was going by, and heard him doing his devotions, and stops to inquire what was up. The

sufferer told him the whole circumstance, and says, 'Now yonder's the hole, and if you don't believe me, go and look for yourself' So this fellow went and looked, and comes back and says, 'How many did you say you put in there?' 'Not any less than two tons,' says the sufferer. The other jay went and looked again. He couldn't seem to make it out, so he raised a yell, and three more jays come. They all examined the hole, they all made the sufferer tell it over again, then they all discussed it, and got off as many leather-headed opinions about it as an average crowd of humans could have done.

"They called in more jays; then more and more, till pretty soon this whole region 'peared to have a blue flush about it. There must have been five thousand of them, and such another jawing and disputing and flipping and cussing, you never heard. Every jay in the whole lot put his eye to the hole and delivered a more chuckle-headed opinion about the mystery than the jay that went there before him. They examined the house all over, too The door was standing half open, and at last one old jay happened to go and light on it and look in. Of course, that knocked the mystery galley-west in a second. There lay the acorns, scattered all over the floor. He flopped his wings and raised a whoop 'Come here!' he says, 'Come here, everybody; hang'd if this fool hasn't been trying to fill up a house with acorns!' They all came a-swooping down like a blue cloud, and as each fellow lit on the door and took a glance, the whole absurdity of the contract that that first jay had tackled hit him home and he fell over backwards suffocating with laughter, and the next jay took his place and done the same

"Well, sir, they roosted around here on the housetop and the trees for an hour, and guffawed over that thing like human beings It ain't any use to tell me a bluejay hasn't got a sense of humor, because I know better. And memory, too. They brought jays here from all over the United States to look down that hole, every summer for three years Other birds, too. And they could all see the point, except an owl that come from Nova Scotia to visit the Yo Semite, and he took this thing in on his way back He said he couldn't see anything funny in it. But then he was a good deal disappointed about Yo Semite, too."

From

Life on the Mississippi

Chapter III

FRESCOES FROM THE PAST

A chapter written for **Huckleberry Finn**, but never included in it, is the one which follows. Clemens placed it in Chapter III of **Life on the Mississippi**, with introductory remarks which throw some light on his conception of the nature of **The Adventures of Huckleberry Finn**. The "tall talk" and the fanciful yarning in the passage are among Clemens' happiest achievements in this vein The boasts of Bob and the Pet Child of Calamity represent a convention in the prewar humor of the frontier—the convention whereby authors pictured contestants preceding all fights with similar proclamations about their prowess. The author evidently remembered and recorded some of the favorite phrases of the Hannibal town drunkard whom he had known when he was a boy. Just why Clemens left this passage out of **Huckleberry Finn** has puzzled his critics, since it is rich in invention and humor.

By way of illustrating keelboat talk and manners, and that now departed and hardly-remembered raft-life, I will throw in, in this place, a chapter from a book which I have been working at, by fits and starts, during the past five or six years, and may possibly finish in the course of five or six more. The book is a story which details some passages in the life of an ignorant village boy, Huck Finn, son of the town drunkard of my time out West, there. He has run away from his persecuting father, and from a persecuting good widow who wishes to make a nice, truth-telling, respectable boy of him; and with him a slave of the widow's has also escaped They have found a fragment of a lumber-raft (it is high

water and dead summer-time), and are floating down the river by night, and hiding in the willows by day—bound for Cairo, whence the Negro will seek freedom in the heart of the free states. But, in a fog, they pass Cairo without knowing it. By and by they begin to suspect the truth, and Huck Finn is persuaded to end the dismal suspense by swimming down to a huge raft which they have seen in the distance ahead of them, creeping aboard under cover of the darkness, and gathering the needed information by eavesdropping:

But you know [writes Huck] a young person can't wait very well when he is impatient to find a thing out. We talked it over, and by and by Jim said it was such a black night, now, that it wouldn't be no risk to swim down to the big raft and crawl aboard and listen—they would talk about Cairo, because they would be calculating to go ashore there for a spree, maybe; or anyway they would send boats ashore to buy whisky or fresh meat or something. Jim had a wonderful level head, for a nigger: he could most always start a good plan when you wanted one.

I stood up and shook my rags off and jumped into the river, and struck out for the raft's light. By and by, when I got down nearly to her, I eased up and went slow and cautious. But everything was all right—nobody at the sweeps. So I swum down along the raft till I was most abreast the camp-fire in the middle, then I crawled aboard and inched along and got in among some bundles of shingles on the weather side of the fire. There was thirteen men there—they was the watch on deck of course. And a mighty rough-looking lot, too. They had a jug, and tin cups, and they kept the jug moving. One man was singing—roaring, you may say; and it wasn't a nice song—for a parlor, anyway. He roared through his nose, and strung out the last word of every line very long. When he was done they all fetched a kind of Injun warwhoop, and then another was sung. It begun:

"There was a woman in our towdn,
In our towdn did dwed'l [dwell],
She loved her husband dear-i-lee,
But another man twyste as wed'l.

"Singing too, riloo, riloo, riloo,
Ri-too, riloo, rilay - - - e,
She loved her husband dear-i-lee,
But another man twyste as wed'l."

And so on—fourteen verses. It was kind of poor, and when he was going to start on the next verse one of them said it was the tune the old cow died on; and another one said: "Oh, give us a rest!" And another one told him to take a walk. They made fun of him till he got mad and jumped up and begun to cuss the crowd, and said he could lam any thief in the lot.

They was all about to make a break for him, but the biggest man there jumped up and says:

"Set whar you are, gentlemen. Leave him to me; he's my meat."

Then he jumped up in the air three times, and cracked his heels together every time. He flung off a buckskin coat that was all hung with fringes, and says, "You lay thar tell the chawin-up's done"; and flung his hat down, which was all over ribbons, and says, "You lay thar tell his sufferin's is over."

Then he jumped up in the air and cracked his heels together again, and shouted out:

"Whoo-oop! I'm the old original iron-hawed, brass-mounted, copper-bellied corpse-maker from the wilds of Arkansaw! Look at me! I'm the man they call Sudden Death and General Desolation! Sired by a hurricane, dam'd by an earthquake, half-brother to the cholera, nearly related to the smallpox on the mother's side! Look at me! I take nineteen alligators and a bar'l of whisky for breakfast when I'm in robust health, and a bushel of rattlesnakes and a dead body when I'm ailing I split the everlasting rocks with my glance, and I squench the thunder when I speak! Whoo-oop! Stand back and give me room according to my strength! Blood's my natural drink, and the wails of the dying is music to my ear. Cast your eye on me, gentlemen! and lay low and hold your breath, for I'm 'bout to turn myself loose!"

All the time he was getting this off, he was shaking his head and looking fierce, and kind of swelling around in a little circle, tucking up his wristbands, and now and then straightening up and beating his breast with his fist, saying, "Look at me, gentlemen!" When he got through, he jumped up and cracked his heels together three times, and let off a roaring "Whoo-oop! I'm the bloodiest son of a wildcat that lives!"

Then the man that had started the row tilted his old slouch hat down over his right eye; then he bent stooping forward, with his back sagged and his south end sticking out far, and his fists a-shoving out and drawing in in front of him, and so went around in a little circle about

three times, swelling himself up and breathing hard. Then he straightened, and jumped up and cracked his heels together three times before he lit again (that made them cheer), and he began to shout like this:

"Whoo-oop! bow your neck and spread, for the kingdom of sorrow's a-coming! Hold me down to the earth, for I feel my powers a-working! whoo-oop! I'm a child of sin, *don't* let me get a start! Smoked glass, here, for all! Don't attempt to look at me with the naked eye, gentlemen! When I'm playful I use the meridians of longitude and parallels of latitude for a seine, and drag the Atlantic Ocean for whales! I scratch my head with the lightning and purr myself to sleep with the thunder! When I'm cold, I bile the Gulf of Mexico and bathe in it; when I'm hot I fan myself with an equinoctial storm; when I'm thirsty I reach up and suck a cloud dry like a sponge; when I range the earth hungry, famine follows in my tracks! Whoo-oop! Bow your neck and spread! I put my hand on the sun's face and make it night in the earth; I bite a piece out of the moon and hurry the seasons; I shake myself and crumble the mountains! Contemplate me through leather—*don't* use the naked eye! The massacre of isolated communities is the pastime of my idle moments, the destruction of nationalities the serious business of my life! The boundless vastness of the great American desert is my enclosed property, and I bury my dead on my own premises!" He jumped up and cracked his heels together three times before he lit (they cheered him again), and as he come down he shouted out: "Whoo-oop! bow your neck and spread, for the Pet Child of Calamity's a-coming!"

Then the other one went to swelling around and blowing again—the first one—the one they called Bob; next, the Child of Calamity chipped in again, swelling round and round each other and punching their fists most into each other's faces, and whooping and jawing like Injuns; then Bob called the Child names, and the Child called him names back again; next, Bob called him a heap rougher names; and the Child come back at him with the very worst kind of language; next, Bob knocked the Child's hat off, and the Child picked it up and kicked Bob's ribbony hat about six foot; Bob went and got it and said never mind, this warn't going to be the last of this thing, because he was a man that never forgot and never forgive, and so the Child better look out, for there was a time a-coming, just as sure as he was a living man, that he would have to answer to him with the best blood in his body. The Child said no man was willinger than he for that time to come, and he would give Bob fair warning, *now,* never to cross his path again, for he could never rest till he had waded in his blood, for such was his nature, though he was sparing him now on account of his family, if he had one.

Both of them was edging away in different directions, growling and shaking their heads and going on about what they was going to do; but a little black-whiskered chap skipped up and says:

"Come back here, you couple of chicken-livered cowards, and I'll thrash the two of ye!"

And he done it, too. He snatched them, he jerked them this way and that, he booted them around, he knocked them sprawling faster than they could get up. Why, it warn't two minutes till they begged like dogs—and how the other lot did yell and laugh and clap their hands all the way through, and shout, "Sail in, Corpse-Maker!" "Hi! at him again, Child of Calamity!" "Bully for you, little Davy!" Well, it was a perfect pow-wow for a while, Bob and the Child had red noses and black eyes when they got through. Little Davy made them own up that they was sneaks and cowards and not fit to eat with a dog or drink with a nigger; then Bob and the Child shook hands with each other, very solemn, and said they had always respected each other and was willing to let bygones be bygones. So then they washed their faces in the river; and just then there was a loud order to stand by for a crossing, and some of them went forward to man the sweeps there, and the rest went aft to handle the after sweeps.

I lay still and waited for fifteen minutes, and had a smoke out of a pipe that one of them left in reach; then the crossing was finished, and they stumped back and had a drink around and went to talking and singing again. Next they got out an old fiddle, and one played, and another patted juba, and the rest turned themselves loose on a regular old-fashioned keelboat breakdown. They couldn't keep that up very long without getting winded, so by and by they settled around the jug again.

They sung "Jolly, Jolly Raftsman's the Life for Me," with a rousing chorus, and then they got to talking about differences betwixt hogs, and their different kind of habits; and next about women and their different kind

of ways; and next about the best ways to put out houses that was afire; and next about what ought to be done with the Injuns; and next what a king had to do, and how much he got; and next about how to make cats fight; and next what to do when a man has fits; and next about the differences betwixt clear-water rivers and muddy-water ones. The man they called Ed said the muddy Mississippi water was wholesomer to drink than the clear water of the Ohio; he said if you let a pint of yaller Mississippi water settle, you would have about a half to three-quarters of an inch of mud in the bottom, according to the stage of the river, and then it warn't no better than Ohio water—what you wanted to do was to keep it stirred up—and when the river was low, keep mud on hand to put in and thicken the water up the way it ought to be.

The Child of Calamity said that was so; he said there was nutritiousness in the mud, and a man that drunk Mississippi water could grow corn in his stomach if he wanted to. He says:

"You look at the graveyards; that tells the tale. Trees won't grow worth shucks in a Cincinnati graveyard, but in a Sent Louis graveyard they grow upwards of eight hundred foot high. It's all on account of the water the people drunk before they laid up. A Cincinnati corpse don't richen a soil any."

And they talked about how Ohio water didn't like to mix with Mississippi water. Ed said if you take the Mississippi on a rise when the Ohio is low, you'll find a wide band of clear water all the way down the east side of the Mississippi for a hundred mile or more, and the minute you get out a quarter of a mile from shore and pass the line, it is all thick and yaller the rest of the way across. They talked about how to keep tobacco from getting mouldy, and from that they went to ghosts and told about a lot that other folks had seen; but Ed says:

"Why don't you tell something that you've seen yourselves? Now let me have a say. Five years ago I was on a raft as big as this, and right along here it was a bright moonshiny night, and I was on watch and boss of the stabboard oar forrard, and one of my pards was a man named Dick Allbright, and he come along to where I was sitting, forrard—gaping and stretching, he was—and stooped down on the edge of the raft and washed his face in the river, and come and set down by me and got out his pipe, and had just got it filled, when he looks up and says:

"'Why looky-here,' he says, 'ain't that Buck Miller's place, over yander in the bend?'

"'Yes,' says I, 'it is—why?' He laid his pipe down and leaned his head on his hand, and says:

"'I thought we'd be furder down.' I says:

"'I thought it, too, when I went off watch'—we was standing six hours on and six off—'but the boys told me,' I says, 'that the raft didn't seem to hardly move, for the last hour,' says I, 'though she's a-slipping along all right now,' says I. He give a kind of a groan, and says:

"'I seed a raft act so before, along here,' he says, 'pears to me the current has most quit above the head of this bend durin' the last two years,' he says.

"Well, he raised up two or three times, and looked away off and around on the water. That started me at it, too. A body is always doing what he sees somebody else doing, though there mayn't be no sense in it. Pretty soon I see a black something floating on the water away

Huckleberry Finn

off to stabboard and quartering behind us. I see he was looking at it, too, I says:

"'What's that?' He says, sort of pettish:

"'Tain't nothing but an old empty bar'l.'

"'An empty bar'l!' says I, 'why,' says I, 'a spy-glass is a fool to *your* eyes. How can you tell it's an empty bar'l?' He says:

"'I don't know; I reckon it ain't a bar'l, but I thought it might be,' says he.

"'Yes,' I says, 'so it might be, and it might be anything else, too; a body can't tell nothing about it, such a distance as that,' I says:

"We hadn't nothing else to do, so we kept on watching it. By and by I says,

"'Why, looky-here, Dick Allbright, that thing's a-gaining on us, I believe.'

"He never said nothing. The thing gained and gained, and I judged it must be a dog that was about tired out. Well, we swung down into the crossing, and the thing floated across the bright streak of the moonshine, and by George, it *was* a bar'l. Says I:

"'Dick Allbright, what made you think that thing was a bar'l, when it was half a mile off?' says I. Says he:

"'I don't know.' Says I:

"'You tell me, Dick Allbright.' Says he:

"'Well, I knowed it was a bar'l; I've seen it before; lots has seen it; they says it's a ha'nted bar'l.'

"I called the rest of the watch, and they come and stood there, and I told them what Dick said. It floated right along abreast, now, and didn't gain any more. It was about twenty foot off. Some was for having it aboard, but the rest didn't want to. Dick Allbright said rafts that had fooled with it had got bad luck by it. The captain of the watch said he didn't believe in it. He said he reckoned the bar'l gained on us because it was in a little better current than what we was. He said it would leave by and by.

"So then we went to talking about other things, and we had a song, and then a breakdown; and after that the captain of the watch called for another song, but it was clouding up now, and the bar'l stuck right thar in the same place, and the song didn't seem to have much warm-up to it, somehow, and so they didn't finish it, and there warn't any cheers, but it sort of dropped flat, and nobody said anything for a minute. Then everybody tried to talk at once, and one chap got off a joke, but it warn't no use, they didn't laugh, and even the chap that made the joke didn't laugh at it, which ain't usual. We all just settled down glum, and watched the bar'l, and was oneasy and oncomfortable. Well, sir, it shut down black and still, and then the wind began to moan around, and next the lightning began to play and the thunder to grumble. And pretty soon there was a regular storm, and in the middle of it a man that was running aft stumbled and fell and sprained his ankle so that he had to lay up. This made the boys shake their heads. And every time the lightning come, there was that bar'l, with the blue lights winking around it. We was always on the lookout for it. But by and by, toward dawn, she was gone. When the day come we couldn't see her anywhere, and we warn't sorry, either.

"But next night about half past nine, when there was songs and high jinks going on, here she comes again, and took her old roost on the stabboard side. There warn't no more high jinks. Everybody got solemn; nobody talked; you couldn't get anybody to do anything but set around moody and look at the bar'l. It begun to cloud up again. When the watch changed, the off watch stayed up, 'stead of turning in. The storm ripped and roared around all night, and in the middle of it another man tripped and sprained his ankle, and had to knock off. The bar'l left toward day, and nobody see it go.

"Everybody was sober and down in the mouth all day. I don't mean the kind of sober that comes of leaving liquor alone—not that. They was quiet, but they all drunk more than usual—not together, but each man sidled off and took it private, by himself.

"After dark the off watch didn't turn in; nobody sung, nobody talked; the boys didn't scatter around, neither; they sort of huddled together, forrard; and for two hours they set there, perfectly still, looking steady in the one direction, and heaving a sigh once in a while. And then, here comes the bar'l again. She took up her old place. She stayed there all night; nobody turned in. The storm come on again, after midnight. It got awful dark; and the rain poured down; hail, too; the thunder boomed and roared and bellowed; the wind blowed a hurricane; and the lightning spread over everything in big sheets of glare, and showed the whole raft as plain as day; and the river lashed up white as milk as far as you could see for miles, and there was that

bar'l jiggering along, same as ever. The captain ordered the watch to man the after sweeps for a crossing, and nobody would go—no more sprained ankles for them, they said. They wouldn't even *walk* aft. Well, then, just then the sky split wide open, with a crash, and the lightning killed two men of the after watch, and crippled two more. Crippled them how, say you? Why, *sprained their ankles!*

"The bar'l left in the dark betwixt lightnings, toward dawn. Well, not a body eat a bite at breakfast that morning. After that the men loafed around in twos and threes, and talked low together. But none of them herded with Dick Allbright. They all give him the cold shake. If he come around where any of the men was, they split up and sidled away. They wouldn't man the sweeps with him. The captain had all the skiffs hauled up on the raft, alongside of his wigwam, and wouldn't let the dead men be took ashore to be planted; he didn't believe a man that got ashore would come back, and he was right.

"After night come, you could see pretty plain that there was going to be trouble if that bar'l come again; there was such a muttering going on. A good many wanted to kill Dick Allbright, because he'd seen the bar'l on other trips, and that had an ugly look. Some wanted to put him ashore. Some said: 'Let's all go ashore in a pile, if the bar'l comes again.'

"This kind of whispers was still going on, the men being bunched together forrard watching for the bar'l, when lo and behold you here she comes again. Down she comes, slow and steady, and settles into her old tracks. You could 'a' heard a pin drop. Then up comes the captain, and says:

" 'Boys, don't be a pack of children and fools; I don't want this bar'l to be dogging us all the way to Orleans, and *you* don't: Well, then, how's the best way to stop it? Burn it up—that's the way. I'm going to fetch it aboard,' he says. And before anybody could say a word, in he went.

"He swum to it, and as he come pushing it to the raft, the men spread to one side. But the old man got it aboard and busted in the head, and there was a baby in it! Yes, sir; a stark-naked baby. It was Dick Allbright's baby, he owned up and said so.

" 'Yes,' he says, a-leaning over it, 'yes, it is my own lamented darling, my poor lost Charles William Allbright deceased,' says he—for he could curl his tongue around the bulliest words in the language when he was of a mind to, and lay them before you without a jint started anywheres. Yes, he said, he used to live up at the head of this bend, and one night he choked his child, which was crying, not intending to kill it—which was prob'ly a lie—and then he was scared, and buried it in a bar'l, before his wife got home, and off he went, and struck the northern trail and went to rafting; and this was the third year that the bar'l had chased him. He said the bad luck always begun light, and lasted till four men was killed, and then the bar'l didn't come any more after that. He said if the men would stand it one more night—and was a-going on like that—but the men had got enough. They started to get out a boat to take him ashore and lynch him, but he grabbed the little child all of a sudden and jumped overboard with it, hugged up to his breast and shedding tears, and we never see him again, poor old suffering soul, nor Charles William neither."

"*Who* was shedding tears?" says Bob; "was it Allbright or the baby?"

"Why, Allbright, of course; didn't I tell you the baby was dead? Been dead three years—how could it cry?"

"Well, never mind how it could cry—how could it *keep* all that time?" says Davy. "You answer me that."

"I don't know how it done it," says Ed. "It done it, though—that's all I know about it."

"Say—what did they do with the bar'l?" says the Child of Calamity.

"Why, they hove it overboard, and it sunk like a chunk of lead."

"Edward, did the child look like it was choked?" says one.

"Did it have its hair parted?" says another.

"What was the brand on that bar'l, Eddy?" says a fellow they called Bill.

"Have you got the papers for them statistics, Edmund?" says Jimmy.

"Say, Edwin, was you one of the men that was killed by the lightning?" says Davy.

"Him? Oh, no! he was both of 'em," says Bob. Then they all haw-hawed.

"Say, Edward, don't you reckon you'd better take a pill? You look bad—don't you feel pale?" says the Child of Calamity.

"Oh, come, now, Eddy," says Jimmy, "show up; you must 'a' kept part of that bar'l to prove the thing by. Show us the bung-hole—*do*—and we'll all believe you."

"Say, boys," says Bill, "less divide it up. Thar's thirteen of us. I can swaller a thirteenth of the yarn, if you can worry down the rest."

Ed got up mad and said they could all go to some place which he ripped out pretty savage, and then walked off aft, cussing to himself, and they yelling and jeering at him, and roaring and laughing so you could hear them a mile.

"Boys, we'll split a watermelon on that," says the Child of Calamity; and he came rummaging around in the dark amongst the shingle bundles where I was, and put his hand on me. I was warm and soft and naked; so he says "Ouch!" and jumped back.

"Fetch a lantern or a chunk of fire here, boys—there's a snake here as big as a cow!"

So they run there with a lantern, and crowded up and looked in on me.

"Come out of that, you beggar!" says one.

"Who are you?" says another.

"What are you after here? Speak up prompt, or overboard you go."

"Snake him out, boys. Snatch him out by the heels."

I began to beg, and crept out amongst them trembling. They looked me over, wondering, and the Child of Calamity says:

"A cussed thief! Lend me a hand and less heave him overboard!"

"No," says Big Bob, "less get out the paint-pot and paint him a sky-blue all over from head to heel, and *then* heave him over."

"Good! that's it. Go for the paint, Jimmy."

When the paint come, and Bob took the brush and was just going to begin, the others laughing and rubbing their hands, I begun to cry, and that sort of worked on Davy, and he says:

"'Vast there. He's nothing but a cub. I'll paint the man that teches him!"

So I looked around on them, and some of them grumbled and growled, and Bob put down the paint, and the others didn't take it up.

"Come here to the fire, and less see what you're up to here," says Davy. "Now set down there and give an account of yourself. How long have you been aboard here?"

"Not over a quarter of a minute, sir," says I.

"How did you get dry so quick?"

"I don't know, sir. I'm always that way, mostly."

"Oh, you are, are you? What's your name?"

I warn't going to tell my name. I didn't know what to say, so I just says:

"Charles William Allbright, sir."

Then they roared—the whole crowd; and I was mighty glad I said that, because, maybe, laughing would get them in a better humor.

When they got done laughing, Davy says·

"It won't hardly do, Charles William. You couldn't have growed this much in five year, and you was a baby, when you come out of the bar'l, you know, and dead at that. Come now, tell a straight story, and nobody'll hurt you, if you ain't up to anything wrong. What *is* your name?"

"Aleck Hopkins, sir. Aleck James Hopkins."

"Well, Aleck, where did you come from here?"

"From a trading-scow. She lays up the bend yonder. I was born on her. Pap has traded up and down here all his life; and he told me to swim off here, because when you went by he said he would like to get some of you to speak to a Mr. Jonas Turner, in Cairo, and tell him—"

"Oh, come!"

"Yes, sir, it's as true as the world. Pap he says—"

"Oh, your grandmother!"

They all laughed, and I tried again to talk, but they broke in on me and stopped me.

"Now, looky-here," says Davy; "you're scared, and so you talk wild. Honest, now do you live in a scow, or is it a lie?"

"Yes, sir, in a trading-scow. She lays up at the head of the bend But I warn't born in her. It's our first trip."

"Now you're talking! What did you come aboard here for? To steal?"

"No, sir, I didn't. It was only to get a ride on the raft. All boys does that."

"Well, I know that. But what did you hide for?"

"Sometimes they drive the boys off."

"So they do. They might steal. Looky-here; if we let you off this time, will you keep out of these kind of scrapes hereafter?"

"'Deed I will, boss. You try me."

"All right, then. You ain't but little ways from shore.

Overboard with you, and don't you make a fool of yourself another time this way. Blast it, boy, some raftsmen would rawhide you till you were black and blue!"

I didn't wait to kiss good-by, but went overboard and broke for shore. When Jim come along by and by, the big raft was far away out of sight around the point. I swum out and got aboard, and was mighty glad to see home again.

The boy did not get the information he was after, but his adventure has furnished the glimpse of the departed raftsman and keelboatman which I desire to offer in this place.

1876?-1883

From

Huckleberry Finn

When Twain himself published this episode as a unit in the Century for December 1884, he explained its context in the book for the magazine readers as follows: "The Negro Jim is escaping from slavery in Missouri, and Huck Finn is running away from a drunken father, who maltreats him. The two fugitives are floating down the Mississippi on a fragment of a lumber-raft, doing their voyaging by night and hiding themselves and the raft in the day-time. When this chapter opens they have already floated four hundred miles—a trip which has occupied ten or twelve adventurous nights."

The following passage (part of Chapter XVI and all of Chapters XVII and XVIII) typifies much that made the book memorable. Here, in rich detail, is a segment of life along the river in the 1840's. Here is Huck's character, revealed by what he does and says. And here is an employment of the American language for varying purposes —for humor ranging from broad, low comedy to something much higher, for description, for the portrayal of action, and for Huck's restrained account of how he felt after the death of his friend, Buck Grangerford.

THE GRANGERFORDS TAKE ME IN

Well, the night got gray and rather thick, which is the next meanest thing to fog. You can't tell the shape of the river, and you can't see no distance. It got to be very late and still, and then along comes a steamboat up the river. We lit the lantern, and judged she would see it. Up-stream boats didn't generly come close to us; they go out and follow the bars and hunt for easy water under the reefs; but nights like this they bull right up the channel against the whole river.

We could hear her pounding along, but we didn't see her good till she was close. She aimed right for us. Often they do that and try to see how close they can come without touching; sometimes the wheel bites off a sweep, and then the pilot sticks his head out and laughs, and thinks he's mighty smart. Well, here she comes, and we said she was going to try and shave us, but she didn't seem to be sheering off a bit. She was a big one, and she was coming in a hurry, too, looking like a black cloud with rows of glow-worms around it, but all of a sudden she bulged out, big and scary, with a long row of wide-open furnace doors shining like red-hot teeth, and her monstrous bows and guards hanging right over us There was a yell at us, and a jingling of bells to stop the engines, a powwow of cussing, and whistling of steam—and as Jim went overboard on one side and I on the other, she come smashing straight through the raft.

I dived—and I aimed to find the bottom, too, for a thirty-foot wheel had got to go over me, and I wanted it to have plenty of room. I could always stay under water a minute, this time I reckon I stayed under a minute and a half. Then I bounced for the top in a hurry, for I was nearly busting. I popped out to my armpits and blowed the water out of my nose, and puffed a bit Of course there was a booming current, and of course that boat started her engines again ten seconds after she stopped them, for they never cared much for raftsmen, so now she was churning along up the river, out of sight in the thick weather, though I could hear her

I sung out for Jim about a dozen times, but I didn't get any answer, so I grabbed a plank that touched me while I was "treading water," and struck out for shore, shoving it ahead of me. But I made out to see that the drift of the current was towards the left-hand shore, which meant that I was in a crossing; so I changed off and went that way.

It was one of these long, slanting, two-mile crossings; so I was a good long time in getting over. I made a safe landing, and clumb up the bank. I couldn't see but a little ways, but I went poking along over rough ground for a quarter of a mile or more, and then I run across a big old-fashioned double log house before I noticed it I was going to rush by and get away, but a lot of dogs jumped out and went to howling and barking at me, and I knowed better than to move another peg.

In about a minute somebody spoke out of a window without putting his head out, and says:

"Be done, boys! Who's there?"

I says:

"It's me."

"Who's me?"

"George Jackson, sir."

"What do you want?"

"I don't want nothing, sir. I only want to go along by, but the dogs won't let me."

"What are you prowling around here this time of night for—hey?"

"I warn't prowling around, sir, I fell overboard off of the steamboat."

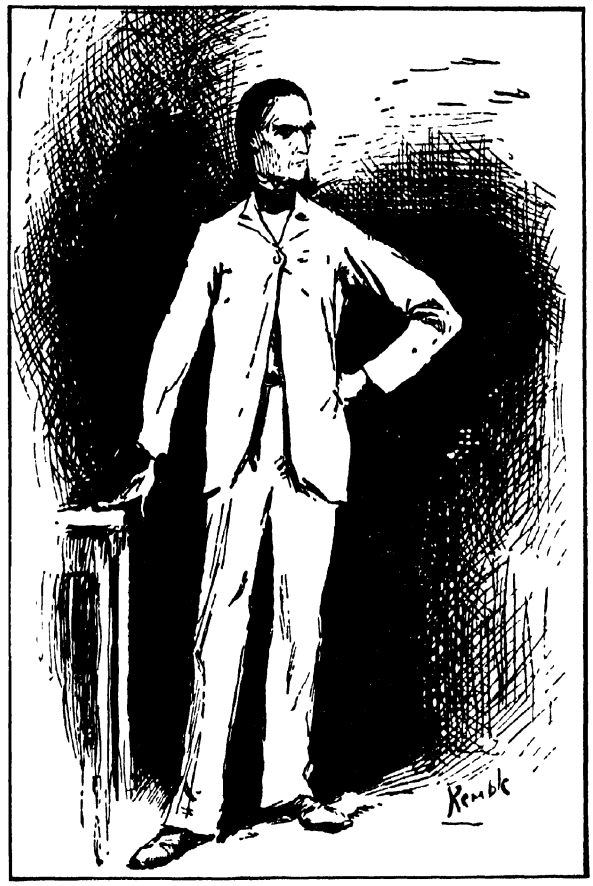
"Oh, you did, did you? Strike a light there, somebody. What did you say your name was?"

"George Jackson, sir. I'm only a boy."

"Look here, if you're telling the truth you needn't be afraid—nobody 'll hurt you. But don't try to budge, stand right where you are. Rouse out Bob and Tom, some of you, and fetch the guns. George Jackson, is there anybody with you?"

"No, sir, nobody."

I heard the people stirring around in the house now, and see a light. The man sung out·



"Snatch that light away, Betsy, you old fool—ain't you got any sense? Put it on the floor behind the front door. Bob, if you and Tom are ready, take your places."

"All ready."

"Now, George Jackson, do you know the Shepherdsons?"

"No, sir; I never heard of them."

"Well, that may be so, and it mayn't. Now, all ready. Step forward, George Jackson. And mind, don't you hurry —come mighty slow. If there's anybody with you, let him keep back—if he shows himself he'll be shot. Come along now. Come slow; push the door open yourself—just enough to squeeze in, d'you hear?"

Colonel Grangerford.

I didn't hurry, I couldn't if I'd a-wanted to. I took one slow step at a time and there warn't a sound, only I thought I could hear my heart The dogs were as still as the humans, but they followed a little behind me. When I got to the three log doorsteps I heard them unlocking and unbarring and unbolting I put my hand on the door and pushed it a little and a little more till somebody said, "There, that's enough—put your head in." I done it, but I judged they would take it off.

The candle was on the floor, and there they all was, looking at me, and me at them, for about a quarter of a minute. Three big men with guns pointed at me, which made me wince, I tell you; the oldest, gray and about sixty, the other two thirty or more—all of them fine and handsome—and the sweetest old gray-headed lady, and back of her two young women which I couldn't see right well. The old gentleman says:

"There; I reckon it's all right. Come in."

As soon as I was in the old gentleman he locked the door and barred it and bolted it, and told the young men to come in with their guns, and they all went in a big parlor that had a new rag carpet on the floor, and got together in a corner that was out of the range of the front windows—there warn't none on the side. They held the candle, and took a good look at me, and all said, "Why, *he* ain't a Shepherdson—no, there ain't any Shepherdson about him." Then the old man said he hoped I wouldn't mind being searched for arms, because he didn't mean no harm by it—it was only to make sure So he didn't pry into my pockets, but only felt outside with his hands, and said it was all right. He told me to make myself easy and at home, and tell all about myself, but the old lady says:

"Why, bless you, Saul, the poor thing's as wet as he can be, and don't you reckon it may be he's hungry?"

"True for you, Rachel—I forgot."

So the old lady says:

"Betsy" (this was a nigger woman), "you fly around and get him something to eat as quick as you can, poor thing; and one of you girls go and wake up Buck and tell him—oh, here he is himself. Buck, take this little stranger and get the wet clothes off from him and dress him up in some of yours that's dry."

Buck looked about as old as me—thirteen or fourteen or along there, though he was a little bigger than me. He hadn't on anything but a shirt, and he was very frowzy-headed He came in gaping and digging one fist into his eyes, and he was dragging a gun along with the other one. He says:

"Ain't they no Shepherdsons around?"

They said, no, 'twas a false alarm.

"Well," he says, "if they'd 'a' ben some, I reckon I'd 'a' got one."

They all laughed, and Bob says:

"Why, Buck, they might have scalped us all, you've been so slow in coming."

"Well, nobody come after me, and it ain't right. I'm always kept down; I don't get no show."

"Never mind, Buck, my boy," says the old man, "you'll have show enough, all in good time, don't you fret about that Go 'long with you now, and do as your mother told you."

When we got up-stairs to his room he got me a coarse shirt and a roundabout and pants of his, and I put them on. While I was at it he asked me what my name was, but before I could tell him he started to tell me about a bluejay and a young rabbit he had catched in the woods day before yesterday, and he asked me where Moses was when the candle went out. I said I didn't know, I hadn't heard about it before, no way.

"Well, guess," he says.

"How'm I going to guess," says I, "when I never heard tell of it before?"

"But you can guess, can't you? It's just as easy."

"*Which* candle?" I says.

"Why, any candle," he says.

"I don't know where he was," says I; "where was he?"

"Why, he was in the *dark!* That's where he was!"

"Well, if you knowed where he was, what did you ask me for?"

"Why, blame it, it's a riddle, don't you see? Say, how long are you going to stay here? You got to stay always. We can just have booming times—they don't have no school now. Do you own a dog? I've got a dog—and he'll go in the river and bring out chips that you throw in. Do you like to comb up Sundays, and all that kind of foolishness? You bet I don't, but ma she makes me. Confound these ole britches! I reckon I'd better put 'em on, but I'd ruther not, it's so warm. Are you all ready? All right. Come along, old hoss."

Cold corn-pone, cold corn-beef, butter and buttermilk—that is what they had for me down there, and there ain't nothing better that ever I've come across yet. Buck and his ma and all of them smoked cob pipes, except the nigger woman, which was gone, and the two young women. They all smoked and talked, and I eat and talked. The young women had quilts around them, and their hair down their backs. They all asked me questions, and I told them how pap and me and all the family was living on a little farm down at the bottom of Arkansaw, and my sister Mary Ann run off and got married and never was heard of no more, and Bill went to hunt them and he warn't heard of no more, and Tom and Mort died, and then there warn't nobody but just me and pap left, and he was just trimmed down to nothing, on account of his troubles; so when he died I took what there was left, because the farm didn't belong to us, and started up the river, deck passage, and fell overboard; and that was how I come to be here. So they said I could have a home there as long as I wanted it. Then it was most

daylight and everybody went to bed, and I went to bed with Buck, and when I waked up in the morning, drat it all, I had forgot what my name was. So I laid there about an hour trying to think, and when Buck waked up I says:

"Can you spell, Buck?"

"Yes," he says.

"I bet you can't spell my name," says I.

"I bet you what you dare I can," says he

"All right," says I, "go ahead."

"G-e-o-r-g-e J-a-x-o-n—there now," he says.

"Well," says I, "you done it, but I didn't think you could. It ain't no slouch of a name to spell—right off without studying"

I set it down, private, because somebody might want *me* to spell it next, and so I wanted to be handy with it and rattle it off like I was used to it.

It was a mighty nice family, and a mighty nice house, too. I hadn't seen no house out in the country before that was so nice and had so much style It didn't have an iron latch on the front door, nor a wooden one with a buckskin string, but a brass knob to turn, the same as houses in town. There warn't no bed in the parlor, nor a sign of a bed, but heaps of parlors in towns has beds in them There was a big fireplace that was bricked on the bottom, and the bricks was kept clean and red by pouring water on them and scrubbing them with another brick, sometimes they wash them over with red water-paint that they call Spanish-brown, same as they do in town. They had big brass dog-irons that could hold up a saw-log. There was a clock on the middle of the mantelpiece, with a picture of a town painted on the bottom half of the glass front, and a round place in the middle of it for the sun, and you could see the pendulum swinging behind it It was beautiful to hear that clock tick; and sometimes when one of these peddlers had been along and scoured her up and got her in good shape, she would start in and strike a hundred and fifty before she got tuckered out They wouldn't took any money for her.

Well, there was a big outlandish parrot on each side of the clock, made out of something like chalk, and painted up gaudy. By one of the parrots was a cat made of crockery, and a crockery dog by the other, and when you pressed down on them they squeaked, but didn't open their mouths nor look different nor interested. They squeaked through underneath. There was a couple of big wild-turkey-wing fans spread out behind those things. On the table in the middle of the room was a kind of a lovely crockery basket that had apples and oranges and peaches and grapes piled up in it, which was much redder and yellower and prettier than real ones is, but they warn't real because you could see where pieces had got chipped off and showed the white chalk, or whatever it was, underneath.

This table had a cover made out of beautiful oil-cloth, with a red and blue spread-eagle painted on it, and a painted border all around. It come all the way from Philadephia, they said. There was some books, too, piled up perfectly exact, on each corner of the table. One was a big family Bible full of pictures. One was *Pilgrim's Progress,* about a man that left his family, it didn't say why. I read considerable in it now and then. The statements was interesting, but tough. Another was *Friendship's Offering,* full of beautiful stuff and poetry, but I didn't read the poetry. Another was Henry Clay's Speeches, and another was Dr. Gunn's *Family Medicine,* which told you all about what to do if a body was sick or dead. There was a hymn-book, and a lot of other books. And there was nice split-bottom chairs, and perfectly sound, too—not bagged down in the middle and busted, like an old basket.

They had pictures hung on the walls—mainly Washingtons and Lafayettes, and battles, and Highland Marys, and one called "Signing the Declaration." There was some that they called crayons, which one of the daughters which was dead made her own self when she was only fifteen years old They was different from any pictures I ever see before—blacker, mostly, than is common. One was a woman in a slim black dress, belted small under the armpits, with bulges like a cabbage in the middle of the sleeves, and a large black scoop-shovel bonnet with a black veil, and white slim ankles crossed about with black tape, and very wee black slippers, like a chisel, and she was leaning pensive on a tombstone on her right elbow, under a weeping willow, and her other hand hanging down her side holding a white handkerchief and a reticule, and underneath the picture it said "Shall I Never See Thee More Alas." Another one was a young lady with her hair all combed up straight to the top of her head, and knotted there in front of a comb like a chair-back, and she was crying into a handkerchief and had a dead bird laying on its back in her other hand with its heels up, and underneath the picture it

said "I Shall Never Hear Thy Sweet Chirrup More Alas." There was one where a young lady was at a window looking up at the moon, and tears running down her cheeks; and she had an open letter in one hand with black sealing-wax showing on one edge of it, and she was mashing a locket with a chain to it against her mouth, and underneath the picture it said "And Art Thou Gone Yes Thou Art Gone Alas." These was all nice pictures, I reckon, but I didn't somehow seem to take to them, because if ever I was down a little they always give me the fan-tods. Everybody was sorry she died, because she had laid out a lot more of these pictures to do, and a body could see by what she had done what they had lost. But I reckoned that with her disposition she was having a better time in the graveyard. She was at work on what they said was her greatest picture when she took sick, and every day and every night it was her prayer to be allowed to live till she got it done, but she never got the chance. It was a picture of a young woman in a long white gown, standing on the rail of a bridge all ready to jump off, with her hair all down her back, and looking up to the moon, with the tears running down her face, and she had two arms folded across her breast, and two arms stretched out in front, and two more reaching up toward the moon—and the idea was to see which pair would look best, and then scratch out all the other arms, but, as I was saying, she died before she got her mind made up, and now they kept this picture over the head of the bed in her room, and every time her birthday come they hung flowers on it. Other times it was hid with a little curtain The young woman in the picture had a kind of a nice sweet face, but there was so many arms it made her look too spidery, seemed to me.

This young girl kept a scrap-book when she was alive, and used to paste obituaries and accidents and cases of patient suffering in it out of the *Presbyterian Observer,* and write poetry after them out of her own head. It was very good poetry. This is what she wrote about a boy by the name of Stephen Dowling Bots that fell down a well and was drowned:

ODE TO STEPHEN DOWLING BOTS, DEC'D

And did young Stephen sicken,
  And did young Stephen die?
And did the sad hearts thicken,
  And did the mourners cry?

No; such was not the fate of
  Young Stephen Dowling Bots;
Though sad hearts round him thickened,
  'Twas not from sickness' shots.

No whooping-cough did rack his frame,
  Nor measles drear with spots,
Not these impaired the sacred name
  Of Stephen Dowling Bots.

Despised love struck not with woe
  That head of curly knots,
Nor stomach troubles laid him low,
  Young Stephen Dowling Bots.

O no. Then list with tearful eye,
  Whilst I his fate do tell.
His soul did from this cold world fly
  By falling down a well.

They got him out and emptied him;
  Alas it was too late;
His spirit was gone for to sport aloft
  In the realms of the good and great.

If Emmeline Grangerford could make poetry like that before she was fourteen, there ain't no telling what she could 'a' done by and by. Buck said she could rattle off poetry like nothing She didn't ever have to stop to think. He said she would slap down a line, and if she couldn't find anything to rhyme with it would just scratch it out and slap down another one, and go ahead. She warn't particular; she could write about anything you choose to give her to write about just so it was sadful. Every time a man died, or a woman died, or a child died, she would be on hand with her "tribute" before he was cold. She called them tributes. The neighbors said it was the doctor first, then Emmeline, then the undertaker—the undertaker never got in ahead of Emmeline but once, and then she hung fire on a rhyme for the dead person's name, which was Whistler She warn't ever the same after that, she never complained, but she kinder pined away and did not live long. Poor thing, many's the time I made myself go up to the little room that used to be hers and get out her poor old scrap-book and read in it when her pictures had been

" . . . so many arms it made her look too spidery. . . . "

aggravating me and I had soured on her a little. I liked all that family, dead ones and all, and warn't going to let anything come between us. Poor Emmeline made poetry about all the dead people when she was alive, and it didn't seem right that there warn't nobody to make some about her now she was gone; so I tried to sweat out a verse or two myself, but I couldn't seem to make it go somehow. They kept Emmeline's room trim and nice, and all the things fixed in it just the way she liked to have them when she was alive, and nobody ever slept there. The old lady took care of the room herself, though there were plenty of niggers, and she sewed there a good deal and read her Bible there mostly.

Well, as I was saying about the parlor, there was beautiful curtains on the windows: white, with pictures painted on them of castles with vines all down the walls, and cattle coming down to drink. There was a little old piano, too, that had tin pans in it, I reckon, and nothing was ever so lovely as to hear the young ladies sing "The Last Link is Broken" and play "The Battle of Prague" on it. The walls of all the rooms was plastered, and most had carpets on the floors, and the whole house was whitewashed on the outside.

It was a double house, and the big open place betwixt them was roofed and floored, and sometimes the table was set there in the middle of the day, and it was a cool, comfortable place. Nothing couldn't be better. And warn't the cooking good, and just bushels of it too!

Col. Grangerford was a gentleman, you see. He was a gentleman all over; and so was his family. He was well born, as the saying is, and that's worth as much in a man as it is in a horse, so the Widow Douglas said, and nobody ever denied that she was of the first aristocracy in our town; and pap he always said it, too, though he warn't no more quality than a mudcat himself. Col. Grangerford was very tall and very slim, and had a darkish-paly complexion, not a sign of red in it anywheres; he was clean-shaved every morning all over his thin face, and he had the thinnest kind of lips, and the thinnest kind of nostrils, and a high nose, and heavy eyebrows, and the blackest kind of eyes, sunk so deep back that they seemed like they was looking out of caverns at you, as you may say. His forehead was high, and his hair was gray and straight and hung to his shoulders. His hands was long and thin, and every day of his life he put on a clean shirt and a full suit from head to foot made out of linen so white it hurt your eyes to look at it; and on Sundays he wore a blue tail-coat with brass buttons on it. He carried a mahogany cane with a silver head to it. There warn't no frivolishness about him, not a bit, and he warn't ever loud. He was as kind as he could be—you could feel that, you know, and so you had confidence. Sometimes he smiled, and it was good to see; but when he straightened himself up like a liberty-pole, and the lightning begun to flicker out from under his eyebrows, you wanted to climb a tree first, and find out what the matter was afterwards. He didn't ever have to tell anybody to mind their manners—everybody was always good-mannered where he was. Everybody loved to have him around, too; he was sunshine most always—I mean he made it seem like good weather. When he turned into a cloud-bank it was awful dark for half a minute, and that was enough; there wouldn't nothing go wrong again for a week.

When him and the old lady come down in the morning all the family got up out of their chairs and give them good day, and didn't set down again till they had set down. Then Tom and Bob went to the sideboard where the decanter was, and mixed a glass of bitters and handed it to him, and he held it in his hand and waited till Tom's and Bob's was mixed, and then they bowed and said, "Our duty to you, sir, and madam", and *they* bowed the least bit in the world and said thank you, and so they drank, all three, and Bob and Tom poured a spoonful of water on the sugar and the mite of whisky or apple-brandy in the bottom of their tumblers, and give it to me and Buck, and we drank to the old people too.

Bob was the oldest and Tom next—tall, beautiful men with very broad shoulders and brown faces, and long black hair and black eyes. They dressed in white linen from head to foot, like the old gentleman, and wore broad Panama hats.

Then there was Miss Charlotte; she was twenty-five, and tall and proud and grand, but as good as she could be when she warn't stirred up; but when she was she had a look that would make you wilt in your tracks, like her father. She was beautiful.

So was her sister, Miss Sophia, but it was a different kind. She was gentle and sweet like a dove, and she was only twenty.

Each person had their own nigger to wait on them—Buck too. My nigger had a monstrous easy time, because I warn't used to having anybody do anything for me, but Buck's was on the jump most of the time.

This was all there was of the family now, but there used to be more—three sons, they got killed; and Emmeline that died.

The old gentleman owned a lot of farms and over a hundred niggers. Sometimes a stack of people would come there, horseback, from ten or fifteen mile around, and stay five or six days, and have such junketings round about and on the river, and dances and picnics in the woods daytimes, and balls at the house nights. These people was mostly kinfolks of the family The men brought their guns with them. It was a handsome lot of quality, I tell you.

There was another clan of aristocracy around there—five or six families—mostly of the name of Shepherdson. They was as high-toned and well born and rich and grand as the tribe of Grangerfords. The Shepherdsons and Grangerfords used the same steamboat-landing, which was about two mile above our house; so sometimes when I went up there with a lot of our folks I used to see a lot of the Shepherdsons there on their fine horses.

One day Buck and me was away out in the woods hunting, and heard a horse coming. We was crossing the road. Buck says:

"Quick! Jump for the woods!"

We done it, and then peeped down the woods through the leaves Pretty soon a splendid young man came galloping down the road, setting his horse easy and looking like a soldier He had his gun across his pommel. I had seen him before. It was young Harney Shepherdson. I heard Buck's gun go off at my ear, and Harney's hat tumbled off from his head. He grabbed his gun and rode straight to the place where we was hid. But we didn't wait. We started through the woods on a run. The woods warn't thick, so I looked over my shoulder to dodge the bullet, and twice I seen Harney cover Buck with his gun, and then he rode away the way he come—to get his hat, I reckon, but I couldn't see. We never stopped running till we got home. The old gentleman's eyes blazed a minute—'twas pleasure, mainly, I judged—then his face sort of smoothed down, and he says, kind of gentle:

"I don't like that shooting from behind a bush. Why didn't you step into the road, my boy?"

"The Shepherdsons don't, father. They always take advantage"

Miss Charlotte she held her head up like a queen while Buck was telling his tale, and her nostrils spread and her eyes snapped The two young men looked dark, but never said nothing Miss Sophia she turned pale, but the color come back when she found the man warn't hurt.

Soon as I could get Buck down by the corn-cribs under the trees by ourselves, I says.

"Did you want to kill him, Buck?"

"Well, I bet I did."

"What did he do to you?"

"Him? He never done nothing to me."

"Well, then, what did you want to kill him for?"

"Why, nothing—only it's on account of the feud."

"What's a feud?"

"Why, where was you raised? Don't you know what a feud is?"

"Never heard of it before—tell me about it."

"Well," says Buck, "a feud is this way. A man has a quarrel with another man, and kills him, then that other man's brother kills *him;* then the other brothers, on both sides, goes for one another; then the *cousins* chip in—and by and by everybody's killed off, and there ain't no more feud. But it's kind of slow, and takes a long time."

"Has this one been going on long, Buck?"

"Well, I should *reckon!* It started thirty year ago, or som'ers along there. There was trouble 'bout something, and then a lawsuit to settle it; and the suit went agin one of the men, and so he up and shot the man that won the suit—which he would naturally do, of course. Anybody would."

"What was the trouble about, Buck?—land?"

"I reckon maybe—I don't know."

"Well, who done the shooting? Was it a Grangerford or a Shepherdson?"

"Laws, how do *I* know? It was so long ago."

"Don't anybody know?"

"Oh, yes, pa knows, I reckon, and some of the other old people, but they don't know now what the row was about in the first place."

"Has there been many killed, Buck?"

"Yes; right smart chance of funerals. But they don't always kill. Pa's got a few buckshot in him; but he don't mind it 'cuz he don't weigh much, anyway. Bob's been carved up some with a bowie, and Tom's been hurt once or twice."

"Has anybody been killed this year, Buck?"

"Yes; we got one and they got one. 'Bout three months ago my cousin Bud, fourteen year old, was riding through the woods on t'other side of the river, and didn't have no weapon with him, which was blame' foolishness, and in a lonesome place he hears a horse a-coming behind him, and sees old Baldy Shepherdson a-linkin' after him with his gun in his hand and his white hair a-flying in the wind; and 'stead of jumping off and taking to the brush, Bud 'lowed he could outrun him; so they had it, nip and tuck, for five mile or more, the old man a-gaining all the time; so at last Bud seen it warn't any use, so he stopped and faced around so as to have the bullet-holes in front, you know, and the old man he rode up and shot him down. But he didn't git much chance to enjoy his luck, for inside of a week our folks laid *him* out."

"I reckon that old man was a coward, Buck."

"I reckon he *warn't* a coward. Not by a blame' sight. There ain't a coward amongst them Shepherdsons—not a one. And there ain't no cowards amongst the Grangerfords either. Why, that old man kep' up his end in a fight one day for half an hour against three Grangerfords, and come out winner. They was all a-horseback; he lit off of his horse and got behind a little woodpile, and kep' his horse before him to stop the bullets; but the Grangerfords stayed on their horses and capered around the old man, and peppered away at him, and he peppered away at them. Him and his horse both went home pretty leaky and crippled, but the Grangerfords had to be *fetched* home—and one of 'em was dead, and another died the next day. No, sir; if a body's out hunting for cowards he don't want to fool away any time amongst them Shepherdsons, becuz they don't breed any of that *kind.*"

Next Sunday we all went to church, about three mile, everybody a-horseback. The men took their guns along, so did Buck, and kept them between their knees or stood them handy against the wall. The Shepherdsons done the same. It was pretty ornery preaching—all about brotherly love, and such-like tiresomeness; but everybody said it was a good sermon, and they all talked it over going home, and had such a powerful lot to say about faith and good works and free grace and predestination, and I don't know what all, that it did seem to me to be one of the roughest Sundays I had run across yet.

About an hour after dinner everybody was dozing around, some in their chairs and some in their rooms, and it got to be pretty dull. Buck and a dog was stretched out on the grass in the sun sound asleep. I went up to our room, and judged I would take a nap myself. I found that sweet Miss Sophia standing in her door, which was next to ours, and she took me in her room and shut the door very soft, and asked me if I liked her, and I said I did; and she asked me if I would do something for her and not tell anybody, and I said I would. Then she said she'd forgot her Testament, and left it in the seat at church between two other books, and would I slip out quiet and go there and fetch it to her, and

not say nothing to nobody. I said I would. So I slid out and slipped off up the road, and there warn't anybody at the church, except maybe a hog or two, for there warn't any lock on the door, and hogs likes a puncheon floor in summer-time because it's cool. If you notice, most folks don't go to church only when they've got to; but a hog is different.

Says I to myself, something's up; it ain't natural for a girl to be in such a sweat about a Testament. So I give it a shake, and out drops a little piece of paper with *"Half past two"* wrote on it with a pencil. I ransacked it, but couldn't find anything else. I couldn't make anything out of that, so I put the paper in the book again, and when I got home and upstairs there was Miss Sophia in her door waiting for me. She pulled me in and shut the door; then she looked in the Testament till she found the paper, and as soon as she read it she looked glad; and before a body could think she grabbed me and give me a squeeze, and said I was the best boy in the world, and not to tell anybody. She was mighty red in the face for a minute, and her eyes lighted up, and it made her powerful pretty. I was a good deal astonished, but when I got my breath I asked her what the paper was about, and she asked me if I had read it, and I said no, and she asked me if I could read writing, and I told her "no, only coarse-hand," and then she said the paper warn't anything but a book-mark to keep her place, and I might go and play now.

I went off down to the river, studying over this thing, and pretty soon I noticed that my nigger was following along behind. When we was out of sight of the house he looked back and around a second, and then comes a-running, and says:

"Mars Jawge, if you'll come down into de swamp I'll show you a whole stack o' water-moccasins."

Thinks I, that's mighty curious; he said that yesterday. He oughter know a body don't love water-moccasins enough to go around hunting for them. What is he up to, anyway? So I says:

"All right; trot ahead."

I followed a half a mile; then he struck out over the swamp, and waded ankle-deep as much as another half-mile. We come to a little flat piece of land which was dry and very thick with trees and bushes and vines, and he says:

"You shove right in dah jist a few steps, Mars Jawge; dah's whah dey is. I's seed 'm befo'; I don't k'yer to see 'em no mo'."

Then he slopped right along and went away, and pretty soon the trees hid him. I poked into the place a ways and come to a little open patch as big as a bedroom all hung around with vines, and found a man laying there asleep—and, by jings, it was my old Jim!

I waked him up, and I reckoned it was going to be a grand surprise to him to see me again, but it warn't. He nearly cried he was so glad, but he warn't surprised. Said he swum along behind me that night, and heard me yell every time, but dasn't answer, because he didn't want nobody to pick *him* up and take him into slavery again. Says he:

"I got hurt a little, en couldn't swim fas', so I wuz a considerable ways behine you towards de las', when you landed I reck'ned I could ketch up wid you on de lan' 'dout havin' to shout at you, but when I see dat house I begin to go slow. I 'uz off too fur to hear what dey say to you—I wuz 'fraid o' de dogs; but when it 'uz all quiet ag'in I knowed you's in de house, so I struck out for de woods to wait for day. Early in de mawnin' some er de niggers come along, gwyne to de fields, en dey tuk me en showed me dis place, whah de dogs can't track me on accounts o' de water, en dey brings me truck to eat every night, en tells me how you's a-gittin' along."

"Why didn't you tell my Jack to fetch me here sooner, Jim?"

"Well, 'twarn't no use to 'sturb you, Huck, tell we could do sumfn—but we's all right now. I ben a-buyin' pots en pans en vittles, as I got a chanst, en a-patchin' up de raf' nights when—"

"*What* raft, Jim?"

"Our ole raf'."

"You mean to say our old raft warn't smashed all to flinders?"

"No, she warn't. She was tore up a good deal—one en' of her was; but dey warn't no great harm done, on'y our traps was mos' all los'. Ef we hadn' dive' so deep en swum so fur under water, en de night hadn't ben so dark, en we warn't so sk'yerd, en ben sick punkin-heads, as de sayin' is, we'd a seed de raf'. But it's jis' as well we didn't, 'kase now she's all fixed up ag'in mos' as good as new, en we's got a new lot o' stuff, in de place o' what 'uz los'."

"Why, how did you get hold of the raft again, Jim—did you catch her?"

"How I gwyne to ketch her en I out in de woods? No; some er de niggers foun' her ketched on a snag along heah in de ben', en dey hid her in a crick 'mongst de willows, en dey wuz so much jawin' 'bout which un 'um she b'long to de mos' dat I come to heah 'bout it pooty soon, so I ups en settles de trouble by tellin' 'um she don't b'long to none uv 'um, but to you en me; en I ast 'm if dey gwyne to grab a young white genlman's propaty, en git a hid'n for it? Den I gin 'm ten cents apiece, en dey 'uz mighty well satisfied, en wisht some mo' raf's 'ud come along en make 'm rich ag'in. Dey's mighty good to me, dese niggers is, en whatever I wants 'm to do fur me I doan' have to ast 'm twice, honey. Dat Jack's a good nigger, en pooty smart."

"Yes, he is. He ain't ever told me you was here; told me to come, and he'd show me a lot of water-moccasins. If anything happens *he* ain't mixed up in it. He can say he never seen us together, and it'll be the truth."

I don't want to talk much about the next day. I reckon I'll cut it pretty short. I waked up about dawn, and was a-going to turn over and go to sleep again when I noticed how still it was—didn't seem to be anybody stirring. That warn't usual. Next I noticed that Buck was up and gone. Well, I gets up, a-wondering, and goes down-stairs—nobody around; everything as still as a mouse. Just the same outside. Thinks I, what does it mean? Down by the woodpile I comes across my Jack, and says:

"What's it all about?"

Says he:

"Don't you know, Mars Jawge?"

"No," says I, "I don't."

"Well, den, Miss Sophia's run off! 'deed she has. She run off in de night some time—nobody don't know jis' when; run off to get married to dat young Harney Shepherdson, you know—leastways, so dey 'spec. De fambly foun' it out 'bout half an hour ago—maybe a little mo'—en' I *tell* you dey warn't no time los'. Sich another hurryin' up guns en hosses *you* never see! De women folks has gone for to stir up de relations, en ole Mars Saul en de boys tuck dey guns en rode up de river road for to try to ketch dat young man en kill him 'fo' he kin git acrost de river wid Miss Sophia. I reck'n dey's gwyne to be mighty rough times."

"Buck went off 'thout waking me up."

"Well, I reck'n he *did!* Dey warn't gwyne to mix you

" . . . trying to get at a couple of young chaps that was behind the wood-rank. . . ."

up in it. Mars Buck he loaded up his gun en 'lowed he's gwyne to fetch home a Shepherdson or bust. Well, dey'll be plenty un 'm dah, I reck'n, en you bet you he'll fetch one ef he gits a chanst."

I took up the river road as hard as I could put. By and by I begin to hear guns a good ways off. When I came in sight of the log store and the woodpile where the steamboats lands I worked along under the trees and brush till I got to a good place, and then I clumb up into the forks of a cottonwood that was out of reach, and watched. There was a wood-rank four foot high a little ways in front of the tree, and first I was going to hide behind that; but maybe it was luckier I didn't.

There was four or five men cavorting around on their horses in the open place before the log store, cussing and yelling, and trying to get at a couple of young chaps that was behind the wood-rank alongside of the steamboat-landing; but they couldn't come it. Every time one of them showed himself on the river side of the woodpile he got shot at. The two boys was squatting back to back behind the pile, so they could watch both ways.

By and by the men stopped cavorting around and yelling. They started riding towards the store; then up gets one of the boys, draws a steady bead over the wood-rank, and drops one of them out of his saddle. All the men jumped off of their horses and grabbed the hurt one and started to carry him to the store; and that minute the two boys started on the run. They got half-way to the tree I was in before the men noticed. Then the men see them, and jumped on their horses and took out

after them. They gained on the boys, but it didn't do no good, the boys had too good a start; they got to the woodpile that was in front of my tree, and slipped in behind it, and so they had the bulge on the men again. One of the boys was Buck, and the other was a slim young chap about nineteen years old.

The men ripped around awhile, and then rode away. As soon as they was out of sight I sung out to Buck and told him. He didn't know what to make of my voice coming out of the tree at first. He was awful surprised. He told me to watch out sharp and let him know when the men come in sight again; said they was up to some devilment or other—wouldn't be gone long. I wished I was out of that tree, but I dasn't come down. Buck begun to cry and rip, and 'lowed that him and his cousin Joe (that was the other young chap) would make up for this day yet. He said his father and his two brothers was killed, and two or three of the enemy. Said the Shepherdsons laid for them in ambush. Buck said his father and brothers ought to waited for their relations—the Shepherdsons was too strong for them. I asked him what was become of young Harney and Miss Sophia. He said they'd got across the river and was safe. I was glad of that; but the way Buck did take on because he didn't manage to kill Harney that day he shot at him—I hain't ever heard anything like it.

All of a sudden, bang! bang! bang! goes three or four guns—the men had slipped around through the woods and come in from behind without their horses! The boys jumped for the river—both of them hurt—and as they swum down the current the men run along the bank shooting at them and singing out, "Kill them, kill them!" It made me so sick I most fell out of the tree. I ain't a-going to tell *all* that happened—it would make me sick again if I was to do that. I wished I hadn't ever come ashore that night to see such things. I ain't ever going to get shut of them—lots of times I dream about them.

I stayed in the tree till it begun to get dark, afraid to come down. Sometimes I heard guns away off in the woods; and twice I seen little gangs of men gallop past the log store with guns; so I reckoned the trouble was still a-going on. I was mighty down-hearted; so I made up my mind I wouldn't ever go anear that house again, because I reckoned I was to blame, somehow. I judged that that piece of paper meant that Miss Sophia was to meet Harney somewheres at half past two and run off; and I judged I ought to told her father about that paper and the curious way she acted, and then maybe he would 'a' locked her up, and this awful mess wouldn't ever happened.

When I got down out of the tree I crept along down the river-bank a piece, and found the two bodies laying in the edge of the water, and tugged at them till I got them ashore, then I covered up their faces, and got away as quick as I could. I cried a little when I was covering up Buck's face, for he was mighty good to me.

It was just dark now. I never went near the house, but struck through the woods and made for the swamp. Jim warn't on his island, so I tramped off in a hurry for the crick, and crowded through the willows, red-hot to jump aboard and get out of that awful country. The raft was gone! My souls, but I was scared! I couldn't get my breath for most a minute. Then I raised a yell. A voice not twenty-five foot from me says:

"Good lan'! is dat you, honey? Doan' make no noise."

It was Jim's voice—nothing ever sounded so good before. I run along the bank a piece and got aboard, and Jim he grabbed me and hugged me, he was so glad to see me. He says:

"Laws bless you, chile, I 'uz right down sho' you's dead ag'in Jack's been heah; he say he rek'n you's ben shot, kase you didn' come home no mo'; so I's jes' dis minute a-startin' de raf' down towards de mouf er de crick, so's to be all ready for to shove out en leave soon as Jack comes ag'in en tells me for certain you *is* dead. Lawsy, I's mighty glad to git you back ag'in, honey."

I says:

"All right—that's mighty good; they won't find me, and they'll think I've been killed, and floated down the river—there's something up there that'll help them think so—so don't you lose no time, Jim, but just shove off for the big water as fast as ever you can."

I never felt easy till the raft was two mile below there and out in the middle of the Mississippi. Then we hung up our signal lantern, and judged that we was free and safe once more. I hadn't had a bite to eat since yesterday, so Jim he got out some corn-dodgers and buttermilk, and pork and cabbage and greens—there ain't nothing in the world so good when it's cooked right—and whilst I eat my supper we talked and had a good time. I was powerful glad to get away from the feuds, and so was

Jim to get away from the swamp. We said there warn't no home like a raft, after all. Other places do seem so cramped up and smothery, but a raft don't. You feel mighty free and easy and comfortable on a raft.

1883·1884

AN ARKANSAW DIFFICULTY

Down the river below the Grangerford plantation, Huck and Jim, against their will, were joined by two rascals who called themselves the king and the duke. These two, who were glad to collect any dishonest pennies available, brought the raft ashore in Bricksville, Arkansas, to give a performance of a Shakespearean play, and Huck saw the incidents here described. The passage, part of Chapter XXI, starts just after the duke has hired the courthouse and has posted bills advertising the play.

When Clemens printed a long selection about Huck, Jim, the king, and the duke in the February 1885 issue of the Century, most of this passage was omitted for fear that it might offend the sensibilities of subscribers. (See Bernard DeVoto, Mark Twain's America, pp. 212-216, for a detailed study of the excisions.) Sherburn's speech to the mob, with its commentaries on what Clemens called "The damned human race," is an articulation of some of the pessimistic attitudes which were to become more and more important to Clemens as the years passed. In What Is Man? and The Mysterious Stranger, he was to give them their most detailed expression.

Then we went loafing around town. The stores and houses was most all old, shackly, dried-up frame concerns that hadn't ever been painted; they was set up three or four foot above ground on stilts, so as to be out of reach of the water when the river was overflowed. The houses had little gardens around them, but they didn't seem to raise hardly anything in them but jimpson-weeds, and sunflowers, and ashpiles, and old curled-up boots and shoes, and pieces of bottles, and rags, and played-out tinware. The fences was made of different kinds of boards, nailed on at different times; and they leaned every which way, and had gates that didn't generly have but one hinge—a leather one. Some of the fences had been whitewashed some time or another, but the duke said it was in Columbus's time, like enough. There was generly hogs in the garden, and people driving them out.

All the stores was along one street. They had white domestic awnings in front, and the country-people hitched their horses to the awning-posts. There was empty dry-goods boxes under the awnings, and loafers roosting on them all day long, whittling them with their Barlow knives; and chawing tobacco, and gaping and yawning and stretching—a mighty ornery lot. They generly had on yellow straw hats most as wide as an umbrella, but didn't wear no coats nor waistcoats; they called one another Bill, and Buck, and Hank, and Joe, and Andy, and talked lazy and drawly, and used considerable many cuss-words. There was as many as one loafer leaning up against every awning-post, and he most always had his hands in his britches pockets, except when he fetched them out to lend a chaw of tobacco or scratch. What a body was hearing amongst them all the time was:

"Gimme a chaw 'v tobacker, Hank."

"Cain't; I hain't got but one chaw left. Ask Bill."

Maybe Bill he gives him a chaw; maybe he lies and says he ain't got none. Some of them kinds of loafers never has a cent in the world, nor a chaw of tobacco of their own. They get all their chawing by borrowing; they say to a fellow, "I wisht you'd len' me a chaw, Jack, I jist this minute give Ben Thompson the last chaw I had"—which is a lie pretty much every time; it don't fool nobody but a stranger; but Jack ain't no stranger, so he says:

"*You* give him a chaw, did you? So did your sister's cat's grandmother. You pay me back the chaws you've awready borry'd off'n me, Lafe Buckner, then I'll loan you one or two ton of it, and won't charge you no back intrust, nuther."

"Well, I *did* pay you back some of it wunst."

"Yes, you did—'bout six chaws. You borry'd store tobacker and paid back nigger-head."

Store tobacco is flat black plug, but these fellows mostly chaws the natural leaf twisted. When they borrow a chaw they don't generly cut it off with a knife, but set the plug in between their teeth, and gnaw with their teeth and tug at the plug with their hands till they get it in two; then sometimes the one that owns the tobacco looks mournful at it when it's handed back, and says, sarcastic:

"I'm on the waw-path, and the price uv coffins is a-gwyne to raise."

"Here, gimme the *chaw,* and you take the *plug.*"

All the streets and lanes was just mud; they warn't nothing else *but* mud—mud as black as tar and nigh about a foot deep in some places, and two or three inches deep in *all* the places. The hogs loafed and grunted around everywheres. You'd see a muddy sow and a litter of pigs come lazying along the street and whollop herself right down in the way, where folks had to walk around her, and she'd stretch out and shut her eyes and wave her ears whilst the pigs was milking her, and look as happy as if she was on salary. And pretty soon you'd hear a loafer sing out, "Hi! *so* boy! sick him, Tige!" and away the sow would go, squealing most horrible, with a dog or two swinging to each ear, and three or four dozen more a-coming; and then you would see all the loafers get up and watch the thing out of sight, and laugh at the fun and look grateful for the noise. Then they'd settle back again till there was a dog-fight. There couldn't anything wake them up all over, and make them happy all over, like a dog-fight—unless it might be putting turpentine on a stray dog and setting fire to him, or tying a tin pan to his tail and see him run himself to death.

On the river-front some of the houses was sticking out over the bank, and they was bowed and bent, and about ready to tumble in. The people had moved out of them. The bank was caved away under one corner of some others, and that corner was hanging over. People lived in them yet, but it was dangersome, because sometimes a strip of land as wide as a house caves in at a time. Sometimes a belt of land a quarter of a mile deep will start in and cave along and cave along till it all caves into the river in one summer. Such a town as that has to be always moving back, and back, and back, because the river's always gnawing at it.

The nearer it got to noon that day the thicker and thicker was the wagons and horses in the streets, and more coming all the time. Families fetched their dinners with them from the country, and eat them in the wagons. There was considerable whisky-drinking going on, and I seen three fights. By and by somebody sings out:

"Here comes old Boggs!—in from the country for his little old monthly drunk; here he comes, boys!"

All the loafers looked glad; I reckoned they was used to having fun out of Boggs. One of them says:

"Wonder who he's a-gwyne to chaw up this time. If he'd a-chawed up all the men he's ben a-gwyne to chaw up in the last twenty year he'd have considerable ruputation now."

Another one says, "I wisht old Boggs 'd threaten me, 'cuz then I'd know I warn't gwyne to die for a thousan' year."

Boggs comes a-tearing along on his horse, whooping and yelling like an Injun, and singing out:

"Cler the track, thar. I'm on the waw-path, and the price uv coffins is a-gwyne to raise."

He was drunk, and weaving about in his saddle; he was over fifty year old, and had a very red face. Everybody yelled at him and laughed at him and sassed him, and he sassed back, and said he'd attend to them and lay them out in their regular turns, but he couldn't wait now because he'd come to town to kill old Colonel Sherburn, and his motto was, "Meat first, and spoon vittles to top off on."

He see me, and rode up and says:

"Whar'd you come f'm, boy? You prepared to die?"

Then he rode on. I was scared, but a man says:

"He don't mean nothing; he's always a-carryin' on like that when he's drunk. He's the best-naturedest old fool in Arkansaw—never hurt nobody, drunk nor sober."

Boggs rode up before the biggest store in town, and bent his head down so he could see under the curtain of the awning and yells:

"Come out here, Sherburn! Come out and meet the man you've swindled. You're the houn' I'm after, and I'm a-gwyne to have you, too!"

And so he went on, calling Sherburn everything he

could lay his tongue to, and the whole street packed with people listening and laughing and going on. By and by a proud-looking man about fifty-five—and he was a heap the best-dressed man in that town, too—steps out of the store, and the crowd drops back on each side to let him come. He says to Boggs, mighty ca'm and slow—he says:

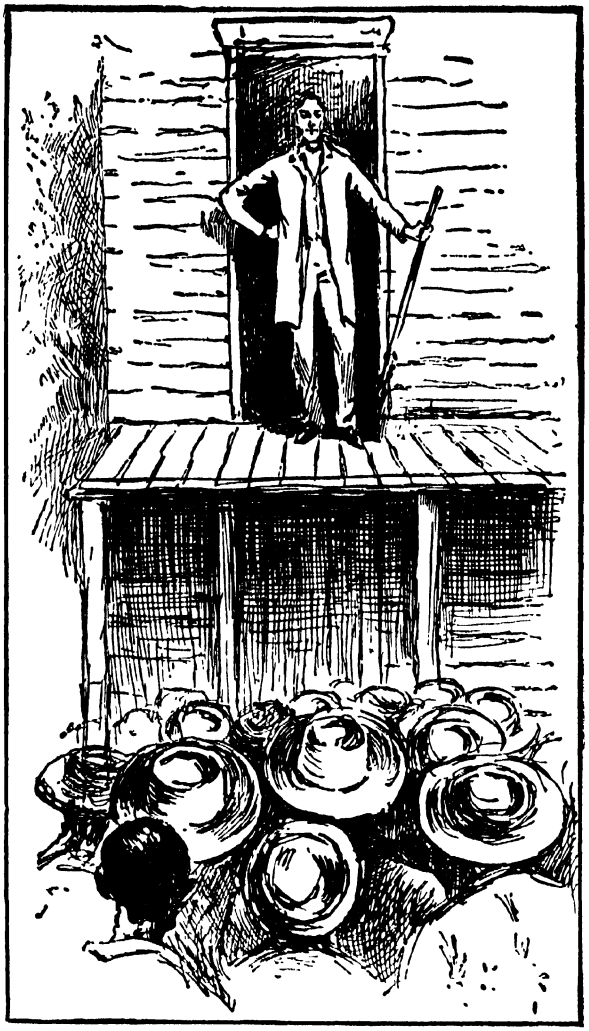
"I'm tired of this, but I'll endure it till one o'clock. Till one o'clock, mind—no longer. If you open your mouth against me only once after that time you can't travel so far but I will find you."

Then he turns and goes in. The crowd looked mighty sober; nobody stirred, and there warn't no more laughing. Boggs rode off blackguarding Sherburn as loud as he could yell, all down the street; and pretty soon back he comes and stops before the store, still keeping it up. Some men crowded around him and tried to get him to shut up, but he wouldn't; they told him it would be one o'clock in about fifteen minutes, and so he *must* go home —he must go right away But it didn't do no good. He cussed away with all his might, and throwed his hat down in the mud and rode over it, and pretty soon away he went a-raging down the street again, with his gray hair a-flying Everybody that could get a chance at him tried their best to coax him off of his horse so they could lock him up and get him sober; but it warn't no use—up the street he would tear again, and give Sherburn another cussing. By and by somebody says:

"Go for his daughter!—quick, go for his daughter; sometimes he'll listen to her. If anybody can persuade him, she can."

So somebody started on a run. I walked down street a ways and stopped. In about five or ten minutes here comes Boggs again, but not on his horse He was a-reeling across the street towards me, bareheaded, with a friend on both sides of him a-holt of his arms and hurrying him along. He was quiet, and looked uneasy; and he warn't hanging back any, but was doing some of the hurrying himself. Somebody sings out:

"Boggs!"



I looked over there to see who said it, and it was that Colonel Sherburn. He was standing perfectly still in the street, and had a pistol raised in his right hand—not aiming it, but holding it out with the barrel tilted up towards the sky. The same second I see a young girl coming on the run, and two men with her. Boggs and the men turned round to see who called him, and when they see the pistol the men jumped to one side, and the pistol-barrel come down slow and steady to a level—both barrels cocked. Boggs throws up both of his hands and says, "O Lord, don't shoot!" Bang! goes the first shot, and he staggers back, clawing at the air—bang! goes the second one, and he tumbles backwards onto the ground, heavy and solid, with his arms spread out. That young girl screamed out and comes rushing, and down she throws herself on her father, crying, and saying, "Oh, he's killed him, he's killed him!" The crowd closed up around them, and shouldered and jammed one another, with their necks stretched, trying to see, and people on the inside trying to shove them back and shouting, "Back, back! give him air, give him air!"

Colonel Sherburn he tossed his pistol onto the ground, and turned around on his heels and walked off.

They took Boggs to a little drug store, the crowd pressing around just the same, and the whole town following, and I rushed and got a good place at the window, where I was close to him and could see in. They laid him on the floor and put one large Bible under his head, and opened another one and spread it on his breast, but they tore open his shirt first, and I seen where one of the bullets went in He made about a dozen long gasps, his breast lifting the Bible up when he drawed in his breath, and letting it down again when he breathed it out—and after that he laid still; he was dead. Then they pulled his daughter away from him, screaming and crying, and took her off She was about sixteen, and very sweet and gentle looking, but awful pale and scared.

Well, pretty soon the whole town was there, squirming and scrouging and pushing and shoving to get at the window and have a look, but people that had the places wouldn't give them up, and folks behind them was saying all the time, "Say, now, you've looked enough, you fellows; 'tain't right and 'tain't fair for you to stay thar all the time, and never give nobody a chance; other folks has their rights as well as you."

There was considerable jawing back, so I slid out, thinking maybe there was going to be trouble. The streets was full, and everybody was excited. Everybody that seen the shooting was telling how it happened, and there was a big crowd packed around each one of these fellows, stretching their necks and listening. One long, lanky man, with long hair and a big white fur stovepipe

"Just then Sherburn steps out onto the roof. . . ."

hat on the back of his head, and a crooked-handled cane, marked out the places on the ground where Boggs stood and where Sherburn stood, and the people following him around from one place to t'other and watching everything he done, and bobbing their heads to show they understood, and stooping a little and resting their hands on their thighs to watch him mark the places on the ground with his cane; and then he stood up straight and stiff where Sherburn had stood, frowning and having his hat-brim down over his eyes, and sung out, "Boggs!" and then fetched his cane down slow to a level, and says "Bang!" staggered backwards, says "Bang!" again, and fell down flat on his back. The people that had seen the thing said he done it perfect; said it was just exactly the way it all happened. Then as much as a dozen people got out their bottles and treated him.

Well, by and by somebody said Sherburn ought to be lynched. In about a minute everybody was saying it; so away they went, mad and yelling, and snatching down every clothes-line they come to to do the hanging with.

They swarmed up towards Sherburn's house, a-whooping and raging like Injuns, and everything had to clear the way or get run over and tromped to mush, and it was awful to see. Children was heeling it ahead of the mob, screaming and trying to get out of the way; and every window along the road was full of women's heads, and there was nigger boys in every tree, and bucks and wenches looking over every fence; and as soon as the mob would get nearly to them they would break and skaddle back out of reach. Lots of the women and girls was crying and taking on, scared most to death.

They swarmed up in front of Sherburn's palings as thick as they could jam together, and you couldn't hear yourself think for the noise. It was a little twenty-foot yard. Some sung out "Tear down the fence! tear down the fence!" Then there was a racket of ripping and tearing and smashing, and down she goes, and the front wall of the crowd begins to roll in like a wave.

Just then Sherburn steps out onto the roof of his little front porch, with a double-barrel gun in his hand, and takes his stand, perfectly ca'm and deliberate, not saying a word. The racket stopped, and the wave sucked back.

Sherburn never said a word—just stood there, looking down. The stillness was awful creepy and uncomfortable. Sherburn run his eye slow along the crowd; and wherever it struck the people tried a little to outgaze him, but they couldn't; they dropped their eyes and looked sneaky. Then pretty soon Sherburn sort of laughed; not the pleasant kind, but the kind that makes you feel like when you are eating bread that's got sand in it.

Then he says, slow and scornful:

"The idea of *you* lynching anybody! It's amusing. The idea of you thinking you had pluck enough to lynch a *man!* Because you're brave enough to tar and feather poor friendless cast-out women that come along here, did that make you think you had grit enough to lay your

hands on a *man?* Why, a *man's* safe in the hands of ten thousand of your kind—as long as it's daytime and you're not behind him.

"Do I know you? I know you clear through. I was born and raised in the South, and I've lived in the North; so I know the average all around. The average man's a coward. In the North he lets anybody walk over him that wants to, and goes home and prays for a humble spirit to bear it. In the South one man, all by himself, has stopped a stage full of men in the daytime, and robbed the lot. Your newspapers call you a brave people so much that you think you *are* braver than any other people—whereas you're just *as* brave, and no braver. Why don't your juries hang murderers? Because they're afraid the man's friends will shoot them in the back, in the dark—and it's just what they *would* do.

"So they always acquit; and then a *man* goes in the night, with a hundred masked cowards at his back, and lynches the rascal Your mistake is, that you didn't bring a man with you; that's one mistake, and the other is that you didn't come in the dark and fetch your masks. You brought *part* of a man—Buck Harkness, there—and if you hadn't had him to start you, you'd 'a' taken it out in blowing.

"You didn't want to come. The average man don't like trouble and danger. *You* don't like trouble and danger. But if only *half* a man—like Buck Harkness, there—shouts 'Lynch him! lynch him!' you're afraid to back down—afraid you'll be found out to be what you are—*cowards*—and so you raise a yell, and hang yourselves onto that half-a-man's coat-tail, and come raging up here, swearing what big things you're going to do. The pitifulest thing out is a mob; that's what an army is—a mob; they don't fight with courage that's born in them, but with courage that's borrowed from their mass, and from their officers. But a mob without any *man* at the head of it is *beneath* pitifulness. Now the thing for *you* to do is to droop your tails and go home and crawl in a hole. If any real lynching's going to be done it will be done in the dark, Southern fashion; and when they come they'll bring their masks, and fetch a *man* along. Now *leave*—and take your half-a-man with you"—tossing his gun up across his left arm and cocking it when he says this.

The crowd washed back sudden, and then broke all apart, and went tearing off every which way, and Buck Harkness he heeled it after them, looking tolerable cheap. I could 'a' stayed if I wanted to, but I didn't want to.

1884

William Dean Howells

1837 • 1920

William Dean Howells was born at Martin's Ferry, Ohio, in 1837. His father was a printer and journalist in several Ohio towns, and the boy learned early to help. He received little formal education, but he had a passion for languages, especially German, and for literature, especially the poems of Heine. From 1856 to 1861 Howells was reporter and editorial writer on the *Ohio State Journal* of Columbus. He wrote in 1860 a campaign biography of Lincoln and was rewarded by an appointment in 1861 as consul at Venice. In the meantime, he had been trying his hand at poetry. "Ah! if I only could write something worthy of the *Atlantic!*" he said to a friend; the ambition was realized in 1860 when three of his poems appeared in that magazine. In the same year occurred his first visit to New England, which is charmingly remembered in *Literary Friends and Acquaintance*

(1900). To the young Howells the journey was a pilgrimage to the Holy Land of American literature. James T. Fields, editor of the *Atlantic,* Lowell, and Holmes received him most cordially. Hawthorne, after talking with Howells on the hilltop back of "The Wayside," wrote on his card as an introduction to Emerson, "I find this young man worthy."

Howells was in Venice from 1861 to 1865. In 1862 he married Eleanor Mead, of Brattleboro, Vermont. The literary fruits of Howells' Italian experience were to appear later in *Venetian Life* (1866), *Modern Italian Poets* (1887), and elsewhere. In 1866 he returned to America, was made assistant editor of the *Atlantic,* and settled in Cambridge. In 1872 he became editor-in-chief and continued in that high office until 1881. During these years, Howells seems to have been especially under the somewhat awe-inspiring mentorship of Lowell, of whom he wrote to Charles Eliot Norton, "His strength is felt throughout the whole puny body of our literature."

Howells moved in 1888 to New York, where he lived —allowing for excursions back to New England and to Europe—the rest of his life. After two months there, he wrote: "I have been trying to catch on to the bigger life of the place. It's immensely interesting . . . and the place is lordly free, with foreign touches of all kinds all through its abounding Americanism: Boston seems of another planet." In 1889 he attended a Socialist meeting. "It was as quiet and orderly as a Sunday School, and people whom the reporters represent as violent conspirators were poorly-dressed, well-behaved listeners to a lecture which dealt patiently with hard facts." It is clear that Howells' residence in New York extended his social horizon. As early as 1886 he had established a connection with Harper and Brothers. From 1900 on he wrote the "Easy Chair" department of *Harper's Monthly,* which brought him increasing influence and prestige. He received honorary degrees from Harvard, Yale, Columbia, and Oxford, and for many years was president of the American Academy of Arts and Letters.

In addition to many volumes of travel, autobiography, literary criticism, and plays, Howells wrote thirty-eight novels. Three of these have generally been regarded as decidedly better than the rest: *A Modern Instance* (1881), *The Rise of Silas Lapham* (1885), and *A Hazard of New Fortunes* (1890). The setting of the first and second is New England, chiefly Boston; of the third, New York. *A Modern Instance* is an intense story —intense, that is, for the mild Howells—of the failure of the marriage of a young journalist of weak moral principle and an inexperienced, temperamental girl from a Maine village. The characters and scenes are drawn with knowledge and skill. *The Rise of Silas Lapham* is the story of the career of a "self-made" Boston businessman who is awkward in society but honorable in business; the author is especially expert in depicting contrasts between the Brahmins and the parvenus of the Boston social world. In *A Hazard of New Fortunes* Howells essayed a larger canvas. A half-dozen or more individuals living in New York, each representing a different social background and attitude, are brought together, somewhat artificially, by means of their connection with a magazine. The climactic event is a streetcar strike, which is treated sympathetically. "No other American novel of the nineteenth century, except possibly *The Gilded Age,*" says Granville Hicks, "can be compared in its scope with *A Hazard of New Fortunes.*" A fourth book of considerable interest— *A Traveler from Altruria* (1894)—may be added, though it is more nearly a tract than a novel. Altruria is Howells' Utopia, and his "traveler," after having been sufficiently pained by what he has seen at a summer hotel in the White Mountains, describes the ideal society in a lecture which shows, still further, Howells' increasing interest in social problems and the influence of his reading of Edward Bellamy and Tolstoy.

Howells has been sharply criticized since his death. The naturalists have objected to his reticence and decency, his suppression of sex and crime. The Freudians (see Ludwig Lewisohn, *Expression in America*) have discovered in his prudishness the "violent sex-consciousness" of the Victorian mind. The Socialist critics (see Granville Hicks, *The Great Tradition*) have condemned him for his failure to come to grips with the problems of capital and labor; Hicks cannot forgive him, particularly, for presenting in Silas Lapham an honorable capitalist. In defense, it may be urged that Howells dealt with the life he knew, and that he should be judged by what he wrote, rather than by what he didn't write. He thought, a little naively perhaps, that "the more smiling aspects of life are the more American." The new realism in fiction, he maintained, should portray the typical, the representative, rather than the exceptional; and he persisted in his belief that the typical, the representative phenomena of American life were compara-

tively decent. From this point of view, his books give a valuable picture. He had a facile pen; he had skill in dialogue and dramatic situation; he was marvelously adept in depicting the domestic commonplaces and the foibles of "society." During the last two decades of the nineteenth century, he was our chief recorder in prose fiction of the domestic life of middle-class America.

A Hazard of New Fortunes

A Hazard of New Fortunes begins with the difficult decision of the Marches (especially difficult for Mrs. March, who is a native Bostonian) to move from Boston to New York, where Mr. March, who in many ways resembles Howells himself, is to edit the magazine **Every Other Week**. Howells' delicate realism is exhibited at its best in the scene in which Mr. and Mrs. March face this turning point in their lives. The later scenes, in which the Marches look for living quarters in New York, show both the niceties of Howells' realism and his expanding social consciousness.

PART FIRST

Chapter I

Now, you think this thing over, March, and let me know the last of next week," said Fulkerson. He got up from the chair which he had been sitting astride, with his face to its back, and tilting toward March on its hind-legs, and came and rapped upon his table with his thin bamboo stick "What you want to do is to get out of the insurance business, anyway. You acknowledge that yourself. You never liked it, and now it makes you sick, in other words, it's killing you. You ain't an insurance man by nature. You're a natural-born literary man; and you've been going against the grain. Now, I offer you a chance to go *with* the grain, I don't say you're going to make your everlasting fortune, but I'll give you a living salary, and if the thing succeeds you'll share in its success We'll all share in its success That's the beauty of it I tell you, March, this is the greatest idea that has been struck since——" Fulkerson stopped and searched his mind for a fit image—"since the creation of man."

He put his leg up over the corner of March's table and gave himself a sharp cut on the thigh, and leaned forward to get the full effect of his words upon his listener

March had his hands clasped together behind his head, and he took one of them down long enough to put his inkstand and mucilage-bottle out of Fulkerson's way. After many years' experiment of a moustache and whiskers, he now wore his grizzled beard full, but cropped close, it gave him a certain grimness, corrected by the gentleness of his eyes.

"Some people don't think much of the creation of man, nowadays Why stop at that? Why not say since the morning stars sang together?"

"No, sir, no, sir! I don't want to claim too much, and I draw the line at the creation of man I'm satisfied with that. But if you want to ring the morning stars into the prospectus, all right, I won't go back on you"

"But I don't understand why you've set your mind on *me*," March said "I haven't had any magazine experience, you know that, and I haven't seriously attempted to do anything in literature since I was married. I gave up smoking and the Muse together. I suppose I could still manage a cigar, but I don't believe I could——"

"Muse worth a cent" Fulkerson took the thought out of his mouth and put it into his own words. "I know. Well, I don't want you to I don't care if you never

33 **morning . . . together** See Job 38 7 'When the morning stars sang together, and all the sons of God shouted for joy."

write a line for the thing, though you needn't reject anything of yours, if it happens to be good, on that account. And I don't want much experience in my editor; rather not have it. You told me, didn't you, that you used to do some newspaper work before you settled down?"

"Yes; I thought my lines were permanently cast in those places once. It was more an accident than anything else that I got into the insurance business. I suppose I secretly hoped that if I made my living by something utterly different, I could come more freshly to literature proper in my leisure."

"I see; and you found the insurance business too many for you. Well, anyway, you've always had a hankering for the inkpots; and the fact that you first gave me the idea of this thing shows that you've done more or less thinking about magazines."

"Yes—less."

"Well, all right. Now don't you be troubled. I know what I want, generally speaking, and in this particular instance I want *you.* I might get a man of more experience, but I should probably get a man of more prejudice and self-conceit along with him, and a man with a following of the literary hangers-on that are sure to get round an editor sooner or later. I want to start fair; and I've found out in the syndicate business all the men that are worth having. But they know me, and they don't know you, and that's where we shall have the pull on them. They won't be able to work the thing. Don't you be anxious about the experience. I've got experience enough of my own to run a dozen editors. What I want is an editor who has taste, and you've got it; and conscience, and you've got it; and horse-sense, and you've got that. And I like you because you're a Western man, and I'm another. I do cotton to a Western man when I find him off East here, holding his own with the best of 'em, and showing 'em that he's just as much civilised as they are. We both know what it is to have our bright home in the setting sun; heigh?"

"I think we Western men who've come East are apt to take ourselves a little too objectively, and to feel ourselves rather more representative than we need," March remarked.

Fulkerson was delighted. "You've hit it! We do! We are!"

"And as for holding my own, I'm not very proud of what I've done in that way; it's been very little to hold. But I know what you mean, Fulkerson, and I've felt the same thing myself; it warmed me toward you when we first met. I can't help suffusing a little to any man when I hear that he was born on the other side of the Alleghanies. It's perfectly stupid. I despise the same thing when I see it in Boston people."

Fulkerson pulled first one of his blond whiskers and then the other, and twisted the end of each into a point, which he left to untwine itself. He fixed March with his little eyes, which had a curious innocence in their cunning, and tapped the desk immediately in front of him. "What I like about you is that you're broad in your sympathies. The first time I saw you, that night on the Quebec boat, I said to myself, 'There's a man I want to know. There's a human being.' I was a little afraid of Mrs. March and the children, but I felt at home with you—thoroughly domesticated—before I passed a word with you; and when you spoke first, and opened up with a joke over that fellow's tableful of light literature and Indian moccasins and birch-bark toy canoes and stereoscopic views, I knew that we were brothers—spiritual twins. I recognised the Western style of fun, and I thought, when you said you were from Boston, that it was some of the same. But I see now that it's being a cold fact, as far as the last fifteen or twenty years count, is just so much gain. You know both sections, and you can make this thing go, from ocean to ocean."

"We might ring that into the prospectus, too," March suggested, with a smile. "You might call the thing *From Sea to Sea.* By the way, what are you going to call it?"

"I haven't decided yet; that's one of the things I wanted to talk with you about. I *had* thought of *The Syndicate;* but it sounds kind of dry, and it don't seem to cover the ground exactly. I should like something that would express the co-operative character of the thing; but I don't know as I can get it."

"Might call it *The Mutual.*"

"They'd think it was an insurance paper. No, that won't do. But Mutual comes pretty near the idea. If we could get something like that, it would pique curiosity;

---

7 lines . . . places. Compare Psalms 16:6: "The lines are fallen unto me in pleasant places; yea, I have a goodly heritage" • 35 cotton to, readily make friends with

and then if we could get paragraphs afloat explaining that the contributors were to be paid according to the sales, it would be a first rate ad."

He bent a wide, anxious, inquiring smile upon March, who suggested lazily, "You might call it *The Round-Robin.* That would express the central idea of irresponsibility. As I understand, everybody is to share the profits and be exempt from the losses. Or, if I'm wrong, and the reverse is true, you might call it *The Army of Martyrs.* Come, that sounds attractive, Fulkerson! Or what do you think of *The Fifth Wheel?* That would forestall the criticism that there are too many literary periodicals already. Or, if you want to put forward the idea of complete independence, you could call it *The Free Lance;* or——"

"Or *The Hog on Ice*—either stand up or fall down, you know," Fulkerson broke in coarsely. "But we'll leave the name of the magazine till we get the editor. I see the poison's beginning to work in you, March; and if I had time, I'd leave the result to time. But I haven't. I've got to know inside of the next week. To come down to business with you, March, I shan't start this thing unless I can get you to take hold of it."

He seemed to expect some acknowledgment, and March said, "Well, that's very nice of you, Fulkerson."

"No, sir; no, sir! I've always liked you, and wanted you, ever since we met that first night. I had this thing inchoately in my mind then, when I was telling you about the newspaper syndicate business—beautiful vision of a lot of literary fellows breaking loose from the bondage of publishers, and playing it alone—"

"You might call it *The Lone Hand;* that would be attractive," March interrupted. "The whole West would know what you meant."

Fulkerson was talking seriously, and March was listening seriously; but they both broke off and laughed. Fulkerson got down off the table, and made some turns about the room. It was growing late; the October sun had left the top of the tall windows; it was still clear day, but it would soon be twilight; they had been talking a long time. Fulkerson came and stood with his little feet wide apart, and bent his little lean, square face on March: "See here! How much do you get out of this thing here, anyway?"

"The insurance business?" March hesitated a moment, and then said, with a certain effort of reserve, "At present about three thousand." He looked up at Fulkerson with a glance, as if he had a mind to enlarge upon the fact, and then dropped his eyes without saying more.

Whether Fulkerson had not thought it so much or not, he said, "Well, I'll give you thirty-five hundred. Come! And your chances in the success."

"We won't count the chances in the success. And I don't believe thirty-five hundred would go any further in New York than three thousand in Boston."

"But you don't live on three thousand here?"

"No; my wife has a little property."

"Well, she won't lose the income if you go to New York. I suppose you pay six or seven hundred a year for your house here. You can get plenty of flats in New York for the same money; and I understand you can get all sorts of provisions for less than you pay now—three or four cents on the pound. Come!"

This was by no means the first talk they had had about the matter; every three or four months during the past two years the syndicate man had dropped in upon March to air the scheme and to get his impressions of it. This had happened so often that it had come to be a sort of joke between them. But now Fulkerson clearly meant business, and March had a struggle to maintain himself in a firm poise of refusal.

"I dare say it wouldn't—or it needn't—cost so very much more, but I don't want to go to New York; or my wife doesn't. It's the same thing."

"A good deal samer," Fulkerson admitted.

March did not quite like his candour, and he went on with dignity. "It's very natural she shouldn't. She has always lived in Boston; she's attached to the place. Now, if you were going to start *The Fifth Wheel* in Boston—"

Fulkerson slowly and sadly shook his head, but decidedly. "Wouldn't do. You might as well say St. Louis or Cincinnati. There's only one city that belongs to the whole country, and that's New York."

"Yes, I know," sighed March; "and Boston belongs to the Bostonians; but they like you to make yourself at home while you're visiting."

"If you'll agree to make phrases like that, right along, and get them into *The Round-Robin* somehow, I'll say four thousand," said Fulkerson. "You think it over now, March. You *talk* it over with Mrs. March; I know you will, anyway; and I might as well make a virtue of ad-

vising you to do it. Tell her I advised you to do it, and you let me know before next Saturday what you've decided."

March shut down the rolling top of his desk in the corner of the room, and walked Fulkerson out before him. It was so late that the last of the chore-women who washed down the marble halls and stairs of the great building had wrung out her floor-cloth and departed, leaving spotless stone and a clean damp smell in the darkening corridors behind her.

"Couldn't offer you such swell quarters in New York, March," Fulkerson said as he went tack-tacking down the steps with his small boot-heels. "But I've got my eye on a little house round in West Eleventh Street, that I'm going to fit up for my bachelor's hall in the third story, and adapt for *The Lone Hand* in the first and second, if this thing goes through; and I guess we'll be pretty comfortable. It's right on the Sand Strip—no malaria of *any* kind."

"I don't know that I'm going to share its salubrity with you yet," March sighed in an obvious travail which gave Fulkerson hopes.

"Oh yes, you are," he coaxed. "Now, you talk it over with your wife. You give her a fair, unprejudiced chance at the thing on its merits, and I'm very much mistaken in Mrs. March if she doesn't tell you to go in and win. We're bound to win!"

They stood on the outside steps of the vast edifice beetling like a granite crag above them, with the stone groups of an allegory of life-insurance fore-shortened in the bas-relief overhead. March absently lifted his eyes to it. It was suddenly strange after so many years' familiarity, and so was the well-known street in its Saturday-evening solitude. He asked himself, with prophetic homesickness, if it were an omen of what was to be. But he only said musingly, "A fortnightly. You know that didn't work in England. *The Fortnightly* is published once a month now."

"It works in France," Fulkerson retorted. "The *Revue des Deux Mondes* is still published twice a month. I guess we can make it work in America—with illustrations."

"Going to have illustrations?"

"My dear boy! What are you giving me? Do I look like the sort of lunatic who would start a thing in the twilight of the nineteenth century *without* illustrations? *Come* off!"

"Ah, that complicates it! I don't know anything about art." March's look of discouragement confessed the hold the scheme had taken upon him.

"I don't want you to!" Fulkerson retorted. "Don't you suppose I shall have an art man?"

"And will they—the artists—work at a reduced rate too, like the writers, with the hopes of a share in the success?"

"Of course they will! And if I want any particular man, for a card, I'll pay him big money besides. But I can get plenty of first-rate sketches on my own terms. You'll see! They'll *pour* in!"

"Look here, Fulkerson," said March, "you'd better call this fortnightly of yours *The Madness of the Half-Moon;* or *Bedlam Broke Loose* wouldn't be bad! Why do you throw away all your hard earnings on such a crazy venture? Don't do it!" The kindness which March had always felt, in spite of his wife's first misgivings and reservations, for the merry, hopeful, slangy, energetic little creature trembled in his voice. They had both formed a friendship for Fulkerson during the week they were together in Quebec. When he was not working the newspapers there, he went about with them over the familiar ground they were showing their children, and was simply grateful for the chance, as well as very entertaining about it all. The children liked him, too; when they got the clew to his intention, and found that he was not quite serious in many of the things he said, they thought he was great fun. They were always glad when their father brought him home on the occasion of Fulkerson's visits to Boston; and Mrs. March, though of a charier hospitality, welcomed Fulkerson with a grateful sense of his admiration for her husband. He had a way of treating March with deference, as an older and abler man, and of qualifying the freedom he used toward every one with an implication that March tolerated it voluntarily, which she thought very sweet, and even refined.

"Ah, *now* you're talking like a man and a brother," said Fulkerson. "Why, March, old man, do you suppose I'd come on here and try to talk you into this thing if I wasn't morally, if I wasn't perfectly, *sure* of success? There isn't any if or and about it. I know my ground, every inch; and I don't stand alone on it," he added,

---

57 **for a card,** that is, to play a winning card

with a significance which did not escape March. "When you've made up your mind, I can give you the proof; but I'm not at liberty now to say anything more. I tell you it's going to be a triumphal march from the word go, with coffee and lemonade for the procession along the whole line. All you've got to do is to fall in." He stretched out his hand to March. "You let me know as soon as you can."

March deferred taking his hand till he could ask, "Where are you going?"

"Parker House. Take the half-past ten for New York to-night."

"I thought I might walk your way." March looked at his watch. "But I shouldn't have time. Good-bye!"

He now let Fulkerson have his hand, and they exchanged a cordial pressure. Fulkerson started off at a quick, light pace. Half a block away he stopped, turned round, and seeing March still standing where he had left him, he called back joyously, "I've got the name!"

"What?"

"Every Other Week."

"It isn't bad."

"Ta-ta!"

Chapter II

All the way up to the South End March prolonged his talk with Fulkerson, and at his door in Nankeen Square he closed the parley with a plump refusal to go to New York on any terms. His daughter Bella was lying in wait for him in the hall, and she threw her arms round his neck with the exuberance of her fourteen years, and with something of the histrionic intention of her sex. He pressed on, with her clinging about him, to the library, and, in the glow of his decision against Fulkerson, kissed his wife, where she sat by the study lamp reading the *Transcript* through her first pair of eyeglasses: it was agreed in the family that she looked distinguished in them, or at any rate cultivated. She took them off to give him a glance of question, and their son Tom looked up from his book for a moment; he was in his last year at the high-school, and was preparing for Harvard.

"I didn't get away from the office till half-past five," March explained to his wife's glance, "and then I walked. I suppose dinner's waiting. I'm sorry, but I won't do it any more."

At table he tried to be gay with Bella, who babbled at him with a voluble pertness, which her brother had often advised her parents to check in her, unless they wanted her to be universally despised.

"Papa," she shouted, at last, "you're not listening!"

As soon as possible his wife told the children they might be excused. Then she asked, "What *is* it, Basil?"

"What is what?" he retorted, with a specious brightness that did not avail.

"What is on your mind?"

"How do you know there's anything?"

"Your kissing me so when you came in, for one thing."

"Don't I always kiss you when I come in?"

"Not now. I suppose it isn't necessary any more. *Cela va sans baiser.*"

"Yes, I guess it's so; we get along without the symbolism now." He stopped, but she knew that he had not finished.

"Is it about your business? Have they done anything more?"

"No; I'm still in the dark. I don't know whether they mean to supplant me, or whether they ever did. But I wasn't thinking about that. Fulkerson has been to see me again."

"Fulkerson?" She brightened at the name, and March smiled too. "Why didn't you bring him to dinner?"

"I wanted to talk with you. Then you *do* like him?"

"What has that got to do with it, Basil?"

"Nothing! nothing! That is, he was boring away about that scheme of his again. He's got it into definite shape at last."

"What shape?"

March outlined it for her, and his wife seized its main features with the intuitive sense of affairs which makes women such good business-men, when they will let it.

"It *sounds* perfectly crazy," she said finally. "But it mayn't be. The only thing I didn't like about Mr. Fulkerson was his always wanting to chance things. But what have you got to do with it?"

"What have I got to do with it?" March toyed with the delay the question gave him; then he said, with a

---

34 **Transcript.** The Boston Evening Transcript, discontinued in 1941, was for many years the favorite newspaper of the more cultivated in Boston • 59 **Cela . . . baiser,** it goes without kissing (on the analogy of "cela va sans dire," it goes without saying)

sort of deprecatory laugh, "It seems that Fulkerson has had his eye on me ever since we met that night on the Quebec boat. I opened up pretty freely to him, as you do to a man you never expect to see again, and when I found he was in that newspaper syndicate business, I told him about my early literary ambitions——"

"You can't say that *I* ever discouraged them, Basil," his wife put in. "I should have been willing, any time, to give up everything for them."

"Well, he says that I first suggested this brilliant idea to him. Perhaps I did; I don't remember. When he told me about his supplying literature to newspapers for simultaneous publication, he says I asked, 'Why not apply the principle of co-operation to a magazine, and run it in the interest of the contributors?' and that set him to thinking, and he thought out his plan of a periodical, which should pay authors and artists a low price outright for their work, and give them a chance of the profits in the way of a percentage. After all, it isn't so very different from the chances an author takes when he publishes a book. And Fulkerson thinks that the novelty of the thing would pique public curiosity, if it didn't arouse public sympathy. And the long and short of it is, Isabel, that he wants me to help edit it."

"To edit it?" His wife caught her breath, and she took a little time to realise the fact, while she stared hard at her husband to make sure he was not joking.

"Yes. He says he owes it all to me; that I invented the idea—the germ—the microbe."

His wife had now realised the fact, at least in a degree that excluded trifling with it. "That is very honourable of Mr. Fulkerson; and if he owes it to you, it was the least he could do." Having recognised her husband's claim to the honour done him, she began to kindle with a sense of the honour itself, and the value of the opportunity. "It's a very high compliment to *you,* Basil; a *very* high compliment. And you could give up this wretched insurance business that you've always hated so, and that's making you so unhappy now that you think they're going to take it from you. Give it up, and take Mr. Fulkerson's offer! It's a perfect interposition, coming just at this time! Why, do it! Mercy!" she suddenly arrested herself, "he wouldn't expect *you* to get along on the possible profits?" Her face expressed the awfulness of the notion.

March smiled reassuringly, and waited to give himself the pleasure of the sensation he meant to give her. "If I'll make striking phrases for it and edit it too, he'll give me four thousand dollars."

He leaned back in his chair, and stuck his hands deep into his pockets, and watched his wife's face, luminous with the emotions that flashed through her mind—doubt, joy, anxiety.

"Basil! You don't mean it! Why, *take* it! Take it *instantly! Oh,* what a thing to happen! *Oh,* what luck! But you deserve it, if you first suggested it. What an escape, what a triumph over all those hateful insurance people! O Basil, I'm afraid he'll change his mind! You ought to have accepted on the spot. You might have *known* I would approve, and you could *so* easily have taken it back if I didn't. Telegraph him now! Run right out with the despatch! Or we can send Tom!"

In these imperatives of Mrs. March's there was always much of the conditional. She meant that he should do what she said, if it were entirely right; and she never meant to be considered as having urged him.

"And suppose his enterprise went wrong?" her husband suggested.

"It won't *go* wrong. Hasn't he made a success of his syndicate?"

"He says so—yes."

"Very well, then, it stands to reason that he'll succeed in this, too. He wouldn't undertake it if he didn't know it would succeed; he must have capital."

"It will take a great deal to get such a thing going; and even if he's got an Angel behind him——"

She caught at the word: "An Angel?"

"It's what the theatrical people call a financial backer. He dropped a hint of something of that kind."

"Of course, he's got an Angel," said his wife, promptly adopting the word. "And even if he hadn't, still, Basil, I should be willing to have you risk it. The risk isn't so great, is it? We shouldn't be ruined if it failed altogether. With our stocks we have two thousand a year, anyway, and we could pinch through on that till you got into some other business afterward, especially if we'd saved something out of your salary while it lasted. Basil, I want you to try it! I know it will give you a new lease of life to have a congenial occupation." March laughed, but his wife persisted. "I'm all for your trying it, Basil; indeed I am. If it's an experiment, you can give it up."

"It can give me up, too."

"Oh, nonsense! I guess there's not much fear of that. Now, I want you to telegraph Mr. Fulkerson, so that he'll find the despatch waiting for him when he gets to New York. I'll take the whole responsibility, Basil, and I'll risk all the consequences."

Chapter III

March's face had sobered more and more as she followed one hopeful burst with another, and now it expressed a positive pain. But he forced a smile, and said: "There's a little condition attached. Where did you suppose it was to be published?"

"Why, in Boston, of course. Where else should it be published?"

She looked at him for the intention of his question so searchingly that he quite gave up the attempt to be gay about it. "No," he said gravely, "it's to be published in New York."

She fell back in her chair. "In New York?" She leaned forward over the table toward him, as if to make sure that she heard aright, and said, with all the keen reproach that he could have expected, "*In New York,* Basil! Oh, how *could* you have let me go on?"

He had a sufficiently rueful face in owning, "I oughtn't to have done it, but I got started wrong. I couldn't help putting the best foot forward at first—or as long as the whole thing was in the air. I didn't know that you would take so much to the general enterprise, or else I should have mentioned the New York condition at once; but of course that puts an end to it."

"Oh, of course," she assented sadly. "We *couldn't* go to New York."

"No, I know that," he said; and with this a perverse desire to tempt her to the impossibility awoke in him, though he was really quite cold about the affair himself now. "Fulkerson thought we could get a nice flat in New York for about what the interest and taxes came to here, and provisions are cheaper. But I should rather not experiment at my time of life. If I could have been caught younger, I might have been inured to New York, but I don't believe I could stand it now."

"How I hate to have you talk that way, Basil! You are young enough to try anything—anywhere; but you know I don't like New York. I don't approve of it. It's so *big,* and *so* hideous! Of course I shouldn't mind that; but I've always lived in Boston, and the children were born and have all their friendships and associations here." She added, with helplessness that discredited her good-sense and did her injustice, "I have just got them both into the Friday afternoon class at Papanti's, and you know how difficult that is."

March could not fail to take advantage of an occasion like this. "Well, that alone ought to settle it. Under the circumstances it would be flying in the face of Providence to leave Boston. The mere fact of a brilliant opening like that offered me on *The Microbe,* and the halcyon future which Fulkerson promises if we'll come to New York, is as dust in the balance against the advantages of the Friday afternoon class."

"Basil," she appealed solemnly, "have I ever interfered with your career?"

"I never had any for you to interfere with, my dear."

"Basil! Haven't I always had faith in you? And don't you suppose that if I thought it would really be for your advancement, I would go to New York or anywhere with you?"

"No, my dear, I don't," he teased. "If it would be for my salvation, yes, perhaps; but not short of that; and I should have to prove by a cloud of witnesses that it would. I don't blame you. I wasn't born in Boston, but I understand how you feel. And really, my dear," he added, without irony, "I never seriously thought of asking you to go to New York. I *was* dazzled by Fulkerson's offer, I'll own that; but his choice of me as editor sapped my confidence in him."

"I don't like to hear you say that, Basil," she entreated.

"Well, of course there were mitigating circumstances. I could see that Fulkerson meant to keep the whip-hand himself, and that was reassuring. And besides, if the Reciprocity Life should happen not to want my services any longer, it wouldn't be quite like giving up a certainty; though, as a matter of business, I let Fulkerson get that impression; I felt rather sneaking to do it. But, if the worst comes to the worst, I can look about for something to do in Boston; and, anyhow, people don't starve on two thousand a year, though it's convenient to

---

49 class at Papanti's, dancing class of select young people • 68 cloud of witnesses. See Hebrews 12:1: "Wherefore seeing we also are compassed about with so great a cloud of witnesses . . ."

have five. The fact is, I'm too old to change so radically. If you don't like my saying that, then *you* are, Isabel, and so are the children. I've no right to take them from the home we've made, and to change the whole course of their lives, unless I can assure them of something, and I can't assure them of anything. Boston is big enough for us, and it's certainly prettier than New York. I always feel a little proud of hailing from Boston; my pleasure in the place mounts the further I get away from it. But I do appreciate it, my dear, I've no more desire to leave it than you have. You may be sure that if you don't want to take the children out of the Friday afternoon class, I don't want to leave my library here, and all the ways I've got set in. We'll keep on. Very likely the company won't supplant me, and if it does, and Watkins gets the place, he'll give me a subordinate position of some sort. Cheer up, Isabel! I have put Satan and his angel, Fulkerson, behind me, and it's all right. Let's go in to the children."

He came round the table to Isabel, where she sat in a growing distraction, and lifted her by the waist from her chair.

She sighed deeply. "Shall we tell the children about it?"

"No. What's the use, now?"

"There wouldn't be any," she assented. When they entered the family room, where the boy and girl sat on either side of the lamp working out the lessons for Monday which they had left over from the day before, she asked, "Children, how would you like to live in New York?"

Bella made haste to get in her word first. "And give up the Friday afternoon class?" she wailed.

Tom growled from his book, without lifting his eyes, "I shouldn't want to go to Columbia. They haven't got any dormitories, and you have to board round anywhere. Are you going to New York?" He now deigned to look up at his father.

"No, Tom. You and Bella have decided me against it. Your perspective shows the affair in its true proportions. I had an offer to go to New York, but I've refused it...."

[After a prolonged consideration, the Marches decide to accept Fulkerson's offer and move to New York. Renouncing her initial objection, Mrs. March insists that she has always wanted her husband to try his hand at literature. The final decision is hastened by the almost certain prospect of March's being transferred to a less desirable position in the insurance company. When the following chapter opens, the Marches have for some time been looking for a house or apartment in New York without much success.]

Chapter IX

Their house-hunting no longer had novelty, but it still had interest; and they varied their day by taking a coupé, by renouncing advertisements, and by reverting to agents. Some of these induced them to consider the idea of furnished houses; and Mrs. March learned tolerance for Fulkerson by accepting permits to visit flats and houses which had none of the qualifications she desired in either, and were as far beyond her means as they were out of the region to which she had geographically restricted herself. They looked at three-thousand and four-thousand dollar apartments, and rejected them for one reason or another which had nothing to do with the rent; the higher the rent was, the more critical they were of the slippery inlaid floors and the arrangement of the richly decorated rooms. They never knew whether they had deceived the janitor or not; as they came in a coupé, they hoped they had.

They drove accidentally through one street that seemed gayer in the perspective than an L road. The fire-escapes, with their light iron balconies and ladders of iron, decorated the lofty house fronts; the roadway and sidewalks and door-steps swarmed with children; women's heads seemed to show at every window. In the basements, over which flights of high stone steps led to the tenements, were green-grocers' shops abounding in cabbages, and provision stores running chiefly to bacon and sausages, and cobblers' and tinners' shops, and the like, in proportion to the small needs of a poor neighbourhood. Ash barrels lined the sidewalks, and garbage heaps filled the gutters; teams of all trades stood idly about; a peddler of cheap fruit urged his cart through the street, and mixed his cry with the joyous screams and shouts of the children and the scolding and gossiping voices of the

---

1 radically suggests the idea of uprooting • 17 put . . . me. Compare Luke 4 8 from the account of the temptation of Jesus: "And Jesus answered and said unto him, Get thee behind me, Satan . . ." • 43 coupé, a four-wheeled closed carriage for two persons inside, with an outside seat for the driver • 60 L road, the elevated railroad, then new in New York and only recently (1941) dismantled

women; the burly blue bulk of a policeman defined itself at the corner; a drunkard zigzagged down the sidewalk toward him. It was not the abode of the extremest poverty, but of a poverty as hopeless as any in the world, transmitting itself from generation to generation, and establishing conditions of permanency to which human life adjusts itself as it does to those of some incurable disease, like leprosy.

The time had been when the Marches would have taken a purely æsthetic view of the facts as they glimpsed them in this street of tenement-houses; when they would have contented themselves with saying that it was as picturesque as a street in Naples or Florence, and with wondering why nobody came to paint it; they would have thought they were sufficiently serious about it in blaming the artists for their failure to appreciate it, and going abroad for the picturesque when they had it here under their noses. It was to the nose that the street made one of its strongest appeals, and Mrs. March pulled up her window of the coupé. "Why does he take us through such a disgusting street?" she demanded, with an exasperation of which her husband divined the origin.

"This driver may be a philanthropist in disguise," he answered, with dreamy irony, "and may want us to think about the people who are not merely carried through this street in a coupé, but have to spend their whole lives in it, winter and summer, with no hopes of driving out of it, except in a hearse. I must say they don't seem to mind it. I haven't seen a jollier crowd anywhere in New York. They seem to have forgotten death a little more completely than any of their fellow-citizens, Isabel. And I wonder what they think of us, making this gorgeous progress through their midst. I suppose they think we're rich, and hate us—if they hate rich people; they don't look as if they hated anybody. Should we be as patient as they are with their discomfort? I don't believe there's steam-heat or an elevator in the whole block. Seven rooms and a bath would be more than the largest and genteelest family would know what to do with. They wouldn't know what to do with the bath anyway."

His monologue seemed to interest his wife apart from the satirical point it had for themselves. "You ought to get Mr. Fulkerson to let you work some of these New York sights up for *Every Other Week,* Basil; you could do them very nicely."

"Yes; I've thought of that. But don't let's leave the personal ground. Doesn't it make you feel rather small and otherwise unworthy when you see the kind of street these fellow-beings of yours live in, and then think how particular you are about locality and the number of bell-pulls? I don't see even ratchets and speaking-tubes at these doors." He craned his neck out of the window for a better look, and the children of discomfort cheered him, out of sheer good feeling and high spirits. "I didn't know I was so popular. Perhaps it's a recognition of my humane sentiments."

"Oh, it's very easy to have humane sentiments, and to satirise ourselves for wanting eight rooms and a bath in a good neighbourhood, when we see how these wretched creatures live," said his wife. "But if we shared all we have with them, and then settled down among them, what good would it do?"

"Not the least in the world. It might help us for the moment, but it wouldn't keep the wolf from their doors for a week; and then they would go on just as before, only they wouldn't be on such good terms with the wolf. The only way for them is to keep up an unbroken intimacy with the wolf; then they can manage him somehow. I don't know how, and I'm afraid I don't want to. Wouldn't you like to have this fellow drive us round among the halls of pride somewhere for a little while? Fifth Avenue or Madison, up-town?"

"No; we've no time to waste. I've got a place near Third Avenue, on a nice cross street, and I want him to take us there." It proved that she had several addresses near together, and it seemed best to dismiss their coupé and do the rest of their afternoon's work on foot. It came to nothing; she was not humbled in the least by what she had seen in the tenement-house street; she yielded no point in her ideal of a flat, and the flats persistently refused to lend themselves to it. She lost all patience with them.

"Oh, I don't say the flats are in the right of it," said her husband, when she denounced their stupid inadequacy to the purposes of a Christian home. "But I'm not so sure that we are either. I've been thinking about that home business ever since my sensibilities were dragged —in a coupé—through that tenement-house street. Of course no child born and brought up in such a place as that could have any conception of home. But that's because those poor people can't give character to their habi-

---

50 number of bell-pulls, one for each flight up

tations. They have to take what they can get. But people like us—that is, of our means—do give character to the average flat. It's made to meet their tastes, or their supposed tastes; and so it's made for social show, not for family life at all. Think of a baby in a flat! It's a contradiction in terms; the flat is the negation of motherhood. The flat means society life; that is, the pretence of social life. It's made to give artificial people a society basis on a little money—too much money, of course, for what they get. So the cost of the building is put into marble halls and idiotic decoration of all kinds. I don't object to the conveniences, but none of these flats have a living-room. They have drawing-rooms to foster social pretence, and they have dining-rooms and bedrooms; but they have no room where the family can all come together and feel the sweetness of being a family. The bedrooms are black-holes mostly, with a sinful waste of space in each. If it were not for the marble halls, and the decorations, and the foolishly expensive finish, the houses could be built round a court, and the flats could be shaped something like a Pompeiian house, with small sleeping closets—only lit from the outside—and the rest of the floor thrown into two or three large cheerful halls, where all the family life could go on, and society could be transacted unpretentiously. Why, those tenements are better and humaner than those flats! There the whole family lives in the kitchen, and has its consciousness of being; but the flat abolishes the family consciousness. It's confinement without coziness; it's cluttered without being snug. You couldn't keep a self-respecting cat in a flat; you couldn't go down cellar to get cider. No: the Anglo-Saxon home, as we know it in the Anglo-Saxon house, is simply impossible in the Franco-American flat, not because it's humble, but because it's false."

"Well, then," said Mrs. March, "let's look at houses."

He had been denouncing the flat in the abstract, and he had not expected this concrete result. But he said, "We will look at houses, then."

Chapter X

Nothing mystifies a man more than a woman's aberrations from some point at which he supposes her fixed as a star. In these unfurnished houses, without steam or elevator, March followed his wife about with patient wonder. She rather liked the worst of them best; but she made him go down into the cellars and look at the furnaces; she exacted from him a rigid inquest of the plumbing. She followed him into one of the cellars by the fitful glare of successively lighted matches, and they enjoyed a moment in which the anomaly of their presence there on that errand, so remote from all the facts of their long-established life in Boston, realised itself for them.

"Think how easily we might have been murdered and nobody been any the wiser!" she said when they were comfortably out-doors again.

"Yes, or made way with ourselves in an access of emotional insanity, supposed to have been induced by unavailing flat-hunting," he suggested.

She fell in with the notion. "I'm beginning to *feel* crazy. But I don't want *you* to lose your head, Basil. And I don't want you to sentimentalise any of the things you see in New York. I think you were disposed to do it in that street we drove through. I don't believe there's any *real* suffering—not real *suffering*—among those people; that is, it would be suffering from our point of view, but they've been used to it all their lives, and they don't feel their discomfort so much."

"Of course I understand that, and I don't propose to sentimentalise them. I think when people get used to a bad state of things they had better stick to it; in fact they don't usually like a better state so well, and I shall keep that firmly in mind."

She laughed with him, and they walked along the L-bestridden avenue, exhilarated by their escape from murder and suicide in that cellar, toward the nearest cross-town track, which they meant to take home to their hotel. "Now to-night we will go to the theatre," she said, "and get this whole house business out of our minds, and be perfectly fresh for a new start in the morning." Suddenly she clutched his arm. "Why, did you *see* that man?" and she signed with her head toward a decently dressed person who walked beside them, next to the gutter, stooping over as if to examine it, and half halting at times.

"No. What?"

"Why, I saw him pick up a dirty bit of cracker from the pavement and cram it into his mouth and eat it down as if he were famished. And look! he's actually hunting for more in those garbage heaps!"

This was what the decent-looking man with the hard hands and broken nails of a workman was doing—like a hungry dog. They kept up with him, in the fascination

of the sight, to the next corner, where he turned down the side street still searching the gutter.

They walked on a few paces. Then March said, "I must go after him," and he left his wife standing.

"Are you in want—hungry?" he asked the man.

The man said he could not speak English, monsieur. March asked his question in French.

The man shrugged a pitiful, desperate shrug, "Mais, monsieur——"

March put a coin in his hand, and then suddenly the man's face twisted up; he caught the hand of this almsgiver in both of his, and clung to it. "Monsieur! monsieur!" he gasped, and the tears rained down his face.

His benefactor pulled himself away, shocked and ashamed, as one is by such a chance, and got back to his wife, and the man lapsed back into the mystery of misery out of which he had emerged.

March felt it laid upon him to console his wife for what had happened. "Of course we might live here for years and not see another case like that; and of course there are twenty places where he could have gone for help if he had known where to find them."

"Ah, but it's the possibility of his needing the help so badly as that!" she answered. "That's what I can't bear, and I shall not come to a place where such things are possible, and we may as well stop our house-hunting here at once."

"Yes? And what part of Christendom will you live in? Such things are possible everywhere in our conditions."

"Then we must change the conditions——"

"Oh no; we must go to the theatre and forget them. We can stop at Brentano's for our tickets as we pass through Union Square."

"I am not going to the theatre, Basil. I am going home to Boston to-night. You can stay and find a flat."

He convinced her of the absurdity of her position and even of its selfishness; but she said that her mind was quite made up irrespective of what had happened; that she had been away from the children long enough; that she ought to be at home to finish up the work of leaving it. The word brought a sigh. "Ah, I don't know why we should see nothing but sad and ugly things now. When we were young——"

"Younger," he put in. "We're still young."

"That's what we pretend, but we know better. But I was thinking how pretty and pleasant things used to be turning up all the time on our travels in the old days. Why, when we were in New York here on our wedding journey the place didn't seem half so dirty as it does now, and none of these dismal things happened."

"It was a good deal dirtier," he answered; "and I fancy worse in every way—hungrier, raggeder, more wretchedly housed. But that wasn't the period of life for us to notice it. Don't you remember, when we started to Niagara the last time, how everybody seemed middle-aged and commonplace; and when we got there there were no evident brides; nothing but elderly married people?"

"At least they weren't starving," she rebelled.

"No, you don't starve in parlour cars and first-class hotels; but if you step out of them you run your chance of seeing those who do, if you're getting on pretty well in the forties. If it's the unhappy who see unhappiness, think what misery must be revealed to people who pass their lives in the really squalid tenement-house streets—I don't mean picturesque avenues like that we passed through."

"But we are *not* unhappy," she protested, bringing the talk back to the personal base again, as women must to get any good out of talk. "We're really no unhappier than we were when we were young."

"We're more serious."

"Well, I hate it; and I wish you *wouldn't* be so serious, if that's what it brings us to."

"I will be trivial from this on," said March. "Shall we go to the *Hole in the Ground* to-night?"

"I am going to Boston."

"It's much the same thing. How do you like that for triviality? It's a little blasphemous, I'll allow."

"It's very silly," she said.

At the hotel they found a letter from the agent who had sent them the permit to see Mrs. Grosvenor Green's apartment. He wrote that she had heard they were pleased with her apartment, and that she thought she could make the terms to suit. She had taken her passage to Europe, and was very anxious to let the flat before she sailed. She would call that evening at seven.

"Mrs. Grosvenor Green!" said Mrs. March. "Which of the ten thousand flats is it, Basil?"

---

8 Mais, monsieur, Why, sir • 34 Brentano's, a bookstore and ticket agency • 50 our wedding journey. Howells began the story of the Marches in Their Wedding Journey

"The gimcrackery," he answered. "In the Xenophon, you know."

"Well, she may save herself the trouble. I shall not see her. Or yes—I must. I *couldn't* go away without seeing what sort of creature could have planned that fly-away flat. She must be a perfect—"

"Parachute," March suggested.

"No: anybody so light as that couldn't come down."

"Well, toy balloon."

"Toy balloon will do for the present," Mrs. March admitted. "But I feel that naught but herself can be her parallel for volatility."

When Mrs. Grosvenor Green's card came up they both descended to the hotel parlour, which March said looked like the saloon of a Moorish day-boat; not that he knew of any such craft, but the decorations were so Saracenic and the architecture so Hudson Riverish. They found there on the grand central divan a large lady whose vast smoothness, placidity, and plumpness set at defiance all their preconceptions of Mrs. Grosvenor Green, so that Mrs. March distinctly paused with her card in her hand before venturing even tentatively to address her. Then she was astonished at the low calm voice in which Mrs. Green acknowledged herself, and slowly proceeded to apologise for calling. It was not quite true that she had taken her passage for Europe, but she hoped soon to do so, and she confessed that in the meantime she was anxious to let her flat. She was a little worn out with the care of house-keeping—Mrs. March breathed, "Oh yes!" in the sigh with which ladies recognise one another's martyrdom—and Mr. Green had business abroad, and she was going to pursue her art studies in Paris; she drew in Mr. Ilcomb's class now, but the instruction was so much better in Paris; and as the Superintendent seemed to think the price was the only objection, she had ventured to call.

"Then we didn't deceive him in the least," thought Mrs. March, while she answered sweetly: "No; we were only afraid that it would be too small for our family. We require a good many rooms." She could not forego the opportunity of saying, "My husband is coming to New York to take charge of a literary periodical, and he will have to have a room to write in," which made Mrs. Green bow to March, and made March look sheepish. "But we did think the apartment very charming (It *was* architecturally charming," she protested to her conscience), "and we should have been so glad if we could have got into it." She followed this with some account of their house-hunting, amid soft murmurs of sympathy from Mrs. Green, who said that she had been through all that, and that if she could have shown her apartment to them she felt sure that she could have explained it so that they would have seen its capabilities better. Mrs. March assented to this, and Mrs. Green added that if they found nothing exactly suitable she would be glad to have them look at it again; and then Mrs. March said that she was going back to Boston herself, but she was leaving Mr. March to continue the search, and she had no doubt he would be only *too* glad to see the apartment by daylight. "But if you take it, Basil," she warned him, when they were alone, "I shall simply renounce you. I wouldn't live in that junk shop if you gave it to me. But who would have thought she was that kind of looking person? Though of course I might have known if I had stopped to think once. It's because the place doesn't express her at all that it's so unlike her. It couldn't be like anybody, or anything that flies in the air, or creeps upon the earth, or swims in the waters under the earth. I wonder where in the world she's from; she's no New-Yorker; even we can see that; and she's not quite a country person either; she seems like a person from some large town, where she's been an æsthetic authority. And she can't find good enough art instruction in New York, and has to go to Paris for it! Well, it's pathetic, after all, Basil. I can't help feeling sorry for a person who mistakes herself to that extent."

"I can't help feeling sorry for the husband of a person who mistakes herself to that extent. What is Mr. Grosvenor Green going to do in Paris while she's working her way into the Salon?"

"Well, you keep away from her apartment, Basil; that's all I've got to say to *you*. And yet I do like some things about her."

"I like everything about her but her apartment," said March.

"I like her going to be out of the country," said his wife. "We shouldn't be overlooked. And the place was

---

6 fly-away, flighty, eccentric • 16 Saracenic, pertaining to the Moslems • 67 flies . . . earth. Mrs. March's language is reminiscent of Genesis 1:26: "And God said, Let us make man in our image . . . and let them have dominion over the fish of the sea, and over the fowl of the air, and over the cattle, and over all the earth, and over every creeping thing . . ."

prettily shaped, you can't deny it. And there was an elevator and steam-heat. And the location *is* very convenient. And there was a hall-boy to bring up cards. The halls and stairs were kept very clean and nice. But it wouldn't do. I could put you a folding bed in the room where you wrote, and we could even have one in the parlour—"

"Behind a portière? I couldn't stand any more portières!"

"And we could squeeze the two girls into one room, or perhaps only bring Margaret, and put out the whole of the wash. Basil!" she almost shrieked, "it isn't to be thought of!"

He retorted, "I'm not thinking of it, my dear."

Fulkerson came in just before they started for Mrs. March's train, to find out what had become of them, he said, and to see whether they had got anything to live in yet.

"Not a thing," she said. "And I'm just going back to Boston, and leaving Mr. March here to do anything he pleases about it. He has *carte blanche*."

"But freedom brings responsibility, you know, Fulkerson, and it's the same as if I'd no choice. I'm staying behind because I'm left, not because I expect to do anything."

"Is that so?" asked Fulkerson. "Well, we must see what can be done. I supposed you would be all settled by this time, or I should have humped myself to find you something. None of those places I gave you amount to anything?"

"As much as forty thousand others we've looked at," said Mrs. March. "Yes, one of them, *does* amount to something. It comes so near being what we want that I've given Mr. March particular instructions not to go near it."

She told him about Mrs. Grosvenor Green and her flat, and at the end he said—

"Well, well, we must look out for that. I'll keep an eye on him, Mrs. March, and see that he doesn't do anything rash, and I won't leave him till he's found just the right thing. It exists, of course; it must in a city of eighteen hundred thousand people, and the only question is where to find it. You leave him to me, Mrs. March; I'll watch out for him."

Fulkerson showed some signs of going to the station when he found they were not driving, but she bade him a peremptory good-bye at the hotel door.

"He's very nice, Basil, and his way with you is perfectly charming. It's very sweet to see how really fond of you he is. But I didn't want him stringing along up to Forty-second Street with us, and spoiling our last moments together."

At Third Avenue they took the Elevated, for which she confessed an infatuation. She declared it the most ideal way of getting about in the world, and was not ashamed when he reminded her of how she used to say that nothing under the sun could induce her to travel on it. She now said that the night transit was even more interesting than the day, and that the fleeting intimacy you formed with people in second and third floor interiors, while all the usual street life went on underneath, had a domestic intensity mixed with a perfect repose that was the last effect of good society with all its security and exclusiveness. He said it was better than the theatre, of which it reminded him, to see those people through their windows: a family party of work-folk at a late tea, some of the men in their shirt sleeves; a woman sewing by a lamp; a mother laying her child in its cradle; a man with his head fallen on his hands upon a table; a girl and her lover leaning over the window-sill together. What suggestion! what drama! what infinite interest! At the Forty-second Street station they stopped a minute on the bridge that crosses the track to the branch road for the Central Depôt, and looked up and down the long stretch of the elevated to north and south. The track that found and lost itself a thousand times in the flare and tremor of the innumerable lights; the moony sheen of the electrics mixing with the reddish points and blots of gas far and near; the architectural shapes of houses and churches and towers, rescued by the obscurity from all that was ignoble in them, and the coming and going of the trains marking the stations with vivider or fainter plumes of flame-shot steam—formed an incomparable perspective. They often talked afterward of the superb spectacle, which in a city full of painters nightly works its unrecorded miracles; and they were just to the Arachne roof spun in iron over the cross street on which they ran to the depôt; but for the present they were mostly inarticulate before it. They had another moment of rich silence when they paused

---

10 two girls, servants • 87 Arachne, according to Ovid's Metamorphoses, a maiden turned into a spider by Minerva for competing with her in the arts of weaving and embroidery

in the gallery that leads from the elevated station to the waiting-rooms in the Central Depôt and looked down upon the great night trains lying on the tracks dim under the rain of gas-lights that starred without dispersing the vast darkness of the place. What forces, what fates, slept in these bulks which would soon be hurling themselves north and east and west through the night! Now they waited there like fabled monsters of Arab story ready for the magician's touch, tractable, reckless, will-less—organised lifelessness full of a strange semblance of life.

The Marches admired the impressive sight with a thrill of patriotic pride in the fact that the whole world perhaps could not afford just the like. Then they hurried down to the ticket offices, and he got her a lower berth in the Boston sleeper, and went with her to the car. They made the most of the fact that her berth was in the very middle of the car; and she promised to write as soon as she reached home. She promised also that having seen the limitations of New York in respect to flats, she would not be hard on him if he took something not quite ideal. Only he must remember that it was not to be above Twentieth Street nor below Washington Square; it must not be higher than the third floor; it must have an elevator, steam-heat, hall-boys, and a pleasant janitor. These were essentials; if he could not get them, then they must do without. But he must get them. . . .

[The Marches soon find themselves, strangely enough, established in Mrs. Grosvenor Green's apartment, which Mrs. March takes a real pleasure in adapting to the needs of her family; and March embarks upon his new career as editor of Every Other Week. The magazine is the device by which Howells brings together in New York an interesting assortment of people. Fulkerson, a "go-getter" from the West, is the promoter and business manager of the magazine. Dryfoos, recently made rich by the discovery of natural gas on his Indiana farm, is the "angel" or financial backer; he is presented as a crude and unscrupulous capitalist. The Dryfoos household includes the infirm and ineffectual Mrs. Dryfoos, who has been unhappy ever since she left the old homestead in the West; a son, Conrad, who is bookkeeper for the magazine but who is more interested (much to his father's disgust) in religious and social work; two daughters, Mela and Christine; and a chaperone, Mrs. Mandel, who has been employed to educate the young ladies in the social graces. Others connected more or less directly with the magazine are: Lindau, an immigrant Socialist from Germany, who lost an arm in the American Civil War; Colonel Woodburn, a "professional" Southerner, and his daughter; Kendricks, a dilettante writer; Beaton, a dilettante painter who has shown Christine Dryfoos an equivocal attention; and Margaret Vance, of aristocratic family, who shares Conrad Dryfoos' interest in social reform.

The selection which follows is an account of a stag dinner at the Dryfoos house, the affair having been engineered by the genial Fulkerson to bring together in friendly fashion the people connected with the magazine. The intrusion of the question of capital and labor, however, mars the harmony of the occasion.]

PART FOURTH

Chapter VI

So far as the Dryfoos family was concerned, the dinner might as well have been given at Frescobaldi's rooms. None of the ladies appeared. Mrs. Dryfoos was glad to escape to her own chamber, where she sat before an autumnal fire, shaking her head and talking to herself at times, with the foreboding of evil which old women like her make part of their religion. The girls stood just out of sight at the head of the stairs, and disputed which guest it was at each arrival; Mrs. Mandel had gone to her room to write letters, after beseeching them not to stand there. When Kendricks came, Christine gave Mela a little pinch, equivalent to a little mocking shriek; for, on the ground of his long talk with Mela at Mrs. Horn's, in the absence of any other admirer, they based a superstition of his interest in her; when Beaton came, Mela returned the pinch, but awkwardly, so that it hurt, and then Christine involuntarily struck her.

Frescobaldi's men were in possession everywhere: they had turned the cook out of her kitchen and the waitress out of her pantry; the reluctant Irishman at the door was supplemented by a vivid Italian, who spoke French with the guests, and said, "*Bien, Monsieur,*" and "*Toute suite,*" and "*Merci!*" to all, as he took their hats and coats, and effused a hospitality that needed no language but the gleam of his eyes and teeth and the play of his eloquent hands. From his professional dress-coat,

---

28 **Frescobaldi**, a caterer employed for the occasion

lustrous with the grease spotted on it at former dinners and parties, they passed to the frocks of the elder and younger Dryfoos in the drawing-room, which assumed informality for the affair, but did not put their wearers wholly at their ease. The father's coat was of black broadcloth, and he wore it unbuttoned; the skirts were long, and the sleeves came down to his knuckles; he shook hands with his guests, and the same dryness seemed to be in his palm and throat, as he huskily asked each to take a chair. Conrad's coat was of modern texture and cut, and was buttoned about him as if it concealed a bad conscience within its lapels; he met March with his entreating smile, and he seemed no more capable of coping with the situation than his father. They both waited for Fulkerson, who went about and did his best to keep life in the party during the half-hour that passed before they sat down at dinner. Beaton stood gloomily aloof, as if waiting to be approached on the right basis before yielding an inch of his ground; Colonel Woodburn, awaiting the moment when he could sally out on his hobby, kept himself intrenched within the dignity of a gentleman, and examined askance the figure of old Lindau as he stared about the room, with his fine head up, and his empty sleeve dangling over his wrist. March felt obliged to him for wearing a new coat in the midst of that hostile luxury, and he was glad to see Dryfoos make up to him and begin to talk with him, as if he wished to show him particular respect, though it might have been because he was less afraid of him than of the others. He heard Lindau saying, "Boat, the name is Choarman?" and Dryfoos beginning to explain his Pennsylvania Dutch origin, and he suffered himself, with a sigh of relief, to fall into talk with Kendricks, who was always pleasant; he was willing to talk about something besides himself, and had no opinions that he was not ready to hold in abeyance for the time being out of kindness to others. In that group of impassioned individualities, March felt him a refuge and comfort—with his harmless dilettante intention of some day writing a novel, and his belief that he was meantime collecting material for it.

Fulkerson, while breaking the ice for the whole company, was mainly engaged in keeping Colonel Woodburn thawed out. He took Kendricks away from March and presented him to the Colonel as a person who, like himself, was looking into social conditions; he put one hand on Kendricks' shoulder, and one on the colonel's, and made some flattering joke, apparently at the expense of the young fellow, and then left them. March heard Kendricks protest in vain, and the colonel say gravely: "I do not wonder, sir, that these things interest you. They constitute a problem which society must solve or which will dissolve society," and he knew from that formula, which the colonel had once used with him, that he was laying out a road for the exhibition of the hobby's paces later.

Fulkerson came back to March, who had turned toward Conrad Dryfoos, and said, "If we don't get this thing going pretty soon, it'll be the death of me," and just then Frescobaldi's butler came in and announced to Dryfoos that dinner was served. The old man looked toward Fulkerson with a troubled glance, as if he did not know what to do; he made a gesture to touch Lindau's elbow. Fulkerson called out, "*Here's* Colonel Woodburn, Mr. Dryfoos," as if Dryfoos were looking for him; and he set the example of what he was to do by taking Lindau's arm himself. "Mr. Lindau is going to sit at my end of the table, alongside of March. Stand not upon the order of your going, gentlemen, but fall in at once." He contrived to get Dryfoos and the colonel before him, and he let March follow with Kendricks. Conrad came last with Beaton, who had been turning over the music at the piano, and chafing inwardly at the whole affair. At the table Colonel Woodburn was placed on Dryfoos's right, and March on his left. March sat on Fulkerson's right, with Lindau next him; and the young men occupied the other seats.

"Put you next to March, Mr. Lindau," said Fulkerson, "so you can begin to put Apollinaris in his champagne-glass at the right moment; you know his little weakness of old; sorry to say it's grown on him."

March laughed with kindly acquiescence in Fulkerson's wish to start the gaiety, and Lindau patted him on the shoulder. "I know hiss veakness. If he liges a class of vine, it iss begause his loaf ingludes efen hiss enemy, as Shakespeare galled it."

"Ah, but Shakespeare couldn't have been thinking of champagne," said Kendricks.

---

30 **Boat . . . Choarman,** but . . . German • 68 **Stand . . . once.** Compare Macbeth, Act III, sc. iv, ll. 118-119 • 79 **Apollinaris,** an effervescing alkaline mineral water • 85 **loaf . . . it,** a double allusion to the Bible ("Love your enemies," Matthew 5:44) and to Shakespeare ("Oh God, that men should put an enemy in their mouths to steal away their brains!" Othello, Act II, sc. iii, l. 291)

"I suppose, sir," Colonel Woodburn interposed with lofty courtesy, "champagne could hardly have been known in his day."

"I suppose not, colonel," returned the younger man deferentially. "He seemed to think that sack and sugar might be a fault; but he didn't mention champagne."

"Perhaps he felt there was no question about that," suggested Beaton, who then felt that he had not done himself justice in the sally.

"I wonder just when champagne did come in," said March.

"I know when it ought to come in," said Fulkerson. "Before the soup!"

They all laughed, and gave themselves the air of drinking champagne out of tumblers every day, as men like to do. Dryfoos listened uneasily; he did not quite understand the allusions, though he knew what Shakespeare was, well enough; Conrad's face expressed a gentle deprecation of joking on such a subject, but he said nothing.

The talk ran on briskly through the dinner. The young men tossed the ball back and forth; they made some wild shots, but they kept it going, and they laughed when they were hit. The wine loosed Colonel Woodburn's tongue; he became very companionable with the young fellows; with the feeling that a literary dinner ought to have a didactic scope, he praised Scott and Addison as the only authors fit to form the minds of gentlemen.

Kendricks agreed with him, but wished to add the name of Flaubert as a master of style. "Style, you know," he added, "is the man."

"Very true, sir; you are quite right, sir," the colonel assented; he wondered who Flaubert was.

Beaton praised Baudelaire and Maupassant; he said these were the masters. He recited some lurid verses from Baudelaire; Lindau pronounced them a disgrace to human nature, and gave a passage from Victor Hugo on Louis Napoleon, with his heavy German accent, and then he quoted Schiller. "Ach, boat that iss peaudifool! Not zo?" he demanded of March.

"Yes, beautiful; but, of course, you know I think there's nobody like Heine!"

Lindau threw back his great old head and laughed, showing a want of teeth under his moustache. He put his hand on March's back. "This poy—he wass a poy den—wass so gracy to pekin reading Heine that he gommence with the tictionary bevore he knows any crammar, and ve bick it out vort by vort togeder."

"He was a pretty cay poy in those days, heigh, Lindau?" asked Fulkerson, burlesquing the old man's accent, with an impudent wink that made Lindau himself laugh. "Back in the dark ages, I mean, there in Indianapolis. Just how long ago did you old codgers meet there, anyway?" Fulkerson saw the restiveness in Dryfoos's eye at the purely literary course the talk had taken; he had intended it to lead up that way to business, to *Every Other Week;* but he saw that it was leaving Dryfoos too far out, and he wished to get it on the personal ground, where everybody is at home.

"Ledt me zee," mused Lindau. "Wass it in fifty-nine or zixty, Passil? Idt wass a year or dwo pefore the war proke oudt, anyway."

"Those were exciting times," said Dryfoos, making his first entry into the general talk. "I went down to Indianapolis with the first company from our place, and I saw the red-shirts pouring in everywhere. They had a song—

> "Oh, never mind the weather, but git over
> double trouble,
> For we're bound for the land of Canaan."

The fellows locked arms and went singin' it up and down four or five abreast in the moonlight; crowded everybody else off the sidewalk."

"I rememper, I rememper," said Lindau, nodding his head slowly up and down. "A coodt many off them nefer gome pack from that landt of Ganaan, Mr. Dryfoos?"

"You're right, Mr. Lindau. But I reckon it was worth it—the country we've got now. Here, young man!" He caught the arm of the waiter who was going round with the champagne bottle. "Fill up Mr. Lindau's glass, there. I want to drink the health of those old times with him. Here's to your empty sleeve, Mr. Lindau. God bless it! No offence to *you,* Colonel Woodburn," said Dryfoos, turning to him before he drank.

---

5 **sack . . . fault,** from Falstaff's speech to Hal, I Henry IV, Act II, sc. iv, l. 517: "If sack and sugar be a fault, God help the wicked" • 31 **Style . . . man.** "The style is the man himself" ("Le style est l'homme même") occurs in a Discourse by the Comte de Buffon written in 1750 • 43 **nobody like Heine.** Howells gives to March one of his own early preferences

"Not at all, sir, not at all," said the colonel. "I will drink with you, if you will permit me."

"We'll all drink—standing," cried Fulkerson. "Help March to get up, somebody! Fill high the bowl with Samian Apollinaris for Coonrod! Now, then, hurrah for Lindau!"

They cheered, and hammered on the table with the butts of their knife-handles. Lindau remained seated. The tears came into his eyes; he said, "I thank you, chendlemen," and hiccoughed.

"I'd 'a' went into the war myself," said Dryfoos, "but I was raisin' a family of young children, and I didn't see how I could leave my farm. But I helped to fill up the quota at every call, and when the volunteering stopped I went round with the subscription paper myself; and we offered as good bounties as any in the State. My substitute was killed in one of the last skirmishes—in fact, after Lee's surrender—and I've took care of his family, more or less, ever since."

"By the way, March," said Fulkerson, "what sort of an idea would it be to have a good war-story—might be a serial—in the magazine? The war has never fully panned out in fiction yet. It was used a good deal just after it was over, and then it was dropped. I think it's time to take it up again. I believe it would be a card."

It was running in March's mind that Dryfoos had an old rankling shame in his heart for not having gone into the war, and that he had often made that explanation of his course without having ever been satisfied with it. He felt sorry for him; the fact seemed pathetic; it suggested a dormant nobleness in the man.

Beaton was saying to Fulkerson, "You might get a series of sketches by substitutes; the substitutes haven't been much heard from in the war literature. How would 'The Autobiography of a Substitute' do? You might follow him up to the moment he was killed in the other man's place, and inquire whether he had any right to the feelings of a hero when he was only hired in the place of one. Might call it 'The Career of a Deputy Hero.'"

"I fancy," said March, "that there was a great deal of mixed motive in the men who went into the war as well as in those who kept out of it. We canonised all that died or suffered in it, but some of them must have been self-seeking and low-minded, like men in other vocations." He found himself saying this in Dryfoos's behalf; the old man looked at him gratefully at first, he thought, and then suspiciously.

Lindau turned his head toward him and said: "You are righdt, Passil; you are righdt. I haf zeen on the fieldt of pattle the voarst eggsipitions of human paseness —chelousy, fanity, ecodistic bridte. I haf zeen men in the face off death itself gofferened by motifes as low as— as pusiness motifes."

"Well," said Fulkerson, "it would be a grand thing for *Every Other Week* if we could get some of those ideas worked up into a series. It would make a lot of talk."

Colonel Woodburn ignored him in saying, "I think, Major Lindau——"

"High brifate; prefet gorporal," the old man interrupted, in rejection of the title.

Kendricks laughed and said, with a glance of appreciation at Lindau, "Brevet corporal is good."

Colonel Woodburn frowned a little, and passed over the joke. "I think Mr. Lindau is right. Such exhibitions were common to both sides, though if you gentlemen will pardon me for saying so, I think they were less frequent on ours. We were fighting more immediately for existence; we were fewer than you were, and we knew it; we felt more intensely that if each were not for all, then none was for any."

The colonel's words made their impression. Dryfoos said with authority, "That is so."

"Colonel Woodburn," Fulkerson called out, "if you'll work up those ideas into a short paper—say three thousand words—I'll engage to make March take it."

The colonel went on without replying: "But Mr. Lindau is right in characterising some of the motives that led men to the cannon's mouth as no higher than business motives, and his comparison is the most forcible that he could have used. I was very much struck by it."

The hobby was out, the colonel was in the saddle with so firm a seat that no effort sufficed to dislodge him. The dinner went on from course to course with barbaric profusion, and from time to time Fulkerson tried to bring the talk back to *Every Other Week*. But perhaps because that was only the ostensible and not the real object of

---

4 **Fill . . . Samian.** Compare "The Isles of Greece" in Byron's **Don Juan**, Canto III, I 61 "Fill high the bowl with Samian wine" • 64 **Brevet,** by honorary promotion

the dinner, which was to bring a number of men together under Dryfoos's roof, and make them the witnesses of his splendour, make them feel the power of his wealth, Fulkerson's attempts failed. The colonel showed how commercialism was the poison at the heart of our national life; how we began as a simple, agricultural people, who had fled to these shores with the instinct, divinely implanted, of building a State such as the sun never shone upon before; how we had conquered the wilderness and the savage; how we had flung off, in our struggle with the mother-country, the trammels of tradition and precedent, and had settled down, a free nation, to the practice of the arts of peace; how the spirit of commercialism had stolen insidiously upon us, and the infernal impulse of competition had embroiled us in a perpetual warfare of interests, developing the worst passions of our nature, and teaching us to trick and betray and destroy one another in the strife for money, till now that impulse had exhausted itself, and we found competition gone and the whole economic problem in the hands of monopolies—the Standard Oil Company, the Sugar Trust, the Rubber Trust, and what not. And now what was the next thing? Affairs could not remain as they were; it was impossible; and what was the next thing?

The company listened for the main part silently. Dryfoos tried to grasp the idea of commercialism as the colonel seemed to hold it; he conceived of it as something like the dry-goods business on a vast scale, and he knew he had never been in that. He did not like to hear competition called infernal; he had always supposed it was something sacred; but he approved of what Colonel Woodburn said of the Standard Oil Company; it was all true; the Standard Oil Company had squeezed Dryfoos once, and made him sell it a lot of oil-wells by putting down the price of oil so low in that region that he lost money on every barrel he pumped.

All the rest listened silently, except Lindau; at every point the colonel made against the present condition of things he said more and more fiercely, "You are righdt, you are righdt." His eyes glowed, his hand played with his knife-hilt. When the colonel demanded, "And what is the next thing?" he threw himself forward, and repeated, "Yes, sir! What is the next thing?"

"Natural gas, by thunder!" shouted Fulkerson.

One of the waiters had profited by Lindau's posture to lean over him and put down in the middle of the table a structure in white sugar. It expressed Frescobaldi's conception of a derrick, and a touch of nature had been added in the flame of brandy, which burned luridly up from a small pit in the centre of the base, and represented the gas in combustion as it issued from the ground. Fulkerson burst into a roar of laughter with the words that recognised Frescobaldi's personal tribute to Dryfoos. Everybody rose and peered over at the thing, while he explained the work of sinking a gas-well, as he had already explained it to Frescobaldi. In the midst of his lecture he caught sight of the caterer himself, where he stood in the pantry doorway, smiling with an artist's anxiety for the effect of his masterpiece.

"Come in, come in, Frescobaldi! We want to congratulate you," Fulkerson called to him. "Here, gentlemen! Here's Frescobaldi's health."

They all drank; and Frescobaldi, smiling brilliantly and rubbing his hands as he bowed right and left, permitted himself to say to Dryfoos, "You are please; no? You like?"

"First-rate, first-rate!" said the old man; but when the Italian had bowed himself out and his guests had sunk into their seats again, he said dryly to Fulkerson, "I reckon they didn't have to torpedo that well, or the derrick wouldn't look quite so nice and clean."

"Yes," Fulkerson answered, "and that ain't quite the style—that little wiggly-waggly blue flame—that the gas acts when you touch off a good vein of it. This might do for weak-gas;" and he went on to explain: "They call it weak-gas when they tap it two or three hundred feet down; and anybody can sink a well in his backyard and get enough gas to light and heat his house. I remember one fellow that had it blazing up from a pipe through a flower-bed, just like a jet of water from a fountain. My, my, my! You fel—you gentlemen—ought to go out and see that country, all of you. Wish we *could* torpedo this well, Mr. Dryfoos, and let 'em see how it works! Mind that one you torpedoed for me? You know, when they sink a well," he went on to the company, "they can't always most generally sometimes tell whether they're goin' to get gas or oil or salt-water. Why, when they first began to bore for salt-water out on the Kanawha, back about the beginning of the century, they used to get gas now and then, and then they considered it a

---

89 Kanawha, a river which flows through West Virginia into the Ohio River

failure; they called a gas-well a blower, and give it up in disgust; the time wasn't ripe for gas yet. Now they bore away sometimes till they get half-way to China, and don't seem to strike anything worth speaking of. Then they put a dynamite torpedo down in the well and explode it. They have a little bar of iron that they call a Go-devil, and they just drop it down on the business end of the torpedo, and then stand from under, if *you* please! You hear a noise, and in about a half a minute you begin to *see* one, and it begins to rain oil and mud and salt-water and rocks and pitchforks and adoptive citizens; and when it clears up the derrick's painted—got a coat on that'll wear in any climate. That's what our honoured host meant. Generally get some visiting lady, when there's one round, to drop the Go-devil. But that day we had to put up with Conrad here. They offered to let me drop it, but I declined. I told 'em I hadn't much practice with Go-devils in the newspaper syndicate business, and I wasn't very well myself, anyway. Astonishing," Fulkerson continued, with the air of relieving his explanation by an anecdote, "how reckless they get using dynamite when they're torpedoing wells. We stopped at one place where a fellow was handling the cartridges pretty freely, and Mr. Dryfoos happened to caution him a little, and that ass came up with one of 'em in his hand, and began to pound it on the buggy-wheel to show us how safe it was. I turned green, I was so scared; but Mr. Dryfoos kept his colour, and kind of coaxed the fellow till he quit. You could see he was the fool kind, that if you tried to stop him he'd keep on hammering that cartridge, just to show that it wouldn't explode, till he blew you into Kingdom Come. When we got him to go away, Mr. Dryfoos drove up to his foreman. 'Pay Sheney off, and discharge him on the spot,' says he. 'He's too safe a man to have round; he knows too much about dynamite.' I never saw anybody so cool."

Dryfoos modestly dropped his head under Fulkerson's flattery and, without lifting it, turned his eyes toward Colonel Woodburn. "I had all sorts of men to deal with in developing my property out there, but I had very little trouble with them, generally speaking."

"Ah, ah! you foundt the labouring-man reasonable—dractable—tocile?" Lindau put in.

"Yes, generally speaking," Dryfoos answered. "They mostly knew which side of their bread was buttered. I did have one little difficulty at one time. It happened to be when Mr. Fulkerson was out there. Some of the men tried to form a union——"

"No, no!" cried Fulkerson. "Let *me* tell that! I know you wouldn't do yourself justice, Mr. Dryfoos, and I want 'em to know how a strike can be managed, if you take it in time. You see, some of those fellows got a notion that there ought to be a union among the working-men to keep up wages, and dictate to the employers, and Mr. Dryfoos's foreman was the ringleader in the business. They understood pretty well that as soon as he found it out that foreman would walk the plank, and so they watched out till they thought they had Mr. Dryfoos just where they wanted him—everything on the keen jump, and every man worth his weight in diamonds—and then they come to him, and told him to sign a promise to keep that foreman to the end of the season, or till he was through with the work on the Dryfoos and Hendry Addition, under penalty of having them all knock off. Mr. Dryfoos smelt a mice, but he couldn't tell where the mice was; he saw that they did have him, and he signed, of course. There wasn't anything really against the fellow, anyway; he was a first-rate man, and he did his duty every time; only he'd got some of those ideas into his head, and they turned it. Mr. Dryfoos signed, and then he laid low."

March saw Lindau listening with a mounting intensity, and heard him murmur in German, "Shameful! shameful!"

Fulkerson went on: "Well, it wasn't long before they began to show their hand, but Mr. Dryfoos kept dark. He agreed to everything; there never was such an obliging capitalist before; there wasn't a thing they asked of him that he didn't do, with the greatest of pleasure, and all went merry as a marriage-bell till one morning a whole gang of fresh men marched into the Dryfoos and Hendry Addition, under the escort of a dozen Pinkertons with repeating rifles at half-cock, and about fifty fellows found themselves out of a job. You never saw such a mad set."

"Pretty neat," said Kendricks, who looked at the affair purely from an æsthetic point of view. "Such a *coup* as that would tell tremendously in a play."

"That was vile treason," said Lindau in German to

---

81 **merry . . . marriage-bell,** from Byron's **Childe Harold,** Canto III, l. 188: "And all went merry as a marriage bell" • 83 **Pinkertons,** detectives employed by an agency founded by Allan Pinkerton in Chicago in 1850

March. "He's an infamous traitor! I cannot stay here. I must go."

He struggled to rise, while March held him by the coat, and implored him under his voice, "For Heaven's sake, don't, Lindau! You owe it to yourself not to make a scene, if you come here." Something in it all affected him comically; he could not help laughing.

The others were discussing the matter, and seemed not to have noticed Lindau, who controlled himself and sighed: "You are right. I must have patience."

Beaton was saying to Dryfoos, "Pity your Pinkertons couldn't have given them a few shots before they left."

"No, that wasn't necessary," said Dryfoos. "I succeeded in breaking up the union. I entered into an agreement with other parties not to employ any man who would not swear that he was non-union. If they had attempted violence, of course they could have been shot. But there was no fear of that. Those fellows can always be depended upon to cut each other's throats in the long-run."

"But sometimes," said Colonel Woodburn, who had been watching throughout for a chance to mount his hobby again, "they make a good deal of trouble first. How was it in the great railroad strike of '77?"

"Well, I guess there was a little trouble that time, colonel," said Fulkerson. "But the men that undertake to override the laws and paralyse the industries of a country like this generally get left in the end."

"Yes, sir, generally; and up to a certain point, always. But it's the exceptional that is apt to happen, as well as the unexpected. And a little reflection will convince any gentleman here that there is always a danger of the exceptional in your system. The fact is, those fellows have the game in their own hands already. A strike of the whole body of the Brotherhood of Engineers alone would starve out the entire Atlantic seaboard in a week; labour insurrection could make head at a dozen given points, and your government couldn't move a man over the roads without the help of the engineers."

"That is so," said Kendricks, struck by the dramatic character of the conjecture. He imagined a fiction dealing with the situation as something already accomplished.

"Why don't some fellow do the *Battle of Dorking* act with that thing?" said Fulkerson. "It would be a card."

"Exactly what I was thinking, Mr. Fulkerson," said Kendricks.

Fulkerson laughed. "Telepathy—clear case of mind-transference. Better see March, here, about it. *I'd* like to have it in *Every Other Week*. It would make talk."

"Perhaps it might set your people to thinking as well as talking," said the colonel.

"Well, sir," said Dryfoos, setting his lips so tightly together that his imperial stuck straight outward, "if I had my way, there wouldn't *be* any Brotherhood of Engineers, nor any other kind of labour union in the whole country."

"What!" shouted Lindau. "You would sobbress the unionss of the voarking-men?"

"Yes, I would."

"And what would you do with the unionss of the gabidalists—the drosts—and gompines, and boolss? Would you dake the righdt from one and gif it to the odder?"

"Yes, sir, I would," said Dryfoos, with a wicked look at him.

Lindau was about to roar back at him with some furious protest, but March put his hand on his shoulder imploringly, and Lindau turned to him to say in German, "But it is infamous—infamous! What kind of man is this? Who is he? He has the heart of a tyrant."

Colonel Woodburn cut in. "You couldn't do that, Mr. Dryfoos, under your system. And if you attempted it, with your conspiracy laws, and that kind of thing, it might bring the climax sooner than you expected. Your commercialised society has built its house on the sands. It will have to go. But I should be sorry if it went before its time."

"You are righdt, sir," said Lindau. "It would be a bity. I hobe it will last till it feelss its rottenness, like Herodt. Boat, when its hour gomes, when it trops to bieces with the veight off its own gorrubtion—what then?"

"It's not to be supposed that a system of things like this can drop to pieces of its own accord, like the old Republic of Venice," said the colonel. "But when the last vestige of commercial society is gone, then we can

24 **strike of '77.** Railroad riots in 1877 throughout the East, and especially in Pennsylvania, resulted from the reduction of wages • 43 **Battle of Dorking,** by Sir G. T. Chesney (1833-1895), appeared in Blackwood's Magazine in 1871. Designed to point up a lack of military preparation, the book gave an imaginary account of the invasion and ultimate conquest of England by a foreign power • 53 **Imperial,** a pointed beard on a man's chin and lower lip

begin to build anew; and we shall build upon the central idea, not of the false liberty you now worship, but of responsibility—responsibility. The enlightened, the moneyed, the cultivated class shall be responsible to the central authority—emperor, duke, president; the name does not matter—for the national expense and the national defence, and it shall be responsible to the working-classes of all kinds for homes and lands and implements, and the opportunity to labour at all times. The working-classes shall be responsible to the leisure class for the support of its dignity in peace, and shall be subject to its command in war. The rich shall warrant the poor against planless production and the ruin that now follows, against danger from without and famine from within, and the poor——"

"No, no, no!" shouted Lindau. "The *State* shall do that—the whole beople. The men who voark shall have and shall eat; and the men that will not voark, they shall sdarfe. But no man need sdarfe. He will go to the State, and the State will see that he haf voark, and that he haf foodt. All the roadts and mills and mines and landts shall be the beople's and be ron *by* the beople *for* the beople. There shall be no rich and no boor, and there shall not be war any more, for what bower wouldt dare to addack a beople bound togeder in a broderhood like that?"

"Lion and lamb act," said Fulkerson, not well knowing, after so much champagne, what words he was using.

No one noticed him, and Colonel Woodburn said coldly to Lindau, "You are talking paternalism, sir."

"And *you* are dalking *feutalism*!" retorted the old man.

The Colonel did not reply. A silence ensued, which no one broke till Fulkerson said: "Well, now, look here. If either one of these millenniums was brought about, by force of arms, or otherwise, what would become of *Every Other Week?* Who would want March for an editor? How would Beaton sell his pictures? Who would print Mr. Kendricks' little society verses and short stories? What would become of Conrad and his good works?" Those named grinned in support of Fulkerson's diversion, but Lindau and the colonel did not speak; Dryfoos looked down at his plate, frowning. A waiter came round with cigars, and Fulkerson took one. "Ah," he said, as he bit off the end, and leaned over to the emblematic masterpiece, where the brandy was still feebly flickering, "I wonder if there's enough natural gas left to light my cigar." His effort put the flame out and knocked the derrick over; it broke in fragments on the table. Fulkerson cackled over the ruin: "I wonder if all Moffitt will look that way after labour and capital have fought it out together. I hope this ain't ominous of anything personal, Dryfoos?"

"I'll take the risk of it," said the old man harshly.

He rose mechanically, and Fulkerson said to Frescobaldi's man, "You can bring us the coffee in the library."

The talk did not recover itself there. Lindau would not sit down; he refused coffee, and dismissed himself with a haughty bow to the company; Colonel Woodburn shook hands elaborately all round, when he had smoked his cigar; the others followed him. It seemed to March that his own good-night from Dryfoos was dry and cold. . . .

[A streetcar strike furnishes the dramatic climax of Howells' story; such a strike had occurred in New York a few months before the publication of the book. In the chapters that follow, the strike is presented in such a way as to show the reactions of various characters to it: the hostility of the elder Dryfoos; the sympathy of Lindau, young Dryfoos, and Margaret Vance; the indifference of Fulkerson; the detachment of March. Whatever Howells' own attitude may have been, the emphasis given to the subject shows the author's growing awareness of the problem.]

PART FIFTH

Chapter III

The strike made a good deal of talk in the office of *Every Other Week*—that is, it made Fulkerson talk a good deal. He congratulated himself that he was not personally incommoded by it, like some of the fellows who lived up-town, and had not everything under one roof, as it were. He enjoyed the excitement of it, and he kept the office-boy running out to buy the extras which the newsmen came crying through the street almost every hour with a lamentable, unintelligible noise. He read not only the latest intelligence of the strike, but the editorial comments on it, which praised the firm at-

titude of both parties, and the admirable measures taken by the police to preserve order. Fulkerson enjoyed the interviews with the police captains and the leaders of the strike; he equally enjoyed the attempts of the reporters to interview the road managers, which were so graphically detailed, and with such a fine feeling for the right use of scareheads as to have almost the value of direct expressions from them, though it seemed that they had resolutely refused to speak. He said, at second-hand from the papers, that if the men behaved themselves and respected the rights of property, they would have public sympathy with them every time; but just as soon as they began to interfere with the roads' right to manage their own affairs in their own way, they must be put down with an iron hand; the phrase "iron hand" did Fulkerson almost as much good as if it had never been used before. News began to come of fighting between the police and the strikers when the roads tried to move their cars with men imported from Philadelphia, and then Fulkerson rejoiced at the splendid courage of the police. At the same time he believed what the strikers said, and that the trouble was not made by them, but by gangs of roughs acting without their approval. In this juncture he was relieved by the arrival of the State Board of Arbitration, which took up its quarters, with a great many scareheads, at one of the principal hotels, and invited the roads and the strikers to lay the matter in dispute before them; he said that now we should see the working of the greatest piece of social machinery in modern times. But it appeared to work only in the alacrity of the strikers to submit their grievance. The roads were as one road in declaring that there was nothing to arbitrate, and that they were merely asserting their right to manage their own affairs in their own way. One of the presidents was reported to have told a member of the Board, who personally summoned him, to get out and to go about his business. Then, to Fulkerson's extreme disappointment, the august tribunal, acting on behalf of the sovereign people in the interest of peace, declared itself powerless and got out, and would, no doubt, have gone about its business if it had had any. Fulkerson did not know what to say, perhaps because the extras did not; but March laughed at this result.

"It's a good deal like the military manœuvre of the King of France and his forty thousand men. I suppose somebody told him at the top of the hill that there was nothing to arbitrate, and to get out and go about his business, and that was the reason he marched down after he had marched up with all that ceremony. What amuses me is to find that in an affair of this kind the roads have rights and the strikers have rights, but the public has no rights at all. The roads and the strikers are allowed to fight out a private war in our midst—as thoroughly and precisely a private war as any we despise the Middle Ages for having tolerated—as any street war in Florence or Verona—and to fight it out at our pains and expense, and we stand by like sheep, and wait till we get tired. It's a funny attitude for a city of fifteen hundred thousand inhabitants."

"What would you do?" asked Fulkerson, a good deal daunted by this view of the case.

"Do? Nothing. Hasn't the State Board of Arbitration declared itself powerless? We have no hold upon the strikers; and we're so used to being snubbed and disobliged by common carriers that we have forgotten our hold on the roads, and always allow them to manage their own affairs in their own way, quite as if we had nothing to do with them, and they owed us no services in return for their privileges."

"That's a good deal so," said Fulkerson, disordering his hair. "Well, it's nuts for the colonel nowadays. He says if he was boss of this town he would seize the roads on behalf of the people, and man 'em with policemen, and run 'em till the managers had come to terms with the strikers; and he'd do that every time there was a strike."

"Doesn't that rather savour of the paternalism he condemned in Lindau?" asked March.

"I don't know. It savours of horse-sense."

"You are pretty far gone, Fulkerson. I thought you were the most engaged man I ever saw; but I guess you're more father-in-lawed. And before you're married too."

"Well, the colonel's a glorious old fellow, March. I wish he had the power to do that thing, just for the fun of looking on while he waltzed in. He's on the

---

7 scareheads, sensational headlines • 45 military . . . men, an allusion to the nursery rhyme: "The King of France with forty thousand men/ Marched up the hill and then marched down again" • 82 engaged man. Fulkerson has become engaged to marry Colonel Woodburn's daughter

keen jump from morning till night, and he's up late and early to see the row. I'm afraid he'll get shot at some of the fights; he sees them all; *I* can't get any show at them: haven't seen a brickbat shied or a club swung yet. Have you?"

"No, I find I can philosophise the situation about as well from the papers, and that's what I really want to do, I suppose. Besides I'm solemnly pledged by Mrs. March not to go near any sort of crowd, under penalty of having her bring the children and go with me. Her theory is that we must all die together; the children haven't been at school since the strike began. There's no precaution that Mrs. March hasn't used. She watches me whenever I go out, and sees that I start straight for this office."

Fulkerson laughed and said: "Well, it's probably the only thing that's saved your life. Have you seen anything of Beaton lately?"

"No. You don't mean to say *he's* killed!"

"Not if he knows it. But I don't know——. What do you say, March? What's the reason you couldn't get us up a paper on the strike?"

"I knew it would fetch round to *Every Other Week,* somehow."

"No, but seriously. There'll be plenty of newspaper accounts. But you could treat it in the historical spirit —like something that happened several centuries ago; De Foe's Plague of London style. Heigh? What made me think of it was Beaton. If I could get hold of him, you two could go round together and take down its æsthetic aspects. It's a big thing, March, this strike is. I tell you it's imposing to have a private war, as you say, fought out this way, in the heart of New York, and New York not minding it a bit. See? Might take that view of it. With your descriptions and Beaton's sketches—well, it would just be the greatest card! Come! What do you say?"

"Will you undertake to make it right with Mrs. March if I'm killed and she and the children are not killed with me?"

"Well, it would be difficult. I wonder how it would do to get Kendricks to do the literary part?"

"I've no doubt he'd jump at the chance. I've yet to see the form of literature that Kendricks wouldn't lay down his life for."

"Say!" March perceived that Fulkerson was about to vent another inspiration, and smiled patiently. "Look here! What's the reason we couldn't get one of the strikers to write it up for us?"

"Might have a symposium of strikers and presidents," March suggested.

"No; I'm in earnest. They say some of those fellows —especially the foreigners—are educated men. I know one fellow—a Bohemian—that used to edit a Bohemian newspaper here. He could write it out in his kind of Dutch, and we could get Lindau to translate it."

"I guess not," said March dryly.

"Why not? He'd do it for the cause, wouldn't he? Suppose you put it up on him, the next time you see him."

"I don't see Lindau any more," said March. He added, "I guess he's renounced me along with Mr. Dryfoos's money."

"Pshaw! You don't mean he hasn't been round since?"

"He came for a while, but he's left off coming now. I don't feel particularly gay about it," March said, with some resentment of Fulkerson's grin. "He's left me in debt to him for lessons to the children."

Fulkerson laughed out. "Well, he *is* the greatest old fool! Who'd 'a' thought he'd 'a' been in earnest with those 'brincibles' of his? But I suppose there have to be just such cranks; it takes all kinds to make a world."

"There has to be *one* such crank, it seems," March partially assented. "One's enough for me."

"I reckon this thing is nuts for Lindau, too," said Fulkerson. "Why, it must act like a schooner of beer on him all the while, to see 'gabidal' embarrassed like it is by this strike. It must make old Lindau feel like he was back behind those barricades at Berlin. Well, he's a splendid old fellow; pity he drinks, as I remarked once before."

When March left the office he did not go home so directly as he came, perhaps because Mrs. March's eye was not on him. He was very curious about some aspects of the strike, whose importance, as a great social convulsion, he felt people did not recognise; and with his temperance in everything, he found its negative ex-

28 **De Foe's . . . London.** Defoe's Journal of the Plague Year (1722) was a fictitious narrative which seemed so authentic that it was later quoted as authoritative • 79 **barricades at Berlin,** a reference to the Revolution of 1848 in Prussia

pressions as significant as its more violent phases. He had promised his wife solemnly that he would keep away from these, and he had a natural inclination to keep his promise; he had no wish to be that peaceful spectator who always gets shot when there is any firing on a mob. He interested himself in the apparent indifference of the mighty city, which kept on about its business as tranquilly as if the private war being fought out in its midst were a vague rumour of Indian troubles on the frontier; and he realised how there might once have been a street feud of forty years in Florence without interfering materially with the industry and prosperity of the city. On Broadway there was a silence where a jangle and clatter of horse-car bells and hoofs had been, but it was not very noticeable; and on the avenues, roofed by the elevated roads, this silence of the surface tracks was not noticeable at all in the roar of the trains overhead. Some of the cross-town cars were beginning to run again; with a policeman on the rear of each; on the Third Avenue line, operated by non-union men, who had not struck, there were two policemen beside the driver of every car, and two beside the conductor, to protect them from the strikers. But there were no strikers in sight, and on Second Avenue they stood quietly about in groups on the corners. While March watched them at a safe distance, a car laden with policemen came down the track, but none of the strikers offered to molest it. In their simple Sunday best, March thought them very quiet, decent-looking people, and he could well believe that they had nothing to do with the riotous outbreaks in other parts of the city. He could hardly believe that there were any such outbreaks; he began more and more to think them mere newspaper exaggerations in the absence of any disturbance, or the disposition to it, that he could see. He walked on to the East River: Avenues A, B, and C presented the same quiet aspect as Second Avenue; groups of men stood on the corners, and now and then a police-laden car was brought unmolested down the tracks before them; they looked at it and talked together, and some laughed, but there was no trouble.

March got a cross-town car, and came back to the West side. A policeman, looking very sleepy and tired, lounged on the platform.

"I suppose you'll be glad when this cruel war is over," March suggested, as he got in.

The officer gave him a surly glance and made him no answer.

His behaviour, from a man born to the joking give and take of our life, impressed March. It gave him a fine sense of the ferocity which he had read of the French troops putting on toward the populace just before the *coup d'état;* he began to feel like populace; but he struggled with himself and regained his character of philosophical observer. In this character he remained in the car and let it carry him by the corner where he ought to have got out and gone home, and let it keep on with him to one of the furthermost tracks westward, where so much of the fighting was reported to have taken place. But everything on the way was as quiet as on the East side.

Suddenly the car stopped with so quick a turn of the brake that he was half thrown from his seat, and the policeman jumped down from the platform and ran forward.

Chapter IV

Dryfoos sat at breakfast that morning with Mrs. Mandel as usual to pour out his coffee. Conrad had already gone down-town; the two girls lay abed much later than their father breakfasted, and their mother had gradually grown too feeble to come down till lunch. Suddenly Christine appeared at the door. Her face was white to the edges of her lips, and her eyes were blazing.

"Look here, father! Have you been saying anything to Mr. Beaton?"

The old man looked up at her across his coffee-cup through his frowning brows. "No."

Mrs. Mandel dropped her eyes, and the spoon shook in her hand.

"Then what's the reason he don't come here any more?" demanded the girl; and her glance darted from her father to Mrs. Mandel. "Oh, it's *you,* is it? I'd like to know who told *you* to meddle in other people's business?"

"*I* did," said Dryfoos savagely. "*I* told her to ask him what he wanted here, and he said he didn't want

---

53 coup d'état, the sudden stroke of policy by which Louis Napoleon became emperor of France (1851-1852)

anything, and he stopped coming. That's all. I did it myself."

"Oh, you *did,* did you?" said the girl, scarcely less insolently than she had spoken to Mrs. Mandel. "I should like to know what you did it for? I'd like to know what made you think I wasn't able to take care of myself. I just knew somebody had been meddling, but I didn't suppose it was *you.* I can manage my own affairs in my own way, if you please, and I'll thank you after this to leave me to myself in what don't concern you."

"Don't concern me? You impudent jade!" her father began.

Christine advanced from the doorway toward the table; she had her hands closed upon what seemed trinkets, some of which glittered and dangled from them. She said, "Will you go to him and tell him that this meddlesome minx here had no business to say anything about me to him, and you take it all back?"

"No!" shouted the old man. "And if——"

"That's all I want of *you!*" the girl shouted in her turn. "Here are your presents." With both hands she flung the jewels—pins and rings and earrings and bracelets—among the breakfast dishes, from which some of them sprang to the floor. She stood a moment to pull the intaglio ring from the finger where Beaton put it a year ago, and dashed that at her father's plate. Then she whirled out of the room, and they heard her running upstairs.

The old man made a start toward her, but he fell back in his chair before she was gone, and with a fierce, grinding movement of his jaws, controlled himself. "Take—take those things up," he gasped to Mrs. Mandel. He seemed unable to rise again from his chair, but when she asked him if he were unwell, he said no, with an air of offence, and got quickly to his feet. He mechanically picked up the intaglio ring from the table while he stood there, and put it on his little finger; his hand was not much bigger than Christine's.

"How do you suppose she found it out?" he asked, after a moment.

"She seems to have merely suspected it," said Mrs. Mandel, in a tremor, and with the fright in her eyes which Christine's violence had brought there.

"Well, it don't make any difference. She had to know, somehow, and now she knows." He started toward the door of the library, as if to go into the hall, where his hat and coat always hung.

"Mr. Dryfoos," palpitated Mrs. Mandel, "I can't remain here, after the language your daughter has used to me— I can't let you leave me—I—I'm afraid of her——"

"Lock yourself up, then," said the old man rudely. He added, from the hall before he went out, "I reckon she'll quiet down now."

He took the elevated road. The strike seemed a very far-off thing, though the paper he bought to look up the stock market was full of noisy typography about yesterday's troubles on the surface lines. Among the millions in Wall Street there was some joking and some swearing, but not much thinking about the six thousand men who had taken such chances in their attempt to better their condition. Dryfoos heard nothing of the strike in the lobby of the Stock Exchange, where he spent two or three hours watching a favourite stock of his go up and go down under the betting. By the time the Exchange closed it had risen eight points, and on this and some other investments he was five thousand dollars richer than he had been in the morning. But he had expected to be richer still, and he was by no means satisfied with his luck. All through the excitement of his winning and losing had played the dull, murderous rage he felt toward the child who had defied him, and when the game was over and he started home, his rage mounted into a sort of frenzy; he would teach her, he would break her. He walked a long way without thinking, and then waited for a car. None came, and he hailed a passing coupé.

"What has got all the cars?" he demanded of the driver, who jumped down from his box to open the door for him and get his direction.

"Been away?" asked the driver. "Hasn't been any car along for a week. Strike."

"Oh yes," said Dryfoos. He felt suddenly giddy, and he remained staring at the driver after he had taken his seat.

The man asked, "Where to?"

Dryfoos could not think of his street or number, and he said with uncontrollable fury, "I told you once! Go up to West Eleventh, and drive along slow on the south side; I'll show you the place."

He could not remember the number of *Every Other Week* office, where he suddenly decided to stop before

he went home. He wished to see Fulkerson, and ask him something about Beaton: whether he had been about lately, and whether he had dropped any hint of what had happened concerning Christine; Dryfoos believed that Fulkerson was in the fellow's confidence.

There was nobody but Conrad in the counting-room, whither Dryfoos returned after glancing into Fulkerson's empty office. "Where's Fulkerson?" he asked, sitting down with his hat on.

"He went out a few moments ago," said Conrad, glancing at the clock. "I'm afraid he isn't coming back again to-day, if you wanted to see him."

Dryfoos twisted his head sidewise and upward to indicate March's room. "That other fellow out, too?"

"He went just before Mr. Fulkerson," answered Conrad.

"Do you generally knock off here in the middle of the afternoon?" asked the old man.

"No," said Conrad, as patiently as if his father had not been there a score of times, and found the whole staff of *Every Other Week* at work between four and five. "Mr. March, you know, always takes a good deal of his work home with him, and I suppose Mr. Fulkerson went out so early because there isn't much doing to-day. Perhaps it's the strike that makes it dull."

"The strike—yes! It's a pretty piece of business to have everything thrown out because a parcel of lazy hounds want a chance to lay off and get drunk." Dryfoos seemed to think Conrad would make some answer to this, but the young man's mild face merely saddened, and he said nothing. "I've got a coupé out there now that I had to take because I couldn't get a car. If I had my way I'd have a lot of those vagabonds hung. They're waiting to get the city into a snarl, and then rob the houses—pack of dirty, worthless whelps. They ought to call out the militia, and fire into 'em. Clubbing is too good for them." Conrad was still silent, and his father sneered, "But I reckon *you* don't think so."

"I think the strike is useless," said Conrad.

"Oh, you *do,* do you? Comin' to your senses a little. Gettin' tired walkin' so much. I should like to know what your gentlemen over there on the East side think about the strike, anyway."

The young fellow dropped his eyes. "I am not authorised to speak for them."

"Oh, indeed! And perhaps you're not authorised to speak for yourself?"

"Father, you know we don't agree about these things. I'd rather not talk——"

"But I'm goin' to *make* you talk this time!" cried Dryfoos, striking the arm of the chair he sat in with the side of his fist. A maddening thought of Christine came over him. "As long as you eat my bread, you have got to do as I say. I won't have my children telling me what I shall do and sha'n't do, or take on airs of being holier than me. Now, you just speak up! Do you think those loafers are right, or don't you? Come!"

Conrad apparently judged it best to speak. "I think they were very foolish to strike—at this time, when the elevated roads can do the work."

"Oh, at this time, heigh! And I suppose they think over there on the East side that it'd been wise to strike before we got the elevated." Conrad again refused to answer, and his father roared, "What do you think?"

"I think a strike is always bad business. It's war; but sometimes there don't seem any other way for the working men to get justice. They say that sometimes strikes do raise the wages, after a while."

"Those lazy devils were paid enough already," shrieked the old man. "They got two dollars a day. How much do you think they ought to 'a' got? Twenty?"

Conrad hesitated with a beseeching look at his father. But he decided to answer. "The men say that with partial work, and fines, and other things they get sometimes a dollar, and sometimes ninety cents a day."

"They lie, and you *know* they lie," said his father, rising and coming toward him. "And what do you think the upshot of it all will be, after they've ruined business for another week, and made people hire hacks, and stolen the money of honest men? How is it going to end?"

"They will have to give in."

"Oh, give in, heigh! And what will you say *then,* I should like to know? How will you feel about it then? Speak!"

"I shall feel as I do now. I know you don't think that way, and I don't blame you—or anybody. But if I have got to say how I shall feel, why, I shall feel sorry they didn't succeed, for I believe they have a righteous cause, though they go the wrong way to help themselves."

His father came close to him, his eyes blazing, his teeth set. "Do you *dare* to say that to me?"

"Yes. I can't help it. I pity them; my whole heart is with those poor men."

"You impudent puppy!" shouted the old man. He lifted his hand and struck his son in the face. Conrad caught his hand with his own left, and while the blood began to trickle from a wound that Christine's intaglio ring had made in his temple, he looked at him with a kind of grieving wonder, and said, "Father!"

The old man wrenched his fist away, and ran out of the house. He remembered his address now, and he gave it as he plunged into the coupé. He trembled with his evil passion, and glared out of the windows at the passers as he drove home; he only saw Conrad's mild grieving, wondering eyes, and the blood slowly trickling from the wound in his temple.

Conrad went to the neat set-bowl in Fulkerson's comfortable room, and washed the blood away, and kept bathing the wound with the cold water till it stopped bleeding. The cut was not deep, and he thought he would not put anything on it. After a while he locked up the office, and started out, he hardly knew where. But he walked on, in the direction he had taken, till he found himself in Union Square, on the pavement in front of Brentano's. It seemed to him that he heard some one calling gently to him, "Mr. Dryfoos!"

Chapter V

Conrad looked confusedly around, and the same voice said again, "Mr. Dryfoos!" and he saw that it was a lady speaking to him from a coupé beside the curbing, and then he saw that it was Miss Vance.

She smiled when he gave signs of having discovered her, and came up to the door of her carriage. "I am so glad to meet you. I have been longing to talk to somebody; nobody seems to feel about it as I do. Oh, isn't it horrible? *Must* they fail? I saw cars running on all the lines as I came across; it made me sick at heart. *Must* those brave fellows give in? And everybody seems to hate them so—I can't bear it." Her face was estranged with excitement, and there were traces of tears on it. "You must think me almost crazy to stop you in the street this way; but when I caught sight of you I had to speak. I knew you would sympathise—I knew you would feel as I do. Oh, how can anybody help honouring those poor men for standing by one another as they do? They are risking all they have in the world for the sake of justice! Oh, they are true heroes! They are staking the bread of their wives and children on the dreadful chance they've taken! But no one seems to understand it. No one seems to see that they are willing to suffer more now that other poor men may suffer less hereafter. And those wretched creatures that are coming in to take their places—those traitors——"

"We can't blame them for wanting to earn a living, Miss Vance," said Conrad.

"No, no! I don't blame them. Who am I, to do such a thing? It's *we*—people like me, of my class—who make the poor betray one another. But this dreadful fighting—this hideous paper is full of it." She held up an extra, crumpled with her nervous reading. "Can't something be done to stop it? Don't you think that if some one went among them, and tried to make them see how perfectly hopeless it was to resist the companies, and drive off the new men, he might do some good? I have wanted to go and try; but I am a woman, and I mustn't! I shouldn't be afraid of the strikers, but I'm afraid of what people would say!" Conrad kept pressing his handkerchief to the cut in his temple, which he thought might be bleeding, and now she noticed this. "Are you hurt, Mr. Dryfoos? You look so pale."

"No, it's nothing—a little scratch I've got."

"Indeed you look pale. Have you a carriage? How will you get home? Will you get in here with me, and let me drive you?"

"No, no," said Conrad, smiling at her excitement. "I'm perfectly well——"

"And you don't think I'm foolish and wicked for stopping you here, and talking in this way? But I know you feel as I do!"

"Yes, I feel as you do. You are right—right in every way—I mustn't keep you—Good-bye." He stepped back to bow, but she put her beautiful hand out of the window, and when he took it she wrung his hand hard.

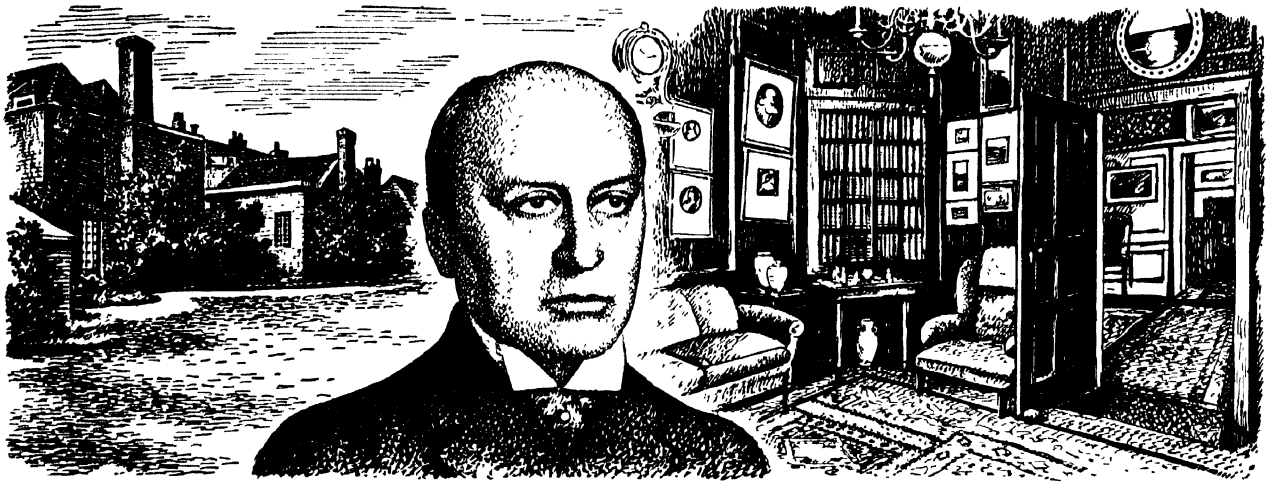
"Thank you, thank you! You are good and you are just! But no one can do anything. It's useless!"

The type of irreproachable coachman on the box whose respectability had suffered through the strange

behaviour of his mistress in this interview, drove quickly off at her signal, and Conrad stood a moment looking after the carriage. His heart was full of joy; it leaped; he thought it would burst. As he turned to walk away it seemed to him as if he mounted upon the air. The trust she had shown him, the praise she had given him; that crush of the hand: he hoped nothing, he formed no idea from it, but it all filled him with love that cast out the pain and shame he had been suffering. He believed that he could never be unhappy any more; the hardness that was in his mind toward his father went out of it; he saw how sorely he had tried him; he grieved that he had done it, but the means, the difference of his feelings about the cause of their quarrel, he was solemnly glad of that since she shared it. He was only sorry for his father. "Poor father!" he said under his breath as he went along. He explained to her about his father in his reverie, and she pitied his father too.

He was walking over toward the West side, aimlessly at first, and then at times with the longing to do something to save those mistaken men from themselves forming itself into a purpose. Was not that what she meant, when she bewailed her woman's helplessness? She must have wished him to try, if he, being a man, could not do something; or if she did not, still he would try, and if she heard of it, she would recall what she had said, and would be glad he had understood her so. Thinking of her pleasure in what he was going to do, he forgot almost what it was; but when he came to a street-car track he remembered it, and looked up and down to see if there were any turbulent gathering of men, whom he might mingle with and help to keep from violence. He saw none anywhere; and then suddenly, as if at the same moment, for in his exalted mood all events had a dream-like simultaneity, he stood at the corner of an avenue, and in the middle of it, a little way off, was a street-car, and around the car a tumult of shouting, cursing, struggling men. The driver was lashing his horses forward, and a policeman was at their heads, with the conductor, pulling them; stones, clubs, brick-bats hailed upon the car, the horses, the men trying to move them. The mob closed upon them in a body, and then a patrol-wagon whirled up from the other side, and a squad of policemen leaped out, and began to club the rioters. Conrad could see how they struck them under the rims of their hats; the blows on their skulls sounded as if they had fallen on stone; the rioters ran in all directions.

One of the officers rushed up toward the corner where Conrad stood, and then he saw at his side a tall old man with a long white beard. He was calling out at the policeman: "Ah yes! Glup the strikerss—gif it to them! Why don't you co and glup the bresidents that insoalt your lawss, and gick your Boart of Arpidration out-of-toors? Glup the strikerss—they cot no friendts! They cot no money to pribe you, to dreat you!"



The officer lifted his club, and the old man threw his left arm up to shield his head. Conrad recognised Lindau, and now he saw the empty sleeve dangle in the air, over the stump of his wrist. He heard a shot in that turmoil beside the car, and something seemed to strike him in the breast. He was going to say to the policeman, "Don't strike him! He's an old soldier! You see he has no hand!" but he could not speak, he could not move his tongue. The policeman stood there; he saw his face: it was not bad, not cruel; it was like the face of a statue, fixed, perdurable; a mere image of irresponsible and involuntary authority. Then Conrad fell forward, pierced through the heart by that shot fired from the car.

March heard the shot as he scrambled out of his car, and at the same moment he saw Lindau drop under the club of the policeman, who left him where he fell, and joined the rest of the squad in pursuing the rioters. The fighting round the car in the avenue ceased; the driver whipped his horses into a gallop, and the place was left empty.

March would have liked to run; he thought how his wife had implored him to keep away from the rioting; but he could not have left Lindau lying there if he would. Something stronger than his will drew him to the spot, and there he saw Conrad dead beside the old man. . . .

[The concluding chapters tell briefly of the death of Lindau, the remorse of Dryfoos for his treatment of his son, the transfer of the ownership of Every Other Week from Dryfoos to Fulkerson and March, the Dryfooses' departure for Europe, the marriage of Fulkerson and Miss Woodburn, and the entrance of Margaret Vance into an order of nuns. Thus Howells concludes his rich and varied study of the New York of the 1880's.]

1890

Henry James

1843 • 1916

Although he was born in New York and lived for a number of years in Boston, Cambridge, and Newport, Henry James was an expatriate. In his early life, the frequent removals of his family from place to place prevented him from taking root anywhere. There were long and repeated visits to Europe and intermittent sojourns in America. By the time he had reached maturity, periodic migrations had become a habit—especially migrations to Europe.

James wanted to be a writer of fiction, but he had difficulty in finding his proper milieu. He was aware of the importance of roots to the creative artist, for in an early essay on the Russian novelist Turgenev, he said, "His works savor strongly of his native soil, like those of all great novelists." But Europe attracted James more compellingly than his native land; he had been more exposed to European influences and he felt acutely the inferiority of America in the arts.

Europe, then, it would have to be; perhaps he could take root there. After an important year in Paris (1875-1876), where he came under the influence, in varying degrees, of Turgenev, Maupassant, Flaubert, Daudet, and Zola, he began in England a residence which proved to be permanent.

James' output was prodigiously large, consisting chiefly of literary criticism, short stories, and novels. The literary criticism is acute: consider, as examples, his *Hawthorne* (1879), the essays on Emerson and George Eliot in *Partial Portraits* (1888), the essay on Zola in *Notes on Novelists* (1914), and the Prefaces to the novels (added in 1907). His short stories often show him at his best. But despite the excellence of the criticism and the short fiction, James is important chiefly for his novels,

Panel (l to r) James' home, "Lamb House," at Rye, Sussex • Henry James at 57 • The library of "Lamb House"

of which the following titles are a partial list: *Roderick Hudson* (1876), *The American* (1877), *The Portrait of a Lady* (1881), *The Bostonians* (1886), *The Tragic Muse* (1890), *The Spoils of Poynton* (1897), *What Maisie Knew* (1897), *The Wings of the Dove* (1902), *The Ambassadors* (1903), *The Golden Bowl* (1904).

James began as a writer of the "international novel." Roderick Hudson is a young American painter who goes to Italy to study his art; Christopher Newman, in *The American,* is a retired American manufacturer who goes to Paris to acquire culture—and a wife; Isabel Archer, in *The Portrait of a Lady,* is an intelligent, spirited American girl who, after various experiences in England and on the Continent, marries, and lives in Rome. In this early work "the 'international' light," James said, "lay, to my sense, thick and rich upon the scene." These writings, and many others, are comparative studies of the European and American cultures. Europe, of course, is the home of the arts and of "high civilization." America is culturally raw. But this is only half of the picture which James presents. The other half has to do with character and morals, and in this department, James' Americans carry off the honors Against the background of a tarnished European society, Christopher Newman, Isabel Archer, Lambert Strether (in *The Ambassadors*) are seen as shining examples of moral rectitude and fineness of feeling.

James continued to employ international characters and comparisons. But in his later work, the international theme is less emphasized (except in *The Ambassadors,* where it is again prominent), and he becomes increasingly interested in psychological processes and in "method." The books which show the full maturity of his art are *The Wings of the Dove, The Ambassadors,* and *The Golden Bowl,* and it is probably upon these works that his fame will ultimately rest. The "method" in this mature fiction consists in placing a character in a difficult and complex social situation, and then showing his growing awareness, step by step, of the situation in all of its subtleties and refinements. The author manages the "point of view" in such a way as to exploit the limited insights of certain characters. In *The Golden Bowl,* for example, the first half of the story is told (in the third person) from the point of view of the Prince; the second half is told from the point of view of the Princess. In *The Ambassadors,* the most perfect embodiment of his method, the entire story is told (in the third person) from the point of view of Lambert Strether.

Many American readers have found James not at all to their liking. Their objections are sufficiently embodied in the following severe judgments by Parrington: "James' romanticization of European culture worked to his undoing, for it constrained the artist to a lifelong pursuit of intangible realities that existed only in his imagination. . . . Even in his subtle psychological inquiries he remained shut up within his own skull-pan. His characters are only projections of his brooding fancy, externalizations of hypothetical subtleties." It is true that James was alienated from America and that he became increasingly obsessed with psychological subtleties which he described in an increasingly difficult style. Quite possibly, however, Parrington, and those who agree with the judgments just quoted, do James less than justice. It may be urged that there is more of America in James' books than appears at first glance. His books contain scores of Americans; his most admirable characters are, repeatedly, Americans; and, paradoxically enough in view of his high regard for the "culture" of Europe, his Europeans and his Europeanized Americans are likely to betray a moral decadence—a moral decadence which the author unmistakably condemns. America does not come off nearly so badly in James' books as some suppose, nor Europe nearly so well. It is arguable, moreover, that the psychological subtleties of the later works have valid basis in fact. Civilized human relations are almost infinitely complex and subtle. Most novelists greatly simplify, or pass superficially over, these relations, James was, one may say, a specialist in them. He was perhaps the first novelist to recognize to the fullest the complexities which may grow out of the relationship of one sensitive personality to another, and to record them with fine discrimination and microscopic detail.

The Art of Fiction

James was at odds with two schools of fiction popular in this period: the school of romantic adventure, best represented by Robert Louis Stevenson, and the school of detailed social documentation—the naturalistic school—best represented by Émile Zola. James' own work was neither "adventurous" nor "sociological." With a minimum of plot, in the usual sense of the term, and of external details, James' stories tended more and more to concentrate upon the fascinating problem of the expanding consciousness of a character. The result was much less popular than the work of the other schools, and James felt the challenge.

To those of the naturalistic school, who insisted that the novelist should write from a large and varied experience of life, James replied that experience is properly "an immense sensibility" and that insight is more important than "experience" as ordinarily construed. The English woman novelist (in James' illustration) who succeeded so admirably in giving a convincing picture of French Protestant youth had had, as a matter of "experience," only a momentary glimpse of such a group; but she had had the all-important faculty of "insight." To those who insisted upon exciting incident, James answered that excitement does not necessarily consist of physical action, does not absolutely require moving accidents by flood and field. "It is an incident," he remarked characteristically, "for a woman to stand up with her hand resting on a table and look out at you in a certain way"—an exciting incident, too, he meant to imply, particularly if the young woman happened to be Miss Isabel Archer in **The Portrait of a Lady**. The "psychological" subjects, he argued, have an interest and validity of their own. For example, the "moral consciousness of a child," which Edmond de Goncourt and George Eliot had employed with varying success, and which James himself was to employ, rather abstrusely, in **What Maisie Knew**, may be more exciting to a subtle intelligence than Stevenson's adventures on the Spanish Main. From James' standpoint, the first is the more valid subject because it comes within the range of every reader's experience, while the second subject is known to most readers "only in supposition."

Both in motivation, therefore, and in its essential argument, James' essay was a criticism of popular current schools of fiction and a spirited defense of his own fictional practice.

"The Art of Fiction" was first published in **Longman's Magazine** in 1884; it was collected with other essays in **Partial Portraits** in 1888.

I should not have affixed so comprehensive a title to these few remarks, necessarily wanting in any completeness upon a subject the full consideration of which would carry us far, did I not seem to discover a pretext for my temerity in the interesting pamphlet lately published under this name by Mr. Walter Besant. Mr. Besant's lecture at the Royal Institution—the original form of his pamphlet—appears to indicate that many persons are interested in the art of fiction, and are not indifferent to such remarks, as those who practise it may attempt to make about it. I am therefore anxious not to lose the benefit of this favourable association, and to edge in a few words under cover of the attention which Mr. Besant is sure to have excited. There is something very encouraging in his having put into form certain of his ideas on the mystery of story-telling.

It is a proof of life and curiosity—curiosity on the part of the brotherhood of novelists as well as on the part of their readers. Only a short time ago it might have been supposed that the English novel was not what the French call *discutable*. It had no air of having a theory, a conviction, a consciousness of itself behind it—of being the expression of an artistic faith, the result of choice and comparison. I do not say it was necessarily the worse for that; it would take much more courage than I possess to intimate that the form of the novel as Dickens and Thackeray (for instance) saw it had any taint of incompleteness. It was, however, *naïf* (if I may help myself out with another French word); and evi-

---

6 Besant, Sir Walter Besant (1836-1901), English novelist and critic • **21 discutable**, debatable

dently if it be destined to suffer in any way for having lost its *naïveté* it has now an idea of making sure of the corresponding advantages. During the period I have alluded to there was a comfortable good-humoured feeling abroad that a novel is a novel, as a pudding is a pudding, and that our only business with it could be to swallow it. But within a year or two, for some reason or other, there have been signs of returning animation—the era of discussion would appear to have been to a certain extent opened. Art lives upon discussion, upon experiment, upon curiosity, upon variety of attempt, upon the exchange of views and the comparison of standpoints; and there is a presumption that those times when no one has anything particular to say about it, and has no reason to give for practice or preference, though they may be times of honour, are not times of development—are times, possibly, even a little of dulness. The successful application of any art is a delightful spectacle, but the theory too is interesting; and though there is a great deal of the latter without the former I suspect there has never been a genuine success that has not had a latent core of conviction. Discussion, suggestion, formulation, these things are fertilizing when they are frank and sincere. Mr. Besant has set an excellent example in saying what he thinks, for his part, about the way in which fiction should be written, as well as about the way in which it should be published; for his view of the "art," carried on into an appendix, covers that too. Other labourers in the same field will doubtless take up the argument, they will give it the light of their experience, and the effect will surely be to make our interest in the novel a little more what it had for some time threatened to fail to be—a serious, active, inquiring interest, under protection of which this delightful study may, in moments of confidence, venture to say a little more what it thinks of itself.

It must take itself seriously for the public to take it so. The old superstition about fiction being "wicked" has doubtless died out in England; but the spirit of it lingers in a certain oblique regard directed toward any story which does not more or less admit that it is only a joke. Even the most jocular novel feels in some degree the weight of the proscription that was formerly directed against literary levity: the jocularity does not always succeed in passing for orthodoxy. It is still expected, though perhaps people are ashamed to say it, that a production which is after all only a "make-believe" (for what else is a "story"?) shall be in some degree apologetic—shall renounce the pretension of attempting really to represent life. This, of course, any sensible, wide-awake story declines to do, for it quickly perceives that the tolerance granted to it on such a condition is only an attempt to stifle it disguised in the form of generosity. The old evangelical hostility to the novel, which was as explicit as it was narrow, and which regarded it as little less favourable to our immortal part than a stage-play, was in reality far less insulting. The only reason for the existence of a novel is that it does attempt to represent life. When it relinquishes this attempt, the same attempt that we see on the canvas of the painter, it will have arrived at a very strange pass. It is not expected of the picture that it will make itself humble in order to be forgiven; and the analogy between the art of the painter and the art of the novelist is, so far as I am able to see, complete. Their inspiration is the same, their process (allowing for the different quality of the vehicle) is the same, their success is the same. They may learn from each other, they may explain and sustain each other. Their cause is the same, and the honour of one is the honour of another. The Mahometans think a picture an unholy thing, but it is a long time since any Christian did, and it is therefore the more odd that in the Christian mind the traces (dissimulated though they may be) of a suspicion of the sister art should linger to this day. The only effectual way to lay it to rest is to emphasize the analogy to which I just alluded—to insist on the fact that as the picture is reality, so the novel is history. That is the only general description (which does it justice) that we may give of the novel. But history also is allowed to represent life; it is not, any more than painting, expected to apologize. The subject-matter of fiction is stored up likewise in documents and records, and if it will not give itself away, as they say in California, it must speak with assurance, with the tone of the historian. Certain accomplished novelists have a habit of giving themselves away which must often bring tears to the eyes of people who take their fiction seriously. I was lately struck, in reading over many pages of Anthony Trollope, with his want of discretion in this particular. In a digression, a parenthesis or an aside, he concedes to the reader that he and this trusting friend are only "making believe." He admits that the events he narrates have not really hap-

pened, and that he can give his narrative any turn the reader may like best. Such a betrayal of a sacred office seems to me, I confess, a terrible crime; it is what I mean by the attitude of apology, and it shocks me every whit as much in Trollope as it would have shocked me in Gibbon or Macaulay. It implies that the novelist is less occupied in looking for the truth (the truth, of course I mean, that he assumes, the premises that we must grant him, whatever they may be) than the historian, and in doing so it deprives him at a stroke of all his standing-room. To represent and illustrate the past, the actions of men, is the task of either writer, and the only difference that I can see is, in proportion as he succeeds, to the honour of the novelist, consisting as it does in his having more difficulty in collecting his evidence, which is so far from being purely literary. It seems to me to give him a great character, the fact that he has at once so much in common with the philosopher and the painter; this double analogy is a magnificent heritage.

It is of all this evidently that Mr. Besant is full when he insists upon the fact that fiction is one of the *fine* arts, deserving in its turn of all the honours and emoluments that have hitherto been reserved for the successful profession of music, poetry, painting, architecture. It is impossible to insist too much on so important a truth, and the place that Mr. Besant demands for the work of the novelist may be represented, a trifle less abstractly, by saying that he demands not only that it shall be reputed artistic, but that it shall be reputed very artistic indeed. It is excellent that he should have struck this note, for his doing so indicates that there was need of it, that his proposition may be to many people a novelty. One rubs one's eyes at the thought; but the rest of Mr. Besant's essay confirms the revelation. I suspect in truth that it would be possible to confirm it still further, and that one would not be far wrong in saying that in addition to the people to whom it has never occurred that a novel ought to be artistic, there are a great many others who, if this principle were urged upon them, would be filled with an indefinable mistrust. They would find it difficult to explain their repugnance, but it would operate strongly to put them on their guard. "Art," in our Protestant communities, where so many things have got so strangely twisted about, is supposed in certain circles to have some vague injurious effect upon those who make it an important consideration, who let it weigh in the balance. It is assumed to be opposed in some mysterious manner to morality, to amusement, to instruction. When it is embodied in the work of the painter (the sculptor is another affair!) you know what it is: it stands there before you, in the honesty of pink and green and a gilt frame; you can see the worst of it at a glance, and you can be on your guard. But when it is introduced into literature it becomes more insidious—there is danger of its hurting you before you know it. Literature should be either instructive or amusing, and there is in many minds an impression that these artistic preoccupations, the search for form, contribute to neither end, interfere indeed with both. They are too frivolous to be edifying, and too serious to be diverting; and they are moreover priggish and paradoxical and superfluous. That, I think, represents the manner in which the latent thought of many people who read novels as an exercise in skipping would explain itself if it were to become articulate. They would argue, of course, that a novel ought to be "good," but they would interpret this term in a fashion of their own, which indeed would vary considerably from one critic to another. One would say that being good means representing virtuous and aspiring characters placed in prominent positions; another would say that it depends on a "happy ending," on a distribution at the last of prizes, pensions, husbands, wives, babies, millions, appended paragraphs, and cheerful remarks. Another still would say that it means being full of incident and movement, so that we shall wish to jump ahead, to see who was the mysterious stranger, and if the stolen will was ever found, and shall not be distracted from this pleasure by any tiresome analysis or "description." But they would all agree that the "artistic" idea would spoil some of their fun. One would hold it accountable for all the description, another would see it revealed in the absence of sympathy. Its hostility to a happy ending would be evident, and it might even in some cases render any ending at all impossible. The "ending" of a novel is, for many persons, like that of a good dinner, a course of dessert and ices, and the artist in fiction is regarded as a sort of meddlesome doctor who forbids agreeable aftertastes. It is therefore true that this conception of Mr. Besant's of the novel as a superior form encounters not only a negative but a positive indifference. It matters little that as a work of art it should really be as little or as much of its essence to supply

happy endings, sympathetic characters, and an objective tone, as if it were a work of mechanics: the association of ideas, however incongruous, might easily be too much for it if an eloquent voice were not sometimes raised to call attention to the fact that it is at once as free and as serious a branch of literature as any other.

Certainly this might sometimes be doubted in presence of the enormous number of works of fiction that appeal to the credulity of our generation, for it might easily seem that there could be no great character in a commodity so quickly and easily produced. It must be admitted that good novels are much compromised by bad ones, and that the field at large suffers discredit from overcrowding. I think, however, that this injury is only superficial, and that the superabundance of written fiction proves nothing against the principle itself. It has been vulgarised, like all other kinds of literature, like everything else to-day, and it has proved more than some kinds accessible to vulgarisation. But there is as much difference as there ever was between a good novel and a bad one: the bad is swept with all the daubed canvases and spoiled marble into some unvisited limbo, or infinite rubbish-yard beneath the back-windows of the world, and the good subsists and emits its light and stimulates our desire for perfection. As I shall take the liberty of making but a single criticism of Mr. Besant, whose tone is so full of love of his art, I may as well have done with it at once. He seems to me to mistake, in attempting to say so definitely beforehand, what sort of an affair the good novel will be. To indicate the danger of such an error as that has been the purpose of these few pages; to suggest that certain traditions on the subject, applied *a priori,* have already had much to answer for, and that the good health of an art which undertakes so immediately to reproduce life must demand that it be perfectly free. It lives upon exercise, and the very meaning of exercise is freedom. The only obligation to which in advance we may hold a novel, without incurring the accusation of being arbitrary, is that it be interesting. That general responsibility rests upon it, but it is the only one I can think of. The ways in which it is at liberty to accomplish this result (of interesting us) strike me as innumerable, and such as can only suffer from being marked out or fenced in by prescription. They are as various as the temperament of man, and they are successful in proportion as they reveal a particular mind, different from others. A novel is in its broadest definition a personal, a direct impression of life: that, to begin with, constitutes its value, which is greater or less according to the intensity of the impression. But there will be no intensity at all, and therefore no value, unless there is freedom to feel and say. The tracing of a line to be followed, of a tone to be taken, of a form to be filled out, is a limitation of that freedom and a suppression of the very thing that we are most curious about. The form, it seems to me, is to be appreciated after the fact: then the author's choice has been made, his standard has been indicated; then we can follow lines and directions and compare tones and resemblances. Then in a word we can enjoy one of the most charming of pleasures, we can estimate quality, we can apply the test of execution. The execution belongs to the author alone; it is what is most personal to him, and we measure him by that. The advantage, the luxury, as well as the torment and responsibility of the novelist, is that there is no limit to what he may attempt as an executant—no limit to his possible experiments, efforts, discoveries, successes. Here it is especially that he works, step by step, like his brother of the brush, of whom we may always say that he has painted his picture in a manner best known to himself. His manner is his secret, not necessarily a jealous one. He cannot disclose it as a general thing if he would; he would be at a loss to teach it to others. I say this with a due recollection of having insisted on the community of method of the artist who paints a picture and the artist who writes a novel. The painter *is* able to teach the rudiments of his practice, and it is possible, from the study of good work (granted the aptitude), both to learn how to paint and to learn how to write. Yet it remains true, without injury to the *rapprochement,* that the literary artist would be obliged to say to his pupil much more than the other, "Ah, well, you must do it as you can!" It is a question of degree, a matter of delicacy. If there are exact sciences, there are also exact arts, and the grammar of painting is so much more definite that it makes the difference.

I ought to add, however, that if Mr. Besant says at the beginning of his essay that the "laws of fiction may be laid down and taught with as much precision and exact-

---

79 rapprochement, comparison or analogy (between the art of painting and the art of fiction)

ness as the laws of harmony, perspective, and proportion," he mitigates what might appear to be an extravagance by applying his remark to "general" laws, and by expressing most of these rules in a manner with which it would certainly be unaccommodating to disagree. That the novelist must write from his experience, that his "characters must be real and such as might be met with in actual life;" that "a young lady brought up in a quiet country village should avoid descriptions of garrison life," and "a writer whose friends and personal experiences belong to the lower middle-class should carefully avoid introducing his characters into society;" that one should enter one's notes in a common-place book; that one's figures should be clear in outline; that making them clear by some trick of speech or of carriage is a bad method, and "describing them at length" is a worse one; that English Fiction should have a "conscious moral purpose;" that "it is almost impossible to estimate too highly the value of careful workmanship—that is, of style;" that "the most important point of all is the story," that "the story is everything:" these are principles with most of which it is surely impossible not to sympathise. That remark about the lower middle-class writer and his knowing his place is perhaps rather chilling; but for the rest I should find it difficult to dissent from any one of these recommendations. At the same time, I should find it difficult positively to assent to them, with the exception, perhaps, of the injunction as to entering one's notes in a common-place book. They scarcely seem to me to have the quality that Mr. Besant attributes to the rules of the novelist—the "precision and exactness" of "the laws of harmony, perspective, and proportion." They are suggestive, they are even inspiring, but they are not exact, though they are doubtless as much so as the case admits of: which is a proof of that liberty of interpretation for which I just contended. For the value of these different injunctions—so beautiful and so vague—is wholly in the meaning one attaches to them. The characters, the situation, which strike one as real will be those that touch and interest one most, but the measure of reality is very difficult to fix. The reality of Don Quixote or of Mr. Micawber is a very delicate shade; it is a reality so coloured by the author's vision that, vivid as it may be, one would hesitate to propose it as a model: one would expose one's self to some very embarrassing questions on the part of a pupil. It goes without saying that you will not write a good novel unless you possess the sense of reality; but it will be difficult to give you a recipe for calling that sense into being. Humanity is immense, and reality has a myriad forms; the most one can affirm is that some of the flowers of fiction have the odour of it, and others have not; as for telling you in advance how your nosegay should be composed, that is another affair. It is equally excellent and inconclusive to say that one must write from experience; to our supposititious aspirant such a declaration might savour of mockery. What kind of experience is intended, and where does it begin and end? Experience is never limited, and it is never complete; it is an immense sensibility, a kind of huge spiderweb of the finest silken threads suspended in the chamber of consciousness, and catching every air-borne particle in its tissue. It is the very atmosphere of the mind; and when the mind is imaginative—much more when it happens to be that of a man of genius—it takes to itself the faintest hints of life, it converts the very pulses of the air into revelations. The young lady living in a village has only to be a damsel upon whom nothing is lost to make it quite unfair (as it seems to me) to declare to her that she shall have nothing to say about the military. Greater miracles have been seen than that, imagination assisting, she should speak the truth about some of these gentlemen. I remember an English novelist, a woman of genius, telling me that she was much commended for the impression she had managed to give in one of her tales of the nature and way of life of the French Protestant youth. She had been asked where she learned so much about this recondite being, she had been congratulated on her peculiar opportunities. These opportunities consisted in her having once, in Paris, as she ascended a staircase, passed an open door where, in the household of a *pasteur*, some of the young Protestants were seated at table round a finished meal. The glimpse made a picture; it lasted only a moment, but that moment was experience. She had got her direct personal impression, and she turned out her type. She knew what youth was, and what Protestantism; she also had the advantage of having seen what it was to be French, so that she converted these ideas into a concrete image and produced a reality. Above all, however, she was blessed with

---

42 Micawber, in Dickens' David Copperfield • 81 pasteur, pastor

the faculty which when you give it an inch takes an ell, and which for the artist is a much greater source of strength than any accident of residence or of place in the social scale. The power to guess the unseen from the seen, to trace the implication of things, to judge the whole piece by the pattern, the condition of feeling life in general so completely that you are well on your way to knowing any particular corner of it—this cluster of gifts may almost be said to constitute experience, and they occur in country and in town, and in the most differing stages of education. If experience consists of impressions, it may be said that impressions *are* experience, just as (have we not seen it?) they are the very air we breathe. Therefore, if I should certainly say to a novice, "Write from experience and experience only," I should feel that this was rather a tantalising monition if I were not careful immediately to add, "Try to be one of the people on whom nothing is lost!"

I am far from intending by this to minimise the importance of exactness—of truth of detail. One can speak best from one's own taste, and I may therefore venture to say that the air of reality (solidity of specification) seems to me to be the supreme virtue of a novel—the merit on which all its other merits (including that conscious moral purpose of which Mr. Besant speaks) helplessly and submissively depend. If it be not there they are all as nothing, and if these be there, they owe their effect to the success with which the author has produced the illusion of life. The cultivation of this success, the study of this exquisite process, form, to my taste, the beginning and the end of the art of the novelist. They are his inspiration, his despair, his reward, his torment, his delight. It is here in very truth that he competes with life; it is here that he competes with his brother the painter in *his* attempt to render the look of things, the look that conveys their meaning, to catch the colour, the relief, the expression, the surface, the substance of the human spectacle. It is in regard to this that Mr. Besant is well inspired when he bids him take notes. He cannot possibly take too many, he cannot possibly take enough. All life solicits him, and to "render" the simplest surface, to produce the most momentary illusion, is a very complicated business. His case would be easier, and the rule would be more exact, if Mr. Besant had been able to tell him what notes to take. But this, I fear, he can never learn in any manual; it is the business of his life. He has to take a great many in order to select a few, he has to work them up as he can, and even the guides and philosophers who might have most to say to him must leave him alone when it comes to the application of precepts, as we leave the painter in communion with his palette. That his characters "must be clear in outline," as Mr. Besant says—he feels that down to his boots; but how he shall make them so is a secret between his good angel and himself. It would be absurdly simple if he could be taught that a great deal of "description" would make them so, or that on the contrary the absence of description and the cultivation of dialogue, or the absence of dialogue and the multiplication of "incident," would rescue him from his difficulties. Nothing, for instance, is more possible than that he be of a turn of mind for which this odd, literal opposition of description and dialogue, incident and description, has little meaning and light. People often talk of these things as if they had a kind of internecine distinctness, instead of melting into each other at every breath, and being intimately associated parts of one general effort of expression. I cannot imagine composition existing in a series of blocks, nor conceive, in any novel worth discussing at all, of a passage of description that is not in its intention narrative, a passage of dialogue that is not in its intention descriptive, a touch of truth of any sort that does not partake of the nature of incident, or an incident that derives its interest from any other source than the general and only source of the success of a work of art—that of being illustrative. A novel is a living thing, all one and continuous, like any other organism, and in proportion as it lives will it be found, I think, that in each of the parts there is something of each of the other parts. The critic who over the close texture of a finished work shall pretend to trace a geography of items will mark some frontiers as artificial, I fear, as any that have been known to history. There is an old-fashioned distinction between the novel of character and the novel of incident which must have cost many a smile to the intending fabulist who was keen about his work. It appears to me as little to the point as the equally celebrated distinction between the novel and the romance—to answer as little to any

---

1 ell. A measure whose length varies in different countries; the English ell is 45 inches

reality. There are bad novels and good novels, as there are bad pictures and good pictures; but that is the only distinction in which I see any meaning, and I can as little imagine speaking of a novel of character as I can imagine speaking of a picture of character. When one says picture one says of character, when one says novel one says of incident, and the terms may be transposed at will. What is character but the determination of incident? What is incident but the illustration of character? What is either a picture or a novel that is *not* of character? What else do we seek in it and find in it? It is an incident for a woman to stand up with her hand resting on a table and look at you in a certain way; or if it be not an incident I think it will be hard to say what it is. At the same time it is an expression of character. If you say you don't see it (character in *that—allons donc!*), this is exactly what the artist who has reasons of his own for thinking he *does* see it undertakes to show you. When a young man makes up his mind that he has not faith enough after all to enter the church as he intended, that is an incident, though you may not hurry to the end of the chapter to see whether perhaps he doesn't change once more. I do not say that these are extraordinary or startling incidents. I do not pretend to estimate the degree of interest proceeding from them, for this will depend upon the skill of the painter. It sounds almost puerile to say that some incidents are intrinsically much more important than others, and I need not take this precaution after having professed my sympathy for the major ones in remarking that the only classification of the novel that I can understand is into that which has life and that which has it not.

The novel and the romance, the novel of incident and that of character—these clumsy separations appear to me to have been made by critics and readers for their own convenience, and to help them out of some of their occasional predicaments, but to have little reality or interest for the producer, from whose point of view it is of course that we are attempting to consider the art of fiction. The case is the same with another shadowy category which Mr. Besant apparently is disposed to set up—that of the "modern English novel;" unless indeed it be that in this matter he has fallen into an accidental confusion of standpoints. It is not quite clear whether he intends the remarks in which he alludes to it to be didactic or historical. It is as difficult to suppose a person intending to write a modern English as to suppose him writing an ancient English novel: that is a label which begs the question. One writes the novel, one paints the picture, of one's language and of one's time, and calling it modern English will not, alas! make the difficult task any easier. No more, unfortunately, will calling this or that work of one's fellow-artist a romance —unless it be, of course, simply for the pleasantness of the thing, as for instance when Hawthorne gave this heading to his story of *Blithedale.* The French, who have brought the theory of fiction to remarkable completeness, have but one name for the novel, and have not attempted smaller things in it, that I can see, for that. I can think of no obligation to which the "romancer" would not be held equally with the novelist; the standard of execution is equally high for each. Of course it is of execution that we are talking—that being the only point of a novel that is open to contention. This is perhaps too often lost sight of, only to produce interminable confusions and cross-purposes. We must grant the artist his subject, his idea, his *donnée:* our criticism is applied only to what he makes of it. Naturally I do not mean that we are bound to like it or find it interesting: in case we do not our course is perfectly simple—to let it alone. We may believe that of a certain idea even the most sincere novelist can make nothing at all, and the event may perfectly justify our belief; but the failure will have been a failure to execute, and it is in the execution that the fatal weakness is recorded. If we pretend to respect the artist at all, we must allow him his freedom of choice, in the face, in particular cases, of innumerable presumptions that the choice will not fructify. Art derives a considerable part of its beneficial exercise from flying in the face of presumptions, and some of the most interesting experiments of which it is capable are hidden in the bosom of common things. Gustave Flaubert has written a story about the devotion of a servant-girl to a parrot, and the production, highly finished as it is, cannot on the whole be called a success. We are perfectly free to find it flat, but I think it might have been interesting; and I, for my part, am extremely glad he should have written it; it is a contribution to our knowledge of what

---

can be done—or what cannot. Ivan Turgénieff has written a tale about a deaf and dumb serf and a lap-dog, and the thing is touching, loving, a little masterpiece. He struck the note of life where Gustave Flaubert missed it—he flew in the face of a presumption and achieved a victory.

Nothing, of course, will ever take the place of the good old fashion of "liking" a work of art or not liking it: the most improved criticism will not abolish that primitive, that ultimate test. I mention this to guard myself from the accusation of intimating that the idea, the subject, of a novel or a picture, does not matter. It matters, to my sense, in the highest degree, and if I might put up a prayer it would be that artists should select none but the richest. Some, as I have already hastened to admit, are much more remunerative than others, and it would be a world happily arranged in which persons intending to treat them should be exempt from confusions and mistakes. This fortunate condition will arrive only, I fear, on the same day that critics become purged from error. Meanwhile, I repeat, we do not judge the artist with fairness unless we say to him, "Oh, I grant you your starting-point, because if I did not I should seem to prescribe to you, and heaven forbid I should take that responsibility. If I pretend to tell you what you must not take, you will call upon me to tell you then what you must take; in which case I shall be prettily caught. Moreover, it isn't till I have accepted your data that I can begin to measure you. I have the standard, the pitch; I have no right to tamper with your flute and then criticise your music. Of course I may not care for your idea at all; I may think it silly, or stale, or unclean; in which case I wash my hands of you altogether. I may content myself with believing that you will not have succeeded in being interesting, but I shall, of course, not attempt to demonstrate it, and you will be as indifferent to me as I am to you. I needn't remind you that there are all sorts of tastes: who can know it better? Some people, for excellent reasons, don't like to read about carpenters; others, for reasons even better, don't like to read about courtesans. Many object to Americans. Others (I believe they are mainly editors and publishers) won't look at Italians. Some readers don't like quiet subjects; others don't like bustling ones. Some enjoy a complete illusion, others the consciousness of large concessions. They choose their novels accordingly, and if they don't care about your idea they won't, *a fortiori,* care about your treatment."

So that it comes back very quickly, as I have said, to the liking: in spite of M. Zola, who reasons less powerfully than he represents, and who will not reconcile himself to this absoluteness of taste, thinking that there are certain things that people ought to like, and that they can be made to like. I am quite at a loss to imagine anything (at any rate in this matter of fiction) that people *ought* to like or to dislike. Selection will be sure to take care of itself, for it has a constant motive behind it. That motive is simply experience. As people feel life, so they will feel the art that is most closely related to it. This closeness of relation is what we should never forget in talking of the effort of the novel. Many people speak of it as a factitious, artificial form, a product of ingenuity, the business of which it is to alter and arrange the things that surround us, to translate them into conventional, traditional moulds. This, however, is a view of the matter which carries us but a very short way, condemns the art to an eternal repetition of a few familiar *clichés,* cuts short its development, and leads us straight up to a dead wall. Catching the very note and trick, the strange irregular rhythm of life, that is the attempt whose strenuous force keeps Fiction upon her feet. In proportion as in what she offers us we see life *without* rearrangement do we feel that we are touching the truth; in proportion as we see it *with* rearrangement do we feel that we are being put off with a substitute, a compromise and convention. It is not uncommon to hear an extraordinary assurance of remark in regard to this matter of rearranging, which is often spoken of as if it were the last word of art. Mr. Besant seems to me in danger of falling into the great error with his rather unguarded talk about "selection." Art is essentially selection, but it is a selection whose main care is to be typical, to be inclusive. For many people art means rose-coloured window-panes, and selection means picking a bouquet for Mrs. Grundy. They will tell you glibly that artistic considerations have nothing to do with the disagreeable, with the ugly; they will rattle off shallow commonplaces about the province of art and the limits of art till you are

48 *a fortiori,* by the stronger reason • 51 **represents,** portrays in his fiction • 85 **Mrs. Grundy,** a person referred to in Thomas Morton's comedy **Speed the Plough** (1798), has become the stock symbol of narrow conventionalism and prudery

moved to some wonder in return as to the province and the limits of ignorance. It appears to me that no one can ever have made a seriously artistic attempt without becoming conscious of an immense increase—a kind of revelation—of freedom. One perceives in that case—by the light of a heavenly ray—that the province of art is all life, all feeling, all observation, all vision. As Mr. Besant so justly intimates, it is all experience. That is a sufficient answer to those who maintain that it must not touch the sad things of life, who stick into its divine unconscious bosom little prohibitory inscriptions on the end of sticks, such as we see in public gardens—"It is forbidden to walk on the grass; it is forbidden to touch the flowers; it is not allowed to introduce dogs or to remain after dark; it is requested to keep to the right." The young aspirant in the line of fiction whom we continue to imagine will do nothing without taste, for in that case his freedom would be of little use to him; but the first advantage of his taste will be to reveal to him the absurdity of the little sticks and tickets. If he have taste, I must add, of course, he will have ingenuity, and my disrespectful reference to that quality just now was not meant to imply that it is useless in fiction. But it is only a secondary aid; the first is a capacity for receiving straight impressions.

Mr. Besant has some remarks on the question of "the story" which I shall not attempt to criticise, though they seem to me to contain a singular ambiguity, because I do not think I understand them. I cannot see what is meant by talking as if there were a part of a novel which is the story and part of it which for mystical reasons is not—unless indeed the distinction be made in a sense in which it is difficult to suppose that any one should attempt to convey anything. "The story," if it represents anything, represents the subject, the idea, the *donnée* of the novel; and there is surely no "school"—Mr. Besant speaks of a school—which urges that a novel should be all treatment and no subject. There must assuredly be something to treat; every school is intimately conscious of that. This sense of the story being the idea, the starting-point, of the novel, is the only one that I see in which it can be spoken of as something different from its organic whole; and since in proportion as the work is successful the idea permeates and penetrates it, informs and animates it, so that every word and every punctuation-point contribute directly to the expression, in that proportion do we lose our sense of the story being a blade which may be drawn more or less out of its sheath. The story and the novel, the idea and the form, are the needle and thread, and I never heard of a guild of tailors who recommended the use of the thread without the needle, or the needle without the thread. Mr. Besant is not the only critic who may be observed to have spoken as if there were certain things in life which constitute stories, and certain others which do not. I find the same odd implication in an entertaining article in the *Pall Mall Gazette,* devoted, as it happens, to Mr. Besant's lecture. "The story is the thing!" says this graceful writer, as if with a tone of opposition to some other idea. I should think it was, as every painter who, as the time for "sending in" his picture looms in the distance, finds himself still in quest of a subject—as every belated artist not fixed about his theme will heartily agree. There are some subjects which speak to us and others which do not, but he would be a clever man who should undertake to give a rule—an index expurgatorius—by which the story and the no-story should be known apart. It is impossible (to me at least) to imagine any such rule which shall not be altogether arbitrary. The writer in the *Pall Mall* opposes the delightful (as I suppose) novel of *Margot la Balafrée* to certain tales in which "Bostonian nymphs" appear to have "rejected English dukes for psychological reasons." I am not acquainted with the romance just designated, and can scarcely forgive the *Pall Mall* critic for not mentioning the name of the author, but the title appears to refer to a lady who may have received a scar in some heroic adventure. I am inconsolable at not being acquainted with this episode, but am utterly at a loss to see why it is a story when the rejection (or acceptance) of a duke is not, and why a reason, psychological or other, is not a subject when a cicatrix is. They are all particles of the multitudinous life with which the novel deals, and surely no dogma which pretends to make it lawful to touch the one and unlawful to touch the other will stand for a moment on its feet. It is the special picture that must stand or fall, according as it seems to possess truth or to lack it. Mr.

---

71 **Bostonian . . . reasons,** presumably a reference to James' Portrait of a Lady, in which Isabel Archer, an American girl, rejects a proposal of marriage from an English lord • 82 **cicatrix,** scar; **la Balafrée** means "the scarred woman"

Besant does not, to my sense, light up the subject by intimating that a story must, under penalty of not being a story, consist of "adventures." Why of adventures more than of green spectacles? He mentions a category of impossible things, and among them he places "fiction without adventure." Why without adventure, more than without matrimony, or celibacy, or parturition, or cholera, or hydropathy, or Jansenism? This seems to me to bring the novel back to the hapless little *rôle* of being an artificial, ingenious thing—bring it down from its large, free character of an immense and exquisite correspondence with life. And what *is* adventure when it comes to that, and by what sign is the listening pupil to recognize it? It is an adventure—an immense one—for me to write this little article; and for a Bostonian nymph to reject an English duke is an adventure only less stirring, I should say, than for an English duke to be rejected by a Bostonian nymph. I see dramas within dramas in that, and innumerable points of view. A psychological reason is, to my imagination, an object adorably pictorial; to catch the tint of its complexion—I feel as if that idea might inspire one to Titianesque efforts. There are few things more exciting to me, in short, than a psychological reason, and yet, I protest, the novel seems to me the most magnificent form of art. I have just been reading, at the same time, the delightful story of *Treasure Island,* by Mr. Robert Louis Stevenson and, in a manner less consecutive, the last tale from M. Edmond de Goncourt, which is entitled *Chérie.* One of these works treats of murders, mysteries, islands of dreadful renown, hairbreadth escapes, miraculous coincidences, and buried doubloons. The other treats of a little French girl who lived in a fine house in Paris, and died of wounded sensibility because no one would marry her. I call *Treasure Island* delightful, because it appears to me to have succeeded wonderfully in what it attempts; and I venture to bestow no epithet upon *Chérie,* which strikes me as having failed deplorably in what it attempts—that is, in tracing the development of the moral consciousness of a child. But one of these productions strikes me as exactly as much of a novel as the other, and as having a "story" quite as much. The moral consciousness of a child is as much a part of life as the islands of the Spanish Main, and the one sort of geography seems to me to have those "surprises" of which Mr. Besant speaks quite as much as the other. For myself (since it comes back in the last resort, as I say, to the preference of the individual), the picture of the child's experience has the advantage that I can at successive steps (an immense luxury, near to the "sensual pleasure" of which Mr. Besant's critic in the *Pall Mall* speaks) say Yes or No, as it may be, to what the artist puts before me. I have been a child in fact, but I have been on a quest for a buried treasure only in supposition, and it is a simple accident that with M. de Goncourt I should have for the most part to say No. With George Eliot, when she painted that country with a far other intelligence, I always said Yes.

The most interesting part of Mr. Besant's lecture is unfortunately the briefest passage—his very cursory allusion to the "conscious moral purpose" of the novel. Here again it is not very clear whether he be recording a fact or laying down a principle; it is a great pity that in the latter case he should not have developed his idea. This branch of the subject is of immense importance, and Mr. Besant's few words point to considerations of the widest reach, not to be lightly disposed of. He will have treated the art of fiction but superficially who is not prepared to go every inch of the way that these considerations will carry him. It is for this reason that at the beginning of these remarks I was careful to notify the reader that my reflections on so large a theme have no pretension to be exhaustive. Like Mr. Besant, I have left the question of the morality of the novel till the last, and at the last I find I have used up my space. It is a question surrounded with difficulties, as witness the very first that meets us, in the form of a definite question, on the threshold. Vagueness, in such a discussion, is fatal, and what is the meaning of your morality and your conscious moral purpose? Will you not define your terms and explain how (a novel being a picture) a picture can be either moral or immoral? You wish to paint a moral picture or carve a moral statue: will you not tell us how you would set about it? We are discussing the Art of Fiction; questions of art are questions (in the widest sense) of execution; questions of morality are quite another affair, and will you not let us see how it is that you

8 **Jansenism.** The doctrines propounded by Cornelis Jansen (1585-1638), bishop of Ypres, and pronounced heretical by the Catholic Church • 22 **Titianesque,** referring to Titian (1477-1576), Venetian painter • 56 **George Eliot.** The reference is to George Eliot's **Silas Marner**

find it so easy to mix them up? These things are so clear to Mr. Besant that he has deduced from them a law which he sees embodied in English Fiction, and which is "a truly admirable thing and a great cause for congratulation." It is a great cause for congratulation indeed when such thorny problems become as smooth as silk. I may add that in so far as Mr. Besant perceives that in point of fact English Fiction has addressed itself preponderantly to these delicate questions he will appear to many people to have made a vain discovery. They will have been positively struck, on the contrary, with the moral timidity of the usual English novelist; with his (or with her) aversion to face the difficulties with which on every side the treatment of reality bristles. He is apt to be extremely shy (whereas the picture that Mr. Besant draws is a picture of boldness), and the sign of his work, for the most part, is a cautious silence on certain subjects. In the English novel (by which of course I mean the American as well), more than in any other, there is a traditional difference between that which people know and that which they agree to admit that they know, that which they see and that which they speak of, that which they feel to be a part of life and that which they allow to enter into literature. There is the great difference, in short, between what they talk of in conversation and what they talk of in print. The essence of moral energy is to survey the whole field, and I should directly reverse Mr. Besant's remark and say not that the English novel has a purpose, but that it has a diffidence. To what degree a purpose in a work of art is a source of corruption I shall not attempt to inquire; the one that seems to me least dangerous is the purpose of making a perfect work. As for our novel, I may say lastly on this score that as we find it in England to-day it strikes me as addressed in a large degree to "young people," and that this in itself constitutes a presumption that it will be rather shy. There are certain things which it is generally agreed not to discuss, not even to mention, before young people. That is very well, but the absence of discussion is not a symptom of the moral passion. The purpose of the English novel—"a truly admirable thing, and a great cause for congratulation"—strikes me therefore as rather negative.

There is one point at which the moral sense and the artistic sense lie very near together; that is in the light of the very obvious truth that the deepest quality of a work of art will always be the quality of the mind of the producer. In the proportion as that intelligence is fine will the novel, the picture, the statue partake of the substance of beauty and truth. To be constituted of such elements is, to my vision, to have purpose enough. No good novel will ever proceed from a superficial mind; that seems to me an axiom which, for the artist in fiction, will cover all needful moral ground: if the youthful aspirant take it to heart it will illuminate for him many of the mysteries of "purpose." There are many other useful things that might be said to him, but I have come to the end of my article, and can only touch them as I pass. The critic in the *Pall Mall Gazette,* whom I have already quoted, draws attention to the danger, in speaking of the art of fiction, of generalising. The danger that he has in mind is rather, I imagine, that of particularising, for there are some comprehensive remarks which, in addition to those embodied in Mr. Besant's suggestive lecture, might without fear of misleading him be addressed to the ingenuous student. I should remind him first of the magnificence of the form that is open to him, which offers to sight so few restrictions and such innumerable opportunities. The other arts, in comparison, appear confined and hampered; the various conditions under which they are exercised are so rigid and definite. But the only condition that I can think of attaching to the composition of the novel is, as I have already said, that it be sincere. This freedom is a splendid privilege, and the first lesson of the young novelist is to learn to be worthy of it. "Enjoy it as it deserves," I should say to him; "take possession of it, explore it to its utmost extent, publish it, rejoice in it. All life belongs to you, and do not listen either to those who would shut you up into corners of it and tell you that it is only here and there that art inhabits, or to those who would persuade you that this heavenly messenger wings her way outside of life altogether, breathing a superfine air, and turning away her head from the truth of things. There is no impression of life, no manner of seeing it and feeling it, to which the plan of the novelist may not offer a place; you have only to remember that talents so dissimilar as those of Alexandre Dumas and Jane Austen, Charles Dickens and Gustave Flaubert have worked in this field with equal glory. Do not think too much about optimism and pessimism; try and catch the colour of life itself. In France to-day we see a prodigious effort (that of

of the capacity of the novel can allude without respect), we see an extraordinary effort, vitiated by a spirit of pessimism on a narrow basis. M. Zola is magnificent, but he strikes an English reader as ignorant; he has an air of working in the dark; if he had as much light as energy, his results would be of the highest value. As for the lish fiction especially) is strewn with their brittle particles as with broken glass. If you must indulge in conclusions, let them have the taste of a wide knowledge. Remember that your first duty is to be as complete as possible—to make as perfect a work. Be generous and delicate and pursue the prize."

1884

The Middle Years

"The Middle Years" first appeared in **Scribner's Magazine** in 1893; it was collected with other stories in **Terminations** in 1895.

Technically, the story is an interesting example of James' mature mastery of "point of view." Although told in the third person, the narrative is managed, carefully and consistently, from the point of view of a single character. Placing himself at the center of Dencombe's consciousness, the author surveys the scene through Dencombe's—never another's—eyes. The rich potentialities of the restricted point of view were to be more fully realized in the late novels, notably in **The Wings of the Dove, The Ambassadors,** and **The Golden Bowl.**

Like several of James' best stories, "The Middle Years" has for its subject the life of the creative artist in literature. Two points are stressed in the following story: the artist's desire for perfection and the artist's desire for intelligent appreciation.

Dencombe's life has been one of complete devotion to his art. The mastery of his art has been achieved slowly and with great difficulty. He is a perfectionist. Although he reads his latest book with a good deal of pride, it does not completely satisfy him. Moreover, he looks forward to even better work in the future: "a certain splendid 'last manner,' the very citadel, as it would prove, of his reputation." This characterization of Dencombe is applicable to James himself.

A second point of emphasis is Dencombe's feeling that his work is not rightly understood or appreciated by the reading public. Possibly we are to infer that "poor Dencombe" dies of the sheer lack of appreciation. The autobiographical parallel here, of course, is much less close. Although the story probably reflects the author's disappointment at the failure of his works to win a large audience, James has never been without discerning readers. Moreover, James did not die of frustration; he lived actually to accomplish what Dencombe could only grandly envisage: "the jewels rare, strings of pearls, he would hang between the columns of his temple."

The April day was soft and bright, and poor Dencombe, happy in the conceit of reasserted strength, stood in the garden of the hotel, comparing, with a deliberation in which, however, there was still something of languor, the attractions of easy strolls He liked the feeling of the south, so far as you could have it in the north, he liked the sandy cliffs and the clustered pines, he liked even the colorless sea. "Bournemouth as a health resort" had sounded like a mere advertisement, but now he was reconciled to the prosaic The sociable country postman, passing through the garden, had just given him a small parcel, which he took out with him, leaving the hotel to the right and creeping to a convenient bench that he knew of, a safe recess in the cliff. It looked to the south, to the tinted walls of the Island, and was protected behind by the sloping shoulder of the down. He was tired enough when he reached it, and for a moment he was disappointed, he was better, of course, but better, after all, than what? He should never again, as at one or two great moments of the past, be better than himself. The infinite of life had gone, and what was left of the dose was a small glass engraved like a thermometer by the apothecary. He sat and stared at the sea, which appeared

---

8 **Bournemouth,** on the southern coast of England

all surface and twinkle, far shallower than the spirit of man. It was the abyss of human illusion that was the real, the tideless deep. He held his packet, which had come by book post, unopened on his knee, liking, in the lapse of so many joys (his illness had made him feel his age), to know that it was there, but taking for granted there could be no complete renewal of the pleasure, dear to young experience, of seeing oneself "just out." Dencombe, who had a reputation, had come out too often and knew too well in advance how he should look.

His postponement associated itself vaguely, after a little, with a group of three persons, two ladies and a young man, whom, beneath him, straggling and seemingly silent, he could see move slowly together along the sands. The gentleman had his head bent over a book, and was occasionally brought to a stop by the charm of this volume, which, as Dencombe could perceive even at a distance, had a cover alluringly red. Then his companions, going a little further, waited for him to come up, poking their parasols into the beach, looking around them at the sea and sky, and clearly sensible of the beauty of the day. To these things the young man with the book was still more clearly indifferent; lingering, credulous, absorbed, he was an object of envy to an observer from whose connection with literature all such artlessness had faded. One of the ladies was large and mature; the other had the spareness of comparative youth and of a social situation possibly inferior. The large lady carried back Dencombe's imagination to the age of crinoline; she wore a hat of the shape of a mushroom, decorated with a blue veil, and had the air, in her aggressive amplitude, of clinging to a vanished fashion or even a lost cause. Presently her companion produced from under the folds of a mantle a limp, portable chair which she stiffened out and of which the large lady took possession. This act, and something in the movement of either party, instantly characterized the performers—they performed for Dencombe's recreation—as opulent matron and humble dependent. What, moreover, was the use of being an approved novelist if one couldn't establish a relation between such figures; the clever theory, for instance, that the young man was the son of the opulent matron, and that the humble dependent, the daughter of a clergyman or an officer, nourished a secret passion for him? Was that not visible from the way she stole behind her protectress to look back at him? back to where he had let himself come to a full stop when his mother sat down to rest. His book was a novel; it had the catch-penny cover, and while the romance of life stood neglected at his side he lost himself in that of the circulating library. He moved mechanically to where the sand was softer, and ended by plumping down in it to finish his chapter at his ease. The humble dependent, discouraged by his remoteness, wandered, with a martyred droop of the head, in another direction, and the exorbitant lady, watching the waves, offered a confused resemblance to a flying machine that had broken down.

When his drama began to fail Dencombe remembered that he had, after all, another pastime. Though such promptitude on the part of the publisher was rare, he was already able to draw from its wrapper his "latest," perhaps his last. The cover of *The Middle Years* was duly meretricious, the smell of the fresh pages the very odor of sanctity; but for the moment he went no further —he had become conscious of a strange alienation. He had forgotten what his book was about. Had the assault of his old ailment, which he had so fallaciously come to Bournemouth to ward off, interposed utter blankness as to what had preceded it? He had finished the revision of proof before quitting London, but his subsequent fortnight in bed had passed the sponge over color. He couldn't have chanted to himself a single sentence, couldn't have turned with curiosity or confidence to any particular page. His subject had already gone from him, leaving scarcely a superstition behind. He uttered a low moan as he breathed the chill of this dark void, so desperately it seemed to represent the completion of a sinister process. The tears filled his mild eyes; something precious had passed away. This was the pang that had been sharpest during the last few years—the sense of ebbing time, of shrinking opportunity; and now he felt not so much that his last chance was going as that it was gone indeed. He had done all that he should ever do, and yet he had not done what he wanted. This was the laceration—that practically his career was over; it was as violent as a rough hand at his throat. He rose from his seat nervously, like a creature hunted by a

---

8 oneself "just out," that is, one's book just published

dread; then he fell back in his weakness and nervously opened his book. It was a single volume; he preferred single volumes and aimed at a rare compression. He began to read, and little by little, in this occupation, he was pacified and reassured. Everything came back to him, but came back with a wonder, came back, above all, with a high and magnificent beauty. He read his own prose, he turned his own leaves, and had, as he sat there with the spring sunshine on the page, an emotion peculiar and intense. His career was over, no doubt, but it was over, after all, with *that.*

He had forgotten during his illness the work of the previous year; but what he had chiefly forgotten was that it was extraordinarily good. He lived once more into his story and was drawn down, as by a siren's hand, to where, in the dim underworld of fiction, the great glazed tank of art, strange, silent subjects float. He recognized his motive and surrendered to his talent. Never, probably, had that talent, such as it was, been so fine. His difficulties were still there, but what was also there, to his perception, though probably, alas! to nobody's else, was the art that in most cases had surmounted them. In his surprised enjoyment of this ability he had a glimpse of a possible reprieve. Surely its force was not spent—there were life and service in it yet. It had not come to him easily, it had been backward and roundabout. It was the child of time, the nursling of delay; he had struggled and suffered for it, making sacrifices not to be counted, and now that it was really mature was it to cease to yield, to confess itself brutally beaten? There was an infinite charm for Dencombe in feeling as he had never felt before that diligence *vincit omnia.* The result produced in his little book was somehow a result beyond his conscious intention: it was as if he had planted his genius, had trusted his method, and they had grown up and flowered with this sweetness. If the achievement had been real, however, the process had been manful enough. What he saw so intensely today, what he felt as a nail driven in, was that only now, at the very last, had he come into possession. His development had been abnormally slow, almost grotesquely gradual. He had been hindered and retarded by experience, and for long periods had only groped his way. It had taken too much of his life to produce too little of his art. The art had come, but it had come after everything else. At such a rate a first existence was too short—long enough only to collect material; so that to fructify, to use the material, one must have a second age, an extension. This extension was what poor Dencombe sighed for. As he turned the last leaves of his volume he murmured: "Ah, for another go! ah, for a better chance!"

The three persons he had observed on the sands had vanished and then reappeared; they had now wandered up a path, an artificial and easy ascent, which led to the top of the cliff. Dencombe's bench was halfway down, on a sheltered ledge, and the large lady, a massive, heterogeneous person, with bold black eyes and kind red cheeks, now took a few moments to rest. She wore dirty gauntlets and immense diamond earrings; at first she looked vulgar, but she contradicted this announcement in an agreeable offhand tone. While her companions stood waiting for her she spread her skirts on the end of Dencombe's seat. The young man had gold spectacles, through which, with his finger still in his red-covered book, he glanced at the volume, bound in the same shade of the same color, lying on the lap of the original occupant of the bench. After an instant Dencombe understood that he was struck with a resemblance, had recognized the gilt stamp on the crimson cloth, was reading *The Middle Years,* and now perceived that somebody else had kept pace with him. The stranger was startled, possibly even a little ruffled, to find that he was not the only person who had been favored with an early copy. The eyes of the two proprietors met for a moment, and Dencombe borrowed amusement from the expression of those of his competitor, those, it might even be inferred, of his admirer. They confessed to some resentment—they seemed to say: "Hang it, has he got it *already?* Of course he's a brute of a reviewer!" Dencombe shuffled his copy out of sight while the opulent matron, rising from her repose, broke out: "I feel already the good of this air!"

"I can't say I do," said the angular lady. "I find myself quite let down."

"I find myself horribly hungry. At what time did you order lunch?" her protectress pursued.

The young person put the question by. "Dr. Hugh always orders it."

---

32 vincit omnia, conquers all things

"I ordered nothing today—I'm going to make you diet," said their comrade.

"Then I shall go home and sleep. *Qui dort, dine!*"

"Can I trust you to Miss Vernham?" asked Dr. Hugh of his elder companion.

"Don't I trust *you?*" she archly inquired.

"Not too much!" Miss Vernham, with her eyes on the ground, permitted herself to declare. "You must come with us at least to the house," she went on, while the personage on whom they appeared to be in attendance began to mount higher. She had got a little out of earshot; nevertheless Miss Vernham became, as far as Dencombe was concerned, less distinctly audible to murmur to the young man: "I don't think you realize all you owe the countess!"

Absently, a moment, Dr. Hugh caused his gold-rimmed spectacles to shine at her.

"Is that the way I strike you? I see—I see!"

"She's awfully good to us," continued Miss Vernham, compelled by her interlocutor's immovability to stand there in spite of his discussion of private matters. Of what use would it have been that Dencombe should be sensitive to shades had he not detected in that immovability a strange influence from the quiet old convalescent in the great tweed cape? Miss Vernham appeared suddenly to become aware of some such connection, for she added in a moment: "If you want to sun yourself here you can come back after you've seen us home."

Dr. Hugh, at this, hesitated, and Dencombe, in spite of a desire to pass for unconscious, risked a covert glance at him. What his eyes met this time, as it happened, was on the part of the young lady a queer stare, naturally vitreous, which made her aspect remind him of some figure (he couldn't name it) in a play or a novel, some sinister governess or tragic old maid. She seemed to scrutinize him, to challenge him, to say, from general spite· "What have you got to do with us?" At the same instant the rich humor of the countess reached them from above: "Come, come, my little lambs, you should follow your old *bergère!*" Miss Vernham turned away at this, pursuing the ascent, and Dr. Hugh, after another mute appeal to Dencombe and a moment's evident demur, deposited his book on the bench, as if to keep his place or even as a sign that he would return, and bounded without difficulty up the rougher part of the cliff.

Equally innocent and infinite are the pleasures of observation and the resources engendered by the habit of analyzing life. It amused poor Dencombe, as he dawdled in his tepid air bath, to think that he was waiting for a revelation of something at the back of a fine young mind. He looked hard at the book on the end of the bench, but he wouldn't have touched it for the world. It served his purpose to have a theory which should not be exposed to refutation. He already felt better of his melancholy; he had, according to his old formula, put his head at the window. A passing countess could draw off the fancy when, like the elder of the ladies who had just retreated, she was as obvious as the giantess of a caravan. It was indeed general views that were terrible; short ones, contrary to an opinion sometimes expressed, were the refuge, were the remedy. Dr. Hugh couldn't possibly be anything but a reviewer who had understandings for early copies with publishers or with newspapers. He reappeared in a quarter of an hour, with visible relief at finding Dencombe on the spot, and the gleam of white teeth in an embarrassed but generous smile. He was perceptibly disappointed at the eclipse of the other copy of the book; it was a pretext the less for speaking to the stranger. But he spoke notwithstanding; he held up his own copy and broke out pleadingly:

"*Do* say, if you have occasion to speak of it, that it's the best thing he has done yet!"

Dencombe responded with a laugh: "Done yet" was so amusing to him, made such a grand avenue of the future. Better still, the young man took *him* for a reviewer. He pulled out *The Middle Years* from under his cape, but instinctively concealed any telltale look of fatherhood. This was partly because a person was always a fool for calling attention to his work. "Is that what you're going to say yourself?" he inquired of his visitor.

"I'm not quite sure I shall write anything. I don't as a regular thing—I enjoy in peace. But it's awfully fine."

Dencombe debated a moment. If his interlocutor had begun to abuse him he would have confessed on the spot to his identity, but there was no harm in drawing him on a little to praise. He drew him on with such success that in a few moments his new acquaintance, seated by

---

his side, was confessing candidly that Dencombe's novels were the only ones he could read a second time. He had come the day before from London, where a friend of his, a journalist, had lent him his copy of the last—the copy sent to the office of the journal and already the subject of a "notice" which, as was pretended there (but one had to allow for "swagger"), it had taken a full quarter of an hour to prepare. He intimated that he was ashamed for his friend, and in the case of a work demanding and repaying study, of such inferior manners; and, with his fresh appreciation and inexplicable wish to express it, he speedily became for poor Dencombe a remarkable, a delightful apparition. Chance had brought the weary man of letters face to face with the greatest admirer in the new generation whom it was supposable he possessed. The admirer, in truth, was mystifying, so rare a case was it to find a bristling young doctor—he looked like a German physiologist—enamored of literary form. It was an accident, but happier than most accidents, so that Dencombe, exhilarated as well as confounded, spent half an hour in making his visitor talk while he kept himself quiet. He explained his premature possession of *The Middle Years* by an allusion to the friendship of the publisher, who, knowing he was at Bournemouth for his health, had paid him this graceful attention. He admitted that he had been ill, for Dr. Hugh would infallibly have guessed it; he even went so far as to wonder whether he mightn't look for some hygienic "tip" from a personage combining so bright an enthusiasm with a presumable knowledge of the remedies now in vogue. It would shake his faith a little perhaps to have to take a doctor seriously who could take *him* so seriously, but he enjoyed this gushing modern youth, and he felt with an acute pang that there would still be work to do in a world in which such odd combinations were presented. It was not true, what he had tried for renunciation's sake to believe, that all the combinations were exhausted. They were not, they were not—they were infinite; the exhaustion was in the miserable artist.

Dr. Hugh was an ardent physiologist, saturated with the spirit of the age—in other words he had just taken his degree; but he was independent and various, he talked like a man who would have preferred to love literature best. He would fain have made fine phrases, but nature had denied him the trick. Some of the finest in *The Middle Years* had struck him inordinately, and he took the liberty of reading them to Dencombe in support of his plea. He grew vivid, in the balmy air, to his companion, for whose deep refreshment he seemed to have been sent; and was particularly ingenuous in describing how recently he had become acquainted, and how instantly infatuated, with the only man who had put flesh between the ribs of an art that was starving on superstitions. He had not yet written to him—he was deterred by a sentiment of respect. Dencombe at this moment felicitated himself more than ever on having never answered the photographers. His visitor's attitude promised him a luxury of intercourse, but he surmised that a certain security in it, for Dr. Hugh, would depend not a little on the countess. He learned without delay with what variety of countess they were concerned, as well as the nature of the tie that united the curious trio. The large lady, an Englishwoman by birth and the daughter of a celebrated baritone, whose taste, without his talent, she had inherited, was the widow of a French nobleman and mistress of all that remained of the handsome fortune, the fruit of her father's earnings, that had constituted her dower. Miss Vernham, an odd creature but an accomplished pianist, was attached to her person at a salary. The countess was generous, independent, eccentric; she traveled with her minstrel and her medical man. Ignorant and passionate, she had nevertheless moments in which she was almost irresistible. Dencombe saw her sit for her portait in Dr. Hugh's free sketch, and felt the picture of his young friend's relation to her frame itself in his mind. This young friend, for a representative of the new psychology, was himself easily hypnotized, and if he became abnormally communicative it was only a sign of his real subjection. Dencombe did accordingly what he wanted with him, even without being known as Dencombe.

Taken ill on a journey in Switzerland the countess had picked him up at an hotel, and the accident of his happening to please her had made her offer him, with her imperious liberality, terms that couldn't fail to dazzle a practitioner without patients and whose resources had been drained dry by his studies. It was not the way he would have elected to spend his time, but it was time that would pass quickly, and meanwhile she was wonderfully kind. She exacted perpetual attention, but it was impossible not to like her. He gave details about his

queer patient, a "type" if there ever was one, who had in connection with her flushed obesity and in addition to the morbid strain of a violent and aimless will a grave organic disorder; but he came back to his loved novelist, whom he was so good as to pronounce more essentially a poet than many of those who went in for verse, with a zeal excited, as all his indiscretion had been excited, by the happy chance of Dencombe's sympathy and the coincidence of their occupation. Dencombe had confessed to a slight personal acquaintance with the author of *The Middle Years,* but had not felt himself as ready as he could have wished when his companion, who had never yet encountered a being so privileged, began to be eager for particulars. He even thought that Dr. Hugh's eye at that moment emitted a glimmer of suspicion. But the young man was too inflamed to be shrewd, and repeatedly caught up the book to exclaim: "Did you notice this?" or "Weren't you immensely struck with that?" "There's a beautiful passage toward the end," he broke out; and again he laid his hand upon the volume. As he turned the pages he came upon something else, while Dencombe saw him suddenly change color. He had taken up, as it lay on the bench, Dencombe's copy instead of his own, and his neighbor immediately guessed the reason of his start. Dr. Hugh looked grave an instant; then he said: "I see you've been altering the text!" Dencombe was a passionate corrector, a fingerer of style; the last thing he ever arrived at was a form final for himself. His ideal would have been to publish secretly, and then, on the published text, treat himself to the terrified revise, sacrificing always a first edition and beginning for posterity and even for the collectors, poor dears, with a second. This morning, in *The Middle Years,* his pencil had pricked a dozen lights. He was amused at the effect of the young man's reproach; for an instant it made him change color. He stammered, at any rate, ambiguously; then, through a blur of ebbing consciousness, saw Dr. Hugh's mystified eyes. He only had time to feel he was about to be ill again—that emotion, excitement, fatigue, the heat of the sun, the solicitation of the air, had combined to play him a trick, before, stretching out a hand to his visitor with a plaintive cry, he lost his senses altogether.

Later he knew that he had fainted and that Dr. Hugh had got him home in a bath chair, the conductor of which, prowling within hail for custom, had happened to remember seeing him in the garden of the hotel. He had recovered his perception in the transit, and had, in bed, that afternoon, a vague recollection of Dr. Hugh's young face, as they went together, bent over him in a comforting laugh and expressive of something more than a suspicion of his identity. That identity was ineffaceable now, and all the more that he was disappointed, disgusted. He had been rash, been stupid, had gone out too soon, stayed out too long. He oughtn't to have exposed himself to strangers, he ought to have taken his servant. He felt as if he had fallen into a hole too deep to descry any little patch of heaven. He was confused about the time that had elapsed—he pieced the fragments together. He had seen his doctor, the real one, the one who had treated him from the first and who had again been very kind. His servant was in and out on tiptoe, looking very wise after the fact. He said more than once something about the sharp young gentleman. The rest was vagueness, in so far as it wasn't despair. The vagueness, however, justified itself by dreams, dozing anxieties from which he finally emerged to the consciousness of a dark room and a shaded candle.

"You'll be all right again—I know all about you now," said a voice near him that he knew to be young. Then his meeting with Dr. Hugh came back. He was too discouraged to joke about it yet, but he was able to perceive, after a little, that the interest of it was intense for his visitor. "Of course I can't attend you professionally—you've got your own man, with whom I've talked and who's excellent," Dr. Hugh went on. "But you must let me come to see you as a good friend. I've just looked in before going to bed. You're doing beautifully, but it's a good job I was with you on the cliff. I shall come in early tomorrow. I want to do something for you. I want to do everything. You've done a tremendous lot for me." The young man held his hand, hanging over him, and poor Dencombe, weakly aware of this living pressure, simply lay there and accepted his devotion. He couldn't do anything less—he needed help too much.

The idea of the help he needed was very present to him that night, which he spent in a lucid stillness, an intensity of thought that constituted a reaction from his hours of stupor. He was lost, he was lost—he was lost if he couldn't be saved. He was not afraid of suffering,

of death; he was not even in love with life; but he had had a deep demonstration of desire. It came over him in the long, quiet hours that only with *The Middle Years* had he taken his flight; only on that day, visited by soundless processions, had he recognized his kingdom. He had had a revelation of his range. What he dreaded was the idea that his reputation should stand on the unfinished. It was not with his past but with his future that it should properly be concerned. Illness and age rose before him like specters with pitiless eyes: how was he to bribe such fates to give him the second chance? He had had the one chance that all men have—he had had the chance of life. He went to sleep again very late, and when he awoke Dr. Hugh was sitting by his head. There was already, by this time, something beautifully familiar in him.

"Don't think I've turned out your physician," he said; "I'm acting with his consent. He has been here and seen you. Somehow he seems to trust me. I told him how we happened to come together yesterday, and he recognizes that I've a peculiar right."

Dencombe looked at him with a calculating earnestness. "How have you squared the countess?"

The young man blushed a little, but he laughed. "Oh, never mind the countess!"

"You told me she was very exacting."

Dr. Hugh was silent a moment. "So she is."

"And Miss Vernham's an *intrigante.*"

"How do you know that?"

"I know everything. One *has* to, to write decently!"

"I think she's mad," said limpid Dr. Hugh.

"Well, don't quarrel with the countess—she's a present help to you."

"I don't quarrel," Dr. Hugh replied. "But I don't get on with silly women." Presently he added: "You seem very much alone."

"That often happens at my age. I've outlived, I've lost by the way."

Dr. Hugh hesitated; then surmounting a soft scruple: "Whom have you lost?"

"Everyone."

"Ah, no!" the young man murmured, laying a hand on his arm.

"I once had a wife—I once had a son. My wife died when my child was born, and my boy, at school, was carried off by typhoid."

"I wish I'd been there!" said Dr. Hugh simply.

"Well—if you're here!" Dencombe answered, with a smile that, in spite of dimness, showed how much he liked to be sure of his companion's whereabouts.

"You talk strangely of your age. You're not old."

"Hypocrite—so early!"

"I speak physiologically."

"That's the way I've been speaking for the last five years, and it's exactly what I've been saying to myself. It isn't till we *are* old that we begin to tell ourselves we're not!"

"Yet I know I myself am young," Dr. Hugh declared.

"Not so well as I!" laughed his patient, whose visitor indeed would have established the truth in question by the honesty with which he changed the point of view, remarking that it must be one of the charms of age—at any rate in the case of high distinction—to feel that one has labored and achieved. Dr. Hugh employed the common phrase about earning one's rest, and it made poor Dencombe, for an instant, almost angry. He recovered himself, however, to explain, lucidly enough, that if he, ungraciously, knew nothing of such a balm, it was doubtless because he had wasted inestimable years. He had followed Literature from the first, but he had taken a lifetime to get alongside of her. Only today, at last, had he begun to *see,* so that what he had hitherto done was a movement without a direction. He had ripened too late, and was so clumsily constituted that he had had to teach himself by mistakes.

"I prefer your flowers, then, to other people's fruit, and your mistakes to other people's successes," said gallant Dr. Hugh. "It's for your mistakes I admire you."

"You're happy—you don't know," Dencombe answered.

Looking at his watch the young man had got up; he named the hour of the afternoon at which he would return. Dencombe warned him against committing himself too deeply, and expressed again all his dread of making him neglect the countess—perhaps incur her displeasure.

"I want to be like you—I want to learn by mistakes!" Dr. Hugh laughed.

"Take care you don't make too grave a one! But do come back," Dencombe added, with the glimmer of a new idea.

"You should have had more vanity!" Dr. Hugh spoke

as if he knew the exact amount required to make a man of letters normal.

"No, no—I only should have had more time. I want another go."

"Another go?"

"I want an extension."

"An extension?" Again Dr. Hugh repeated Dencombe's words, with which he seemed to have been struck.

"Don't you know?—I want to what they call 'live.'"

The young man, for good-by, had taken his hand, which closed with a certain force. They looked at each other hard a moment. "You *will* live," said Dr. Hugh.

"Don't be superficial. It's too serious!"

"You *shall* live!" Dencombe's visitor declared, turning pale.

"Ah, that's better!" And as he retired the invalid, with a troubled laugh, sank gratefully back.

All that day and all the following night he wondered if it mightn't be arranged. His doctor came again, his servant was attentive, but it was to his confident young friend that he found himself mentally appealing. His collapse on the cliff was plausibly explained, and his liberation, on a better basis, promised for the morrow; meanwhile, however, the intensity of his meditations kept him tranquil and made him indifferent. The idea that occupied him was none the less absorbing because it was a morbid fancy. Here was a clever son of the age, ingenious and ardent, who happened to have set him up for connoisseurs to worship. This servant of his altar had all the new learning in science and all the old reverence in faith; wouldn't he therefore put his knowledge at the disposal of his sympathy, his craft at the disposal of his love? Couldn't he be trusted to invent a remedy for a poor artist to whose art he had paid a tribute? If he couldn't, the alternative was hard: Dencombe would have to surrender to silence, unvindicated and undivined. The rest of the day and all the next he toyed in secret with this sweet futility. Who would work the miracle for him but the young man who could combine such lucidity with such passion? He thought of the fairy tales of science, and charmed himself into forgetting that he looked for a magic that was not of this world. Dr. Hugh was an apparition, and that placed him above the law. He came and went while his patient, who sat up, followed him with supplicating eyes. The interest of knowing the great author had made the young man begin *The Middle Years* afresh, and would help him to find a deeper meaning in its pages. Dencombe had told him what he "tried for"; with all his intelligence, on a first perusal, Dr. Hugh had failed to guess it. The baffled celebrity wondered then who in the world *would* guess it; he was amused once more at the fine, full way with which an intention could be missed. Yet he wouldn't rail at the general mind today—consoling as that ever had been: the revelation of his own slowness had seemed to make all stupidity sacred.

Dr. Hugh, after a little, was visibly worried, confessing, on inquiry, to a source of embarrassment at home. "Stick to the countess—don't mind me," Dencombe said repeatedly; for his companion was frank enough about the large lady's attitude. She was so jealous that she had fallen ill—she resented such a breach of allegiance. She paid so much for his fidelity that she must have it all; she refused him the right to other sympathies, charged him with scheming to make her die alone, for it was needless to point out how little Miss Vernham was a resource in trouble. When Dr. Hugh mentioned that the countess would already have left Bournemouth if he hadn't kept her in bed, poor Dencombe held his arm tighter and said with decision: "Take her straight away." They had gone out together, walking back to the sheltered nook in which, the other day, they had met. The young man, who had given his companion a personal support, declared with emphasis that his conscience was clear—he could ride two horses at once. Didn't he dream, for his future, of a time when he should have to ride five hundred? Longing equally for virtue, Dencombe replied that in that golden age no patient would pretend to have contracted with him for his whole attention. On the part of the countess was not such an avidity lawful? Dr. Hugh denied it, said there was no contract, but only a free understanding, and that a sordid servitude was impossible to a generous spirit; he liked moreover to talk about art, and that was the subject on which, this time, as they sat together on the sunny bench, he tried most to engage the author of *The Middle Years*. Dencombe, soaring again a little on the weak wings of convalescence and still haunted by that happy notion of an organized rescue, found another strain of eloquence to plead the cause of a certain splendid "last manner," the very citadel, as it would prove, of his reputation, the

ered. While his listener gave up the morning and the great, still sea appeared to wait, he had a wonderful explanatory hour. Even for himself he was inspired as he told of what his treasure would consist—the precious metals he would dig from the mine, the jewels rare, strings of pearls, he would hang between the columns of his temple. He was wonderful for himself, so thick his convictions crowded; but he was still more wonderful for Dr. Hugh, who assured him, none the less, that the very pages he had just published were already encrusted with gems. The young man, however, panted for the combinations to come, and, before the face of the beautiful day renewed to Dencombe his guarantee that his profession would hold itself responsible for such a life. Then he suddenly clapped his hand upon his watch pocket and asked leave to absent himself for half an hour. Dencombe waited there for his return, but was at last recalled to the actual by the fall of a shadow across the ground. The shadow darkened into that of Miss Vernham, the young lady in attendance on the countess; whom Dencombe, recognizing her, perceived so clearly to have come to speak to him that he rose from his bench to acknowledge the civility. Miss Vernham indeed proved not particularly civil; she looked strangely agitated, and her type was now unmistakable.

"Excuse me if I inquire," she said, "whether it's too much to hope that you may be induced to leave Dr. Hugh alone." Then, before Dencombe, greatly disconcerted, could protest: "You ought to be informed that you stand in his light, that you may do him a terrible injury."

"Do you mean by causing the countess to dispense with his services?"

"By causing her to disinherit him." Dencombe stared at this, and Miss Vernham pursued, in the gratification of seeing she could produce an impression: "It has depended on himself to come into something very handsome. He has had a magnificent prospect, but I think you've succeeded in spoiling it."

"Not intentionally, I assure you. Is there no hope that the accident may be repaired?" Dencombe asked.

"She was ready to do anything for him. She takes great fancies, she lets herself go—it's her way. She has no relations, she's free to dispose of her money, and she's very ill."

"I'm very sorry to hear it," Dencombe stammered. mouth? That's what I've come to ask of you."

Poor Dencombe sank down on his bench. "I'm very ill myself, but I'll try!"

Miss Vernham still stood there with her colorless eyes and the brutality of her good conscience. "Before it's too late, please!" she said; and with this she turned her back, in order, quickly, as if it had been a business to which she could spare but a precious moment, to pass out of his sight.

Oh, yes! after this Dencombe was certainly very ill. Miss Vernham had upset him with her rough, fierce news; it was the sharpest shock to him to discover what was at stake for a penniless young man of fine parts. He sat trembling on his bench, staring at the waste of waters, feeling sick with the directness of the blow. He was indeed too weak, too unsteady, too alarmed; but he would make the effort to get away, for he couldn't accept the guilt of interference, and his honor was really involved. He would hobble home, at any rate, and then he would think what was to be done. He made his way back to the hotel and, as he went, had a characteristic vision of Miss Vernham's great motive. The countess hated women, of course; Dencombe was lucid about that; so the hungry pianist had no personal hopes and could only console herself with the bold conception of helping Dr. Hugh in order either to marry him after he should get his money or to induce him to recognize her title to compensation and buy her off. If she had befriended him at a fruitful crisis he would really, as a man of delicacy, and she knew what to think of that point, have to reckon with her.

At the hotel Dencombe's servant insisted on his going back to bed. The invalid had talked about catching a train and had begun with orders to pack; after which his humming nerves had yielded to a sense of sickness. He consented to see his physician, who immediately was sent for, but he wished it to be understood that his door was irrevocably closed to Dr. Hugh. He had his plan, which was so fine that he rejoiced in it after getting back to bed. Dr. Hugh, suddenly finding himself snubbed without mercy, would, in natural disgust and to the joy of Miss Vernham, renew his allegiance to the countess. When his physician arrived Dencombe learned that he was feverish and that this was very wrong; he was to cultivate calmness and try, if possible, not to think. For

the rest of the day he wooed stupidity; but there was an ache that kept him sentient, the probable sacrifice of his "extension," the limit of his course. His medical adviser was anything but pleased; his successive relapses were ominous. He charged this personage to put out a strong hand and take Dr. Hugh off his mind—it would contribute so much to his being quiet. The agitating name, in his room, was not mentioned again, but his security was a smothered fear, and it was not confirmed by the receipt, at ten o'clock that evening, of a telegram which his servant opened and read for him and to which, with an address in London, the signature of Miss Vernham was attached. "Beseech you to use all influence to make our friend join us here in the morning. Countess much the worse for dreadful journey, but everything may still be saved." The two ladies had gathered themselves up and had been capable in the afternoon of a spiteful revolution. They had started for the capital, and if the elder one, as Miss Vernham had announced, was very ill, she had wished to make it clear that she was proportionately reckless. Poor Dencombe, who was not reckless, and who only desired that everything should indeed be "saved," sent this missive straight off to the young man's lodging and had on the morrow the pleasure of knowing that he had quitted Bournemouth by an early train.

Two days later he pressed in with a copy of a literary journal in his hand. He had returned because he was anxious and for the pleasure of flourishing the great review of *The Middle Years*. Here at least was something adequate—it rose to the occasion; it was an acclamation, a reparation, a critical attempt to place the author in the niche he had fairly won. Dencombe accepted and submitted; he made neither objection nor inquiry, for old complications had returned and he had had two atrocious days. He was convinced not only that he should never again leave his bed, so that his young friend might pardonably remain, but that the demand he should make on the patience of beholders would be very moderate indeed. Dr. Hugh had been to town, and he tried to find in his eyes some confession that the countess was pacified and his legacy clinched; but all he could see there was the light of his juvenile joy in two or three of the phrases of the newspaper. Dencombe couldn't read them, but when his visitor had insisted on repeating them more than once he was able to shake an unintoxicated head. "Ah, no! but they would have been true of what I *could* have done!"

"What people 'could have done' is mainly what they've in fact done," Dr. Hugh contended.

"Mainly, yes; but I've been an idiot!" said Dencombe.

Dr. Hugh did remain; the end was coming fast. Two days later Dencombe observed to him, by way of the feeblest of jokes, that there would now be no question whatever of a second chance. At this the young man stared; then he exclaimed: "Why, it has come to pass—it has come to pass! The second chance has been the public's—the chance to find the point of view, to pick up the pearl!"

"Oh, the pearl!" poor Dencombe uneasily sighed. A smile as cold as a winter sunset flickered on his drawn lips as he added: "The pearl is the unwritten—the pearl is the unalloyed, the *rest*, the lost!"

From that moment he was less and less present, heedless to all appearance of what went on around him. His disease was definitely mortal, of an action as relentless, after the short arrest that had enabled him to fall in with Dr. Hugh, as a leak in a great ship. Sinking steadily, though this visitor, a man of rare resources, now cordially approved by his physician, showed endless art in guarding him from pain, poor Dencombe kept no reckoning of favor or neglect, betrayed no symptom of regret or speculation. Yet toward the last he gave a sign of having noticed that for two days Dr. Hugh had not been in his room, a sign that consisted of his suddenly opening his eyes to ask of him if he had spent the interval with the countess.

"The countess is dead," said Dr. Hugh. "I knew that in a particular contingency she wouldn't resist. I went to her grave."

Dencombe's eyes opened wider. "She left you 'something handsome'?"

The young man gave a laugh almost too light for a chamber of woe. "Never a penny! She roundly cursed me."

"Cursed you?" Dencombe murmured.

"For giving her up. I gave her up for *you*. I had to choose," his companion explained.

"You chose to let a fortune go?"

"I chose to accept, whatever they might be, the consequences of my infatuation," smiled Dr. Hugh. Then, as

a larger pleasantry: "A fortune be hanged! It's your own fault if I can't get your things out of my head."

The immediate tribute to his humor was a long, bewildered moan; after which, for many hours, many days Dencombe lay motionless and absent. A response so absolute, such a glimpse of a definite result, and such a sense of credit worked together in his mind and producing a strange commotion, slowly altered and transfigured his despair. The sense of cold submersion left him—he seemed to float without an effort. The incident was extraordinary as evidence, and it shed an intenser light. At the last he signed to Dr. Hugh to listen, and, when he was down on his knees by the pillow, brought him very near.

"You've made me think it all a delusion."

"Not your glory, my dear friend," stammered the young man.

"Not my glory—what there is of it! It *is* glory—to have been tested, to have had our little quality, and cast our little spell. The thing is to have made somebody care. You happen to be crazy, of course, but that doesn't affect the law."

"You're a great success!" said Dr. Hugh, putting into his young voice the ring of a marriage bell.

Dencombe lay taking this in; then he gathered strength to speak once more. "A second chance—*that's* the delusion. There never was to be but one. We work in the dark—we do what we can—we give what we have. Our doubt is our passion, and our passion is our task. The rest is the madness of art."

"If you've doubted, if you've despaired, you've always 'done' it," his visitor subtly argued.

"We've done something or other," Dencombe conceded.

"Something or other is everything. It's the feasible. It's *you!*"

"Comforter!" poor Dencombe ironically sighed.

"But it's true," insisted his friend.

"It's true. It's frustration that doesn't count."

"Frustration's only life," said Dr. Hugh.

"Yes, it's what passes." Poor Dencombe was barely audible, but he had marked with the words the virtual end of his first and only chance.

1895

The Two Faces

"The Two Faces" first appeared (under the title "The Faces") in Harper's Bazaar in 1900.

The story well illustrates the characteristics of James' last phase: the closely knit structure, the complex style, the psychological subtlety, and the ironical emphasis are seen here in full development. Though dramatic in its method to an unusual degree, since dialogue is extensively used, the story nevertheless is told from the point of view of a single character, Shirley Sutton: "It is with Sutton's total impression," the author says quite explicitly, "that we are particularly and almost exclusively concerned." Sutton's, therefore, is the only consciousness into which the reader is given direct glimpses. But our interest in him is hardly as great (despite his apparently genuine disappointment in the object of his admiration) as our interest in the cruel Mrs. Grantham and her pathetic victim. The London world of fashion, as James portrays it, was a world of pretentious formalism, spitefulness, and intrigue.

Though James preferred the two-volume novel, he prided himself upon his ability to present an action capable of novel-length treatment within the confines of the short story. "The Two Faces" seemed to him a remarkable instance, even among his own short pieces, of skillful compression, for apropos of this story, James spoke of "the thrilling question of the poor painter's tormented acceptance, in advance, of the scanted canvas; of the writer's rueful, hopeful assent to the conditions known to him as 'too little room to turn round.'" It would be "of the liveliest interest, then," he said, "to see how he may nevertheless...effectively manoeuvre." "The value of the 'The Two Faces,'" he went on, "is thus peculiarly an economic one...The neat evolution, as I call it, the example of the turn of the whole coach and pair in the contracted court, without the 'spill' of a single passenger or the

derangement of a single parcel, is only in three or four cases (where the coach is fuller still) more appreciable."

The servant, who, in spite of his sealed stamped look, appeared to have his reasons, stood there for instruction in a manner not quite usual after announcing the name Mrs. Grantham, however, took it up—"Lord Gwyther?"—with a quick surprise that for an instant justified him even to the small scintilla in the glance she gave her companion, which might have had exactly the sense of the butler's hesitation. This companion, a shortish fairish youngish man, clean-shaven and keen-eyed, had, with a promptitude that would have struck an observer—which the butler indeed was—sprung to his feet and moved to the chimney-piece, though his hostess herself meanwhile managed not otherwise to stir. "Well?" she said as for the visitor to advance; which she immediately followed with a sharper "He's not there?"

"Shall I show him up, ma'am?"

"But of course!" The point of his doubt made her at last rise for impatience, and Bates, before leaving the room, might still have caught the achieved irony of her appeal to the gentleman into whose communion with her he had broken. "Why in the world not—? What a way—!" she exclaimed as Sutton felt beside his cheek the passage of her eyes to the glass behind him.

"He wasn't sure you'd see anyone."

"I don't see 'any one,' but I see individuals."

"That's just it—and sometimes you don't see them."

"Do you mean ever because of *you?*" she asked as she touched into place a tendril of hair. "That's just his impertinence, as to which I shall speak to him."

"Don't," said Shirley Sutton. "Never notice anything."

"That's nice advice from you," she laughed, "who notice everything!"

"Ah but I speak of nothing."

She looked at him a moment. "You're still more impertinent than Bates. You'll please not budge," she went on.

"Really? I must sit him out?" he continued as, after a minute, she had not again spoken—only glancing about, while she changed her place, partly for another look at the glass and partly to see if she could improve her seat. What she felt was rather more than, clever and charming though she was, she could hide. "If you're wondering how you seem I can tell you. Awfully cool and easy."

She gave him another stare. She was beautiful and conscious. "And if you're wondering how *you* seem—"

"Oh I'm not!" he laughed from before the fire. "I always perfectly know."

"How you seem," she retorted, "is as if you didn't!"

Once more for a little he watched her. "You're looking lovely for him—extraordinarily lovely, within the marked limits of your range. But that's enough. Don't be clever."

"Then who *will* be?"

"There you are!" he sighed with amusement.

"Do you know him?" she asked as, through the door left open by Bates, they heard steps on the landing.

Sutton had to think an instant, and produced a "No" just as Lord Gwyther was again announced, which gave an unexpectedness to the greeting offered him a moment later by this personage—a young man, stout and smooth and fresh, but not at all shy, who, after the happiest rapid passage with Mrs. Grantham, put out a hand with a straight free "How d'ye do?"

"Mr. Shirley Sutton," Mrs. Grantham explained.

"Oh yes," said her second visitor quite as if he knew; which, as he couldn't have known, had for her first the interest of confirming a perception that his lordship would be—no, not at all, in general embarrassed, only was now exceptionally and especially agitated. As it is, for that matter, with Sutton's total impression that we are particularly and almost exclusively concerned, it may be further mentioned that he was not less clear as to the really handsome way in which the young man kept himself together and little by little—though with all proper aid indeed—finally found his feet. All sorts of things, for the twenty minutes, occurred to Sutton, though one of them was certainly not that it would, after all, be better he should go. One of them was that their hostess was doing it in perfection—simply, easily, kindly, yet with something the least bit queer in her wonderful eyes; another was that if he had been recognized without the least ground it was through a tension of nerves on the part of his fellow guest that produced inconsequent motions; still another was that, even had departure been indicated, he would positively have felt dissuasion in the rare promise of the scene. This was in especial after Lord Gwyther not only had announced that he was now married, but had mentioned

that he wished to bring his wife to Mrs. Grantham for the benefit so certain to be derived. It was the passage immediately produced by that speech that provoked in Sutton the intensity, as it were, of his arrest. He already knew of the marriage as well as Mrs. Grantham herself, and as well also as he knew of some other things, and this gave him doubtless the better measure of what took place before him and the keener consciousness of the quick look that, at a marked moment—though it was not absolutely meant for him any more than his companion —Mrs. Grantham let him catch.

She smiled, but it had a gravity. "I think, you know, you ought to have told me before."

"Do you mean when I first got engaged? Well, it all took place so far away, and we really told, at home, so few people."

Oh there might have been reasons; but it had not been quite right. "You were married at Stuttgart? That wasn't too far for *my* interest, at least, to reach."

"Awfully kind of you—and of course one knew you *would* be kind. But it wasn't at Stuttgart; it was over there, but quite in the country. We should have managed it in England but that her mother naturally wished to be present, yet wasn't in health to come. So it was really, you see, a sort of little hole-and-corner German affair."

This didn't in the least check Mrs. Grantham's claim, but it started a slight anxiety. "Will she be—a—then German?"

Sutton knew her to know perfectly what Lady Gwyther would "be," but he had by this time, while their friend explained, his independent interest. "Oh dear no! My father-in-law has never parted with the proud birthright of a Briton. But his wife, you see, holds an estate in Wurtemberg from *her* mother, Countess Kremnitz, on which, with the awful condition of his English property, you know, they've found it for years a tremendous saving to live. So that though Valda was luckily born at home she has practically spent her life over there."

"Oh I see." Then, after a slight pause, "Is Valda her pretty name?" Mrs. Grantham asked.

"Well," said the young man, only wishing, in his candor, it was clear, to be drawn out—"well, she has, in the manner of her mother's people, about thirteen; but that's the one we generally use."

Mrs. Grantham waited but an instant. "Than may *I* generally use it?"

"It would be too charming of you; and nothing would give her—as I assure you nothing would give *me*—greater pleasure." Lord Gwyther quite glowed with the thought.

"Then I think that instead of coming alone you might have brought her to see me."

"It's exactly what," he instantly replied, "I came to ask your leave to do." He explained that for the moment Lady Gwyther was not in town, having as soon as she arrived gone down to Torquay to put in a few days with one of her aunts, also her godmother, to whom she was an object of great interest. She had seen no one yet, and no one—not that *that* mattered—had seen her; she knew nothing whatever of London and was awfully frightened at facing it and at what (however little) might be expected of her. "She wants some one," he said, "some one who knows the whole thing, don't you see? and who's thoroughly kind and clever, as you would be, if I may say so, to take her by the hand." It was at this point and on these words that the eyes of Lord Gwyther's two auditors inevitably and wonderfully met. But there was nothing in the way he kept it up to show he caught the encounter. "She wants, if I may tell you so, a real friend for the great labyrinth; and asking myself what I could do to make things ready for her, and who would be absolutely the best woman in London—"

"You thought naturally of *me?*" Mrs. Grantham had listened with no sign but the faint flash just noted; now, however, she gave him the full light of her expressive face—which immediately brought Shirley Sutton, looking at his watch, once more to his feet.

"She *is* the best woman in London!" He addressed himself with a laugh to the other visitor, but offered his hand in farewell to their hostess.

"You're going?"

"I must," he said without scruple.

"Then we do meet at dinner?"

"I hope so." On which, to take leave, he returned with interest to Lord Gwyther the friendly clutch he had a short time before received.

II

They did meet at dinner, and if they were not, as it happened, side by side, they made that up afterwards in the happiest angle of a drawing-room that offered both shine and shadow and that was positively much appreciated, in the circle in which they moved, for the favorable "corners" created by its shrewd mistress. Mrs. Grantham's face, charged with something produced in it by Lord Gwyther's visit, had been with him so constantly

for the previous hours that, when she instantly challenged him on his "treatment" of her in the afternoon, he was on the point of naming it as his reason for not having remained with her. Something new had quickly come into her beauty; he couldn't as yet have said what, nor whether on the whole to its advantage or its loss. Till he should see this clearer, at any rate he would say nothing; so that he found with sufficient presence of mind a better excuse. If in short he had in defiance of her particular request left her alone with Lord Gwyther it was simply because the situation had suddenly turned so exciting that he had fairly feared the contagion of it—the temptation of its making him, most improperly, put in his word.

They could now talk of these things at their ease. Other couples, ensconced and scattered, enjoyed the same privilege, and Sutton had more and more the profit, such as it was, of feeling that his interest in Mrs. Grantham had become—what was the luxury of so high a social code—an acknowledged and protected relation. He knew his London well enough to know that he was on the way to be regarded as her main source of consolation for the trick Lord Gwyther had several months before publicly played on her. Many persons had not held that, by the high social code in question, his lordship could have "reserved the right" to turn up that way, from one day to another, engaged to be married. For himself London took, with its short cuts and its cheap psychology, an immense deal for granted. To his own sense he was never —could in the nature of things never be—any man's successor. Just what had constituted the predecessorship of other men was apparently that they had been able to make up their mind. He, worse luck, was at the mercy of her face, and more than ever at the mercy of it now, which meant moreover not that it made a slave of him, but that it made, disconcertingly, a sceptic. It was the absolute perfection of the handsome, but things had a way of coming into it. "I felt," he said, "that you were there together at a point at which you had a right to the ease the absence of a listener would give. I was sure that when you made me promise to stay you hadn't guessed—"

"That he could possibly have come to me on such an extraordinary errand? No, of course I hadn't guessed. Who *would?* But didn't you see how little I was upset by it?"

Sutton demurred. Then with a smile: "I think *he* saw how little."

"You yourself didn't then?"

He again held back, but not, after all, to answer. "He was wonderful, wasn't he?"

"I think he was," she returned after a moment. To which she added: "Why did he pretend that way he knew you?"

"He didn't pretend. He felt somehow on the spot that I was 'in it.' " Sutton had found this afterwards and found it to represent a reality. "It was an effusion of cheer and hope. He was so glad to see me there and to find you happy."

"Happy?"

"Happy. Aren't you?"

"Because of *you?*"

"Well,—according to the impression he received as he came in."

"That was sudden then," she asked, "and unexpected?"

Her companion thought. "Prepared in some degree, but confirmed by the sight of us, there together, so awfully jolly and sociable over your fire."

Mrs. Grantham turned this round. "If he knew I was 'happy' then—which, by the way, is none of his business, nor of yours either—why in the world did he come?"

"Well, for good manners, and for his idea," said Sutton.

She took it in, appearing to have no hardness of rancor that could bar discussion. "Do you mean by his idea his proposal that I should grandmother his wife? And if you do is the proposal your reason for calling him wonderful?"

Sutton laughed. "Pray what's yours?" As this was a question, however, that she took her time to answer or not to answer—only appearing interested for a moment in a combination that had formed itself on the other side of the room—he presently went on. "What's *his?*—that would seem to be the point. His, I mean, for having decided on the extraordinary step of throwing his little wife, bound hands and feet, into your arms. Intelligent as you are, and with these three or four hours to have thought it over, I yet don't see how that can fail still to mystify you."

She continued to watch their opposite neighbors. " 'Little,' you call her. Is she so very small?"

"Tiny, tiny—she *must* be; as different as possible in every way—of necessity—from you. They always *are* the opposite pole, you know," said Shirley Sutton.

She glanced at him now. "You strike me as of an impudence—!"

"No, no. I only like to make it out with you."

She looked away again and after a little went on. "I'm sure she's charming, and only hope one isn't to gather he's already tired of her."

"Not a bit! He's tremendously in love, and he'll remain so."

"So much the better. And if it's a question," said Mrs. Grantham, "of one's doing what one can for her, he has only, as I told him when you had gone, to give me the chance."

"Good! So he *is* to commit her to you?"

"You use extraordinary expressions, but it's settled that he brings her."

"And you'll really and truly help her?"

"Really and truly?" said Mrs. Grantham with her eyes again on him. "Why not? For what do you take me?"

"Ah isn't that just what I still have the discomfort, every day I live, of asking myself?"

She had made, as she spoke, a movement to rise, which, as if she was tired of his tone, his last words appeared to determine. But, also getting up, he held her, when they were on their feet, long enough to hear the rest of what he had to say. "If you do help her, you know, you'll show him you've understood."

"Understood what?"

"Why, his idea—the deep acute train of reasoning that has led him to take, as one may say, the bull by the horns; to reflect that as you might, as you probably *would*, in any case, get at her, he plays the wise game, as well as the bold one, by treating your generosity as a real thing and placing himself publicly under an obligation to you."

Mrs. Grantham showed not only that she had listened, but that she had for an instant considered. "What is it you elegantly describe as my getting 'at' her?"

"He takes his risk, but puts you, you see, on your honor."

She thought a moment more. "What profundities indeed then over the simplest of matters! And if your idea is," she went on, "that if I do help her I shall show him I've understood them, so it will be that if I don't—"

"You'll show him"—Sutton took her up—"that you haven't? Precisely. But in spite of not wanting to appear to have understood *too* much—"

"I may still be depended on to do what I can? Quite certainly. You'll see what I may still be depended on to do." And she moved away.

III

It was not, doubtless, that there had been anything in their rather sharp separation at that moment to sustain or prolong the interruption; yet it definitely befell that, circumstances aiding, they practically failed to meet again before the great party at Burbeck. This occasion was to gather in some thirty persons from a certain Friday to the following Monday, and it was on the Friday that Sutton went down. He had known in advance that Mrs. Grantham was to be there, and this perhaps, during the interval of hindrance, had helped him a little to be patient. He had before him that certitude of a real full cup—two days brimming over with the sight of her. He found, however, on his arrival that she was not yet in the field, and presently learned that her place would be in a small contingent that was to join the party on the morrow. This knowledge he extracted from Miss Banker, who was always the first to present herself at any gathering that was to enjoy her, and whom, moreover—partly on that very account—the wary not less than the speculative were apt to hold themselves well-advised to engage with at as early as possible a stage of the business. She was stout red rich mature universal—a massive much-fingered volume, alphabetical wonderful indexed, that opened of itself at the right place. She opened for Sutton instinctively at G—, which happened to be remarkably convenient. "What she's really waiting for is to bring down Lady Gwyther."

"Ah, the Gwythers are coming?"

"Yes; caught, through Mrs. Grantham, just in time. *She'll* be the feature—every one wants to see her."

Speculation and wariness met and combined at this moment in Shirley Sutton. "Do you mean—a—Mrs. Grantham?"

"Dear no! Poor little Lady Gwyther, who, but just arrived in England, appears now literally for the first time in her life in any society whatever, and whom (don't you know the extraordinary story? You ought to —*you!*) she, of all people, has so wonderfully taken up. It will be quite—here—as if she were 'presenting' her."

Sutton of course took in more things than even appeared. "I never know what I ought to know; I only know, inveterately, what I oughtn't. So what *is* the extraordinary story?"

"You really haven't heard—?"

"Really," he replied without winking.

"It happened indeed but the other day," said Miss Banker, "yet every one's already wondering. Gwyther has thrown his wife on her mercy—but I won't believe you if you pretend to me you don't know why he shouldn't."

Sutton asked himself then what he *could* pretend. "Do you mean because she's merciless?"

She hesitated. "If you don't know perhaps I oughtn't to tell you."

He liked Miss Banker and found just the right tone to plead. "*Do* tell me."

"Well," she sighed, "it will be your own fault—! They had been such friends that there could have been but one name for the crudity of his original *procédé*. When I was a girl we used to call it throwing over. They call it in French to *lâcher*. But I refer not so much to the act itself as to the manner of it, though you may say indeed of course that there's in such cases after all only one manner. Least said soonest mended."

Sutton seemed to wonder. "Oh he said too much?"

"He said nothing. That was it."

Sutton kept it up. "But was *what?*"

"Why, what she must, like any woman in her shoes, have felt to be his perfidy. He simply went and *did* it—took to himself this child, that is, without the preliminary of a scandal or a rupture—before she could turn round."

"I follow you. But it would appear from what you say that she *has* turned round now."

"Well," Miss Banker laughed, "we shall see for ourselves how far. It will be what every one will try to see."

"Oh then we've work cut out!" And Sutton certainly felt that he himself had—an impression that lost nothing from a further talk with Miss Banker in the course of a short stroll in the grounds with her the next day. He spoke as one who had now considered many things.

"Did I understand from you yesterday that Lady Gwyther's a 'child'?"

"Nobody knows. It's prodigious the way she has managed."

"The way Lady Gwyther has—?"

"No, the way May Grantham has kept her till this hour in her pocket."

He was quick at his watch. "Do you mean by 'this hour' that they're due now?"

"Not till tea. All the others arrive together in time for that." Miss Banker had clearly, since the previous day, filled in gaps and become, as it were, revised and enlarged. "She'll have kept a cat from seeing her, so as to produce her entirely herself."

"Well," Sutton mused, "that will have been a very noble sort of return—"

"For Gwyther's behavior? Very. Yet I feel creepy."

"Creepy?"

"Because so much depends for the girl—in the way of the right start or the wrong start—on the signs and omens of this first appearance. It's a great house and a great occasion, and we're assembled here, it strikes me, very much as the Roman mob at the circus used to be to see the next Christian maiden brought out to the tigers."

"Oh if she *is* a Christian maiden—!" Sutton murmured. But he stopped at what his imagination called up.

It perhaps fed that faculty a little that Miss Banker had the effect of making out that Mrs. Grantham might individually be, in any case, something of a Roman matron. "She has kept her in the dark so that we may only take her from her hand. She'll have formed her for us."

"In so few days?"

"Well, she'll have prepared her—decked her for the sacrifice with ribbons and flowers."

"Ah if you only mean that she'll have taken her to her dressmaker—!" And it came to Sutton, at once as a new light and as a check, almost, to anxiety, that this was all poor Gwyther, mistrustful probably of a taste formed by Stuttgart, might have desired of their friend.

There were usually at Burbeck many things taking place at once; so that wherever else, on such occasions, tea might be served, it went forward with matchless pomp, weather permitting, on a shaded stretch of one of the terraces and in presence of one of the prospects. Shirley Sutton, moving, as the afternoon waned, more restlessly about and mingling in dispersed groups only to find they had nothing to keep him quiet, came upon it as he turned a corner of the house—saw it seated there in all its state. It might be said that at Burbeck it was, like everything else, made the most of. It constituted immediately, with multiplied tables and glittering plate, with rugs and cushions and ices and fruit and wonderful porcelain and beautiful women, a scene of splendor, almost an incident of grand opera. One of the beautiful women might quite have been expected to rise with a gold cup and a celebrated song.

---

14 **procédé**, behavior 16 **lâcher**, let go, cast off

One of them did rise, as happened, while Sutton drew near, and he found himself a moment later seeing nothing and nobody but Mrs. Grantham. They met on the terrace, just away from the others, and the movement in which he had the effect of arresting her might have been that of withdrawal. He quickly saw, however, that if she had been about to pass into the house it was only on some errand—to get something or to call some one—that would immediately have restored her to her public. It somehow struck him on the spot—and more than ever yet, though the impression was not wholly new to him—that she felt herself a figure for the forefront of the stage and indeed would have been recognized by any one at a glance as the *prima donna assoluta.* She caused, in fact, during the few minutes he stood talking to her, an extraordinary series of waves to roll extraordinarily fast over his sense, not the least mark of the matter being that the appearance with which it ended was again the one with which it had begun. "The face—the face," as he kept dumbly repeating; that was at last, as at first, all he could clearly see. She had a perfection resplendent, but what in the world had it done, this perfection, to her beauty? It was her beauty doubtless that looked out at him, but it was into something else that, as their eyes met, he strangely found himself looking

It was as if something had happened in consequence of which she had changed, and there was that in this swift perception that made him glance eagerly about for Lady Gwyther. But as he took in the recruited group—identities of the hour added to those of the previous twenty-four—he saw, among his recognitions, one of which was the husband of the person missing, that Lady Gwyther was not there. Nothing in the whole business was more singular than his consciousness that, as he came back to his interlocutress after the nods and smiles and handwaves he had launched, she knew what had been his thought She knew for whom he had looked without success; but why should this knowledge visibly have hardened and sharpened her, and precisely at a moment when she was unprecedentedly magnificent? The indefinable apprehension that had somewhat sunk after his second talk with Miss Banker and then had perversely risen again—this nameless anxiety now produced on him, with a sudden sharper pinch, the effect of a great suspense. The action of that, in turn, was to show him that he hadn't yet fully known how much he had at stake on a final view. It was revealed to him for the first time that he "really cared" whether Mrs. Grantham were a safe nature. It was too ridiculous by what a thread it hung, but something was certainly in the air that would definitely tell him.

What was in the air descended in the next moment to earth. He turned round as he caught the expression with which her eyes attached themselves to something that approached. A little person, very young and very much dressed, had come out of the house, and the expression in Mrs. Grantham's eyes was that of the artist confronted with her work and interested, even to impatience, in the judgment of others. The little person drew nearer, and though Sutton's companion, without looking at him now, gave it a name and met it, he had jumped for himself at certitude. He saw many things—too many, and they appeared to be feathers, frills, excrescences of silk and lace—massed together and conflicting, and after a moment also saw struggling out of them a small face that struck him as either scared or sick. Then, with his eyes again returning to Mrs. Grantham, he saw another.

He had no more talk with Miss Banker till late that evening—an evening during which he had felt himself too noticeably silent; but something had passed between this pair, across dinner-table and drawing-room, without speech, and when they at last found words it was in the needed ease of a quiet end of the long, lighted gallery, where she opened again at the very paragraph.

"You were right—that *was* it. She did the only thing that, at such short notice, she *could* do. She took her to her dressmaker."

Sutton, with his back to the reach of the gallery, had, as if to banish a vision, buried his eyes for a minute in his hands. "And oh the face—the face!"

"Which?" Miss Banker asked.

"Whichever one looks at."

"But May Grantham's glorious. She has turned herself out—"

"With a splendor of taste and a sense of effect, eh? Yes." Sutton showed he saw far.

"She *has* the sense of effect. The sense of effect as exhibited in Lady Gwyther's clothes—!" was something Miss Banker failed of words to express. "Everybody's overwhelmed. Here, you know, that sort of thing's grave. The poor creature's lost."

---

14 **prima donna assoluta,** prima donna in an absolute sense—without rival

"Lost?"

"Since on the first impression, as we said, so much depends. The first impression's made—oh made!—I defy her now ever to unmake it. Her husband, who's proud, won't like her the better for it. And I don't see," Miss Banker went on, "that her prettiness *was* enough—a mere little feverish frightened freshness; what *did* he see in her?—to be so blasted. It has been done with an atrocity of art—"

"That supposes the dressmaker then also a devil?"

"Oh your London women and their dressmakers!" Miss Banker laughed.

"But the face—the face!" Sutton woefully repeated.

"May's?"

"The little girl's. It's exquisite."

"Exquisite?"

"For unimaginable pathos."

"Oh!" Miss Banker dropped.

"She has at last begun to see." Sutton showed again how far *he* saw. "It glimmers upon her innocence, she makes it dimly out—what has been done with her. She's even worse this evening—the way, my eye, she looked at dinner!—than when she came. Yes"—he was confident —"it has dawned (how couldn't it, out of all of you?) and she knows."

"She ought to have known before!" Miss Banker intelligently sighed.

"No; she wouldn't in that case have been so beautiful."

"Beautiful?" cried Miss Banker; "over loaded like a monkey in a show!"

"The face, yes; which goes to the heart. It's that that makes it," said Shirley Sutton. "And it's that"—he thought it out—"that makes the other."

"I see. Conscious?"

"Horrible!"

"You take it hard," said Miss Banker.

Lord Gwyther, just before she spoke, had come in sight and was now near them. Sutton on this, appearing to wish to avoid him, reached, before answering his companion's observation, a door that opened close at hand. "So hard," he replied from that point, "that I shall be off tomorrow morning."

"And not see the rest?" she called after him.

But he had already gone, and Lord Gwyther, arriving, amiably took up her question. "The rest of what?"

Miss Banker looked him well in the eyes. "Of Mrs. Grantham's clothes."

1903

REALISTS AND NATURALISTS: Garland, Crane, Norris, Dreiser

Hamlin Garland

1860 • 1940

In the battle of the realists against "effete romanticism" in the 1890's, William Dean Howells had perhaps his most militant ally in Hamlin Garland. For Garland, indeed, "realism" was too tame a term; he preferred to call himself a "veritist" or truth stater and his first important book, *Main-Travelled Roads* (1891), came close to being the most completely honest volume of its decade. Garland lacked the deep-rooted convictions and patience that Howells had; he fought with pitchforks and was easily discouraged. To most critics, therefore, Garland's is a story

of failure, of giving way to economic and social pressure.

The details of Garland's life are to be found in numerous autobiographical books, of which the most notable is *A Son of the Middle Border* (1917). Born in 1860 on a farm in western Wisconsin, he moved with his family first to northeastern Iowa, where he attended Cedar Valley Seminary at Osage, and then to northeastern South Dakota. As a boy he learned the endless routine of the dirt farmer—caring for stock, plowing, dragging, sowing, cultivating, harvesting. The world of books was more attractive, and, encouraged by his mother, he determined to make himself a teacher.

He chose to study in Boston and there, between 1884 and 1887, he quickly educated himself in the theaters, in the homes of friendly writers, actors, and artists, most of all in the Boston Public Library. He discovered Herbert Spencer and Henrik Ibsen and impressionism and the new novelists of Europe, realists most of them. Unsophisticated and far from intellectually radical, he was nevertheless influenced by the restlessness of the age.

Then, in 1887, he returned to South Dakota to visit his parents. His visit was to a West suffering the ills which were soon to call forth the People's Party and the oratory of William Jennings Bryan. Garland saw that farm life was far from idyllic and that the frontier had not fulfilled its promise. When he returned to Boston he wrote the tales collected in *Main-Travelled Roads.*

Garland's tragedy was that he never surpassed this initial effort. For a time, encouraged by the friendship of B. O. Flower, editor of *The Arena,* he thought of himself as a reformer; his anger at the plight of his native section and his reading of Henry George found expression in several political novels in 1892. For nearly twenty years he devoted himself to exemplifying the virtues of Western literature, only to find that Western themes and Western scenes were of themselves no guarantee of greatness. He wrote sixteen novels between 1895 and 1916. They show an increasing command of structure and are perhaps as good as the better magazine fiction of the period. Not one of them, however, is truly memorable and some are almost gushingly sentimental. In his search for fresh local color he failed to correct his greatest weakness as a novelist—his thin characterization. It is obvious that Garland's fondness for family and club life, for travel, for literary friendships, however satisfying to him personally, cost him much as an artist. The power which he had briefly in the years between 1887 and 1891 was largely gone.

After 1916, when he moved to New York, Garland attained a new popularity by turning to autobiography. The writer who had insisted that "the present is the vital theme" ransacked his journals and notebooks and memory for five volumes dealing with the "Middle Border" and four volumes of literary gossip. In 1922 *A Daughter of the Middle Border* won the Pulitzer Prize for biography. Social and literary historians will doubtless find these books invaluable. They make it clear, however, that Garland was never really a rebel. What seemed like revolt was an intensely personal emotional reaction to a particular situation; the true Garland was respectful of tradition and of success, wherever he found them. He was interested, moreover, in many things, perhaps too many for his artistic salvation. Veritism was only one cause among many, and although he tried to present life truthfully he never had an irrepressible passion to say something important supremely well.

Mrs. Ripley's Trip

In a Foreword to Main-Travelled Roads written in 1922 Garland told of his trip to South Dakota in 1887, after three years in Boston. On his way he stopped in Chicago to visit Joseph Kirkland, author of Zury, who suggested that Garland ought to write fiction (see A Son of the Middle Border). The farther he got beyond Chicago the more depressing he found the landscape, and when he got to Ordway, South Dakota, he found his mother "imprisoned in a small cabin on the enormous sunburnt, treeless plain, with no expectation of ever living anywhere else." "In that hot little house," he added in Roadside Meetings, "I wrote my first story, a sketch descriptive of

the life I had known as a boy. It was in truth only the amplification of a tale which my mother retold of an old neighbor in Iowa who, after many years of border life, went 'back to York State' on a visit. 'Mrs. Ripley' was not unlike a character in Mary Wilkins' stories [he was probably thinking of "The Revolt of 'Mother' "] and I wrote nearly two thousand words of her story one Sunday forenoon." Completed after Garland's return to Boston, "Mrs. Ripley's Trip" was accepted by Harper's Weekly and printed in the issue for November 24, 1888.

The night was in windy November, and the blast, threatening rain, roared around the poor little shanty of Uncle Ripley, set like a chicken-trap on the vast Iowa prairie. Uncle Ethan was mending his old violin, with many York State "dums!" and "I gol darns!" totally oblivious of his tireless old wife, who, having "finished the supper-dishes," sat knitting a stocking, evidently for the little grandson who lay before the stove like a cat.

Neither of the old people wore glasses, and their light was a tallow candle; they couldn't afford "none o' them new-fangled lamps." The room was small, the chairs were wooden, and the walls bare—a home where poverty was a never-absent guest The old lady looked pathetically little, weazened, and hopeless in her ill-fitting garments (whose original color had long since vanished), intent as she was on the stocking in her knotted, stiffened fingers, and there was a peculiar sparkle in her little black eyes, and an unusual resolution in the straight line of her withered and shapeless lips.

Suddenly she paused, stuck a needle in the spare knob of her hair at the back of her head, and looking at Ripley, said decisively: "Ethan Ripley, you'll haff to do your own cooking from now on to New Year's. I'm goin' back to Yaark State."

The old man's leather-brown face stiffened into a look of quizzical surprise for a moment; then he cackled, incredulously: "Ho! Ho! har! Sho! be y', now? I want to know if y' be."

"Well, you'll find out."

"Goin' to start to-morrow, mother?"

"No, sir, I ain't, but I am on Thursday. I want to get to Sally's by Sunday, sure, an' to Silas's on Thanksgivin'."

There was a note in the old woman's voice that brought genuine stupefaction into the face of Uncle Ripley. Of course in this case, as in all the others, the money consideration was uppermost.

"Howgy 'xpect to get the money, mother? Anybody died an' left yeh a pile?"

"Never you mind where I get the money, so 's 't *you* don't haff to bear it. The land knows if I'd 'a' waited for *you* to pay my way—"

"You needn't twit me of bein' poor, old woman," said Ripley, flaming up after the manner of many old people. "I've done *my* part t' get along. I've worked day in and day out—"

"Oh! I ain't done no work, have I?" snapped she, laying down the stocking and levelling a needle at him, and putting a frightful emphasis on "I."

"I didn't say you hadn't done no work."

"Yes, you did!"

"I didn't neither. I said—"

"I *know* what you said."

"I said I'd done *my part!*" roared the husband, dominating her as usual by superior lung power. "I didn't *say* you hadn't done your part," he added with an unfortunate touch of emphasis.

"I know y' didn't *say* it, but y' meant it. I don't know what y' call doin' my part, Ethan Ripley; but if cookin' for a drove of harvest hands and thrashin' hands, takin' care o' the eggs and butter, 'n' diggin' 'taters an' milkin' ain't *my* part, I don't never expect to do my part, 'n' you might as well know it fust 's last.

"I'm sixty years old," she went on, with a little break in her harsh voice, dominating him now by woman's logic, "an' I've never had a day to myself, not even Fourth o' July. If I've went a-visitin' 'r to a picnic, I've had to come home an' milk 'n' get supper for you menfolks. I ain't been away t' stay overnight for thirteen years in this house, 'n' it was just so in Davis County for ten more. For twenty-three years, Ethan Ripley, I've stuck right to the stove an' churn without a day or a night off."

Her voice choked again, but she rallied, and continued impressively, "And now I'm a-goin back to Yaark State."

Ethan was vanquished. He stared at her in speechless surprise, his jaw hanging. It was incredible.

"For twenty-three years," she went on, musingly, "I've just about promised myself every year I'd go back an' see my folks." She was distinctly talking to herself now, and her voice had a touching, wistful cadence. "I've wanted to go back an' see the old folks, an' the hills where we played, an' eat apples off the old tree down by

the well. I've had them trees an' hills in my mind days and days—nights, too—an' the girls I used to know, an' my own folks—"

She fell into a silent muse, which lasted so long that the ticking of the clock grew loud as a gong in the man's ears, and the wind outside seemed to sound drearier than usual. He returned to the money problem; kindly, though.

"But how y' goin' t' raise the money? I ain't got no extra cash this time. Agin Roach is paid, an' the interest paid, we ain't got no hundred dollars to spare, Jane, not by a jugful."

"Wal, don't you lay awake nights studyin' on where I'm a-goin' to get the money," said the old woman, taking delight in mystifying him. She had him now, and he couldn't escape. He strove to show his indifference, however, by playing a tune or two on the violin.

"Come, Tukey, you better climb the wooden hill," Mrs. Ripley said, a half-hour later, to the little chap on the floor, who was beginning to get drowsy under the influence of his grandpa's fiddling. "Pa, you had orta 'a' put that string in the clock to-day—on the 'larm side the string is broke," she said, upon returning from the boy's bedroom. "I orta git up early to-morrow, to git some sewin' done. Land knows, I can't fix up much, but they is a little I c'n do. I want to look decent."

They were alone now, and they both sat expectantly.

"You 'pear to think, mother, that I'm agin yer goin'."

"Wal, it would kinder seem as if y' hadn't hustled yerself any t' help me git off."

He was smarting under the sense of being wronged. "Wal, I'm just as willin' you should go as I am for myself, but if I ain't got no money I don't see how I'm goin' to send—"

"I don't want ye to send; nobody ast ye to, Ethan Ripley. I guess if I had what I've earnt since we came on this farm I'd have enough to go to Jericho with."

"You've got as much out of it as I have," he replied gently. "You talk about your goin' back. Ain't I been wantin' to go back myself? And ain't I kep' still 'cause I see it wa'n't no use? I guess I've worked jest as long and as hard as you, an' in storms an' in mud an' heat, ef it comes t' that."

The woman was staggered, but she wouldn't give up; she must get in one more thrust.

"Wal, if you'd 'a' managed as well as I have, you'd have some money to go with." And she rose and went to mix her bread and set it "raisin'."

He sat by the fire twanging his fiddle softly. He was plainly thrown into gloomy retrospection, something quite unusual for him. But his fingers picking out the bars of a familiar tune set him to smiling, and whipping his bow across the strings, he forgot all about his wife's resolutions and his own hardships. "Trouble always slid off his back like punkins off a haystack, anyway," his wife said.

The old man still sat fiddling softly after his wife disappeared in the hot and stuffy little bedroom off the kitchen. His shaggy head bent lower over his violin. He heard her shoes drop—*one, two.* Pretty soon she called:

"Come, put up that squeakin' old fiddle, and go to bed. Seems as if you orta have sense enough not to set there keepin' everybody in the house awake."

"You hush up," retorted he. "I'll come when I git ready, and not till. I'll be glad when you're gone—"

"Yes, I warrant *that.*"

With which amiable good-night they went off to sleep, or at least she did, while he lay awake pondering on "where under the sun she was goin' t' raise that money."

The next day she was up bright and early, working away on her own affairs, ignoring Ripley entirely, the fixed look of resolution still on her little old wrinkled face. She killed a hen and dressed and baked it. She fried up a pan of doughnuts and made a cake. She was engaged in the doughnuts when a neighbor came in, one of these women who take it as a personal affront when any one in the neighborhood does anything without asking their advice. She was fat, and could talk a man blind in three minutes by the watch. Her neighbor said:

"What's this I hear, Mis' Ripley?"

"I dun know. I expect you hear about all they is goin' on in this neighborhood," replied Mrs. Ripley, with crushing bluntness; but the gossip did not flinch.

"Well, Sett Turner told *me* that her husband told *her* that Ripley told *him* this mornin' that you was goin' back East on a visit."

"Wal, what of it?"

"Well, air yeh?"

"The Lord willin' an' the weather permittin', I expect I be."

"Good land, I want to know! Well, well! I never was

so astonished in my whole life. I said, says I, 'It can't be.' 'Well,' ses 'e, 'tha's what *she* told me,' ses 'e. 'But,' says I, 'she is the last woman in the world to go gallavantin' off East,' ses I. 'An',' ses he, 'but it comes from good authority,' ses he. 'Well, then, it must be so,' ses I. But, land sakes! do tell me all about it. How come you to make up y'r mind? All these years you've been kind a' talkin' it over, an' now y'r actshelly goin'—well, I *never!* 'I s'pose Ripley furnishes the money,' ses I to him. 'Well, no,' ses 'e. 'Ripley says he'll be blowed if he sees where the money's coming from,' ses 'e; and ses I, 'But maybe she's jest jokin',' ses I. 'Not much,' he says. S' 'e: 'Ripley believes she's goin' fast enough. He's jest as anxious to find out as we be—' "

Here Mrs. Doudney paused for breath; she had walked so fast and rested so little that her interminable flow of "ses I's" and "ses he's" ceased necessarily. She had reached, moreover, the point of most vital interest—the money.

"An' you'll find out jest 'bout as soon as he does," was the dry response from the figure hovering over the stove; and with all her manoeuvring that was all she got.

All day Ripley went about his work exceedingly thoughtful for him. It was cold blustering weather. The wind rustled among the cornstalks with a wild and mournful sound, the geese and ducks went sprawling down the wind, and the horses' coats were ruffled and backs raised.

The old man was husking all alone in the field, his spare form rigged out in two or three ragged coats, his hands inserted in a pair of gloves minus nearly all the fingers, his thumbs done up in "stalls," and his feet thrust into huge coarse boots. The "down ears" wet and chapped his hands, already worn to the quick. Toward night it grew colder and threatened snow. In spite of all these attacks he kept his cheerfulness, and though he was very tired, he was softened in temper.

Having plenty of time to think matters over, he had come to the conclusion that the old woman needed a play-spell. "I ain't likely to be no richer next year than I am this one; if I wait till I'm able to send her she won't never go. I calc'late I c'n git enough out o' them shoats to send her. I'd kind a' lotted on eat'n' them pigs done up in sassengers, but if the ol' woman goes East, Tukey an' me'll kind a' haff to pull through without 'em. We'll have a turkey f'r Thanksgivin', an' a chicken once 'n a while. Lord! but we'll miss the gravy on the flapjacks." (He smacked his lips over the thought of the lost dainty.) "But let 'er rip! We can stand it. Then there is my buffalo overcoat. I'd kind a' calc'lated on havin' a buffalo—but that's gone up the spout along with them sassengers."

These heroic sacrifices having been determined upon, he put them into effect at once.

This he was able to do, for his corn-rows ran alongside the road leading to Cedarville, and his neighbors were passing almost all hours of the day.

It would have softened Jane Ripley's heart could she have seen his bent and stiffened form among the corn-rows, the cold wind piercing to the bone through his threadbare and insufficient clothing. The rising wind sent the snow rattling among the moaning stalks at intervals. The cold made his poor dim eyes water, and he had to stop now and then to swing his arms about his chest to warm them. His voice was hoarse with shouting at the shivering team.

That night as Mrs. Ripley was clearing the dishes away she got to thinking about the departure of the next day, and she began to soften. She gave way to a few tears when little Tewksbury Gilchrist, her grandson, came up and stood beside her.

"Gran'ma, you ain't goin' to stay away always, are yeh?"

"Why, course not, Tukey. What made y' think that?"

"Well, y' ain't told us nawthin' 't all about it. An' yeh kind o' look 's if yeh was mad."

"Well, I ain't mad; I'm jest a-thinkin', Tukey. Y' see, I come away from them hills when I was a little girl a'most; before I married y'r grandad. And I ain't never been back. 'Most all my folks is there, sonny, an' we've been s' poor all these years I couldn't seem t' never git started. Now, when I'm 'most ready t' go, I feel kind a queer—'s if I'd cry."

And cry she did, while little Tewksbury stood patting her trembling hands. Hearing Ripley's step on the porch, she rose hastily and, drying her eyes, plunged at the work again.

Ripley came in with a big armful of wood, which he rolled into the wood-box with a thundering crash. Then he pulled off his mittens, slapped them together to knock off the ice and snow, and laid them side by side under the stove. He then removed cap, coat, blouse, and

finally his boots, which he laid upon the wood-box, the soles turned toward the stove-pipe.

As he sat down without speaking, he opened the front doors of the stove, and held the palms of his stiffened hands to the blaze. The light brought out a thoughtful look on his large, uncouth, yet kindly, visage. Life had laid hard lines on his brown skin, but it had not entirely soured a naturally kind and simple nature. It had made him penurious and dull and iron-muscled; had stifled all the slender flowers of his nature; yet there was warm soil somewhere hid in his heart.

"It's snowin' like all p'ssessed," he remarked finally. "I guess we'll have a sleigh-ride to-morrow. I calc'late t' drive y' daown in scrumptious style. If you must leave, why, we'll give yeh a whoopin' old send-off—won't we, Tukey?"

Nobody replying, he waited a moment. "I've ben a-thinkin' things over kind o' t'-day, mother, an' I've come t' the conclusion that we *have* been kind o' hard on yeh, without knowin' it, y' see. Y' see I'm kind o' easy-goin', an' little Tuke he's only a child, an' we ain't c'nsidered how you felt."

She didn't appear to be listening, but she was, and he didn't appear, on his part, to be talking to her, and he kept his voice as hard and dry as he could.

"An' I was tellin' Tukey t'-day that it was a dum shame our crops hadn't turned out better. An' when I saw ol' Hatfield go by I hailed him, an' asked him what he'd gimme for two o' m' shoats. Wal, the upshot is, I sent t' town for some things I calc'late you'd need. An' here's a ticket to Georgetown, and ten dollars. Why, ma, what's up?"

Mrs. Ripley broke down, and with her hands all wet with dishwater, as they were, covered her face, and sobbed. She felt like kissing him, but she didn't. Tewksbury began to whimper too; but the old man was astonished. His wife had not wept for years (before him). He rose and walking clumsily up to her timidly touched her hair—

"Why, mother! What's the matter? What've I done now? I was calc'latin' to sell them pigs anyway. Hatfield jest advanced the money on 'em."

She hopped up and dashed into the bedroom, and in a few minutes returned with a yarn mitten, tied around the wrist, which she laid on the table with a thump, saying: "I don't want yer money. There's money enough to take me where I want to go."

"Whee—ew! Thunder and gimpsum root! Where 'd ye get that? Didn't dig it out of a hole?"

"No, I jest saved it—a dime at a time—see!"

Here she turned it out on the table—some bills, but mostly silver dimes and quarters.

"Thunder and scissors! Must be two er three hundred dollars there," he exclaimed.

"They's jest seventy-five dollars and thirty cents; jest about enough to go back on. Tickets is fifty-five dollars, goin' and comin'. That leaves twenty dollars for other expenses, not countin' what I've already spent, which is six-fifty," said she, recovering her self-possession. "It's plenty."

"But y' ain't calc'lated on no sleepers nor hotel bills."

"I ain't goin' on no sleeper. Mis' Doudney says it's jest scandalous the way things is managed on them cars. I'm goin' on the old-fashioned cars, where they ain't no half-dressed men runnin' around."

"But *you* needn't be afraid of them, mother; at your age—"

"There! you needn't throw my age an' homeliness into my face, Ethan Ripley. If I hadn't waited an' tended on you so long, I'd look a little more's I did when I married yeh."

Ripley gave it up in despair. He didn't realize fully enough how the proposed trip had unsettled his wife's nerves. She didn't realize it herself.

"As for the hotel bills, they won't be none. I ain't agoin' to pay them pirates as much for a day's board as we'd charge for a week's, and have nawthin' to eat but dishes. I'm goin' to take a chicken an' some hard-boiled eggs, an' I'm goin' right through to Georgetown."

"Wal, all right, mother; but here's the ticket I got."

"I don't want yer ticket."

"But you've got to take it."

"Well, I haint."

"Why, yes, ye have. It's bought, an' they won't take it back."

"Won't they?" She was perplexed again.

"Not much they won't. I ast 'em. A ticket sold is sold."

"Wal, if they won't—"

"You bet they won't."

"I s'pose I'll haff to use it." And that ended it.

They were a familiar sight as they rode down the road toward town next day. As usual, Mrs. Ripley sat up straight and stiff as "a half-drove wedge in a white-oak log." The day was cold and raw. There was some snow

on the ground, but not enough to warrant the use of sleighs. It was "neither sleddin' nor wheelin'." The old people sat on a board laid across the box, and had an old quilt or two drawn up over their knees. Tewksbury lay in the back part of the box (which was filled with hay), where he jounced up and down, in company with a queer old trunk and a brand-new imitation-leather hand-bag.

There is no ride quite so desolate and uncomfortable as a ride in a lumber-wagon on a cold day in autumn, when the ground is frozen, and the wind is strong and raw with threatening snow. The wagon-wheels grind along in the snow, the cold gets in under the seat at the calves of one's legs, and the ceaseless bumping of the bottom of the box on the feet is almost intolerable.

There was not much talk on the way down, and what little there was related mainly to certain domestic regulations, to be strictly followed, regarding churning, pickles, pancakes, etc. Mrs. Ripley wore a shawl over her head, and carried her queer little black bonnet in her hand. Tewksbury was also wrapped in a shawl. The boy's teeth were pounding together like castanets by the time they reached Cedarville, and every muscle ached with the fatigue of shaking.

After a few purchases they drove down to the station, a frightful little den (common in the West), which was always too hot or too cold. It happened to be hot just now—a fact which rejoiced little Tewksbury.

"Now git my trunk *stamped, 'r fixed, 'r* whatever they call it," she said to Ripley, in a commanding tone, which gave great delight to the inevitable crowd of loafers beginning to assemble. "Now remember, Tukey, have grandad kill that biggest turkey night before Thanksgiving, an' then you run right over to Mis' Doudney's—she's got a nawful tongue, but she can bake a turkey first-rate—an' she'll fix up some squash-pies for yeh. You can warm up one o' them mince-pies. I wish ye could be with me, but ye can't; so do the best ye can."

Ripley returning now, she said: "Wal, now, I've fixed things up the best I could. I've baked bread enough to last a week, an' Mis' Doudney has promised to bake for yeh—"

"I don't like her bakin'."

"Wal, you'll haff to stand it till I get back, 'n' you'll find a jar o' sweet pickles an' some crab-apple sauce down suller, 'n' you'd better melt up brown sugar for 'lasses, 'n' for goodness' sake don't eat all them mince-pies up the fust week, 'n' see that Tukey ain't froze goin' to school. An' now you'd better get out for home. Good-by! an' remember them pies."

As they were riding home, Ripley roused up after a long silence.

"Did she—a—kiss you good-by, Tukey?"

"No, sir," piped Tewksbury.

"Thunder! didn't she?" After a silence: "She didn't me, neither. I guess she kind a' sort a' forgot it, bein' so flustrated, y' know."

One cold, windy, intensely bright day, Mrs. Stacey, who lives about two miles from Cedarville, looking out of the window, saw a queer little figure struggling along the road, which was blocked here and there with drifts. It was an old woman laden with a good half-dozen parcels, which the wind seemed determined to wrench from her.

She was dressed in black, with a full skirt, and her cloak being short, the wind had excellent opportunity to inflate her garments and sail her off occasionally into the deep snow outside the track, but she held out bravely till she reached the gate. As she turned in, Mrs. Stacey cried:

"Why! it's Gran'ma Ripley, just getting back from her trip. Why! how do you do? Come in. Why! you must be nearly frozen. Let me take off your hat and veil."

"No, thank ye kindly, but I can't stop," was the given reply. "I must be gittin' back to Ripley. I expec' that man has jest let ev'rything go six ways f'r Sunday."

"Oh, you *must* sit down just a minute and warm."

"Wal, I will; but I've got to git home by sundown sure. I don't s'pose they's a thing in the house to eat," she said solemnly.

"Oh, dear! I wish Stacey was here, so he could take you home. An' the boys at school—"

"Don't need any help, if 't wa'nt for these bundles an' things. I guess I'll jest leave some of 'em here, an'—Here! take one of these apples. I brought 'em from Lizy Jane's suller, back to Yaark State."

"Oh! they're delicious! You must have had a lovely time."

"Pretty good. But I kep' thinkin' of Ripley an' Tukey all the time. I s'pose they have had a gay time of it" (she meant the opposite of gay). "Wal, as I told Lizy Jane, I've had my spree, an' now I've got to git back to work. They ain't no rest for such as we are. As I told Lizy Jane, them folks in the big houses have Thanksgivin' dinners every day of their lives, and men an' women

in splendid clo's to wait on 'em, so 't Thanksgivin' don't mean anything to 'em; but we poor critters, we make a great to-do if we have a good dinner onct a year. I've saw a pile o' this world, Mrs. Stacey—a pile of it! I didn't think they was so many big houses in the world as I saw b'tween here an' Chicago. Wal, I can't set here gabbin'." She rose resolutely. "I must get home to Ripley. Jest kind o' stow them bags away. I'll take two an' leave them three others. Good-by! I must be gittin' home to Ripley. He'll want his supper on time."

And off up the road the indomitable little figure trudged, head held down to the cutting blast—little snow-fly, a speck on a measureless expanse, crawling along with painful breathing, and slipping, sliding steps —"Gittin' home to Ripley an' the boy."

Ripley was out to the barn when she entered, but Tewksbury was building a fire in the old cook-stove. He sprang up with a cry of joy, and ran to her. She seized him and kissed him, and it did her so much good she hugged him close, and kissed him again and again, crying hysterically.

"Oh, gran'ma, I'm so glad to see you! We've had an awful time since you've been gone."

She released him, and looked around. A lot of dirty dishes were on the table, the table-cloth was a "sight to behold" (as she afterward said), and so was the stove—kettle-marks all over the table-cloth, splotches of pan-cake batter all over the stove.

"Wal, I sh'd say as much," she dryly assented, untying her bonnet-strings.

When Ripley came in she had her regimentals on, the stove was brushed, the room swept, and she was elbow-deep in the dish-pan. "Hullo, mother! Got back, hev yeh?"

"I sh'd say it was about *time,*" she replied curtly, without looking up or ceasing work. "Has ol' 'Crumpy' dried up yit?" This was her greeting.

Her trip was a fact now, no chance could rob her of it. She had looked forward twenty-three years toward it, and now she could look back at it accomplished. She took up her burden again, never more thinking to lay it down

1887-1888

---

42 down. The only extensive revision of the Harper's Weekly text was Garland's fortunate omission of the following ending: ". . . till her poor work weary, bony hands should be folded finally on her lean, pathetic old bosom. Her next trip will be so far away she will never return—far past the gates of space and time"

From

Crumbling Idols

Crumbling Idols: Twelve Essays on Art Dealing Chiefly with Literature, Painting and the Drama, published by the newly founded firm of Stone and Kimball in 1894, was an expansion, revision, and rearrangement of various critical articles and (presumably) lectures which Garland had written in the preceding several years. Although he was inclined in his later life to be a little scornful of his violence and youthfulness, Crumbling Idols is historically important. It reflects Garland's acceptance of Howells' faith in realism, his conviction (which he later recanted) that the literary center of the future was to be Chicago, his awareness of the interrelation of the arts, and the characteristic enthusiasms of the 1890's for Ibsen, impressionism, and local color. If there was any "manifesto" defending the general position of the local colorists, this book contained it. Of the two chapters here reprinted, "Local Color in Art" seems not to have been printed previously, but "The Local Novel" was apparently part of a lecture delivered as early as 1891 (see Roadside Meetings, p. 189) and is substantially the same as "The Future of Fiction," which had appeared in The Arena for April 1893. Other portions of the book had appeared in The Arena and The Forum.

V

LOCAL COLOR IN ART

Local color in fiction is demonstrably the life of fiction. It is the native element, the differentiating element. It corresponds to the endless and vital charm of individual

peculiarity. It is the differences which interest us; the similarities do not please, do not forever stimulate and feed as do the differences. Literature would die of dry rot if it chronicled the similarities only, or even largely.

Historically, the local color of a poet or dramatist is of the greatest value. The charm of Horace is the side light he throws on the manners and customs of his time. The vital in Homer lies, after all, in his local color, not in his abstractions. Because the sagas of the North delineate more exactly how men and women lived and wrought in those days, therefore they have always appealed to me with infinitely greater power than Homer.

Similarly, it is the local color of Chaucer that interests us to-day. We yawn over his tales of chivalry which were in the manner of his contemporaries, but the Miller and the Priest interest us. Wherever the man of the past in literature showed us what he really lived and loved, he moves us. We understand him, and we really feel an interest in him.

Historically, local color has gained in beauty and suggestiveness and humanity from Chaucer down to the present day. Each age has embodied more and more of its actual life and social conformation until the differentiating qualities of modern art make the best paintings of Norway as distinct in local color as its fiction is vital and indigenous.

Every great moving literature to-day is full of local color. It is this element which puts the Norwegian and Russian almost at the very summit of modern novel writing, and it is the comparative lack of this distinctive flavor which makes the English and French take a lower place in truth and sincerity.

Everywhere all over the modern European world, men are writing novels and dramas as naturally as the grass or corn or flax grows. The Provençal, the Hun, the Catalonian, the Norwegian, is getting a hearing. This literature is not the literature of scholars; it is the literature of lovers and doers; of men who love the modern and who have not been educated to despise common things.

These men are speaking a new word. They are not hunting themes, they are struggling to express.

Conventional criticism does not hamper or confine them. They are rooted in the soil. They stand among the corn-fields and they dig in the peat-bogs. They concern themselves with modern and very present words and themes, and they have brought a new word which is to divide in half the domain of beauty.

They have made art the re-creation of the beautiful *and the significant.* Mere beauty no longer suffices. Beauty is the world-old aristocrat who has taken for mate this mighty young plebeian Significance. Their child is to be the most human and humane literature ever seen.

It has taken the United States longer to achieve independence of English critics than it took to free itself from old-world political and economic rule. Its political freedom was won, not by its gentlemen and scholars, but by its yeomanry; and in the same way our national literature will come in its fulness when the common American rises spontaneously to the expression of his concept of life.

The fatal blight upon most American art has been, and is to-day, its imitative quality, which has kept it characterless and factitious,—a forced rose-culture rather than the free flowering of native plants.

Our writers despised or feared the home market. They rested their immortality upon the "universal theme," which was a theme of no interest to the public and of small interest to themselves.

During the first century and a half, our literature had very little national color. It was quite like the utterance of corresponding classes in England. But at length Bryant and Cooper felt the influence of our mighty forests and prairies. Whittier uttered something of New England boy-life, and Thoreau prodded about among newly discovered wonders, and the American literature got its first start.

Under the influence of Cooper came the stories of wild life from Texas, from Ohio, and from Illinois. The wild, rough settlements could not produce smooth and cultured poems or stories; they only furnished forth rough-and-ready anecdotes, but in these stories there were hints of something fine and strong and native.

As the settlements increased in size, as the pressure of the forest and the wild beast grew less, expression

---

28 **Norwegian and Russian.** Garland refers to the work of Björnstjerne Bjornson (1832-1910) and Ivan Turgenev (1818-1883), two of the most famous novelists of the latter nineteenth century • 35 **Provençal . . . Catalonian,** a reference to the regional and national literatures of southern France, Hungary, and northeastern Spain, best represented perhaps by the poetry of the Provençal Frédéric Mistral (1830-1914) and the Hungarians Sándor Petöfi (1823-1849) and János Arany (1817-1882), and by the plays of the Catalonian Ángel Guimerá (1847-1924). The local color movement of the United States was preceded and paralleled by widespread regionalism in Europe

rose to a higher plane; men softened in speech and manner. All preparations were being made for a local literature raised to the level of art.

The Pacific slope was first in the line. By the exceptional interest which the world took in the life of the gold fields, and by the forward urge which seems always to surprise the pessimist and the scholiast, two young men were plunged into that wild life, led across the plains set in the shadow of Mount Shasta, and local literature received its first great marked, decided impetus.

To-day we have in America, at last, a group of writers who have no suspicion of imitation laid upon them. Whatever faults they may be supposed to have, they are at any rate, themselves. American critics can depend upon a characteristic American literature of fiction and the drama from these people.

The corn has flowered, and the cotton-boll has broken into speech.

Local color—what is it? It means that the writer spontaneously reflects the life which goes on around him. It is natural and unstrained art.

It is, in a sense, unnatural and artificial to find an American writing novels of Russia or Spain or the Holy Land. He cannot hope to do it so well as the native. The best he can look for is that poor word of praise, "He does it very well, considering he is an alien."

If a young writer complain that there are no themes at home, that he is forced to go abroad for perspective and romance, I answer there is something wrong in his education or his perceptive faculty. Often he is more anxious to win a money success than to be patiently one of art's unhurried devotees.

I can sympathize with him, however, for criticism has not helped him to be true. Criticism of the formal kind and spontaneous expression are always at war, like the old man and the youth. They may politely conceal it, but they are mutually destructive.

Old men naturally love the past; the books they read are the master-pieces; the great men are all dying off, they say; the young man should treat lofty and universal themes, as they used to do. These localisms are petty. These truths are disturbing. Youth annoys them. Spontaneousness is formlessness, and the criticism that does not call for the abstract and the ideal and the beautiful is leading to destruction, these critics say.

And yet there is a criticism which helps, which tends to keep a writer at his best; but such criticism recognizes the dynamic force of a literature, and tries to spy out tendencies. This criticism to-day sees that local color means national character, and is aiding the young writer to treat his themes in the best art.

I assert it is the most natural thing in the world for a man to love his native land and his native, intimate surroundings. Born into a web of circumstances, enmeshed in common life, the youthful artist begins to think. All the associations of that childhood and the love-life of youth combine to make that web of common affairs, threads of silver and beads of gold; the near-at-hand things are the dearest and sweetest after all.

As the reader will see, I am using local color to mean something more than a forced study of the picturesque scenery of a State.

Local color in a novel means that it has such quality of texture and back-ground that it could not have been written in any other place or by any one else than a native.

It means a statement of life as indigenous as the plant-growth. It means that the picturesque shall not be seen by the author,—that every tree and bird and mountain shall be dear and companionable and necessary, not picturesque; the tourist cannot write the local novel.

From this it follows that local color must not be put in for the sake of local color. It must go in, it *will* go in, because the writer naturally carries it with him half unconsciously, or conscious only of its significance, its interest to him.

He must not stop to think whether it will interest the reader or not. He must be loyal to himself, and put it in because he loves it. If he is an artist, he will make his reader feel it through his own emotion.

What we should stand for is not universality of theme, but beauty and strength of treatment, leaving the writer to choose his theme because he loves it.

Here is the work of the critic. Recognizing that the theme is beyond his control, let him aid the young writer to delineate simply and with unwavering strokes. Even here the critic can do little, if he is possessed of the idea that the young writer of to-day should model upon Addison or Macaulay or Swift.

There are new criterions to-day in writing as in paint-

---

7 two young men, presumably Bret Harte (see p. 810) and Joaquin Miller (1841?-1913) • 9 Mount Shasta, in northern California

ing, and individual expression is the aim. The critic can do much to aid a young writer to *not* copy an old master or any other master. Good criticism can aid him to be vivid and simple and unhackneyed in his technique, the subject is his own affair.

I agree with him who says, Local art must be raised to the highest levels in its expression; but in aiding this perfection of technique we must be careful not to cut into the artist's spontaneity. To apply ancient dogmas of criticism to our life and literature would be benumbing to artist and fatal to his art.

VI

THE LOCAL NOVEL

The local novel seems to be the heir-apparent to the kingdom of poesy. It is already the most promising of all literary attempts to-day; certainly it is the most sincere. It seems but beginning its work. It is "hopelessly contemporaneous"; that is its strength. It is (at its best) unaffected, natural, emotional. It is sure to become all-powerful. It will redeem American literature, as it has already redeemed the South from its conventional and highly wrought romanticism.

By reason of growing truth and sincerity the fiction of the South has risen from the dead. It is now in the spring season of shooting wilding plants and timorous blades of sown grains. Its future is assured. Its soil is fertilized with the blood of true men. Its women are the repositories of great, vital, sincere, emotional experiences which will inevitably appear in their children, and at last in art, and especially in fiction. The Southern people are in the midst of a battle more momentous than the Rebellion, because it is the result of the Rebellion; that is, the battle of intrenched privilege against the swiftly-spreading democratic idea of equality before the law and in the face of nature.

They have a terribly, mightily dramatic race-problem on their hands. The South is the meeting-place of winds. It is the seat of swift and almost incalculable change; and this change, this battle, this strife of invisible powers, is about to enter their fiction.

The Negro has already entered it. He has brought a musical speech to his masters, and to the new fiction. He has brought a strange and pleading song into music. The finest writers of the New South already find him a never-failing source of interest. He is not, of course, the only subject of Southern fiction, nor even the principal figure; but he is a necessary part, and a most absorbingly interesting part.

The future of fiction in the South will also depict the unreconstructed rebel unreservedly, and the race-problem without hate or contempt or anger; for the highest art will be the most catholic in its sympathy. It will delineate vast contending forces, and it will be a great literature.

The Negro will enter the fiction of the South, first, as subject; second, as artist in his own right. His first attempts will be imitative, but he will yet utter himself, as surely as he lives. He will contribute a poetry and a novel as peculiarly his own as the songs he sings. He may appear, also, in a strange half-song, half-chant, and possibly in a drama peculiar to himself; but in some form of fiction he will surely utter the sombre and darkly-florid genius for emotional utterance which characterizes him.

In the North the novel will continue local for some time to come. It will delineate the intimate life and speech of every section of our enormous and widely scattered republic. It will catch and fix in charcoal the changing, assimilating races, delineating the pathos and humor and the infinite drama of their swift adjustment to new conditions. California, New Mexico, Idaho, Utah, Oregon, each wonderful locality in our Nation of Nations will yet find its native utterance. The superficial work of the tourist and outsider will not do. The real novelist of these sections is walking behind the plow or trudging to school in these splendid potential environments.

This local movement will include the cities as well, and St. Louis, Chicago, San Francisco, will be delineated by artists born of each city, whose work will be so true that it could not have been written by any one from the outside. The real utterance of a city or a locality can only come when a writer is born out of its intimate heart. To such an one, nothing will be "strange" or "picturesque;" all will be familiar, and full of significance or beauty. The novel of the slums must be written by one who has played there as a child, and taken part in all its amusements; not out of curiosity, but out of pleasure seeking. It cannot be done from above nor from the outside. It must be done out of a full heart and without seeking for effect.

The artist should not look abroad to see how others

are succeeding. Success does not always measure merit. It took nearly a third of a century for Whitman and Monet to be recognized. The great artist never conforms. He does not trail after some other man's success. He works out his individual perception of things.

The contrast of city and country, everywhere growing sharper, will find its reflection in this local novel of the immediate future,—the same tragedies and comedies, with the essential difference called local color, and taking place all over the land, wherever cities arise like fungi, unhealthy, yet absorbing as subjects of fictional art.

As I have elsewhere pointed out, the drama will join the novel in this study of local conditions. It will be derived from fiction, and in many cases the dramatist and novelist will be the same person. In all cases the sincerity of the author's love for his scenes and characters will find expression in tender care for truth, and there will be made to pass before our eyes wonderfully suggestive pictures of other lives and landscapes. The drama will grow in dignity and importance along these lines.

Both drama and novel will be colloquial. This does not mean that they will be exclusively in the dialects, but the actual speech of the people of each locality will unquestionably be studied more closely than ever before. Dialect is the life of a language, precisely as the common people of the nation form the sustaining power of its social life and art.

And so in the novel, in the short story, and in the drama—by the work of a multitude of loving artists, not by the work of an over-topping personality—will the intimate social, individual life of the nation be depicted. Before this localism shall pass away, such a study will have been made of this land and people as has never been made by any other age or social group,—a literature from the plain people, reflecting their unrestrained outlook on life, subtle in speech and color, humane beyond precedent, humorous, varied, simple in means, lucid as water, searching as sunlight.

To one who believes each age to be its own best interpreter, the idea of "decay of fiction" never comes. That which the absolutist takes for decay is merely change. The conservative fears change; the radical welcomes it. The conservative tries to argue that fundamentals cannot change; that they are the same yesterday, to-day, and to-morrow. If that were true, then a sorrowful outlook on the future would be natural. Such permanency would be death. Life means change.

As a matter of fact, the minute differentiations of literature which the conservative calls its non-essentials, are really its essentials. Vitality and growth are in these "non-essentials." It is the difference in characters, not their similarity, which is forever interesting. It is the subtle coloring individuality gives which vitalizes landscape art, and so it is the subtle differences in the interpretation of life which each age gives that vitalizes its literature and makes it its own.

The individuality of the artist is the saving grace of art; and landscape painting will not be fantastic so long as men study nature. It will never be mere reproduction so long as the artist represents it as he sees it. The fact will correct the fantasy. The artist will color the fact.

The business of the present is not to express fundamentals, but to sincerely present its own minute and characteristic interpretation of life. This point cannot be too often insisted upon. Unless a writer add something to the literature of his race, has he justification? Is there glory in imitation? Is the painter greatest who copies old masters, or is it more praiseworthy to embody an original conception? These are very important questions for the young artist.

To perceive the hopelessness of absolutism in literature, you have but to stop a moment to think. Admit that there are perfect models to which must be referred all subsequent writing, and we are committed to a barren round of hopeless imitations. The young writer is disheartened or drawn off into imitations, and ruined for any real expression. This way of looking at literature produced our Barlows and Coltons and Hillhouses, with their "colossi of cotton-batting," and it produces blank-verse dramas to-day.

But the relativists in art are full of hope. They see that life is the model,—or, rather, that each man stands accountable to himself first, and to the perceived fact of life second. Life is always changing, and literature

---

3 **Monet,** Claude Monet (1840-1926), French painter, who applied to his art the scientific principles of light and is regarded as the leader of the impressionists • **78 Barlows . . . Hillhouses.** Garland is probably echoing some contemporary judgment of early American literature, but the editors have been unable to place the phrase "colossi of cotton-batting." All the writers named were overambitious—Joel Barlow (1754-1812) in his epic, **The Columbiad;** James A Hillhouse (1789-1841) in his blank-verse drama, **Hadad** (1825); and George Hooker Colton (1818-1847) in **Tecumseh, or, The West Thirty Years Since** (1842), a romantic poem of nine cantos in the manner of Sir Walter Scott

changes with it. It never decays; it changes. Poetry—that is to say *impassioned personal outlook on life*—is in no more danger of extinction to-day than in the days of Edmund Spenser. The American novel will continue to grow in truth to American life without regard to the form and spirit of the novel or drama of the past. Consciously or unconsciously, the point of view of the modern writer is that of the veritist, or truth stater.

Once out of the period of tutelage, it is natural for youth to overleap barriers. He naturally discards the wig and cloak of his grandfathers. He comes at last to reject, perhaps a little too brusquely, the models which conservatism regards with awe. He respects them as history, but he has life, abounding, fresh, contiguous life; life that stings and smothers and overwhelms and exalts, like the salt, green, snow-tipped ocean surf, life, with its terrors and triumphs, right here and now; its infinite drama, its allurement, its battle, and its victories. Life is the model, truth is the master, the heart of the man himself his motive power. The pleasure of re-creating in the image of nature is the artist's unfailing reward.

To him who sees that difference, not similarity, is the vitalizing quality, there is no sorrow at change. The future will take care of itself. In the space of that word "difference" lies all the infinite range of future art. Some elements are comparatively unchanging. The snow will fall, spring will come, men and women love, the stars will rise and set, and grass return again and again in vast rhythms of green, but society will not be the same.

The physical conformation of our nation will change. It will lose its wildness, its austerity. Its unpeopled plains will pass away, and gardens will bloom where the hot sand now drifts. Cities will rise where now the elk and the mountain lions are. Swifter means of transportation will bring the lives of different sections into closer relationship. It will tend to equalize intellectual opportunities. The physical and mental life of men and women will be changed, the relation of man to man, and man to woman, will change in detail, and the fiction of the future will express these changes.

To the veritist, therefore, the present is the vital theme. The past is dead, and the future can be trusted to look after itself. The young men and maidens of that time will find the stars of their present brighter than the stars of '92, the people around them more absorbing than books, and their own outlook on life more reasonable than that of dead men. Their writing and painting, in proportion to its vitality and importance, will reflect this, their natural attitude, toward life and history.

1891-1893·1894

Stephen Crane

1871 • 1900

Stephen Crane has been called "the Chatterton of American literature"—a comparison which implies that, like the young English poet, he was (in Wordsworth's phrase) a "marvelous boy" who "perished in his pride." Although Crane himself would not have liked such a romantic tag, it contains an element of truth; a writer of indisputable genius, Crane died prematurely, leaving a body of work which, while excellent in itself, gave promise of still better work to come.

Crane was born in Newark, New Jersey, the son of a Methodist preacher. He spent one year at Lafayette College, where he shocked his English professor by declaring that Tennyson's poetry was "swill"; and another year at Syracuse University, where he played shortstop on the varsity nine. Believing earnestly that he must devote his life to "the business of writing," he began with journalism. His brief career as a newspaper writer gave him rich and varied opportunities for observation: in the New York Bowery, in Texas and Mexico, and—under war conditions—in Greece and in Cuba. After his mar-

riage in 1896 he lived in England; one of his close friends there was Joseph Conrad. Crane died in the Black Forest, in Germany, where he had gone with the hope of improving his health.

His fame rests upon a few poems, several short stories, and two short novels—*Maggie: A Girl of the Streets* (1893) and *The Red Badge of Courage* (1895). As a poet, Crane is an interesting link between Emily Dickinson and the Imagists of the 1910's. As a writer of fiction, he is important both as an early naturalist and as an expert craftsman. *Maggie* has been called the first naturalistic American novel. An honest picture of the brutal and sordid life of the New York slums, the book was such a novelty in 1893 that the author had to publish it at his own expense. *The Red Badge* is remarkable in both substance and technique. It is nominally the story of a battle in the Civil War; but any war and any battle would have served, because there is no attempt at localization. At the time of writing, Crane knew nothing of war at first hand. After his experiences in Greece and Cuba, he could say to a friend, "*The Red Badge* is all right!" Later experience had confirmed the truth first apprehended chiefly by the imagination. Henry Fleming, the soldier, ran panic-stricken when the enemy charged; but with experience, he gained courage. Before the end of the story, "he had been to touch the great death, and found that, after all, it was but the great death." *The Red Badge* is an acute psychological study of the raw recruit in action. Technically, the book is comparable with James' mature work in that the story, though written in the third person, is managed consistently from the point of view of the distraught soldier.

Crane was above all else (and in a sense applicable to comparatively few American writers) the disinterested artist. He aimed at complete honesty of treatment. He wrote with economy, restraint, and a respect for point of view. He chose words precisely and created images (in prose as well as in verse) which are colorful and impressionistic. He was a master of irony; he saw ironical implications everywhere. It was ironical that a nice girl like Maggie should have "blossomed in a mud puddle." It was ironical that the soldier, Henry Fleming, should have gained courage through an accidental knock on the head. Man's self-importance, to Crane, and his self-pity were ironical in a universe indifferent to man.

The Works of Stephen Crane, ed. Wilson Follett, 12 vols., New York, 1926 • Thomas Beer, Stephen Crane, New York, 1923

The Open Boat

A Tale intended to be after the Fact. Being the Experience of Four Men from the Sunk Steamer 'Commodore'

In December 1896, the steamer Commodore, carrying ammunition and a party of Cuban insurrectionists, sailed from Jacksonville, Florida, for Cuba, where a revolution was in progress. Crane was on board as war correspondent for a newspaper syndicate. The ship went down off the Florida coast, and Crane got into the last of the boats to leave the sinking vessel; the other men in the open boat were the ship's cook, the oiler, and the injured captain. Crane's story is based upon his actual experiences; it is indeed "after the fact."

The story is told from the point of view of the men in the boat; more especially from the point of view of the correspondent, who was Crane himself. If there are a few violations of this rule (as when the author intrudes to say that "there was not a life-saving station within twenty miles") the violations are designed to heighten the desired effect (in the instance cited, the effect of irony). "The Open Boat" is Crane at his best. Sustained point of view, restraint, ironical wit, poetic images and cadences, and Poe's virtue of totality—these are some of the characteristic qualities of Crane which make "The Open Boat" one of the short masterpieces of modern American prose.

I

None of them knew the colour of the sky. Their eyes glanced level, and were fastened upon the waves that swept toward them. These waves were of the hue of slate, save for the tops, which were of foaming white,

---

The Open Boat by Stephen Crane, by permission of Alfred A. Knopf, Inc. Copyright 1926 by Alfred A. Knopf, Inc.

and all of the men knew the colours of the sea. The horizon narrowed and widened, and dipped and rose, and at all times its edge was jagged with waves that seemed thrust up in points like rocks.

Many a man ought to have a bath-tub larger than the boat which here rode upon the sea. These waves were most wrongfully and barbarously abrupt and tall, and each froth-top was a problem in small boat navigation.

The cook squatted in the bottom and looked with both eyes at the six inches of gunwale which separated him from the ocean. His sleeves were rolled over his fat forearms, and the two flaps of his unbuttoned vest dangled as he bent to bail out the boat. Often he said: 'Gawd! That was a narrow clip.' As he remarked it he invariably gazed eastward over the broken sea.

The oiler, steering with one of the two oars in the boat, sometimes raised himself suddenly to keep clear of water that swirled in over the stern. It was a thin little oar and it seemed often ready to snap.

The correspondent, pulling at the other oar, watched the waves and wondered why he was there.

The injured captain, lying in the bow, was at this time buried in that profound dejection and indifference which comes, temporarily at least, to even the bravest and most enduring when, willy nilly, the firm fails, the army loses, the ship goes down. The mind of the master of a vessel is rooted deep in the timbers of her, though he command for a day or a decade, and this captain had on him the stern impression of a scene in the greys of dawn of seven turned faces, and later a stump of a top-mast with a white ball on it that slashed to and fro at the waves, went low and lower, and down. Thereafter there was something strange in his voice. Although steady, it was deep with mourning, and of a quality beyond oration or tears.

'Keep 'er a little more south, Billie,' said he.

'A little more south, sir,' said the oiler in the stern.

A seat in this boat was not unlike a seat upon a bucking broncho, and, by the same token, a broncho is not much smaller. The craft pranced and reared, and plunged like an animal. As each wave came, and she rose for it, she seemed like a horse making at a fence outrageously high. The manner of her scramble over these walls of water is a mystic thing, and, moreover, at the top of them were ordinarily these problems in white water, the foam racing down from the summit of each wave, requiring a new leap, and a leap from the air. Then, after scornfully bumping a crest, she would slide, and race, and splash down a long incline, and arrive bobbing and nodding in front of the next menace.

A singular disadvantage of the sea lies in the fact that after successfully surmounting one wave you discover that there is another behind it just as important and just as nervously anxious to do something effective in the way of swamping boats. In a ten-foot dingey one can get an idea of the resources of the sea in the line of waves that is not probable to the average experience which is never at sea in a dingey. As each slaty wall of water approached, it shut all else from the view of the men in the boat, and it was not difficult to imagine that this particular wave was the final outburst of the ocean, the last effort of the grim water. There was a terrible grace in the move of the waves, and they came in silence, save for the snarling of the crests.

In the wan light, the faces of the men must have been grey. Their eyes must have glinted in strange ways as they gazed steadily astern. Viewed from a balcony, the whole thing would doubtless have been weirdly picturesque. But the men in the boat had no time to see it, and if they had had leisure there were other things to occupy their minds. The sun swung steadily up the sky, and they knew it was broad day because the colour of the sea changed from slate to emerald-green, streaked with amber lights, and the foam was like tumbling snow. The process of the breaking day was unknown to them. They were aware only of this effect upon the colour of the waves that rolled toward them.

In disjointed sentences the cook and the correspondent argued as to the difference between a life-saving station and a house of refuge. The cook had said: 'There's a house of refuge just north of the Mosquito Inlet Light, and as soon as they see us, they'll come off in their boat and pick us up.'

'As soon as who see us?' said the correspondent.

'The crew,' said the cook.

'Houses of refuge don't have crews,' said the correspondent. 'As I understand them, they are only places where clothes and grub are stored for the benefit of shipwrecked people. They don't carry crews.'

'Oh, yes, they do,' said the cook.

'No, they don't,' said the correspondent.

---

16 oiler, an engine-room greaser

'Well, we're not there yet, anyhow,' said the oiler, in the stern.

'Well,' said the cook, 'perhaps it's not a house of refuge that I'm thinking of as being near Mosquito Inlet Light. Perhaps it's a life-saving station.'

'We're not there yet,' said the oiler, in the stern.

II

As the boat bounced from the top of each wave, the wind tore through the hair of the hatless men, and as the craft plopped her stern down again the spray slashed past them. The crest of each of these waves was a hill, from the top of which the men surveyed, for a moment, a broad tumultuous expanse, shining and wind-riven. It was probably splendid. It was probably glorious, this play of the free sea, wild with lights of emerald and white and amber.

'Bully good thing it's an on-shore wind,' said the cook. 'If not, where would we be? Wouldn't have a show.'

'That's right,' said the correspondent.

The busy oiler nodded his assent.

Then the captain, in the bow, chuckled in a way that expressed humour, contempt, tragedy, all in one. 'Do you think we've got much of a show now, boys?' said he.

Whereupon the three were silent, save for a trifle of hemming and hawing. To express any particular optimism at this time they felt to be childish and stupid, but they all doubtless possessed this sense of the situation in their mind. A young man thinks doggedly at such times. On the other hand, the ethics of their condition was decidedly against any open suggestion of hopelessness. So they were silent.

'Oh, well,' said the captain, soothing his children, 'we'll get ashore all right.'

But there was that in his tone which made them think, so the oiler quoth: 'Yes! If this wind holds!'

The cook was bailing: 'Yes! If we don't catch hell in the surf.'

Canton flannel gulls flew near and far. Sometimes they sat down on the sea, near patches of brown seaweed that rolled over the waves with a movement like carpets on a line in a gale. The birds sat comfortably in groups, and they were envied by some in the dingey, for the wrath of the sea was no more to them than it was to a covey of prairie chickens a thousand miles inland. Often they came very close and stared at the men with black bead-like eyes. At these times they were uncanny and sinister in their unblinking scrutiny, and the men hooted angrily at them, telling them to be gone. One came, and evidently decided to alight on the top of the captain's head. The bird flew parallel to the boat and did not circle, but made short sidelong jumps in the air in chicken-fashion. His black eyes were wistfully fixed upon the captain's head. 'Ugly brute,' said the oiler to the bird. 'You look as if you were made with a jack-knife.' The cook and the correspondent swore darkly at the creature. The captain naturally wished to knock it away with the end of the heavy painter; but he did not dare do it, because anything resembling an emphatic gesture would have capsized this freighted boat, and so with his open hand, the captain gently and carefully waved the gull away. After it had been discouraged from the pursuit the captain breathed easier on account of his hair, and others breathed easier because the bird struck their minds at this time as being somehow gruesome and ominous.

In the meantime the oiler and the correspondent rowed. And also they rowed.

They sat together in the same seat, and each rowed an oar. Then the oiler took both oars; then the correspondent took both oars; then the oiler; then the correspondent. They rowed and they rowed. The very ticklish part of the business was when the time came for the reclining one in the stern to take his turn at the oars. By the very last star of truth, it is easier to steal eggs from under a hen than it was to change seats in the dingey. First the man in the stern slid his hand along the thwart and moved with care, as if he were of Sèvres. Then the man in the rowing seat slid his hand along the other thwart. It was all done with the most extraordinary care. As the two sidled past each other, the whole party kept watchful eyes on the coming wave, and the captain cried: 'Look out now! Steady there!'

The brown mats of seaweed that appeared from time to time were like islands, bits of earth. They were travelling, apparently, neither one way nor the other. They were, to all intents, stationary. They informed the men in the boat that it was making progress slowly toward the land.

The captain, rearing cautiously in the bow, after the

dingey soared on a great swell, said that he had seen the lighthouse at Mosquito Inlet. Presently the cook remarked that he had seen it. The correspondent was at the oars then, and for some reason he too wished to look at the lighthouse, but his back was toward the far shore and the waves were important, and for some time he could not seize an opportunity to turn his head. But at last there came a wave more gentle than the others, and when at the crest of it he swiftly scoured the western horizon.

'See it?' said the captain.

'No,' said the correspondent slowly, 'I didn't see anything.'

'Look again,' said the captain. He pointed. 'It's exactly in that direction.'

At the top of another wave, the correspondent did as he was bid, and this time his eyes chanced on a small still thing on the edge of the swaying horizon. It was precisely like the point of a pin. It took an anxious eye to find a lighthouse so tiny.

'Think we'll make it, captain?'

'If this wind holds and the boat don't swamp, we can't do much else,' said the captain.

The little boat, lifted by each towering sea, and splashed viciously by the crests, made progress that in the absence of seaweed was not apparent to those in her. She seemed just a wee thing wallowing, miraculously top up, at the mercy of five oceans. Occasionally, a great spread of water, like white flames, swarmed into her.

'Bail her, cook,' said the captain serenely.

'All right, captain,' said the cheerful cook.

III

It would be difficult to describe the subtle brotherhood of men that was here established on the seas. No one said that it was so. No one mentioned it. But it dwelt in the boat, and each man felt it warm him. They were a captain, an oiler, a cook, and a correspondent, and they were friends, friends in a more curiously iron-bound degree than may be common. The hurt captain, lying against the water-jar in the bow, spoke always in a low voice and calmly, but he could never command a more ready and swiftly obedient crew than the motley three of the dingey. It was more than a mere recognition of what was best for the common safety. There was surely in it a quality that was personal and heartfelt. And after this devotion to the commander of the boat there was this comradeship that the correspondent, for instance, who had been taught to be cynical of men, knew even at the time was the best experience of his life. But no one said that it was so. No one mentioned it.

'I wish we had a sail,' remarked the captain. 'We might try my overcoat on the end of an oar and give you two boys a chance to rest.' So the cook and the correspondent held the mast and spread wide the overcoat. The oiler steered, and the little boat made good way with her new rig. Sometimes the oiler had to scull sharply to keep a sea from breaking into the boat, but otherwise sailing was a success.

Meanwhile the lighthouse had been growing slowly larger. It had now almost assumed colour, and appeared like a little grey shadow on the sky. The man at the oars could not be prevented from turning his head rather often to try for a glimpse of this little grey shadow.

At last, from the top of each wave the men in the tossing boat could see land. Even as the lighthouse was an upright shadow on the sky, this land seemed but a long black shadow on the sea. It certainly was thinner than paper. 'We must be about opposite New Smyrna,' said the cook, who had coasted this shore often in schooners. 'Captain, by the way, I believe they abandoned that life-saving station there about a year ago.'

'Did they?' said the captain.

The wind slowly died away. The cook and the correspondent were not now obliged to slave in order to hold high the oar. But the waves continued their old impetuous swooping at the dingey, and the little craft, no longer under way, struggled woundily over them. The oiler or the correspondent took the oars again.

Shipwrecks are apropos of nothing. If men could only train for them and have them occur when the men had reached pink condition, there would be less drowning at sea. Of the four in the dingey none had slept any time worth mentioning for two days and two nights previous to embarking in the dingey, and in the excitement of clambering about the deck of a foundering ship they had also forgotten to eat heartily.

For these reasons, and for others, neither the oiler nor the correspondent was fond of rowing at this time. The correspondent wondered ingenuously how in the name of all that was sane could there be people who thought

---

it amusing to row a boat. It was not an amusement; it was a diabolical punishment, and even a genius of mental aberrations could never conclude that it was anything but a horror to the muscles and a crime against the back. He mentioned to the boat in general how the amusement of rowing struck him, and the weary-faced oiler smiled in full sympathy. Previously to the foundering, by the way, the oiler had worked double-watch in the engine-room of the ship.

'Take her easy, now, boys,' said the captain. 'Don't spend yourselves. If we have to run a surf you'll need all your strength, because we'll sure have to swim for it. Take your time.'

Slowly the land arose from the sea. From a black line it became a line of black and a line of white, trees and sand. Finally, the captain said that he could make out a house on the shore. 'That's the house of refuge, sure,' said the cook. 'They'll see us before long, and come out after us.'

The distant-lighthouse reared high. 'The keeper ought to be able to make us out now, if he's looking through a glass,' said the captain. 'He'll notify the life-saving people.'

'None of those other boats could have got ashore to give word of the wreck,' said the oiler, in a low voice. 'Else the lifeboat would be out hunting us.'

Slowly and beautifully the land loomed out of the sea. The wind came again. It had veered from the north-east to the south-east. Finally, a new sound struck the ears of the men in the boat. It was the low thunder of the surf on the shore. 'We'll never be able to make the lighthouse now,' said the captain. 'Swing her head a little more north, Billie.'

'A little more north, sir,' said the oiler.

Whereupon the little boat turned her nose once more down the wind, and all but the oarsmen watched the shore grow. Under the influence of this expansion doubt and direful apprehension was leaving the minds of the men. The management of the boat was still most absorbing, but it could not prevent a quiet cheerfulness. In an hour, perhaps, they would be ashore.

Their backbones had become thoroughly used to balancing in the boat, and they now rode this wild colt of a dingey like circus men. The correspondent thought that he had been drenched to the skin, but happening to feel in the top pocket of his coat, he found therein eight cigars. Four of them were soaked with sea-water; four were perfectly scatheless. After a search, somebody produced three dry matches, and thereupon the four waifs rode impudently in their little boat, and with an assurance of an impending rescue shining in their eyes, puffed at the big cigars and judged well and ill of all men. Everybody took a drink of water.

IV

'Cook,' remarked the captain, 'there don't seem to be any signs of life about your house of refuge.'

'No,' replied the cook. 'Funny they don't see us!'

A broad stretch of lowly coast lay before the eyes of the men. It was of low dunes topped with dark vegetation. The roar of the surf was plain, and sometimes they could see the white lip of a wave as it spun up the beach. A tiny house was blocked out black upon the sky. Southward, the slim lighthouse lifted its little grey length.

Tide, wind, and waves were swinging the dingey northward. 'Funny they don't see us,' said the men.

The surf's roar was here dulled, but its tone was, nevertheless, thunderous and mighty. As the boat swam over the great rollers, the men sat listening to this roar. 'We'll swamp sure,' said everybody.

It is fair to say here that there was not a life-saving station within twenty miles in either direction, but the men did not know this fact, and in consequence they made dark and opprobrious remarks concerning the eyesight of the nation's life-savers. Four scowling men sat in the dingey and surpassed records in the invention of epithets.

'Funny they don't see us.'

The light-heartedness of a former time had completely faded. To their sharpened minds it was easy to conjure pictures of all kinds of incompetency and blindness and, indeed, cowardice. There was the shore of the populous land, and it was bitter and bitter to them that from it came no sign.

'Well,' said the captain, ultimately, 'I suppose we'll have to make a try for ourselves. If we stay out here too long, we'll none of us have strength left to swim after the boat swamps.'

And so the oiler, who was at the oars, turned the boat straight for the shore. There was a sudden tightening of muscles. There was some thinking.

'If we don't all get ashore—' said the captain. 'If we don't all get ashore, I suppose you fellows know where to send news of my finish?'

They then briefly exchanged some addresses and ad-

monitions. As for the reflections of the men, there was a great deal of rage in them. Perchance they might be formulated thus: 'If I am going to be drowned—if I am going to be drowned—if I am going to be drowned, why, in the name of the seven mad gods who rule the sea, was I allowed to come thus far and contemplate sand and trees? Was I brought here merely to have my nose dragged away as I was about to nibble the sacred cheese of life? It is preposterous. If this old ninny-woman, Fate, cannot do better than this, she should be deprived of the management of men's fortunes. She is an old hen who knows not her intention. If she has decided to drown me, why did she not do it in the beginning and save me all this trouble? The whole affair is absurd. . . . But no, she cannot mean to drown me. She dare not drown me. She cannot drown me. Not after all this work.' Afterward the man might have had an impulse to shake his fist at the clouds 'Just you drown me, now, and then hear what I call you!'

The billows that came at this time were more formidable. They seemed always just about to break and roll over the little boat in a turmoil of foam. There was a preparatory and long growl in the speech of them. No mind unused to the sea would have concluded that the dingey could ascend these sheer heights in time. The shore was still afar. The oiler was a wily surfman. 'Boys,' he said swiftly, 'she won't live three minutes more, and we're too far out to swim. Shall I take her to sea again, captain?'

'Yes! Go ahead!' said the captain.

This oiler, by a series of quick miracles, and fast and steady oarsmanship, turned the boat in the middle of the surf and took her safely to sea again.

There was a considerable silence as the boat bumped over the furrowed sea to deeper water. Then somebody in gloom spoke. 'Well, anyhow, they must have seen us from the shore by now.'

The gulls went in slanting flight up the wind toward the grey desolate east. A squall, marked by dingy clouds, and clouds brick-red, like smoke from a burning building, appeared from the south-east.

'What do you think of those life-saving people? Ain't they peaches?'

'Funny they haven't seen us.'

'Maybe they think we're out here for sport! Maybe they think we're fishin'. Maybe they think we're damned fools.'

It was a long afternoon. A changed tide tried to force them southward, but wind and wave said northward. Far ahead, where coastline, sea, and sky formed their mighty angle, there were little dots which seemed to indicate a city on the shore

'St. Augustine?'

The captain shook his head. 'Too near Mosquito Inlet.'

And the oiler rowed, and then the correspondent rowed. Then the oiler rowed. It was a weary business. The human back can become the seat of more aches and pains than are registered in books for the composite anatomy of a regiment. It is a limited area, but it can become the theatre of innumerable muscular conflicts, tangles, wrenches, knots, and other comforts.

'Did you ever like to row, Billie?' asked the correspondent.

'No,' said the oiler. 'Hang it.'

When one exchanged the rowing-seat for a place in the bottom of the boat, he suffered a bodily depression that caused him to be careless of everything save an obligation to wiggle one finger. There was cold sea-water swashing to and fro in the boat, and he lay in it. His head, pillowed on a thwart, was within an inch of the swirl of a wave crest, and sometimes a particularly obstreperous sea came in-board and drenched him once more. But these matters did not annoy him. It is almost certain that if the boat had capsized he would have tumbled comfortably out upon the ocean as if he felt sure that it was a great soft mattress.

'Look! There's a man on the shore!'

'Where?'

'There! See 'im? See 'im?'

'Yes, sure! He's walking along.'

'Now he's stopped. Look! He's facing us!'

'He's waving at us!'

'So he is! By thunder!'

'Ah, now we're all right! Now we're all right! There'll be a boat out here for us in half an hour.'

'He's going on. He's running. He's going up to that house there.'

The remote beach seemed lower than the sea, and it required a searching glance to discern the little black figure. The captain saw a floating stick and they rowed to it. A bath-towel was by some weird chance in the boat, and, tying this on the stick, the captain waved it. The oarsman did not dare turn his head, so he was obliged to ask questions.

'What's he doing now?'

'He's standing still again. He's looking, I think. . . . There he goes again. Toward the house. . . . Now he stopped again.'

'Is he waving at us?'

'No, not now! he was, though.'

'Look! There comes another man!'

'He's running.'

'Look at him go, would you.'

'Why, he's on a bicycle. Now he's met the other man. They're both waving at us. Look!'

'There comes something up the beach.'

'What the devil is that thing?'

'Why, it looks like a boat.'

'Why, certainly it's a boat.'

'No, it's on wheels.'

'Yes, so it is. Well, that must be the life-boat. They drag them along shore on a wagon.'

'That's the life-boat, sure.'

'No, by—, it's—it's an omnibus.'

'I tell you it's a life-boat.'

'It is not! It's an omnibus. I can see it plain. See? One of these big hotel omnibuses.'

'By thunder, you're right. It's an omnibus, sure as fate. What do you suppose they are doing with an omnibus? Maybe they are going around collecting the life-crew, hey?'

'That's it, likely. Look! There's a fellow waving a little black flag. He's standing on the steps of the omnibus. There come those other two fellows. Now they're all talking together. Look at the fellow with the flag. Maybe he ain't waving it.'

'That ain't a flag, is it? That's his coat. Why, certainly, that's his coat.'

'So it is. It's his coat. He's taken it off and is waving it around his head. But would you look at him swing it.'

'Oh, say, there isn't any life-saving station there. That's just a winter resort hotel omnibus that has brought over some of the boarders to see us drown.'

'What's that idiot with the coat mean? What's he signaling, anyhow?'

'It looks as if he were trying to tell us to go north. There must be a life-saving station up there.'

'No! He thinks we're fishing. Just giving us a merry hand. See? Ah, there, Willie.'

'Well, I wish I could make something out of those signals. What do you suppose he means?'

'He don't mean anything. He's just playing.'

'Well, if he'd just signal us to try the surf again, or to go to sea and wait, or go north, or go south, or go to hell —there would be some reason in it. But look at him. He just stands there and keeps his coat revolving like a wheel. The ass!'

'There come more people.'

'Now there's quite a mob. Look! Isn't that a boat?'

'Where? Oh, I see where you mean. No, that's no boat.'

'That fellow is still waving his coat.'

'He must think we like to see him do that. Why don't he quit it? It don't mean anything.'

'I don't know. I think he is trying to make us go north. It must be that there's a life-saving station there somewhere.'

'Say, he ain't tired yet. Look at 'im wave.'

'Wonder how long he can keep that up. He's been revolving his coat ever since he caught sight of us. He's an idiot. Why aren't they getting men to bring a boat out? A fishing boat—one of those big yawls—could come out here all right. Why don't he do something?'

'Oh, it's all right, now.'

'They'll have a boat out here for us in less than no time, now that they've seen us.'

A faint yellow tone came into the sky over the low land. The shadows on the sea slowly deepened. The wind bore coldness with it, and the men began to shiver.

'Holy smoke!' said one, allowing his voice to express his impious mood, 'if we keep on monkeying out here! If we've got to flounder out here all night!'

'Oh, we'll never have to stay here all night! Don't you worry. They've seen us now, and it won't be long before they'll come chasing out after us.'

The shore grew dusky. The man waving a coat blended gradually into this gloom, and it swallowed in the same manner the omnibus and the group of people. The spray, when it dashed uproariously over the side, made the voyagers shrink and swear like men who were being branded.

'I'd like to catch the chump who waved that coat. I feel like soaking him one, just for luck.'

'Why? What did he do?'

'Oh, nothing, but then he seemed so damned cheerful.'

In the meantime the oiler rowed, and then the correspondent rowed, and then the oiler rowed. Grey-faced and bowed forward, they mechanically, turn by turn, plied the leaden oars. The form of the lighthouse had vanished from the southern horizon, but finally a pale star ap-

peared, just lifting from the sea. The streaked saffron in the west passed before the all-merging darkness, and the sea to the east was black. The land had vanished, and was expressed only by the low and drear thunder of the surf.

'If I am going to be drowned—if I am going to be drowned—if I am going to be drowned, why, in the name of the seven mad gods who rule the sea, was I allowed to come thus far and contemplate sand and trees? Was I brought here merely to have my nose dragged away as I was about to nibble the sacred cheese of life?'

The patient captain, drooped over the water-jar, was sometimes obliged to speak to the oarsman.

'Keep her head up! Keep her head up!'

'"Keep her head up," sir.' The voices were weary and low.

This was surely a quiet evening. All save the oarsman lay heavily and listlessly in the boat's bottom. As for him, his eyes were just capable of noting the tall black waves that swept forward in a most sinister silence, save for an occasional subdued growl of a crest.

The cook's head was on a thwart, and he looked without interest at the water under his nose. He was deep in other scenes. Finally he spoke. 'Billie,' he murmured, dreamfully, 'what kind of pie do you like best?'

V

'Pie,' said the oiler and the correspondent, agitatedly. 'Don't talk about those things, blast you!'

'Well,' said the cook, 'I was just thinking about ham sandwiches, and—'

A night on the sea in an open boat is a long night. As darkness settled finally, the shine of the light, lifting from the sea in the south, changed to full gold. On the northern horizon a new light appeared, a small bluish gleam on the edge of the waters. These two lights were the furniture of the world. Otherwise there was nothing but waves.

Two men huddled in the stern, and distances were so magnificent in the dingey that the rower was enabled to keep his feet partly warmed by thrusting them under his companions. Their legs indeed extended far under the rowing-seat until they touched the feet of the captain forward. Sometimes, despite the efforts of the tired oarsman, a wave came piling into the boat, an icy wave of the night, and the chilling water soaked them anew. They would twist their bodies for a moment and groan, and sleep the dead sleep once more, while the water in the boat gurgled about them as the craft rocked.

The plan of the oiler and the correspondent was for one to row until he lost the ability, and then arouse the other from his sea-water couch in the bottom of the boat.

The oiler plied the oars until his head drooped forward, and the overpowering sleep blinded him. And he rowed yet afterward. Then he touched a man in the bottom of the boat, and called his name. 'Will you spell me for a little while?' he said, meekly.

'Sure, Billie,' said the correspondent, awakening and dragging himself to a sitting position. They exchanged places carefully, and the oiler, cuddling down in the sea-water at the cook's side, seemed to go to sleep instantly.

The particular violence of the sea had ceased. The waves came without snarling. The obligation of the man at the oars was to keep the boat headed so that the tilt of the rollers would not capsize her, and to preserve her from filling when the crests rushed past. The black waves were silent and hard to be seen in the darkness. Often one was almost upon the boat before the oarsman was aware.

In a low voice the correspondent addressed the captain. He was not sure that the captain was awake, although this iron man seemed to be always awake. 'Captain, shall I keep her making for that light north, sir?'

The same steady voice answered him. 'Yes. Keep it about two points off the port bow.'

The cook had tied a life-belt around himself in order to get even the warmth which this clumsy cork contrivance could donate, and he seemed almost stove-like when a rower, whose teeth invariably chattered wildly as soon as he ceased his labour, dropped down to sleep.

The correspondent, as he rowed, looked down at the two men sleeping underfoot. The cook's arm was around the oiler's shoulders, and, with their fragmentary clothing and haggard faces, they were the babes of the sea, a grotesque rendering of the old babes in the wood.

Later he must have grown stupid at his work, for suddenly there was a growling of water, and a crest came with a roar and a swash into the boat, and it was a wonder that it did not set the cook afloat in his life-belt. The cook continued to sleep, but the oiler sat up, blinking his eyes and shaking with the new cold.

'Oh, I'm awful sorry, Billie,' said the correspondent, contritely.

'That's all right, old boy,' said the oiler, and lay down again and was asleep.

Presently it seemed that even the captain dozed, and the correspondent thought that he was the one man afloat on all the oceans. The wind had a voice as it came over the waves, and it was sadder than the end.

There was a long, loud swishing astern of the boat, and a gleaming trail of phosphorescence, like blue flame, was furrowed on the black waters. It might have been made by a monstrous knife.
