Statistical Pocket-Book
on
Expellees
in the Federal Republic of Germany
and West Berlin

Editor: Federal Statistical Office
Wiesbaden 1953

Foreword

After World War II, above all by reason of the resolutions of Yalta and Potsdam, over 17 million German people have been expelled from their hereditary homes in East Germany and abroad. The expulsion took place under brutal and inhuman circumstances. More than 2½ million Germans have lost their lives in this way or have been forcibly displaced. Hundreds of thousands are still kept back to do forced labour. The expellees had to leave behind their entire property. They were torn away from all human and economic relations, they lost their homes and their means of subsistence. In addition to the expellees who have come to the Federal Republic there is the influx of refugees seeking refuge from the Soviet zone of occupation, today some 2 millions, among them many expellees who have lost their homes for the second time.

This negation of all principles of humanity has led to a tragedy of almost inconceivable gravity. Hardly ever before has a generation been confronted with human and economic problems of such a serious and extensive nature. The extent of the mental distress of these homeless people cannot be measured in figures. An attempt must be made, however, to indicate with figures the magnitude of these problems. All responsible authorities in post-war Germany were aware that extreme efforts had to be made to help the expellees, to offer them a new existence and to make them again useful members of the German nation. The emergency measures of the first years became crystallized to programmes and services whose sums grew higher from year to year. As an indispensable basis of this planning, figures are given showing as accurately as possible the present situation and the possibilities of integration. The refugee statistics are an important prerequisite for the solution of the refugee problem.

I am therefore happy to note that the Statistical Office of the Federal Republic deals with the expellee groups of the population in the first Statistical Pocket-Book it has issued. I hope that these facts painstakingly compiled by the organs of official statistics will show the German people and foreign nations the magnitude and severity of the misfortune caused by the expulsion of many millions of people.

IV

May these figures, which also show numerous starts towards a new, constructive life in the nation and in the family, deepen the binding realization: that only by selfhelp from our own people and by the assistance of the world can the German expellee problem be brought closer to solution.

Bonn, June 1953.

Dr. Hans Lukaschek
Federal Minister for Expellees

Prefatory Note

In the last few years comprehensive statistics on expellees have been collected. It is intended to publish these in a special volume of the "Statistik der Bundesrepublik Deutschland". Some time, however, will be required for the completion of this research work. Therefore the Statistical Office of the Federal Republic has compiled the most important results of the statistics on expellees in the present Pocket-Book in order to present them to a large number of readers. An alphabetical subject index facilitates the use of this Pocket-Book and short methodical notes before each section are intended to prevent the figures from being wrongly interpreted. A chronological table gives the most important dates on the expulsion and integration of the expellees. A textual elaboration of the statistics would have gone beyond the scope of a small pocket-book. It may, however, be pointed out that in a series of investigations made by the "Verein für Sozialpolitik", dedicated to the problem of the expellees, a comprehensive text concerning the expellees, as reflected in statistics, drawn up by Dr. G. Reichling, will be published (Publishers: Duncker und Humblot, Berlin).

The present Statistical Pocket-Book has been prepared in the "Population and Cultural Statistics" Division of the Federal Statistical Office under the direction of Dr. Horstmann by Dr. Reichling, with the collaboration of the Lander Statistical Offices and all Divisions of the Federal Statistical Office; the editorial work has been undertaken by Mr. van Randenborgh.

General Introduction

Sources:— The figures published in the Statistical Pocket-Book are based on the results of the census of population and occupations as well as on that of establishments and of dwellings on 13 September 1950 and of numerous other statistics compiled in the Federal Republic showing the total density, distribution and integration of expellees. Moreover, some censuses made in parts of the Federal Republic are taken into consideration when they could be regarded as representative of all expellees.

Circles of persons:— The term expellee is linked on the one hand with the political conception of a circle of persons robbed of their hereditary home, on the other, of certain characteristics of uprooting, lack of means and of destitution, which require social care. Due to the lack of a clear definition of the term expellees and with the easily tangible features in the statistical censuses it became necessary to use substitute definitions and to make use of special constructions in the census and preparation. In the framework of the population census of 1950 as well as in the sector of the population statistics, in particular in the population estimates, in order to make a distinction between the expellees and the total population, the domicile on 1 September 1939 in combination with the German mother tongue for foreign countries was taken as a basis. With other statistics the possession of an expellee identity card and the number of persons provided with refugee identity cards provided by the Refugee Administrations had to be used as a basis. This applies particularly to many statistics connected with measures of care and integration. The respective definitions of terms and bases of census are explained at the beginning of the individual sections of the Pocket-Book.

The circles of refugees from the Soviet zone of occupation and from Berlin and the non-German refugees and foreigners have been additionally shown in a few tables only.

As the assimilation of expellees in the Federal Republic has not been without effects on the total population, the surveys give a comparison of the statistical values for the expellees with those of the total population. Accord-

ding to the differences to be illustrated between the two circles of persons, the ratios and structural features are expressed in percentages.

The data on expellees and the total population for the Federal Republic have been sub-divided as far as possible, whereas for the Laender or the larger and smaller administrative districts, etc., they have been listed in a simplified form.

Territorial status :— In nine sections the Pocket-Book shows the number, geographical distribution and structure of the expellees for the Federal Republic, followed by corresponding data for West Berlin, Urban and Rural Districts and certain communities. In the English edition of the Pocket-Book the smallest regional data are restricted to the Administrative Districts (AD).

It was only possible to a small extent to prepare information on the whereabouts and structure of expellees outside the borders of the Federal Republic. The number of expellees in the Soviet zone of occupation is estimated at 3.8 millions for the end of 1952, more than 200,000 expellees have found accommodation in Berlin, of whom some 160,000 are in West Berlin and 46,000 in East Berlin. For Austria some 300,000 expellees are recorded, to whom are to be added some further 150,000 to 200,000 expellees who possessed or were given Austrian nationality and therefore are not recorded as expellees in the Austrian statistics.

Rounding off :— In general, addition has been rounded off in such a way that the individual figures have been rounded to the smallest digit shown, independently of the sums of the lines and columns. By this procedure there may be small differences in the sums.

Abbreviations :

Mill. = Millions	AD = Administrative District
% = in Percentages	(Regierungsbezirk,
DM = Deutsche Mark	Verwaltungsbezirk)
sq.m. = square metres	Occ. Zone = Zone of occupation
ha = Hectare = 2.71 acres	ERP = European Recovery Program
F.R. = Federal Republic	IRO = International Refugee Organization

Explanations of signs :

— = nil	0 = more than nil but less than
. = no data available	half of the smallest digit shown.

Further references :— The Statistical Pocket-Book gives a survey of the present status of statistical work on the expellee problem. A number of special inquiries now being made or in preparation regarding the expellees could not be taken into consideration in this edition of the Pocket-Book.

XII

Among such statistics the following are to be mentioned: income tax and turnover tax statistics for expellees, total census of September 1952 for expellee and refugee plants, census made within the land use census of May 1953 on the refugee holdings in agriculture and forestry, a special census in the refugee and transit camps as well as the valuation of the application forms for the Federal expellee identity card under the Federal Law on Expellees of 19 May 1953. The results of these statistics and of the other statistical observations on the expellee problem are reported in the current publications of the Statistical Office of the Federal Republic (*Statistisches Jahrbuch*, *Monatszeitschrift: "Wirtschaft und Statistik"*, a monthly periodical, and *Statistische Berichte Arbeitsreihe VIII/20 "Statistische Unterlagen zum Flüchtlingsproblem"*) and the Statistical Offices of the *Laender*.

The ciphers of the German edition were taken over, for reasons of printing technique, without considering the English manner of writing numbers with more than three digits and decimal figures.

I. Expulsion and Assimilation

Preliminary remarks:— In the censuses of population on 29 October 1946 and on 13 September 1950 the question was put as to the domicile on 1 September 1939, in order to obtain a general view of the shifts in population caused by flight and expulsion. In accordance with this circumstance it is possible to differentiate the expellees and refugees from the indigenous population already living in the Federal Republic in 1939. Those persons who on 1 September 1939 lived in the East German territories (territorial status on 31 December 1937) now under Polish or Soviet administration, in the Saar district or abroad, the latter only with German as their mothertongue, were regarded as expellees. Refugees are those persons who on 1 September 1939 were domiciled in Berlin or in a Land of the Soviet zone of occupation. The domicile of the father on September 1939, in exceptional cases that of the mother, is decisive for the co-ordination, in one of these groups, of children born after 1 September 1939.

In the census of population on 13 September 1950 the number of those possessing a refugee identity card was recorded. The refugee identity card (in the Laender of the British zone the refugee identity card A) was given to persons who had lost their domicile in the East German territories under foreign administration or abroad in connection with the events of the second World War, by flight or expulsion, no matter whether they had already lived there on 1 September 1939 or not. Thus holders of refugee identity cards and expellees according to the criterion of the domicile on 1 September 1939 do not correspond exactly with one another, but for both circles of persons the balance shows the same numbers.

Those persons who do not possess German nationality and do not come under the circles of persons under Article 116 of the Basic Law (Expellees) are considered as foreigners, the number of whom is determined by special statistics.

The migration of expellees across the Laender borders was determined on the basis of police registrations and notices of departure and recorded in the results of the migration statistics compiled in the Federal Republic since January 1950.

The surveys of re-settlement were drawn up according to reports of the Laender concerned on the number and structure of expellees re-settled with Government aid from Schleswig-Holstein, Lower Saxony and Bavaria (Laender of departure) to the remaining Laender of the Federal Republic (Laender of arrival).

Reference is made to the terms "economically active population", "independents without occupation" and "dependents without occupation" in the preliminary remarks to section V.

*) The migration figures across Laender borders are higher in Tables 7c and d than in 7a and b, because migration across the borders of the former Laender Wuerttemberg-Baden, Baden and Wuerttemberg-Hohenzollern (incl. Lindau), by age groups and occupational divisions, which took place within the new Land Baden-Wuerttemberg, could not be eliminated for reasons of technical procedure. — ¹⁾ Age Group = Years of Birth (as shown at the end of the year).

7. Migration across Laender Borders in 1951*)

¹⁾ Resettlements to Hamburg and Bremen are not done in resettlement transports.

II. Life and Mortality of Expellees

Preliminary remarks :— The figures on the structure of the expellees as well as of the total population according to age, sex, and marital status were made available by the census of population of 13 September 1950 and the further estimates of its results, the figures on marriages, births, and deaths by the vital statistics in which the expellees have been especially listed since the beginning of 1950. The enumeration of deaths by causes of death, recorded at the same time as the other data on deaths at the Registry Office, was, however, made for expellees only in Lower Saxony and North Wuerttemberg up to 1951.

Both in the census of population on 13 September 1950 as well as in the vital statistics, the circles of expellees already described in the preliminary remarks to Section I, according to the criterion of the domicile on 1 September 1939, are regarded as expellees. In so far as the domicile on 1 September 1939 is not stated on the census papers for the vital statistics (e.g. on the Registry Office forms), as well as in cases of doubt, the possession of a refugee identity card, separately asked for, moreover, on the grounds of control, was sufficient. In 1950 inquiry was made in some Laender regarding only the expellee character (documented by the refugee identity card). However, due to the far-reaching numerical conformity of the holders of refugee identity cards with the expellees according to domicile, comparableness and continuity of the figures are not disturbed.

The other terms to be observed in the statistics of births and deaths are to be seen in the footnotes to the individual tables. Live births are counted as expellees if the father, in the case of illegitimate births the mother, is an expellee. Only Bavaria, where the expellee character of children conforms in every case with that of the mother, does not follow this rule.

Legal affiliation to a church, a religious community or a religious-philosophical community was decisive in determining the religious affiliation of the population as well as that of the expellees in the census of population in 1950, as also in the previous censuses.

III. Households and Dwellings of Expellees

Preliminary remarks : — On 13 September 1950 together with the census of population and occupations a census was made of the buildings and dwellings in the Federal Republic (Law of 27 July 1950 on a census of population, buildings and dwellings, non-agricultural establishments and small agricultural holdings in 1950). The following explanations are given of the terms used, in so far as they occur in tables 2 and 3.

As a rule the totality of rooms which, according to the construction of the house, is intended for the accommodation of a household and which has the following features is regarded as a dwelling:

- a cooking niche or kitchen as provided in the building plan,
- a separate entrance to the dwelling directly from the staircase or from an ante-room or from outside.

If such a dwelling is situated in an emergency dwelling house (small makeshift homes, Nissen huts, destroyed buildings, etc.), it is not regarded as a normal dwelling but as an emergency dwelling. Emergency dwellings also often lack essential components of normal dwellings, e. g. a kitchen. Also dwellings situated in cellars as well as dwellings in attics not built for permanent dwelling use are counted as emergency dwellings.

The owner of a house in a dwelling in his own house, as well as the tenant of a dwelling in whose name the rent contract is made and who pays the rent directly to the owner of the house are regarded as occupants of dwellings.

All second and further dwelling parties living together with the occupant of the dwelling in a dwelling were counted as subtenants.

Homeless persons quartered elsewhere are families or individuals who, due to the lack of dwellings, are lodged in institution rooms or mass dwellings until they are allotted a dwelling.

The term dwelling party is virtually identical with that of household. This term includes communities of persons who mutually run an independent household and are economically associated with one another and live together. Individuals, too, running a household of their own are regarded as dwelling parties.

Those dwelling parties were counted as expellee dwelling parties when the head of the household was in possession of a refugee identity card (in the British zone of occupation and in Rhineland-Palatinate: refugee identity card A).

Weighted rooms : — The conditions of accommodation in dwellings were expressed, *inter alia*, by calculating the average number of persons per room. In order to avoid treating, for instance, a room with more than 10 sq. m.

and a room with less than 6 sq. m. as of equal value, namely in each case as 1 room, the rooms were assessed according to their floor surface: in this way

rooms and kitchens with more than 10 sq. m. count as 1 room
 rooms of 6—10 sq. m. „ „ $\frac{3}{4}$ room
 rooms less than 6 sq. m. and kitchens less than
 10 sq. m. „ „ $\frac{1}{2}$ room
 emergency rooms and emergency kitchens „ „ $\frac{1}{4}$ room.

In the corresponding tables it is thus to be observed that for instance the given value for $\frac{1}{2}$ room can be composed of only a makeshift room and an emergency kitchen: it can, however, also represent the value of a room less than 6 sq. m. or that of a kitchen of less than 10 sq. m. floor surface.

IV. School and University Education of Expellees

Preliminary remarks:— In the censuses made annually in May at schools providing a general education, all primary, special, intermediate, and secondary schools, as well as standard schools in Schleswig-Holstein, Hamburg and Bremen and the similar “Freie Waldorfschulen (Rudolf Steiner Schools)” are included. The figures for pupils at standard schools are listed in the subsequent tables, in accordance with the character of their branches, with the individual types of schools in order that they may be compared with the results for all Laender of the Federal Republic.

The census taking place in autumn every year at occupational training schools include the following schools:

Vocational Schools: — All schools with compulsory attendance of young people simultaneously undergoing practical training or with jobs, as well as not gainfully employed youths.

Occupational Training Schools: — All schools which, without requiring practical training, are voluntarily attended with full-time education lasting at least one year in preparation for occupations.

Advanced Technical Schools: — All schools serving occupational training and which are voluntarily attended after sufficient practical previous occupational training, the curriculum comprising at least a six months course with full-time education or 600 lessons.

The censuses at Teachers' Training Institutions taking place annually in winter include all institutions serving for the training of teachers for primary schools and occupational training schools — with the exception of Hamburg, as there the training of all teachers takes place at the University.

Every year in the winter term in the scope of the University and Institution of University Level statistics the censuses at the universities and institutions determine, inter alia, the number of expellees among the German students.

In so far as expellees are recorded in the censuses at the schools these are the holders of refugee identity cards or children listed on the refugee identity cards of their parents. In the censuses at the Institutions and Universities in the winter term 1951/52 the expellees were counted according to the criterion of the domicile on 1 September 1939.

V. Occupational Integration of Expellees

Preliminary remarks : The basis for compiling the statistics of the occupational integration of expellees is the occupational census of 13 September 1950. In this the structure of expellees as well as of the total population was determined according to occupations, as well as to the position in the occupation, and to the kind of establishments in which the occupation is practised, and (for all those not gainfully employed) according to the source of income. From this results first the classification in the following three population groups :

1. Economically active persons who have an occupation for the purpose of earning their livelihood, even if they were not gainfully employed on the census date but were unemployed,
2. Independents without occupation who draw an income of some kind without having a main employment, or permanent inmates of institutions of various kinds (cf. table 6),
3. Dependents without occupation who as family members are dependent on a member of the labour force or on a person not gainfully employed.

Besides, the economically active persons are classified according to three points:

1. according to the occupation (comprised in occupational groups in the subsequent table),
2. according to the position in the occupation (independent, family helpers, civil servants, salaried employees, workers, the latter three groups also comprised under the designation „dependents”),
3. according to the nature of the economic branch in which the occupation is carried out (comprised in economic divisions in the subsequent tables).

The definition of expellees in the scope of the occupational census is the same as in the census of population (cf. preliminary remarks to sections I and II).

The results of the statistics of the Federal Ministry of Labour added to this section give a retrospective view of the development of unemployment in the Federal Republic with special consideration of the unemployment of expellees, back to the beginning of 1949. In the unemployment statistics, the holders of refugee identity cards (in Lower Saxony and North Rhine-Westphalia only of refugee identity card A) are regarded as expellees. Further details are given in the preliminary remarks to section I of this Pocketbook regarding the delimitation and numerical conformity of the expellees listed in the census of population and occupation according to the domicile with the holders of refugee identity cards.

VI. Integration of Expellees in Agriculture and Forestry

Preliminary remarks: — The integration of expellee peasantry in the agriculture of the Federal Republic is reflected in a number of tables for which the data (partly supplemented by estimates) were taken from the census of agricultural holdings of 24 May 1949, the census of population and occupations of 13 September 1950 and the land use census of May 1952. Further results come from the statistics on the minimum-sized areas under cultivation of less than 0.5 hectares in the framework of the census of population and occupations of 13 September 1950.

The latest figure for agricultural and forestry holdings, whose occupants were expellees (expellee holdings) is given in the land use census of May 1952 which includes the expellee holdings among holdings with an area of 0.5 hectares and over (among the market gardens, orchards and vineyards also under 0.5 hectares). The minimum-sized areas under 0.5 hectares, which are used by expellees as arable land, meadows (treed meadows), pastures, forests, fishing waters, land planted with vines, garden land, small gardens, were determined in the scope of the population census of 13 September 1950 by a section of the household lists especially provided for this purpose.

By expellees in the meaning of the census of agricultural holdings, the statistics on the minimum-sized areas under cultivation and the special statistics compiled in connection with the land use census those persons are meant who at the time of the census were in possession of a refugee identity card (in the Laender of the British zone the refugee identity card A). In the census of occupations determining the number of expellees among the independents, family helpers and dependent labour in agriculture and forestry on 13 September 1950, the criterion of the domicile on 1 September 1939 was applicable for the delimitation of the term expellee. Further details regarding the differences between the two terms referring to expellees is to be seen in the preliminary remarks to section I.

In these censuses an agricultural and forestry holding is regarded as an expellee holding only when an expellee is considered to be the occupant (owner or lessee) on whose account the holding is managed. Thus those holdings which are managed by an expellee for a third party (for instance as manager), or those into which expellees have married without managing the holding on their own account are not counted among the expellee holdings of agriculture and forestry.

VII. Integration of Expellees in Industry

Preliminary remarks: -- The integration of expellees as employers or as persons employed in industry is illustrated by the following statistics:

1. Census of establishments of 13 September 1950,
2. Additional census to the report on industry at the end of November 1951 and special statistics from the report on industry in September 1952,
3. Census in the main building trades, surface and sub-surface construction and engineering as well as related branches, July 1951,
4. Census of handicrafts of 30 September 1949.

In the census of establishments enterprises are regarded as expellee enterprises when they are run by one or more persons or as partnerships or limited companies K.G., in which at least half the occupants are expellees. In the report on industries and the census in the main building trades, according to the directives of 4 August 1950 of the Expellees' Bank, an enterprise is an expellee enterprise when the occupant is an expellee; partnerships and corporations are regarded as expellee enterprises when expellees have more than a 50% share in the capital. The same holds good for the refugee enterprises.

By establishments the local units of enterprises are meant. All units whose sites are separated from one another and in which at least one person is occupied are regarded as such.

Establishments are counted as replacement establishments when they have been established in the present communities after 31 December 1944 as a substitute for an establishment which was given up as a result of the war or of the consequences of the war and which formerly (before 1 January 1945) was in another community.

In the subsequent tables holders of a refugee identity card (in the Laender of the British zone of the refugee identity card A) are counted as expellees. Refugees are those German citizens or nationals who after 1 September 1939 transferred their permanent domicile from the territory of the Soviet zone of occupation or from Berlin to the Federal Republic but who do not belong to the circles of expellees.

It was often difficult to determine expellees employed in industry so that the figures given here are to be assessed as minimum figures.

In the structure according to size classes it is to be observed that the occupants are included among the persons employed.

VIII. Integration of Expellees in Public Services

Preliminary remarks : — Placing expellees in vacancies in public services is one of the most urgent tasks for the Federation and Laender. In order to determine the ratios, in some cases prescribed by law, of the expellees to the persons employed in public services according to appointments, career groups, and branches of administration or types of economic enterprises of state and local authorities, the question was already put in 1949 in the statistics regarding the status of personnel in some Laender as to the expellee character. Owing to lack of uniformity in the censuses the results cannot be compiled as results for the Federation. Uniform statistics on personnel were first compiled as on 2 September 1950 in all offices of the Federation, Laender, communities and community associations, followed by those of the Federal Railways and Post Office as well as by further public authorities which are subject to the supervision of regional authorities. Unfortunately, the results of these censuses, too, do not admit of a thoroughly satisfactory compilation of a Federal result, as in these, in some cases, the refugees from the Soviet zone of occupation and from Berlin are included among the expellees and cannot be listed separately. In spite of this shortcoming these censuses have at least provided proportional data on the state of the integration of expellees in public services for the whole Federal Republic.

The following section has been supplemented by a number of special surveys of the expellees among the full-time teachers according to the censuses on schools and universities and institutions of university level in 1951 and 1952. The preliminary remarks to section IV of the Pocketbook explains the method and carrying out of these censuses as well as the terms used for the several kinds of schools.

In the meaning of the census of the status of personnel of 2 September 1950 and of the school statistics, expellees are holders of refugee identity cards (in the Laender of the British zone of refugee identity card A).

IX. Measures of Aid and Assistance for Expellees

Preliminary remarks: The table on the financial services of the Federation and of the Laender for the integration of expellees in industry represents an attempt of the "Bank für Vertriebene und Geschädigte" (Equalization of Burdens Bank) to illustrate on as broad a basis as possible all Laender grants and credits, including ERP funds (DM counterpart funds of the Marshall Plan) and the aid funds of the main point programme (in the scope of the 1st procurement of work programme of the Federal Government of 9 February 1950) as well as guarantees of the most various kinds serving the integration of expellees. A number of further tables give a survey of the amount of business and activities of the Equalization of Burdens Bank itself.

Data are given by some of the statistics prepared by the Federal Ministry for Food, Agriculture, and Forestry in accordance with information from the supreme settlement authorities of the Laender on the public funds spent on the promotion of settling expellee farmers under the Refugee Settlement Law of 10 August 1949 and other means of assistance. As these also include subsidiary employment places as well as farm labourer settlements, minimum-sized settlements, or homesteads, the figures on expellee farmers who have received aid shown here cannot be compared with the results of other censuses of agricultural expellee holdings given in section V.

The application of funds raised on the basis of the Immediate Aid Law of 8 August 1949 was supplied by the main office for Immediate Aid in accordance with the monthly statistics and in conformity with the books of the Laender offices for Immediate Aid. Extracts are given of this comprehensive numerical material. The sums appropriated to expellees on the one hand and to others who suffered losses on the other hand, which could not be ascertained separately for technical reasons, would roughly correspond to the ratio of the approved applications. At the request of the Federal Minister for Expellees corresponding estimated figures were included in the tables.

After a general survey in which the sums paid out according to types of aid are listed up to the expiry of the period of enforcement of the Immediate Aid Law on 31 August 1952, the sums paid out are compiled, according to Laender, in the tables on maintenance aid, aid for household effects, and promotion of social housing; in the tables on aid for establishing means of subsistence and community aid for creating permanent working places, however, the approved sums in the same period, according to Laender, are compiled. It was decided to record the approved sums because in these types

of aid several months often elapsed between approval and paying out, and therefore in some cases the sums could be paid out only after 31 August 1952. The types of aid shown in the surveys are legally fixed in the provisions of §§ 35, 37, 43—46 of the Immediate Aid Law.

In all Laender of the Federation the public welfare statistics have again been uniformly compiled as from the financial year 1950/51. With their help the services of public welfare assistance and public assistance (institutions) given to certain circles of persons regarded as indigent or worthy of support are compiled. Indigent persons are supported on the part of welfare associations by public welfare assistance with money and material services while preserving their economic independence. Public assistance (institutions) takes care of indigent persons in institutes and homes. Public juvenile aid includes the official measures provided in the Law for Juvenile Welfare of 9 July 1922 on the promotion of juvenile care and welfare.

Owing to a lack of numerical data no surveys can be given of the care of expellees to be mentioned among the measures of aid and assistance by social insurance, care of war victims, unemployment benefit and welfare.

In so far as expellees are supported or taken care of in public welfare by public measures of assistance these are holders of the refugee identity card (in the Laender of the British zone of refugee identity card A).

Notes to p. 85:

¹⁾ Credits approved by the Equalization of Burdens Bank. — ²⁾ Incl. small credits for expellees in handicrafts, small trades, and the professions. — ³⁾ Incl. a small share from Berlin and Soviet Zone plants. — ⁴⁾ Incl. plants related to refugees. — ⁵⁾ Incl. Lindau. — ⁶⁾ Without Lindau. — ⁷⁾ Plus 16, 059, 800 DM ERP credits for new buildings, import, and reconstruction of sea-going ships of expellee shipping companies. — ⁸⁾ Guarantees by Finanz-A.G.

¹⁾ Without universities in Hesse at which conditions are different on account of the constitutional exemption from fees, thus preventing a comparison with other universities. —

²⁾ Without teachers' training institutions.

Results for West Berlin

Preliminary remarks: — Like most of the other censuses for expellee statistics, the census on 13 September 1950 was also made in West Berlin. In the following results the ratio of expellees to the various important circles of persons is reproduced in absolute figures and in percentages. As in material respect the survey repeats the data given for the Federal Republic and for the Laender, the preliminary remarks on the preceding main sections are also applicable to West Berlin.

Estimates of the census of expellees are not taking place in West Berlin. The number of expellees in West Berlin on 1 January 1953 is estimated at 160,000 and in East Berlin at 46,000.

¹⁾ The data on employed expellees from the results of the census of non-agricultural establishments of 13. 9. 1950 refer throughout to minimum figures, as it was difficult for the establishments to determine which of their employees belonged to the circle of expellees. — ²⁾ Fully employed staff in direct service. There were no civil servants at the time of the census in West Berlin. — ³⁾ The above results are based on data given by the persons questioned, the Land accomodating authorities had not yet checked the claims. — ⁴⁾ Financial year.

Results for Administrative Districts

Preliminary remarks: — The ratios of the assimilated expellees to the population differ much within the Federal Republic. This is apparent not only in a comparison of the Laender but also of the larger and smaller administrative districts within the Laender. Similar differences can be seen in the structure in regard to the districts from which the expellees come and to the religious denominations, in the structure of employment, and in the type of accommodation. In order to judge the living conditions of the expellees in the administrative districts the most important statistical data, which have been shown in the previous main sections for the Federal Republic and the Laender, are repeated below in abbreviated form. In the German edition these data were also given for all urban and rural districts.

The results for administrative districts give the total figures for expellees according to the census of 13 September 1950 and estimates of same up to 1 July 1952.

In order to give a survey of the composition of expellees according to the districts they come from, the ratios for persons from the East German territories under foreign administration and for those from Czechoslovakia are listed separately. The proportion of expellees from the remaining foreign countries (Poland, Danzig, South-East European states, etc.) is to be calculated by finding the difference.

As a basis for judging the problems and tasks resulting from the denominational distribution of expellees, the figures for the Protestant and Roman Catholic expellees are listed with the corresponding ratios to the total number of persons with religious affiliations (Cf. introduction to sections II).

The employment and living conditions of the expellees are to be seen from the data on the employment and dwelling parties (Cf. introduction to sections III and V).

In the supplementary column on commutation the number of commuters among the expellees is given. The economically active persons whose working places are not in the communities in which they are domiciled are considered as commuters.

The introductions to the corresponding main sections of the Pocket-Book give further information regarding the delimitation of the circles of expellees. The expellee commuters were ascertained on the grounds of their possessing a refugee identity card.

Chronological Table on the Expulsion and Integration of Expellees

Preliminary remarks: — Selection and supplementation of the data compiled in the Statistical Office of the Federal Republic has been made by the Federal Ministry for Expellees.

- 1. 9. 1939: Beginning of the war with Poland.
- 17. 9. 1939: Soviets march into East Poland.
- 15. and 30. 10. 1939: Treaty on re-settlement of Germans from Latvia and Estonia to the German Reich.
- 21. 10. 1939: Treaty on re-settlement of Germans from South Tyrol to the German Reich.
- 3. 11. 1939: Treaty on re-settlement of Germans from East Galicia and from Volhynia to the German Reich.
- 5. 9. 1940: Treaty with the Soviet Union on re-settlement of Germans from Bessarabia and from North Bukowina to the German Reich.
- September/
- October 1940: Re-settlement of Germans from Cholim District to the German Reich.
- 22. 10. 1940: Treaty with Roumania on re-settlement of Germans from South Bukowina and North Dobrudja to the German Reich.
- 1940/1941: Deportation of Germans from East Volhynia to Siberia and Central Asia.
- 10. 1. 1941: Treaties with the Soviet Union on subsequent re-settlement of Germans from Estonia and Latvia and re-settlement of Germans from Lithuania to the German Reich.
- 22. 6. 1941: Beginning of the war with the U.S.S.R.
- 14. 8. 1941: Atlantic Charter (Roosevelt-Churchill) — Second Point to the effect that the signatory countries wish no change of territory which does not concur with the freely expressed wishes of the peoples concerned.
- from 15. 8. 1941: Deportation of Volga Germans to Siberia and Central Asia.
- End of 1941: Deportation of Germans from the Crimea and the Caucasus to Siberia and Central Asia.
- 1. 1. 1942: Acknowledgment of the principles of the Atlantic Charter by the United Nations (26 nations).
- September 1942: The British Government informs the Czechoslovakian Exile Government that in principle it has nothing against deportation of Sudeten Germans.
- 6. 10. 1942: Treaties on re-settlement of Germans from Croatia and from Serbia to the German Reich; transportation of the Gottschee German language enclave Germans to the German Reich.
- 13. 10. 1942: Treaty on re-settlement of Germans from Bulgaria to the German Reich.
- 12. 5. 1943: Roosevelt informs Benes of his agreement to the planned expulsion of Sudeten Germans.
- 6. 6. 1943: The Soviet Ambassador with the Czechoslovakian Exile Government expresses his agreement to the expulsion of Sudeten Germans.
- 23. 11.—1. 12. 1943: Conference of Teheran (Roosevelt-Churchill-Stalin) deals with the new western frontier of Poland.
- 1943 and
- Summer 1944: Re-settlement of Black Sea Germans to the Reich Territory.
- August 1944: Soviet troops in parts of East Prussia.
- Autumn 1944: Volksdeutsche from North Siebenburgen (Transylvania) and Hungary flee to Austria and Bavaria.
- 15. 12. 1944: Prime Minister Churchill approves in the British House of Commons an expansion of Poland to the west in place of the territories to be ceded in the east and the total expulsion of Germans from the new territories.

December 1944

and 1945: Germans from Siebenburgen (Transylvania), Hungary and Yugoslavia are deported to the Soviet Union.

12. 1. 1945: Beginning of the Russian Vistula offensive; beginning of the mass trek of East German refugees.

3.—12. 2. 1945: Crimea Conference at Yalta (Churchill-Roosevelt-Stalin): Poland is to be compensated by a considerable increase of territory in the west and north for the cessions in the east. The final fixing of the west frontiers of Poland is postponed until the Peace Conference. A secret protocol provides, *inter alia*, for using Germans as labour as on account reparations.

5. 2. 1945: Statement to the press by Bierut, President of the National Council in Warsaw, that Poland has taken over the civil administration in the Reich territories eastwards of the Oder-Neisse line.

28. 2. 1945: Measures against the Volksdeutsche remaining in Poland, such as placing in labour camps, confiscation of property, and so forth.

February/April 1945: Mass deportation of Germans from the territories occupied by the Red Army to the Soviet Union.

5. 3. 1945: Confiscation of movable and immovable property left in Poland by fleeing Germans.

26. 3. 1945: Occupation and destruction of Danzig.

9. 4. 1945: Capitulation of Königsberg.

5. 5. 1945: Revolt in Czechoslovakia and beginning of terrorism against the Germans.

7. 5. 1945: Capitulation of Breslau.

8. 5. 1945: Capitulation of the German Wehrmacht.

19. 5. 1945: Decree of President Benes on the confiscation of all German property in Czechoslovakia.

5. 6. 1945: Fixing of the Zones of Occupation within the German Reich in the frontiers of 21. 12. 1937 on the part of the Governments of Great Britain, the U.S.A., the U.S.S.R. and France.

26. 6. 1945: Charter of the United Nations; it excludes German expellees from international aid for refugees.

22. 7. 1945: Prague Government submits plans to the three Big Powers for the „orderly removal” of Germans and Magyars from Czechoslovakia.

2. 8. 1945: Potsdam Agreement — Art. IX to the effect that the heads of the three governments confirm their view that the final fixing of the western frontiers of Poland is to be postponed until the Peace Conference, Art. XIII to the effect that the conference aims at an agreement on the expulsion of Germans from Poland, Czechoslovakia and Hungary.

5. 10. 1945: Marshal Zukow fixes the beginning of the expulsion of Germans from Poland, Czechoslovakia and Hungary to the Soviet Zone.

October 1945- 1948: Expulsion of Germans from Poland and also from the East German territories under Polish administration (Single transports until 1950).

November 1945: Establishment of Laender Refugee Administrations in Bavaria, Württemberg-Baden and Hesse.

20. 11. 1945: Agreement of the Allied Control Council for Germany in Berlin on the plan for the removal of the German population from Czechoslovakia, Austria, Hungary and Poland to the four occupied zones of Germany.

14. 12. 1945: Refugee Emergency Law in Bavaria.

1945- 1946: Flight of Germans from Hungary and Yugoslavia to Austria.

19. 1. 1946: Start of the transportation lasting until the beginning of 1947 of Germans from Czechoslovakia, Hungary and Yugoslavia to Bavaria, Hesse and Württemberg-Baden as well as to the Soviet zone of occupation.

14. 2. 1946: Agreement on the removal of Germans from Poland between the British Army of the Rhine and the Polish authorities. The transport of Germans begins immediately and lasts until 1947.

February 1946: Establishment of a Refugee Committee in the South German Laender Council. Coordination agency of the Refugee Administrations of the Laender of the U.S. Zone.

20. 4. 1946: First appeal for international aid for the solution of the German refugee problem by the Refugee Commissioners of the three Laender of the U.S. Zone in the Stuttgart Laender Council.

6. 9. 1946: Speech by the U.S. Secretary of State Byrnes in Stuttgart to the effect that it is evident from the protocols of the Potsdam Conference that the heads of the states have not agreed to support in the peace settlement the cession of the territories of Silesia and other East German territories consigned for administrative purposes.
- Autumn 1946: Appointment of Bishop Maximilian Kaller as Refugee Bishop of the Roman Catholic Church in Germany.
23. 10. 1946: Stalin's interview on the western frontiers of Poland; he describes them as final.
24. 10. 1946: Minister of the Interior of Czechoslovakia Vosek announces the conclusion of the expulsion of Sudeten Germans.
5. 12. 1946: Acceptance of the statute of the IRO; exclusion of the German expellees and refugees from any measures of aid.
- December 1946: First transport with expellees from refugee camps in Denmark arrives in West Germany.
19. 2. 1947: Law on the admission and integration of German refugees (Refugee Law) in the Laender of the American Zone (Bavaria, Hesse, Württemberg-Baden).
- Spring 1947: Approval by the U.S. Military Government for refugees to unite with the aim of mutual social aid.
7. 6. 1947: Resolution of the Conference of the heads of the German Laender governments in Munich on the re-distribution of refugees and founding of the working community of German refugee administrations in Stuttgart.
11. 6. 1947: Law on aid for refugees in Land Lower Saxony.
- Middle of 1947: Beginning of the state credit and guarantee actions of the Laender for the re-founding of expellee establishments.
- Autumn 1947 and
- Autumn 1948: Expulsion of Germans from the parts of East Prussia occupied by the Soviets (single expulsions until 1950).
- November 1947: First agreement on internal German re-settlement by the Stuttgart Laender Council.
27. 11. 1947: Law on doing away with the distressed conditions of refugees in Schleswig-Holstein.
2. 6. 1948: Refugee Law of Land North Rhine-Westphalia.
- from the middle
- of 1948: Full utilization of Laender credits and Laender guarantees for independent expellees.
- Autumn 1948: Occupation Powers repeal coalition prohibition for expellees and refugees in Germany.
- from Autumn 1948: Founding of expellee associations and Landsmannschaften.
9. 12. 1948: Conference of the Prime Ministers of the Laender resolves to set up a central agency for refugee affairs.
1. 2. 1949: Agency for problems of expellees in the United Economic Area set up under Dr. Ottomar Schreiber.
- 22.—25. 2. 1949: Hamburg Conference of the Oecumenic Council of Churches on the German refugee problem.
9. 4. 1949: Founding of the Central Association of Expelled Germans in Hanover.
23. 5. 1949: Basic Law for the Federal Republic of Germany. Article 116 determines the equal status of expellees with German citizens.
21. 6. 1949: Resolution of the U.S. Congress to examine the German expellee problem („Walter“ Committee).
- July 1949: First consideration of the expellees under Marshall Plan Aid.
8. 8. 1949: Law on the mitigation of urgent social distress (Emergency Aid Law).
10. 8. 1949: Law on the promotion of integration of expellees in agriculture (Refugee Settlement Law).
17. 8. 1949: Land law on aid for refugees (Land Refugee Law) Rhineland-Palatinate.
- August 1949: Settlement of payments to expellees by the West German Railways and Post Office.
21. 9. 1949: Dr. Hans Lukaschek appointed Federal Minister for Expellees.
29. 11. 1949: Decree of the Federal Government on the re-settlement of 300,000 expellees from the Laender Bavaria, Lower Saxony and Schleswig-Holstein.

24. 1. 1950: Founding of the Netherlands Committee of Enquiry for the German refugee problem.
9. 2. 1950: Main point programme under the procurement of work programme 1950 of the Federal Government for Schleswig-Holstein, Lower Saxony, Bavaria and North Hesse.
1. 3. 1950: First transport under „Operation Link“ arrives at Heiligenstadt from Poland.
24. 3. 1950: „Walter“ Report on the refugee problems in Germany submitted to the U.S. House of Representatives.
20. 4. 1950: First treatment of the expellee problem at the Emigration Conference of the International Labour Office in Geneva.
12. 5. 1950: Founding of the Expellees Bank in Bonn.
- May 1950: Conference of Foreign Ministers in London recognizes Germany's expellee problem as a problem of international responsibility.
3. 7. 1950: Law on the admission and integration of expellees in the Hansa city of Hamburg.
- July 1950: Social conference of the European Movement in Rome deals with the German expellee problem.
- July 1950: Experts Conference of Foreign Ministers in Paris deals with the German expellee problem.
- July 1950: On the basis of the „Walter“ report supplementation of the U.S.-D.P. law of 1948 and granting of 54,744 visas and cost-free emigration to the U.S.A. for German expellees.
5. 8. 1950: Charter of the German expellees: right to the native country as a basic right of mankind given by God — rejection of revenge and reprisals — creation of a united Europe — cooperation in the recovery of Germany and of Europe.
- August 1950: Consultative Assembly of the Council of Europe resolves to establish a refugee committee comprising German expellees.
21. 9. 1950: Founding of the Convention of the scattered Protestant eastern Churches in Königswinter (Eastern Churches Committee).
- October 1950: „Sonne“ commission arrives from the U.S.A.
28. 11. 1950: First law on the transfer of burdens and coverage to the Federation.
- November 1950: Committee of Ministers of the Council of Europe deals with the German expellee problem for the first time.
17. 12. 1950: Founding of the „United East German Landsmannschaften“ (VOL) in Bonn.
21. 3. 1951: „Sonne“ plan on the integration of expellees in the German community submitted to the Federal Chancellor.
- 9.—14. 4. 1951: Meeting of the International Red Cross in Hanover on problems of expellees and refugees.
- April 1951: Practical conclusion of „Operation Link“ by stopping the transports.
11. 5. 1951: Federal Law for settling the legal status of persons coming under Article 131 of the Basic Law.
13. 5. 1951: Resolution of the General Assembly of the Council of Europe on the establishment of a European refugee organization which also comprises the German expellees in its activities.
22. 5. 1951: Law on the re-settlement of a further 300,000 expellees from the Laender Bavaria, Lower Saxony and Schleswig-Holstein.
28. 5. 1951: Law on the legal status of homeless foreigners in the Federal Republic.
11. 9. 1951: Letter from Queen Juliana of the Netherlands to President Truman asking for help for the expellees.
- September 1951: Germany becomes a member in the Advisory Council of the High Commissioner of the U.N.O. for refugees.
19. 11. 1951: Federal Government signs the international convention of 28. 7. 1951 on the status of refugees and homeless foreigners.
22. 11. 1951: Berlin House of Deputies approves the Bill on immediate aid measures for the procurement of household effects for victims of material damage due to the war and for expellees.
- November 1951: Founding of the Provisional intergovernmental committee for the movement of migrants from Europe (PICCME, now ICEM) in Brussels.
30. 1. 1952: Law on the integration of expellees and of persons of equal status in Schleswig-Holstein.

- 12. 2. 1952: Decree on re-settlement of expellees from refugee camps and emergency dwellings in the Laender Bavaria, Lower Saxony and Schleswig-Holstein.
- 27. 3. 1952: Law on currency compensation for expellees with savings accounts.
- 21. 4. 1952: Law on determining expulsion and war damage (Determination Law).
- 29. 4. 1952: The Expellees Bank (Vertriebenen-Bank) in Bad Godesberg changed to the Bank for Expellees and Injured Persons (Bank für Vertriebene und Geschädigte) – (Equalization of Burdens Bank).
