2. Of letters or writing: Having the large rounded forms (not joined to each other) characteristic of early Greek and Latin manuscripts; also (in looser use), of large size, capital.

The term is also applied to letters having the form of the uncial, irrespective of size. When used in its strict sense, *uncial* is distinguished from *capital*, which denotes the more original, unrounded forms of the letters.

Jerome's *unciales litteræ* (Prol. Job) is commonly explained as meaning 'letters of an inch long'; his use of the word is accompanied by the phrase *ut vulgo aiunt*, and the literal sense was perhaps not seriously intended. The emendations *initiales* 'initial' and *uncinales* 'hooked, bent', have been suggested.

-uncle, *suffix*, representing OF. *-uncle (-oncle)* and ultimately L. *-unculus, -uncula*, in a few words, in most of which it retains its diminutive force. Other examples are mostly of recent date, and show considerable extension of the usage, as in *undefleece*, *-fur*, *-mattress*, etc.

The meaning is however as frequently expressed by Sub- 5 a and 6.

b. With other nouns, in the sense of 'subordinate, subsidiary, minor'. An early instance of this is *under-help* (1579); others, such as *underaccident*, *-action*, *-cause*, *-ministry*, etc., occur in the 17th cent. In later use the tendency is to employ either *sub-* (see Sub- 5 b, c, d) or an adjective, but A. Tucker *Light Nat.* (1768) has *under-aim*, *-plan*, *-scheme*, *-society*, *-species*, *-stage*.

Chiefly OE., as *underblegan* to subject, *underbiigan* to submit, *underfodam* to subject, subjugate; and ME., as *underassist*, *-put*, *-throw*. See also *undershining*, *-sphere*, *-study*, *-sweat*, *-thrown*.

Under- is rarely employed in the sense of Sub- 9 (Florio (1611) has *under-vigilate* rendering *It. sottovigilare*.

III. In figurative senses.

8. With verbs. a. In OE., various secondary meanings of *under-* are represented by such verbs as *underbeginnan* to begin or attempt, *underfon* to receive, *undergetan*, *-numan*, *-standan* to understand, *underscadan* to investigate. In several of these survive in ME., as *underfo*, *undergete*, *-nim*, *-stand*, *-undersecke*; and a few more are added, as *underfind*, *-grope*, *-take*. In later examples the sense is usually that of (secret) investigation, as *underfeel*, *-look*, *-search*, *-watch*, or of unobserved action, as *underheer*. In addition to the verbs some agentnouns occur, as *under-doer*, *-plotter*, *-plotter*.

Florio (1611) renders It. *sottoscapere*, *valere* by *underknow*, *-smile*.

b. From the end of the 16th cent *under-* is used with verbs in the sense of 'below (at a lower rate than) another person', as in *underbid*, *-buy*, *-sell*, *-spend*, *-work*.

c. Occasionally the sense is 'to a point or degree below what is normal or customary', as in *undercook*, *-hew*.

d. Very rarely, subordinate action is implied, as in *underlet* = sublet.

9. With nouns, denoting actions, etc., which lie or are kept beneath the surface or in the background. An early instance is *underscrift* (*c* 1400); others occur from the 17th cent., as *underdealing*, *-thought*. Modern instances are chiefly of an individual character.

IV. Denoting insufficiency or defect.

10. a. With verbs. From the latter part of the 16th cent., by contrast with Over- 27, *under-* is prefixed to verbs to imply that the action falls below the usual or proper standard, and thus acquires the sense of 'at too low a rate', 'too low', 'too little', 'insufficiently'. Early instances are *underprize, -value*, others of slightly later date are *underbuy, -charge, -rate, -reckon, -sell*, etc. Subsequently the use becomes extremely common, especially in the sense of 'insufficiently, not enough', and occurs frequently with pa. pples. and pvpl. adjs. Examples of vbl. sbs. (cf. b) are also included in the following illustrations.

c. With adjectives *under-* is rarely employed as the opposite of Over- 28, except when directly suggested by the latter, e.g. *under-scrupulous* as the converse of *over-scrupulous*; *underhonest* (Shaks.) in contrast to *overproud*; *under-ripe*, etc.

11. In words formed with *under-* the stress is variable. Normally it falls on the stem in verbs (including participles in predicative use) and on the prefix in nouns, adjectives, and attributive participles, with concurrence even on prefix or stem respectively, whenever form or sense makes a double stressing natural or necessary. Even in verbs, however, the prefix naturally takes either the main or an equal stress whenever it becomes emphatic through contrast either with the simple verb or with a compound in Over-.

12. Compounds in which the two parts are not felt to be distinct are written as one word without a hyphen. In other formations the use of the hyphen is variable, and depends to a great extent on the form or the frequency of the word. Complete separation of the prefix, common in older usage, is now restricted to instances in which *under* may be taken as an adjective. Examples of these have been included under the compounds, as no clear distinction can be drawn between the two.

Under- (wndə), *prefix*[2], originating in the coalescence of the preposition Under with a following noun, the compound being then usually employed as an adj. or adv., as Underfoot, -ground, -hand, -stairs, -water. In attributive use these compounds have the stress on the prefix.

Purely local as the compounds *under-celestial* (Florio), *-natural* (1632), *-proficient* (1703), are rare. An unusual type occurs in Undergraduate.

The (*b*) *-er undern* also survived in dialect use, and appears as *earnder*, *eender*, etc. (see YERNDER), while OE. *after undern* appears in the 15th c. as *erneryng*, *ernedrynk*, in 17th as *ernder*, *earndren*, and later as *aurnder*, *arntren*, etc. (*Eng.
