275. war—presumably King George's War, 1744-48. **280. Loup-garou**—were-wolf. **302. story**—The *Works* note that this story is the subject of Rossini's opera *La gazza ladra* (The Thievish Magpie).

Might took the place of right, and the weak were oppressed, and the mighty
Ruled with an iron rod. Then it chanced in a nobleman's palace
That a necklace of pearls was lost, and erelong a suspicion
Fell on an orphan girl who lived as maid in the household.
She, after form of trial condemned to die on the scaffold,
Patiently met her doom at the foot of the statue of Justice.
As to her Father in heaven her innocent spirit ascended,
Lo! o'er the city a tempest rose; and the bolts of the thunder
Smote the statue of bronze, and hurled in wrath from its left hand
Down on the pavement below the clattering scales of the balance,
And in the hollow thereof was found the nest of a magpie,
Into whose clay-built walls the necklace of pearls was inwoven."
Silenced, but not convinced, when the story was ended, the blacksmith
Stood like a man who fain would speak, but findeth no language;
All his thoughts were congealed into lines on his face, as the vapors
Freeze in fantastic shapes on the window-panes in the winter.

Then Evangeline lighted the brazen lamp on the table,
Filled, till it overflowed the pewter tankard with home-brewed
Nut-brown ale, that was famed for its strength in the village of Grand-Pré;
While from his pocket the notary drew his papers and inkhorn,
Wrote with a steady hand the date and the age of the parties,
Naming the dower of the bride in flocks of sheep and in cattle.
Orderly all things proceeded, and duly and well were completed,
And the great seal of the law was set like a sun on the margin.
Then from his leathern pouch the farmer threw on the table
Three times the old man's fee in solid pieces of silver;
And the notary rising, and blessing the bride and the bridegroom,
Lifted aloft the tankard of ale and drank to their welfare.
Wiping the foam from his lip, he solemnly bowed and departed,
While in silence the others sat and mused by the fireside,
Till Evangeline brought the draught-board out of its corner.
Soon was the game begun. In friendly contention the old men
Laughed at each lucky hit, or unsuccessful manoeuvre,
Laughed when a man was crowned, or a breach was made in the king-row.
Meanwhile apart, in the twilight gloom of a window's embrasure,
Sat the lovers and whispered together, beholding the moon rise
Over the pallid sea and the silvery mist of the meadows.
Silently one by one, in the infinite meadows of heaven,
Blossomed the lovely stars, the forget-me-nots of the angels.

Thus was the evening passed. Anon the bell from the belfry
Rang out the hour of nine, the village curfew, and straightway
Rose the guests and departed; and silence reigned in the household.
Many a farewell word and sweet good-night on the door-step
Lingered long in Evangeline's heart, and filled it with gladness.
Carefully then were covered the embers that glowed on the hearth-stone,
And on the oaken stairs resounded the tread of the farmer.
Soon with a soundless step the foot of Evangeline followed.
Up the staircase moved a luminous space in the darkness,

344. draught-board—checkerboard.

Lighted less by the lamp than the shining face of the maiden.
Silent she passed the hall, and entered the door of her chamber.
Simple that chamber was, with its curtains of white, and its clothes-press
Ample and high, on whose spacious shelves were carefully folded
Linen and woollen stuffs, by the hand of Evangeline woven.
This was the precious dower she would bring to her husband in marriage,
Better than flocks and herds, being proofs of her skill as a housewife.
Soon she extinguished her lamp, for the mellow and radiant moonlight
Streamed through the windows, and lighted the room, till the heart of the maiden
Swelled and obeyed its power, like the tremulous tides of the ocean.
Ah! she was fair, exceeding fair to behold, as she stood with
Naked snow-white feet on the gleaming floor of her chamber!
Little she dreamed that below, among the trees of the orchard,
Waited her lover and watched for the gleam of her lamp and her shadow.
Yet were her thoughts of him, and at times a feeling of sadness
Passed o'er her soul, as the sailing shade of clouds in the moonlight
Flitted across the floor and darkened the room for a moment.
And, as she gazed from the window, she saw serenely the moon pass
Forth from the folds of a cloud, and one star follow her footsteps,
As out of Abraham's tent young Ishmael wandered with Hagar!

IV

Pleasantly rose next morn the sun on the village of Grand-Pré.
Pleasantly gleamed in the soft, sweet air the Basin of Minas,
Where the ships, with their wavering shadows, were riding at anchor.
Life had long been astir in the village, and clamorous labor
Knocked with its hundred hands at the golden gates of the morning.
Now from the country around, from the farms and neighboring hamlets,
Came in their holiday dresses the blithe Acadian peasants.
Many a glad good-morrow and jocund laugh from the young folk
Made the bright air brighter, as up from the numerous meadows,
Where no path could be seen but the track of wheels in the greensward,
Group after group appeared, and joined, or passed on the highway.
Long ere noon, in the village all sounds of labor were silenced.
Thronged were the streets with people; and noisy groups at the house-doors
Sat in the cheerful sun, and rejoiced and gossiped together.
Every house was an inn, where all were welcomed and feasted;
For with this simple people, who lived like brothers together,
All things were held in common, and what one had was another's.
Yet under Benedict's roof hospitality seemed more abundant:
For Evangeline stood among the guests of her father;
Bright was her face with smiles, and words of welcome and gladness
Fell from her beautiful lips, and blessed the cup as she gave it.

Under the open sky, in the odorous air of the orchard,
Stript of its golden fruit, was spread the feast of betrothal.
There in the shade of the porch were the priest and the notary seated;
There good Benedict sat, and sturdy Basil the blacksmith.
Not far withdrawn from these, by the cider-press and the beehives,

366. **woven**—*Cf.* Prov. 31: 10-31. 381. **Ishmael**—*Cf.* Gen. 21: 9-14.

Michael the fiddler was placed, with the gayest of hearts and of waistcoats.
Shadow and light from the leaves alternately played on his snow-white
Hair, as it waved in the wind; and the jolly face of the fiddler
Glowed like a living coal when the ashes are blown from the embers.
Gayly the old man sang to the vibrant sound of his fiddle,
Tous les Bourgeois de Chartres, and *Le Carillon de Dunkerque,*
And anon with his wooden shoes beat time to the music.
Merrily, merrily whirled the wheels of the dizzying dances
Under the orchard-trees and down the path to the meadows;
Old folk and young together, and children mingled among them.
Fairest of all the maids was Evangeline, Benedict's daughter!
Noblest of all the youths was Gabriel, son of the blacksmith!

So passed the morning away. And lo! with a summons sonorous
Sounded the bell from its tower, and over the meadows a drum beat.
Thronged ere long was the church with men. Without, in the churchyard,
Waited the women. They stood by the graves, and hung on the headstones
Garlands of autumn-leaves and evergreens fresh from the forest.
Then came the guard from the ships, and marching proudly among them
Entered the sacred portal. With loud and dissonant clangor
Echoed the sound of their brazen drums from ceiling and casement,—
Echoed a moment only, and slowly the ponderous portal
Closed, and in silence the crowd awaited the will of the soldiers.
Then uprose their commander, and spake from the steps of the altar,
Holding aloft in his hands, with its seals, the royal commission.
"You are convened this day," he said, "by His Majesty's orders.
Clement and kind has he been; but how you have answered his kindness
Let your own hearts reply! To my natural make and my temper
Painful the task is I do, which to you I know must be grievous.
Yet must I bow and obey, and deliver the will of our monarch:
Namely, that all your lands, and dwellings, and cattle of all kinds
Forfeited be to the crown; and that you yourselves from this province
Be transported to other lands. God grant you may dwell there
Ever as faithful subjects, a happy and peaceable people!
Prisoners now I declare you, for such is His Majesty's pleasure!"
As, when the air is serene in the sultry solstice of summer,
Suddenly gathers a storm, and the deadly sling of the hailstones
Beats down the farmer's corn in the field, and shatters his windows,
Hiding the sun, and strewing the ground with thatch from the house-roofs,
Bellowing fly the herds, and seek to break their enclosures;
So on the hearts of the people descended the words of the speaker.
Silent a moment they stood in speechless wonder, and then rose
Louder and ever louder a wail of sorrow and anger,
And, by one impulse moved, they madly rushed to the door-way.
Vain was the hope of escape; and cries and fierce imprecations
Rang through the house of prayer; and high o'er the head of the others

413. Tous . . . Dunkerque—Longfellow found these French airs in a *Recueil de cantiques à l'usage des missions,* Quebec, 1833. The first means: "All the Citizens of Chartres"; the second, "The Chimes of Dunkirk." **430. commander**—The facts seem to be that the Acadians were removed at the order of New England colonies, and without consulting the English government. The commander was Lieutenant-Colonel John Winslow of Massachusetts, a fact which Longfellow has suppressed.

Rose, with his arms uplifted, the figure of Basil the blacksmith,
As, on a stormy sea, a spar is tossed by the billows.
Flushed was his face and distorted with passion; and wildly he shouted,—
"Down with the tyrants of England! we never have sworn them allegiance!
Death to these foreign soldiers, who seize on our homes and our harvests!"
More he fain would have said, but the merciless hand of a soldier
Smote him upon the mouth, and dragged him down to the pavement.

In the midst of the strife and tumult of angry contention,
Lo! the door of the chancel opened, and Father Felician
Entered, with serious mien, and ascended the steps of the altar.
Raising his reverend hand, with a gesture he awed into silence
All that clamorous throng; and thus he spake to his people;
Deep were his tones and solemn; in accents measured and mournful
Spake he, as, after the tocsin's alarum, distinctly the clock strikes.
"What is this that ye do, my children? what madness has seized you?
Forty years of my life have I labored among you, and taught you,
Not in word alone, but in deed, to love one another?
Is this the fruit of my toils, of my vigils and prayers and privations?
Have you so soon forgotten all lessons of love and forgiveness?
This is the house of the Prince of Peace, and would you profane it
Thus with violent deeds and hearts overflowing with hatred?
Lo! where the crucified Christ from his cross is gazing upon you!
See! in those sorrowful eyes what meekness and holy compassion!
Hark! how those lips still repeat the prayer, 'O Father, forgive them!'
Let us repeat that prayer in the hour when the wicked assail us,
Let us repeat it now, and say, 'O Father, forgive them!' "
Few were his words of rebuke, but deep in the hearts of his people
Sank they, and sobs of contrition succeeded the passionate outbreak,
While they repeated his prayer, and said, "O Father, forgive them!"

Then came the evening service. The tapers gleamed from the altar.
Fervent and deep was the voice of the priest, and the people responded,
Not with their lips alone, but their hearts; and the Ave Maria
Sang they, and fell on their knees, and their souls, with devotion translated,
Rose on the ardor of prayer, like Elijah ascending to heaven.

Meanwhile had spread in the village the tidings of ill, and on all sides
Wandered, wailing, from house to house the women and children.
Long at her father's door Evangeline stood, with her right hand
Shielding her eyes from the level rays of the sun, that, descending,
Lighted the village street with mysterious splendor, and roofed each
Peasant's cottage with golden thatch, and emblazoned its windows.
Long within had been spread the snow-white cloth on the table;
There stood the wheaten loaf, and the honey fragrant with wild-flowers;
There stood the tankard of ale, and the cheese fresh brought from the dairy,
And, at the head of the board, the great arm-chair of the farmer.
Thus did Evangeline wait at her father's door, as the sunset
Threw the long shadows of trees o'er the broad ambrosial meadows.

461. chancel—space near the altar, reserved for the clergy and the choir. **476. O Father**—*Cf.* Luke 23:34. **484. Ave Maria**—Hail, Mary—the beginning of the favorite prayer. **486. Elijah**—*Cf.* II Kings 2:11. **498. ambrosial**—about equivalent to "extremely pleasant."

Ah! on her spirit within a deeper shadow had fallen,
And from the fields of her soul a fragrance celestial ascended,—
Charity, meekness, love, and hope, and forgiveness, and patience!
Then, all-forgetful of self, she wandered into the village,
Cheering with looks and words the mournful hearts of the women,
As o'er the darkening fields with lingering steps they departed,
Urged by their household cares, and the weary feet of their children.
Down sank the great red sun, and in golden, glimmering vapors
Veiled the light of his face, like the Prophet descending from Sinai.
Sweetly over the village the bell of the Angelus sounded.

Meanwhile amid the gloom, by the church Evangeline lingered.
All was silent within; and in vain at the door and the windows
Stood she, and listened and looked, until, overcome by emotion,
"Gabriel!" cried she aloud with tremulous voice; but no answer
Came from the graves of the dead, nor the gloomier grave of the living.
Slowly at length she returned to the tenantless house of her father.
Smouldered the fire on the hearth, on the board was the supper untasted,
Empty and drear was each room, and haunted with phantoms of terror.
Sadly echoed her step on the stair and the floor of her chamber.
In the dead of the night she heard the disconsolate rain fall
Loud on the withered leaves of the sycamore-tree by the window.
Keenly the lightning flashed; and the voice of the echoing thunder
Told her that God was in heaven, and governed the world he created!
Then she remembered the tale she had heard of the justice of Heaven;
Soothed was her troubled soul. and she peacefully slumbered till morning.

V

Four times the sun had risen and set; and now on the fifth day
Cheerily called the cock to the sleeping maids of the farm-house.
Soon o'er the yellow fields, in silent and mournful procession,
Came from the neighboring hamlets and farms the Acadian women,
Driving in ponderous wains their household goods to the sea-shore,
Pausing and looking back to gaze once more on their dwellings,
Ere they were shut from sight by the winding road and the woodland.
Close at their sides their children ran, and urged on the oxen,
While in their little hands they clasped some fragments of playthings.

Thus to the Gaspereau's mouth they hurried; and there on the sea-beach
Piled in confusion lay the household goods of the peasants.
All day long between the shore and the ships did the boats ply;
All day long the wains came laboring down from the village.
Late in the afternoon, when the sun was near to his setting,
Echoed far o'er the fields came the roll of drums from the churchyard.
Thither the women and children thronged. On a sudden the church-doors
Opened, and forth came the guard, and marching in gloomy procession
Followed the long-imprisoned, but patient, Acadian farmers.
Even as pilgrims, who journey afar from their homes and their country,
Sing as they go, and in singing forget they are weary and wayworn,
So with songs on their lips the Acadian peasants descended

507. Prophet—*Cf.* Ex. 34: 29-35.

Down from the church to the shore, amid their wives and their daughters.
Foremost the young men came; and, raising together their voices,
Sang with tremulous lips a chant of the Catholic Missions:—
"Sacred heart of the Saviour! O inexhaustible fountain!
Fill our hearts this day with strength and submission and patience!"
Then the old men, as they marched, and the women that stood by the wayside
Joined in the sacred psalm, and the birds in the sunshine above them
Mingled their notes therewith, like voices of spirits departed.

Half-way down to the shore Evangeline waited in silence,
Not overcome with grief, but strong in the hour of affliction,—
Calmly and sadly she waited, until the procession approached her,
And she beheld the face of Gabriel pale with emotion.
Tears then filled her eyes, and, eagerly running to meet him,
Clasped she his hands, and laid her head on his shoulder, and whispered,—
"Gabriel, be of good cheer! for if we love one another
Nothing, in truth, can harm us, whatever mischances may happen!"
Smiling she spake these words; then suddenly paused, for her father
Saw she slowly advancing. Alas! how changed was his aspect!
Gone was the glow from his cheek, and the fire from his eye, and his footstep
Heavier seemed with the weight of the heavy heart in his bosom.
But with a smile and a sigh, she clasped his neck and embraced him,
Speaking words of endearment where words of comfort availed not.
Thus to the Gaspereau's mouth moved on that mournful procession.

There disorder prevailed, and the tumult and stir of embarking.
Busily plied the freighted boats; and in the confusion
Wives were torn from their husbands, and mothers, too late, saw their children
Left on the land, extending their arms, with wildest entreaties.
So unto separate ships were Basil and Gabriel carried,
While in despair on the shore Evangeline stood with her father.
Half the task was not done when the sun went down, and the twilight
Deepened and darkened around; and in haste the refluent ocean
Fled away from the shore, and left the line of the sand-beach
Covered with waifs of the tide, with kelp and the slippery sea-weed.
Farther back in the midst of the household goods and the wagons,
Like to a gypsy camp, or a leaguer after a battle,
All escape cut off by the sea, and the sentinels near them,
Lay encamped for the night the houseless Acadian farmers.
Back to its nethermost caves retreated the bellowing ocean,
Dragging adown the beach the rattling pebbles, and leaving
Inland and far up the shore the stranded boats of the sailors.
Then, as the night descended, the herds returned from their pastures;
Sweet was the moist still air with the odor of milk from their udders;
Lowing they waited, and long, at the well-known bars of the farm-yard,—
Waited and looked in vain for the voice and the hand of the milkmaid.
Silence reigned in the streets; from the church no Angelus sounded,
Rose no smoke from the roofs, and gleamed no lights from the windows.

But on the shores meanwhile the evening fires had been kindled,
Built of the drift-wood thrown on the sands from wrecks in the tempest.

579. **leaguer**—camp, especially of a besieging army.

Round them shapes of gloom and sorrowful faces were gathered,
Voices of women were heard, and of men, and the crying of children.
Onward from fire to fire, as from hearth to hearth in his parish,
Wandered the faithful priest, consoling and blessing and cheering,
Like unto shipwrecked Paul on Melita's desolate sea-shore.
Thus he approached the place where Evangeline sat with her father,
And in the flickering light beheld the face of the old man,
Haggard and hollow and wan, and without either thought or emotion,
E'en as the face of a clock from which the hands have been taken.
Vainly Evangeline strove with words and caresses to cheer him,
Vainly offered him food; yet he moved not, he looked not, he spake not,
But, with a vacant stare, ever gazed at the flickering fire-light.
"Benedicite!" murmured the priest, in tones of compassion.
More he fain would have said, but his heart was full, and his accents
Faltered and paused on his lips, as the feet of a child on a threshold,
Hushed by the scene he beholds, and the awful presence of sorrow.
Silently, therefore, he laid his hand on the head of the maiden,
Raising his tearful eyes to the silent stars that above them
Moved on their way, unperturbed by the wrongs and sorrows of mortals.
Then sat he down at her side, and they wept together in silence.

Suddenly rose from the south a light, as in autumn the blood-red
Moon climbs the crystal walls of heaven, and o'er the horizon
Titan-like stretches its hundred hands upon mountain and meadow,
Seizing the rocks and the rivers, and piling huge shadows together.
Broader and ever broader it gleamed on the roofs of the village,
Gleamed on the sky and the sea, and the ships that lay in the roadstead.
Columns of shining smoke uprose, and flashes of flame were
Thrust through their folds and withdrawn, like the quivering hands of a martyr.
Then as the wind seized the gleeds and the burning thatch, and, uplifting,
Whirled them aloft through the air, at once from a hundred house-tops
Started the sheeted smoke with flashes of flame intermingled.

These things beheld in dismay the crowd on the shore and on shipboard.
Speechless at first they stood, then cried aloud in their anguish,
"We shall behold no more our homes in the village of Grand-Pré!"
Loud on a sudden the cocks began to crow in the farm-yards,
Thinking the day had dawned; and anon the lowing of cattle
Came on the evening breeze, by the barking of dogs interrupted.
Then rose a sound of dread, such as startles the sleeping encampments
Far in the western prairies or forests that skirt the Nebraska,
When the wild horses affrighted sweep by with the speed of the whirlwind,
Or the loud bellowing herds of buffaloes rush to the river.
Such was the sound that arose on the night, as the herds and the horses
Broke through their folds and fences, and madly rushed o'er the meadows.

Overwhelmed with the sight, yet speechless, the priest and the maiden
Gazed on the scene of terror that reddened and widened before them;
And as they turned at length to speak to their silent companion,

597. **Paul**—*Cf.* Acts 28: 1-10. 605. **"Benedicite"**—"Blessings upon you!" 615. **Titan-like**—loose reference to Briareus, a giant with a hundred hands. 621. **gleeds**—coals.

Lo! from his seat he had fallen, and stretched abroad on the sea-shore
Motionless lay his form, from which the soul had departed.
Slowly the priest uplifted the lifeless head, and the maiden
Knelt at her father's side, and wailed aloud in her terror.
Then in a swoon she sank, and lay with her head on his bosom.
Through the long night she lay in deep, oblivious slumber;
And when she awoke from the trance, she beheld a multitude near her.
Faces of friends she beheld, that were mournfully gazing upon her,
Pallid, with tearful eyes, and looks of saddest compassion.
Still the blaze of the burning village illumined the landscape,
Reddened the sky overhead, and gleamed on the faces around her,
And like the day of doom it seemed to her wavering senses.
Then a familiar voice she heard, as it said to the people,—
"Let us bury him here by the sea. When a happier season
Brings us again to our homes from the unknown land of our exile,
Then shall his sacred dust be piously laid in the churchyard."
Such were the words of the priest. And there in haste by the seaside,
Having the glare of the burning village for funeral torches,
But without bell or book, they buried the farmer of Grand-Pré.
And as the voice of the priest repeated the service of sorrow,
Lo! with a mournful sound, like the voice of a vast congregation,
Solemnly answered the sea, and mingled its roar with the dirges.
'Twas the returning tide, that afar from the waste of the ocean,
With the first dawn of the day, came heaving and hurrying landward.
Then recommenced once more the stir and noise of embarking;
And with the ebb of the tide the ships sailed out of the harbor,
Leaving behind them the dead on the shore, and the village in ruins.

[End of Part the First]

In the second part of the poem Evangeline and Father Felician wander to Louisiana in search of Basil and Gabriel, who, however, pass them on the Mississippi without knowing it. Evangeline then pursues her lover into the Far West, but always they fail to meet. Finally she returns to Philadelphia, becomes a nurse during the pestilence, and finds Gabriel dying of yellow fever.

THE SECRET OF THE SEA

Written in 1848 and published in *The Seaside and the Fireside* (1849).

Ah! what pleasant visions haunt me
As I gaze upon the sea!
All the old romantic legends,
All my dreams, come back to me.

Sails of silk and ropes of sandal,
Such as gleam in ancient lore;
And the singing of the sailors,
And the answer from the shore!

Most of all, the Spanish ballad
Haunts me oft, and tarries long,
Of the noble Count Arnaldos
And the sailor's mystic song.

657. without bell or book—without tolling of bells and without the service book of the Church. **5. sandal**—a silken material. The whole line is literally translated from the Spanish ballad. **11. Arnaldos**—The *Romance del Conde Arnaldos* is one of the most musical of the traditional popular ballads of Spain. Lines 17-32 are a free rendering of the original.

Like the long waves on a sea-beach,
  Where the sand as silver shines,
With a soft, monotonous cadence,
  Flow its unrhymed lyric lines;—

Telling how the Count Arnaldos,
  With his hawk upon his hand,
Saw a fair and stately galley,
  Steering onward to the land;—

How he heard the ancient helmsman
  Chant a song so wild and clear,
That the sailing sea-bird slowly
  Poised upon the mast to hear,

Till his soul was full of longing,
  And he cried, with impulse strong,—
"Helmsman! for the love of heaven,
  Teach me, too, that wondrous song!"

"Wouldst thou,"—so the helmsman answered,
  "Learn the secret of the sea?
Only those who brave its dangers
  Comprehend its mystery!"

In each sail that skims the horizon,
  In each landward-blowing breeze,
I behold that stately galley,
  Hear those mournful melodies;

Till my soul is full of longing
  For the secret of the sea,
And the heart of the great ocean
  Sends a thrilling pulse through me.

SIR HUMPHREY GILBERT

Written in 1848, and, after periodical publication, incorporated in *The Seaside and the Fireside* (1849). Sir Humphrey Gilbert (1539?-1583), half-brother of Sir Walter Ralegh, landed at St. John's, Newfoundland, August 5, 1583. On the night of September 9 during the return voyage, his ship, the *Squirrel*, suddenly disappeared, as reported by those sailing in the accompanying vessel, the *Golden Hind*. Longfellow drew his account from Hakluyt, *The Principal Navigations, Voyages, and Discoveries of the English Nation*. Hakluyt, however, does not attribute the disaster to ice.

Southward with fleet of ice
  Sailed the corsair Death;
Wild and fast blew the blast,
  And the east-wind was his breath.

His lordly ships of ice
  Glistened in the sun;
On each side, like pennons wide,
  Flashing crystal streamlets run.

His sails of white sea-mist
  Dripped with silver rain;
But where he passed there were cast
  Leaden shadows o'er the main.

Eastward from Campobello
  Sir Humphrey Gilbert sailed;
Three days or more seaward he bore,
  Then, alas! the land-wind failed.

Alas! the land-wind failed,
  And ice-cold grew the night;
And never more, on sea or shore,
  Should Sir Humphrey see the light.

He sat upon the deck,
  The Book was in his hand;
"Do not fear! Heaven is as near,"
  He said, "by water as by land!"

In the first watch of the night,
  Without a signal's sound,
Out of the sea, mysteriously,
  The fleet of Death rose all around.

The moon and the evening star
  Were hanging in the shrouds;
Every mast, as it passed,
  Seemed to rake the passing clouds.

They grappled with their prize,
  At midnight black and cold!
As of a rock was the shock;
  Heavily the ground-swell rolled.

13. **Campobello**—an island in the Bay of Fundy.

Southward through day and dark,
They drift in close embrace,
With mist and rain, to the Spanish Main;
Yet there seems no change of place.

Southward, forever southward,
They drift through dark and day;
And like a dream, in the Gulf-Stream
Sinking, vanish all away.

CHILDREN

Written in 1849, published in the *Courtship of Miles Standish* volume (1858).

Come to me, O ye children!
For I hear you at your play,
And the questions that perplexed me
Have vanished quite away.

Ye open the eastern windows,
That look towards the sun,
Where thoughts are singing swallows,
And the brooks of morning run.

In your hearts are the birds and the sunshine,
In your thoughts the brooklet's flow,
But in mine is the wind of Autumn
And the first fall of the snow.

Ah! what would the world be to us
If the children were no more?
We should dread the desert behind us
Worse than the dark before.

What the leaves are to the forest,
With light and air for food,
Ere their sweet and tender juices
Have been hardened into wood,—

That to the world are children;
Through them it feels the glow
Of a brighter and sunnier climate
Than reaches the trunks below.

Come to me, O ye children!
And whisper in my ear
What the birds and the winds are singing
In your sunny atmosphere.

For what are all our contrivings,
And the wisdom of our books,
When compared with your caresses,
And the gladness of your looks?

Ye are better than all the ballads
That ever were sung or said;
For ye are living poems,
And all the rest are dead.

THE BUILDING OF THE SHIP

Written June-September, 1849, and published as the leading poem in *The Seaside and the Fireside* (1849). The form of the poem was suggested by Schiller's *The Song of the Bell;* the content, with its symbolical hints of the building of the nation, is expressive of Longfellow's anxiety over the darkening political situation.

"Build me straight, O worthy Master!
Stanch and strong, a goodly vessel,
That shall laugh at all disaster,
And with wave and whirlwind wrestle!"

The merchant's word
Delighted the Master heard;
For his heart was in his work, and the heart
Giveth grace unto every Art.
A quiet smile played round his lips,
As the eddies and dimples of the tide
Play round the bows of ships
That steadily at anchor ride.
And with a voice that was full of glee,
He answered, "Erelong we will launch
A vessel as goodly, and strong, and stanch,
As ever weathered a wintry sea!"
And first with nicest skill and art,
Perfect and finished in every part,
A little model the Master wrought,
Which should be to the larger plan
What the child is to the man,
Its counterpart in miniature;
That with a hand more swift and sure
The greater labor might be brought
To answer to his inward thought.

39. **Spanish Main**—the main ocean north of South America.

And as he labored, his mind ran o'er
The various ships that were built of yore,
And above them all, and strangest of all
Towered the Great Harry, crank and tall,
Whose picture was hanging on the wall,
With bows and stern raised high in air,
And balconies hanging here and there,
And signal lanterns and flags afloat,
And eight round towers, like those that frown
From some old castle, looking down
Upon the drawbridge and the moat.
And he said with a smile, "Our ship, I wis,
Shall be of another form than this!"
It was of another form, indeed;
Built for freight, and yet for speed,
A beautiful and gallant craft;
Broad in the beam, that the stress of the blast,
Pressing down upon sail and mast,
Might not the sharp bows overwhelm;
Broad in the beam, but sloping aft
With graceful curve and slow degrees,
That she might be docile to the helm,
And that the currents of parted seas,
Closing behind, with mighty force,
Might aid and not impede her course.

In the ship-yard stood the Master,
With the model of the vessel,
That should laugh at all disaster,
And with wave and whirlwind wrestle!
Covering many a rood of ground,
Lay the timber piled around;
Timber of chestnut, and elm, and oak,
And scattered here and there, with these,
The knarred and crooked cedar knees;
Brought from regions far away,
From Pascagoula's sunny bay,
And the banks of the roaring Roanoke!
Ah! what a wondrous thing it is
To note how many wheels of toil
One thought, one word, can set in motion!
There's not a ship that sails the ocean,
But every climate, every soil,
Must bring its tribute, great or small,
And help to build the wooden wall!

The sun was rising o'er the sea,
And long the level shadows lay,
As if they, too, the beams would be
Of some great, airy argosy,
Framed and launched in a single day.
That silent architect, the sun,
Had hewn and laid them every one,
Ere the work of man was yet begun.
Beside the Master, when he spoke,
A youth, against an anchor leaning,
Listened, to catch his slightest meaning,
Only the long waves, as they broke
In ripples on the pebbly beach,
Interrupted the old man's speech.
Beautiful they were, in sooth,
The old man and the fiery youth!
The old man, in whose busy brain
Many a ship that sailed the main
Was modelled o'er and o'er again;—
The fiery youth, who was to be
The heir of his dexterity,
The heir of his house, and his daughter's hand,
When he had built and launched from land
What the elder head had planned.

"Thus," said he, "will we build this ship!
Lay square the blocks upon the slip,
And follow well this plan of mine.
Choose the timbers with greatest care;
Of all that is unsound beware;
For only what is sound and strong
To this vessel shall belong.
Cedar of Maine and Georgia pine
Here together shall combine.
A goodly frame, and a goodly fame,
And the UNION be her name!
For the day that gives her to the sea
Shall give my daughter unto thee!"

The Master's word
Enraptured the young man heard;
And as he turned his face aside,
With a look of joy and a thrill of pride
Standing before
Her father's door,
He saw the form of his promised bride.
The sun shone on her golden hair,
And her cheek was glowing fresh and fair,
With the breath of morn and the soft sea air.

29. **Great Harry**—the famous ship of Henry VII of England, built in 1488 and accurately described in the following lines. 59. **knarred**—knotty. 61. **Pascagoula's**—river in Mississippi. 62. **Roanoke**—The Roanoke River rises in Virginia and flows through North Carolina to the sea, but it is scarcely a "roaring" river. 95. **slip**—the inclined plane on which a vessel is built.

Like a beauteous barge was she,
Still at rest on the sandy beach,
Just beyond the billow's reach;
But he
Was the restless, seething, stormy sea!
Ah, how skilful grows the hand
That obeyeth Love's command!
It is the heart, and not the brain,
That to the highest doth attain,
And he who followeth Love's behest
Far excelleth all the rest!

Thus with the rising of the sun
Was the noble task begun,
And soon throughout the ship-yard's bounds
Were heard the intermingled sounds
Of axes and of mallets, plied
With vigorous arms on every side;
Plied so deftly and so well,
That, ere the shadows of evening fell,
The keel of oak for a noble ship,
Scarfed and bolted, straight and strong,
Was lying ready, and stretched along
The blocks, well placed upon the slip.
Happy, thrice happy, every one
Who sees his labor well begun,
And not perplexed and multiplied,
By idly waiting for time and tide!

And when the hot, long day was o'er,
The young man at the Master's door
Sat with the maiden calm and still,
And within the porch, a little more
Removed beyond the evening chill
The father sat, and told them tales
Of wrecks in the great September gales,
Of pirates coasting the Spanish Main,
And ships that never came back again,
The chance and change of a sailor's life,
Want and plenty, rest and strife,
His roving fancy, like the wind,
That nothing can stay and nothing can bind.
And the magic charm of foreign lands,
With shadows of palms, and shining sands,
Where the tumbling surf,
O'er the coral reefs of Madagascar,
Washes the feet of the swarthy Lascar,
As he lies alone and asleep on the turf.
And the trembling maiden held her breath
At the tales of that awful, pitiless sea,
With all its terror and mystery,
The dim, dark sea, so like unto Death,
That divides and yet unites mankind!
And whenever the old man paused, a gleam
From the bowl of his pipe would awhile illume
The silent group in the twilight gloom,
And thoughtful faces, as in a dream;
And for a moment one might mark
What had been hidden by the dark,
That the head of the maiden lay at rest,
Tenderly, on the young man's breast!

Day by day the vessel grew,
With timbers fashioned strong and true,
Stemson and keelson and sternson-knee,
Till, framed with perfect symmetry,
A skeleton ship rose up to view!
And around the bows and along the side
The heavy hammers and mallets plied,
Till after many a week, at length,
Wonderful for form and strength,
Sublime in its enormous bulk,
Loomed aloft the shadowy hulk!
And around it columns of smoke, upwreathing,
Rose from the boiling, bubbling, seething
Caldron, that glowed,
And overflowed
With the black tar, heated for the sheathing.
And amid the clamors
Of clattering hammers,
He who listened heard now and then
The song of the Master and his men:—

"Build me straight, O worthy Master,
Stanch and strong, a goodly vessel,
That shall laugh at all disaster,
And with wave and whirlwind wrestle!"

With oaken brace and copper band,
Lay the rudder on the sand,

137. **scarfed**—A scarf joint is a joint by which two timbers are connected lengthwise into a continuous piece, the ends being cut so as to overlap and fit into each other. 161. **Lascar**—an East Indian sailor. 178, **Stemson . . . keelson . . . sternson-knee**—The stemson is a curved timber fixed in the after part of a ship and scarfed to the keelson, a line of jointed timbers laid along the middle of the floor timbers over the keel and continued into the sternson knee, to which the stern post is fixed.

That, like a thought, should have control
Over the movement of the whole;
And near it the anchor, whose giant hand
Would reach down and grapple with the land,
And immovable and fast
Hold the great ship against the bellowing blast!
And at the bows an image stood,
By a cunning artist carved in wood,
With robes of white, that far behind
Seemed to be fluttering in the wind.
It was not shaped in a classic mould,
Not like a Nymph or Goddess of old,
Or Naiad rising from the water,
But modelled from the Master's daughter!
On many a dreary and misty night,
'Twill be seen by the rays of the signal light,
Speeding along through the rain and the dark,
Like a ghost in its snow-white sark,
The pilot of some phantom bark,
Guiding the vessel, in its flight,
By a path none other knows aright!

Behold, at last,
Each tall and tapering mast
Is swung into its place;
Shrouds and stays
Holding it firm and fast!

Long ago,
In the deer-haunted forests of Maine,
When upon mountain and plain
Lay the snow,
They fell,—those lordly pines!
Those grand, majestic pines!
'Mid shouts and cheers
The jaded steers,
Panting beneath the goad,
Dragged down the weary, winding road
Those captive kings so straight and tall,
To be shorn of their streaming hair,
And naked and bare,
To feel the stress and the strain
Of the wind and the reeling main,
Whose roar
Would remind them forevermore
Of their native forests they should not see again.
And everywhere
The slender, graceful spars
Poise aloft in the air,
And at the mast-head,
White, blue, and red,
A flag unrolls the stripes and stars.
Ah! when the wanderer, lonely, friendless,
In foreign harbors shall behold
That flag unrolled,
'Twill be as a friendly hand
Stretched out from his native land,
Filling his heart with memories sweet and endless!

All is finished! and at length
Has come the bridal day
Of beauty and of strength.
To-day the vessel shall be launched!
With fleecy clouds the sky is blanched,
And o'er the bay,
Slowly, in all his splendors dight,
The great sun rises to behold the sight.

The ocean old,
Centuries old,
Strong as youth, and as uncontrolled,
Paces restless to and fro,
Up and down the sands of gold.
His beating heart is not at rest;
And far and wide,
With ceaseless flow,
His beard of snow
Heaves with the heaving of his breast.
He waits impatient for his bride.
There she stands,
With her foot upon the sands,

219. sark—shroud. **227.** "I wish to anticipate a criticism on this passage, by stating that sometimes, though not usually, vessels are launched fully sparred and rigged. I have availed myself of the exception as better suited to my purpose than the general rule; but the reader will see that it is neither a blunder nor a poetic license. On this subject a friend in Portland, Maine, writes me thus: 'In this State, and also, I am told, in New York, ships are sometimes rigged upon the stocks, in order to save time, and to make a show. There was a fine large ship launched last summer at Ellsworth, fully sparred and rigged. Some years ago a ship was launched here, with her rigging, spars, sails, and cargo aboard. She sailed the next day and—was never heard of again! I hope this will not be the fate of your poem!' " (Longfellow's note)

Decked with flags and streamers gay,
In honor of her marriage day,
Her snow-white signals fluttering, blending,
Round her like a veil descending,
Ready to be
The bride of the gray old sea.

On the deck another bride
Is standing by her lover's side.
Shadows from the flags and shrouds,
Like the shadows cast by clouds,
Broken by many a sudden fleck,
Fall around them on the deck.

The prayer is said,
The service read,
The joyous bridegroom bows his head;
And in tears the good old Master
Shakes the brown hand of his son,
Kisses his daughter's glowing cheek
In silence, for he cannot speak,
And ever faster
Down his own the tears begin to run.
The worthy pastor—
The shepherd of that wandering flock,
That has the ocean for its wold,
That has the vessel for its fold,
Leaping ever from rock to rock—
Spake, with accents mild and clear,
Words of warning, words of cheer,
But tedious to the bridegroom's ear.
He knew the chart
Of the sailor's heart,
All its pleasures and its griefs,
All its shallows and rocky reefs,
All those secret currents, that flow
With such resistless undertow,
And lift and drift, with terrible force,
The will from its moorings and its course.
Therefore he spake, and thus said he:—
"Like unto ships far off at sea,
Outward or homeward bound, are we.
Before, behind, and all around,
Floats and swings the horizon's bound,
Seems at its distant rim to rise
And climb the crystal wall of the skies,
And then again to turn and sink,
As if we could slide from its outer brink.

Ah! it is not the sea,
It is not the sea that sinks and shelves,
But ourselves
That rock and rise
With endless and uneasy motion,
Now touching the very skies,
Now sinking into the depths of ocean.
Ah! if our souls but poise and swing
Like the compass in its brazen ring,
Ever level and ever true
To the toil and the task we have to do,
We shall sail securely, and safely reach
The Fortunate Isles, on whose shining beach
The sights we see, and the sounds we hear,
Will be those of joy and not of fear!"

Then the Master,
With a gesture of command,
Waved his hand;
And at the word,
Loud and sudden there was heard,
All around them and below,
The sound of hammers, blow on blow,
Knocking away the shores and spurs.
And see! she stirs!
She starts,—she moves,—she seems to feel
The thrill of life along her keel,
And, spurning with her foot the ground,
With one exulting, joyous bound,
She leaps into the ocean's arms!

And lo! from the assembled crowd
There rose a shout, prolonged and loud,
That to the ocean seemed to say,
"Take her, O bridegroom, old and gray,
Take her to thy protecting arms,
With all her youth and all her charms!"

How beautiful she is! How fair
She lies within those arms, that press
Her form with many a soft caress
Of tenderness and watchful care!
Sail forth into the sea, O ship!
Through wind and wave, right onward steer!
The moistened eye, the trembling lip,
Are not the signs of doubt or fear.

300. **pastor**—The character of the pastor, together with his sermon, is vaguely reminiscent of Father Taylor, the famous sailors' preacher, who also figures in Chap. VIII of Melville's *Moby Dick*. 347. **shores and spurs**—braces and props for holding the vessel upright before it is launched.

Sail forth into the sea of life,
O gentle, loving, trusting wife,
And safe from all adversity
Upon the bosom of that sea
Thy comings and thy goings be!
For gentleness and love and trust
Prevail o'er angry wave and gust;
And in the wreck of noble lives
Something immortal still survives!

Thou, too, sail on, O Ship of State!
Sail on, O UNION, strong and great!
Humanity with all its fears,
With all the hopes of future years,
Is hanging breathless on thy fate!
We know what Master laid thy keel,
What Workmen wrought thy ribs of steel,
Who made each mast, and sail, and rope,
What anvils rang, what hammers beat,
In what a forge and what a heat
Were shaped the anchors of thy hope!
Fear not each sudden sound and shock,
'Tis of the wave and not the rock;
'Tis but the flapping of the sail,
And not a rent made by the gale!
In spite of rock and tempest's roar,
In spite of false lights on the shore,
Sail on, nor fear to breast the sea!
Our hearts, our hopes, are all with thee,
Our hearts, our hopes, our prayers, our tears,
Our faith triumphant o'er our fears,
Are all with thee,—are all with thee!

MY LOST YOUTH

Written in 1855, published in *Putnam's Monthly*, August, 1855, and collected into the *Courtship of Miles Standish* volume (1858). The first seeds of the poem were sown during a visit to Portland in 1846. During an illness in March, 1855, his thoughts recurred to "a memory of Portland,—my native town, the city by the sea," and he wrote the poem, noting in his diary that I "am rather pleased with it, and with the bringing in of the two lines of the old Lapland song,

"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

The collected *Works* gives the song as occurring in John Scheffer, *The History of Lapland*, Oxford, 1674, and the significant passage as:

"A youth's desire is the desire of the wind,
All his essaies
Are long delaies,
No issue can they find."

Often I think of the beautiful town
That is seated by the sea;
Often in thought go up and down
The pleasant streets of that dear old town,
And my youth comes back to me.
And a verse of a Lapland song
Is haunting my memory still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the shadowy lines of its trees,
And catch, in sudden gleams,
The sheen of the far-surrounding seas,
And islands that were the Hesperides
Of all my boyish dreams.
And the burden of that old song,
It murmurs and whispers still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the black wharves and the slips,
And the sea-tides tossing free;
And Spanish sailors with bearded lips,
And the beauty and mystery of the ships,
And the magic of the sea.
And the voice of that wayward song
Is singing and saying still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the bulwarks by the shore,
And the fort upon the hill;
The sunrise gun, with its hollow roar
The drum-beat repeated o'er and o'er,
And the bugle wild and shrill.
And the music of that old song
Throbs in my memory still:
"A boy's will is the wind's will,

And the thoughts of youth are long, long thoughts."

I remember the sea-fight far away,
How it thundered o'er the tide!
And the dead captains, as they lay
In their graves, o'erlooking the tranquil bay
Where they in battle died.
And the sound of that mournful song
Goes through me with a thrill:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I can see the breezy dome of groves,
The shadows of Deering's Woods;
And the friendships old and the early loves
Come back with a Sabbath sound, as of doves
In quiet neighborhoods.
And the verse of that sweet old song,
It flutters and murmurs still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

I remember the gleams and glooms that dart
Across the school-boy's brain;
The song and the silence in the heart,
That in part are prophecies, and in part
Are longings wild and vain.
And the voice of that fitful song
Sings on, and is never still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

There are things of which I may not speak;
There are dreams that cannot die;
There are thoughts that make the strong heart weak,
And bring a pallor into the cheek,
And a mist before the eye.
And the words of that fatal song
Come over me like a chill:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

Strange to me now are the forms I meet
When I visit the dear old town;
But the native air is pure and sweet,
And the trees that o'ershadow each well-known street,
As they balance up and down,
Are singing the beautiful song,
Are sighing and whispering still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

And Deering's Woods are fresh and fair,
And with joy that is almost pain
My heart goes back to wander there,
And among the dreams of the days that were,
I find my lost youth again.
And the strange and beautiful song,
The groves are repeating it still:
"A boy's will is the wind's will,
And the thoughts of youth are long, long thoughts."

SANDALPHON

Written in 1858 and published in the *Courtship of Miles Standish* volume (1858). In Longfellow's *Diary* one reads (November 2, 1857): "In the evening, Scherb read to me some curious Talmudic legends from Corrodi's *Chiliasmus*,—of the great angel Sandalphon, and the Feast of the Leviathan; at which feast this great fish is to be served up." In the collected *Works* the following selections from J. P. Stehelin, *The Traditions of the Jews* are quoted as being marked by the poet and evidently furnishing the material upon which he based his poem:

"Rabbi Eliezer hath said: 'There is an Angel who standeth on earth and reacheth with his head to the door of Heaven. It is taught in the Mishna that he is called Sandalphon.' . . .

"There are three [angels] who weave or make garlands out of the prayers of the Israelites . . . the third is Sandalphon. . . .

37. **sea-fight**—This refers to an engagement between the British brig *Boxer*, and the American brig *Enterprise*, fought off the harbor of Portland in 1813. The captains of both ships were killed, and were buried side by side in the cemetery on Mountjoy. The *Enterprise* won the encounter.

"There be Angels which are of Wind and there be Angels which are of Fire. . . .

"The holy and blessed God creates every day a multitude of angels in heaven, who, after they have sung a hymn before Him, do perish . . . Except Michael and Gabriel . . . and Sandalphon and their equals, who remain in their glory wherewith they were invested in the six days' creation. . . .

"The prophet Elias is the Angel Sandalphon, who twisteth or bindeth garlands out of the prayers, for his Lord."

Have you read in the Talmud of old,
In the Legends the Rabbins have told
  Of the limitless realms of the air,
Have you read it,—the marvellous story
Of Sandalphon, the Angel of Glory,
  Sandalphon, the Angel of Prayer?

How, erect, at the outermost gates
Of the City Celestial he waits,
  With his feet on the ladder of light,
That, crowded with angels unnumbered,
By Jacob was seen, as he slumbered
  Alone in the desert at night?

The Angels of Wind and of Fire
Chant only one hymn, and expire
  With the song's irresistible stress;
Expire in their rapture and wonder,
As harp-strings are broken asunder
  By music they throb to express.

But serene in the rapturous throng,
Unmoved by the rush of the song,
  With eyes unimpassioned and slow,
Among the dead angels, the deathless
Sandalphon stands listening breathless
  To sounds that ascend from below;—

From the spirits on earth that adore,
From the souls that entreat and implore
  In the fervor and passion of prayer;
From the hearts that are broken with losses,
And weary with dragging the crosses
  Too heavy for mortals to bear.

And he gathers the prayers as he stands,
And they change into flowers in his hands,
  Into garlands of purple and red;
And beneath the great arch of the portal,
Through the streets of the City Immortal
  Is wafted the fragrance they shed.

It is but a legend, I know,—
A fable, a phantom, a show,
  Of the ancient Rabbinical lore;
Yet the old mediaeval tradition,
The beautiful, strange superstition,
  But haunts me and holds me the more.

When I look from my window at night,
And the welkin above is all white,
  All throbbing and panting with stars,
Among them majestic is standing
Sandalphon the angel, expanding
  His pinions in nebulous bars.

And the legend, I feel, is a part
Of the hunger and thirst of the heart,
  The frenzy and fire of the brain,
That grasps at the fruitage forbidden,
The golden pomegranates of Eden,
  To quiet its fever and pain.

THE SAGA OF KING OLAF

"The Challenge of Thor" was written about 1849 as part of the *Christus,* and later transferred to "The Saga of King Olaf," composed 1859-60, which as a whole was finally incorporated in *Tales of a Wayside Inn* (1863). The saga is based upon Longfellow's reading of the *Heimskringla* (or at least of "King Olaf Trygvesson's Saga") by Snorre Sturlason (1178-1241) as translated by Samuel Laing in 1844. Longfellow's poem is in twenty-two sections, from which selections illustrating Olaf's character, his loves, and his death have been chosen for inclusion here.

I

THE CHALLENGE OF THOR

Longfellow originally intended this as the prologue to the second part of his *Christus* (1872). Its complement in thought is the

1. **Talmud**—the collection of Jewish laws not included in the Pentateuch. 2. **Rabbins**—rabbis. 11. **Jacob**—*Cf.* Gen. 28: 11-15. 44. **welkin**—sky.

"Finale" to that poem, spoken by St. John. The god Thor, with his war-hammer, Miölner, is the embodiment of force, whereas St. John sets forth the Christian doctrine of love.

I am the God Thor,
I am the War God,
I am the Thunderer!
Here in my Northland,
My fastness and fortress,
Reign I forever!

Here amid icebergs
Rule I the nations;
This is my hammer,
Miölner the mighty;
Giants and sorcerers
Cannot withstand it!

These are the gauntlets
Wherewith I wield it,
And hurl it afar off;
This is my girdle;
Whenever I brace it,
Strength is redoubled!

The light thou beholdest
Stream through the heavens,
In flashes of crimson,
Is but my red beard
Blown by the night-wind,
Affrighting the nations!

Jove is my brother;
Mine eyes are the lightning;
The wheels of my chariot
Roll in the thunder,
The blows of my hammer
Ring in the earthquake!

Force rules the world still,
Has ruled it, shall rule it;
Meekness is weakness,
Strength is triumphant,
Over the whole earth
Still is it Thor's-Day!

Thou art a God too,
O Galilean!
And thus single-handed
Unto the combat,
Gauntlet or Gospel,
Here I defy thee!

II

KING OLAF'S RETURN

For an understanding of the poem it is necessary to know something of the life of Olaf Trygvesson (968-1000), King of Norway. After the murder of his father, his mother, Astrid, fled to hiding, and gave birth to her son on a small island in a Norse lake. Mother and boy then fled to Sweden, closely pursued; afterwards, when Astrid tried to rejoin her brother, Sigurd, then in the service of King Valdemar of Russia, mother and child were captured by Esthonian vikings and separated. When Olaf was nine he was recognized in a market place in Esthonia by Sigurd, as related in the poem, and, after killing his master, fled to Russia, where he remained nine years in the court of King Valdemar. Finding that Valdemar's friendship was cooling, he took ship, went to Vendland, married Queen Geyra, conquered and plundered widely, and in 994 was baptized a Christian. After sundry adventures, he sailed north by way of the Orkney Islands to reconquer his kingdom of Norway. He is the Havelock the Dane of English tradition.

And King Olaf heard the cry,
Saw the red light in the sky,
  Laid his hand upon his sword,
As he leaned upon the railing,
And his ships went sailing, sailing
  Northward into Drontheim fiord.

There he stood as one who dreamed;
And the red light glanced and gleamed
  On the armor that he wore;
And he shouted, as the rifted
Streamers o'er him shook and shifted,
  "I accept thy challenge, Thor!"

17. **brace it**—bind it on. 25. **Jove**—Jove as the wielder of the lightning. 36. **Thor's-Day**—Thursday is so derived. 2. **red light**—that is, the Northern Lights. 6. **Drontheim fiord**—Drontheim (Trondhjem) was then one of the principal places in Norway; there Olaf was later made king at a general council.

To avenge his father slain,
And reconquer realm and reign,
Came the youthful Olaf home,
Through the midnight sailing, sailing,
Listening to the wild wind's wailing,
And the dashing of the foam.

To his thoughts the sacred name
Of his mother Astrid came,
And the tale she oft had told
Of her flight by secret passes
Through the mountains and morasses,
To the home of Hakon old.

Then strange memories crowded back
Of Queen Gunhild's wrath and wrack,
And a hurried flight by sea;
Of grim Vikings, and the rapture
Of the sea-fight, and the capture,
And the life of slavery.

How a stranger watched his face
In the Esthonian market-place,
Scanned his features one by one,
Saying, "We should know each other;
I am Sigurd, Astrid's brother,
Thou art Olaf, Astrid's son!"

Then as Queen Allogia's page,
Old in honors, young in age,
Chief of all her men-at-arms;
Till vague whispers, and mysterious,
Reached King Valdemar, the imperious,
Filling him with strange alarms.

Then his cruisings o'er the seas,
Westward to the Hebrides
And to Scilly's rocky shore;
And the hermit's cavern dismal,
Christ's great name and rites baptismal
In the ocean's rush and roar.

All these thoughts of love and strife
Glimmered through his lurid life,
As the stars' intenser light
Through the red flames o'er him trailing,
As his ships went sailing, sailing
Northward in the summer night.

Trained for either camp or court,
Skilful in each manly sport,
Young and beautiful and tall;
Art of warfare, craft of chases,
Swimming, skating, snow-shoe races,
Excellent alike in all.

When at sea, with all his rowers,
He along the bending oars
Outside of his ship could run.
He the Smalsor Horn ascended,
And his shining shield suspended
On its summit, like a sun.

On the ship-rails he could stand,
Wield his sword with either hand,
And at once two javelins throw;
At all feasts where ale was strongest
Sat the merry monarch longest,
First to come and last to go.

Norway never yet had seen
One so beautiful of mien,
One so royal in attire,
When in arms completely furnished,

13. **father slain**—Olaf's father was slain by Eirik Blood-Ax. 24. **Hakon**—Hakon Gamle, a Swede, not to be confused with Hakon Jarl of the following poem. Hakon Gamle protected Astrid and her son during their flight. 26. **Queen Gunhild's**—Queen Gunhild, the wife of Eirik Blood-Ax, according to tradition the Lady Macbeth of Norse history, was the real force behind her sons in their struggle to gain control of Norway. 37. **Queen Allogia's**—wife of Valdemar, the Grand Duke or "king" of Russia (Novgorod). 46. **hermit's**—See Chap. xxxii of "King Olaf Trygvesson's Saga." 49. **thoughts of love**—After the death of Queen Geyre, Olaf married Gyda, the daughter (the saga says sister) of Olaf Kvaran, who was King of Dublin, but with twelve men he was compelled to fight with another suitor named Alfin and his twelve men to get her. 64-66. **Smalsor Horn**—". . . he ascended the Smalsor Horn [an inaccessible peak on the summit of a mountain in Bremanger, now called Hornelen], and fixed his shield upon the very peak."—Chap. xcii of "King Olaf Trygvesson's Saga." 67-72. "King Olaf could run across the oars outside of the vessel while his men were rowing the Serpent. He could play with three daggers, so that one was always in the air, and he took the one falling by the handle. He could walk all around the ship's rails, could strike and cut equally well with both hands, and could cast two spears at once. King Olaf was a very merry frolicsome man; gay and social; had great taste in everything; was very generous; was very finical in his dress, but in battle he exceeded all in bravery."—*Ibid.*

Harness gold-inlaid and burnished,
Mantle like a flame of fire.

Thus came Olaf to his own,
When upon the night-wind blown
Passed that cry along the shore;
And he answered, while the rifted
Streamers o'er him shook and shifted,
"I accept thy challenge, Thor!"

III

THORA OF RIMOL

By force and fraud Earl Hakon of Lade obtained power in Norway, afterwards forming an alliance with Thora of Rimol, "a woman of great influence, and one of the earl's best beloved." He was surprised by Olaf Trygvesson and forced to flee, as told in the poem, which, with wonderful vividness, relates the events of sections LIII-LVI of "King Olaf Trygvesson's Saga." As illustrating Longfellow's remarkable skill in following the terse account of the saga, the pertinent passages are quoted:

"The earl now sends Kark to Thora, and begs of her to come secretly to him. She did so, and he took it very kind of her, and begged her to conceal him for a few nights until the army of the bonders [yeomen] had dispersed. 'Here about my house,' said she, 'you will be hunted after, both inside and outside; for many know that I would willingly help you if I can. There is but one place about the house where they could never expect to find such a man as you, and that is the swine-stye.' When they came there the earl said, 'Well, let it be made ready for us; as to save our life is the first and foremost concern.' The slave dug a great hole in it, bore away the earth that he dug out, and laid wood over it. . . . Then the earl and Kark both went in the hole. Thora covered it with wood, and threw earth and dung over it, and drove the swine upon the top of it.

". . . Then Olaf held a House Thing or council out in the yard, and stood upon a great stone which lay beside the swine-stye, and made a speech to the people, in which he promised to enrich the man with rewards and honours who should kill the earl. This speech was heard by the earl and the thrall Kark.

" 'Why art thou so pale,' says the earl, 'and now again black as earth? Thou hast not the intention to betray me?'

" 'By no means,' replies Kark.

" 'We were born on the same night,' says the earl, 'and the time will be short between our deaths.'

". . . When night came the earl kept himself awake; but Kark slept, and was disturbed in his sleep. The earl woke him, and asked him, 'what he was dreaming of?'

"He answered, 'I was at Lade, and Olaf Trygvesson was laying a gold ring about my neck.'

"The earl says, 'It will be a red ring Olaf will lay about thy neck if he catches thee. . . .'

". . . towards day the earl suddenly dropped asleep; but his sleep was so unquiet that he drew his heels under him, and raised his neck, as if going to rise, and screamed dreadfully high. On this Kark, dreadfully alarmed, drew a large knife out of his belt, stuck it in the earl's throat, and cut it across, and killed Earl Hakon. Then Kark cut off the earl's head, and ran away. Late in the day he came to Lade, where he delivered the earl's head to King Olaf . . . Olaf had him taken out and beheaded. . . . [At Nidarholm] he had the heads of the earl and of Kark hung upon [a gallows], and the whole army of the bonders cast stones at them, screaming and shouting that the one worthless fellow had followed the other."

"Thora of Rimol! hide me! hide me!
Danger and shame and death betide me!
For Olaf the King is hunting me down
Through field and forest, through thorp and town!"
Thus cried Jarl Hakon
To Thora, the fairest of women.

"Hakon Jarl! for the love I bear thee
Neither shall shame nor death come near thee!

But the hiding-place wherein thou must lie
Is the cave underneath the swine in the sty."
Thus to Jarl Hakon
Said Thora, the fairest of women.

So Hakon Jarl and his base thrall Karker
Crouched in the cave, than a dungeon darker,
As Olaf came riding, with men in mail,
Through the forest roads into Orkadale,
Demanding Jarl Hakon
Of Thora, the fairest of women.

"Rich and honored shall be whoever
The head of Hakon Jarl shall dissever!"
Hakon heard him, and Karker the slave,
Through the breathing-holes of the darksome cave.
Alone in her chamber
Wept Thora, the fairest of women.

Said Karker, the crafty, "I will not slay thee!
For all the king's gold I will never betray thee!"
"Then why dost thou turn so pale, O churl,
And then again black as the earth?" said the Earl.
More pale and more faithful
Was Thora, the fairest of women.

From a dream in the night the thrall started, saying,
"Round my neck a gold ring King Olaf was laying!"
And Hakon answered, "Beware of the king!
He will lay round thy neck a blood-red ring."
At the ring on her finger
Gazed Thora, the fairest of women.

At daybreak slept Hakon, with sorrows encumbered,
But screamed and drew up his feet as he slumbered;
The thrall in the darkness plunged with his knife,
And the Earl awakened no more in this life.
But wakeful and weeping
Sat Thora, the fairest of women.

At Nidarholm the priests are all singing,
Two ghastly heads on the gibbet are swinging;
One is Jarl Hakon's and one is his thrall's,
And the people are shouting from windows and walls;
While alone in her chamber
Swoons Thora, the fairest of women.

IV

QUEEN SIGRID THE HAUGHTY

After subduing Norway, Olaf proposed marriage to Queen Sigrid in Sweden, who refused him as related in the poem, and later married Svend of the Forked Beard, King of Denmark and conqueror of England. See section XVII of the poem.

Queen Sigrid the Haughty sat proud and aloft
In her chamber, that looked over meadow and croft.
Heart's dearest,
Why dost thou sorrow so?

The floor with tassels of fir was besprent,
Filling the room with their fragrant scent.

She heard the birds sing, she saw the sun shine,
The air of summer was sweeter than wine.

Like a sword without scabbard the bright river lay
Between her own kingdom and Norroway.

But Olaf the King had sued for her hand,
The sword would be sheathed, the river be spanned.

Her maidens were seated around her knee,
Working bright figures in tapestry.

And one was singing the ancient rune
Of Brynhilda's love and the wrath of Gudrun.

And through it, and round it, and over it all
Sounded incessant the waterfall.

15-16. rune—presumably portions of the *Volsungasaga*, the Scandinavian version of the story of the *Niebelungenlied*.

The Queen in her hand held a ring of gold,
From the door of Ladé's Temple old.

King Olaf had sent her this wedding gift,
But her thoughts as arrows were keen and swift.

She had given the ring to her goldsmiths twain,
Who smiled, as they handed it back again.

And Sigrid the Queen, in her haughty way,
Said, "Why do you smile, my goldsmiths, say?"

And they answered: "O Queen! if the truth must be told,
The ring is of copper, and not of gold!"

The lightning flashed o'er her forehead and cheek,
She only murmured, she did not speak:

"If in his gifts he can faithless be,
There will be no gold in his love to me."

A footstep was heard on the outer stair,
And in strode King Olaf with royal air.

He kissed the Queen's hand, and he whispered of love,
And swore to be true as the stars are above.

But she smiled with contempt as she answered: "O King,
Will you swear it, as Odin once swore, on the ring?"

And the King: "Oh speak not of Odin to me,
The wife of King Olaf a Christian must be."

Looking straight at the King, with her level brows,
She said, "I keep true to my faith and my vows."

Then the face of King Olaf was darkened with gloom,
He rose in his anger and strode through the room.

"Why, then, should I care to have thee?" he said,—
"A faded old woman, a heathenish jade!"

His zeal was stronger than fear or love,
And he struck the Queen in the face with his glove.

Then forth from the chamber in anger he fled,
And the wooden stairway shook with his tread.

Queen Sigrid the Haughty said under her breath,
"This insult, King Olaf, shall be thy death!"
Heart's dearest,
Why dost thou sorrow so?

Sections v, vi, and vii of the poem relate various supernatural happenings, in which the Norse gods struggle with Olaf; and Olaf's destruction of the image of Odin at Mere.

VIII

GUDRUN

Olaf defeated Jern Skiaegge, the leader of the yeomen who opposed him in the name of the old religion. Olaf's men killed Jern Skiaegge, and the king therefore offered to marry Gudrun, Jern's daughter, by way of compensation. At the conclusion of the incident described by Longfellow the saga says simply: "Gudrun never came into the king's bed again."

On King Olaf's bridal night
Shines the moon with tender light,
And across the chamber streams
Its tide of dreams.

At the fatal midnight hour,
When all evil things have power,
In the glimmer of the moon
Stands Gudrun.

Close against her heaving breast
Something in her hand is pressed;

20. Ladé's Temple—The saga says that Olaf razed the heathen temple at Lade to the ground, and took the great gold ring which Earl Hakon had had made and which hung on the door of the temple. This "was considered a distinguished ornament."

Like an icicle, its sheen
Is cold and keen.

On the cairn are fixed her eyes
Where her murdered father lies,
And a voice remote and drear
She seems to hear.

What a bridal night is this!
Cold will be the dagger's kiss;
Laden with the chill of death
Is its breath.

Like the drifting snow she sweeps
To the couch where Olaf sleeps;
Suddenly he wakes and stirs,
His eyes meet hers.

"What is that," King Olaf said,
"Gleams so bright above my head?
Wherefore standest thou so white
In pale moonlight?"

"'Tis the bodkin that I wear
When at night I bind my hair;
It woke me falling on the floor;
'Tis nothing more."

"Forests have ears, and fields have eyes·
Often treachery lurking lies
Underneath the fairest hair!
Gudrun beware!"

Ere the earliest peep of morn
Blew King Olaf's bugle-horn;
And forever sundered ride
Bridegroom and bride!

The omitted sections (IX-XVI) tell of the Christianization of Norway; the building and manning of Olaf's great war vessel, the *Long Serpent;* the reception at Olaf's court of Thyri, the sister of Svend of the Forked Beard, who fled from her husband, King Burislaf; the wedding of Olaf and Thyri; and how Thyri incited him to conquer Vendland, the kingdom of King Burislaf.

XVII

KING SVEND OF THE FORKED BEARD

Svend, King of Denmark, hoped to recover possession of lands in Norway, and formed an alliance with the "King" of Sweden, and with Eirik and Svein, the sons of Jarl Hakon, to attack Olaf.

Loudly the sailors cheered
Svend of the Forked Beard,
As with his fleet he steered
Southward to Vendland;
Where with their courses hauled
All were together called,
Under the Isle of Svald
Near to the mainland.

After Queen Gunhild's death,
So the old Saga saith,
Plighted King Svend his faith
To Sigrid the Haughty;
And to avenge his bride,
Soothing her wounded pride,
Over the waters wide
King Olaf sought he.

Still on her scornful face,
Blushing with deep disgrace,
Bore she the crimson trace
Of Olaf's gauntlet;
Like a malignant star,
Blazing in heaven afar,
Red shone the angry scar
Under her frontlet.

Oft to King Svend she spake,
"For thine own honor's sake
Shalt thou swift vengeance take
On the vile coward!"
Until the King at last,
Gusty and overcast,
Like a tempestuous blast
Threatened and lowered.

Soon as the Spring appeared,
Svend of the Forked Beard

4. **Vendland**—the south shore of the Baltic. 5. **courses hauled**—with sails trimmed to sail with the wind. 7. **Svald**—So says the saga, but Svald is a harbor west of the island of Rügen. 9. **Gunhild's**—This is Gunhild, daughter of King Burislaf, not the Gunhild of sec. II, line 26.

High his red standard reared,
  Eager for battle;
While every warlike Dane,
Seizing his arms again,
Left all unsown the grain,
  Unhoused the cattle.

Likewise the Swedish King
Summoned in haste a Thing,
Weapons and men to bring
  In aid of Denmark;
Eric the Norseman, too,
As the war-tidings flew,
Sailed with a chosen crew
  From Lapland and Finmark.

So upon Easter day
Sailed the three kings away,
Out of the sheltered bay,
  In the bright season;
With them Earl Sigvald came,
Eager for spoil and fame;
Pity that such a name
  Stooped to such treason!

Safe under Svald at last,
Now were their anchors cast,
Safe from the sea and blast,
  Plotted the three kings;
While, with a base intent,
Southward Earl Sigvald went,
On a foul errand bent,
  Unto the Sea-Kings.

Thence to hold on his course
Unto King Olaf's force,
Lying within the hoarse
  Mouths of Stet-haven;
Him to ensnare and bring
Unto the Danish king,
Who his dead corse would fling
  Forth to the raven!

XVIII

KING OLAF AND EARL SIGVALD

Olaf had sixty ships of war; when rumors of the armament of the allies reached his ears, the treacherous Sigvald persuaded him that Svend would not attack so powerful a fleet, but said he would bring eleven powerful ships to Olaf's aid. Olaf therefore ordered his fleet to sail for home, but the smaller ships sailed fastest, leaving only eleven ships with Olaf. Sigvald then persuaded Olaf that he knew the best channels for the large ships, and so betrayed the King to his enemies, he himself taking no part in the battle.

On the gray sea-sands
King Olaf stands,
Northward and seaward
He points with his hands.

With eddy and whirl
The sea-tides curl,
Washing the sandals
Of Sigvald the Earl.

The mariners shout,
The ships swing about,
The yards are all hoisted,
The sails flutter out.

The war-horns are played,
The anchors are weighed,
Like moths in the distance
The sails flit and fade.

The sea is like lead,
The harbor lies dead,
As a corse on the sea-shore,
Whose spirit has fled!

On that fatal day,
The histories say,

41. Swedish King—whose name was also Olaf, wherefore Longfellow has to omit naming him. He was the son of Sigrid the Haughty. **42. Thing**—Council. **45. Eric**—son of Jarl Hakon. **48. Finmark**—the northern part of the Scandinavian peninsula. **53. Earl Sigvald**—Earl Sigvald had been instrumental in forming the marriage between King Burislaf of Vendland and Thyri, who was now the wife of Olaf. A great and famous warrior, he counterfeited his designs and pretended to be the friend of Olaf, as related in sec. XVIII of the poem. This is the "foul errand" of line 63: "to bring it about by cunning devices that King Swend and King Olaf should fall in with each other." **68. Stet-haven**—Olaf had sailed to Vendland (North Germany), and must sail north to get home again.

Seventy vessels
Sailed out of the bay.

But soon scattered wide
O'er the billows they ride,
While Sigvald and Olaf
Sail side by side.

Cried the Earl: "Follow me!
I your pilot will be,
For I know all the channels
Where flows the deep sea!"

So into the strait
Where his foes lie in wait,
Gallant King Olaf
Sails to his fate!

Then the sea-fog veils
The ships and their sails;
Queen Sigrid the Haughty,
Thy vengeance prevails!

XIX

KING OLAF'S WAR-HORNS

Based on Chapters CXII-CXVII of the saga.

"Strike the sails!" King Olaf said;
"Never shall men of mine take flight;
Never away from battle I fled,
Never away from my foes!
Let God dispose
Of my life in the fight!"

"Sound the horns!" said Olaf the King;
And suddenly through the drifting brume
The blare of the horns began to ring,
Like the terrible trumpet shock
Of Regnarock,
On the Day of Doom!

Louder and louder the war-horns sang
Over the level floor of the flood;
All the sails came down with a clang,
And there in the midst overhead
The sun hung red
As a drop of blood.

Drifting down on the Danish fleet
Three together the ships were lashed,
So that neither should turn and retreat;
In the midst, but in front of the rest,
The burnished crest
Of the Serpent flashed.

King Olaf stood on the quarter-deck,
With bow of ash and arrows of oak;
His gilded shield was without a fleck,
His helmet inlaid with gold,
And in many a fold
Hung his crimson cloak.

On the forecastle Ulf the Red
Watched the lashing of the ships;
"If the Serpent lie so far ahead,
We shall have hard work of it here,"
Said he with a sneer
On his bearded lips.

King Olaf laid an arrow on string,
"Have I a coward on board?" said he.
"Shoot it another way, O King!"
Sullenly answered Ulf,
The old sea-wolf;
"You have need of me!"

In front came Svend, the King of the Danes,
Sweeping down with his fifty rowers;
To the right, the Swedish king with his thanes;
And on board of the Iron Beard
Earl Eric steered
To the left with his oars.

"These soft Danes and Swedes," said the King,
"At home with their wives had better stay,
Than come within reach of my Serpent's sting:

33. **strait**—by Svald, as narrated in the previous poem. 1. Olaf's people begged him not to risk battle with so great a force, but he answered as indicated. In battle, Viking ships resorted to oars instead of sails. 8. **brume**—mist. 11. **Regnarock**—in Norse mythology, the day of the destruction of the world. 16. **midst**—mist, in earlier version. 20. **three together**—Ships were bound three together, the longest in the middle, and rowed against each other. The fighting was mainly done from the forecastles, and grappling irons were used for dragging the vessels out of line or for bringing them within boarding distance.

But where Eric the Norseman leads
Heroic deeds
Will be done to-day!"

Then as together the vessels crashed,
Eric severed the cables of hide,
With which King Olaf's ships were lashed,
And left them to drive and drift
With the currents swift
Of the outward tide.

Louder the war-horns growl and snarl,
Sharper the dragons bite and sting!
Eric the son of Hakon Jarl
A death-drink salt as the sea
Pledges to thee,
Olaf the King!

XX

EINAR TAMBERSKELVER

Based on Chapter CXVIII of the saga.

It was Einar Tamberskelver
Stood beside the mast;
From his yew-bow, tipped with silver,
Flew the arrows fast;
Aimed at Eric unavailing,
As he sat concealed,
Half behind the quarter-railing,
Half behind his shield.

First an arrow struck the tiller,
Just above his head;
"Sing, O Eyvind Skaldaspiller,"
Then Earl Eric said.
"Sing the song of Hakon dying,
Sing his funeral wail!"
And another arrow flying
Grazed his coat of mail.

Turning to a Lapland yeoman,
As the arrow passed,
Said Earl Eric, "Shoot that bowman
Standing by the mast."
Sooner than the word was spoken
Flew the yeoman's shaft;
Einar's bow in twain was broken,
Einar only laughed.

"What was that?" said Olaf, standing
On the quarter-deck.
"Something heard I like the stranding
Of a shattered wreck."
Einar then, the arrow taking
From the loosened string,
Answered, "That was Norway breaking
From thy hand, O King!"

"Thou art but a poor diviner,"
Straightway Olaf said;
"Take my bow, and swifter, Einar,
Let thy shafts be sped."
Of his bows the fairest choosing,
Reached he from above;
Einar saw the blood-drops oozing
Through his iron glove.

But the bow was thin and narrow;
At the first essay,
O'er its head he drew the arrow,
Flung the bow away;
Said, with hot and angry temper
Flushing in his cheek,
"Olaf! for so great a Kämper
Are thy bows too weak!"

Then, with smile of joy defiant
On his beardless lip,
Scaled he, light and self-reliant,
Eric's dragon-ship.
Loose his golden locks were flowing,
Bright his armor gleamed;
Like Saint Michael overthrowing
Lucifer he seemed.

62. **dragons**—Prows of Viking ships were shaped into dragon's heads, and heavily reenforced so that they served as rams. 1. **Einar Tamberskelver**—Einar "was not reckoned as fully experienced, being only eighteen years old" when he first joined the crew of the *Long Serpent*, but he became the most famous bowman in the fleet. 11. **Eyvind Skaldaspiller**—a great poet or scald, who had composed verses celebrating the prowess of Jarl Hakon, and was now in the service of Eric, Hakon's son. 47. **Kämper**—warrior.

XXI

KING OLAF'S DEATH-DRINK

Based on Chapters CXX-CXXII of the saga.

All day has the battle raged,
All day have the ships engaged,
But not yet is assuaged
The vengeance of Eric the Earl.

The decks with blood are red,
The arrows of death are sped,
The ships are filled with the dead,
And the spears the champions hurl.

They drift as wrecks on the tide,
The grappling-irons are plied,
The boarders climb up the side,
The shouts are feeble and few.

Ah! never shall Norway again
See her sailors come back o'er the main;
They all lie wounded or slain,
Or asleep in the billows blue!

On the deck stands Olaf the King,
Around him whistle and sing
The spears that the foemen fling,
And the stones they hurl with their hands.

In the midst of the stones and the spears,
Kolbiorn, the marshal, appears,
His shield in the air he uprears,
By the side of King Olaf he stands.

Over the slippery wreck
Of the Long Serpent's deck
Sweeps Eric with hardly a check,
His lips with anger are pale;

He hews with his axe at the mast,
Till it falls, with the sails overcast
Like a snow-covered pine in the vast
Dim forests of Orkadale.

Seeing King Olaf then,
He rushes aft with his men,
As a hunter into the den
Of the bear, when he stands at bay.

"Remember Jarl Hakon!" he cries;
When lo! on his wondering eyes,
Two kingly figures arise,
Two Olafs in warlike array!

Then Kolbiorn speaks in the ear
Of King Olaf a word of cheer,
In a whisper that none may hear,
With a smile on his tremulous lip;

Two shields raised high in the air,
Two flashes of golden hair,
Two scarlet meteors' glare,
And both have leaped from the ship.

Earl Eric's men in the boats
Seize Kolbiorn's shield as it floats,
And cry, from their hairy throats,
"See! it is Olaf the King!"

While far on the opposite side
Floats another shield on the tide,
Like a jewel set in the wide
Sea-current's eddying ring.

There is told a wonderful tale,
How the King stripped off his mail,
Like leaves of the brown sea-kale,
As he swam beneath the main;

But the young grew old and gray,
And never, by night or day,
In his kingdom of Norroway
Was King Olaf seen again!

Section XXII of the poem concludes the whole with a picture of Astrid, the mother of Olaf, as an abbess, listening to a message from St. John that love is eternal.

32. **Orkadale**—*Cf.* line 15 of sec. III ("Thora of Rimol") for the appropriateness of this reference. 39. **Two kingly figures**—that is, Kolbiorn was dressed like the King. 50. **Kolbiorn**—that is, Kolbiorn was rescued. 59. **sea-kale**—a plant found wild on the shores of western Europe.

THE BIRDS OF KILLINGWORTH

Published in the *Atlantic Monthly,* December, 1863, and afterwards included in *Tales of a Wayside Inn* (1863). According to the collected *Works,* "the men of the northern part of the town [of Killingworth, Connecticut] did yearly in the spring choose two leaders, and then the two sides were formed: the side that got beaten should pay the bills. Their special game was the hawk, the owl, the crow, the blackbird, and any other bird supposed to be mischievous to the corn. Some years each side would bring them in by the bushel. This was followed up for only a few years, for the birds began to grow scarce." The story, based upon this suggestion, is Longfellow's invention.

It was the season, when through all the land
The merle and mavis build, and building sing
Those lovely lyrics, written by His hand,
Whom Saxon Caedmon calls the Blithe-heart King;
When on the boughs the purple buds expand,
The banners of the vanguard of the Spring,
And rivulets, rejoicing, rush and leap,
And wave their fluttering signals from the steep.

The robin and the bluebird, piping loud,
Filled all the blossoming orchards with their glee;
The sparrows chirped as if they still were proud
Their race in Holy Writ should mentioned be;
And hungry crows, assembled in a crowd,
Clamored their piteous prayer incessantly,
Knowing who hears the ravens cry, and said:
"Give us, O Lord, this day, our daily bread!"

Across the Sound the birds of passage sailed,
Speaking some unknown language strange and sweet
Of tropic isle remote, and passing hailed
The village with the cheers of all their fleet;
Or quarrelling together, laughed and railed
Like foreign sailors, landed in the street
Of seaport town, and with outlandish noise
Of oaths and gibberish frightening girls and boys.

Thus came the jocund Spring in Killingworth,
In fabulous days, some hundred years ago;
And thrifty farmers, as they tilled the earth,
Heard with alarm the cawing of the crow,
That mingled with the universal mirth,
Cassandra-like, prognosticating woe;

2. merle and mavis—the European blackbird and the thrush. **4. Caedmon**—Caedmon was an Anglo-Saxon poet of the seventh century. The reference is to a phrase in the poem *Genesis.* **11. sparrows**—*Cf.* Matt. 10:29. **15. ravens**—*Cf.* Ps. 147:9. **16. Give**—*Cf.* Matt. 6:11. **17. Sound**—Long Island Sound. **30. Cassandra**—the daughter of Priam and Hecuba, who was given the gift of prophecy by Apollo, but, because she broke her promise to the god, was punished by having her prophecies regarded as futile.

They shook their heads, and doomed with dreadful words
To swift destruction the whole race of birds.

And a town-meeting was convened straightway
To set a price upon the guilty heads
Of these marauders, who, in lieu of pay,
Levied black-mail upon the garden beds
And cornfields, and beheld without dismay
The awful scarecrow, with his fluttering shreds;
The skeleton that waited at their feast,
Whereby their sinful pleasure was increased.

Then from his house, a temple painted white,
With fluted columns, and a roof of red,
The Squire came forth, august and splendid sight!
Slowly descending, with majestic tread,
Three flights of steps, nor looking left nor right,
Down the long street he walked, as one who said,
"A town that boasts inhabitants like me
Can have no lack of good society!"

The Parson, too, appeared, a man austere,
The instinct of whose nature was to kill;
The wrath of God he preached from year to year,
And read, with fervor, Edwards on the Will;
His favorite pastime was to slay the deer
In Summer on some Adirondac hill;
E'en now, while walking down the rural lane,
He lopped the wayside lilies with his cane.

From the Academy, whose belfry crowned
The hill of Science with its vane of brass,
Came the Preceptor, gazing idly round,
Now at the clouds, and now at the green grass,
And all absorbed in reveries profound
Of fair Almira in the upper class,
Who was, as in a sonnet he had said,
As pure as water, and as good as bread.

And next the Deacon issued from his door,
In his voluminous neck-cloth, white as snow;
A suit of sable bombazine he wore;
His form was ponderous, and his step was slow;
There never was so wise a man before;
He seemed the incarnate "Well, I told you so!"
And to perpetuate his great renown
There was a street named after him in town.

51. wrath of God—supposed to be the central doctrine of Calvinism. **52. Edwards on the Will**—The masterpiece of Jonathan Edwards (1703-1758) is his treatise on the freedom of the will, published in 1754. *Cf.* p. 55. **57. Academy**—Before the rise of the high school, the village academy was the characteristic American secondary school. **58. Science**—knowledge. **67. bombazine**—twilled fabric.

These came together in the new town-hall,
With sundry farmers from the region round.
The Squire presided, dignified and tall,
His air impressive and his reasoning sound;
Ill fared it with the birds, both great and small;
Hardly a friend in all that crowd they found,
But enemies enough, who every one
Charged them with all the crimes beneath the sun.

When they had ended, from his place apart
Rose the Preceptor, to redress the wrong,
And, trembling like a steed before the start,
Looked round bewildered on the expectant throng;
Then thought of fair Almira, and took heart
To speak out what was in him, clear and strong,
Alike regardless of their smile or frown,
And quite determined not to be laughed down.

"Plato, anticipating the Reviewers,
From his Republic banished without pity
The Poets; in this little town of yours,
You put to death, by means of a Committee,
The ballad-singers and the Troubadours,
The street-musicians of the heavenly city,
The birds, who make sweet music for us all
In our dark hours, as David did for Saul.

"The thrush that carols at the dawn of day
From the green steeples of the piny wood;
The oriole in the elm; the noisy jay,
Jargoning like a foreigner at his food;
The bluebird balanced on some topmost spray,
Flooding with melody the neighborhood;
Linnet and meadow-lark, and all the throng
That dwell in nests, and have the gift of song.

"You slay them all! and wherefore? for the gain
Of a scant handful more or less of wheat,
Or rye, or barley, or some other grain,
Scratched up at random by industrious feet,
Searching for worm or weevil after rain!
Or a few cherries, that are not so sweet
As are the songs these uninvited guests
Sing at their feast with comfortable breasts.

"Do you ne'er think what wondrous beings these?
Do you ne'er think who made them, and who taught
The dialect they speak, where melodies
Alone are the interpreters of thought?

89. Plato . . . the Reviewers—In his ideal commonwealth, pictured in the *Republic,* Plato allowed no poets. The harshness of critical reviews of poetry in quarterlies like the *Edinburgh Review* is what Longfellow has in mind. **96. David**—*Cf.* I Sam. 16: 14-23.

Whose household words are songs in many keys,
  Sweeter than instrument of men e'er caught!
Whose habitations in the tree-tops even
Are half-way houses on the road to heaven!

"Think, every morning when the sun peeps through
  The dim, leaf-latticed windows of the grove,
How jubilant the happy birds renew
  Their old, melodious madrigals of love!
And when you think of this, remember too
  'Tis always morning somewhere, and above
The awakening continents, from shore to shore,
Somewhere the birds are singing evermore.

"Think of your woods and orchards without birds!
  Of empty nests that cling to boughs and beams
As in an idiot's brain remembered words
  Hang empty 'mid the cobwebs of his dreams!
Will bleat of flocks or bellowing of herds
  Make up for the lost music, when your teams
Drag home the stingy harvest, and no more
The feathered gleaners follow to your door?

"What! would you rather see the incessant stir
  Of insects in the windrows of the hay,
And hear the locust and the grasshopper
  Their melancholy hurdy-gurdies play?
Is this more pleasant to you than the whir
  Of meadow-lark, and her sweet roundelay,
Or twitter of little field-fares, as you take
Your nooning in the shade of bush and brake?

"You call them thieves and pillagers; but know,
  They are the winged wardens of your farms,
Who from the cornfields drive the insidious foe,
  And from your harvests keep a hundred harms;
Even the blackest of them all, the crow,
  Renders good service as your man-at-arms,
Crushing the beetle in his coat of mail,
And crying havoc on the slug and snail.

"How can I teach your children gentleness,
  And mercy to the weak, and reverence
For Life, which, in its weakness or excess,
  Is still a gleam of God's omnipotence,
Or Death, which, seeming darkness, is no less
  The selfsame light, although averted hence,
When by your laws, your actions, and your speech,
You contradict the very things I teach?"

124. madrigals—unaccompanied choruses in four or eight parts, generally love songs. **142. roundelay**—a song in which a simple melody is often repeated. **143. field-fares**—European thrush.

With this he closed; and through the audience went
A murmur, like the rustle of dead leaves;
The farmers laughed and nodded, and some bent
Their yellow heads together like their sheaves;
Men have no faith in fine-spun sentiment
Who put their trust in bullocks and in beeves.
The birds were doomed; and, as the record shows,
A bounty offered for the heads of crows.

There was another audience out of reach,
Who had no voice nor vote in making laws,
But in the papers read his little speech,
And crowned his modest temples with applause;
They made him conscious, each one more than each,
He still was victor, vanquished in their cause.
Sweetest of all the applause he won from thee,
O fair Almira at the Academy!

And so the dreadful massacre began;
O'er fields and orchards, and o'er woodland crests,
The ceaseless fusillade of terror ran.
Dead fell the birds, with blood-stains on their breasts,
Or wounded crept away from sight of man,
While the young died of famine in their nests;
A slaughter to be told in groans, not words,
The very St. Bartholomew of Birds!

The Summer came, and all the birds were dead;
The days were like hot coals; the very ground
Was burned to ashes; in the orchards fed
Myriads of caterpillars, and around
The cultivated fields and garden beds
Hosts of devouring insects crawled, and found
No foe to check their march, till they had made
The land a desert without leaf or shade.

Devoured by worms, like Herod, was the town,
Because, like Herod, it had ruthlessly
Slaughtered the Innocents. From the trees spun down
The canker-worms upon the passers-by,
Upon each woman's bonnet, shawl, and gown,
Who shook them off with just a little cry;
They were the terror of each favorite walk,
The endless theme of all the village talk.

The farmers grew impatient, but a few
Confessed their error, and would not complain,
For after all, the best thing one can do
When it is raining, is to let it rain.

184. St. Bartholomew—On the evening of Aug. 23, 1572 (St. Bartholomew's Eve), the French Huguenots were massacred by order of the King. **192. land**—*Cf.* Acts 12: 23. **193. Herod**—*Cf.* Matt. 2: 16.

Then they repealed the law, although they knew
It would not call the dead to life again;
As school-boys, finding their mistake too late,
Draw a wet sponge across the accusing slate.

That year in Killingworth the Autumn came
Without the light of his majestic look,
The wonder of the falling tongues of flame,
The illumined pages of his Doom's-Day book.
A few lost leaves blushed crimson with their shame,
And drowned themselves despairing in the brook,
While the wild wind went moaning everywhere,
Lamenting the dead children of the air!

But the next Spring a stranger sight was seen,
A sight that never yet by bard was sung,
As great a wonder as it would have been
If some dumb animal had found a tongue!
A wagon, overarched with evergreen,
Upon whose boughs were wicker cages hung,
All full of singing birds, came down the street,
Filling the air with music wild and sweet.

From all the country round these birds were brought,
By order of the town, with anxious quest,
And, loosened from their wicker prisons, sought
In woods and fields the places they loved best,
Singing loud canticles, which many thought
Were satires to the authorities addressed,
While others, listening in green lanes, averred
Such lovely music never had been heard!

But blither still and louder carolled they
Upon the morrow, for they seemed to know
It was the fair Almira's wedding-day,
And everywhere, around, above, below,
When the Preceptor bore his bride away,
Their songs burst forth in joyous overflow,
And a new heaven bent over a new earth
Amid the sunny farms of Killingworth.

DIVINA COMMEDIA

Published in the *Atlantic Monthly,* December, 1864-November, 1866. The first two sonnets prefaced the *Inferno,* but the whole six appeared in *Flower-de-Luce* (1866), and were also distributed as prefaces to three portions of the *Divine Comedy* when

211. tongues—*Cf.* Acts 2:3. **212. Doom's-Day book**—William the Conqueror took an "inventory" of England, known as the Domesday Book, so called because its thoroughness was said to be like that of the Last Judgment. **229. canticles**—chants, as for a church service.

.ne translation was completed. The autobiographical references are to the poet's grief over the death of his second wife.

Oft have I seen at some cathedral door
A laborer, pausing in the dust and heat,
Lay down his burden, and with reverent feet
Enter, and cross himself, and on the floor
Kneel to repeat his paternoster o'er;
Far off the noises of the world retreat;
The loud vociferations of the street
Become an undistinguishable roar.
So, as I enter here from day to day,
And leave my burden at this minster gate,
Kneeling in prayer, and not ashamed to pray,
The tumult of the time disconsolate
To inarticulate murmurs dies away,
While the eternal ages watch and wait.

II

How strange the sculptures that adorn these towers!
This crowd of statues, in whose folded sleeves
Birds build their nests; while canopied with leaves
Parvis and portal bloom like trellised bowers,
And the vast minster seems a cross of flowers!
But fiends and dragons on the gargoyled eaves
Watch the dead Christ between the living thieves,
And, underneath, the traitor Judas lowers!
Ah! from what agonies of heart and brain,
What exultations trampling on despair,
What tenderness, what tears, what hate of wrong,
What passionate outcry of a soul in pain,
Uprose this poem of the earth and air,
This mediaeval miracle of song!

III

I enter, and I see thee in the gloom
Of the long aisles, O poet saturnine!
And strive to make my steps keep pace with thine.
The air is filled with some unknown perfume;
The congregation of the dead make room
For thee to pass; the votive tapers shine;
Like rooks that haunt Ravenna's groves of pine
The hovering echoes fly from tomb to tomb.

10. **minster gate**—cathedral gate or door. 12. **time disconsolate**—the Civil War. 18. **parvis**—about equivalent to church porch. 20. **fiends**—The general comparison is between the woes pictured in the *Inferno* and the sculptures, especially the gargoyles, of a cathedral. 30. **poet saturnine**—Dante, so called because of his somber gravity. 33. **congregation**—multitude. The third and fourth sonnets are for the *Purgatorio*. 35. **Ravenna's groves**—Dante makes various references to Ravenna, where he was afterwards buried.

From the confessionals I hear arise
Rehearsals of forgotten tragedies,
And lamentations from the crypts below;
And then a voice celestial that begins
With the pathetic words, "Although your sins
As scarlet be," and ends with "as the snow."

IV

With snow-white veil and garments as of flame,
She stands before thee, who so long ago
Filled thy young heart with passion and the woe
From which thy song and all its splendors came;
And while with stern rebuke she speaks thy name,
The ice about thy heart melts as the snow
On mountain heights, and in swift overflow
Comes gushing from thy lips in sobs of shame.
Thou makest full confession; and a gleam,
As of the dawn on some dark forest cast,
Seems on thy lifted forehead to increase;
Lethe and Eunoë—the remembered dream
And the forgotten sorrow—bring at last
That perfect pardon which is perfect peace.

V

I lift mine eyes, and all the windows blaze
With forms of Saints and holy men who died,
Here martyred and hereafter glorified;
And the great Rose upon its leaves displays
Christ's Triumph, and the angelic roundelays,
With splendor upon splendor multiplied;
And Beatrice again at Dante's side
No more rebukes, but smiles her words of praise.
And then the organ sounds, and unseen choirs
Sing the old Latin hymns of peace and love
And benedictions of the Holy Ghost;
And the melodious bells among the spires
O'er all the house-tops and through heaven above
Proclaim the elevation of the Host!

41-42. **"Although . . ."**—*Cf. Purgatorio,* XXXI, line 98. 43-56. **In** general, this sonnet is reminiscent of *Purgatorio,* XXX-XXXI. The **She** is of course Beatrice. 54. **Lethe and Eunoë**—At the top of the Mountain of Purgatory Dante drinks of Lethe, the river of forgetfulness, and of Eunoë, the river of the memory of good. 57-59. **windows**—Continuing the figure of the cathedral, Longfellow now compares the *Paradiso* to the windows. 60. **Rose**—At the conclusion of his journey (*Paradiso,* XXXI), Dante beholds the Trinity and the blessed in the form of a rose, the blessed being seated in order in the petals of the rose. 63-64. **Beatrice**—When Beatrice first meets Dante (*Purgatorio,* XXX), she reproves him for having followed false pleasures, but her last words (*Paradiso,* XXX) are words of comfort. 66. **hymns**—Fragments of Latin hymns, used in the church service, are found throughout the *Divine Comedy.* 70. **elevation of the Host**—the supreme point in the celebration of the mass, when the consecrated elements are lifted up before the congregation.

VI

O star of morning and of liberty!
O bringer of the light, whose splendor shines
Above the darkness of the Apennines,
Forerunner of the day that is to be!
The voices of the city and the sea,
The voices of the mountains and the pines,
Repeat thy song, till the familiar lines
Are footpaths for the thought of Italy!
Thy flame is blown abroad from all the heights,
Through all the nations, and a sound is heard,
As of a mighty wind, and men devout,
Strangers of Rome, and the new proselytes,
In their own language hear the wondrous word,
And many are amazed and many doubt.

CHAUCER

Written in 1873; published in the *Masque of Pandora* volume (1875).

An old man in a lodge within a park;
The chamber walls depicted all around
With portraitures of huntsman, hawk, and hound,
And the hurt deer. He listeneth to the lark,
Whose song comes with the sunshine through the dark
Of painted glass in leaden lattice bound;
He listeneth and he laugheth at the sound,
Then writeth in a book like any clerk.
He is the poet of the dawn, who wrote
The Canterbury Tales, and his old age
Made beautiful with song; and as I read
I hear the crowing cock, I hear the note
Of lark and linnet, and from every page
Rise odors of ploughed field or flowery mead.

SHAKESPEARE

Written in 1873; published in the *Masque of Pandora* volume (1875).

A vision as of crowded city streets,
With human life in endless overflow;
Thunder of thoroughfares; trumpets that blow
To battle; clamor, in obscure retreats,
Of sailors landed from their anchored fleets;
Tolling of bells in turrets, and below
Voices of children, and bright flowers that throw
O'er garden-walls their intermingled sweets!
This vision comes to me when I unfold
The volume of the Poet paramount,
Whom all the Muses loved, not one alone;—
Into his hands they put the lyre of gold,
And, crowned with sacred laurel at their fount,
Placed him as Musagetes * on their throne.

MILTON

Published in the *Masque of Pandora* volume (1875).

I pace the sounding sea-beach and behold
How the voluminous billows roll and run,
Upheaving and subsiding, while the sun
Shines through their sheeted emerald far unrolled,
And the ninth wave, slow gathering fold by fold
All its loose-flowing garments into one,
Plunges upon the shore, and floods the dun
Pale reach of sands, and changes them to gold.

71-84. star—In general, Longfellow follows Byron's interpretation of Dante as a prophet of Italian freedom. *Cf. The Prophecy of Dante.* * **Musagetes**—Apollo.

So in majestic cadence rise and fall
  The mighty undulations of thy song,
  O sightless bard, England's Maeonides!
And ever and anon, high over all
  Uplifted, a ninth wave superb and strong,
  Floods all the soul with its melodious seas.

THE SOUND OF THE SEA

Written July 27, 1874; published in the *Masque of Pandora* volume (1875).

The sea awoke at midnight from its sleep,
And round the pebbly beaches far and wide
I heard the first wave of the rising tide
Rush onward with uninterrupted sweep;
A voice out of the silence of the deep,
A sound mysteriously multiplied
As of a cataract from the mountain's side,
Or roar of winds upon a wooded steep.
So comes to us at times, from the unknown
And inaccessible solitudes of being,
The rushing of the sea-tides of the soul;
And inspirations, that we deem our own,
Are some divine foreshadowing and foreseeing
Of things beyond our reason or control.

MORITURI SALUTAMUS

POEM FOR THE FIFTIETH ANNIVERSARY OF THE CLASS OF 1825 IN BOWDOIN COLLEGE

Tempora labuntur, tacitisque senescimus annis,
Et fugiunt freno non remorante dies.
—Ovid, *Fastorum*, Lib. VI.

Written in 1874 and published in the *Masque of Pandora* volume (1875). The title means: "We who are about to die salute you," the legendary cry of the gladiators to the Roman Emperor on their entering the arena. The central idea of the poem is said to have been suggested by Gérome's famous painting of such a scene. Motto: "Time passes away, we grow old with the silent years, and the days flee past with no delaying check."

"O Caesar, we who are about to die
Salute you!" was the gladiators' cry
In the arena, standing face to face
With death and with the Roman populace.

O ye familiar scenes,—ye groves of pine,
That once were mine and are no longer mine,—
Thou river, widening through the meadows green
To the vast sea, so near and yet unseen,—
Ye halls, in whose seclusion and repose
Phantoms of fame, like exhalations, rose
And vanished,—we who are about to die,
Salute you; earth and air and sea and sky,
And the Imperial Sun that scatters down
His sovereign splendors upon grove and town.

Ye do not answer us! ye do not hear!
We are forgotten; and in your austere

11. **Maeonides**—Homer; but *cf. Paradise Lost*, Bk. III: line 35.

And calm indifference, ye little care
Whether we come or go, or whence or where.
What passing generations fill these halls,
What passing voices echo from these walls,
Ye heed not; we are only as the blast,
A moment heard, and then forever past.

Not so the teachers who in earlier days
Led our bewildered feet through learning's maze;
They answer us—alas! what have I said?
What greetings come there from the voiceless dead?
What salutation, welcome, or reply?
What pressure from the hands that lifeless lie?
They are no longer here; they all are gone
Into the land of shadows,—all save one.
Honor and reverence, and the good repute
That follows faithful service as its fruit,
Be unto him, whom living we salute.

The great Italian poet, when he made
His dreadful journey to the realms of shade,
Met there the old instructor of his youth,
And cried in tones of pity and of ruth:
"Oh, never from the memory of my heart
Your dear, paternal image shall depart,
Who while on earth, ere yet by death surprised,
Taught me how mortals are immortalized;
How grateful am I for that patient care
All my life long my language shall declare."

To-day we make the poet's words our own,
And utter them in plaintive undertone;
Nor to the living only be they said,
But to the other living called the dead,
Whose dear, paternal images appear
Not wrapped in gloom, but robed in sunshine here;
Whose simple lives, complete and without flaw,
Were part and parcel of great Nature's law;
Who said not to their Lord, as if afraid,
"Here is thy talent in a napkin laid,"
But labored in their sphere, as men who live
In the delight that work alone can give.
Peace be to them; eternal peace and rest,
And the fulfilment of the great behest:
"Ye have been faithful over a few things,
Over ten cities shall ye reign as kings."

And ye who fill the places we once filled,
And follow in the furrows that we tilled,

34. Italian poet—Dante pictures himself as meeting Brunetto Latini and so addressing him in the *Inferno*, xv, lines 82-87. Lines 38-43 are a translation of the Italian. **53. talent**—*Cf.* Matt. 25: 14-30. **58. faithful**—*Cf.* Luke 19: 17.

Young men, whose generous hearts are beating high,
We who are old, and are about to die,
Salute you; hail you; take your hands in ours,
And crown you with our welcome as with flowers!

How beautiful is youth! how bright it gleams
With its illusions, aspirations, dreams!
Book of Beginnings, Story without End,
Each maid a heroine, and each man a friend!
Aladdin's Lamp, and Fortunatus' Purse,
That holds the treasures of the universe!
All possibilities are in its hands,
No danger daunts it, and no foe withstands;
In its sublime audacity of faith,
"Be thou removed!" it to the mountain saith,
And with ambitious feet, secure and proud,
Ascends the ladder leaning on the cloud!

As ancient Priam at the Scaean gate
Sat on the walls of Troy in regal state
With the old men, too old and weak to fight,
Chirping like grasshoppers in their delight
To see the embattled hosts, with spear and shield,
Of Trojans and Achaians in the field;
So from the snowy summits of our years
We see you in the plain, as each appears,
And question of you; asking, "Who is he
That towers above the others? Which may be
Atreides, Menelaus, Odysseus,
Ajax the great, or bold Idomeneus?"

Let him not boast who puts his armor on
As he who puts it off, the battle done.
Study yourselves; and most of all note well
Wherein kind Nature meant you to excel.
Not every blossom ripens into fruit;
Minerva, the inventress of the flute,
Flung it aside, when she her face surveyed
Distorted in a fountain as she played;
The unlucky Marsyas found it, and his fate
Was one to make the bravest hesitate.

Write on your doors the saying wise and old,
"Be bold! be bold!" and everywhere, "Be bold;
Be not too bold!" Yet better the excess
Than the defect; better the more than less;
Better like Hector in the field to die,
Than like a perfumed Paris turn and fly.

78. **Priam**—*Cf.* Iliad, III. 95-98. **Minerva . . . Marsyas**—Marsyas, having found the flute as described, challenged Apollo to a contest. Apollo won, bound Marsyas to a tree, and flayed him alive. 101. **"Be bold!"**—*Cf.* Spenser, *The Faerie Queene*, Bk. III, canto XI, line 54. 104-05. **Hector . . . Paris**—*Cf.* Iliad, III and XXII.

And now, my classmates; ye remaining few
That number not the half of those we knew,
Ye, against whose familiar names not yet
The fatal asterisk of death is set,
Ye I salute! The horologe of Time
Strikes the half-century with a solemn chime,
And summons us together once again,
The joy of meeting not unmixed with pain.

Where are the others? Voices from the deep
Caverns of darkness answer me: "They sleep!"
I name no names; instinctively I feel
Each at some well-remembered grave will kneel,
And from the inscription wipe the weeds and moss,
For every heart best knoweth its own loss.
I see their scattered gravestones gleaming white
Through the pale dusk of the impending night;
O'er all alike the impartial sunset throws
Its golden lilies mingled with the rose;
We give to each a tender thought, and pass
Out of the graveyards with their tangled grass,
Unto these scenes frequented by our feet
When we were young, and life was fresh and sweet.

What shall I say to you? What can I say
Better than silence is? When I survey
This throng of faces turned to meet my own,
Friendly and fair, and yet to me unknown,
Transformed the very landscape seems to be;
It is the same, yet not the same to me.
So many memories crowd upon my brain,
So many ghosts are in the wooded plain,
I fain would steal away, with noiseless tread,
As from a house where some one lieth dead.
I cannot go;—I pause;—I hesitate;
My feet reluctant linger at the gate;
As one who struggles in a troubled dream
To speak and cannot, to myself I seem.

Vanish the dream! Vanish the idle fears!
Vanish the rolling mists of fifty years!
Whatever time or space may intervene,
I will not be a stranger in this scene.
Here every doubt, all indecision, ends;
Hail, my companions, comrades, classmates, friends!

Ah me! the fifty years since last we met
Seem to me fifty folios bound and set
By Time, the great transcriber, on his shelves,
Wherein are written the histories of ourselves.

109. asterisk—It is customary to indicate the names of deceased members of a college class by printing an asterisk beside their names.

What tragedies, what comedies, are there;
What joy and grief, what rapture and despair!
What chronicles of triumph and defeat,
Of struggle, and temptation, and retreat!
What records of regrets, and doubts, and fears!
What pages blotted, blistered by our tears!
What lovely landscapes on the margin shine,
What sweet, angelic faces, what divine
And holy images of love and trust,
Undimmed by age, unsoiled by damp or dust!

Whose hand shall dare to open and explore
These volumes, closed and clasped forevermore?
Not mine. With reverential feet I pass;
I hear a voice that cries, "Alas! alas!
Whatever hath been written shall remain,
Nor be erased nor written o'er again;
The unwritten only still belongs to thee:
Take heed, and ponder well what that shall be."

As children frightened by a thunder-cloud
Are reassured if some one reads aloud
A tale of wonder, with enchantment fraught,
Or wild adventure, that diverts their thought,
Let me endeavor with a tale to chase
The gathering shadows of the time and place
And banish what we all too deeply feel
Wholly to say, or wholly to conceal.

In mediaeval Rome, I know not where,
There stood an image with its arm in air,
And on its lifted finger, shining clear,
A golden ring with the device, "Strike here!"
Greatly the people wondered, though none guessed
The meaning that these words but half expressed,
Until a learned clerk, who at noonday
With downcast eyes was passing on his way,
Paused, and observed the spot, and marked it well,
Whereon the shadow of the finger fell;
And, coming back at midnight, delved, and found
A secret stairway leading underground.
Down this he passed into a spacious hall,
Lit by a flaming jewel on the wall;
And opposite, in threatening attitude,
With bow and shaft a brazen statue stood.
Upon its forehead, like a coronet,
Were these mysterious words of menace set:
"That which I am, I am; my fatal aim
None can escape, not even yon luminous flame!"

174. tale—Longfellow found the ensuing tale in the *Gesta Romanorum*, Tale CVII.

Midway the hall was a fair table placed,
With cloth of gold, and golden cups enchased
With rubies, and the plates and knives were gold.
And gold the bread and viands manifold.
Around it, silent, motionless, and sad,
Were seated gallant knights in armor clad,
And ladies beautiful with plume and zone,
But they were stone, their hearts within were stone;
And the vast hall was filled in every part
With silent crowds, stony in face and heart.

Long at the scene, bewildered and amazed,
The trembling clerk in speechless wonder gazed;
Then from the table, by his greed made bold,
He seized a goblet and a knife of gold,
And suddenly from their seats the guests upsprang,
The vaulted ceiling with loud clamors rang,
The archer sped his arrow at their call,
Shattering the lambent jewel on the wall,
And all was dark around and overhead;—
Stark on the floor the luckless clerk lay dead!

The writer of this legend then records
Its ghostly application in these words:
The image is the Adversary old,
Whose beckoning finger points to realms of gold;
Our lusts and passions are the downward stair
That leads the soul from a diviner air;
The archer, Death; the flaming jewel, Life;
Terrestrial goods, the goblet and the knife;
The knights and ladies, all whose flesh and bone
By avarice have been hardened into stone;
The clerk, the scholar whom the love of pelf
Tempts from his books and from his nobler self.

The scholar and the world! The endless strife,
The discord in the harmonies of life!
The love of learning, the sequestered nooks,
And all the sweet serenity of books;
The market-place, the eager love of gain,
Whose aim is vanity, and whose end is pain!

But why, you ask me, should this tale be told
To men grown old, or who are growing old?
It is too late! Ah, nothing is too late
Till the tired heart shall cease to palpitate.
Cato learned Greek at eighty; Sophocles
Wrote his grand Oedipus, and Simonides

219. ghostly—spiritual. **240. Cato**—Cato the Censor (234-149 B.C.). **240. Sophocles**—Sophocles (495-405 B.C.) is said to have written his *Oedipus at Colonus* just before his death. **241. Simonides**—(556-467 B.C.) one of the great Greek lyric poets of his age.

Bore off the prize of verse from his compeers,
When each had numbered more than fourscore years,
And Theophrastus, at fourscore and ten,
Had but begun his "Characters of Men."
Chaucer, at Woodstock with the nightingales,
At sixty wrote the Canterbury Tales;
Goethe at Weimar, toiling to the last,
Completed Faust when eighty years were past.
These are indeed exceptions; but they show
How far the gulf-stream of our youth may flow
Into the arctic regions of our lives,
Where little else than life itself survives.

As the barometer foretells the storm
While still the skies are clear, the weather warm,
So something in us, as old age draws near,
Betrays the pressure of the atmosphere.
The nimble mercury, ere we are aware,
Descends the elastic ladder of the air;
The telltale blood in artery and vein
Sinks from its higher levels in the brain;
Whatever poet, orator, or sage
May say of it, old age is still old age.
It is the waning, not the crescent moon;
The dusk of evening, not the blaze of noon;
It is not strength, but weakness; not desire,
But its surcease; not the fierce heat of fire,
The burning and consuming element,
But that of ashes and of embers spent,
In which some living sparks we still discern,
Enough to warm, but not enough to burn.

What then? Shall we sit idly down and say
The night hath come; it is no longer day?
The night hath not yet come; we are not quite
Cut off from labor by the failing light;
Something remains for us to do or dare;
Even the oldest tree some fruit may bear;
Not Oedipus Coloneus, or Greek Ode,
Or tales of pilgrims that one morning rode
Out of the gateway of the Tabard Inn,
But other something, would we but begin;
For age is opportunity no less
Than youth itself, though in another dress,
And as the evening twilight fades away
The sky is filled with stars, invisible by day.

244. Theophrastus—(382-297 B.C.) author of *Moral Characters,* one of the Greek prose classics. **246. Chaucer**—See Longfellow's sonnet "Chaucer," p. 631. **248. Goethe**—Johann Wolfgang von Goethe (1749-1832) began work on his *Faust* in 1773, but the conclusion did not appear until the year following his death.

THE CROSS OF SNOW

Written July 10, 1879; published in the *Life*. Suggested by an illustrated book of Western scenery which contained a picture of Holy Cross Mountain, Colorado. The sonnet was found in Longfellow's portfolio after his death. The reference, of course, is to the tragic death of the second Mrs. Longfellow.

In the long, sleepless watches of the night,
A gentle face—the face of one long dead—
Looks at me from the wall, where round its head
The night-lamp casts a halo of pale light.
Here in this room she died; and soul more white
Never through martyrdom of fire was led
To its repose; nor can in books be read
The legend of a life more benedight.
There is a mountain in the distant West,
That, sun-defying, in its deep ravines
Displays a cross of snow upon its side.
Such is the cross I wear upon my breast
These eighteen years, through all the changing scenes
And seasons, changeless since the day she died.

VICTOR AND VANQUISHED

Written April 4, 1876; published in *In the Harbor* (1882).

As one who long hath fled with panting breath
Before his foe, bleeding and near to fall,
I turn and set my back against the wall,
And look thee in the face, triumphant Death.
I call for aid, and no one answereth;
I am alone with thee, who conquerest all;
Yet me thy threatening form doth not appall,
For thou art but a phantom and a wraith.
Wounded and weak, sword broken at the hilt,
With armor shattered, and without a shield,
I stand unmoved; do with me what thou wilt;
I can resist no more, but will not yield.
This is no tournament where cowards tilt;
The vanquished here is victor of the field.

A DUTCH PICTURE

Published in *Kéramos and Other Poems* (1878). The incidents seem to be imaginary.

Simon Danz has come home again,
From cruising about with his buccaneers;
He has singed the beard of the King of Spain,
And carried away the Dean of Jaen *
And sold him in Algiers.

In his house by the Maese, with its roof of tiles
And weathercocks flying aloft in air,
There are silver tankards of antique styles,
Plunder of convent and castle, and piles
Of carpets rich and rare.

In his tulip garden there by the town
Overlooking the sluggish stream,
With his Moorish cap and dressing-gown
The old sea-captain, hale and brown,
Walks in a waking dream.

A smile in his gray mustachio lurks
Whenever he thinks of the King of Spain,
And the listed tulips look like Turks,
And the silent gardener as he works
Is changed to the Dean of Jaen.

The windmills on the outermost
Verge of the landscape in the haze,
To him are towers on the Spanish coast,
With whiskered sentinels at their post,
Though this is the river Maese.

But when the winter rains begin,
He sits and smokes by the blazing brands,
And old sea-faring men come in,
Goat-bearded, gray, and with double chin,
And rings upon their hands.

* **Jaen**—properly Jaén, a city and province in Andalusia. 6. **Maese**—the Dutch name for the Meuse River. 18. **listed**—enlisted(?); bent over(?).

They sit there in the shadow and shine
  Of the flickering fire of the winter night:
Figures in color and design
Like those by Rembrandt of the Rhine,
  Half darkness and half light.

And they talk of their ventures lost or won,
  And their talk is ever and ever the same,
While they drink the red wine of Tarragon,
From the cellars of some Spanish Don,
  Or convent set on flame.

Restless at times, with heavy strides
  He paces his parlor to and fro;
He is like a ship that at anchor rides,
And swings with the rising and falling tides,
  And tugs at her anchor-tow.

Voices mysterious far and near,
  Sound of the wind and sound of the sea,
Are calling and whispering in his ear,
"Simon Danz! Why stayest thou here?
  Come forth and follow me!"

So he thinks he shall take to the sea again
  For one more cruise with his buccaneers,
To singe the beard of the King of Spain,
And capture another Dean of Jaen
  And sell him in Algiers.

JUGURTHA

Written in 1879, published in the *Ultima Thule* volume (1880). The incident is told in Plutarch's life of Marius, Chapter XII, but in the original Jugurtha addresses Hercules. Jugurtha (died 104 B.C.) was a king of Numidia, defeated by the Romans.

How cold are thy baths, Apollo!
  Cried the African monarch, the splendid,
As down to his death in the hollow
  Dark dungeons of Rome he descended,
  Uncrowned, unthroned, unattended;
How cold are thy baths, Apollo!

How cold are thy baths, Apollo!
  Cried the Poet, unknown, unbefriended,
As the vision, that lured him to follow,
  With the mist and the darkness blended,
  And the dream of his life was ended;
How cold are thy baths, Apollo!

THE TIDE RISES, THE TIDE FALLS

Written September 11, 1879; published in the *Ultima Thule* volume (1880).

The tide rises, the tide falls,
The twilight darkens, the curlew calls;
Along the sea-sands damp and brown
The traveller hastens toward the town,
  And the tide rises, the tide falls.

Darkness settles on roofs and walls,
But the sea, the sea in the darkness calls;
The little waves, with their soft, white hands,
Efface the footprints in the sands,
  And the tide rises, the tide falls.

The morning breaks; the steeds in their stalls
Stamp and neigh, as the hostler calls;
The day returns, but nevermore
Returns the traveller to the shore,
  And the tide rises, the tide falls.

ULTIMA THULE

This was the dedicatory poem of the volume by that name, and was addressed to George Washington Greene, author of a *Life of Nathanael Greene,* dedicated to Longfellow, a lifelong friend.

With favoring winds, o'er sunlit seas,
We sailed for the Hesperides,
The land where golden apples grow;
But that, ah! that was long ago.

How far since then the ocean streams
Have swept us from the land of dreams,

34. Rembrandt of the Rhine—Rembrandt van Rijn (1606-1669), the great Dutch painter, whose later work especially is notable for its manipulation of light and shadow. **38. Tarragon**—Tarragona is a province in northeastern Spain.

That land of fiction and of truth,
The lost Atlantis of our youth!

Whither, ah, whither? are not these
The tempest-haunted Hebrides,
Where sea-gulls scream, and breakers roar,
And wreck and sea-weed line the shore?

Ultima Thule! Utmost Isle!
Here in thy harbors for awhile
We lower our sails, awhile we rest
From the unending endless quest.

THE BELLS OF SAN BLAS

The last poem by Longfellow, written March 12-15, 1882. The subject was suggested by an article in *Harper's Magazine* (March, 1882). Published in *In the Harbor* (1882).

What say the Bells of San Blas
To the ships that southward pass
  From the harbor of Mazatlan?
To them it is nothing more
Than the sound of surf on the shore,—
  Nothing more to master or man.

But to me, a dreamer of dreams,
To whom what is and what seems
  Are often one and the same,—
The Bells of San Blas to me
Have a strange, wild melody,
  And are something more than a name.

For bells are the voice of the church;
They have tones that touch and search
  The hearts of young and old;
One sound to all, yet each
Lends a meaning to their speech,
  And the meaning is manifold.

They are a voice of the Past
Of an age that is fading fast,
  Of a power austere and grand;
When the flag of Spain unfurled
Its folds o'er this western world,
  And the Priest was lord of the land.

The chapel that once looked down
On the little seaport town
  Has crumbled into the dust;
And on oaken beams below
The bells swing to and fro,
  And are green with mould and rust.

"Is, then, the old faith dead,"
They say, "and in its stead
  Is some new faith proclaimed,
That we are forced to remain
Naked to sun and rain,
  Unsheltered and ashamed?

"Once in our tower aloof
We rang over wall and roof
  Our warnings and our complaints;
And round about us there
The white doves filled the air,
  Like the white souls of the saints.

"The saints! Ah, have they grown
Forgetful of their own?
  Are they asleep, or dead,
That open to the sky
Their ruined Missions lie,
  No longer tenanted?

"Oh, bring us back once more
The vanished days of yore,
  When the world with faith was filled;
Bring back the fervid zeal,
The hearts of fire and steel,
  The hands that believe and build.

"Then from our tower again
We will send over land and main
  Our voices of command,
Like exiled kings who return
To their thrones, and the people learn
  That the Priest is lord of the land!"

8. **Atlantis**—a fabled land of happy people long since lost in the sea. 13. **Ultima Thule**—that part of the world regarded by the ancients as most remote. 1. **San Blas**—an inlet on the northern side of the Isthmus of Panama. The legend is that the bells of a sacked convent, being thrown into the sea, are still heard to ring. 3. **Mazatlan**—a town and harbor on the southern coast of the Mexican state of Sinaloa.

O Bells of San Blas, in vain
Ye call back the Past again!
The Past is deaf to your prayer;
Out of the shadows of night
The world rolls into light;
It is daybreak everywhere.

[A NATIONAL LITERATURE]

This selection is from Chapter xx of *Kavanagh,* a slight romance, really a succession of sketches, published in 1849. Mr. Churchill is the village schoolmaster of Fairmeadow.

MEANWHILE, things had gone on very quietly and monotonously in Mr. Churchill's family. Only one event, and that a mysterious one, had disturbed its serenity. It was the sudden disappearance of Lucy, the pretty orphan girl; and, as the booted centipede, who had so much excited Mr. Churchill's curiosity, disappeared at the same time, there was little doubt that they had gone away together. But whither gone, and wherefore, remained a mystery.

Mr. Churchill, also, had had his profile, and those of his wife and children, taken, in a very humble style, by Mr. Bantam, whose advertisement he had noticed on his way to school nearly a year before. His own was considered the best, as a work of art. The face was cut out entirely; the color of the coat velvet; the shirt-collar very high and white; and the top of his head ornamented with a crest of hair turning up in front, though his own turned down,—which slight deviation from nature was explained and justified by the painter as a license allowable in art.

One evening, as he was sitting down to begin, for at least the hundredth time, the great Romance,—subject of so many resolves and so much remorse, so often determined upon but never begun,—a loud knock at the street-door, which stood wide open, announced a visitor. Unluckily, the study-door was likewise open; and consequently, being in full view, he found it impossible to refuse himself; nor, in fact, would have done so, had all the doors been shut and bolted,—the art of refusing one's self being at that time but imperfectly understood in Fairmeadow. Accordingly, the visitor was shown in.

He announced himself as Mr. Hathaway. Passing through the village, he could not deny himself the pleasure of calling on Mr. Churchill, whom he knew by his writings in the periodicals, though not personally. He wished, moreover, to secure the co-operation of one, already so favorably known to the literary world, in a new Magazine he was about to establish, in order to raise the character of American literature, which, in his opinion, the existing reviews and magazines had entirely failed to accomplish. A daily increasing want of something better was felt by the public; and the time had come for the establishment of such a periodical as he proposed. After explaining, in rather a florid and exuberant manner, his plans and prospects, he entered more at large

4. booted centipede—In Chap. 1 Churchill meets "an ill-looking man, carrying so many old boots that he seemed literally buried in them." **8. profile**—silhouette. **28. Magazine**—Most magazines of the period had such prospectuses.

into the subject of American literature, which it was his design to foster and patronize.

"I think, Mr. Churchill," said he, "that we want a national literature commensurate with our mountains and rivers,—commensurate with Niagara, and the Alleghanies, and the Great Lakes!"

"Oh!"

"We want a national epic that shall correspond to the size of the country; that shall be to all other epics what Banvard's Panorama of the Mississippi is to all other paintings,—the largest in the world!"

"Ah!"

"We want a national drama in which scope enough shall be given to our gigantic ideas, and to the unparalleled activity and progress of our people!"

"Of course."

"In a word, we want a national literature altogether shaggy and unshorn, that shall shake the earth, like a herd of buffaloes thundering over the prairies!"

"Precisely," interrupted Mr. Churchill; "but excuse me!—are you not confounding things that have no analogy? Great has a very different meaning when applied to a river, and when applied to a literature. Large and shallow may perhaps be applied to both. Literature is rather an image of the spiritual world, than of the physical, is it not?—of the internal, rather than the external. Mountains, lakes, and rivers are, after all, only its scenery and decorations, not its substance and essence. A man will not necessarily be a great poet because he lives near a great mountain. Nor, being a poet, will he necessarily write better poems than another, because he lives nearer Niagara."

"But, Mr. Churchill, you do not certainly mean to deny the influence of scenery on the mind?"

"No, only to deny that it can create genius. At best, it can only develop it. Switzerland has produced no extraordinary poet; nor, as far as I know, have the Andes, or the Himalaya mountains, or the Mountains of the Moon in Africa."

"But, at all events," urged Mr. Hathaway, "let us have our literature national. If it is not national, it is nothing."

"On the contrary, it may be a great deal. Nationality is a good thing to a certain extent, but universality is better. All that is best in the great poets of all countries is not what is national in them, but what is universal. Their roots are in their native soil; but their branches wave in the unpatriotic air, that speaks the same language unto all men, and their leaves shine with the illimitable light that pervades all lands. Let us throw all the windows open; let us admit the light and air on all sides; that we may look toward the four corners of the heavens, and not always in the same direction."

"But you admit nationality to be a good thing?"

"Yes, if not carried too far; still, I confess, it rather limits one's views of truth. I prefer what is natural. Mere nationality is often ridiculous. Every one smiles

8. Banvard's Panorama—On Dec. 19, 1845, Longfellow went to see "Banvard's moving diorama of the Mississippi. One seems to be sailing down the great stream, and sees the boats and the sand-banks crested with cottonwood, and the bayous by moonlight. Three miles of canvas, and a great deal of merit." He used his impressions in Pt. II of *Evangeline*.

when he hears the Icelandic proverb, 'Iceland is the best land the sun shines upon.' Let us be natural, and we shall be national enough. Besides, our literature can be strictly national only so far as our character and modes of thought differ from those of other nations. Now, as we are very like the English,—are, in fact, English under a different sky,—I do not see how our literature can be very different from theirs. Westward from hand to hand we pass the lighted torch, but it was lighted at the old domestic fireside of England."

"Then you think our literature is never to be anything but an imitation of the English?"

"Not at all. It is not an imitation, but, as some one has said, a continuation."

"It seems to me that you take a very narrow view of the subject."

"On the contrary, a very broad one. No literature is complete until the language in which it is written is dead. We may well be proud of our task and of our position. Let us see if we can build in any way worthy of our forefathers."

"But I insist on originality."

"Yes; but without spasms and convulsions. Authors must not, like Chinese soldiers, expect to win victories by turning somersets in the air."

"Well, really, the prospect from your point of view is not very brilliant. Pray, what do you think of our national literature?"

"Simply, that a national literature is not the growth of a day. Centuries must contribute their dew and sunshine to it. Our own is growing slowly but surely, striking its roots downward and its branches upward, as is natural; and I do not wish, for the sake of what some people call originality, to invert it, and try to make it grow with its roots in the air. And as for having it so savage and wild as you want it, I have only to say, that all literature, as well as all art, is the result of culture and intellectual refinement."

"Ah! we do not want art and refinement; we want genius,—untutored, wild, original, free."

"But, if this genius is to find any expression, it must employ art, for art is the external expression of our thoughts. Many have genius, but, wanting art, are for ever dumb. The two must go together to form the great poet, painter, or sculptor."

"In that sense, very well."

"I was about to say also that I thought our literature would finally not be wanting in a kind of universality.

"As the blood of all nations is mingling with our own, so will their thoughts and feelings finally mingle in our literature. We shall draw from the Germans, tenderness; from the Spaniards, passion; from the French, vivacity, to mingle more and more with our English solid sense. And this will give us universality, so much to be desired."

JOHN GREENLEAF WHITTIER

1807-1892

I. NEWSPAPER POET AND "COUNTRY" EDITOR (1807–1833)

1807 December 17, born on farm near Haverhill, Massachusetts, eldest son and second child of John and Abigail Hussey Whittier. Attended country schools.

1821 Introduced to the poetry of Burns by Joshua Coffin, the schoolmaster.

1826 June 8, first poem, "The Exile's Departure," printed in the *Newburyport Free Press,* edited by William Lloyd Garrison. Beginning of lifelong friendship. Whittier learned shoemaking.

1827 May 1, entered Haverhill Academy. Poems by Whittier appeared in various newspapers. During the winter 1827-28, he taught school.

1828 November 8, first prose article (on Burns) printed in the *Haverhill Gazette.* In December, Whittier entered the printing and publishing offices of W. and W. R. Collier, in Boston, editing the *American Manufacturer,* a pro-Clay paper.

1829 August, returned to farm, and from January to June, 1830, edited the *Haverhill Gazette.*

1830 June to July, 1832, edited the *New England Review* at Hartford, Connecticut, returning to Haverhill early in 1832. Father died June 11.

1831 February, *Legends of New England* published (prose), Whittier's first book. *Moll Pitcher* published (revised, 1840). During these years Whittier's writing steadily increased in bulk, and he became known as a newspaper contributor.

II. THE ANTISLAVERY FIGHT (1833–1865)

1833 Published *Justice and Expediency* (Haverhill), first formal antislavery pronouncement. In November, elected delegate to the National Anti-Slavery Convention in Philadelphia.

1835 Elected to the Massachusetts Legislature. *Mogg Megone* published in the *New England Magazine* (March-April), appearing in book form in 1836. Whittier now commenced that career of agitation which exposed him and his friends to mob violence.

1836 Editor, the *Haverhill Gazette.* Sold the Haverhill farm in April, and removed to Amesbury in July.

1837 *Poems written during the Progress of the Abolition Question in the United States* (Boston) published. Whittier active as a lobbyist and politician. In October, first poem in the *Democratic Review,* to which Whittier contributed for ten years.

1838 Active in abolitionist propaganda in Philadelphia, with frequent trips to Massachusetts. Finally returned to Amesbury, which became his headquarters. *Poems* (Philadelphia) published.

1843 *Lays of My Home and Other Poems* (Boston) published.
1844 Virtual editor of the Amesbury *Village Transcript* (became the *Essex Transcript*). *Miscellaneous Poems* (Boston) published.
1845 Friendship with Charles Sumner began. Made contributing editor to the *National Era* (to 1860). *The Stranger in Lowell* (Boston) published.
1846 *Voices of Freedom* (Philadelphia) published.
1849 *Margaret Smith's Journal* published serially in the *National Era* (book form, same year). *Poems* (Boston) published.
1850 London edition of *Poetical Works. Songs of Labor and Other Poems* (Boston) and *Old Portraits and Modern Sketches* (Boston) published.
1853 *The Chapel of the Hermits and Other Poems* (Boston) published.
1854 *Literary Recreations and Miscellanies* (Boston) published.
1855 Read "The Panorama" at Tremont Temple, Boston (book form, 1856).
1857 "Blue and Gold" edition of *Poetical Works*. "The Gift of Tritemus" in the first number of the *Atlantic Monthly*.
1858 Mother died.
1860 January 7, sister Mary died. *Home Ballads, Poems and Lyrics* (Boston) published.
1863 "Barbara Frietchie" in the October *Atlantic Monthly*. *In War Time and Other Poems* (Boston) published.
1864 September 3, sister Elizabeth died.
1865 "Laus Deo" in the *Independent*, February 9. Whittier attended a meeting at Faneuil Hall with R. H. Dana, Jr., and others to outline plans for reconstruction.

III. THE GRAND OLD MAN (1865–1892)

1866 *Snow-Bound* published; first volume to bring Whittier money. *Prose Works* (2 vols.). Both published in Boston.
1867 *Maud Muller* published. During 1867-68 Whittier, whose health was never good, was severely ill. *National Lyrics* (Boston) and *The Tent on the Beach and Other Poems* (Boston) published.
1869 *Among the Hills and Other Poems* (Boston) and *Poetical Works* (Boston) published.
1870 *Ballads of New England* (Boston) published.
1871 *Miriam and Other Poems* (Boston) published; Whittier edited *Child Life*, a poetical anthology (Boston).
1872 *The Pennsylvania Pilgrim and Other Poems* (Boston) published; edited *The Journal of John Woolman* (Boston).
1874 Edited *Child Life in Prose* (Boston); published *Mabel Martin and Other Poems* (Boston). Household edition of *Works* published.
1875 *Hazel Blossoms* (Boston) published.
1876 Edited *Songs of Three Centuries* (Boston).
1877 Seventieth birthday celebrated widely; *Atlantic Monthly* dinner. *Favorite Poems* published.
1878 *The Vision of Echard and Other Poems* (Boston) published.
1880 W. M. Rossetti contributed critical biography to London edition of *Complete Poetical Works*.
1881 *The King's Missive and Other Poems* (Boston) published.
1883 *The Bay of Seven Islands and Other Poems* (Boston) published.
1886 *Saint Gregory's Guest and Recent Poems* (Boston) published.

1888 *Complete Poetical and Prose Works* (7 vols.) published—Riverside and Large Paper editions.

1892 *At Sundown* (poems) published in Boston (two editions). Whittier died September 7.

The Complete Poetical and Prose Works of John Greenleaf Whittier, Houghton Mifflin, 7 vols., were issued in 1888-89 as the Riverside and Large Paper editions. To be preferred are the Standard Library and Artists' editions, 7 vols., 1892. For poetry, the *Complete Poetical Works of John Greenleaf Whittier,* ed. by H. E. Scudder, Houghton Mifflin, 1894 (Cambridge edition), is usually sufficient. See Harry H. Clark, ed., *John Greenleaf Whittier, Representative Selections,* American Book Co., 1935.

The five volumes covering the years 1928-32 of the great *Annual Bibliography of English Language and Literature* published by the Modern Humanities Research Association contain but one reference to an article having to do with Whittier, and that one is a reprint of an uncollected poem. This remarkable neglect of a poet who once loomed so large in the literary heavens is perhaps unfair to his genuine worth, but it points to a decline and fall of fame greater than in the case of any other of the "standard" American poets. Why should this be?

For one thing, a large portion of Whittier's writing was occasional. The anti-slavery crusade, which roused his Quaker pen to a heat of un-Quaker-like anger, is a closed book; and few American readers are sufficiently interested to uncover the episodes which called forth "Massachusetts to Virginia" or "Ichabod." Many of his poems were, like "The Centennial Hymn," in the stricter sense, written for occasions. Rare, indeed, is the occasional poem which so surpasses the episode that brought it forth as to endure when the occasion passes, and Whittier was not the man to write such a poem. He was too facile, too good-natured; he never comprehended the fatal confusion between having to write a poem and having a poem to write.

In the next place, Whittier's poetry is simple, direct, and nonintellectual; and the whole movement in recent and contemporary poetry has been in the direction of intellectualized verse. But this movement has not prevented the recognition of the genre studies of poets like Robert Frost; and it is a defect in contemporary taste

which applauds the admirable vignettes of New England in the one poet and neglects the equally admirable vignettes of the other. Whittier is not intellectualistic, but he has at his best a capacity for sharp actuality in verse; and no poem in the English language does quite what "Snow-Bound" does in recapturing the charm of a lost chapter of life.

Moreover, a distinction must be made between sentimentality and simplicity. Whittier is, alas! too often sentimental, but he is also capable of a directness, a simplicity, which are among the rarer poetic accomplishments. Even one who does not share the religious point of view of Whittier may well admire the lucent candor of some of his religious poems. There is a hearty honesty, moreover, about his simple stories of New England life, his celebrations of the dignity of labor, his dogged and quiet faith in goodness, which are as much a part of the American tradition as poets more loudly celebrated. He was once too highly praised; he is now probably too greatly neglected; and the task of the student may well be to try to ascertain what his enduring claims upon our attention truly are.

THE MORAL WARFARE

This poem first appears among Whittier's collected verse in the *Poems* of 1838, and was republished in *Voices of Freedom* (1846). It then took its place in the various editions of the collected poems; and in 1888-89 appears among the "Anti-Slavery Poems," a place which it retains in 1892. The theme is the replacement of physical warfare by moral struggle; and the reader may, if he likes, interpret the "natal day" of Freedom as the American Declaration of Independence.

When Freedom, on her natal day,
Within her war-rocked cradle lay,
An iron race around her stood,
Baptized her infant brow in blood;
And, through the storm which round her swept,
Their constant ward and watching kept.

Then, where our quiet herds repose
The roar of baleful battle rose,
And brethren of a common tongue
To mortal strife as tigers sprung,
And every gift on Freedom's shrine
Was man for beast, and blood for wine!

Our fathers to their graves have gone;
Their strife is past, their triumph won;
But sterner trials wait the race
Which rises in their honored place;
A moral warfare with the crime
And folly of an evil time.

So let it be. In God's own might
We gird us for the coming fight,
And, strong in Him whose cause is ours
In conflict with unholy powers,
We grasp the weapons He has given,—
The Light, and Truth, and Love of Heaven.

MEMORIES

This poem first appeared in *Lays of My Home and Other Poems* (1843), and was republished in *Songs of Labor and Other Poems* (1850). In 1888-89 it forms part of "Poems Subjective and Reminiscent," a place it retains in 1892. The subject of the poem is unknown.

A beautiful and happy girl,
With step as light as summer air,
Eyes glad with smiles, and brow of pearl,
Shadowed by many a careless curl
Of unconfined and flowing hair;
A seeming child in everything,
Save thoughtful brow and ripening charms,
As Nature wears the smile of Spring
When sinking into Summer's arms.

A mind rejoicing in the light
Which melted through its graceful bower,
Leaf after leaf, dew-moist and bright,
And stainless in its holy white,
Unfolding like a morning flower:
A heart, which, like a fine-toned lute,
With every breath of feeling woke,
And, even when the tongue was mute,
From eye and lip in music spoke.

How thrills once more the lengthening chain
Of memory, at the thought of thee!
Old hopes which long in dust have lain,
Old dreams, come thronging back again,
And boyhood lives again in me;
I feel its glow upon my cheek,
Its fulness of the heart is mine,
As when I leaned to hear thee speak,
Or raised my doubtful eye to thine.

I hear again thy low replies,
I feel thy arm within my own,
And timidly again uprise
The fringèd lids of hazel eyes,
With soft brown tresses overblown.
Ah! memories of sweet summer eves,
Of moonlit wave and willowy way,
Of stars and flowers, and dewy leaves,
And smiles and tones more dear than they!

Ere this, thy quiet eye hath smiled
My picture of thy youth to see,
When, half a woman, half a child,
Thy very artlessness beguiled,
And folly's self seemed wise in thee;
I too can smile, when o'er that hour
The lights of memory backward stream,
Yet feel the while that manhood's power
Is vainer than my boyhood's dream.

Years have passed on, and left their trace,
Of graver care and deeper thought;
And unto me the calm, cold face
Of manhood, and to thee the grace
Of woman's pensive beauty brought.
More wide, perchance, for blame than praise,
The school-boy's humble name has flown;
Thine, in the green and quiet ways
Of unobtrusive goodness known.

And wider yet in thought and deed
Diverge our pathways, one in youth;
Thine the Genevan's sternest creed,
While answers to my spirit's need
The Derby dalesman's simple truth.
For thee, the priestly rite and prayer,
And holy day, and solemn psalm;
For me, the silent reverence where
My brethren gather, slow and calm.

Yet hath thy spirit left on me
An impress Time has worn not out,
And something of myself in thee,
A shadow from the past, I see,
Lingering, even yet, thy way about;
Not wholly can the heart unlearn
That lesson of its better hours,
Not yet has Time's dull footstep worn
To common dust that path of flowers.

Thus, while at times before our eyes
The shadows melt, and fall apart,
And, smiling through them, round us lies
The warm light of our morning skies,—
The Indian Summer of the heart!
In secret sympathies of mind,
In founts of feeling which retain
Their pure, fresh flow, we yet may find
Our early dreams not wholly vain!

MASSACHUSETTS TO VIRGINIA

First published in the *Liberator,* January 27, 1843, this poem then appeared in the *Lays of My Home* volume (1843), with the following introductory note:

"Written on reading an account of the proceedings of the citizens of Norfolk (Va.) in reference to GEORGE LATIMER, the alleged fugitive slave, the result of whose case in Massachusetts will probably be similar to that of the negro SOMERSET in England, in 1772."

The poem and the note then reappeared in *Voices of Freedom* (1846) and in the various editions of *Poetical Works.* In *National Lyrics* (1865) the poem appears without the note, as it does in *Favorite Poems* (1877). In the 1888-89 edition, it ap-

57. Genevan's—John Calvin (1509-1564). **59. Derby dalesman's**—Apparently George Fox (1624-1691) is meant, who, though born in Leicestershire, was first imprisoned for preaching his beliefs in Derbyshire in 1650.

pears among the "Anti-Slavery Poems," with the following revised version of the introductory note:

"Written on reading an account of the proceedings of the citizens of Norfolk, Va., in reference to George Latimer, the alleged fugitive slave, who was seized in Boston without warrant at the request of James B. Grey, of Norfolk, claiming to be his master. The case caused great excitement North and South, and led to the presentation of a petition to Congress, signed by more than fifty thousand citizens of Massachusetts, calling for such laws and proposed amendments to the Constitution as should relieve the Commonwealth from all further participation in the crime of oppression. George Latimer himself was finally given free papers for the sum of four hundred dollars."

The 1892 edition reprints the 1888-89 version. There were various typographical changes among the editions.

The blast from Freedom's Northern hills, upon its Southern way,
Bears greeting to Virginia from Massachusetts Bay:
No word of haughty challenging, nor battle bugle's peal,
Nor steady tread of marching files, nor clang of horsemen's steel,

No train of deep-mouthed cannon along our highways go;
Around our silent arsenals untrodden lies the snow;
And to the land-breeze of our ports, upon their errands far,
A thousand sails of commerce swell, but none are spread for war.

We hear thy threats, Virginia! thy stormy words and high
Swell harshly on the Southern winds which melt along our sky;
Yet not one brown, hard hand foregoes its honest labor here,
No hewer of our mountain oak suspends his axe in fear.

Wild are the waves which lash the reefs along St. George's bank;
Cold on the shores of Labrador the fog lies white and dank;
Through storm, and wave, and blinding mist, stout are the hearts which man
The fishing-smacks of Marblehead, the sea-boats of Cape Ann.

The cold north light and wintry sun glare on their icy forms,
Bent grimly o'er their straining lines or wrestling with the storms;
Free as the winds they drive before, rough as the waves they roam,
They laugh to scorn the slaver's threat against their rocky home.

What means the Old Dominion? Hath she forgot the day
When o'er her conquered valleys swept the Briton's steel array?

13. **St. George's bank**—one hundred miles east of Cape Cod, and frequented by fishermen. 16. **Marblehead**—town near Salem, noted for its fishing business. 16. **Cape Ann**—the easternmost projection of Massachusetts, save for Cape Cod, and a home of fishermen. 21. **Old Dominion**—After Gates's defeat at Camden, Virginia was overrun by a British army, variously commanded by Tarleton, Benedict Arnold, and Cornwallis. The Virginia Legislature and the governor (Jefferson) were compelled to flee. Greene's campaign in South Carolina gradually forced the British to the seacoast; Cornwallis took refuge in Yorktown; and the armies of Washington and Rochambeau ended the war by marching from the Hudson to Yorktown, which capitulated Oct. 19, 1781.

How, side by side with sons of hers, the Massachusetts men
Encountered Tarleton's charge of fire, and stout Cornwallis, then?

Forgets she how the Bay State, in answer to the call
Of her old House of Burgesses, spoke out from Faneuil Hall?
When, echoing back her Henry's cry, came pulsing on each breath
Of Northern winds the thrilling sounds of 'Liberty or Death!'

What asks the Old Dominion? If now her sons have proved
False to their fathers' memory, false to the faith they loved;
If she can scoff at Freedom, and its great charter spurn,
Must we of Massachusetts from truth and duty turn?

We hunt your bondmen, flying from Slavery's hateful hell;
Our voices, at your bidding, take up the bloodhound's yell;
We gather, at your summons, above our fathers' graves,
From Freedom's holy altar-horns to tear your wretched slaves!

Thank God! not yet so vilely can Massachusetts bow;
The spirit of her early time is with her even now;
Dream not because her Pilgrim blood moves slow and calm and cool,
She thus can stoop her chainless neck, a sister's slave and tool!

All that a sister State should do, all that a free State may,
Heart, hand, and purse we proffer, as in our early day;
But that one dark loathsome burden ye must stagger with alone,
And reap the bitter harvest which ye yourselves have sown!

Hold, while ye may, your struggling slaves, and burden God's free air
With woman's shriek beneath the lash, and manhood's wild despair;
Cling closer to the 'cleaving curse' that writes upon your plains
The blasting of Almighty wrath against a land of chains.

Still shame your gallant ancestry, the cavaliers of old,
By watching round the shambles where human flesh is sold;
Gloat o'er the new-born child, and count his market value, when
The maddened mother's cry of woe shall pierce the slaver's den!

Lower than plummet soundeth, sink the Virginia name;
Plant, if ye will, your fathers' graves with rankest weeds of shame;
Be, if ye will, the scandal of God's fair universe;
We wash our hands forever of your sin and shame and curse.

25. **Bay State**—Resolutions adopted by the Virginia burgesses (legislators) in 1769 and again in 1774 were promptly echoed in Massachusetts. 26. **Faneuil Hall**—in Boston is especially associated with patriotic meetings of the eighteenth century. 27. **Henry**—Patrick Henry's famous speech was delivered in a Richmond church in March, 1775. Whittier quotes the last phrase and also echoes the sentence: "The next gale which sweeps from the north will bring to our ears the clash of resounding arms." 31. **great charter**—the Declaration of Independence, mainly written by the Virginian, Jefferson, which declares that all men are created equal. 36. **altar-horns**—*Cf.* I Kings 1:50. 47. **cleaving curse**—*Cf.* Gen. 4:11-12. Theological supporters of slavery sometimes argued that the Negro race inherited the curse of Cain; and sometimes, that set on Hagar and Ishmael (Gen. 21:12 ff.). 53. **plummet**—*Cf. Tempest,* Act III, Scene 3, line 101.

A voice from lips whereon the coal from Freedom's shrine hath been,
Thrilled, as but yesterday, the hearts of Berkshire's mountain men:
The echoes of that solemn voice are sadly lingering still
In all our sunny valleys, on every wind-swept hill.

And when the prowling man-thief came hunting for his prey
Beneath the very shadow of Bunker's shaft of gray,
How, through the free lips of the son, the father's warning spoke;
How, from its bonds of trade and sect, the Pilgrim city broke!

A hundred thousand right arms were lifted up on high,
A hundred thousand voices sent back their loud reply;
Through the thronged towns of Essex the startling summons rang,
And up from bench and loom and wheel her young mechanics sprang!

The voice of free, broad Middlesex, of thousands as of one,
The shaft of Bunker calling to that of Lexington;
From Norfolk's ancient villages, from Plymouth's rocky bound
To where Nantucket feels the arms of ocean close her round;

From rich and rural Worcester, where through the calm repose
Of cultured vales and fringing woods the gentle Nashua flows,
To where Wachuset's wintry blasts the mountain larches stir,
Swelled up to Heaven the thrilling cry of 'God save Latimer!'

And sandy Barnstable rose up, wet with the salt sea spray;
And Bristol sent her answering shout down Narragansett Bay!
Along the broad Connecticut old Hampden felt the thrill,
And the cheer of Hampshire's woodmen swept down from Holyoke Hill.

The voice of Massachusetts! Of her free sons and daughters,
Deep calling unto deep aloud, the sound of many waters!
Against the burden of that voice what tyrant power shall stand?
No fetters in the Bay State! No slave upon her land!

Look to it well, Virginians! In calmness we have borne,
In answer to our faith and trust, your insult and your scorn;
You've spurned our kindest counsels; you've hunted for our lives;
And shaken round our hearths and homes your manacles and gyves!

We wave no war, we lift no arm, we fling no torch within
The fire-damps of the quaking mine beneath your soil of sin;
We leave ye with your bondmen, to wrestle, while ye can,
With the strong upward tendencies and godlike soul of man!

58. Berkshire's—The westernmost county in Massachusetts contains the Berkshire Mountains. **61-64. prowling . . . broke**—This stanza is sufficiently explained by the introductory note. **67. Essex**—Whittier now passes in review the counties of Massachusetts. A glance at the map will show the appropriateness of his poetical descriptions. **74. Nashua**—the Nashua River. **75. Wachuset's**—a mountain near Fitchburg, Massachusetts. **79. Hampden**—Hampden County is split in two by the Connecticut River. **80. Holyoke Hill**—The Holyoke range lies on either side of the Connecticut River in Hampshire County. **81. voice of Massachusetts**—As the poem was first read to the Essex County convention held at Ipswich Jan. 2, 1843, the appropriateness of the phraseology to Whittier's purpose is evident.

But for us and for our children, the vow which we have given
For freedom and humanity is registered in heaven;
No slave-hunt in our borders, no pirate on our strand!
No fetters in the Bay State—no slave upon our land!

PROEM

Dated "Amesbury, 11 mo., 1847," this poem first appears as the preface to the *Poems* of 1849, and thereafter as the preface to each collected edition.

I love the old melodious lays
Which softly melt the ages through,
The songs of Spenser's golden days,
Arcadian Sidney's silvery phrase,
Sprinkling our noon of time with freshest morning dew.

Yet, vainly in my quiet hours
To breathe their marvellous notes I try;
I feel them, as the leaves and flowers
In silence feel the dewy showers,
And drink with glad, still lips the blessing of the sky.

The rigor of a frozen clime,
The harshness of an untaught ear,
The jarring words of one whose rhyme
Beat often Labor's hurried time,
Or Duty's rugged march through storm and strife, are here.

Of mystic beauty, dreamy grace,
No rounded art the lack supplies;
Unskilled the subtle lines to trace,
Or softer shades of Nature's face,
I view her common forms with unanointed eyes.

Nor mine the seer-like power to show
The secrets of the heart and mind;
To drop the plummet-line below
Our common world of joy and woe,
A more intense despair or brighter hope to find.

Yet here at least an earnest sense
Of human right and weal is shown;
A hate of tyranny intense,
And hearty in its vehemence,
As if my brother's pain and sorrow were my own.

O Freedom! if to me belong
Nor mighty Milton's gift divine,
Nor Marvell's wit and graceful song,
Still with a love as deep and strong
As theirs, I lay, like them, my best gifts on thy shrine!

ICHABOD

First published in the *National Era,* May 2, 1850, this poem was collected into the second part of the *Songs of Labor* volume of that year. It remained consistently in the various collected editions, and also appeared in *National Lyrics* (1865) and *Favorite Poems* (1877). In 1888-89 and 1892 it was put under "Personal Poems," and prefaced by the following note:

"This poem was the outcome of the surprise and grief and forecast of evil consequences which I felt on reading the seventh of March speech of Daniel Webster in support of the 'compromise' and the Fugitive Slave Bill. No partisan or personal enmity dictated it. On the contrary my admiration of the splendid personality and intellectual power of the great Senator was never stronger than when I laid down his speech, and, in one of the saddest moments of my life, penned my protest. I saw, as I wrote, with painful clearness its sure results,—the Slave Power arrogant and defiant, strengthened and encouraged to carry out its scheme

3. **Spenser's**—Edmund Spenser (about 1552-1599). 4. **Sidney's**—Sir Philip Sidney (1554-1586), author of *Arcadia,* a pastoral romance. 32. **Milton's**—John Milton (1608-1674). 33. **Marvell's**—Andrew Marvell (1621-1678).

for the extension of its baleful system, or the dissolution of the Union, the guaranties of personal liberty in the free States broken down, and the whole country made the hunting-ground of slave-catchers. In the horror of such a vision, so soon fearfully fulfilled, if one spoke at all, he could only speak in tones of stern and sorrowful rebuke.

"But death softens all resentments, and the consciousness of a common inheritance of frailty and weakness modifies the severity of judgment. Years after, in *The Lost Occasion* I gave utterance to an almost universal regret that the great statesman did not live to see the flag which he loved trampled under the feet of Slavery, and, in view of this desecration, make his last days glorious in defence of 'Liberty and Union, one and inseparable.' "

The significance of the title may be learned by consulting I Sam. 4: 21. Whittier's view of the significance of the Seventh of March Speech is no longer held by any competent historian.

So fallen! so lost! the light withdrawn
Which once he wore!
The glory from his gray hairs gone
Forevermore!

Revile him not, the Tempter hath
A snare for all;
And pitying tears, not scorn and wrath,
Befit his fall!

Oh, dumb be passion's stormy rage,
When he who might
Have lighted up and led his age,
Falls back in night.

Scorn! would the angels laugh, to mark
A bright soul driven,
Fiend-goaded, down the endless dark,
From hope and heaven!

Let not the land once proud of him
Insult him now,
Nor brand with deeper shame his dim,
Dishonored brow.

But let its humbled sons, instead,
From sea to lake,
A long lament, as for the dead,
In sadness make.

Of all we loved and honored, naught
Save power remains;
A fallen angel's pride of thought,
Still strong in chains.

All else is gone; from those great eyes
The soul has fled:
When faith is lost, when honor dies,
The man is dead!

Then pay the reverence of old days
To his dead fame;
Walk backward, with averted gaze,
And hide the shame!

SONGS OF LABOR, DEDICATION

First printed in *Songs of Labor and Other Poems* (1850). In 1888-89 and 1892 preceded by the note:

"Prefixed to the volume of which the group of six poems following this prelude constituted the first portion."

I would the gift I offer here
Might graces from thy favor take,
And, seen through Friendship's atmosphere,
On softened lines and coloring, wear
The unaccustomed light of beauty, for thy sake.

Few leaves of Fancy's spring remain:
But what I have I give to thee,
The o'er-sunned bloom of summer's plain,
And paler flowers, the latter rain
Calls from the westering slope of life's autumnal lea.

Above the fallen groves of green,
Where youth's enchanted forest stood,
Dry root and mossèd trunk between,
A sober after-growth is seen,
As springs the pine where falls the gay-leafed maple wood!

Yet birds will sing, and breezes play
Their leaf-harps in the sombre tree;
And through the bleak and wintry day
It keeps its steady green alway,—
So, even my after-thoughts may have a charm
for thee.

Art's perfect forms no moral need,
And beauty is its own excuse;
But for the dull and flowerless weed
Some healing virtue still must plead,
And the rough ore must find its honors in
its use.

So haply these, my simple lays
Of homely toil, may serve to show
The orchard bloom and tasselled maize
That skirt and gladden duty's ways,
The unsung beauty hid life's common things
below.

Haply from them the toiler, bent
Above his forge or plough, may gain
A manlier spirit of content,
And feel that life is wisest spent
Where the strong working hand makes
strong the working brain.

The doom which to the guilty pair
Without the walls of Eden came,
Transforming sinless ease to care
And rugged toil, no more shall bear
The burden of old crime, or mark of primal
shame.

A blessing now, a curse no more;
Since He, whose name we breathe with
awe,
The coarse mechanic vesture wore,
A poor man toiling with the poor,
In labor, as in prayer, fulfilling the same law.

THE SHOEMAKERS

This poem first appears among Whittier's volumes in *Songs of Labor and Other Poems* (1850). Until 1888 it retained its place in the "Songs of Labor" section of the various collected editions. In 1888-89 and 1892 it took its place in "Songs of Labor and Reform." Whittier wrote a series of poems celebrating various trades—characteristically, he selected those common in Massachusetts—and though "The Shoemakers" is not the best of these, its appropriateness to this selection is evident since Whittier was himself a shoemaker.

Ho! workers of the old time styled
The Gentle Craft of Leather!
Young brothers of the ancient guild,
Stand forth once more together!
Call out again your long array,
In the olden merry manner!
Once more, on gay St. Crispin's day,
Fling out your blazoned banner!

Rap, rap! upon the well-worn stone
How falls the polished hammer!
Rap, rap! the measured sound has grown
A quick and merry clamor.
Now shape the sole! now deftly curl
The glossy vamp around it,
And bless the while the bright-eyed girl
Whose gentle fingers bound it!

For you, along the Spanish main
A hundred keels are ploughing;
For you, the Indian on the plain
His lasso-coil is throwing;
For you, deep glens with hemlock dark
The woodman's fire is lighting;
For you, upon the oak's gray bark,
The woodman's axe is smiting.

21-22. Art's . . . beauty—*Cf.* Emerson, "The Rhodora," line 12. **36. doom**—*Cf.* Gen. 3. **2. Gentle Craft**—The reference is (1) to the medieval guild of shoemakers; and (2) to *The Gentle Çraft. A Discourse . . . Shewing what famous men have been shoomakers . . .* (1597) by Thomas Deloney (1543-1600). **7. St. Crispin's day**—Two brothers, Crispin and Crispinian, shoemakers both, were Christian martyrs, being put to death in the third century. Their day is Oct. 25. **15. girl**—Note the reference to the employment of women in factory work in Massachusetts. **17. Spanish main**—the American mainland adjacent to the Caribbean from Panama to the mouth of the Orinoco; also the adjoining sea. **19-20. Indian . . . throwing**—Indian cowboys on the Argentine pampas, whence a large part of the supply of cowhides comes. **21. hemlock**—Whittier has in mind the sources of the bark used in tanning leather.

For you, from Carolina's pine
The rosin-gum is stealing;
For you, the dark-eyed Florentine
Her silken skein is reeling;
For you, the dizzy goatherd roams
His rugged Alpine ledges;
For you, round all her shepherd homes
Bloom England's thorny hedges.

The foremost still, by day or night,
On moated mound of heather,
Where'er the need of trampled right
Brought toiling men together;
Where the free burghers from the wall
Defied the mail-clad master,
Than yours at Freedom's trumpet-call,
No craftsmen rallied faster.

Let foplings sneer, let fools deride,
Ye heed no idle scorner;
Free hands and hearts are still your pride,
And duty done your honor.
Ye dare to trust, for honest fame,
The jury Time empanels,
And leave to truth each noble name
Which glorifies your annals.

Thy songs, Hans Sachs, are living yet,
In strong and hearty German;
And Bloomfield's lay, and Gifford's wit,
And patriot fame of Sherman;
Still from his book, a mystic seer,
The soul of Behmen teaches,
And England's priesthood shakes to hear
Of Fox's leathern breeches.

The foot is yours; where'er it falls,
It treads your well-wrought leather,
On earthen floor, in marble halls,
On carpet, or on heather.

Still there the sweetest charm is found
Of matron grace or vestal's,
As Hebe's foot bore nectar round
Among the old celestials!

Rap, rap!—your stout and bluff brogan,
With footsteps slow and weary,
May wander where the sky's blue span
Shuts down upon the prairie.
On Beauty's foot your slippers glance,
By Saratoga's fountains,
Or twinkle down the summer dance
Beneath the Crystal Mountains!

The red brick to the mason's hand,
The brown earth to the tiller's,
The shoe in yours shall wealth command,
Like fairy Cinderella's!
As they who shunned the household maid
Beheld the crown upon her,
So all shall see your toil repaid
With hearth and home and honor.

Then let the toast be freely quaffed,
In water cool and brimming,—
"All honor to the good old Craft,
Its merry men and women!"
Call out again your long array,
In the old time's pleasant manner:
Once more, on gay St. Crispin's day,
Fling out his blazoned banner!

FIRST-DAY THOUGHTS

First collected in *The Chapel of the Hermits and Other Poems* (1853); in 1888-89 and 1892 printed among "Religious Poems." The Quaker custom of avoiding the

27. **Florentine**—The silk-making industry of northern Italy. *Cf.* Browning's *Pippa Passes.* 31. **round**—The rime has forced a certain obscurity. Whittier has in mind that England produces sheep and wool (as part of his picture of the geographical romance of shoemaking), but he has put his case backward. 49. **Sachs**—Hans Sachs (1494-1576), the greatest German poet of his time, was a cobbler of Nuremberg. 51. **Bloomfield's**—Robert Bloomfield (1766-1823), one of the "uneducated poets," was once apprenticed to shoemaking. 51. **Gifford's**—William Gifford (1756-1826), editor of the *Quarterly Review*, was once a cobbler. 52. **Sherman**—Roger Sherman (1721-1793), signer of the Declaration of Independence, and once a shoemaker. 54. **Behmen**—Jakob Boehme (1575-1624), German mystic; once a shoemaker. 56. **Fox's**—See note 7, p. 445. The leathern breeches of Fox are famous in Quaker annals. 63. **Hebe's**—cupbearer of the gods on Olympus. 70. **Saratoga's**—Saratoga Springs, New York, long a famous summer resort. What Whittier means by the **Crystal Mountains** seems to be the White Mountains of New Hampshire.

"heathen" names of days of the week gives meaning to the title.

In calm and cool and silence, once again
I find my old accustomed place among
My brethren, where, perchance, no human tongue
Shall utter words; where never hymn is sung,
Nor deep-toned organ blown, nor censer swung,
Nor dim light falling through the pictured pane!
There, syllabled by silence, let me hear
The still small voice which reached the prophet's ear;
Read in my heart a still diviner law
Than Israel's leader on his tables saw!
There let me strive with each besetting sin,
Recall my wandering fancies, and restrain
The sore disquiet of a restless brain;
And, as the path of duty is made plain,
May grace be given that I may walk therein,
Not like the hireling, for his selfish gain,
With backward glances and reluctant tread,
Making a merit of his coward dread,
But, cheerful, in the light around me thrown,
Walking as one to pleasant service led;
Doing God's will as if it were my own,
Yet trusting not in mine, but in his strength alone!

BURNS

ON RECEIVING A SPRIG OF HEATHER IN BLOSSOM

First collected in *The Panorama and Other Poems* (1856); in 1888-89 and 1892 printed among "Personal Poems." The passage which describes Whittier reading Burns during harvest time is autobiographical. The references to poems by Burns are largely self-explanatory.

No more these simple flowers belong
To Scottish maid and lover;
Sown in the common soil of song,
They bloom the wide world over.

In smiles and tears, in sun and showers,
The minstrel and the heather,
The deathless singer and the flowers
He sang of live together.

Wild heather-bells and Robert Burns!
The moorland flower and peasant!
How, at their mention, memory turns
Her pages old and pleasant!

The gray sky wears again its gold
And purple of adorning,
And manhood's noonday shadows hold
The dews of boyhood's morning.

The dews that washed the dust and soil
From off the wings of pleasure,
The sky, that flecked the ground of toil
With golden threads of leisure.

I call to mind the summer day,
The early harvest mowing,
The sky with sun and clouds at play,
And flowers with breezes blowing.

I hear the blackbird in the corn,
The locust in the haying;
And, like the fabled hunter's horn,
Old tunes my heart is playing.

How oft that day, with fond delay,
I sought the maple's shadow,
And sang with Burns the hours away,
Forgetful of the meadow!

Bees hummed, birds twittered, overhead
I heard the squirrels leaping,
The good dog listened while I read,
And wagged his tail in keeping.

I watched him while in sportive mood
I read "The Twa Dogs' " story,
And half believed he understood
The poet's allegory.

10. **Israel's leader**—Moses.

Sweet day, sweet songs! The golden hours
  Grew brighter for that singing,
From brook and bird and meadow flowers
  A dearer welcome bringing.

New light on home-seen Nature beamed,
  New glory over Woman;
And daily life and duty seemed
  No longer poor and common.

I woke to find the simple truth
  Of fact and feeling better
Than all the dreams that held my youth
  A still repining debtor:

That Nature gives her handmaid, Art,
  The themes of sweet discoursing;
The tender idyls of the heart
  In every tongue rehearsing.

Why dream of lands of gold and pearl,
  Of loving knight and lady,
When farmer boy and barefoot girl
  Were wandering there already?

I saw through all familiar things
  The romance underlying;
The joys and griefs that plume the wings
  Of Fancy skyward flying.

I saw the same blithe day return,
  The same sweet fall of even,
That rose on wooded Craigie-burn,
  And sank on crystal Devon.

I matched with Scotland's heathery hills
  The sweetbrier and the clover;
With Ayr and Doon, my native rills,
  Their wood hymns chanting over.

O'er rank and pomp, as he had seen,
  I saw the Man uprising;
No longer common or unclean,
  The child of God's baptizing!

With clearer eyes I saw the worth
  Of life among the lowly;
The Bible at his Cotter's hearth
  Had made my own more holy.

And if at times an evil strain,
  To lawless love appealing,
Broke in upon the sweet refrain
  Of pure and healthful feeling,

It died upon the eye and ear,
  No inward answer gaining;
No heart had I to see or hear
  The discord and the staining.

Let those who never erred forget
  His worth, in vain bewailings;
Sweet Soul of Song! I own my debt
  Uncancelled by his failings!

Lament who will the ribald line
  Which tells his lapse from duty,
How kissed the maddening lips of wine
  Or wanton ones of beauty;

But think, while falls that shade between
  The erring one and Heaven,
That he who loved like Magdalen,
  Like her may be forgiven.

Not his the song whose thunderous chime
  Eternal echoes render;
The mournful Tuscan's haunted rhyme,
  And Milton's starry splendor!

But who his human heart has laid
  To Nature's bosom nearer?
Who sweetened toil like him, or paid
  To love a tribute dearer?

Through all his tuneful art, how strong
  The human feeling gushes!
The very moonlight of his song
  Is warm with smiles and blushes!

Give lettered pomp to teeth of Time,
  So "Bonnie Doon" but tarry;
Blot out the Epic's stately rhyme,
  But spare his "Highland Mary"!

67-68. Craigie-burn . . . Devon—*Cf.* Burns's poem, "Craigieburn Wood" and his "The Banks of the Devon." **99. Magdalen**—*Cf.* Luke 7: 37-47. **103. Tuscan's**—Dante.

THE LAST WALK IN AUTUMN

After publication in 1878, this first appeared in the *Poetical Works,* Vol. II (1857), among "Later Poems." In 1888-89 and 1892 it appears among "Poems of Nature."

I

O'er the bare woods, whose outstretched hands
Plead with the leaden heavens in vain,
I see, beyond the valley lands,
The sea's long level dim with rain.
Around me all things, stark and dumb,
Seem praying for the snows to come,
And, for the summer bloom and greenness gone,
With winter's sunset lights and dazzling morn atone.

II

Along the river's summer walk,
The withered tufts of asters nod;
And trembles on its arid stalk
The hoar plume of the golden-rod.
And on a ground of sombre fir,
And azure-studded juniper,
The silver birch its buds of purple shows,
And scarlet berries tell where bloomed the sweet wild-rose!

III

With mingled sound of horns and bells,
A far-heard clang, the wild geese fly,
Storm-sent, from Arctic moors and fells,
Like a great arrow through the sky,
Two dusky lines converged in one,
Chasing the southward-flying sun;
While the brave snow-bird and the hardy jay
Call to them from the pines, as if to bid them stay.

IV

I passed this way a year ago:
The wind blew south; the noon of day
Was warm as June's; and save that snow
Flecked the low mountains far away,
And that the vernal-seeming breeze
Mocked faded grass and leafless trees,
I might have dreamed of summer as I lay,
Watching the fallen leaves with the soft wind at play.

V

Since then, the winter blasts have piled
The white pagodas of the snow
On these rough slopes, and, strong and wild,
Yon river, in its overflow
Of spring-time rain and sun, set free,
Crashed with its ices to the sea;
And over these gray fields, then green and gold,
The summer corn has waved, the thunder's organ rolled.

VI

Rich gift of God! A year of time!
What pomp of rise and shut of day,
What hues wherewith our Northern clime
Makes autumn's dropping woodlands gay,
What airs outblown from ferny dells,
And clover-bloom and sweetbrier smells,
What songs of brooks and birds, what fruits and flowers,
Green woods and moonlit snows, have in its round been ours!

VII

I know not how, in other lands,
The changing seasons come and go;
What splendors fall on Syrian sands,
What purple lights on Alpine snow!
Nor how the pomp of sunrise waits
On Venice at her watery gates;
A dream alone to me is Arno's vale,
And the Alhambra's halls are but a traveller's tale.

VIII

Yet, on life's current, he who drifts
Is one with him who rows or sails;
And he who wanders widest lifts
No more of beauty's jealous veils
Than he who from his doorway sees
The miracle of flowers and trees,

51. **Syrian**—The point is that Whittier has never seen Palestine, the Alps, Italy, or Spain.

Feels the warm Orient in the noonday air,
And from cloud minarets hears the sunset call
to prayer!

IX

The eye may well be glad that looks
Where Pharpar's fountains rise and fall;
But he who sees his native brooks
Laugh in the sun, has seen them all.
The marble palaces of Ind
Rise round him in the snow and wind;
From his lone sweetbrier Persian Hafiz
smiles,
And Rome's cathedral awe is in his woodland
aisles.

X

And thus it is my fancy blends
The near at hand and far and rare;
And while the same horizon bends
Above the silver-sprinkled hair
Which flashed the light of morning skies
On childhood's wonder-lifted eyes,
Within its round of sea and sky and field,
Earth wheels with all her zones, the Kosmos
stands revealed.

XI

And thus the sick man on his bed,
The toiler to his task-work bound,
Behold their prison-walls outspread,
Their clipped horizon widen round!
While [illegible] fancy waits,
Like Peter's angel at the gates,
The power is theirs to baffle care and pain,
To bring the lost world back, and make it
theirs again!

XII

What lack of goodly company,
When masters of the ancient lyre
Obey my call, and trace for me
Their words of mingled tears and fire!
I talk with Bacon, grave and wise,
I read the world with Pascal's eyes;
And priest and sage, with solemn brows
austere,
And poets, garland-bound, the Lords of
Thought, draw near.

XIII

Methinks, O friend, I hear thee say,
"In vain the human heart we mock;
Bring living guests who love the day,
Not ghosts who fly at crow of cock!
The herbs we share with flesh and blood
Are better than ambrosial food
With laurelled shades." I grant it, nothing
loath,
But doubly blest is he who can partake of
both.

XIV

He who might Plato's banquet grace,
Have I not seen before me sit,
And watched his puritanic face,
With more than Eastern wisdom lit?
Shrewd mystic! who, upon the back
Of his Poor Richard's Almanac
Writing the Sufi's song, the Gentoo's dream,
Links Manu's age of thought to Fulton's age
of steam!

XV

Here too, of answering love secure,
Have I not welcomed to my hearth
The gentle pilgrim troubadour,
Whose songs have girdled half the earth;
Whose pages, like the magic mat
Whereon the Eastern lover sat,
Have borne me over Rhine-land's purple
vines,

66. **Pharpar's**—*Cf.* II Kings 5: 12. 71. **Hafiz**—Persian lyric poet of the fourteenth century. 72. **Rome's cathedral**—the cathedral of St. Peter in Rome. 80. **Kosmos**—system of the universe. 86. **Peter's angel**—*Cf.* Acts 5: 19. 93. **Bacon**—Francis Bacon (1561-1626); the reference is especially to his *Essays*. 94. **Pascal's**—Blaise Pascal (1623-1662), whose *Pensées* are one of the religious classics of the world. 105. **Plato's banquet**—The reference is to a Platonic dialogue called *The Symposium*. Emerson is, of course, meant; and Whittier has in mind Emerson's love for Oriental books of wisdom. 110. **Poor Richard's Almanac**—that is, standing as a representative for American "horse sense." 111. **Sufi's**—a mystic sect among the Mohammedans of Persia. 111. **Gentoo's**—Hindu, an oblique reference to Brahminism. 112. **Manu's**—the supposed lawgiver of the Hindus. 112. **Fulton's**—Robert Fulton (1765-1815), American inventor of the steamboat. 115. **pilgrim troubadour**—Bayard Taylor (1825-1878), to whose travel books and poems the following lines have reference.

And Nubia's tawny sands, and Phrygia's
mountain pines!

XVI

And he, who to the lettered wealth
Of ages adds the lore unpriced,
The wisdom and the moral health,
The ethics of the school of Christ;
The statesman to his holy trust,
As the Athenian archon, just,
Struck down, exiled like him for truth alone,
Has he not graced my home with beauty all
his own?

XVII

What greetings smile, what farewells wave,
What loved ones enter and depart!
The good, the beautiful, the brave,
The Heaven-lent treasures of the heart!
How conscious seems the frozen sod
And beechen slope whereon they trod!
The oak-leaves rustle, and the dry grass
bends
Beneath the shadowy feet of lost or absent
friends.

XVIII

Then ask not why to these bleak hills
I cling, as clings the tufted moss,
To bear the winter's lingering chills,
The mocking spring's perpetual loss.
I dream of lands where summer smiles,
The soft winds blow from spicy isles,
But scarce would Ceylon's breath of flowers
be sweet,
Could I not feel thy soil, New England, at
my feet!

XIX

At times I long for gentler skies,
And bathe in dreams of softer air,
But homesick tears would fill the eyes
That saw the Cross without the Bear.
The pine must whisper to the palm,
The north-wind break the tropic calm;
And with the dreamy languor of the Line,
The North's keen virtue blend, and strength
to beauty join.

XX

Better to stem with heart and hand
The roaring tide of life, than lie,
Unmindful, on its flowery strand,
Of God's occasions drifting by!
Better with naked nerve to bear
The needles of this goading air,
Than, in the lap of sensual ease, forego
The godlike power to do, the godlike aim to
know.

XXI

Home of my heart! to me more fair
Than gay Versailles or Windsor's halls,
The painted, shingly town-house where
The freeman's vote for Freedom falls!
The simple roof where prayer is made,
Than Gothic groin and colonnade;
The living temple of the heart of man,
Than Rome's sky-mocking vault, or many-
spired Milan!

XXII

More dear thy equal village schools,
Where rich and poor the Bible read,
Than classic halls where Priestcraft rules,
And Learning wears the chains of Creed;
Thy glad Thanksgiving, gathering in
The scattered sheaves of home and kin,
Than the mad license ushering Lenten
pains,
Or holidays of slaves who laugh and dance in
chains.

XXIII

And sweet homes nestle in these dales,
And perch along these wooded swells;

121. **And he**—Charles Sumner (1811-1874), senator from Massachusetts, who, after a vigorous attack on slavery, in 1856, was caned by Congressman Preston Brooks. 126. **Athenian archon**—Aristides, exiled from Athens according to legend because people grew tired of hearing him called "the Just." 148. **Cross . . . Bear**—that is, eyes that saw the Southern Cross (the principal constellation in the southern heavens). The Great Bear (the Dipper) is not visible in the Southern Hemisphere. 151. **Line**—the equator. 162. **Versailles . . . Windsor's**—types of royal palaces. 166. **Gothic . . . colonnade**—Gothic cathedrals as housing Roman Catholic worship. 168. **Rome's . . . vault**—*Cf.* note 72, p. 660. 168. **Milan**—The cathedral at Milan is famous. 175. **license**—In many Italian cities, such as Rome, a carnival season precedes Lent, and is marked by masking and merrymaking. When Whittier wrote, Italian independence had not been attained; hence the "holidays of slaves" reference in line 176.

And, blest beyond Arcadian vales,
They hear the sound of Sabbath bells!
Here dwells no perfect man sublime,
Nor woman winged before her time,
But with the faults and follies of the race,
Old home-bred virtues hold their not unhonored place.

XXIV

Here manhood struggles for the sake
Of mother, sister, daughter, wife,
The graces and the loves which make
The music of the march of life;
And woman, in her daily round
Of duty, walks on holy ground.
No unpaid menial tills the soil, nor here
Is the bad lesson learned at human rights to sneer.

XXV

Then let the icy north-wind blow
The trumpets of the coming storm,
To arrowy sleet and blinding snow
Yon slanting lines of rain transform.
Young hearts shall hail the drifted cold,
As gayly as I did of old;
And I, who watch them through the frosty pane,
Unenvious, live in them my boyhood o'er again.

XXVI

And I will trust that He who heeds
The life that hides in mead and wold,
Who hangs yon alder's crimson beads,
And stains these mosses green and gold,
Will still, as He hath done, incline
His gracious care to me and mine;
Grant what we ask aright, from wrong debar,
And, as the earth grows dark, make brighter every star!

XXVII

I have not seen, I may not see,
My hopes for man take form in fact,
But God will give the victory
In due time; in that faith I act.
And he who sees the future sure,
The baffling present may endure,
And bless, meanwhile, the unseen Hand that leads
The heart's desires beyond the halting step of deeds.

XXVIII

And thou, my song, I send thee forth,
Where harsher songs of mine have flown;
Go, find a place at home and hearth
Where'er thy singer's name is known;
Revive for him the kindly thought
Of friends; and they who love him not,
Touched by some strain of thine, perchance may take
The hand he proffers all, and thank him for thy sake.

SKIPPER IRESON'S RIDE

First published in the *Atlantic Monthly*, December, 1857, this poem was collected into *Home Ballads and Poems* (1860) and reappeared in *Ballads of New England* (1870) and *Favorite Poems* (1877). In the collected editions it was part of "Home Ballads" until 1888-89 and 1892, when it became part of "Narrative and Legendary Poems" and the following introductory note was added:

"In the valuable and carefully prepared *History of Marblehead*, published in 1879 by Samuel Roads, Jr., it is stated that the crew of Captain Ireson, rather than himself, were responsible for the abandonment of the disabled vessel. To screen themselves they charged their captain with the crime. In view of this the writer of the ballad addressed the following letters to the historian:—

"OAK KNOLL, DANVERS, 5 *mo.* 18, 1880.

"MY DEAR FRIEND: I heartily thank thee for a copy of thy *History of Marblehead*. I have read it with great interest and think good use has been made of the abundant material. No town in Essex County has a record more honorable than Marblehead; no one has done more to develop the industrial interests of our New England seaboard, and certainly none have given such evidences of self-

179. Arcadian vales—In pastoral poetry Arcadia is supposed to be a valley inhabited by happy shepherds.

sacrificing patriotism. I am glad the story of it has been told, and told so well. I have now no doubt that thy version of Skipper Ireson's ride is the correct one. My verse was founded solely on the fragment of rhyme which I heard from one of my early schoolmates, a native of Marblehead.

"I supposed the story to which it referred dated back at least a century. I know nothing of the participators, and the narrative of the ballad was pure fancy. I am glad for the sake of truth and justice that the real facts are given in thy book. I certainly would not knowingly do injustice to any one, dead or living.

"I am very truly thy friend,

"JOHN G. WHITTIER."

Of all the rides since the birth of time,
Told in story or sung in rhyme,—
On Apuleius's Golden Ass,
Or one-eyed Calender's horse of brass,
Witch astride of a human back,
Islam's prophet on Al-Borák,—
The strangest ride that ever was sped
Was Ireson's, out from Marblehead!
Old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a cart
By the women of Marblehead!

Body of turkey, head of owl,
Wings a-droop like a rained-on fowl,
Feathered and ruffled in every part,
Skipper Ireson stood in the cart.
Scores of women, old and young,
Strong of muscle, and glib of tongue,
Pushed and pulled up the rocky lane,
Shouting and singing the shrill refrain:
"Here's Flud Oirson, fur his horrd horrt,
Torr'd an' futherr'd an' corr'd in a corrt
By the women o' Morble'ead!"

Wrinkled scolds with hands on hips,
Girls in bloom of cheek and lips,
Wild-eyed, free-limbed, such as chase
Bacchus round some antique vase,
Brief of skirt, with ankles bare,
Loose of kerchief and loose of hair,
With conch-shells blowing and fish-horns' twang,
Over and over the Maenads sang:
"Here's Flud Oirson, fur his horrd horrt,
Torr'd an' futherr'd an' corr'd in a corrt
By the women o' Morble'ead!"

Small pity for him!—He sailed away
From a leaking ship in Chaleur Bay,—
Sailed away from a sinking wreck,
With his own town's-people on her deck!
"Lay by! lay by!" they called to him.
Back he answered, "Sink or swim!
Brag of your catch of fish again!"
And off he sailed through the fog and rain!
Old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a cart
By the women of Marblehead!

Fathoms deep in dark Chaleur
That wreck shall lie forevermore.
Mother and sister, wife and maid,
Looked from the rocks of Marblehead
Over the moaning and rainy sea,—
Looked for the coming that might not be!
What did the winds and the sea-birds say
Of the cruel captain who sailed away—?
Old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a cart
By the women of Marblehead!

Through the street, on either side,
Up flew windows, doors swung wide;
Sharp-tongued spinsters, old wives gray,
Treble lent the fish-horn's bray.
Sea-worn grandsires, cripple-bound,
Hulks of old sailors run aground,
Shook head, and fist, and hat, and cane,
And cracked with curses the hoarse refrain:
"Here's Flud Oirson, fur his horrd horrt,
Torr'd an' futherr'd an' corr'd in a corrt
By the women o' Morble'ead!"

3. **Apuleius's**—The *Golden Ass* of Apuleius (second century A.D.), also known as *The Metamorphosis*, tells the story of a man transformed by magic into an ass. 4. **Calender's**—the "Story of the Third Calender" in the Arabian Nights. 6. **Al-Borák**—According to legend, Mohammed was carried into the seventh heaven by the angel Gabriel, mounted on the back of a white animal with two wings, known as Al Borák. 26. **Bacchus**—Bacchus is a frequent subject on Greek vases, and is often shown accompanied by Bacchantes or Maenads, female devotees of the god. 35. **Chaleur Bay**—inlet of the Gulf of St. Lawrence in Canada.

Sweetly along the Salem road
Bloom of orchard and lilac showed.
Little the wicked skipper knew
Of the fields so green and the sky so blue.
Riding there in his sorry trim,
Like an Indian idol glum and grim,
Scarcely he seemed the sound to hear
Of voices shouting, far and near:
"Here's Flud Oirson, fur his horrd horrt,
Torr'd an' futherr'd an' corr'd in a corrt
By the women o' Morble'ead!"

"Hear me, neighbors!" at last he cried,—
"What to me is this noisy ride?
What is the shame that clothes the skin
To the nameless horror that lives within?
Waking or sleeping, I see a wreck,
And hear a cry from a reeling deck!
Hate me and curse me,—I only dread
The hand of God and the face of the dead!"
Said old Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a cart
By the women of Marblehead!

Then the wife of the skipper lost at sea
Said, "God has touched him! why should we!"
Said an old wife mourning her only son,
"Cut the rogue's tether and let him run!"
So with soft relentings and rude excuse,
Half scorn, half pity, they cut him loose,
And gave him a cloak to hide him in,
And left him alone with his shame and sin.
Poor Floyd Ireson, for his hard heart,
Tarred and feathered and carried in a cart
By the women of Marblehead!

TELLING THE BEES

This poem was first collected in *Home Ballads and Poems* (1860), where it is preceded by this note:

"A remarkable custom, brought from the Old Country, formerly prevailed in the rural districts of New England. On the death of a member of the family, the bees were at once informed of the event, and their hives dressed in mourning. This ceremonial was supposed to be necessary to prevent the swarms from leaving their hives and seeking a new home."

The poem was republished in *Favorite Poems* (1877) without the note, which appears, however, in all the collected editions. In 1888-89 and 1892 the poem is classed with the "Narrative and Legendary Poems."

Here is the place; right over the hill
Runs the path I took;
You can see the gap in the old wall still,
And the stepping-stones in the shallow brook.

There is the house, with the gate red-barred,
And the poplars tall;
And the barn's brown length, and the cattle-yard,
And the white horns tossing above the wall.

There are the beehives ranged in the sun;
And down by the brink
Of the brook are her poor flowers, weed-o'errun,
Pansy and daffodil, rose and pink.

A year has gone, as the tortoise goes,
Heavy and slow;
And the same rose blows, and the same sun glows,
And the same brook sings of a year ago.

There's the same sweet clover-smell in the breeze;
And the June sun warm
Tangles his wings of fire in the trees,
Setting, as then, over Fernside farm.

I mind me how with a lover's care
From my Sunday coat
I brushed off the burrs, and smoothed my hair,
And cooled at the brookside my brow and throat.

Since we parted, a month had passed,—
To love, a year;

Down through the beeches I looked at last
On the little red gate and the well-sweep near.

I can see it all now,—the slantwise rain
Of light through the leaves,
The sundown's blaze on her window-pane,
The bloom of her roses under the eaves.

Just the same as a month before,—
The house and the trees,
The barn's brown gable, the vine by the door,—
Nothing changed but the hives of bees.

Before them, under the garden wall,
Forward and back,
Went drearily singing the chore-girl small,
Draping each hive with a shred of black.

Trembling, I listened: the summer sun
Had the chill of snow;
For I knew she was telling the bees of one
Gone on the journey we all must go!

Then I said to myself, "My Mary weeps
For the dead to-day:
Haply her blind old grandsire sleeps
The fret and the pain of his age away."

But her dog whined low; on the doorway sill,
With his cane to his chin,
The old man sat; and the chore-girl still
Sung to the bees stealing out and in.

And the song she was singing ever since
In my ear sounds on:—
"Stay at home, pretty bees, fly not hence!
Mistress Mary is dead and gone!"

MY PLAYMATE

The history of this poem is like that of the preceding. The scenery is that of Whittier's boyish recollections.

The pines were dark on Ramoth hill,
Their song was soft and low;
The blossoms in the sweet May wind
Were falling like the snow.

The blossoms drifted at our feet,
The orchard birds sang clear;
The sweetest and the saddest day
It seemed of all the year.

For, more to me than birds or flowers,
My playmate left her home,
And took with her the laughing spring,
The music and the bloom.

She kissed the lips of kith and kin,
She laid her hand in mine:
What more could ask the bashful boy
Who fed her father's kine?

She left us in the bloom of May:
The constant years told o'er
Their seasons with as sweet May morns,
But she came back no more.

I walk, with noiseless feet, the round
Of uneventful years;
Still o'er and o'er I sow the spring
And reap the autumn ears.

She lives where all the golden year
Her summer roses blow;
The dusky children of the sun
Before her come and go.

There haply with her jewelled hands
She smooths her silken gown,—
No more the homespun lap wherein
I shook the walnuts down.

The wild grapes wait us by the brook,
The brown nuts on the hill,
And still the May-day flowers make sweet
The woods of Follymill.

The lilies blossom in the pond,
The bird builds in the tree,
The dark pines sing on Ramoth hill
The slow song of the sea.

I wonder if she thinks of them,
And how the old time seems,—
If ever the pines of Ramoth wood
Are sounding in her dreams.

I see her face, I hear her voice;
  Does she remember mine?
And what to her is now the boy
  Who fed her father's kine?

What cares she that the orioles build
  For other eyes than ours,—
That other hands with nuts are filled,
  And other laps with flowers?

O playmate in the golden time!
  Our mossy seat is green,
Its fringing violets blossom yet,
  The old trees o'er it lean.

The winds so sweet with birch and fern
  A sweeter memory blow;
And there in spring the veeries sing
  The song of long ago.

And still the pines of Ramoth wood
  Are moaning like the sea,—
The moaning of the sea of change
  Between myself and thee!

THE WAITING

Gathered into *In War Time and Other Poems* (1863) under "Occasional Poems." In 1888-89 and 1892 it became part of "Poems Subjective and Reminiscent."

I wait and watch: before my eyes
  Methinks the night grows thin and gray;
I wait and watch the eastern skies
To see the golden spears uprise
  Beneath the oriflamme of day!

Like one whose limbs are bound in trance
  I hear the day-sounds swell and grow,
And see across the twilight glance,
Troop after troop, in swift advance,
  The shining ones with plumes of snow!

I know the errand of their feet,
  I know what mighty work is theirs;
I can but lift up hands unmeet
The threshing-floors of God to beat,
  And speed them with unworthy prayers.

I will not dream in vain despair
  The steps of progress wait for me:
The puny leverage of a hair
The planet's impulse well may spare,
  A drop of dew the tided sea.

The loss, if loss there be, is mine,
  And yet not mine if understood;
For one shall grasp and one resign,
One drink life's rue, and one its wine,
  And God shall make the balance good.

Oh power to do! Oh baffled will!
  Oh prayer and action! ye are one.
Who may not strive, may yet fulfil
The harder task of standing still,
  And good but wished with God is done!

59. **veeries**—vireos.

LAUS DEO

First published in the *Independent*, February 9, 1865, this poem was included in *National Lyrics* (1865) with the subtitle: "On hearing the bells ring for the constitutional amendment abolishing slavery in the United States." It reappeared in the *Tent on the Beach* volume (1867) under "National Lyrics," and retained its place in that section until 1888-89 and 1892, when it was transferred to "Anti-Slavery Poems," and the subtitle was replaced by the following note:

"On hearing the bells ring on the passage of the constitutional amendment abolishing slavery. The resolution was adopted by Congress, January 31, 1865. The ratification by the requisite number of States was announced December 18, 1865."

The title—"Praise be to God"—is from the Latin Bible (Vulgate). The poem is steeped in biblical phraseology.

It is done!
  Clang of bell and roar of gun
Send the tidings up and down.
  How the belfries rock and reel!
  How the great guns, peal on peal,
Fling the joy from town to town!

Ring, O bells!
Every stroke exulting tells
Of the burial hour of crime.
Loud and long, that all may hear,
Ring for every listening ear
Of Eternity and Time!

Let us kneel:
God's own voice is in that peal,
And this spot is holy ground.
Lord, forgive us! What are we,
That our eyes this glory see,
That our ears have heard this sound!

For the Lord
On the whirlwind is abroad;
In the earthquake He has spoken;
He has smitten with His thunder
The iron walls asunder,
And the gates of brass are broken!

Loud and long
Lift the old exulting song;
Sing with Miriam by the sea,
He has cast the mighty down;
Horse and rider sink and drown;
'He hath triumphed gloriously!'

Did we dare,
In our agony of prayer,
Ask for more than He has done?
When was ever his right hand
Over any time or land
Stretched as now beneath the sun?

How they pale,
Ancient myth and song and tale,
In this wonder of our days,
When the cruel rod of war
Blossoms white with righteous law,
And the wrath of man is praise!

Blotted out!
All within and all about
Shall a fresher life begin;
Freer breathe the universe
As it rolls its heavy curse
On the dead and buried sin!

It is done!
In the circuit of the sun
Shall the sound thereof go forth.
It shall bid the sad rejoice,
It shall give the dumb a voice,
It shall belt with joy the earth!

Ring and swing,
Bells of joy! On morning's wing
Sound the song of praise abroad!
With a sound of broken chains
Tell the nations that He reigns,
Who alone is Lord and God!

SNOW-BOUND

A WINTER IDYL

TO THE MEMORY OF THE HOUSEHOLD IT DESCRIBES THIS POEM IS DEDICATED BY THE AUTHOR

First published in booklet form in 1866; and in 1888-89 and 1892 brigaded with "Poems Subjective and Reminiscent," and prefaced by the following note:

"The inmates of the family at the Whittier homestead who are referred to in the poem were my father, mother, my brother and two sisters, and my uncle and aunt both unmarried. In addition, there was the district schoolmaster who boarded with us. The 'not unfeared, half-welcome guest' was Harriet Livermore, daughter of Judge Livermore, of New Hampshire, a young woman of fine natural ability, enthusiastic, eccentric, with slight control over her violent temper, which sometimes made her religious profession doubtful. She was equally ready to exhort in school-house prayer-meetings and dance in a Washington ball-room, while her father was a member of Congress. She early embraced the doctrine of the Second Advent, and felt it her duty to proclaim the Lord's speedy coming. With this message she crossed the Atlantic and spent the greater part of a long life in travelling over Europe and Asia. She lived some time with Lady Hester Stan-

20. whirlwind—*Cf.* Job, Chapter 28 and subsequent chapters. **25. Loud and long**—*Cf.* Ex. 15: 21.

hope, a woman as fantastic and mentally strained as herself, on the slope of Mt. Lebanon, but finally quarrelled with her in regard to two white horses with red marks on their backs which suggested the idea of saddles, on which her titled hostess expected to ride into Jerusalem with the Lord. A friend of mine found her, when quite an old woman, wandering in Syria with a tribe of Arabs, who with the Oriental notion that madness is inspiration, accepted her as their prophetess and leader. At the time referred to in *Snow-Bound* she was boarding at the Rocks Village about two miles from us.

"In my boyhood, in our lonely farm-house, we had scanty sources of information; few books and only a small weekly newspaper. Our only annual was the Almanac. Under such circumstances story-telling was a necessary resource in the long winter evenings. My father when a young man had traversed the wilderness to Canada, and could tell us of his adventures with Indians and wild beasts, and of his sojourn in the French villages. My uncle was ready with his record of hunting and fishing and, it must be confessed, with stories which he at least half believed, of witchcraft and apparitions. My mother, who was born in the Indian-haunted region of Somersworth, New Hampshire, between Dover and Portsmouth, told us of the inroads of the savages, and the narrow escape of her ancestors. She described strange people who lived on the Piscataqua and Cocheco, among whom was Bantam the sorcerer. I have in my possession the wizard's 'conjuring book,' which he solemnly opened when consulted. It is a copy of Cornelius Agrippa's *Magic* printed in 1651, dedicated to Dr. Robert Child, who, like Michael Scott, had learned

> 'the art of glammorie
> In Padua beyond the sea,'

and who is famous in the annals of Massachusetts, where he was at one time a resident, as the first man who dared petition the General Court for liberty of conscience. The full title of the book is *Three Books of Occult Philosophy, by Henry Cornelius Agrippa, Knight, Doctor of both Laws, Counsellor to Caesar's Sacred Majesty and Judge of the Prerogative Court.*"

"As the Spirits of Darkness be stronger in the dark, so good Spirits which be Angels of Light, are augmented not only by the Divine light of the Sun, but also by our common VVood Fire: and as the Celestial Fire drives away dark spirits, so also this our Fire of VVood doth the same." COR. AGRIPPA, *Occult Philosophy*, Book I. ch. v.

"Announced by all the trumpets of the sky,
Arrives the snow; and, driving o'er the fields,
Seems nowhere to alight; the whited air
Hides hills and woods, the river and the heaven,
And veils the farm-house at the garden's end.
The sled and traveller stopped, the courier's feet
Delayed, all friends shut out, the housemates sit
Around the radiant fireplace, enclosed
In a tumultuous privacy of storm."
EMERSON, *The Snow-Storm.*

The sun that brief December day
Rose cheerless over hills of gray,
And, darkly circled, gave at noon
A sadder light than waning moon.
Slow tracing down the thickening sky
Its mute and ominous prophecy,
A portent seeming less than threat,
It sank from sight before it set.
A chill no coat, however stout,
Of homespun stuff could quite shut out,
A hard, dull bitterness of cold,
That checked, mid-vein, the circling race
Of life-blood in the sharpened face,
The coming of the snow-storm told.
The wind blew east; we heard the roar
Of Ocean on his wintry shore,
And felt the strong pulse throbbing there
Beat with low rhythm our inland air.

Meanwhile we did our nightly chores,—
Brought in the wood from out of doors,
Littered the stalls, and from the mows
Raked down the herd's-grass for the cows:
Heard the horse whinnying for his corn;
And, sharply clashing horn on horn,
Impatient down the stanchion rows
The cattle shake their walnut bows;

22. herd's-grass—now known as timothy. **25-26. stanchion . . . bows**—A stanchion is a bow (here made of walnut) fastened over the neck of a cow and made fast to the sides of the stall.

While, peering from his early perch
Upon the scaffold's pole of birch
The cock his crested helmet bent
And down his querulous challenge sent.

Unwarmed by any sunset light
The gray day darkened into night,
A night made hoary with the swarm
And whirl-dance of the blinding storm,
As zigzag, wavering to and fro
Crossed and recrossed the wingèd snow:
And ere the early bedtime came
The white drift piled the window-frame,
And through the glass the clothes-line posts
Looked in like tall and sheeted ghosts.

So all night long the storm roared on:
The morning broke without a sun;
In tiny spherule traced with lines
Of Nature's geometric signs,
In starry flake, and pellicle
All day the hoary meteor fell;
And, when the second morning shone,
We looked upon a world unknown,
On nothing we could call our own.
Around the glistening wonder bent
The blue walls of the firmament,
No cloud above, no earth below,—
A universe of sky and snow!
The old familiar sights of ours
Took marvelous shapes; strange domes and towers
Rose up where sty or corn-crib stood,
Or garden-wall, or belt of wood;
A smooth white mound the brush-pile showed,
A fenceless drift what once was road;
The bridle-post an old man sat
With loose-flung coat and high cocked hat;
The well-curb had a Chinese roof;
And even the long sweep, high aloof,
In its slant splendor, seemed to tell
Of Pisa's leaning miracle.

A prompt, decisive man, no breath
Our father wasted: "Boys, a path!"
Well pleased (for when did farmer boy
Count such a summons less than joy?)
Our buskins on our feet we drew;
With mittened hands, and caps drawn low,
To guard our necks and ears from snow,
We cut the solid whiteness through.
And, where the drift was deepest, made
A tunnel walled and overlaid
With dazzling crystal: we had read
Of rare Aladdin's wondrous cave,
And to our own his name we gave,
With many a wish the luck were ours
To test his lamp's supernal powers.
We reached the barn with merry din,
And roused the prisoned brutes within.
The old horse thrust his long head out,
And grave with wonder gazed about;
The cock his lusty greeting said,
And forth his speckled harem led;
The oxen lashed their tails, and hooked,
And mild reproach of hunger looked;
The hornèd patriarch of the sheep,
Like Egypt's Amun roused from sleep,
Shook his sage head with gesture mute,
And emphasized with stamp of foot.

All day the gusty north-wind bore
The loosening drift its breath before;
Low circling round its southern zone,
The sun through dazzling snow-mist shone.
No church-bell lent its Christian tone
To the savage air, no social smoke
Curled over woods of snow-hung oak.
A solitude made more intense
By dreary-voicèd elements,
The shrieking of the mindless wind,
The moaning tree-boughs swaying blind,
And on the glass the unmeaning beat
Of ghostly finger-tips of sleet.
Beyond the circle of our hearth
No welcome sound of toil or mirth
Unbound the spell, and testified
Of human life and thought outside.
We minded that the sharpest ear
The buried brooklet could not hear,
The music of whose liquid lip
Had been to us companionship,
And, in our lonely life, had grown
To have an almost human tone.

45. pellicle—thin film. **65. Pisa's . . . miracle**—the leaning tower of Pisa. **70. buskins**—boots; high shoes. **90. Amun**—The god Amun (Amon) in ancient Egypt had the head of a ram.

As night drew on, and, from the crest
Of wooded knolls that ridged the west,
The sun, a snow-blown traveler, sank
From sight beneath the smothering bank,
We piled, with care, our nightly stack
Of wood against the chimney-back,—
The oaken log, green, huge, and thick,
And on its top the stout back-stick;
The knotty forestick laid apart,
And filled between with curious art
The ragged brush; then, hovering near,
We watched the first red blaze appear,
Heard the sharp crackle, caught the gleam
On whitewashed wall and sagging beam,
Until the old, rude-furnished room
Burst, flower-like, into rosy bloom;
While radiant with a mimic flame
Outside the sparkling drift became,
And through the bare-boughed lilac-tree
Our own warm hearth seemed blazing free.
The crane and pendent trammels showed,
The Turks' heads on the andirons glowed;
While childish fancy, prompt to tell
The meaning of the miracle,
Whispered the old rhyme: *"Under the tree,*
When fire outdoors burns merrily,
There the witches are making tea."

The moon above the eastern wood
Shone at its full; the hill-range stood
Transfigured in the silver flood,
Its blown snows flashing cold and keen,
Dead white, save where some sharp ravine
Took shadow, or the sombre green
Of hemlocks turned to pitchy black
Against the whiteness at their back.
For such a world and such a night
Most fitting that unwarming light,
Which only seemed where'er it fell
To make the coldness visible.

Shut in from all the world without,
We sat the clean-winged hearth about,
Content to let the north-wind roar
In baffled rage at pane and door,
While the red logs before us beat
The frost-line back with tropic heat;
And ever, when a louder blast
Shook beam and rafter as it passed,
The merrier up its roaring draught
The great throat of the chimney laughed,
The house-dog on his paws outspread
Laid to the fire his drowsy head,
The cat's dark silhouette on the wall
A couchant tiger's seemed to fall;
And, for the winter fireside meet,
Between the andirons' straddling feet,
The mug of cider simmered slow,
The apples sputtered in a row,
And, close at hand, the basket stood
With nuts from brown October's wood.

What matter how the night behaved?
What matter how the north-wind raved?
Blow high, blow low, not all its snow
Could quench our hearth-fire's ruddy glow.
O Time and Change!—with hair as gray
As was my sire's that winter day,
How strange it seems, with so much gone
Of life and love, to still live on!
Ah, brother! only I and thou
Are left of all that circle now,—
The dear home faces whereupon
That fitful firelight paled and shone.
Henceforward, listen as we will,
The voices of that hearth are still;
Look where we may, the wide earth o'er,
Those lighted faces smile no more.
We tread the paths their feet have worn,
We sit beneath their orchard trees,
We hear, like them, the hum of bees
And rustle of the bladed corn;
We turn the pages that they read,
Their written words we linger o'er,
But in the sun they cast no shade,
No voice is heard, no sign is made,
No step is on the conscious floor!
Yet Love will dream, and Faith will trust,
(Since He who knows our need is just)
That somehow, somewhere, meet we must.
Alas for him who never sees
The stars shine through his cypress-trees!
Who, hopeless, lays his dead away,
Nor looks to see the breaking day
Across the mournful marbles play!

136. trammels—iron hooks for holding vessels over the fire. **160. frost-line**—that is, the fire gradually warmed more and more of the room. On cold nights all of the room not warmed by the fire would be intensely cold. **183. brother**—Matthew Franklin Whittier (1812-1883). **207. mournful marbles**—gravestones.

Who hath not learned, in hours of faith,
The truth to flesh and sense unknown,
That Life is ever lord of Death,
And Love can never lose its own!

We sped the time with stories old,
Wrought puzzles out, and riddles told,
Or stammered from our school-book lore
"The chief of Gambia's golden shore."
How often since, when all the land
Was clay in Slavery's shaping hand,
As if a far-blown trumpet stirred
The languorous sin-sick air, I heard:
"Does not the voice of reason cry,
Claim the first right which Nature gave,
From the red scourge of bondage fly,
Nor deign to live a burdened slave!"
Our father rode again his ride
On Memphremagog's wooded side;
Sat down again to moose and samp
In trapper's hut and Indian camp;
Lived o'er the old idyllic ease
Beneath St. François' hemlock-trees;
Again for him the moonlight shone
On Norman cap and bodiced zone;
Again he heard the violin play
Which led the village dance away,
And mingled in its merry whirl
The grandam and the laughing girl.
Or, nearer home, our steps he led
Where Salisbury's level marshes spread
Mile-wide as flies the laden bee;
Where merry mowers, hale and strong,
Swept, scythe on scythe, their swaths along
The low green prairies of the sea.
We shared the fishing off Boar's Head,
And round the rocky Isles of Shoals
The hake-broil on the drift-wood coals;
The chowder on the sand-beach made,
Dipped by the hungry, steaming hot,
With spoons of clam-shell from the pot.
We heard the tales of witchcraft old,
And dream and sign and marvel told
To sleepy listeners as they lay
Stretched idly on the salted hay,
Adrift along the winding shores,
When favoring breezes deigned to blow
The square sail of the gundalow,
And idle lay the useless oars.

215. *The African Chief* was the title of a poem by Mrs. Sarah Wentworth Morton, wife of the Hon. Perez Morton, a former attorney-general of Massachusetts. Mrs. Morton's *nom de plume* was *Philenia*. The school book in which *The African Chief* was printed was Caleb Bingham's *The American Preceptor*, and the poem contained fifteen stanzas, of which the first four were as follows:

"See how the black ship cleaves the main
High-bounding o'er the violet wave,
Remurmuring with the groans of pain,
Deep freighted with the princely slave.

"Did all the gods of Afric sleep,
Forgetful of their guardian love,
When the white traitors of the deep
Betrayed him in the palmy grove.

"A chief of Gambia's golden shore,
Whose arm the band of warriors led,
Perhaps the lord of boundless power,
By whom the foodless poor were fed.

"Does not the voice of reason cry,
'Claim the first right which nature gave;
From the red scourge of bondage fly,
Nor deign to live a burdened slave.'"
(Whittier's note)

224. father—John Whittier (1760-1830). **225. Memphremagog's**—a lake in Vermont and Canada. **226. samp**—mush made of Indian corn. **229. St. François'**—river and village north of Lake Memphremagog, in Canada. **231. zone**—waist. **237. Salisbury's**—town in northeastern Massachusetts near the Whittier farm. **242. Boar's Head**—Between Salisbury and Portsmouth on the New England coast there are two promontories, Big and Little Boar's Head. **243. Isles of Shoals**—off the coast near the Boar's Head. **244. hake**—a kind of fish. **254. gundalow**—flat-bottomed boat.

Our mother, while she turned her wheel
Or run the new-knit stocking-heel,
Told how the Indian hordes came down
At midnight on Cocheco town,
And how her own great-uncle bore
His cruel scalp-mark to fourscore.
Recalling, in her fitting phrase,
So rich and picturesque and free
(The common unrhymed poetry
Of simple life and country ways),
The story of her early days,—
She made us welcome to her home;
Old hearths grew wide to give us room;
We stole with her a frightened look
At the gray wizard's conjuring-book,
The fame whereof went far and wide
Through all the simple country-side;
We heard the hawks at twilight play,
The boat-horn on Piscataqua,
The loon's weird laughter far away;
We fished her little trout-brook, knew
What flowers in wood and meadow grew,
What sunny hillsides autumn-brown
She climbed to shake the ripe nuts down,
Saw where in sheltered cove and bay
The duck's black squadron anchored lay,
And heard the wild-geese calling loud
Beneath the gray November cloud.

Then, haply, with a look more grave,
And soberer tone, some tale she gave
From painful Sewel's ancient tome,
Beloved in every Quaker home,
Of faith fire-winged by martyrdom,
Or Chalkley's Journal, old and quaint,—
Gentlest of skippers, rare sea-saint!—
Who, when the dreary calms prevailed,
And water-butt and bread-cask failed,
And cruel, hungry eyes pursued
His portly presence, mad for food
With dark hints muttered under breath
Of casting lots for life or death,
Offered, if Heaven withheld supplies,
To be himself the sacrifice.
Then, suddenly, as if to save
The good man from his living grave,
A ripple on the water grew,
A school of porpoise flashed in view.
"Take, eat," he said, "and be content;
These fishes in my stead are sent
By Him who gave the tangled ram
To spare the child of Abraham."

Our uncle, innocent of books,
Was rich in lore of fields and brooks,
The ancient teachers never dumb
Of Nature's unhoused lyceum.
In moons and tides and weather wise,
He read the clouds as prophecies,
And foul or fair could well divine,
By many an occult hint and sign,
Holding the cunning-warded keys
To all the woodcraft mysteries;
Himself to Nature's heart so near
That all her voices in his ear
Of beast or bird had meanings clear,

256. mother—Abigail Hussey Whittier (1781-1857). **259. Cocheco**—town near Dover, New Hampshire, raided by the Indians in 1689. **270. conjuring-book**—See introductory note to *Snow-Bound*. **274. Piscataqua**—river principally in Maine and New Hampshire. **286. Sewel's . . . tome**—*History of the Quakers* (1722) by William Sewel. **289. Chalkley's Journal**—by Thomas Chalkley (1675-1741), published 1747. "Chalkley's own narrative of this incident, as given in his *Journal* is as follows. 'To stop their murmuring, I told them they should not need to cast lots, which was usual in such cases, which of us should die first, for I would freely offer up my life to do them good. One said, "God bless you! I will not eat any of you." Another said, "He would die before he would eat any of me;" and so said several. I can truly say, on that occasion, at that time, my life was not dear to me, and that I was serious and ingenuous in my proposition: and as I was leaning over the side of the vessel, thoughtfully considering my proposal to the company, and looking in my mind to Him that made me, a very large dolphin came up towards the top or surface of the water, and looked me in the face; and I called the people to put a hook into the sea, and take him, for here is one come to redeem me (I said to them). And they put a hook into the sea, and the fish readily took it, and they caught him. He was longer than myself. I think he was about six feet long, and the largest that ever I saw. This plainly showed us that we ought not to distrust the providence of the Almighty. The people were quieted by this act of Providence, and murmured no more. We caught enough to eat plentifully of, till we got into the capes of Delaware.'" (Whittier's note) **303. "Take, eat"**—*Cf.* Matt. 26:26. **305. ram**—*Cf.* Gen. 22:13. **307. uncle**—Moses Whittier (died 1824). **310. lyceum**—The lyceum was like the modern Chautauqua. **315. cunning-warded**—about equivalent to intricately made.

Like Apollonius of old,
Who knew the tales the sparrows told,
Or Hermes, who interpreted
What the sage cranes of Nilus said;
A simple, guileless, childlike man,
Content to live where life began;
Strong only on his native grounds,
The little world of sights and sounds
Whose girdle was the parish bounds,
Whereof his fondly partial pride
The common features magnified,
As Surrey hills to mountains grew
In White of Selborne's loving view,—
He told how teal and loon he shot,
And how the eagle's eggs he got,
The feats on pond and river done,
The prodigies of rod and gun;
Till, warming with the tales he told,
Forgotten was the outside cold,
The bitter wind unheeded blew,
From ripening corn the pigeons flew,
The partridge drummed i' the wood, the mink
Went fishing down the river-brink.
In fields with bean or clover gay,
The woodchuck, like a hermit gray,
Peered from the doorway of his cell;
The muskrat plied the mason's trade,
And tier by tier his mud-walls laid;
And from the shagbark overhead
The grizzled squirrel dropped his shell.

Next, the dear aunt, whose smile of cheer
And voice in dreams I see and hear,—
The sweetest woman ever Fate
Perverse denied a household mate,
Who, lonely, homeless, not the less
Found peace in love's unselfishness,
And welcome wheresoe'er she went,
A calm and gracious element,
Whose presence seemed the sweet income
And womanly atmosphere of home,—
Called up her girlhood memories,
The huskings and the apple-bees,
The sleigh-rides and the summer sails,
Weaving through all the poor details
And homespun warp of circumstance
A golden woof-thread of romance.
For well she kept her genial mood
And simple faith of maidenhood;
Before her still a cloud-land lay,
The mirage loomed across her way;
The morning dew, that dried so soon
With others, glistened at her noon;
Through years of toil and soil and care,
From glossy tress to thin gray hair,
All unprofaned she held apart
The virgin fancies of the heart.
Be shame to him of woman born
Who had for such but thought of scorn.

There, too, our elder sister plied
Her evening task the stand beside;
A full, rich nature, free to trust,
Truthful and almost sternly just,
Impulsive, earnest, prompt to act,
And make her generous thought a fact,
Keeping with many a light disguise
The secret of self-sacrifice.
O heart sore-tried! thou hast the best
That Heaven itself could give thee,—rest,
Rest from all bitter thoughts and things!
How many a poor one's blessing went
With thee beneath the low green tent
Whose curtain never outward swings!

As one who held herself a part
Of all she saw, and let her heart
Against the household bosom lean,
Upon the motley-braided mat
Our youngest and our dearest sat,
Lifting her large, sweet, asking eyes,
Now bathed within the unfading green
And holy peace of Paradise.
Oh, looking from some heavenly hill,
Or from the shade of saintly palms,
Or silver reach of river calms,
Do those large eyes behold me still?
With me one little year ago:—
The chill weight of the winter snow
For months upon her grave has lain;
And now, when summer south-winds blow

320. **Apollonius**—Apollonius of Tyre, Greek mystic of the first century. 322. **Hermes**—Hermes Trismegistus, reputed author of numerous works on Egypt. 323. **Nilus**—the Nile. 331-32. **Surrey . . . White**—The reference is to the *Natural History of Selborne* by Gilbert White (1720-1793), the English naturalist. The Surrey in question is in England. 350. **aunt**—Mercy Evans Hussey (died 1846). 378. **sister**—Mary Caldwell Whittier (1806-1860). 396. **youngest**—Elizabeth Hussey Whittier (died 1864).

And brier and harebell bloom again,
I tread the pleasant paths we trod,
I see the violet-sprinkled sod
Whereon she leaned, too frail and weak
The hillside flowers she loved to seek,
Yet following me where'er I went
With dark eyes full of love's content.
The birds are glad; the brier-rose fills
The air with sweetness; all the hills
Stretch green to June's unclouded sky;
But still I wait with ear and eye
For something gone which should be nigh,
A loss in all familiar things,
In flower that blooms, and bird that sings.
And yet, dear heart! remembering thee,
Am I not richer than of old?
Safe in thy immortality
What change can reach the wealth I hold?
What chance can mar the pearl and gold
Thy love hath left in trust with me?
And while in life's late afternoon,
Where cool and long the shadows grow,
I walk to meet the night that soon
Shall shape and shadow overflow,
I cannot feel that thou art far,
Since near at need the angels are;
And when the sunset gates unbar,
Shall I not see thee waiting stand,
And, white against the evening star,
The welcome of thy beckoning hand?

Brisk wielder of the birch and rule,
The master of the district school
Held at the fire his favored place;
Its warm glow lit a laughing face
Fresh-hued and fair, where scarce appeared
The uncertain prophecy of beard.
He teased the mitten-blinded cat,
Played cross-pins on my uncle's hat,
Sang songs, and told us what befalls
In classic Dartmouth's college halls.
Born the wild Northern hills among,
From whence his yeoman father wrung
By patient toil subsistence scant,
Not competence and yet not want,
He early gained the power to pay
His cheerful, self-reliant way;
Could doff at ease his scholar's gown
To peddle wares from town to town
Or through the long vacation's reach
In lonely lowland districts teach,
Where all the droll experience found
At stranger hearths in boarding round,
The moonlit skater's keen delight,
The sleigh-drive through the frosty night,
The rustic party, with its rough
Accompaniment of blind-man's-buff,
And whirling plate, and forfeits paid,
His winter task a pastime made.
Happy the snow-locked homes wherein
He tuned his merry violin,
Or played the athlete in the barn,
Or held the good dame's winding-yarn,
Or mirth-provoking versions told
Of classic legends rare and old,
Wherein the scenes of Greece and Rome
Had all the commonplace of home,
And little seemed at best the odds
'Twixt Yankee peddlers and old gods;
Where Pindus-born Arachthus took
The guise of any grist-mill brook,
And dread Olympus at his will
Became a huckleberry hill.

A careless boy that night he seemed;
But at his desk he had the look
And air of one who wisely schemed,
And hostage from the future took
In trainèd thought and lore of book.
Large-brained, clear-eyed,—of such as he
Shall Freedom's young apostles be,
Who, following in War's bloody trail,
Shall every lingering wrong assail;
All chains from limb and spirit strike,
Uplift the black and white alike;
Scatter before their swift advance
The darkness and the ignorance,
The pride, the lust, the squalid sloth,
Which nurtured Treason's monstrous growth,
Made murder pastime, and the hell
Of prison-torture possible;
The cruel lie of caste refute,
Old forms remould, and substitute

439. master—George Haskell (1799-1876), a Dartmouth graduate. **445. cross-pins**—Also called hattie. The players lay pins on the crown of a hat; and each in turn gives the hat a smart tap. If any two pins after such a tap lie across each other, the player picks them up. **476. Arachthus**—river in Greece, rising in the Pindus range.

For Slavery's lash the freeman's will,
For blind routine, wise-handed skill;
A school-house plant on every hill,
Stretching in radiate nerve-lines thence
The quick wires of intelligence;
Till North and South together brought
Shall own the same electric thought,
In peace a common flag salute,
And, side by side in labor's free
And unresentful rivalry,
Harvest the fields wherein they fought.

Another guest that winter night
Flashed back from lustrous eyes the light.
Unmarked by time, and yet not young,
The honeyed music of her tongue
And words of meekness scarcely told
A nature passionate and bold,
Strong, self-concentred, spurning guide,
Its milder features dwarfed beside
Her unbent will's majestic pride.
She sat among us, at the best,
A not unfeared, half-welcome guest,
Rebuking with her cultured phrase
Our homeliness of words and ways.
A certain pard-like, treacherous grace
Swayed the lithe limbs and dropped the lash,
Lent the white teeth their dazzling flash;
And under low brows, black with night,
Rayed out at times a dangerous light;
The sharp heat-lightnings of her face
Presaging ill to him whom Fate
Condemned to share her love or hate.
A woman tropical, intense
In thought and act, in soul and sense,
She blended in a like degree
The vixen and the devotee,
Revealing with each freak of feint
The temper of Petruchio's Kate,
The raptures of Siena's saint.
Her tapering hand and rounded wrist
Had facile power to form a fist;
The warm, dark languish of her eyes
Was never safe from wrath's surprise.
Brows saintly calm and lips devout
Knew every change of scowl and pout;
And the sweet voice had notes more high
And shrill for social battle-cry.

Since then what old cathedral town
Has missed her pilgrim staff and gown,
What convent-gate has held its lock
Against the challenge of her knock!
Through Smyrna's plague-hushed thoroughfares,
Up sea-set Malta's rocky stairs,
Gray olive slopes of hills that hem
Thy tombs and shrines, Jerusalem,
Or startling on her desert throne
The crazy Queen of Lebanon
With claims fantastic as her own,
Her tireless feet have held their way;
And still, unrestful, bowed, and gray,
She watches under Eastern skies,
With hope each day renewed and fresh,
The Lord's quick coming in the flesh,
Whereof she dreams and prophesies!

Where'er her troubled path may be,
The Lord's sweet pity with her go!
The outward wayward life we see,
The hidden springs we may not know.
Nor is it given us to discern
What threads the fatal sisters spun,
Through what ancestral years has run
The sorrow with the woman born,
What forged her cruel chain of moods,
What set her feet in solitudes,
And held the love within her mute,
What mingled madness in the blood,
A life-long discord and annoy,
Water of tears with oil of joy,
And hid within the folded bud
Perversities of flower and fruit.
It is not ours to separate
The tangled skein of will and fate,
To show what metes and bounds should stand
Upon the soul's debatable land,
And between choice and Providence
Divide the circle of events;
But He who knows our frame is just,

510 ff. **guest**—Harriet Livermore (born 1788). See Whittier's introductory note for the explanation of the allusions. 536. **Petruchio's Kate**—the hero and heroine of Shakespeare's *The Taming of the Shrew*. 537. **Siena's saint**—St. Catherine of Siena (1347-1380), a mystic. 555. **Queen**—"An interesting account of Lady Hester Stanhope may be found in Kinglake's *Eothen*, chapter viii." (Whittier's note)

Merciful and compassionate,
And full of sweet assurances
And hope for all the language is,
That He remembereth we are dust!

At last the great logs, crumbling low,
Sent out a dull and duller glow,
The bull's-eye watch that hung in view,
Ticking its weary circuit through,
Pointed with mutely warning sign
Its black hand to the hour of nine.
That sign the pleasant circle broke:
My uncle ceased his pipe to smoke,
Knocked from its bowl the refuse gray,
And laid it tenderly away,
Then roused himself to safely cover
The dull red brands with ashes over.
And while, with care, our mother laid
The work aside, her steps she stayed
One moment, seeking to express
Her grateful sense of happiness
For food and shelter, warmth and health,
And love's contentment more than wealth,
With simple wishes (not the weak,
Vain prayers which no fulfillment seek,
But such as warm the generous heart,
O'er-prompt to do with Heaven its part)
That none might lack, that bitter night,
For bread and clothing, warmth and light.

Within our beds awhile we heard
The wind that round the gables roared,
With now and then a ruder shock,
Which made our very bedsteads rock.
We heard the loosened clapboards tost,
The board-nails snapping in the frost;
And on us, through the unplastered wall,
Felt the light sifted snow-flakes fall.
But sleep stole on, as sleep will do
When hearts are light and life is new;
Faint and more faint the murmurs grew,
Till in the summer-land of dreams
They softened to the sound of streams,
Low stir of leaves, and dip of oars,
And lapsing waves on quiet shores.

Next morn we wakened with the shout
Of merry voices high and clear;
And saw the teamsters drawing near
To break the drifted highways out.
Down the long hillside treading slow
We saw the half-buried oxen go,
Shaking the snow from heads uptost,
Their straining nostrils white with frost.
Before our door the straggling train
Drew up, an added team to gain.
The elders threshed their hands a-cold,
Passed, with the cider-mug, their jokes
From lip to lip; the younger folks
Down the loose snow-banks, wrestling, rolled,
Then toiled again the cavalcade
O'er windy hill, through clogged ravine,
And woodland paths that wound between
Low drooping pine-boughs winter-weighed.
From every barn a team afoot,
At every house a new recruit,
Where, drawn by Nature's subtlest law,
Haply the watchful young men saw
Sweet doorway pictures of the curls
And curious eyes of merry girls,
Lifting their hands in mock defence
Against the snow-ball's compliments,
And reading in each missive tost
The charm which Eden never lost.

We heard once more the sleigh-bells' sound;
And, following where the teamsters led,
The wise old Doctor went his round,
Just pausing at our door to say,
In the brief autocratic way
Of one who, prompt at Duty's call,
Was free to urge her claim on all,
That some poor neighbor sick abed
At night our mother's aid would need.
For, one in generous thought and deed,
What mattered in the sufferer's sight
The Quaker matron's inward light,
The Doctor's mail of Calvin's creed?
All hearts confess the saints elect
Who, twain in faith, in love agree,
And melt not in an acid sect
The Christian pearl of charity!

So days went on: a week had passed
Since the great world was heard from last.
The Almanac we studied o'er,
Read and reread our little store
Of books and pamphlets, scarce a score;
One harmless novel, mostly hid
From younger eyes, a book forbid,

659. **Doctor**—Dr. Elias Weld of Rocks Village.

And poetry, (or good or bad,
A single book was all we had,)
Where Ellwood's meek, drab-skirted Muse,
A stranger to the heathen Nine,
Sang, with a somewhat nasal whine,
The wars of David and the Jews.
At last the floundering carrier bore
The village paper to our door.
Lo! broadening outward as we read,
To warmer zones the horizon spread;
In panoramic length unrolled
We saw the marvel that it told.
Before us passed the painted Creeks,
And daft McGregor on his raids
In Costa Rica's everglades.
And up Taygetus winding slow
Rode Ypsilanti's Mainote Greeks,
A Turk's head at each saddle-bow!
Welcome to us its week-old news,
Its corner for the rustic Muse,
Its monthly gauge of snow and rain,
Its record, mingling in a breath
The wedding bell and dirge of death;
Jest, anecdote, and love-lorn tale,
The latest culprit sent to jail;
Its hue and cry of stolen and lost,
Its vendue sales and goods at cost,
And traffic calling loud for gain.
We felt the stir of hall and street,
The pulse of life that round us beat;
The chill embargo of the snow
Was melted in the genial glow;
Wide swung again our ice-locked door,
And all the world was ours once more!

Clasp, Angel of the backward look
And folded wings of ashen gray
And voice of echoes far away,
The brazen covers of thy book;
The weird palimpsest old and vast,
Wherein thou hid'st the spectral past;
Where, closely mingling, pale and glow
The characters of joy and woe;
The monographs of outlived years,
Or smile-illumed or dim with tears,
Green hills of life that slope to death,
And haunts of home, whose vistaed trees
Shade off to mournful cypresses
With the white amaranths underneath.
Even while I look, I can but heed
The restless sands' incessant fall,
Importunate hours that hours succeed,
Each clamorous with its own sharp need,
And duty keeping pace with all.
Shut down and clasp the heavy lids;
I hear again the voice that bids
The dreamer leave his dream midway
For larger hopes and graver fears:
Life greatens in these later years,
The century's aloe flowers to-day!

Yet, haply, in some lull of life,
Some Truce of God which breaks its strife,
The worldling's eyes shall gather dew,
Dreaming in throngful city ways
Of winter joys his boyhood knew;
And dear and early friends—the few
Who yet remain—shall pause to view
These Flemish pictures of old days;
Sit with me by the homestead hearth,
And stretch the hands of memory forth
To warm them at the wood-fire's blaze!
And thanks untraced to lips unknown
Shall greet me like the odors blown
From unseen meadows newly mown,
Or lilies floating in some pond,
Wood-fringed, the wayside gaze beyond;
The traveler owns the grateful sense
Of sweetness near, he knows not whence,
And, pausing, takes with forehead bare
The benediction of the air.

THE ETERNAL GOODNESS

Gathered into *The Tent on the Beach and Other Poems* (1867) as part of "Occasional Poems," this poem retained its place in that section until 1888-89 and 1892, when it be-

683. **Ellwood's**—Thomas Ellwood (1639-1713), author of *Davideis* (1712). 693. **Creeks**—Andrew Jackson defeated the Creeks at Talladega (1813) and Tohopeka (1814). 694. **McGregor**—"Sir" Gregor McGregor in 1819 tried to establish a colony on the coast of Costa Rica by force of arms. 696. **Taygetus**—that is, General Ypsilanti was leading a force of Greek insurrectionists from Maina up Mount Taygetus. 707. **vendue**—public sale; auction. 728. **amaranths**—imaginary immortal flowers. 730. **sands'**—that is, sand in an hourglass. 739. **aloe**—symbol of bitterness. 741. **Truce of God**—state of peace. 747. **Flemish pictures**—The Flemish school of painting was notable for its loving and homely realism.

came part of "Religious Poems." It is probably Whittier's most eloquent statement of his religious faith.

O Friends! with whom my feet have trod
The quiet aisles of prayer,
Glad witness to your zeal for God
And love of man I bear.

I trace your lines of argument;
Your logic linked and strong
I weigh as one who dreads dissent,
And fears a doubt as wrong.

But still my human hands are weak
To hold your iron creeds:
Against the words ye bid me speak
My heart within me pleads.

Who fathoms the Eternal Thought?
Who talks of scheme and plan?
The Lord is God! He needeth not
The poor device of man.

I walk with bare, hushed feet the ground
Ye tread with boldness shod;
I dare not fix with mete and bound
The love and power of God.

Ye praise his justice; even such
His pitying love I deem:
Ye seek a king; I fain would touch
The robe that hath no seam.

Ye see the curse which overbroods
A world of pain and loss;
I hear our Lord's beatitudes
And prayer upon the cross.

More than your schoolmen teach, within
Myself, alas! I know:
Too dark ye cannot paint the sin,
Too small the merit show.

I bow my forehead to the dust,
I veil mine eyes for shame,
And urge, in trembling self-distrust,
A prayer without a claim.

I see the wrong that round me lies,
I feel the guilt within;
I hear, with groan and travail-cries,
The world confess its sin.

Yet, in the maddening maze of things,
And tossed by storm and flood,
To one fixed trust my spirit clings;
I know that God is good!

Not mine to look where cherubim
And seraphs may not see,
But nothing can be good in Him
Which evil is in me.

The wrong that pains my soul below
I dare not throne above,
I know not of his hate,—I know
His goodness and his love.

I dimly guess from blessings known
Of greater out of sight,
And, with the chastened Psalmist, own
His judgments too are right.

I long for household voices gone,
For vanished smiles I long,
But God hath led my dear ones on,
And He can do no wrong.

I know not what the future hath
Of marvel or surprise,
Assured alone that life and death
His mercy underlies.

And if my heart and flesh are weak
To bear an untried pain,
The bruisèd reed He will not break,
But strengthen and sustain.

No offering of my own I have,
Nor works my faith to prove;
I can but give the gifts He gave,
And plead his love for love.

And so beside the Silent Sea
I wait the muffled oar;
No harm from Him can come to me
On ocean or on shore.

19. **mete and bound**—legal term meaning boundary. 27. **beatitudes**—*Cf.* Matt. 5:3-12. 28. **prayer**—*Cf.* Luke 23:34. 55. **Psalmist**—*Cf.* Psalms 19:9. 67. **bruisèd reed**—*Cf.* Isa. 42:3.

I know not where his islands lift
Their fronded palms in air;
I only know I cannot drift
Beyond his love and care.

O brothers! if my faith is vain,
If hopes like these betray,
Pray for me that my feet may gain
The sure and safer way.

And Thou, O Lord! by whom are seen
Thy creatures as they be,
Forgive me if too close I lean
My human heart on Thee!

ABRAHAM DAVENPORT

First collected in *The Tent on the Beach and Other Poems* (1867). It retains this place in 1888-89 and 1892, where it is preceded by the following note:

"The famous Dark Day of New England, May 19, 1780, was a physical puzzle for many years to our ancestors, but its occurrence brought something more than philosophical speculation into the minds of those who passed through it. Abraham Davenport's sturdy protest is a matter of history."

The story may be found in J. W. Barber, *Connecticut Historical Collections*, New Haven, 1836, p. 407.

In the old days (a custom laid aside
With breeches and cocked hats) the people sent
Their wisest men to make the public laws.
And so, from a brown homestead, where the Sound
Drinks the small tribute of the Mianas,
Waved over by the woods of Rippowams,
And hallowed by pure lives and tranquil deaths,
Stamford sent up to the councils of the State
Wisdom and grace in Abraham Davenport.

'Twas on a May-day of the far old year
Seventeen hundred eighty, that there fell
Over the bloom and sweet life of the Spring,
Over the fresh earth and the heaven of noon,
A horror of great darkness, like the night
In day of which the Norland sagas tell,—
The Twilight of the Gods. The low-hung sky
Was black with ominous clouds, save where its rim
Was fringed with a dull glow, like that which climbs
The crater's sides from the red hell below.
Birds ceased to sing, and all the barn-yard fowls
Roosted; the cattle at the pasture bars
Lowed, and looked homeward; bats on leathern wings
Flitted abroad; the sounds of labor died;
Men prayed, and women wept; all ears grew sharp
To hear the doom-blast of the trumpet shatter
The black sky, that the dreadful face of Christ
Might look from the rent clouds, not as he looked
A loving guest at Bethany, but stern
As Justice and inexorable Law.

Meanwhile in the old State House, dim as ghosts,
Sat the lawgivers of Connecticut,
Trembling beneath their legislative robes.
"It is the Lord's Great Day! Let us adjourn,"
Some said; and then, as if with one accord,
All eyes were turned to Abraham Davenport.
He rose, slow cleaving with his steady voice
The intolerable hush. "This well may be
The Day of Judgment which the world awaits;
But be it so or not, I only know
My present duty, and my Lord's command
To occupy till He come. So at the post
Where He hath set me in his providence,
I choose, for one, to meet Him face to face,—
No faithless servant frightened from my task,
But ready when the Lord of the harvest calls;

5-6. **Mianas . . . Rippowams**—small rivers near Stamford, Connecticut. 15. **Norland**—Norse. 16. **Twilight of the Gods**—in Northern mythology, the Gotterdammerung, or passing of all things. 25. **trumpet**—*Cf.* Rev. Chapter 20. 28. **Bethany**—*Cf.* Matt. 26: 6-13. 30. **State House**—at Hartford.

And therefore, with all reverence, I would say,
Let God do his work, we will see to ours.
Bring in the candles." And they brought them in.

Then by the flaring lights the Speaker read,
Albeit with husky voice and shaking hands,
An act to amend an act to regulate
The shad and alewive fisheries. Whereupon
Wisely and well spake Abraham Davenport,
Straight to the question, with no figures of speech
Save the ten Arab signs, yet not without
The shrewd dry humor natural to the man:
His awe-struck colleagues listening all the while,
Between the pauses of his argument,
To hear the thunder of the wrath of God
Break from the hollow trumpet of the cloud.

And there he stands in memory to this day,
Erect, self-poised, a rugged face, half seen
Against the background of unnatural dark,
A witness to the ages as they pass,
That simple duty hath no place for fear.

IN SCHOOL-DAYS

This poem was first gathered into a volume in *Miriam and Other Poems* (1871), and also appeared in *Favorite Poems* (1877). In 1888-89 and 1892 it became part of "Poems Subjective and Reminiscent."

Still sits the school-house by the road,
A ragged beggar sleeping;
Around it still the sumachs grow,
And blackberry-vines are creeping.

Within, the master's desk is seen,
Deep scarred by raps official;
The warping floor, the battered seats,
The jack-knife's carved initial;

The charcoal frescoes on its wall;
Its door's worn sill, betraying
The feet that, creeping slow to school,
Went storming out to playing!

Long years ago a winter sun
Shone over it at setting;
Lit up its western window-panes,
And low eaves' icy fretting.

It touched the tangled golden curls,
And brown eyes full of grieving,
Of one who still her steps delayed
When all the school were leaving.

For near her stood the little boy
Her childish favor singled:
His cap pulled low upon a face
Where pride and shame were mingled.

Pushing with restless feet the snow
To right and left, he lingered;—
As restlessly her tiny hands
The blue-checked apron fingered.

He saw her lift her eyes; he felt
The soft hand's light caressing,
And heard the tremble of her voice,
As if a fault confessing.

"I'm sorry that I spelt the word:
I hate to go above you,
Because,"—the brown eyes lower fell,—
"Because, you see, I love you!"

Still memory to a gray-haired man
That sweet child-face is showing.
Dear girl! the grasses on her grave
Have forty years been growing!

He lives to learn, in life's hard school,
How few who pass above him
Lament their triumph and his loss,
Like her,—because they love him.

CENTENNIAL HYMN

First published as a broadside for the Philadelphia Exposition of 1876; then gathered

52. **alewive**—The alewife is a kind of fish. 55. **ten Arab signs**—the Arabic numerals. 1-2. **Still . . . sleeping**—The construction is confused: "like a sleeping ragged beggar, the school-house still sits by the roadside."

into the *Vision of Echard* volume (1878). In 1888-89 and 1892 it became one of the "Occasional Poems" and was preceded by this note:

"Written for the opening of the International Exhibition, Philadelphia, May 10, 1876. The music for the hymn was written by John K. Paine, and may be found in *The Atlantic Monthly* for June, 1876."

I

Our fathers' God! from out whose hand
The centuries fall like grains of sand,
We meet to-day, united, free,
And loyal to our land and Thee,
To thank Thee for the era done,
And trust Thee for the opening one.

II

Here, where of old, by thy design,
The fathers spake that word of Thine
Whose echo is the glad refrain
Of rended bolt and falling chain,
To grace our festal time, from all
The zones of earth our guests we call.

III

Be with us while the New World greets
The Old World thronging all its streets,
Unveiling all the triumphs won
By art or toil beneath the sun;
And unto common good ordain
This rivalship of hand and brain.

IV

Thou, who hast here in concord furled
The war flags of a gathered world,
Beneath our Western skies fulfil
The Orient's mission of good-will,
And, freighted with love's Golden Fleece,
Send back its Argonauts of peace.

V

For art and labor met in truce,
For beauty made the bride of use,
We thank Thee; but, withal, we crave
The austere virtues strong to save,
The honor proof to place or gold,
The manhood never bought nor sold!

VI

Oh make Thou us, through centuries long,
In peace secure, in justice strong;
Around our gift of freedom draw
The safeguards of Thy righteous law:
And, cast in some diviner mould,
Let the new cycle shame the old!

BURNING DRIFT-WOOD

First printed in *At Sundown* (1892) and afterwards in the collected editions.

Before my drift-wood fire I sit,
And see, with every waif I burn,
Old dreams and fancies coloring it,
And folly's unlaid ghosts return.

O ships of mine, whose swift keels cleft
The enchanted sea on which they sailed,
Are these poor fragments only left
Of vain desires and hopes that failed?

Did I not watch from them the light
Of sunset on my towers in Spain,
And see, far off, uploom in sight
The Fortunate Isles I might not gain?

Did sudden lift of fog reveal
Arcadia's vales of song and spring,
And did I pass, with grazing keel,
The rocks whereon the sirens sing?

Have I not drifted hard upon
The unmapped regions lost to man,
The cloud-pitched tents of Prester John,
The palace domes of Kubla Khan?

Did land winds blow from jasmine flowers,
Where Youth the ageless Fountain fills?

23. Golden Fleece—In Greek mythology Jason and his fellow explorers (the Argonauts) set out in quest of the Golden Fleece. **2. waif**—bit of picked-up wood. **14. Arcadia's**—See note 179, p. 662. **19. Prester John**—the fabulous magician-monarch of medieval fable. **20. Kubla Khan**—*Cf.* Coleridge's poem of that name. **21. jasmine flowers**—much celebrated in oriental lyric poetry. **22. Youth . . . Fountain**—the Fountain of Youth, sought in Florida by Ponce de Leon.

Did Love make sign from rose blown bowers,
And gold from Eldorado's hills?

Alas! the gallant ships that sailed
On blind Adventure's errand sent,
Howe'er they laid their courses, failed
To reach the haven of Content.

And of my ventures, those alone
Which Love had freighted, safely sped,
Seeking a good beyond my own,
By clear-eyed Duty piloted.

O mariners, hoping still to meet
The luck Arabian voyagers met,
And find in Bagdad's moonlit street,
Haroun al Raschid walking yet,

Take with you, on your Sea of Dreams,
The fair, fond fancies dear to youth.
I turn from all that only seems,
And seek the sober grounds of truth.

What matter that it is not May,
That birds have flown, and trees are bare,
That darker grows the shortening day,
And colder blows the wintry air!

The wrecks of passion and desire,
The castles I no more rebuild,
May fitly feed my drift-wood fire,
And warm the hands that age has chilled.

Whatever perished with my ships,
I only know the best remains;
A song of praise is on my lips
For losses which are now my gains.

Heap high my hearth! No worth is lost;
No wisdom with the folly dies.
Burn on, poor shreds, your holocaust
Shall be my evening sacrifice!

Far more than all I dared to dream,
Unsought before my door I see;
On wings of fire and steeds of steam
The world's great wonders come to me,

And holier signs, unmarked before,
Of Love to seek and Power to save,—
The righting of the wronged and poor,
The man evolving from the slave;

And life, no longer chance or fate,
Safe in the gracious Fatherhood.
I fold o'er-wearied hands and wait,
In full assurance of the good.

And well the waiting time must be,
Though brief or long its granted days,
If Faith and Hope and Charity
Sit by my evening hearth-fire's blaze.

And with them, friends whom Heaven has spared,
Whose love my heart has comforted,
And, sharing all my joys, has shared
My tender memories of the dead,—

Dear souls who left us lonely here,
Bound on their last, long voyage, to whom
We, day by day, are drawing near,
Where every bark has sailing room.

I know the solemn monotone
Of waters calling unto me;
I know from whence the airs have blown
That whisper of the Eternal Sea

As low my fires of drift-wood burn,
I hear that sea's deep sounds increase,
And, fair in sunset light, discern
Its mirage-lifted Isles of Peace.

THE CITY OF A DAY

First published in *The Stranger in Lowell* (1845), where it formed all of the first section, and part of the second. The pages of this book, said Whittier in the intro-

24. **Eldorado's**—See note 42, p. 745. 36. **Haroun al Raschid**—the caliph celebrated in the Arabian Nights.

duction, "are a transcript—too free and frank perhaps—of impressions made upon his mind by the common incidents of daily life." When putting together the *Prose Works* of 1866, Whittier fused together the two sections as indicated, dropping the latter part of section II ("The Heart of the Stranger") completely. In the collected editions the same arrangement was kept.

Leaders of New England thought viewed with admiration and alarm the advance of industrialism in that region, particularly at Lowell, Massachusetts, which seemed for a time to promise becoming a model mill village or town. To understand Whittier's allusions it is necessary to remember that Lowell stands on the Merrimac River at the mouth of the Concord. Around Pawtucket Falls a canal was built in 1804; and later (1822) a power dam was constructed by the Merrimack Manufacturing Co. In 1823 the first cloth was woven in the Lowell mills; and the town grew from 2,000 in 1826 to 18,000 in 1836. As the work in the mills attracted "female laborers," the corporation provided boarding-houses, and sought to look after the education and culture of the operatives. One expression was *The Lowell Offering* (1840-1845), a periodical edited by the factory girls. In 1840 the Irish commenced to come in, and were followed by other immigrants, as Whittier notes. Whittier's half-conscious prophecy of the sadder results of industrialism, mingled with his admiration of Yankee thrift and shrewdness, is typical of similar comment by Thoreau, Emerson, and other New Englanders.

THIS, then, is Lowell,—a city springing up, like the enchanted palaces of the Arabian tales, as it were in a single night, stretching far and wide its chaos of brick masonry and painted shingles, filling the angle of the confluence of the Concord and the Merrimac with the sights and sounds of trade and industry. Marvellously here have art and labor wrought their modern miracles. I can scarcely realize the fact that a few years ago these rivers, now tamed and subdued to the purposes of man and charmed into slavish subjection to the wizard of mechanism, rolled unchecked towards the ocean the waters of the Winnipesaukee and the rock-rimmed springs of the White Mountains, and rippled down their falls in the wild freedom of Nature. A stranger, in view of all this wonderful change, feels himself, as it were, thrust forward into a new century; he seems treading on the outer circle of the millennium of steam engines and cotton mills. Work is here the patron saint. Everything bears his image and superscription. Here is no place for that respectable class of citizens called gentlemen, and their much vilified brethren, familiarly known as loafers. Over the gateways of this new-world Manchester glares the inscription, "Work, or die!" Here

> "Every worm beneath the moon
> Draws different threads, and late or soon
> Spins, toiling out his own cocoon."

The founders of this city probably never dreamed of the theory of Charles Lamb in respect to the origin of labor:—

9. **Winnipesaukee**—Lake Winnipesaukee in New Hampshire (where the White Mountains are also located) drains into a tributary of the Merrimac. 16. **Manchester**—The building of the Manchester and Liverpool Railway in 1830 had led to a great "boom" in Manchester, which became one of the leading industrial centers in Great Britain.

"Who first invented work, and thereby bound
The holiday rejoicing spirit down
To the never-ceasing importunity
Of business in the green fields and the town?
Sabbathless Satan,—he who his unglad
Task ever plies midst rotatory burnings;
For wrath divine has made him like a wheel
In that red realm from whence are no returnings."

Rather, of course, would they adopt Carlyle's apostrophe of "Divine labor, noble, ever fruitful,—the grand, sole miracle of man;" for this is indeed a city consecrated to thrift,—dedicated, every square rod of it, to the divinity of work; the gospel of industry preached daily and hourly from some thirty temples, each huger than the Milan Cathedral or the Temple of Jeddo, the Mosque of St. Sophia or the Chinese pagoda of a hundred bells; its mighty sermons uttered by steam and water-power; its music the everlasting jar of mechanism and the organ-swell of many waters; scattering the cotton and woollen leaves of its evangel from the wings of steamboats and rail-cars throughout the land; its thousand priests and its thousands of priestesses ministering around their spinning-jenny and power-loom altars, or thronging the long, unshaded streets in the level light of sunset. After all, it may well be questioned whether this gospel, according to Poor Richard's Almanac, is precisely calculated for the redemption of humanity. Labor, graduated to man's simple wants, necessities, and unperverted tastes, is doubtless well; but all beyond this is weariness to flesh and spirit. Every web which falls from these restless looms has a history more or less connected with sin and suffering, beginning with slavery and ending with overwork and premature death.

A few years ago, while travelling in Pennsylvania, I encountered a small, dusky-browed German of the name of Etzler. He was possessed by a belief that the world was to be restored to its paradisiacal state by the sole agency of mechanics, and that he had himself discovered the means of bringing about this very desirable consummation. His whole mental atmosphere was thronged with spectral enginery; wheel within wheel; plans of hugest mechanism; Brobdignagian steam-engines; Niagaras of water-power; wind-mills with "sail-broad vans," like those of Satan in chaos, by the proper application of which every valley was to be exalted and every hill laid low; old forests seized by their shaggy tops and uprooted; old morasses drained; the tropics made cool; the eternal ices melted around the poles; the ocean itself covered with artificial islands, blossoming gardens of the blessed, rocking gently on the bosom of the deep. Give him "three hundred thousand dollars and ten years' time," and he would undertake to do the work. Wrong, pain, and sin, being in his view but the results of our physical necessities, ill-gratified desires, and natural

1-8. **"Who first . . . returnings"**—Whittier quotes from memory, and badly mangles, Lamb's sonnet "Work," which begins "Who first invented work and bound the free." 9-10. **"Divine . . . man"**—a reminiscence of passages in Bk. III of Carlyle's *Past and Present* (1843). 17. **evangel**—message of good tidings. 21. **gospel . . . Poor Richard's**—that is, such self-regarding maxims as "A penny saved is a penny earned." 33. **Brobdignagian**—huge; from the second part of *Gulliver's Travels*. 34. **"sail-broad vans"**—*Cf. Paradise Lost*, Bk. II, line 927. 35. **valley . . . low**—*Cf.* Isa. 40:4.

yearnings for a better state, were to vanish before the millennium of mechanism. "It would be," said he, "as ridiculous then to dispute and quarrel about the means of life as it would be now about water to drink by the side of mighty rivers, or about permission to breathe the common air." To his mind the great forces of Nature took the shape of mighty and benignant spirits, sent hitherward to be the servants of man in restoring to him his lost paradise; waiting only for his word of command to apply their giant energies to the task, but as yet struggling blindly and aimlessly, giving ever and anon gentle hints, in the way of earthquake, fire, and flood, that they are weary of idleness, and would fain be set at work. Looking down, as I now do, upon these huge brick workshops, I have thought of poor Etzler, and wondered whether he would admit, were he with me, that his mechanical forces have here found their proper employment of millennium making. Grinding on, each in his iron harness, invisible, yet shaking, by his regulated and repressed power, his huge prisonhouse from basement to capstone, is it true that the genii of mechanism are really at work here, raising us, by wheel and pulley, steam and water-power, slowly up that inclined plane from whose top stretches the broad table-land of promise?

Many of the streets of Lowell present a lively and neat aspect, and are adorned with handsome public and private buildings; but they lack one pleasant feature of older towns,—broad spreading shade-trees. One feels disposed to quarrel with the characteristic utilitarianism of the first settlers, which swept so entirely away the green beauty of Nature. For the last few days it has been as hot here as Nebuchadnezzar's furnace or Monsieur Chabert's oven, the sun glaring down from a copper sky upon these naked, treeless streets, in traversing which one is tempted to adopt the language of a warm-weather poet:—

> "The lean, like walking skeletons, go stalking pale and gloomy;
> The fat, like redhot warming pans, send hotter fancies through me;
> I wake from dreams of polar ice, on which I've been a slider,
> Like fishes dreaming of the sea and waking in the spider."

How unlike the elm-lined avenues of New Haven, upon whose cool and graceful panorama the stranger looks down upon the Judge's Cave, or the vine-hung pinnacles of West Rock, its tall spires rising white and clear above the level greenness!—or the breezy leafiness of Portland, with its wooded islands in the distance, and itself overhung with verdant beauty, rippling and waving in the same cool breeze which stirs the waters of the beautiful Bay of Casco! But time will remedy all this; and, when Lowell shall have numbered half the years of her sister cities, her newly planted elms and maples, which now only cause us to contrast their shadeless stems with the leafy glory of their parents of the forest, will stretch out to the future visitor arms of welcome and repose.

There is one beautiful grove in Lowell,—that on Chapel Hill,—where a cluster of fine old oaks lift their sturdy stems and green branches, in close proximity to the crowded city, blending the cool rustle of their leaves with the din of machinery. As I look at them in this gray twilight they seem lonely and isolated, as if wondering what has become of their old forest companions,

23. **furnace**—*Cf.* Dan. 2:19 ff. **Monsieur Chabert** was Master Chiffinch's cook in Scott's *Peveril of the Peak*, Ch. 22.

and vainly endeavoring to recognize in the thronged and dusty streets before them those old, graceful colonnades of maple and thick-shaded oaken vistas, stretching from river to river, carpeted with the flowers and grasses of spring, or ankle deep with leaves of autumn, through whose leafy canopy the sunlight melted in upon wild birds, shy deer, and red Indians. Long may these oaks remain to remind us that, if there be utility in the new, there was beauty in the old, leafy Puseyites of Nature, calling us back to the past, but, like their Oxford brethren, calling in vain; for neither in polemics nor in art can we go backward in an age whose motto is ever "Onward."

The population of Lowell is constituted mainly of New Englanders; but there are representatives here of almost every part of the civilized world. The good-humored face of the Milesian meets one at almost every turn; the shrewdly solemn Scotchman, the transatlantic Yankee, blending the crafty thrift of Bryce Snailsfoot with the stern religious heroism of Cameron; the blue-eyed, fair-haired German from the towered hills which overlook the Rhine,—slow, heavy, and unpromising in his exterior, yet of the same mould and mettle of the men who rallied for "fatherland" at the Tyrtean call of Korner and beat back the chivalry of France from the banks of the Katzback,—the countrymen of Richter, and Goethe, and our own Follen. Here, too, are pedlers from Hamburg, and Bavaria, and Poland, with their sharp Jewish faces, and black, keen eyes. At this moment, beneath my window are two sturdy, sunbrowned Swiss maidens grinding music for a livelihood, rehearsing in a strange Yankee land the simple songs of their old mountain home, reminding me, by their foreign garb and language, of

"Lauterbrunnen's peasant girl."

Poor wanderers! I cannot say that I love their music; but now, as the notes die away, and, to use the words of Dr. Holmes, "silence comes like a poultice to heal the wounded ear," I feel grateful for their visitation. Away from crowded thoroughfares, from brick walls and dusty avenues, at the sight of these poor peasants I have gone in thought to the vale of Chamouny, and seen, with Coleridge, the morning star pausing on the "bald, awful head of sovereign Blanc," and the sun rise and set upon snowy-crested mountains, down in whose

7. **Puseyites**—followers of Edward B. Pusey (1800-1882), one of the leaders of the Oxford movement, which sought to revive the spiritual life of the Anglican Church by a return to theological practices of the early centuries. 12. **Milesian**—Irishman. 13. **transatlantic Yankee**—in apposition to Scotchman. 14. **Bryce Snailsfoot**—shifty peddler in *The Pirate* by Sir Walter Scott. 14. **Cameron**—Richard Cameron, founder of an extreme sect of the Covenanters, who appears in *Old Mortality* by Sir Walter Scott. 17. **Tyrtean**—The Spartans, being instructed by an oracle to choose a general from the Athenians, selected in derision the lame schoolmaster Tyrtaeus; but his martial lyrics proved so inspiring as to make the Spartans victorious. 17. **Korner**—Karl Theodor Korner (1791-1813), killed in battle, whose volume of patriotic lyrics, *Leier und Schwert* (1814), roused German nationalism against Napoleon. 18. **Katzback**—At the Battle of Katzback Blucher, with 90,000 troops, defeated 100,000 Frenchmen, Aug. 26, 1813. 18. **Richter**—Jean Paul Richter (1763-1825), German romantic humorist. 19. **Goethe**—Johann Wolfgang von Goethe (1749-1832), much admired by the New England poets of the period. 19. **Follen**—Charles Theodore Christian Follen (1795-1840), German-born educator and preacher. 27-28. **silence . . . ear**—

"And silence, like a poultice, comes
To heal the blows of sound."
—Oliver Wendell Holmes, "The Music-Grinders."

30-32. **Chamouny . . . Blanc**—*Cf.* Coleridge's poem, "Hymn before Sunrise in the Vale of Chamouni." Coleridge's line is: "On thy bald awful head, O sovran Blanc!"

valleys the night still lingers; and, following in the track of Byron and Rousseau, have watched the lengthening shadows of the hills on the beautiful waters of the Genevan lake. Blessings, then, upon these young wayfarers, for they have "blessed me unawares." In an hour of sickness and lassitude they have wrought for me the miracle of Loretto's Chapel, and borne me away from the scenes around me and the sense of personal suffering to that wonderful land where Nature seems still uttering, from lake and valley, and from mountains whose eternal snows lean on the hard, blue heaven, the echoes of that mighty hymn of a new-created world, when "the morning stars sang together, and all the sons of God shouted for joy."

But of all classes of foreigners the Irish are by far the most numerous. Light-hearted, wrong-headed, impulsive, uncalculating, with an Oriental love of hyperbole, and too often a common dislike of cold water and of that gem which the fable tells us rests at the bottom of the well, the Celtic elements of their character do not readily accommodate themselves to those of the hard, cool, self-relying Anglo-Saxon. I am free to confess to a very thorough dislike of their religious intolerance and bigotry, but am content to wait for the change that time and the attrition of new circumstances and ideas must necessarily make in this respect. Meanwhile I would strive to reverence man as man, irrespective of his birthplace. A stranger in a strange land is always to me an object of sympathy and interest. Amidst all his apparent gayety of heart and national drollery and wit, the poor Irish emigrant has sad thoughts of the "ould mother of him," sitting lonely in her solitary cabin by the bog-side; recollections of a father's blessing and a sister's farewell are haunting him; a grave mound in a distant churchyard far beyond the "wide wathers" has an eternal greenness in his memory; for there, perhaps, lies a "darlint child" or a "swate crather" who once loved him. The new world is forgotten for the moment; blue Killarney and the Liffey sparkle before him, and Glendalough stretches beneath him its dark, still mirror; he sees the same evening sunshine rest upon and hallow alike with Nature's blessing the ruins of the Seven Churches of Ireland's apostolic age, the broken mound of the Druids, and the round towers of the Phoenician sun-worshippers; pleasant and mournful recollections of his home waken within him; and the rough and seemingly careless and lighthearted laborer melts into tears. It is no light thing to abandon one's own country and household gods. Touching and beautiful was the injunction of the prophet of the Hebrews: "Ye shall not oppress the stranger; *for ye know the heart of the stranger,* seeing that ye were strangers in the land of Egypt."

1. **Byron and Rousseau**—*Cf. Childe Harold's Pilgrimage,* Canto III, stanzas LXXXV ff. 4. **"blessed . . . unawares"**—*Cf.* Coleridge's *The Ancient Mariner,* Pt. IV, stanza XIV, last line. 5. **Loretto's Chapel**—a chapel near Ancona, Italy, noted for its supposed miraculous cures. 9-10. **"the morning stars . . . joy"**—*Cf.* Job 38:7. 17. **religious . . . bigotry**—The intrusion of Roman Catholic Irish into Protestant Massachusetts naturally aroused religious friction. 28. **Killarney**—The Lakes of Killarney are among the most beautiful in Ireland. 28. **Liffey**—the river Liffey, on which Dublin stands. 28. **Glendalough**—famous Irish lake. 30. **Seven Churches**—In the early ages in Ireland churches were often built in groups of seven; hence the phrase "the Seven Churches of Glendalough. 31. **mound . . . Druids**—Certain mounds in Ireland were, when Whittier wrote, supposed to be associated with Druidic rites. 31. **round towers**—The round towers found in Ireland, long a source of controversy to archaeologists, and now known to be of Christian origin, were once supposed to mark a Phoenician invasion. 35. **prophet**—*Cf.* Ex. 33:9.

EDGAR ALLAN POE

1809-1849

I. A YOUNG VIRGINIA "GENTLEMAN" (1809–1827)

1809 Born January 19, in Boston, second son of David and Elizabeth Arnold Poe, actors. After July, 1810, the father disappeared.

1810 Mrs. Poe went to Richmond with her infant son, dying there December 8, 1811. Young Edgar taken into the family of John and Frances Keeling Allan. John Allan became Poe's legal guardian, but never formally adopted him.

1815–1820 The Allans took Poe to England and Scotland, Poe attending a number of schools, especially Manor House School at Stoke Newington (1817-20).

1820–1826 Poe led the life of a Richmond boy of good social standing, tutoring, reading much contemporary (romantic) literature, and falling in love with Jane Stith Stanard ("Helen, thy beauty is to me") and Sarah Elmira Royster, to whom he was "engaged." Growing antagonism between Poe and John Allan.

1826 February, Poe matriculated at the University of Virginia, whence he was compelled to withdraw at Christmas, 1827, because of the refusal of his guardian to make good his gambling debts.

1826–1827 Poe discovered that Sarah Elmira Royster was to marry another man. After quarreling with John Allan, he left the Allan home (March 19, 1827), eventually going to Boston (April, 1827).

II. THE SOLDIER OF FORTUNE (1827–1831)

1827 Poe published anonymously in the spring, from the printing press of a young friend in Boston, *Tamerlane and Other Poems. By a Bostonian.*

1827 May 26, enlisted in the United States Army (Battery H, First Artillery) as Edgar A. Perry. On October 31, 1827, the battery was transferred to Fort Moultrie on Sullivan's Island, in the harbor of Charleston, South Carolina. Sent to Fortress Monroe, Virginia, December, 1828.

1829 Poe promoted to be regimental sergeant-major. Upon the death of Mrs. Allan (February 28, 1829), Poe returned briefly to Richmond; attempt at reconciliation with Allan. Poe discharged from the army April 15, 1829.

While John Allan sought to have Poe appointed to West Point, Poe struggled to begin his literary career in Baltimore, living (August, 1829) in the house of Mrs. Maria Clemm, mother of Virginia, Poe's cousin.

Published in Baltimore in December *Al Aaraaf, Tamerlane, and Minor Poems. By Edgar A. Poe.*

1829–1830 Brief return to Richmond; violent quarrel with John Allan (May, 1830). Left Richmond (May or June) for West Point, which he entered July 1, 1830.

1830–1831 Unhappy at West Point, Poe continued writing, and deliberately neglected his duties as a cadet in order to be court-martialed and discharged (March 6, 1831, though he left February 19).

III. HACK-WRITER AND GENIUS (1831–1844)

1831 February 20, arrived in New York City. Published *Poems* ("Second Edition") in March. Returned to Baltimore, and the Clemm household, where he lived surrounded by poverty, illness, and debt.

1832 A futile return to Richmond, where Mr. Allan had married again, ended Poe's relations with his guardian. Mr. Allan died March 27, 1834. Five of Poe's tales published in the *Philadelphia Saturday Courier.*

1833 October 12, Poe awarded a prize of $100 by the Baltimore *Saturday Visiter* for *The MS. Found in a Bottle.*

1834–1835 Poe in desperate circumstances; befriended by John Pendleton Kennedy, who was instrumental in calling him to the attention of Thomas W. White, editor of the *Southern Literary Messenger.*

1835 In August, Poe returned to Richmond to join the staff of the foregoing magazine, a position which, except for certain periods, he held to January, 1837.

1835 September 22, Poe secretly married his cousin Virginia. A second, public ceremony took place in Richmond May 16, 1836, Virginia being then thirteen.

1836 Despite incessant labors on the *Southern Literary Messenger,* notably as a critic of contemporary literature, Poe felt circumscribed and unsuccessful, and in December resolved to go North.

1837 Poe took his family to New York City in February. A second burst of creative energy began with this remove.

1838 Poe published *The Narrative of Arthur Gordon Pym* (July). In the summer, the Poes removed to Philadelphia, where the poet eventually became editor with William E. Burton of the latter's *Gentleman's Magazine* (July, 1839), but the connection was not lasting.

1839 Poe published in Philadelphia in two volumes *Tales of the Grotesque and Arabesque* (dated on title-pages 1840).

1841 Poe's association with *Graham's Magazine* began (January), to which he contributed much of his best work (to April, 1842).

1843 Poe struggled to establish a magazine of his own, but the project failed.

1844 The Poes left Philadelphia (April) for New York. Virginia Clemm Poe in increasingly bad health. Poe labored at hack work.

IV. THE AUTHOR OF "THE RAVEN" (1844–1849)

1844 Poe laboring at hack work for the New York *Evening Mirror,* edited by Nathaniel P. Willis.

1845 "The Raven" published February 8 in the *Evening Mirror.* Poe sprang into popular fame. (First "official" appearance of the poem.)

1845–1846 Poe at work on the *Broadway Journal.* Beginning of his association with Frances Sargent Osgood and other "literati."

1845 Publication of *Tales* (June). Poe first met Mrs. Sarah Helen Whitman. Publication (later in the year) of *The Raven and Other Poems.*

1846 The Poes, after many changes of residence, removed to Fordham.

1847 January 30, Virginia Poe died.

1848 Poe published *Eureka: A Prose Poem.* Beginning of emotional and sentimental relations with romantic women, especially Mrs. Whitman, with whom a marriage contract (never fulfilled) was drawn up (December 15, 1848).

1849 Poe went to Richmond (July). Died, in mysterious circumstances, Baltimore, October 7, 1849.

BIBLIOGRAPHY AND EDITIONS: Charles F. Heartman, *A Bibliography of First Printings of the Writings of Edgar Allan Poe,* Hattiesburg, Miss., The Book Farm, 1943.

Works of Edgar Allan Poe, ed. by E. C. Stedman and G. E. Woodberry, Stone & Kimball, 1894-95, 10 vols., Scribner, 1914; *Complete Works of Edgar Allan Poe,* ed. by J. A. Harrison, Crowell, 1902, 17 vols. (the Virginia edition, usually regarded as the best; Vols. I and XVII are biographical); besides these two standard editions there are innumerable other editions of varying degrees of trustworthiness. John W. Ostrom, ed., *Letters of Edgar Allan Poe,* Cambridge, Mass., 1948, 2 vols. (supersedes all other collections of letters). *The Poems of Edgar Allan Poe,* ed. by Killis Campbell, Ginn, 1917, is the best one-volume edition of the poems. *Poe's Short Stories,* ed. by Killis Campbell, Harcourt, Brace, 1927 (American Authors). The most usable one-volume book of selections is *The Book of Poe,* ed. by Addison Hibbard, Doubleday, Doran, 1929. However, see also the selections ed. Margaret Alterton and Hardin Craig (American Writers Series), American Book Co., 1935.

The greatest representative of the American romantic movement in point of influence and popularity, Poe has suffered from an enveloping mist of legend which he himself helped to create. A hard-working journalist who turned out thousands of words of copy was combined in him with a genius of febrile and dreamy temperament; and this personality developed amidst disastrous private surroundings and in a period of American literature which combined reverence for the sentimental with indifference to the real demands of the artist upon his time and his readers. The result was the Poe tragedy.

As Poe falls into perspective, the conflict between the America of his day and his own temperament more markedly appears, and he becomes not so much a mysterious spirit from another world as an imperfect human being born out of his

due time and therefore in conflict with his times. He was a child of romance; but he combined with his "phantasmagoric" imagination a mathematical lucidity of statement which must be reckoned with. Therefore it was that he revolved around the problem of science in modern life, seeking by some short cut, some feat of mental prestidigitation, to solve the mysteries of existence by the application of pseudo-scientific formulae. From phrenology to botany, from mathematics to mysticism his restless spirit wandered, rationalizing his disappointments in actual life into dreams of gigantic intellectual attainments. A self-conscious artist, he strove continually to better his own technique, especially in the short story—a genre with which his name is immortally associated—and in the poem which seeks by blurred image and verbal melody to hypnotize the reader into a willing suspension of disbelief.

Because of the importance of Poe's development as a craftsman, the editors have broken their rule of giving only the definitive text of the selections printed, and have included variant readings to permit a study of Poe at work revising his material.

A DREAM WITHIN A DREAM

In the *Tamerlane* volume (1827), the germ of this poem, entitled "Imitation," is a poem of twenty lines, the main resemblance of which to the final version is in the meter. In the *Al Aaraaf* volume (1829) the poem has become "To —— ——" and is composed of forty lines divided into four unequal stanzas. Lines 12-17 of the final version, with some slight alterations in phraseology, form the first six lines of stanza three of the 1829 version. Omitted from the *Poems* of 1831 and from the *Raven* volume of 1845, this poem received its final revision upon its appearance in *Flag of Our Union* (1849). The present text is that of Griswold's edition of the *Works* (1850).

Take this kiss upon the brow!
And, in parting from you now,
Thus much let me avow—
You are not wrong, who deem
That my days have been a dream;
Yet if hope has flown away
In a night, or in a day,
In a vision, or in none,
Is it therefore the less *gone?*
All that we see or seem
Is but a dream within a dream.

I stand amid the roar
Of a surf-tormented shore,
And I hold within my hand
Grains of the golden sand—
How few! yet how they creep
Through my fingers to the deep,
While I weep—while I weep!
O God! can I not grasp
Them with a tighter clasp?
O God! can I not save
One from the pitiless wave?
Is *all* that we see or seem
But a dream within a dream?

SONG FROM "AL AARAAF"

"Al Aaraaf," the title poem of the volume of that name (1829), is a confused allegorical poem which neither a revision in 1831 nor a return to the original version in 1845 did much to clarify. The maiden Nesace, type of ideal beauty, lives in Al Aaraaf, the burning star observed by the astronomer Tycho Brahe. The wrath of God is expressed against her because men have imagined a "model" of his infinity; wherefore Nesace is ordered to leave Al Aaraaf and fly across the heavens

"and so be
To every heart a barrier and a ban
Lest the stars totter in the guilt of man"—

apparently man's low idea of God and beauty. At the conclusion of Part I Nesace begins her journey. In Part II she comes to one of Poe's amazing temples "out of space, out of time," whence she addresses the lyric here reprinted.

'Neath blue-bell or streamer—
  Or tufted wild spray
That keeps, from the dreamer
  The moonbeam away—
Bright beings! that ponder,
  With half closing eyes,
On the stars which your wonder
  Hath drawn from the skies,
'Till they glance thro' the shade, and
  Come down to your brow
Like —— eyes of the maiden
  Who calls on you now—
Arise! from your dreaming
  In violet bowers,
To duty beseeming
  These star-litten hours—
And shake from your tresses
  Encumber'd with dew
The breath of those kisses
  That cumber them too—
(O! how, without you, Love!
  Could angels be blest?)
Those kisses of true love
  That lull'd ye to rest!
Up!—shake from your wing
  Each hindering thing:
The dew of the night—
  It would weigh down your flight;
And true love caresses—
  O! leave them apart!
They are light on the tresses,
  But lead on the heart.

Ligeia! Ligeia!
  My beautiful one!
Whose harshest idea
  Will to melody run,
O! is it thy will
  On the breezes to toss?
Or, capriciously still,
  Like the lone Albatross,
Incumbent on night
  (As she on the air)
To keep watch with delight
  On the harmony there?

Ligeia! wherever
  Thy image may be,
No magic shall sever
  Thy music from thee:
Thou hast bound many eyes
  In a dreamy sleep—
But the strains still arise
  Which *thy* vigilance keep—
The sound of the rain
  Which leaps down to the flower,
And dances again
  In the rhythm of the shower—
The murmur that springs
  From the growing of grass
Are the music of things—
  But are modell'd, alas!—
Away, then, my dearest,
  O! hie thee away

4. moonbeam—"In Scripture is this passage—'The sun shall not harm thee by day, nor the moon by night.' It is perhaps not generally known that the moon, in Egypt, has the effect of producing blindness to those who sleep with the face exposed to its rays, to which circumstance the passage evidently alludes." (Poe's note) **5. Bright beings!**—followers of Nesace, who have followed her from Al Aaraaf to the temple. **7. wonder**—The general drift of the passage is to show forth mystically the relation between the human desire of beauty and the various beautiful aspects of the universe, especially the night stars. **11. maiden**—Nesace, who speaks the whole lyric. **14. violet bowers**—Poe pictures Nesace's home on Al Aaraaf as a bower of flowers. **21-22.** In the first version of "Al Aaraaf" the parentheses were replaced by square brackets throughout the poem. —Having addressed the beings of her train generally, Nesace (Beauty) now calls specifically upon Love to rise above human imperfections (**Each hindering thing**). **24.** Until the final version, the place of the exclamation point was taken by a colon. **30.** Until the final version, the place of the exclamation point was taken by a comma. The general meaning is: The caresses of imperfect human love weigh down the ideal concepts of which man is capable. **33. Ligeia!**—the personification of the harmony of nature. One of the sirens was so named. **40. Albatross**—"The Albatross is said to sleep on the wing." (Poe's note) **45-60.** The general sense of this passage is that no magic shall intervene to prevent the poet's seeing ideal beauty and harmony, even though many are dead to the vision. The sound of rain, and other natural objects of beauty, are proof that Ligeia (natural harmony) is still watching over the earth, though these phenomena are "modell'd"—that is, take form in imperfect finite modes of being. **57. murmur**—"I met with this idea in an old English tale, which I am now unable to obtain[,] and quote from memory:—'The verie essence and, as it were, springe-heade and origine of all musiche is the verie pleasaunte sounde which the trees of the forest do make when they growe.'" (Poe's note)

To springs that lie clearest
  Beneath the moon ray—
To lone lake that smiles,
  In its dream of deep rest,
At the many star-isles
  That enjewel its breast—
Where wild flowers, creeping,
  Have mingled their shade,
On its margin is sleeping
  Full many a maid—
Some have left the cool glade, and
  Have slept with the bee—
Arouse them, my maiden,
  On moorland and lea—
Go! breathe on their slumber,
  All softly in ear,
The musical number
  They slumber'd to hear—
For what can awaken
  An angel so soon,
Whose sleep hath been taken
  Beneath the cold moon,
As the spell which no slumber
  Of witchery may test,
The rhythmical number
  Which lull'd him to rest?

ROMANCE

In the *Al Aaraaf* volume (1829) this was ntitled "Preface," and the text was very close o the final version. In the 1831 volume the itle was changed to "Introduction," and the oem was expanded to sixty-six lines. The inal version returned to the *Al Aaraaf* poem in length, but kept certain changes brought in by the 1831 poem.

Romance, who loves to nod and sing,
With drowsy head and folded wing,
Among the green leaves as they shake
Far down within some shadowy lake,
To me a painted paroquet
Hath been—a most familiar bird—
Taught me my alphabet to say—
To lisp my very earliest word
While in the wild wood I did lie,
A child—with a most knowing eye.

Of late, eternal Condor years
So shake the very Heaven on high
With tumult as they thunder by,
I have no time for idle cares
Through gazing on the unquiet sky.
And when an hour with calmer wings
Its down upon my spirit flings—
That little time with lyre and rhyme
To while away—forbidden things!
My heart would feel to be a crime
Unless it trembled with the strings!

SONNET—TO SCIENCE

This sonnet is properly the introduction to "Al Aaraaf," to which it is the key, and by Poe was always printed just before that poem. Conventional usage has led editors to divorce it from its proper setting. The version in the *Al Aaraaf* volume (1829) was reprinted, with

74. slept . . . bee—"The wild bee will not sleep in the shade if there be moonlight. "The rhyme in this verse, as in one about sixty lines before, has an appearance of affectation. It is, however, imitated from Sir W. Scott, or rather from Claud Halcro—in whose mouth I admired its effect:

"O! were there an island,
  Tho' ever so wild
Where woman might smile, and
  No man be beguil'd, &c." (Poe's note)

9. The final comma was introduced in the 1845 version. **11.** "O, then the eternal Condor years" (1831). The condor figures much in South American poetry, but apparently makes its first appearance in English verse with Thomas Campbell's "Power of Russia" (1837). Poe therefore precedes Campbell. **12.** "So shake the very air on high" (1829); "So shook the very Heavens on high" (1831). **13.** "With tumult as they thunder'd by" (1831). **14.** "I hardly have had time for cares" (1829); "I had no time for idle cares" (1831). **15.** "Thro' gazing on th' unquiet sky!" (1829). **16.** "And, when an hour with calmer wings" (1829); "Or if an hour with calmer wing" (1831). **17.** "Its down did on my spirit fling" (1831). **18.** "That little hour with lyre and rhyme" (1831). **19.** "To while away—forbidden thing!" (1831). **20.** "My heart half fear'd to be a crime" (1831). **21.** "Did it not tremble with the strings!" (1829).

one slight change in punctuation, in the 1831 volume; but the final version shows certain important changes.

Science! true daughter of Old Time thou art!
Who alterest all things with thy peering eyes.
Why preyest thou thus upon the poet's heart,
Vulture, whose wings are dull realities?
How should he love thee? or how deem thee wise,
Who wouldst not leave him in his wandering
To seek for treasure in the jewelled skies,
Albeit he soared with an undaunted wing?
Hast thou not dragged Diana from her car?
And driven the Hamadryad from the wood
To seek a shelter in some happier star?
Hast thou not torn the Naiad from her flood,
The Elfin from the green grass, and from me
The summer dream beneath the tamarind tree?

TO HELEN

"Helen" was Jane Stith Stanard, concerning whom see Hervey Allen, *Israfel,* Vol. I, pp. 106 ff. The poem in its first shape may be found in the 1831 volume, and its final version in 1845.

Helen, thy beauty is to me
  Like those Nicéan barks of yore,
That gently, o'er a perfumed sea,
  The weary, way-worn wanderer bore
  To his own native shore.
On desperate seas long wont to roam,
  Thy hyacinth hair, thy classic face,
Thy Naiad airs have brought me home
  To the glory that was Greece,
  And the grandeur that was Rome.

Lo! in yon brilliant window-niche
  How statue-like I see thee stand,
The agate lamp within thy hand!
  Ah, Psyche, from the regions which
  Are Holy-Land!

ISRAFEL

This poem first appears in the 1831 volume, where it has the same number of stanzas as in the final version, which, however, is expanded and changed from the earlier one. In general, Israfel is symbolic of the romantic ideal of the poet. Poe adds a footnote to the title as follows: "And the angel Israfel, [whose heart-strings are a lute, and] who has the sweetest voice of all God's creatures—KORAN." The passage in brackets first appears in 1845, and the phrase is derived from Moore's *Lalla Rookh.*

In Heaven a spirit doth dwell
  "Whose heart-strings are a lute;"
None sing so wildly well
As the angel Israfel,
And the giddy stars (so legends tell),
Ceasing their hymns, attend the spell
  Of his voice, all mute.

1. "Science! meet daughter of old Time thou art" (1831). 3. "Why prey'st . . ." (1831). 4. "Vulture! whose wings are dull realities!" (1831). 5. "How should he love thee—or how deem thee wise" (1831). 6. 1831 has a comma at the end of the line. 7. "jewell'd" (1831). 8. "Albeit he soar with an undaunted wing" (1831); "Albeit, he soar . . ." (1829). 9. "dragg'd" (1831). 1831 has a comma at the end of the line. 10. **driven**—"driv'n" (1831).—Apparently Nesace is such a Hamadryad in "Al Aaraaf," driven to seek shelter in that star. 12. "The gentle Naiad from her fountain flood?" (1831). 13. "The elfin from the green grass? and from me" (1831). 14. "beneath the shrubbery" (1831). The **tamarind,** which lifts the line from commonplace into magic, is a purely "literary" tree, so far as Poe's experience is concerned. 2. **Nicéan**—Poe probably picked up this musical adjective from the Latin poetry of Catullus. See J. J. Jones, "Poe's 'Nicéan Barks,'" *American Literature,* Vol. II, pp. 433-38. 7. **hyacinth**—"Hyacinthine" is a Homeric epithet for hair, apparently meaning "golden." But in "Ligeia" (p. 701, line 33) Poe makes it mean "raven-black." 9. "To the beauty of fair Greece," (1831). 10. "And the grandeur of old Rome." (1831). 11. "Lo! in that little window-niche" (1831). 13. "The golden scroll within thy hand—" (1831). 14. "A Psyche form . . ." (1831). 15. "Holy land!" (1831). 5-7. In 1831 this passage was simply "And the giddy stars are mute."

Tottering above
In her highest noon,
The enamoured moon
Blushes with love,
While, to listen, the red levin
(With the rapid Pleiads, even,
Which were seven)
Pauses in Heaven.

And they say (the starry choir
And the other listening things)
That Israfeli's fire
Is owing to that lyre
By which he sits and sings—
The trembling living wire
Of those unusual strings.

But the skies that angel trod,
Where deep thoughts are a duty—
Where Love's a grown-up God—
Where the Houri glances are
Imbued with all the beauty
Which we worship in a star.

Therefore thou art not wrong,
Israfeli, who despisest
An unimpassioned song;
To thee the laurels belong,
Best bard, because the wisest!
Merrily live, and long!

The ecstasies above
With thy burning measures suit—
Thy grief, thy joy, thy hate, thy love,
With the fervour of thy lute—
Well may the stars be mute!

Yes, Heaven is thine; but this
Is a world of sweets and sours;
Our flowers are merely—flowers,
And the shadow of thy perfect bliss
Is the sunshine of ours.

If I could dwell
Where Israfel
Hath dwelt, and he where I,
He might not sing so wildly well
A mortal melody,
While a bolder note than this might swell
From my lyre within the sky.

THE CITY IN THE SEA

In the 1831 volume this poem was called "The Doomed City," ran to fifty-eight lines, and was divided into six stanzaic divisions. There are, in addition, many important textual variations.

Lo! Death has reared himself a throne
In a strange city lying alone
Far down within the dim West,
Where the good and the bad and the worst and the best
Have gone to their eternal rest.

12. **levin**—lightning, rapid flame. 13-14. These do not appear in 1831. Why Poe refers to the Pleiads as **rapid** does not appear. They were seven sisters, according to myth, one of whom became invisible through shame at having had intercourse with a mortal. Poe's reference, of course, is to the constellation named after them. 17. "And all the listening things" (1831). 20-21. These lines do not appear in 1831. 22. **Of**—"With" (1831). 23. **skies**—"Heavens" (1831). 25. "Where Love is a grown god—" (1831). 26. 1831 omits "the." After line 26, 1831 inserted the line: "—Stay! turn thine eyes afar!—" 28. **a**—1831 reads "yon." 29. "Thou are not, therefore, wrong" (1831). 33. "Best bard,—because the wisest." (1831). The following line is omitted in the earlier version. 35. **ecstasies**—"extacies" (1831). 37. "Thy grief—if any—thy love" (1831). 40. **thine;**—"thine:" (1831). 41. 1831 ends this line with a colon. 43. 1831 omits "perfect." 45-51. "If I did dwell where Israfel
Hath dwelt, and he where I,
He could not sing one half as well—
One half as passionately,
And a stormier note than this would swell
From my lyre within the sky." (1831)

1. **has**—"hath rear'd" (1831). 2. **lying**—"all" (1831). 3. **West**—"west" (1831). 4. **Where**—"And" (1831).

There shrines and palaces and towers
(Time-eaten towers that tremble not!)
Resemble nothing that is ours.
Around, by lifting winds forgot,
Resignedly beneath the sky
The melancholy waters lie.

No rays from the holy heaven come down
On the long night-time of that town;
But light from out the lurid sea
Streams up the turrets silently—
Gleams up the pinnacles far and free—
Up domes—up spires—up kingly halls—
Up fanes—up Babylon-like walls—
Up shadowy long-forgotten bowers
Of sculptured ivy and stone flowers—
Up many and many a marvellous shrine
Whose wreathéd friezes intertwine
The viol, the violet, and the vine.
Resignedly beneath the sky
The melancholy waters lie.
So blend the turrets and shadows there
That all seem pendulous in air,
While from a proud tower in the town
Death looks gigantically down.

There open fanes and gaping graves
Yawn level with the luminous waves;
But not the riches there that lie
In each idol's diamond eye—
Not the gaily-jewelled dead
Tempt the waters from their bed;
For no ripples curl, alas!
Along that wilderness of glass—
No swellings tell that winds may be
Upon some far-off happier sea—
No heavings hint that winds have been
On seas less hideously serene.

But lo, a stir is in the air!
The wave—there is a movement there!
As if the towers had thrust aside,
In slightly sinking, the dull tide—
As if their tops had feebly given
A void within the filmy Heaven.
The waves have now a redder glow—
The hours are breathing faint and low—

6. In 1831, a new stanzaic division was made here, and in place of the present lines 6-8 Poe wrote:

"There shrines, and palaces, and towers
Are—not like any thing of ours—
O! no—O! no—*ours* never loom
To heaven with that ungodly gloom!
Time-eaten towers that tremble not!"

10. Between these two divisions of the poem, Poe inserted in 1831 the following section:

"A heaven that God doth not contemn
With stars is like a diadem—
We liken our ladies' eyes to them—
But there! that everlasting pall!
It would be mockery to call
Such dreariness a heaven at all."

12. "Yet tho' no holy rays come down" (1831). **13. town;**—"town," (1831). **14.** "Light from the lurid, deep sea" (1831). **16.** Omitted in 1831. **17-23.** This passage originally read:

"Up thrones—up long-forgotten bowers
Of sculptur'd ivy and stone flowers—
Up domes—up spires—up kingly halls—
Up fanes—up Babylon-like walls—
Up many a melancholy shrine
Whose entablatures intertwine
The mask—the viol—and the vine." (1831)

24-29. Added in 1845. **30.** "There open temples—open graves" (1831). **31.** "Are on a level with the waves—" (1831). **33. eye—** —"eye," (1831). **35.** 1831 ends this line with a colon. **38. tell**—"hint" (1831). **39. some**—"a" in 1831, which ends the line with a colon. **40-41.** In 1831 this passage read:

"While from the high towers of the town
Death looks gigantically down."

43. "The wave! there is a ripple there!" (1831). **44. thrust**—"thrown" (1831). **46.** "As if the turret-tops had given" (1831). **47.** "A vacuum in the filmy heaven:" (1831). **49.** "The very hours are breathing low—" (1831).

And when, amid no earthly moans,
Down, down that town shall settle hence,
Hell, rising from a thousand thrones,
Shall do it reverence.

THE SLEEPER

"The Sleeper" appears as "Irene" in the 1831 volume, where it has roughly the same length as the final version. But the 1845 version is so radically revised from the earlier volume as to be to all intents a new poem. Hence the variations will not be given here. The present text is that of the *Raven* volume (1845).

At midnight, in the month of June,
I stand beneath the mystic moon.
An opiate vapour, dewy, dim,
Exhales from out her golden rim,
And, softly dripping, drop by drop,
Upon the quiet mountain-top,
Steals drowsily and musically
Into the universal valley.
The rosemary nods upon the grave;
The lily lolls upon the wave;
Wrapping the fog about its breast,
The ruin moulders into rest;
Looking like Lethe, see! the lake
A conscious slumber seems to take,
And would not, for the world, awake.
All Beauty sleeps!—and lo! where lies
(Her casement open to the skies)
Irene, with her Destinies!

O lady bright! can it be right—
This window open to the night?
The wanton airs, from the tree-top,
Laughingly through the lattice drop—
The bodiless airs, a wizard rout,
Flit through thy chamber in and out,
And wave the curtain canopy
So fitfully—so fearfully—
Above the closed and fringed lid
'Neath which thy slumb'ring soul lies hid,
That, o'er the floor and down the wall,
Like ghosts the shadows rise and fall!
O lady dear, hast thou no fear?
Why and what art thou dreaming here?
Sure thou art come o'er far-off seas,
A wonder to these garden trees!
Strange is thy pallor! strange thy dress!
Strange, above all, thy length of tress,
And this all solemn silentness!

The lady sleeps! Oh, may her sleep,
Which is enduring, so be deep!
Heaven have her in its sacred keep!
This chamber changed for one more holy,
This bed for one more melancholy,
I pray to God that she may lie
Forever with unopened eye,
While the dim sheeted ghosts go by!

My love, she sleeps! Oh, may her sleep,
As it is lasting, so be deep!
Soft may the worms about her creep!
Far in the forest, dim and old,
For her may some tall vault unfold—
Some vault that oft hath flung its black
And winged panels fluttering back,
Triumphant, o'er the crested palls,
Of her grand family funerals—
Some sepulchre, remote, alone,
Against whose portal she hath thrown,
In childhood, many an idle stone—
Some tomb from out whose sounding door
She ne'er shall force an echo more,
Thrilling to think, poor child of sin!
It was the dead who groaned within!

53. The original ending ran:

"Shall do it reverence,
And Death to some more happy clime
Shall give his undivided time."

3. vapour—The unpoetic basis of Poe's poem is the superstition that moonlight and night air have a blasting and deadly effect upon sleepers exposed to them. **13. Lethe**—The waters of Lethe, the river of forgetfulness, were supposed to be black. **18. Irene**—a trisyllable. **27. fringed**—two syllables. **41. one more holy**—that is, the family burial vault. **49 ff.** "The vault described at the end of *The Sleeper* . . . recalls almost literally some of the great family tombs on the plantations about Charleston, with the semi-feudal pomp that surrounds them." (Allen)

LENORE

"Lenore" originally began existence in the 1831 volume as "A Paean," the long lines of "Lenore" being broken in two, and the poem having the form of quatrains. The internal rimes of the last version are not found in 1831. To discover the changes made by Poe in reaching the final version, the student may compare lines 20-21 of "Lenore" with the last stanza of "A Paean":

> "Therefore, to thee this night
> I will no requiem raise,
> But waft thee on thy flight,
> With a Paean of old days."

A version in the *Pioneer,* February, 1843, is in elaborate, irregular stanzaic form, which Poe abandoned for no good apparent reason. The present text is that of the 1845 volume. Poe later (1849) rearranged the text slightly.

Ah, broken is the golden bowl! the spirit flown forever!
Let the bell toll!—a saintly soul floats on the Stygian river;
And, Guy De Vere, hast *thou* no tear?—weep now or never more!
See! on yon drear and rigid bier low lies thy love, Lenore!
Come! let the burial rite be read—the funeral song be sung!—
An anthem for the queenliest dead that ever died so young—
A dirge for her the doubly dead in that she died so young.

"Wretches! ye loved her for her wealth and hated her for her pride,
And when she fell in feeble health, ye blessed her—that she died!
How *shall* the ritual, then, be read—the requiem how be sung
By you—by yours, the evil eye,—by yours, the slanderous tongue
That did to death the innocence that died, and died so young?"

Peccavimus; but rave not thus! and let a Sabbath song
Go up to God so solemnly the dead may feel no wrong!
The sweet Lenore hath "gone before," with Hope, that flew beside,
Leaving thee wild for the dear child that should have been thy bride—
For her, the fair and *debonair,* that now so lowly lies,
The life upon her yellow hair but not within her eyes—
The life still there, upon her hair—the death upon her eyes.

"Avaunt! to-night my heart is light. No dirge will I upraise,
"But waft the angel on her flight with a Paean of old days!
"Let *no* bell toll, then,—lest her soul, amid its hallowed mirth,
"Should catch the note, as it doth float—up from the damnèd Earth!
"To friends above, from fiends below, the indignant ghost is riven—
"From Hell unto a high estate far up within the Heaven—
"From grief and groan, to a golden throne, beside the King of Heaven."]

THE COLISEUM

"The Coliseum" was submitted in 1833 for the prize offered by the Baltimore *Saturday Visiter* for the best short poem sent in, but as his "Tales of the Folio Club" won the prize for the best tale in prose, the judges ruled out "The Coliseum," which was, however, published in the columns of that paper in 1833. After appearing in various magazines (like all of Poe's poems), it finally came to

1. **golden bowl**—*Cf.* Eccles. 12:6. 2. **Stygian**—The river Styx is supposed to divide the underworld from the world of the living, and Charon ferries the souls of the dead across it. 9. **blessed**—that is, cursed—a euphemism still common in parts of the South. 11. **evil eye**—probably with some reference to the superstition that persons possessing the evil eye are able to blast their victims with a look. 13. **Peccavimus**—We have sinned. 17. **debonair**—probably used here in the obsolete sense of *meek, kindly.* 21. **Paean**—here, a song of gratitude for deliverance.

rest in *The Raven* volume (1845), the text of which is here followed. Poe intended to work this poem into his (unfinished) blank verse drama, "Politian" (first published 1835-36).

Type of the antique Rome! Rich reliquary
Of lofty contemplation left to Time
By buried centuries of pomp and power!
At length—at length—after so many days
Of weary pilgrimage and burning thirst
(Thirst for the springs of lore that in thee lie,)
I kneel, an altered and an humble man,
Amid thy shadows, and so drink within
My very soul thy grandeur, gloom, and glory!

Vastness! and Age! and Memories of Eld!
Silence! and Desolation! and dim Night!
I feel ye now—I feel ye in your strength—
O spells more sure than e'er Judaean king
Taught in the gardens of Gethsemane!
O charms more potent than the rapt Chaldee
Ever drew down from out the quiet stars!
Here, where a hero fell, a column falls!
Here, where the mimic eagle glared in gold,
A midnight vigil holds the swarthy bat!
Here, where the dames of Rome their gilded hair
Waved to the wind, now wave the reed and thistle!
Here, where on golden throne the monarch lolled,
Glides, spectre-like, unto his marble home,
Lit by the wan light of the hornèd moon,
The swift and silent lizard of the stones!

But stay! these walls—these ivy-clad arcades—
These mouldering plinths—these sad and blackened shafts—
These vague entablatures—this crumbling frieze—
These shattered cornices—this wreck—this ruin—
These stones—alas! these gray stones—are they all—
All of the famed, and the colossal left
By the corrosive Hours to Fate and me?

"Not all"—the Echoes answer me—"not all!
Prophetic sounds and loud, arise forever
From us, and from all Ruin, unto the wise,
As melody from Memnon to the Sun.
We rule the hearts of mightiest men—we rule
With a despotic sway all giant minds.
We are not impotent—we pallid stones.
Not all our power is gone—not all our fame—
Not all the magic of our high renown—
Not all the wonder that encircles us—
Not all the mysteries that in us lie—
Not all the memories that hang upon
And cling around about us as a garment,
Clothing us in a robe of more than glory."

TO ONE IN PARADISE

This poem originally appeared without title in *Godey's Lady's Book* as part of the story originally entitled "The Visionary," January, 1834, a tale which became "The Assignation." Poe included it under the present title in his 1845 volume, the text of which is here followed.

Thou wast all that to me, love,
For which my soul did pine—
A green isle in the sea, love,
A fountain and a shrine,
All wreathed with fairy fruits and flowers,
And all the flowers were mine.
Ah, dream too bright to last!

Ah, starry Hope! that didst arise
But to be overcast!
A voice from out the Future cries,

13. **Judaean king**—Christ. 15. **Chaldee**—The Chaldeans long enjoyed a reputation as astrologers and wizards. 18. **mimic eagle**—The eagle was carried by the Roman legion as modern regiments carry the regimental flag. 19. **bat** is the subject, **vigil** the object of the verb. 20. **gilded hair**—Fashionable Roman ladies wore gilt wigs. 26. **arcades**—The arches supporting the external walls of the Colosseum formed tiers of arcades. 27-29. Poe's description follows exactly the architectural order. The plinth is the base of the shaft, or column, which in turn supports the entablature, divided into three parts, the architrave, the frieze, and the cornice. 36. **Memnon**—Colossal statues of Memnon on the Nile River were supposed to give forth a musical note at sunrise.

"On! on!"—but o'er the Past
(Dim gulf!) my spirit hovering lies
Mute, motionless, aghast!

For, alas! alas! with me
The light of Life is o'er!
No more—no more—no more—
(Such language holds the solemn sea
To the sands upon the shore)
Shall bloom the thunder-blasted tree,
Or the stricken eagle soar!

And all my days are trances,
And all my nightly dreams
Are where thy dark eye glances,
And where thy footstep gleams—
In what ethereal dances,
By what eternal streams.

LIGEIA

And the will therein lieth, which dieth not. Who knoweth the mysteries of the will, with its vigor? For God is but a great will pervading all things by nature of its intentness. Man doth not yield himself to the angels, nor unto death utterly, save only through the weakness of his feeble will.*

JOSEPH GLANVILL.

"Ligeia" was first printed in the *American Museum,* September, 1838, after which it was gathered into *Tales of the Grotesque and Arabesque,* the text of which is (with certain exceptions as noted) followed here. A slightly expanded text, following upon the appearance of the tale in the *Broadway Journal,* was gathered into the Griswold edition of the *Works,* variant readings from which are here noted by (G). Poe had previously in "Berenice" made a kind of preparatory study for "Ligeia," the earlier story first appearing in the *Southern Literary Messenger* for March, 1835. In "Berenice" the return of the dead woman depends upon the lover's recognition of her teeth, a fact which helps to account for Poe's emphasis upon the "bright line of pearly teeth" appearing in the dead woman. By comparing the Griswold readings in the footnotes with the 1840 text the student may watch Poe in the revision of one of his most famous stories. Minor changes in capitalization and punctuation are not noted.

I CANNOT, for my soul, remember how, when, or even precisely where, I first became acquainted with the Lady Ligeia. Long years have since elapsed, and my memory is feeble through much suffering. Or, perhaps, I cannot *now* bring these points to mind, because, in truth, the character of my beloved, her rare learning, her singular yet placid cast of beauty, and the thrilling and enthralling eloquence of her low, musical language, made their way into my heart by paces so steadily and stealthily progressive that they have been unnoticed and unknown. Yet I believe that I met her first and most frequently in some large, old, decaying city near the Rhine. Of her family—I have surely heard her speak—that it is of a remotely ancient date cannot be doubted. Ligeia! Buried in studies of a nature more than all else adapted to deaden impressions of the outward world, it is by that sweet word alone—by Ligeia—that I bring before mine eyes in fancy the image of her who is no more. And now, while I write, a recollection flashes upon me that I have *never known*

* **And the will . . .** —The supposed quotation from Joseph Glanvill (1636-1680) is apparently Poe's invention. 9. **city near the Rhine**—The Rhineland became, in the romantic movement, a region in which literary marvels might conveniently be placed. 11. **Ligeia**—"Ligeia! Ligeia!" (G).

the paternal name of her who was my friend and my betrothed, and who became the partner of my studies, and finally the wife of my bosom. Was it a playful charge on the part of my Ligeia? or was it a test of my strength of affection that I should institute no inquiries upon this point? or was it rather a caprice of my own—a wildly romantic offering on the shrine of the most passionate devotion? I but indistinctly recall the fact itself—what wonder that I have utterly forgotten the circumstances which originated or attended it? And, indeed, if ever that spirit which is entitled *Romance*—if ever she, the wan and the misty-winged *Ashtophet* of idolatrous Egypt, presided, as they tell, over marriages ill-omened, then most surely she presided over mine.

There is one dear topic, however, on which my memory fails me not. It is the person of Ligeia. In stature she was tall, somewhat slender, and in her latter days, even emaciated. I would in vain attempt to portray the majesty, the quiet ease, of her demeanor, or the incomprehensible lightness and elasticity of her footfall. She came and departed like a shadow. I was never made aware of her entrance into my closed study, save by the dear music of her low sweet voice, as she placed her delicate hand upon my shoulder. In beauty of face no maiden ever equalled her. It was the radiance of an opium dream—an airy and spirit-lifting vision more wildly divine than the fantasies which hovered about the slumbering souls of the daughters of Delos. Yet her features were not of that regular mould which we have been falsely taught to worship in the classical labors of the heathen. "There is no exquisite beauty," says Bacon, Lord Verulam, speaking truly of all the forms and *genera* of beauty, "without some *strangeness* in the proportions." Yet, although I saw that the features of Ligeia were not of a classic regularity, although I perceived that her loveliness was indeed "exquisite," and felt that there was much of "strangeness" pervading it, yet I have tried in vain to detect the irregularity, and to trace home my own perception of "the strange." I examined the contour of the lofty and pale forehead—it was faultless—how cold indeed that word when applied to a majesty so divine!—the skin rivalling the purest ivory, the commanding extent and repose, the gentle prominence of the regions above the temples, and then the raven-black, the glossy, the luxuriant and naturally-curling tresses, setting forth the full force of the Homeric epithet, "hyacinthine!" I looked at the delicate outlines of the nose—and nowhere but in the graceful medallions of the Hebrews had I beheld a similar perfection. There was the same luxurious smoothness of surface, the same scarcely perceptible tendency to the aquiline, the same harmoniously curved nostrils speaking the free spirit. I regarded the sweet

9. Ashtophet—Apparently Poe has vaguely in mind Ashtoreth, or Ashtaroth, a form of Astarte, goddess of fertility among the Babylonians and other oriental groups. **12. person**—*"person"* (G). **15. like**—"as" (G). **20. daughters of Delos**—The reference is obscure, and Poe may have merely been attracted by the alliteration. Greek maidens sometimes made offerings in the temple of Artemis on the island of Delos. **22. exquisite**—"There is no excellent beauty that hath not some strangeness in the proportion." Bacon's *Essayes* (1625), "Of Beauty." **23. Verülam**—"Verulam" (G), throughout. **24. proportions**—"proportion" (G). **28. contour**—Poe's description of Ligeia, including the emphasis upon her low voice and musical diction, owes much to phrenology. *Cf.* Edward Hungerford, "Poe and Phrenology," *American Literature*, Vol. II, pp. 209 ff., especially pp. 228-31. It is important to note that "the gentle prominence of the regions above the temples," denoting "Love of Life" according to the phrenological charts, points to the dénouement of the story. *Cf.* lines 27-30, page 703. **34-35. medallions of the Hebrews**—Poe has vaguely in mind the Roman representations of the Jews. **35. was**—"were" (G).

mouth. Here was indeed the triumph of all things heavenly—the magnificent turn of the short upper lip—the soft, voluptuous slumber of the under—the dimples which sported, and the color which spoke—the teeth glancing back, with a brilliancy almost startling, every ray of the holy light which fell upon them in her serene, and placid, yet most exultingly radiant of all smiles. I scrutinized the formation of the chin—and here, too, I found the gentleness of breadth, the softness and the majesty, the fulness and the spirituality, of the Greek,—the contour which the god Apollo revealed but in a dream, to Cleomenes, the son of the Athenian. And then I peered into the large eyes of Ligeia.

For eyes we have no models in the remotely antique. It might have been, too, that in these eyes of my beloved lay the secret to which Lord Verülam alludes. They were, I must believe, far larger than the ordinary eyes of our race. They were even far fuller than the fullest of the Gazelle eyes of the tribe of the valley of Nourjahad. Yet it was only at intervals—in moments of intense excitement—that this peculiarity became more than slightly noticeable in Ligeia. And at such moments was her beauty—in my heated fancy thus it appeared perhaps—the beauty of beings either above or apart from the earth—the beauty of the fabulous Houri of the Turk. The color of the orbs was the most brilliant of black, and far over them hung jetty lashes of great length. The brows, slightly irregular in outline, had the same hue. The "strangeness," however, which I found in the eyes was of a nature distinct from the formation, or the color, or the brilliancy of the features, and must, after all, be referred to the *expression*. Ah, word of no meaning! behind whose vast latitude of mere sound we intrench our ignorance of so much of the spiritual. The expression of the eyes of Ligeia! How, for long hours have I pondered upon it! How have I, through the whole of a midsummer night, struggled to fathom it! What was it—that something more profound than the well of Democritus—which lay far within the pupils of my beloved? What *was* it? I was possessed with a passion to discover. Those eyes! those large, those shining, those divine orbs! they became to me twin stars of Leda, and I to them devoutest of astrologers. Not for a moment was the unfathomable meaning of their glance, by day or by night, absent from my soul.

There is no point, among the many incomprehensible anomalies of the science of mind, more thrillingly exciting than the fact—never, I believe, noticed in the schools—that in our endeavors to recall to memory something long forgotten we often find ourselves *upon the very verge* of remembrance without being able, in the end, to remember. And thus how frequently, in my intense

8. Cleomenes—Poe's allusion seems to be largely fanciful. Cleomenes, son of Apollodorus the Athenian, was the sculptor of the Venus of Medici, and the reference in the text is to the inscription on the pedestal. But although Poe desires to compare Ligeia to the Venus as a type of Greek female beauty, there seems to be no authority for Apollo's revelation to Cleomenes. (It is possible Poe mistook "Apollodorus" for "Apollo.") **12-13. our race**—"our own race" (G). **13-14. Gazelle eyes . . . Nourjahad**—a reference to *The History of Nourjahad* (1767), a novel by Mrs. Frances Sheridan (1724-1766). **18. Houri**—The Mohammedan heaven is inhabited by beautiful women called houris. **18. color**—"hue" (G). **20. hue**—"tint" (G). **27. well of Democritus**—Democritus of Abdera, a Greek philosopher of the fifth century B.C., who, according to Diogenes Laertius, said that truth lies in a deep well. **30. twin stars of Leda**—The two brightest stars in the constellation Gemini are named Castor and Pollux, after the two sons of Leda and Zeus. **30-32. Not . . . soul**—G. omits this sentence.

scrutiny of Ligeia's eyes, have I felt approaching the full knowledge of their expression—felt it approaching—yet not quite be mine—and so at length entirely depart. And (strange, oh strangest mystery of all!) I found, in the commonest objects of the universe, a circle of analogies to that expression. I mean to say that, subsequently to the period when Ligeia's beauty passed into my spirit, there dwelling as in a shrine, I derived, from many existences in the material world, a sentiment such as I felt always aroused within me by her large and luminous orbs. Yet not the more could I define that sentiment, or analyze, or even steadily view it. I recognized it, let me repeat, sometimes in the commonest objects of the universe. It has flashed upon me in the survey of a rapidly-growing vine—in the contemplation of a moth, a butterfly, a chrysalis, a stream of running water. I have felt it in the ocean, in the falling of a meteor. I have felt it in the glances of unusually aged people. And there are one or two stars in heaven—(one especially, a star of the sixth magnitude, double and changeable, to be found near the large star in Lyra) in a telescopic scrutiny of which I have been made aware of the feeling. I have been filled with it by certain sounds from stringed instruments, and not unfrequently by passages from books. Among innumerable other instances, I well remember something in a volume of Joseph Glanvill, which (perhaps merely from its quaintness—who shall say?) never failed to inspire me with the sentiment,— "And the will therein lieth, which dieth not. Who knoweth the mysteries of the will, with its vigor? For God is but a great will pervading all things by nature of its intentness. Man doth not yield him to the angels, nor unto death utterly, but only through the weakness of his feeble will."

Length of years, and subsequent reflection, have enabled me to trace, indeed, some remote connexion between this passage in the old English moralist and a portion of the character of Ligeia. An *intensity* in thought, action, or speech, was possibly, in her, a result, or at least an index, of that gigantic volition which, during our long intercourse, failed to give other and more immediate evidence of its existence. Of all the women whom I have ever known she, the outwardly calm, the ever-placid Ligeia, was the most violently a prey to the tumultuous vultures of stern passion. And of such passion I could form no estimate, save by the miraculous expansion of those eyes which at once so delighted and appalled me, by the almost magical melody, modulation, distinctness and placidity of her very low voice, and by the fierce energy (rendered doubly effective by contrast with her manner of utterance) of the words which she habitually uttered.

I have spoken of the learning of Ligeia: it was immense—such as I have never known in woman. In the classical tongues was she deeply proficient, and as far as my own acquaintance extended in regard to the modern dialects of Europe, I have never known her at fault. Indeed upon any theme of the most admired, because simply the most abstruse of the boasted erudition of the academy, have I *ever* found Ligeia at fault? How singularly, how thrillingly,

10. G. omits **commonest objects . . . in the . . . 15. Lyra**—Poe refers to a famous binary star in the constellation Lyra, known as Epsilon Lyra. **24. but**—"save" (G). **26. connexion**—"connection" (G); G. omits **old. 36. words**—"wild words" (G). **40. dialects**—languages. **43. academy**—learned world.

this one point in the nature of my wife has forced itself, at this late period only, upon my attention! I said her knowledge was such as I had never known in woman. Where breathes the man who, like her, has traversed, and successfully, *all* the wide areas of moral, natural, and mathematical science? I saw not then what I now clearly perceive, that the acquisitions of Ligeia were gigantic, were astounding—yet I was sufficiently aware of her infinite supremacy to resign myself, with a child-like confidence, to her guidance through the chaotic world of metaphysical investigation at which I was most busily occupied during the earlier years of our marriage. With how vast a triumph—with how vivid a delight—with how much of all that is ethereal in hope—did I *feel,* as she bent over me in studies but little sought for—but less known—that delicious vista by slow but perceptible degrees expanding before me, down whose long, gorgeous, and all untrodden path, I might at length pass onward to the goal of a wisdom too divinely precious not to be forbidden!

How poignant, then, must have been the grief with which, after some years, I beheld my well-grounded expectations take wings to themselves and flee away! Without Ligeia I was but as a child groping benighted. Her presence, her readings alone, rendered vividly luminous the many mysteries of the transcendentalism in which we were immersed. Letters, lambent and golden, grew duller than Saturnian lead, wanting the radiant lustre of her eyes. And now those eyes shone less and less frequently upon the pages over which I pored. Ligeia grew ill. The wild eyes blazed with a too—too glorious effulgence; the pale fingers became of the transparent waxen hue of the grave—and the blue veins upon the lofty forehead swelled and sunk impetuously with the tides of the most gentle emotion. I saw that she must die—and I struggled desperately in spirit with the grim Azrael. And the struggles of the passionate wife were, to my astonishment, even more energetic than my own. There had been much in her stern nature to impress me with the belief that, to her, death would have come without its terrors—but not so. Words are impotent to convey any just idea of the fierceness of resistance with which she wrestled with the dark shadow. I groaned in anguish at the pitiable spectacle. I would have soothed—I would have reasoned; but in the intensity of her wild desire for life—for life—*but* for life, solace and reason were alike the uttermost of folly. Yet not for an instant, amid the most convulsive writhings of her fierce spirit, was shaken the external placidity of her demeanor. Her voice grew more gentle—grew more low—yet I would not wish to dwell upon the wild meaning of the quietly-uttered words. My brain reeled as I hearkened entranced, to a melody more than mortal—to assumptions and aspirations which mortality had never before known.

That she loved me, I should not have doubted; and I might have been easily aware that, in a bosom such as hers, love would have reigned no ordi-

2. had—"have" (G). **3. Where**—"but where" (G). **4. natural**—"physical" (G). **11. sought for**—"sought" (G). **12. slow but perceptible**—"slow" (G). **12. degrees**—"degree" (G). **14. wisdom . . . forbidden**—*Cf.* Gen. 3:5-6 **16. flee**—"fly" (G). *Cf.* Prov. 23:5. **18. transcendentalism**—metaphysical speculation. **19. Letters**—G. begins the sentence with "Wanting the radiant lustre of her eyes." **24. sunk**—"sank" (G). **26. Azrael**—the Hebrew angel of death. **29. terrors**—*Cf.* Ps. 45:4. **30-31 dark shadow**—"Shadow" (G). *Cf.* Isa. 9:2. **33-34. not . . . instant**—"until the last instance" (G).

nary passion. But in death only, was I fully impressed with the strength of her affection. For long hours, detaining my hand, would she pour out before me the overflowing of a heart whose more than passionate devotion amounted to idolatry. How had I deserved to be so blessed by such confessions?—how had I deserved to be so cursed with the removal of my beloved in the hour of her making them? But upon this subject I cannot bear to dilate. Let me say only, that in Ligeia's more than womanly abandonment to a love, alas! all unmerited, all unworthily bestowed, I at length recognized the principle of her longing with so wildly earnest a desire for the life which was now fleeing so rapidly away. It is this wild longing—it is this eager vehemence of desire for life—*but* for life—that I have no power to portray—no utterance capable of expressing.

[At high noon of the night in which she departed, beckoning me, peremptorily, to her side, she bade me repeat certain verses composed by herself not many days before. I obeyed her. They were these:

Lo! 'tis a gala night
  Within the lonesome latter years!
An angel throng, bewinged, bedight
  In veils, and drowned in tears,
Sit in a theatre, to see
  A play of hopes and fears,
While the orchestra breathes fitfully
  The music of the spheres.

Mimes, in the form of God on high,
  Mutter and mumble low,
And hither and thither fly;
  Mere puppets they, who come and go
At bidding of vast formless things
  That shift the scenery to and fro,
Flapping from out their condor wings
  Invisible Wo!

That motley drama!—oh, be sure
  It shall not be forgot!
With its Phantom chased for evermore,
  By a crowd that seize it not,
Through a circle that ever returneth in
  To the self-same spot;
And much of Madness, and more of Sin
  And horror, the soul of the plot!

13 ff. The passage in brackets, beginning **At high noon of the night,** appears only in G. In 1840 this read only: "Methinks I again behold the terrific struggles of her lofty, her nearly idealized nature, with the might and the terror, and the majesty, of the great Shadow. But she perished. The giant *will* succumbed to a power more stern. And I thought, as I gazed upon the corpse, of the wild passage in Joseph Glanville: 'The will therein lieth, which dieth not. Who knoweth the mysteries of the will, with its vigor? For God is but a great will pervading all things by nature of its intentness. Man doth not yield him to the angels, *nor unto death utterly,* save only through the weakness of his feeble will.'" **16. Lo! 'tis**—The poem originally appeared in *Graham's Magazine* for January, 1843, as "The Conqueror Worm," and was not united with "Ligeia" until the appearance of the story in the *Broadway Journal.*

But see, amid the mimic rout
A crawling shape intrude!
A blood-red thing that writhes from out
The scenic solitude!
It writhes!—it writhes!—with mortal pangs
The mimes become its food,
And seraphs sob at vermin fangs
In human gore imbued.

Out—out are the lights—out all!
And over each quivering form,
The curtain, a funeral pall,
Comes down with the rush of a storm—
While the angels, all pallid and wan,
Uprising, unveiling, affirm
That the play is the tragedy, "Man,"
And its hero the Conqueror Worm.

"O God!" half shrieked Ligeia, leaping to her feet and extending her arms aloft with a spasmodic movement, as I made an end of these lines—"O God! O Divine Father!—shall these things be undeviatingly so?—shall this conqueror be not once conquered? Are we not part and parcel in Thee? Who—who knoweth the mysteries of the will with its vigor? Man doth not yield him to the angels, *nor unto death utterly,* save only through the weakness of his feeble will."

And now, as if exhausted with emotion, she suffered her white arms to fall, and returned solemnly to her bed of death. And as she breathed her last sighs, there came mingled with them a low murmur from her lips. I bent to them my ear and distinguished, again, the concluding words of the passage in Glanvill:—*"Man doth not yield him to the angels, nor unto death utterly, save only through the weakness of his feeble will."*]

She died—and I, crushed into the very dust with sorrow, could no longer endure the lonely desolation of my dwelling in the dim and decaying city by the Rhine. I had no lack of what the world terms wealth—Ligeia had brought me far more, very far more, than ordinarily falls to the lot of mortals. After a few months, therefore, of weary and aimless wandering, I purchased, and put in some repair, an abbey, which I shall not name, in one of the wildest and least frequented portions of fair England. The gloomy and dreary grandeur of the building, the almost savage aspect of the domain, the many melancholy and time-honored memories connected with both, had much in unison with the feelings of utter abandonment which had driven me into that remote and unsocial region of the country. Yet although the external abbey, with its verdant decay hanging about it, suffered but little alteration, I gave way, with a child-like perversity, and perchance with a faint hope of alleviating my sorrows, to a display of more than regal magnificence within. For such follies even in childhood I had imbibed a taste, and now they came back to me as if in the dotage of grief. Alas, I feel how much even of incipient madness might

1. **mimic rout**—masqued dance. 32. **terms**—"calls" (G).

have been discovered in the gorgeous and fantastic draperies, in the solemn carvings of Egypt, in the wild cornices and furniture, in the bedlam patterns of the carpets of tufted gold! I had become a bounden slave in the trammels of opium, and my labors and my orders had taken a coloring from my dreams. But these absurdities I must not pause to detail. Let me speak only of that one chamber, ever accursed, whither, in a moment of mental alienation, I led from the altar as my bride—as the successor of the unforgotten Ligeia—the fair-haired and blue-eyed Lady Rowena Trevanion, of Tremaine.

There is no individual portion of the architecture and decoration of that bridal chamber which is not now visibly before me. Where were the souls of the haughty family of the bride, when, through thirst of gold, they permitted to pass the threshold of an apartment *so* bedecked, a maiden and a daughter so beloved? I have said that I minutely remember the details of the chamber—yet I am sadly forgetful on topics of deep moment—and here there was no system, no keeping, in the fantastic display, to take hold upon the memory. The room lay in a high turret of the castellated abbey, was pentagonal in shape, and of capacious size. Occupying the whole southern face of the pentagon was the sole window—an immense sheet of unbroken glass from Venice—a single pane, and tinted of a leaden hue, so that the rays of either the sun or moon, passing through it, fell with a ghastly lustre upon the objects within. Over the upper portion of this huge window, extended the trellice-work of an aged vine, which clambered up the massy walls of the turret. The ceiling, of gloomy-looking oak, was excessively lofty, vaulted, and elaborately fretted with the wildest and most grotesque specimens of a semi-Gothic, semi-Druidical device. From out the most central recess of this melancholy vaulting, depended, by a single chain of gold, with long links, a huge censer of the same metal, Saracenic in pattern, and with many perforations so contrived that there writhed in and out of them, as if endued with a serpent vitality, a continual succession of parti-colored fires. Some few ottomans and golden candelabra of Eastern figure were in various stations about—and there was the couch, too, the bridal couch, of an Indian model, and low, and sculptured of solid ebony, with a canopy above. In each of the angles of the chamber, stood on end a gigantic sarcophagus of black granite, from the tombs of the kings over against Luxor, with their aged lids full of immemorial sculpture. But in the draping of the apartment lay, alas! the chief fantasy of all. The lofty walls—gigantic in height—even unproportionably so, were hung from summit to foot, in vast folds, with a heavy and massive-looking tapestry—tapestry of a material which was found alike as a carpet on the floor, as a covering for the ottomans and the ebony bed, as a canopy for the bed, and as the gorgeous volutes of the curtains which partially shaded the window. The material was

2. carvings of Egypt—Interest in things Egyptian, following upon the deciphering of the Rosetta Stone (1802), and the publication of important work in Egyptology in the eighteen-twenties by Champollion, was manifested by the romantic writers. **2. bedlam**—insane. **20. upon**—"on" (G). **21. trellice**—"trellis" (G). **24. Gothic . . . Druidical**—Adjectives much used by romantic writers without precise meaning. The **device** was a pattern suggesting "northern antiquities." **27. Saracenic**—Here, about equivalent to oriental, with a strong suggestion of barbaric. **29. Some few ottomans**—G. begins a new paragraph. **31. Indian**—Hindu, but the word is purposely vague. **32. canopy**—"pall-like canopy" (G). **34. Luxor**—Luxor, near Thebes, a great center of Egyptian archaeological research.

the richest cloth of gold. It was spotted all over, at irregular intervals, with arabesque figures, about a foot in diameter, and wrought upon the cloth in patterns of the most jetty black. But these figures partook of the true character of the arabesque only when regarded from a single point of view. By a contrivance now common, and indeed traceable to a very remote period of antiquity, they were made changeable in aspect. To one entering the room they bore the appearance of simple monstrosities; but upon a farther advance, this appearance gradually departed; and, step by step, as the visiter moved his station in the chamber, he saw himself surrounded by an endless succession of the ghastly forms which belong to the superstition of the Northman, or arise in the guilty slumbers of the monk. The phantasmagoric effect was vastly heightened by the artificial introduction of a strong continual current of wind behind the draperies—giving a hideous and uneasy animation to the whole.

In halls such as these—in a bridal chamber such as this—I passed, with the Lady of Tremaine, the unhallowed hours of the first month of our marriage—passed them with but little disquietude. That my wife dreaded the fierce moodiness of my temper—that she shunned me, and loved me but little—I could not help perceiving—but it gave me rather pleasure than otherwise. I loathed her with a hatred belonging more to demon than to man. My memory flew back, (oh, with what intensity of regret!) to Ligeia, the beloved, the beautiful, the entombed. I revelled in recollections of her purity, of her wisdom, of her lofty, her ethereal nature, of her passionate, her idolatrous love. Now, then, did my spirit fully and freely burn with more than all the fires of her own. In the excitement of my opium dreams (for I was habitually fettered in the iron shackles of the drug) I would call aloud upon her name, during the silence of the night, or among the sheltered recesses of the glens by day, as if, through the wild eagerness, the solemn passion, the consuming ardor of my longing for the departed Ligeia I could restore the departed Ligeia to the pathway she had abandoned upon the earth.

About the commencement of the second month of the marriage, the Lady Rowena was attacked with sudden illness from which her recovery was slow. The fever which consumed her rendered her nights uneasy, and, in her perturbed state of half-slumber, she spoke of sounds, and of motions, in and about the chamber of the turret, which had no origin save in the distemper of her fancy, or, perhaps, in the phantastic influences of the chamber itself. She became at length convalescent—finally well. Yet but a brief period elapsed, ere a second more violent disorder again threw her upon a bed of suffering—and from this attack her frame, at all times feeble, never altogether recovered. Her illnesses were, after this epoch, of alarming character, and of more alarming recurrence, defying alike the knowledge and the great exertions of her medical men. With the increase of the chronic disease, which had thus, apparently, taken too sure hold upon her constitution to be eradicated by human

10. Northman—"Norman" (G). **20-21. beloved . . . the beautiful**—"the beloved, the august, the beautiful" (G). **25. iron shackles**—"shackles" (G). **28.** G. omits the first **Ligeia.** For the second **the departed Ligeia** G. reads "her." **29.** Between **abandoned** and **upon** G. inserts: "—ah, *could* it be for ever?—" **34. which had**—"which I concluded had" (G). **35. phantastic**—"phantasmagoric" (G). **41. medical men**—"physicians" (G).

means, I could not fail to observe a similar increase in the nervous irritation of her temperament, and in her excitability by trivial causes of fear. Indeed reason seemed fast tottering from her throne. She spoke again, and now more frequently and pertinaciously, of the sounds, of the slight sounds, and of the unusual motions among the tapestries, to which she had formerly alluded.

One night, near the closing in of September, she pressed this distressing subject with more than usual emphasis upon my attention. She had just awakened from an unquiet slumber, and I had been watching, with feelings half of anxiety, half of vague terror, the workings of her emaciated countenance. I sat by the side of her ebony bed, upon one of the ottomans of India. She partly arose, and spoke, in an earnest low whisper, of sounds which she *then* heard, but which I could not hear, of motions which she *then* saw, but which I could not perceive. The wind was rushing hurriedly behind the tapestries, and I wished to show her (what, let me confess it, I could not *all* believe) that those faint, almost inarticulate breathings, and the very gentle variations of the figures upon the wall, were but the natural effects of that customary rushing of the wind. But a deadly pallor, overspreading her face, had proved to me that my exertions to reassure her would be fruitless. She appeared to be fainting, and no attendants were within call. I remembered where was deposited a decanter of light wine which had been ordered by her physicians, and hastened across the chamber to procure it. But, as I stepped beneath the light of the censer, two circumstances of a startling nature attracted my attention. I had felt that some palpable object had passed lightly by my person; and I saw that there lay a faint, indefinite shadow upon the golden carpet, in the very middle of the rich lustre thrown from the censer. But I was wild with the excitement of an immoderate dose of opium, and heeded these things but little, nor spoke of them to Rowena. Having found the wine, I recrossed the chamber, and poured out a gobletful, which I held to the lips of the fainting lady. She had now partially recovered, however, and took, herself, the vessel, while I sank upon an ottoman near me, with my eyes rivetted upon her person. It was then that I became distinctly aware of a gentle foot-fall upon the carpet, and near the couch; and, in a second thereafter, as Rowena was in the act of raising the wine to her lips, I saw, or may have dreamed that I saw, fall within the goblet, as if from some invisible spring in the atmosphere of the room, three or four large drops of a brilliant and ruby-colored fluid. If this I saw—not so Rowena. She swallowed the wine unhesitatingly, and I forbore to speak to her of a circumstance which must, after all, I considered, have been but the suggestion of a vivid imagination, rendered morbidly active by the terror of the lady, by the opium, and by the hour.

Yet—I cannot conceal it from myself—after this period, a rapid change for the worst took place in the disorder of my wife; so that, on the third subsequent night, the hands of her menials prepared her for the tomb, and on the

2. After **fear,** G. omits the following sentence. 15. **faint**—G. omits, but adds "those" after **and.** 23. **palpable**—"palpable although invisible" (G). 24.—After **lay** G. omits **a faint, indefinite shadow.** 25. **censer**—G. adds: "a shadow—a faint, indefinite shadow of angelic aspect—such as might be fancied for the shadow of a shade." 29. **took, herself, the vessel**—"took the vessel herself" (G). 30. **rivetted**—"fastened" (G). 40. **from myself . . . period**—"from my own perception that, immediately subsequent to the fall of the ruby-drops," (G).

fourth, I sat alone, with her shrouded body, in that fantastic chamber which had received her as my bride. Wild visions, opium-engendered, flitted shadow-like before me. I gazed with unquiet eye upon the sarcophagi in the angles of the room, upon the varying figures of the drapery, and upon the writhing of the parti-colored fires in the censer overhead. My eyes then fell, as I called to mind the circumstances of a former night, to the spot beneath the glare of the censer where I had seen the faint traces of the shadow. It was there, however, no longer, and breathing with greater freedom, I turned my glances to the pallid and rigid figure upon the bed. Then rushed upon me a thousand memories of Ligeia—and then came back upon my heart, with the turbulent violence of a flood, the whole of that unutterable wo with which I had regarded *her* thus enshrouded. The night waned; and still, with a bosom full of bitter thoughts of the one only and supremely beloved, I remained gazing upon the body of Rowena.

It might have been midnight, or perhaps earlier, or later, for I had taken no note of time, when a sob, low, gentle, but very distinct, startled me from my revery. I *felt* that it came from the bed of ebony—the bed of death. I listened in an agony of superstitious terror—but there was no repetition of the sound; I strained my vision to detect any motion in the corpse, but there was not the slightest perceptible. Yet I could not have been deceived. I *had* heard the noise, however faint, and my soul was awakened within me, as I resolutely and perseveringly kept my attention rivetted upon the body. Many minutes elapsed before any circumstance occurred tending to throw light upon the mystery. At length it became evident that a slight, a very faint, and barely noticeable tinge of color had flushed up within the cheeks, and along the sunken small veins of the eyelids. Through a species of unutterable horror and awe, for which the language of mortality has no sufficiently energetic expression, I felt my brain reel, my heart cease to beat, my limbs grow rigid where I sat. Yet a sense of duty finally operated to restore my self-possession. I could no longer doubt that we had been precipitate in our preparations for interment —that Rowena still lived. It was necessary that some immediate exertion be made; yet the turret was altogether apart from the portion of the abbey tenanted by the servants—there were none within call,—I had no means of summoning them to my aid without leaving the room for many minutes—and this I could not venture to do. I therefore struggled alone in my endeavors to call back the spirit still hovering. In a short period it was certain, however, that a relapse had taken place; the color disappeared from both eyelid and cheek, leaving a wanness even more than that of marble; the lips became doubly shrivelled and pinched up in the ghastly expression of death; a repulsive clamminess and coldness overspread rapidly the surface of the body; and all the usual rigorous stiffness immediately supervened. I fell back with a shudder upon the couch from which I had been so startlingly aroused, and again gave myself up to passionate waking visions of Ligeia.

An hour thus elapsed when, (could it be possible?) I was a second time

21. within me, as I—"within me. I" (G). **22. rivetted**—"riveted" (G). **24. faint**—"feeble" (G). **28. brain reel**—G. omits. **30. for interment**—G. omits. **41. rigorous stiffness**—rigor mortis.

aware of some vague sound issuing from the region of the bed. I listened—in extremity of horror. The sound came again—it was a sigh. Rushing to the corpse, I saw—distinctly saw—a tremor upon the lips. In a minute after, they slightly relaxed, disclosing a bright line of the pearly teeth. Amazement now struggled in my bosom with the profound awe which had hitherto reigned therein alone. I felt that my vision grew dim, that my reason wandered, and it was only by a convulsive effort that I at length succeeded in nerving myself to the task which duty thus, once more, had pointed out. There was now a partial glow upon the forehead and upon the cheek and throat—a perceptible warmth pervaded the whole frame—there was even a slight pulsation at the heart. The lady lived; and with redoubled ardor I betook myself to the task of restoration. I chafed and bathed the temples and the hands, and used every exertion which experience, and no little medical reading, could suggest. But in vain. Suddenly, the color fled, the pulsation ceased, the lips resumed the expression of the dead, and, in an instant afterwards, the whole body took upon itself the icy chilliness, the livid hue, the intense rigidity, the sunken outline, and each and all of the loathsome peculiarities of that which has been, for many days, a tenant of the tomb.

And again I sunk into visions of Ligeia—and again, (what marvel that I shudder while I write?) *again* there reached my ears a low sob from the region of the ebony bed. But why shall I minutely detail the unspeakable horrors of that night? Why shall I pause to relate how, time after time, until near the period of the gray dawn, this hideous drama of revivification was repeated, and how each terrific relapse was only into a sterner and apparently more irredeemable death; [how each agony wore the aspect of a struggle with some invisible foe; and how each struggle was succeeded by I know not what of wild change in the personal appearance of the corpse?] Let me hurry to a conclusion.

The greater part of the fearful night had worn away, and the corpse of Rowena once again stirred—and now more vigorously than hitherto, although arousing from a dissolution more appalling in its utter hopelessness than any. I had long ceased to struggle or to move, and remained sitting rigidly upon the ottoman, a helpless prey to a whirl of violent emotions, of which extreme awe was perhaps the least terrible, the least consuming. The corpse, I repeat, stirred, and now more vigorously than before. The hues of life flushed up with unwonted energy into the countenance—the limbs relaxed—and, save that the eyelids were yet pressed heavily together, and that the bandages and draperies of the grave still imparted their charnel character to the figure, I might have dreamed that Rowena had indeed shaken off, utterly, the fetters of Death. But if this idea was not, even then, altogether adopted, I could, at least, doubt no longer, when, arising from the bed, tottering, with feeble steps, with closed eyes, and with the manner of one bewildered in a dream, the Lady of Tremaine advanced boldly and palpably into the middle of the apartment.

I trembled not—I stirred not—for a crowd of unutterable fancies connected

3-4. minute . . . relaxed—"minute afterwards they relaxed" (G). **6. therein**—"there" (G). **7. convulsive**—"violent" (G). **11. lived**—*"lived"* (G). **15. afterwards**—"afterward" (G). **17. each and all**—"all" (G). **23. and**—G. omits. **25.** The passage in brackets beginning **how each agony** is found only in G. **28-29. the corpse of Rowena**—"she who had been dead" (G). **41. Lady of Tremaine**—"thing that was enshrouded" (G).

with the air, the demeanor of the figure, rushing hurriedly through my brain, had paralyzed, had chilled me into stone. I stirred not—but gazed upon the apparition. There was a mad disorder in my thoughts—a tumult unappeasable. Could it, indeed, be the *living* Rowena who confronted me? [Could it indeed be Rowena *at all*—the fair-haired, the blue-eyed Lady Rowena Trevanion of Tremaine?] Why, *why,* should I doubt it? The bandage lay heavily about the mouth—but then it was the mouth of the breathing Lady of Tremaine. And the cheeks—there were the roses as in her noon of life—yes, these were indeed the fair cheeks of the living Lady of Tremaine. And the chin, with its dimples, as in health, was it not hers?—but *had she then grown taller since her malady?* What inexpressible madness seized me with that thought? One bound, and I had reached her feet! Shrinking from my touch, she let fall from her head, unloosened, the ghastly cerements which had confined it, and there streamed forth, into the rushing atmosphere of the chamber, huge masses of long and dishevelled hair. *It was blacker than the raven wings of the midnight!* And now the eyes opened of the figure which stood before me. "Here then, at least," I shrieked aloud, "can I never—can I never be mistaken—these are the full, and the black, and the wild eyes—of the lady—of the Lady Ligeia!"

THE FALL OF THE HOUSE OF USHER

Son cœur * est un luth suspendu;
Sitôt qu'on le touche il résonne.
DE BERANGER

"The Fall of the House of Usher" first appeared in *Burton's Gentleman's Magazine,* September, 1839, after which it was gathered into the *Tales* of 1840. With certain changes of text, it then appeared in the *Tales* of 1845, from which the present text is taken. Variant readings from the 1840 edition are so noted.

DURING the whole of a dull, dark, and soundless day in the autumn of the year, when the clouds hung oppressively low in the heavens, I had been passing alone, on horseback, through a singularly dreary tract of country; and at length found myself, as the shades of the evening drew on, within view of the melancholy House of Usher. I know not how it was—but, with the first glimpse of the building, a sense of insufferable gloom pervaded my spirit. I say insufferable; for the feeling was unrelieved by any of that half-pleasurable, because poetic, sentiment with which the mind usually receives even the sternest natural images of the desolate or terrible. I looked upon

1. **air**—After **air,** G. inserts "the stature,". **4-6.** The passage in brackets is found only in G. **7. it was . . . mouth**—"might it not be the mouth" (G). **8. were indeed**—"might indeed be" (G). **10. was . . . hers**—"might it not be hers" (G). **15. hair. It**—"hair; *it*" (G). **16. the eyes**—"slowly opened the eyes" (G). **17-18.** G. reads: "the full, and the black, and the wild eyes—of my lost love—of the lady—of the LADY LIGEIA." * **Son cœur**—The verse quotation does not appear in 1840. Pierre Jean de Béranger (1780-1857) was a writer of popular songs and Anacreontic verse, and the couplet is from his poem "Le refus." The passage means: "His heart is a suspended lute; as soon as it is touched, it resounds." **23. House of Usher**—"The house of Usher, itself, may well be some old, crumbling, and cracked-wall colonial mansion found moldering in the Carolina woods, as it was left desolate by the hands of the marauding British, surrounded by its swamps and gloomy woods, its cypress-stained tarns, and its snake-haunted Indian moats." (Allen)

the scene before me—upon the mere house, and the simple landscape features of the domain—upon the bleak walls—upon the vacant eye-like windows—upon a few rank sedges—and upon a few white trunks of decayed trees—with an utter depression of soul which I can compare to no earthly sensation more properly than to the after-dream of the reveller upon opium—the bitter lapse into everyday life—the hideous dropping off of the veil. There was an iciness, a sinking, a sickening of the heart—an unredeemed dreariness of thought which no goading of the imagination could torture into aught of the sublime. What was it—I paused to think—what was it that so unnerved me in the contemplation of the House of Usher? It was a mystery all insoluble; nor could I grapple with the shadowy fancies that crowded upon me as I pondered. I was forced to fall back upon the unsatisfactory conclusion, that while, beyond doubt, there *are* combinations of very simple natural objects which have the power of thus affecting us, still the analysis of this power lies among considerations beyond our depth. It was possible, I reflected, that a mere different arrangement of the particulars of the scene, of the details of the picture, would be sufficient to modify, or perhaps to annihilate its capacity for sorrowful impression; and, acting upon this idea, I reined my horse to the precipitous brink of a black and lurid tarn that lay in unruffled lustre by the dwelling, and gazed down—but with a shudder even more thrilling than before—upon the remodelled and inverted images of the gray sedge, and the ghastly tree-stems, and the vacant and eye-like windows.

Nevertheless, in this mansion of gloom I now proposed to myself a sojourn of some weeks. Its proprietor, Roderick Usher, had been one of my boon companions in boyhood; but many years had elapsed since our last meeting. A letter, however, had lately reached me in a distant part of the country—a letter from him—which, in its wildly importunate nature, had admitted of no other than a personal reply. The MS. gave evidence of nervous agitation. The writer spoke of acute bodily illness—of a mental disorder which oppressed him—and of an earnest desire to see me, as his best and indeed his only personal friend, with a view of attempting, by the cheerfulness of my society, some alleviation of his malady. It was the manner in which all this, and much more, was said—it was the apparent *heart* that went with his request—which allowed me no room for hesitation; and I accordingly obeyed forthwith what I still considered a very singular summons.

Although, as boys, we had been even intimate associates, yet I really knew little of my friend. His reserve had been always excessive and habitual. I was aware, however, that his very ancient family had been noted, time out of mind, for a peculiar sensibility of temperament, [illegible] itself, through long ages, in many works of exalted art, and manifested, of late, in repeated deeds of munificent yet unobtrusive charity, as well as in a passionate devotion to the intricacies, perhaps even more than to the orthodox and easily recognizable beauties, of musical science. I had learned, too, the very remarkable fact, that the stem of the Usher race, all time-honored as it was, had put forth at no period, any enduring branch; in other words, that the entire family lay in the direct line of descent, and had always, with very trifling and very temporary variation, so lain. It was this deficiency, I considered, while running over in

thought the perfect keeping of the character of the premises with the accredited character of the people, and while speculating upon the possible influence which the one, in the long lapse of centuries, might have exercised upon the other—it was this deficiency, perhaps, of collateral issue, and the consequent undeviating transmission, from sire to son of the patrimony with the name, which had, at length, so identified the two as to merge the original title of the estate in the quaint and equivocal appellation of the "House of Usher"—an appellation which seemed to include, in the minds of the peasantry who used it, both the family and the family mansion.

I have said that the sole effect of my somewhat childish experiment—that of looking down within the tarn—had been to deepen the first singular impression. There can be no doubt that the consciousness of the rapid increase of my superstition—for why should I not so term it?—served mainly to accelerate the increase itself. Such, I have long known, is the paradoxical law of all sentiments having terror as a basis. And it might have been for this reason only, that, when I again uplifted my eyes to the house itself, from its image in the pool, there grew in my mind a strange fancy—a fancy so ridiculous, indeed, that I but mention it to show the vivid force of the sensations which oppressed me. I had so worked upon my imagination as really to believe that about the whole mansion and domain there hung an atmosphere peculiar to themselves and their immediate vicinity—an atmosphere which had no affinity with the air of heaven, but which had reeked up from the decayed trees, and the gray wall, and the silent tarn—a pestilent and mystic vapor, dull, sluggish, faintly discernible, and leaden-hued.

Shaking off from my spirit what *must* have been a dream, I scanned more narrowly the real aspect of the building. Its principal feature seemed to be that of an excessive antiquity. The discoloration of ages had been great. Minute fungi overspread the whole exterior, hanging in a fine tangled web-work from the eaves. Yet all this was apart from any extraordinary dilapidation. No portion of the masonry had fallen; and there appeared to be a wild inconsistency between its still perfect adaptation of parts, and the crumbling condition of the individual stones. In this there was much that reminded me of the specious totality of old wood-work which has rotted for long years in some neglected vault, with no disturbance from the breath of the external air. Beyond this indication of extensive decay, however, the fabric gave little token of instability. Perhaps the eye of a scrutinizing observer might have discovered a barely perceptible fissure, which, extending from the roof of the building in front, made its way down the wall in a zigzag direction, until it became lost in the sullen waters of the tarn.

Noticing these things, I rode over a short causeway to the house. A servant in waiting took my horse, and I entered the Gothic archway of the hall. A valet, of stealthy step, thence conducted me, in silence, through many dark and intricate passages in my progress to the *studio* of his master. Much that I en-

10-11. experiment . . . tarn—"experiment, of looking down within the tarn," (1840). **19. about**—"around about" (1840). **23-24. tarn . . . leaden-hued**—"tarn, in the form of an inelastic vapor or gas—dull, sluggish, faintly discernible, and leaden-hued". (1840). There is no paragraph break in 1840. **41. Gothic**—Here, as elsewhere, the adjective is used for atmospheric effect. **43. studio**—not italicized in 1840.

countered on the way contributed, I know not how, to heighten the vague sentiments of which I have already spoken. While the objects around me—while the carvings of the ceilings, the sombre tapestries of the walls, the ebon blackness of the floors, and the phantasmagoric armorial trophies which rattled as I strode, were but matters to which, or to such as which, I have been accustomed from my infancy—while I hesitated not to acknowledge how familiar was all this—I still wondered to find how unfamiliar were the fancies which ordinary images were stirring up. On one of the staircases, I met the physician of the family. His countenance, I thought, wore a mingled expression of low cunning and perplexity. He accosted me with trepidation and passed on. The valet now threw open a door and ushered me into the presence of his master.

The room in which I found myself was very large and lofty. The windows were long, narrow, and pointed, and at so vast a distance from the black oaken floor as to be altogether inaccessible from within. Feeble gleams of encrimsoned light made their way through the trellised panes, and served to render sufficiently distinct the more prominent objects around; the eye, however, struggled in vain to reach the remoter angles of the chamber, or the recesses of the vaulted and fretted ceiling. Dark draperies hung upon the walls. The general furniture was profuse, comfortless, antique, and tattered. Many books and musical instruments lay scattered about, but failed to give any vitality to the scene. I felt that I breathed an atmosphere of sorrow. An air of stern, deep, and irredeemable gloom hung over and pervaded all.

Upon my entrance, Usher arose from a sofa on which he had been lying at full length, and greeted me with a vivacious warmth which had much in it, I at first thought, of an overdone cordiality—of the constrained effort of the *ennuyé* man of the world. A glance, however, at his countenance, convinced me of his perfect sincerity. We sat down; and for some moments, while he spoke not, I gazed upon him with a feeling half of pity, half of awe. Surely, man had never before so terribly altered, in so brief a period, as had Roderick Usher! It was with difficulty that I could bring myself to admit the identity of the wan being before me with the companion of my early boyhood. Yet the character of his face had been at all times remarkable. A cadaverousness of complexion; an eye large, liquid, and luminous beyond comparison; lips somewhat thin and very pallid, but of a surpassingly beautiful curve; a nose of a delicate Hebrew model, but with a breadth of nostril unusual in similar formations; a finely moulded chin, speaking, in its want of prominence, of a want of moral energy; hair of a more than web-like softness and tenuity; these features, with an inordinate expansion above the regions of the temple, made up altogether a countenance not easily to be forgotten. And now in the mere exaggeration of the prevailing character of these features, and of the expression they were wont to convey, lay so much of change that I doubted to whom I spoke. The now ghastly pallor of the skin, and the now miraculous lustre of

12. large and lofty—"large and excessively lofty" (1840). **15. trellised**—"trelliced" (1840). **23. on**—"upon" (1840). **26. ennuyé**—bored. **32. character of his face**—"The description of Roderick Usher is the most perfect pen-portrait of Poe himself which is known." (Allen) At the same time Usher's character has been determined by the supposed laws of phrenological description. See Edward Hungerford, *op. cit.*, pp. 225-27. **38. inordinate expansion**—indicating "ideality," according to phrenology. *Cf.* p. 701, lines 30-31.

the eye, above all things startled and even awed me. The silken hair, too, had been suffered to grow all unheeded, and as, in its wild gossamer texture, it floated rather than fell about the face, I could not, even with effort, connect its Arabesque expression with any idea of simple humanity.

In the manner of my friend I was at once struck with an incoherence—an inconsistency; and I soon found this to arise from a series of feeble and futile struggles to overcome an habitual trepidancy—an excessive nervous agitation. For something of this nature I had indeed been prepared, no less by his letter, than by reminiscences of certain boyish traits, and by conclusions deduced from his peculiar physical conformation and temperament. His action was alternately vivacious and sullen. His voice varied rapidly from a tremulous indecision (when the animal spirits seemed utterly in abeyance) to that species of energetic concision—that abrupt, weighty, unhurried, and hollow-sounding enunciation—that leaden, self-balanced and perfectly modulated guttural utterance, which may be observed in the lost drunkard, or the irreclaimable eater of opium, during the periods of his most intense excitement.

It was thus that he spoke of the object of my visit, of his earnest desire to see me, and of the solace he expected me to afford him. He entered, at some length, into what he conceived to be the nature of his malady. It was, he said, a constitutional and a family evil, and one for which he despaired to find a remedy—a mere nervous affection, he immediately added, which would undoubtedly soon pass off. It displayed itself in a host of unnatural sensations. Some of these, as he detailed them, interested and bewildered me; although, perhaps, the terms, and the general manner of the narration had their weight. He suffered much from a morbid acuteness of the senses; the most insipid food was alone endurable; he could wear only garments of certain texture; the odors of all flowers were oppressive; his eyes were tortured by even a faint light; and there were but peculiar sounds, and these from stringed instruments, which did not inspire him with horror.

To an anomalous species of terror I found him a bounden slave. "I shall perish," said he, "I *must* perish in this deplorable folly. Thus, thus, and not otherwise, shall I be lost. I dread the events of the future, not in themselves, but in their results. I shudder at the thought of any, even the most trivial, incident, which may operate upon this intolerable agitation of soul. I have, indeed, no abhorrence of danger, except in its absolute effect—in terror. In this unnerved—in this pitiable condition—I feel that the period will sooner or later arrive when I must abandon life and reason together, in some struggle with the grim phantasm, FEAR."

I learned, moreover, at intervals, and through broken and equivocal hints, another singular feature of his mental condition. He was enchained by certain superstitious impressions in regard to the dwelling which he tenanted, and

4. **Arabesque**—"arabesque" (1840). 7. **trepidancy**—trepidation. 1840 follows this with a comma. 9. **conclusions**—presumably a hint as to the phrenological correctness of the delineation. 13. **concision**—conciseness. 15. **observed**—In 1840 the paragraph concludes "which may be observed in the moments of intense excitement of the lost drunkard, or the irreclaimable eater of opium." 21. **affection**—complaint, illness. 23. **me;**—"me—" (1840). 36. **feel**—In 1840 this paragraph concludes "I feel that I must inevitably abandon life and reason together in my struggles with some fatal demon of fear."

whence, for many years, he had never ventured forth—in regard to an influence whose supposititious force was conveyed in terms too shadowy here to be restated—an influence which some peculiarities in the mere form and substance of his family mansion, had, by dint of long sufferance, he said, obtained over his spirit—an effect which the *physique* of the gray walls and turrets, and of the dim tarn into which they all looked down, had, at length, brought about upon the *morale* of his existence.

He admitted, however, although with hesitation, that much of the peculiar gloom which thus afflicted him could be traced to a more natural and far more palpable origin—to the severe and long-continued illness—indeed to the evidently approaching dissolution—of a tenderly beloved sister—his sole companion for long years—his last and only relative on earth. "Her decease," he said, with a bitterness which I can never forget, "would leave him (him the hopeless and the frail) the last of the ancient race of the Ushers." While he spoke, the lady Madeline (for so was she called) passed slowly through a remote portion of the apartment, and, without having noticed my presence, disappeared. I regarded her with an utter astonishment not unmingled with dread—and yet I found it impossible to account for such feelings. A sensation of stupor oppressed me, as my eyes followed her retreating steps. When a door, at length, closed upon her, my glance sought instinctively and eagerly the countenance of the brother—but he had buried his face in his hands, and I could only perceive that a far more than ordinary wanness had overspread the emaciated fingers through which trickled many passionate tears.

The disease of the lady Madeline had long baffled the skill of her physicians. A settled apathy, a gradual wasting away of the person, and frequent although transient affections of a partially cataleptical character, were the unusual diagnosis. Hitherto she had steadily borne up against the pressure of her malady, and had not betaken herself finally to bed; but, on the closing in of the evening of my arrival at the house, she succumbed (as her brother told me at night with inexpressible agitation) to the prostrating power of the destroyer; and I learned that the glimpse I had obtained of her person would thus probably be the last I should obtain—that the lady, at least while living, would be seen by me no more.

For several days ensuing, her name was unmentioned by either Usher or myself: and during this period I was busied in earnest endeavors to alleviate the melancholy of my friend. We painted and read together; or I listened, as if in a dream, to the wild improvisations of his speaking guitar. And thus, as a closer and still closer intimacy admitted me more unreservedly into the recesses of his spirit, the more bitterly did I perceive the futility of all attempt at cheering a mind from which darkness, as if an inherent positive quality, poured forth upon all objects of the moral and physical universe, in one unceasing radiation of gloom.

1. **whence**—"from which" (1840). 11. **sister**— —"sister;" (1840). 14. **While**—"As" (1840). 18. **and yet . . . feelings**—1840 reads "dread. Her figure, her air, her features—all, in their very minutest development were those—were identically (I can use no other sufficient term,) were identically those of the Roderick Usher who sat beside me." 18. **sensation**—"feeling" (1840). 19. **When**—"As" (1840). 20. **her**—"her exit" (1840). 29-30. The passage set off by parentheses is in 1840 set off by commas. 30. **destroyer;**—"destroyer—" (1840). 35. **myself:**—"myself;" (1840). 36. **together;**—"together—" (1840).

I shall ever bear about me a memory of the many solemn hours I thus spent alone with the master of the House of Usher. Yet I should fail in any attempt to convey an idea of the exact character of the studies, or of the occupations, in which he involved me, or led me the way. An excited and highly distempered ideality threw a sulphureous lustre over all. His long improvised dirges will ring forever in my ears. Among other things, I hold painfully in mind a certain singular perversion and amplification of the wild air of the last waltz of Von Weber. From the paintings over which his elaborate fancy brooded, and which grew, touch by touch, into vaguenesses at which I shuddered the more thrillingly, because I shuddered knowing not why;—from these paintings (vivid as their images now are before me) I would in vain endeavor to educe more than a small portion which should lie within the compass of merely written words. By the utter simplicity, by the nakedness of his designs, he arrested and overawed attention. If ever mortal painted an idea, that mortal was Roderick Usher. For me at least, in the circumstances then surrounding me, there arose out of the pure abstractions which the hypochondriac contrived to throw upon his canvas, an intensity of intolerable awe, no shadow of which felt I ever yet in the contemplation of the certainly glowing yet too concrete reveries of Fuseli.

One of the phantasmagoric conceptions of my friend, partaking not so rigidly of the spirit of abstraction, may be shadowed forth, although feebly, in words. A small picture presented the interior of an immensely long and rectangular vault or tunnel, with low walls, smooth, white, and without interruption or device. Certain accessory points of the design served well to convey the idea that this excavation lay at an exceeding depth below the surface of the earth. No outlet was observed in any portion of its vast extent, and no torch, or other artificial source of light was discernible; yet a flood of intense rays rolled throughout, and bathed the whole in a ghastly and inappropriate splendor.

I have just spoken of that morbid condition of the auditory nerve which rendered all music intolerable to the sufferer, with the exception of certain effects of stringed instruments. It was, perhaps, the narrow limits to which he thus confined himself upon the guitar, which gave birth, in great measure, to the fantastic character of his performances. But the fervid *facility* of his *impromptus* could not be so accounted for. They must have been, and were, in the notes, as well as in the words of his wild fantasias (for he not unfrequently accompanied himself with rhymed verbal improvisations), the result of that intense mental collectedness and concentration to which I have previously alluded as observable only in particular moments of the highest artificial excitement. The words of one of these rhapsodies I have easily remembered. I was, perhaps, the more forcibly impressed with it, as he gave it, because, in

5. **sulphureous**—"sulphurous" (1840). 6. **hold**—"bear" (1840). 8. **Von Weber**—Karl Maria von Weber (1786-1826), one of the greatest musicians of the romantic school. The so-called "Last Waltz of Von Weber" is really by Karl Gottlieb Reissiger (1798-1859)—No. 5 of *Danses brillantes* (1822). 10. **why;**— —"why," (1840). 15. **least,**—"least—" (1840). 16. **me,**—"me —" (1840). 19. **Fuseli**—Henry Fuseli (Füssly; 1741-1825), eccentric painter, illustrator of Shakespeare, and famous for his picture "The Nightmare." 27. **discernible;**—"discernible—" (1840). 35. **impromptus**—not italicized in 1840. 40. **remembered**—"borne away in memory" (1840).

the under or mystic current of its meaning, I fancied that I perceived, and for the first time, a full consciousness on the part of Usher, of the tottering of his lofty reason upon her throne. The verses, which were entitled "The Haunted Palace," ran very nearly, if not accurately, thus:—

I

In the greenest of our valleys,
By good angels tenanted,
Once a fair and stately palace—
Radiant palace—reared its head.
In the monarch Thought's dominion—
It stood there!
Never seraph spread a pinion
Over fabric half so fair.

II

Banners yellow, glorious, golden,
On its roof did float and flow;
(This—all this—was in the olden
Time long ago)
And every gentle air that dallied,
In that sweet day,
Along the ramparts plumed and pallid,
A winged odor went away.

III

Wanderers in that happy valley
Through two luminous windows saw
Spirits moving musically
To a lute's well-tunéd law,
Round about a throne, where sitting
(Porphyrogene!)
In state his glory well befitting,
The ruler of the realm was seen.

IV

And all with pearl and ruby glowing
Was the fair palace door,
Through which came flowing, flowing, flowing
And sparkling evermore,
A troop of Echoes whose sweet duty
Was but to sing,
In voices of surpassing beauty,
The wit and wisdom of their king.

V

But evil things, in robes of sorrow,
Assailed the monarch's high estate;

4. "The Haunted Palace" first appeared in the Baltimore *American Museum*, April, 1839. 8. **Radiant**—"Snow-white" (1840). 26. **Porphyrogene**—born to the purple; imperially born.

(Ah, let us mourn, for never morrow
Shall dawn upon him, desolate!)
And, round about his home, the glory
That blushed and bloomed
Is but a dim-remembered story
Of the old time entombed.

VI

And travellers now within that valley,
Through the red-litten windows, see
Vast forms that move fantastically
To a discordant melody;
While, like a rapid ghastly river,
Through the pale door,
A hideous throng rush out forever,
And laugh—but smile no more.

I well remember that suggestions arising from this ballad, led us into a train of thought wherein there became manifest an opinion of Usher's which I mention not so much on account of its novelty, (for other men have thought thus,) as on account of the pertinacity with which he maintained it. This opinion, in its general form, was that of the sentience of all vegetable things. But, in his disordered fancy, the idea had assumed a more daring character, and trespassed, under certain conditions, upon the kingdom of inorganization. I lack words to express the full extent, or the earnest *abandon* of his persuasion. The belief, however, was connected (as I have previously hinted) with the gray stones of the home of his forefathers. The conditions of the sentience had been here, he imagined, fulfilled in the method of collocation of these stones—in the order of their arrangement, as well as in that of the many *fungi* which overspread them, and of the decayed trees which stood around—above all, in the long undisturbed endurance of this arrangement, and in its reduplication in the still waters of the tarn. Its evidence—the evidence of the sentience—was to be seen, he said, (and I here started as he spoke,) in the gradual yet certain condensation of an atmosphere of their own about the waters and the walls. The result was discoverable, he added, in that silent, yet importunate and terrible influence which for centuries had moulded the destinies of his family, and which made *him* what I now saw him—what he was. Such opinions need no comment, and I will make none.

Our books—the books which, for years, had formed no small portion of the

17. **other men**—"Watson, Dr. Percival, Spallanzani, and especially the Bishop of Landaff.—See 'Chemical Essays,' Vol. V." (Poe's note) **26. fungi**—not italicized in 1840. **30-32. the gradual . . . walls**—1840 prints this passage in italics. **36. books**—Usher's library is notable for its fantastic qualities, but it is nevertheless amazing to see the author assemble titles from such far-fetched sources. Jean-Baptiste-Louis Gresset (1709-1777) wrote *Vert-Vert* (1734) and *La Chartreuse*, anticlerical and licentious poems. Niccoló Machiavelli (1469-1527) wrote, among other things, a satiric antifeminist novel, *Belfagor Arcidiavolo*. Emmanuel Swedenborg (1688-1772), Swedish mystic, published his *Heaven and Hell* in Latin in 1758. *The Subterranean Voyage of Nicholas Klimm* was published in Latin in 1741 by Ludvig Holberg (1684-1754). Robert Fludd (1574-1637) published in Latin *Clavis philosophiae et alchymae Fluddanae* (1633). Joannes Indagine published *Chiromantia* in 1531. Marin Cureau de la Chambre (1594-1669) published *Discours sur les principes*

mental existence of the invalid—were, as might be supposed, in strict keeping with this character of phantasm. We pored together over such works as the Ververt and Chartreuse of Gresset; the Belphegor of Machiavelli; the Heaven and Hell of Swedenborg; the Subterranean Voyage of Nicholas Klimm by Holberg; the Chiromancy of Robert Flud, of Jean D'Indaginé, and of De la Chambre; the Journey into the Blue Distance of Tieck; and the City of the Sun of Campanella. One favorite volume was a small octavo edition of the Directorium Inquisitorum, by the Dominican Eymeric de Gironne; and there were passages in Pomponius Mela, about the old African Satyrs and Oegipans, over which Usher would sit dreaming for hours. His chief delight, however, was found in the perusal of an exceedingly rare and curious book in quarto Gothic—the manual of a forgotten church—the Vigiliae Mortuorum secundum Chorum Ecclesiae Maguntinae.

I could not help thinking of the wild ritual of this work, and of its probable influence upon the hypochondriac, when, one evening, having informed me abruptly that the lady Madeline was no more, he stated his intention of preserving her corpse for a fortnight, (previously to its final interment,) in one of the numerous vaults within the main walls of the building. The worldly reason, however, assigned for this singular proceeding, was one which I did not feel at liberty to dispute. The brother had been led to his resolution (so he told me) by consideration of the unusual character of the malady of the deceased, of certain obtrusive and eager inquiries on the part of her medical men, and of the remote and exposed situation of the burial-ground of the family. I will not deny that when I called to mind the sinister countenance of the person whom I met upon the staircase, on the day of my arrival at the house, I had no desire to oppose what I regarded as at best but a harmless, and by no means an unnatural, precaution.

At the request of Usher, I personally aided him in the arrangements for the temporary entombment. The body having been encoffined, we two alone bore it to its rest. The vault in which we placed it (and which had been so long unopened that our torches, half smothered in its oppressive atmosphere, gave us little opportunity for investigation) was small, damp, and entirely without means of admission for light; lying, at great depth, immediately beneath that portion of the building in which was my own sleeping apartment. It had been used, apparently, in remote feudal times, for the worst purposes of a donjon-keep, and, in later days as a place of deposit for powder, or some other highly

de la chiromancie (1653). What book of Ludwig Tieck (1773-1853) Poe has in mind is not clear. Thomas Campanella (1568-1639) published *The City of the Sun* in Latin in 1643. Nicolas Eymeric de Girone (about 1320-1399) is the author of *Directorium inquisitorum* (1503). The geography of Pomponius Mela (first century A.D.) was printed at Milan in 1471. The last title in the paragraph refers to a book of unknown date and time of publication, beginning: *Incipiunt vigilie mortuorū secundū chorū ecclesie Maguntin* [Mayence], printed (?) by Johann Schoiffer.

4. by—"de" (1840). **9. Oegipans**—properly, Aegipan—a goat-shaped man, supposed to be found in Africa. **12. Vigiliae**—Poe's information—however he got it—is exact. The *Vigilie* is a quarto, very rare, printed in the characters used for early Bibles. (J. G. T. Graesse, *Trésor de livres rares et précieux*, Vol. VI, p. 490 [1867]). **14. wild ritual**—wild as it deals with a macabre subject. The ritual seems to have been standard. The title of the book means *The Watches of the Dead according to the Choir of the Church of Mainz*. **22. inquiries**—"Body-snatching" was not uncommon in the first half of the nineteenth century. Part of the plot of *The Adventures of Tom Sawyer* turns upon such an episode.

combustible substance, as a portion of its floor, and the whole interior of a long archway through which we reached it, were carefully sheathed with copper. The door, of massive iron, had been, also, similarly protected. Its immense weight caused an unusually sharp grating sound, as it moved upon its hinges.

Having deposited our mournful burden upon tressels within this region of horror, we partially turned aside the yet unscrewed lid of the coffin, and looked upon the face of the tenant. A striking similitude between the brother and sister now first arrested my attention; and Usher, divining, perhaps, my thoughts, murmured out some few words from which I learned that the deceased and himself had been twins, and that sympathies of a scarcely intelligible nature had always existed between them. Our glances, however, rested not long upon the dead—for we could not regard her unawed. The disease which had thus entombed the lady in the maturity of youth, had left, as usual in all maladies of a strictly cataleptical character, the mockery of a faint blush upon the bosom and the face, and that suspiciously lingering smile upon the lip which is so terrible in death. We replaced and screwed down the lid, and, having secured the door of iron, made our way, with toil, into the scarcely less gloomy apartments of the upper portion of the house.

And now, some days of bitter grief having elapsed, an observable change came over the features of the mental disorder of my friend. His ordinary manner had vanished. His ordinary occupations were neglected or forgotten. He roamed from chamber to chamber with hurried, unequal, and objectless step. The pallor of his countenance had assumed, if possible, a more ghastly hue—but the luminousness of his eye had utterly gone out. The once occasional huskiness of his tone was heard no more; and a tremulous quaver, as if of extreme terror, habitually characterized his utterance. There were times, indeed, when I thought his unceasingly agitated mind was laboring with some oppressive secret, to divulge which he struggled for the necessary courage. At times, again, I was obliged to resolve all into the mere inexplicable vagaries of madness, for I beheld him gazing upon vacancy for long hours, in an attitude of the profoundest attention, as if listening to some imaginary sound. It was no wonder that his condition terrified—that it infected me. I felt creeping upon me, by slow yet certain degrees, the wild influences of his own fantastic yet impressive superstitions.

It was, especially, upon retiring to bed late in the night of the seventh or eighth day after the placing of the lady Madeline within the donjon, that I experienced the full power of such feelings. Sleep came not near my couch—while the hours waned and waned away. I struggled to reason off the nervousness which had dominion over me. I endeavored to believe that much, if not all of what I felt, was due to the bewildering influence of the gloomy furniture of the room—of the dark and tattered draperies, which, tortured into motion by the breath of a rising tempest, swayed fitfully to and fro upon the walls, and rustled uneasily about the decorations of the bed. But my efforts

7-8. A striking . . . attention; and—For this phrase 1840 substitutes the sentence "The exact similitude between the brother and sister even here again startled and confounded me." **26. utterance. There**—1840 separates the two sentences by a dash. **40. bewildering**—"phantasmagoric" (1840).

were fruitless. An irrepressible tremor gradually pervaded my frame; and, at length, there sat upon my very heart an incubus of utterly causeless alarm. Shaking this off with a gasp and a struggle, I uplifted myself upon the pillows, and, peering earnestly within the intense darkness of the chamber, hearkened—I know not why, except that an instinctive spirit prompted me—to certain low and indefinite sounds which came, through the pauses of the storm, at long intervals, I knew not whence. Overpowered by an intense sentiment of horror, unaccountable yet unendurable, I threw on my clothes with haste (for I felt that I should sleep no more during the night), and endeavored to arouse myself from the pitiable condition into which I had fallen, by pacing rapidly to and fro through the apartment.

I had taken but few turns in this manner, when a light step on an adjoining staircase arrested my attention. I presently recognized it as that of Usher. In an instant afterward he rapped with a gentle touch at my door, and entered, bearing a lamp. His countenance was, as usual, cadaverously wan—but, moreover, there was a species of mad hilarity in his eyes—an evidently restrained *hysteria* in his whole demeanor. His air appalled me—but anything was preferable to the solitude which I had so long endured, and I even welcomed his presence as a relief.

"And you have not seen it?" he said abruptly, after having stared about him for some moments in silence—"you have not then seen it?—but, stay! you shall." Thus speaking, and having carefully shaded his lamp, he hurried to one of the casements, and threw it freely open to the storm.

The impetuous fury of the entering gust nearly lifted us from our feet. It was, indeed, a tempestuous yet sternly beautiful night, and one wildly singular in its terror and its beauty. A whirlwind had apparently collected its force in our vicinity; for there were frequent and violent alterations in the direction of the wind; and the exceeding density of the clouds (which hung so low as to press upon the turrets of the house) did not prevent our perceiving the life-like velocity with which they flew careering from all points against each other, without passing away into the distance. I say that even their exceeding density did not prevent our perceiving this—yet we had no glimpse of the moon or stars—nor was there any flashing forth of the lightning. But the under surfaces of the huge masses of agitated vapor, as well as all terrestrial objects immediately around us, were glowing in the unnatural light of a faintly luminous and distinctly visible gaseous exhalation which hung about and enshrouded the mansion.

"You must not—you shall not behold this!" said I, shudderingly, to Usher, as I led him with a gentle violence, from the window to a seat. "These appearances, which bewilder you, are merely electrical phenomena not uncommon—or it may be that they have their ghastly origin in the rank miasma of the tarn. Let us close this casement;—the air is chilling and dangerous to your frame. Here is one of your favorite romances. I will read, and you shall listen;—and so we will pass away this terrible night together."

9. **for . . . night**—1840 sets off the material in parentheses by commas. 16. **moreover**—1840 omits. 17. **hysteria**—not in italics in 1840. 23. **casements**—"gigantic casements" (1840).

The antique volume which I had taken up was the "Mad Trist" of Sir Launcelot Canning; but I had called it a favorite of Usher's more in sad jest than in earnest; for, in truth, there is little in its uncouth and unimaginative prolixity which could have had interest for the lofty and spiritual ideality of my friend. It was, however, the only book immediately at hand; and I indulged a vague hope that the excitement which now agitated the hypochondriac, might find relief (for the history of mental disorder is full of similar anomalies) even in the extremeness of the folly which I should read. Could I have judged, indeed, by the wild overstrained air of vivacity with which he hearkened, or apparently hearkened, to the words of the tale, I might well have congratulated myself upon the success of my design.

I had arrived at that well-known portion of the story where Ethelred, the hero of the Trist, having sought in vain for peaceable admission into the dwelling of the hermit, proceeds to make good an entrance by force. Here, it will be remembered, the words of the narrative run thus:

"And Ethelred, who was by nature of a doughty heart, and who was now mighty withal, on account of the powerfulness of the wine which he had drunken, waited no longer to hold parley with the hermit, who, in sooth, was of an obstinate and malicefuI turn, but, feeling the rain upon his shoulders, and fearing the rising of the tempest, uplifted his mace outright, and, with blows, made quickly room in the plankings of the door for his gauntleted hand; and now pulling therewith sturdily, he so cracked, and ripped, and tore all asunder, that the noise of the dry and hollow-sounding wood alarummed and reverberated throughout the forest."

At the termination of this sentence I started, and for a moment, paused; for it appeared to me (although I at once concluded that my excited fancy had deceived me)—it appeared to me that, from some very remote portion of the mansion, there came, indistinctly, to my ears, what might have been, in its exact similarity of character, the echo (but a stifled and dull one certainly) of the very cracking and ripping sound which Sir Launcelot had so particularly described. It was, beyond doubt, the coincidence alone which had arrested my attention; for, amid the rattling of the sashes of the casements, and the ordinary commingled noises of the still increasing storm, the sound, in itself, had nothing, surely, which should have interested or disturbed me. I continued the story:

"But the good champion Ethelred, now entering within the door, was sore enraged and amazed to perceive no signal of the maliceful hermit; but, in the stead thereof, a dragon of a scaly and prodigious demeanor, and of a fiery tongue, which sate in guard before a palace of gold, with a floor of silver; and upon the wall there hung a shield of shining brass with this legend enwritten—

Who entereth herein, a conqueror hath bin;
Who slayeth the dragon, the shield he shall win;

And Ethelred uplifted his mace, and struck upon the head of the dragon, which fell before him, and gave up his pesty breath, with a shriek so horrid and harsh, and

1. **"Mad Trist"**—The "antique volume" in question is apparently Poe's own fabrication. 2. **Canning;**—"Canning—" (1840). 15. **thus:**—"thus:—" (1840). 41. **win;**—"wIn." (1840).

withal so piercing, that Ethelred had fain to close his ears with his hands against the dreadful noise of it, the like whereof was never before heard."

Here again I paused abruptly, and now with a feeling of wild amazement—for there could be no doubt whatever that, in this instance, I did actually hear (although from what direction it proceeded I found it impossible to say) a low and apparently distant, but harsh, protracted, and most unusual screaming or grating sound—the exact counterpart of what my fancy had already conjured up for the dragon's unnatural shriek as described by the romancer.

Oppressed, as I certainly was, upon the occurrence of this second and most extraordinary coincidence, by a thousand conflicting sensations, in which wonder and extreme terror were predominant, I still retained sufficient presence of mind to avoid exciting, by any observation, the sensitive nervousness of my companion. I was by no means certain that he had noticed the sounds in question; although, assuredly, a strange alteration had, during the last few minutes taken place in his demeanor. From a position fronting my own, he had gradually brought round his chair, so as to sit with his face to the door of the chamber; and thus I could but partially perceive his features, although I saw that his lips trembled as if he were murmuring inaudibly. His head had dropped upon his breast—yet I knew that he was not asleep, from the wide and rigid opening of the eye as I caught a glance of it in profile. The motion of his body, too, was at variance with this idea—for he rocked from side to side with a gentle yet constant and uniform sway. Having rapidly taken notice of all this, I resumed the narrative of Sir Launcelot, which thus proceeded:

"And now, the champion, having escaped from the terrible fury of the dragon, bethinking himself of the brazen shield, and of the breaking up of the enchantment which was upon it, removed the carcass from out of the way before him, and approached valorously over the silver pavement of the castle to where the shield was upon the wall; which in sooth tarried not for his full coming, but fell down at his feet upon the silver floor, with a mighty great and terrible ringing sound."

No sooner had these syllables passed my lips, than—as if a shield of brass had indeed, at the moment, fallen heavily upon a floor of silver—I became aware of a distinct, hollow, metallic, and clangorous yet apparently muffled reverberation. Completely unnerved, I leaped to my feet; but the measured rocking movement of Usher was undisturbed. I rushed to the chair in which he sat. His eyes were bent fixedly before him, and throughout his whole countenance there reigned a stony rigidity. But, as I placed my hand upon his shoulder, there came a strong shudder over his whole person; a sickly smile quivered about his lips; and I saw that he spoke in a low, hurried, and gibbering murmur, as if unconscious of my presence. Bending closely over him, I at length drank in the hideous import of his words.

"Not hear it?—yes, I hear it, and *have* heard it. Long—long—long—many minutes, many hours, many days, have I heard it—yet I dared not—oh, pity me, miserable wretch that I am!—I dared not—I *dared* not speak! *We have put*

23. proceeded:—"proceeded:—" (1840). **33. I leaped**—"I started convulsively" (1840). **36. stony**—"more than stony" (1840). **36. placed**—"laid" (1840). **37. whole person**—"frame" (1840).

her living in the tomb! Said I not that my senses were acute? I *now* tell you that I heard her first feeble movements in the hollow coffin. I heard them—many, many days ago—yet I dared not—*I dared not speak!* And now—to-night—Ethelred—ha! ha!—the breaking of the hermit's door, and the death-cry of the dragon, and the clangor of the shield!—say, rather, the rending of her coffin, and the grating of the iron hinges of her prison, and her struggles within the coppered archway of the vault! Oh, whither shall I fly? Will she not be here anon? Is she not hurrying to upbraid me for my haste? Have I not heard her footstep on the stair? Do I not distinguish that heavy and horrible beating of her heart? Madman!"—here he sprang furiously to his feet, and shrieked out his syllables, as if in the effort he were giving up his soul—*"Madman! I tell you that she now stands without the door!"*

As if in the superhuman energy of his utterance there had been found the potency of a spell, the huge antique pannels to which the speaker pointed, threw slowly back, upon the instant, their ponderous and ebony jaws. It was the work of the rushing gust—but then without those doors there *did* stand the lofty and enshrouded figure of the Lady Madeline of Usher. There was blood upon her white robes, and the evidence of some bitter struggle upon every portion of her emaciated frame. For a moment she remained trembling and reeling to and fro upon the threshold—then, with a low moaning cry, fell heavily inward upon the person of her brother, and in her violent and now final death-agonies, bore him to the floor a corpse, and a victim to the terrors he had anticipated.

From that chamber, and from that mansion, I fled aghast. The storm was still abroad in all its wrath as I found myself crossing the old causeway. Suddenly there shot along the path a wild light, and I turned to see whence a gleam so unusual could have issued; for the vast house and its shadows were alone behind me. The radiance was that of the full, setting, and blood-red moon, which now shone vividly through that once barely-discernible fissure, of which I have before spoken as extending from the roof of the building, in a zigzag direction, to the base. While I gazed, this fissure rapidly widened—there came a fierce breath of the whirlwind—the entire orb of the satellite burst at once upon my sight—my brain reeled as I saw the mighty walls rushing asunder—there was a long tumultuous shouting sound like the voice of a thousand waters—and the deep and dank tarn at my feet closed sullenly and silently over the fragments of the *"House of Usher."*

THE MASQUE OF THE RED DEATH

This "study" in horror first appeared in *Graham's Magazine* for May, 1842, and later in the *Broadway Journal* for July 19, 1845, the text of which is here followed.

5. shield!—"shield" (1840). **5. her**—"the" (1840). **6. of her prison**—1840 omits. **7. whither**—*Cf.* Ps. 139:7. **10. sprang**—"sprung" (1840). **11. Madman!**—not in italics in 1840. **14. spell,**—"spell—" (1840). **21. violent**—"horrible" (1840). **22. anticipated**—"dreaded" (1840). **27. issued;**—"issued—" (1840). **30. spoken**—"spoken," (1840). **34-35. voice . . . waters**—*Cf.* Rev. 1:15.

It represents a type of "study" of which Poe was fond—the creation of a single episode set in a carefully wrought atmospheric effect.

THE "RED DEATH" had long devastated the country. No pestilence had ever been so fatal, or so hideous. Blood was its Avator and its seal—the redness and the horror of blood. There were sharp pains, and sudden dizziness, and then profuse bleeding at the pores, with dissolution. The scarlet stains upon the body and especially upon the face of the victim, were the pest ban which shut him out from the aid and from the sympathy of his fellowmen. And the whole seizure, progress and termination of the disease, were the incidents of half an hour.

But the Prince Prospero was happy and dauntless and sagacious. When his dominions were half depopulated, he summoned to his presence a thousand hale and light-hearted friends from among the knights and dames of his court, and with these retired to the deep seclusion of one of his castellated abbeys. This was an extensive and magnificent structure, the creation of the prince's own eccentric yet august taste. A strong and lofty wall girdled it in. This wall had gates of iron. The courtiers, having entered, brought furnaces and massy hammers and welded the bolts. They resolved to leave means neither of ingress or egress to the sudden impulses of despair or of frenzy from within. The abbey was amply provisioned. With such precautions the courtiers might bid defiance to contagion. The external world could take care of itself. In the meantime it was folly to grieve, or to think. The prince had provided all the appliances of pleasure. There were buffoons, there were improvisatori, there were ballet-dancers, there were musicians, there was Beauty, there was wine. All these and security were within. Without was the "Red Death."

It was toward the close of the fifth or sixth month of his seclusion, and while the pestilence raged most furiously abroad, that the Prince Prospero entertained his thousand friends at a masked ball of the most unusual magnificence.

It was a voluptuous scene, that masquerade. But first let me tell of the rooms in which it was held. There were seven—an imperial suite. In many palaces, however, such suites form a long and straight vista, while the folding doors slide back nearly to the walls on either hand, so that the view of the whole extent is scarcely impeded. Here the case was very different; as might have been expected from the duke's love of the *bizarre*. The apartments were so irregularly disposed that the vision embraced but little more than one at a time. There was a sharp turn at every twenty or thirty yards, and at each turn a novel effect. To the right and left, in the middle of each wall, a tall and narrow Gothic window looked out upon a closed corridor which pursued the windings of the suite. These windows were of stained glass whose color varied in accordance with the prevailing hue of the decorations of the chamber into which it opened. That at the eastern extremity was hung, for example, in blue—and vividly blue were its windows. The second chamber was purple in its ornaments and tapestries, and here the panes were purple. The third was green throughout, and so were the casements. The fourth was furnished and lighted

2. **Avator**—properly, avatar, reincarnation. 21. **improvisatori**—properly, makers of *ex tempore* verses.

with orange—the fifth with white—the sixth with violet. The seventh apartment was closely shrouded in black velvet tapestries that hung all over the ceiling and down the walls, falling in heavy folds upon a carpet of the same material and hue. But in this chamber only, the color of the windows failed to correspond with the decorations. The panes here were scarlet—a deep blood color. Now in no one of the seven apartments was there any lamp or candelabrum, amid the profusion of golden ornaments that lay scattered to and fro or depended from the roof. There was no light of any kind emanating from lamp or candle within the suite of chambers. But in the corridors that followed the suite, there stood, opposite to each window, a heavy tripod, bearing a brazier of fire that projected its rays through the tinted glass and so glaringly illumined the room. And thus were produced a multitude of gaudy and fantastic appearances. But in the western or black chamber the effect of the firelight that streamed upon the dark hangings through the blood-tinted panes, was ghastly in the extreme, and produced so wild a look upon the countenances of those who entered, that there were few of the company bold enough to set foot within its precincts at all.

It was in this apartment, also, that there stood against the western wall, a gigantic clock of ebony. Its pendulum swung to and fro with a dull, heavy, monotonous clang; and when the minute-hand made the circuit of the face, and the hour was to be stricken, there came from the brazen lungs of the clock a sound which was clear and loud and deep and exceedingly musical, but of so peculiar a note and emphasis that, at each lapse of an hour, the musicians of the orchestra were constrained to pause, momentarily, in their performance, to hearken to the sound; and thus the waltzers perforce ceased their evolutions; and there was a brief disconcert of the whole gay company; and, while the chimes of the clock yet rang, it was observed that the giddiest grew pale, and the more aged and sedate passed their hands over their brows as if in confused revery or meditation. But when the echoes had fully ceased, a light laughter at once pervaded the assembly; the musicians looked at each other and smiled as if at their own nervousness and folly, and made whispering vows, each to the other, that the next chiming of the clock should produce in them no similar emotion; and then, after the lapse of sixty minutes (which embrace three thousand and six hundred seconds of the Time that flies,) there came yet another chiming of the clock, and then were the same disconcert and tremulousness and meditation as before.

But, in spite of these things, it was a gay and magnificent revel. The tastes of the duke were peculiar. He had a fine eye for colors and effects. He disregarded the *decora* of mere fashion. His plans were bold and fiery, and his conceptions glowed with barbaric lustre. There are some who would have thought him mad. His followers felt that he was not. It was necessary to hear and see and touch him to be *sure* that he was not.

He had directed, in great part, the movable embellishments of the seven chambers, upon occasion of this great *fête;* and it was his own guiding taste which had given character to the masqueraders. Be sure they were grotesque.

26. disconcert—lack of concert, lack of order. **39. decora**—decorations, embellishments.

There were much glare and glitter and piquancy and phantasm—much of what has been since seen in "Hernani." There were arabesque figures with unsuited limbs and appointments. There were delirious fancies such as the madman fashions. There was much of the beautiful, much of the wanton, much of the *bizarre,* something of the terrible, and not a little of that which might have excited disgust. To and fro in the seven chambers there stalked, in fact, a multitude of dreams. And these—the dreams—writhed in and about, taking hue from the rooms, and causing the wild music of the orchestra to seem as the echo of their steps. And, anon, there strikes the ebony clock which stands in the hall of the velvet. And then, for a moment, all is still, and all is silent save the voice of the clock. The dreams are stiff-frozen as they stand. But the echoes of the chime die away—they have endured but an instant—and a light, half-subdued laughter floats after them as they depart. And now again the music swells, and the dreams live, and writhe to and fro more merrily than ever, taking hue from the many tinted windows through which stream the rays from the tripods. But to the chamber which lies most westwardly of the seven, there are now none of the maskers who venture; for the night is waning away; and there flows a ruddier light through the blood-colored panes; and the blackness of the sable drapery appalls; and to him whose foot falls upon the sable carpet, there comes from the near clock of ebony a muffled peal more solemnly emphatic than any which reaches *their* ears who indulge in the more remote gayeties of the other apartments.

But these other apartments were densely crowded, and in them beat feverishly the heart of life. And the revel went whirlingly on, until at length there commenced the sounding of midnight upon the clock. And then the music ceased, as I have told; and the evolutions of the waltzers were quieted; and there was an uneasy cessation of all things as before. But now there were twelve strokes to be sounded by the bell of the clock; and thus it happened, perhaps, that more of thought crept, with more of time, into the meditations of the thoughtful among those who revelled. And thus, too, it happened, perhaps, that before the last echoes of the last chime had utterly sunk into silence, there were many individuals in the crowd who had found leisure to become aware of the presence of a masked figure which had arrested the attention of no single individual before. And the rumor of this new presence having spread itself whisperingly around, there arose at length from the whole company, a buzz, or murmur, expressive of disapprobation and surprise—then, finally, of terror, of horror, and of disgust.

In an assembly of phantasms such as I have painted, it may well be supposed that no ordinary appearance could have excited such sensation. In truth the masquerade license of the night was nearly unlimited; but the figure in question had out-Heroded Herod, and gone beyond the bounds of even the prince's indefinite decorum. There are chords in the hearts of the most reckless which

2. **"Hernani"**—a costume play by Victor Hugo (1830), generally regarded as the beginning of the romantic movement in the French theater. **2-3. unsuited . . . appointments**—that is, whose limbs did not suit their costumes (appointments). **26. waltzers**—The waltz, then a relatively new dance, was regarded as a bit "fast" when this story was written. **41. out-Heroded Herod**—*Cf.* Hamlet's speech to the players, ***Hamlet,*** Act III, scene 2.

cannot be touched without emotion. Even with the utterly lost, to whom life and death are equally jests, there are matters of which no jest can be made. The whole company, indeed, seemed now deeply to feel that in the costume and bearing of the stranger neither wit nor propriety existed. The figure was tall and gaunt, and shrouded from head to foot in the habiliments of the grave. The mask which concealed the visage was made so nearly to resemble the countenance of a stiffened corpse that the closest scrutiny must have had difficulty in detecting the cheat. And yet all this might have been endured, if not approved, by the mad revellers around. But the mummer had gone so far as to assume the type of the Red Death. His vesture was dabbled in *blood*—and his broad brow, with all the features of the face, was besprinkled with the scarlet horror.

When the eyes of Prince Prospero fell upon this spectral image (which with a slow and solemn movement, as if more fully to sustain its *rôle,* stalked to and fro among the waltzers) he was seen to be convulsed, in the first moment, with a strong shudder either of terror or distaste; but, in the next, his brow reddened with rage.

"Who dares?" he demanded hoarsely of the courtiers who stood near him—"who dares insult us with this blasphemous mockery? Seize him and unmask him—that we may know whom we have to hang at sunrise, from the battlements!"

It was in the eastern or blue chamber in which stood the Prince Prospero as he uttered these words. They rang throughout the seven rooms loudly and clearly—for the prince was a bold and robust man, and the music had become hushed at the waving of his hand.

It was in the blue room where stood the prince, with a group of pale courtiers by his side. At first, as he spoke, there was a slight rushing movement of this group in the direction of the intruder, who at the moment was also near at hand, and now, with deliberate and stately step, made closer approach to the speaker. But from a certain nameless awe with which the mad assumptions of the mummer had inspired the whole party, there were found none who put forth hand to seize him; so that, unimpeded, he passed within a yard of the prince's person; and, while the vast assembly, as if with one impulse, shrank from the centres of the rooms to the walls, he made his way uninterruptedly, but with the same solemn and measured step which had distinguished him from the first, through the blue chamber to the purple—through the purple to the green—through the green to the orange—through this again to the white—and even thence to the violet, ere a decided movement had been made to arrest him. It was then, however, that the Prince Prospero, maddening with rage and the shame of his own momentary cowardice, rushed hurriedly through the six chambers, while none followed him on account of a deadly terror that had seized upon all. He bore aloft a drawn dagger, and had approached, in rapid impetuosity, to within three or four feet of the retreating figure, when the latter, having attained the extremity of the velvet apartment, turned suddenly and confronted his pursuer. There was a sharp cry—and the dagger dropped gleaming upon the sable carpet, upon which, instantly afterwards, fell prostrate in

10. type—typical appearance.

death the Prince Prospero. Then, summoning the wild courage of despair, a throng of the revellers at once threw themselves into the black apartment, and, seizing the mummer, whose tall figure stood erect and motionless within the shadow of the ebony clock, gasped in unutterable horror at finding the grave-cerements and corpse-like mask which they handled with so violent a rudeness, untenanted by any tangible form.

And now was acknowledged the presence of the Red Death. He had come like a thief in the night. And one by one dropped the revellers in the blood-bedewed halls of their revel, and died each in the despairing posture of his fall. And the life of the ebony clock went out with that of the last of the gay. And the flames of the tripods expired. And Darkness and Decay and the Red Death held illimitable dominion over all.

THE PURLOINED LETTER

Nil sapientiae odiosius acumine nimio.
SENECA

"The Purloined Letter," the fourth of Poe's "tales of ratiocination," or detective stories, to be printed, appeared first of all in *The Gift*, an annual appearing in 1845. It was then collected into the *Tales* of 1845, from which the present text is taken. Motto: "Nothing is more distasteful to good sense than too much subtlety." Lucius Annaeus Seneca (3 B.C.-65 A.D.).

AT PARIS, just after dark one gusty evening in the autumn of 18—, I was enjoying the two-fold luxury of meditation and a meerschaum, in company with my friend C. Auguste Dupin, in his little back library, or book-closet, *au troisième, No.* 33, *Rue Dunôt, Faubourg St. Germain.* For one hour at least we had maintained a profound silence; while each, to any casual observer, might have seemed intently and exclusively occupied with the curling eddies of smoke that oppressed the atmosphere of the chamber. For myself, however, I was mentally discussing certain topics which had formed matter for conversation between us at an earlier period of the evening; I mean the affair of the Rue Morgue, and the mystery attending the murder of Marie Rogêt. I looked upon it, therefore, as something of a coincidence, when the door of our apartment was thrown open and admitted our old acquaintance, Monsieur G——, the Prefect of the Parisian police.

We gave him a hearty welcome; for there was nearly half as much of the entertaining as of the contemptible about the man, and we had not seen him for several years. We had been sitting in the dark, and Dupin now arose for the purpose of lighting a lamp, but sat down again, without doing so, upon G.'s saying that he had called to consult us, or rather to ask the opinion of my friend, about some official business which had occasioned a great deal of trouble.

8. thief in the night—*Cf.* I Thess. 5: 1-2. **15. Dupin**—Dupin, who is Poe's contribution to the gallery of eccentric detectives, is first introduced to solve the mystery of "The Murders in the Rue Morgue," and later "The Mystery of Marie Rogêt." **16. au troisième**—M. Dupin lived on the third floor at No. 33, Dunot Street, in the ward of St. Germain. **25. Monsieur G——**—Monsieur G—— also appears in the two earlier stories concerning M. Dupin.

"If it is any point requiring reflection," observed Dupin, as he forbore to enkindle the wick, "we shall examine it to better purpose in the dark."

"That is another of your odd notions," said the Prefect, who had a fashion of calling everything "odd" that was beyond his comprehension, and thus lived amid an absolute legion of "oddities."

"Very true," said Dupin, as he supplied his visiter with a pipe, and rolled towards him a comfortable chair.

"And what is the difficulty now?" I asked. "Nothing more in the assassination way, I hope?"

"Oh no; nothing of that nature. The fact is, the business is *very* simple indeed, and I make no doubt that we can manage it sufficiently well ourselves; but then I thought Dupin would like to hear the details of it, because it is so excessively *odd*."

"Simple and odd," said Dupin.

"Why, yes; and not exactly that, either. The fact is, we have all been a good deal puzzled because the affair *is* so simple, and yet baffles us altogether."

"Perhaps it is the very simplicity of the thing which puts you at fault," said my friend.

"What nonsense you *do* talk!" replied the Prefect, laughing heartily.

"Perhaps the mystery is a little *too* plain," said Dupin.

"Oh, good heavens! who ever heard of such an idea?"

"A little *too* self-evident."

"Ha! ha! ha!—ha! ha! ha!—ho! ho! ho!" roared our visitor, profoundly amused, "oh, Dupin, you will be the death of me yet!"

"And what, after all, *is* the matter on hand?" I asked.

"Why, I will tell you," replied the Prefect, as he gave a long, steady, and contemplative puff, and settled himself in his chair. "I will tell you in a few words; but, before I begin, let me caution you that this is an affair demanding the greatest secrecy, and that I should most probably lose the position I now hold, were it known that I confided it to any one."

"Proceed," said I.

"Or not," said Dupin.

"Well, then; I have received personal information, from a very high quarter, that a certain document of the last importance, has been purloined from the royal apartments. The individual who purloined it is known; this beyond a doubt; he was seen to take it. It is known, also, that it still remains in his possession."

"How is this known?" asked Dupin.

"It is clearly inferred," replied the Prefect, "from the nature of the document, and from the non-appearance of certain results which would at once arise from its passing *out* of the robber's possession;—that is to say, from his employing it as he must design in the end to employ it."

"Be a little more explicit," I said.

"Well, I may venture so far as to say that the paper gives its holder a certain power in a certain quarter where such power is immensely valuable." The Prefect was fond of the cant of diplomacy.

"Still I do not quite understand," said Dupin.

"No? Well; the disclosure of the document to a third person, who shall be nameless, would bring in question the honor of a personage of most exalted station; and this fact gives the holder of the document an ascendancy over the illustrious personage whose honor and peace are so jeopardized."

"But this ascendancy," I interposed, "would depend upon the robber's knowledge of the loser's knowledge of the robber. Who would dare——"

"The thief," said G., "is the Minister D——, who dares all things, those unbecoming as well as those becoming a man. The method of the theft was not less ingenious than bold. The document in question—a letter, to be frank—had been received by the personage robbed while alone in the royal *boudoir*. During its perusal she was suddenly interrupted by the entrance of the other exalted personage from whom especially it was her wish to conceal it. After a hurried and vain endeavor to thrust it in a drawer, she was forced to place it, open as it was, upon a table. The address, however, was uppermost, and, the contents thus unexposed, the letter escaped notice. At this juncture enters the Minister D——. His lynx eye immediately perceives the paper, recognizes the handwriting of the address, observes the confusion of the personage addressed, and fathoms her secret. After some business transactions, hurried through in his ordinary manner, he produces a letter somewhat similar to the one in question, opens it, pretends to read it, and then places it in close juxtaposition to the other. Again he converses, for some fifteen minutes, upon the public affairs. At length, in taking leave, he takes also from the table the letter to which he had no claim. Its rightful owner saw, but, of course, dared not call attention to the act, in the presence of the third personage who stood at her elbow. The Minister decamped; leaving his own letter—one of no importance—upon the table."

"Here, then," said Dupin to me, "you have precisely what you demand to make the ascendancy complete—the robber's knowledge of the loser's knowledge of the robber."

"Yes," replied the Prefect; "and the power thus attained has, for some months past, been wielded, for political purposes, to a very dangerous extent. The personage robbed is more thoroughly convinced, every day, of the necessity of reclaiming her letter. But this, of course, cannot be done openly. In fine, driven to despair, she has committed the matter to me."

"Than whom," said Dupin, amid a perfect whirlwind of smoke, "no more sagacious agent could, I suppose, be desired, or even imagined."

"You flatter me," replied the Prefect; "but it is possible that some such opinion may have been entertained."

"It is clear," said I, "as you observe, that the letter is still in possession of the minister; since it is this possession, and not any employment of the letter, which bestows the power. With the employment the power departs."

"True," said G.; "and upon this conviction I proceeded. My first care was to make thorough search of the minister's hotel; and here my chief embarrass-

11. **boudoir**—here used in the old-fashioned sense of withdrawing-room. 44. **hotel**—here used to mean a pretentious private house.

ment lay in the necessity of searching without his knowledge. Beyond all things, I have been warned of the danger which would result from giving him reason to suspect our design."

"But," said I, "you are quite *au fait* in these investigations. The Parisian police have done this thing often before."

"O, yes; and for this reason I did not despair. The habits of the minister gave me, too, a great advantage. He is frequently absent from home all night. His servants are by no means numerous. They sleep at a distance from their master's apartment, and, being chiefly Neapolitans, are readily made drunk. I have keys, as you know, with which I can open any chamber or cabinet in Paris. For three months a night has not passed, during the greater part of which I have not been engaged, personally, in ransacking the D—— Hotel. My honor is interested, and, to mention a great secret, the reward is enormous. So I did not abandon the search until I had become fully satisfied that the thief is a more astute man than myself. I fancy that I have investigated every nook and corner of the premises in which it is possible that the paper can be concealed."

"But is it not possible," I suggested, "that although the letter may be in possession of the minister, as it unquestionably is, he may have concealed it elsewhere than upon his own premises?"

"This is barely possible," said Dupin. "The present peculiar condition of affairs at court, and especially of those intrigues in which D—— is known to be involved, would render the instant availability of the document—its susceptibility of being produced at a moment's notice—a point of nearly equal importance with its possession."

"Its susceptibility of being produced?" said I.

"That is to say, of being *destroyed,*" said Dupin.

"True," I observed; "the paper is clearly then upon the premises. As for its being upon the person of the minister, we may consider that as out of the question."

"Entirely," said the Prefect. "He has been twice waylaid, as if by footpads, and his person rigorously searched under my own inspection."

"You might have spared yourself this trouble," said Dupin. "D——, I presume, is not altogether a fool, and, if not, must have anticipated these waylayings, as a matter of course."

"Not *altogether* a fool," said G., "but then he's a poet, which I take to be only one remove from a fool."

"True," said Dupin, after a long and thoughtful whiff from his meerschaum, "although I have been guilty of certain doggerel myself."

"Suppose you detail," said I, "the particulars of your search."

"Why, the fact is, we took our time, and we searched *every where.* I have had long experience in these affairs. I took the entire building, room by room; devoting the nights of a whole week to each. We examined, first, the furniture of each apartment. We opened every possible drawer; and I presume you know that, to a properly trained police agent, such a thing as a *secret* drawer is impossible. Any man is a dolt who permits a 'secret' drawer to escape him in a search of this kind. The thing is *so* plain. There is a certain amount of bulk—

4. **au fait**—accomplished, "in the know."

of space—to be accounted for in every cabinet. Then we have accurate rules. The fiftieth part of a line could not escape us. After the cabinets we took the chairs. The cushions we probed with the fine long needles you have seen me employ. From the tables we removed the tops."

"Why so?"

"Sometimes the top of a table, or other similarly arranged piece of furniture, is removed by the person wishing to conceal an article; then the leg is excavated, the article deposited within the cavity, and the top replaced. The bottoms and tops of bed-posts are employed in the same way."

"But could not the cavity be detected by sounding?" I asked.

"By no means, if, when the article is deposited, a sufficient wadding of cotton be placed around it. Besides, in our case, we were obliged to proceed without noise."

"But you could not have removed—you could not have taken to pieces *all* articles of furniture in which it would have been possible to make a deposit in the manner you mention. A letter may be compressed into a thin spiral roll, not differing much in shape or bulk from a large knitting-needle, and in this form it might be inserted into the rung of a chair, for example. You did not take to pieces all the chairs?"

"Certainly not; but we did better—we examined the rungs of every chair in the hotel, and, indeed, the jointings of every description of furniture, by the aid of a most powerful microscope. Had there been any traces of recent disturbance we should not have failed to detect it instantly. A single grain of gimlet-dust, for example, would have been as obvious as an apple. Any disorder in the glueing—any unusual gaping in the joints—would have sufficed to insure detection."

"I presume you looked to the mirrors, between the boards and the plates, and you probed the beds and the bed-clothes, as well as the curtains and carpets."

"That of course; and when we had absolutely completed every particle of the furniture in this way, then we examined the house itself. We divided its entire surface into compartments, which we numbered, so that none might be missed; then we scrutinized each individual square inch throughout the premises, including the two houses immediately adjoining, with the microscope, as before."

"The two houses adjoining!" I exclaimed; "you must have had a great deal of trouble."

"We had; but the reward offered is prodigious."

"You include the *grounds* about the houses?"

"All the grounds are paved with brick. They gave us comparatively little trouble. We examined the moss between the bricks, and found it undisturbed."

"You looked among D——'s papers, of course, and into the books of the library?"

"Certainly; we opened every package and parcel; we not only opened every book, but we turned over every leaf in each volume, not contenting ourselves with a mere shake, according to the fashion of some of our police officers. We also measured the thickness of every book-*cover*, with the most accurate ad-

measurement, and applied to each the most jealous scrutiny of the microscope. Had any of the bindings been recently meddled with, it would have been utterly impossible that the fact should have escaped observation. Some five or six volumes, just from the hands of the binder, we carefully probed, longitudinally, with the needles."

"You explored the floors beneath the carpets?"

"Beyond doubt. We removed every carpet, and examined the boards with the microscope."

"And the paper on the walls?"

"Yes."

"You looked into the cellars?"

"We did."

"Then," I said, "you have been making a miscalculation, and the letter is *not* upon the premises, as you suppose."

"I fear you are right there," said the Prefect. "And now, Dupin, what would you advise me to do?"

"To make a thorough re-search of the premises."

"That is absolutely needless," replied G——. "I am not more sure that I breathe than I am that the letter is not at the Hotel."

"I have no better advice to give you," said Dupin. "You have, of course, an accurate description of the letter?"

"Oh yes!"—And here the Prefect, producing a memorandum-book, proceeded to read aloud a minute account of the internal, and especially of the external appearance of the missing document. Soon after finishing the perusal of this description, he took his departure, more entirely depressed in spirits than I had ever known the good gentleman before.

In about a month afterwards he paid us another visit, and found us occupied very nearly as before. He took a pipe and a chair and entered into some ordinary conversation. At length I said,—

"Well, but G——, what of the purloined letter? I presume you have at last made up your mind that there is no such thing as overreaching the Minister?"

"Confound him, say I—yes; I made the re-examination, however, as Dupin suggested—but it was all labor lost, as I knew it would be."

"How much was the reward offered, did you say?" asked Dupin.

"Why, a very great deal—a *very* liberal reward—I don't like to say how much, precisely; but one thing I *will* say, that I wouldn't mind giving my individual check for fifty thousand francs to any one who could obtain me that letter. The fact is, it is becoming of more and more importance every day; and the reward has been lately doubled. If it were trebled, however, I could do no more than I have done."

"Why, yes," said Dupin, drawlingly, between the whiffs of his meerschaum, "I really—think, G——, you have not exerted yourself—to the utmost in this matter. You might—do a little more, I think, eh?"

"How?—in what way?"

"Why—puff, puff—you might—puff, puff—employ counsel in the matter, eh?—puff, puff, puff. Do you remember the story they tell of Abernethy?"

46. Abernethy—Dr. John Abernethy (1764-1831), a famous and crotchety British medical man, whose career was prolific in similar anecdotes.

"No: hang Abernethy!"

"To be sure! hang him and welcome. But, once upon a time, a certain rich miser conceived the design of sponging upon this Abernethy for a medical opinion. Getting up, for this purpose, an ordinary conversation in a private company, he insinuated his case to the physician, as that of an imaginary individual.

"'We will suppose,' said the miser, 'that his symptoms are such and such; now, doctor, what would *you* have directed him to take?'

"'Take!' said Abernethy, 'why, take *advice,* to be sure.'"

"But," said the Prefect, a little discomposed, "*I* am *perfectly* willing to take advice, and to pay for it. I would *really* give fifty thousand francs to any one who would aid me in the matter."

"In that case," replied Dupin, opening a drawer, and producing a check-book, "you may as well fill me up a check for the amount mentioned. When you have signed it, I will hand you the letter."

I was astounded. The Prefect appeared absolutely thunder-stricken. For some minutes he remained speechless and motionless, looking incredulously at my friend with open mouth, and eyes that seemed starting from their sockets; then, apparently recovering himself in some measure, he seized a pen, and after several pauses and vacant stares, finally filled up and signed a check for fifty thousand francs, and handed it across the table to Dupin. The latter examined it carefully and deposited it in his pocket-book; then, unlocking an *escritoire,* took thence a letter and gave it to the Prefect. This functionary grasped it in a perfect agony of joy, opened it with a trembling hand, cast a rapid glance at its contents, and then, scrambling and struggling to the door, rushed at length unceremoniously from the room and from the house, without having uttered a syllable since Dupin had requested him to fill up the check.

When he had gone, my friend entered into some explanations.

"The Parisian police," he said, "are exceedingly able in their way. They are persevering, ingenious, cunning, and thoroughly versed in the knowledge which their duties seem chiefly to demand. Thus, when G—— detailed to us his mode of searching the premises at the Hotel D——, I felt entire confidence in his having made a satisfactory investigation—so far as his labors extended."

"So far as his labors extended?" said I.

"Yes," said Dupin. "The measures adopted were not only the best of their kind, but carried out to absolute perfection. Had the letter been deposited within the range of their search, these fellows would, beyond a question, have found it."

I merely laughed—but he seemed quite serious in all that he said.

"The measures, then," he continued, "were good in their kind, and well executed; their defect lay in their being inapplicable to the case, and to the man. A certain set of highly ingenious resources are, with the Prefect, a sort of Procrustean bed, to which he forcibly adapts his designs. But he perpetually errs by being too deep or too shallow, for the matter in hand; and many a schoolboy is a better reasoner than he. I knew one about eight years of age, whose success at

22. escritoire—writing-desk. **42-43. Procrustean bed**—Procrustes, a mythological robber of humorous temperament, possessed an iron bed, on which he stretched his victims. If they were too long, their legs were cut short; if not long enough, their legs were stretched to fill it.

guessing in the game of 'even and odd' attracted universal admiration. This game is simple, and is played with marbles. One player holds in his hand a number of these toys, and demands of another whether that number is even or odd. If the guess is right, the guesser wins one; if wrong, he loses one. The boy to whom I allude won all the marbles of the school. Of course he had some principle of guessing; and this lay in mere observation and admeasurement of the astuteness of his opponents. For example, an arrant simpleton is his opponent, and, holding up his closed hand, asks, 'are they even or odd?' Our schoolboy replies, 'odd,' and loses; but upon the second trial he wins, for he then says to himself, 'the simpleton had them even upon the first trial, and his amount of cunning is just sufficient to make him have them odd upon the second; I will therefore guess odd;'—he guesses odd, and wins. Now, with a simpleton a degree above the first, he would have reasoned thus: 'This fellow finds that in the first instance I guessed odd, and, in the second, he will propose to himself, upon the first impulse, a simple variation from even to odd, as did the first simpleton; but then a second thought will suggest that this is too simple a variation, and finally he will decide upon putting it even as before. I will therefore guess even;'—he guesses even, and wins. Now this mode of reasoning in the schoolboy, whom his fellows termed 'lucky,'—what, in its last analysis, is it?"

"It is merely," I said, "an identification of the reasoner's intellect with that of his opponent."

"It is," said Dupin; "and, upon inquiring of the boy by what means he effected the *thorough* identification in which his success consisted, I received answer as follows: 'When I wish to find out how wise, or how stupid, or how good, or how wicked is any one, or what are his thoughts at the moment, I fashion the expression of my face, as accurately as possible, in accordance with the expression of his, and then wait to see what thoughts or sentiments arise in my mind or heart, as if to match or correspond with the expression.' This response of the schoolboy lies at the bottom of all the spurious profundity which has been attributed to Rochefoucauld, to La Bougive, to Machiavelli, and to Campanella."

"And the identification," I said, "of the reasoner's intellect with that of his opponent, depends, if I understand you aright, upon the accuracy with which the opponent's intellect is admeasured."

"For its practical value it depends upon this," replied Dupin; "and the Prefect and his cohort fail so frequently, first, by default of this identification, and, secondly, by ill-admeasurement, or rather through non-admeasurement, of the intellect with which they are engaged. They consider only their *own* ideas of ingenuity; and, in searching for anything hidden, advert only to the modes in which *they* would have hidden it. They are right in this much—that their own ingenuity is a faithful representative of that of *the mass;* but when the cunning of the individual felon is diverse in character from their own, the felon foils them, of course. This always happens when it is above their own, and very

31. **Rochefoucauld . . .** —François de la Rochefoucauld (1613-1680), whose *Maximes* first appeared in 1665. For Machiavelli and Campanella see note 36, p. 720. Who is meant by **La Bougive** is not clear.

usually when it is below. They have no variation of principle in their investigations; at best, when urged by some unusual emergency—by some extraordinary reward—they extend or exaggerate their old modes of *practice,* without touching their principles. What, for example, in this case of D——, has been done to vary the principle of action? What is all this boring, and probing, and sounding, and scrutinizing with the microscope, and dividing the surface of the building into registered square inches—what is it all but an exaggeration *of the application* of the one principle or set of principles of search, which are based upon the one set of notions regarding human ingenuity, to which the Prefect, in the long routine of his duty, has been accustomed? Do you not see he has taken it for granted that *all* men proceed to conceal a letter,—not exactly in a gimlet-hole bored in a chair-leg—but, at least, in *some* out-of-the-way hole or corner suggested by the same tenor of thought which would urge a man to secrete a letter in a gimlet-hole bored in a chair-leg? And do you not see also, that such *recherchés* nooks for concealment are adapted only for ordinary occasions, and would be adopted only by ordinary intellects; for, in all cases of concealment, a disposal of the article concealed—a disposal of it in this *recherché* manner,—is, in the very first instance, presumable and presumed; and thus its discovery depends, not at all upon the acumen, but altogether upon the mere care, patience, and determination of the seekers; and where the case is of importance—or, what amounts to the same thing in the policial eyes, when the reward is of magnitude—the qualities in question have *never* been known to fail. You will now understand what I meant in suggesting that, had the purloined letter been hidden anywhere within the limits of the Prefect's examination—in other words, had the principle of its concealment been comprehended within the principles of the Prefect—its discovery would have been a matter altogether beyond question. This functionary however, has been thoroughly mystified; and the remote source of his defeat lies in the supposition that the Minister is a fool, because he has acquired renown as a poet. All fools are poets; this the Prefect *feels;* and he is merely guilty of a *non distributio medii* in thence inferring that all poets are fools."

"But is this really the poet?" I asked. "There are two brothers, I know; and both have attained reputation in letters. The Minister I believe has written learnedly on the Differential Calculus. He is a mathematician, and no poet."

"You are mistaken; I know him well; he is both. As poet *and* mathematician, he would reason well; as mere mathematician, he could not have reasoned at all, and thus would have been at the mercy of the Prefect."

"You surprise me," I said, "by these opinions, which have been contradicted by the voice of the world. You do not mean to set at naught the well-digested idea of centuries. The mathematical reason has long been regarded as *the* reason *par excellence.*"

"'*Il y a à parier,*'" replied Dupin, quoting from Chamfort, "'*que toute idée publique, toute convention reçue, est une sottise, car elle a convenue au plus*

15. **recherchés**—here about equivalent to far-fetched. 39. **non distributio medii**—the fallacy of the undistributed middle—a term in logic, connoting a failure to define an important element in the syllogism. 40-41. **the reason par excellence**—the very essence of reason. 42. **"Il y a . . ."**—"The odds are that every public idea, every convention agreed upon is a piece of folly since it is agreed to by the majority." Sebastian Roch Nicolas Chamfort (1741-1794), famous for his *Maximes et Pensées,* was a wit and moralist.

grand nombre.' The mathematicians, I grant you, have done their best to promulgate the popular error to which you allude, and which is none the less an error for its promulgation as truth. With an art worthy a better cause, for example, they have insinuated the term 'analysis' into application to algebra. The French are the originators of this particular deception; but if a term is of any importance—if words derive any value from applicability—then 'analysis' conveys 'algebra' about as much as, in Latin, *'ambitus'* implies 'ambition,' *'religio'* 'religion,' or *'homines honesti'* a set of *honorable* men."

"You have a quarrel on hand, I see," said I, "with some of the algebraists of Paris; but proceed."

"I dispute the availability, and thus the value, of that reason which is cultivated in any special form other than the abstractly logical. I dispute, in particular, the reason educed by mathematical study. The mathematics are the science of form and quantity; mathematical reasoning is merely logic applied to observation upon form and quantity. The great error lies in supposing that even the truths of what is called *pure* algebra, are abstract or general truths. And this error is so egregious that I am confounded at the universality with which it has been received. Mathematical axioms are *not* axioms of general truth. What is true of *relation*—of form and quantity—is often grossly false in regard to morals, for example. In this latter science it is very usually *un*true that the aggregated parts are equal to the whole. In chemistry also the axiom fails. In the consideration of motive it fails; for two motives, each of a given value, have not, necessarily, a value when united, equal to the sum of their values apart. There are numerous other mathematical truths which are only truths within the limits of *relation*. But the mathematician argues, from his *finite truths,* through habit, as if they were of an absolutely general applicability —as the world indeed imagines them to be. Bryant, in his very learned 'Mythology,' mentions an analogous source of error, when he says that 'although the Pagan fables are not believed, yet we forget ourselves continually, and make inferences from them as existing realities.' With the algebraists, however, who are Pagans themselves, the 'Pagan fables' *are* believed, and the inferences are made, not so much through lapse of memory, as through an unaccountable addling of the brains. In short, I never yet encountered the mere mathematician who could be trusted out of equal roots, or one who did not clandestinely hold it as a point of his faith that $x^2 + px$ was absolutely and unconditionally equal to q. Say to one of these gentlemen, by way of experiment, if you please, that you believe occasions may occur where $x^2 + px$ is *not* altogether equal to q, and, having made him understand what you mean, get out of his reach as speedily as convenient, for, beyond doubt, he will endeavor to knock you down.

"I mean to say," continued Dupin, while I merely laughed at his last observations, "that if the Minister had been no more than a mathematician, the Prefect would have been under no necessity of giving me this check. I knew

7-8. The point is that the derivatives of a word do not necessarily indicate the original meaning of the word. In Latin **ambitus** means a going around, and hence an unlawful striving for office; **religio** is merely reverence for the gods; and *honestus* (plural, **honesti**) means respectable. **18. Mathematical axioms**—Poe here implies the assumptions of some branches of modern mathematical theory, such as non-Euclidean geometry. **27. Bryant**—Jacob Bryant (1715-1804) published in three volumes *A New System, or, an Analysis of Ancient Mythology,* London, 1774-76.

him, however, as both mathematician and poet, and my measures were adapted to his capacity, with reference to the circumstances by which he was surrounded. I knew him as a courtier, too, and as a bold *intriguant.* Such a man, I considered, could not fail to be aware of the ordinary policial modes of action. He could not have failed to anticipate—and events have proved that he did not fail to anticipate—the waylayings to which he was subjected. He must have foreseen, I reflected, the secret investigations of his premises. His frequent absences from home at night, which were hailed by the Prefect as certain aids to his success, I regarded only as *ruses,* to afford opportunity for thorough search to the police, and thus the sooner to impress them with the conviction to which G——, in fact, did finally arrive—the conviction that the letter was not upon the premises. I felt, also, that the whole train of thought, which I was at some pains in detailing to you just now, concerning the invariable principle of policial action in searches for articles concealed—I felt that this whole train of thought would necessarily pass through the mind of the Minister. It would imperatively lead him to despise all the ordinary *nooks* of concealment. *He* could not, I reflected, be so weak as not to see that the most intricate and remote recess of his hotel would be as open as his commonest closets to the eyes, to the probes, to the gimlets, and to the microscopes of the Prefect. I saw, in fine, that he would be driven, as a matter of course, to *simplicity,* if not deliberately induced to it as a matter of choice. You will remember, perhaps, how desperately the Prefect laughed when I suggested, upon our first interview, that it was just possible this mystery troubled him so much on account of its being so *very* self-evident."

"Yes," said I, "I remember his merriment well. I really thought he would have fallen into convulsions."

"The material world," continued Dupin, "abounds with very strict analogies to the immaterial; and thus some color of truth has been given to the rhetorical dogma, that metaphor, or simile, may be made to strengthen an argument, as well as to embellish a description. The principle of the *vis inertiae,* for example, seems to be identical in physics and metaphysics. It is not more true in the former, that a large body is with more difficulty set in motion than a smaller one, and that its subsequent *momentum* is commensurate with this difficulty, than it is, in the latter, that intellects of the vaster capacity, while more forcible, more constant, and more eventful in their movements than those of inferior grade, are yet the less readily moved, and more embarrassed and full of hesitation in the first few steps of their progress. Again: have you ever noticed which of the street signs, over the shop doors, are the most attractive of attention?"

"I have never given the matter a thought," I said.

"There is a game of puzzles," he resumed, "which is played upon a map. One party playing requires another to find a given word—the name of town, river, state or empire—any word, in short, upon the motley and perplexed surface of the chart. A novice in the game generally seeks to embarrass his opponents by giving them the most minutely lettered names; but the adept selects such words as stretch, in large characters, from one end of the chart to

3. intriguant—intriguer. **30. vis inertiae**—force of inertia.

the other. These, like the over-largely lettered signs and placards of the street, escape observation by dint of being excessively obvious; and here the physical oversight is precisely analogous with the moral inapprehension by which the intellect suffers to pass unnoticed those considerations which are too obtrusively and too palpably self-evident. But this is a point, it appears, somewhat above or beneath the understanding of the Prefect. He never once thought it probable, or possible, that the Minister had deposited the letter immediately beneath the nose of the whole world, by way of best preventing any portion of that world from perceiving it.

"But the more I reflected upon the daring, dashing, and discriminating ingenuity of D——; upon the fact that the document must always have been *at hand,* if he intended to use it to good purpose; and upon the decisive evidence, obtained by the Prefect, that it was not hidden within the limits of that dignitary's ordinary search—the more satisfied I became that, to conceal this letter, the Minister had resorted to the comprehensive and sagacious expedient of not attempting to conceal it at all.

"Full of these ideas, I prepared myself with a pair of green spectacles, and called one fine morning, quite by accident, at the Ministerial hotel. I found D—— at home, yawning, lo[illegible] and dawdling, as usual, and pretending to be in the last extremity of *ennui.* He is, perhaps, the most really energetic human being now alive—but that is only when nobody sees him.

"To be even with him, I complained of my weak eyes, and lamented the necessity of the spectacles, under cover of which I cautiously and thoroughly surveyed the apartment, while seemingly intent only upon the conversation of my host.

"I paid especial attention to a large writing-table near which he sat, and upon which lay confusedly, some miscellaneous letters and other papers, with one or two musical instruments and a few books. Here, however, after a long and very deliberate scrutiny, I saw nothing to excite particular suspicion.

"At length my eyes, in going the circuit of the room, fell upon a trumpery filigree card-rack of paste-board, that hung dangling by a dirty blue ribbon from a little brass knob just beneath the middle of the mantel-piece. In this rack, which had three or four compartments, were five or six visiting cards and a solitary letter. This last was much soiled and crumpled. It was torn nearly in two, across the middle—as if a design, in the first instance, to tear it entirely up as worthless, had been altered, or stayed, in the second. It had a large black seal, bearing the D—— cipher *very* conspicuously, and was addressed, in a diminutive female hand, to D——, the minister, himself. It was thrust carelessly, and even, as it seemed, contemptuously, into one of the upper divisions of the rack.

"No sooner had I glanced at this letter, than I concluded it to be that of which I was in search. To be sure, it was, to all appearance, radically different from the one of which the Prefect had read us so minute a description. Here the seal was large and black, with the D—— cipher; there it was small and red, with the ducal arms of the S—— family. Here, the address, to the Minister, was diminutive and feminine; there the superscription, to a certain royal personage, was markedly bold and decided; the size alone formed a point

of correspondence. But, then, the *radicalness* of these differences, which was excessive; the dirt; the soiled and torn condition of the paper, so inconsistent with the *true* methodical habits of D——, and so suggestive of a design to delude the beholder into an idea of the worthlessness of the document; these things, together with the hyperobtrusive situation of this document, full in the view of every visitor, and thus exactly in accordance with the conclusions to which I had previously arrived; these things, I say, were strongly corroborative of suspicion, in one who came with the intention to suspect.

"I protracted my visit as long as possible, and, while I maintained a most animated discussion with the Minister, on a topic which I knew well had never failed to interest and excite him, I kept my attention really riveted upon the letter. In this examination, I committed to memory its external appearance and arrangement in the rack; and also fell, at length, upon a discovery which set at rest whatever trivial doubt I might have entertained. In scrutinizing the edges of the paper, I observed them to be more *chafed* than seemed necessary. They presented the *broken* appearance which is manifested when a stiff paper, having been once folded and pressed with a folder, is refolded in a reversed direction, in the same creases or edges which had formed the original fold. This discovery was sufficient. It was clear to me that the letter had been turned, as a glove, inside out, re-directed, and re-sealed. I bade the Minister good morning, and took my departure at once, leaving a gold snuff-box upon the table.

"The next morning I called for the snuff-box, when we resumed, quite eagerly, the conversation of the preceding day. While thus engaged, however, a loud report, as if of a pistol, was heard immediately beneath the windows of the hotel, and was succeeded by a series of fearful screams, and the shoutings of a mob. D—— rushed to a casement, threw it open, and looked out. In the meantime, I stepped to the card-rack, took the letter, put it in my pocket, and replaced it by a *fac-simile,* (so far as regards externals,) which I had carefully prepared at my lodgings; imitating the D—— cipher, very readily, by means of a seal formed of bread.

"The disturbance in the street had been occasioned by the frantic behavior of a man with a musket. He had fired it among a crowd of women and children. It proved, however, to have been without ball, and the fellow was suffered to go his way as a lunatic or a drunkard. When he had gone, D—— came from the window, whither I had followed him immediately upon securing the object in view. Soon afterwards I bade him farewell. The pretended lunatic was a man in my own pay."

"But what purpose had you," I asked, "in replacing the letter by a *fac-simile?* Would it not have been better, at the first visit, to have seized it openly, and departed?"

"D——," replied Dupin, "is a desperate man, and a man of nerve. His hotel, too, is not without attendants devoted to his interests. Had I made the wild attempt you suggest, I might never have left the Ministerial presence alive. The good people of Paris might have heard of me no more. But I had an object apart from these considerations. You know my political prepossessions. In this matter, I act as a partisan of the lady concerned. For eighteen months the Minister has had her in his power. She has now him in hers—since, being unaware

that the letter is not in his possession, he will proceed with his exactions as if it was. Thus will he inevitably commit himself, at once, to his political destruction. His downfall, too, will not be more precipitate than awkward. It is all very well to talk about the *facilis descensus Averni;* but in all kinds of climbing, as Catalani said of singing, it is far more easy to get up than to come down. In the present instance I have no sympathy—at least no pity—for him who descends. He is that *monstrum horrendum,* an unprincipled man of genius. I confess, however, that I should like very well to know the precise character of his thoughts, when, being defied by her whom the Prefect terms 'a certain personage' he is reduced to opening the letter which I left for him in the card-rack."

"How? did you put anything particular in it?"

"Why—it did not seem altogether right to leave the interior blank—that would have been insulting. D——, at Vienna once, did me an evil turn, which I told him quite good-humoredly, that I should remember. So, as I knew he would feel some curiosity in regard to the identity of the person who had outwitted him, I thought it a pity not to give him a clew. He is well acquainted with my MS., and I just copied into the middle of the blank sheet the words—

'—— Un dessein si funeste,
S'il n'est digne d'Atrée, est digne de Thyeste.'

They are to be found in Crébillon's *Atrée.*"

DREAM-LAND

"Dream-Land" was originally published in *Graham's Magazine* for June, 1844, and later gathered into the 1845 volume. The 1845 text is here followed.

By a route obscure and lonely,
Haunted by ill angels only,
Where an Eidolon, named NIGHT,
On a black throne reigns upright,
I have reached these lands but newly
From an ultimate dim Thule—
From a wild weird clime that lieth, sublime,
Out of SPACE—out of TIME.

Bottomless vales and boundless floods,
And chasms, and caves, and Titan woods,
With forms that no man can discover
For the dews that drip all over;
Mountains toppling evermore
Into seas without a shore;
Seas that restlessly aspire,
Surging, unto skies of fire;
Lakes that endlessly outspread
Their lone waters—lone and dead,—
Their still waters—still and chilly
With the snows of the lolling lily.

By the lakes that thus outspread
Their lone waters, lone and dead,—
Their sad waters, sad and chilly
With the snows of the lolling lily,—
By the mountains—near the river
Murmuring lowly, murmuring ever,—
By the grey woods,—by the swamp
Where the toad and the newt encamp,—

4. facilis . . . —easy [is] the descent to Avernus. Virgil, Aeneid, VI, v. 125. **5. Catalani**—Angelica Catalini (1780-1849) was one of the greatest operatic singers of the day. **7. monstrum horrendum**—horrid monstrosity—a tag from Virgil, Aeneid, III, v. 658. **18-19. "Un dessein . . . Thyeste"**—"A plan so mournful is worthy of Thyestes, if it is not worthy of Atreus."—Prosper Jolyot de Crébillon (1674-1762), an important if secondary writer of French classical tragedies, produced *Atrée* (*Atreus*) in 1707. **3. Eidolon**—specter. Poe apparently wishes the accent shifted from the second syllable to the first. **6. ultimate dim Thule**—from the Latin *ultima Thule,* the farthest known land. **10. Titan**—not merely gigantic, but eldest.

By the dismal tarns and pools
Where dwell the Ghouls,—
By each spot the most unholy—
In each nook most melancholy,—
There the traveller meets, aghast,
Sheeted Memories of the Past—
Shrouded forms that start and sigh
As they pass the wanderer by—
White-robed forms of friends long given,
In agony, to the Earth—and Heaven.

For the heart whose woes are legion
'Tis a peaceful, soothing region—
For the spirit that walks in shadow
'Tis—oh 'tis an Eldorado!

But the traveller, travelling through it,
May not—dare not openly view it;
Never its mysteries are exposed
To the weak human eye unclosed;
So wills its King, who hath forbid
The uplifting of the fringed lid;
And thus the sad Soul that here passes
Beholds it but through darkened glasses.

By a route obscure and lonely,
Haunted by ill angels only,
Where an Eidolon, named NIGHT,
On a black throne reigns upright,
I have wandered home but newly
From this ultimate dim Thule.

THE RAVEN

"The Raven" first appeared in the *Evening Mirror,* January 29, 1845. On the sources of the poem consult Woodberry, *The Life of Edgar Allan Poe,* Vol. II, pp. 111 ff.; and Allen, *Israfel,* Vol. II, pp. 608 ff. In *Graham's Magazine* for April, 1846, Poe published "The Philosophy of Composition," which purports to explain how he wrote the poem, an ingenious but somewhat unveracious account. The text here reproduced is that of the 1845 volume.

Once upon a midnight dreary, while I pondered, weak and weary,
Over many a quaint and curious volume of forgotten lore,
While I nodded, nearly napping, suddenly there came a tapping,
As of some one gently rapping, rapping at my chamber door.
"'Tis some visiter," I muttered, "tapping at my chamber door—
Only this, and nothing more."

Ah, distinctly I remember it was in the bleak December,
And each separate dying ember wrought its ghost upon the floor.
Eagerly I wished the morrow;—vainly I had sought to borrow
From my books surcease of sorrow—sorrow for the lost Lenore—
For the rare and radiant maiden whom the angels name Lenore—
Nameless here for evermore.

And the silken, sad, uncertain rustling of each purple curtain
Thrilled me—filled me with fantastic terrors never felt before;
So that now, to still the beating of my heart, I stood repeating,
"'Tis some visiter entreating entrance at my chamber door—
Some late visiter entreating entrance at my chamber door;—
This it is and nothing more."

30. **Ghouls**—evil spirits supposed to prey on corpses. 42. **Eldorado**—literally, "the gilded one." According to legend, an Indian king bathed daily in gold dust somewhere in the far west; hence, by transfer, the region or city over which he ruled; hence, any desirable and unattainable paradise. 8. **wrought its ghost**—that is, was reflected upon the floor.

Presently my soul grew stronger; hesitating then no longer,
"Sir," said I, "or Madam, truly your forgiveness I implore;
But the fact is I was napping, and so gently you came rapping,
And so faintly you came tapping, tapping at my chamber door,
That I scarce was sure I heard you"—here I opened wide the door;—
Darkness there, and nothing more.

Deep into that darkness peering, long I stood there wondering, fearing,
Doubting, dreaming dreams no mortal ever dared to dream before;
But the silence was unbroken, and the stillness gave no token,
And the only word there spoken was the whispered word, "Lenore!"
This I whispered, and an echo murmured back the word, "Lenore!"
Merely this and nothing more.

Back into the chamber turning, all my soul within me burning,
Soon I heard again a tapping somewhat louder than before.
"Surely," said I, "surely that is something at my window lattice;
Let me see, then, what thereat is, and this mystery explore—
Let my heart be still a moment and this mystery explore;—
'Tis the wind and nothing more!"

Open here I flung the shutter, when, with many a flirt and flutter,
In there stepped a stately raven of the saintly days of yore;
Not the least obeisance made he; not an instant stopped or stayed he;
But, with mien of lord or lady, perched above my chamber door—
Perched upon a bust of Pallas just above my chamber door—
Perched, and sat, and nothing more.

Then this ebony bird beguiling my sad fancy into smiling,
By the grave and stern decorum of the countenance it wore,
"Though thy crest be shorn and shaven, thou," I said, "art sure no craven,
Ghastly grim and ancient raven wandering from the Nightly shore—
Tell me what thy lordly name is on the Night's Plutonian shore!"
Quoth the raven, "Nevermore."

Much I marveled this ungainly fowl to hear discourse so plainly,
Though its answer little meaning—little relevancy bore;
For we cannot help agreeing that no living human being
Ever yet was blessed with seeing bird above his chamber door—
Bird or beast upon the sculptured bust above his chamber door,
With such name as "Nevermore."

But the raven, sitting lonely on the placid bust, spoke only
That one word, as if his soul in that one word he did outpour.
Nothing farther then he uttered—not a feather then he fluttered—
Till I scarcely more than muttered "Other friends have flown before—
On the morrow *he* will leave me, as my hopes have flown before."
Then the bird said, "Nevermore."

41. Pallas—Pallas Athene, the goddess of wisdom. There is a tradition that Poe's first conception centered in an owl, associated especially with Pallas. **47. Plutonian**—infernal.

Startled at the stillness broken by reply so aptly spoken,
"Doubtless," said I, "what it utters is its only stock and store
Caught from some unhappy master whom unmerciful Disaster
Followed fast and followed faster till his songs one burden bore—
Till the dirges of his Hope that melancholy burden bore
Of 'Never—nevermore.'"

But the raven still beguiling all my sad soul into smiling,
Straight I wheeled a cushioned seat in front of bird and bust and door;
Then, upon the velvet sinking, I betook myself to linking
Fancy unto fancy, thinking what this ominous bird of yore—
What this grim, ungainly, ghastly, gaunt, and ominous bird of yore
Meant in croaking "Nevermore."

This I sat engaged in guessing, but no syllable expressing
To the fowl whose fiery eyes now burned into my bosom's core;
This and more I sat divining, with my head at ease reclining
On the cushion's velvet lining that the lamplight gloated o'er,
But whose velvet violet lining with the lamplight gloating o'er,
She shall press, ah, nevermore!

Then, methought, the air grew denser, perfumed from an unseen censer
Swung by angels whose faint foot-falls tinkled on the tufted floor.
"Wretch," I cried, "thy God hath lent thee—by these angels he hath sent thee
Respite—respite and nepenthe from thy memories of Lenore!
Quaff, oh quaff this kind nepenthe and forget this lost Lenore!"
Quoth the raven, "Nevermore."

"Prophet!" said I, "thing of evil!—prophet still, if bird or devil!—
Whether Tempter sent, or whether tempest tossed thee here ashore,
Desolate yet all undaunted, on this desert land enchanted—
On this home by Horror haunted—tell me truly, I implore—
Is there—*is* there balm in Gilead?—tell me—tell me, I implore!"
Quoth the raven, "Nevermore."

"Prophet!" said I, "thing of evil—prophet still, if bird or devil!
By that Heaven that bends above us—by that God we both adore—
Tell this soul with sorrow laden if, within the distant Aidenn,
It shall clasp a sainted maiden whom the angels name Lenore—
Clasp a rare and radiant maiden whom the angels name Lenore."
Quoth the raven, "Nevermore."

"Be that word our sign of parting, bird or fiend!" I shrieked, upstarting—
"Get thee back into the tempest and the Night's Plutonian shore!
Leave no black plume as a token of that lie thy soul hath spoken!
Leave my loneliness unbroken!—quit the bust above my door!
Take thy beak from out my heart, and take thy form from off my door!"
Quoth the raven, "Nevermore."

77. **gloating**—Among the rare meanings of "gloat" is to refract light. **80. Swung . . . floor**—This line often appears as "Swung by seraphim whose foot-falls tinkled on the tufted floor." Poe's definitive reading, however, is presumably established by the 1845 text. The incapacity of foot-falls to tinkle has often been commented upon. **89. balm in Gilead**—See Jer. 8: 22. **93. Aidenn**—spelling of Eden forced by the rhyme.

And the raven, never flitting, still is sitting, still is sitting
On the pallid bust of Pallas just above my chamber door;
And his eyes have all the seeming of a demon's that is dreaming,
And the lamplight o'er him streaming throws his shadow on the floor;
And my soul from out that shadow that lies floating on the floor
Shall be lifted—nevermore!

ULALUME

"Ulalume" first appeared in the *American Whig Review* for December, 1847, and was reprinted in the *Home Journal,* January 1, 1848, and the *Literary World,* March 3, 1849. At first the poem contained a tenth stanza as follows:

Said *we,* then—the two, then—"Ah, can it
Have been that the woodlandish ghouls,
The pitiful, the merciless ghouls—
To bar up our way and to ban it
From the secret that lies in these wolds—
From the thing that lies hidden in these wolds—
Had drawn up the spectre of a planet
From the limbo of lunary souls,
This sinfully scintillant planet
From the Hell of the planetary souls?"

This stanza was abandoned in 1849, and by Griswold in his edition of Poe's *Works* (1850), from which the present text is derived. In the first version the poem was subtitled "To ————." Poe himself referred to it as a ballad.

The skies they were ashen and sober;
The leaves they were crisped and sere—
The leaves they were withering and sere;
It was night in the lonesome October
Of my most immemorial year;
It was hard by the dim lake of Auber,
In the misty mid region of Weir—
It was down by the dank tarn of Auber,
In the ghoul-haunted woodland of Weir.

Here once, through an alley Titanic,
Of cypress, I roamed with my Soul—
Of cypress, with Psyche, my Soul.
These were days when my heart was volcanic
As the scoriac rivers that roll—
As the lavas that restlessly roll
Their sulphurous currents down Yaanek
In the ultimate climes of the Pole—
That groan as they roll down Mount Yaanek
In the realms of the boreal pole.

Our talk had been serious and sober,
But our thoughts they were palsied and sere—
Our memories were treacherous and sere—
For we knew not the month was October,
And we marked not the night of the year—
(Ah, night of all nights in the year!)
We noted not the dim lake of Auber—
(Though once we had journeyed down here)—
Remembered not the dank tarn of Auber,
Nor the ghoul-haunted woodland of Weir.

And now, as the night was senescent
And star-dials pointed to morn—
As the star-dials hinted of morn—
At the end of our path a liquescent
And nebulous lustre was born,

106. **lamplight . . . shadow**—Poe's conception here is of a bracket candelabrum affixed to the wall above the door and the bust, as is sometimes seen in English palaces and in some New York houses contemporary with Poe. 2. **crisped**—two syllables. 5. **immemorial**—here, Poe probably means memorable, unforgettable. 6-7. **Auber . . . Weir**—poetic geography. 10. **Titanic**—with the combined ideas of huge and very old. 14. **scoriac**—slaglike. Poe is apparently the first to use this word. 16. **Yaanek**—more poetic geography. 17. **ultimate**—verbal echo of *ultima Thule,* the last edge of the world. 19. **boreal**—literally, northern, but the "atmosphere" of the word here is simply that of vague and distant cold. 30. **senescent**—Latin, *senescens;* growing old. 31. **star-dials**—the stars considered as means of measuring time.

Out of which a miraculous crescent
Arose with a duplicate horn—
Astarte's bediamonded crescent
Distinct with its duplicate horn.

And I said—"She is warmer than Dian:
She rolls through an ether of sighs—
She revels in a region of sighs:
She has seen that the tears are not dry on
These cheeks, where the worm never dies,
And has come past the stars of the Lion
To point us the path to the skies—
To the Lethean peace of the skies—
Come up, in despite of the Lion,
To shine on us with her bright eyes—
Come up through the lair of the Lion,
With love in her luminous eyes."

But Psyche, uplifting her finger,
Said—"Sadly this star I mistrust—
Her pallor I strangely mistrust:—
Oh, hasten!—oh, let us not linger!
Oh, fly!—let us fly!—for we must."
In terror she spoke, letting sink her
Wings till they trailed in the dust—
In agony sobbed, letting sink her
Plumes till they trailed in the dust—
Till they sorrowfully trailed in the dust.

I replied—"This is nothing but dreaming:
Let us on by this tremulous light!
Let us bathe in this crystalline light!
Its Sibylic splendor is beaming
With Hope and in Beauty to-night:—
See!—it flickers up the sky through the night!
Ah, we safely may trust to its gleaming,
And be sure it will lead us aright—
We safely may trust to a gleaming
That cannot but guide us aright,
Since it flickers up to Heaven through the night."

Thus I pacified Psyche and kissed her,
And tempted her out of her gloom—
And conquered her scruples and gloom;
And we passed to the end of the vista,
But were stopped by the door of a tomb—
By the door of a legended tomb;
And I said—"What is written, sweet sister,
On the door of this legended tomb?"
She replied—"Ulalume—Ulalume—
'Tis the vault of thy lost Ulalume!"

Then my heart it grew ashen and sober
As the leaves that were crisped and sere—
As the leaves that were withering and sere,
And I cried—"It was surely October
On *this* very night of last year
That I journeyed—I journeyed down here—
That I brought a dread burden down here—
On this night of all nights in the year,
Ah, what demon has tempted me here?
Well I know, now, this dim lake of Auber—
This misty mid region of Weir—
Well I know, now, this dank tarn of Auber,
This ghoul-haunted woodland of Weir."

ELDORADO

This poem first appeared in *Flag of Our Union,* April 21, 1849. The present text follows that of Griswold (1850). On the derivation of "Eldorado" see note to line 42 of "Dream-Land" (page 763).

Gaily bedight,
A gallant knight,
In sunshine and in shadow,
Had journeyed long,
Singing a song,
In search of Eldorado.

But he grew old—
This knight so bold—
And o'er his heart a shadow

37. Astarte's . . . crescent—Astarte, a Phrygian goddess associated with the moon, and especially with the horned moon, is in certain aspects the goddess of earthly, or impure, love, and is here in contrast to Dian (Diana), the virgin huntress, type of chaste love. **44. stars of the Lion**—the constellation Leo. Poe was inordinately fond of astronomical lore. Here the constellation is also vaguely associated with the function of Leo as one of the houses, or signs, of the zodiac in astrology. **52. this star**—that is, the moon, not properly a star. **64. Sibylic**—more commonly, Sibylline; oracular, mysterious in a good sense.

Fell as he found
No spot of ground
That looked like Eldorado.

And, as his strength
Failed him at length,
He met a pilgrim shadow—
"Shadow," said he,
"Where can it be—
This land of Eldorado?"

"Over the Mountains
Of the Moon,
Down the Valley of the Shadow,
Ride, boldly ride,"
The shade replied,—
"If you seek for Eldorado!"

ANNABEL LEE

This poem first appeared in the New York *Tribune,* October 9, 1849. The present text is that of Poe's manuscript preserved at the Henry E. Huntington Library, and there exhibited.

It was many and many a year ago,
In a kingdom by the sea,
That a maiden there lived whom you may know
By the name of Annabel Lee:
And this maiden she lived with no other thought
Than to love and be loved by me.

She was a child and *I* was a child,
In this kingdom by the sea;
But we loved with a love that was more than love—
I and my Annabel Lee—
With a love that the wingèd seraphs of heaven
Coveted her and me.

And this was the reason that, long ago,
In this kingdom by the sea,
A wind blew out of a cloud, chilling
My beautiful Annabel Lee—
So that her highborn kinsmen came
And bore her away from me,
To shut her up in a sepulchre
In this kingdom by the sea.

The angels, not half so happy in Heaven,
Went envying her and me:—
Yes, that was the reason (as all men know,
In this kingdom by the sea)
That the wind came out of the cloud by night
Chilling and killing my Annabel Lee.

But our love it was stronger by far than the love
Of those who were older than we—
Of many far wiser than we—
And neither the angels in Heaven above,
Nor the demons down under the sea,
Can ever dissever my soul from the soul
Of the beautiful Annabel Lee:—

For the moon never beams, without bringing me dreams
Of the beautiful Annabel Lee;
And the stars never rise, but I feel the bright eyes
Of the beautiful Annabel Lee;
And so, all the night-tide, I lie down by the side
Of my darling, my darling, my life and my bride
In her sepulchre there by the sea—
In her tomb by the sounding sea.

THE CASK OF AMONTILLADO

This story first appeared in *Godey's Lady's Book* for November, 1846, whence it was collected into Griswold's edition of the *Works* (1850). Griswold's version differs in a number of minor details from the magazine version, but what authority

19-20. Mountains of the Moon—The Mountains of the Moon are in northern Africa, but Poe is here using the phrase as poetic geography connoting any remote, impossible place.

there is for these changes does not appear. The present text is therefore that of *Godey's Lady's Book*.

THE THOUSAND injuries of Fortunato I had borne as I best could; but when he ventured upon insult, I vowed revenge. You, who so well know the nature of my soul, will not suppose, however, that I gave utterance to a threat. *At length* I would be avenged: this was a point definitively settled—but the very definitiveness with which it was resolved precluded the idea of risk. I must not only punish, but punish with impunity. A wrong is unredressed when retribution overtakes its redresser. It is equally unredressed when the avenger fails to make himself felt as such to him who has done the wrong.

It must be understood that neither by word nor deed had I given Fortunato cause to doubt my good will. I continued, as was my wont, to smile in his face, and he did not perceive that my smile *now* was at the thought of his immolation.

He had a weak point—this Fortunato—although in other regards he was a man to be respected and even feared. He prided himself on his connoisseurship in wine. Few Italians have the true virtuoso spirit. For the most part their enthusiasm is adopted to suit the time and opportunity—to practice imposture upon the British and Austrian *millionaires*. In painting and gemmary, Fortunato, like his countrymen, was a quack—but in the matter of old wines he was sincere. In this respect I did not differ from him materially;—I was skilful in the Italian vintages myself, and bought largely whenever I could.

It was about dusk, one evening during the supreme madness of the carnival season, that I encountered my friend. He accosted me with excessive warmth, for he had been drinking much. The man wore motley. He had on a tight-fitting parti-striped dress, and his head was surmounted by the conical cap and bells. I was so pleased to see him that I thought I should never have done wringing his hand.

I said to him—"My dear Fortunato, you are luckily met. How remarkably well you are looking to-day. But I have received a pipe of what passes for Amontillado, and I have my doubts."

"How?" said he. "Amontillado? A pipe? Impossible! And in the middle of the carnival!"

"I have my doubts," I replied; "and I was silly enough to pay the full Amontillado price without consulting you in the matter. You were not to be found, and I was fearful of losing a bargain."

"Amontillado!"

"I have my doubts."

"Amontillado!"

"And I must satisfy them."

"Amontillado!"

"As you are engaged, I am on my way to Luchresi. If any one has a critical turn, it is he. He will tell me—"

16. virtuoso—connoisseur, skillful practitioner. **18. gemmary**—the science of gems. **30. Amontillado**—Amontillado is a dry sherry coming from Montilla, in Spain. **31. pipe**—small barrel. **41. Luchresi**—For some unknown reason, Griswold, and many subsequent editors, have changed the name to "Luchesi."

"Luchresi cannot tell Amontillado from Sherry."

"And yet some fools will have it that his taste is a match for your own."

"Come, let us go."

"Whither?"

"To your vaults."

"My friend, no; I will not impose upon your good nature. I perceive you have an engagement. Luchresi—"

"I have no engagement;—come."

"My friend, no. It is not the engagement, but the severe cold with which I perceive you are afflicted. The vaults are insufferably damp. They are incrusted with nitre."

"Let us go, nevertheless. The cold is merely nothing. Amontillado! You have been imposed upon. And as for Luchresi, he cannot distinguish Sherry from Amontillado."

Thus speaking, Fortunato possessed himself of my arm. Putting on a mask of black silk, and drawing a *roquelaire* closely about my person, I suffered him to hurry me to my palazzo.

There were no attendants at home; they had absconded to make merry in honour of the time. I had told them that I should not return until the morning, and had given them explicit orders not to stir from the house. These orders were sufficient, I well knew, to insure their immediate disappearance, one and all, as soon as my back was turned.

I took from their sconces two flambeaus, and giving one to Fortunato, bowed him through several suites of rooms to the archway that led into the vaults. I passed down a long and winding staircase, requesting him to be cautious as he followed. We came at length to the foot of the descent, and stood together on the damp ground of the catacombs of the Montresors.

The gait of my friend was unsteady, and the bells upon his cap jingled as he strode.

"The pipe," said he.

"It is farther on," said I; "but observe the white web-work which gleams from these cavern walls."

He turned towards me, and looked into my eyes with two filmy orbs that distilled the rheum of intoxication.

"Nitre?" he asked at length.

"Nitre," I replied. "How long have you had that cough?"

"Ugh! ugh! ugh!—ugh! ugh! ugh!—ugh! ugh! ugh!—ugh! ugh! ugh!—ugh! ugh! ugh!"

My poor friend found it impossible to reply for many minutes.

"It is nothing," he said, at last.

"Come," I said, with decision, "we will go back; your health is precious. You are rich, respected, admired, beloved; you are happy, as once I was. You are a man to be missed. For me it is no matter. We will go back; you will be ill, and I cannot be responsible. Besides, there is Luchresi—"

17. **roquelaire**—short cloak. 18. **palazzo**—literally, palace—the house of a wealthy person.

"Enough," he said; "the cough is a mere nothing; it will not kill me. I shall not die of a cough."

"True—true," I replied; "and, indeed, I had no intention of alarming you unnecessarily—but you should use all proper caution. A draught of this Medoc will defend us from the damps."

Here I knocked off the neck of a bottle which I drew from a long row of its fellows that lay upon the mould.

"Drink," I said, presenting him the wine.

He raised it to his lips with a leer. He paused and nodded to me familiarly, while his bells jingled.

"I drink," he said, "to the buried that repose around us."

"And I to your long life."

He again took my arm, and we proceeded.

"These vaults," he said, "are extensive."

"The Montresors," I replied, "were a great and numerous family."

"I forget your arms."

"A huge human foot d'or, in a field azure; the foot crushes a serpent rampant whose fangs are embedded in the heel."

"And the motto?"

"Nemo me impune lacessit."

"Good!" he said.

The wine sparkled in his eyes and the bells jingled. My own fancy grew warm with the Medoc. We had passed through long walls of piled skeletons, with casks and puncheons intermingling, into the inmost recesses of the catacombs. I paused again, and this time I made bold to seize Fortunato by an arm above the elbow.

"The nitre!" I said; "see, it increases. It hangs like moss upon the vaults. We are below the river's bed. The drops of moisture trickle among the bones. Come, we will go back ere it is too late. Your cough—"

"It is nothing," he said; "let us go on. But first, another draught of the Medoc."

I broke and reached him a flagon of De Grâve. He emptied it at a breath. His eyes flashed with a fierce light. He laughed and threw the bottle upwards with a gesticulation I did not understand.

I looked at him in surprise. He repeated the movement—a grotesque one.

"You do not comprehend?" he said.

"Not I," I replied.

"Then you are not of the brotherhood."

"How?"

"You are not of the masons."

4. Medoc—properly *Médoc*—wine from a particular region on the Gironde River in France. The inferior wine from this region is known simply as Médoc; the superior brands have particular names. Hence, Fortunato's acceptance of Médoc without comment is a mark of his intoxication. **17. foot . . . azure**—heraldic language meaning a golden foot on a blue field. **17. rampant**—erect. **20. "Nemo . . ."**—"No one attacks me with impunity" Poe apparently took the motto from the royal arms of Scotland. **23. long walls**—"walls" (1850). **23. skeletons**—"bones" (1850). **32. De Grâve**—Properly, Grâves, a mild wine from Bordeaux, which could scarcely have made Fortunato's "eyes flash with a fierce light." Poe's knowledge is at fault.

"Yes, yes," I said; "yes, yes."

"You? Impossible! A mason?"

"A mason," I replied.

"A sign," he said, "a sign."

"It is this," I answered, producing from beneath the folds of my *roquelaire,* a trowel.

"You jest," he exclaimed, recoiling a few paces. "But let us proceed to the Amontillado."

"Be it so," I said, replacing the tool beneath the cloak, and again offering him my arm. He leaned upon it heavily. We continued our route in search of the Amontillado. We passed through a range of low arches, descended, passed on, and, descending again, arrived at a deep crypt, in which the foulness of the air caused our flambeaus rather to glow than flame.

At the most remote end of the crypt there appeared another less spacious. Its walls had been lined with human remains, piled to the vault overhead, in the fashion of the great catacombs of Paris. Three sides of this interior crypt were still ornamented in this manner. From the fourth side the bones had been thrown down, and lay promiscuously upon the earth, forming at one point a mound of some size. Within the wall thus exposed by the displacing of the bones, we perceived a still interior crypt or recess, in depth about four feet, in width three, in height six or seven. It seemed to have been constructed for no especial use within itself, but formed merely the interval between two of the colossal supports of the roof of the catacombs, and was backed by one of their circumscribing walls of solid granite.

It was in vain that Fortunato, uplifting his dull torch, endeavoured to pry into the depth of the recess. Its termination the feeble light did not enable us to see.

"Proceed," I said; "herein is the Amontillado. As for Luchresi—"

"He is an ignoramus," interrupted my friend, as he stepped unsteadily forward, while I followed immediately at his heels. In an instant he had reached the extremity of the niche, and finding his progress arrested by the rock, stood stupidly bewildered. A moment more and I had fettered him to the granite. In its surface were two iron staples, distant from each other about two feet, horizontally. From one of these depended a short chain, from the other a padlock. Throwing the links about his waist, it was but the work of a few seconds to secure it. He was too much astounded to resist. Withdrawing the key, I stepped back from the recess.

"Pass your hand," I said, "over the wall; you cannot help feeling the nitre. Indeed it is *very* damp. Once more let me *implore* you to return. No? Then I must positively leave you. But I must first render you all the little attentions in my power."

"The Amontillado!" ejaculated my friend, not yet recovered from his astonishment.

4. he said—1850 omits the second "a sign." **5-6.** 1850 transposes the phrases "a trowel" and "from . . . roquelaire." **16. catacombs of Paris**—The catacombs of Paris, later in construction than those in Italy, were used for burial purposes as late as the eighteenth century. **17. fourth side**—"fourth" (1850). **20. crypt or**—1850 omits.

"True," I replied; "the Amontillado."

As I said these words I busied myself among the pile of bones of which I have before spoken. Throwing them aside, I soon uncovered a quantity of building stone and mortar. With these materials and with the aid of my trowel, I began vigorously to wall up the entrance of the niche.

I had scarcely laid the first tier of the masonry when I discovered that the intoxication of Fortunato had in a great measure worn off. The earliest indication I had of this was a low moaning cry from the depth of the recess. It was *not* the cry of a drunken man. There was then a long and obstinate silence. I laid the second tier, and the third, and the fourth; and then I heard the furious vibrations of the chain. The noise lasted for several minutes, during which, that I might hearken to it with the more satisfaction, I ceased my labours and sat down upon the bones. When at last the clanking subsided, I resumed the trowel, and finished without interruption the fifth, the sixth, and the seventh tier. The wall was now nearly upon a level with my breast. I again paused, and holding the flambeaus over the mason work, threw a few feeble rays upon the figure within.

A succession of loud and shrill screams, bursting suddenly from the throat of the chained form, seemed to thrust me violently back. For a brief moment I hesitated, I trembled. Unsheathing my rapier, I began to grope with it about the recess; but the thought of an instant reassured me. I placed my hand upon the solid fabric of the catacombs, and felt satisfied. I reapproached the wall; I replied to the yells of him who clamoured. I re-echoed, I aided, I surpassed them in volume and in strength. I did this, and the clamorer grew still.

It was now midnight, and my task was drawing to a close. I had completed the eighth, the ninth, and the tenth tier. I had finished a portion of the last and the eleventh; there remained but a single stone to be fitted and plastered in. I struggled with its weight; I placed it partially in its destined position. But now there came from out the niche a low laugh that erected the hairs upon my head. It was succeeded by a sad voice, which I had difficulty in recognizing as that of the noble Fortunato. The voice said—

"Ha! ha! ha!—he! he! he!—a very good joke, indeed—an excellent jest. We will have many a rich laugh about it at the palazzo—he! he! he—over our wine—he! he! he!"

"The Amontillado!" I said.

"He! he! he!—he! he! he!—yes, the Amontillado. But is it not getting late? Will not they be awaiting us at the palazzo, the Lady Fortunato and the rest? Let us be gone."

"Yes," I said, "let us be gone."

"For the love of God, Montresor!"

"Yes," I said, "for the love of God!"

But to these words I hearkened in vain for a reply. I grew impatient. I called aloud—

"Fortunato!"

No answer. I called again—

"Fortunato!"

No answer still. I thrust a torch through the remaining aperture and let it

fall within. There came forth in return only a jingling of the bells. My heart grew sick; it was the dampness of the catacombs that made it so. I hastened to make an end of my labour. I forced the last stone into its position; I plastered it up. Against the new masonry I re-erected the old rampart of bones. For the half of a century no mortal has disturbed them. *In pace requiescat.*

[HAWTHORNE'S TWICE-TOLD TALES]

Although only the second and longer portion of Poe's review of Hawthorne's stories is usually reprinted, that author began his notice of his great contemporary in *Graham's Magazine* for April, 1842, and returned to the subject in the May number. The first discussion forms an appropriate prelude to the second, and better-known, essay for the reason that it sets the book in its contemporary background. Moreover, some of Poe's characteristic thrusts at cheap contemporary literature, his delight in finding a truly "original" author, and the compliment to Irving are found in the opening remarks. The part of the review down to the division line is the part which first appeared.

Twice-Told Tales. By Nathaniel Hawthorne. James Munroe & Co.: Boston.

We have always regarded the *Tale* (using this word in its popular acceptation) as affording the best prose opportunity for display of the highest talent. It has peculiar advantages which the novel does not admit. It is, of course, a far finer field than the essay. It has even points of superiority over the poem. An accident has deprived us, this month, of our customary space for review; and thus nipped in the bed a design long cherished of treating this subject in detail; taking Mr. Hawthorne's volumes as a text. In May we shall endeavor to carry out our intention. At present we are forced to be brief.

With rare exception—in the case of Mr. Irving's "Tales of a Traveller" and a few other works of a like cast—we have had no American tales of high merit. We have had no skilful compositions—nothing which could bear examination as works of art. Of twattle called tale-writing we have had, perhaps, more than enough. We have had a superabundance of the Rosa-Matilda effusions—gilt-edged paper all *couleur de rose:* a full allowance of cut-and-thrust blue-blazing melodramaticisms; a nauseating surfe[i]t of low miniature copying of low life, much in the manner, and with about half the merit, of the Dutch herrings and decayed cheeses of Van Tuyssel—of all this *eheu jam satis!*

Mr. Hawthorne's volumes appear to us misnamed in two respects. In the first place they should not have been called "Twice-Told Tales"—for this is a title which will not bear *repetition.* If in the first collected edition they were

2. it was—"on account of" (1850). **2. that made it so**—1850 omits. **5. In pace requiescat**—May he rest in peace—an inscription frequently carved on tombstones. **15. Irving's "Tales . . ."**—published first in 1824. **19. Rosa-Matilda**—a hit at the sentimental romanticism of the "Della Cruscan" order. "Anna Matilda" was the poetic signature of Hannah Cowley (1758-1800), and the fashion of names thus set was widely imitated. **20. couleur de rose**—rose-color. **23. Van Tuyssel**—No such Dutch painter is known. The name is apparently an invention of Poe's. **23. eheu jam satis!**—alas, now enough!

twice-told, of course now they are thrice told. May we live to hear them told a hundred times! In the second place, these compositions are by no means *all* "Tales." The most of them are essays properly so called. It would have been wise in their author to have modified his title, so as to have had reference to all included. This point could have been easily arranged.

But under whatever titular blunders we receive this book, it is most cordially welcome. We have seen no prose composition by any American which can compare with *some* of these articles in the higher merits, or indeed in the lower; while there is not a single piece which would do dishonor to the best of the British essayists.

"The Rill from the Town Pump" which, through the *ad captandum* nature of its title, has attracted more of public notice than any other of Mr. Hawthorne's compositions, is perhaps, the *least* meritorious. Among the best, we may briefly mention "The Hollow of the Three Hills;" "The Minister's Black Veil;" "Wakefield;" "Mr. Higginbotham's Catastrophe;" "Fancy's Show-Box;" "Dr. Heidegger's Experiment;" "David Swan;" "The Wedding Knell;" and "The White Old Maid." It is remarkable that all these, with one exception, are from the first volume.

The style of Mr. Hawthorne is purity itself. His *tone* is singularly effective—wild, plaintive, thoughtful, and in full accordance with his themes. We have only to object that there is insufficient diversity in these themes themselves, or rather in their character. His *originality* both of incident and of reflection is very remarkable; and this trait alone would ensure him at least *our* warmest regard and commendation. We speak here chiefly of the tales; the essays are not so markedly novel. Upon the whole we look upon him as one of the few men of indisputable genius to whom our country has as yet given birth. As such, it will be our delight to do him honor; and lest, in these undigested and cursory remarks, we should appear to do him *more* honor than is his due, we postpone all farther comment until a more favorable opportunity.

We said a few hurried words about Mr. Hawthorne in our last number, with the design of speaking more fully in the present. We are still, however, pressed for room, and must necessarily discuss his volumes more briefly and more at random than their high merits deserve.

The book professes to be a collection of *tales,* yet is, in two respects, misnamed. These pieces are now in their third republication, and, of course, are thrice-told. Moreover, they are by no means *all* tales, either in the ordinary or in the legitimate understanding of the term. Many of them are pure essays; for example, "Sights from a Steeple," "Sunday at Home," "Little Annie's Ramble," "A Rill from the Town Pump," "The Toll-Gatherer's Day," "The Haunted Mind," "The Sister Years," "Snow-Flakes," "Night Sketches," and "Foot-Prints on the Sea-Shore." We mention these matters chiefly on account

11. ad captandum—"catchy." **18. first volume**—This also contains "The Gray Champion" and "The Gentle Boy"; and the second volume includes "Lady Eleanore's Mantle," "The Ambitious Guest," and "Edward Fane's Rosebud" among the better-known stories. **35. third republication**—The first collected edition of *Twice-Told Tales* was 1837; the second, 1842.

of their discrepancy with that marked precision and finish by which the body of the work is distinguished.

Of the essays just named, we must be content to speak in brief. They are each and all beautiful, without being characterized by the polish and adaptation so visible in the tales proper. A painter would at once note their leading or predominant feature, and style it *repose*. There is no attempt at effect. All is quiet, thoughtful, subdued. Yet this repose may exist simultaneously with high originality of thought; and Mr. Hawthorne has demonstrated the fact. At every turn we meet with novel combinations; yet these combinations never surpass the limits of the quiet. We are soothed as we read; and withal is a calm astonishment that ideas so apparently obvious have never occurred or been presented to us before. Herein our author differs materially from Lamb or Hunt or Hazlitt—who, with vivid originality of manner and expression, have less of the true novelty of thought than is generally supposed, and whose originality, at best, has an uneasy and meretricious quaintness, replete with startling effects unfounded in nature, and inducing trains of reflection which lead to no satisfactory result. The Essays of Hawthorne have much of the character of Irving, with more of originality, and less of finish; while, compared with the Spectator, they have a vast superiority at all points. The Spectator, Mr. Irving, and Mr. Hawthorne have in common that tranquil and subdued manner which we have chosen to denominate *repose;* but, in the case of the two former, this repose is attained rather by the absence of novel combination, or of originality, than otherwise, and consists chiefly in the calm, quiet, unostentatious expression of commonplace thoughts, in an unambitious, unadulterated Saxon. In them, by strong effort, we are made to conceive the absence of all. In the essays before us the absence of effort is too obvious to be mistaken, and a strong undercurrent of *suggestion* runs continuously beneath the upper stream of the tranquil thesis. In short, these effusions of Mr. Hawthorne are the product of a truly imaginative intellect, restrained, and in some measure repressed, by fastidiousness of taste, by constitutional melancholy, and by indolence.

But it is of his tales that we desire principally to speak. The tale proper, in our opinion, affords unquestionably the fairest field for the exercise of the loftiest talent, which can be afforded by the wide domains of mere prose. Were we bidden to say how the highest genius could be most advantageously employed for the best display of its own powers, we should answer, without hesitation—in the composition of a rhymed poem, not to exceed in length what might be perused in an hour. Within this limit alone can the highest order of true poetry exist. We need only here say, upon this topic, that, in almost all classes of composition, the unity of effect or impression is a point of the greatest importance. It is clear, moreover, that this unity cannot be thoroughly preserved in productions whose perusal cannot be completed at one sitting. We

12-13. **Lamb . . . Hunt . . . Hazlitt**—Poe reviewed a life of Hazlitt in the *Southern Literary Messenger*, September, 1836, in which he said Hazlitt, though deficient in imagination, was perhaps unequaled as a critic. Of Hazlitt's *The Characters of Shakespeare's Plays* he said (*Broadway Journal*, Aug. 16, 1845) Hazlitt was "the best commentator who ever wrote in English." In the same magazine (Aug. 30, 1845), he said of Hunt that "he has insufficient stimulus' and was "fit for very little." Poe has little to say about Lamb.

may continue the reading of a prose composition, from the very nature of prose itself, much longer than we can persevere, to any good purpose, in the perusal of a poem. This latter, if truly fulfilling the demands of the poetic sentiment, induces an exaltation of the soul which cannot be long sustained. All high excitements are necessarily transient. Thus a long poem is a paradox. And, without unity of impression, the deepest effects cannot be brought about. Epics were the offspring of an imperfect sense of Art, and their reign is no more. A poem *too* brief may produce a vivid, but never an intense or enduring impression. Without a certain continuity of effort—without a certain duration or repetition of purpose—the soul is never deeply moved. There must be the dropping of the water upon the rock. De Béranger has wrought brilliant things—pungent and spirit-stirring—but, like all immassive bodies, they lack *momentum,* and thus fail to satisfy the Poetic Sentiment. They sparkle and excite, but, from want of continuity, fail deeply to impress. Extreme brevity will degenerate into epigrammatism; but the sin of extreme length is even more unpardonable. *In medio tutissimus ibis.*

Were we called upon, however, to designate that class of composition which, next to such a poem as we have suggested, should best fulfil the demands of high genius—should offer it the most advantageous field of exertion—we should unhesitatingly speak of the prose tale, as Mr. Hawthorne has here exemplified it. We allude to the short prose narrative, requiring from a half-hour to one or two hours in its perusal. The ordinary novel is objectionable, from its length, for reasons already stated in substance. As it cannot be read at one sitting, it deprives itself, of course, of the immense force derivable from *totality.* Worldly interests intervening during the pauses of perusal, modify, annul, or counteract, in a greater or less degree, the impressions of the book. But simple cessation in reading would, of itself, be sufficient to destroy the true unity. In the brief tale, however, the author is enabled to carry out the fulness of his intention, be it what it may. During the hour of perusal the soul of the reader is at the writer's control. There are no external or extrinsic influences—resulting from weariness or interruption.

A skilful literary artist has constructed a tale. If wise, he has not fashioned his thoughts to accommodate his incidents; but having conceived, with deliberate care, a certain unique or single *effect* to be wrought out, he then invents such incidents—he then combines such events as may best aid him in establishing this preconceived effect. If his very initial sentence tend not to the outbringing of this effect, then he has failed in his first step. In the whole composition there should be no word written, of which the tendency, direct or indirect, is not to the one pre-established design. And by such means, with such care and skill, a picture is at length painted which leaves in the mind of him who contemplates it with a kindred art, a sense of the fullest satisfaction. The idea of the tale has been presented unblemished, because undisturbed: and this is an end unattainable by the novel. Undue brevity is just as exceptionable here as in the poem; but undue length is yet more to be avoided.

We have said that the tale has a point of superiority even over the poem.

11. De Béranger—*Cf.* note to motto of "The Fall of the House of Usher," p. 712. **16. In medio . . .** —You shall be most secure in some middle ground.

In fact, while the *rhythm* of this latter is an essential aid in the development of the poem's highest idea—the idea of the Beautiful—the artificialities of this rhythm are an inseparable bar to the development of all points of thought or expression which have their basis in *Truth*. But Truth is often, and in very great degree, the aim of the tale. Some of the finest tales are tales of ratiocination. Thus the field of this species of composition, if not in so elevated a region on the mountain of Mind, is a table-land of far vaster extent than the domain of the mere poem. Its products are never so rich, but infinitely more numerous, and more appreciable by the mass of mankind. The writer of the prose tale, in short, may bring to his theme a vast variety of modes or inflections of thought and expression—(the ratiocinative, for example, the sarcastic, or the humorous) which are not only antagonistical to the nature of the poem, but absolutely forbidden by one of its most peculiar and indispensable adjuncts; we allude, of course, to rhythm. It may be added here, *par parenthèse,* that the author who aims at the purely beautiful in a prose tale is laboring at a great disadvantage. For Beauty can be better treated in the poem. Not so with terror, or passion, or horror, or a multitude of such other points. And here it will be seen how full of prejudice are the usual animadversions against those *tales of effect,* many fine examples of which were found in the earlier numbers of Blackwood. The impressions produced were wrought in a legitimate sphere of action, and constituted a legitimate although sometimes an exaggerated interest. They were relished by every man of genius: although there were found many men of genius who condemned them without just ground. The true critic will but demand that the design intended be accomplished, to the fullest extent, by the means most advantageously applicable.

We have very few American tales of real merit—we may say, indeed, none, with the exception of "The Tales of a Traveller" of Washington Irving, and these "Twice-Told Tales" of Mr. Hawthorne. Some of the pieces of Mr. John Neal abound in vigor and originality; but, in general, his compositions of this class are excessively diffuse, extravagant, and indicative of an imperfect sentiment of Art. Articles at random are, now and then, met with in our periodicals which might be advantageously compared with the best effusions of the British Magazines; but, upon the whole, we are far behind our progenitors in this department of literature.

Of Mr. Hawthorne's tales we would say, emphatically, that they belong to the highest region of Art—an Art subservient to genius of a very lofty order. We had supposed, with good reason for so supposing, that he had been thrust into his present position by one of the impudent *cliques* which beset our literature, and whose pretensions it is our full purpose to expose at the earliest opportunity; but we have been most agreeably mistaken. We know of few compositions which the critic can more honestly commend than these "Twice-Told Tales." As Americans, we feel proud of the book.

Mr. Hawthorne's distinctive trait is invention, creation, imagination, orig-

14. par parenthèse—by way of parenthesis. **19. Blackwood**—*Blackwood's Edinburgh Monthly Magazine,* founded 1817, notable for the amount of romantic fiction in its earlier volumes. **28-29. John Neal**—John Neal (1793-1876), American author of numerous volumes of fiction.

inality—a trait which, in the literature of ficton, is positively worth all the rest. But the nature of the originality, so far as regards its manifestation in letters, is but imperfectly understood. The inventive or original mind as frequently displays itself in novelty of *tone* as in novelty of matter. Mr. Hawthorne is original at *all* points.

It would be a matter of some difficulty to designate the best of these tales; we repeat that, without exception, they are beautiful. "Wakefield" is remarkable for the skill with which an old idea—a well-known incident—is worked up or discussed. A man of whims conceives the purpose of quitting his wife and residing *incognito,* for twenty years, in her immediate neighborhood. Something of this kind actually happened in London. The force of Mr. Hawthorne's tale lies in the analysis of the motives which must or might have impelled the husband to such folly, in the first instance, with the possible causes of his perseverance. Upon this thesis a sketch of singular power has been constructed.

"The Wedding Knell" is full of the boldest imagination—an imagination fully controlled by taste. The most captious critic could find no flaw in this production.

"The Minister's Black Veil" is a masterly composition, of which the sole defect is that to the rabble its exquisite skill will be *caviare.* The *obvious* meaning of this article will be found to smother its insinuated one. The *moral* put into the mouth of the dying minister will be supposed to convey the *true* import of the narrative; and that a crime of dark dye (having reference to the "young lady") has been committed, is a point which only minds congenial with that of the author will perceive.

"Mr. Higginbotham's Catastrophe" is vividly original, and managed most dexterously.

"Dr. Heidegger's Experiment" is exceedingly well imagined, and executed with surpassing ability. The artist breathes in every line of it.

"The White Old Maid" is objectionable even more than the "Minister's Black Veil," on the score of its mysticism. Even with the thoughtful and analytic, there will be much trouble in penetrating its entire import.

"The Hollow of the Three Hills" we would quote in full had we space;—not as evincing higher talent than any of the other pieces, but as affording an excellent example of the author's peculiar ability. The subject is commonplace. A witch subjects the Distant and the Past to the view of a mourner. It has been the fashion to describe, in such cases, a mirror in which the images of the absent appear; or a cloud of smoke is made to arise, and thence the figures are gradually unfolded. Mr. Hawthorne has wonderfully heightened his effect by making the ear, in place of the eye, the medium by which the fantasy is conveyed. The head of the mourner is enveloped in the cloak of the witch, and within its magic folds there arise sounds which have an all-sufficient intelligence. Throughout this article also, the artist is conspicuous—not more in positive than in negative merits. Not only is all done that should be done, but (what perhaps is an end with more difficulty attained) there is nothing done which

20. rabble . . . caviare—*Cf. Hamlet,* Act II, scene 2—"caviar to the general."

should not be. Every word *tells,* and there is not a word which does *not* tell.

In "Howe's Masquerade" we observe something which resembles plagiarism —but which *may be* a very flattering coincidence of thought. We quote the passage in question.

[Quotation.]

The idea here is, that the figure in the cloak is the phantom or reduplication of Sir William Howe; but in an article called "William Wilson," one of the "Tales of the Grotesque and Arabesque," we have not only the same idea, but the same idea similarly presented in several respects. We quote two paragraphs, which our readers may compare with what has been already given. We have italicized, above, the immediate particulars of resemblance.

[Quotation.]

Here it will be observed that, not only are the two general conceptions identical, but there are various *points* of similarity. In each case the figure seen is the wraith or duplication of the beholder. In each case the scene is a masquerade. In each case the figure is cloaked. In each, there is a quarrel—that is to say, angry words pass between the parties. In each the beholder is enraged. In each the cloak and sword fall upon the floor. The "villain, unmuffle yourself," of Mr. H. is precisely paralleled by a passage at page 56 of "William Wilson."

In the way of objection we have scarcely a word to say of these tales. There is, perhaps, a somewhat too general or prevalent *tone*—a tone of melancholy and mysticism. The subjects are insufficiently varied. There is not so much of *versatility* evinced as we might well be warranted in expecting from the high powers of Mr. Hawthorne. But beyond these trivial exceptions we have really none to make. The style is purity itself. Force abounds. High imagination gleams from every page. Mr. Hawthorne is a man of the truest genius. We only regret that the limits of our Magazine will not permit us to pay him that full tribute of commendation, which, under other circumstances, we should be so eager to pay.

Poe returned to this volume of Hawthorne's in an essay contributed to *Godey's Lady's Book* for November, 1847 (Virginia edition of the *Works,* Vol. XIII, pp. 141-55), in which he reprinted his paragraphs about the structure of the short story, and accounted for Hawthorne's lack of popularity by denying him originality, though granting him "peculiarity." The review concludes: "Let him [Hawthorne] mend his pen, get a bottle of visible ink, come out from the Old Manse, cut Mr. Alcott, hang (if possible) the editor of 'The Dial,' and throw out of the window to the pigs all his odd numbers of 'The North American Review.'"

THE POETIC PRINCIPLE

This essay first appeared in *Sartain's Union Magazine,* October, 1850.

IN SPEAKING of the Poetic Principle, I have no design to be either thorough or profound. While discussing very much at random the essentiality of what we call Poetry, my principal purpose will be to cite for consideration some few of those minor English or American poems which best suit my own taste, or which, upon my own fancy, have left the most definite impression. By "minor poems" I mean, of course, poems of little length. And here, in the beginning, permit me to say a few words in regard to a somewhat peculiar principle, which, whether rightfully or wrongfully, has always had its influence in my own critical estimate of the poem. I hold that a long poem does not exist. I maintain that the phrase, "a long poem," is simply a flat contradiction in terms.

I need scarcely observe that a poem deserves its title only inasmuch as it excites, by elevating the soul. The value of the poem is in the ratio of this elevating excitement. But all excitements are, through a psychal necessity, transient. That degree of excitement which would entitle a poem to be so called at all, cannot be sustained throughout a composition of any great length. After the lapse of half an hour, at the very utmost, it flags—fails—a revulsion ensues—and then the poem is, in effect, and in fact, no longer such.

There are, no doubt, many who have found difficulty in reconciling the critical dictum that the "Paradise Lost" is to be devoutly admired throughout, with the absolute impossibility of maintaining for it, during perusal, the amount of enthusiasm which that critical dictum would demand. This great work, in fact, is to be regarded as poetical only when, losing sight of that vital requisite in all works of Art, Unity, we view it merely as a series of minor poems. If, to preserve its Unity—its totality of effect or impression—we read it (as would be necessary) at a single sitting, the result is but a constant alternation of excitement and depression. After a passage of what we feel to be true poetry, there follows, inevitably, a passage of platitude which no critical pre-judgment can force us to admire; but if, upon completing the work, we read it again, omitting the first book—that is to say, commencing with the second—we shall be surprised at now finding that admirable which we before condemned—that damnable which we had previously so much admired. It follows from all this that the ultimate, aggregate, or absolute effect of even the best epic under the sun, is a nullity—and this is precisely the fact.

In regard to the Iliad, we have, if not positive proof, at least very good reason, for believing it intended as a series of lyrics; but, granting the epic intention, I can say only that the work is based in an imperfect sense of Art. The modern epic is, of the supposititious ancient model, but an inconsiderate and blindfold imitation. But the day of these artistic anomalies is over. If, at any time, any very long poem *were* popular in reality, which I doubt, it is at least clear that no very long poem will ever be popular again.

14. **psychal**—psychological.

That the extent of a poetical work is, *ceteris paribus,* the measure of its merit, seems undoubtedly, when we thus state it, a proposition sufficiently absurd—yet we are indebted for it to the Quarterly Reviews. Surely there can be nothing in mere *size,* abstractly considered—there can be nothing in mere *bulk,* so far as a volume is concerned, which has so continuously elicited admiration from these saturnine pamphlets! A mountain, to be sure, by the mere sentiment of physical magnitude which it conveys, *does* impress us with a sense of the sublime—but no man is impressed after *this* fashion by the material grandeur of even "The Columbiad." Even the Quarterlies have not instructed us to be so impressed by it. *As yet,* they have not *insisted* on our estimating Lamartine by the cubic foot, or Pollok by the pound—but what else are we to *infer* from their continued prating about "sustained effort"? If, by "sustained effort," any little gentleman has accomplished an epic, let us frankly commend him for the effort—if this indeed be a thing commendable—but let us forbear praising the epic on the effort's account. It is to be hoped that common sense, in the time to come, will prefer deciding upon a work of art rather by the impression it makes, by the effect it produces, than by the time it took to impress the effect, or by the amount of "sustained effort" which had been found necessary in effecting the impression. The fact is, that perseverance is one thing and genius quite another—nor can all the Quarterlies in Christendom confound them. By and by, this proposition, with many which I have just been urging, will be received as self-evident. In the mean time, by being generally condemned as falsities, they will not be essentially damaged as truths.

On the other hand, it is clear that a poem may be improperly brief. Undue brevity degenerates into mere epigrammatism. A *very* short poem, while now and then producing a brilliant or vivid, never produces a profound or enduring effect. There must be the steady pressing down of the stamp upon the wax. De Béranger has wrought innumerable things, pungent and spirit-stirring; but in general they have been too imponderous to stamp themselves deeply into the public attention, and thus, as so many feathers of fancy, have been blown aloft only to be whistled down the wind.

A remarkable instance of the effect of undue brevity in depressing a poem—in keeping it out of the popular view—is afforded by the following exquisite little Serenade:

I arise from dreams of thee
  In the first sweet sleep of night,
When the winds are breathing low,
  And the stars are shining bright;
I arise from dreams of thee,
  And a spirit in my feet
Has led me—who knows how?—
  To thy chamber-window, sweet!

1. **ceteris paribus**—other things being equal. 9. **Columbiad**—An ambitious epic poem (in ten books) published in 1807 by Joel Barlow (1754-1812). 10-11. **Lamartine . . . Pollok**—Alphonse de Lamartine (1790-1827), one of the great French poets of the romantic group. Robert Pollok (1798?-1827) published in 1827 a long didactic poem, *The Course of Time,* now generally regarded as unreadable. 34. **Serenade**—In the *Poetical Works* of Shelley edited by Mrs. Shelley (1839) this poem is entitled "Lines to an Indian Air," and the text differs in punctuation from Poe's.

The wandering airs, they faint
  On the dark, the silent stream—
The champak odors fail
  Like sweet thoughts in a dream;
The nightingale's complaint,
  It dies upon her heart,
As I must die on thine,
  O, beloved as thou art!

O, lift me from the grass!
  I die, I faint, I fail!
Let thy love in kisses rain
  On my lips and eyelids pale.
My cheek is cold and white, alas!
  My heart beats loud and fast:
Oh! press it close to thine again,
  Where it will break at last!

Very few perhaps are familiar with these lines—yet no less a poet than Shelley is their author. Their warm, yet delicate and ethereal imagination will be appreciated by all—but by none so thoroughly as by him who has himself arisen from sweet dreams of one beloved to bathe in the aromatic air of a southern midsummer night.

One of the finest poems by Willis, the very best in my opinion which he has ever written, has no doubt, through this same defect of undue brevity, been kept back from its proper position, not less in the critical than in the popular view.

The shadows lay along Broadway,
  'Twas near the twilight-tide—
And slowly there a lady fair
  Was walking in her pride.
Alone walk'd she; but, viewlessly,
  Walk'd spirits at her side.

Peace charm'd the street beneath her feet,
  And Honour charm'd the air;
And all astir looked kind on her,
  And call'd her good and fair—
For all God ever gave to her
  She kept with chary care.

She kept with care her beauties rare
  From lovers warm and true—
For her heart was cold to all but gold,
  And the rich came not to woo—
But honour'd well are charms to sell,
  If priests the selling do.

26. The shadows—This poem, under the title "Unseen Spirits," appears in *The Poems, Sacred, Passionate, and Humorous of Nathaniel Parker Willis* (1850), the text of which Poe seems to have followed.

Now walking there was one more fair—
A slight girl, lily-pale;
And she had unseen company
To make the spirit quail—
'Twixt Want and Scorn she walk'd forlorn,
And nothing could avail.

No mercy now can clear her brow
For this world's peace to pray;
For, as love's wild prayer dissolved in air,
Her woman's heart gave way!—
But the sin forgiven by Christ in Heaven
By man is cursed alway!

In this composition we find it difficult to recognize the Willis who has written so many mere "verses of society." The lines are not only richly ideal, but full of energy; while they breathe an earnestness, an evident sincerity of sentiment, for which we look in vain throughout all the other works of this author.

While the epic mania—while the idea that, to merit in poetry, prolixity is indispensable—has for some years past been gradually dying out of the public mind by mere dint of its own absurdity, we find it succeeded by a heresy too palpably false to be long tolerated, but one which, in the brief period it has already endured, may be said to have accomplished more in the corruption of our Poetical Literature than all its other enemies combined. I allude to the heresy of *The Didactic*. It has been assumed, tacitly and avowedly, directly and indirectly, that the ultimate object of all Poetry is Truth. Every poem, it is said, should inculcate a moral, and by this moral is the poetical merit of the work to be adjudged. We Americans especially have patronized this happy idea, and we Bostonians very especially have developed it in full. We have taken it into our heads that to write a poem simply for the poem's sake, and to acknowledge such to have been our design, would be to confess ourselves radically wanting in the true Poetic dignity and force:—but the simple fact is, that would we but permit ourselves to look into our own souls, we should immediately there discover that under the sun there neither exists nor *can* exist any work more thoroughly dignified, more supremely noble than this very poem, this poem *per se*, this poem which is a poem and nothing more, this poem written solely for the poem's sake.

With as deep a reverence for the True as ever inspired the bosom of man, I would nevertheless limit, in some measure, its modes of inculcation. I would limit to enforce them. I would not enfeeble them by dissipation. The demands of Truth are severe. She has no sympathy with the myrtles. All *that* which is so indispensable in Song is precisely all *that* with which *she* has nothing whatever to do. It is but making her a flaunting paradox to wreathe her in gems and flowers. In enforcing a truth, we need severity rather than efflorescence of language. We must be simple, precise, terse. We must be cool, calm, unimpassioned. In a word, we must be in that mood which, as nearly as possible, is the exact converse of the poetical. *He* must be blind indeed who does not

39. **myrtles**—The myrtle is associated with Apollo and the Muses as the deities of song.

perceive the radical and chasmal differences between the truthful and the poetical modes of inculcation. He must be theory-mad beyond redemption who, in spite of these differences, shall still persist in attempting to reconcile the obstinate oils and waters of Poetry and Truth.

Dividing the world of mind into its three most immediately obvious distinctions, we have the Pure Intellect, Taste, and the Moral Sense. I place Taste in the middle because it is just this position which it occupies in the mind. It holds intimate relations with either extreme, but from the Moral Sense is separated by so faint a difference that Aristotle has not hesitated to place some of its operations among the virtues themselves. Nevertheless, we find the *offices* of the trio marked with a sufficient distinction. Just as the Intellect concerns itself with Truth, so Taste informs us of the Beautiful, while the Moral Sense is regardful of Duty. Of this latter, while Conscience teaches the obligation, and Reason the expediency, Taste contents herself with displaying the charms, waging war upon Vice solely on the ground of her deformity, her disproportion, her animosity to the fitting, to the appropriate, to the harmonious, in a word, to Beauty.

An immortal instinct deep within the spirit of man is thus plainly a sense of the Beautiful. This it is which administers to his delight in the manifold forms, and sounds, and odors, and sentiments, amid which he exists. And just as the lily is repeated in the lake, or the eyes of Amaryllis in the mirror, so is the mere oral or written repetition of these forms, and sounds, and colors, and odors, and sentiments, a duplicate source of delight. But this mere repetition is not poetry. He who shall simply sing, with however glowing enthusiasm, or with however vivid a truth of description, of the sights, and sounds, and odors, and colors, and sentiments, which greet *him* in common with all mankind—he, I say, has yet failed to prove his divine title. There is still a something in the distance which he has been unable to attain. We have still a thirst unquenchable, to allay which he has not shown us the crystal springs. This thirst belongs to the immortality of Man. It is at once a consequence and an indication of his perennial existence. It is the desire of the moth for the star. It is no mere appreciation of the Beauty before us—but a wild effort to reach the Beauty above. Inspired by an ecstatic prescience of the glories beyond the grave, we struggle by multiform combinations among the things and thoughts of Time to attain a portion of that Loveliness whose very elements, perhaps, appertain to eternity alone. And thus when by Poetry—or when by Music, the most entrancing of the Poetic moods—we find ourselves melted into tears, we weep then—not as the Abbate Gravina supposes—through excess of pleasure, but through a certain, petulant, impatient sorrow at our inability to grasp *now*, wholly, here on earth, at once and forever, those divine and rapturous joys, of which *through* the poem or *through* the music, we attain to but brief and indeterminate glimpses.

The struggle to apprehend the supernal Loveliness—this struggle, on the part

9. Aristotle—The allusion is to the *Nicomachaean Ethics*, for example, Bk. VI. **31. desire . . . star**—From Shelley's lyric beginning "One word is too often profaned." **38. Gravina**—The reference seems to be to Giovanni Vincenzo Gravina (1664-1718), founder of the Arcadian Academy, and noted critic.

of souls fittingly constituted—has given to the world all *that* which it (the world) has ever been enabled at once to understand and to *feel* as poetic.

The Poetic Sentiment, of course, may develop itself in various modes—in Painting, in Sculpture, in Architecture, in the Dance—very especially in Music —and very peculiarly, and with a wide field, in the composition of the Landscape Garden. Our present theme, however, has regard only to its manifestation in words. And here let me speak briefly on the topic of rhythm. Contenting myself with the certainty that Music, in its various modes of metre, rhythm, and rhyme, is of so vast a moment in Poetry as never to be wisely rejected—is so vitally important an adjunct that he is simply silly who declines its assistance—I will not now pause to maintain its absolute essentiality. It is in Music, perhaps, that the soul most nearly attains the great end for which, when inspired by the Poetic Sentiment, it struggles—the creation of supernal Beauty. It *may* be, indeed, that here this sublime end is, now and then, attained in *fact*. We are often made to feel, with a shivering delight, that from an earthly harp are stricken notes which *cannot* have been unfamiliar to the angels. And thus there can be little doubt that in the union of Poetry with Music in its popular sense, we shall find the widest field for the Poetic development. The old Bards and Minnesingers had advantages which we do not possess—and Thomas Moore, singing his own songs, was, in the most legitimate manner, perfecting them as poems.

To recapitulate, then:—I would define, in brief, the Poetry of words as *The Rhythmical Creation of Beauty*. Its sole arbiter is Taste. With the Intellect or with the Conscience, it has only collateral relations. Unless incidentally, it has no concern whatever either with Duty or with Truth.

A few words, however, in explanation. *That* pleasure which is at once the most pure, the most elevating, and the most intense, is derived, I maintain, from the contemplation of the Beautiful. In the contemplation of Beauty we alone find it possible to attain that pleasurable elevation, or excitement, *of the soul,* which we recognize as the Poetic Sentiment, and which is so easily distinguished from Truth, which is the satisfaction of the Reason, or from Passion, which is the excitement of the heart. I make Beauty, therefore,—using the word as inclusive of the sublime,—I make Beauty the province of the poem, simply because it is an obvious rule of Art that effects should be made to spring as directly as possible from their causes:—no one as yet having been weak enough to deny that the peculiar elevation in question is at least *most readily* attainable in the poem. It by no means follows, however, that the incitements of Passion, or the precepts of Duty, or even the lessons of Truth, may not be introduced into a poem, and with advantage; for they may subserve incidentally, in various ways, the general purposes of the work:—but the true artist will always contrive to tone them down in proper subjection to that *Beauty* which is the atmosphere and the real essence of the poem.

I cannot better introduce the few poems which I shall present for your consideration, than by the citation of the Proem to Mr. Longfellow's "Waif":

19. **Thomas Moore**—Thomas Moore (1779-1852) was accustomed to sing his own songs to his own music in the drawing-rooms of London. 44. **Waif**—*The Waif* is an anthology of poems edited by Longfellow and published in 1844 (1845).

The day is done, and the darkness
  Falls from the wings of Night,
As a feather is wafted downward
  From an eagle in his flight.

I see the lights of the village
  Gleam through the rain and the mist,
And a feeling of sadness comes o'er me,
  That my soul cannot resist;

A feeling of sadness and longing,
  That is not akin to pain,
And resembles sorrow only
  As the mist resembles the rain.

Come, read to me some poem,
  Some simple and heartfelt lay,
That shall soothe this restless feeling,
  And banish the thoughts of day.

Not from the grand old masters,
  Not from the bards sublime,
Whose distant footsteps echo
  Through the corridors of Time.

For, like strains of martial music,
  Their mighty thoughts suggest
Life's endless toil and endeavor;
  And to-night I long for rest.

Read from some humbler poet,
  Whose songs gushed from his heart,
As showers from the clouds of summer,
  Or tears from the eyelids start;

Who through long days of labor,
  And nights devoid of ease,
Still heard in his soul the music
  Of wonderful melodies.

Such songs have power to quiet
  The restless pulse of care,
And come like the benediction
  That follows after prayer.

Then read from the treasured volume
  The poem of thy choice,
And lend to the rhyme of the poet
  The beauty of thy voice.

20. Time—Longfellow's text does not personify time.

And the night shall be filled with music,
And the cares, that infest the day,
Shall fold their tents, like the Arabs,
And as silently steal away.

With no great range of imagination, these lines have been justly admired for their delicacy of expression. Some of the images are very effective. Nothing can be better than

The bards sublime
Whose distant footsteps echo
Down the corridors of Time.

The idea of the last quatrain is also very effective. The poem, on the whole, however, is chiefly to be admired for the graceful *insouciance* of its metre, so well in accordance with the character of the sentiments, and especially for the *ease* of the general manner. This "ease" or naturalness, in a literary style, it has long been the fashion to regard as ease in appearance alone—as a point of really difficult attainment. But not so:—a natural manner is difficult only to him who should never meddle with it—to the unnatural. It is but the result of writing with the understanding, or with the instinct, that *the tone,* in composition, should always be that which the mass of mankind would adopt—and must perpetually vary, of course, with the occasion. The author who, after the fashion of the "North American Review," should be upon *all* occasions merely "quiet," must necessarily upon *many* occasions be simply silly, or stupid; and has no more right to be considered "easy" or "natural" than a Cockney exquisite, or than the sleeping Beauty in the wax-works.

Among the minor poems of Bryant, none has so much impressed me as the one which he entitles "June." I quote only a portion of it:

There, through the long, long summer hours,
The golden light should lie,
And thick young herbs and groups of flowers
Stand in their beauty by.
The oriole should build and tell
His love-tale, close beside my cell;
The idle butterfly
Should rest him there, and there be heard
The housewife-bee and humming bird.

And what if cheerful shouts at noon
Come, from the village sent,
Or songs of maids, beneath the moon,
With fairy laughter blent?
And what if, in the evening light,
Betrothed lovers walk in sight

10. **Down**—The misquotation is Poe's. *Cf.* line 20, p. 769. 12. **insouciance**—quality of being care-free. 23. **exquisite**—dandy. 26. **"June"**—Poe quotes the last four stanzas as printed in Bryant's *Poems* of 1832. There are certain minor differences in punctuation—Bryant has neither question mark nor hyphen in the stanzas quoted.

Of my low monument?
I would the lovely scene around
Might know no sadder sight nor sound.

I know, I know I should not see
The season's glorious show,
Nor would its brightness shine for me,
Nor its wild music flow;
But if, around my place of sleep,
The friends I love should come to weep,
They might not haste to go.
Soft airs, and song, and light and bloom
Should keep them lingering by my tomb.

These to their softened hearts should bear
The thought of what has been,
And speak of one who cannot share
The gladness of the scene;
Whose part, in all the pomp that fills
The circuit of the summer hills,
Is—that his grave is green;
And deeply would their hearts rejoice
To hear again his living voice.

The rhythmical flow here is even voluptuous—nothing could be more melodious. The poem has always affected me in a remarkable manner. The intense melancholy which seems to well up, perforce, to the surface of all the poet's cheerful sayings about his grave, we find thrilling us to the soul—while there is the truest poetic elevation in the thrill. The impression left is one of a pleasurable sadness. And if, in the remaining compositions which I shall introduce to you, there be more or less of a similar tone always apparent, let me remind you that (how or why we know not) this certain taint of sadness is inseparably connected with all the higher manifestations of true Beauty. It is, nevertheless,

A feeling of sadness and longing
That is not akin to pain,
And resembles sorrow only
As the mist resembles the rain.

The taint of which I speak is clearly perceptible even in a poem so full of brilliancy and spirit as the "Health" of Edward Coate Pinckney.

I fill this cup to one made up
Of loveliness alone,
A woman, of her gentle sex
The seeming paragon;

37. **Pinckney**—The Virginia edition prints "Pinckney," but the poet in question was Edward Coate (or Coote) Pinkney (1802-1828). The poem appears in *Poems* by Edward C. Pinkney (1825), where each stanza is printed as a quatrain of four long lines. There are also certain minor differences in punctuation between Pinkney's version and that quoted by Poe, who seems to have no authority for breaking the poem into eight-line stanzas.

To whom the better elements
And kindly stars have given
A form so fair, that, like the air,
'Tis less of earth than heaven.

Her every tone is music's own,
Like those of morning birds,
And something more than melody
Dwells ever in her words;
The coinage of her heart are they,
And from her lips each flows
As one may see the burden'd bee
Forth issue from the rose.

Affections are as thoughts to her,
The measures of her hours;
Her feelings have the fragrancy,
The freshness of young flowers;
And lovely passions, changing oft,
So fill her, she appears
The image of themselves by turns,—
The idol of past years!

Of her bright face one glance will trace
A picture on the brain,
And of her voice in echoing hearts
A sound must long remain;
But memory, such as mine of her,
So very much endears,
When death is nigh, my latest sigh
Will not be life's but hers.

I fill this cup to one made up
Of loveliness alone,
A woman, of her gentle sex
The seeming paragon—
Her health! and would on earth there stood
Some more of such a frame,
That life might be all poetry,
And weariness a name.

It was the misfortune of Mr. Pinckney to have been born too far south. Had he been a New Englander, it is probable that he would have been ranked as the first of American lyrists, by that magnanimous cabal which has so long controlled the destinies of American Letters, in conducting the thing called "The North American Review." The poem just cited is especially beautiful; but the poetic elevation which it induces, we must refer chiefly to our sympathy in the poet's enthusiasm. We pardon his hyperboles for the evident earnestness with which they are uttered.

It was by no means my design, however, to expatiate upon the *merits* of

what I should read you. These will necessarily speak for themselves. Boccalini, in his "Advertisements from Parnassus," tells us that Zoilus once presented Apollo a very caustic criticism upon a very admirable book:—whereupon the god asked him for the beauties of the work. He replied that he only busied himself about the errors. On hearing this, Apollo, handing him a sack of unwinnowed wheat, bade him pick out *all the chaff* for his reward.

Now this fable answers very well as a hit at the critics—but I am by no means sure that the god was in the right. I am by no means certain that the true limits of the critical duty are not grossly misunderstood. Excellence, in a poem especially, may be considered in the light of an axiom, which need only be properly *put,* to become self-evident. It is *not* excellence if it require to be demonstrated as such:—and thus to point out too particularly the merits of a work of Art, is to admit that they are *not* merits altogether.

Among the "Melodies" of Thomas Moore is one whose distinguished character as a poem proper seems to have been singularly left out of view. I allude to his lines beginning—"Come, rest in this bosom." The intense energy of their expression is not surpassed by anything in Byron. There are two of the lines in which a sentiment is conveyed that embodies the *all in all* of the divine passion of love—a sentiment which, perhaps, has found its echo in more, and in more passionate, human hearts than any other single sentiment ever embodied in words:

> Come, rest in this bosom, my own stricken deer,
> Though the herd have fled from thee, thy home is still here;
> Here still is the smile, that no cloud can o'ercast,
> And a heart and a hand all thy own to the last.
>
> Oh! what was love made for, if 'tis not the same
> Through joy and through torment, through glory and shame?
> I know not, I ask not, if guilt's in that heart,
> I but know that I love thee, whatever thou art.
>
> Thou hast call'd me thy Angel in moments of bliss,
> And thy Angel I'll be, 'mid the horrors of this,—
> Through the furnace, unshrinking, thy steps to pursue,
> And shield thee, and save thee,—or perish there too!

It has been the fashion of late days to deny Moore imagination, while granting him fancy—a distinction originating with Coleridge—than whom no man more fully comprehended the great powers of Moore. The fact is, that the fancy of this poet so far predominates over all his other faculties, and over the fancy of all other men, as to have induced, very naturally, the idea that he is fanciful *only.* But never was there a greater mistake. Never was a grosser wrong done the fame of a true poet. In the compass of the English language I can call to mind no poem more profoundly—more weirdly *imaginative,* in the best sense,

1. **Boccalini**—Trajan Boccalini (1556-1613) published the *Advertisements from Parnassus* in 1612 14. **"Melodies"**—The *Irish Melodies* of Moore appeared at intervals from 1807 to 1835. 35. **distinction**—Poe refers to the famous distinction made by Coleridge in his *Biographia Literaria* (1817, 1847).

than the lines commencing—"I would I were by that dim lake"—which are the composition of Thomas Moore. I regret that I am unable to remember them.

One of the noblest—and, speaking of fancy, one of the most singularly fanciful of modern poets, was Thomas Hood. His "Fair Ines" had always for me an inexpressible charm:

O saw ye not fair Ines?
She's gone into the West,
To dazzle when the sun is down,
And rob the world of rest:
She took our daylight with her,
The smiles that we love best,
With morning blushes on her cheek,
And pearls upon her breast.

O turn again, fair Ines,
Before the fall of night,
For fear the Moon should shine alone,
And stars unrivall'd bright;
And blessed will the lover be
That walks beneath their light,
And breathes the love against thy cheek
I dare not even write!

Would I had been, fair Ines,
That gallant cavalier,
Who rode so gaily by thy side,
And whisper'd thee so near!
Were there no bonny dames at home,
Or no true lovers here,
That he should cross the seas to win
The dearest of the dear?

I saw thee, lovely Ines,
Descend along the shore,
With bands of noble gentlemen,
And banners wav'd before;
And gentle youth and maidens gay,
And snowy plumes they wore;
It would have been a beauteous dream,
If it had been no more!

Alas, alas, fair Ines,
She went away with song,

1. **"I would . . ."**—Poe's reference is to one of the later *Irish Melodies* beginning "I wish I was by that dim Lake," which may be found in the Oxford edition of Moore's *Poetical Works*, p. 226. 5. **Hood**—Thomas Hood (1799-1845), humorist and poet, of whom, after condemning his puns, Poe wrote in his *Marginalia* that he was *"distinctive* [in the] borderland between Fancy and Fantasy . . . he is never truly or purely imaginative for more than a paragraph at a time." 5. **"Fair Ines"**—The text of "Fair Ines" quoted by Poe follows closely that in *Poems* by Thomas Hood (London, 1846), with a few minor variations in punctuation. Curiously enough, neither "Fair Ines" nor "The Bridge of Sighs" was included in the *Poems* of Hood published by Putnam in New York in 1850.

With Music waiting on her steps,
And shoutings of the throng;
But some were sad, and felt no mirth,
But only Music's wrong,
In sounds that sang Farewell, Farewell,
To her you've loved so long.

Farewell, farewell, fair Ines,
That vessel never bore
So fair a lady on its deck,
Nor danced so light before,—
Alas for pleasure on the sea,
And sorrow on the shore!
The smile that blest one lover's heart
Has broken many more!

"The Haunted House," by the same author, is one of the truest poems ever written, one of the *truest,* one of the most unexceptionable, one of the most thoroughly artistic, both in its theme and in its execution. It is, moreover, powerfully ideal—imaginative. I regret that its length renders it unsuitable for the purposes of this Lecture. In place of it, permit me to offer the universally appreciated "Bridge of Sighs."

One more Unfortunate,
Weary of breath,
Rashly importunate,
Gone to her death!

Take her up tenderly,
Lift her with care;—
Fashion'd so slenderly,
Young, and so fair!

Look at her garments
Clinging like cerements;
Whilst the wave constantly
Drips from her clothing;
Take her up instantly,
Loving, not loathing—

Touch her not scornfully;
Think of her mournfully,
Gently and humanly;
Not of the stains of her,
All that remains of her
Now is pure womanly.

15. **"The Haunted House"**—a "Romance" in three parts, for which consult Hood's *Poems.*
19. **Lecture**—Poe delivered this essay, or the substance of it, as a lecture as early as 1848.
20. **"Bridge of Sighs"**—Poe omits Hood's motto for the poem: "Drown'd! Drown'd!"—HAMLET. In general he follows the text of Hood's *Poems* of 1846, though he does not keep all of Hood's stanzaic divisions, and there are minor variations in punctuation.

Make no deep scrutiny
Into her mutiny
Rash and undutiful;
Past all dishonor,
Death has left on her
Only the beautiful.

Still, for all slips of hers,
One of Eve's family—
Wipe those poor lips of hers
Oozing so clammily.
Loop up her tresses
Escaped from the comb,
Her fair auburn tresses;
Whilst wonderment guesses
Where was her home?

Who was her father?
Who was her mother?
Had she a sister?
Had she a brother?
Or was there a dearer one
Still, and a nearer one
Yet, than all other?

Alas! for the rarity
Of Christian charity
Under the sun!
Oh! it was pitiful!
Near a whole city full,
Home she had none.

Sisterly, brotherly,
Fatherly, motherly
Feelings had changed:
Love, by harsh evidence,
Thrown from its eminence;
Even God's providence
Seeming estranged.

Where the lamps quiver
So far in the river,
With many a light
From window and casement,
From garret to basement,
She stood, with amazement,
Houseless by night.

The bleak wind of March
Made her tremble and shiver;
But not the dark arch,
Or the black flowing river:

Mad from life's history,
Glad to death's mystery,
Swift to be hurl'd—
Anywhere, anywhere
Out of the world!

In she plunged boldly,
No matter how coldly
The rough river ran,—
Over the brink of it,
Picture it,—think of it,
Dissolute Man!
Lave in it, drink of it
Then, if you can!

Take her up tenderly,
Lift her with care,
Fashion'd so slenderly,
Young, and so fair!

Ere her limbs frigidly
Stiffen too rigidly,
Decently,—kindly,—
Smooth, and compose them;
And her eyes, close them,
Staring so blindly!

Dreadfully staring
Through muddy impurity,
As when with the daring
Last look of despairing
Fixed on futurity.

Perishing gloomily,
Spurred by contumely,
Cold inhumanity,
Burning insanity,
Into her rest,—
Cross her hands humbly,
As if praying dumbly,
Over her breast!
Owning her weakness,
Her evil behaviour,
And leaving, with meekness,
Her sins to her Savior!

The vigor of this poem is no less remarkable than its pathos. The versification, although carrying the fanciful to the very verge of the fantastic, is nevertheless admirably adapted to the wild insanity which is the thesis of the poem.

Among the minor poems of Lord Byron is one which has never received from the critics the praise which it undoubtedly deserves:

Though the day of my destiny's over,
And the star of my fate hath declined,
Thy soft heart refused to discover
The faults which so many could find;
Though thy soul with my grief was acquainted,
It shrunk not to share it with me,
And the love which my spirit hath painted
It never hath found but in *thee*.

Then when nature around me is smiling,
The last smile which answers to mine,
I do not believe it beguiling,
Because it reminds me of thine;
And when winds are at war with the ocean,
As the breasts I believed in with me,
If their billows excite an emotion,
It is that they bear me from *thee*.

Though the rock of my last hope is shivered,
And its fragments are sunk in the wave,
Though I feel that my soul is delivered
To pain—it shall not be its slave.
There is many a pang to pursue me:
They may crush, but they shall not contemn—
They may torture, but shall not subdue me—
'Tis of *thee* that I think—not of them.

Though human, thou didst not deceive me,
Though woman, thou didst not forsake,
Though loved, thou forborest to grieve me,
Though slandered, thou never couldst shake,—
Though trusted, thou didst not disclaim me,
Though parted, it was not to fly,
Though watchful, 'twas not to defame me,
Nor mute, that the world might belie.

Yet I blame not the world, nor despise it,
Nor the war of the many with one—
If my soul was not fitted to prize it,
'Twas folly not sooner to shun:
And if dearly that error hath cost me,
And more than I once could foresee,
I have found that whatever it lost me,
It could not deprive me of *thee*.

From the wreck of the past, which hath perished,
Thus much I at least may recall,

1. one—This poem of Byron's is the famous "Stanzas to Augusta" published in the *Prisoner of Chillon* volume (1816). Poe's text differs in capitalization and punctuation from the original.

It hath taught me that which I most cherished,
Deserved to be dearest of all:
In the desert a fountain is springing,
In the wide waste there still is a tree,
And a bird in the solitude singing,
Which speaks to my spirit of *thee.*

Although the rhythm here is one of the most difficult, the versification could scarcely be improved. No nobler *theme* ever engaged the pen of poet. It is the soul-elevating idea that no man can consider himself entitled to complain of Fate while, in his adversity, he still retains the unwavering love of woman.

From Alfred Tennyson—although in perfect sincerity I regard him as the noblest poet that ever lived—I have left myself time to cite only a very brief specimen. I call him, and *think* him the noblest of poets—*not* because the impressions he produces are at *all* times the most profound—*not* because the poetical excitement which he induces is at *all* times the most intense—but because it *is* at all times the most ethereal—in other words, the most elevating and most pure. No poet is so little of the earth, earthy. What I am about to read is from his last long poem, "The Princess":

Tears, idle tears, I know not what they mean,
Tears from the depth of some divine despair
Rise in the heart, and gather to the eyes,
In looking on the happy Autumn-fields,
And thinking of the days that are no more.

Fresh as the first beam glittering on a sail,
That brings our friends up from the underworld,
Sad as the last which reddens over one
That sinks with all we love below the verge;
So sad, so fresh, the days that are no more.

Ah, sad and strange as in dark summer dawns
The earliest pipe of half-awaken'd birds
To dying ears, when unto dying eyes
The casement slowly grows a glimmering square;
So sad, so strange, the days that are no more.

Dear as remember'd kisses after death,
And sweet as those by hopeless fancy feign'd
On lips that are for others; deep as love,
Deep as first love, and wild with all regret;
O Death in Life, the days that are no more.

Thus, although in a very cursory and imperfect manner, I have endeavoured to convey to you my conception of the Poetic Principle. It has been my purpose to suggest that, while this Principle itself is strictly and simply the Human

11. **Tennyson**—"The injustice done in America to the magnificent genius of Tennyson is one of the worst sins for which the country has to answer." (Poe in the *Broadway Journal,* July 19, 1845) Poe wrote much on Tennyson, for which see the index to the Virginia edition, under Tennyson. 18. **"The Princess"**—*The Princess* first appeared in 1847.

Aspiration for Supernal Beauty, the manifestation of the Principle is always found in *an elevating excitement of the Soul,* quite independent of that passion which is the intoxication of the Heart, or of that truth which is the satisfaction of the Reason. For in regard to Passion, alas! its tendency is to degrade rather than to elevate the Soul. Love, on the contrary—Love—the true, the divine Eros—the Uranian as distinguished from the Dionaean Venus—is unquestionably the purest and truest of all poetical themes. And in regard to Truth—if, to be sure, through the attainment of a truth we are led to perceive a harmony where none was apparent before, we experience at once the true poetical effect—but this effect is referable to the harmony alone, and not in the least degree to the truth which merely served to render the harmony manifest.

We shall reach, however, more immediately a distinct conception of what the true Poetry is, by mere reference to a few of the simple elements which induce in the Poet himself the true poetical effect. He recognizes the ambrosia which nourishes his soul, in the bright orbs that shine in Heaven—in the volutes of the flower—in the clustering of low shrubberies—in the waving of the grain-fields—in the slanting of tall Eastern trees—in the blue distance of mountains—in the grouping of clouds—in the twinkling of half-hidden brooks —in the gleaming of silver rivers—in the repose of sequestered lakes—in the star-mirroring depths of lonely wells. He perceives it in the songs of birds—in the harp of Aeolus—in the sighing of the night-wind—in the repining voice of the forest—in the surf that complains to the shore—in the fresh breath of the woods—in the scent of the violet—in the voluptuous perfume of the hyacinth—in the suggestive odor that comes to him at eventide from far-distant, undiscovered islands, over dim oceans, illimitable and unexplored. He owns it in all noble thoughts—in all unworldly motives—in all holy impulses—in all chivalrous, generous, and self-sacrificing deeds. He feels it in the beauty of woman—in the grace of her step—in the lustre of her eye—in the melody of her voice—in her soft laughter—in her sigh—in the harmony of the rustling of her robes. He deeply feels it in her winning endearments—in her burning enthusiasms—in her gentle charities—in her meek and devotional endurances—but above all—ah, far above all—he kneels to it, he worships it in the faith, in the purity, in the strength, in the altogether divine majesty—of her *love.*

Let me conclude by the recitation of yet another brief poem—one very different in character from any that I have before quoted. It is by Motherwell, and is called "The Song of the Cavalier." With our modern and altogether rational ideas of the absurdity and impiety of warfare, we are not precisely in that frame of mind best adapted to sympathize with the sentiments, and thus to appreciate the real excellence of the poem. To do this fully we must identify ourselves in fancy with the soul of the old cavalier.

6. Eros—Cupid as a type of celestial love. **6. Uranian . . . Dionaean**—Uranian means celestial, and Poe apparently desires to oppose Dionaean to it in the sense of earthly. As Dione was the mother of Venus, his mythology is not accurate. The student will note that this passage is the theme of "Ulalume." **17. volutes**—convolutions. **18. Eastern**—The reference, if any, is obscure. **22. harp of Aeolus**—The Aeolian harp, wind-stirred, came to be a standard type of spontaneous music and poetry with the romantic writers. **36. Motherwell**—William Motherwell (1797-1829), the Scotch poet. In *The Poetical Works of William Motherwell* published in Boston in 1847 this poem appears as "The Cavalier's Song." Poe quotes the second stanza only.

Then mount! then mount, brave gallants, all,
And don your helmes amaine:
Deathe's couriers, Fame and Honour, call
Us to the field againe.
No shrewish teares shall fill our eye
When the sword-hilt's in our hand,—
Heart-whole we'll part, and no whit sighe
For the fayrest of the land;
Let piping swaine, and craven wight,
Thus weepe and puling crye,
Our business is like men to fight,
And hero-like to die!

MELLONTA TAUTA

"Mellonta Tauta" ("Those Things That Are to Be") first appeared in *Godey's Lady's Book* for February, 1849, and was reprinted with minor variations of the text by Griswold. The magazine text is here followed. Poe later reprinted a large portion of "Mellonta Tauta" in his *Eureka*. The selection is important because it illustrates so large a number of Poe's interests and crotchets—the scientific hoax, the pretense at metaphysical omniscience, the interest in astronomy, social criticism, and a certain cruel rapidity of thought and style characteristic of his later work.

To the Editor of the Lady's Book:

I have the honor of sending you, for your magazine, an article which I hope you will be able to comprehend rather more distinctly than I do myself. It is a translation, by my friend Martin Van Buren Mavis (sometimes called the "Poughkeepsie Seer,") of an odd-looking MS. which I found, about a year ago, tightly corked up in a jug floating in the *Mare Tenebrarum*—a sea well described by the Nubian geographer, but seldom visited, now-a-days, except by the transcendentalists and divers for crotchets.

Very Truly,
EDGAR A. POE

ON BOARD BALLOON "SKYLARK,"
April 1, 2848;

Now, my dear friend—now, for your sins, you are to suffer the infliction of a long gossiping letter. I tell you distinctly that I am going to punish you for

16. Martin Van Buren—In 1848 Martin Van Buren, to the horror of Southern Democrats, was nominated for the Presidency on the Free Soil ticket. His home (Lindenwald) in Columbia County, New York, was not far from Poughkeepsie. Why "Mavis," does not appear. **18-19. Mare . . . Nubian geographer**—In *Eureka* Poe identifies the "Nubian geographer" with Ptolemy Hephestion—an error for Claudius Ptolemaeus, whose *Guide to Geography* is in question. Hostile to Boston, Poe ironically thinks that the transcendentalists sail on a "Sea of Shadows" (Mare Tenebrarum); but the great index to Ptolemy's *Geography* prepared by Joseph Moletius (Venice, 1562) fails to reveal any Mare Tenebrarum in the book. **23. Balloon**—The thirties and forties of the last century saw much interest in the possibilities of balloons for scientific and transportation purposes. Poe's imagination was enkindled; among other evidences of his interest are "The Unparalleled Adventure of One Hans Pfaall" (*Southern Literary Messenger*, June, 1835), and "The Balloon Hoax" (New York *Sun*, Apr. 13, 1844), which may be read in the collected works. **25. Now**—It will make for the comfort of the student to realize that this letter is by "Pundita," presumably the wife of the "Pundit" frequently referred to.

all your impertinences by being as tedious, as discursive, as incoherent, and as unsatisfactory as possible. Besides, here I am, cooped in a dirty balloon, with some one or two hundred of the *canaille,* all bound on a *pleasure* excursion, (what a funny idea some people have of pleasure!) and I have no prospect of touching *terra firma* for a month at least. Nobody to talk to. Nothing to do. When one has nothing to do, then is the time to correspond with one's friends. You perceive, then, why it is that I write you this letter—it is on account of my *ennui* and your sins.

Get ready your spectacles and make up your mind to be annoyed. I mean to write at you every day during this odious voyage.

Heigho! when will any *Invention* visit the human pericranium? Are we forever to be doomed to the thousand inconveniences of the balloon? Will *nobody* contrive a more expeditious mode of progress? This jog-trot movement, to my thinking, is little less than positive torture. Upon my word we have not made more than a hundred miles the hour since leaving home! The very birds beat us—at least some of them. I assure you that I do not exaggerate at all. Our motion, no doubt, seems slower than it actually is—this on account of our having no objects about us by which to estimate our velocity, and on account of our going *with* the wind. To be sure, whenever we meet a balloon we have a chance of perceiving our rate, and then, I admit, things do not appear so very bad. Accustomed as I am to this mode of traveling, I cannot get over a kind of giddiness whenever a balloon passes us in a current directly overhead. It always seems to me like an immense bird of prey about to pounce upon us and carry us off in its claws. One went over us this morning about sunrise, and so nearly overhead that its drag rope actually brushed the net-work suspending our car, and caused us very serious apprehension. Our captain said that if the material of the bag had been the trumpery varnished "silk" of five hundred or a thousand years ago, we should inevitably have been damaged. This silk, as he explained it to me, was a fabric composed of the entrails of a species of earth-worm. The worm was carefully fed on mulberries—a kind of fruit resembling a water-melon—and, when sufficiently fat, was crushed in a mill. The paste thus arising was called *papyrus* in its primary state, and went through a variety of processes until it finally became "silk." Singular to relate, it was once much admired as an article of *female dress!* Balloons were also very generally constructed from it. A better kind of material, it appears, was subsequently found in the down surrounding the seed-vessels of a plant vulgarly called *euphorbium,* and at that time botanically termed milkweed. This latter kind of silk was designated as silk-buckingham, on account of its su-

3. canaille—vulgar crowd. **5. terra firma**—solid ground. **5. month**—If the balloon goes at the rate of 100 miles an hour (and there is no evidence in the story that it ever stops), Pundita's pleasure excursion is to consist of circumnavigating the earth three times in a month! Poe's mathematics does not agree with the geography of his story. **25. drag rope**—The use of the drag rope as a means of checking or increasing the rate at which a balloon might travel was in 1849 a relatively recent discovery of Charles Green's (1785-1870), famous for the "Nassau balloon." **30-31. mulberries . . . water-melon**—Poe deliberately introduces confusions of this sort into his narrative for verisimilitude. The entire description of silk-making is purposely inaccurate. **38. silk-buckingham**—a vague hit at James Silk Buckingham (1786-1855), a writer of voluminous—and tedious—travel books; an *Outline Sketch of the Voyages, Travels, Writings and Public Labours of James Silk Buckingham* appeared in 1848.

perior durability, and was usually prepared for use by being varnished with a solution of gum caoutchouc—a substance which in some respects must have resembled the *gutta percha* now in common use. This caoutchouc was occasionally called India rubber or rubber of whist, and was no doubt one of the numerous *fungi.* Never tell me again that I am not at heart an antiquarian.

Talking of drag-ropes our own, it seems, has this moment knocked a man overboard from one of the small magnetic propellers that swarm in ocean below us—a boat of about six thousand tons, and, from all accounts, shamefully crowded. These diminutive barques should be prohibited from carrying more than a definite number of passengers. The man, of course, was not permitted to get on board again, and was soon out of sight, he and his life-preserver. I rejoice, my dear friend, that we live in an age so enlightened that no such thing as an individual is supposed to exist. It is the mass for which the true Humanity cares. By the by, talking of Humanity, do you know that our immortal Wiggins is not so original in his views of the Social Condition and so forth, as his contemporaries are inclined to suppose? Pundit assures me that the same ideas were put, nearly in the same way, about a thousand years ago, by an Irish philosopher called Furrier, on account of his keeping a retail shop for cat-peltries and other furs. Pundit *knows,* you know; there can be no mistake about it. How very wonderfully do we see verified, every day, the profound observation of the Hindoo Aries Tottle (as quoted by Pundit)—"Thus must we say that, not once or twice, or a few times, but with almost infinite repetitions, the same opinions come round in a circle among men."

April 2.—Spoke to-day the magnetic cutter in charge of the middle section of floating telegraph wires. I learn that when this species of telegraph was first put into operation by Horse, it was considered quite impossible to convey the wires over sea; but now we are at a loss to comprehend where the difficulty lay! So wags the world. *Tempora mutantur*—excuse me for quoting the Etruscan. What *would* we do without the Atalantic telegraph? (Pundit says Atlantic was the ancient adjective.) We lay to a few minutes to ask the cutter some questions, and learned, among other glorious news, that civil war

2-5. gum caoutchouc . . . fungi—The flourish of botanic names here is intended purely for humor and to "show up" antiquarianism. "Gum caoutchouc," from which rubber is made, is not a fungus. The punning play on "India rubber—rubber of whist" is typical of much of the humor of the forties. **7. magnetic propellers**—The phrase need not be taken very seriously. It is, however, interesting to note that the first large ship to be built with a propeller, the *Great Britain,* was constructed only in 1844, her tonnage being 3,448. Poe's **boat of about six thousand** tons and **small magnetic propellers** are therefore quasi-humorous. **14. Humanity**—Under the influence of Fourier, Saint-Simon, the transcendentalists, and other reformatory groups, the word **Humanity** was much bandied about in the forties—to Poe's sardonic disgust. **18. Furrier**—François Charles Marie Fourier (1772-1837) advocated a reorganization of society into units (phalanges), each to be economically self-sufficient (phalanstery) in line with the principles of "social harmony." (Note Poe's hit at cats.) **21. Aries Tottle**—Aristotle. **25. floating telegraph wires**—The first electric telegraph was opened between Baltimore and Washington in 1844. Despite experiments by Morse in 1842 with submarine cables, the principle of insulating telegraph wires was not well known, a submarine cable (between England and France) not being laid until after "Mellonta Tauta" was published—that is, not until 1850. **26. Horse**—S. F. B. Morse (1791-1872), inventor of the electric telegraph. **28-29. Tempora mutantur . . . Etruscan**—"Times change." Part of a line reading *"Tempora mutantur et nos mutamur in illis"*—a variant of *"Omnia mutantur nos et mutamur illis,"* from Matthias Borbonius, *Deliciae Poetarum Germanorum,* Vol. I, p. 685. Poe follows a common error in attributing the line to Virgil (the Etruscan).

is raging in Africa, while the plague is doing its good work beautifully both in Yurope and Ayesher. Is it not truly remarked that, before the magnificent light shed upon philosophy by Humanity, the world was accustomed to regard War and Pestilence as calamities? Do you know that prayers were actually offered up in the ancient temples to the end that these *evils*(!) might not be visited upon mankind? Is it not really difficult to comprehend upon what principle of interest our forefathers acted? Were they so blind as not to perceive that the destruction of a myriad of individuals is only so much positive advantage to the mass!

April 3.—It is really a very fine amusement to ascend the rope-ladder leading to the summit of the balloon-bag and thence survey the surrounding world. From the car below, you know, the prospect is not so comprehensive—you can see little vertically. But seated here (where I write this) in the luxuriously-cushioned open piazza of the summit, one can see everything that is going on in all directions. Just now, there is quite a crowd of balloons in sight, and they present a very animated appearance, while the air is resonant with the hum of so many millions of human voices. I have heard it asserted that when Yellow or (as Pundit *will* have it) Violet, who is supposed to have been the first aeronaut, maintained the practicability of traversing the atmosphere in all directions, by merely ascending or descending until a favorable current was attained, he was scarcely hearkened to at all by his contemporaries, who looked upon him as merely an ingenious sort of madman, because the philosophers (?) of the day declared the thing impossible. Really now it does seem to me *quite* unaccountable how anything so obviously feasible could have escaped the sagacity of the ancient *savans*. But in all ages the great obstacles to advancement in Art have been opposed by the so-called men of science. To be sure, *our* men of science are not quite so bigoted as those of old:—oh, I have something *so* queer to tell you on this topic. Do you know that it is not more than a thousand years ago since the metaphysicians consented to relieve the people of the singular fancy that there existed but *two possible roads for the attainment of Truth!* Believe it if you can! It appears that long, long ago, in the night of Time, there lived a Turkish philosopher (or Hindoo possibly) called Aries Tottle. This person introduced, or at all events propagated what was termed the deductive or *à priori* mode of investigation. He started with what he maintained to be *axioms* or "self-evident truths," and thence proceeded "logically" to results. His greatest disciples were one Neuclid and one Cant. Well, Aries Tottle flourished supreme until the advent of one Hog, surnamed the "Ettrick Shepherd," who preached an entirely different system, which he

2. Yurope . . . Ayesher—Europe, Asia. **14. open piazza**—Motion at the rate of 100 miles an hour would, of course, make an "open piazza" impossible. **18. Violet**—Poe's reference is confused. The first human being to ascend in a balloon was Jean François Pilâtre de Rozier (1756-1785), who in 1783 had as companion Girond de Villette—apparently Poe's "Violet." **30. two possible roads**—The value of Poe's attempt at a theory of knowledge midway between his (oversimplified) versions of Aristotle and Bacon is much in dispute, the weight of opinion inclining to dismiss Poe's as charlatanism. The development of relativity, however, has caused a rise in Poe's stock as a theorizer. **36. Neuclid**—Euclid, who, however, died when Aristotle was ten years old. **36. Cant**—Immanuel Kant, greatest of German metaphysicians (1724-1804). **37. Hog**—Pundita confuses Francis Bacon (1561-1626) with James Hogg the poet (1772-1835), known as the "Ettrick Shepherd."

called the *à posteriori* or *in*ductive. His plan referred altogether to Sensation. He proceeded by observing, analyzing and classifying facts—*instantiae naturae,* as they were affectedly called—into general laws. Aries Tottle's mode, in a word, was based on *noumena;* Hog's on *phenomena.* Well, so great was the admiration excited by this latter system that, at its first introduction, Aries Tottle fell into disrepute; but finally he recovered ground, and was permitted to divide the realm of Truth with his more modern rival. The *savans* now maintained that the Aristotelian and *Baconian* roads were the sole possible avenues to knowledge. "Baconian," you must know, was an adjective invented as equivalent to Hog-ian and more euphonious and dignified.

Now, my dear friend, I do assure you, most positively, that I represent this matter fairly, on the soundest authority; and you can easily understand how a notion so absurd on its very face must have operated to retard the progress of all true knowledge—which makes its advances almost invariably by intuitive bounds. The ancient idea confined investigation to *crawling;* and for hundreds of years so great was the infatuation about Hog especially, that a virtual end was put to all thinking properly so called. No man dared utter a truth to which he felt himself indebted to his *Soul* alone. It mattered not whether the truth was even *demonstrably* a truth, for the bullet-headed *savans* of the time regarded only *the road* by which he had attained it. They would not even *look* at the end. "Let us see the means," they cried, "the means!" If, upon investigation of the means, it was found to come neither under the category of Aries (that is to say Ram) nor under the category Hog, why then the savans went no farther, but pronounced the "theorist" a fool, and would have nothing to do with him or his truth.

Now, it cannot be maintained, even, that by the crawling system the greatest amount of truth would be attained in any long series of ages, for the repression of *imagination* was an evil not to be compensated for by any superior *certainty* in the ancient modes of investigation. The error of these Jurmains, these Vrinch, these Inglitch and these Amriccans, (the latter, by the way, were our own immediate progenitors,) was an error quite analogous with that of the wiseacre who fancies that he must necessarily see an object the better the more closely he holds it to his eyes. These people blinded themselves by details. When they proceeded Hoggishly, their "facts" were by no means always facts—a matter of little consequence had it not been for assuming that they *were* facts and must be facts because they appeared to be such. When they proceeded on the path of the Ram, their course was scarcely as straight as a ram's horn, for they *never had* an axiom which was an axiom at all. They must have been very blind not to see this, even in their own day; for even in their own day many of the long "established" axioms had been rejected. For

1. **Sensation**—that is, data of the senses. Poe, however, is unfair to Bacon. 2. **instantiae naturae**—natural instances; but Bacon's phrase in the *Novum Organon* is *"instantiae prerogativae"*—prerogative [that is, governing] instances. 4. **noumena . . . phenomena**—On the difference between these terms the student should consult an unabridged dictionary. 22-23. **Aries . . . Ram**—The play on words refers to the signs of the zodiac. 29. **Jurmains**—The Germans in the first half of the nineteenth century were leading theorists in speculative philosophy. The French ("Vrinch") metaphysicians like Cousin, the English, and the Americans were more or less indebted to German transcendentalism.

example—*"Ex nihilo nihil fit;"* "a body cannot act where it is not;" "there cannot exist antipodes;" "darkness cannot come out of light"—all these, and a dozen other similar propositions, formerly admitted without hesitation as axioms, were, even at the period of which I speak, seen to be untenable. How absurd in these people, then, to persist in putting faith in "axioms" as immutable bases of Truth! But even out of the mouths of their soundest reasoners it is easy to demonstrate the futility, the impalpability of their axioms in general. Who *was* the soundest of their logicians? Let me see! I will go and ask Pundit and be back in a minute. . . . Ah, here we have it! Here is a book written nearly a thousand years ago and lately translated from the Inglitch—which, by the way, appears to have been the rudiments of the American. Pundit says it is decidedly the cleverest ancient work on its topic, Logic. The author (who was much thought of in his day) was one Miller, or Mill; and we find it recorded of him, as a point of some importance, that he had a mill-horse called Bentham. But let us glance at the treatise!

Ah!—"Ability or inability to conceive," says Mr. Mill, very properly, "is in no case to be received as a criterion of axiomatic truth." What *modern* in his senses would ever think of disputing this truism? The only wonder with us must be, how it happened that Mr. Mill conceived it necessary even to hint at any thing so obvious. So far good—but let us turn over another page. What have we here?—"Contradictories cannot both be true—that is, cannot co-exist in nature." Here Mr. Mill means, for example, that a tree must be either a tree or not a tree—that it cannot be at the same time a tree and not a tree. Very well; but I ask him *why*. His reply is this—and never pretends to be any thing else than this—"Because it is impossible to conceive that contradictories can both be true." But this is no answer at all, by his own showing; for has he not just admitted as a truism that "ability or inability to conceive is *in no case* to be received as a criterion of axiomatic truth."

Now I do not complain of these ancients so much because their logic is, by their own showing, utterly baseless, worthless and fantastic altogether, as because of their pompous and imbecile proscription of all *other* roads of truth, of all *other* means for its attainment than the two preposterous paths—the one of creeping and the one of crawling—to which they have dared to confine the Soul that loves nothing so well as to *soar*.

By the by, my dear friend, do you not think it would have puzzled these ancient dogmaticians to have determined by *which* of their two roads it was that the most important and most sublime of *all* their truths was, in effect, attained? I mean the truth of Gravitation. Newton owed it to Kepler. Kepler admitted that his three laws were *guessed at*—these three laws of all laws which led the great Inglitch mathematician to his principle, the basis of all physical principle—to go behind which we must enter the Kingdom of Metaphysics.

1. **"Ex nihilo . . . fit"**—"Nothing can be created from nothing." 13. **Miller, or Mill**—In 1843 John Stuart Mill (1806-1873) published *A System of Logic, Ratiocinative and Inductive*, 2 vols., generally regarded as the best theoretic presentation of the basis of nineteenth-century inductive science. 15. **Bentham**—Mill represented the second phase of utilitarian thought, largely shaped in modern times by Jeremy Bentham (1748-1832), and representative of Baconian methodology. 16. **Ability**—For Mill's discussion of axioms see Bk. II of the *Logic*, especially Chaps. V-VII. Poe is not fair to Mill. 38. **Kepler**—See note 22, p. 480.

Kepler guessed—that is to say, *imagined*. He was essentially a "theorist"—that word now of so much sanctity, formerly an epithet of contempt. Would it not have puzzled these old moles, too, to have explained by which of the two "roads" a cryptographist unriddles a cryptograph of more than usual secrecy, or by which of the two roads Champollion directed mankind to those enduring and almost innumerable truths which resulted from his deciphering the Hieroglyphics?

One word more on this topic and I will be done boring you. Is it not *passing* strange that, with their eternal prating about *roads* to Truth, these bigoted people missed what we now so clearly perceive to be the great highway—that of Consistency? Does it not seem singular how they should have failed to deduce from the works of God the vital fact that a perfect consistency *must be* an absolute truth! How plain has been our progress since the late announcement of this proposition! Investigation has been taken out of the hands of the ground-moles and given, as a task, to the true and only true thinkers, the men of ardent imagination. These latter *theorize.* Can you not fancy the shout of scorn with which my words would be received by our progenitors were it possible for them to be now looking over my shoulder? These men, I say, *theorize;* and their theories are simply corrected, reduced, systematized—cleared, little by little, of their dross of inconsistency—until, finally, a perfect consistency stands apparent which even the most stolid admit, because it *is* a consistency, to be an absolute and an unquestionable *truth.*

April 4.—The new gas is doing wonders, in conjunction with the new improvement in gutta percha. How very safe, commodious, manageable, and in every respect convenient are our modern balloons! Here is an immense one approaching us at the rate of at least a hundred and fifty miles an hour. It seems to be crowded with people—perhaps there are three or four hundred passengers—and yet it soars to an elevation of nearly a mile, looking down upon poor us with sovereign contempt. Still a hundred or even two hundred miles an hour is slow traveling, after all. *Do* you remember our flight on the railroad across the Kanadaw continent?—fully three hundred miles the hour—*that* was traveling. Nothing to be seen, though—nothing to be done but flirt, feast and dance in the magnificent saloons. Do you remember what an odd sensation was experienced when, by chance, we caught a glimpse of external objects while the cars were in full flight? Everything seemed unique—in one mass. For my part, I cannot say but that I preferred the traveling by the slow train of a hundred miles the hour. Here we were permitted to have glass windows—even to have them open—and something like a distinct view of the country was attainable. . . . Pundit says that *the route* for the great Kanadaw railroad must have been in some measure marked out about nine hundred

4. cryptographist—Poe prided himself on his ability to decipher secret messages. But in "The Gold Bug" is an instance of almost strict deductive logic in the solution of a cryptogram. **5. Champollion**—Jean François Champollion (1790-1832) first deciphered an important passage in Egyptian hieroglyphics in 1821. American magazines in Poe's lifetime were filled with references to the new science of Egyptology. **31. Kanadaw**—In 2848 Kanadaw has apparently replaced American as a continental adjective. **33. saloons**—salons. *Cf.* the saloon of a modern steamship. **39. route**—In 1845 Asa Whitney laid before Congress the first plan presented to that body for building a transcontinental railroad, but the route was still under debate when Poe wrote.

years ago! In fact, he goes so far as to assert that actual traces of a road are still discernible—traces referable to a period quite as remote as that mentioned. The track, it appears, was *double* only; ours, you know, has twelve paths; and three or four new ones are in preparation. The ancient rails were very slight, and placed so close together as to be, according to modern notions, quite frivolous, if not dangerous in the extreme. The present width of track—fifty feet—is considered, indeed, scarcely secure enough. For my part, I make no doubt that a track of some sort *must* have existed in very remote times, as Pundit asserts; for nothing can be clearer, to my mind, than that, at some period—not less than seven centuries ago, certainly—the Northern and Southern Kanadaw continents were *united;* the Kanawdians, then, would have been driven, by necessity, to a great railroad across the continent.

April 5.—I am almost devoured by *ennui.* Pundit is the only conversible person on board; and he, poor soul! can speak of nothing but antiquities. He has been occupied all the day in the attempt to convince me that the ancient Amricans *governed themselves!*—did ever anybody hear of such an absurdity?—that they existed in a sort of every-man-for-himself confederacy, after the fashion of the "prairie dogs" that we read of in fable. He says that they started with the queerest idea conceivable, viz: that all men are born free and equal—this in the very teeth of the laws of *gradation* so visibly impressed upon all things both in the moral and physical universe. Every man "voted," as they called it—that is to say, meddled with public affairs—until, at length, it was discovered that what is everybody's business is nobody's, and that the "Republic" (so the absurd thing was called) was without a government at all. It is related, however, that the first circumstance which disturbed, very particularly, the self-complacency of the philosophers who constructed this "Republic," was the startling discovery that universal suffrage gave opportunity for fraudulent schemes, by means of which any desired number of votes might at any time be polled, without the possibility of prevention or even detection, by any party which should be merely villainous enough not to be ashamed of the fraud. A little reflection upon this discovery sufficed to render evident the consequences, which were that rascality *must* predominate—in a word, that a republican government *could* never be anything but a rascally one. While the philosophers, however, were busied in blushing at their stupidity in not having foreseen these inevitable evils, and intent upon the invention of new theories, the matter was put to an abrupt issue by a fellow of the name of *Mob,* who took everything into his own hands and set up a despotism, in comparison with which those of the fabulous Zeros and Hellofagabaluses were respectable and delectable. This Mob (a foreigner, by the by), is said to have been the most odious of all men that ever encumbered the earth. He was a giant in stature—insolent, rapacious, filthy; had the gall of a bullock with the heart of an hyena and the brains of a peacock. He died, at length, by dint of his own energies, which exhausted him. Nevertheless, he had his uses, as everything has, however vile, and taught mankind a lesson which to this day it is in no danger of forgetting—never to run directly contrary to the natural analogies.

38. Zeros . . . Hellofagabaluses—Nero; Heliogabalus. **39. foreigner**—a hit at the American fallacy that foreign-born residents are responsible for lawlessness.

As for Republicanism, no analogy could be found for it upon the face of the earth—unless we except the case of the "prairie dogs," an exception which seems to demonstrate, if anything, that democracy is a very admirable form of government—for dogs.

April 6.—Last night had a fine view of Alpha Lyrae, whose disk, through our captain's spy-glass, subtends an angle of half a degree, looking very much as our sun does to the naked eye on a misty day. Alpha Lyrae, although so *very* much larger than our sun, by the by, resembles him closely as regards its spots, its atmosphere, and in many other particulars. It is only within the last century, Pundit tells me, that the binary relation existing between these two orbs began even to be suspected. The evident motion of our system in the heavens was (strange to say!) referred to an orbit about a prodigious star in the centre of the galaxy. About this star, or at all events about a centre of gravity common to all the globes of the Milky Way and supposed to be near Alcyone in the Pleiades, every one of these globes was declared to be revolving, our own performing the circuit in a period of 117,000,000 of years! *We,* with our present lights, our vast telescopic improvements and so forth, of course find it difficult to comprehend *the ground* of an idea such as this. Its first propagator was one Mudler. He was led, we must presume, to this wild hypothesis by mere analogy in the first instance; but, this being the case, he should have at least adhered to analogy in its development. A great central orb *was,* in fact, suggested; so far Mudler was consistent. This central orb, however, dynamically, should have been greater than all its surrounding orbs taken together. The question might then have been asked—"Why do we not see it?"—*we,* especially, who occupy the mid region of the cluster—the very locality *near* which, at least, must be situated this inconceivable central sun. The astronomer, perhaps, at this point, took refuge in the suggestion of non-luminosity; and here analogy was suddenly let fall. But even admitting the central orb non-luminous, how did he manage to explain its failure to be rendered visible by the incalculable host of glorious suns glaring in all directions about it? No doubt what he finally maintained was merely a centre of gravity common to all the revolving orbs—but here again analogy must have been let fall. Our system revolves, it is true, about a common centre of gravity, but it does this in connection with and in consequence of a material sun whose mass more than counterbalances the rest of the system. The mathematical circle is a curve composed of an infinity of straight lines; but this idea of the circle—this idea of it which, in regard to all earthly geometry, we consider as merely the mathematical, in contradistinction from the practical, idea—is, in sober fact, the *practical* conception which alone we have any right to entertain in respect to those Titanic circles with which we have to deal, at least in fancy, when we suppose our system, with its fellows, revolving about a point in the centre of the galaxy. Let the most vigorous of human imaginations but

1. **Republicanism**—the form of government, not the party (yet unborn). 5. **Alpha Lyrae**—Vega, the fourth brightest star in the sky. But under the most powerful modern telescopes no star is ever more than a point of light. Poe's description is entirely fanciful. 10. **binary relation**—Poe's fancy rests upon two truths: (1) The constellation of the Lyre contains two famous binary (double) stars; (2) the whole solar system is supposed to be moving in the direction of this constellation. 19. **Mudler**—What astronomer Poe has in mind is not clear.

attempt to take a single step towards the comprehension of a circuit so unutterable! It would scarcely be paradoxical to say that a flash of lightning itself, traveling *forever* upon the circumference of this inconceivable circle, would still *forever* be traveling in a straight line. That the path of our sun along such a circumference—that the direction of our system in such an orbit—would, to any human perception, deviate in the slightest degree from a straight line even in a million of years, is a proposition not to be entertained; and yet these ancient astronomers were absolutely cajoled, it appears, into believing that a decisive curvature had become apparent during the brief period of their astronomical history—during the mere point—during the utter nothingness of two or three thousand years! How incomprehensible, that considerations such as this did not at once indicate to them the true state of affairs—that of the binary revolution of our sun and Alpha Lyrae around a common centre of gravity!

April 7.—Continued last night our astronomical amusements. Had a fine view of the five Nepturian asteroids, and watched with much interest the putting up of a huge impost on a couple of lintels in the new temple at Daphnis in the moon. It was amusing to think that creatures so diminutive as the lunarians, and bearing so little resemblance to humanity, yet evinced a mechanical ingenuity so much superior to our own. One finds it difficult, too, to conceive the vast masses which these handle so easily, to be as light as our reason tells us they actually are.

April 8.—Eureka! Pundit is in his glory. A balloon from Kanadaw spoke us to-day and threw on board several late papers: they contain some exceedingly curious information relative to Kanawdian or rather to Amriccan antiquities. You know, I presume, that laborers have for some months been employed in preparing the ground for a new fountain at Paradise, the emperor's principal pleasure garden. Paradise, it appears, has been, *literally* speaking, an island time out of mind—that is to say, its northern boundary was always (as far back as any records extend) a rivulet, or rather a very narrow arm of the sea. This arm was gradually widened until it attained its present breadth—a mile. The whole length of the island is nine miles; the breadth varies materially. The entire area (so Pundit says) was, about eight hundred years ago, densely packed with houses, some of them twenty stories high; land (for some most unaccountable reason) being considered as specially precious just in this vicinity. The disastrous earthquake, however, of the year 2050, so totally uprooted and overwhelmed the town (for it was almost too large to be called a village) that the most indefatigable of our antiquarians have never yet been able to obtain from the site any sufficient data (in the shape of coins, medals or inscriptions) wherewith to build up even the ghost of a theory concerning the manners, customs, &c. &c., of the aboriginal inhabitants. Nearly all that we have hitherto known of them is, that they were a portion of the Knickerbocker tribe of savages infesting the continent at its first discovery by Recorder Riker, a knight of the Golden Fleece. They were by no means uncivilized,

15. **Nepturian asteroids**—The Nepturian asteroids are entirely fanciful. 20. **masses . . . easily**—because of the lesser pull of gravity upon the moon, a much smaller body than the earth. 26. **Paradise**—Manhattan Island. 43. **Riker**—Richard Riker (1773-1842), who served many years as Recorder of the City of New York.

however, but cultivated various arts and even sciences after a fashion of their own. It is related of them that they were acute in many respects, but were oddly afflicted with a monomania for building what, in the ancient Amriccan, was denominated "churches"—a kind of pagoda instituted for the worship of two idols that went by the names of Wealth and Fashion. In the end, it is said, the island became, nine-tenths of it, church. The women, too, it appears, were oddly deformed by a natural protuberance of the region just below the small of the back—although, most unaccountably, this deformity was looked upon altogether in the light of a beauty. One or two pictures of these singular women have, in fact, been miraculously preserved. They look very odd, *very*—like something between a turkey-cock and a dromedary.

Well, these few details are nearly all that have descended to us respecting the ancient Knickerbockers. It seems, however, that while digging in the centre of the emperor's garden (which, you know, covers the whole island,) some of the workmen unearthed a cubical and evidently chiseled block of granite, weighing several hundred pounds. It was in good preservation, having received, apparently, little injury from the convulsion which entombed it. On one of its surfaces was a marble slab with (only think of it!) *an inscription—a legible inscription*. Pundit is in ecstasies. Upon detaching the slab, a cavity appeared, containing a leaden box filled with various coins, a long scroll of names, several documents which appear to resemble newspapers, with other matters of intense interest to the antiquarian! There can be no doubt that all these are genuine Amriccan relics belonging to the tribe called Knickerbocker. The papers thrown on board our balloon are filled with fac-similes of the coins, MSS., typography, &c. &c. I copy for your amusement the Knickerbocker inscription on the marble slab:—

THIS CORNER STONE OF A MONUMENT TO THE
MEMORY OF
GEORGE WASHINGTON,
WAS LAID WITH APPROPRIATE CEREMONIES ON THE
19TH DAY OF OCTOBER, 1847,
THE ANNIVERSARY OF THE SURRENDER OF
LORD CORNWALLIS
TO GENERAL WASHINGTON AT YORKTOWN,
A.D. 1781,
UNDER THE AUSPICES OF THE
WASHINGTON MONUMENT ASSOCIATION OF THE
CITY OF NEW YORK.

This, as I give it, is a verbatim translation done by Pundit himself, so there *can* be no mistake about it. From the few words thus preserved, we glean several important items of knowledge, not the least interesting of which is the fact that a thousand years ago *actual* monuments had fallen into disuse—as was all very proper—the people contenting themselves, as we do now, with a mere

7. **protuberance**—the bustle. 15. **granite**—For a picture of the proposed monument to Washington here satirized by Poe, see J. G. Wilson, *Memorial History of the City of New York*, 1893, Vol. III, p. 409. It was planned for Hamilton Square.

indication of the design to erect a monument at some future time; a corner-stone being cautiously laid by itself "solitary and alone" (excuse me for quoting the great Amriccan poet Benton!) as a guarantee of the magnanimous *intention*. We ascertain, too, very distinctly, from this admirable inscription, the how, as well as the where and the what, of the great surrender in question. As to the *where*, it was Yorktown (wherever that was), and as to the *what*, it was General Cornwallis (no doubt some wealthy dealer in corn). *He* was surrendered. The inscription commemorates the surrender of—what?—why, "of Lord Cornwallis." The only question is what could the savages wish him surrendered for. But when we remember that these savages were undoubtedly cannibals, we are led to the conclusion that they intended him for sausage. As to the *how* of the surrender, no language can be more explicit. Lord Cornwallis was surrendered (for sausage) "under the auspices of the Washington Monument Association"—no doubt a charitable institution for the depositing of corner-stones.—But Heaven bless me! what is the matter? Ah! I see—the balloon has collapsed, and we shall have a tumble into the sea. I have, therefore, only time enough to add that, from a hasty inspection of fac-similes of newspapers, &c., I find that *the* great men in those days among the Amriccans were one John, a smith, and one Zacchary, a tailor.

Good bye, until I see you again. Whether you ever get this letter or not is a point of little importance, as I write altogether for my own amusement. I shall cork the MS. up in a bottle however, and throw it into the sea.

Yours everlastingly,

PUNDITA

19. **smith . . . Zacchary**—John Smith was apparently some mediocrity who came under Poe's eye in New York. In 1848 Zachary Taylor was elected President of the United States.

ABRAHAM LINCOLN

1809-1865

I. THE YOUNG FRONTIERSMAN (1809–1834)

1809 Born in Hardin County, Kentucky, February 12, son of Thomas and Nancy Hanks Lincoln.

1816 Moved with his family to southern Indiana. Had less than twelve months of schooling in five different country schools, but read the Bible, Aesop, *Robinson Crusoe, Pilgrim's Progress,* Weems's *Life of Washington,* a history of the United States, Burns, Shakespeare.

1828 Made a journey as a hired hand on a flatboat to New Orleans.

1830 Migrated with his family in March to Macon County, Illinois, then to Coles County.

1831–1834 Clerk in a country store at New Salem, Illinois. Also split rails and, during spare time, studied law.

1832 Candidate for the Illinois House of Representatives. Served in the Black Hawk War five weeks; practiced surveying.

II. DEBATER OF SLAVERY ISSUES (1834–1860)

1834 Elected to the legislature; reëlected in 1836, 1838, and 1840.

1842 Married Mary Todd, overcoming melancholia accentuated by death of his fiancée, Ann Rutledge, in 1835.

1847–1849 Served a term in the national House of Representatives as a Whig.

1849–1854 Formed a successful law partnership with W. H. Herndon at Springfield, Illinois.

1858 Debates with Stephen A. Douglas in various Illinois towns on the subject of slavery brought him national attention.

1860 Delivered the Cooper Institute Speech February 27. Followed by his nomination for the Presidency of the United States in May.

III. THE WAR PRESIDENT (1861–1865)

1861 Farewell Remarks at Springfield, February 11; First Inaugural Address, March 4.

1863 November 19, Address at the Dedication of the National Cemetery at Gettysburg.

1865 March 4, the Second Inaugural Address.
April 14, assassinated in Ford's Theatre, Washington, and died the next day.

No one in the nineteenth century left a greater impress on American life and thought than Abraham Lincoln. This impression he made through his ability to phrase his utterances so compellingly that the people yielded ready assent to his logic. Clarity of thought, a sure grasp of facts, power of analysis, and flexibility of style characterize Lincoln's prose. His style is essentially the man—free from academic exhibitions, candid, poised, tolerant, compassionate, devoted, sincere. Whether he addressed himself to his neighbors at Springfield, or reasoned with the cultivated men and women in Cooper Institute, or solaced a bereaved mother, or voiced in a dedicatory address the ideals of a civilization, Lincoln knew how to adapt his medium to the situation in hand. He had from his frontier upbringing a homely utterance, a gift of humor and story-telling, sharpened by his legal experience, which, together with an ambition to get on, changed him by slow degrees from a country politician to an artist in statecraft, a spokesman of mankind itself. "What I do say is that no man is good enough to govern another man without that other's consent"—in such homely and sagacious utterances is the pith of the American contribution to world thought.

The text of the Lincoln selections is that of the Nicolay and Hay edition of *The Complete Works.*

ADDRESS AT COOPER INSTITUTE, NEW YORK

This speech, delivered February 27, 1860, at Cooper Institute, New York City, was significant because it made Lincoln favorably known to the Republican leaders in the East and made it possible a few months later to secure their consent to his nomination to the Presidency. It illustrates Lincoln's ability as a reasoner.

Mr. President and Fellow-Citizens of New York: The facts with which I shall deal this evening are mainly old and familiar; nor is there anything new in the general use I shall make of them. If there shall be any novelty, it will be in the mode of presenting the facts, and the inferences and observations following that presentation. In his speech last autumn at Columbus, Ohio, as reported in the "New-York Times," Senator Douglas said:

6. Senator Douglas—Stephen A. Douglas (1813-1861), United States Senator from Illinois, with whom Lincoln held the famous Lincoln-Douglas Debates in 1858.

"Our fathers, when they framed the government under which we live, understood this question just as well, and even better, than we do now."

I fully indorse this, and I adopt it as a text for this discourse. I so adopt it because it furnishes a precise and an agreed starting-point for a discussion between Republicans and that wing of the Democracy headed by Senator Douglas. It simply leaves the inquiry: What was the understanding those fathers had of the question mentioned?

What is the frame of government under which we live? The answer must be, "The Constitution of the United States." That Constitution consists of the original, framed in 1787, and under which the present government first went into operation, and twelve subsequently framed amendments, the first ten of which were framed in 1789.

Who were our fathers that framed the Constitution? I suppose the "thirty-nine" who signed the original instrument may be fairly called our fathers who framed that part of the present government. It is almost exactly true to say they framed it, and it is altogether true to say they fairly represented the opinion and sentiment of the whole nation at that time. Their names, being familiar to nearly all, and accessible to quite all, need not now be repeated.

I take these "thirty-nine," for the present, as being "our fathers who framed the government under which we live." What is the question which, according to the text, those fathers understood "just as well, and even better, than we do now?"

It is this: Does the proper division of local from federal authority, or anything in the Constitution, forbid our federal government to control as to slavery in our federal territories?

Upon this, Senator Douglas holds the affirmative, and Republicans the negative. This affirmation and denial form an issue; and this issue—this question—is precisely what the text declares our fathers understood "better than we." Let us now inquire whether the "thirty-nine," or any of them, ever acted upon this question; and if they did, how they acted upon it—how they expressed that better understanding. In 1784, three years before the Constitution, the United States then owning the Northwestern Territory, and no other, the Congress of the Confederation had before them the question of prohibiting slavery in that territory; and four of the "thirty-nine" who afterward framed the Constitution were in that Congress, and voted on that question. Of these, Roger Sherman, Thomas Mifflin, and Hugh Williamson voted for the prohibition, thus showing that, in their understanding, no line dividing local from federal authority, nor anything else, properly forbade the federal government to control as to slavery in federal territory. The other of the four, James McHenry, voted against the prohibition, showing that for some cause he thought it improper to vote for it.

In 1787, still before the Constitution, but while the convention was in ses-

5. **wing of the Democracy**—The Northern Democrats were willing to accept the Dred Scott opinion, and any decision which the Supreme Court might make as to slavery. 32. **Northwestern Territory**—The region north of the Ohio River between Pennsylvania and the Mississippi River, comprising the present states of Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota, was ceded to the United States by Great Britain in 1783.

sion framing it, and while the Northwestern Territory still was the only territory owned by the United States, the same question of prohibiting slavery in the territory again came before the Congress of the Confederation; and two more of the "thirty-nine" who afterward signed the Constitution were in that Congress, and voted on the question. They were William Blount and William Few; and they both voted for the prohibition—thus showing that in their understanding no line dividing local from federal authority, nor anything else, properly forbade the federal government to control as to slavery in federal territory. This time the prohibition became a law, being part of what is now well known as the Ordinance of '87.

The question of federal control of slavery in the territories seems not to have been directly before the convention which framed the original Constitution; and hence it is not recorded that the "thirty-nine," or any of them, while engaged on that instrument, expressed any opinion on that precise question.

In 1789, by the first Congress which sat under the Constitution, an act was passed to enforce the Ordinance of '87, including the prohibition of slavery in the Northwestern Territory. The bill for this act was reported by one of the "thirty-nine"—Thomas Fitzsimmons, then a member of the House of Representatives from Pennsylvania. It went through all its stages without a word of opposition, and finally passed both branches without ayes and nays, which is equivalent to a unanimous passage. In this Congress there were sixteen of the thirty-nine fathers who framed the original Constitution. They were John Langdon, Nicholas Gilman, William S. Johnson, Roger Sherman, Robert Morris, Thomas Fitzsimmons, William Few, Abraham Baldwin, Rufus King, William Paterson, George Clymer, Richard Bassett, George Read, Pierce Butler, Daniel Carroll, and James Madison.

This shows that, in their understanding, no line dividing local from federal authority, nor anything in the Constitution, properly forbade Congress to prohibit slavery in the federal territory; else both their fidelity to correct principle, and their oath to support the Constitution, would have constrained them to oppose the prohibition.

Again, George Washington, another of the "thirty-nine," was then President of the United States, and as such approved and signed the bill, thus completing its validity as a law, and thus showing that, in his understanding, no line dividing local from federal authority, nor anything in the Constitution, forbade the federal government to control as to slavery in federal territory.

No great while after the adoption of the original Constitution, North Carolina ceded to the federal government the country now constituting the state of Tennessee; and a few years later Georgia ceded that which now constitutes the states of Mississippi and Alabama. In both deeds of cession it was made a condition by the ceding states that the federal government should not prohibit slavery in the ceded country. Besides this, slavery was then actually in the ceded country. Under these circumstances, Congress, on taking charge of these countries, did not absolutely prohibit slavery within them. But they did interfere

10. **Ordinance of '87**—This provided for territorial government, public education, and religious freedom, and forbade slavery. **37-38. North Carolina ceded**—in 1790. Georgia ceded her claims in 1802.

with it—take control of it—even there, to a certain extent. In 1798 Congress organized the territory of Mississippi. In the act of organization they prohibited the bringing of slaves into the territory from any place without the United States, by fine, and giving freedom to slaves so brought. This act passed both branches of Congress without yeas and nays. In that Congress were three of the "thirty-nine" who framed the original Constitution. They were John Langdon, George Read, and Abraham Baldwin. They all probably voted for it. Certainly they would have placed their opposition to it upon record if, in their understanding, any line dividing local from federal authority, or anything in the Constitution, properly forbade the federal government to control as to slavery in federal territory.

In 1803 the federal government purchased the Louisiana country. Our former territorial acquisitions came from certain of our own states; but this Louisiana country was acquired from a foreign nation. In 1804 Congress gave a territorial organization to that part of it which now constitutes the state of Louisiana. New Orleans, lying within that part, was an old and comparatively large city. There were other considerable towns and settlements, and slavery was extensively and thoroughly intermingled with the people. Congress did not, in the Territorial Act, prohibit slavery; but they did interfere with it—take control of it—in a more marked and extensive way than they did in the case of Mississippi. The substance of the provision therein made in relation to slaves was:

1st. That no slave should be imported into the territory from foreign parts.

2nd. That no slave should be carried into it who had been imported into the United States since the first day of May, 1798.

3rd. That no slave should be carried into it, except by the owner, and for his own use as a settler; the penalty in all the cases being a fine upon the violator of the law, and freedom to the slave.

This act also was passed without ayes or nays. In the Congress which passed it there were two of the "thirty-nine." They were Abraham Baldwin and Jonathan Dayton. As stated in the case of Mississippi, it is probable they both voted for it. They would not have allowed it to pass, without recording their opposition to it if, in their understanding, it violated either the line properly dividing local from federal authority, or any provision of the Constitution.

In 1819-20 came and passed the Missouri question. Many votes were taken, by yeas and nays, in both branches of Congress, upon the various phases of the general question. Two of the "thirty-nine"—Rufus King and Charles Pinckney—were members of that Congress. Mr. King steadily voted for slavery prohibition and against all compromises, while Mr. Pinckney as steadily voted against slavery prohibition and against all compromises. By this, Mr. King showed that, in his understanding, no line dividing local from federal authority, nor anything in the Constitution, was violated by Congress prohibiting slavery in federal territory; while Mr. Pinckney, by his votes, showed that, in his understanding, there was some sufficient reason for opposing such prohibition in that case.

35. **Missouri question**—that is, whether Missouri should be admitted as a slave state to balance the admission of Maine as a free state.

The cases I have mentioned are the only acts of the "thirty-nine," or of any of them, upon the direct issue, which I have been able to discover.

To enumerate the persons who thus acted as being four in 1784, two in 1787, seventeen in 1789, three in 1798, two in 1804, and two in 1819-20, there would be thirty of them. But this would be counting John Langdon, Roger Sherman, William Few, Rufus King, and George Read each twice, and Abraham Baldwin three times. The true number of those of the "thirty-nine" whom I have shown to have acted upon the question which, by the text, they understood better than we, is twenty-three, leaving sixteen not shown to have acted upon it in any way.

Here, then, we have twenty-three out of our thirty-nine fathers "who framed the government under which we live," who have, upon their official responsibility and their corporal oaths, acted upon the very question which the text affirms they "understood just as well, and even better, than we do now"; and twenty-one of them—a clear majority of the whole "thirty-nine"—so acting upon it as to make them guilty of gross political impropriety and willful perjury if, in their understanding, any proper division between local and federal authority, or anything in the Constitution they had made themselves, and sworn to support, forbade the federal government to control as to slavery in the federal territories. Thus the twenty-one acted; and, as actions speak louder than words, so actions under such responsibility speak still louder.

Two of the twenty-three voted against congressional prohibition of slavery in the federal territories, in the instances in which they acted upon the question. But for what reasons they so voted is not known. They may have done so because they thought a proper division of local from federal authority, or some provision or principle of the Constitution, stood in the way; or they may, without any such question, have voted against the prohibition on what appeared to them to be sufficient grounds of expediency. No one who has sworn to support the Constitution can conscientiously vote for what he understands to be an unconstitutional measure, however expedient he may think it; but one may and ought to vote against a measure which he deems constitutional if, at the same time, he deems it inexpedient. It, therefore, would be unsafe to set down even the two who voted against the prohibition as having done so because, in their understanding, any proper division of local from federal authority, or anything in the Constitution, forbade the federal government to control as to slavery in federal territory.

The remaining sixteen of the "thirty-nine," so far as I have discovered, have left no record of their understanding upon the direct question of federal control of slavery in the federal territories. But there is much reason to believe that their understanding upon that question would not have appeared different from that of their twenty-three compeers, had it been manifested at all.

For the purpose of adhering rigidly to the text, I have purposely omitted whatever understanding may have been manifested by any person, however distinguished, other than the thirty-nine fathers who framed the original Constitution; and, for the same reason, I have also omitted whatever understanding may have been manifested by any of the "thirty-nine" even on any other

13. **corporal**—corporate.

phase of the general question of slavery. If we should look into their acts and declarations on those other phases, as the foreign slave-trade, and the morality and policy of slavery generally, it would appear to us that on the direct question of federal control of slavery in federal territories, the sixteen, if they had acted at all, would probably have acted just as the twenty-three did. Among that sixteen were several of the most noted anti-slavery men of those times—as Dr. Franklin, Alexander Hamilton, and Gouverneur Morris—while there was not one now known to have been otherwise, unless it may be John Rutledge, of South Carolina.

The sum of the whole is that of our thirty-nine fathers who framed the original Constitution, twenty-one—a clear majority of the whole—certainly understood that no proper division of local from federal authority, nor any part of the Constitution, forbade the federal government to control slavery in the federal territories; while all the rest had probably the same understanding. Such, unquestionably, was the understanding of our fathers who framed the original Constitution; and the text affirms that they understood the question "better than we."

But, so far, I have been considering the understanding of the question manifested by the framers of the original Constitution. In and by the original instrument, a mode was provided for amending it; and, as I have already stated, the present frame of "the government under which we live" consists of that original, and twelve amendatory articles framed and adopted since. Those who now insist that federal control of slavery in federal territories violates the Constitution, point us to the provisions which they suppose it thus violates; and, as I understand, they all fix upon provisions in these amendatory articles, and not in the original instrument. The Supreme Court, in the Dred Scott case, plant themselves upon the Fifth Amendment, which provides that no person shall be deprived of "life, liberty, or property without due process of law"; while Senator Douglas and his peculiar adherents plant themselves upon the Tenth Amendment, providing that "the powers not delegated to the United States by the Constitution" "are reserved to the states respectively, or to the people."

Now, it so happens that these amendments were framed by the first Congress which sat under the Constitution—the identical Congress which passed the act, already mentioned, enforcing the prohibition of slavery in the Northwestern Territory. Not only was it the same Congress, but they were the identical, same individual men who, at the same session, and at the same time within the session, had under consideration, and in progress toward maturity, these constitutional amendments, and this act prohibiting slavery in all the territory the nation then owned. The constitutional amendments were introduced before, and passed after, the act enforcing the Ordinance of '87; so that, during the whole pendency of the act to enforce the ordinance, the constitutional amendments were also pending.

26-27. Dred Scott case—Dred Scott, a slave, had been taken by his master to the free state of Illinois and to the region west of the Mississippi where slavery had been forbidden. Returning to Missouri, he sued for freedom on the ground that residence in free territory had made him free. The case was finally decided against him by the Supreme Court in 1857.

The seventy-six members of that Congress, including sixteen of the framers of the original Constitution, as before stated, were pre-eminently our fathers who framed that part of "the government under which we live" which is now claimed as forbidding the federal government to control slavery in the federal territories.

Is it not a little presumptuous in anyone at this day to affirm that the two things which that Congress deliberately framed, and carried to maturity at the same time, are absolutely inconsistent with each other? And does not such affirmation become impudently absurd when coupled with the other affirmation, from the same mouth, that those who did the two things alleged to be inconsistent, understood whether they really were inconsistent better than we—better than he who affirms that they are inconsistent?

It is surely safe to assume that the thirty-nine framers of the original Constitution, and the seventy-six members of the Congress which framed the amendments thereto, taken together, do certainly include those who may be fairly called "our fathers who framed the government under which we live." And so assuming, I defy any man to show that any one of them ever, in his whole life, declared that, in his understanding, any proper division of local from federal authority, or any part of the Constitution, forbade the federal government to control as to slavery in the federal territories. I go a step further. I defy anyone to show that any living man in the whole world ever did, prior to the beginning of the present century (and I might almost say prior to the beginning of the last half of the present century), declare that, in his understanding, any proper division of local from federal authority, or any part of the Constitution, forbade the federal government to control as to slavery in the federal territories. To those who now so declare I give not only "our fathers who framed the government under which we live," but with them all other living men within the century in which it was framed, among whom to search, and they shall not be able to find the evidence of a single man agreeing with them.

Now, and here, let me guard a little against being misunderstood. I do not mean to say we are bound to follow implicitly in whatever our fathers did. To do so would be to discard all the lights of current experience—to reject all progress, all improvement. What I do say is, that if we would supplant the opinions and policy of our fathers in any case, we should do so upon evidence so conclusive, and argument so clear, that even their great authority, fairly considered and weighed, cannot stand; and most surely not in a case whereof we ourselves declare they understood the question better than we.

If any man at this day sincerely believes that a proper division of local from federal authority, or any part of the Constitution, forbids the federal government to control as to slavery in the federal territories, he is right to say so, and to enforce his position by all truthful evidence and fair argument which he can. But he has no right to mislead others who have less access to history, and less leisure to study it, into the false belief that "our fathers who framed the government under which we live" were of the same opinion—thus substituting falsehood and deception for truthful evidence and fair argument. If any man at this day sincerely believes "our fathers who framed the government under

which we live" used and applied principles, in other cases, which ought to have led them to understand that a proper division of local from federal authority, or some part of the Constitution, forbids the federal government to control as to slavery in the federal territories, he is right to say so. But he should, at the same time, brave the responsibility of declaring that, in his opinion, he understands their principles better than they did themselves; and especially should he not shirk that responsibility by asserting that they "understood the question just as well, and even better, than we do now."

But enough! Let all who believe that "our fathers who framed the government under which we live understood this question just as well, and even better, than we do now," speak as they spoke, and act as they acted upon it. This is all Republicans ask—all Republicans desire—in relation to slavery. As those fathers marked it, so let it be again marked, as an evil not to be extended, but to be tolerated and protected only because of and so far as its actual presence among us makes that toleration and protection a necessity. Let all the guaranties those fathers gave it be not grudgingly, but fully and fairly, maintained. For this Republicans contend, and with this, so far as I know or believe, they will be content.

And now, if they would listen—as I suppose they will not—I would address a few words to the Southern people.

I would say to them: You consider yourselves a reasonable and a just people; and I consider that in the general qualities of reason and justice you are not inferior to any other people. Still, when you speak of us Republicans, you do so only to denounce us as reptiles, or, at the best, as no better than outlaws. You will grant a hearing to pirates or murderers, but nothing like it to "Black Republicans." In all your contentions with one another, each of you deems an unconditional condemnation of "Black Republicanism" as the first thing to be attended to. Indeed, such condemnation of us seems to be an indispensable prerequisite—license, so to speak—among you to be admitted or permitted to speak at all. Now, can you or not be prevailed upon to pause and to consider whether this is quite just to us, or even to yourselves? Bring forward your charges and specifications, and then be patient long enough to hear us deny or justify.

You say we are sectional. We deny it. That makes an issue; and the burden of proof is upon you. You produce your proof; and what is it? Why, that our party has no existence in your section—gets no votes in your section. The fact is substantially true; but does it prove the issue? If it does, then in case we should, without change of principle, begin to get votes in your section, we should thereby cease to be sectional. You cannot escape this conclusion; and yet, are you willing to abide by it? If you are, you will probably soon find that we have ceased to be sectional, for we shall get votes in your section this very year. You will then begin to discover, as the truth plainly is, that your proof does not touch the issue. The fact that we get no votes in your section is a fact of your making, and not of ours. And if there be fault in that fact, that fault is primarily yours, and remains so until you show that we repel you by some wrong principle or practice. If we do repel you by any wrong principle or practice, the fault is ours; but this brings you to where you ought to have

started—to a discussion of the right or wrong of our principle. If our principle, put in practice, would wrong your section for the benefit of ours, or for any other object, then our principle, and we with it, are sectional, and are justly opposed and denounced as such. Meet us, then, on the question of whether our principle, put in practice, would wrong your section; and so meet us as if it were possible that something may be said on our side. Do you accept the challenge? No! Then you really believe that the principle which "our fathers who framed the government under which we live" thought so clearly right as to adopt it, and indorse it again and again, upon their official oaths, is in fact so clearly wrong as to demand your condemnation without a moment's consideration.

Some of you delight to flaunt in our faces the warning against sectional parties given by Washington in his Farewell Address. Less than eight years before Washington gave that warning, he had, as President of the United States, approved and signed an act of Congress enforcing the prohibition of slavery in the Northwestern Territory, which act embodied the policy of the government upon that subject up to and at the very moment he penned that warning; and about one year after he penned it, he wrote Lafayette that he considered that prohibition a wise measure, expressing in the same connection his hope that we should at some time have a confederacy of free states.

Bearing this in mind, and seeing that sectionalism has since arisen upon this same subject, is that warning a weapon in your hands against us, or in our hands against you? Could Washington himself speak, would he cast the blame of that sectionalism upon us, who sustain his policy, or upon you, who repudiate it? We respect that warning of Washington, and we commend it to you, together with his example pointing to the right application of it.

But you say you are conservative—eminently conservative—while we are revolutionary, destructive, or something of the sort. What is conservatism? Is it not adherence to the old and tried, against the new and untried? We stick to, contend for, the identical old policy on the point in controversy which was adopted by "our fathers who framed the government under which we live"; while you with one accord reject, and scout, and spit upon that old policy, and insist upon substituting something new. True, you disagree among yourselves as to what that substitute shall be. You are divided on new propositions and plans, but you are unanimous in rejecting and denouncing the old policy of the fathers. Some of you are for reviving the foreign slave-trade; some for a congressional slave-code for the territories; some for Congress forbidding the territories to prohibit slavery within their limits; some for maintaining slavery in the territories through the judiciary; some for the "gur-reat purrinciple" that "if one man would enslave another, no third man should object," fantastically called "popular sovereignty"; but never a man among you is in favor of federal prohibition of slavery in federal territories, according to the practice of "our fathers who framed the government under which we live." Not one of all your various plans can show a precedent or an advocate in the

13. Farewell Address—Sept. 17, 1796. **18. Lafayette**—*Cf. The Writings of Washington*, ed. by Jared Sparks, 1835, Vol. IX, pp. 163-64.

century within which our government originated. Consider, then, whether your claim of conservatism for yourselves, and your charge of destructiveness against us, are based on the most clear and stable foundations.

Again, you say we have made the slavery question more prominent than it formerly was. We deny it. We admit that it is more prominent, but we deny that we made it so. It was not we, but you, who discarded the old policy of the fathers. We resisted, and still resist, your innovation; and thence comes the greater prominence of the question. Would you have that question reduced to its former proportions? Go back to that old policy. What has been will be again, under the same conditions. If you would have the peace of the old times, readopt the precepts and policy of the old times.

You charge that we stir up insurrections among your slaves. We deny it; and what is your proof? Harpers Ferry! John Brown!! John Brown was no Republican; and you have failed to implicate a single Republican in his Harpers Ferry enterprise. If any member of our party is guilty in that matter, you know it, or you do not know it. If you do know it, you are inexcusable for not designating the man and proving the fact. If you do not know it, you are inexcusable for asserting it, and especially for persisting in the assertion after you have tried and failed to make the proof. You need not be told that persisting in a charge which one does not know to be true, is simply malicious slander.

Some of you admit that no Republican designedly aided or encouraged the Harpers Ferry affair, but still insist that our doctrines and declarations necessarily lead to such results. We do not believe it. We know we hold no doctrine, and make no declaration, which were not held to and made by "our fathers who framed the government under which we live." You never dealt fairly by us in relation to this affair. When it occurred, some important state elections were near at hand, and you were in evident glee with the belief that, by charging the blame upon us, you could get an advantage of us in those elections. The elections came, and your expectations were not quite fulfilled. Every Republican man knew that, as to himself at least, your charge was a slander, and he was not much inclined by it to cast his vote in your favor. Republican doctrines and declarations are accompanied with a continual protest against any interference with your slaves, or with you about your slaves. Surely, this does not encourage them to revolt. True, we do, in common with "our fathers who framed the government under which we live," declare our belief that slavery is wrong; but the slaves do not hear us declare even this. For anything we say or do, the slaves would scarcely know there is a Republican party. I believe they would not, in fact, generally know it but for your misrepresentations of us in their hearing. In your political contests among yourselves, each faction charges the other with sympathy with Black Republicanism; and then, to give point to the charge, defines Black Republicanism to simply be insurrection, blood, and thunder among the slaves.

Slave insurrections are no more common now than they were before the

13. **Harpers Ferry! John Brown!!**—On Oct. 16, 1859, Brown with nineteen followers seized the United States arsenal at the confluence of the Potomac and Shenandoah rivers, was caught, tried. and later executed for treason and for conspiracy to free slaves.

Republican party was organized. What induced the Southampton insurrection, twenty-eight years ago, in which at least three times as many lives were lost as at Harpers Ferry? You can scarcely stretch your very elastic fancy to the conclusion that Southampton was "got up by Black Republicanism." In the present state of things in the United States, I do not think a general, or even a very extensive, slave insurrection is possible. The indispensable concert of action cannot be attained. The slaves have no means of rapid communication; nor can incendiary freemen, black or white, supply it. The explosive materials are everywhere in parcels; but there neither are, nor can be supplied, the indispensable connecting trains.

Much is said by Southern people about the affection of slaves for their masters and mistresses; and a part of it, at least, is true. A plot for an uprising could scarcely be devised and communicated to twenty individuals before some one of them, to save the life of a favorite master or mistress, would divulge it. This is the rule; and the slave revolution in Haiti was not an exception to it, but a case occurring under peculiar circumstances. The gunpowder plot of British history, though not connected with slaves, was more in point. In that case, only about twenty were admitted to the secret; and yet one of them, in his anxiety to save a friend, betrayed the plot to that friend, and, by consequence, averted the calamity. Occasional poisonings from the kitchen, and open or stealthy assassinations in the field, and local revolts extending to a score or so, will continue to occur as the natural results of slavery; but no general insurrection of slaves, as I think, can happen in this country for a long time. Whoever much fears, or much hopes, for such an event, will be alike disappointed.

In the language of Mr. Jefferson, uttered many years ago, "It is still in our power to direct the process of emancipation and deportation peaceably, and in such slow degrees, as that the evil will wear off insensibly; and their places be, *pari passu,* filled up by free white laborers. If, on the contrary, it is left to force itself on, human nature must shudder at the prospect held up."

Mr. Jefferson did not mean to say, nor do I, that the power of emancipation is in the federal government. He spoke of Virginia; and, as to the power of emancipation, I speak of the slaveholding states only. The federal government, however, as we insist, has the power of restraining the extension of the institution—the power to insure that a slave insurrection shall never occur on any American soil which is now free from slavery.

John Brown's effort was peculiar. It was not a slave insurrection. It was an attempt by white men to get up a revolt among slaves, in which the slaves refused to participate. In fact, it was so absurd that the slaves, with all their ignorance, saw plainly enough it could not succeed. That affair, in its philosophy, corresponds with the many attempts, related in history, at the assassina-

1. **Southampton insurrection**—an uprising of slaves in Southampton County, Virginia, in 1831, led by Nat Turner. About seventy lives were lost 15. **revolution in Haiti**—the insurrection of 1791 led by Toussaint L'Ouverture. Wordsworth has a sonnet to him. 16. **gunpowder plot**—A plot led by Guy Fawkes to blow up the houses of Parliament, when the Court should be present, was discovered and frustrated Nov. 5, 1605. 29. **pari passu**—with equal pace, as quickly. The quotation is from Jefferson's "Autobiography," *Works* (Memorial ed.), Vol. I, p. 73. Lincoln was not a Negrophile; he wanted the Territories kept free to allow white labor to prosper and determine its own future.

tion of kings and emperors. An enthusiast broods over the oppression of a people till he fancies himself commissioned by Heaven to liberate them. He ventures the attempt, which ends in little else than his own execution. Orsini's attempt on Louis Napoleon, and John Brown's attempt at Harpers Ferry, were, in their philosophy, precisely the same. The eagerness to cast blame on old England in the one case, and on New England in the other, does not disprove the sameness of the two things.

And how much would it avail you, if you could, by the use of John Brown, Helper's book, and the like, break up the Republican organization? Human action can be modified to some extent, but human nature cannot be changed. There is a judgment and a feeling against slavery in this nation, which cast at least a million and a half of votes. You cannot destroy that judgment and feeling—that sentiment—by breaking up the political organization which rallies around it. You can scarcely scatter and disperse an army which has been formed into order in the face of your heaviest fire; but if you could, how much would you gain by forcing the sentiment which created it out of the peaceful channel of the ballot box into some other channel? What would that other channel probably be? Would the number of John Browns be lessened or enlarged by the operation?

But you will break up the Union rather than submit to a denial of your constitutional rights.

That has a somewhat reckless sound; but it would be palliated, if not fully justified, were we proposing, by the mere force of numbers, to deprive you of some right plainly written down in the Constitution. But we are proposing no such thing.

When you make these declarations you have a specific and well-understood allusion to an assumed constitutional right of yours to take slaves into the federal territories, and to hold them there as property. But no such right is specifically written in the Constitution. That instrument is literally silent about any such right. We, on the contrary, deny that such a right has any existence in the Constitution, even by implication.

Your purpose, then, plainly stated, is that you will destroy the government, unless you be allowed to construe and force the Constitution as you please, on all points in dispute between you and us. You will rule or ruin in all events.

This, plainly stated, is your language. Perhaps you will say the Supreme Court has decided the disputed constitutional question in your favor. Not quite so. But waiving the lawyer's distinction between *dictum* and decision, the court has decided the question for you in a sort of way. The court has substantially said it is your constitutional right to take slaves into the federal territories, and to hold them there as property. When I say the decision was made in a sort of way, I mean it was made in a divided court, by a bare majority of the judges,

3. Orsini's—Felice Orsini attempted to assassinate Napoleon III on Jan. 14, 1858. **9. Helper's book**—In *The Impending Crisis in the South, and How to Meet It* (1857) Hinton R Helper (1829-1909), protagonist of the "poor whites" of North Carolina, attacked slavery from the standpoint of the nonslaveholding Southern whites. Not even Brown's raid was so effective in arousing the slaveholding oligarchy. **37. dictum and decision**—A decision is a judgment given by a competent tribunal; a dictum is an opinion expressed by a court upon some question which is not necessary to the decision of the case before it.

and they not quite agreeing with one another in the reasons for making it; that it is so made as that its avowed supporters disagree with one another about its meaning, and that it was mainly based upon a mistaken statement of fact—the statement in the opinion that "the right of property in a slave is distinctly and expressly affirmed in the Constitution."

An inspection of the Constitution will show that the right of property in a slave is not "distinctly and expressly affirmed" in it. Bear in mind, the judges do not pledge their judicial opinion that such right is impliedly affirmed in the Constitution; but they pledge their veracity that it is "distinctly and expressly" affirmed there—"distinctly," that is, not mingled with anything else—"expressly," that is, in words meaning just that, without the aid of any inference, and susceptible of no other meaning.

If they had only pledged their judicial opinion that such right is affirmed in the instrument by implication, it would be open to others to show that neither the word "slave" nor "slavery" is to be found in the Constitution, nor the word "property" even, in any connection with language alluding to the things slave, or slavery; and that wherever in that instrument the slave is alluded to, he is called a "person"; and wherever his master's legal right in relation to him is alluded to, it is spoken of as "service or labor which may be due"—as a debt payable in service or labor. Also it would be open to show, by contemporaneous history, that this mode of alluding to slaves and slavery, instead of speaking of them, was employed on purpose to exclude from the Constitution the idea that there could be property in man.

To show all this is easy and certain.

When this obvious mistake of the judges shall be brought to their notice, is it not reasonable to expect that they will withdraw the mistaken statement, and reconsider the conclusion based upon it?

And then it is to be remembered that "our fathers who framed the government under which we live"—the men who made the Constitution—decided this same constitutional question in our favor long ago: decided it without division among themselves when making the decision; without division among themselves about the meaning of it after it was made, and, so far as any evidence is left, without basing it upon any mistaken statement of facts.

Under all these circumstances, do you really feel yourselves justified to break up this government unless such a court decision as yours is shall be at once submitted to as a conclusive and final rule of political action? But you will not abide the election of a Republican President! In that supposed event, you say, you will destroy the Union; and then, you say, the great crime of having destroyed it will be upon us! That is cool. A highwayman holds a pistol to my ear, and mutters through his teeth, "Stand and deliver, or I shall kill you, and then you will be a murderer!"

To be sure, what the robber demanded of me—my money—was my own; and I had a clear right to keep it; but it was no more my own than my vote is my own; and the threat of death to me, to extort my money, and the threat of destruction to the Union, to extort my vote, can scarcely be distinguished in principle.

A few words now to Republicans. It is exceedingly desirable that all parts

of this great confederacy shall be at peace, and in harmony one with another. Let us Republicans do our part to have it so. Even though much provoked, let us do nothing through passion and ill temper. Even though the Southern people will not so much as listen to us, let us calmly consider their demands, and yield to them if, in our deliberate view of our duty, we possibly can. Judging by all they say and do, and by the subject and nature of their controversy with us, let us determine, if we can, what will satisfy them.

Will they be satisfied if the territories be unconditionally surrendered to them? We know they will not. In all their present complaints against us, the territories are scarcely mentioned. Invasions and insurrections are the rage now. Will it satisfy them if, in the future, we have nothing to do with invasions and insurrections? We know it will not. We so know, because we know we never had anything to do with invasions and insurrections; and yet this total abstaining does not exempt us from the charge and the denunciation.

The question recurs, What will satisfy them? Simply this: we must not only let them alone, but we must somehow convince them that we do let them alone. This, we know by experience, is no easy task. We have been so trying to convince them from the very beginning of our organization, but with no success. In all our platforms and speeches we have constantly protested our purpose to let them alone; but this has had no tendency to convince them. Alike unavailing to convince them is the fact that they have never detected a man of us in any attempt to disturb them.

These natural and apparently adequate means all failing, what will convince them? This, and this only: cease to call slavery wrong, and join them in calling it right. And this must be done thoroughly—done in acts as well as in words. Silence will not be tolerated—we must place ourselves avowedly with them. Senator Douglas's new sedition law must be enacted and enforced, suppressing all declarations that slavery is wrong, whether made in politics, in presses, in pulpits, or in private. We must arrest and return their fugitive slaves with greedy pleasure. We must pull down our free-state constitutions. The whole atmosphere must be disinfected from all taint of opposition to slavery, before they will cease to believe that all their troubles proceed from us.

I am quite aware they do not state their case precisely in this way. Most of them would probably say to us, "Let us alone; do nothing to us, and say what you please about slavery." But we do let them alone—have never disturbed them—so that, after all, it is what we say which dissatisfies them. They will continue to accuse us of doing, until we cease saying.

I am also aware they have not as yet in terms demanded the overthrow of our free-state constitutions. Yet those constitutions declare the wrong of slavery with more solemn emphasis than do all other sayings against it; and when all these other sayings shall have been silenced, the overthrow of these constitutions will be demanded, and nothing be left to resist the demand. It is nothing to the contrary that they do not demand the whole of this just now. Demanding what they do, and for the reason they do, they can voluntarily stop no-

27. new sedition law—The reference is to an act passed during the short war with France in 1798 to suppress criticism on the part of the Jeffersonian Democrats. Lincoln implies that Douglas wishes to revive that principle long reviled by his own party.

where short of this consummation. Holding, as they do, that slavery is morally right and socially elevating, they cannot cease to demand a full national recognition of it as a legal right and a social blessing.

Nor can we justifiably withhold this on any ground save our conviction that slavery is wrong. If slavery is right, all words, acts, laws, and constitutions against it are themselves wrong, and should be silenced and swept away. If it is right, we cannot justly object to its nationality—its universality; if it is wrong, they cannot justly insist upon its extension—its enlargement. All they ask we could readily grant, if we thought slavery right; all we ask they could as readily grant, if they thought it wrong. Their thinking it right and our thinking it wrong is the precise fact upon which depends the whole controversy. Thinking it right, as they do, they are not to blame for desiring its full recognition as being right; but thinking it wrong, as we do, can we yield to them? Can we cast our votes with their view, and against our own? In view of our moral, social, and political responsibilities, can we do this?

Wrong as we think slavery is, we can yet afford to let it alone where it is, because that much is due to the necessity arising from its actual presence in the nation; but can we, while our votes will prevent it, allow it to spread into the national territories, and to overrun us here in these free states? If our sense of duty forbids this, then let us stand by our duty fearlessly and effectively. Let us be diverted by none of those sophistical contrivances wherewith we are so industriously plied and belabored—contrivances such as groping for some middle ground between the right and the wrong; vain as the search for a man who should be neither a living man nor a dead man; such as a policy of "don't care" on a question about which all true men do care; such as Union appeals beseeching true Union men to yield to Disunionists, reversing the divine rule, and calling, not the sinners, but the righteous to repentance; such as invocations to Washington, imploring men to unsay what Washington said and undo what Washington did.

Neither let us be slandered from our duty by false accusations against us, nor frightened from it by menaces of destruction to the government, nor of dungeons to ourselves. Let us have faith that right makes might, and in that faith let us to the end dare to do our duty as we understand it.

FAREWELL REMARKS AT SPRINGFIELD, ILLINOIS

An extemporaneous speech delivered in a drizzling rain to his neighbors, February 11, 1861, from the rear platform as the train was about to bear the President-elect off to Washington.

My Friends: No one, not in my situation, can appreciate my feeling of sadness at this parting. To this place, and the kindness of these people, I owe everything. Here I have lived a quarter of a century, and have passed from a young

27. sinners . . . repentance—*Cf.* Matt. 9: 13.

to an old man. Here my children have been born, and one is buried. I now leave, not knowing when or whether ever I may return, with a task before me greater than that which rested upon Washington. Without the assistance of that Divine Being who ever attended him, I cannot succeed. With that assistance, I cannot fail. Trusting in Him who can go with me, and remain with you, and be everywhere for good, let us confidently hope that all will yet be well. To His care commending you, as I hope in your prayers you will commend me, I bid you an affectionate farewell

ADDRESS IN INDEPENDENCE HALL, PHILADELPHIA

Another informal address, delivered February 22, 1861, on his way to Washington. Theodore Cuyler (1819-1876), who presided at the meeting, was a Democrat who believed that the Union should be maintained at all costs.

Mr. Cuyler: I am filled with deep emotion at finding myself standing in this place, where were collected together the wisdom, the patriotism, the devotion to principle, from which sprang the institutions under which we live. You have kindly suggested to me that in my hands is the task of restoring peace to our distracted country. I can say in return, sir, that all the political sentiments I entertain have been drawn, so far as I have been able to draw them, from the sentiments which originated in and were given to the world from this hall. I have never had a feeling, politically, that did not spring from the sentiments embodied in the Declaration of Independence. I have often pondered over the dangers which were incurred by the men who assembled here and framed and adopted that Declaration. I have pondered over the toils that were endured by the officers and soldiers of the army who achieved that independence. I have often inquired of myself what great principle or idea it was that kept this Confederacy so long together. It was not the mere matter of separation of the colonies from the motherland, but that sentiment in the Declaration of Independence which gave liberty not alone to the people of this country, but hope to all the world, for all future time. It was that which gave promise that in due time the weights would be lifted from the shoulders of all men, and that all should have an equal chance. This is the sentiment embodied in the Declaration of Independence. Now, my friends, can this country be saved on that basis? If it can, I will consider myself one of the happiest men in the world if I can help to save it. If it cannot be saved upon that principle, it will be truly awful. But if this country cannot be saved without giving up that principle, I was about to say I would rather be assassinated on this spot than surrender it. Now, in my view of the present aspect of affairs, there is no need of bloodshed and war. There is no necessity for it. I am not in favor of such a course; and I may say in advance that there will be no bloodshed unless it is forced upon the government. The government will not use force, unless force is used against it.

My friends, this is wholly an unprepared speech. I did not expect to be called

on to say a word when I came here. I supposed I was merely to do something toward raising a flag. I may, therefore, have said something indiscreet. But I have said nothing but what I am willing to live by, and, if it be the pleasure of Almighty God, to die by.

FIRST INAUGURAL ADDRESS

Delivered at the Capitol, March 4, 1861. Ordinances of secession had been adopted shortly before by seven Southern states. The idea in the last paragraph was Secretary Seward's, but Lincoln gave it its final literary form.

Fellow Citizens of the United States: In compliance with a custom as old as the government itself, I appear before you to address you briefly, and to take in your presence the oath prescribed by the Constitution of the United States to be taken by the President "before he enters on the execution of his office."

I do not consider it necessary at present for me to discuss those matters of administration about which there is no special anxiety or excitement.

Apprehension seems to exist among the people of the Southern states that by the accession of a Republican administration their property and their peace and personal security are to be endangered. There has never been any reasonable cause for such apprehension. Indeed, the most ample evidence to the contrary has all the while existed and been open to their inspection. It is found in nearly all the published speeches of him who now addresses you. I do but quote from one of those speeches when I declare that "I have no purpose, directly or indirectly, to interfere with the institution of slavery in the states where it exists. I believe I have no lawful right to do so, and I have no inclination to do so." Those who nominated and elected me did so with full knowledge that I had made this and many similar declarations, and had never recanted them. And, more than this, they placed in the platform for my acceptance, and as a law to themselves and to me, the clear and emphatic resolution which I now read:

> *Resolved,* That the maintenance inviolate of the rights of the states, and especially the right of each state to order and control its own domestic institutions according to its own judgment exclusively, is essential to that balance of power on which the perfection and endurance of our political fabric depend, and we denounce the lawless invasion by armed force of the soil of any state or territory, no matter under what pretext, as among the gravest of crimes.

I now reiterate these sentiments; and, in doing so, I only press upon the public attention the most conclusive evidence of which the case is susceptible, that the property, peace, and security of no section are to be in any wise endangered by the now incoming administration. I add, too, that all the protection which, consistently with the Constitution and the laws, can be given, will be cheerfully given to all the states when lawfully demanded, for whatever cause—as cheerfully to one section as to another.

There is much controversy about the delivering up of fugitives from service

or labor. The clause I now read is as plainly written in the Constitution as any other of its provisions:

> No person held to service or labor in one state, under the laws thereof, escaping into another, shall in consequence of any law or regulation therein be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

It is scarcely questioned that this provision was intended by those who made it for the reclaiming of what we call fugitive slaves; and the intention of the lawgiver is the law. All members of Congress swear their support to the whole Constitution—to this provision as much as to any other. To the proposition, then, that slaves whose cases come within the terms of this clause "shall be delivered up," their oaths are unanimous. Now, if they would make the effort in good temper, could they not with nearly equal unanimity frame and pass a law by means of which to keep good that unanimous oath?

There is some difference of opinion whether this clause should be enforced by national or by state authority; but surely that difference is not a very material one. If the slave is to be surrendered, it can be of but little consequence to him or to others by which authority it is done. And should any one in any case be content that his oath shall go unkept on a merely unsubstantial controversy as to how it shall be kept?

Again, in any law upon this subject, ought not all the safeguards of liberty known in civilized and humane jurisprudence to be introduced, so that a free man be not, in any case, surrendered as a slave? And might it not be well at the same time to provide by law for the enforcement of that clause in the Constitution which guarantees that "the citizen of each state shall be entitled to all privileges and immunities of citizens in the several states"?

I take the official oath today with no mental reservations, and with no purpose to construe the Constitution or laws by any hypercritical rules. And while I do not choose now to specify particular acts of Congress as proper to be enforced, I do suggest that it will be much safer for all, both in official and private stations, to conform to and abide by all those acts which stand unrepealed, than to violate any of them, trusting to find impunity in having them held to be unconstitutional.

It is seventy-two years since the first inauguration of a president under our national Constitution. During that period fifteen different and greatly distinguished citizens have, in succession, administered the executive branch of the government. They have conducted it through many perils, and generally with great success. Yet, with all this scope of precedent, I now enter upon the same task for the brief constitutional term of four years under great and peculiar difficulty. A disruption of the federal Union, heretofore only menaced, is now formidably attempted.

I hold that, in contemplation of universal law and of the Constitution, the union of these states is perpetual. Perpetuity is implied, if not expressed, in the fundamental law of all national governments. It is safe to assert that no government proper ever had a provision in its organic law for its own termination. Continue to execute all the express provisions of our national Constitution,

and the Union will endure forever—it being impossible to destroy it except by some action not provided for in the instrument itself.

Again, if the United States be not a government proper, but an association of states in the nature of contract merely, can it, as a contract, be peaceably unmade by less than all the parties who made it? One party to a contract may violate it—break it, so to speak; but does it not require all to lawfully rescind it?

Descending from these general principles, we find the proposition that, in legal contemplation the Union is perpetual confirmed by the history of the Union itself. The Union is much older than the Constitution. It was formed, in fact, by the Articles of Association in 1774. It was matured and continued by the Declaration of Independence in 1776. It was further matured, and the faith of all the then thirteen states expressly plighted and engaged that it should be perpetual, by the Articles of Confederation in 1778. And, finally, in 1787 one of the declared objects for ordaining and establishing the Constitution was "to form a more perfect Union."

But if the destruction of the Union by one or by a part only of the states be lawfully possible, the Union is less perfect than before the Constitution. having lost the vital element of perpetuity.

It follows from these views that no state upon its own mere motion can lawfully get out of the Union; that resolves and ordinances to that effect are legally void; and that acts of violence, within any state or states, against the authority of the United States, are insurrectionary or revolutionary according to circumstances.

I therefore consider that, in view of the Constitution and the laws, the Union is unbroken; and to the extent of my ability I shall take care, as the Constitution itself expressly enjoins upon me, that the laws of the Union be faithfully executed in all the states. Doing this I deem to be only a simple duty on my part; and I shall perform it so far as practicable, unless my rightful masters, the American people, shall withhold the requisite means, or in some authoritative manner direct the contrary. I trust this will not be regarded as a menace, but only as the declared purpose of the Union that it will constitutionally defend and maintain itself.

In doing this there needs to be no bloodshed or violence; and there shall be none, unless it be forced upon the national authority. The power confided to me will be used to hold, occupy, and possess the property and places belonging to the government, and to collect the duties and imposts; but beyond what may be necessary for these objects, there will be no invasion, no using of force against or among the people anywhere. Where hostility to the United States, in any interior locality, shall be so great and universal as to prevent competent resident citizens from holding the federal offices, there will be no attempt to force obnoxious strangers among the people for that object. While the strict legal right may exist in the government to enforce the exercise of these offices, the attempt to do so would be so irritating, and so nearly impracticable withal, that I deem it better to forego for the time the uses of such offices.

The mails, unless repelled, will continue to be furnished in all parts of the Union. So far as possible, the people everywhere shall have that sense of per-

fect security which is most favorable to calm thought and reflection. The course here indicated will be followed unless current events and experience shall show a modification or change to be proper, and in every case and exigency my best discretion will be exercised according to circumstances actually existing, and with a view and a hope of a peaceful solution of the national troubles and the restoration of fraternal sympathies and affections.

That there are persons in one section or another who seek to destroy the Union at all events, and are glad of any pretext to do it, I will neither affirm nor deny; but if there be such, I need address no word to them. To those, however, who really love the Union may I not speak?

Before entering upon so grave a matter as the destruction of our national fabric, with all its benefits, its memories, and its hopes, would it not be wise to ascertain precisely why we do it? Will you hazard so desperate a step while there is any possibility that any portion of the ills you fly from have no real existence? Will you, while the certain ills you fly to are greater than all the real ones you fly from—will you risk the commission of so fearful a mistake?

All profess to be content in the Union if all constitutional rights can be maintained. Is it true, then, that any right, plainly written in the Constitution, has been denied? I think not. Happily the human mind is so constituted that no party can reach to the audacity of doing this. Think, if you can, of a single instance in which a plainly written provision of the Constitution has ever been denied. If by the mere force of numbers a majority should deprive a minority of any clearly written constitutional right, it might, in a moral point of view, justify revolution—certainly would if such a right were a vital one. But such is not our case. All the vital rights of minorities and of individuals are so plainly assured to them by affirmations and negations, guarantees and prohibitions, in the Constitution, that controversies never arise concerning them. But no organic law can ever be framed with a provision specifically applicable to every question which may occur in practical administration. No foresight can anticipate, nor any document of reasonable length contain, express provisions for all possible questions. Shall fugitives from labor be surrendered by national or by state authority? The Constitution does not expressly say. *May* Congress prohibit slavery in the territories? The Constitution does not expressly say. *Must* Congress protect slavery in the territories? The Constitution does not expressly say.

From questions of this class spring all our constitutional controversies, and we divide upon them into majorities and minorities. If the minority will not acquiesce, the majority must, or the government must cease. There is no other alternative; for continuing the government is acquiescence on one side or the other.

If a minority in such case will secede rather than acquiesce, they make a precedent which in turn will divide and ruin them; for a minority of their own will secede from them whenever a majority refuses to be controlled by such minority. For instance, why may not any portion of a new confederacy a year or two hence arbitrarily secede again, precisely as portions of the present Union now claim to secede from it? All who cherish disunion sentiments are now being educated to the exact temper of doing this.

Is there such perfect identity of interests among the states to compose

a new Union, as to produce harmony only, and prevent renewed secession?

Plainly, the central idea of secession is the essence of anarchy. A majority held in restraint by constitutional checks and limitations, and always changing easily with deliberate changes of popular opinions and sentiments, is the only true sovereign of a free people. Whoever rejects it does, of necessity, fly to anarchy or to despotism. Unanimity is impossible; the rule of a minority, as a permanent arrangement, is wholly inadmissible; so that, rejecting the majority principle, anarchy or despotism in some form is all that is left.

I do not forget the position, assumed by some, that constitutional questions are to be decided by the Supreme Court; nor do I deny that such decisions must be binding, in any case, upon the parties to a suit, as to the object of that suit, while they are also entitled to very high respect and consideration in all parallel cases by all other departments of the government. And while it is obviously possible that such decisions may be erroneous in any given case, still the evil effect following it, being limited to that particular case, with the chance that it may be overruled and never become a precedent for other cases, can better be borne than could the evils of a different practice. At the same time, the candid citizen must confess that if the policy of the government, upon vital questions affecting the whole people, is to be irrevocably fixed by decisions of the Supreme Court, the instant they are made, in ordinary litigation between parties in personal actions, the people will have ceased to be their own rulers, having to that extent practically resigned their government into the hands of that eminent tribunal. Nor is there in this view any assault upon the court or the judges. It is a duty from which they may not shrink to decide cases properly brought before them, and it is no fault of theirs if others seek to turn their decisions to political purposes.

One section of our country believes slavery is right, and ought to be extended, while the other believes it is wrong, and ought not be extended. This is the only substantial dispute. The fugitive-slave clause of the Constitution, and the law for the suppression of the foreign slave-trade, are each as well enforced, perhaps, as any law can ever be in a community where the moral sense of the people imperfectly supports the law itself. The great body of the people abide by the dry legal obligation in both cases, and a few break over in each. This, I think, cannot be perfectly cured; and it would be worse in both cases after the separation of the sections than before. The foreign slave-trade, now imperfectly suppressed, would be ultimately revived, without restriction, in one section, while fugitive slaves, now only partially surrendered, would not be surrendered at all by the other.

Physically speaking, we cannot separate. We cannot remove our respective sections from each other, nor build an impassable wall between them. A husband and wife may be divorced, and go out of the presence and beyond the reach of each other; but the different parts of our country cannot do this. They cannot but remain face to face, and intercourse, either amicable or hostile, must continue between them. Is it possible, then, to make that intercourse more advantageous or more satisfactory after separation than before? Can aliens make treaties easier than friends can make laws? Can treaties be more faithfully enforced between aliens than laws can among friends? Suppose you go to war,

you cannot fight always; and when, after much loss on both sides, and no gain on either, you cease fighting, the identical old questions as to terms of intercourse are again upon you.

This country, with its institutions, belongs to the people who inhabit it. Whenever they shall grow weary of the existing government, they can exercise their constitutional right of amending it, or their revolutionary right to dismember or overthrow it. I cannot be ignorant of the fact that many worthy and patriotic citizens are desirous of having the national Constitution amended. While I make no recommendation of amendments, I fully recognize the rightful authority of the people over the whole subject, to be exercised in either of the modes prescribed in the instrument itself; and I should, under existing circumstances, favor rather than oppose a fair opportunity being afforded the people to act upon it. I will venture to add that to me the convention mode seems preferable, in that it allows amendments to originate with the people themselves, instead of only permitting them to take or reject propositions originated by others not especially chosen for the purpose, and which might not be precisely such as they would wish to either accept or refuse. I understand a proposed amendment to the Constitution—which amendment, however, I have not seen—has passed Congress, to the effect that the federal government shall never interfere with the domestic institutions of the states, including that of persons held to service. To avoid misconstruction of what I have said, I depart from my purpose not to speak of particular amendments so far as to say that, holding such a provision to now be implied constitutional law, I have no objections to its being made express and irrevocable.

The chief magistrate derives all his authority from the people, and they have conferred none upon him to fix terms for the separation of the states. The people themselves can do this also if they choose; but the Executive, as such, has nothing to do with it. His duty is to administer the present government, as it came to his hands, and to transmit it, unimpaired by him, to his successor.

Why should there not be a patient confidence in the ultimate justice of the people? Is there any better or equal hope in the world? In our present differences is either party without faith of being in the right? If the Almighty Ruler of Nations, with His eternal truth and justice, be on your side of the North, or on yours of the South, that truth and that justice will surely prevail by the judgment of this great tribunal of the American people.

By the frame of the government under which we live, this same people have wisely given their public servants but little power for mischief; and have, with equal wisdom, provided for the return of that little to their own hands at very short intervals. While the people retain their virtue and vigilance, no administration, by any extreme of wickedness or folly, can very seriously injure the government in the short space of four years.

My countrymen, one and all, think calmly and well upon this whole subject. Nothing valuable can be lost by taking time. If there be an object to hurry any of you in hot haste to a step which you would never take deliberately, that object will be frustrated by taking time; but no good object can be frustrated by it. Such of you as are now dissatisfied, still have the old Constitution un-

impaired, and, on the sensitive point, the laws of your own framing under it; while the new administration will have no immediate power, if it would, to change either. If it were admitted that you who are dissatisfied hold the right side in the dispute, there still is no single good reason for precipitate action. Intelligence, patriotism, Christianity, and a firm reliance on Him who has never yet forsaken this favored land, are still competent to adjust in the best way all our present difficulty.

In your hands, my dissatisfied fellow-countrymen, and not in mine, is the momentous issue of civil war. The government will not assail you. You can have no conflict without being yourselves the aggressors. You have no oath registered in heaven to destroy the government, while I shall have the most solemn one to "preserve, protect, and defend it."

I am loath to close. We are not enemies, but friends. We must not be enemies. Though passion may have strained, it must not break our bonds of affection. The mystic chords of memory, stretching from every battle-field and patriot grave to every living heart and hearthstone all over this broad land, will yet swell the chorus of the Union when again touched, as surely they will be, by the better angels of our nature.

ADDRESS AT THE DEDICATION OF THE GETTYSBURG NATIONAL CEMETERY

Delivered November 19, 1863, at Gettysburg, Pennsylvania. Edward Everett had just made the formal address of two hours' duration to an audience of perhaps a hundred thousand people. Lincoln had outlined his address, and, at the last, committed it to paper, writing the concluding sentences in pencil after reaching Gettysburg.

FOURSCORE and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty, and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation, or any nation so conceived and so dedicated, can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field as a final resting-place for those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But, in a larger sense, we cannot dedicate—we cannot consecrate—we cannot hallow—this ground. The brave men, living and dead, who struggled here, have consecrated it far above our poor power to add or detract. The world will little note nor long remember what we say here, but it can never forget what they did here. It is for us, the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion; that we here highly resolve

that these dead shall not have died in vain; that this nation, under God, shall have a new birth of freedom; and that government of the people, by the people, for the people, shall not perish from the earth.

LETTER TO MRS. BIXBY

The original of this letter has not been found.

EXECUTIVE MANSION, WASHINGTON
November 21, 1864

MRS. BIXBY, Boston, Massachusetts.

Dear Madam: I have been shown in the files of the War Department a statement of the Adjutant-General of Massachusetts that you are the mother of five sons who have died gloriously on the field of battle. I feel how weak and fruitless must be any words of mine which should attempt to beguile you from the grief of a loss so overwhelming. But I cannot refrain from tendering to you the consolation that may be found in the thanks of the Republic they died to save. I pray that our heavenly Father may assuage the anguish of your bereavement, and leave you only the cherished memory of the loved and lost, and the solemn pride that must be yours to have laid so costly a sacrifice upon the altar of freedom.

Yours very sincerely and respectfully,
ABRAHAM LINCOLN.

SECOND INAUGURAL ADDRESS

Delivered March 4, 1865, at the Capitol. For clarity, beauty, and "high seriousness" it takes prominent rank among American speeches.

Fellow-Countrymen: At this second appearing to take the oath of the presidential office, there is less occasion for an extended address than there was at the first. Then a statement, somewhat in detail, of a course to be pursued, seemed fitting and proper. Now, at the expiration of four years, during which public declarations have been constantly called forth on every point and phase of the great contest which still absorbs the attention and engrosses the energies of the nation, little that is new could be presented. The progress of our arms, upon which all else chiefly depends, is as well known to the public as to myself; and it is, I trust, reasonably satisfactory and encouraging to all. With high hope for the future, no prediction in regard to it is ventured.

On the occasion corresponding to this four years ago, all thoughts were anxiously directed to an impending civil war. All dreaded it—all sought to avert it. While the inaugural address was being delivered from this place, devoted altogether to saving the Union without war, insurgent agents were in the city seeking to destroy it without war—seeking to dissolve the Union, and divide effects, by negotiation. Both parties deprecated war; but one of them would

make war rather than let the nation survive; and the other would accept war rather than let it perish. And the war came.

One-eighth of the whole population were colored slaves, not distributed generally over the Union, but localized in the Southern part of it. These slaves constituted a peculiar and powerful interest. All knew that this interest was, somehow, the cause of the war. To strengthen, perpetuate, and extend this interest was the object for which the insurgents would rend the Union, even by war; while the government claimed no right to do more than to restrict the territorial enlargement of it.

Neither party expected for the war the magnitude or the duration which it has already attained. Neither anticipated that the cause of the conflict might cease with, or even before, the conflict itself should cease. Each looked for an easier triumph, and a result less fundamental and astounding. Both read the same Bible, and pray to the same God; and each invokes his aid against the other. It may seem strange that any men should dare to ask a just God's assistance in wringing their bread from the sweat of other men's faces; but let us judge not, that we be not judged. The prayers of both could not be answered—that of neither has been answered fully.

The Almighty has his own purposes. "Woe unto the world because of offences! for it must needs be that offences come; but woe to that man by whom the offence cometh." If we shall suppose that American slavery is one of those offences which, in the providence of God, must needs come, but which, having continued through his appointed time, he now wills to remove, and that he gives to both North and South this terrible war, as the woe due to those by whom the offence came, shall we discern therein any departure from those divine attributes which the believers in a living God always ascribe to him? Fondly do we hope—fervently do we pray—that this mighty scourge of war may speedily pass away. Yet, if God wills that it continue until all the wealth piled by the bondman's two hundred and fifty years of unrequited toil shall be sunk, and until every drop of blood drawn with the lash shall be paid by another drawn with the sword, as was said three thousand years ago, so still it must be said, "The judgments of the Lord are true and righteous altogether."

With malice toward none; with charity for all; with firmness in the right, as God gives us to see the right, let us strive on to finish the work we are in; to bind up the nation's wounds; to care for him who shall have borne the battle, and for his widow, and his orphan—to do all which may achieve and cherish a just and lasting peace among ourselves, and with all nations.

17. judge not . . . —*Cf.* Matt. 7:1. **19. Woe unto . . .** —*Cf.* Matt. 18:7. **32. The judgments . . .** —*Cf.* Ps. 19:9.

OLIVER WENDELL HOLMES

1809-1894

I. THE STUDENT (1809–1838)

1809 August 29, born at Cambridge, Massachusetts, the eldest son and fourth child of the Rev. Abiel and Sarah Wendell Holmes.
1819–24 Attended Cambridge schools.
1824 Entered Phillips Academy, Andover, Massachusetts.
1825 Summer, entered Harvard College, contributing to the college paper in later years.
1829 Graduated from Harvard College, and entered upon the study of law (to 1830).
1830 September 16, "Old Ironsides" appeared in the Boston *Daily Advertiser.* Holmes studying medicine in the private school of Dr. James Jackson.
1831 November, earliest paper of *The Autocrat of the Breakfast-Table* series appeared in the *New England Magazine;* second printed in February, 1832.
1833 March, sailed for Europe, arriving in England April 26, and going to Paris, where he studied medicine under Louis, Larrey, and others. His studies were interrupted in the springs and summers by trips in France, Holland, Switzerland, Italy, England.
1835 December, returned to New York, and thence to Boston.
1836 Published *Poems* (Boston); won Boylston Prize for medical essay (and again in 1837); received degree of M.D. from Harvard College.
1838 Appointed professor of anatomy in Dartmouth College, his lectures coming in August, September, October (held position to 1840).

II. THE PROFESSOR (1838–1857)

1840 June 15, married Amelia Lee Jackson; lived in Boston.
1842 Published *Homoeopathy and Its Kindred Delusions* (Boston).
1843 Read paper on "The Contagiousness of Puerperal Fever" before the Boston Society for Medical Improvement (published in Boston; reworked and republished in 1855).
1846 Published *Poems* (London, 1846; Boston, 1852); also *Urania: A Rhymed Lesson* (Boston, 1846).
1847 Appointed Parkman professor of anatomy and physiology in the Harvard Medical School (1871, title changed to professor of anatomy).
1847–53 Dean of the Medical School.
1849 Published *Poems* (Boston).
1849–53 Spent summers on farm near Pittsfield, Massachusetts.
1851 First class poem for the class of '29.
1853 Delivered Lowell Institute lectures on the English poets.

III. THE AUTOCRAT OF THE BREAKFAST-TABLE (1857–1894)

1857 Holmes named the *Atlantic Monthly;* and, at Lowell's suggestion, continued the *Autocrat* papers (published in book form, Boston, 1858). Holmes a member of The Saturday Club.
1860 Published *The Professor at the Breakfast-Table* (Boston, 1859); also *Currents and Counter-Currents in Medical Science* (Boston).
1861 Published *Elsie Venner: A Romance of Destiny* (Boston).
1862 Published *Songs in Many Keys* (Boston, 1861).
1863 Delivered Fourth of July oration in Boston.
1864 Published *Soundings from the Atlantic* (Boston, 1863).
1867 Published *The Guardian Angel* (Boston).
1872 Published *The Poet at the Breakfast-Table* (Boston). The intervening years saw the writing of many medical essays and addresses.
1875 Published *Songs of Many Seasons* (Boston).
1879 Published *John Lothrop Motley: A Memoir* (Boston, 1878).
1880 Made an LL.D. by Harvard; published *The Iron Gate and Other Poems* (Boston).
1882 Became professor emeritus at Harvard.
1883 Published *Medical Essays* (Boston) and *Pages from an Old Volume of Life* (Boston).
1885 Published *Ralph Waldo Emerson* (American Men of Letters series) and *A Mortal Antipathy* (Boston).
1886 Trip of three months in Europe, receiving various honorary degrees, the trip being recorded in *Our Hundred Days in Europe* (1887).
1887–88 Illness and death of his wife (eldest son, Edward, died, 1884); published *Before the Curfew and Other Poems* (Boston, 1888).
1889 Death of Holmes's daughter, Mrs. Sargent.
1891 Published *Over the Teacups* (Boston, 1890); *Poetical Works* (Boston).
1894 October 7, Holmes died in Boston.
1895 *Complete Poetical Works* published.

BIOGRAPHIES: J. T. Morse, Jr., *Life and Letters of Oliver Wendell Holmes,* Houghton Mifflin, 1896; M. A. DeW. Howe, *Holmes of the Breakfast-Table,* Oxford University Press, 1937.

BIBLIOGRAPHY AND EDITIONS: G. B. Ives, *A Bibliography of Oliver Wendell Holmes,* Houghton Mifflin, 1907; *Literary History of the United States,* Vol. III, pp. 564-68.

There is no absolutely complete edition, but the *Complete Works of Oliver Wendell Holmes,* Houghton Mifflin, 1891-92, 13 vols. (Riverside edition), is good. There are various formats, such as the Standard Library edition, 1892; the Artists' edition, 1892-96; and the Autocrat edition, 1904. See the *Representative Selections from Oliver Wendell Holmes,* ed. S. I. Hayakawa and H. M. Jones (American Writers Series), American Book Co., 1939. Interesting is Clarence P. Oberndorf, ed., *The Psychiatric Novels of Oliver Wendell Holmes,* Columbia, 1943.

Dr. Holmes made but few claims on immortality, and posterity has obligingly accepted him at his own modest estimation of his merits. One therefore finds in the histories and anthologies that Oliver Wendell Holmes was a charming writer of light verse, and that he wrote those brilliant bits of *causerie,* the Breakfast-Table series. Sometimes it is remembered that he wrote "medicated" novels. And always

he is portrayed as a type-representative of the Boston-Cambridge Brahmin caste. Holmes's reputation has, accordingly, somewhat declined, and he is ranked with the minor authors rather than with the classics of major importance.

A more careful reading of Holmes reveals, however, some reason to distrust the complacence of posterity. Holmes is undoubtedly a distinguished writer of light verse, but then, light verse is not easy to write, and the infallible tact which Holmes brought to the writing of his occasional poems and his *vers de société* results from that art which conceals art. His muse is the last incarnation of the eighteenth-century manner in America—a manner refined and improved upon until the name of Austin Dobson need not cause the shade of Dr. Holmes much uneasiness. And if Holmes was a Brahmin, he saw the strength and weakness of the Brahmin caste with too shrewd an eye to admit dismissing him as merely one of them. Holmes's Brahminism was, as his biographer remarks, not provincial but racial.

There is a Holmes, however, of more importance than the *causeur* and the writer of class poems, and this is the Holmes who battled all his life for intellectual liberty. Because the country has absorbed his reforms, it is difficult to see how important they were; but in essay and novel, in poem and letter, in jest and Breakfast-Table conversation he attacked the still formidable fortress of nineteenth-century Calvinism in the name of humanity and science. In an essay such as the one on Jonathan Edwards he trains all his batteries on intrenchments that were still stoutly defended; and his "medicated" novels present problems not so much medical as confounding to the theologians. Because the guiding principle of the Breakfast-Table series is informality, most readers do not see that Holmes is a brilliant swordsman in the cause of philosophical freedom. And in the field of medicine he relentlessly attacked quackery, carelessness, and smugness. Moreover, he early familiarized his readers with many of the concepts of heredity and evolution which, had they been presented by a less skillful writer, would not have been received. Under the bland and urbane exterior of an author too frequently dismissed as little better than trivial, there is a deadly earnestness in the cause of liberalism. For this reason the editors have ventured to present selections from Holmes which represent another side of his writing than that usually given in the anthologies.

OLD IRONSIDES

First published in the Boston *Daily Advertiser,* September 16, 1830. The circumstances are explained in the notes which Holmes added to the poem, given below. The poem was then gathered into the *Poems* of 1836, without title, as part of "Poetry: A Metrical Essay"; it was reprinted in the *Boston Book* of 1837; in the "Blue and Gold" edition of the *Poems* (1862) it reappeared as an independent unit; and in the Household and Riverside editions it took its place as part of the "Earlier Poems." Holmes's note is as follows:

"This was the popular name by which the frigate Constitution was known. The poem was first printed in the *Boston Daily Advertiser,* at the time when it was proposed to break up the old ship as unfit for service. I subjoin the paragraph which led to the writing of the poem. It is from the *Advertiser* of Tuesday, September 14, 1830:—

"'*Old Ironsides.*—It has been affirmed upon good authority that the Secretary of the Navy has recommended to the Board of Navy Commissioners to dispose of the frigate Constitution. Since it has been understood that such a step was in contemplation we have heard but one opinion expressed, and that in decided disapprobation of the measure. Such a national object of interest, so endeared to our national pride as Old Ironsides is, should never by any act of our government cease to belong to the Navy, so long as our country

s to be found upon the map of nations. In England it was lately determined by the Admiralty to cut the Victory, a one-hundred gun ship (which it will be recollected bore the flag of Lord Nelson at the battle of Trafalgar,) down to a seventy-four, but so loud were the lamentations of the people upon the proposed measure that the intention was abandoned. We confidently anticipate that he Secretary of the Navy will in like manner consult the general wish in regard to the Constitution, and either let her remain in ordinary or rebuild her whenever the public ervice may require.'—*New York Journal of Commerce.*

"The poem was an impromptu outburst of feeling and was published on the next day but one after reading the above paragraph."

The *Constitution* distinguished itself in he War of 1812 by defeating the British hip *Guerrière* in August, 1812, and by defeating the *Java* in December. Popular opinon resulted in saving the ship for posterity. Holmes's interest was aroused by the fact, among others, that, when he wrote the poem, he *Constitution* was lying in the Charlestown Navy Yard, Boston.

Ay, tear her tattered ensign down!
  Long has it waved on high,
And many an eye has danced to see
  That banner in the sky;
Beneath it rung the battle shout,
  And burst the cannon's roar;—
The meteor of the ocean air
  Shall sweep the clouds no more!

Her deck, once red with heroes' blood,
  Where knelt the vanquished foe,
When winds were hurrying o'er the flood,
  And waves were white below,
No more shall feel the victor's tread,
  Or know the conquered knee;—
The harpies of the shore shall pluck
  The eagle of the sea!

O better that her shattered hulk
  Should sink beneath the wave;
Her thunders shook the mighty deep,
  And there should be her grave;
Nail to the mast her holy flag,
  Set every threadbare sail,
And give her to the god of storms,
  The lightning and the gale!

THE LAST LEAF

First published in the *Amateur,* March 23, 1831; republished in the *Harbinger,* 1833, the *Laurel,* 1836, and the *Knickerbocker or New York Monthly Magazine,* February, 1836; collected in *Poems,* 1836; part of "Earlier Poems" in the Household edition. In the Riverside edition, the poem is preceded by the following note:

"This poem was suggested by the appearance in one of our streets of a venerable relic of the Revolution, said to be one of the party who threw the tea overboard in Boston Harbor. He was a fine monumental specimen in his cocked hat and knee breeches, with his buckled shoes and his sturdy cane. The smile with which I, as a young man, greeted him, meant no disrespect to an honored fellow-citizen whose costume was out of date, but whose patriotism never changed with years. I do not recall any earlier example of this form of verse, which was commended by the fastidious Edgar Allan Poe, who made a copy of the whole poem which I have in his own handwriting. Good Abraham Lincoln had a great liking for the poem, and repeated it from memory to Governor Andrew, as the governor himself told me."

The subject of the poem was Major Thomas Melville, the grandfather of Herman Melville.

I saw him once before,
As he passed by the door,
  And again
The pavement stones resound,
As he totters o'er the ground
  With his cane.

They say that in his prime,
Ere the pruning-knife of Time
  Cut him down,

Not a better man was found
By the Crier on his round
  Through the town.

But now he walks the streets,
And he looks at all he meets
  Sad and wan,
And he shakes his feeble head,
That it seems as if he said,
  "They are gone."

The mossy marbles rest
On the lips he has prest
  In their bloom,
And the names he loved to hear
Have been carved for many a year
  On the tomb.

My grandmamma has said—
Poor old lady, she is dead
  Long ago—
That he had a Roman nose,
And his cheek was like a rose
  In the snow.

But now his nose is thin,
And it rests upon his chin
  Like a staff,
And a crook is in his back,
And a melancholy crack
  In his laugh.

I know it is a sin
For me to sit and grin
  At him here;
But the old three-cornered hat,
And the breeches, and all that,
  Are so queer!

And if I should live to be
The last leaf upon the tree
  In the spring,
Let them smile, as I do now,
At the old forsaken bough
  Where I cling.

MY AUNT

First published in the *New England Magazine*, October, 1831; republished in the *Harbinger*, 1833; collected into the *Poems* of 1836; in the London *Poems* of 1846 put in the section "Lyrics"; and in the Household edition, under "Earlier Poems."

My aunt! my dear unmarried aunt!
  Long years have o'er her flown;
Yet still she strains the aching clasp
  That binds her virgin zone;
I know it hurts her,—though she looks
  As cheerful as she can;
Her waist is ampler than her life,
  For life is but a span.

My aunt! my poor deluded aunt!
  Her hair is almost gray;
Why will she train that winter curl
  In such a spring-like way?
How can she lay her glasses down,
  And say she reads as well,
When through a double convex lens
  She just makes out to spell?

Her father—grandpapa! forgive
  This erring lip its smiles—
Vowed she should make the finest girl
  Within a hundred miles;
He sent her to a stylish school;
  'Twas in her thirteenth June;
And with her, as the rules required,
  "Two towels and a spoon."

They braced my aunt against a board,
  To make her straight and tall;
They laced her up, they starved her down,
  To make her light and small;
They pinched her feet, they singed her hair,
  They screwed it up with pins;—
O never mortal suffered more
  In penance for her sins.

But when my precious aunt was done,
  My grandsire brought her back;
(By daylight, lest some rabid youth
  Might follow on the track;)
"Ah!" said my grandsire, as he shook
  Some powder in his pan,*
"What could this lovely creature do
  Against a desperate man!"

11. **Crier**—town crier. * **pan**—in eighteenth-century muskets the hollow part of the lock, which received the priming.

Alas! nor chariot, nor barouche,
Nor bandit cavalcade,
Tore from the trembling father's arms
His all-accomplished maid.

For her how happy had it been!
And Heaven had spared to me
To see one sad, ungathered rose
On my ancestral tree.

THE BALLAD OF THE OYSTERMAN

First published in the *Amateur,* July 17, 1830; then in the *Harbinger,* 1833; collected into *Poems* (1836); became part of "Miscellaneous Poems (1830, etc.)" of the Household edition, and part of "Verses from the Oldest Portfolio" in the Riverside edition. The poem is amusing in itself; the student should also note the implied attack upon some of the stock in trade of romantic love poetry.

It was a tall young oysterman lived by the river-side,
His shop was just upon the bank, his boat was on the tide;
The daughter of a fisherman, that was so straight and slim,
Lived over on the other bank, right opposite to him.

It was the pensive oysterman that saw a lovely maid,
Upon a moonlight evening, a sitting in the shade;
He saw her wave her handkerchief, as much as if to say,
"I'm wide awake, young oysterman, and all the folks away."

Then up arose the oysterman, and to himself said he,
"I guess I'll leave the skiff at home, for fear that folks should see;
I read it in the story-book, that, for to kiss his dear,
Leander swam the Hellespont,—and I will swim this here."

And he has leaped into the waves, and crossed the shining stream,
And he has clambered up the bank, all in the moonlight gleam;
O there were kisses sweet as dew, and words as soft as rain,—
But they have heard her father's step, and in he leaps again!

Out spoke the ancient fisherman,—"O what was that, my daughter?"
" 'T was nothing but a pebble, sir, I threw into the water."
"And what is that, pray tell me, love, that paddles off so fast?"
"It's nothing but a porpoise, sir, that's been a swimming past."

Out spoke the ancient fisherman,—"Now bring me my harpoon!
I'll get into my fishing-boat, and fix the fellow soon."
Down fell that pretty innocent, as falls a snow-white lamb,
Her hair drooped round her pallid cheeks, like seaweed on a clam.

Alas for those two loving ones! she waked not from her swound,
And he was taken with the cramp, and in the waves was drowned;
But Fate has metamorphosed them, in pity of their woe,
And now they keep an oyster-shop for mermaids down below.

41. chariot—light, four-wheeled "buggy." **41. barouche**—four-wheeled carriage with a seat in front for the driver, two double seats inside, and a folding top.

AFTER A LECTURE ON WORDSWORTH

In 1853 Holmes delivered some lectures on the English poets at the Lowell Institute in Boston. At the conclusion of the lecture on Wordsworth he read this poem. Under the title "A Vision of the Housatonic. Epilogue to a Lecture on Wordsworth" it was first printed in *The Knickerbocker Gallery* (1855), and reprinted in *The Atlantic Souvenir* (1859). Under its present title it appears as part of the "Vignettes" section of *Songs in Many Keys* (1862). The student will note that Holmes echoes many bits of Wordsworthian phraseology and cadence.

Come, spread your wings, as I spread mine.
  And leave the crowded hall
For where the eyes of twilight shine
  O'er evening's western wall.

These are the pleasant Berkshire hills,
  Each with its leafy crown;
Hark! from their sides a thousand rills
  Come singing sweetly down.

A thousand rills; they leap and shine,
  Strained through the shadowy nooks,
Till, clasped in many a gathering twine,
  They swell a hundred brooks.

A hundred brooks, and still they run
  With ripple, shade, and gleam,
Till clustering all their braids in one,
  They flow a single stream.

A bracelet spun from mountain mist,
  A silvery sash unwound,
With ox-bow curve and sinuous twist
  It writhes to reach the Sound.

This is my bark,—a pygmy's ship;
  Beneath a child it rolls;
Fear not,—one body makes it dip,
  But not a thousand souls.

Float we the grassy banks between;
  Without an oar we glide;
The meadows, drest in living green,
  Unroll on either side.

Come, take the book we love so well,
  And let us read and dream
We see whate'er its pages tell,
  And sail an English stream.

Up to the clouds the lark has sprung,
  Still trilling as he flies;
The linnet sings as there he sung;
  The unseen cuckoo cries,

And daisies strew the banks along,
  And yellow kingcups shine,
With cowslips, and a primrose throng,
  And humble celandine.

Ah foolish dream! when Nature nursed
  Her daughter in the West,
The fount was drained that opened first;
  She bared her other breast.

On the young planet's orient shore
  Her morning hand she tried;
Then turned the broad medallion o'er
  And stamped the sunset side.

Take what she gives, her pine's tall stem,
  Her elm with hanging spray;
She wears her mountain diadem
  Still in her own proud way.

Look on the forests' ancient kings,
  The hemlock's towering pride:
Yon trunk had thrice a hundred rings,
  And fell before it died.

5. Berkshire—*Cf* note 58, p. 652. **20. Sound**—Long Island Sound. **29. book**—Wordsworth's *Poems* **33. Up to the clouds**—The opening line of Wordsworth's "To a Sky-Lark" is "Up with me! up into the clouds!" **35. linnet**—a bird to which Wordsworth addressed his poem "The Green Linnet." **36. cuckoo**—*Cf.* Wordsworth's "To the Cuckoo"—"still longed for, never seen." **37. daisies**—Wordsworth has four poems on the daisy. **39. primrose**—There is a famous primrose in "Peter Bell"; and Wordsworth has also a poem "The Primrose of the Rock." **40. celandine**—Wordsworth addressed three poems to the "small celandine."

Nor think that Nature saves her bloom
And slights our grassy plain;
For us she wears her court costume,—
Look on its broidered train;

The lily with the sprinkled dots,
Brands of the noontide beam;
The cardinal, and the blood-red spots,
Its double in the stream,

As if some wounded eagle's breast,
Slow throbbing o'er the plain,
Had left its airy path impressed
In drops of scarlet rain.

And hark! and hark! the woodland rings;
There thrilled the thrush's soul;
And look! that flash of flamy wings,—
The fire-plumed oriole!

Above, the hen-hawk swims and swoops,
Flung from the bright, blue sky;
Below, the robin hops, and whoops
His piercing, Indian cry.

Beauty runs virgin in the woods
Robed in her rustic green,
And oft a longing thought intrudes,
As if we might have seen

Her every finger's every joint
Ringed with some golden line,
Poet whom Nature did anoint!
Had our wild home been thine.

Yet think not so; Old England's blood
Runs warm in English veins;
But wafted o'er the icy flood
Its better life remains:

Our children know each wildwood smell,
The bayberry and the fern,
The man who does not know them well
Is all too old to learn.

Be patient! On the breathing page
Still pants our hurried past;
Pilgrim and soldier, saint and sage,—
The poet comes the last!

Though still the lark-voiced matins ring
The world has known so long;
The wood-thrush of the West shall sing
Earth's last sweet even-song!

THE VOICELESS

One of the *Autocrat* poems, for the bibliographical history of which see "The Living Temple."

We count the broken lyres that rest
Where the sweet wailing singers slumber,
But o'er their silent sister's breast
The wild-flowers who will stoop to number?
A few can touch the magic string,
And noisy Fame is proud to win them:—
Alas for those that never sing,
But die with all their music in them!

Nay, grieve not for the dead alone
Whose song has told their hearts' sad story,—
Weep for the voiceless, who have known
The cross without the crown of glory!
Not where Leucadian breezes sweep
O'er Sappho's memory-haunted billow,
But where the glistening night-dews weep
On nameless sorrow's churchyard pillow.

O hearts that break and give no sign
Save whitening lip and fading tresses,
Till Death pours out his longed-for wine
Slow-dropped from Misery's crushing presses,—

61. lily . . . dots—the tiger lily? **63. cardinal**—The American cardinal bird or cardinal grosbeak is not known in Europe. **70. thrush**—Holmes's catalogue is of American birds not native to Europe. **13. Leucadian**—Sappho, the Greek poetess of the sixth century B.C., is supposed to have leaped into the sea from the Leucadian rock because of an unhappy love affair.

If singing breath or echoing chord
To every hidden pang were given,
What endless melodies were poured,
As sad as earth, as sweet as heaven!

THE LIVING TEMPLE

This poem, also known as "The Anatomist's Hymn," formed part of the original *Autocrat of the Breakfast-Table,* and was published with an installment of that work in the *Atlantic Monthly* in 1858, and in the *Autocrat* in volume form. It was collected into *Songs in Many Keys* (1862); in the Household edition it formed part of "Songs in Many Keys, Part II, 1857-1861." It should be studied as reflecting Holmes's reverential attitude towards his chosen science. The anatomical references are obvious. The manner of the poem suggests the allegorical poems of the seventeenth century in England.

Not in the world of light alone,
Where God has built his blazing throne
Nor yet alone in earth below,
With belted seas that come and go,
And endless isles of sunlit green,
Is all thy Maker's glory seen:
Look in upon thy wondrous frame,—
Eternal wisdom still the same!

The smooth, soft air with pulse-like waves
Flows murmuring through its hidden caves,
Whose streams of brightening purple rush,
Fired with a new and livelier blush,
While all their burden of decay
The ebbing current steals away,
And red with Nature's flame they start
From the warm fountains of the heart.

No rest that throbbing slave may ask,
Forever quivering o'er his task,
While far and wide a crimson jet
Leaps forth to fill the woven net
Which in unnumbered crossing tides
The flood of burning life divides,
Then, kindling each decaying part,
Creeps back to find the throbbing heart.

But warmed with that unchanging flame
Behold the outward moving frame,
Its living marbles jointed strong
With glistening band and silvery thong,
And linked to reason's guiding reins
By myriad rings in trembling chains,
Each graven with the threaded zone
Which claims it as the master's own.

See how yon beam of seeming white
Is braided out of seven-hued light,
Yet in those lucid globes no ray
By any chance shall break astray.
Hark how the rolling surge of sound,
Arches and spirals circling round,
Wakes the hushed spirit through thine ear
With music it is heaven to hear.

Then mark the cloven sphere that holds
All thought in its mysterious folds;
That feels sensation's faintest thrill,
And flashes forth the sovereign will;
Think on the stormy world that dwells
Locked in its dim and clustering cells!
The lightning gleams of power it sheds
Along its hollow glassy threads!

O Father! grant thy love divine
To make these mystic temples thine!
When wasting age and wearying strife
Have sapped the leaning walls of life,
When darkness gathers over all,
And the last tottering pillars fall,
Take the poor dust thy mercy warms,
And mould it into heavenly forms!

THE BOYS

1859

From 1851 to 1889 Holmes furnished annually a poem for the reunion of the Harvard class of 1829, of which he was a member—the most remarkable series of

college poems ever written in the United States. "The Boys" was first published as part of *The Professor at the Breakfast-Table* in the *Atlantic Monthly,* February, 1859, and in the *Professor* volume (1859). It was collected into *Songs and Poems of the Class of 1829* (1859) and into *Songs in Many Keys* (1862). The Riverside edition has the following note:

"The members of the Harvard College class of 1829 referred to in this poem are: 'Doctor,' Francis Thomas; 'Judge,' G. T. Bigelow, Chief Justice of the Supreme Court of Massachusetts; 'Speaker,' Hon. Francis B. Crowninshield, Speaker of the Massachusetts House of Representatives; 'Mr. Mayor,' G. W. Richardson, of Worcester, Mass.; 'Member of Congress,' Hon. George T. Davis; 'Reverend,' James Freeman Clarke; 'boy with the grave mathematical look,' Benjamin Peirce; 'boy with a three-decker brain,' Judge Benjamin R. Curtis, of the Supreme Court of the United States; 'nice youngster of excellent pith,' S. F. Smith, author of 'My Country, 'tis of Thee.' "

Has there any old fellow got mixed with the boys?
If there has, take him out, without making a noise.
Hang the Almanac's cheat and the Catalogue's spite!
Old Time is a liar! We're twenty to-night!

We're twenty! We're twenty! Who says we are more?
He's tipsy,—young jackanapes!—show him the door!
"Gray temples at twenty?"—Yes! *white* if we please;
Where the snow-flakes fall thickest there's nothing can freeze!

Was it snowing I spoke of? Excuse the mistake!
Look close,—you will see not a sign of a flake!
We want some new garlands for those we have shed,—
And these are white roses in place of the red.

We've a trick, we young fellows, you may have been told,
Of talking (in public) as if we were old:—
That boy we call "Doctor," and this we call "Judge";
It's a neat little fiction,—of course it's all fudge.

That fellow's the "Speaker,"—the one on the right;
"Mr. Mayor," my young one, how are you to-night?
That's our "Member of Congress," we say when we chaff;
There's the "Reverend" What's his name?—don't make me laugh.

That boy with the grave mathematical look
Made believe he had written a wonderful book,
And the ROYAL SOCIETY thought it was *true!*
So they chose him right in; a good joke it was, too!

There's a boy, we pretend, with a three-decker brain,
That could harness a team with a logical chain;
When he spoke for our manhood in syllabled fire,
We called him "The Justice," but now he's "The Squire."

3. **Catalogue**—of Harvard graduates.

And there's a nice youngster of excellent pith,—
Fate tried to conceal him by naming him Smith;
But he shouted a song for the brave and the free,—
Just read on his medal, "My country," "of thee!"

You hear that boy laughing?—You think he's all fun;
But the angels laugh, too, at the good he has done;
The children laugh loud as they troop to his call,
And the poor man that knows him laughs loudest of all!

Yes, we're boys,—always playing with tongue or with pen,—
And I sometimes have asked,—Shall we ever be men?
Shall we always be youthful, and laughing, and gay,
Till the last dear companion drops smiling away?

Then here's to our boyhood, its gold and its gray!
The stars of its winter, the dews of its May!
And when we have done with our life-lasting toys,
Dear Father, take care of thy children, THE BOYS!

BROTHER JONATHAN'S LAMENT FOR SISTER CAROLINE

Published in the *Atlantic Monthly,* May, 1861; republished in *Chimes of Freedom and Union* (1861); collected into *Songs in Many Keys* (1862). On December 20, 1860, a convention at Columbia, South Carolina, adopted a resolution declaring that "the union now subsisting between South Carolina and the other states" was dissolved. On April 12, 1861, the Confederate troops opened fire on Fort Sumter, in Charleston Harbor. However, Holmes dated his poem March 25, 1861.

She has gone,—she has left us in passion and pride,—
Our stormy-browed sister, so long at our side!
She has torn her own star from our firmament's glow,
And turned on her brother the face of a foe!

O Caroline, Caroline, child of the sun,
We can never forget that our hearts have been one,—
Our foreheads both sprinkled in Liberty's name,
From the fountain of blood with the finger of flame!

You were always too ready to fire at a touch;
But we said, "She is hasty,—she does not mean much."
We have scowled, when you uttered some turbulent threat;
But Friendship still whispered, "Forgive and forget!"

Has our love all died out? Have its altars grown cold?
Has the curse come at last which the fathers foretold?

33. boy laughing—the Rev. Samuel May, the abolitionist. **9. too ready**—In 1832 a South Carolina convention had "nullified" the Tariff Acts of 1828 and 1832.

Then Nature must teach us the strength of the chain
That her petulant children would sever in vain.

They may fight till the buzzards are gorged with their spoil,
Till the harvest grows black as it rots in the soil,
Till the wolves and the catamounts troop from their caves,
And the shark tracks the pirate, the lord of the waves:

In vain is the strife! When its fury is past,
Their fortunes must flow in one channel at last,
As the torrents that rush from the mountains of snow
Roll mingled in peace through the valleys below.

Our Union is river, lake, ocean, and sky:
Man breaks not the medal, when God cuts the die!
Though darkened with sulphur, though cloven with steel,
The blue arch will brighten, the waters will heal!

O Caroline, Caroline, child of the sun,
There are battles with Fate that can never be won!
The star-flowering banner must never be furled,
For its blossoms of light are the hope of the world!

Go, then, our rash sister! afar and aloof,
Run wild in the sunshine away from our roof;
But when your heart aches and your feet have grown sore,
Remember the pathway that leads to our door!

THE CHAMBERED NAUTILUS

Again, part of the *Autocrat* papers, and first published in the *Atlantic Monthly,* 1858; collected into *Songs in Many Keys* (1862); and in the Household edition placed in the section of poems from the *Autocrat.* The chambered, or pearly, nautilus, native to the South Pacific and Indian oceans, is one of the cephalopods. The fancy connected with the nautilus is that it uses its membrane to serve as a sail.

This is the ship of pearl, which, poets feign,
Sails the unshadowed main,—
The venturous bark that flings
On the sweet summer wind its purpled wings
In gulfs enchanted, where the Siren sings,
And coral reefs lie bare,
Where the cold sea-maids rise to sun their streaming hair.

Its webs of living gauze no more unfurl;
Wrecked is the ship of pearl!
And every chambered cell,
Where its dim dreaming life was wont to dwell,
As the frail tenant shaped his growing shell,
Before thee lies revealed,—
Its irised ceiling rent, its sunless crypt unsealed!

Year after year beheld the silent toil
That spread his lustrous coil;
Still, as the spiral grew,
He left the past year's dwelling for the new,
Stole with soft step its shining archway through,
Built up its idle door,
Stretched in his last-found home, and knew the old no more.

Thanks for the heavenly message brought by thee,
Child of the wandering sea,
Cast from her lap, forlorn!
From thy dead lips a clearer note is born
Than ever Triton blew from wreathèd horn!
While on mine ear it rings,
Through the deep caves of thought I hear a voice that sings:—

Build thee more stately mansions, O my soul,
As the swift seasons roll!
Leave thy low-vaulted past!
Let each new temple, nobler than the last,
Shut thee from heaven with a dome more vast,
Till thou at length art free,
Leaving thine outgrown shell by life's unresting sea!

CONTENTMENT

"Man wants but little here below."

One of the *Autocrat* poems, following the bibliographical fortunes of the others. The motto is from Goldsmith, "The Hermit," stanza 8.

Little I ask; my wants are few;
I only wish a hut of stone,
(A *very plain* brown stone will do,)
That I may call my own;—
And close at hand is such a one,
In yonder street that fronts the sun.

Plain food is quite enough for me;
Three courses are as good as ten;—
If Nature can subsist on three,
Thank Heaven for three. Amen!
I always thought cold victual nice;—
My *choice* would be vanilla-ice.

I care not much for gold or land;—
Give me a mortgage here and there,—
Some good bank-stock, some note of hand,
Or trifling railroad share,—
I only ask that Fortune send
A *little* more than I shall spend.

Honors are silly toys, I know,
And titles are but empty names;
I would, *perhaps,* be Plenipo,—
But only near St. James;
I'm very sure I should not care
To fill our Gubernator's chair.

Jewels are baubles; 't is a sin
To care for such unfruitful things;—
One good-sized diamond in a pin,—
Some, *not so large,* in rings,—

26. Triton—*Cf.* Wordsworth: "hear old Triton blow his wreathèd horn," the last line of the sonnet beginning "The world is too much with us; late and soon." Triton is one of the lesser sea gods. **3. brown stone**—The "brown-stone front" was the fashionable mode of building among the rich when the poem was written. **21. Plenipo**—minister plenipotentiary. The joke lies in the fact that the poet would merely like to be the most important minister in the diplomatic service, the one credited to England, the Court of St. James's. **24. Gubernator**—Governor.

A ruby, and a pearl, or so,
Will do for me;—I laugh at show.

My dame should dress in cheap attire;
(Good, heavy silks are never dear;)—
I own perhaps I *might* desire
Some shawls for true Cashmere,—
Some marrowy crapes of China silk,
Like wrinkled skins on scalded milk.

I would not have the horse I drive
So fast that folks must stop and stare;
An easy gait—two, forty-five—
Suits me; I do not care;—
Perhaps, for just a *single spurt,*
Some seconds less would do no hurt.

Of pictures, I should like to own
Titians and Raphaels three or four,—
I love so much their style and tone,—
One Turner, and no more,
(A landscape,—foreground golden dirt,—
The sunshine painted with a squirt.)

Of books but few,—some fifty score
For daily use, and bound for wear;
The rest upon an upper floor;—
Some *little* luxury *there*
Of red morocco's gilded gleam,
And vellum rich as country cream.

Busts, cameos, gems,—such things as these,
Which others often show for pride,
I value for their power to please,
And selfish churls deride;—
One Stradivarius, I confess,
Two Meerschaums, I would fain possess.

Wealth's wasteful tricks I will not learn
Nor ape the glittering upstart fool;—
Shall not carved tables serve my turn,
But *all* must be of buhl?
Give grasping pomp its double share,—
I ask but *one* recumbent chair.

Thus humble let me live and die,
Nor long for Midas' golden touch;
If Heaven more generous gifts deny,
I shall not miss them *much,*—
Too grateful for the blessing lent
Of simple tastes and mind content!

THE DEACON'S MASTER-PIECE

OR, THE WONDERFUL "ONE-HOSS SHAY" A LOGICAL STORY

An *Autocrat* poem. The satire on Calvinism should be compared with Holmes's essay on Jonathan Edwards.

Have you heard of the wonderful one-hoss shay,
That was built in such a logical way
It ran a hundred years to a day,
And then, of a sudden, it—ah, but stay,
I'll tell you what happened without delay,
Scaring the parson into fits,
Frightening people out of their wits,—
Have you ever heard of that, I say?

Seventeen hundred and fifty-five.
Georgius Secundus was then alive,—
Snuffy old drone from the German hive.
That was the year when Lisbon-town
Saw the earth open and gulp her down,
And Braddock's army was done so brown,
Left without a scalp to its crown.
It was on the terrible Earthquake-day
That the Deacon finished the one-hoss shay.

39. two, forty-five—that is, a fast horse. **44. Titians**—Tiziano Vecellio (1477-1576), great Venetian painter. **44. Raphaels**—Raffaello Sanzio (1483-1520), Italian painter. **46. Turner**—J. M. W. Turner (1775-1851), English landscape painter celebrated by Ruskin. **59. Stradivarius**—The violins manufactured by Antonio Stradivari of Cremona (1644-1737) are priceless. **60. Meerschaums**—Genuine meerschaum pipes were, and are, expensive. **64. buhl**—cabinetwork inlaid with tortoise shell, metal, and so on. **68. Midas**—who, in Greek mythology, as a punishment for his greed, was compelled to turn into gold everything he touched, including his child. **10. Georgius Secundus**—George II, born in Hanover, and King of England 1727-60. **12. Lisbon-town**—The terrible Lisbon earthquake of 1755 furnished a moot point in theology, seeming to deny the goodness of God. **14. Braddock's**—General Edward Braddock (1695-1755), defeated and killed by the French and Indians.

Now in building of chaises, I tell you what,
There is always *somewhere* a weakest spot,—
In hug, tire, felloe, in spring or thill,
In panel, or crossbar, or floor, or sill,
In screw, bolt, thoroughbrace,—lurking still,
Find it somewhere you must and will,—
Above or below, or within or without,—
And that's the reason, beyond a doubt,
That a chaise *breaks down,* but doesn't *wear out.*

But the Deacon swore, (as Deacons do,
With an "I dew vum," or an "I tell *yeou,*")
He would build one shay to beat the taown
'n' the keounty 'n' all the kentry raoun';
It should be so built that it *couldn'* break daown:
"Fur," said the Deacon, "'t's mighty plain
Thut the weakes' place mus' stan' the strain;
'n' the way t' fix it, uz I maintain,
Is only jest
T' make that place uz strong uz the rest."

So the Deacon inquired of the village folk
Where he could find the strongest oak,
That could n't be split nor bent nor broke,—
That was for spokes and floor and sills;
He sent for lancewood to make the thills;
The crossbars were ash, from the straightest trees,
The panels of white-wood, that cuts like cheese,
But lasts like iron for things like these;

The hubs of logs from the "Settler's ellum,"—
Last of its timber,—they couldn't sell 'em,
Never an axe had seen their chips,
And the wedges flew from between their lips,
Their blunt ends frizzled like celery-tips;
Step and prop-iron, bolt and screw,
Spring, tire, axle, and linchpin too,
Steel of the finest, bright and blue;
Thoroughbrace bison-skin, thick and wide;
Boot, top, dasher, from tough old hide
Found in the pit when the tanner died,
That was the way he "put her through."
"There!" said the Deacon, "naow she'll dew!"

Do! I tell you, I rather guess
She was a wonder, and nothing less!
Colts grew horses, beards turned gray,
Deacon and deaconess dropped away,
Children and grandchildren—where were they?
But there stood the stout old one-hoss shay
As fresh as on Lisbon-earthquake-day!

EIGHTEEN HUNDRED;—it came and found
The Deacon's masterpiece strong and sound.
Eighteen hundred increased by ten;—
"Hahnsum kerridge" they called it then.
Eighteen hundred and twenty came;—
Running as usual; much the same.
Thirty and forty at last arrive,
And then come fifty, and FIFTY-FIVE.

Little of all we value here
Wakes on the morn of its hundredth year
Without both feeling and looking queer.
In fact, there's nothing that keeps its youth,
So far as I know, but a tree and truth.
(This is a moral that runs at large;
Take it.—You're welcome.—No extra charge.)

FIRST OF NOVEMBER,—the Earthquake-day,—
There are traces of age in the one-hoss shay,
A general flavor of mild decay,
But nothing local, as one may say.
There couldn't be,—for the Deacon's art
Had made it so like in every part
That there wasn't a chance for one to start.
For the wheels were just as strong as the thills,
And the floor was just as strong as the sills,
And the panels just as strong as the floor,
And the whipple-tree neither less nor more,
And the back-crossbar as strong as the fore,
And spring and axle and hub *encore.*
And yet, *as a whole,* it is past a doubt
In another hour it will be *worn out!*

First of November, 'Fifty-five!
This morning the parson takes a drive.
Now, small boys, get out of the way!
Here comes the wonderful one-hoss shay,
Drawn by a rat-tailed, ewe-necked bay.

18. chaises—Note that the French form "chaise" comes to be pronounced "shay." **20. felloe**—the exterior wooden rim of the wheel. **20. thill**—one of the two shafts by which a horse is hitched to a vehicle. **22. thoroughbrace**—leather strap supporting the body of a carriage. **50. linchpin**—a pin inserted in the end of the axletree to hold the wheel.

"Huddup!" said the parson.—Off went they.
The parson was working his Sunday's text,—
Had got to *fifthly,* and stopped perplexed
At what the—Moses—was coming next.
All at once the horse stood still,
Close by the meet'n'-house on the hill.
First a shiver, and then a thrill,
Then something decidedly like a spill,—
And the parson was sitting upon a rock,
At half past nine by the meet'n'-house clock,—
Just the hour of the Earthquake shock!
What do you think the parson found,
When he got up and stared around?
The poor old chaise in a heap or mound,
As if it had been to the mill and ground!
You see, of course, if you're not a dunce,
How it went to pieces all at once,—
All at once, and nothing first,—
Just as bubbles do when they burst.

End of the wonderful one-hoss shay.
Logic is logic. That's all I say.

DOROTHY Q.

A FAMILY PORTRAIT

Published in the *Atlantic Monthly,* January, 1871, and collected into *Songs of Many Seasons* (1875) as part of the "In the Quiet Days" section. In the Riverside edition Holmes prefaces the poem by the following note:

"I cannot tell the story of Dorothy Q. more simply in prose than I have told it in verse, but I can add something to it.

"Dorothy was the daughter of Judge Edmund Quincy, and the niece of Josiah Quincy, junior, the young patriot and orator who died just before the American Revolution, of which he was one of the most eloquent and effective promoters. The son of the latter, Josiah Quincy, the first mayor of Boston bearing that name, lived to a great age, one of the most useful and honored citizens of his time.

"The canvas of the painting was so much decayed that it had to be replaced by a new one, in doing which the rapier thrust was of course filled up."

Grandmother's mother: her age, I guess,
Thirteen summers, or something less;
Girlish bust, but womanly air;
Smooth, square forehead with uprolled hair;
Lips that lover has never kissed;
Taper fingers and slender wrist;
Hanging sleeves of stiff brocade;
So they painted the little maid.

On her hand a parrot green
Sits unmoving and broods serene.
Hold up the canvas full in view,—
Look! there's a rent the light shines through,
Dark with a century's fringe of dust,—
That was a Red-Coat's rapier-thrust!
Such is the tale the lady old,
Dorothy's daughter's daughter, told.

Who the painter was none may tell,—
One whose best was not over well;
Hard and dry, it must be confessed,
Flat as a rose that has long been pressed;
Yet in her cheek the hues are bright,
Dainty colors of red and white,
And in her slender shape are seen
Hint and promise of stately mien.

Look not on her with eyes of scorn,—
Dorothy Q. was a lady born!
Ay! since the galloping Normans came,
England's annals have known her name;
And still to the three-hilled rebel town
Dear is that ancient name's renown,
For many a civic wreath they won,
The youthful sire and the gray-haired son.

O Damsel Dorothy! Dorothy Q.!
Strange is the gift that I owe to you;
Such a gift as never a king
Save to daughter or son might bring,—
All my tenure of heart and hand,
All my title to house and land;
Mother and sister and child and wife
And joy and sorrow and death and life!

27. Normans—Quincy is a Norman French name, brought into England at the time of the Norman Conquest (1066). **29. three-hilled . . . town**—Boston was once known as Tremont, because of the three hills on which it was built.

What if a hundred years ago
Those close-shut lips had answered No,
When forth the tremulous question came
That cost the maiden her Norman name,
And under the folds that look so still
The bodice swelled with the bosom's thrill?
Should I be I, or would it be
One tenth another, to nine tenths me?

Soft is the breath of a maiden's YES:
Not the light gossamer stirs with less;
But never a cable that holds so fast
Through all the battles of wave and blast,
And never an echo of speech or song
That lives in the babbling air so long!
There were tones in the voice that whispered then
You may hear to-day in a hundred men.

O lady and lover, how faint and far
Your images hover,—and here we are,
Solid and stirring in flesh and bone,—
Edward's and Dorothy's—all their own,—
A goodly record for Time to show
Of a syllable spoken so long ago!—
Shall I bless you, Dorothy, or forgive
For the tender whisper that bade me live?

It shall be a blessing, my little maid!
I will heal the stab of the Red-Coat's blade,
And freshen the gold of the tarnished frame,
And gild with a rhyme your household name;
So you shall smile on us brave and bright
As first you greeted the morning's light,
And live untroubled by woes and fears
Through a second youth of a hundred years.

AT THE PANTOMIME

First published in *Songs of Many Seasons* (1875), though Holmes appends the cryptic note: "18—. Rewritten 1874," indicating that the germ of the poem is earlier. The last four verses formed part of an installment of *Over the Teacups* in the *Atlantic Monthly* for July, 1890. It forms part of the "In the Quiet Days" section of the 1875 volume.

The house was crammed from roof to floor,
Heads piled on heads at every door;
Half dead with August's seething heat
I crowded on and found my seat,
My patience slightly out of joint,
My temper short of boiling-point,
Not quite at *Hate mankind as such,*
Nor yet at *Love them overmuch.*

Amidst the throng the pageant drew
Were gathered Hebrews not a few,
Black-bearded, swarthy,—at their side
Dark, jewelled women, orient-eyed:
If scarce a Christian hopes for grace
Who crowds one in his narrow place,
What will the savage victim do
Whose ribs are kneaded by a Jew?

Next on my left a breathing form
Wedged up against me, close and warm;
The beak that crowned the bistred face
Betrayed the mould of Abraham's race,—
That coal-black hair, that smoke-brown hue,—
Ah, cursèd, unbelieving Jew!
I started, shuddering, to the right,
And squeezed—a second Israelite!

Then woke the evil brood of rage
That slumber, tongueless, in their cage;
I stabbed in turn with silent oaths
The hook-nosed kite of carrion clothes,
The snaky usurer, him that crawls
And cheats beneath the golden balls,
Moses and Levi, all the horde,
Spawn of the race that slew its Lord.

Up came their murderous deeds of old,
The grisly story Chaucer told,
And many an ugly tale beside
Of children caught and crucified;
I heard the ducat-sweating thieves

19. bistred—Bistre is a dark brown pigment. **28. carrion clothes**—"Ol' clothes man" was a slang term for the Jew much bandied about in the nineteenth century. **34. Chaucer**—the story of Hugh of Lincoln. **36. children caught and crucified**—The legend of the "ritual murder" of Gentile children by the Jews is an ancient and baseless slander. **37. ducat-sweating**—a reminiscence of Shylock's lament as reported by Salanio, *Merchant of Venice,* Act II, scene 8.

Beneath the Ghetto's [illegible] eaves,
And, thrust beyond the tented green,
The lepers cry, "Unclean! Unclean!"

The show went on, but, ill at ease,
My sullen eye it could not please.
In vain my conscience whispered, "Shame!
Who but their Maker is to blame?"
I thought of Judas and his bribe,
And steeled my soul against their tribe:
My neighbors stirred; I looked again
Full on the younger of the twain.

A fresh young cheek whose olive hue
The mantling blood shows faintly through;
Locks dark as midnight, that divide
And shade the neck on either side;
Soft, gentle, loving eyes that gleam
Clear as a starlit mountain stream;—
So looked that other child of Shem,
The Maiden's Boy of Bethlehem!

And thou couldst scorn the peerless blood
That flows unmingled from the Flood,—
Thy scutcheon spotted with the stains
Of Norman thieves and pirate Danes!
The New World's foundling, in thy pride
Scowl on the Hebrew at thy side,
And lo! the very semblance there
The Lord of Glory deigned to wear!

I see that radiant image rise,
The flowing hair, the pitying eyes,
The faintly crimsoned cheek that shows
The blush of Sharon's opening rose,—
Thy hands would clasp his hallowed feet
Whose brethren soil thy Christian seat,
Thy lips would press his garment's hem
That curl in wrathful scorn for them!

A sudden mist, a watery screen,
Dropped like a veil before the scene;
The shadow floated from my soul,
And to my lips a whisper stole,—
"Thy prophets caught the Spirit's flame,
From thee the Son of Mary came,
With thee the Father deigned to dwell,—
Peace be upon thee, Israel!"

NEARING THE SNOW-LINE

First published in the *Atlantic Monthly*, January, 1870, and collected into *Songs of Many Seasons* (1875), where it forms the terminal poem of the section "In the Quiet Days."

Slow toiling upward from the misty vale,
I leave the bright enamelled zones below;
No more for me their beauteous bloom shall glow,
Their lingering sweetness load the morning gale;
Few are the slender flowerets, scentless, pale,
That on their ice-clad stems all trembling blow
Along the margin of unmelting snow;
Yet with unsaddened voice thy verge I hail,
White realm of peace above the flowering line;
Welcome thy frozen domes, thy rocky spires!
O'er thee undimmed the moon-girt planets shine,
On thy majestic altars fade the fires
That filled the air with smoke of vain desires,
And all the unclouded blue of heaven is thine!

40. Unclean—*Cf.* Lev. 13:45. **45. Judas . . . bribe**—*Cf.* Mark 26:15. **55. Shem**—*Cf.* Gen. 10:21-32. **60. Norman thieves and pirate Danes**—The Norse (Norman) vikings and the Danes who founded kingdoms in England were, to all intents, pirates. **68. Sharon's . . . rose**—*Cf.* Song of Sol. 2.1. **2. enamelled zones**—belts of verdure studded with flowers.

AT MY FIRESIDE

This is the prelude to the volume *Before the Curfew* (1888).

Alone, beneath the darkened sky,
With saddened heart and unstrung lyre,
I heap the spoils of years gone by,
And leave them with a long-drawn sigh,
Like drift-wood brands that glimmering lie,
Before the ashes hide the fire.

Let not these slow declining days
The rosy light of dawn outlast;
Still round my lonely hearth it plays,
And gilds the east with borrowed rays,
While memory's mirrored sunset blaze
Flames on the windows of the past.

March 1, 1888.

AFTER THE CURFEW

1889

This is the last of Holmes's poems for the class of 1829, and was published in a volume entitled *Latest Poems of the Class of 1829* (1890). It also served as one of the *Over the Teacups* poems in the *Atlantic Monthly,* and in the volume of that name. It was collected into the Riverside edition in 1891 as the last poem in the section "Poems of the Class of '29."

The play is over. While the light
Yet lingers in the darkening hall,
I come to say a last Good-night
Before the final *Exeunt all.*

We gathered once, a joyous throng:
The jovial toasts went gayly round;
With jest, and laugh, and shout, and song.
We made the floors and walls resound.

We come with feeble steps and slow.
A little band of four or five,
Left from the wrecks of long ago,
Still pleased to find ourselves alive.

Alive! How living, too, are they
Whose memories it is ours to share!
Spread the long table's full array,—
There sits a ghost in every chair!

One breathing form no more, alas!
Amid our slender group we see;
With him we still remained "The Class,"—
Without his presence what are we?

The hand we ever loved to clasp,—
That tireless hand which knew no rest,—
Loosed from affection's clinging grasp,
Lies nerveless on the peaceful breast.

The beaming eye, the cheering voice,
That lent to life a generous glow,
Whose every meaning said "Rejoice,"
We see, we hear, no more below.

The air seems darkened by his loss,
  Earth's shadowed features look less fair,
And heavier weighs the daily cross
  His willing shoulders helped us bear.

Why mourn that we the favored few
  Whom grasping Time so long has spared
Life's sweet illusions to pursue,
  The common lot of age have shared?

In every pulse of Friendship's heart
  There breeds unfelt a throb of pain,—
One hour must rend its links apart,
  Though years on years have forged the chain.

So ends "The Boys,"—a lifelong play.
  We too must hear the Prompter call
To fairer scenes and brighter day:
  Farewell! I let the curtain fall.

INVITÂ MINERVÂ

One of the *Over the Teacups* poems, gathered into the Riverside edition. The title means "The Unwilling Minerva"; that is, to be without ability (inspiration); and the phrase is used in this meaning by Cicero.

Vex not the Muse with idle prayers—
  She will not hear thy call;
She steals upon thee unawares,
  Or seeks thee not at all.

Soft as the moonbeams when they sought
  Endymion's fragrant bower,
She parts the whispering leaves of thought
  To show her full-blown flower.

For thee her wooing hour has passed,
  The singing birds have flown,
And winter comes with icy blast
  To chill thy buds unblown.

Yet, though the woods no longer thrill
  As once their arches rung,
Sweet echoes hover round thee still
  Of songs thy summer sung.

Live in thy past; await no more
  The rush of heaven-sent wings;
Earth still has music left in store
  While Memory sighs and sings.

THE AUTOCRAT OF THE BREAKFAST-TABLE

First published in the *Atlantic Monthly,* November, 1857, as the first installment of the series. The text is that of the first edition in book form (1858), and comprises Chapter I of *The Autocrat of the Breakfast-Table.*

I

I WAS just going to say, when I was interrupted, that one of the many ways of classifying minds is under the heads of arithmetical and algebraical intellects. All economical and practical wisdom is an extension or variation of the following arithmetical formula: $2 + 2 = 4$. Every philosophical proposition has the more general character of the expression $a + b = c$. We are mere

6. Endymion—in Greek legend the beautiful boy beloved by Artemis. **1. interrupted**—Holmes had contributed some earlier and inferior essays under this title to the *New England Magazine* in 1831-32.

operatives, empirics, and egotists, until we learn to think in letters instead of figures.

They all stared. There is a divinity student lately come among us to whom I commonly address remarks like the above, allowing him to take a certain share in the conversation, so far as assent or pertinent questions are involved. He abused his liberty on this occasion by presuming to say that Leibnitz had the same observation.—No, sir, I replied, he has not. But he said a mighty good thing about mathematics, that sounds something like it, and you found it, *not in the original,* but quoted by Dr. Thomas Reid. I will tell the company what he did say, one of these days.

—If I belong to a Society of Mutual Admiration?—I blush to say that I do not at this present moment. I once did, however. It was the first association to which I ever heard the term applied; a body of scientific young men in a great foreign city who admired their teacher, and to some extent each other. Many of them deserved it; they have become famous since. It amuses me to hear the talk of one of those beings described by Thackeray—

"Letters four do form his name"—

about a social development which belongs to the very noblest stage of civilization. All generous companies of artists, authors, philanthropists, men of science, are, or ought to be, Societies of Mutual Admiration. A man of genius, or any kind of superiority, is not debarred from admiring the same quality in another, nor the other from returning his admiration. They may even associate together and continue to think highly of each other. And so of a dozen such men, if any one place is fortunate enough to hold so many. The being referred to above assumes several false premises. First, that men of talent necessarily hate each other. Secondly, that intimate knowledge or habitual association destroys our admiration of persons whom we esteemed highly at a distance. Thirdly, that a circle of clever fellows, who meet together to dine and have a good time, have signed a constitutional compact to glorify themselves and to put down him and the fraction of the human race not belonging to their number. Fourthly, that it is an outrage that he is not asked to join them.

6. Leibnitz—See note 14, p. 407. **9. Reid**—Thomas Reid (1710-1796), leader of the Scotch "common-sense" group of philosophers. **14. city**—"The 'body of scientific young men in a great foreign city' was the Société d'Observation Médicale, of Paris, of which M. Louis was president, and MM. Barth, Grisotte, and our own Dr. Bowditch were members. They agreed in admiring their justly-honored president, and thought highly of some of their associates, who have since made good their promise of distinction.

"About the time when these papers were published, the Saturday Club was founded, or, rather, found itself in existence, without any organization, almost without parentage. It was natural enough that such men as Emerson, Longfellow, Agassiz, Peirce, with Hawthorne, Motley, Sumner, when within reach and others who would be good company for them, should meet and dine together once in a while, as they did, in point of fact, every month, and as some who are still living, with other and newer members, still meet and dine. If some of them had not admired each other they would have been exceptions in the world of letters and science. The club deserves being remembered for having no constitution or by-laws, for making no speeches, coming and going at will without remark, and acting out, though it did not proclaim the motto, 'Shall I not take mine ease in mine inn?' There was and is nothing of the Bohemian element about this club, but it has had many good times and not a little good talking." (Holmes's note, 1883) **16. Thackeray**—William Makepeace Thackeray (1811-1863). Only truthful persons can interpret the line of quoted verse.

Here the company laughed a good deal, and the old gentleman who sits opposite said: "That's it! that's it!"

I continued, for I was in the talking vein. As to clever people's hating each other, I think *a little* extra talent does sometimes make people jealous. They become irritated by perpetual attempts and failures, and it hurts their tempers and dispositions. Unpretending mediocrity is good, and genius is glorious; but a weak flavor of genius in an essentially common person is detestable. It spoils the grand neutrality of a commonplace character, as the rinsings of an unwashed wineglass spoil a draught of fair water. No wonder the poor fellow we spoke of, who always belongs to this class of slightly flavored mediocrities, is puzzled and vexed by the strange sight of a dozen men of capacity working and playing together in harmony. He and his fellows are always fighting. With them familiarity naturally breeds contempt. If they ever praise each other's bad drawings, or broken-winded novels, or spavined verses, nobody ever supposed it was from admiration; it was simply a contract between themselves and a publisher or dealer.

If the Mutuals have really nothing among them worth admiring, that alters the question. But if they are men with noble powers and qualities, let me tell you that, next to youthful love and family affections, there is no human sentiment better than that which unites the Societies of Mutual Admiration. And what would literature or art be without such associations? Who can tell what we owe to the Mutual Admiration Society of which Shakspeare, and Ben Jonson, and Beaumont and Fletcher were members? Or to that of which Addison and Steele formed the centre, and which gave us the Spectator? Or to that where Johnson, and Goldsmith, and Burke, and Reynolds, and Beauclerk, and Boswell, most admiring among all admirers, met together? Was there any great harm in the fact that the Irvings and Paulding wrote in company? or any unpardonable cabal in the literary union of Verplanck and Bryant and Sands, and as many more as they chose to associate with them?

The poor creature does not know what he is talking about when he abuses this noblest of institutions. Let him inspect its mysteries through the knot-hole he has secured, but not use that orifice as a medium for his popgun. Such a society is the crown of a literary metropolis; if a town has not material for it, and spirit and good feeling enough to organize it, it is a mere caravansary, fit for a man of genius to lodge in, but not to live in. Foolish people hate and dread and envy such an associaton of men of varied powers and influence, because it is lofty, serene, impregnable, and, by the necessity of the case, exclusive. Wise ones are prouder of the title M.S.M.A. than of all their other honors put together.

—All generous minds have a horror of what are commonly called "facts." They are the brute beasts of the intellectual domain. Who does not know fel-

22. Society—the gatherings at the Mermaid Tavern, celebrated by many poets. **23-24. Addison and Steele**—the group which Pope satirized in his portrait of Atticus, wherein Addison "gave his little Senate laws." **25. Johnson**—known simply as The Club, and celebrated in Boswell's *Johnson* and Goldsmith's *Retaliation*. **27. Irvings and Paulding**—The *Salmagundi Papers* were written in collaboration by Washington Irving, Pierre Irving, and James K. Paulding. **28. literary union**—Gulian Verplanck, William Cullen Bryant, and Robert C. Sands edited *The Talisman* (1827-29) in collaboration. **34. caravansary**—inn.

lows that always have an ill-conditioned fact or two which they lead after them into decent company like so many bull-dogs, ready to let them slip at every ingenious suggestion, or convenient generalization, or pleasant fancy? I allow no "facts" at this table. What! Because bread is good and wholesome and necessary and nourishing, shall you thrust a crumb into my windpipe while I am talking? Do not these muscles of mine represent a hundred loaves of bread? and is not my thought the abstract of ten thousand of these crumbs of truth with which you would choke off my speech?

[The above remark must be conditioned and qualified for the vulgar mind. The reader will of course understand the precise amount of seasoning which must be added to it before he adopts it as one of the axioms of his life. The speaker disclaims all responsibility for its abuse in incompetent hands.]

This business of conversation is a very serious matter. There are men that it weakens one to talk with an hour more than a day's fasting would do. Mark this which I am going to say, for it is as good as a working professional man's advice, and costs you nothing: It is better to lose a pint of blood from your veins than to have a nerve tapped. Nobody measures your nervous force as it runs away, nor bandages your brain and marrow after the operation.

There are men of *esprit* who are excessively exhausting to some people. They are the talkers who have what may be called *jerky* minds. Their thoughts do not run in the natural order of sequence. They say bright things on all possible subjects, but their zigzags rack you to death. After a jolting half-hour with one of these jerky companions, talking with a dull friend affords great relief. It is like taking the cat in your lap after holding a squirrel.

What a comfort a dull but kindly person is, to be sure, at times! A ground-glass shade over a gas-lamp does not bring more solace to our dazzled eyes than such a one to our minds.

"Do not dull people bore you?" said one of the lady-boarders,—the same that sent me her autograph-book last week with a request for a few original stanzas, not remembering that "The Pactolian" pays me five dollars a line for every thing I write in its columns.

"Madam," said I, (she and the century were in their teens together,) "all men are bores, except when we want them. There never was but one man whom I would trust with my latch-key."

"Who might that favored person be?"

"Zimmermann."

—The men of genius that I fancy most have erectile heads like the cobra-di-capello. You remember what they tell of William Pinkney, the great pleader; how in his eloquent paroxysms the veins of his neck would swell and his face flush and his eyes glitter, until he seemed on the verge of apoplexy. The hydraulic ar· · · · for supplying the brain with blood are only second in importance to its own organization. The bulbous-headed fellows that steam

19. **esprit**—wit. 36. **Zimmermann**—"The *'Treatise on Solitude'* is not so frequently seen lying about on library tables as in our younger days. I remember that I always respected the title and let the book alone." (Holmes's note, 1883) The reference is to a once popular book of religious musings by Johann Georg von Zimmermann (1728-1795). 37. **cobra-di-capello**—the hooded cobra, which raises its head and expands its hood when aroused. Holmes was full of snake lore. 38. **Pinkney**—William Pinkney (1764-1822), lawyer and orator.

well when they are at work are the men that draw big audiences and give us marrowy books and pictures. It is a good sign to have one's feet grow cold when he is writing. A great writer and speaker once told me that he often wrote with his feet in hot water; but for this, *all* his blood would have run into his head, as the mercury sometimes withdraws into the ball of a thermometer.

—You don't suppose that my remarks made at this table are like so many postage-stamps, do you,—each to be only once uttered? If you do, you are mistaken. He must be a poor creature who does not often repeat himself. Imagine the author of the excellent piece of advice, "Know thyself," never alluding to that sentiment again during the course of a protracted existence! Why, the truths a man carries about with him are his tools; and do you think a carpenter is bound to use the same plane but once to smooth a knotty board with, or to hang up his hammer after it has driven its first nail? I shall never repeat a conversation, but an idea often. I shall use the same types when I like, but not commonly the same stereotypes. A thought is often original, though you have uttered it a hundred times. It has come to you over a new route, by a new and express train of associations.

Sometimes, but rarely, one may be caught making the same speech twice over, and yet be held blameless. Thus, a certain lecturer, after performing in an inland city, where dwells a *Littératrice* of note, was invited to meet her and others over the social teacup. She pleasantly referred to his many wanderings in his new occupation. "Yes," he replied, "I am like the Huma, the bird that never lights, being always in the cars, as he is always on the wing."—Years elapsed. The lecturer visited the same place once more for the same purpose. Another social cup after the lecture, and a second meeting with the distinguished lady. "You are constantly going from place to place," she said.—"Yes," he answered, "I am like the Huma,"—and finished the sentence as before.

What horrors, when it flashed over him that he had made this fine speech, word for word, twice over! Yet it was not true, as the lady might perhaps have fairly inferred, that he had embellished his conversation with the Huma daily during that whole interval of years. On the contrary, he had never once thought of the odious fowl until the recurrence of precisely the same circumstances brought up precisely the same idea. He ought to have been proud of the accuracy of his mental adjustments. Given certain factors, and a sound brain should always evolve the same fixed product with the certainty of Babbage's calculating machine.

—What a satire, by the way, is that machine on the mere mathematician! A

10. author—The phrase is attributed to Solon (639?-559 B.C.), among others. **16. stereotypes**—the matrices, formed from individual types, of printing surfaces, formerly used in stereotype printing. **21. Littératrice**—literary woman. **23. Huma**—"It was an agreeable incident of two consecutive visits to Hartford, Conn., that I met there the late Mrs. Sigourney. The second meeting recalled the first, and with it the allusion to the Huma, which bird is the subject of a short poem by another New England authoress, which may be found in Mr. Griswold's collection." (Holmes's note, 1883) The Huma appears in Moore's *Lalla Rookh*, the prose passage preceding "Paradise and the Peri." **37. Babbage**—Charles Babbage (1792-1871), mathematician and inventor, who long worked at a calculating machine without ever completing it.

Frankenstein-monster, a thing without brains and without heart, too stupid to make a blunder; which turns out results like a corn-sheller, and never grows any wiser or better, though it grind a thousand bushels of them!

I have an immense respect for a man of talents *plus* "the mathematics." But the calculating power alone should seem to be the least human of qualities, and to have the smallest amount of reason in it; since a machine can be made to do the work of three or four calculators, and better than any one of them. Sometimes I have been troubled that I had not a deeper intuitive apprehension of the relations of numbers. But the triumph of the ciphering hand-organ has consoled me. I always fancy I can hear the wheels clicking in a calculator's brain. The power of dealing with numbers is a kind of "detached lever" arrangement, which may be put into a mighty poor watch. I suppose it is about as common as the power of moving the ears voluntarily, which is a moderately rare endowment.

—Little localized powers, and little narrow streaks of specialized knowledge, are things men are very apt to be conceited about. Nature is very wise; but for this encouraging principle how many small talents and little accomplishments would be neglected! Talk about conceit as much as you like, it is to human character what salt is to the ocean; it keeps it sweet, and renders it endurable. Say rather it is like the natural unguent of the sea-fowl's plumage, which enables him to shed the rain that falls on him and the wave in which he dips. When one has had *all* his conceit taken out of him, when he has lost *all* his illusions, his feathers will soon soak through, and he will fly no more.

"So you admire conceited people, do you?" said the young lady who has come to the city to be finished off for—the duties of life.

I am afraid you do not study logic at your school, my dear. It does not follow that I wish to be pickled in brine because I like a salt-water plunge at Nahant. I say that conceit is just as natural a thing to human minds as a centre is to a circle. But little-minded people's thoughts move in such small circles that five minutes' conversation gives you an arc long enough to determine their whole curve. An arc in the movement of a large intellect does not sensibly differ from a straight line. Even if it have the third vowel as its centre, it does not soon betray it. The highest thought, that is, is the most seemingly impersonal; it does not obviously imply any individual centre.

Audacious self-esteem, with good ground for it, is always imposing. What resplendent beauty that must have been which could have authorized Phryne to "peel" in the way she did! What fine speeches are those two: *"Non omnis moriar,"* and "I have taken all knowledge to be my province"! Even in common people, conceit has the virtue of making them cheerful; the man who thinks his wife, his baby, his house, his horse, his dog, and himself severally

1. **Frankenstein-monster**—In the novel *Frankenstein* by Mary Shelley (1797-1851), the medical student Frankenstein creates a monster from the remains of the dissecting-room, gives it life, but cannot give it a soul. **28. Nahant**—a seaside resort near Boston. **36. Phryne**—Phryne, the most beautiful of Athenian courtesans, being accused of murder, bared her breasts to the jury and was acquitted. **37-38. "Non . . . moriar"**—"I shall not wholly die"; that is, "My works shall assure me of immortality."—Horace, *Carmina*, III, 30, 6. **38. "I . . . province"**—the claim made for his philosophy by Francis Bacon.

unequalled, is almost sure to be a good-humored person, though liable to be tedious at times.

—What are the great faults of conversation? Want of ideas, want of words, want of manners, are the principal ones, I suppose you think. I don't doubt it, but I will tell you what I have found spoil more good talks than anything else;—long arguments on special points between people who differ on fundamental principles upon which these points depend. No men can have satisfactory relations with each other until they have agreed on certain *ultimata* of belief not to be disturbed in ordinary conversation, and unless they have sense enough to trace the secondary questions depending upon these ultimate beliefs to their source. In short, just as a written constitution is essential to the best social order, so a code of finalities is a necessary condition of profitable talk between two persons. Talking is like playing on the harp; there is as much in laying the hand on the strings to stop their vibrations as in twanging them to bring out their music.

—Do you mean to say the pun-question is not clearly settled in your minds? Let me lay down the law upon the subject. Life and language are alike sacred. Homicide and *verbicide*—that is, violent treatment of a word with fatal results to its legitimate meaning, which is its life—are alike forbidden. Manslaughter, which is the meaning of the one, is the same as man's laughter, which is the end of the other. A pun is *primâ facie* an insult to the person you are talking with. It implies utter indifference to or sublime contempt for his remarks, no matter how serious. I speak of total depravity, and one says all that is written on the subject is deep raving. I have committed my self-respect by talking with such a person. I should like to commit him, but cannot, because he is a nuisance. Or I speak of geological convulsions, and he asks me what was the cosine of Noah's ark; also, whether the Deluge was not a deal huger than any modern inundation.

A pun does not commonly justify a blow in return. But if a blow were given for such cause, and death ensued, the jury would be judges both of the facts and of the pun, and might, if the latter were of an aggravated character, return a verdict of justifiable homicide. Thus, in a case lately decided before Miller, J., Doe presented Roe a subscription paper, and urged the claims of suffering humanity. Roe replied by asking, When charity was like a top? It is in evidence that Doe preserved a dignified silence. Roe then said, "When it begins to hum." Doe then—and not till then—struck Roe, and his head happening to hit a bound volume of the Monthly Rag-bag and Stolen Miscellany, intense mortification ensued, with a fatal result. The chief laid down his notions of the law to his brother justices, who unanimously replied, "Jest so." The chief rejoined, that no man should jest so without being punished for it, and charged for the prisoner, who was acquitted, and the pun ordered to be burned by the sheriff. The bound volume was forfeited as a deodand, but not claimed.

16. pun-question—It may be necessary to call the attention of the student to the hidden puns which stud this castigation of punning. **21. primâ facie**—on the face of it. **33. Miller, J.**—the legal formula, meaning Judge Miller presiding; but the incorrigible Holmes plays on Joe Miller, the supposed author of a current jest-book. **42. deodand**—in English law a thing which causes the death of a person and which is therefore forfeited to the crown, for pious uses.

People that make puns are like wanton boys that put coppers on the railroad tracks. They amuse themselves and other children, but their little trick may upset a freight train of conversation for the sake of a battered witticism.

I will thank you, B.F., to bring down two books, of which I will mark the places on this slip of paper. (While he is gone, I may say that this boy, our landlady's youngest, is called BENJAMIN FRANKLIN, after the celebrated philosopher of that name. A highly merited compliment.)

I wished to refer to two eminent authorities. Now be so good as to listen. The great moralist says: "To trifle with the vocabulary which is the vehicle of social intercourse is to tamper with the currency of human intelligence. He who would violate the sanctities of his mother tongue would invade the recesses of the paternal till without remorse, and repeat the banquet of Saturn without an indigestion."

And, once more, listen to the historian. "The Puritans hated puns. The Bishops were notoriously addicted to them. The Lords Temporal carried them to the verge of license. Majesty itself must have its Royal quibble. 'Ye be burly, my Lord of Burleigh,' said Queen Elizabeth, 'but ye shall make less stir in our realm than my Lord of Leicester.' The gravest wisdom and the highest breeding lent their sanction to the practice. Lord Bacon playfully declared himself a descendant of 'Og, the King of Bashan. Sir Philip Sidney, with his last breath, reproached the soldier who brought him water, for wasting a casque full upon a dying man. A courtier, who saw Othello performed at the Globe Theatre, remarked, that the blackamoor was a brute, and not a man. 'Thou hast reason,' replied a great Lord, 'according to Plato his saying; for this be a two-legged animal *with* feathers.' The fatal habit became universal. The language was corrupted. The infection spread to the national conscience. Political double-dealings naturally grew out of verbal double meanings. The teeth of the new dragon were sown by the Cadmus who introduced the alphabet of equivocation. What was levity in the time of the Tudors grew to regicide and revolution in the age of the Stuarts."

Who was that boarder that just whispered something about the Macaulay-flowers of literature?—There was a dead silence.—I said calmly, I shall henceforth consider any interruption by a pun as a hint to change my boarding-house. Do not plead my example. If *I* have used any such, it has been only as a Spartan father would show up a drunken helot. We have done with them.

—If a logical mind ever found out anything with its logic?—I should say that its most frequent work was to build a *pons asinorum* over chasms which shrewd people can bestride without such a structure. You can hire logic, in the shape of a lawyer, to prove anything that you want to prove. You can buy

9. great moralist—This is Dr. Johnson, but the student will search in vain in Johnson's works for this amusing travesty of his style. **12. banquet of Saturn**—According to Greek myth, Saturn devoured all his children but one. **14. historian**—As hinted by Holmes's subsequent pun about the Macaulay-flowers of literature, the quotation from Macaulay is purely imaginary. It is scarcely necessary to explain who the various persons are. For Og see Num 21: 33. The point of the word-play regarding Othello will be seen when one remembers the manner of Desdemona's taking off. **35. helot**—slave. **37 pons asinorum**—literally, asses' bridge, the name applied to the fifth proposition of Bk. I of Euclid, because of the shape of the figure and the difficulty beginning students have in mastering the demonstration.

treastises to show that Napoleon never lived, and that no battle of Bunker-hill was ever fought. The great minds are those with a wide span, which couple truths related to, but far removed from, each other. Logicians carry the surveyor's chain over the track of which these are the true explorers. I value a man mainly for his primary relations with truth, as I understand truth,—not for any secondary artifice in handling his ideas. Some of the sharpest men in argument are notoriously unsound in judgment. I should not trust the counsel of a clever debater, any more than that of a good chess-player. Either may of course advise wisely, but not necessarily because he wrangles or plays well.

The old gentleman who sits opposite got his hand up, as a pointer lifts his forefoot, at the expression, "his relations with truth, as I understand truth," and when I had done, sniffed audibly, and said I talked like a transcendentalist. For his part, common sense was good enough for him.

Precisely so, my dear sir, I replied; common sense, *as you understand it.* We all have to assume a standard of judgment in our own minds, either of things or persons. A man who is willing to take another's opinion has to exercise his judgment in the choice of whom to follow, which is often as nice a matter as to judge of things for one's self. On the whole, I had rather judge men's minds by comparing their thoughts with my own, than judge of thoughts by knowing who utter them. I must do one or the other. It does not follow, of course, that I may not recognize another man's thoughts as broader and deeper than my own; but that does not necessarily change my opinion, otherwise this would be at the mercy of every superior mind that held a different one. How many of our most cherished beliefs are like those drinking-glasses of the ancient pattern, that serve us well so long as we keep them in our hand, but spill all if we attempt to set them down! I have sometimes compared conversation to the Italian game of *mora,* in which one player lifts his hand with so many fingers extended, and the other gives the number if he can. I show my thought, another his; if they agree, well; if they differ, we find the largest common factor, if we can, but at any rate avoid disputing about remainders and fractions, which is to real talk what tuning an instrument is to playing on it.

—What if, instead of talking this morning, I should read you a copy of verses, with critical remarks by the author? Any of the company can retire that like.

ALBUM VERSES.

When Eve had led her lord away,
And Cain had killed his brother,
The stars and flowers, the poets say,
Agreed with one another

To cheat the cunning tempter's art,
And teach the race its duty,

1. **treatises**—Archbishop Richard Whately (1787-1863), in an effort to demonstrate the absurdity of supposing Jesus Christ to be a myth, published in 1819 *Historic Doubts Relative to Napoleon Buonaparte,* in which, with the same logic, he demonstrated that Napoleon was a myth. 2. **span**—"There is something like this in J. H. Newman's *Grammar of Assent.* See the *Characteristics,* arranged by W. S. Lilly, p. 81." (Holmes's note, 1883)

By keeping on its wicked heart
Their eyes of light and beauty.

A million sleepless lids, they say,
Will be at least a warning;
And so the flowers would watch by day,
The stars from eve to morning.

On hill and prairie, field and lawn,
Their dewy eyes upturning,
The flowers still watch from reddening dawn
Till western skies are burning.

Alas! each hour of daylight tells
A tale of shame so crushing,
That some turn white as sea-bleached shells,
And some are always blushing.

But when the patient stars look down
On all their light discovers,
The traitor's smile, the murderer's frown,
The lips of lying lovers,

They try to shut their saddening eyes,
And in the vain endeavour
We see them twinkling in the skies,
And so they wink forever.

What do *you* think of these verses, my friends?—Is that piece an impromptu? said my landlady's daughter. (Aet. 19+. Tender-eyed blonde. Long ringlets. Cameo pin. Gold pencil-case on a chain. Locket. Bracelet. Album. Autograph book. Accordeon. Reads Byron, Tupper, and Sylvanus Cobb, junior, while her mother makes the puddings. Says "Yes?" when you tell her anything.)—*Oui et non, ma petite.*—Yes and no, my child. Five of the seven verses were written off-hand; the other two took a week,—that is, were hanging round the desk in a ragged, forlorn, unrhymed condition as long as that. All poets will tell you just such stories. *C'est le* DERNIER *pas qui coute.* Don't you know how hard it is for some people to get out of a room after their visit is really over? They want to be off, and you want to have them off, but they don't know how to manage it. One would think they had been built in your parlour or study, and were waiting to be launched. I have contrived a sort of ceremonial inclined plane for such visitors, which being lubricated with certain smooth phrases, I back them down, metaphorically speaking, stern-foremost, into their "native element," the great ocean of out-doors. Well, now, there are poems as hard to get rid of as these rural visitors. They come in glibly, use up all the serviceable rhymes, *day, ray, beauty, duty, skies, eyes, other, brother, mountain, fountain,* and the like; and so they go on until you think it is time for the wind-up, and

24. Aet.—aged **26. Tupper**—Martin Tupper (1810-1889), author of a commonplace but once popular series called *Proverbial Philosophy* (1838; 1839-76). **26. Cobb**—Sylvanus Cobb, Jr. (1823-1887), American author of innumerable sentimental fictions. **31. C'est . . . coute**—It is the last step which costs; variant of the French proverb that it is the first step which costs.

the wind-up won't come on any terms. So they lie about until you get sick of the sight of them, and end by thrusting some cold scrap of a final couplet upon them, and turning them out of doors. I suspect a good many "impromptus" could tell just such a story as the above.—Here turning to our landlady, I used an illustration which pleased the company much at the time, and has since been highly commended. "Madam," I said, "you can pour three gills and three quarters of honey from that pint jug, if it is full, in less than one minute; but, Madam, you could not empty that last quarter of a gill, though you were turned into a marble Hebe, and held the vessel upside down for a thousand years."

One gets tired to death of the old, old rhymes, such as you see in that copy of verses,—which I don't mean to abuse, or to praise either. I always feel as if I were a cobbler, putting new top-leathers to an old pair of boot-soles and bodies, when I am fitting sentiments to these venerable jingles,

. . . . . youth
. . . . . morning
. . . . . truth
. . . . . warning.

Nine tenths of the "Juvenile Poems" written spring out of the above musical and suggestive coincidences.

"Yes?" said our landlady's daughter.

I did not address the following remark to her, and I trust, from her limited range of reading, she will never see it; I said it softly to my next neighbor.

When a young female wears a flat circular side-curl, gummed on each temple,—when she walks with a male, not arm in arm, but his arm against the back of hers,—and when she says "Yes?" with the note of interrogation, you are generally safe in asking her what wages she gets, and who the "feller" was you saw her with.

"What were you whispering?" said the daughter of the house, moistening her lips, as she spoke, in a very engaging manner.

"I was only laying down a principle of social diagnosis."

"Yes?"

—It is curious to see how the same wants and tastes find the same modes of expression in all times and places. The young ladies of Otaheite, as you may see in Cook's Voyages, had a sort of crinoline arrangement fully equal in radius to the largest spread of our own lady-baskets. When I fling a Bay-State shawl over my shoulders, I am only taking a lesson from the climate that the Indian had learned before me. A *blanket*-shawl we call it, and not a plaid; and we wear it like the aborigines, and not like the Highlanders.

—We are the Romans of the modern world,—the great assimilating people. Conflicts and conquests are of course necessary accidents with us, as with our prototypes. And so we come to their style of weapon. Our army sword is the short, stiff, pointed *gladius* of the Romans; and the American bowie-knife is

9. Hebe—cupbearer to the gods in Greek mythology. **34. Otaheite**—Tahiti, visited by Captain James Cook in 1769. **35. Cook's Voyages**—Consult *The Three Voyages of Captain James Cook round the World*, London, 1821, Vol. I, pp. 191-92. **43. gladius**—sword.

the same tool, modified to meet the daily wants of civil society. I announce at this table an axiom not to be found in Montesquieu or the journals of Congress:

The race that shortens its weapons lengthens its boundaries.

Corollary. It was the Polish *lance* that left Poland at last with nothing of her own to bound.

"Dropped from her nerveless grasp the *shattered spear!*"

What business had Sarmatia to be fighting for liberty with a fifteen-foot pole between her and the breasts of her enemies? If she had but clutched the old Roman and young American weapon, and come to close quarters, there might have been a chance for her; but it would have spoiled the best passage in "The Pleasures of Hope."

—Self-made men?—Well yes. Of course every body likes and respects self-made men. It is a great deal better to be made in that way than not to be made at all. Are any of you younger people old enough to remember that Irishman's house on the marsh at Cambridgeport, which house he built from drain to chimney-top with his own hands? It took him a good many years to build it, and one could see that it was a little out of plumb, and a little wavy in outline, and a little queer and uncertain in general aspect. A regular hand could certainly have built a better house; but it was a very good house for a "self-made" carpenter's house, and people praised it, and said how remarkably well the Irishman had succeeded. They never thought of praising the fine blocks of houses a little farther on.

Your self-made man, whittled into shape with his own jack-knife, deserves more credit, if that is all, than the regular engine-turned article, shaped by the most approved pattern, and French-polished by society and travel. But as to saying that one is every way the equal of the other, that is another matter. The right of strict social discrimination of all things and persons, according to their merits, native or acquired, is one of the most precious republican privileges. I take the liberty to exercise it when I say that, *other things being equal,* in most relations of life I prefer a man of family.

What do I mean by a man of family?—O, I'll give you a general idea of what I mean. Let us give him a first-rate fit out; it costs us nothing.

Four or five generations of gentlemen and gentlewomen; among them a member of his Majesty's Council for the Province, a Governor or so, one or two Doctors of Divinity, a member of Congress, not later than the time of long boots with tassels.

Family portraits. The member of the Council, by Smibert. The great

2. **Montesquieu**—Charles de Secondat, Baron de la Brède et de Montesquieu (1689-1755), French political writer. 7. **Sarmatia**—Poland. 11. **Pleasures of Hope**—by Thomas Campbell (1777-1844). 34. **Council for the Province**—in colonial Massachusetts the body corresponding to the upper house of the modern legislature. 37. **portraits**—"The full-length pictures by Copley I was thinking of are such as may be seen in the Memorial Hall of Harvard University, but many are to be met with in different parts of New England, sometimes in the possession of the poor descendants of the rich gentlefolks in lace ruffles and glistening satins, grandees and grand dames of the ante-Revolutionary period. I remember one poor old gentleman who had nothing left of his family possessions but the full-length portraits of his ancestors, the Counsellor and his lady, saying, with a gleam of pleasantry which had come down from the days of Mather Byles, and 'Balch the Hatter,' and Sigourney, that he fared not so badly after all, for he had a pair of *canvasbacks* every day through the whole year.

"The mention of these names, all of which are mere traditions to myself and my contemporaries,

merchant-uncle by Copley, full length, sitting in his arm-chair, in a velvet cap and flowered robe, with a globe by him, to show the range of his commercial transactions, and letters with large red seals lying round, one directed conspicuously to The Honorable, etc., etc. Great-grandmother, by the same artist; brown satin, lace very fine, hands superlative; grand old lady, stiffish, but imposing. Her mother, artist unknown; flat, angular, hanging sleeves; parrot on fist. A pair of Stuarts, viz., 1. A superb, full-blown, mediaeval gentleman, with a fiery dash of Tory blood in his veins, tempered down with that of a fine old rebel grandmother, and warmed up with the best of old India Madeira; his face is one flame of ruddy sunshine; his ruffled shirt rushes out of his bosom with an impetuous generosity, as if it would drag his heart after it; and his smile is good for twenty thousand dollars to the Hospital, besides ample bequests to all relatives and dependants. 2. Lady of the same; remarkable cap; high waist, as in time of Empire; bust *à la Josephine;* wisps of curls, like celery-tips, at sides of forehead; complexion clear and warm, like rose-cordial. As for the miniatures by Malbone, we don't count them in the gallery.

Books, too, with the names of old college-students in them,—family names; —you will find them at the head of their respective classes in the days when students took rank on the catalogue from their parents' condition. Elzevirs, with the Latinized appellations of youthful progenitors, and *Hic liber est meus* on the title-page. A set of Hogarth's original plates. Pope, original edition, 15 volumes, London, 1717. Barrow on the lower shelves, in folio. Tillotson on the upper, in a little dark platoon of octo-decimos.

Some family silver; a string of wedding and funeral rings; the arms of the family curiously blazoned; the same in worsted, by a maiden aunt.

If the man of family has an old place to keep these things in, furnished with claw-footed chairs and black mahogany tables, and tall bevel-edged mirrors, and stately upright cabinets, his outfit is complete.

No, my friends, I go (always, other things being equal) for the man who

reminds me of the long succession of wits and humorists whose companionship has been the delight of their generation, and who leave nothing on record by which they will be remembered; Yoricks who set the table in a roar, story-tellers who gave us scenes of life in monologue better than the stilted presentments of the stage, and those always welcome friends with social interior furnishings, whose smile provoked the wit of others and whose rich, musical laughter was its abundant reward. Who among us in my earlier days ever told a story or carolled a rippling *chanson* so gayly, so easily, so charmingly as John Sullivan, whose memory is like the breath of a long bygone summer? Mr. Arthur Gilman has left his monument in the stately structures he planned; Mr. James T. Fields in the pleasant volumes full of precious recollections; but twenty or thirty years from now old men will tell their boys that the Yankee story-teller died with the first, and that the chief of our literary reminiscents, whose ideal portrait gallery reached from Wordsworth to Swinburne, left us when the second bowed his head and 'fell on sleep,' no longer to delight the guests whom his hospitality gathered around him with the pictures to which his lips gave life and action." (Holmes's note, 1883) The **Smibert** of the last line on p. 849 is John Smibert, one of the earliest American portrait painters, of whom little is known.

1. **Copley**—John Singleton Copley (1737-1815). 7. **Stuarts**—portraits by Gilbert Stuart (1755-1828), now best known for his portraits of Washington. 14. **Empire**—The fashions of the First Empire (Napoleon I) swept America, the styles being set by Josephine, Napoleon's first wife. 16. **Malbone**—Edward Greene Malbone (1777-1807), American miniaturist. 19. **Elzevirs**—The printing done by the firm of Elzevir of Venice was some of the most beautiful of the Renaissance work. 20. **Hic . . . meus**—This is my book. 21. **Hogarth**—William Hogarth (1697-1764), British painter and engraver, whose engravings in series, like "Marriage à la Mode," are much prized. 22. **Barrow**—Isaac Barrow (1630-1677), English theologian. 22. **Tillotson**—John Tillotson (1630-1694), eloquent English divine.

inherits family traditions and the cumulative humanities of at least four or five generations. Above all things, as a child, he should have tumbled about in a library. All men are afraid of books, who have not handled them from infancy. Do you ever suppose our dear *didascalos* over there ever read *Poli Synopsis,* or consulted *Castelli Lexicon,* while he was growing up to their stature? Not he; but virtue passed through the hem of their parchment and leather garments whenever he touched them, as the precious drugs sweated through the bat's handle in the Arabian story. I tell you he is at home wherever he smells the invigorating fragrance of Russia leather. No self-made man feels so. One may, it is true, have all the antecedents I have spoken of, and yet be a boor or a shabby fellow. One may have none of them, and yet be fit for councils and courts. Then let them change places. Our social arrangement has this great beauty, that its strata shift up and down as they change specific gravity, without being clogged by layers of prescription. But I still insist on my democratic liberty of choice, and I go for the man with the gallery of family portraits against the one with the twenty-five-cent daguerreotype, unless I found out that the last is the better of the two.

—I should have felt more nervous about the late comet, if I had thought the world was ripe. But it is very green yet, if I am not mistaken; and besides, there is a great deal of coal to use up, which I cannot bring myself to think was made for nothing. If certain things, which seem to me essential to a millennium, had come to pass, I should have been frightened; but they haven't. Perhaps you would like to hear my

LATTER-DAY WARNINGS.

When legislators keep the law,
  When banks dispense with bolts and locks,
When berries, whortle—rasp—and straw—
  Grow bigger *downwards* through the box,—

When he that selleth house or land
  Shows leak in roof or flaw in right,—
When haberdashers choose the stand
  Whose window hath the broadest light,—

When preachers tell us all they think,
  And party leaders all they mean,—
When what we pay for, that we drink,
  From real grape and coffee-bean,—

4. our dear didascalos—teacher. " 'Our dear *didascalos*' was meant for Professor James Russell Lowell, now Minister to England It requires the union of exceptional native gifts and generations of training to bring the 'natural man' of New England to the completeness of scholarly manhood, such as that which adds new distinction to the name he bears, already remarkable for its successive generations of eminent citizens." (Holmes's note, 1883) It should be noted, in connection with Holmes's discussion of family, that New England was being flooded with immigrants while he was writing, and that the incursion was feared by the old Boston families. **4. Poli Synopsis**—*Synopsis criticorum aliorumque Sacrae Scripturae . . .* London, 1669-76, by Matthew Poole (1625-1679). **5. Castelli Lexicon**—*Lexicon medicum Graeco-Latinum,* Leipzig, 1713, by Bartolommeo Castelli, whose dates are unknown. **6. virtue**—*Cf.* Mark 5: 27-28. **9. Russia leather**—used for fine bindings.

When lawyers take what they would give,
And doctors give what they would take,—
When city fathers eat to live,
Save when they fast for conscience' sake,—

When one that hath a horse on sale
Shall bring his merit to the proof,
Without a lie for every nail
That holds the iron on the hoof,—

When in the usual place for rips
Our gloves are stitched with special care,
And guarded well the whalebone tips
When first umbrellas need repair,—

When Cuba's weeds have quite forgot
The power of suction to resist,
And claret-bottles harbor not
Such dimples as would hold your fist,—

When publishers no longer steal,
And pay for what they stole before,—
When the first locomotive's wheel
Rolls through the Hoosac tunnel's bore;—

Till then let Cumming blaze away,
And Miller's saints blow up the globe;
But when you see that blessed day,
Then order your ascension robe!

The company seemed to like the verses, and I promised them to read others occasionally, if they had a mind to hear them. Of course they would not expect it every morning. Neither must the reader suppose that all these things I have reported were said at any one breakfast-time. I have not taken the trouble to date them, as Raspail, *père,* used to date every proof he sent to the printer; but they were scattered over several breakfasts; and I have said a good many more things since, which I shall very possibly print some time or other, if I am urged to do it by judicious friends.

I finished off with reading some verses of my friend the Professor, of whom you may perhaps hear more by and by. The Professor read them, he told me,

20. bore—"This hoped for, but almost despaired of, event, occurred on the 9th of February, 1875. The writer of the above lines was as much pleased as his fellow-citizens at the termination of an enterprise which gave constant occasion for the most inveterate pun on record. When the other conditions referred to above are as happily fulfilled as this has been, he will still say as before, that it is time for the ascension garment to be ordered." (Holmes's note, 1883) **21. Cumming**—Alfred Cumming (1803-1873), appointed territorial governor of Utah in May, 1857, went to take possession of his territory accompanied by a detachment of the United States army because of the opposition of the Mormons. The so-called "Mormon War," which was mostly a clash of proclamations, ran through 1858-59, while Holmes was writing. **22. Miller**—William Miller (1782-1849), founder of the Adventist Church, who advertised the second coming of Christ for 1843-44. **29. Raspail**—François-Vincent Raspail (1794-1878), French medical writer.

at a farewell meeting, where the youngest of our great Historians met a few of his many friends at their invitation.

Yes, we knew we must lose him,—though friendship may claim
To blend her green leaves with the laurels of fame;
Though fondly, at parting, we call him our own,
'Tis the whisper of love when the bugle has blown.

As the rider who rests with the spur on his heel,—
As the guardsman who sleeps in his corselet of steel,—
As the archer who stands with his shaft on the string,
He stoops from his toil to the garland we bring.

What pictures yet slumber unborn in his loom
Till their warriors shall breathe and their beauties shall bloom,
While the tapestry lengthens the life-glowing dyes
That caught from our sunsets the stain of their skies!

In the alcoves of death, in the charnels of time,
Where flit the gaunt spectres of passion and crime,
There are triumphs untold, there are martyrs unsung,
There are heroes yet silent to speak with his tongue!

Let us hear the proud story which time has bequeathed
From lips that are warm with the freedom they breathed!
Let him summon its tyrants and tell us their doom,
Though he sweep the black past like Van Tromp with his broom!

. . . . . .

The dream flashes by, for the west-winds awake
On pampas, on prairie, o'er mountain and lake,
To bathe the swift bark, like a sea-girdled shrine,
With incense they stole from the rose and the pine.

So fill a bright cup with the sunlight that gushed
When the dead summer's jewels were trampled and crushed;
THE TRUE KNIGHT OF LEARNING,—the world holds him dear,—
Love bless him, Joy crown him, God speed his career!

JONATHAN EDWARDS

This essay was originally printed in the *International Review* for July, 1880, and then gathered into *Pages from an Old Volume of Life* (1883). Much of its doctrine is scattered through Holmes's other writings, especially the Breakfast-Table series, but

1. **Historians**—"'The youngest of our great historians,' referred to in the poem, was John Lothrop Motley. His career of authorship was as successful as it was noble, and his works are among the chief ornaments of our national literature. Are Republics still ungrateful, as of old?" (Holmes's note, 1883) If it is remembered that Motley was the historian of the Dutch struggle for liberty against Spain, the allusions in the poem become clearer. 22. **Van Tromp**—After defeating the English in the Anglo-Dutch War in the reign of Charles II, the Dutch Admiral van Tromp fixed a broom to his ship to signify he had swept the enemy from the seas.

no single essay of his more clearly reveals the liberal bent of the author's mind, or shows more adroitly the manner of his attack upon Calvinistic theology.

As THE centennial anniversaries of noteworthy events and signal births come round, frequent and importunate as tax-bills, fearful with superlatives as schoolgirls' letters, wearisome with iteration as a succession of drum-solos, noisy with trumpet-blowing through the land as the jubilee of Israel, we are, perhaps, in danger of getting tired of reminiscences. A foreigner might well think the patron saint of America was Saint Anniversary. As our aboriginal predecessors dug up the bones of their ancestors when they removed from one place to another, and carried them with the living on their journey, so we consider it a religious duty, at stated intervals in the journey of time, to exhume the memories of dead personages and events, and look at them in the light of the staring and inquisitive present, before consigning them again to the sepulchre.

A recent centennial celebration seems to make this a fitting time for any of us, who may feel a call or an inclination, to examine the life and religious teachings of a man of whom Mr. Bancroft has said, referring to his relations to his theological successors, that "his influence is discernible on every leading mind. Bellamy and Hopkins were his pupils; Dwight was his expositor; Smalley, Emmons, and many others were his followers; through Hopkins his influence reached Kirkland, and assisted in moulding the character of Channing." Of all the scholars and philosophers that America had produced before the beginning of the present century, two only had established a considerable and permanent reputation in the world of European thought,—Benjamin Franklin and Jonathan Edwards. No two individuals could well differ more in temperament, character, beliefs, and mode of life than did these two men, representing respectively intellect, practical and abstract. Edwards would have called Franklin an infidel, and turned him over to the uncovenanted mercies, if, indeed, such were admitted in his programme, of the Divine administration. Franklin

1. **centennial**—the hundredth anniversary of the declaration of American Independence, 1876, was the occasion of many patriotic and commemorative celebrations. 4. **trumpet-blowing**—*Cf*, for example, Ps. 47:5. 15. **Bancroft**—George Bancroft (1800-1891), the historian, contributed the biographical article on Edwards to Appleton's American Cyclopaedia, 1st ed., New York, 1874, Vol. VI, to which Holmes frequently refers. The quotation is from p. 444. 17. **Bellamy**—Joseph Bellamy (1719-1790), a "New Light" Connecticut theologian, who substituted a theory of atonement for all in place of atonement for the elect only. 17. **Hopkins**—Samuel Hopkins (1721-1803), who carried Edwards' theology to its extreme limits. He was associated with Edwards at Stockbridge, and later removed to Newport, Rhode Island. 17. **Dwight**—Timothy Dwight (1752-1817), the grandson of Edwards, elected president of Yale in 1791, and author of *Theology Explained and Defended* (5 vols., 1818-19), one of the most powerful antideistic works of its time. 17. **Smalley**—John Smalley (1734-1820), a pupil of Bellamy, author of *Natural and Moral Inability* (1769). 18. **Emmons**—Nathaniel Emmons (1745-1840), founder of the Massachusetts missionary society, who prepared fifty-seven young men for the ministry. 19. **Kirkland**—John T. Kirkland (1770-1840), president of Harvard 1810-28, one of the founders of the *Monthly Anthology*, who led the way to Unitarianism. 19. **Channing**—William E. Channing (1780-1842), a member of Hopkins' congregation, who revolted against his doctrine, became a Unitarian, and published the *Moral Argument against Calvinism*. 22-23. **Franklin . . . Edwards**—For biographical outlines of these men see the selections in this anthology. 26. **uncovenanted**—The "covenant" theology finds the chief bond between God and man in the series of "covenants" or bargains struck between the two, as recorded in the Old Testament and, to a lesser extent, in the New.

would have called Edwards a fanatic, and tried the effect of "Poor Richard's" common-sense on the major premises of his remorseless syllogisms.

We are proud of the great Boston-born philosopher, who snatched the thunderbolt from heaven with one hand, and the sceptre from tyranny with the other. So, also, we are proud of the great New England divine, of whom it might be said quite as truly, "Eripuit coelo fulmen." Did not Dugald Stewart and Sir James Mackintosh recognize his extraordinary ability? Did not Robert Hall, in one of those "fits of easy transmission," in which loose and often extravagant expressions escape from excitable minds, call him "the greatest of the sons of men"? Such praise was very rare in those days, and it is no wonder that we have made the most of these and similar fine phrases. We always liked the English official mark on our provincial silver, and there was not a great deal of it.

In studying the characteristics of Edwards in his life and writings, we find so much to remind us of Pascal that, if we believed in the doctrine of metempsychosis, we could almost feel assured that the Catholic had come back to earth in the Calvinist. Both were of a delicate and nervous constitution, habitual invalids. Their features, it is true, have not so much in common. The portrait prefixed to Dwight's edition of Edwards's works shows us a high forehead, a calm, steady eye, a small, rather prim mouth, with something about it of the unmated and no longer youthful female. The medallion of Pascal shows a head not large in the dome, but ample in the region of the brow, strongly marked features, a commanding Roman nose, a square jaw, a questioning mouth, an asserting chin,—a look altogether not unlike that of the late Reverend James Walker, except for its air of invalidism. Each was remarkable for the precocious development of his observing and reflecting powers. Their spiritual as well as their mental conditions were parallel in many respects. Both had a strong tendency to asceticism. Pascal wore a belt studded with sharp points turned inward, which he pressed against his body when he felt the aggressive movements of temptation. He was jealous of any pleasure derived from the delicacy of his food, which he regarded solely as the means of supporting life. Edwards did not wear the belt of thorns in material shape, but he pricked himself with perpetual self-accusations, and showed precisely the same jealousy about the gratification of the palate. He was spared, we may say in parenthesis, the living to see the republication in Boston of his fellow-countryman, Count Rumford's, essay "Of the Pleasure of Eating, and of the Means that may be

3-4. snatched . . . tyranny—Turgot is the author of the Latin phrase on a medal struck in France to honor Franklin: *Eripuit coelo fulmen sceptrumque tyrannis*, translated in the text. **6. Stewart**—Dugald Stewart (1753-1828), one of the Scottish "common-sense" philosophers. **7. Mackintosh**—Sir James Mackintosh (1765-1832), an eclectic philosopher, writer, and conversationalist. **8. Hall**—Robert Hall (1764-1831), a leader of the English Baptists. The index to his work does not reveal where he spoke of Edwards. **8. "fits of easy transmission"**—*Cf.* note 39, p. 431. **15. Pascal**—Blaise Pascal (1626-1662), one of the greatest of seventeenth-century French moralists. **15. metempsychosis**—transmigration of souls. **19. Dwight's edition**—Edwards' works were edited in 10 vols. by Sereno E. Dwight, 1829-30. **25. Walker**—James Walker (1794-1874), president of Harvard 1853-60. **36. Rumford**—Sir Benjamin Thompson, Count Rumford, born in Woburn, Massachusetts, 1753, died in Paris, 1814. "Of the Pleasures of Eating, and of the Means that may be employed for increasing it" is the title of Chap. II of his essay "Of Food; and particularly of feeding the poor," originally published in the *Bibliothèque britannique*, and republished in Rumford's *Complete Works*, 4 vols., by the American Academy of Arts and Sciences, Boston, 1870-75.

employed for increasing it." Pascal and Edwards were alike sensitive, pure in heart and in life, profoundly penetrated with the awful meaning of human existence; both filled with a sense of their own littleness and sinfulness; both trembling in the presence of God and dwelling much upon his wrath and its future manifestations; both singularly powerful as controversialists, and alive all over to the *gaudia certaminis,*—one fighting the Jesuits and the other the Arminians. They were alike in their retiring and melancholy kind of life. Pascal was a true poet who did not care to wear the singing robes. As much has been claimed for Edwards on the strength of a passage here and there which shows sentiment and imagination. But this was in his youthful days, and the "little white flower" of his diary fades out in his polemic treatises, as the "star of Bethlehem" no longer blossoms when the harsh blades of grass crowd around it. Pascal's prose is light and elastic everywhere with *esprit;* much of that of Edwards, thickened as it is with texts from Scripture, reminds us of the unleavened bread of the Israelite: holy it may be, but heavy it certainly is. The exquisite wit which so delights us in Pascal could not be claimed for Edwards; yet he could be satirical in a way to make the gravest person smile,—as in the description of the wonderful animal the traveller tells of as inhabiting Terra del Fuego, with which he laughs his opponents to scorn in his treatise on the "Freedom of the Will." Both had the same fondness for writing in the form of aphorisms,—natural to strong thinkers, who act like the bankers whose habit it is to sign checks, but not to count out money,—and both not rarely selected the same or similar subjects for their brief utterances.

Even in some external conditions Pascal and Edwards suggest comparison. Both were greatly influenced by devout, spiritually-minded women. Pascal, who died unmarried, had his two sisters,—Gilberte and Jacqueline,—the first of whom, afterwards Madame Périer, wrote the Memoir of her brother, so simply, so sweetly, that one can hardly read it without thinking he hears it in her own tender woman's voice,—as if she were audibly shaping the syllables which are flowing through his mute consciousness. Edwards's wife, Sarah Pierrepont, was the lady of whom he wrote the remarkable account (cited by Mr. Bancroft in his article on Edwards, as it stands in the first edition of Appleton's "Cyclopaedia") before he had made her acquaintance,—she being then only thirteen years old. She was spiritual to exaltation and ecstasy. To his sister Jerusha, seven years younger than himself, he was tenderly attached. She, too, was of a devoutly religious character.

There were certain differences in the midst of these parallelisms. Auvergne,

6. gaudia certaminis—joys of conflict. **7. Arminians**—followers of the theologian James, or Jakob, Arminius (1560-1609), who modified Calvinistic doctrine by changing the notion of predestination, making the atonement universal, holding that salvation is possible to all, interpreting depravity as a bias or inclination of the mind which can be overcome (free will), thinking of grace as a free gift, holding that conversion is possible by persuasion and moral means, and believing that falls from grace are possible. The student will note various references to Arminianism in the essay. **11-12. "star of Bethlehem"**—the white field onion. **13. esprit**—wit. **15. unleavened bread**—*Cf.* Ex. 12: 15 ff. **18. animal**—See Edwards' *On the Freedom of the Will,* Pt IV, sec. II. **26. Gilberte**—Gilberte Pascal (1620-1687). **26. Jacqueline**—Jacqueline Pascal (1625-1661). **27. Memoir**—to be found in the edition of Pascal edited by Brunschvieg and Boutroux, Vol. I, pp. 35-121. **31. Pierrepont**—Sarah Pierrepont (Edwards) (1710-1758). **31. account**—See p. 44. **35. Jerusha**—Jerusha Edwards (1710-1728). **37. Auvergne**—Pascal was born in Clermont in Auvergne.

with its vine-clad slopes, was not the same as Connecticut, with its orchards of elbowed apple-trees. Windsor, a pleasant name, not wanting in stately associations, sounds less romantic than Clermont. We think of Blaise and Jacqueline, wandering in the shadow of *Puy de Dome,* and kneeling in the ancient cathedral of that venerable town where the first trumpet of the first crusade was blown; and again we see Jonathan and Jerusha straying across lots to Poquannock, or sitting in the cold church, side by side on the smileless Sabbath. Whether or not Edwards had ever read Pascal is not shown by any reference in his writings, but there are some rather curious instances of similar or identical expressions. Thus the words of his sermon, in which he speaks of sinners as "in the hands of an angry God," are identical in meaning with Pascal's "dans les mains d'un Dieu irrité." His expression applied to man, "a poor little worm," sounds like a translation of Pascal's "chétif vermisseau." A paragraph of his detached observations entitled "Body Infinite," reminds one of the second paragraph of the twenty-fourth chapter of Pascal's "Pensées." These resemblances are worth noting in a comparison of the two writers. Dealing with similar subjects, it is not strange to find them using similar expressions. But it seems far from unlikely that Edwards had fallen in with a copy of Pascal, and borrowed, perhaps unconsciously, something of his way of thinking.

We may hope that their spirits have met long ago in a better world, for each was a saintly being, who might have claimed for him the epithet applied to Spinoza. But if they had met in this world, Pascal would have looked sadly on Edwards as a heretic, and Edwards would have looked sternly on Pascal as a papist. Edwards, again, would have scouted an Arminian; but to Bossuet, the great Bishop of Meaux, a *Socinian,* even, was only a developed Calvinist.

The feeling which naturally arises in contemplating the character of Jonathan Edwards is that of deep reverence for a man who seems to have been anointed from his birth; who lived a life pure, laborious, self-denying, occupied with the highest themes, and busy in the highest kind of labor,—such a life as in another church might have given him a place in the "Acta Sanctorum." We can in part account for what he was when we remember his natural inherited instincts, his training, his faith, and the conditions by which he was surrounded. His ancestors had fed on sermons so long that he must have been born with Scriptural texts lying latent in his embryonic thinking-marrow, like

4. Puy de Dome—mountain in south central France. **5. first trumpet**—Pope Urban II went to Clermont and there on November 26, 1095, preached a great sermon which inaugurated the First Crusade. **6. Poquannock**—modern Poquonock, a village in the town of Windsor in Connecticut. **10. sermon**—preached at Enfield, July 8, 1741, "and attended with remarkable impressions on many of the hearers." **12. "dans . . . irrité"**—translated in the text. **13. "chétif vermisseau"**—mean little worm. **15. "Pensées"**—The paragraph in question refers to the concept of an infinite being without parts. The paragraph of Edwards to which Holmes refers does not appear to be listed in the index to Edwards' *Works.* **18. copy of Pascal**—Copies of the *Pensées* found their way to New England as early as the middle of the seventeenth century. **21-22. epithet . . . Spinoza**—Spinoza was called "the God-intoxicated man." **24. Bossuet**—Jacques Bénigne Bossuet, Bishop of Meaux (1627-1704), the greatest French preacher of the seventeenth century. **25. Socinian**—a follower of Faustus Socinus (1539-1604), who denied the existence of the Trinity, the personality of the Devil, the depravity of man, the atonement, and the eternity of Hell. **30. "Acta Sanctorum"**—*Deeds of the Saints,* a title given to records of the saints published by one or another of the various Catholic bodies. **33. ancestors**—The earliest known ancestor of Edwards was an Anglican clergyman, whose widow and son emigrated to America in 1640.

the undeveloped picture in a film of collodion. He was bred in the family of a Connecticut minister in a town where revivals of religion were of remarkable frequency. His mother, it may be suspected, found him in brains, for she was called the brighter of the old couple; and the fact that she did not join the church until Jonathan was twelve years old implies that she was a woman who was not to be hurried into becoming a professor of religion simply because she was the wife of the Reverend Timothy Edwards. His faith in the literal inspiration of the Old and New Testament was implicit; it was built on texts, as Venice and Amsterdam are built on piles. The "parable of Eden," as our noble Boston preacher calls it, was to him a simple narrative of exact occurrences. The fruit, to taste which conferred an education, the talking ophidian, the many-centuried patriarchs, the floating menagerie with the fauna of the drowning earth represented on its decks, the modelling of the first woman about a bone of the first man—all these things were to him, as to those about him, as real historical facts as the building of the Pyramids. He was surrounded with believers like himself, who held the doctrines of Calvinism in all their rigor. But, on the other hand, he saw the strongholds of his position threatened by the gradual approach or the actual invasion of laxer teachings and practices, so that he found himself, as he thought, forced into active hostilities, and soon learned his strength as a combatant, and felt the stern delight of the warrior as champion of the church militant. This may have given extravagance to some of his expressions, and at times have blinded him to the real meaning as well as to the practical effect of the doctrines he taught to the good people of Northampton, and gave to the world in pages over which many a reader has turned pale and trembled.

In order to get an idea of what the theological system is of which he was the great New England exponent, we will take up briefly some of its leading features. It is hardly necessary to say that Edwards's main doctrines agree with those of the Westminster Assembly's two catechisms. These same doctrines almost assumed the character of a state religion when the "Confession of Faith" of the Synod assembled in Boston, May 12, 1680, was printed by an Order of the General Court of Massachusetts, passed May 19 of the same year. But we are to look at these doctrines, as Edwards accepted and interpreted them.

The God of Edwards is not a Trinity, but a Quaternity. The fourth Person is an embodied abstraction, to which he gave the name of *Justice*. As Jupiter was governed by Fate, so Jehovah is governed by Justice. This takes precedence of all other elements in the composite Divinity. Its province is to demand *satisfaction,* though as its demand is infinite, it can never be satiated. This satisfaction is derived from the infliction of misery on sensitive beings, who, by the fact of coming into existence under conditions provided or permitted by

1. **picture . . . collodion**—The reference is to the development of photographic plates. 3. **found him**—endowed him. 10. **noble Boston preacher**—presumably the Rev. Phillips Brooks (1835-1893). 11. **ophidian**—serpent. "Ophidian" is a favorite word of Holmes. 11-14. **fruit . . . man**—*Cf.* Gen. 2-3; 6-7; 10; and so forth. 29. **catechisms**—the "Larger" Catechism, printed 1647, and the "Shorter" Catechism, printed 1648, by direction of the English Parliament. 30. **"Confession of Faith"**—printed 1649 by direction of the English Parliament, but dating from 1647. The classic statement of British Calvinistic theology. 34. **Quaternity**—a God of four persons.

their Creator, have incurred his wrath and received his curse as their patrimony. Its work, as in the theology of Dante, is seen in the construction and perpetual maintenance of an *Inferno,* which Edwards mentions to ears polite and impolite with an unsparing plainness, emphasis, and frequency such as would have contented the satirical Cowper. The familiar quotation,—

"Quantum vertice ad auras
Aetherias, tantum radice ad Tartara tendit,"—

is eminently applicable to Edwards's theology; it flowers in heaven, but its roots, from which it draws its life and its strength, reach down to the deepest depths of hell.

The omnipotence of Justice is needed in his system, for it is dealing, as was said above, with infinite demands, which nothing short of it could begin to meet. The proof of this is a very simple mathematical one, and can be made plain to the most limited intelligence.

Sin, which is the subject of Justice, gets its measure by comparing it with the excellence of the Being whose law it violates. As the Being is infinite in perfections, every sin against him acquires the character of infinite magnitude. "Justice" demands a punishment commensurate with its infinite dimensions. This is the ground upon which the eternity of future punishment is an imperative condition prescribed by "Justice" to the alleged omnipotence of the Creator. Who and what is the being made subject to this infinite penalty?

Man, as Edwards looks at him, is placed in a very singular condition. He has innumerable duties and not the smallest right, or the least claim on his Maker. In this doctrine Edwards differs from the finer and freer thinker with whom I have compared him. "There is a reciprocal duty between God and man," is one of Pascal's noblest sayings. No such relation exists for Edwards; and if at any time there seems a balance in favor of the creature, the sovereignty of the Creator is a sponge which wipes out all and costs nothing,—nothing but the misery of a human being; and after all, in the view of the saints, which must be correct, we are assured by Edwards that it will all be right, for "the glory of God will in their estimate be of greater consequence than the welfare of thousands and millions of souls." Man, since Adam's fall, is born in a state of moral inability,—a kind of spiritual hemiplegia. He is competent, as we have seen, to commit an infinite amount of sin, but he cannot of himself perform the least good action. He is hateful to his Maker, *ex officio,* as a human being. It is no wonder that Edwards uses hard words about such a being. This is a specimen from one of those sermons to which the long-suffering people of Northampton listened for twenty-four years: "You have never loved God, who is infinitely glorious and lovely; and why then is God under *obligations* to love you, who are all over deformed and loathsome as a filthy worm, or rather a hateful viper?" And on the very next page he returns to his epithets and comparisons, paying his respects to his fellow-creatures in the following

3. **ears polite**—"who never mentions hell to ears polite," Pope, *Moral Essays,* IV, line 149. Holmes, by a slip of memory, attributes the line to William Cowper. 6-7. **"Quantum . . . tendit"**—Virgil, *Georgics,* II, lines 291-92. The sense may be gleaned from the text. 33. **hemiplegia**—a palsy affecting one side of the body only. 35. **ex officio**—by reason of his status as a human being.

words: "Seeing you thus disregard so great a God, is it a heinous thing for God to slight you, a little wretched, despicable creature; a worm, a mere nothing and less than nothing; a vile insect that has risen up in contempt against the Majesty of heaven and earth?" We can hardly help remarking just here that this kind of language will seem to most persons an unwholesome sort of rhetoric for a preacher to indulge in; not favorable to the sweetness of his own thoughts, and not unlikely to produce irritation in some of his more excitable hearers. But he was led, as it will soon appear, into the use of expressions still more fitted to disturb the feelings of all persons of common sensibility, and especially of the fathers and mothers who listened to him. Such was Edwards's estimate of humanity.

His opinion of the *Devil* is hardly more respectful than that which he entertains of man. "Though the Devil be exceedingly crafty and subtle," he says, "yet he is one of the greatest fools and blockheads in the world, as the subtlest of wicked men are." But for all he was such a fool, he has played a very important part, Edwards thinks, in the great events of the world's history. He was in a dreadful rage just before the flood. He brought about the peopling of America by leading men and women there so as to get them out of the way of the gospel. Thus he was, according to Edwards, the true Pilgrim Father of the New World. He himself had seen the Devil prevail against two revivals of religion in this country. The personal presence of the great enemy of mankind was as real to Edwards as the spectral demons in the woods about Gloucester, which the soldiers fired at but could not hit, were to Cotton Mather and his reverend correspondent. How the specialty of the archfiend differed from that of Edwards's "Justice" is not perfectly clear, except that one executes what the other orders, the Evil Angel finding pleasure in inflicting torture, and "Justice" attaining the end known to theologians as "satisfaction" in seeing it inflicted. And as Edwards couples his supreme principle with an epithet corresponding to a well-known human passion,—speaking of it as "revenging justice,"—we can have some idea of what "satisfaction" means in the light of the common saying that "revenge is sweet;" but the explanation does not leave the soul in seraphic harmony with the music of the spheres or the keynote of its own being.

It will be enough for our present purpose to refer briefly to the leading doctrines of several of Edwards's special works.

In his treatise, "The Great Christian Doctrine of Original Sin defended," he teaches that "God, in his constitution with Adam, dealt with him as a *public* person,—as the head of the human species,—and had respect to his posterity, as included in him." Again: "God dealing with Adam as the head of his posterity (as has been shown) and treating them as one, he deals with his posterity as having *all sinned in him.*" There was always a difficulty in dealing with the relation of infants to the divine government. It is doubtful whether Edwards would have approved of the leniency of their sentence in Michael Wigglesworth's "Day of Doom," in which the comparatively comfortable quarters of

20. two revivals—in 1734-35 and 1740-42 (the Great Awakening). **23. Mather**—the Rev. Cotton Mather (1663-1728). **36. "The Great . . . defended"**—published at Boston in 1758. **44. "Day of Doom"**—*The Day of Doom* (1662) by Michael Wigglesworth (1631-1705), a once popular poem setting forth the cruder aspects of damnation according to Calvin. Holmes quotes from the best-known stanza.

"The easiest room in hell"

are assigned to the little creatures. Edwards argues against the charitable supposition that, though sin is truly imputed to infants, so that they are as a consequence, exposed to a proper punishment, yet that *all* Adam's guilt not being imputed to them, they might be let off with only temporal death or annihilation. He maintains, on the contrary, "that none can, in good consistence with themselves, own a real *imputation* of the guilt of Adam's first sin to his posterity, without owning that they are *justly* treated as sinners, truly guilty, and *children of wrath,* on that account; nor unless they allow a just imputation of the *whole* of the *evil* of that transgression, at least all that pertains to that act, as a full and complete violation of the *covenant* which God had established; even as much as if each one of mankind had the like covenant established with him singly, and had, by the like direct and full act of rebellion, violated it himself." The little albuminous automaton is not sent into the world without an inheritance. Every infant of the human race is entitled to one undivided share of the guilt and consequent responsibility of the Trustee to whom the Sovereign had committed its future, and who invested it in a fraudulent concern.

By the "Work of Redemption," of which Edwards wrote an elaborate history, a few of the human race have been exempted from the infinite penalties consequent upon being born upon this planet, the atmosphere of which is a slow poison, killing everybody after a few score of years. But "the bulk of mankind" go eventually to the place prepared for them by "Justice," of which place and its conditions Edwards has given full and detailed descriptions.

The essay on "God's Chief End in Creation" reaches these two grand results: "God aims at satisfying justice in the eternal damnation of sinners, which will be satisfied with their damnation considered no otherwise than with regard to its eternal duration. God aims to satisfy his infinite grace or benevolence by the bestowment of a good infinitely valuable because eternal."

His idea of the "Nature of True Virtue," as expressed in his treatise with that title, is broad enough for the το καλον of the most ancient or the most modern philosophy. A principle of virtue is, according to Edwards, "union of heart to being, simply considered; which implies a disposition to benevolence to being, in general." This definition has been variously estimated by philosophical critics. There is something in it which reminds one of the "ether" of the physicists. This is a conceivable if not a necessary medium, but no living thing we know anything about can live in it, can fly or breathe in it, and we must leave it to the angels, with whose physiology we are not acquainted.

The full title of the work on which Edwards's reputation as a thinker mainly rests is, "A careful and strict Inquiry into the modern prevailing notions of that Freedom of the Will which is supposed to be essential to moral agency, virtue and vice, reward and punishment, praise and blame."

14. albuminous automaton—human embryo. **16. Trustee**—Adam. **19. "Work of Redemption"**—Edwards' *A History of the Work of Redemption . . .* was first published in Edinburgh (1774). **25. "God's . . . Creation"**—One of *Two Dissertations* published in Boston (1765). The full title is: "Concerning the End for which God created the World." **30. "Nature . . . Virtue"**—part of *Two Dissertations,* published at Boston (1765). **31. το καλον**—the good. **41. Freedom of the Will**—published at Boston in 1754.

Edwards thinks it necessary to meet those who object to reasonings like his that they run "into nice scholastic distinctions and abstruse metaphysical subtleties, and set these in opposition to common-sense." But an essay which Robert Hall read and re-read with intense interest before he was nine years old must have a good deal in it which comes within the compass of moderate understandings. The truth is, his argument, unfolded with infinite patience and admirable ingenuity, is nothing but a careful evolution of the impossibilities involved in the idea of that old scholastic thesis best known in the popular form of the puzzle called in learned books *l'âne de Buridan,* and in common speech "the ass between two bundles of hay,"—or as Leibnitz has it, between two pastures. A more dignified statement of it is to be found at the beginning of the fourth canto of Dante's "Paradiso." The passage is thus given in Mr. Longfellow's translation:—

> "Between two viands equally removed
> And tempting, a free man would die of hunger,
> Ere either he could bring unto his teeth."

The object of Edwards was to prove that such a state of equilibrium, supposed by his Arminian opponents to be necessary to account for human freedom and responsibility, does not and cannot exist. Leibnitz had already denied its possibility without any express act of the Creator.

The reader of this celebrated treatise may well admire the sleuth-hound-like sagacity and tenacity with which the keen-scented reasoner follows the devious tracks of his adversaries; yet he can hardly help feeling that a vast number of words have been expended in proving over and over again a proposition which, as put by the great logician, is self-evident. In fact, Edwards has more than once stated his own argument with a contemptuous brevity, as if he felt that he had been paying out in farthings what he could easily hand us in the form of a shilling. Here is one of his condensed statements:—

"There is no high degree of refinement and abstruse speculation in determining that a thing is not before it is, and so cannot be the cause of itself; or that the first act of free choice has not another act of free choice going before that to excite or direct it; or in determining that no choice can be made while the mind remains in a state of absolute indifference; that preference and equilibrium never co-exist; and that therefore no choice is made in a state of liberty consisting in indifference; and that so far as the Will is determined by motives, exhibiting and operating previous to the act of the Will, so far it is not determined by the act of the Will itself; that nothing can begin to be, which before was not, without a cause, or some antecedent ground or reason why it then begins to be; that effects depend on their causes, and are connected with them; that virtue is not the worse, nor sin the better, for the strength of inclination with which it is practised, and the difficulty which thence arises of doing otherwise; and that when it is already infallibly known that the thing will be, it is not contingent whether it will ever be or no; or that it can be truly said, notwithstanding, that it is not necessary it should be, but it either may be, or may not be."

4. Robert Hall—See note 8, p. 855. **9. l'âne de Buridan**—Buridan's ass, from the figure used by Jean Buridan, a fourteenth-century French "schoolman." **10. Leibnitz**—See note 14, p. 407. **14-16. "Between two viands . . . teeth"**—*Paradiso,* IV, lines 1-3.

This subject of the freedom of the will, which Milton's fallen angels puzzled over, and found themselves

"In wandering mazes lost,"—

of which Chaucer's "Nonne's Preeste" says,—

"That in scole is gret altercation
In this matere and gret disputison,
And hath ben of an hundred thousand men,"—

is one which we can hardly touch without becoming absorbed in its contemplation. We are all experts in the matter of volition. We may have read much or little; we may have made it a special subject of thought or not: each of us has at any rate been using his will during every waking hour of his life, and must have some practical acquaintance with its working within him.

The drift of Edwards's argument is to show that, though we are free to *follow* our will, we are not free to *form* an act of volition, but that this of necessity obeys the strongest motive. As the natural man—that is every man since the fall of Adam—is corrupt in all his tendencies, it follows that his motives, and consequently his moral volitions, are all evil until changed by grace, which is a free gift to such as are elected from eternity according to God's good pleasure. "The doctrine of a self-determining will as the ground of all moral good and evil tends to prevent any proper exercises of faith in God and Christ in the affair of our salvation, as it tends to prevent all dependence upon them."

In spite of any general assertions of Edwards to the contrary, we find our wills tied up hand and foot in the logical propositions which he knots inextricably about them; and yet when we lay down the book, we feel as if there was something left free after all. We cannot help saying *E pur si muove.* We are disposed to settle the matter as magisterially as Dr. Johnson did. "Sir," said he, "we *know* our will is free, and *there's* an end on't."

Not so certainly do we know this, perhaps, as the great dogmatist affirms. "A wooden top," says Hobbes, "that is lashed by the boys, and runs about, sometimes to one wall, sometimes to another, sometimes spinning, sometimes hitting men on the shins, if it were sensible of its own motion would think it proceeded from its own will, unless it felt what lashed it. And is a man any wiser when he runs to one place for a benefice, to another for a bargain, and troubles the world with writing errors and requiring answers, because he thinks he does it without other cause than his own will, and seeth not what are the lashings that cause that will?" And in the same way Leibnitz speaks of the magnetic needle: if it took pleasure in turning to the north, it would suppose itself to be acting independently, not knowing anything of the magnetic currents.

So far, then, all is, or at least may be, purely mechanical and necessitated, in

3. **"In . . . lost"**—*Paradise Lost,* Bk. II, line 561. 5. **in scole**—The quotation is from lines 412-15. 26. **E . . . muove**—And yet it moves, the phrase attributed to Galileo, after he had been required to recant his belief in the rotation of the earth about the sun. 27. **Johnson**—*Cf.* Boswell's *Life of Johnson,* ed. by G. B. Hill, Vol. II, p. 82 (year 1769). 30. **Hobbes**—Thomas Hobbes (1588-1679), English philosopher.

spite of our feeling to the contrary. Kant solves the problem by taking the will out of the series of phenomena, and exempting it as a *noumenon* from the empirical laws of the phenomenal world,—from the conditions of cause and effect, as they exist in time. In this way he arrives at his "categorical imperative," the supreme "ought," which he recognizes as the moral legislator. His doctrine is satirically stated by Julius Müller thus: "Kant imputes to man, since he will make him entirely his own lawgiver, the contradictory task of separating himself from himself in order to subject himself to himself." It is curious to see how Kant comes down virtually to the level of scepticism, if not of materialism, in the following explanatory note, which makes the text little better than a promise to pay without a signature:—

"The real morality of actions, their merit or demerit, and even that of our own conduct, is completely unknown to us. Our estimates can relate only to their empirical character. How much is the result of the action of free-will, how much is to be ascribed to nature and to blameless error, or to a happy constitution of temperament (*merito fortunae*), no one can discover, nor, for this reason, determine with perfect justice."

Our distinguished fellow-countryman, Mr. Hazard, follows Dr. Samuel Clarke in recognizing in man the power of determining his own effort, in the act of volition, without being first acted upon by any extrinsic power or force. Man is for him a "creative first cause," an independent power, as truly creating the future in the sphere of the finite as God himself in the sphere of the infinite.

Physiological psychology has taken up the problem of the will as coming under the general laws of life. Cousin says of Hartley, that his "was the first attempt to join the study of intellectual man to that of physical man." Whether this be strictly true or not, there is no doubt that Hartley gave a clear account of many of those automatic actions since grouped as belonging to the reflex function; and that, leaving out his hypothesis of vibrations, his account of the development of volition from automatism in the infant is among the earliest—if not the earliest—of the efforts to show the transition from involuntary to voluntary action. Johannes Müller followed in the same direction, and from the day when Galvani first noticed the twitching of a frog's hind legs, the reflex function has been followed upward farther and farther until it appears in the "unconscious cerebration" of Dr. Carpenter, and the localization of speech and certain special movements in certain portions of the brain. Our physiological psychology is looking to the vivisectionists and the pathologists for help in finding the relation between the mental and moral faculties and the nervous centres; to learn from them the connection of living circuits and batteries;

1. **Kant**—*Cf.* note 12, p. 464. 2. **noumenon**—an object of rational intuition which cannot be known through the operations of the senses. 6. **Müller**—Julius Muller (1801-1878), German theologian (Lutheran). 16. **merito fortunae**—by the accident (merit) of fortune. 18. **Hazard**—Rowland Gibson Hazard (1801-1888), manufacturer and philosopher Holmes refers to his *Freedom of Mind in Willing*, 1864, et cetera. 19. **Clarke**—Dr. Samuel Clarke (1675-1729), English divine, is presumably meant. 25. **Cousin**—Victor Cousin (1792-1867), French eclectic philosopher. 25. **Hartley**—David Hartley (1705-1757), English metaphysician and psychologist, who anticipated some of the conclusions of physiological psychology. 33. **Galvani**—Luigi(?) Galvani (1737-1798), the discoverer of the phenomenon named after him. 35. **Carpenter**—presumably Dr. William Benjamin Carpenter (1813-1885), British physiologist.

possibly, not probably, to fix upon some particular portion of the brain where the will shall be found really enthroned, as Descartes vainly fancied that the soul is in the pineal gland.

As the study of the individual reduces his seemingly self-determined actions more and more to reflex action, to mechanism, in short, so we find that the study of mankind in communities, which constitutes history, resolves itself more and more into manifestations of the same reflex function. Why else does history "repeat itself," but that communities of men, like those of bees and ants, act in the same way under the same conditions? And in the last analysis, what are the *laws of human nature* but a generalized expression of the fact that every organ obeys its proper stimulus, and every act of volition follows its motive as inevitably as the weight falls if unsupported, and the spring recoils if bent?

The more we study the will in the way of analysis, the more strictly does it appear to be determined by the infinitely varied conditions of the individual. At the bottom of all these lies the moral "personal equation" of each human being. Suppose sin were always literally red,—as it is in the figurative expressions, "though your sins be as scarlet," "though they be red like crimson,"—in that case, it is very certain that many persons would be unable to distinguish sin from virtue, if we suppose virtue to have a color also, and that color to be green. There is good reason to believe that certain persons are born more or less completely blind to moral distinctions, as others are born color-blind. Many examples of this kind may be found in the "Psychologie Naturelle" of M. Prosper Despine, and our own criminal records would furnish notable instances of such imperfect natures. We are getting to be predestinarians as much as Edwards or Calvin was, only instead of universal corruption of nature derived from Adam, we recognize inherited congenital tendencies,—some good, some bad,—for which the subject of them is in no sense responsible. Edwards maintains that, in spite of his doctrine, "man is entirely, perfectly, and unspeakably different from a machine, in that he has reason and understanding, with a faculty of will, and so is capable of volition and choice: in that his will is guided by the dictates or views of his understanding; and in that his external actions and behavior, and in many respects also his thoughts and the exercises of his mind, are subject to his will." But all this only mystified his people, and the practical rural comment was in the well-known satirical saying, "You can and you can't, you shall and you shan't," and so forth,—the epigram that stung to death a hundred sermons based on the attempt to reconcile slavery to a depraved nature, on the one hand, with freedom to sin and responsibility for what could not be helped, on the other.

It is as hard to leave this subject without attempting to help in clearing it up as it is to pass a cairn without the desire of throwing a stone upon it. This impulse must excuse the following brief excursion.

In spite of the strongest-motive necessitarian doctrine, we do certainly have a feeling, amounting to a working belief, that we are free to choose before we have made our choice.

2. Descartes—René Descartes (1596-1650), French philosopher. **18. "though . . . crimson"**—*Cf.* Isa. 1: 18. **24. Despine**—M. Prosper Despine (1812-1892), French psychologist.

We have a sense of difficulty overcome by effort in many acts of choice. We have a feeling in retrospect, amounting to a practical belief, that we could have left undone the things that we have done, and that we could have done the things that we ought to have done and did not do, and we accuse or else excuse ourselves accordingly.

Suppose this belief to be a self-deception, as we have seen that Hobbes and Leibnitz suggest it may be, "a deceiving of mankind by God himself," as Edwards accuses Lord Kaimes of maintaining, still this instinctive *belief* in the power of moral choice in itself constitutes a powerful motive. Our thinking ourselves free is the key to our whole moral nature. "Possumus quia posse videmur." We can make a difficult choice because we think we can. Happily, no reasoning can persuade us out of this belief; happily, indeed, for virtue rests upon it, education assumes and develops it, law pronounces its verdict and the ministers of the law execute its mandates on the strength of it. Make us out automata if you will, but we are automata which cannot help believing that they do their work well or ill as they choose, that they wind themselves up or let themselves run down by a power not in the weights or springs.

On the whole, we can afford to leave the question of liberty and necessity where Edwards leaves that of our belief in the existence of the material universe:—

"Though we suppose that the Material Universe is absolutely dependent on Idea, yet we may speak in the old way and as properly and truly as ever."

"It is just all one as to any benefit or advantage, any end that we can suppose was proposed by the Creator, as if the Material Universe were existent in the same manner as is vulgarly thought."

And so we can say that, after all the arguments of the metaphysicians, all the experiments of the physiologists, all the uniform averages of statisticians, it is just all one as to any benefit or advantage as if a real self-determining power, and real responsibility for our acts of moral choice were existent in the same manner as is vulgarly thought.

The "Treatise on Original Sin" deals with that subject in the usual mediaeval style. As a specimen of what we may call theological sharp practice, the reader may take the following passage. Edwards is arguing against the supposition that the doctrine of original sin implies,—

"That nature must be corrupted by some *positive influence,*—'something by some means or other *infused* into the human nature; some *quality* or other, not from the *choice* of our minds, but like a *taint, tincture,* or *infection,* altering the natural constitution, faculties, and dispositions of our souls. That sin and evil dispositions are IMPLANTED in the foetus in the womb.' Whereas our doctrine neither implies nor infers any such thing. In order to account for a sinful corruption of nature, yea, a total native depravity of the heart of man, there is not the least need of supposing any evil quality *infused, implanted,* or *wrought* into the nature of man, by any positive cause, or influence whatsoever, either from God, or the creature; or of

8. Kaimes—Henry Home, Lord Kames (1696-1782), who published *Essays on the Principles of Morality and Natural Religion* in 1751. **10-11. "Possumus . . . videmur"**—"We are able to do something because we seem to be able to do something." **31. Treatise**—*The Great Christian Doctrine of Original Sin Defended* . . . published in Boston, 1758.

supposing that man is conceived and born with a *fountain of evil* in his heart, such as is anything properly *positive*. I think a little attention to the nature of things will be sufficient to satisfy any impartial, considerate inquirer that the absence of positive good principles, and so the withholding of a special divine influence to impart and maintain those good principles—leaving the common natural principles of self-love, natural appetite, etc., to themselves, without the government of superior divine principles—will certainly be followed with the corruption, yea, the total corruption of the heart, without occasion for any *positive* influence at all: and that it was thus in fact that corruption of nature came on Adam, immediately on his fall, and comes on all his posterity, as sinning in him, and falling with him."

The archbishop did not poison Ugolino and his boys,—he only withheld food from them. We will let Julius Müller expose the fallacy: "But even by giving this turn to the question, the idea cannot be avoided of an implantation of the moral corruption in human nature by a Divine causality, as directly contradicting the religious axiom that God cannot be the author of sin; for if from his Divine withdrawment the origination of the corrupt nature necessarily follows, then the former is just a cause of the latter." And to the same effect Professor Fisher allows that if God withdraws from the soul the grace without which it cannot but sin, "it is vain to urge that the act of God is of a negative character. . . . We do not see how the conclusion can be avoided that God is the author of sin."

There are conceptions which are not only false, not only absurd, but which act as *disorganizing forces* in the midst of the thinking apparatus. They injure the texture of the mind as a habit of gross sin injures the type of the character. Such is the idea that a descendant of Adam can in any way be guilty or reckoned guilty of his sin. He may *suffer* for it, but that is his misfortune, and Justice should account to him for his suffering. "I could not help it" disarms vengeance and renders Tartarus a wanton luxury of cruelty. Edwards's powerful intellect was filled with disorganizing conceptions, like that which makes all mankind sinners thousands of years before they were born.

A chief ground of complaint against Edwards is his use of language with reference to the future of mankind which shocks the sensibilities of a later generation. There is no need of going into all the plans and machinery of his "Inferno," as displayed in his sermons. We can endure much in the mediaeval verse of Dante which we cannot listen to in the comparatively raw and recent prose of Edwards. Mr. John Morley speaks in one of his Essays of "the horrors of what is perhaps the most frightful idea that has ever corroded human character,—the idea of eternal punishment." Edwards has done his best to burn these horrors into the souls of men. A new organic and a new inorganic chemistry are brought into the laboratory where "the bulk of mankind" have been conveyed for vivisection or vivicombustion. The body is to possess the most exquisite sensibilities, is to be pervaded in every fibre and particle by the fire, and the fire is to be such that our lime-kilns and iron-furnaces would be refrigerators in comparison with the mildest of the torture-chambers.

11. **Ugolino**—*Cf.* Dante, *Inferno*, XXXIII. 18. **Professor Fisher**—George Park Fisher (1827-1909), professor of divinity in Yale College 1854-61; professor of ecclesiastical history, 1861-1901. 36. **Morley**—John Morley, Viscount Morley of Blackburn (1838-1923). 41. **vivicombustion**—burning alive.

Here the great majority of mankind are to pass the days and nights, if such terms are applicable to it, of a sleepless eternity. And all this apparatus of torture in full operation for "four thousand years," none of its victims warned of it or knowing anything about it until the "good news" came which brought life and immortality to light,—an immortality of misery to "the bulk of mankind!"

But Edwards can be partially excused for doing violence to human feelings. It is better, perhaps, to confess that he was an imitator and a generous borrower than to allow him the credit of originality at the expense of his better human attributes. Very good men are sometimes very forgetful. The Rev. Thomas Scott was a very good man, no doubt, in many respects, but that excellent old friend of the writer, the late learned and amiable Dr. Jenks, says in an Editor's Notice, to be found in the fifth volume of "The Comprehensive Commentary": "Nothing but such a diligent comparison as this work necessarily required, of the labors of Henry and Scott, could have shown how greatly the latter was indebted to the former, especially in the Old Testament; and the lack of acknowledgment can be accounted for, and reconciled with principle, only by the consideration, that, possibly, if it had been made in every case where it was due, the work would have been less acceptable to persons of the 'establishment' whom the writer was desirous to influence favorably." Was ever an indictment drawn in language more tenderly modulated?

The Rev. Mr. Gillespie of Scotland, writing to Edwards, asks him, "Are the works of the great Mr. Boston known in your country, namely, the 'Fourfold State of Man'?" etc. To which Edwards replies: As to Mr. Boston's 'View of the Covenant of Grace,' I have had some opportunity to examine it, and I confess I do not understand the scheme of thought presented in that book. I have read his 'Fourfold State of Man,' and liked it exceedingly well. I think in that he shows himself to be a truly great divine."

The Rev. Thomas Boston of Ettrick, Scotland,—an Ettrick shepherd very different from "Jamie the Poeter," as James Hogg was called by his rustic neighbors,—may be remembered as one of the authors largely cited by Mr. Buckle in his arraignment of the barbarous theology of Scotland. He died in 1732, but the edition before the present writer, though without date, is evidently a comparatively recent one, and bears the impress, "Philadelphia: Presbyterian Board of Publication."

Something of the mild surprise which honest old Dr. Jenks experienced when he found the property of Matthew Henry on the person of Thomas Scott may be felt by scrupulous individuals at recognizing a large part of the awful language, with the use of which Edwards is often reproached, as the property of Thomas Boston. There is no mistaking the identity of many of

11. Scott—the Rev. Thomas Scott (1747-1821), British theologian, author of *The Holy Bible, with Notes,* 1788-92, 4 vols., often reprinted. **12. Jenks**—the Rev. these expressions and images. Some, besides the Scriptural ones, may have been borrowed by both writers from a common source, but there is a considerable number which confess their parentage in the most unequivocal way. The argument for infinite punishment is the same; the fiery furnace the same; the hair suspending a living soul over it the same; reptiles and other odious images belong to both alike; infinite duration is described in similar language; the natural affections no longer exist; the mother will not pity the daughter in these flames, says Boston; parents, says Edwards, will sing hallelujahs as they see their children driven into the flames where they are to lie "roasting" (Edwards) and "roaring" (Boston) forever. This last word, it may be remarked, has an ill sound on the lips of a theologian; it looks as if he were getting out of the reach of human sympathies. It sounds very harshly when Cotton Mather says of a poor creature who was accidentally burned to death,—being, it seems, a little in liquor at the time, poor soul!—that she "went roaring out of one fire into another."

The true source of Edwards's Dante-like descriptions of his "Inferno" is but too obvious. Whatever claim to the character of a poet is founded on the lurid brilliancy of these passages may as well be reconsidered in the red light of Thomas Boston's rhetorical *autos-da-fé*. But wherever such pictures are found, at first or second hand, they are sure causes of unbelief, and liable to produce hatred not only of those who teach them, but of their whole system of doctrines. "Who are these cruel old clerical Torquemadas," ask the ungodly, "who are rolling the tortures of ourselves, our wives and children, under their tongues like a sweet morsel?" The denunciations of the pulpit came so near the execrations of the street in their language, and sometimes, it almost seemed, in their spirit, that many a "natural man" must have left his pew with the feeling in his heart embodied in a verse which the writer of this article found many years ago in a psalm-book in a Glasgow meeting-house where he was attending service, and has remembered ever since:—

"As cursing he like clothes put on,
Into his bowels so
Like water, and into his bones
Like oil down let it go."

God forgive them! Doubtless many of them were as sincere and conscientious as the most zealous officers of the Holy Inquisition.

The title of the "Treatise on the Religious Affections" might naturally lead us to expect a large expression of those tenderer feelings with which Edwards was, no doubt, naturally endowed. But in point of fact, if a sermon of Edwards is like a nail driven through a human heart, this treatise is just what clinches it. It is a sad thought how many souls it must have driven to despair. For after having equipped the underground laboratory of "revenging justice" with a complete apparatus of torture, such as to think of suggests nothing but insanity, he fills the unhappy believer's mind with so many doubts and scruples

19. **autos-da-fé**—literally, "acts of faith," the term applied to the burning of heretics by the Spanish Inquisition. 22. **Torquemadas**—Tomás de Torquemada (1420-1498), the notorious general of the Spanish Inquisition. 36. **"Treatise . . . Affections"**—*A Treatise Concerning the Religious Affections*, published at Boston, 1746.

that many a pious Christian after reading it must have set himself down as a castaway. No warmth of feeling, no joy in believing, no love of religious exercises, no disposition to praise and glorify God, no assurance of faith, can be depended on as a "gracious affection;" for "as the Devil can counterfeit all the saving operations and graces of the Spirit of God, so he can counterfeit those operations that are preparatory to grace,"—in short, render every humble Christian so doubtful of his own state that "the peace which passeth all understanding" becomes a phrase without meaning. A discouraging statement, but not worse than Bunyan's:—

"A Christian man is never long at ease,
When one fright's gone, another doth him seize."

As a general rule, we may venture to say that those writings of Edwards which are made up chiefly or to a great extent of Scriptural quotations are not very profitable reading. Such writings commonly deal with texts as the Chinese carvers do with the roots or other vegetable growths upon which they exercise their skill; they note certain fanciful resemblances in them, and add whatever of their own is necessary to complete the fantastic object they are going to shape. Besides, nothing is so dangerous to intellectual virility as to have a so-called infallible book to fall back upon: it was so with the students of Aristotle, with those of Hippocrates and Galen; and there is no sacred book in the world which has not crippled human souls, as all who remember the Scriptural justifications of Slavery will readily admit. There is therefore no need of taking up Edwards's exegetical treatises, which show him in his less robust aspect, as the Commentaries on the Prophecies are generally thought to show Sir Isaac Newton. Those who wish to learn what things the monstrous births arising from the conjunction of the sons of God with the daughters of men typify,—"The Church of Rome, that monstrous beast," among others,—those who are like to be edified by learning that when Elisha throws the stick into the water to recover the sunken axe-head, the stick represents Christ and the iron the soul of man; those who are ready to believe that the casting the hook and taking the first fish that came up and finding a piece of money in his mouth to be paid as tribute "signify that ministers of the gospel should receive of the temporal things of those that they preach the gospel to, whose souls they catch for Christ, for they are the fish of which gospel-ministers are the fishers,"—all such will do well to read Edwards's "Notes on the Bible."

Such were some of the beliefs of the great divine who stamped his personality and his doctrines on the New England theology of the last century. The story of his outward life is a short and melancholy one. In 1727 he was

7. **peace . . . understanding**—*Cf.* Phil. 4:7. **10-11. "A . . . seize"**—from a quatrain written under a woodcut first printed in the 13th ed. of Bunyan's *Pilgrim's Progress* (1692). **20. Hippocrates and Galen**—Hippocrates (460-370 B.C.) and Galen (131-201 A.D.) open and close the ancient period of Greek medicine. **23. exegetical treatises**—works designed to explain biblical texts and passages. **24. The date of original publication is not clear.

settled at Northampton as the colleague of his grandfather, the venerable Solomon Stoddard, who died in 1729. Two great revivals of religion happened during his ministry. Of both these he has left printed accounts. The work entitled "Thoughts on the Revival of Religion in New England in 1740" is spoken of as having been, from the time of its first publication, to a very wide extent the common text-book of evangelical divines on the subject of which it treats.

The scenes described in his account remind one of the religious frenzies which seized upon multitudes in the Middle Ages. There are passages which look like the account of an epidemic, and passages almost as startling as one may read in Defoe's description of the Plague of London. Faintings, convulsions, utter prostration, trances, visions like those of delirium tremens, were common occurrences. Children went home from the religious meetings crying aloud through the streets. Some lost their reason; not enough, Edwards says, to cause alarm, unless we are disposed to gather up all we can to darken the work and set it forth in frightful colors. But he perhaps goes rather too far in saying so much as this: "We cannot determine how great a calamity distraction is, considered with all its consequences, and all that might have been consequent if the distraction had not happened; nor indeed whether, thus considered, it be any calamity at all, or whether it be not a mercy, by preventing some great sin," etc. One cannot help questioning whether a sense of the ludicrous did not relax his features as he wrote this last sentence.

While the work was at its height a poor man, overwhelmed with melancholy, made an attempt to cut his throat. Then a gentleman of good standing, who had been greatly concerned about the state of his soul, but who "durst entertain no hope concerning his own good estate," succeeded in taking his life in that way. "After this, multitudes in this and other towns seemed to have it strongly suggested to them and pressed upon them to do as this person had done." And pious persons, who had no special darkness or doubt about the goodness of their state, had it urged upon them as if somebody had spoken to them,— "Cut your own throat! Now is a good opportunity. Now! Now!"

Within a very short period there was a remarkable change; for in 1744 Edwards writes of the "very melancholy state of things in New England." "There is a vast alteration," he says, "within these two years. . . . Many high professors are fallen, some into gross immoralities, some into a rooted spiritual pride, enthusiasm, and an incorrigible wildness of behavior, some into a cold frame of mind, showing a great indifference to the things of religion." But many, and, he hopes, the greater part of those that were professed converts, were genuine ones, and he hopes and is persuaded that God will yet revive his work.

Seven years later, writing to the Rev. Mr. Erskine, he says there are many instances of perseverance in the subjects of the late revival; not so great a proportion, he thinks, as in Scotland. "I cannot say," he writes, "that the

2. Two . . . revivals—*Cf.* note 20, p. 860. **4. "Thoughts . . . 1740"**—*Some Thoughts Concerning the Present Revival of Religion in New England.* **11. Defoe's . . . greater part of supposed converts give reason, by their conversation, to suppose that they are true converts. The proportion may perhaps be more truly represented by the proportion of the blossoms on a tree which abide and come to mature fruit to the whole number of blossoms in the spring." After all, it is only fair to say that this is as much as could be claimed for the success of the sower who went forth to sow in the parable.

Twenty-four years the people of Northampton listened to the preaching of this great sermonizer, this mighty reasoner, this holy man. Difficulties arose between him and his people into the consideration of which we need not enter. It is enough to refer to the delicate subject of the evil ways which had crept in to an alarming extent among the young people who listened to his preaching, and the excitement caused in families by the fear of their exposure. But the final quarrel was on the question of admission of unconverted persons to the communion table, against which, though it had been advocated by his venerated colleague, he felt bound in conscience to declare himself.

There must have been something more, one must believe, than these causes to account for the final vote which separated him from his charge. For when it was publicly put to the people "whether they still insisted on Mr. Edwards's dismission from the pastoral office over them," a great majority (above two hundred against twenty) voted for his dismission.

It is impossible that people of ordinary sensibilities should have listened to his torturing discourses without becoming at last sick of hearing of infinite horrors and endless agonies. It came very hard to kind-hearted persons to believe that the least sin exposed a creature God had made to such exorbitant penalties. Edwards's whole system had too much of the character of the savage people by whom the wilderness had so recently been tenanted. There was revenge—"revenging *justice*" was what he called it—insatiable, exhausting its ingenuity in contriving the most exquisite torments; there was the hereditary hatred glaring on the babe in its cradle; there were the suffering wretch and the pleased and shouting lookers-on. Every natural grace of disposition; all that had once charmed in the sweet ingenuousness of youth, in the laughing gayety of childhood, in the winning helplessness of infancy; every virtue that Plato had dreamed of, every character that Plutarch had drawn,—all were branded with the hot iron which left the blackened inscription upon them, signifying that they were accursed of God,—the damning word *nature*.

With all his powers, his virtues, his eloquence, it must have been more than people could do to stand being called "vile insects," "filthy worms," "firebrands of hell," and other such hard names. But what must have been the feeling of Northampton mothers when they read what Edwards said about their darlings! It seems that there had been complaints against some preachers for frightening poor innocent children, as he says, with talk of hell-fire and eternal damnation. But if those who complain really believe what they profess to, they show, he thinks, a great deal of weakness and inconsideration. Then follow the words which the writer once quoted on a public occasion, which

6. parable—The reference is to Matt. 13: 3-9. **33. Plutarch**—Plutarch's *Parallel Lives* are intended as ethical examples. **35. nature**—that is, unregenerate.

use of them brought him a letter from a much-respected orthodox clergyman, asking where they could be found. It is not strange that he asked, for he might have looked in vain for them in the ten-volume edition of Edwards's works, published under the editorship of his own predecessor, grandson of Edwards, the Reverend Sereno E. Dwight, or the English reprint of that edition. But the editor of the edition of the work on "Revivals," published in New York in 1832, did not think it necessary, perhaps honest, to omit the passage, and this is the way it reads:—

"As innocent as children seem to be to us, yet, if they are out of Christ, they are not so in God's sight, but are young vipers, and are infinitely more hateful than vipers, and are in a most miserable condition, as well as grown persons; and they are naturally very senseless and stupid, being *born as the wild ass's colt,* and need much to awaken them."

Is it possible that Edwards read the text mothers love so well, "Suffer little *vipers* to come unto me, and forbid them not, for of such is the Kingdom of God"?

The truth is, Edwards belonged in Scotland, to which he owed so much, and not to New England. And the best thing that could have happened, if it had happened early enough, both for him and for his people, was what did happen after a few years of residence at Stockbridge, where he went after leaving Northampton,—namely, his transfer to the presidency of the college at Princeton, New Jersey, where the Scotch theological thistle has always flourished, native or imported,—a stately flower at present, with fewer prickles and livelier bloom than in the days of Thomas Boston, the Ettrick shepherd of old. Here he died before assuming the duties of his office; died in faith and hope,—hope for himself, at any rate, perhaps, as we shall see, with less despairing views for the future of his fellow-creatures than his printed works have shown us.

The reader may have patience left for a few general remarks.

The spiritual nature seems to be a natural endowment, like a musical ear. Those who have no ear for music must be very careful how they speak about that mysterious world of thrilling vibrations which are idle noises to them. And so the true saint can be entirely appreciated only by saintly natures. Yet the least spiritual man can hardly read those remarkable "Resolutions" of Edwards without a reverence akin to awe for his purity and elevation. His beliefs and his conduct we need not hesitate to handle freely. We have lately seen unquestioning and unquestioned "faith" ending in child-murder. The spiritual nature is no safeguard against error of doctrine or practice; indeed, it may be doubted whether a majority of all the spiritual natures in the world would be found in Christian countries.

Edwards's system seems, in the light of to-day, to the last degree barbaric, mechanical, materialistic, pessimistic. If he had lived a hundred years later, and

6. editor . . . "Revivals"—published with *A Faithful Narrative* in 1832. The editor is not known. **14-16. "Suffer . . . God"**—*Cf.* Mark 10 14. **22. Scotch theological thistle**—that is, Calvinism in particular. **34. "Resolutions"**—*Cf.* p. 39. **42. mechanical**—mechanistic.

breathed the air of freedom, he could not have written with such old-world barbarism as we find in his volcanic sermons. We can realize in our day the truth of Montesquieu's saying, "If the punishments of the Orientals horrify humanity, the reason is that the despot who ordains them is above all laws. It is not so in republics, wherein the laws are always mild, because he who makes them is himself a subject." We cannot have self-government and humane laws without its reacting on our view of the Divine administration. It was not so strange that Thomas Boston, from whose livid pages Edwards derived much of his inspiration, should put his hearers on the rack of his depraved imagination, for he could remember the days when torture was used in Scotland to extract evidence. He may have heard the story told in his nursery,—for he was a boy six years old at the time,—how they had been applying the thumbscrews for an hour and a half to Principal William Carstairs, at Holyrood Palace, under the direction of the Privy Council.

Again, what can be more mechanical than the God of all gods he contrived,—or accepted,—under the name of *Justice,*—a piece of iron machinery which would have held back the father's arms stretching out to embrace his son, and shed the blood of the prodigal, instead of that of the fatted calf?

What can be more utterly materialistic than to attach the idea of sinfulness and responsibility, and liability to eternal suffering in consequence, to a little organic bundle, with no more knowledge of its relations to the moral world than a marsupial embryo in the maternal pouch has of its geographical position?

And what pessimism that ever entered the mind of man has gone farther than that which taxed the imagination to the utmost for its horrors, and declared that these were but the faintest image of what was reserved for the bulk of mankind?

There is reason to fear that Edwards has not been fairly dealt with in all respects. We have seen that in one instance expressions, which it was probably thought would give offence, were omitted by his editor. A far more important matter remains to be cleared up. The writer is informed on unquestionable authority that there is or was in existence a manuscript of Edwards in which his views appear to have undergone a great change in the direction of Arianism, or of Sabellianism, which is an old-fashioned Unitarianism, or at any rate show a defection from his former standard of orthodoxy, and which its custodians, thinking it best to be wise as serpents in order that they might continue harmless as doves, have considered it their duty to withhold from the public. If any of our friends at Andover can inform us what are the facts about this manuscript, such information would be gratefully received by many inquirers, who would be rejoiced to know that so able and so good a man lived to be

emancipated from the worse than heathen conceptions which had so long enchained his powerful, but crippled understanding.

Much that was morbid in Edwards's theology was doubtless owing to ill health, from which he was an habitual sufferer, a melancholic temperament, and the habit of constant moral introspection, of which his diary gives abundant evidence. Mr. Galton, in his work on "Heredity," says, after having looked up the history of a good many clergymen: "A gently complaining and fatigued spirit is that in which evangelical divines are very apt to pass their days. . . . There is an air of invalidism about most religious biographies." And Taine, in his notice of the poet Cowper, speaks of the "profound dejection, gloomy and continued despair, the horrible malady of the nerves and the soul which leads to suicide, *Puritanism,* and madness."

Perpetual self-inspection leads to spiritual hypochondriasis. If a man insists on counting his pulse twenty times a day, on looking at his tongue every hour or two, on taking his temperature with the thermometer morning and evening, on weighing himself three or four times a week, he will soon find himself in a doubtful state of bodily health. It is just so with those who are perpetually counting their spiritual pulse, taking the temperature of their feelings, weighing their human and necessarily imperfect characters against the infinite perfections placed in the other scale of the balance.

These melancholy diarists remind one of children in their little gardens, planting a bean or a lupine-seed in the morning, and pulling it up in the evening to see if it has sprouted or how it is getting on. The diarist pulls his character up by the roots every evening, and finds the soil of human nature,—the humus,—out of which it must needs grow, clinging to its radicles. Then he mourns over himself as did the saintly Brainard as "inexpressibly loathsome and defiled," calling himself so vile "that [he] dared not look anybody in the face," and soon becomes a fit subject for medical treatment, having lost all wholesome sense of the world about him and of his own personality.

Jeremy Taylor has well said of godly fear: "But this so excellent grace is soon abused in the best and most tender spirits; in those who are softened by nature and religion, by infelicities or cares, by sudden accidents or a sad soul; and the Devil, observing that fear, like a spare diet, starves the fevers of lust and quenches the flames of hell, endeavors to heighten this abstinence so much as to starve the man, and break the spirit into timorousness and scruple, sadness and unreasonable tremblings, credulity and trifling observation, suspicion and false accusations of God."

The fact that, while Edwards's name is used as a war-cry, and inscribed on the labarum of the old bow-and-arrow controversialists, his works are neglected, his doctrines either passed over in silence or repudiated, shows that his great powers were under some misguiding influence. The truth is that the whole system of beliefs which came in with the story of the "fall of man," the curse

of the father of the race conveyed by natural descent to his posterity, the casting of the responsibility of death and all the disorders of creation upon the unfortunate being who found them a part of the arrangements of the universe when he first made his appearance, is gently fading out of enlightened human intelligence, and we are hardly in a condition to realize what a tyranny it once exerted over many of the strongest minds. We no longer pretend to hold our primeval ancestor, whoever he may have been, responsible for the entrance of death into the world, for the teeth of the carnivora, for the venom of the snake, for the battles of the megatherium, the maladies of the ichthyosaurus, the indispositions of the pterodactyl, the extinction of the strange creatures that left their footprints on the shores of the Connecticut, where we have been finding the tracks of a fossil theology not less monstrous than its predecessors in the material world. Astronomy, Geology, Ethnology, and the comparative study of Oriental religions have opened the way; and now Anthropology has taken hold of the matter, and, leaving aside all those questions which by searching no man can find out, must deal with the problem which Asiatic tradition and its interpreters have failed to solve. But in the mean time many lessons are to be learned from the careful study of a man, who, as Mr. Bancroft says, "sums up the old theology of New England and is the fountain-head of the new." What better comment can be made on his misdirected powers than his own remark: "A person may have a strong reason and yet not a good reason. He may have a strength of mind to drive an argument and yet not have even balances."

As we picture the scenes he described, the Divine ingenuity fitting the body and soul for the extremity of suffering, and providing new physical and chemical laws to carry torture beyond our power of imagination, friends looking on pleased, parents rejoicing and singing hallelujahs as they see their children "turned away and beginning to enter into the great furnace" where they are to "roast" forever, all natural affections utterly gone,—can we find anywhere a more striking illustration of his own words? He is speaking of the self-torturing worship of the heathen: "How powerful must be the delusions of the human mind, and how strong the tendency of the heart to carry them such a length and so to overcome the tenderest feelings of human nature!"

There is no sufficient reason for attacking the motives of a man so saintly in life, so holy in aspirations, so patient, so meek, so laborious, so thoroughly in earnest in the work to which his life was given. But after long smothering in the sulphurous atmosphere of his thought one cannot help asking, Was this or anything like this,—is this or anything like this,—the accepted belief of any considerable part of Protestantism? If so, we must say with Bacon, "It were better to have no opinion of God at all than such an opinion as is unworthy of Him." A "natural man" is better than an unnatural theologian. It is a less violence to our nature to deify protoplasm than it is to diabolize the Deity.

The practical effect of Edwards's teachings about the relations of God and man has bequeathed a lesson not to be forgotten. A revival in which the majority of the converts fell away; nervous disorders of all sorts, insanity,

8. carnivora—flesh-eating animals. **9-10. megatherium . . . ichthyosaurus . . . pterodactyl**—extinct animals known only by their fossil remains.

suicide, among the rewards of his eloquence; Religion dressed up in fine phrases and made much of, while Morality, her Poor Relation, was getting hard treatment at the hands of the young persons who had grown up under the reign of terror of the Northampton pulpit; alienation of the hearts of his people to such an extent as is rarely seen in the bitterest quarrels between pastor and flock,—if this was a successful ministry, what disasters would constitute a failure?

"Never," says Professor Fisher, "was there a louder call for the utmost candor and fairness in dealing with the difficulties and objections of inquiring minds, whose perplexities find little relief in much of the current and traditional teaching."

At the bottom of these difficulties lies the doctrine of the "fall of man." Does not the present state of our knowledge compel us to consider the narrative on which this is based as a disproved, or at the best an unproved story, and to consign it, with the cohering doctrine of sin and all other inferences dependent upon it, to the nebulous realm of Asiatic legends, the vehicles of many different religions, each with its mingled truths and errors? The change of opinion is coming quite rapidly enough: we should hardly dare to print our doubts and questions if we did not know that they will be read by few, made light of by some of these, summarily answered and dismissed by others, and have no apparent immediate effect on the great mass of beliefs. For what we want in the religious and in the political organisms is just that kind of vital change which takes place in our bodies,—interstitial disintegration and reintegration; and one of the legitimate fears of our time is that science, which Sainte-Beuve would have us think has destroyed faith, will be too rapid in its action on beliefs. So the doubter should be glad that he is doubted; the rationalist respect the obduracy of the dogmatist; and all the mighty explosives with which the growth of knowledge has furnished us should be used rather to clear the path for those who come after us than to shatter the roofs which have long protected and still protect so many of our humble and trusting fellow-creatures.

23. interstitial—within the tissues. **25. Sainte-Beuve**—Charles Augustin Sainte-Beuve (1804-1869), the most influential French critic of his time.

HENRY DAVID THOREAU

1817-1862

1817 July 12, born at Concord, Massachusetts, the second son of John and Cynthia Dunbar Thoreau.

1818–1823 Lived mainly at Chelmsford; first went to school in Boston.

1823–1833 Grew up in Concord village, attending local schools, including the "Academy." Well grounded in the classics.

1833–1837 At Harvard College, graduating in August, 1837. In the vacations he taught school or "peddled." During this period Thoreau began his journals, though not systematically until October, 1837.

1837 Association with Emerson began.

1838 April 11, first lectured at Concord, beginning a lecture career of twenty years. Refused to pay church taxes. June, taught at the Concord "Academy."

1839 August 31, trip on the Concord and Merrimac rivers with his brother John.

1840 July, essay on Persius printed in the *Dial*. Thoreau contributed regularly during the four years of the existence of this magazine.

1841 April, lived in Emerson's house (to 1843).

1842 February, brother John died.

1843 Spring, tutor to William Emerson's children on Staten Island. Made the acquaintance of Horace Greeley, his "Maecenas."

1845 March, retired to Walden Pond, where he lived until September 6, 1847. During this period Thoreau spent a night in jail for his refusal to pay taxes.

1846 Visited Maine woods (again in 1853 and 1857).

1847 March and April, essay on Carlyle published in *Graham's Magazine*. Acquaintance with Agassiz ripened.

1849 "Essay on Civil Disobedience" published in *Aesthetic Papers*. *A Week on the Concord and Merrimac Rivers* published. Thoreau's sister Helen died. In the autumn Thoreau made his excursion to Cape Cod with a friend.

1850 September, visit to Canada with Ellery Channing.

1853 Essays which later became *A Yankee in Canada* published in *Putnam's Magazine*.

1854 *Walden* published. Thoreau delivered at an antislavery meeting in Framingham his speech "Slavery in Massachusetts."

1855 Some of the papers which later became *Cape Cod* published in *Putnam's Magazine*. Thoreau's health failing.

1859 February, Thoreau's father died. October, John Brown and Thoreau both appeared at an antislavery meeting in Concord. November, Thoreau delivered his plea for Brown at Tremont Temple, Boston.

1861 Trip west (to Minnesota) in search of health unsuccessful.

1862 May 6, Thoreau died at Concord.

1863 *Excursions* published (volume of essays from magazines).

1864 *The Maine Woods* published; also *Cape Cod* (1863).
1866 *A Yankee in Canada* published.
1881–1892 Thoreau's journals published as *Early Spring in Massachusetts* (1881); *Summer* (1884); *Winter* (1888); *Autumn* (1892).
1895 *Poems of Nature* published.

BIOGRAPHIES: F. B. Sanborn, *Henry David Thoreau,* Houghton Mifflin, 1882; H. S. Salt, *Henry David Thoreau,* Scribner, 1896; A. R. Marble, *Thoreau His Home, Friends and Books,* Crowell, 1902; W. E. The Writings of Henry David Thoreau, Houghton Mifflin, 1894, 10 vols. (Riverside edition); *Familiar Letters* added as Vol. XI, 1894; Manuscript and Walden editions, 1907, 20 vols. (the *Journal* occupying the last 14 vols.); Carl Bode, ed., *Collected Papers of Henry Thoreau,* Packard, 1943. *Some Unpublished Letters of Henry David and Sophia Elizabeth Thoreau,* ed. by S. A. Jones, Marion Press, 1899. *The Heart of Thoreau's Journals,* ed. Odell Shepard, Houghton Mifflin, 1927; *Representative Selections from Henry David Thoreau,* ed. Bartholow V. Crawford, American Book Co., 1934; Carl Bode, ed., *The Portable Thoreau,* Viking, 1947.

Perhaps the best way to approach Thoreau is to read the poems of Robert Frost, especially one so characteristic of the New England point of view as that entitled "New Hampshire." Thoreau has been labeled many times—poet-naturalist, transcendentalist, cosmic Yankee, bachelor of nature, social rebel—but the labels have a habit of slipping off. The reader of Robert Frost soon learns to expect from the Yankee elusive silences, Puck-like irony, and a whimsical acceptance of points of view which the New Englander has not the slightest intention of keeping to. So it is that Thoreau, quicksilver-like, eludes our pains; and, like the loon he describes in *Walden,* about the time he seems definitely cornered he slips under water and comes up again, laughing, rods away from the reader.

It is surprising, in view of the slender quantity of Thoreau's work published in his lifetime, how definite is the impression which he has made on American literature and on the world. The twenty-volume edition of his writings includes fourteen volumes of his journal, leaving but six of more formal publication; and of these six volumes, half the material is secondary and tangential. Nevertheless, Thoreau remains a major figure, partly because of the firm integrity of his personality, and partly because his philosophy, or at any rate his habit of mind, remains a perpetual challenge to sophisticated man.

It is possible to distinguish three general stages in the interpretation of Thoreau. The earlier point of view is that he was primarily a "poet-naturalist," and is that of Emerson and Lowell. After the publication of Sanborn's life there was a tendency to see in Thoreau the transcendentalist. Latterly, it is the social and economic rebellion of Thoreau which has most engaged attention, Thoreau's life and utterances being interpreted as ironic exposures of the futility of machine-made civilization and the tyranny of the state. What the next approach will be no one can guess,

but that there will be another fashion in interpretation is sure. Meantime, every reader has the task—and the riddle—of deciding what Thoreau in his essence really was. Perhaps, like Rousseau, he is destined to be all things to all men—though it seems certain that capitalism will never quite claim him for its own.

A WINTER WALK

This sketch was originally published in the *Dial* (Vol. IV, No. 2) for October, 1843, and collected into the posthumous volume of *Excursions* (1863). In *The Personality of Thoreau,* Boston, 1901, F. B. Sanborn prints a poem and a prose paragraph which, he says, were omitted from the *Dial* version. Thoreau's sister Sophia seems to have prepared the manuscripts for *Excursions;* in that volume the text of "A Winter Walk" differs in a number of particulars from the *Dial* text. The volume does not indicate the authority for the changes made; and though these have been incorporated in the collected editions of Thoreau, the present editors have preferred to keep the *Dial* text as being the last to appear in Thoreau's lifetime, pending more light on the authority of the *Excursions* version.

THE WIND has gently murmured through the blinds, or puffed with feathery softness against the windows, and occasionally sighed like a summer zephyr lifting the leaves along the livelong night. The meadow mouse has slept in his snug gallery in the sod, the owl has sat in a hollow tree in the depth of the swamp, the rabbit, the squirrel, and the fox have all been housed. The watch-dog has lain quiet on the hearth, and the cattle have stood silent in their stalls. The earth itself has slept, as it were its first, not its last sleep, save when some street-sign or wood-house door has faintly creaked upon its hinge, cheering forlorn nature at her midnight work. The only sound awake twixt Venus and Mars,—advertising us of a remote inward warmth, a divine cheer and fellowship, where gods are met together, but where it is very bleak for men to stand. But while the earth has slumbered, all the air has been alive with feathery flakes descending, as if some northern Ceres reigned, showering her silvery grain over all the fields.

We sleep and at length awake to the still reality of a winter morning. The snow lies warm as cotton or down upon the window-sill; the broadened sash and frosted panes admit a dim and private light, which enhances the snug cheer within. The stillness of the morning is impressive. The floor creaks under our feet as we move toward the window to look abroad through some clear space over the fields. We see the roofs stand under their snow burden. From the eaves and fences hang stalactites of snow, and in the yard stand stalagmites covering some concealed core. The trees and shrubs rear white arms to the sky on every side, and where were walls and fences, we see fantastic forms stretching in frolic gambols across the dusky landscape, as if nature had strewn her fresh designs over the fields by night as models for man's art.

Silently we unlatch the door, letting the drift fall in, and step abroad to face

10. Venus and Mars—the planets. **10. advertising**—informing. **14. Ceres**—the Roman goddess of the grain. **21. stalactites**—hanging deposits of calcium carbonate in a cave, in shape resembling an icicle. **21. stalagmites**—deposits like an inverted stalactite formed on the floor of a cavern by the dripping of calcareous water.

the cutting air. Already the stars have lost some of their sparkle, and a dull, leaden mist skirts the horizon. A lurid brazen light in the east proclaims the approach of day, while the western landscape is dim and spectral still, and clothed in a sombre Tartarian light, like the shadowy realms. They are Infernal sounds only that you hear;—the crowing of cocks, the barking of dogs, the chopping of wood, the lowing of kine, all seem to come from Pluto's barnyard and beyond the Styx;—not for any melancholy they suggest, but their twilight bustle is too solemn and mysterious for earth. The recent tracks of the fox or otter, in the yard, remind us that each hour of the night is crowded with events, and the primeval nature is still working and making tracks in the snow. Opening the gate, we tread briskly along the lone country road, crunching the dry and crisped snow under our feet, or aroused by the sharp clear creak of the wood-sled, just starting for the distant market, from the early farmer's door, where it has lain the summer long, dreaming amid the chips and stubble. For through the drifts and powdered windows, we see the farmer's early candle, like a paled star, emitting a lonely beam, as if some severe virtue were at its matins there. And one by one the smokes begin to ascend from the chimneys amid the trees and snows.

> The sluggish smoke curls up from some deep dell,
> The stiffened air exploring in the dawn,
> And making slow acquaintance with the day;
> Delaying now upon its heavenward course,
> In wreathed loiterings dallying with itself,
> With as uncertain purpose and slow deed,
> As its half-wakened master by the hearth,
> Whose mind still slumbering and sluggish thoughts
> Have not yet swept into the onward current
> Of the new day;—and now it streams afar,
> The while the chopper goes with step direct,
> And mind intent to swing the early axe.
> First in the dusky dawn he sends abroad
> His early scout, his emissary, smoke,
> The earliest, latest pilgrim from the roof,
> To feel the frosty air, inform the day;
> And while he crouches still beside the hearth,
> Nor musters courage to unbar the door,
> It has gone down the glen with the light wind,
> And o'er the plain unfurled its venturous wreath,
> Draped the treetops, loitered upon the hill,
> And warmed the pinions of the early bird;
> And now, perchance, high in the crispy air,
> Has caught sight of the day o'er the earth's edge,
> And greets its master's eye at his low door,
> As some refulgent cloud in the upper sky.

We hear the sound of wood-chopping at the farmers' doors, far over the frozen earth, the baying of the housedog, and the distant clarion of the cock.

4. **Tartarian**—from Tartarus, a synonym for Hades. 7. **Styx**—the infernal river which all souls must cross into the lower world.

The thin and frosty air conveys only the finer particles of sound to our ears, with short and sweet vibrations, as the waves subside soonest on the purest and lightest liquids, in which gross substances sink to the bottom. They come clear and bell-like, and from a greater distance in the horizon, as if there were fewer impediments than in summer to make them faint and ragged. The ground is sonorous, like seasoned wood, and even the ordinary rural sounds are melodious, and the jingling of the ice on the trees is sweet and liquid. There is the least possible moisture in the atmosphere, all being dried up, or congealed, and it is of such extreme tenuity and elasticity, that it becomes a source of delight. The withdrawn and tense sky seems groined like the aisles of a cathedral, and the polished air sparkles as if there were crystals of ice floating in it. Those who have resided in Greenland tell us, that, when it freezes, "the sea smokes like burning turfland, and a fog or mist arises, called frostsmoke," which "cutting smoke frequently raises blisters on the face and hands, and is very pernicious to the health." But this pure stinging cold is an elixir to the lungs, and not so much a frozen mist as a crystallized mid-summer haze, refined and purified by cold.

The sun at length rises through the distant woods, as if with the faint clashing swinging sound of cymbals, melting the air with his beams, and with such rapid steps the morning travels, that already his rays are gilding the distant western mountains. Meanwhile we step hastily along through the powdery snow, warmed by an inward heat, enjoying an Indian summer still, in the increased glow of thought and feeling. Probably if our lives were more conformed to nature, we should not need to defend ourselves against her heats and colds, but find her our constant nurse and friend, as do plants and quadrupeds. If our bodies were fed with pure and simple elements, and not with a stimulating and heating diet, they would afford no more pasture for cold than a leafless twig, but thrive like the trees, which find even winter genial to their expansion.

The wonderful purity of nature at this season is a most pleasing fact. Every decayed stump and moss-grown stone and rail, and the dead leaves of autumn, are concealed by a clean napkin of snow. In the bare fields and tinkling woods, see what virtue survives. In the coldest and bleakest places, the warmest charities still maintain a foot-hold. A cold and searching wind drives away all contagion, and nothing can withstand it but what has a virtue in it; and accordingly, whatever we meet with in cold and bleak places, as the tops of mountains, we respect for a sort of sturdy innocence, a Puritan toughness. All things beside seem to be called in for shelter, and what stays out must be part of the original frame of the universe, and of such valor as God himself. It is invigorating to breathe the cleansed air. Its greater fineness and purity are visible to the eye, and we would fain stay out long and late, that the gales may sigh through us too, as through the leafless trees, and fit us for the winter:—as if we hoped so to borrow some pure and steadfast virtue, which will stead us in all seasons.

At length, we have reached the edge of the woods, and shut out the gadding town. We enter within their covert as we go under the roof of a

12. resided in Greenland—This is possibly a reference to Sir John Ross's *Narrative of a Second Voyage in Search of a North-West Passage . . . 1829 . . . 1833*, London, 1835, but in the absence of an index to the volume it is impossible to locate the passage quoted.

cottage, and cross its threshold, all ceiled and banked up with snow. They are glad and warm still, and as genial and cheery in winter as in summer. As we stand in the midst of the pines, in the flickering and checkered light which straggles but little way into their maze, we wonder if the towns have ever heard their simple story. It seems to us that no traveller has ever explored them, and notwithstanding the wonders which science is elsewhere revealing every day, who would not like to hear their annals? Our humble villages in the plain, are their contribution. We borrow from the forest the boards which shelter, and the sticks which warm us. How important is their evergreen to the winter, that portion of the summer which does not fade, the permanent year, the unwithered grass. Thus simply, and with little expense of altitude, is the surface of the earth diversified. What would human life be without forests, those natural cities? From the tops of mountains they appear like smoothshaven lawns, yet whither shall we walk but in this taller grass?

There is a slumbering subterranean fire in nature which never goes out, and which no cold can chill. It finally melts the great snow, and in January or July is only buried under a thicker or thinner covering. In the coldest day it flows somewhere, and the snow melts around every tree. This field of winter rye, which sprouted late in the fall, and now speedily dissolves the snow, is where the fire is very thinly covered. We feel warmed by it. In the winter, warmth stands for all virtue, and we resort in thought to a trickling rill, with its bare stones shining in the sun, and to warm springs in the woods, with as much eagerness as rabbits and robins. The steam which rises from swamps and pools is as dear and domestic as that of our own kettle. What fire could ever equal the sunshine of a winter's-day, when the meadow mice come out by the wallsides, and the chickadee lisps in the defiles of the wood? The warmth comes directly from the sun, and is not radiated from the earth, as in summer; and when we feel his beams on our backs as we are treading some snowy dell, we are grateful as for a special kindness, and bless the sun which has followed us into that by-place.

This subterranean fire has its altar in each man's breast, for in the coldest day, and on the bleakest hill, the traveler cherishes a warmer fire within the folds of his cloak than is kindled on any hearth. A healthy man, indeed, is the complement of the seasons, and in winter, summer is in his heart. There is the south. Thither have all birds and insects migrated, and around the warm springs in his breast are gathered the robin and the lark.

In this glade covered with bushes of a year's growth, see how the silvery dust lies on every seared leaf and twig, deposited in such infinite and luxurious forms as by their very variety atone for the absence of color. Observe the tiny tracks of mice around every stem, and the triangular tracks of the rabbit. A pure elastic heaven hangs over all, as if the impurities of the summer sky, refined and shrunk by the chaste winter's cold, had been winnowed from the heavens upon the earth.

Nature confounds her summer distinctions at this season. The heavens seem to be nearer the earth. The elements are less reserved and distinct. Water turns to ice, rain to snow. The day is but a Scandinavian night. The winter is an arctic summer.

How much more living is the life that is in nature, the furred life which still survives the stinging nights, and, from amidst fields and woods covered with frost and snow, sees the sun rise.

"The foodless wilds
Pour forth their brown inhabitants."

The grey-squirrel and rabbit are brisk and playful in the remote glens, even on the morning of the cold Friday. Here is our Lapland and Labrador, and for our Esquimaux and Knistenaux, Dog-ribbed Indians, Novazemblaites, and Spitzbergeners, are there not the ice-cutter and wood-chopper, the fox, musk-rat, and mink?

Still, in the midst of the arctic day, we may trace the summer to its retreats, and sympathize with some contemporary life. Stretched over the brooks, in the midst of the frost-bound meadows, we may observe the submarine cottages of the caddice-worms, the larvae of the Plicipennes; their small cylindrical caves built around themselves, composed of flags, sticks, grass, and withered leaves, shells, and pebbles, in form and color like the wrecks which strew the bottom,—now drifting along over the pebbly bottom, now whirling in tiny eddies and dashing down steep falls, or sweeping rapidly along with the current, or else swaying to and fro at the end of some grass-blade or root. Anon they will leave their sunken habitations, and crawling up the stems of plants, floating on the surface, like gnats, or perfect insects, henceforth flutter over the surface of the water, or sacrifice their short lives in the flame of our candles at evening. Down yonder little glen the shrubs are drooping under their burden, and the red alder-berries contrast with the white ground. Here are the marks of a myriad feet which have already been abroad. The sun rises as proudly over such a glen, as over the valley of the Seine or the Tiber, and it seems the residence of a pure and self-subsistent valor, such as they never witnessed; which never knew defeat nor fear. Here reign the simplicity and purity of a primitive age, and a health and hope far remote from towns and cities. Standing quite alone, far in the forest, while the wind is shaking down snow from the trees, and leaving the only human tracks behind us, we find our reflections of a richer variety than the life of cities. The chickadee and nut-hatch are more inspiring society than the statesmen and philosophers, and we shall return to these last, as to more vulgar companions. In this lonely glen, with its brook draining the slopes, its creased ice and crystals of all hues, where the spruces and hemlocks stand up on either side, and the rush and sere wild oats in the rivulet itself, our lives are more serene and worthy to contemplate.

As the day advances, the heat of the sun is reflected by the hillsides, and we hear a faint but sweet music, where flows the rill released from its fetters,

4-5. **"The foodless . . . inhabitants"**—from the section "Winter" of *The Seasons* by James Thomson. 8. **Esquimaux . . . Dog-ribbed Indians**—The Knistenaux were a tribe of Cree Indians living in the Arctic portions of Canada, where the Dog-ribs also lived. The three proper nouns suggest that Thoreau had been reading travel books by Sir Alexander M'Kenzie, John (later Sir John) Franklin, or William E. Parry, all of whom refer to one or another of these aborigines. See lines 12-15, p. 882. 8. **Novazemblaites**—inhabitants of Nova Zembla, a group of islands in the Arctic Ocean, belonging to Russia. 9. **Spitzbergeners**—inhabitants of an archipelago in the Arctic Ocean north of Norway. 14. **Plicipennes**—caddis-flies. 15. **caves**—*Miscellanies* reads "cases."

and the icicles are melting on the trees; and the nut-hatch and partridge are heard and seen. The south wind melts the snow at noon, and the bare ground appears with its withered grass and leaves, and we are invigorated by the perfume which exhales from it, as by the scent of strong meats.

Let us go into this deserted woodman's hut, and see how he has passed the long winter nights and the short and stormy days. For here man has lived under this south hill-side, and it seems a civilized and public spot. We have such associations as when the traveller stands by the ruins of Palmyra or Hecatompolis. Singing birds and flowers perchance have begun to appear here, for flowers as well as weeds follow in the footsteps of man. These hemlocks whispered over his head, these hickory logs were his fuel, and these pitch-pine roots kindled his fire; yonder fuming rill in the hollow, whose thin and airy vapor still ascends as busily as ever, though he is far off now, was his well. These hemlock boughs, and the straw upon this raised platform, were his bed, and this broken dish held his drink. But he has not been here this season, for the phaebes built their nest upon this shelf last summer. I find some embers left, as if he had but just gone out, where he baked his pot of beans, and while at evening he smoked his pipe, whose stemless bowl lies in the ashes, chatted with his only companion, if perchance he had any, about the depth of the snow on the morrow, already falling fast and thick without, or disputed whether the last sound was the screech of an owl, or the creak of a bough, or imagination only; and through his broad chimney-throat, in the late winter evening, ere he stretched himself upon the straw, he looked up to learn the progress of the storm, and seeing the bright stars of Cassiopeia's chair shining brightly down upon him, fell contentedly asleep.

See how many traces from which we may learn the chopper's history. From this stump we may guess the sharpness of his ax, and from the slope of the stroke, on which side he stood, and whether he cut down the tree without going round it or changing hands; and, from the flexure of the splinters, we may know which way it fell. This one chip contains inscribed on it the whole history of the wood-chopper and of the world. On this scrap of paper, which held his sugar or salt, perchance, or was the wadding of his gun, sitting on a log in the forest, with what interest we read the tattle of cities, of those larger huts, empty and to let, like this, in High-streets and Broad-ways. The eaves are dripping on the south side of this simple roof, while the titmouse lisps in the pine and the genial warmth of the sun around the door is somewhat kind and human.

After two seasons, this rude dwelling does not deform the scene. Already the birds resort to it, to build their nests, and you may track to its door the feet of many quadrupeds. Thus, for a long time, nature overlooks the encroachment and profanity of man. The wood still cheerfully and unsuspiciously echoes the strokes of the axe that fells it, and while they are few and seldom, they enhance its wildness, and all the elements strive to naturalize the sound.

8. Palmyra—the modern Tedmour in Syria, a great city under the later Roman Empire, the ruins of which became famous in the later eighteenth century. **9. Hecatompolis**—the modern Dameghan in Persia, now deserted, but populous under the caliphate. **24. Cassiopeia's chair**—the constellation of that name.

Now our path begins to ascend gradually to the top of this high hill, from whose precipitous south side, we can look over the broad country, of forest and field and river, to the distant snowy mountains. See yonder thin column of smoke curling up through the woods from some invisible farm-house; the standard raised over some rural homestead. There must be a warmer and more genial spot there below, as where we detect the vapor from a spring forming a cloud above the trees. What fine relations are established between the traveller who discovers this airy column from some eminence in the forest and him who sits below. Up goes the smoke as silently and naturally as the vapor exhales from the leaves, and as busy disposing itself in wreathes as the housewife on the hearth below. It is a hieroglyphic of man's life, and suggests more intimate and important things than the boiling of a pot. Where its fine column rises above the forest, like an ensign, some human life has planted itself,—and such is the beginning of Rome, the establishment of the arts, and the foundation of empires, whether on the prairies of America or the steppes of Asia.

And now we descend again, to the brink of this woodland lake, which lies in a hollow of the hills, as if it were their expressed juice, and that of the leaves which are annually steeped in it. Without outlet or inlet to the eye, it has still its history, in the lapse of its waves, in the rounded pebbles on its shore, and in the pines which grow down to its brink. It has not been idle, though sedentary, but, like Abu Musa, teaches that "sitting still at home is the heavenly way; the going out is the way of the world." Yet in its evaporation it travels as far as any. In summer it is the earth's liquid eye; a mirror in the breast of nature. The sins of the wood are washed out in it. See how the woods form an amphitheatre about it, and it is an arena for all the genialness of nature. All trees direct the traveller to its brink, all paths seek it out, birds fly to it, quadrupeds flee to it, and the very ground inclines toward it. It is nature's saloon, where she has sat down to her toilet. Consider her silent economy and tidiness; how the sun comes with his evaporation to sweep the dust from its surface each morning, and a fresh surface is constantly welling up; and annually, after whatever impurities have accumulated herein, its liquid transparency appears again in the spring. In summer a hushed music seems to sweep across its surface. But now a plain sheet of snow conceals it from our eyes, except when the wind has swept the ice bare, and the sere leaves are gliding from side to side, tacking and veering on their tiny voyages. Here is one just keeled up against a pebble on shore, a dry beach leaf, rocking still, as if it would soon start again. A skilful engineer, methinks, might project its course since it fell from the parent stem. Here are all the elements for such a calculation. Its present position, the direction of the wind, the level of the pond, and how much more is given. In its scarred edges and veins is its log rolled up.

We fancy ourselves in the interior of a larger house. The surface of the pond is our deal table or sanded floor, and the woods rise abruptly from its edge, like the walls of a cottage. The lines set to catch pickerel through the ice look like a larger culinary preparation, and the men stand about on the white

21. **Abu Musa**—presumably Abu Hammu Musa (1323/4-1389), a Moorish king in Spain, author of a treatise on politics, and a patron of scholars. 40. **log**—journal of a voyage.

ground like pieces of forest furniture. The actions of these men, at the distance of half a mile over the ice and snow, impress us as when we read the exploits of Alexander in history. They seem not unworthy of the scenery, and as momentous as the conquest of kingdoms.

Again we have wandered through the arches of the wood, until from its skirts we hear the distant booming of ice from yonder bay of the river, as if it were moved by some other and subtler tide than oceans know. To me it has a strange sound of home, thrilling as the voice of one's distant and noble kindred. A mild summer shines over forest and lake, and though there is but one green leaf for many rods, yet nature enjoys a serene health. Every sound is fraught with the same mysterious assurance of health, as well now the creaking of the boughs in January, as the soft sough of the wind in July.

When Winter fringes every bough
  With his fantastic wreath,
And puts the seal of silence now
  Upon the leaves beneath;

When every stream in its pent-house
  Goes gurgling on its way,
And in his gallery the mouse
  Nibbleth the meadow hay;

Methinks the summer still is nigh,
  And lurketh underneath,
As that same meadowmouse doth lie
  Snug in the last year's heath.

And if perchance the Chickadee
  Lisp a faint note anon,
The snow [is] summer's canopy,
  Which she herself put on.

Fair blossoms deck the cheerful trees,
  And dazzling fruits depend,
The north wind sighs a summer breeze,
  The nipping frosts to fend,

Bringing glad tidings unto me,
  The while I stand all ear,
Of a serene eternity,
  Which need not winter fear.

Out on the silent pond straightway
  The restless ice doth crack,
And pond sprites merry gambols play
  Amid the deafening rack.

Eager I hasten to the vale,
  As if I heard brave news,

27. is—The *Dial* text reads "in," obviously a misprint, which *Miscellanies* corrects.

How nature held high festival,
Which it were hard to lose.

I gambol with my neighbor ice,
And sympathizing quake,
As each new crack darts in a trice
Across the gladsome lake.

One with the cricket in the ground,
And fagot on the hearth,
Resounds the rare domestic sound
Along the forest path.

Before night we will take a journey on skates along the course of this meandering river, as full of novelty to one who sits by the cottage fire all the winter's day, as if it were over the polar ice, with Captain Parry or Franklin; following the winding of the stream, now flowing amid hills, now spreading out into fair meadows, and forming a myriad coves and bays where the pine and hemlock overarch. The river flows in the rear of the towns, and we see all things from a new and wilder side. The fields and gardens come down to it with a frankness, and freedom from pretension, which they do not wear on the highway. It is the outside and edge of the earth. Our eyes are not offended by violent contrasts. The last rail of the farmer's fence is some swaying willow bough, which still preserves its freshness, and here at length all fences stop, and we no longer cross any road. We may go far up within the country now by the most retired and level road, never climbing a hill, but by broad levels ascending to the upland meadows. It is a beautiful illustration of the law of obedience, the flow of a river; the path for a sick man, a highway down which an acorn cup may float secure with its freight. Its slight occasional falls, whose precipices would not diversify the landscape, are celebrated by mist and spray, and attract the traveler from far and near. From the remote interior, its current conducts him by broad and easy steps, or by one gentle inclined plain, to the sea. Thus by an early and constant yielding to the inequalities of the ground it secures itself the easiest passage.

No domain of nature is quite closed to man at all times, and now we draw near to the empire of the fishes. Our feet glide swiftly over unfathomed depths, where in summer our line tempted the pout and perch, and where the stately pickerel lurked in the long corridors formed by the bulrushes. The deep, impenetrable marsh, where the heron waded, and bittern squatted, is made pervious to our swift shoes, as if a thousand railroads had been made into it. With one impulse we are carried to the cabin of the muskrat, that earliest settler, and see him dart away under the transparent ice, like a furred fish, to his hole in the bank; and we glide rapidly over meadows where lately "the mower whet his scythe," through beds of frozen cranberries mixed with meadow grass. We skate near to where the blackbird, the pewee, and the kingbird hung their nests over the water, and the hornets builded from the maple in the

13. Parry or Franklin—See note 8, p. 884. **29. gentle . . . plain**—"gentler inclined plane" (*Miscellanies*). **40. mower**—adapted from Milton's "L'Allegro," line 66.

swamp. How many gay warblers now following the sun, have radiated from this nest of silverbirch and thistledown. On the swamp's outer edge was hung the supermarine village, where no foot penetrated. In this hollow tree the wood-duck reared her brood, and slid away each day to forage in yonder fen.

In winter, nature is a cabinet of curiosities, full of dried specimens, in their natural order and position. The meadows and forests are a *hortus siccus*. The leaves and grasses stand perfectly pressed by the air without screw or gum, and the birds' nests are not hung on an artificial twig, but where they builded them. We go about dry shod to inspect the summer's work in the rank swamp, and see what a growth have got the alders, the willows, and the maples; testifying to how many warm suns, and fertilizing dews and showers. See what strides their boughs took in the luxuriant summer,—and anon these dormant buds will carry them onward and upward another span into the heavens.

Occasionally we wade through fields of snow, under whose depths the river is lost for many rods, to appear again to the right or left, where we least expected; still holding on its way underneath, with a faint, stertorous, rumbling sound, as if, like the bear and marmot, it too had hibernated, and we had followed its faint summer trail to where it earthed itself in snow and ice. At first we should have thought that rivers would be empty and dry in mid winter, or else frozen solid till the spring thawed them; but their volume is not diminished even, for only a superficial cold bridges their surfaces. The thousand springs which feed the lakes and streams are flowing still. The issues of a few surface springs only are closed, and they go to swell the deep reservoirs. Nature's wells are below the frost. The summer brooks are not filled with snow-water, nor does the mower quench his thirst with that alone. The streams are swollen when the snow melts in the spring, because nature's work has been delayed, the water being turned into ice and snow, whose particles are less smooth and round, and do not find their level so soon.

Far over the ice, between the hemlock woods and snow-clad hills, stands the pickerel fisher, his lines set in some retired cove, like a Finlander, with his arms thrust into the pouches of his dreadnought; with dull, snowy, fishy thoughts, himself a finless fish, separated a few inches from his race; dumb, erect, and made to be enveloped in clouds and snows, like the pines on shore. In these wild scenes, men stand about in the scenery, or move deliberately and heavily, having sacrificed the sprightliness and vivacity of towns to the dumb sobriety of nature. He does not make the scenery less wild, more than the jays and muskrats, but stands there as a part of it, as the natives are represented in the voyages of early navigators, at Nootka Sound, and on the North-west coast, with their furs about them, before they were tempted to loquacity by a scrap of iron. He belongs to the natural family of man, and is planted deeper in nature and has more root than the inhabitants of towns. Go to him, ask what luck, and you will learn that he too is a worshiper of the unseen. Hear with what sincere deference and waving gesture in his tone he speaks of the

6. hortus siccus—literally, dry garden; a collection of dried botanical specimens. **31. dreadnought**—a coat of very thick cloth. **38. early navigators**—This passage is reminiscent of reading in Hakluyt's *Voyages*, especially of such accounts as those of Luke Fox; but the travel books of Parry, Franklin, and Ross describe similar instances.

lake pickerel, which he has never seen, his primitive and ideal race of pickerel. He is connected with the shore still, as by a fish-line, and yet remembers the season when he took fish through the ice on the pond, while the peas were up in his garden at home.

But now, while we have loitered, the clouds have gathered again, and a few straggling snow-flakes are beginning to descend. Faster and faster they fall, shutting out the distant objects from sight. The snow falls on every wood and field, and no crevice is forgotten; by the river and the pond, on the hill and in the valley. Quadrupeds are confined to their coverts and the birds sit upon their perches this peaceful hour. There is not so much sound as in fair weather, but silently and gradually every slope, and the grey walls and fences, and the polished ice, and the sere leaves, which were not buried before, are concealed, and the tracks of men and beasts are lost. With so little effort does nature re-assert her rule, and blot out the traces of men. Hear how Homer has described the same. "The snowflakes fall thick and fast on a winter's day. The winds are lulled, and the snow falls incessant, covering the tops of the mountains, and the hills, and the plains where the lotustree grows, and the cultivated fields, and they are falling by the inlets and shores of the foaming sea, but are silently dissolved by the waves." The snow levels all things, and infolds them deeper in the bosom of nature, as, in the slow summer, vegetation creeps up to the entablature of the temple, and the turrets of the castle, and helps her to prevail over art.

The surly night-wind rustles through the wood, and warns us to retrace our steps, while the sun goes down behind the thickening storm, and birds seek their roosts, and cattle their stalls.

> "Drooping the lab'rer ox
> Stands covered o'er with snow, and *now* demands
> The fruit of all his toil."

Though winter is represented in the almanac as an old man, facing the wind and sleet, and drawing his cloak about him, we rather think of him as a merry wood-chopper, and warm-blooded youth, as blithe as summer. The unexplored grandeur of the storm keeps up the spirits of the traveller. It does not trifle with us, but has a sweet earnestness. In winter we lead a more inward life. Our hearts are warm and merry, like cottages under drifts, whose windows and doors are half concealed, but from whose chimneys the smoke cheerfully ascends. The imprisoning drifts increase the sense of comfort which the house affords, and in the coldest days we are content to sit over the hearth and see the sky through the chimney top, enjoying the quiet and serene life that may be had in a warm corner by the chimney side, or feeling our pulse by listening to the low of cattle in the street, or the sound of the flail in distant barns all the long afternoon. No doubt a skilful physician could determine our health by observing how these simple and natural sounds affected us. We enjoy now, not an oriental, but a boreal leisure, around warm stoves and fireplaces, and watch the shadow of motes in the sunbeams.

15-19. **"The snowflakes . . . waves"**—from Homer's Iliad, XII, lines 278 ff. 26-28. **"Drooping . . . toil"**—again, from Thomson's "Winter," Thoreau changing "then" to *now*. 43. **boreal**—northern.

Sometimes our fate grows too homely and familiarly serious ever to be cruel. Consider how for three months the human destiny is wrapped in furs. The good Hebrew Revelation takes no cognizance of all this cheerful snow. Is there no religion for the temperate and frigid zones? We know of no scripture which records the pure benignity of the gods on a New England winter night. Their praises have never been sung, only their wrath deprecated. The best scripture, after all, records but a meagre faith. Its saints live reserved and austere. Let a brave devout man spend the year in the woods of Maine or Labrador, and see if the Hebrew Scriptures speak adequately to his condition and experience, from the setting in of winter to the breaking up of the ice.

Now commences the long winter evening around the farmer's hearth, when the thoughts of the indwellers travel far abroad, and men are by nature and necessity charitable and liberal to all creatures. Now is the happy resistance to cold, when the farmer reaps his reward, and thinks of his preparedness for winter, and through the glittering panes, sees with equanimity "the mansion of the northern bear," for now the storm is over,

> "The full ethereal round,
> Infinite worlds disclosing to the view,
> Shines out intensely keen; and all one cope
> Of starry glitter glows from pole to pole."

H. D. T.

CIVIL DISOBEDIENCE

First entitled "Resistance to Civil Government," this essay was published in *Aesthetic Papers* (Boston, 1849), a volume edited by Elizabeth P. Peabody. Although Thoreau speaks of it as a lecture, it is not clear where he first delivered it. Retitled "Civil Disobedience," the essay reappears in the volume entitled *A Yankee in Canada,* and was later transferred to *Miscellanies* (1893). Neglected in the nineteenth century, the essay is now regarded as one of Thoreau's most important pronouncements, and is said to have had a profound influence upon Gandhi.

I HEARTILY accept the motto,—"That government is best which governs least;" and I should like to see it acted up to more rapidly and systematically. Carried out, it finally amounts to this, which also I believe,—"That government is best which governs not at all;" and when men are prepared for it, that will be the kind of government which they will have. Government is at best but an expedient; but most governments are usually, and all governments are sometimes, inexpedient. The objections which have been brought against a standing army, and they are many and weighty, and deserve to prevail, may also at last be brought against a standing government. The standing army is only an arm of the standing government. The government itself, which is only the mode which the people have chosen to execute their will, is equally liable to be abused and perverted before the people can act through it. Witness the present Mexican war, the work of comparatively a few individuals using

15-16. "the mansion . . . bear"—from Thomson's "Winter." **17-20. "The full . . . pole"**—again, with minor differences of punctuation, from "Winter." **34. Mexican war**—begun May 11, 1846, and concluded Feb. 2, 1848. The essay was composed during the struggle.

the standing government as their tool; for, in the outset, the people would not have consented to this measure.

This American government,—what is it but a tradition, though a recent one, endeavoring to transmit itself unimpaired to posterity, but each instant losing some of its integrity? It has not the vitality and force of a single living man; for a single man can bend it to his will. It is a sort of wooden gun to the people themselves. But it is not the less necessary for this; for the people must have some complicated machinery or other, and hear its din, to satisfy that idea of government which they have. Governments show thus how successfully men can be imposed on, even impose on themselves, for their own advantage. It is excellent, we must all allow. Yet this government never of itself furthered any enterprise, but by the alacrity with which it got out of its way. *It* does not keep the country free. *It* does not settle the West. *It* does not educate. The character inherent in the American people has done all that has been accomplished; and it would have done somewhat more, if the government had not sometimes got in its way. For government is an expedient by which men would fain succeed in letting one another alone; and, as has been said, when it is most expedient, the governed are most let alone by it. Trade and commerce, if they were not made of india-rubber, would never manage to bounce over the obstacles which legislators are continually putting in their way; and, if one were to judge these men wholly by the effects of their actions and not partly by their intentions, they would deserve to be classed and punished with those mischievous persons who put obstructions on the railroads.

But, to speak practically and as a citizen, unlike those who call themselves no-government men, I ask for, not at once no government, but *at once* a better government. Let every man make known what kind of government would command his respect, and that will be one step toward obtaining it.

After all, the practical reason why, when the power is once in the hands of the people, a majority are permitted, and for a long period continue, to rule is not because they are most likely to be in the right, nor because this seems fairest to the minority, but because they are physically the strongest. But a government in which the majority rule in all cases cannot be based on justice, even as far as men understand it. Can there be a government in which majorities do not virtually decide right and wrong, but conscience?—in which majorities decide only those questions to which the rule of expediency is applicable? Must the citizen ever for a moment, or in the least degree, resign his conscience to the legislator? Why has every man a conscience, then? I think that we should be men first, and subjects afterward. It is not desirable to cultivate a respect for the law, so much as for the right. The only obligation which I have a right to assume is to do at any time what I think right. It is truly enough said that a corporation has no conscience; but a corporation of conscientious men is a corporation *with* a conscience. Law never made men a whit more just; and, by means of their respect for it, even the well-disposed are daily made the agents of injustice. A common and natural result of an undue respect for law is, that you may see a file of soldiers, colonel, captain, corporal, privates, powder-monkeys, and all, marching in admirable order over hill and dale to the wars, against their wills, ay, against their com-

mon sense and consciences, which makes it very steep marching indeed, and produces a palpitation of the heart. They have no doubt that it is a damnable business in which they are concerned; they are all peaceably inclined. Now, what are they? Men at all? or small movable forts and magazines, at the service of some unscrupulous man in power? Visit the Navy-Yard, and behold a marine, such a man as an American government can make, or such as it can make a man with its black arts,—a mere shadow and reminiscence of humanity, a man laid out alive and standing, and already, as one may say, buried under arms with funeral accompaniments, though it may be,—

> "Not a drum was heard, not a funeral note,
> As his corse to the rampart we hurried;
> Not a soldier discharged his farewell shot
> O'er the grave where our hero we buried."

The mass of men serve the state thus, not as men mainly, but as machines, with their bodies. They are the standing army, and the militia, jailers, constables, *posse comitatus,* etc. In most cases there is no free exercise whatever of the judgment or of the moral sense; but they put themselves on a level with wood and earth and stones; and wooden men can perhaps be manufactured that will serve the purpose as well. Such command no more respect than men of straw or a lump of dirt. They have the same sort of worth only as horses and dogs. Yet such as these even are commonly esteemed good citizens. Others —as most legislators, politicians, lawyers, ministers, and office-holders—serve the state chiefly with their heads; and, as they rarely make any moral distinctions, they are as likely to serve the devil, without *intending* it, as God. A very few,—as heroes, patriots, martyrs, reformers in the great sense, and *men*— serve the state with their consciences also, and so necessarily resist it for the most part; and they are commonly treated as enemies by it. A wise man will only be useful as a man, and will not submit to be "clay," and "stop a hole to keep the wind away," but leave that office to his dust at least:—

> "I am too high-born to be propertied,
> To be a secondary at control,
> Or useful serving-man and instrument
> To any sovereign state throughout the world."

He who gives himself entirely to his fellow-men appears to them useless and selfish; but he who gives himself partially to them is pronounced a benefactor and philanthropist.

How does it become a man to behave toward this American government to-day? I answer, that he cannot without disgrace be associated with it. I cannot for an instant recognize that political organization as *my* government which is the *slave's* government also.

5. Navy-Yard—at Charlestown (now a part of Boston). **10-13. "Not . . . buried"**—the first stanza of "The Burial of Sir John Moore at Corunna" (1817) by Charles Wolfe (1791-1823). **16. posse comitatus**—the sheriff's posse, or body of men armed with legal authority to arrest. **28-29. "clay . . . away"**—*Cf. Hamlet,* Act v, scene 1, lines 201-04. **30-33. "I am . . . world"**—from *King John,* Act v, scene 2, lines 79-82. **37-38. American . . . to-day**—that is, the administration of Polk.

All men recognize the right of revolution; that is, the right to refuse allegiance to, and to resist, the government, when its tyranny or its inefficiency are great and unendurable. But almost all say that such is not the case now. But such was the case, they think, in the Revolution of '75. If one were to tell me that this was a bad government because it taxed certain foreign commodities brought to its ports, it is most probable that I should not make an ado about it, for I can do without them. All machines have their friction; and possibly this does enough good to counterbalance the evil. At any rate, it is a great evil to make a stir about it. But when the friction comes to have its machine, and oppression and robbery are organized, I say, let us not have such a machine any longer. In other words, when a sixth of the population of a nation which has undertaken to be the refuge of liberty are slaves, and a whole country is unjustly overrun and conquered by a foreign army, and subjected to military law, I think that it is not too soon for honest men to rebel and revolutionize. What makes this duty the more urgent is the fact that the country so overrun is not our own, but ours is the invading army.

Paley, a common authority with many on moral questions, in his chapter on the "Duty of Submission to Civil Government," resolves all civil obligation into expediency; and he proceeds to say "that so long as the interest of the whole society requires it, that is, so long as the established government cannot be resisted or changed without public inconveniency, it is the will of God . . . that the established government be obeyed,—and no longer. This principle being admitted, the justice of every particular case of resistance is reduced to a computation of the quantity of the danger and grievance on the one side, and of the probability and expense of redressing it on the other." Of this, he says, every man shall judge for himself. But Paley appears never to have contemplated those cases to which the rule of expediency does not apply, in which a people, as well as an individual, must do justice, cost what it may. If I have unjustly wrested a plank from a drowning man, I must restore it to him though I drown myself. This, according to Paley, would be inconvenient. But he that would save his life, in such a case, shall lose it. This people must cease to hold slaves, and to make war on Mexico, though it cost them their existence as a people.

In their practice, nations agree with Paley; but does any one think that Massachusetts does exactly what is right at the present crisis?

> "A drab of state, a cloth-o'-silver slut,
> To have her train borne up, and her soul trail in the dirt."

Practically speaking, the opponents to a reform in Massachusetts are not a hundred thousand politicians at the South, but a hundred thousand merchants and farmers here, who are more interested in commerce and agriculture than they are in humanity, and are not prepared to do justice to the slave and to Mexico, *cost what it may*. I quarrel not with far-off foes, but with those who, near at home, cooperate with, and do the bidding of, those far away, and with-

13. whole country—Mexico. **17. Paley**—William Paley (1743-1805), influential English moral philosopher, whose *Principles of Moral and Political Philosophy* appeared in 1785. The quotation in lines 19-25 may be found in Vol. II, p. 142, of the edition of 1793 (London).

out whom the latter would be harmless. We are accustomed to say, that the mass of men are unprepared; but improvement is slow, because the few are not materially wiser or better than the many. It is not so important that many should be as good as you, as that there be some absolute goodness somewhere; for that will leaven the whole lump. There are thousands who are *in opinion* opposed to slavery and to the war, who yet in effect do nothing to put an end to them; who, esteeming themselves children of Washington and Franklin, sit down with their hands in their pockets, and say that they know not what to do, and do nothing; who even postpone the question of freedom to the question of free trade, and quietly read the prices-current along with the latest advices from Mexico, after dinner, and, it may be, fall asleep over them both. What is the price-current of an honest man and patriot to-day? They hesitate, and they regret, and sometimes they petition; but they do nothing in earnest and with effect. They will wait, well disposed, for others to remedy the evil, that they may no longer have it to regret. At most, they give only a cheap vote, and a feeble countenance and God-speed, to the right, as it goes by them. There are nine hundred and ninety-nine patrons of virtue to one virtuous man. But it is easier to deal with the real possessor of a thing than with the temporary guardian of it.

All voting is a sort of gaming, like checkers or backgammon, with a slight moral tinge to it, a playing with right and wrong, with moral questions; and betting naturally accompanies it. The character of the voters is not staked. I cast my vote, perchance, as I think right; but I am not vitally concerned that that right should prevail. I am willing to leave it to the majority. Its obligation, therefore, never exceeds that of expediency. Even voting *for the right* is *doing* nothing for it. It is only expressing to men feebly your desire that it should prevail. A wise man will not leave the right to the mercy of chance, nor wish it to prevail through the power of the majority. There is but little virtue in the action of masses of men. When the majority shall at length vote for the abolition of slavery, it will be because they are indifferent to slavery, or because there is but little slavery left to be abolished by their vote. *They* will then be the only slaves. Only *his* vote can hasten the abolition of slavery who asserts his own freedom by his vote.

I hear of a convention to be held at Baltimore, or elsewhere, for the selection of a candidate for the Presidency, made up chiefly of editors, and men who are politicians by profession; but I think, what is it to any independent, intelligent, and respectable man what decision they may come to? Shall we not have the advantage of his wisdom and honesty, nevertheless? Can we not count upon some independent votes? Are there not many individuals in the country who do not attend conventions? But no: I find that the respectable man, so called, has immediately drifted from his position, and despairs of his country, when his country has more reason to despair of him. He forthwith adopts one of the candidates thus selected as the only *available* one, thus proving that he is himself *available* for any purposes of the demagogue. His vote is of no more worth than that of any unprincipled foreigner or hireling na-

5. leaven . . . lump—*Cf.* I Cor. 5: 6. **34. convention . . . Baltimore**—presumably the Democratic convention of 1848.

tive, who may have been bought. O for a man who is a *man,* and, as my neighbor says, has a bone in his back which you cannot pass your hand through! Our statistics are at fault: the population has been returned too large. How many *men* are there to a square thousand miles in this country? Hardly one. Does not America offer any inducement for men to settle here? The American has dwindled into an Odd Fellow,—one who may be known by the development of his organ of gregariousness, and a manifest lack of intellect and cheerful self-reliance; whose first and chief concern, on coming into the world, is to see that the almshouses are in good repair; and, before yet he has lawfully donned the virile garb, to collect a fund for the support of the widows and orphans that may be; who, in short, ventures to live only by the aid of the Mutual Insurance company, which has promised to bury him decently.

It is not a man's duty, as a matter of course, to devote himself to the eradication of any, even the most enormous, wrong; he may still properly have other concerns to engage him; but it is his duty, at least, to wash his hands of it, and, if he gives it no thought longer, not to give it practically his support. If I devote myself to other pursuits and contemplations, I must first see, at least, that I do not pursue them sitting upon another man's shoulders. I must get off him first, that he may pursue his contemplations too. See what gross inconsistency is tolerated. I have heard some of my townsmen say, "I should like to have them order me out to help put down an insurrection of the slaves, or to march to Mexico;—see if I would go;" and yet these very men have each, directly by their allegiance, and so indirectly, at least, by their money, furnished a substitute. The soldier is applauded who refuses to serve in an unjust war by those who do not refuse to sustain the unjust government which makes the war; is applauded by those whose own act and authority he disregards and sets at naught; as if the state were penitent to that degree that it hired one to scourge it while it sinned, but not to that degree that it left off sinning for a moment. Thus, under the name of Order and Civil Government, we are all made at last to pay homage to and support our own meanness. After the first blush of sin comes its indifference; and from immoral it becomes, as it were, *un*moral, and not quite unnecessary to that life which we have made.

The broadest and most prevalent error requires the most disinterested virtue to sustain it. The slight reproach to which the virtue of patriotism is commonly liable, the noble are most likely to incur. Those who, while they disapprove of the character and measures of a government, yield to it their allegiance and support are undoubtedly its most conscientious supporters, and so frequently the most serious obstacles to reform. Some are petitioning the State to dissolve the Union, to disregard the requisitions of the President. Why do they not dissolve it themselves,—the union between themselves and the State,—and refuse to pay their quota into its treasury? Do not they stand in the same relation to the State that the State does to the Union? And have not the same

6. Odd Fellow—the Independent Order of Odd Fellows, the first establishment of which in America seems to date from 1806, but which was officially separated from the English branch of the society in 1842-43. **10. virile garb**—humorous allusion to the *toga virilis,* which the Roman boy put on when he reached man's estate.

reasons prevented the State from resisting the Union which have prevented them from resisting the State?

How can a man be satisfied to entertain an opinion merely, and enjoy *it?* Is there any enjoyment in it, if his opinion is that he is aggrieved? If you are cheated out of a single dollar by your neighbor, you do not rest satisfied with knowing that you are cheated, or with saying that you are cheated, or even with petitioning him to pay you your due; but you take effectual steps at once to obtain the full amount, and see that you are never cheated again. Action from principle, the perception and the performance of right, changes things and relations; it is essentially revolutionary, and does not consist wholly with anything which was. It not only divides States and churches, it divides families; ay, it divides the *individual,* separating the diabolical in him from the divine.

Unjust laws exist: shall we be content to obey them, or shall we endeavor to amend them, and obey them until we have succeeded, or shall we transgress them at once? Men generally, under such a government as this, think that they ought to wait until they have persuaded the majority to alter them. They think that, if they should resist, the remedy would be worse than the evil. But it is the fault of the government itself that the remedy *is* worse than the evil. *It* makes it worse. Why is it not more apt to anticipate and provide for reform? Why does it not cherish its wise minority? Why does it cry and resist before it is hurt? Why does it not encourage its citizens to be on the alert to point out its faults, and *do* better than it would have them? Why does it always crucify Christ, and excommunicate Copernicus and Luther, and pronounce Washington and Franklin rebels?

One would think, that a deliberate and practical denial of its authority was the only offense never contemplated by government; else, why has it not assigned its definite, its suitable and proportionate penalty? If a man who has no property refuses but once to earn nine shillings for the State, he is put in prison for a period unlimited by any law that I know, and determined only by the discretion of those who placed him there; but if he should steal ninety times nine shillings from the State, he is soon permitted to go at large again.

If the injustice is part of the necessary friction of the machine of government, let it go, let it go: perchance it will wear smooth,—certainly the machine will wear out. If the injustice has a spring, or a pulley, or a rope, or a crank, exclusively for itself, then perhaps you may consider whether the remedy will not be worse than the evil; but if it is of such a nature that it requires you to be the agent of injustice to another, then, I say, break the law. Let your life be a counter friction to stop the machine. What I have to do is to see, at any rate, that I do not lend myself to the wrong which I condemn.

As for adopting the ways which the State has provided for remedying the evil, I know not of such ways. They take too much time, and a man's life will be gone. I have other affairs to attend to. I came into this world, not chiefly to make this a good place to live in, but to live in it, be it good or bad. A man has not everything to do, but something; and because he cannot do

24. Copernicus and Luther—Nicolaus Copernicus (1473-1543) was not excommunicated, but Martin Luther (1483-1543) was officially condemned in 1520.

everything, it is not necessary that he should do *something* wrong. It is not my business to be petitioning the Governor or the Legislature any more than it is theirs to petition me; and if they should not hear my petition, what should I do then? But in this case the State has provided no way: its very Constitution is the evil. This may seem to be harsh and stubborn and unconciliatory; but it is to treat with the utmost kindness and consideration the only spirit that can appreciate or deserves it. So is all change for the better, like birth and death, which convulse the body.

I do not hesitate to say, that those who call themselves Abolitionists should at once effectually withdraw their support, both in person and property, from the government of Massachusetts, and not wait till they constitute a majority of one, before they suffer the right to prevail through them. I think that it is enough if they have God on their side, without waiting for that other one. Moreover, any man more right than his neighbors constitutes a majority of one already.

I meet this American government, or its representative, the State government, directly, and face to face, once a year—no more—in the person of its tax-gatherer; this is the only mode in which a man situated as I am necessarily meets it; and it then says distinctly, Recognize me; and the simplest, the most effectual, and, in the present posture of affairs, the indispensablest mode of treating with it on this head, of expressing your little satisfaction with and love for it, is to deny it then. My civil neighbor, the tax-gatherer, is the very man I have to deal with,—for it is, after all, with men and not with parchment that I quarrel,—and he has voluntarily chosen to be an agent of the government. How shall he ever know well what he is and does as an officer of the government, or as a man, until he is obliged to consider whether he shall treat me, his neighbor, for whom he has respect, as a neighbor and well-disposed man, or as a maniac and disturber of the peace, and see if he can get over this obstruction to his neighborliness without a ruder and more impetuous thought or speech corresponding with his action. I know this well, that if one thousand, if one hundred, if ten men whom I could name,—if ten *honest* men only,—ay, if *one* HONEST man, in this State of Massachusetts, *ceasing to hold slaves,* were actually to withdraw from this copartnership, and be locked up in the county jail therefor, it would be the abolition of slavery in America. For it matters not how small the beginning may seem to be: what is once well done is done forever. But we love better to talk about it: that we say is our mission. Reform keeps many scores of newspapers in its service, but not one man. If my esteemed neighbor, the State's ambassador, who will devote his days to the settlement of the question of human rights in the Council Chamber, instead of being threatened with the prisons of Carolina, were to sit down the prisoner of Massachusetts, that State which is so anxious to foist the sin of slavery upon her sister,—though at present she can discover only an act of inhospitality to be the ground of a quarrel with her,—the Legislature would not wholly waive the subject the following winter.

38. State's ambassador—Samuel Hoar, of Concord, officially sent by Massachusetts to protest against the unconstitutional imprisonment of colored Massachusetts seamen by South Carolina, and driven from Charleston by threats.

Under a government which imprisons any unjustly, the true place for a just man is also a prison. The proper place to-day, the only place which Massachusetts has provided for her freer and less desponding spirits, is in her prisons, to be put out and locked out of the State by her own act, as they have already put themselves out by their principles. It is there that the fugitive slave, and the Mexican prisoner on parole, and the Indian come to plead the wrongs of his race should find them; on that separate, but more free and honorable ground, where the State places those who are not *with* her, but *against* her,—the only house in a slave State in which a free man can abide with honor. If any think that their influence would be lost there, and their voices no longer afflict the ear of the State, that they would not be as an enemy within its walls, they do not know by how much truth is stronger than error, nor how much more eloquently and effectively he can combat injustice who has experienced a little in his own person. Cast your whole vote, not a strip of paper merely, but your whole influence. A minority is powerless while it conforms to the majority; it is not even a minority then; but it is irresistible when it clogs by its whole weight. If the alternative is to keep all just men in prison, or give up war and slavery, the State will not hesitate which to choose. If a thousand men were not to pay their tax-bills this year, that would not be a violent and bloody measure, as it would be to pay them, and enable the State to commit violence and shed innocent blood. This is, in fact, the definition of a peaceable revolution, if any such is possible. If the tax-gatherer, or any other public officer, asks me, as one has done, "But what shall I do?" my answer is, "If you really wish to do anything, resign your office." When the subject has refused allegiance, and the officer has resigned his office, then the revolution is accomplished. But even suppose blood should flow. Is there not a sort of blood shed when the conscience is wounded? Through this wound a man's real manhood and immortality flow out, and he bleeds to an everlasting death. I see this blood flowing now.

I have contemplated the imprisonment of the offender, rather than the seizure of his goods,—though both will serve the same purpose,—because they who assert the purest right, and consequently are most dangerous to a corrupt State, commonly have not spent much time in accumulating property. To such the State renders comparatively small service, and a slight tax is wont to appear exorbitant, particularly if they are obliged to earn it by special labor with their hands. If there were one who lived wholly without the use of money, the State itself would hesitate to demand it of him. But the rich man—not to make any invidious comparison—is always sold to the institution which makes him rich. Absolutely speaking, the more money, the less virtue; for money comes between a man and his objects, and obtains them for him; and it was certainly no great virtue to obtain it. It puts to rest many questions which he would otherwise be taxed to answer; while the only new question which it puts is the hard but superfluous one, how to spend it. Thus his moral ground is taken from under his feet. The opportunities of living are diminished in proportion as what are called the "means" are increased. The best thing a man can do for his culture when he is rich is to endeavor to carry out those schemes which he entertained when he was poor. Christ answered the Herodians according

to their condition. "Show me the tribute-money," said he;—and took one penny out of his pocket;—if you use money which has the image of Caesar on it and which he has made current and valuable, that is, *if you are men of the State,* and gladly enjoy the advantages of Caesar's government, then pay him back some of his own when he demands it. "Render therefore to Caesar that which is Caesar's, and to God those things which are God's,"—leaving them no wiser than before as to which was which; for they did not wish to know.

When I converse with the freest of my neighbors, I perceive that, whatever they may say about the magnitude and seriousness of the question, and their regard for the public tranquillity, the long and the short of the matter is, that they cannot spare the protection of the existing government, and they dread the consequences to their property and families of disobedience to it. For my own part, I should not like to think that I ever rely on the protection of the State. But, if I deny the authority of the State when it presents its tax-bill, it will soon take and waste all my property, and so harass me and my children without end. This is hard. This makes it impossible for a man to live honestly, and at the same time comfortably, in outward respects. It will not be worth the while to accumulate property; that would be sure to go again. You must hire or squat somewhere, and raise but a small crop, and eat that soon. You must live within yourself, and depend upon yourself always tucked up and ready for a start, and not have many affairs. A man may grow rich in Turkey even, if he will be in all respects a good subject of the Turkish government. Confucius said: "If a state is governed by the principles of reason, poverty and misery are subjects of shame; if a state is not governed by the principles of reason, riches and honors are the subjects of shame." No: until I want the protection of Massachusetts to be extended to me in some distant Southern port, where my liberty is endangered, or until I am bent solely on building up an estate at home by peaceful enterprise, I can afford to refuse allegiance to Massachusetts, and her right to my property and life. It costs me less in every sense to incur the penalty of disobedience to the State than it would to obey. I should feel as if I were worth less in that case.

Some years ago, the State met me in behalf of the Church, and commanded me to pay a certain sum toward the support of a clergyman whose preaching my father attended, but never I myself. "Pay," it said, "or be locked up in the jail." I declined to pay. But, unfortunately, another man saw fit to pay it. I did not see why the schoolmaster should be taxed to support the priest, and not the priest the schoolmaster; for I was not the State's schoolmaster, but I supported myself by voluntary subscription. I did not see why the lyceum should not present its tax-bill, and have the State to back its demand, as well as the Church. However, at the request of the selectmen, I condescended to

1. **Show . . . money"**—*Cf.* Matt. 22: 19-21, from which the following quotation (lines 5-6) is also taken. 23. **Confucius**—Confucius (about 550-478 B.C.), Chinese philosopher. The quotation is from his *Four Books.* **28-29. refuse allegiance**—In 1838 Thoreau refused to pay taxes for the support of the church, but he was not then put in jail. In 1845, however, on a visit from Walden Pond to Concord to get his shoes mended, Thoreau was imprisoned by Sam Staples, the Concord constable, for refusing to pay his poll tax, spent a night in jail, and was released when the tax was paid for him without his knowledge.

make some such statement as this in writing:—"Know all men by these presents, that I, Henry Thoreau, do not wish to be regarded as a member of any incorporated society which I have not joined." This I gave to the town clerk; and he has it. The State, having thus learned that I did not wish to be regarded as a member of that church, has never made a like demand on me since; though it said that it must adhere to its original presumption that time. If I had known how to name them, I should then have signed off in detail from all the societies which I never signed on to; but I did not know where to find a complete list.

I have paid no poll-tax for six years. I was put into a jail once on this account, for one night; and, as I stood considering the walls of solid stone, two or three feet thick, the door of wood and iron, a foot thick, and the iron grating which strained the light, I could not help being struck with the foolishness of that institution which treated me as if I were mere flesh and blood and bones, to be locked up. I wondered that it should have concluded at length that this was the best use it could put me to, and had never thought to avail itself of my services in some way. I saw that, if there was a wall of stone between me and my townsmen, there was a still more difficult one to climb or break through before they could get to be as free as I was. I did not for a moment feel confined, and the walls seemed a great waste of stone and mortar. I felt as if I alone of all my townsmen had paid my tax. They plainly did not know how to treat me, but behaved like persons who are underbred. In every threat and in every compliment there was a blunder; for they thought that my chief desire was to stand the other side of that stone wall. I could not but smile to see how industriously they locked the door on my meditations, which followed them out again without let or hindrance, and *they* were really all that was dangerous. As they could not reach me, they had resolved to punish my body; just as boys, if they cannot come at some person against whom they have a spite, will abuse his dog. I saw that the State was half-witted, that it was timid as a lone woman with her silver spoons, and that it did not know its friends from its foes, and I lost all my remaining respect for it, and pitied it.

Thus the State never intentionally confronts a man's sense, intellectual or moral, but only his body, his senses. It is not armed with superior wit or honesty, but with superior physical strength. I was not born to be forced. I will breathe after my own fashion. Let us see who is the strongest. What force has a multitude? They only can force me who obey a higher law than I. They force me to become like themselves. I do not hear of *men* being *forced* to live this way or that by masses of men. What sort of life were that to live? When I meet a government which says to me, "Your money or your life," why should I be in haste to give it my money? It may be in a great strait, and not know what to do: I cannot help that. It must help itself; do as I do. It is not worth the while to snivel about it. I am not responsible for the successful working of the machinery of society. I am not the son of the engineer. I perceive that, when an acorn and a chestnut fall side by side, the one does not remain inert to make way for the other, but both obey their own laws, and spring and

grow and flourish as best they can, till one, perchance, overshadows and destroys the other. If a plant cannot live according to its nature, it dies; and so a man.

The night in prison was novel and interesting enough. The prisoners in their shirt-sleeves were enjoying a chat and the evening air in the doorway, when I entered. But the jailer said, "Come, boys, it is time to lock up;" and so they dispersed, and I heard the sound of their steps returning into the hollow apartments. My room-mate was introduced to me by the jailer as "a first-rate fellow and a clever man." When the door was locked, he showed me where to hang my hat, and how he managed matters there. The rooms were whitewashed once a month; and this one, at least, was the whitest, most simply furnished, and probably the neatest apartment in the town. He naturally wanted to know where I came from, and what brought me there; and, when I had told him, I asked him in my turn how he came there, presuming him to be an honest man, of course; and, as the world goes, I believe he was. "Why," said he, "they accuse me of burning a barn; but I never did it." As near as I could discover, he had probably gone to bed in a barn when drunk, and smoked his pipe there; and so a barn was burnt. He had the reputation of being a clever man, had been there some three months waiting for his trial to come on, and would have to wait as much longer; but he was quite domesticated and contented, since he got his board for nothing, and thought that he was well treated.

He occupied one window, and I the other; and I saw that if one stayed there long, his principal business would be to look out the window. I had soon read all the tracts that were left there, and examined where former prisoners had broken out, and where a grate had been sawed off, and heard the history of the various occupants of that room; for I found that even here there was a history and a gossip which never circulated beyond the walls of the jail. Probably this is the only house in the town where verses are composed, which are afterward printed in circular form, but not published. I was shown quite a long list of verses which were composed by some young men who had been detected in an attempt to escape, who avenged themselves by singing them.

I pumped my fellow-prisoner as dry as I could, for fear I should never see him again; but at length he showed me which was my bed, and left me to blow out the lamp.

It was like traveling into a far country, such as I had never expected to behold, to lie there for one night. It seemed to me that I never had heard the town clock strike before, nor the evening sounds of the village; for we slept with the windows open, which were inside the grating. It was to see my native village in the light of the Middle Ages, and our Concord was turned into a Rhine stream, and visions of knights and castles passed before me. They were the voices of old burghers that I heard in the streets. I was an involuntary spectator and auditor of whatever was done and said in the kitchen of the adjacent village-inn,—a wholly new and rare experience to me. It was a closer view of my native town. I was fairly inside of it. I never had seen its institutions before. This is one of its peculiar institutions; for it is a shire town. I began to comprehend what its inhabitants were about.

In the morning, our breakfasts were put through the hole in the door, in small oblong-square tin pans, made to fit, and holding a pint of chocolate, with brown bread, and an iron spoon. When they called for the vessels again, I was green enough to return what bread I had left; but my comrade seized it, and said that I should lay that up for lunch or dinner. Soon after he was let out to work at haying in a neighboring field, whither he went every day, and would not be back till noon; so he bade me good-day, saying that he doubted if he should see me again.

When I came out of prison,—for some one interfered, and paid that tax,—I did not perceive that great changes had taken place on the common, such as he observed who went in a youth and emerged a tottering and gray-headed man; and yet a change had to my eyes come over the scene,—the town, and State, and country,—greater than any that mere time could effect. I saw yet more distinctly the State in which I lived. I saw to what extent the people among whom I lived could be trusted as good neighbors and friends; that their friendship was for summer weather only; that they did not greatly propose to do right; that they were a distinct race from me by their prejudices and superstitions, as the Chinamen and Malays are; that in their sacrifices to humanity they ran no risks, not even to their property; that after all they were not so noble but they treated the thief as he had treated them, and hoped, by a certain outward observance and a few prayers, and by walking in a particular straight though useless path from time to time, to save their souls. This may be to judge my neighbors harshly; for I believe that many of them are not aware that they have such an institution as the jail in their village.

It was formerly the custom in our village, when a poor debtor came out of jail, for his acquaintances to salute him, looking through their fingers, which were crossed to represent the grating of a jail window, "How do ye do?" My neighbors did not thus salute me, but first looked at me, and then at one another, as if I had returned from a long journey. I was put into jail as I was going to the shoemaker's to get a shoe which was mended. When I was let out the next morning, I proceeded to finish my errand, and, having put on my mended shoe, joined a huckleberry party, who were impatient to put themselves under my conduct; and in half an hour,—for the horse was soon tackled, —was in the midst of a huckleberry field, on one of our highest hills, two miles off, and then the State was nowhere to be seen.

This is the whole history of "My Prisons."

I have never declined paying the highway tax, because I am as desirous of being a good neighbor as I am of being a bad subject; and as for supporting schools, I am doing my part to educate my fellow-countrymen now. It is for no particular item in the tax-bill that I refuse to pay it. I simply wish to refuse allegiance to the State, to withdraw and stand aloof from it effectually. I do not care to trace the course of my dollar, if I could, till it buys a man or a musket to shoot one with,—the dollar is innocent,—but I am concerned to trace the

36. **"My Prisons"**—The allusion is to a famous book by Silvio Pellico (1788-1854), Italian poet and dramatist, entitled *Le mie prigioni* (1832), detailing the story of his arrest and imprisonment by the tyrannical Austrian Government.

effects of my allegiance. In fact, I quietly declare war with the State, after my fashion, though I will still make what use and get what advantage of her I can, as is usual in such cases.

If others pay the tax which is demanded of me, from a sympathy with the State, they do but what they have already done in their own case, or rather they abet injustice to a greater extent than the State requires. If they pay the tax from a mistaken interest in the individual taxed, to save his property, or prevent his going to jail, it is because they have not considered wisely how far they let their private feelings interfere with the public good.

This, then, is my position at present. But one cannot be too much on his guard in such a case, lest his action be biased by obstinacy or an undue regard for the opinions of men. Let him see that he does only what belongs to himself and to the hour.

I think sometimes, Why, this people mean well, they are only ignorant; they would do better if they knew how: why give your neighbors this pain to treat you as they are not inclined to? But I think again, This is no reason why I should do as they do, or permit others to suffer much greater pain of a different kind. Again, I sometimes say to myself, When many millions of men, without heat, without ill will, without personal feeling of any kind, demand of you a few shillings only, without the possibility, such is their constitution, of retracting or altering their present demand, and without the possibility, on your side, of appeal to any other millions, why expose yourself to this overwhelming brute force? You do not resist cold and hunger, the winds and the waves, thus obstinately; you quietly submit to a thousand similar necessities. You do not put your head into the fire. But just in proportion as I regard this as not wholly a brute force, but partly a human force, and consider that I have relations to those millions as to so many millions of men, and not of mere brute or inanimate things, I see that appeal is possible, first and instantaneously, from them to the Maker of them, and, secondly, from them to themselves. But if I put my head deliberately into the fire, there is no appeal to fire or to the Maker of fire, and I have only myself to blame. If I could convince myself that I have any right to be satisfied with men as they are, and to treat them accordingly, and not according, in some respects, to my requisitions and expectations of what they and I ought to be, then, like a good Mussulman and fatalist, I should endeavor to be satisfied with things as they are, and say it is the will of God. And, above all, there is this difference between resisting this and a purely brute or natural force, that I can resist this with some effect; but I cannot expect, like Orpheus, to change the nature of the rocks and trees and beasts.

I do not wish to quarrel with any man or nation. I do not wish to split hairs, to make fine distinctions, or set myself up as better than my neighbors. I seek rather, I may say, even an excuse for conforming to the laws of the land. I am but too ready to conform to them. Indeed, I have reason to suspect myself on this head; and each year, as the tax-gatherer comes round, I find myself disposed to review the acts and position of the general and State governments, and the spirit of the people, to discover a pretext for conformity.

38. **Orpheus**—See note 13, p. 469.

"We must affect our country as our parents,
And if at any time we alienate
Our love or industry from doing it honor,
We must respect effects and teach the soul
Matter of conscience and religion,
And not desire of rule or benefit."

I believe that the State will soon be able to take all my work of this sort out of my hands, and then I shall be no better a patriot than my fellow-countrymen. Seen from a lower point of view, the Constitution, with all its faults, is very good; the law and the courts are very respectable; even this State and this American government are, in many respects, very admirable, and rare things, to be thankful for, such as a great many have described them; but seen from a point of view a little higher, they are what I have described them; seen from a higher still, and the highest, who shall say what they are, or that they are worth looking at or thinking of at all?

However, the government does not concern me much, and I shall bestow the fewest possible thoughts on it. It is not many moments that I live under a government, even in this world. If a man is thought-free, fancy-free, imagination-free, that which *is not* never for a long time appearing *to be* to him, unwise rulers or reformers cannot fatally interrupt him.

I know that most men think differently from myself; but those whose lives are by profession devoted to the study of these or kindred subjects content me as little as any. Statesmen and legislators, standing so completely within the institution, never distinctly and nakedly behold it. They speak of moving society, but have no resting-place without it. They may be men of a certain experience and discrimination, and have no doubt invented ingenious and even useful systems, for which we sincerely thank them; but all their wit and usefulness lie within certain not very wide limits. They are wont to forget that the world is not governed by policy and expediency. Webster never goes behind government, and so cannot speak with authority about it. His words are wisdom to those legislators who contemplate no essential reform in the existing government; but for thinkers, and those who legislate for all time, he never once glances at the subject. I know of those whose serene and wise speculations on this theme would soon reveal the limits of his mind's range and hospitality. Yet, compared with the cheap professions of most reformers, and the still cheaper wisdom and eloquence of politicians in general, his are almost the only sensible and valuable words, and we thank Heaven for him. Comparatively, he is always strong, original, and, above all, practical. Still, his quality is not wisdom, but prudence. The lawyer's truth is not Truth, but consistency or a consistent expediency. Truth is always in harmony with herself, and is not concerned chiefly to reveal the justice that may consist with wrong-doing. He well deserves to be called, as he has been called, the Defender of the Constitution. There are really no blows to be given by him but defensive ones. He is not a leader, but a follower. His leaders are the men of '87.

42-43. **Defender . . . Constitution**—The phrase particularly followed upon Webster's second speech on Foote's Resolution—the so-called Reply to Hayne (1830). 44. **men of '87**—the fathers of the Constitution. The Constitution was completed and submitted to the several states in 1787.

"I have never made an effort," he says, "and never propose to make an effort; I have never countenanced an effort, and never mean to countenance an effort, to disturb the arrangement as originally made, by which the various States came into the Union." Still thinking of the sanction which the Constitution gives to slavery, he says, "Because it was a part of the original compact,—let it stand." Notwithstanding his special acuteness and ability, he is unable to take a fact out of its merely political relations, and behold it as it lies absolutely to be disposed of by the intellect,—what, for instance, it behooves a man to do here in America to-day with regard to slavery,—but ventures, or is driven, to make some such desperate answer as the following, while professing to speak absolutely, and as a private man,—from which what new and singular code of social duties might be inferred? "The manner," says he, "in which the governments of those States where slavery exists are to regulate it is for their own consideration, under their responsibility to their constituents, to the general laws of propriety, humanity, and justice, and to God. Associations formed elsewhere, springing from a feeling of humanity, or any other cause, have nothing whatever to do with it. They have never received any encouragement from me, and they never will."

They who know of no purer sources of truth, who have traced up its stream no higher, stand, and wisely stand, by the Bible and the Constitution, and drink at it there with reverence and humility; but they who behold where it comes trickling into this lake or that pool, gird up their loins once more, and continue their pilgrimage toward its fountain-head.

No man with a genius for legislation has appeared in America. They are rare in the history of the world. There are orators, politicians, and eloquent men, by the thousand; but the speaker has not yet opened his mouth to speak who is capable of settling the much-vexed questions of the day. We love eloquence for its own sake, and not for any truth which it may utter, or any heroism it may inspire. Our legislators have not yet learned the comparative value of free trade and of freedom, of union, and of rectitude, to a nation. They have no genius or talent for comparatively humble questions of taxation and finance, commerce and manufactures and agriculture. If we were left solely to the wordy wit of legislators in Congress for our guidance, uncorrected by the seasonable experience and the effectual complaints of the people, America would not long retain her rank among the nations. For eighteen hundred years, though perchance I have no right to say it, the New Testament has been written; yet where is the legislator who has wisdom and practical talent enough to avail himself of the light which it sheds on the science of legislation?

The authority of government, even such as I am willing to submit to,—for I will cheerfully obey those who know and can do better than I, and in many things even those who neither know nor can do so well,—is still an impure one: to be strictly just, it must have the sanction and consent of the governed.

1. **"I have never made . . ."**—The quotations are from a speech by Webster on the Texas question, delivered Dec. 22, 1845, and may be found in the National edition of his *Writings*, Vol. IX, p. 57. **12-18. "The manner . . . will"**—from a speech by Webster on the bill to exclude slavery from the territories, delivered Aug. 12, 1848. See *Writings*, Vol. X, p. 38. **18. will**—"These extracts have been inserted since the lecture was read." (Thoreau's note)

It can have no pure right over my person and property but what I concede to it. The progress from an absolute to a limited monarchy, from a limited monarchy to a democracy, is a progress toward a true respect for the individual. Even the Chinese philosopher was wise enough to regard the individual as the basis of the empire. Is a democracy, such as we know it, the last improvement possible in government? Is it not possible to take a step further towards recognizing and organizing the rights of man? There will never be a really free and enlightened State until the State comes to recognize the individual as a higher and independent power, from which all its own power and authority are derived, and treats him accordingly. I please myself with imagining a State at last which can afford to be just to all men, and to treat the individual with respect as a neighbor; which even would not think it inconsistent with its own repose if a few were to live aloof from it, not meddling with it, nor embraced by it, who fulfilled all the duties of neighbors and fellow-men. A State which bore this kind of fruit, and suffered it to drop off as fast as it ripened, would prepare the way for a still more perfect and glorious State, which also I have imagined, but not yet anywhere seen.

WALDEN

Walden was published in 1854. The original manuscript was destroyed, but F. B. Sanborn edited for The Bibliophile Society (Boston, 1909, 2 vols.) another manuscript which turned up at the end of the last century, and which was thought to be nearer the original form. From the introduction to this edition it appears that about twelve thousand words were omitted in the 1854 edition, probably by the publisher. Nevertheless, it has been thought best to reprint the text of 1854 in the following extracts in view of Sanborn's doubtful repute as editor.

It is important to note that Mr. Sanborn has discovered how freely Thoreau transferred material back and forth in making up *Walden,* the events of which are supposed to take place between March, 1845, and September, 1847. Close inspection of Thoreau's journals shows that he extracted material in them from between 1838 and 1854, and used it in *Walden.* For example, the battle of the ants in *Walden* is supposed to take place in 1845; but it is described in the journal for January, 1852; and similarly the adventure with the loon appears in the journal under date of October 8, 1852.

Walden Pond is about two miles southeast of Concord, and is about one-half mile wide at its broadest point. The Fitchburg Railroad skirts the southwest side of the pond. The land on which Thoreau "squatted" belonged to Emerson. For his building Thoreau borrowed an ax from Alcott, which he returned, he says, sharper than he found it. He bought the lumber for his shack from an Irishman, who had used it for a shanty; and the total cost of his building was $28.12½. A group of friends helped him to erect it—Alcott, Emerson, Ellery Channing, George Curtis, Burrill Curtis, Edmund Hosmer, and Hosmer's three sons, John, Edmund, and Andrew. It must not be thought that Thoreau lived an isolated life at Walden; he frequently made trips into Concord (on one of which he was arrested), and sometimes went on longer journeys; and he was visited by a number of friends and curious strangers.

The first section of *Walden* in the original edition, entitled "Economy," explains

what Thoreau wanted to do, how he built his shack, and how he lived. He sets forth his purpose in section II. When he had satisfied himself, he quit Walden Pond and returned to Concord.

WHERE I LIVED, AND WHAT I LIVED FOR

At a certain season of our life we are accustomed to consider every spot as the possible site of a house. I have thus surveyed the country on every side within a dozen miles of where I live. In imagination I have bought all the farms in succession, for all were to be bought, and I knew their price. I walked over each farmer's premises, tasted his wild apples, discoursed on husbandry with him, took his farm at his price, at any price, mortgaging it to him in my mind; even put a higher price on it,—took everything but a deed of it,—took his word for his deed, for I dearly love to talk,—cultivated it, and him too to some extent, I trust, and withdrew when I had enjoyed it long enough, leaving him to carry it on. This experience entitled me to be regarded as a sort of real-estate broker by my friends. Wherever I sat, there I might live, and the landscape radiated from me accordingly. What is a house but a *sedes,* a seat?—better if a country seat. I discovered many a site for a house not likely to be soon improved, which some might have thought too far from the village, but to my eyes the village was too far from it. Well, there I might live, I said; and there I did live, for an hour, a summer and a winter life; saw how I could let the years run off, buffet the winter through, and see the spring come in. The future inhabitants of this region, wherever they may place their houses, may be sure that they have been anticipated. An afternoon sufficed to lay out the land into orchard, wood lot, and pasture, and to decide what fine oaks or pines should be left to stand before the door, and whence each blasted tree could be seen to the best advantage; and then I let it lie, fallow perchance, for a man is rich in proportion to the number of things which he can afford to let alone.

My imagination carried me so far that I even had the refusal of several farms,—the refusal was all I wanted,—but I never got my fingers burned by actual possession. The nearest that I came to actual possession was when I bought the Hollowell place, and had begun to sort my seeds, and collected materials with which to make a wheelbarrow to carry it on or off with; but before the owner gave me a deed of it, his wife—every man has such a wife—changed her mind and wished to keep it, and he offered me ten dollars to release him. Now, to speak the truth, I had but ten cents in the world, and it surpassed my arithmetic to tell, if I was the man who had ten cents, or who had a farm, or ten dollars, or all together. However, I let him keep the ten dollars and the farm too, for I had carried it far enough; or rather, to be generous, I sold him the farm for just what I gave for it, and, as he was not a rich man, made him a present of ten dollars, and still had my ten cents, and seeds, and materials for a wheelbarrow left. I found thus that I had been a rich man without any damage to my poverty. But I retained the landscape,

14. I discovered—The Bibliophile edition begins a new paragraph here. **29. Hollowell place**—This house stood back from the road to Nine-Acre Corner, and faced the Musketaquid River. Thoreau knew it from boyhood.

and I have since annually carried off what it yielded without a wheelbarrow. With respect to landscapes,—

> "I am monarch of all I *survey*,
> My right there is none to dispute."

I have frequently seen a poet withdraw, having enjoyed the most valuable part of a farm, while the crusty farmer supposed that he had got a few wild apples only. Why, the owner does not know it for many years when a poet has put his farm in rhyme, the most admirable kind of invisible fence, has fairly impounded it, milked it, skimmed it, and got all the cream, and left the farmer only the skimmed milk.

The real attractions of the Hollowell farm, to me, were, its complete retirement, being about two miles from the village, half a mile from the nearest neighbor, and separated from the highway by a broad field; its bounding on the river, which the owner said protected it by its fogs from frosts in the spring, though that was nothing to me; the gray color and ruinous state of the house and barn, and the dilapidated fences, which put such an interval between me and the last occupant; the hollow and lichen-covered apple trees, gnawed by rabbits, showing what kind of neighbors I should have; but above all, the recollection I had of it from my earliest voyages up the river, when the house was concealed behind a dense grove of red maples, through which I heard the house-dog bark. I was in haste to buy it, before the proprietor finished getting out some rocks, cutting down the hollow apple trees, and grubbing up some young birches which had sprung up in the pasture, or, in short, had made any more of his improvements. To enjoy these advantages, I was ready to carry it on; like Atlas, to take the world on my shoulders,—I never heard what compensation he received for that,—and do all those things which had no other motive or excuse but that I might pay for it and be unmolested in my possession of it; for I knew all the while that it would yield the most abundant crop of the kind I wanted, if I could only afford to let it alone. But it turned out as I have said.

All that I could say, then, with respect to farming on a large scale (I have always cultivated a garden,) was, that I had had my seeds ready. Many think that seeds improve with age. I have no doubt that time discriminates between the good and the bad; and when at last I shall plant, I shall be less likely to be disappointed. But I would say to my fellows, once for all, As long as possible live free and uncommitted. It makes but little difference whether you are committed to a farm or the county jail.

Old Cato, whose "De Re Rusticâ" is my "cultivator," says, and the only translation I have seen makes sheer nonsense of the passage, "When you think of

3-4. "I . . . dispute"—The quotation is from Cowper's poem, "Imaginary Verses of Alexander Selkirk." (Selkirk was the original of Robinson Crusoe.) Note the pun on Thoreau's own occupation. **19. voyages**—the trip with John Thoreau described in *A Week on the Concord and Merrimac Rivers* (1849). **25. Atlas**—a Titan in Greek mythology, condemned to stand at the western extremity of the earth and hold up the heavens with his shoulders and hands. The Bibliophile edition begins a new paragraph with this sentence. **38. Cato**—Marcus Porcius Cato (234-149 B.C.), Roman statesman, writer, and general. The *De Re Rusticâ* has to do with farm management. In the Bibliophile edition the quotation is given in Latin, and Thoreau says that "the learned Oxford translator . . . makes sheer nonsense of the passage."

getting a farm, turn it thus in your mind, not to buy greedily; nor spare your pains to look at it, and do not think it enough to go round it once. The oftener you go there the more it will please you, if it is good." I think I shall not buy greedily, but go round and round it as long as I live, and be buried in it first, that it may please me the more at last.

The present was my next experiment of this kind, which I purpose to describe more at length; for convenience, putting the experience of two years into one. As I have said, I do not propose to write an ode to dejection, but to brag as lustily as chanticleer in the morning, standing on his roost, if only to wake my neighbors up.

When first I took up my abode in the woods, that is, began to spend my nights as well as days there, which, by accident, was on Independence day, or the fourth of July, 1845, my house was not finished for winter, but was merely a defence against the rain, without plastering or chimney, the walls being of rough, weather-stained boards, with wide chinks, which made it cool at night. The upright white hewn studs and freshly planed door and window casings gave it a clean and airy look, especially in the morning, when its timbers were saturated with dew, so that I fancied that by noon some sweet gum would exude from them. To my imagination it retained throughout the day more or less of this auroral character, reminding me of a certain house on a mountain which I had visited a year before. This was an airy and unplastered cabin, fit to entertain a travelling god, and where a goddess might trail her garments. The winds which passed over my dwelling were such as sweep over the ridges of mountains, bearing the broken strains, or celestial parts only, of terrestrial music. The morning wind forever blows, the poem of creation is uninterrupted; but few are the ears that hear it. Olympus is but the outside of the earth every where.

The only house I had been the owner of before, if I except a boat, was a tent, which I used occasionally when making excursions in the summer, and this is still rolled up in my garret; but the boat, after passing from hand to hand, has gone down the stream of time. With this more substantial shelter about me, I had made some progress towards settling in the world. This frame, so slightly clad, was a sort of crystallization around me, and reacted on the builder. It was suggestive somewhat as a picture in outlines. I did not need to go out doors to take the air, for the atmosphere within had lost none of its freshness. It was not so much within doors as behind a door where I sat, even in the rainiest weather. The Harivansa says, "An abode without birds is like a meat without seasoning." Such was not my abode, for I found myself suddenly neighbor to the birds; not by having imprisoned one, but having caged myself near them.

8. ode to dejection—The reference is to Samuel Taylor Coleridge's "Dejection: An Ode." **20. auroral**—bright, roseate with dawn. **28. tent**—the tent which Thoreau and his brother used on the trip described in the *Week*. **31. With this**—The Bibliophile edition here makes a new paragraph. **34. outlines**—The Bibliophile edition (which here prints "outline") appends a long note to show the change between the original MS. and the printed version in this passage. **37. Harivansa**—a Sanskrit poem of over sixteen thousand verses, purporting to be part of the great epic, the *Mahabharata*, but of later date. It tells of the creation, the dynasties of the gods, the life of Krishna, and the future of the world.

I was not only nearer to some of those which commonly frequent the garden and the orchard, but to those wilder and more thrilling songsters of the forest which never, or rarely, serenade a villager,—the wood-thrush, the veery, the scarlet tanager, the field-sparrow, the whippoorwill, and many others.

I was seated by the shore of a small pond, about a mile and a half south of the village of Concord and somewhat higher than it, in the midst of an extensive wood between that town and Lincoln, and about two miles south of that our only field known to fame, Concord Battle Ground; but I was so low in the woods that the opposite shore, half a mile off, like the rest, covered with wood, was my most distant horizon. For the first week, whenever I looked out on the pond it impressed me like a tarn high up on the side of a mountain, its bottom far above the surface of other lakes, and, as the sun arose, I saw it throwing off its nightly clothing of mist, and here and there, by degrees, its soft ripples or its smooth reflecting surface was revealed, while the mists, like ghosts, were stealthily withdrawing in every direction into the woods, as at the breaking up of some nocturnal conventicle. The very dew seemed to hang upon the trees later into the day than usual, as on the sides of mountains.

This small lake was of most value as a neighbor in the intervals of a gentle rain storm in August, when, both air and water being perfectly still, but the sky overcast, mid-afternoon had all the serenity of evening, and the wood-thrush sang around, and was heard from shore to shore. A lake like this is never smoother than at such a time; and the clear portion of the air above it being shallow and darkened by clouds, the water, full of light and reflections, becomes a lower heaven itself so much the more important. From a hill top near by, where the wood had been recently cut off, there was a pleasing vista southward across the pond, through a wide indentation in the hills which form the shore there, where their opposite sides sloping toward each other suggested a stream flowing out in that direction through a wooded valley, but stream there was none. That way I looked between and over the near green hills to some distant and higher ones in the horizon, tinged with blue. Indeed, by standing on tiptoe I could catch a glimpse of some of the peaks of the still bluer and more distant mountain ranges in the north-west, those true-blue coins from heaven's own mint, and also of some portion of the village. But in other directions, even from this point, I could not see over or beyond the woods which surrounded me. It is well to have some water in your neighborhood, to give buoyancy to and float the earth. One value even of the smallest well is, that when you look into it you see that earth is not continent but insular. This is as important as that it keeps butter cool. When I looked across the pond from this peak toward the Sudbury meadows, which in time of flood I distinguished elevated perhaps by a mirage in their seething valley, like a coin in a basin, all the earth beyond the pond appeared like a thin crust insulated and floated even by this small sheet of intervening water, and I was reminded that this on which I dwelt was but *dry land.*

7. **Lincoln**—on the Sudbury road 8. **Concord Battle**—fought April 19, 1775. 24. **From a hill**—In the Bibliophile edition a new paragraph begins here. 35. **It is well**—New paragraph in the Bibliophile edition. 39. **Sudbury meadows**—Sanborn says that Thoreau's favorite walk was along the Marlborough Road west and southwest from Concord, through the deep woods along the Sudbury River which flows into the Assabet River to form the Concord River.

Though the view from my door was still more contracted, I did not feel crowded or confined in the least. There was pasture enough for my imagination. The low shrub-oak plateau to which the opposite shore arose, stretched away toward the prairies of the West and the steppes of Tartary, affording ample room for all the roving families of men. "There are none happy in the world but beings who enjoy freely a vast horizon,"—said Damodara, when his herds required new and larger pastures.

Both place and time were changed, and I dwelt nearer to those parts of the universe and to those eras in history which had most attracted me. Where I lived was as far off as many a region viewed nightly by astronomers. We are wont to imagine rare and delectable places in some remote and more celestial corner of the system, behind the constellation of Cassiopeia's Chair, far from noise and disturbance. I discovered that my house actually had its site in such a withdrawn, but forever new and unprofaned, part of the universe. If it were worth the while to settle in those parts near to the Pleiades or the Hyades, to Aldebaran or Altair, then I was really there, or at an equal remoteness from the life which I had left behind, dwindled and twinkling with as fine a ray to my nearest neighbor, and to be seen only in moonless nights by him. Such was that part of creation where I had squatted;—

> "There was a shepherd that did live,
> And held his thoughts as high
> As were the mounts whereon his flocks
> Did hourly feed him by."

What should we think of the shepherd's life if his flocks always wandered to higher pastures than his thoughts?

Every morning was a cheerful invitation to make my life of equal simplicity, and I may say innocence, with Nature herself. I have been as sincere a worshipper of Aurora as the Greeks. I got up early and bathed in the pond; that was a religious exercise, and one of the best things which I did. They say that characters were engraven on the bathing tub of king Tching-thang to this effect: "Renew thyself completely each day; do it again, and again, and forever again." I can understand that. Morning brings back the heroic ages. I was as much affected by the faint hum of a mosquito making its invisible and unimaginable tour through my apartment at earliest dawn, when I was sitting with door and windows open, as I could be by any trumpet that ever sang of fame. It was Homer's requiem; itself an Iliad and Odyssey in the air, singing its own wrath and wanderings. There was something cosmical about it; a standing advertisement, till forbidden, of the everlasting vigor and fertility of the world. The morning, which is the most memorable season of the day, is the awakening

6. Damodara—Damodara Misra, an eleventh-century Sanskrit poet. **12. Cassiopeia's Chair**—a constellation of thirty larger stars supposed to represent the wife of Cepheus and the mother of Andromeda. **15. Pleiades**—a group of smaller stars in the constellation Taurus. **15. Hyades**—constellation named for the nymphs who nursed Zeus. **16. Aldebaran**—the most conspicuous star in the Hyades group. **16. Altair**—a first-magnitude star in the constellation, Aquila. **28. Aurora**—the Greek goddess of dawn. **32. Morning**—New paragraph in the Bibliophile edition. **36-37. wrath and wanderings**—The point is that the Iliad sings the wrath of Achilles, the Odyssey the wanderings of Odysseus. **38-39. The morning**—New paragraph in the Bibliophile edition.

hour. Then there is least somnolence in us; and for an hour, at least, some part of us awakes which slumbers all the rest of the day and night. Little is to be expected of that day, if it can be called a day, to which we are not awakened by our Genius, but by the mechanical nudgings of some servitor, are not awakened by our own newly-acquired force and aspirations from within, accompanied by the undulations of celestial music, instead of factory bells, and a fragrance filling the air—to a higher life than we fell asleep from; and thus the darkness bear its fruit, and prove itself to be good, no less than the light. That man who does not believe that each day contains an earlier, more sacred, and auroral hour than he has yet profaned, has despaired of life, and is pursuing a descending and darkening way. After a partial cessation of his sensuous life, the soul of man, or its organs rather, are reinvigorated each day, and his Genius tries again what noble life it can make. All memorable events, I should say, transpire in morning time and in a morning atmosphere. The Vedas say, "All intelligences awake with the morning." Poetry and art, and the fairest and most memorable of the actions of men, date from such an hour. All poets and heroes, like Memnon, are the children of Aurora, and emit their music at sunrise. To him whose elastic and vigorous thought keeps pace with the sun, the day is a perpetual morning. It matters not what the clocks say or the attitudes and labors of men. Morning is when I am awake and there is a dawn in me. Moral reform is the effort to throw off sleep. Why is it that men give so poor an account of their day if they have not been slumbering? They are not such poor calculators. If they had not been overcome with drowsiness they would have performed something. The millions are awake enough for physical labor; but only one in a million is awake enough for effective intellectual exertion, only one in a hundred millions to a poetic or divine life. To be awake is to be alive. I have never yet met a man who was quite awake. How could I have looked him in the face?

We must learn to reawaken and keep ourselves awake, not by mechanical aids, but by an infinite expectation of the dawn, which does not forsake us in our soundest sleep. I know of no more encouraging fact than the unquestionable ability of man to elevate his life by a conscious endeavor. It is something to be able to paint a particular picture, or to carve a statue, and so to make a few objects beautiful; but it is far more glorious to carve and paint the very atmosphere and medium through which we look, which morally we can do. To affect the quality of the day, that is the highest of arts. Every man is tasked to make his life, even in its details, worthy of the contemplation of his most elevated and critical hour. If we refused, or rather used up, such paltry information as we get, the oracles would distinctly inform us how this might be done.

I went to the woods because I wished to live deliberately, to front only the

4. **Genius**—guardian spirit, supposed to guide and govern an individual. 8. **That**—New paragraph in the Bibliophile edition. 13. **All memorable**—New paragraph in the Bibliophile edition. 14. **transpire**—become known. 14. **The Vedas**—the sacred literature, in four parts, of the Hindus. 17. **Memnon**—The statues of Memnon at Thebes were so named because Memnon was supposed to be the son of the Dawn, and, when reached by the rays of the rising sun, these statues gave forth a musical chord. 20. **Morning is**—New paragraph in the Bibliophile edition 36. **To affect**—New paragraph in the Bibliophile edition. 40 ff. **I went . . . forever**—In the Bibliophile edition, this passage does not appear here, but earlier in the text.

essential facts of life, and see if I could not learn what it had to teach, and not, when I came to die, discover that I had not lived. I did not wish to live what was not life, living is so dear; nor did I wish to practise resignation, unless it was quite necessary. I wanted to live deep and suck out all the marrow of life, to live so sturdily and Spartan-like as to put to rout all that was not life, to cut a broad swath and shave close, to drive life into a corner, and reduce it to its lowest terms, and, if it proved it to be mean, why then to get the whole and genuine meanness of it, and publish its meanness to the world; or if it were sublime, to know it by experience, and be able to give a true account of it in my next excursion. For most men, it appears to me, are in a strange uncertainty about it, whether it is of the devil or of God, and have *somewhat hastily* concluded that it is the chief end of man here to "glorify God and enjoy him forever."

Still we live meanly, like ants; though the fable tells us that we were long ago changed into men; like pygmies we fight with cranes; it is error upon error, and clout upon clout, and our best virtue has for its occasion a superfluous and evitable wretchedness. Our life is frittered away by detail. An honest man has hardly need to count more than his ten fingers, or in extreme cases he may add his ten toes, and lump the rest. Simplicity, simplicity, simplicity! I say, let your affairs be as two or three, and not a hundred or a thousand; instead of a million count half a dozen, and keep your accounts on your thumb nail. In the midst of this chopping sea of civilized life, such are the clouds and storms and quicksands and thousand-and-one items to be allowed for, that a man has to live, if he would not founder and go to the bottom and not make his port at all, by dead reckoning, and he must be a great calculator indeed who succeeds. Simplify, simplify. Instead of three meals a day, if it be necessary eat but one; instead of a hundred dishes, five; and reduce other things in proportion. Our life is like a German Confederacy, made up of petty states, with its boundary forever fluctuating, so that even a German cannot tell you how it is bounded at any moment. The nation itself, with all its so called internal improvements, which, by the way, are all external and superficial, is just such an unwieldy and overgrown establishment, cluttered with furniture and tripped up by its own traps, ruined by luxury and heedless expense, by want of calculation and a worthy aim, as the million households in the land; and the only cure for it as for them is in a rigid economy, a stern and more than Spartan simplicity of life and elevation of purpose. It lives too fast. Men think that it is essential that the *Nation* have commerce, and export ice, and talk through a telegraph, and ride thirty miles an hour, without a doubt, whether *they* do or not; but whether we should live like baboons or like men, is a little uncertain. If we do not get out sleepers, and forge rails, and devote days and

5. **Spartan-like**—The ancient Spartans were subjected to a rigid physical regimen. 12-13. **"glorify . . . forever"**—from the Westminster Catechism—the chief end of man. 14. **fable**—In Greek story, the battle of the cranes and the pygmies is famous. 17. **Our life**—New paragraph in the Bibliophile edition. After "detail" the following sentence appears: "Its dish consists almost entirely of 'fixings,' and very little of the chickens' meat." 26. **Simplify**—New paragraph in the Bibliophile edition. 28. **German Confederacy**—After 1815 the German states were united in a loose confederacy, which proved impractical as a form of union. 36. **fast**—Here the Bibliophile edition inserts fourteen lines ironically discussing the social philosophy of Fourier. 40. **sleepers**—railway ties.

nights to the work, but go to tinkering upon our *lives* to improve *them,* who will build railroads? And if railroads are not built, how shall we get to heaven in season? But if we stay at home and mind our business, who will want railroads? We do not ride on the railroad; it rides upon us. Did you ever think what those sleepers are that underlie the railroad? Each one is a man, an Irishman, or a Yankee man. The rails are laid on them, and they are covered with sand, and the cars run smoothly over them. They are sound sleepers, I assure you. And every few years a new lot is laid down and run over; so that, if some have the pleasure of riding on a rail, others have the misfortune to be ridden upon. And when they run over a man that is walking in his sleep, a supernumerary sleeper in the wrong position, and wake him up, they suddenly stop the cars, and make a hue and cry about it, as if this were an exception. I am glad to know that it takes a gang of men for every five miles to keep the sleepers down and level in their beds as it is, for this is a sign that they may sometime get up again.

Why should we live with such hurry and waste of life? We are determined to be starved before we are hungry. Men say that a stitch in time saves nine, and so they take a thousand stitches to-day to save nine to-morrow. As for *work,* we haven't any of any consequence. We have the Saint Vitus' dance, and cannot possibly keep our heads still. If I should only give a few pulls at the parish bell-rope, as for a fire, that is, without setting the bell, there is hardly a man on his farm in the outskirts of Concord, notwithstanding that press of engagements which was his excuse so many times this morning, nor a boy, nor a woman, I might almost say, but would forsake all and follow that sound, not mainly to save property from the flames, but, if we will confess the truth, much more to see it burn, since burn it must, and we, be it known, did not set it on fire,—or to see it put out, and have a hand in it, if that is done as handsomely; yes, even if it were the parish church itself. Hardly a man takes a half hour's nap after dinner, but when he wakes he holds up his head and asks, "What's the news?" as if the rest of mankind had stood his sentinels. Some give directions to be waked every half hour, doubtless for no other purpose; and then, to pay for it, they tell what they have dreamed. After a night's sleep the news is as indispensable as the breakfast. "Pray tell me any thing new that has happened to a man anywhere on this globe,"—and he reads it over his coffee and rolls, that a man has had his eyes gouged out this morning on the Wachito River; never dreaming the while that he lives in the dark unfathomed mammoth cave of this world, and has but the rudiment of an eye himself.

For my part, I could easily do without the post-office. I think that there are very few important communications made through it. To speak critically, I never received more than one or two letters in my life—I wrote this some years ago—that were worth the postage. The penny-post is, commonly, an institution through which you seriously offer a man that penny for his thoughts which is

5. Irishman—The building of railways led to an invasion of Concord by Irish laborers in the forties. **19. Saint Vitus' dance**—chorea. **21. fire**—to summon the volunteer fire department, but not to pull the bell upside down. **28. Hardly**—Here the Bibliophile edition begins a new paragraph. **35-36. Wachito River**—the Ouachita River in Arkansas, then the frontier, where "gouging" was a characteristic mode of physical combat. **41. penny-post**—introduced in England in 1840 by Sir Rowland Hill.

so often safely offered in jest. And I am sure that I never read any memorable news in a newspaper. If we read of one man robbed, or murdered, or killed by accident, or one house burned, or one vessel wrecked, or one steamboat blown up, or one cow run over on the Western Railroad, or one mad dog killed, or one lot of grasshoppers in the winter,—we never need read of another. One is enough. If you are acquainted with the principle, what do you care for a myriad instances and applications? To a philosopher all *news,* as it is called, is gossip, and they who edit and read it are old women over their tea. Yet not a few are greedy after this gossip. There was such a rush, as I hear, the other day at one of the offices to learn the foreign news by the last arrival, that several large squares of plate glass belonging to the establishment were broken by the pressure,—news which I seriously think a ready wit might write a twelvemonth or twelve years beforehand with sufficient accuracy. As for Spain, for instance, if you know how to throw in Don Carlos and the Infanta and Don Pedro and Seville and Granada, from time to time in the right proportions,—they may have changed the names a little since I saw the papers,—and serve up a bull-fight when other entertainments fail, it will be true to the letter, and give us as good an idea of the exact state or ruin of things in Spain as the most succinct and lucid reports under this head in the newspapers: and as for England, almost the last significant scrap of news from that quarter was the revolution of 1649; and if you have learned the history of her crops for an average year, you never need attend to that thing again, unless your speculations are of a merely pecuniary character. If one may judge who rarely looks into the newspapers, nothing new does ever happen in foreign parts, a French revolution not excepted.

What news! how much more important to know what that is which was never old! "Kieou-he-yu (great dignitary of the state of Wei) sent a man to Khoung-tseu to know his news. Khoung-tseu caused the messenger to be seated near him, and questioned him in these terms: What is your master doing? The messenger answered with respect: My master desires to diminish the number of his faults, but he cannot come to the end of them. The messenger being gone, the philosopher remarked: What a worthy messenger! What a worthy messenger!" The preacher, instead of vexing the ears of drowsy farmers on their day of rest at the end of the week,—for Sunday is the fit conclusion of an ill-spent week, and not the fresh and brave beginning of a new one,—with this one other draggle-tail of a sermon, should shout with thundering voice,—"Pause! Avast! Why so seeming fast, but deadly slow?"

Shams and delusions are esteemed for soundest truths, while reality is fabulous. If men would steadily observe realities only, and not allow themselves to be deluded, life, to compare it with such things as we know, would be like

2. If we—new paragraph in the Bibliophile edition. **4. Western Railroad**—now the Boston and Maine, running from Boston to Albany, through Fitchburg. **8. tea**—The Bibliophile edition here inserts two sentences humorously denouncing Uncle Sam for carrying unimportant information in the mails. **13. As for**—Here the Bibliophile edition begins a new paragraph. **14. Don Carlos . . . Don Pedro**—the principal figures in the Civil War then raging in Spain between the Carlistas and the followers of the Queen. Seville and Granada are principal Spanish cities concerned in the war. **20. revolution**—when the parliamentarians rose against Charles I. **24. French revolution**—Thoreau notes (in the Bibliophile edition) that this was written before the French Revolution of 1848, but "a revolution in France might be expected any day." **27-28. "Kieou-he-yu . . . messenger"**—from the *Analects* of Confucius, XIV, 26, 1-2. **33. The preacher**—Here the Bibliophile edition begins a new paragraph.

a fairy tale and the Arabian Nights' Entertainments. If we respected only what is inevitable and has a right to be, music and poetry would resound along the streets. When we are unhurried and wise, we perceive that only great and worthy things have any permanent and absolute existence,—that petty fears and petty pleasures are but the shadow of the reality. This is always exhilarating and sublime. By closing the eyes and slumbering, and consenting to be deceived by shows, men establish and confirm their daily life of routine and habit every where, which still is built on purely illusory foundations. Children, who play life, discern its true law and relations more clearly than men, who fail to live it worthily, but who think that they are wiser by experience, that is, by failure. I have read in a Hindoo book, that "there was a king's son, who, being expelled in infancy from his native city, was brought up by a forester, and, growing up to maturity in that state, imagined himself to belong to the barbarous race with which he lived. One of his father's ministers having discovered him, revealed to him what he was, and the misconception of his character was removed, and he knew himself to be a prince. So the soul," continues the Hindoo philosopher, "from the circumstances in which it is placed, mistakes its own character, until the truth is revealed to it by some holy teacher, and then it knows itself to be *Brahme*." I perceive that we inhabitants of New England live this mean life that we do because our vision does not penetrate the surface of things. We think that that *is* which *appears* to be. If a man should walk through this town and see only the reality, where, think you, would the "Mill-dam" go to? If he should give us an account of the realities he beheld there, we should not recognize the place in his description. Look at a meeting-house, or a court-house, or a jail, or a shop, or a dwelling-house, and say what that thing really is before a true gaze, and they would all go to pieces in your account of them. Men esteem truth remote, in the outskirts of the system, behind the farthest star, before Adam and after the last man. In eternity there is indeed something true and sublime. But all these times and places and occasions are now and here. God himself culminates in the present moment, and will never be more divine in the lapse of all the ages. And we are enabled to apprehend at all what is sublime and noble only by the perpetual instilling and drenching of the reality that surrounds us. The universe constantly and obediently answers to our conceptions; whether we travel fast or slow, the track is laid for us. Let us spend our lives in conceiving then. The poet or the artist never yet had so fair and noble a design but some of his posterity at least could accomplish it.

Let us spend one day as deliberately as Nature, and not be thrown off the track by every nutshell and mosquito's wing that falls on the rails. Let us rise early and fast, or break fast, gently and without perturbation; let company come and let company go, let the bells ring and the children cry,—determined to make a day of it. Why should we knock under and go with the stream? Let us not be upset and overwhelmed in that terrible rapid and whirlpool called a dinner, situated in the meridian shallows. Weather this danger and you are safe, for the rest of the way is down hill. With unrelaxed nerves, with morning

1. **If we**—New paragraph in the Bibliophile edition. 8. **Children**—New paragraph in the Bibliophile edition. 19. **I perceive**—New paragraph in the Bibliophile edition. 22. **"Mill-dam"**—In the Bibliophile edition, this reads "State Street," apparently with reference to Boston. 27. **Men esteem**—New paragraph in the Bibliophile edition. 33. **The universe**—New paragraph in the Bibliophile edition.

vigor, sail by it, looking another way, tied to the mast like Ulysses. If the engine whistles, let it whistle till it is hoarse for its pains. If the bell rings, why should we run? We will consider what kind of music they are like. Let us settle ourselves, and work and wedge our feet downward through the mud and slush of opinion, and prejudice, and tradition, and delusion, and appearance, that alluvion which covers the globe, through Paris and London, through New York and Boston and Concord, through church and state, through poetry and philosophy and religion, till we come to a hard bottom and rocks in place, which we can call *reality,* and say, This is, and no mistake; and then begin, having a *point d'appui,* below freshet and frost and fire, a place where you might found a wall or a state, or set a lamp-post safely, or perhaps a gauge, not a Nilometer, but a Realometer, that future ages might know how deep a freshet of shams and appearances had gathered from time to time. If you stand right fronting and face to face to a fact, you will see the sun glimmer on both its surfaces, as if it were a cimeter, and feel its sweet edge dividing you through the heart and marrow, and so you will happily conclude your mortal career. Be it life or death, we crave only reality. If we are really dying, let us hear the rattle in our throats and feel cold in the extremities; if we are alive, let us go about our business.

Time is but the stream I go a-fishing in. I drink at it; but while I drink I see the sandy bottom and detect how shallow it is. Its thin current slides away, but eternity remains. I would drink deeper; fish in the sky, whose bottom is pebbly with stars. I cannot count one. I know not the first letter of the alphabet. I have always been regretting that I was not as wise as the day I was born. The intellect is a cleaver; it discerns and rifts its way into the secret of things. I do not wish to be any more busy with my hands than is necessary. My head is hands and feet. I feel all my best faculties concentrated in it. My instinct tells me that my head is an organ for burrowing, as some creatures use their snout and fore-paws, and with it I would mine and burrow my way through these hills. I think that the richest vein is somewhere hereabouts; so by the divining rod and thin rising vapors I judge; and here I will begin to mine.

BRUTE NEIGHBORS

This forms the twelfth section of the 1854 edition. The "companion" (the Poet of the little dialogue) is generally supposed to be Ellery Channing. Thoreau is, of course, the Hermit.

SOMETIMES I had a companion in my fishing, who came through the village to my house from the other side of the town, and the catching of the dinner was as much a social exercise as the eating of it.

Hermit. I wonder what the world is doing now. I have not heard so much as a locust over the sweet-fern these three hours. The pigeons are all asleep

1. **tied . . . Ulysses**—*Cf.* Odyssey, XII. 3-4. **Let us settle**—New paragraph in the Bibliophile edition. 6. **alluvion**—deposits of earth left by floods. 10. **point d'appui**—prop. 12. **Nilometer**—instrument for gauging the height of the Nile. 13. **If you stand**—New paragraph in the Bibliophile edition. 15. **cimeter**—scimitar.

upon their roosts,—no flutter from them. Was that a farmer's noon horn which sounded from beyond the woods just now? The hands are coming in to boiled salt beef and cider and Indian bread. Why will men worry themselves so? He that does not eat need not work. I wonder how much they have reaped. Who would live there where a body can never think for the barking of Bose? And O, the housekeeping! to keep bright the devil's door-knobs, and scour his tubs this bright day! Better not keep a house. Say, some hollow tree; and then for morning calls and dinner-parties! Only a woodpecker tapping. O, they swarm; the sun is too warm there; they are born too far into life for me. I have water from the spring, and a loaf of brown bread on the shelf.—Hark! I hear a rustling of the leaves. Is it some ill-fed village hound yielding to the instinct of the chase? or the lost pig which is said to be in these woods, whose tracks I saw after the rain? It comes on apace; my sumachs and sweet-briers tremble.—Eh, Mr. Poet is it you? How do you like the world to-day?

Poet. See those clouds; how they hang! That's the greatest thing I have seen to-day. There's nothing like it in old paintings, nothing like it in foreign lands,—unless when we were off the coast of Spain. That's a true Mediterranean sky. I thought, as I have my living to get, and have not eaten to-day, that I might go a-fishing. That's the true industry for poets. It is the only trade I have learned. Come, let's along.

Hermit. I cannot resist. My brown bread will soon be gone. I will go with you gladly soon, but I am just concluding a serious meditation. I think that I am near the end of it. Leave me alone, then, for a while. But that we may not be delayed, you shall be digging the bait meanwhile. Angle-worms are rarely to be met with in these parts, where the soil was never fattened with manure; the race is nearly extinct. The sport of digging the bait is nearly equal to that of catching the fish, when one's appetite is not too keen; and this you may have all to yourself to-day. I would advise you to set in the spade down yonder among the ground-nuts, where you see the johnswort waving. I think that I may warrant you one worm to every three sods you turn up, if you look well in among the roots of the grass, as if you were weeding. Or, if you choose to go farther, it will not be unwise, for I have found the increase of fair bait to be very nearly as the squares of the distances.

Hermit alone. Let me see; where was I? Methinks I was nearly in this frame of mind; the world lay about at this angle. Shall I go to heaven or a-fishing? If I should soon bring this meditation to an end, would another so sweet occasion be likely to offer? I was as near being resolved into the essence of things as ever I was in my life. I fear my thoughts will not come back to me. If it would do any good, I would whistle for them. When they make us an offer, is it wise to say, We will think of it? My thoughts have left no track, and I cannot find the path again. What was it that I was thinking of? It was a very hazy day. I will just try these three sentences of Con-fut-see; they may fetch that state about again. I know not whether it was the dumps or a budding ecstasy. Mem. There never is but one opportunity of a kind.

Poet. How now, Hermit, is it too soon? I have got just thirteen whole ones,

4. He that does—New paragraph in the Bibliophile edition. **17. unless . . . sky**—Channing is made to speak in reference to his voyage to the Mediterranean in 1846. **42. Con-fut-see**—Confucius.

besides several which are imperfect or undersized; but they will do for the smaller fry; they do not cover up the hook so much. Those village worms are quite too large; a shiner may make a meal off one without finding the skewer.

Hermit. Well, then let's be off. Shall we to the Concord? There's good sport there if the water be not too high.

Why do precisely these objects which we behold make a world? Why has man just these species of animals for his neighbors; as if nothing but a house could have filled this crevice? I suspect that Pilpay & Co. have put animals to their best use, for they are all beasts of burden, in a sense, made to carry some portion of our thoughts.

The mice which haunted my house were not the common ones, which are said to have been introduced into the country, but a wild native kind not found in the village. I sent one to a distinguished naturalist, and it interested him much. When I was building, one of these had its nest underneath the house, and before I had laid the second floor, and swept out the shavings, would come out regularly at lunch time and pick up the crumbs at my feet. It probably had never seen a man before; and it soon became quite familiar, and would run over my shoes and up my clothes. It could readily ascend the sides of the room by short impulses, like a squirrel, which it resembled in its motions. At length, as I leaned with my elbow on the bench one day, it ran up my clothes, and along my sleeve, and round and round the paper which held my dinner, while I kept the latter close, and dodged and played at bo-peep with it; and when at last I held still a piece of cheese between my thumb and finger, it came and nibbled it, sitting in my hand, and afterward cleaned its face and paws, like a fly, and walked away.

A phoebe soon built in my shed, and a robin for protection in a pine which grew against the house. In June the partridge (*Tetrao umbellus,*) which is so shy a bird, led her brood past my windows, from the woods in the rear to the front of my house, clucking and calling to them like a hen, and in all her behavior proving herself the hen of the woods. The young suddenly disperse on your approach, at a signal from the mother, as if a whirlwind had swept them away, and they so exactly resemble the dried leaves and twigs that many a traveller has placed his foot in the midst of a brood, and heard the whir of the old bird as she flew off, and her anxious calls and mewing, or seen her trail her wings to attract his attention, without suspecting their neighborhood. The parent will sometimes roll and spin round before you in such a dishabille, that you cannot, for a few moments, detect what kind of creature it is. The young squat still and flat, often running their heads under a leaf, and mind only their mother's directions given from a distance, nor will your approach make them run again and betray themselves. You may even tread on them, or have your eyes on them for a minute, without discovering them. I have held them in my open hand at such a time, and still their only care, obedient to their mother and their instinct, was to squat there without fear or trem-

8. Pilpay & Co.—The reference is to Bilpai, Aesop, and other writers of fables **26. A phoebe**—In the Bibliophile edition the sentence about the phoebe is attached to the preceding paragraph, and there follows a discussion of Thoreau's finding a ground bird's nest while plowing.

bling. So perfect is this instinct, that once, when I had laid them on the leaves again, and one accidentally fell on its side, it was found with the rest in exactly the same position ten minutes afterward. They are not callow like the young of most birds, but more perfectly developed and precocious even than chickens. The remarkable adult yet innocent expression of their open and serene eyes is very memorable. All intelligence seems reflected in them. They suggest not merely the purity of infancy, but a wisdom clarified by experience. Such an eye was not born when the bird was, but is coeval with the sky it reflects. The woods do not yield another such a gem. The traveller does not often look into such a limpid well. The ignorant or reckless sportsman often shoots the parent at such a time, and leaves these innocents to fall a prey to some prowling beast or bird, or gradually mingle with the decaying leaves which they so much resemble. It is said that when hatched by a hen they will directly disperse on some alarm, and so are lost, for they never hear the mother's call which gathers them again. These were my hens and chickens.

It is remarkable how many creatures live wild and free though secret in the woods, and still sustain themselves in the neighborhood of towns, suspected by hunters only. How retired the otter manages to live here! He grows to be four feet long, as big as a small boy, perhaps without any human being getting a glimpse of him. I formerly saw the raccoon in the woods behind where my house is built, and probably still heard their whinnering at night. Commonly I rested an hour or two in the shade at noon, after planting, and ate my lunch, and read a little by a spring which was the source of a swamp and of a brook, oozing from under Brister's Hill, half a mile from my field. The approach to this was through a succession of descending grassy hollows, full of young pitch-pines, into a larger wood about the swamp. There, in a very secluded and shaded spot, under a spreading white-pine, there was yet a clean firm sward to sit on. I had dug out the spring and made a well of clear gray water, where I could dip up a pailful without roiling it, and thither I went for this purpose almost every day in midsummer, when the pond was warmest. Thither too the woodcock led her brood, to probe the mud for worms, flying but a foot above them down the bank, while they ran in a troop beneath; but at last, spying me, she would leave her young and circle round and round me, nearer and nearer till within four or five feet, pretending broken wings and legs, to attract my attention, and get off her young, who would already have taken up their march, with faint wiry peep, single file through the swamp, as she directed. Or I heard the peep of the young when I could not see the parent bird. There too the turtle-doves sat over the spring, or fluttered from bough to bough of the soft white-pines over my head; or the red squirrel, coursing down the nearest bough, was particularly familiar and inquisitive. You only need sit still long enough in some attractive spot in the woods that all its inhabitants may exhibit themselves to you by turns.

I was witness to events of a less peaceful character. One day when I went out to my wood-pile, or rather my pile of stumps, I observed two large ants, the one red, the other much larger, nearly half an inch long, and black, fiercely

21. Commonly—New paragraph in the Bibliophile edition. **38. There too**—New paragraph in the Bibliophile edition.

contending with one another. Having once got hold they never let go, but struggled and wrestled and rolled on the chips incessantly. Looking farther, I was surprised to find that the chips were covered with such combatants, that it was not a *duellum,* but a *bellum,* a war between two races of ants, the red always pitted against the black, and frequently two red ones to one black. The legions of these Myrmidons covered all the hills and vales in my woodyard, and the ground was already strewn with the dead and dying, both red and black. It was the only battle-field I have ever witnessed, the only battle-field I ever trod while the battle was raging; internecine war; the red republicans on the one hand, and the black imperialists on the other. On every side they were engaged in deadly combat, yet without any noise that I could hear, and human soldiers never fought so resolutely. I watched a couple that were fast locked in each other's embraces, in a little sunny valley amid the chips, now at noon-day prepared to fight till the sun went down, or life went out. The smaller red champion had fastened himself like a vice to his adversary's front, and through all the tumblings on that field never for an instant ceased to gnaw at one of his feelers near the root, having already caused the other to go by the board; while the stronger black one dashed him from side to side, and as I saw on looking nearer, had already divested him of several of his members. They fought with more pertinacity than bulldogs. Neither manifested the least disposition to retreat. It was evident that their battle-cry was Conquer or die. In the mean while there came along a single red ant on the hill-side of this valley, evidently full of excitement, who either had despatched his foe, or had not yet taken part in the battle; probably the latter, for he had lost none of his limbs; whose mother had charged him to return with his shield or upon it. Or perchance he was some Achilles, who had nourished his wrath apart, and had now come to avenge or rescue his Patroclus. He saw this unequal combat from afar—for the blacks were nearly twice the size of the red, —he drew near with rapid pace till he stood on his guard within half an inch of the combatants; then, watching his opportunity, he sprang upon the black warrior and commenced his operations near the root of his right fore-leg, leaving the foe to select among his own members; and so there were three united for life, as if a new kind of attraction had been invented which put all other locks and cements to shame. I should not have wondered by this time to find that they had their respective musical bands stationed on some eminent chip, and playing their national airs the while, to excite the slow and cheer the dying combatants. I was myself excited somewhat even as if they had been men. The more you think of it, the less the difference. And certainly there is not the fight recorded in Concord history, at least, if in the history of America, that will bear a moment's comparison with this, whether for the numbers engaged in it, or for the patriotism and heroism displayed. For numbers and

4. duellum . . . bellum—not a duel, but a war. **6. Myrmidons**—The soldiers whom Achilles brought to the Trojan War were called Myrmidons. **22. In the mean**—New paragraph in the Bibliophile edition. **25-26. mother . . . it**—The Spartan mother was supposed to have charged her son to return from battle either with his shield (that is, victorious) or upon it (that is, dead). **26. Achilles**—In the Iliad Achilles sulks in his tent until his friend Patroclus is killed by the Trojans, when he sallies forth to battle and slays Hector. **38. The more**—New paragraph in the Bibliophile edition.

for carnage it was an Austerlitz or Dresden. Concord Fight! Two killed on the patriots' side, and Luther Blanchard wounded! Why here every ant was a Buttrick,—"Fire! for God's sake fire!"—and thousands shared the fate of Davis and Hosmer. There was not one hireling there. I have no doubt that it was a principle they fought for, as much as our ancestors, and not to avoid a three-penny tax on their tea; and the results of this battle will be as important and memorable to those whom it concerns as those of the battle of Bunker Hill at least.

I took up the chip on which the three I have particularly described were struggling, carried it into my house, and placed it under a tumbler on my window-sill, in order to see the issue. Holding a microscope to the first-mentioned red ant, I saw that, though he was assiduously gnawing at the near fore-leg of his enemy, having severed his remaining feeler, his own breast was all torn away, exposing what vitals he had there to the jaws of the black warrior, whose breast-plate was apparently too thick for him to pierce; and the dark carbuncles of the sufferer's eyes shone with ferocity such as war only could excite. They struggled half an hour longer under the tumbler, and when I looked again the black soldier had severed the heads of his foes from their bodies, and the still living heads were hanging on either side of him like ghastly trophies at his saddlebow, still apparently as firmly fastened as ever, and he was endeavoring with feeble struggles, being without feelers and with only the remnant of a leg, and I know not how many other wounds, to divest himself of them; which at length, after half an hour more, he accomplished. I raised the glass, and he went off over the window-sill in that crippled state. Whether he finally survived that combat, and spent the remainder of his days in some Hotel des Invalides, I do not know; but I thought that his industry would not be worth much thereafter. I never learned which party was victorious, nor the cause of the war; but I felt for the rest of that day as if I had my feelings excited and harrowed by witnessing the struggle, the ferocity and carnage, of a human battle before my door.

Kirby and Spence tell us that the battles of ants have long been celebrated and the date of them recorded, though they say that Huber is the only modern author who appears to have witnessed them. "Aeneas Sylvius," say they, "after giving a very circumstantial account of one contested with great obstinacy by a great and small species on the trunk of a pear tree," adds that " 'This action was fought in the pontificate of Eugenius the Fourth, in the presence of Nicholas Pistoriensis, an eminent lawyer, who related the whole history of the battle with the greatest fidelity.' A similar engagement between great and small ants is recorded by Olaus Magnus, in which the small ones, being victorious, are said to have buried the bodies of their own soldiers, but left those of their giant enemies a prey to the birds. This event happened previous to

1. **Austerlitz**—At the Battle of Austerlitz (1805) Napoleon slaughtered the allies opposed to him; the Battle of **Dresden** (1813) was marked by great slaughter on both sides. Thoreau's references to the skirmish at **Concord** are self-explanatory, as are his references to the tax on tea and the Battle of Bunker's Hill in the following lines. **26. Hotel des Invalides**—The French "Old Soldiers' Home" in Paris is the Hôtel des Invalides. **33 ff. "Aeneas . . . Sweden"**—The references and quotation are from *An Introduction to Entomology or Elements of the Natural History of Insects* by William Kirby and William Spence, and may be found in the 2d ed., London, 1818, 4 vols., Vol. II, p. 71.

the expulsion of the tyrant Christiern the Second from Sweden." The battle which I witnessed took place in the Presidency of Polk, five years before the passage of Webster's Fugitive-Slave Bill.

Many a village Bose, fit only to course a mud-turtle in a victualling cellar, sported his heavy quarters in the woods, without the knowledge of his master, and ineffectually smelled at old fox burrows and woodchucks' holes; led perchance by some slight cur which nimbly threaded the wood, and might still inspire a natural terror in its denizens;—now far behind his guide, barking like a canine bull toward some small squirrel which had treed itself for scrutiny, then, cantering off, bending the bushes with his weight, imagining that he is on the track of some stray member of the jerbilla family. Once I was surprised to see a cat walking along the stony shore of the pond, for they rarely wander so far from home. The surprise was mutual. Nevertheless the most domestic cat, which has lain on a rug all her days, appears quite at home in the woods, and, by her sly and stealthy behavior, proves herself more native there than the regular inhabitants. Once, when berrying, I met with a cat with young kittens in the woods, quite wild, and they all, like their mother, had their backs up and were fiercely spitting at me. A few years before I lived in the woods there was what was called a "winged cat" in one of the farm-houses in Lincoln nearest the pond, Mr. Gilian Baker's. When I called to see her in June, 1842, she was gone a-hunting in the woods, as was her wont (I am not sure whether it was a male or female, and so use the more common pronoun,) but her mistress told me that she came into the neighborhood a little more than a year before, in April, and was finally taken into their house; that she was of a dark brownish-gray color, with a white spot on her throat, and white feet, and had a large bushy tail like a fox; that in winter the fur grew thick and flatted out along her sides, forming strips ten or twelve inches long by two and a half wide, and under her chin like a muff, the upper side loose, the under matted like felt, and in the spring these appendages dropped off. They gave me a pair of her "wings," which I keep still. There is no appearance of a membrane about them. Some thought it was part flying-squirrel or some other wild animal, which is not impossible, for, according to naturalists, prolific hybrids have been produced by the union of the marten and domestic cat. This would have been the right kind of cat for me to keep, if I had kept any; for why should not a poet's cat be winged as well as his horse?

In the fall the loon (*Colymbus glacialis*) came, as usual, to moult and bathe in the pond, making the woods ring with his wild laughter before I had risen. At rumor of his arrival all the Mill-dam sportsmen are on the alert, in gigs and on foot, two by two and three by three, with patent rifles and conical balls and spy-glasses. They come rustling through the woods like autumn leaves, at least ten men to one loon. Some station themselves on this side of

2. Presidency of Polk—James K. Polk, eleventh President of the United States, 1845-49. **3. Fugitive-Slave Bill**—By supporting the Compromise of 1850, Webster was also compelled to support the bill for the return of fugitive slaves which was part of that program. **11. jerbilla**—Thoreau probably refers to some member of the *Gerbillinae* family of animals, as the pouched mouse. **11. Once I was**—New paragraph in the Bibliophile edition. **16. Once, when**—New paragraph in the Bibliophile edition. In the previous passage the Bibliophile text also indicates that Thoreau met the cat in the summer time. **35. horse**—Pegasus.

the pond, some on that, for the poor bird cannot be omnipresent; if he dive here he must come up there. But now the kind October wind rises, rustling the leaves and rippling the surface of the water, so that no loon can be heard or seen, though his foes sweep the pond with spy-glasses, and make the woods resound with their discharges. The waves generously rise and dash angrily, taking sides with all waterfowl, and our sportsmen must beat a retreat to town and shop and unfinished jobs. But they were too often successful. When I went to get a pail of water early in the morning I frequently saw this stately bird sailing out of my cove within a few rods. If I endeavored to overtake him in a boat, in order to see how he would manoeuver, he would dive and be completely lost, so that I did not discover him again, sometimes, till the latter part of the day. But I was more than a match for him on the surface. He commonly went off in a rain.

As I was paddling along the north shore one very calm October afternoon, for such days especially they settle on to the lakes, like the milkweed down, having looked in vain over the pond for a loon, suddenly one, sailing out from the shore toward the middle a few rods in front of me, set up his wild laugh and betrayed himself. I pursued with a paddle and he dived, but when he came up I was nearer than before. He dived again, but I miscalculated the direction he would take, and we were fifty rods apart when he came to the surface this time, for I had helped to widen the interval; and again he laughed loud and long, and with more reason than before. He manoeuvered so cunningly that I could not get within half a dozen rods of him. Each time, when he came to the surface, turning his head this way and that, he coolly surveyed the water and the land, and apparently chose his course so that he might come up where there was the widest expanse of water and at the greatest distance from the boat. It was surprising how quickly he made up his mind and put his resolve into execution. He led me at once to the widest part of the pond, and could not be driven from it. While he was thinking one thing in his brain, I was endeavoring to divine his thought in mine. It was a pretty game, played on the smooth surface of the pond, a man against a loon. Suddenly your adversary's checker disappears beneath the board, and the problem is to place yours nearest to where his will appear again. Sometimes he would come up unexpectedly on the opposite side of me, having apparently passed directly under the boat. So long-winded was he and so unweariable, that when he had swum farthest he would immediately plunge again, nevertheless; and then no wit could divine where in the deep pond, beneath the smooth surface, he might be speeding his way like a fish, for he had time and ability to visit the bottom of the pond in its deepest part. It is said that loons have been caught in the New York lakes eighty feet beneath the surface, with hooks set for trout,—though Walden is deeper than that. How surprised must the fishes be to see this ungainly visitor from another sphere speeding his way amid their schools! Yet he appeared to know his course as surely underwater as on the surface, and swam much faster there. Once or twice I saw a ripple where

2. **But**—New paragraph in the Bibliophile edition. 39. **It is said**—The Bibliophile edition indicates that Thoreau had read of catching trout at this depth in Seneca Lake. 41. **How surprised**—New paragraph in the Bibliophile edition.

he approached the surface, just put his head out to reconnoitre, and instantly dived again. I found that it was as well for me to rest on my oars and wait his reappearing as to endeavor to calculate where he would rise; for again and again, when I was straining my eyes over the surface one way, I would suddenly be startled by his unearthly laugh behind me. But why, after displaying so much cunning, did he invariably betray himself the moment he came up by that loud laugh? Did not his white breast enough betray him? He was indeed a silly loon, I thought. I could commonly hear the plash of the water when he came up, and so also detected him. But after an hour he seemed as fresh as ever, dived as willingly and swam yet farther than at first. It was surprising to see how serenely he sailed off with unruffled breast when he came to the surface, doing all the work with his webbed feet beneath. His usual note was this demoniac laughter, yet somewhat like that of a waterfowl; but occasionally, when he had balked me most successfully and come up a long way off, he uttered a long-drawn unearthly howl, probably more like that of a wolf than any bird; as when a beast puts his muzzle to the ground and deliberately howls. This was his looning,—perhaps the wildest sound that is ever heard here, making the woods ring far and wide. I concluded that he laughed in derision of my efforts, confident of his own resources. Though the sky was by this time overcast, the pond was so smooth that I could see where he broke the surface when I did not hear him. His white breast, the stillness of the air, and the smoothness of the water were all against him. At length, having come up fifty rods off, he uttered one of those prolonged howls, as if calling on the god of loons to aid him, and immediately there came a wind from the east and rippled the surface, and filled the whole air with misty rain, and I was impressed as if it were the prayer of the loon answered, and his god was angry with me; and so I left him disappearing far away on the tumultuous surface.

For hours, in fall days, I watched the ducks cunningly tack and veer and hold the middle of the pond, far from the sportsmen; tricks which they will have less need to practise in Louisiana bayous. When compelled to rise they would sometimes circle round and round and over the pond at a considerable height, from which they could easily see to other ponds and the river, like black motes in the sky; and, when I thought they had gone off thither long since, they would settle down by a slanting flight of a quarter of a mile on to a distant part which was left free; but what beside safety they got by sailing in the middle of Walden I do not know, unless they love its water for the same reason that I do.

LIFE WITHOUT PRINCIPLE

"Life without Principle," largely compounded out of passages in Thoreau's Journal, 1850-55, was first printed in the *Atlantic Monthly,* October, 1863; thence transferred to *A Yankee in Canada* (1866); and came to rest in the *Miscellanies* volume of 1893 (Vol. X of the Riverside edition).

9. **But after**—New paragraph in the Bibliophile edition.

At a lyceum, not long since, I felt that the lecturer had chosen a theme too foreign to himself, and so failed to interest me as much as he might have done. He described things not in or near to his heart, but toward his extremities and superficies. There was, in this sense, no truly central or centralizing thought in the lecture. I would have had him deal with his privatest experience, as the poet does. The greatest compliment that was ever paid me was when one asked me what *I thought,* and attended to my answer. I am surprised, as well as delighted, when this happens, it is such a rare use he would make of me, as if he were acquainted with the tool. Commonly, if men want anything of me, it is only to know how many acres I make of their land,—since I am a surveyor,—or, at most, what trivial news I have burdened myself with. They never will go to law for my meat; they prefer the shell. A man once came a considerable distance to ask me to lecture on Slavery; but on conversing with him, I found that he and his clique expected seven eighths of the lecture to be theirs, and only one eighth mine; so I declined. I take it for granted, when I am invited to lecture anywhere,—for I have had a little experience in that business,—that there is a desire to hear what *I think* on some subject, though I may be the greatest fool in the country,—and not that I should say pleasant things merely, or such as the audience will assent to; and I resolve, accordingly, that I will give them a strong dose of myself. They have sent for me, and engaged to pay for me, and I am determined that they shall have me, though I bore them beyond all precedent.

So now I would say something similar to you, my readers. Since *you* are my readers, and I have not been much of a traveler, I will not talk about people a thousand miles off but come as near home as I can. As the time is short, I will leave out all the flattery, and retain all the criticism.

Let us consider the way in which we spend our lives.

This world is a place of business. What an infinite bustle! I am awaked almost every night by the panting of the locomotive. It interrupts my dreams. There is no sabbath. It would be glorious to see mankind at leisure for once. It is nothing but work, work, work. I cannot easily buy a blank-book to write thoughts in; they are commonly ruled for dollars and cents. An Irishman, seeing me making a minute in the fields, took it for granted that I was calculating my wages. If a man was tossed out of a window when an infant, and so made a cripple for life, or scared out of his wits by the Indians, it is regretted chiefly because he was thus incapacitated for—business! I think that there is nothing, not even crime, more opposed to poetry, to philosophy, ay, to life itself, than this incessant business.

There is a coarse and boisterous money-making fellow in the outskirts of our town, who is going to build a bank-wall under the hill along the edge of his meadow. The powers have put this into his head to keep him out of mischief, and he wishes me to spend three weeks digging there with him. The result will be that he will perhaps get some more money to hoard, and leave for his heirs to spend foolishly. If I do this, most will commend me as an industrious and hard-working man; but if I choose to devote myself to certain labors which yield more real profit, though but little money, they may be inclined to look on me as an idler. Nevertheless, as I do not need the police of meaningless

33. **a minute**—memorandum.

labor to regulate me, and do not see anything absolutely praiseworthy in this fellow's undertaking any more than in many an enterprise of our own or foreign governments, however amusing it may be to him or them, I prefer to finish my education at a different school.

If a man walk in the woods for love of them half of each day, he is in danger of being regarded as a loafer; but if he spends his whole day as a speculator, shearing off those woods and making earth bald before her time, he is esteemed an industrious and enterprising citizen. As if a town had no interest in its forests but to cut them down!

Most men would feel insulted if it were proposed to employ them in throwing stones over a wall, and then in throwing them back, merely that they might earn their wages. But many are no more worthily employed now. For instance: just after sunrise, one summer morning, I noticed one of my neighbors walking beside his team, which was slowly drawing a heavy hewn stone swung under the axle, surrounded by an atmosphere of industry,—his day's work begun,—his brow commenced to sweat,—a reproach to all sluggards and idlers,—pausing abreast the shoulders of his oxen, and half turning round with a flourish of his merciful whip, while they gained their length on him. And I thought, Such is the labor which the American Congress exists to protect,—honest, manly toil,—honest as the day is long,—that makes his bread taste sweet, and keeps society sweet,—which all men respect and have consecrated; one of the sacred band, doing the needful but irksome drudgery. Indeed, I felt a slight reproach, because I observed this from a window, and was not abroad and stirring about a similar business. The day went by, and at evening I passed the yard of another neighbor, who keeps many servants, and spends much money foolishly, while he adds nothing to the common stock, and there I saw the stone of the morning lying beside a whimsical structure intended to adorn this Lord Timothy Dexter's premises, and the dignity forthwith departed from the teamster's labor, in my eyes. In my opinion, the sun was made to light worthier toil than this. I may add that his employer has since run off, in debt to a good part of the town, and, after passing through Chancery, has settled somewhere else, there to become once more a patron of the arts.

The ways by which you may get money almost without exception lead downward. To have done anything by which you earned money *merely* is to have been truly idle or worse. If the laborer gets no more than the wages which his employer pays him, he is cheated, he cheats himself. If you would get money as a writer or lecturer, you must be popular, which is to go down perpendicularly. Those services which the community will most readily pay for, it is most disagreeable to render. You are paid for being something less than a man. The state does not commonly reward a genius any more wisely. Even the poet laureate would rather not have to celebrate the accidents of royalty. He must be bribed with a pipe of wine; and perhaps another poet is called away from his muse to gauge that very pipe. As for my own business, even that kind of

28. Lord . . . Dexter's—the eccentric merchant known as Lord Timothy Dexter of Newburyport (1747-1806), whose house on High Street in that city (1796) Thoreau refers to. **31. Chancery**—equity court. **42. pipe of wine**—One of the legal perquisites of the Poet Laureate in England is a pipe (cask) of wine.

surveying which I could do with most satisfaction my employers do not want. They would prefer that I should do my work coarsely and not too well, ay, not well enough. When I observe that there are different ways of surveying, my employer commonly asks which will give him the most land, not which is most correct. I once invented a rule for measuring cord-wood, and tried to introduce it in Boston; but the measurer there told me that the sellers did not wish to have their wood measured correctly,—that he was already too accurate for them, and therefore they commonly got their wood measured in Charlestown before crossing the bridge.

The aim of the laborer should be, not to get his living, to get "a good job," but to perform well a certain work; and, even in a pecuniary sense, it would be economy for a town to pay its laborers so well that they would not feel that they were working for low ends, as for a livelihood merely, but for scientific, or even moral ends. Do not hire a man who does your work for money, but him who does it for love of it.

It is remarkable that there are few men so well employed, so much to their minds, but that a little money or fame would commonly buy them off from their present pursuit. I see advertisements for *active* young men, as if activity were the whole of a young man's capital. Yet I have been surprised when one has with confidence proposed to me, a grown man, to embark in some enterprise of his, as if I had absolutely nothing to do, my life having been a complete failure hitherto. What a doubtful compliment this to pay me! As if he had met me half-way across the ocean beating up against the wind, but bound nowhere, and proposed to me to go along with him! If I did, what do you think the underwriters would say? No, no! I am not without employment at this stage of the voyage. To tell the truth, I saw an advertisement for able-bodied seamen, when I was a boy, sauntering in my native port, and as soon as I came of age I embarked.

The community has no bribe that will tempt a wise man. You may raise money enough to tunnel a mountain, but you cannot raise money enough to hire a man who is minding *his own* business. An efficient and valuable man does what he can, whether the community pay him for it or not. The inefficient offer their inefficiency to the highest bidder, and are forever expecting to be put into office. One would suppose that they were rarely disappointed.

Perhaps I am more than usually jealous with respect to my freedom. I feel that my connection with and obligation to society are still very slight and transient. Those slight labors which afford me a livelihood, and by which it is allowed that I am to some extent serviceable to my contemporaries, are as yet commonly a pleasure to me, and I am not often reminded that they are a necessity. So far I am successful. But I foresee that if my wants should be much increased, the labor required to supply them would become a drudgery. If I should sell both my forenoons and afternoons to society, as most appear to do, I am sure that for me there would be nothing left worth living for. I trust that I shall never thus sell my birthright for a mess of pottage. I wish to suggest that a man may be very industrious, and yet not spend his time well. There

8. Charlestown—formerly an independent city across the Charles River from Boston. **44. mess of pottage**—*Cf.* Gen. 25: 29-34.

is no more fatal blunderer than he who consumes the greater part of his life getting his living. All great enterprises are self-supporting. The poet, for instance, must sustain his body by his poetry, as a steam planing-mill feeds its boilers with the shavings it makes. You must get your living by loving. But as it is said of the merchants that ninety-seven in a hundred fail, so the life of men generally, tried by this standard, is a failure, and bankruptcy may be surely prophesied.

Merely to come into the world the heir of a fortune is not to be born, but to be still-born, rather. To be supported by the charity of friends, or a government-pension,—provided you continue to breathe,—by whatever fine synonyms you describe these relations, is to go into the almshouse. On Sundays the poor debtor goes to church to take an account of stock, and finds, of course, that his outgoes have been greater than his income. In the Catholic Church, especially, they go into chancery, make a clean confession, give up all, and think to start again. Thus men will lie on their backs, talking about the fall of man, and never make an effort to get up.

As for the comparative demand which men make on life, it is an important difference between two, that the one is satisfied with a level success, that his marks can all be hit by point-blank shots, but the other, however low and unsuccessful his life may be, constantly elevates his aim, though at a very slight angle to the horizon. I should much rather be the last man,—though, as the Orientals say, "Greatness doth not approach him who is forever looking down; and all those who are looking high are growing poor."

It is remarkable that there is little or nothing to be remembered written on the subject of getting a living; how to make getting a living not merely honest and honorable, but altogether inviting and glorious; for if *getting* a living is not so, then living is not. One would think, from looking at literature, that this question had never disturbed a solitary individual's musings. Is it that men are too much disgusted with their experience to speak of it? The lesson of value which money teaches, which the Author of the Universe has taken so much pains to teach us, we are inclined to skip altogether. As for the means of living, it is wonderful how indifferent men of all classes are about it, even reformers, so called,—whether they inherit, or earn, or steal it. I think that Society has done nothing for us in this respect, or at least has undone what she has done. Cold and hunger seem more friendly to my nature than those methods which men have adopted and advise to ward them off.

The title *wise* is, for the most part, falsely applied. How can one be a wise man, if he does not know any better how to live than other men?—if he is only more cunning and intellectually subtle? Does Wisdom work in a treadmill? or does she teach how to succeed *by her example?* Is there any such thing as wisdom not applied to life? Is she merely the miller who grinds the finest logic? It is pertinent to ask if Plato got his *living* in a better way or more successfully than his contemporaries,—or did he succumb to the difficulties of life like other men? Did he seem to prevail over some of them merely by indifference, or by assuming grand airs? or find it easier to live, because his aunt remembered him in her will? The ways in which most men get their living, that is, live, are mere makeshifts, and a shirking of the real business

of life,—chiefly because they do not know, but partly because they do not mean, any better.

The rush to California, for instance, and the attitude, not merely of merchants, but of philosophers and prophets, so called, in relation to it, reflect the greatest disgrace on mankind. That so many are ready to live by luck, and so get the means of commanding the labor of others less lucky, without contributing any value to society! And that is called enterprise! I know of no more startling development of the immorality of trade, and all the common modes of getting a living. The philosophy and poetry and religion of such a mankind are not worth the dust of a puff-ball. The hog that gets his living by rooting, stirring up the soil so, would be ashamed of such company. If I could command the wealth of all the worlds by lifting my finger, I would not pay *such* a price for it. Even Mahomet knew that God did not make this world in jest. It makes God to be a moneyed gentleman who scatters a handful of pennies in order to see mankind scramble for them. The world's raffle! A subsistence in the domains of Nature a thing to be raffled for! What a comment, what a satire, on our institutions! The conclusion will be, that mankind will hang itself upon a tree. And have all the precepts in all the Bibles taught men only this? and is the last and most admirable invention of the human race only an improved muck-rake? Is this the ground on which Orientals and Occidentals meet? Did God direct us so to get our living, digging where we never planted,—and He would, perchance, reward us with lumps of gold?

God gave the righteous man a certificate entitling him to food and raiment, but the unrighteous man found a facsimile of the same in God's coffers, and appropriated it, and obtained food and raiment like the former. It is one of the most extensive systems of counterfeiting that the world has seen. I did not know that mankind was suffering for want of gold. I have seen a little of it. I know that it is very malleable, but not so malleable as wit. A grain of gold will gild a great surface, but not so much as a grain of wisdom.

The gold-digger in the ravines of the mountains is as much a gambler as his fellow in the saloons of San Francisco. What difference does it make whether you shake dirt or shake dice? If you win, society is the loser. The gold-digger is the enemy of the honest laborer, whatever checks and compensations there may be. It is not enough to tell me that you worked hard to get your gold. So does the Devil work hard. The way of transgressors may be hard in many respects. The humblest observer who goes to the mines sees and says that gold digging is of the character of a lottery; the gold thus obtained is not the same thing with the wages of honest toil. But, practically, he forgets what he has seen, for he has seen only the fact, not the principle, and goes into trade there, that is, buys a ticket in what commonly proves another lottery, where the fact is not so obvious.

After reading Howitt's account of the Australian gold-diggings one evening,

3. **California**—The gold rush of 1849 was followed by a steady stream of immigration. 17-18. **hang . . . tree.**—*Cf.* the suicide of Judas, Matt. 27: 5. 20. **muck-rake**—Thoreau has in mind the celebrated passage in Bunyan's *Pilgrim's Progress:* the man with the muck-rake in the Interpreter's House. 35. **transgressors**—*Cf.* Prov. 13: 15. 42. **Howitt's**—the reference is to *Impressions of Australia Felix* (1845) by Richard Howitt.

I had in my mind's eye, all night, the numerous valleys, with their streams, all cut up with foul pits, from ten to one hundred feet deep, and half a dozen feet across, as close as they can be dug, and partly filled with water,—the locality to which men furiously rush to probe for their fortunes,—uncertain where they shall break ground,—not knowing but the gold is under their camp itself,—sometimes digging one hundred and sixty feet before they strike the vein, or then missing it by a foot,—turned into demons, and regardless of each others' rights, in their thirst for riches,—whole valleys, for thirty miles, suddenly honeycombed by the pits of the miners, so that even hundreds are drowned in them,—standing in water, and covered with mud and clay, they work night and day, dying of exposure and disease. Having read this, and partly forgotten it, I was thinking, accidentally, of my own unsatisfactory life, doing as others do; and with that vision of the diggings still before me, I asked myself why *I* might not be washing some gold daily, though it were only the finest particles,—why *I* might not sink a shaft down to the gold within me, and work that mine. *There* is a Ballarat, a Bendigo for you,—what though it were a sulky-gully? At any rate, I might pursue some path, however solitary and narrow and crooked, in which I could walk with love and reverence. Wherever a man separates from the multitude, and goes his own way in this mood, there indeed is a fork in the road, though ordinary travellers may see only a gap in the paling. His solitary path across-lots will turn out the *higher way* of the two.

Men rush to California and Australia as if the true gold were to be found in that direction; but that is to go to the very opposite extreme to where it lies. They go prospecting farther and farther away from the true lead, and are most unfortunate when they think themselves most successful. Is not our *native* soil auriferous? Does not a stream from the golden mountains flow through our native valley? and has not this for more than geologic ages been bringing down the shining particles and forming the nuggets for us? Yet, strange to tell, if a digger steal away, prospecting for this true gold, into the unexplored solitudes around us, there is no danger that any will dog his steps, and endeavor to supplant him. He may claim and undermine the whole valley even, both the cultivated and the uncultivated portions, his whole life long in peace, for no one will ever dispute his claim. They will not mind his cradles or his toms. He is not confined to a claim twelve feet square, as at Ballarat, but may mine anywhere, and wash the whole wide world in his tom.

Howitt says of the man who found the great nugget which weighed twenty-eight pounds, at the Bendigo diggings in Australia: "He soon began to drink; got a horse, and rode all about, generally at full gallop, and, when he met people, called out to inquire if they knew who he was, and then kindly informed them that he was 'the bloody wretch that had found the nugget.' At last he rode full speed against a tree, and nearly knocked his brains out." I

16. Ballarat—the city of Victoria, Australia, where gold was discovered in 1851. **16. Bendigo**—also known as Sandhurst, a city near Ballarat, celebrated for the gold-mining in its vicinity. **17. sulky-gully**—a gully just wide enough to drive a sulky through. **25. lead**—in gold-mining, an alluvial deposit of gold in an ancient river bed. **27. auriferous**—gold-bearing. **34-35. cradles . . . toms**—long troughs formerly used in gold-washing.

think, however, there was no danger of that, for he had already knocked his brains out against the nugget. Howitt adds, "He is a hopelessly ruined man." But he is a type of the class. They are all fast men. Hear some of the names of the places where they dig: "Jackass Flat,"—"Sheep's-Head Gully,"—"Murderer's Bar," etc. Is there no satire in these names? Let them carry their ill-gotten wealth where they will, I am thinking it will still be "Jackass Flat," if not "Murderer's Bar," where they live.

The last resource of our energy has been the robbing of graveyards on the Isthmus of Darien, an enterprise which appears to be but in its infancy; for, according to late accounts, an act has passed its second reading in the legislature of New Granada, regulating this kind of mining; and a correspondent of the "Tribune" writes: "In the dry season, when the weather will permit of the country being properly prospected, no doubt other rich *guacas* [that is, graveyards] will be found." To emigrants he says: "Do not come before December; take the Isthmus route in preference to the Boca del Toro one; bring no useless baggage, and do not cumber yourself with a tent; but a good pair of blankets will be necessary; a pick, shovel, and axe of good material will be almost all that is required:" advice which might have been taken from the "Burker's Guide." And he concludes with this line in italics and small capitals: *"If you are doing well at home,* STAY THERE," which may fairly be interpreted to mean, "If you are getting a good living by robbing graveyards at home, stay there."

But why go to California for a text? She is the child of New England, bred at her own school and church.

It is remarkable that among all the preachers there are so few moral teachers. The prophets are employed in excusing the ways of men. Most reverend seniors, the *illuminati* of the age, tell me, with a gracious, reminiscent smile, betwixt an aspiration and a shudder, not to be too tender about these things,—to lump all that, that is, make a lump of gold of it. The highest advice I have heard on these subjects was groveling. The burden of it was,—It is not worth your while to undertake to reform the world in this particular. Do not ask how your bread is buttered; it will make you sick, if you do,—and the like. A man had better starve at once than lose his innocence in the process of getting his bread. If within the sophisticated man there is not an unsophisticated one, then he is but one of the devil's angels. As we grow old, we live more coarsely, we relax a little in our disciplines, and, to some extent, cease to obey our finest instincts. But we should be fastidious to the extreme of sanity, disregarding the gibes of those who are more unfortunate than ourselves.

In our science and philosophy, even, there is commonly no true and absolute account of things. The spirit of sect and bigotry has planted its hoof amid the stars. You have only to discuss the problem, whether the stars are inhabited or not, in order to discover it. Why must we daub the heavens as well as the

9. **Isthmus of Darien**—Isthmus of Panama, which, before the digging of the Panama Canal, was, because of its fevers, a fearful obstacle to those who wished to get to California from the Atlantic Coast. 11. **New Granada**—now known as the republic of Colombia. 15. **Boca del Toro**—Bocas del Toro, an indentation north of the Mosquito Gulf and west of the present Panama Canal. 19. **"Burker's Guide"**—not a book, but a humorous invention of Thoreau's. A burker is one who murdered by suffocation in order to obtain and sell bodies for dissection.

earth? It was an unfortunate discovery that Dr. Kane was a Mason, and that Sir John Franklin was another. But it was a more cruel suggestion that possibly that was the reason why the former went in search of the latter. There is not a popular magazine in this country that would dare to print a child's thought on important subjects without comment. It must be submitted to the D.D.'s. I would it were the chickadee-dees.

You come from attending the funeral of mankind to attend to a natural phenomenon. A little thought is sexton to all the world.

I hardly know an *intellectual* man, even, who is so broad and truly liberal that you can think aloud in his society. Most with whom you endeavor to talk soon come to a stand against some institution in which they appear to hold stock,—that is, some particular, not universal, way of viewing things. They will continually thrust their own low roof, with its narrow skylight, between you and the sky, when it is the unobstructed heavens you would view. Get out of the way with your cobwebs; wash your windows, I say! In some lyceums they tell me that they have voted to exclude the subject of religion. But how do I know what their religion is, and when I am near to or far from it? I have walked into such an arena and done my best to make a clean breast of what religion I have experienced, and the audience never suspected what I was about. The lecture was as harmless as moonshine to them. Whereas, if I had read to them the biography of the greatest scamps in history, they might have thought that I had written the lives of the deacons of their church. Ordinarily, the inquiry is, Where did you come from? or, Where are you going? That was a more pertinent question which I overheard one of my auditors put to another once,—"What does he lecture for?" It made me quake in my shoes.

To speak impartially, the best men that I know are not serene, a world in themselves. For the most part, they dwell in forms, and flatter and study effect only more finely than the rest. We select granite for the underpinning of our houses and barns; we build fences of stone; but we do not ourselves rest on an underpinning of granitic truth, the lowest primitive rock. Our sills are rotten. What stuff is the man made of who is not coexistent in our thought with the purest and subtilest truth? I often accuse my finest acquaintances of an immense frivolity; for, while there are manners and compliments we do not meet, we do not teach one another the lessons of honesty and sincerity that the brutes do, or of steadiness and solidity that the rocks do. The fault is commonly mutual, however; for we do not habitually demand any more of each other.

That excitement about Kossuth, consider how characteristic, but superficial, it was!—only another kind of politics or dancing. Men were making speeches to him all over the country, but each expressed only the thought, or the want of thought, of the multitude. No man stood on truth. They were merely banded together, as usual one leaning on another, and all together on nothing; as the

1. **Kane**—Elisha Kent Kane (1820-1857), American Arctic explorer, whose career began with two attempts to find Sir John Franklin. 2. **Franklin**—Sir John Franklin (1786-1847), English explorer, mysteriously lost in the Arctic Circle. 30. **sills**—pun on the meaning of sill as (1) the lowest supporting timber of a house; and (2) a sheet of igneous rock intruded between beds or strata of older rock. 37. **Kossuth**—Louis Kossuth (1802-1894), Hungarian patriot, whose visit to the United States in 1851 produced a great outburst of emotional fervor, which, however, evaporated.

Hindoos made the world rest on an elephant, the elephant on a tortoise, and the tortoise on a serpent, and had nothing to put under the serpent. For all fruit of that stir we have the Kossuth hat.

Just so hollow and ineffectual, for the most part, is our ordinary conversation. Surface meets surface. When our life ceases to be inward and private, conversation degenerates into mere gossip. We rarely meet a man who can tell us any news which he has not read in a newspaper, or been told by his neighbor; and, for the most part, the only difference between us and our fellow is that he has seen the newspaper, or been out to tea, and we have not. In proportion as our inward life fails, we go more constantly and desperately to the post-office. You may depend on it, that the poor fellow who walks away with the greatest number of letters, proud of his extensive correspondence, has not heard from himself this long while.

I do not know but it is too much to read one newspaper a week. I have tried it recently, and for so long it seems to me that I have not dwelt in my native region. The sun, the clouds, the snow, the trees say not so much to me. You cannot serve two masters. It requires more than a day's devotion to know and to possess the wealth of a day.

We may well be ashamed to tell what things we have read or heard in our day. I do not know why my news should be so trivial,—considering what one's dreams and expectations are, why the developments should be so paltry. The news we hear, for the most part, is not news to our genius. It is the stalest repetition. You are often tempted to ask why such stress is laid on a particular experience which you have had,—that, after twenty-five years, you should meet Hobbins, Registrar of Deeds, again on the sidewalk. Have you not budged an inch, then? Such is the daily news. Its facts appear to float in the atmosphere, insignificant as the sporules of fungi, and impinge on some neglected *thallus,* or surface of our minds, which affords a basis for them, and hence a parasitic growth. We should wash ourselves clean of such news. Of what consequence, though our planet explode, if there is no character involved in the explosion? In health we have not the least curiosity about such events. We do not live for idle amusement. I would not run round a corner to see the world blow up.

All summer, and far into the autumn, perchance, you unconsciously went by the newspapers and the news, and now you find it was because the morning and the evening were full of news to you. Your walks were full of incidents. You attended, not to the affairs of Europe, but to your own affairs in Massachusetts fields. If you chance to live and move and have your being in that thin stratum in which the events that make the news transpire,—thinner than the paper on which it is printed,—then these things will fill the world for you; but if you soar above or dive below that plane, you cannot remember nor be reminded of them. Really to see the sun rise or go down every day, so to relate ourselves to a universal fact, would preserve us sane forever. Nations! What are nations? Tartars, and Huns, and Chinamen! Like insects, they swarm. The historian strives in vain to make them memorable. It is for want of a man that there

17. **two masters**—*Cf.* Matt. 6: 24. 27. **sporules**—little spores. 27. **thallus**—a vegetable structure without vascular tissue.

are so many men. It is individuals that populate the world. Any man thinking may say with the Spirit of Lodin,—

> "I looked down from my height on nations,
> And they become ashes before me;—
> Calm is my dwelling in the clouds;
> Pleasant are the great fields of my rest."

Pray, let us live without being drawn by dogs, Esquimaux-fashion, tearing over hill and dale, and biting each other's ears.

Not without a slight shudder at the danger, I often perceive how near I had come to admitting into my mind the details of some trivial affair,—the news of the street; and I am astonished to observe how willing men are to lumber their minds with such rubbish,—to permit idle rumors and incidents of the most insignificant kind to intrude on ground which should be sacred to thought Shall the mind be a public arena, where the affairs of the street and the gossip of the tea-table chiefly are discussed? Or shall it be a quarter of heaven itself,—an hypaethral temple, consecrated to the service of the gods? I find it so difficult to dispose of the few facts which to me are significant, that I hesitate to burden my attention with those which are insignificant, which only a divine mind could illustrate. Such is, for the most part, the news in newspapers and conversation. It is important to preserve the mind's chastity in this respect. Think of admitting the details of a single case of the criminal court into our thoughts, to stalk profanely through their very *sanctum sanctorum* for an hour, ay, for many hours! to make a very barroom of the mind's inmost apartment, as if for so long the dust of the street had occupied us,—the very street itself, with all its travel, its bustle, and filth, had passed through our thoughts' shrine! Would it not be an intellectual and moral suicide? When I have been compelled to sit spectator and auditor in a court-room for some hours, and have seen my neighbors, who were not compelled, stealing in from time to time, and tiptoeing about with washed hands and faces, it has appeared to my mind's eye, that, when they took off their hats, their ears suddenly expanded into vast hoppers for sound, between which even their narrow heads were crowded. Like the vanes of windmills, they caught the broad but shallow stream of sound, which, after a few titillating gyrations in their coggy brains, passed out the other side. I wondered if, when they got home, they were as careful to wash their ears as before their hands and faces. It has seemed to me, at such a time, that the auditors and the witnesses, the jury and the counsel, the judge and the criminal at the bar,—if I may presume him guilty before he is convicted,—were all equally criminal, and a thunderbolt might be expected to descend and consume them all together.

By all kinds of traps and signboards, threatening the extreme penalty of the divine law, exclude such trespassers from the only ground which can be sacred to you. It is so hard to forget what it is worse than useless to remember!

2. Spirit of Lodin—from a speech by the Spirit of Loda in the debate with Fingal in James Macpherson's Ossianic poem *Carricthura* (1761). **16. hypaethral**—open to the sky. **22. sanctum sanctorum**—holy of holies. The phrase is from the Vulgate Bible. **33. coggy**—seemingly the only appearance of the word in this sense. Apparently a pun on coggy, meaning (1) cogged; and (2) deceptive.

If I am to be a thoroughfare, I prefer that it be of the mountain-brooks, the Parnassian streams, and not the town sewers. There is inspiration, that gossip which comes to the ear of the attentive mind from the courts of heaven. There is the profane and stale revelation of the barroom and the police court. The same ear is fitted to receive both communications. Only the character of the hearer determines to which it shall be open, and to which closed. I believe that the mind can be permanently profaned by the habit of attending to trivial things, so that all our thoughts shall be tinged with triviality. Our very intellect shall be macadamized, as it were,—its foundation broken into fragments for the wheels of travel to roll over; and if you would know what will make the most durable pavement, surpassing rolled stones, spruce blocks, and asphaltum, you have only to look into some of our minds which have been subjected to this treatment so long.

If we have thus desecrated ourselves,—as who has not?—the remedy will be by wariness and devotion to reconsecrate ourselves, and make once more a fane of the mind. We should treat our minds, that is, ourselves, as innocent and ingenuous children, whose guardians we are, and be careful what objects and what subjects we thrust on their attention. Read not the Times. Read the Eternities. Conventionalities are at length as bad as impurities. Even the facts of science may dust the mind by their dryness, unless they are in a sense effaced each morning, or rather rendered fertile by the dews of fresh and living truth. Knowledge does not come to us by details, but in flashes of light from heaven. Yes, every thought that passes through the mind helps to wear and tear it, and to deepen the ruts, which, as in the streets of Pompeii, evince how much it has been used. How many things there are concerning which we might well deliberate whether we had better know them,—had better let their peddling-carts be driven, even at the slowest trot or walk, over that bridge of glorious span by which we trust to pass at last from the farthest brink of time to the nearest shore of eternity! Have we no culture, no refinement,—but skill only to live coarsely and serve the Devil?—to acquire a little worldly wealth, or fame, or liberty, and make a false show with it, as if we were all husk and shell, with no tender and living kernel to us? Shall our institutions be like those chestnut burs which contain abortive nuts, perfect only to prick the fingers?

America is said to be the arena on which the battle of freedom is to be fought; but surely it cannot be freedom in a merely political sense that is meant. Even if we grant that the American has freed himself from a political tyrant, he is still the slave of an economical and moral tyrant. Now that the republic—the *res-publica*—has been settled, it is time to look after the *res-privata*, —the private state,—to see, as the Roman senate charged its consuls, *"ne quid res-*PRIVATA *detrimenti caperet,"* that the *private* state receive no detriment.

Do we call this the land of the free? What is it to be free from King George and continue the slaves of King Prejudice? What is it to be born free and not

24. Pompeii—ancient Roman city near Naples, buried in an eruption by Vesuvius (A.D. 79), and excavated in modern times. **40-41. "ne . . . caperet"**—The legal charge given to the consuls in time of danger in the Roman Republic was that they should take care the republic (*res publica*) received no harm.

to live free? What is the value of any political freedom, but as a means to moral freedom? Is it a freedom to be slaves, or a freedom to be free, of which we boast? We are a nation of politicians, concerned about the outmost defenses only of freedom. It is our children's children who may perchance be really free. We tax ourselves unjustly. There is a part of us which is not represented. It is taxation without representation. We quarter troops, we quarter fools and cattle of all sorts upon ourselves. We quarter our gross bodies on our poor souls, till the former eat up all the latter's substance.

With respect to a true culture and manhood, we are essentially provincial still, not metropolitan,—mere Jonathans. We are provincial, because we do not find at home our standards; because we do not worship truth, but the reflection of truth; because we are warped and narrowed by an exclusive devotion to trade and commerce and manufactures and agriculture and the like, which are but means, and not the end.

So is the English Parliament provincial. Mere country bumpkins, they betray themselves, when any more important question arises for them to settle, the Irish question, for instance,—the English question why did I not say? Their natures are subdued to what they work in. Their "good breeding" respects only secondary objects. The finest manners in the world are awkwardness and fatuity when contrasted with a finer intelligence. They appear but as the fashions of past days,—mere courtliness, knee-buckles and small-clothes, out of date. It is the vice, but not the excellence of manners, that they are continually being deserted by the character; they are cast-off clothes or shells, claiming the respect which belonged to the living creature. You are presented with the shells instead of the meat, and it is no excuse generally, that, in the case of some fishes, the shells are of more worth than the meat. The man who thrusts his manners upon me does as if he were to insist on introducing me to his cabinet of curiosities, when I wished to see himself. It was not in this sense that the poet Decker called Christ "the first true gentleman that ever breathed." I repeat that in this sense the most splendid court in Christendom is provincial, having authority to consult about Transalpine interests only, and not the affairs of Rome. A praetor or proconsul would suffice to settle the questions which absorb the attention of the English Parliament and the American Congress.

Government and legislation! these I thought were respectable professions. We have heard of heaven-born Numas, Lycurguses, and Solons, in the history of the world, whose *names* at least may stand for ideal legislators; but think of legislating to *regulate* the breeding of slaves, or the exportation of tobacco! What have divine legislators to do with the exportation or the importation of tobacco? what humane ones with the breeding of slaves? Suppose you were to submit the question to any son of God,—and has He no children in the Nineteenth century? is it a family which is extinct?—in what condition would you

10. Jonathans—Yankees. **17. Irish question**—the problem of the government of Ireland. **29-30. "the first . . . breathed"**—See note 36, p. 1007. The poet's name was Dekker. **31. Transalpine**—across the Alps; that is, the interests of the Vatican. **32. praetor**—here used to mean a Roman provincial governor. **32. proconsul**—a Roman military commander in charge of a province. **36. Numas**—Numa, the legendary original lawgiver of Rome. **36. Lycurguses, and Solons**—Lycurgus and Solon—the legendary original lawgivers of Sparta and Athens respectively.

get it again? What shall a State like Virginia say for itself at the last day, in which these have been the principal, the staple productions? What ground is there for patriotism in such a State? I derive my facts from statistical tables which the States themselves have published.

A commerce that whitens every sea in quest of nuts and raisins, and makes slaves of its sailors for this purpose! I saw, the other day, a vessel which had been wrecked, and many lives lost, and her cargo of rags, juniper berries, and bitter almonds were strewn along the shore. It seemed hardly worth the while to tempt the dangers of the sea between Leghorn and New York for the sake of a cargo of juniper berries and bitter almonds. America sending to the Old World for her bitters! Is not the sea-brine, is not shipwreck, bitter enough to make the cup of life go down here? Yet such, to a great extent, is our boasted commerce; and there are those who style themselves statesmen and philosophers who are so blind as to think that progress and civilization depend on precisely this kind of interchange and activity,—the activity of flies about a molasses-hogshead. Very well, observes one, if men were oysters. And very well, answer I, if men were mosquitoes.

Lieutenant Herndon, whom our Government sent to explore the Amazon, and, it is said, to extend the area of slavery, observed that there was wanting there "an industrious and active population, who know what the comforts of life are, and who have artificial wants to draw out the great resources of the country." But what are the "artificial wants" to be encouraged? Not the love of luxuries, like the tobacco and slaves of, I believe, his native Virginia, nor the ice and granite and other material wealth of our native New England; nor are "the great resources of a country" that fertility or barrenness of soil which produces these. The chief want, in every State that I have been into, was a high and earnest purpose in its inhabitants. This alone draws out "the great resources" of Nature, and at last taxes her beyond her resources; for man naturally dies out of her. When we want culture more than potatoes, and illumination more than sugar-plums, then the great resources of a world are taxed and drawn out, and the result, or staple production, is, not slaves, nor operatives, but men,—those rare fruits called heroes, saints, poets, philosophers, and redeemers.

In short, as a snow-drift is formed where there is a lull in the wind, so, one would say, where there is a lull of truth, an institution springs up. But the truth blows right on over it, nevertheless, and at length blows it down.

What is called politics is comparatively something so superficial and inhuman, that practically I have never fairly recognized that it concerns me at all. The newspapers, I perceive, devote some of their columns specially to politics or government without charge; and this, one would say, is all that saves it; but as I love literature and to some extent the truth also, I never read those columns at any rate. I do not wish to blunt my sense of right so much. I have not got to answer for having read a single President's Message. A strange age

18. **Herndon**—William Lewis Herndon (1813-57), naval officer from Virginia, who with Lieutenant Lardner Gibbon explored the Amazon. Herndon's book was entitled *Exploration of the Valley of the Amazon* (1853; the second volume was by Gibbon, 1854). Thoreau's hostility is due to the fact that Herndon was a Virginian, and that his book approves of Brazilian slavery. The quotation (lines 20-22) seems to be a paraphrase of a passage on p. 281 in Herndon.

of the world this, when empires, kingdoms, and republics come a-begging to a private man's door, and utter their complaints at his elbow! I cannot take up a newspaper but I find that some wretched government or other, hard pushed, and on its last legs, is interceding with me, the reader, to vote for it,— more importunate than an Italian beggar; and if I have a mind to look at its certificate, made, perchance, by some benevolent merchant's clerk, or the skipper that brought it over, for it cannot speak a word of English itself, I shall probably read of the eruption of some Vesuvius, or the overflowing of some Po, true or forged, which brought it into this condition. I do not hesitate, in such a case, to suggest work, or the almshouse; or why not keep its castle in silence, as I do commonly? The poor President, what with preserving his popularity and doing his duty, is completely bewildered. The newspapers are the ruling power. Any other government is reduced to a few marines at Fort Independence. If a man neglects to read the Daily Times, government will go down on its knees to him, for this is the only treason in these days.

Those things which now most engage the attention of men, as politics and the daily routine, are, it is true, vital functions of human society, but should be unconsciously performed, like the corresponding functions of the physical body. They are *infra*-human, a kind of vegetation. I sometimes awake to a half-consciousness of them going on about me, as a man may become conscious of some of the processes of digestion in a morbid state, and so have the dyspepsia, as it is called. It is as if a thinker submitted himself to be rasped by the great gizzard of creation. Politics is, as it were, the gizzard of society, full of grit and gravel, and the two political parties are its two opposite halves,— sometimes split into quarters, it may be, which grind on each other. Not only individuals, but states, have thus a confirmed dyspepsia, which expresses itself, you can imagine by what sort of eloquence. Thus our life is not altogether a forgetting, but also, alas! to a great extent, a remembering, of that which we should never have been conscious of, certainly not in our waking hours. Why should we not meet, not always as dyspeptics, to tell our bad dreams, but sometimes as *eu*peptics, to congratulate each other on the ever-glorious morning? I do not make an exorbitant demand, surely.

11. **President**—In 1863 the "poor President" would be Lincoln. 13-14. **Fort Independence**—fort on Castle Island in Boston Harbor. 19. **infra**—below. 28. **forgetting**—*Cf.* Wordsworth's "Intimations" Ode, sec. v: "Our birth is but a sleep and a forgetting."

JAMES RUSSELL LOWELL

1819-1891

I. "STRIVING PARNASSUS TO CLIMB" (1819–1846)

1819 February 22, born at "Elmwood," Cambridge, Massachusetts, the sixth child of the Rev. Charles Lowell of the West (Unitarian) Church, Boston, and Harriet Spence Lowell of Portsmouth, New Hampshire.
1828 Entered the school of William Wells, Cambridge, to prepare for Harvard.
1834 Admitted to Harvard.
1838 June 25, "rusticated," sent to Concord for neglect of college work. In August his class poem was recited at commencement, but not by Lowell.
1838–1840 Attended Harvard Law School. Period of restlessness. Emotional love of literature.
1839 May, "Threnody on an Infant" published under the signature of Hugh Perceval in the *Southern Literary Messenger.*
1840 Entered law office upon graduation from law school. In August, became engaged to Maria White. In November, Lowell attended the Chardon Street Antislavery Convention.
1841 January, published *A Year's Life and Other Poems.* Began contributing verse to *Graham's Magazine.* In November "The Old Dramatists" appeared in the *Boston Miscellany.*
1842 Abandoned the law as a career. Further magazine contributions.
1843 January, began editing the *Pioneer* (three issues), with Robert Carter. December, published *Poems.*
1844 December 26, married Maria White (died October 27, 1853).
1845 Became editorial writer in Philadelphia on the staff of the *Pennsylvania Freeman,* an abolitionist periodical.

II. THE MAN OF LETTERS (1846–1855)

1846 January, *Conversations on Some of the Old Poets* published (some of the material from contributions in the *Boston Miscellany*). May, severed connection with the *Freeman;* returned to "Elmwood." Further abolitionist articles in the *London Daily News* and the *National Anti-Slavery Standard,* including the first of *The Biglow Papers* in the *Boston Courier,* June 17. December 31, Blanche Lowell born (died March, 1847).
1847 September 9, Mabel Lowell born.
1848 Published *The Fable for Critics,* the first series of *The Biglow Papers, The Vision of Sir Launfal,* and *Poems,* 2 vols.
1849 July 16, Rose Lowell born (died February, 1850).
1850 December 22, Walter Lowell born (died April, 1852).
1851 July, sailed for Europe with his family, spending the winter in Rome, and the summer of 1852 in England, meeting literary men.

1852 October, returned to United States with Thackeray and A. H. Clough.
1853 "A Moosehead Journal" published in *Putnam's Magazine* for November.
1854 Published "Fireside Travels" in *Putnam's* (April and May); and "Leaves from my Italian Journal" in *Graham's* (April, May, July).

III. PROFESSOR AND PUBLIC MAN (1855–1877)

1855 Lectured in Boston on the English poets. Appointed Smith professor of modern languages at Harvard to succeed Longfellow, sailing for Europe in June for study in Germany. Spent the spring in Italy.
1856 August, returned to Cambridge.
1857 September, married Frances Dunlap (died February 19, 1885). Began teaching at Harvard. Editor of the *Atlantic Monthly* (first issue, November).
1859 Attended meetings of the Saturday Club (Holmes, Longfellow, Emerson, Agassiz, Hawthorne, and others).
1861 May, resigned editorship of the *Atlantic*. Published *The Biglow Papers: Second Series*. War poems and political essays.
1864 January, made editor of the *North American Review* with C. E. Norton. *Fireside Travels* published.
1865 July 21, recited the "Commemoration Ode" at Harvard (published in the September *Atlantic*).
1869 "On a Certain Condescension in Foreigners" in the *Atlantic* for January. Published *Under the Willows*.
1870 Published *Among My Books* and *The Cathedral*.
1871 Published *My Study Windows*.
1872 Resigned from the *North American Review* and from Harvard, and went abroad, receiving honorary degrees from Oxford (1873) and Cambridge (1874).
1874 July, returned to the United States and to Harvard. Reëmergence of political interests.
1875 Delivered "Ode" at Concord Centennial, April 19; and "Under the Old Elm," July 3. *Among My Books* (second series) published.
1876 June, delegate to the National Republican Convention; July 4, delivered "Ode for the Fourth of July, 1876."

IV. THE DIPLOMAT (1877–1891)

1877 June, appointed United States minister to Spain, sailing July 14.
1880 January, appointed ambassador to Great Britain, reaching London March 7. During his ambassadorship Lowell delivered various addresses in the British Isles, the most important of which was "Democracy," given at Birmingham, October 6, 1884.
1885 June, Lowell returned to the United States.
1887 Delivered Lowell Institute lectures. *Democracy and Other Addresses* published.
1888 *Heartsease and Rue* published; *Political Essays* published. Visit to Europe, returning December, 1888.
1889 Last trip abroad.
1890 Edited the ten-volume edition of his *Writings*.
1891 Lowell died at "Elmwood" August 12. *Latest Literary Essays* published.
1892 *The Old English Dramatists* published.

The Writings of James Russell Lowell, Houghton Mifflin, 1890, 10 vols. To this Vol. XI (*Latest Literary Essays and Addresses*) and Vol. XII (*The Old English Dramatists*) were added in 1891 and 1892. The Elmwood edition, 1904, 16 vols., is the most comprehensive, including three volumes of letters. Harry Clark and Norman Foerster, edd., *James Russell Lowell: Representative Selections,* American Book Co., 1947.

All the fairies brought their gifts to Lowell's cradle save only the fairy who might have given him that unity of purpose which makes Emerson or Thoreau so completely individual. For Lowell's talents show in formal ode and in humorous verse, in political address and historical essay, in interpretative criticism and delightful letter; only, amid this profusion, the student is sometimes hard put to it to find the essential thing that is Lowell, whom he remembers as the author of this or that work, the work always coming between him and its author. Not all readers of Lowell feel that this diversity of accomplishment masks the deeper personality, but many do, and it is one of the tasks of the student to try to account for the varying judgments which have been passed upon him.

One important element in the problem is the history of Lowell's own development and change. Born into the proper Massachusetts family, he also followed the pattern familiar in many such families of radicalism in youth and conservatism in later years. He began as a mystic, a romanticist, and an advocate of abolition; he ended with his mysticism diminished, a partial repudiation of romanticism, and a condemnation of much in the Reconstruction period that he could not approve, though his essential faith in democracy—at least in his version of democracy—was not shaken. His address on that subject is an almost classic example of the interpretation of political democracy common to men of his standing in his generation. His essay on Rousseau (with which, if the student has time, he should read Lowell's essay on Thoreau) reveals how much of his earlier sentimental romanticism Lowell came to repudiate. But his wit remained constant, his scholarly interests never ceased, and he remained, and remains, by reason of his standards of judgment and his insight, one of the two or three foremost American critics. His poetry has been variously judged; there is always about it something of an air of improvisation, but at its best the intent is noble, the diction usually grave and pure, and if the rhythms are seldom cunning, the cadences are often full and musical.

RHOECUS

"Rhoecus" first appeared in the *Poems* of 1844, at which time it was longer by fifty lines of moral application of the fable. These disappeared when the poem was republished in the two-volume *Poems* of 1849. By a curious coincidence Walter

Savage Landor published a poem entitled "The Hamadryad" setting forth the same story in 1846. The tale goes back to a lost Greek writer of the fifth century B.C. named Charon of Lampsacus, and is preserved only in some learned annotations on Theocritus and Apollonius Rhodius. In the original, Rhoecus agrees to forego the society of women.

God sends his teachers unto every age,
To every clime, and every race of men,
With revelations fitted to their growth
And shape of mind, nor gives the realm of Truth
Into the selfish rule of one sole race:
Therefore each form of worship that hath swayed
The life of man, and given it to grasp
The master-key of knowledge, reverence,
Infolds some germs of goodness and of right;
Else never had the eager soul, which loathes
The slothful down of pampered ignorance,
Found in it even a moment's fitful rest.

There is an instinct in the human heart
Which makes that all the fables it hath coined,
To justify the reign of its belief
And strengthen it by beauty's right divine,
Veil in their inner cells a mystic gift,
Which, like the hazel twig, in faithful hands,
Points surely to the hidden springs of truth.
For, as in nature naught is made in vain,
But all things have within their hull of use
A wisdom and a meaning which may speak
Of spiritual secrets to the ear
Of spirit; so, in whatso'er the heart
Hath fashioned for a solace to itself,
To make its inspirations suit its creed,
And from the niggard hands of falsehood wring
Its needful food of truth, there ever is
A sympathy with Nature, which reveals,
Not less than her own works, pure gleams of light
And earnest parables of inward lore.
Hear now this fairy legend of old Greece,
As full of gracious youth, and beauty still
As the immortal freshness of that grace
Carved for all ages on some Attic frieze.

A youth named Rhoecus, wandering in the wood,
Saw an old oak just trembling to its fall,
And, feeling pity of so fair a tree,
He propped its gray trunk with admiring care,
And with a thoughtless footstep loitered on.
But, as he turned, he heard a voice behind
That murmured "Rhoecus!" 'Twas as if the leaves,
Stirred by a passing breath, had murmured it,

18. hazel twig—A forked, or bent, hazel twig is supposed to be useful in locating underground water.

And, while he paused bewildered, yet again
It murmured "Rhoecus!" softer than a breeze.
He started and beheld with dizzy eyes
What seemed the substance of a happy dream
Stand there before him, spreading a warm glow
Within the green glooms of the shadowy oak.
It seemed a woman's shape, yet far too fair
To be a woman, and with eyes too meek
For any that were wont to mate with gods.
All naked like a goddess stood she there,
And like a goddess all too beautiful
To feel the guilt-born earthliness of shame.
"Rhoecus, I am the Dryad of this tree,"
Thus she began, dropping her low-toned words
Serene, and full, and clear, as drops of dew,
"And with it I am doomed to live and die;
The rain and sunshine are my caterers,
Nor have I other bliss than simple life;
Now ask me what thou wilt, that I can give,
And with a thankful joy it shall be thine."

Then Rhoecus, with a flutter at the heart,
Yet, by the prompting of such beauty, bold,
Answered: "What is there that can satisfy
The endless craving of the soul but love?
Give me thy love, or but the hope of that
Which must be evermore my nature's goal."
After a little pause she said again,
But with a glimpse of sadness in her tone,
"I give it, Rhoecus, though a perilous gift;
An hour before the sunset meet me here."
And straightway there was nothing he could see
But the green glooms beneath the shadowy oak,
And not a sound came to his straining ears
But the low trickling rustle of the leaves,
And far away upon an emerald slope
The falter of an idle shepherd's pipe.

Now, in those days of simpleness and faith,
Men did not think that happy things were dreams
Because they overstepped the narrow bourn
Of likelihood, but reverently deemed
Nothing too wondrous or too beautiful
To be the guerdon of a daring heart.
So Rhoecus made no doubt that he was blest,
And all along unto the city's gate
Earth seemed to spring beneath him as he walked,
The clear, broad sky looked bluer than its wont,
And he could scarce believe he had not wings,
Such sunshine seemed to glitter through his veins
Instead of blood, so light he felt and strange.

Young Rhoecus had a faithful heart enough,
But one that in the present dwelt too much,
And, taking with blithe welcome whatsoe'er
Chance gave of joy, was wholly bound in that,
Like the contented peasant of a vale,
Deemed it the world, and never looked beyond.
So, haply meeting in the afternoon
Some comrades who were playing at the dice,
He joined them, and forgot all else beside.

The dice were rattling at the merriest,
And Rhoecus, who had met but sorry luck,
Just laughed in triumph at a happy throw,
When through the room there hummed a yellow bee
That buzzed about his ear with down-dropped legs
As if to light. And Rhoecus laughed and said,
Feeling how red and flushed he was with loss,
"By Venus! does he take me for a rose?"
And brushed him off with rough, impatient hand.
But still the bee came back, and thrice again
Rhoecus did beat him off with growing wrath.
Then through the window flew the wounded bee,
And Rhoecus, tracking him with angry eyes,
Saw a sharp mountain-peak of Thessaly
Against the red disk of the setting sun,—
And instantly the blood sank from his heart,
As if its very walls had caved away.
Without a word he turned, and, rushing forth,
Ran madly through the city and the gate,
And o'er the plain, which now the wood's long shade,
By the low sun thrown forward broad and dim,
Darkened wellnigh unto the city's wall.

Quite spent and out of breath he reached the tree,
And, listening fearfully, he heard once more
The low voice murmur "Rhoecus!" close at hand:
Whereat he looked around him, but could see
Naught but the deepening glooms beneath the oak.
Then sighed the voice, "O Rhoecus! nevermore
Shalt thou behold me or by day or night,
Me, who would fain have blessed thee with a love
More ripe and bounteous than ever yet
Filled up with nectar any mortal heart:
But thou didst scorn my humble messenger,
And sent'st him back to me with bruisëd wings.
We spirits only show to gentle eyes,
We ever ask an undivided love,
And he who scorns the least of Nature's works
Is thenceforth exiled and shut out from all.
Farewell! for thou canst never see me more."

115. **Thessaly**—district in northern Greece.

Then Rhoecus beat his breast, and groaned aloud,
And cried, "Be pitiful! forgive me yet
This once, and I shall never need it more!"
"Alas!" the voice returned, " 'tis thou art blind,
Not I unmerciful; I can forgive,
But have no skill to heal thy spirit's eyes;
Only the soul hath power o'er itself."
With that again there murmured "Nevermore!"
And Rhoecus after heard no other sound,
Except the rattling of the oak's crisp leaves,
Like the long surf upon a distant shore,
Raking the sea-worn pebbles up and down.
The night had gathered round him: o'er the plain
The city sparkled with its thousand lights,
And sounds of revel fell upon his ear
Harshly and like a curse; above, the sky,
With all its bright sublimity of stars
Deepened, and on his forehead smote the breeze:
Beauty was all around him and delight,
But from that eve he was alone on earth.

TO THE DANDELION

This poem was first published in *Graham's Magazine,* January, 1845, and then included in the *Poems, Second Series,* of 1848.

Dear common flower, that grow'st beside the way,
Fringing the dusty road with harmless gold,
First pledge of blithsome May,
Which children pluck, and, full of pride uphold,
High-hearted buccaneers, o'erjoyed that they
An Eldorado in the grass have found,
Which not the rich earth's ample round
May match in wealth, thou art more dear to me
Than all the prouder summer-blooms may be.

Gold such as thine ne'er drew the Spanish prow
Through the primeval hush of Indian seas,
Nor wrinkled the lean brow
Of age, to rob the lover's heart of ease;
'Tis the Spring's largess, which she scatters now
To rich and poor alike, with lavish hand,
Though most hearts never understand
To take it at God's values, but pass by
The offered wealth with unrewarded eye.

Thou art my tropics and mine Italy;
To look at thee unlocks a warmer clime;
The eyes thou givest me
Are in the heart, and heed not space or time:
Not in mid June the golden-cuirassed bee

14. **largess**—liberality.

Feels a more summer-like warm ravishment
In the white lily's breezy tent,
His fragrant Sybaris, than I, when first
From the dark green thy yellow circles burst.

Then think I of deep shadows on the grass,
Of meadows where in sun the cattle graze,
Where, as the breezes pass,
The gleaming rushes lean a thousand ways,
Of leaves that slumber in a cloudy mass,
Or whiten in the wind, of waters blue
That from the distance sparkle through
Some woodland gap, and of a sky above,
Where one white cloud like a stray lamb doth move.

My childhood's earliest thoughts are linked with thee;
The sight of thee calls back the robin's song,
Who, from the dark old tree
Beside the door, sang clearly all day long,
And I, secure in childish piety,
Listened as if I heard an angel sing
With news from heaven, which he could bring
Fresh every day to my untainted ears
When birds and flowers and I were happy peers.

How like a prodigal doth nature seem,
When thou, for all thy gold, so common art!
Thou teachest me to deem
More sacredly of every human heart,
Since each reflects in joy its scanty gleam
Of heaven, and could some wondrous secret show,
Did we but pay the love we owe,
And with a child's undoubting wisdom look
On all these living pages of God's book.

THE BIGLOW PAPERS

FIRST SERIES

The first number of what became *The Biglow Papers, First Series,* was written rapidly by Lowell and published in the *Boston Courier,* June 17, 1846; and that Lowell did not at first realize the golden vein of literature he had uncovered is evident when one finds him writing to S. H. Gray the previous day and referring to his "squib." The series grew under his hand to nine numbers, which were cumulated in book form and published in 1848. Taking advantage of his creation of the mythical Ezekiel Biglow as a means of introducing Hosea to the public, Lowell also added the Rev. Homer Wilbur to the dramatis personae of the equally mythical town of Jaalam. Mr. Wilbur is the learned and pedantic parson of Jaalam, who has undertaken to edit the poetical works of Hosea with introductions, comments, and notes; his prose annotations are signed "H.W." Further to increase the mystification and the fun, Lowell, or the Rev. Mr. Wilbur for him, also prefaced the volume with laudatory comments on Hosea's poetry from entirely imaginary New England country newspapers.

26. Sybaris—an ancient Greek city in southern Italy, known for its luxury and effeminacy.

No. I

A LETTER

FROM MR. EZEKIEL BIGLOW OF JAALAM TO THE HON. JOSEPH T. BUCKINGHAM, EDITOR OF THE BOSTON COURIER, INCLOSING A POEM OF HIS SON, MR. HOSEA BIGLOW

JAYLEM, june 1846.

MISTER EDDYTER:—Our Hosea wuz down to Boston last week, and he see a cruetin Sarjunt a struttin round as popler as a hen with 1 chicking, with 2 fellers a drummin and fifin arter him like all nater. the sarjunt he thout Hosea hed n't gut his i teeth cut cos he looked a kindo's though he'd jest com down, so he cal'lated to hook him in, but Hosy woodn't take none o' his sarse for all he hed much as 20 Rooster's tales stuck onto his hat and eenamost enuf brass a bobbin up and down on his shoulders and figureed onto his coat and trousis, let alone wut nater hed sot in his featers, to make a 6 pounder out on.

wal, Hosea he com home considerabal riled, and arter I'd gone to bed I heern Him a thrashin round like a short-tailed Bull in fli-time. The old Woman ses she to me ses she, Zekle, ses she, our Hosee's gut the chollery or suthin anuther ses she, don't you Bee skeered, ses I, he's oney amakin pottery * ses i, he's ollers on hand at that ere busynes like Da & martin, and shure enuf, cum mornin, Hosy he cum down stares full chizzle, hare on eend and cote tales flyin, and sot rite of to go reed his varses to Parson Wilbur bein he haint aney grate shows o' book larnin himself, bimeby he cum back and sed the parson wuz dreffle tickled with 'em as i hoop you will Be, and said they wuz True grit.

Hosea ses taint hardly fair to call 'em hisn now, cos the parson kind o' slicked off sum o' the last varses, but he told Hosee he didn't want to put his ore in to tetch to the Rest on 'em, bein they wuz verry well As thay wuz, and then Hosy ses he sed suthin a nuther about Simplex Mundishes or sum sech feller, but I guess Hosea kind o' didn't hear him, for I never hearn o' nobody o' that name in this villadge, and I've lived here man and boy 76 year cum next tater diggin, and thair aint no wheres a kitting spryer'n I be.

If you print 'em I wish you 'd jest let folks know who hosy's father is, cos my ant Keziah used to say it's nater to be curus ses she, she aint livin though and he's a likely kind o' lad.

EZEKIEL BIGLOW

Thrash away, you'll *hev* to rattle
On them kittle-drums o' yourn,—
'Taint a knowin' kind o' cattle
Thet is ketched with mouldy corn;

* *Aut insanit, aut versos facit.*—H. W.

3. **cruetin Sarjunt**—recruiting sergeant. It was still the custom to advertise for volunteers for the American army by sending out a fifer and a drummer, or either, and a sergeant. Lowell's digs at the American army uniform as it then was can be illuminated by consulting prints of the period. 7. **eenamost**—almost. 12. **chollery**—cholera. 12. **suthin anuther**—something or other. 13. **pottery**—poetry. The learned footnote by Mr. Wilbur means "He is either insane or is making verses." 14. **Da & martin**—Day and Martin, proprietors of the most advertised shoeblacking of the day, who made known the merit of their wares in rhyme. 15. **full chizzle**—full chisel, full force. 15. **eend**—end. 22. **Simplex Mundishes**—Hosea's inaccurate remembrance of the learned minister's Latin *simplex munditiis*—neat, but not gaudy; naive, or "green," in matters of sophistication.

Put in stiff, you fifer feller,
  Let folks see how spry you be,—
Guess you'll toot till you are yeller
  'Fore you git ahold o' me!

Thet air flag's a leetle rotten,
  Hope it aint your Sunday's best;—
Fact! it takes a sight o' cotton
  To stuff out a soger's chest:
Sence we farmers hev to pay fer 't,
  Ef you must wear humps like these,
S'posin' you should try salt hay fer 't,
  It would du ez slick ez grease.

'Twould n't suit them Southun fellers,
  They 're a dreffle graspin' set,
We must ollers blow the bellers
  Wen they want their irons het;
May be it's all right ez preachin',
  But *my* narves it kind o' grates,
Wen I see the overreachin'
  O' them nigger-drivin' States.

Them thet rule us, them slave-traders,
  Haint they cut a thunderin' swarth
(Helped by Yankee renegaders),
  Thru the vartu o' the North!
We begin to think it's nater
  To take sarse an' not be riled;—
Who'd expect to see a tater
  All on eend at bein' biled?

Ez fer war, I call it murder,—
  There you hev it plain an' flat;
I don't want to go no furder
  Than my Testyment fer that;
God hez sed so plump an' fairly,
  It's ez long ez it is broad,
An' you've gut to git up airly
  Ef you want to take in God.

'Taint your eppyletts an' feathers
  Make the thing a grain more right;
'Taint afollerin' your bell-wethers
  Will excuse ye in His sight;
Ef you take a sword an' dror it,
  An' go stick a feller thru,
Guv'ment aint to answer for it,
  God'll send the bill to you.

7. cotton—It was freely charged among the abolitionists that the Mexican War was fought to increase the area profitable for cotton-growing and slavery. **22. swarth**—swathe.

Wut's the use o' meetin'-goin'
  Every Sabbath, wet or dry,
Ef it's right to go amowin'
  Feller-men like oats an' rye?
I dunno but wut it's pooty
  Trainin' round in bobtail coats,—
But it's curus Christian dooty
  This 'ere cuttin' folks's throats.

They may talk o' Freedom's airy
  Tell they're pupple in the face,—
It's a grand gret cemetary
  Fer the barthrights of our race;
They jest want this Californy
  So's to lug new slave-states in
To abuse ye, an' to scorn ye,
  An' to plunder ye like sin.

Aint it cute to see a Yankee
  Take sech everlastin' pains,
All to git the Devil's thankee
  Helpin' on 'em weld their chains?
Wy, it's jest ez clear ez figgers,
  Clear ez one an' one makes two,
Chaps thet make black slaves o' niggers
  Want to make wite slaves o' you.

Tell ye jest the eend I've come to
  Arter cipherin' plaguy smart,
An' it makes a handy sum, tu,
  Any gump could larn by heart;
Laborin' man an' laborin' woman
  Hev one glory an' one shame.
Ev'y thin' thet's done inhuman
  Injers all on 'em the same.

'Taint by turnin' out to hack folks
  You're agoin' to git your right,
Nor by lookin' down on black folks
  Coz you're put upon by wite;
Slavery aint o' nary color,
  'Taint the hide thet makes it wus,
All it keers fer in a feller
  'S jest to make him fill its pus.

Want to tackle *me* in, du ye?
  I expect you'll hev to wait;

5. pooty—pretty. **9. airy**—eyrie, as of an eagle. **13. Californy**—The complicated story of the "freeing" of California from Mexico involves the congressional debate over its admittance to statehood. This was eventually done as part of the Compromise of 1850. Lowell's dig is at the offer of the slave states to admit California as a free state, securing in return the admission of other states (to be formed from territory torn from Mexico) as slave states.

Wen cold lead puts daylight thru ye
You'll begin to kal'late;
S'pose the crows wun't fall to pickin'
All the carkiss from your bones,
Coz you helped to give a lickin'
To them poor half-Spanish drones?

Jest go home an' ask our Nancy
Wether I'd be sech a goose
Ez to jine ye,—guess you'd fancy
The etarnal bung wuz loose!
She wants me fer home consumption,
Let alone the hay's to mow,—
Ef you're arter folks o' gumption,
You've a darned long row to hoe.

Take them editors thet's crowin'
Like a cockerel three months old,—
Don't ketch any on 'em goin',
Though they *be* so blasted bold;
Aint they a prime lot o' fellers?
'Fore they think on't guess they 'll sprout
(Like a peach thet's got the yellers),
With the meanness bustin' out.

Wal, go 'long to help 'em stealin'
Bigger pens to cram with slaves,
Help the men thet's ollers dealin'
Insults on your fathers' graves;
Help the strong to grind the feeble,
Help the many agin the few,
Help the men thet call your people
Witewashed slaves an' peddlin' crew!

Massachusetts, God forgive her,
She's akneelin' with the rest,
She, thet ough' to ha' clung ferever
In her grand old eagle-nest;
She thet ough' to stand so fearless
W'ile the wracks are round her hurled,
Holdin' up a beacon peerless
To the oppressed of all the world!

Ha'n't they sold your colored seamen?
Ha'n't they made your env'ys w'iz?
Wut'll make ye act like freemen?
Wut'll git your dander riz?

2. kal'late—calculate; the rhythm requires three syllables. **6. half-Spanish drones**—the Mexicans. During the Mexican War the Americans won every battle. **21. yellers**—yellows, a disease of peach trees, in which sterile shoots are produced and the leaves turn yellow. **40. env'ys w'iz**—envoys whizz: a reference to the scant courtesy with which American representatives were sometimes received abroad in the opening decades of the last century.

Come, I'll tell ye wut I'm thinkin'
  Is our dooty in this fix,
They 'd ha' done 't ez quick ez winkin'
  In the days o' seventy-six.

Clang the bells in every steeple,
  Call all true men to disown
The tradoocers of our people,
  The enslavers o' their own;
Let our dear old Bay State proudly
  Put the trumpet to her mouth,
Let her ring this messidge loudly
  In the ears of all the South:—

"I'll return ye good fer evil
  Much ez we frail mortils can,
But I wun't go help the Devil
  Makin' man the cus o' man;
Call me coward, call me traiter,
  Jest ez suits your mean idees,—
Here I stand a tyrant-hater,
  An' the friend o' God an' Peace!"

Ef I'd *my* way I hed ruther
  We should go to work an' part,—
They take one way, we take t' other,
  Guess it wouldn't break my heart;
Man hed ough' to put asunder
  Them thet God has noways jined;
An' I shouldn't gretly wonder
  Ef there's thousands o' my mind.

[The first recruiting sergeant on record I conceive to have been that individual who is mentioned in the Book of Job as *going to and fro in the earth, and walking up and down in it.* Bishop Latimer will have him to have been a bishop, but to me that other calling would appear more congenial. The sect of Cainites is not yet extinct, who esteemed the first-born of Adam to be the most worthy, not only because of that privilege of primogeniture, but inasmuch as he was able to overcome and slay his younger brother. That was a wise saying of the famous Marquis Pescara to the Papal Legate, that *it was impossible for men to serve Mars and Christ at the same time.* Yet in time past the profession of arms was judged to be κατ' ἐξοχήν that of a gentleman, nor does this opinion want for strenuous upholders even in our day. Must we suppose, then, that the profession of Christianity was only intended for losels, or, at best, to afford an opening for plebeian ambition? Or shall we hold with that nicely metaphysical Pomeranian, Captain Vratz, who was Count Konigsmark's chief instrument in the murder of Mr. Thynne, that the Scheme of Salvation has been arranged with an especial eye to the necessities of the upper classes, and that "God would consider *a gentleman* and deal with him suitably to the condition and profession he had placed him in"? It may be said of us all, *Exemplo plus quam ratione vivimus.*—H. W.]

June 17, 1846

25-26. Man . . . jined—*Cf.* Mark 10:9. **29. first recruiting sergeant**—Satan. *Cf.* Job 1. The quotation is from the seventh verse. **30. Latimer**—Hugh Latimer (1490-1555), one of the chief promoters of the English Reformation. **32. Cainites**—a sect of the second century, the tenet of which was that Cain derived his existence from the higher powers, and Abel from the lower. **34. Pescara**—Fernando Francesco Davalos, Marquis of Pescara (1489-1525), Italian soldier, who defeated Francis I of France in 1525. **36. κατ' ἐξοχήν**—especially. **38. losels**—profligate fellows. **41-42. "God . . . in"**—The quotation is apparently a reminiscence of a passage in Evelyn's *Diary* under date of 10 March, 1682. Thomas Thynne of Longleat married

No. III

WHAT MR. ROBINSON THINKS

First published in the *Boston Courier,* November 2, 1847, and gathered into *The Biglow Papers, First Series.* Lowell wrote to Thomas Hughes (September 13, 1859) that he had written the poem at one sitting. John P. Robinson (1799-1864), a leader of the Whig party, had announced in 1847 that he was going to support General Caleb Cushing for governor of Massachusetts on the Democratic ticket. Cushing commanded the Massachusetts troops in the Mexican War. The incumbent was George N. Briggs, elected in 1844, who, running for reëlection, defeated Cushing by a majority of over 14,000. Briggs, of course, was a Whig.

[A few remarks on the following verses will not be out of place. The satire in them was not meant to have any personal, but only a general, application. Of the gentleman upon whose letter they were intended as a commentary Mr. Biglow had never heard, till he saw the letter itself. The position of the satirist is oftentimes one which he would not have chosen, had the election been left to himself. In attacking bad principles, he is obliged to select some individual who has made himself their exponent, and in whom they are impersonate, to the end that what he says may not, through ambiguity, be dissipated *tenues in auras.* For what says Seneca? *Longum iter per praecepta, breve et efficace per exempla.* A bad principle is comparatively harmless while it continues to be an abstraction, nor can the general mind comprehend it fully till it is printed in that large type which all men can read at sight, namely, the life and character, the sayings and doings, of particular persons. It is one of the cunningest fetches of Satan, that he never exposes himself directly to our arrows, but, still dodging behind this neighbor or that acquaintance, compels us to wound him through them, if at all. He holds our affections as hostages, the while he patches up a truce with our conscience.

Meanwhile, let us not forget that the aim of the true satirist is not to be severe upon persons, but only upon falsehood, and, as Truth and Falsehood start from the same point, and sometimes even go along together for a little way, his business is to follow the path of the latter after it diverges, and to show her floundering in the bog at the end of it. Truth is quite beyond the reach of satire. There is so brave a simplicity in her, that she can no more be made ridiculous than an oak or a pine. The danger of the satirist is, that continual use may deaden his sensibility to the force of language. He becomes more and more liable to strike harder than he knows or intends. He may be careful to put on his boxing-gloves, and yet forget that, the older they grow, the more plainly may the knuckles inside be felt. Moreover, in the heat of contest, the eye is insensibly drawn to the crown of victory, whose tawdry tinsel glitters through that dust of the ring which obscures Truth's wreath of simple leaves. I have sometimes thought that my young friend, Mr. Biglow, needed a monitory hand laid on his arm,—*aliquid sufflaminandus erat.* I have never thought it good husbandry to water the tender plants of reform with *aqua fortis,* yet, where so much is to do in the beds, he were a sorry gardener who should wage a whole day's war with an iron scuffle on those ill weeds that make the garden-walks of life unsightly, when a sprinkle of Attic salt will wither them up. *Est ars etiam maledicendi,* says Scaliger, and truly it is a hard thing to say where the graceful gentleness of the lamb merges in downright sheepishness. We may conclude with worthy and wise Dr. Fuller, that "one may be a lamb in private wrongs, but in hearing general affronts to goodness they are asses which are not lions."—H. W.]

the fifteen-year-old widow of Lord Ogle. Count Königsmark, a suitor of the lady, feeling himself aggrieved, sent Thynne two challenges by Captain Vratz; Thynne retaliated by sending six assassins to murder Konigsmark and Vratz; and on February 12, 1682, Vratz and two others murdered Thynne in Pall Mall, for which they were condemned and executed. Konigsmark was acquitted of complicity. **Exemplo . . . vivimus** in the last line means: We live by example more than by reason.

7. **tenues in auras**—into thin air. 7. **Seneca**—See the headnote on p. 731. 7-8. **Longum . . . exempla**—It is a long way through precept, but a short and sure one by example. 11. **fetches**—tricks. 26. **aliquid . . . erat**—He needed to be checked a bit—what Ben Jonson said of Shakespeare. 27. **aqua fortis**—strong water; also nitric acid, poison. 28. **scuffle**—weeding hoe. 30. **Est . . . maledicendi**—There is even an art in cursing. 30. **Scaliger**—either Julius Caesar Scaliger (1484-1558), an Italian classical scholar; or Joseph Justus Scaliger (1540-1609). Probably the former. 32. **Fuller**—Thomas Fuller (1608-1661), English divine.

Guvener B. is a sensible man;
He stays to his home an' looks arter his folks;
He draws his furrer ez straight ez he can,
An' into nobody's tater-patch pokes;
But John P.
Robinson he
Sez he wunt vote fer Guvener B.

My! aint it terrible? Wut shall we du?
We can't never choose him o' course,—thet 's flat;
Guess we shall hev to come round, (don't you?)
An' go in fer thunder an' guns, an' all that;
Fer John P.
Robinson he
Sez he wunt vote fer Guvener B.

Gineral C. is a dreffle smart man:
He's ben on all sides thet give places or pelf;
But consistency still wuz a part of his plan,—
He's ben true to *one* party,—an' thet is himself;—
So John P.
Robinson he
Sez he shall vote fer Gineral C.

Gineral C. he goes in fer the war;
He don't vally principle more 'n an old cud;
Wut did God make us raytional creeturs fer,
But glory an' gunpowder, plunder an' blood?
So John P.
Robinson he
Sez he shall vote fer Gineral C.

We were gittin' on nicely up here to our village,
With good old idees o' wut's right an' wut aint,
We kind o' thought Christ went agin war an' pillage,
An' thet eppyletts worn't the best mark of a saint;
But John P.
Robinson he
Sez this kind o' thing 's an exploded idee.

The side of our country must ollers be took,
An' Presidunt Polk, you know, *he* is our country.
An' the angel thet writes all our sins in a book
Puts the *debit* to him, an' to us the *per contry;*
An' John P.
Robinson he
Sez this is his view o' the thing to a T.

1-4. Guvener . . . pokes—The reference is to the Whig sentiment against participating in the Mexican War. **37. Polk**—James K. Polk (1795-1849), eleventh President of the United States, during whose administration the Mexican War was fought. **39. per contry**—per contra: on the other side.

Parson Wilbur he calls all these argimunts lies;
Sez they're nothin' on airth but jest *fee, faw fum;*
An' thet all this big talk of our destinies
Is half on it ign'ance, an' t' other half rum;
But John P.
Robinson he
Sez it aint no sech thing; an', of course, so must we.

Parson Wilbur sez *he* never heerd in his life
Thet th' Apostles rigged out in their swaller-tail coats,
An' marched round in front of a drum an' a fife,
To git some on 'em office, an' some on 'em votes;
But John P.
Robinson he
Sez they didn't know everythin' down in Judee.

Wal, it's a marcy we've gut folks to tell us
The rights an' the wrongs o' these matters, I vow,—
God sends country lawyers, an' other wise fellers,
To start the world's team wen it gits in a slough;
Fer John P.
Robinson he
Sez the world'll go right, ef he hollers out Gee!

[The attentive reader will doubtless have perceived in the foregoing poem an allusion to that pernicious sentiment,—"Our country, right or wrong." It is an abuse of language to call a certain portion of land, much more, certain personages, elevated for the time being to high station, our country. I would not sever nor loosen a single one of those ties by which we are united to the spot of our birth, nor minish by a tittle the respect due to the Magistrate. I love our own Bay State too well to do the one, and as for the other, I have myself for nigh forty years exercised, however unworthily, the function of Justice of the Peace, having been called thereto by the unsolicited kindness of that most excellent man and upright patriot, Caleb Strong. *Patriae fumus igne alieno luculentior* is best qualified with this,—*Ubi libertas, ibi patria.* We are inhabitants of two worlds, and owe a double, but not a divided, allegiance. In virtue of our clay, this little ball of earth exacts a certain loyalty of us, while, in our capacity as spirits, we are admitted citizens of an invisible and holier fatherland. There is a patriotism of the soul whose claim absolves us from our other and terrene fealty. Our true country is that ideal realm which we represent to ourselves under the names of religion, duty, and the like. Our terrestrial organizations are but far-off approaches to so fair a model, and all they are verily traitors who resist not any attempt to divert them from this their original intendment. When, therefore, one would have us to fling up our caps and shout with the multitude,—*"Our country, however bounded!"* he demands of us that we sacrifice the larger to the less, the higher to the lower, and that we yield to the imaginary claims of a few acres of soil our duty and privilege as liegemen of Truth. Our true country is bounded on the north and the south, on the east and the west, by Justice, and when she oversteps that invisible boundary-line by so much as a hair's-breadth, she ceases to be our mother, and chooses rather to be looked upon *quasi noverca.* That is a hard choice when our earthly love of country calls upon us to tread one path and our duty points us to another. We must make as noble and becoming an election as did Penelope between Icarius and Ulysses. Veiling our faces, we must take silently the hand of Duty to follow her. . . . H. W.]

Nov. 2, 1847

3. **destinies**—Talk of the "manifest destiny" of the Americans to rule the continent was common among the war party. 23. **"Our . . . wrong"**—reference to the celebrated sentiment attributed to Stephen Decatur: "My country—may she be ever right; but right or wrong—my country!" 26. **minish by a tittle**—diminish by an atom. 29. **Strong**—Caleb Strong (1745-1819), governor of Massachusetts during the War of 1812, and, as an ardent Federalist, opposed to that war, as Parson Wilbur is to this one. 29. **Patriae . . . luculentior**—The smoke of one's own country is brighter than the fire of a strange land. 30. **Ubi . . . patria**—Where liberty is, there is my country. 42. **quasi noverca**—as a stepmother. 44-45. **Penelope . . . Ulysses**—Icarius is the father of Penelope in the Odyssey. The reference seems to be to Greek marriage customs. 45. **follow her**—The omitted portions of Parson Wilbur's notes have nothing to do with the poem.

A FABLE FOR CRITICS

Lowell began the composition of this poem in October, 1847, and by November 13 had written about six hundred lines. As he wrote more and more of it, he dispatched the manuscript in installments to his friend C. F. Briggs, the passages on Alcott (not reprinted here) and Emerson being among the earliest composed. He finally gave the manuscript to Briggs, keeping the copyright in his own name; but composition was interrupted by other literary duties about halfway through the completed version. The whole poem was finished by August, 1848. It is interesting to note that the passage on Oliver Wendell Holmes was an afterthought. Lowell thought highly of the poem at the time of its composition, though its immediate appeal when it was published in 1848 does not seem to have been as great as he had anticipated. The poem belongs to a long line of informal verse criticisms of contemporary men of letters, in most of which Apollo is involved. The immediate predecessor who seems to have suggested the idea to Lowell was Leigh Hunt, in his *Session of the Poets*. Lowell also furnished a title-page and an introduction "To the Reader," all in rhyme, though printed as prose. The plot is so loosely constructed as scarcely to exist. Generally speaking, a critic is describing for Apollo's benefit the characteristics of contemporary men of letters in America. The present selection omits the first five hundred and twenty-six lines printed as verse, as well as the title-page and the "prose" preface.

. . . "There comes Emerson first, whose rich words, every one,
Are like gold nails in temples to hang trophies on,
Whose prose is grand verse, while his verse, the Lord knows,
Is some of it pr—— No, 'tis not even prose;
I'm speaking of metres; some poems have welled
From those rare depths of soul that have ne'er been excelled;
They're not epics, but that doesn't matter a pin,
In creating, the only hard thing's to begin;
A grass-blade's no easier to make than an oak;
If you've once found the way, you've achieved the grand stroke;
In the worst of his poems are mines of rich matter,
But thrown in a heap with a crash and a clatter;
Now it is not one thing nor another alone
Makes a poem, but rather the general tone,
The something pervading, uniting the whole,
The before unconceived, unconceivable soul,
So that just in removing this trifle or that, you
Take away, as it were, a chief limb of the statue;
Roots, wood, bark, and leaves, singly perfect may be,
But, clapt hodge-podge together, they don't make a tree.

"But to come back to Emerson (whom by the way,
I believe we left waiting),—his is, we may say,
A Greek head on right Yankee shoulders, whose range
Has Olympus for one pole, for t'other the Exchange;
He seems, to my thinking, (although I'm afraid
The comparison must, long ere this, have been made),

2. gold nails—*Cf.* Eccles. 12:11. **24. Olympus**—the home of the gods, as a symbol of Emerson's idealism; the **Exchange**, as a symbol of his practical spirit.

A Plotinus-Montaigne, where the Egyptian's gold mist
And the Gascon's shrewd wit cheek-by-jowl coexist;
All admire, and yet scarcely six converts he's got
To I don't (nor they either) exactly know what;
For though he builds glorious temples, 'tis odd
He leaves never a doorway to get in a god.
'Tis refreshing to old-fashioned people like me,
To meet such a primitive Pagan as he,
In whose mind all creation is duly respected
As parts of himself—just a little projected;
And who's willing to worship the stars and the sun,
A convert to—nothing but Emerson.
So perfect a balance there is in his head,
That he talks of things sometimes as if they were dead;
Life, nature, love, God, and affairs of that sort,
He looks at as merely ideas; in short,
As if they were fossils stuck round in a cabinet,
Of such vast extent that our earth's a mere dab in it;
Composed just as he is inclined to conjecture her,
Namely, one part pure earth, ninety-nine parts pure lecturer;
You are filled with delight at his clear demonstration,
Each figure, word, gesture, just fits the occasion,
With the quiet precision of science he'll sort 'em,
But you can't help suspecting the whole a *post mortem.*

"There are persons, mole-blind to the soul's make and style,
Who insist on a likeness 'twixt him and Carlyle;
To compare him with Plato would be vastly fairer,
Carlyle's the more burly, but E. is the rarer;
He sees fewer objects, but clearlier, truelier,
If C.'s as original, E.'s more peculiar;
That he's more of a man you might say of the one,
Of the other he's more of an Emerson;
C.'s the Titan, as shaggy of mind as of limb,—
E. the clear-eyed Olympian, rapid and slim;
The one's two-thirds Norseman, the other half Greek,
Where the one's most abounding, the other's to seek;
C.'s generals require to be seen in the mass—
E.'s specialties gain if enlarged by the glass;
C. gives nature and God his own fits of the blues,
And rims common-sense things with mystical hues,—
E. sits in a mystery calm and intense,
And looks coolly around him with sharp common-sense;
C. shows you how every-day matters unite
With the dim transdiurnal recesses of night,—
While E., in a plain, preternatural way,
Makes mysteries matters of mere every day;

27. Plotinus-Montaigne—Emerson frequently cites Plotinus (see note 8, p. 462) and Montaigne (1553-1592), here called a Gascon because he lived in Bordeaux, in the old region of Gascony. Emerson's oracular wisdom and his skepticism are what Lowell has in mind. **50. post mortem**—autopsy. **59. Titan**—here appropriate, since the Titans were earth-born. **63. generals**—general propositions. **70. transdiurnal**—beyond ordinary daylight.

C. draws all his characters quite *à la* Fuseli,—
Not sketching their bundles of muscles and thews illy,
But he paints with a brush so untamed and profuse,
They seem nothing but bundles of muscles and thews;
E. is rather like Flaxman, lines strait and severe,
And a colorless outline, but full, round, and clear;—
To the men he thinks worthy he frankly accords
The design of a white marble statue in words.
C. labors to get at the centre, and then
Take a reckoning from there of his actions and men;
E. calmly assumes the said centre as granted,
And, given himself, has whatever is wanted.

"He has imitators in scores, who omit
No part of the man but his wisdom and wit,—
Who go carefully o'er the sky-blue of his brain,
And when he has skimmed it once, skim it again;
If at all they resemble him, you may be sure it is
Because their shoals mirror his mists and obscurities,
As a mud-puddle seems deep as heaven for a minute,
While a cloud that floats o'er is reflected within it.

"There comes ——, for instance; to see him's rare sport,
Tread in Emerson's tracks with legs painfully short;
How he jumps, how he strains, and gets red in the face,
To keep step with the mystagogue's natural pace!
He follows as close as a stick to a rocket,
His fingers exploring the prophet's each pocket.
Fie, for shame, brother bard; with good fruit of your own,
Can't you let Neighbor Emerson's orchards alone?
Besides, 'tis no use, you'll not find e'en a core,—
—— has picked up all the windfalls before.
They might strip every tree, and E. never would catch 'em,
His Hesperides have no rude dragon to watch 'em;
When they send him a dishful, and ask him to try 'em,
He never suspects how the sly rogues came by 'em;
He wonders why 'tis there are none such his trees on,
And thinks 'em the best he has tasted this season. . . .

"There is Willis, all *natty* and jaunty and gay,
Who says his best things in so foppish a way,
With conceits and pet phrases so thickly o'erlaying 'em,
That one hardly knows whether to thank him for saying 'em;

73. **Fuseli**—John Henry Fuseli (1741-1825), a German-Swiss painter living in England given to extravagant distortion of form and unusual combinations of color. 77. **Flaxman**—John Flaxman (1755-1826), English sculptor of the classical revival. 93. **There comes**—There seems little doubt that the blank should be filled in with Thoreau's name. 102. **has picked**—There is some doubt as to who is meant, but Alcott and Channing have been suggested. 104. **Hesperides**—In Greek mythology maidens known as the Hesperides watched over a tree of golden apples and were in turn guarded by a dragon. 108. **season**—A description of Alcott is here omitted, as also one of O. O. Brownson. 109. **Willis**—Nathaniel Parker Willis (1806-1867), known to his friends as Nat or Natty, and one of the most characteristic writers of fashionable poetry and journalism in the forties.

Over-ornament ruins both poem and prose,
Just conceive of a Muse with a ring in her nose!
His prose had a natural grace of its own,
And enough of it, too, if he'd let it alone;
But he twitches and jerks so, one fairly gets tired,
And is forced to forgive where one might have admired;
Yet whenever it slips away free and unlaced,
It runs like a stream with a musical waste,
And gurgles along with the liquidest sweep;—
'Tis not deep as a river, but who'd have it deep?
In a country where scarcely a village is found
That has not its author sublime and profound,
For some one to be slightly shallow's a duty,
And Willis's shallowness makes half his beauty.
His prose winds along with a blithe, gurgling error,
And reflects all of Heaven it can see in its mirror:
'Tis a narrowish strip, but it is not an artifice;
'Tis the true out-of-doors with its genuine hearty phiz;
It is Nature herself, and there's something in that,
Since most brains reflect but the crown of a hat.
Few volumes I know to read under a tree,
More truly delightful than his A l'Abri,
With the shadows of leaves flowing over your book,
Like ripple-shades netting the bed of a brook;
With June coming softly your shoulder to look over,
Breezes waiting to turn every leaf of your book over,
And Nature to criticise still as you read,—
The page that bears that is a rare one indeed.

"He's so innate a cockney, that had he been born
Where plain bare-skin's the only full-dress that is worn,
He'd have given his own such an air that you'd say
'T had been made by a tailor to lounge in Broadway.
His nature's a glass of champagne with the foam on't,
As tender as Fletcher, as witty as Beaumont;
So his best things are done in the flush of the moment;
If he wait, all is spoiled; he may stir it and shake it,
But, the fixed air once gone, he can never remake it.
He might be a marvel of easy delightfulness,
If he would not sometimes leave the *r* out of sprightfulness;
And he ought to let Scripture alone—'tis self-slaughter,
For nobody likes inspiration-and-water.
He'd have been just the fellow to sup at the Mermaid,
Cracking jokes at rare Ben, with an eye to the barmaid,
His wit running up as Canary ran down,—
The topmost bright bubble on the wave of The Town. . . .

134. A l'Abri—*Al' Abri; or, The Tent Pitch'd,* a book by Willis published in 1839. **141. cockney**—city-dweller. **146. Fletcher . . . Beaumont**—Francis Beaumont (1586-1615), and John Fletcher (1579-1625), the celebrated collaborators in drama. **152. Scripture**—Willis wrote a number of "elegant" poetical paraphrases of Bible stories, of which "Absalom" is characteristic. **154. Mermaid**—the tavern celebrated in Keats's famous poem, "Lines on the Mermaid Tavern." **155. rare Ben**—Ben Jonson (1574-1637), English dramatist, whose epitaph is "O rare Ben Jonson." **156. Canary**—Canary wine, which convention associates with the Mermaid tavern.

"There is Bryant, as quiet, as cool, and as dignified,
As a smooth, silent iceberg, that never is ignified,
Save when by reflection 'tis kindled o' nights
With a semblance of flame by the chill Northern Lights.
He may rank (Griswold says so) first bard of your nation,
(There's no doubt that he stands in supreme iceolation),
Your topmost Parnassus he may set his heel on,
But no warm applauses come, peal following peal on,—
He's too smooth and too polished to hang any zeal on:
Unqualified merits, I'll grant, if you choose, he has 'em,
But he lacks the one merit of kindling enthusiasm;
If he stir you at all, it is just, on my soul,
Like being stirred up with the very North Pole.

"He is very nice reading in summer, but *inter*
Nos, we don't want *extra* freezing in winter;
Take him up in the depth of July, my advice is,
When you feel an Egyptian devotion to ices,
But, deduct all you can, there's enough that's right good in him,
He has a true soul for field, river, and wood in him;
And his heart, in the midst of brick walls, or where'er it is,
Glows, softens, and thrills with the tenderest charities—
To you mortals that delve in this trade-ridden planet?
No, to old Berkshire's hills, with their limestone and granite.
If you're one who *in loco* (add *foco* here) *desipis,*
You will get of his outermost heart (as I guess) a piece;
But you'd get deeper down if you came as a precipice,
And would break the last seal of its inwardest fountain,
If you only could palm yourself off for a mountain.
Mr. Quivis, or somebody quite as discerning,
Some scholar who's hourly expecting his learning,
Calls B. the American Wordsworth; but Wordsworth
May be rated at more than your whole tuneful herd's worth.
No, don't be absurd, he's an excellent Bryant;
But, my friends, you'll endanger the life of your client,
By attempting to stretch him up into a giant:
If you choose to compare him, I think there are two persons fit for a parallel—Thompson and Cowper;

162. Griswold—Rufus Wilmot Griswold (1815-1857), who leads the poets up to Apollo; noted as an anthologist and editor. **164. Parnassus**—a mountain in Greece sacred to the muses and Apollo. **171-172. inter Nos**—among ourselves. **174. ices**—a pun on Isis, the chief goddess of the ancient Egyptians. **180. Berkshire's hills**—The Berkshire hills are in Massachusetts and Connecticut. **181. in . . . desipis**—The play on words is somewhat complicated. The original Latin phrase is *in loco desipis*—you can be foolish in a particular place. *In foco* adds the meaning: at one's own fireside, but the Locofoco party is the occasion of the jingle. The Locofocos, or radical wing of the Democratic party, held a convention in Tammany Hall, New York City, in 1842, and, when the lights were put out, continued their convention by the aid of the newly invented locofoco matches. **186. Quivis**—Anybody. **190. he**—refers to Bryant. **194. Thompson and Cowper**—James Thomson—though Lowell has Thompson—(1700-1748), author of *The Seasons;* William Cowper (1731-1800), author of *The Task*. Lowell appends the following rhymed note:

To demonstrate quickly and easily how perversely absurd 'tis to sound this name *Cowper,*
As people in general call him named *super,*
I remark that he rhymes it himself with horse-trooper.—

I don't mean exactly,—there's something of each,
There's T.'s love of nature, C.'s penchant to preach;
Just mix up their minds so that C.'s spice of craziness
Shall balance and neutralize T.'s turn for laziness,
And it gives you a brain cool, quite frictionless, quiet,
Whose internal police nips the buds of all riot,—
A brain like a permanent strait-jacket put on
The heart which strives vainly to burst off a button,—
A brain which, without being slow or mechanic,
Does more than a larger less drilled, more volcanic;
He's a Cowper condensed, with no craziness bitten,
And the advantage that Wordsworth before him had written.

"But, my dear little bardlings, don't prick up your ears
Nor suppose I would rank you and Bryant as peers;
If I call him an iceberg, I don't mean to say
There is nothing in that which is grand in its way;
He is almost the one of your poets that knows
How much grace, strength, and dignity lie in Repose;
If he sometimes fall short, he is too wise to mar
His thought's modest fulness by going too far;
'Twould be well if your authors should all make a trial
Of what virtue there is in severe self-denial,
And measure their writings by Hesiod's staff,
Which teaches that all has less value than half.

"There is Whittier, whose swelling and vehement heart
Strains the strait-breasted drab of the Quaker apart,
And reveals the live Man, still supreme and erect,
Underneath the bemummying wrappers of sect;
There was ne'er a man born who had more of the swing
Of the true lyric bard and all that kind of thing;
And his failures arise (though he seems not to know it)
From the very same cause that has made him a poet,—
A fervor of mind which knows no separation
'Twixt simple excitement and pure inspiration,
As my Pythoness erst sometimes erred from not knowing
If 'twere I or mere wind through her tripod was blowing;
Let his mind once get head in its favorite direction
And the torrent of verse bursts the dams of reflection,
While, borne with the rush of the metre along,
The poet may chance to go right or go wrong,
Content with the whirl and delirium of song;
Then his grammar's not always correct, nor his rhymes,
And he's prone to repeat his own lyrics sometimes,
Not his best, though, for those are struck off at white-heats
When the heart in his breast like a trip-hammer beats,

197. craziness—Cowper suffered most of his life from fits of melancholia. **198. laziness**—Thomson was by repute the laziest poet in English literature. **217. Hesiod's**—(eighth century B.C.) the earliest Greek didactic poet. **229. Pythoness**—the priestess who gave forth the oracles of Apollo at Delphi. **239. trip-hammer**—a machine hammer, operated by a tripping device which raises and drops it.

And can ne'er be repeated again any more
Than they could have been carefully plotted before:
Like old what's-his-name there at the battle of Hastings
(Who, however, gave more than mere rhythmical bastings),
Our Quaker leads off metaphorical fights
For reform and whatever they call human rights,
Both singing and striking in front of the war,
And hitting his foes with the mallet of Thor;
Anne haec, one exclaims, on beholding his knocks,
Vestis filii tui, O, leather-clad Fox?
Can that be thy son, in the battle's mid din,
Preaching brotherly love and then driving it in
To the brain of the tough old Goliath of sin,
With the smoothest of pebbles from Castaly's spring,
Impressed on his hard moral sense with a sling?

"All honor and praise to the right-hearted bard
Who was true to The Voice when such service was hard,
Who himself was so free he dared sing for the slave
When to look but a protest in silence was brave;
All honor and praise to the women and men
Who spoke out for the dumb and the down-trodden then!
I need not to name them, already for each
I see History preparing the statue and niche;
They were harsh, but shall *you* be so shocked at hard words
Who have beaten your pruning-hooks up into swords,
Whose rewards and hurrahs men are surer to gain
By the reaping of men and of women than grain?
Why should *you* stand aghast at their fierce wordy war, if
You scalp one another for Bank or for Tariff?
Your calling them cut-throats and knaves all day long
Don't prove that the use of hard language is wrong;
While the World's heart beats quicker to think of such men
As signed Tyranny's doom with a bloody steel-pen,
While on Fourth-of-Julys beardless orators fright one
With hints at Harmodius and Aristogeiton,
You need not look shy at your sisters and brothers
Who stab with sharp words for the freedom of others;—
No, a wreath, twine a wreath for the loyal and true
Who, for sake of the many, dared stand with the few,

242. what's-his-name—Taillefer, a Norman minstrel, who rode into battle at Hastings singing of Roland. **247. mallet of Thor**—Mjollnir, the magic hammer of the Norse war god, which returned to his hand after he had thrown it. **248-249. Anne . . . tui**—Is this indeed the dress of thy son? Gen. 37: 32, in the Latin version. **249. leather-clad Fox**—George Fox (1624-1691), the founder of the Quakers, traditionally supposed to have worn leather breeches. **252. Goliath**—*Cf.* I Sam. 17. **253. Castaly's spring**—Castalia was a spring on Mount Parnassus sacred to Apollo and the Muses. **264. pruning-hooks . . . swords**—*Cf.* Joel 3: 10. **268. Bank . . . Tariff**—The question of the constitutionality of the United States Bank agitated the country throughout the first part of the nineteenth century. The tariff question was one of the sore points between the industrial North and the cotton-growing South. **274. Harmodius . . . Aristogeiton**—classic examples of tyrannicides, who killed Hipparchus, tyrant of Athens, in the sixth century B C., and were themselves slain.

Not of blood-spattered laurel for enemies braved,
But of broad, peaceful oak-leaves for citizens saved! . . .

"There is Hawthorne, with genius so shrinking and rare
That you hardly at first see the strength that is there;
A frame so robust, with a nature so sweet,
So earnest, so graceful, so solid, so fleet,
Is worth a descent from Olympus to meet;
'Tis as if a rough oak that for ages had stood,
With his gnarled bony branches like ribs of the wood,
Should bloom, after cycles of struggle and scathe,
With a single anemone trembly and rathe;
His strength is so tender, his wildness so meek,
That a suitable parallel sets one to seek,—
He's a John Bunyan Fouqué, a Puritan Tieck;
When Nature was shaping him, clay was not granted
For making so full-sized a man as she wanted,
So, to fill out her model, a little she spared
From some finer-grained stuff for a woman prepared,
And she could not have hit a more excellent plan
For making him fully and perfectly man.
The success of her scheme gave her so much delight,
That she tried it again, shortly after, in Dwight;
Only, while she was kneading and shaping the clay,
She sang to her work in her sweet childish way,
And found, when she'd put the last touch to his soul,
That the music had somehow got mixed with the whole.

"Here's Cooper, who's written six volumes to show
He's as good as a lord: well, let's grant that he's so;
If a person prefer that description of praise,
Why, a coronet's certainly cheaper than bays;
But he need take no pains to convince us he's not
(As his enemies say) the American Scott.
Choose any twelve men, and let C. read aloud
That one of his novels of which he's most proud,
And I'd lay any bet that, without ever quitting
Their box, they'd be all, to a man, for acquitting.
He has drawn you one character, though, that is new,
One wildflower he's plucked that is wet with the dew
Of this fresh Western world, and, the thing not to mince,
He has done naught but copy it ill ever since;
His Indians, with proper respect be it said,
Are just Natty Bumppo daubed over with red,
And his very Long Toms are the same useful Nat,
Rigged up in duck pants and a sou'-wester hat,

279-280. laurel . . . oak-leaves—The antithesis is between the laurel crown given victors in classical times, and the wreath of oak leaves intended to commemorate civic virtue. **289. rathe**—early. **292. John . . . Tieck**—John Bunyan (1628-1688), the author of *The Pilgrim's Progress;* Baron de la Motte Fouqué (1777-1843), German romanticist, author of the fantastic romance *Undine;* Ludwig Tieck (1773-1853), one of the principal leaders in the first German romantic school. **300. Dwight**—John Sullivan Dwight (1813-1893), Boston writer on music. **308. bays**—which crown a poet. **321. Long Toms**—Long Tom Coffin, the type of American sailor in *The Pilot* (1823).

(Though once in a Coffin, a good chance was found
To have slipt the old fellow away underground).
All his other men-figures are clothes upon sticks,
The *dernière chemise* of a man in a fix,
(As a captain besieged, when his garrison's small,
Sets up caps upon poles to be seen o'er the wall);
And the women he draws from one model don't vary,
All sappy as maples and flat as a prairie.
When a character's wanted, he goes to the task
As a cooper would do in composing a cask;
He picks out the staves, of their qualities heedful,
Just hoops them together as tight as is needful,
And, if the best fortune should crown the attempt, he
Has made at the most something wooden and empty.

"Don't suppose I would underrate Cooper's abilities;
If I thought you'd do that, I should feel very ill at ease;
The men who have given to *one* character life
And objective existence are not very rife;
You may number them all, both prose-writers and singers,
Without overrunning the bounds of your fingers,
And Natty won't go to oblivion quicker
Than Adams the parson or Primrose the vicar.

"There is one thing in Cooper I like, too, and that is
That on manners he lectures his countrymen gratis,
Not precisely so either, because, for a rarity,
He is paid for his tickets in unpopularity.
Now he may overcharge his American pictures,
But you'll grant there's a good deal of truth in his strictures;
And I honor the man who is willing to sink
Half his present repute for the freedom to think,
And, when he has thought, be his cause strong or weak,
Will risk t'other half for the freedom to speak,
Caring naught for what vengeance the mob has in store,
Let that mob be the upper ten thousand or lower.

"There are truths you Americans need to be told,
And it never'll refute them to swagger and scold;
John Bull, looking o'er the Atlantic, in choler
At your aptness for trade, says you worship the dollar;
But to scorn such eye-dollar-try's what very few do,
And John goes to that church as often as you do.
No matter what John says, don't try to outcrow him,
'Tis enough to go quietly on and outgrow him;
Like most fathers, Bull hates to see Number One
Displacing himself in the mind of his son,
And detests the same faults in himself he'd neglected
When he sees them again in his child's glass reflected;

326. dernière chemise—last shirt. **344. Adams . . . Primrose**—Parson Adams, one of the principal characters in Fielding's *Joseph Andrews*, Mr. Primrose, the leading character in Goldsmith's *The Vicar of Wakefield*. **361. eye-dollar-try's**—The pun is on "idolatry."

To love one another you're too like by half.
If he is a bull, you're a pretty stout calf,
And tear your own pasture for naught but to show
What a nice pair of horns you're beginning to grow.

"There are one or two things I should just like to hint,
For you don't often get the truth told you in print;
The most of you (this is what strikes all beholders)
Have a mental and physical stoop in the shoulders;
Though you ought to be free as the winds and the waves,
You've the gait and the manners of run-away slaves;
Though you brag of your New World, you don't half believe in it,
And as much of the Old as is possible weave in it;
Your goddess of freedom, a tight, buxom girl,
With lips like a cherry and teeth like a pearl,
With eyes bold as Herë's, and hair floating free,
And full of the sun as the spray of the sea,
Who can sing at a husking or romp at a shearing,
Who can trip through the forests alone without fearing,
Who can drive home the cows with a song through the grass,
Keeps glancing aside into Europe's cracked glass,
Hides her red hands in gloves, pinches up her lithe waist,
And makes herself wretched with transmarine taste;
She loses her fresh country charm when she takes
Any mirror except her own rivers and lakes.

"You steal Englishmen's books and think Englishmen's thought,
With their salt on her tail your wild eagle is caught;
Your literature suits its each whisper and motion
To what will be thought of it over the ocean;
The cast clothes of Europe your statesmanship tries
And mumbles again the old blarneys and lies;—
Forget Europe wholly, your veins throb with blood,
To which the dull current in hers is but mud;
Let her sneer, let her say your experiment fails,
In her voice there's a tremble e'en now while she rails,
And your shore will soon be in the nature of things
Covered thick with gilt driftwood of castaway kings,
Where alone, as it were in a Longfellow's Waif
Her fugitive pieces will find themselves safe.
O my friends, thank your God, if you have one, that he
'Twixt the Old World and you set the gulf of a sea;
Be strong-backed, brown-handed, upright as your pines,
By the scale of a hemisphere shape your designs,
Be true to yourselves and this new nineteenth age,
As a statue by Powers, or a picture by Page,

383. Herë—Hera, the wife of Zeus. **393. steal**—In the absence of an international copyright law when this poem was written, English books were reprinted in the United States without the payment of royalties to their authors. **405. Waif**—The reference is to a poetical anthology by this title edited by Longfellow in 1845 [1844]. **412. Powers**—Hiram Powers (1805-1873), American sculptor, famous for his statue of "The Greek Slave." **412. Page**—William Page (1811-1885), American painter, to whom Lowell dedicated his first collection of *Poems*.

Plow, sail, forge, build, carve, paint, all things make new,
To your own New-World instincts contrive to be true,
Keep your ears open wide to the Future's first call,
Be whatever you will, but yourselves first of all,
Stand fronting the dawn on Toil's heaven-scaling peaks,
And become my new race of more practical Greeks.—
Hem! your likeness at present, I shudder to tell o't,
Is that you have your slaves, and the Greek had his helot." . . .

"There comes Poe, with his raven, like Barnaby Rudge,
Three-fifths of him genius and two-fifths sheer fudge,
Who talks like a book of iambs and pentameters,
In a way to make people of common sense damn metres,
Who has written some things quite the best of their kind,
But the heart somehow seems all squeezed out by the mind,
Who—But hey-day! What's this? Messieurs Mathews and Poe,
You mustn't fling mud-balls at Longfellow so,
Does it make a man worse that his character's such
As to make his friends love him (as you think) too much?
Why, there is not a bard at this moment alive
More willing than he that his fellows should thrive;
While you are abusing him thus, even now
He would help either one of you out of a slough;
You may say that he's smooth and all that till you're hoarse,
But remember that elegance also is force;
After polishing granite as much as you will,
The heart keeps its tough old persistency still;
Deduct all you can *that* still keeps you at bay;
Why, he'll live till men weary of Collins and Gray.
I'm not overfond of Greek metres in English,
To me rhyme's a gain, so it be not too jinglish,
And your modern hexameter verses are no more
Like Greek ones than sleek Mr. Pope is like Homer;
As the roar of the sea to the coo of a pigeon is,
So, compared to your moderns, sounds old Melesigenes;
I may be too partial, the reason, perhaps, o't is
That I've heard the old blind man recite his own rhapsodies,
And my ear with that music impregnate may be,
Like the poor exiled shell with the soul of the sea,
Or as one can't bear Strauss when his nature is cloven
To its deeps within deeps by the stroke of Beethoven;
But, set that aside, and 'tis truth that I speak,
Had Theocritus written in English, not Greek,

420. helot—a serf in classical Sparta. **421. Barnaby Rudge**—The central figure of Dickens's novel *Barnaby Rudge* has a raven. **427. Mathews**—Cornelius Mathews (1817-1889), editor and magazine writer. For a specimen of Poe's accusations against Longfellow see his article "Mr. Longfellow and Other Plagiarists." **440. Collins and Gray**—William Collins (1721-1759), author of "Ode to Evening"; Thomas Gray (1716-1771), author of the famous "Elegy in a Country Churchyard." **441. metres**—The hexameter line of *Evangeline* occasioned considerable debate among critics. **444. Pope**—Pope's translation of the Iliad was characterized by Richard Bentley as "A very pretty poem, Mr. Pope, but not Homer." **446. Melesigenes**—Melos-born, meaning Homer. **451. Strauss**—Johann Strauss (1804-1849), famous for his waltzes. **452. Beethoven**—Ludwig van Beethoven (1770-1827), one of the titans of music. **454. Theocritus**—Theocritus, Greek poet of the third century B.C., who wrote pastoral poetry.

I believe that his exquisite sense would scarce change a line
In that rare, tender, virgin-like pastoral Evangeline.
That's not ancient nor modern, its place is apart
Where time has no sway, in the realm of pure Art,
'Tis a shrine of retreat from Earth's hubbub and strife
As quiet and chaste as the author's own life. . . .

"What! Irving? thrice welcome, warm heart and fine brain,
You bring back the happiest spirit from Spain,
And the gravest sweet humor, that ever were there
Since Cervantes met death in his gentle despair;
Nay, don't be embarrassed, nor look so beseeching,
I sha'n't run directly against my own preaching,
And, having just laughed at their Raphaels and Dantes,
Go to setting you up beside matchless Cervantes;
But allow me to speak what I honestly feel,—
To a true poet-heart add the fun of Dick Steele,
Throw in all of Addison, *minus* the chill,
With the whole of that partnership's stock and good-will,
Mix well, and while stirring, hum o'er, as a spell,
The fine *old* English Gentleman, simmer it well,
Sweeten just to your own private liking, then strain,
That only the finest and clearest remain,
Let it stand out of doors till a soul it receives
From the warm lazy sun loitering down through green leaves,
And you'll find a choice nature, not wholly deserving
A name either English or Yankee,—just Irving. . . .

Here, "Forgive me, Apollo," I cried, "while I pour
My heart out to my birthplace: O loved more and more,
Dear Baystate, from whose rocky bosoms thy sons
Should suck milk, strong-will-giving, brave, such as runs
In the veins of old Graylock—who is it that dares
Call thee pedler, a soul wrapped in bank-books and shares?
It is false! She's a Poet! I see, as I write,
Along the far railroad the steam-snake glide white,
The cataract-throb of her mill-hearts I hear,
The swift strokes of trip-hammers weary my ear,
Sledges ring upon anvils, through logs the saw screams,
Blocks swing to their place, beetles drive home the beams:—
It is songs such as these that she croons to the din
Of her fast-flying shuttles, year out and year in,
While from earth's farthest corner there comes not a breeze
But wafts her the buzz of her gold-gleaning bees:

462. Spain—Irving returned from his post as American minister to Spain in 1846. **464. Cervantes**—(1547-1616) the author of *Don Quixote*. He died a Franciscan monk. **467. Raphaels**—Raphael Sanzio (1483-1520), Italian painter. **467. Dantes**—Dante Alighieri (1265-1321), author of the *Divine Comedy*. **470. Steele**—Richard Steele (1672-1729) with Joseph Addison—line 471—(1672-1719), the author of *The Spectator*. **474. English Gentleman**—The reference is to Irving's essay on this theme. **485. Graylock**—a mountain in Massachusetts. **492. beetles**—A beetle is an instrument or machine for driving down piles, stones, and so forth. **494. shuttles**—The references are to the growth of the textile industry in Massachusetts.

What though those horn hands have as yet found small time
For painting and sculpture and music and rhyme?
These will come in due order; the need that pressed sorest
Was to vanquish the seasons, the ocean, the forest,
To bridle and harness the rivers, the steam,
Making those whirl her mill-wheels, this tug in her team,
To vassalize old tyrant Winter, and make
Him delve surlily for her on river and lake;—
When this New World was parted, she strove not to shirk
Her lot in the heirdom, the tough, silent Work,
The hero-share ever, from Herakles down
To Odin, the Earth's iron sceptre and crown:
Yes, thou dear, noble Mother! if ever men's praise
Could be claimed for creating heroical lays,
Thou hast won it; if ever the laurel divine
Crowned the Maker and Builder, that glory is thine!
Thy songs are right epic, they tell how this rude
Rock-rib of our earth here was tamed and subdued;
Thou hast written them plain on the face of the planet
In brave, deathless letters of iron and granite;
Thou hast printed them deep for all time; they are set
From the same runic type-fount and alphabet
With thy stout Berkshire hills and the arms of thy Bay,—
They are staves from the burly old Mayflower lay.
If the drones of the Old World, in querulous ease,
Ask thy Art and thy Letters, point proudly to these,
Or, if they deny these are Letters and Art,
Toil on with the same old invincible heart;
Thou art rearing the pedestal broad-based and grand
Whereon the fair shapes of the Artist shall stand,
And creating, through labors undaunted and long,
The theme for all Sculpture and Painting and Song!

"But my good mother Baystate wants no praise of mine,
She learned from *her* mother a precept divine
About something that butters no parsnips, her *forte*
In another direction lies, work is her sport
(Though she'll curtsy and set her cap straight, that she will,
If you talk about Plymouth and red Bunker's hill).
Dear, notable goodwife! by this time of night,
Her hearth is swept neatly, her fire burning bright,
And she sits in a chair (of home plan and make) rocking,
Musing much, all the while, as she darns on a stocking,
Whether turkeys will come pretty high next Thanksgiving,
Whether flour'll be so dear, for, as sure as she's living,
She will use rye-and-injun then, whether the pig
By this time ain't got pretty tolerable big,

497. **horn**—horny. 507. **Herakles**—Hercules, whose twelve labors form an important part of Greek mythology. 508. **Odin**—the father of the gods in Norse mythology. Lowell glances indirectly at Carlyle's *Heroes and Hero-Worship* (1841) in this passage. 518. **runic**—here used in the sense of rude, original. 541. **rye-and-injun**—rye flour and cornmeal, mixed, as a cheap substitute for wheat flour.

And whether to sell it outright will be best,
Or to smoke hams and shoulders and salt down the rest,—
At this minute she'd swop all my verses, ah, cruel!
For the last patent stove that is saving of fuel;
So I'll just let Apollo go on, for his phiz
Shows I've kept him awaiting too long as it is." . . .

"There's Holmes, who is matchless among you for wit;
A Leyden-jar always full-charged, from which flit
The electrical tingles of hit after hit;
In long poems 'tis painful sometimes, and invites
A thought of the way the new Telegraph writes,
Which pricks down its little sharp sentences spitefully
As if you got more than you'd title to rightfully,
And you find yourself hoping its wild father Lightning
Would flame in for a second and give you a fright'ning.
He has perfect sway of what *I* call a sham metre,
But many admire it, the English pentameter,
And Campbell, I think, wrote most commonly worse,
With less nerve, swing, and fire in the same kind of verse,
Nor e'er achieved aught in't so worthy of praise
As the tribute of Holmes to the grand *Marseillaise*.
You went crazy last year over Bulwer's New Timon;—
Why, if B. to the day of his dying, should rhyme on,
Heaping verses on verses and tomes upon tomes,
He could ne'er reach the best point and vigor of Holmes.
His are just the fine hands, too, to weave you a lyric
Full of fancy, fun, feeling, or spiced with satiric
In a measure so kindly, you doubt if the toes
That are trodden upon are your own or your foes'.

"There is Lowell, who's striving Parnassus to climb
With a whole bale of *isms* tied together with rhyme,
He might get on alone, spite of brambles and boulders,
But he can't with that bundle he has on his shoulders,
The top of the hill he will ne'er come nigh reaching
Till he learns the distinction 'twixt singing and preaching;
His lyre has some chords that would ring pretty well,
But he'd rather by half make a drum of the shell,
And rattle away till he's old as Methusalem,
At the head of a march to the last new Jerusalem." . . .

550. Leyden-jar—a glass jar which condenses electricity and is capable of giving out strong shocks. **553. new Telegraph**—The Morse code (dot-dash system) was just replacing the older recording systems in the telegraph world. **560. Campbell**—Thomas Campbell (1777-1844), British poet. **563. tribute**—The reference is to a passage in sec. II of *Poetry: A Metrical Essay*, Holmes's Phi Beta Kappa poem of 1836. **564. Bulwer's . . . Timon**—Bulwer-Lytton's *The New Timon*, a satirical poem, appeared in 1846. **580. Methusalem**—*Cf.* Gen. 5: 27.

THE BIGLOW PAPERS

SECOND SERIES

THE COURTIN'

As before indicated, the first version of this poem originally appeared among the "Notices of an Independent Press" in the first series of *The Biglow Papers.* According to Lowell's story, he originally wrote the version in question to fill in a blank page in the book. Readers commenced to demand the rest of the poem, and in a later edition of *The Biglow Papers, First Series,* he added more stanzas. The full and final version of the poem seems to have been prepared originally as an "autograph" for the Baltimore Sanitary Commission Fair, and was first published at the end of the Introduction to the second series of *The Biglow Papers.*

God makes sech nights, all white an' still
  Fur'z you can look or listen,
Moonshine an' snow on field an' hill,
  All silence an' all glisten.

Zekle crep' up quite unbeknown
  An' peeked in thru' the winder,
An' there sot Huldy all alone,
  'ith no one nigh to hender.

A fireplace filled the room's one side
  With half a cord o' wood in—
There warn't no stoves (tell comfort died)
  To bake ye to a puddin'.

The wa'nut logs shot sparkles out
  Towards the pootiest, bless her,
An' leetle flames danced all about
  The chiny on the dresser.

Agin the chimbley crook-necks hung,
  An' in amongst 'em rusted
The ole queen's-arm thet gran'ther Young
  Fetched back f'om Concord busted.

The very room, coz she was in,
  Seemed warm f'om floor to ceilin',
An' she looked full ez rosy agin
  Ez the apples she was peelin'.

'Twas kin' o' kingdom-come to look
  On sech a blessed cretur,
A dogrose blushin' to a brook
  Ain't modester nor sweeter.

19. queen's-arm—musket.

He was six foot o' man, A 1,
  Clear grit an' human natur'
None couldn't quicker pitch a ton
  Nor dror a furrer straighter.

He'd sparked it with full twenty gals,
  Hed squired 'em, danced 'em, druv 'em,
Fust this one, an' then thet, by spells—
  All is, he couldn't love 'em.

But long o' her his veins 'ould run
  All crinkly like curled maple,
The side she breshed felt full o' sun
  Ez a south slope in Ap'il.

She thought no v'ice hed sech a swing
  Ez hisn in the choir;
My! when he made Ole Hunderd ring,
  She *knowed* the Lord was nigher.

An' she'd blush scarlit, right in prayer,
  When her new meetin'-bunnet
Felt somehow thru' its crown a pair
  O' blue eyes sot upun it.

Thet night, I tell ye, she looked *somel*
  She seemed to 've gut a new soul,
For she felt sartin-sure he'd come,
  Down to her very shoe-sole.

She heered a foot, an' knowed it tu,
  A-raspin' on the scraper,—
All ways to once her feelins flew
  Like sparks in burnt-up paper.

He kin' o' l'itered on the mat,
  Some doubtfle o' the sekle,
His heart kep' goin' pity-pat,
  But hern went pity Zekle.

An' yit she gin her cheer a jerk
  Ez though she wished him furder,
An' on her apples kep' to work,
  Parin' away like murder.

"You want to see my Pa, I s'pose?"
  "Wal . . . no . . . I come dasignin' "—
"To see my Ma? She's sprinklin' clo'es
  Agin to-morrer's i'nin'."

31. a ton—of hay. **43. Ole Hunderd**—Old Hundred: "Praise God from whom all blessings flow," so called because it was once sung in connection with Ps. 100.

To say why gals acts so or so,
  Or don't, 'ould be persumin';
Mebby to mean *yes* an' say *no*
  Comes nateral to women.

He stood a spell on one foot fust,
  Then stood a spell on t'other,
An' on which one he felt the wust
  He couldn't ha' told ye nuther.

Says he, "I'd better call agin;"
  Says she, "Think likely, Mister:"
Thet last word pricked him like a pin,
  An' . . . Wal, he up an' kist her.

When Ma bimeby upon 'em slips,
  Huldy sot pale ez ashes,
All kin' o' smily roun' the lips
  An' teary roun' the lashes.

For she was jes' the quiet kind
  Whose naturs never vary,
Like streams that keep a summer mind
  Snowhid in Jenooary.

The blood clost roun' her heart felt glued
  Too tight for all expressin',
Tell mother see how metters stood,
  An' gin 'em both her blessin'.

Then her red come back like the tide
  Down to the Bay o' Fundy,
An' all I know is they was cried
  In meetin' come nex' Sunday.

NO. VI.

SUNTHIN' IN THE PASTORAL LINE

This poem was first printed in the *Atlantic Monthly,* June, 1862, and then in the second series of *The Biglow Papers.* A prose introduction by the learned Parson Wilbur is here omitted.

Once git a smell o' musk into a draw,
An' it clings hold like precerdents in law:
Your gra'ma'am put it there,—when, goodness knows,—
To jes' this-worldify her Sunday-clo'es;
But the old chist wun't sarve her gran'son's wife
(For, 'thout new funnitoor, wut good in life?),

93-94. tide . . . Fundy—A huge tide sweeps the Bay of Fundy. **95. cried**—the banns were cried. **1. draw**—drawer.

An' so ole clawfoot, from the precinks dread
O' the spare chamber, slinks into the shed,
Where, dim with dust, it fust or last subsides
To holdin' seeds an' fifty things besides;
But better days stick fast in heart an' husk,
An' all you keep in't gits a scent o' musk.

Jes' so with poets: wut they've airly read
Gits kind o' worked into their heart an' head,
So's 't they can't seem to write but jest on sheers
With furrin countries or played-out ideers,
Nor hev a feelin', ef it doosn't smack
O' wut some critter chose to feel 'way back:
This makes 'em talk o' daisies, larks, an' things,
Ez though we'd nothin' here that blows an' sings
(Why, I'd give more for one live bobolink
Than a square mile o' larks in printer's ink),—
This makes 'em think our fust o' May is May,
Which 'tain't, for all the almanicks can say.

O little city-gals, don't never go it
Blind on the word o' noospaper or poet!
They're apt to puff, an' May-day seldom looks
Up in the country ez 't doos in books;
They're no more like than hornets'-nests an' hives,
Or printed sarmons be to holy lives.
I with my trouses perched on cowhide boots,
Tuggin' my foundered feet out by the roots,
Hev seen ye come to fling on April's hearse
Your muslin nosegays from the milliner's,
Puzzlin' to find dry ground your queen to choose,
An' dance your throats sore in morocker shoes:
I've seen ye an' felt proud, thet, come wut would,
Our Pilgrim stock wuz pethed with hardihood.
Pleasure doos make us Yankees kind o' winch,
Ez though 'twuz sunthin' paid for by the inch;
But yit we du contrive to worry thru,
Ef Dooty tells us thet the thing's to du,
An' kerry a hollerday, ef we set out,
Ez stiddily ez though 'twuz a redoubt.

I, country-born an' bred, know where to find
Some blooms thet make the season suit the mind,
An' seem to metch the doubtin' bluebird's notes,—
Half-vent'rin' liverworts in furry coats,
Bloodroots, whose rolled-up leaves ef you oncurl,
Each on 'em's cradle to a baby-pearl,—
But these are jes' Spring's pickets; sure ez sin,
The rebble frosts'll try to drive 'em in;
For half our May's so awfully like Mayn't,
'twould rile a Shaker or an evrige saint;

38. **pethed**—pithed, given force and strength. 39. **winch**—wince. 54. **Shaker**—a follower of Ann Lee, who taught the immediacy of the second coming of Christ.

Though I own up I like our back'ard springs
Thet kind o' haggle with their greens an' things,
An' when you 'most give up, 'uthout more words
Toss the fields full o' blossoms, leaves, an' birds:
Thet's Northun natur', slow an' apt to doubt,
But when it *does* git stirred, ther' 's no gin-out!

Fust come the blackbirds clatt'rin' in tall trees,
An' settlin' things in windy Congresses,—
Queer politicians, though, for I'll be skinned
Ef all on 'em don't head aginst the wind.
'fore long the trees begin to show belief,—
The maple crimsons to a coral-reef,
Then saffern swarms swing off from all the willers
So plump they look like yaller caterpillars,
Then gray hossches'nuts leetle hands unfold
Softer'n a baby's be at three days old:
Thet's robin-redbreast's almanick; he knows
Thet arter this ther' 's only blossom-snows;
So, choosin' out a handy crotch an' spouse,
He goes to plast'rin' his adobë house.

Then seems to come a hitch,—things lag behind,
Till some fine mornin' Spring makes up her mind,
An' ez, when snow-swelled rivers cresh their dams
Heaped-up with ice thet dovetails in an' jams,
A leak comes spirtin' thru some pin-hole cleft,
Grows stronger, fercer, tears out right an' left,
Then all the waters bow themselves an' come,
Suddin, in one gret slope o' shedderin' foam,
Jes' so our Spring gits everythin' in tune
An' gives one leap from Aperl into June:
Then all comes crowdin' in; afore you think,
Young oak-leaves mist the side-hill woods with pink;
The catbird in the laylock-bush is loud;
The orchards turn to heaps o' rosy cloud;
Red-cedars blossom tu, though few folks know it,
An' look all dipt in sunshine like a poet;
The lime-trees pile their solid stacks o' shade
An' drows'ly simmer with the bees' sweet trade;
In ellum-shrouds the flashin' hangbird clings
An' for the summer vy'ge his hammock slings;
All down the loose-walled lanes in archin' bowers
The barb'ry droops its strings o' golden flowers,
Whose shrinkin' hearts the school-gals love to try
With pins,—they'll worry yourn so, boys, bimeby!
But I don't love your cat'logue style,—do you?—
Ez ef to sell off Natur' by vendoo;
One word with blood in't 's twice ez good ez two:

60. **gin-out**—giving out. 87. **laylock**—lilac. 93. **hangbird**—oriole. 100. **vendoo**—vendue, legal term for public sale.

'nuff sed, June's bridesman, poet o' the year,
Gladness on wings, the bobolink, is here;
Half-hid in tip-top apple-blooms he swings,
Or climbs aginst the breeze with quiverin' wings,
Or, givin' way to't in a mock despair,
Runs down, a brook o' laughter, thru the air.

I ollus feel the sap start in my veins
In Spring, with curus heats an' prickly pains,
Thet drive me, when I git a chance, to walk
Off by myself to hev a privit talk
With a queer critter thet can't seem to 'gree
Along o' me like most folks,—Mister Me.
Ther' 's times when I'm unsoshle ez a stone,
An' sort o' suffercate to be alone,—
I'm crowded jes' to think thet folks are nigh,
An' can't bear nothin' closer than the sky;
Now the wind's full ez shifty in the mind
Ez wut it is ou'-doors, ef I ain't blind,
An' sometimes, in the fairest sou'west weather,
My innard vane points east for weeks together,
My natur' gits all goose-flesh, an' my sins
Come drizzlin' on my conscience sharp ez pins:
Wal, et sech times I jes' slip out o' sight
An' take it out in a fair stan'-up fight
With the one cuss I can't lay on the shelf,
The crook'dest stick in all the heap,—Myself.

'Twuz so las' Sabbath arter meetin'-time:
Findin' my feelin's wouldn't noways rhyme
With nobody's, but off the hendle flew
An' took things from an east-wind pint o' view,
I started off to lose me in the hills
Where the pines be, up back o' 'Siah's Mills:
Pines, ef you're blue, are the best friends I know,
They mope an' sigh an' sheer your feelin's so,—
They hesh the ground beneath so, tu, I swan,
You half-forgit you've gut a body on.
Ther' 's a small school'us' there where four roads meet
The door-steps hollered out by little feet,
An' side-posts carved with names whose owners grew
To gret men, some on 'em, an' deacons, tu;
'taint used no longer, coz the town hez gut
A high-school, where they teach the Lord knows wut:
Three-story larnin' 's pop'lar now; I guess
We thriv' ez wal on jes' two stories less,
For it strikes me ther' 's sech a thing ez sinnin'
By overloadin' children's underpinnin':
Wal, here it wuz I larned my A B C,
An' it's a kind o' favorite spot with me.

133. 'Siah's Mills—Josiah's(?) Mills: merely a bit of veracious local color.

We're curus critters: Now ain't jes' the minute
Thet ever fits us easy while we're in it;
Long ez 'twuz futur', 'twould be perfect bliss,—
Soon ez it's past, *thet* time's wuth ten o' this;
An' yet there ain't a man thet need be told
Thet Now's the only bird lays eggs o' gold.
A knee-high lad, I used to plot an' plan
An' think 'twuz life's cap-sheaf to be a man;
Now, gittin' gray, there's nothin' I enjoy
Like dreamin' back along into a boy:
So the ole school'us' is a place I choose
Afore all others, ef I want to muse;
I set down where I used to set, an' git
My boyhood back, an' better things with it,—
Faith, Hope, an' sunthin', ef it isn't Cherrity,
It's want o' guile, an' thet's ez gret a rerrity,
While Fancy's cushin', free to Prince and Clown,
Makes the hard bench ez soft ez milk-weed-down.

Now, 'fore I knowed, thet Sabbath arternoon
When I sot out to tramp myself in tune,
I found me in the school'us' on my seat,
Drummin' the march to No-wheres with my feet.
Thinkin' o' nothin', I've heerd ole folks say
Is a hard kind o' dooty in its way:
It's thinkin' everythin' you ever knew,
Or ever hearn, to make your feelin's blue.
I sot there tryin' thet on for a spell:
I thought o' the Rebellion, then o' Hell,
Which some folks tell ye now is jest a metterfor
(A the'ry, p'raps, it wun't *feel* none the better for);
I thought o' Reconstruction, wut we'd win
Patchin' our patent self-blow-up agin:
I thought ef this 'ere milkin' o' the wits,
So much a month, warn't givin' Natur' fits,—
Ef folks warn't druv, findin' their own milk fail,
To work the cow thet hez an iron tail,
An' ef idees 'thout ripenin' in the pan
Would send up cream to humor ary man:
From this to thet I let my worryin' creep,
Till finally I must ha' fell asleep.

Our lives in sleep are some like streams thet glide
'twixt flesh an' sperrit boundin' on each side,
Where both shores' shadders kind o' mix an' mingle
In sunthin' thet ain't jes' like either single;
An' when you cast off moorin's from To-day,
An' down towards To-morrer drift away,
The imiges thet tengle on the stream
Make a new upside-down'ard world o' dream:

157. **cap-sheaf**—top sheaf in a shock.

Sometimes they seem like sunrise-streaks an' warnin's
O' wut'll be in Heaven on Sabbath-mornin's,
An', mixed right in ez ef jest out o' spite,
Sunthin' thet says your supper ain't gone right.
I'm gret on dreams, an' often when I wake,
I've lived so much it makes my mem'ry ache,
An' can't skurce take a cat-nap in my cheer
'thout hevin' 'em, some good, some bad, all queer.

Now I wuz settin' where I'd ben, it seemed,
An' ain't sure yit whether I r'ally dreamed,
Nor, ef I did, how long I might ha' slep',
When I hearn some un stompin' up the step,
An' lookin' round, ef two an' two make four,
I see a Pilgrim Father in the door.
He wore a steeple-hat, tall boots, an' spurs
With rowels to 'em big ez ches'nut-burrs,
An' his gret sword behind him sloped away
Long'z a man's speech thet dunno wut to say.—
"Ef your name's Biglow, an' your given-name
Hosee," sez he, "it's arter you I came;
I'm your gret-gran'ther multiplied by three."—
"My *wut?*" sez I.—"Your gret-gret-gret," sez he:
"You wouldn't ha' never ben here but for me.
Two hundred an' three year ago this May
The ship I come in sailed up Boston Bay;
I'd been a cunnle in our Civil War,—
But wut on airth hev *you* gut up one for?
Coz we du things in England, 'tain't for you
To git a notion you can du 'em tu:
I'm told you write in public prints: ef true,
It's nateral you should know a thing or two."—
"Thet air's an argymunt I can't endorse,—
'twould prove, coz you wear spurs, you kep' a horse:
For brains," sez I, "wutever you may think,
Ain't boun' to cash the drafs o' pen-an'-ink,—
Though mos' folks write ez ef they hoped jes' quickenin'
The churn would argoo skim-milk into thickenin';
But skim-milk ain't a thing to change its view
O' wut it's meant for more'n a smoky flue.
But du pray tell me, 'fore we furder go,
How in all Natur' did you come to know
'bout our affairs," sez I, "in Kingdom-Come?"—
"Wal, I worked round at sperrit-rappin' some,
An' danced the tables till their legs wuz gone,
In hopes o' larnin' wut wuz goin' on,"
Sez he, "but mejums lie so like all-split
Thet I concluded it wuz best to quit.
But, come now, ef you wun't confess to knowin',
You've some conjectures how the thing's a-goin'."—
"Gran'ther," sez I, "a vane warn't never known
Nor asked to hev a jedgment of its own;

An' yit, ef 'tain't gut rusty in the jints,
It's safe to trust its say on certin pints:
It knows the wind's opinions to a T,
An' the wind settles wut the weather'll be."
"I never thought a scion of our stock
Could grow the wood to make a weather-cock;
When I wuz younger'n you, skurce more'n a shaver,
No airthly wind," sez he, "could make me waver!"
(Ez he said this, he clinched his jaw an' forehead,
Hitchin' his belt to bring his sword-hilt forrard.)—
"Jes so it wuz with me," sez I, "I swow,
When *I* wuz younger'n wut you see me now,—
Nothin' from Adam's fall to Huldy's bonnet,
Thet I warn't full-cocked with my jedgment on it;
But now I'm gittin' on in life, I find
It's a sight harder to make up my mind,—
Nor I don't often try tu, when events
Will du it for me free of all expense.
The moral question's ollus plain enough,—
It's jes' the human-natur' side thet's tough;
Wut's best to think mayn't puzzle me nor you,—
The pinch comes in decidin' wut to *du;*
Ef you *read* History, all runs smooth ez grease,
Coz there the men ain't nothin' more'n idees,—
But come to *make* it, ez we must to-day,
Th' idees hev arms an' legs an' stop the way:
It's easy fixin' things in facts an' figgers,—
They can't resist, nor warn't brought up with niggers;
But come to try your the'ry on,—why, then
Your facts an' figgers change to ign'ant men
Actin' ez ugly—" —"Smite 'em hip an' thigh!"
Sez gran'ther, "and let every man-child die!
Oh for three weeks o' Crommle an' the Lord!
Up, Isr'el, to your tents an' grind the sword!"—
"Thet kind o' thing worked wal in ole Judee,
But you forgit how long it's ben A.D.;
You think thet's ellerkence,—I call it shoddy,
A thing," sez I, "wun't cover soul nor body;
I like the plain all-wool o' common-sense,
Thet warms ye now, an' will a twelve-month hence.
You took to follerin' where the Prophets beckoned,
An', fust you knowed on, back come Charles the Second;
Now wut I want's to hev all *we* gain stick,
An' not to start Millennium too quick;
We hain't to punish only, but to keep,
An' the cure's gut to go a cent'ry deep."
"Wall, milk-an'-water ain't the best o' glue,"
Sez he, "an' so you'll find afore you're thru;
Ef reshness venters sunthin', shilly-shally
Loses ez often wut's ten times the vally.

279. **Smite**—*Cf.* Judges 15: 8.

Thet exe of ourn, when Charles's neck gut split,
Opened a gap thet ain't bridged over yit:
Slav'ry's your Charles, the Lord hez gin the exe"—
"Our Charles," sez I, "hez gut eight million necks.
The hardest question ain't the black man's right,
The trouble is to 'mancipate the white;
One's chained in body an' can be sot free,
But t'other's chained in soul to an idee:
It's a long job, but we shall worry thru it;
Ef bagnets fail, the spellin'-book must du it."
"Hosee," sez he, "I think you're goin' to fail:
The rettlesnake ain't dangerous in the tail;
This 'ere rebellion's nothing but the rettle,—
You'll stomp on thet an' think you've won the bettle;
It's Slavery thet's the fangs an' thinkin' head,
An' ef you want selvation, cresh it dead,—
An' cresh it suddin, or you'll larn by waitin'
Thet Chance wun't stop to listen to debatin'!"—
"God's truth!" sez I,—"an' ef *I* held the club,
An' knowed jes' where to strike,—but there's the rub!"—
"Strike soon," sez he, "or you'll be deadly ailin',—
Folks thet's afeared to fail are sure o' failin';
God hates your sneakin' creturs thet believe
He'll settle things they run away an' leave!"
He brought his foot down fercely, ez he spoke,
An' give me sech a startle thet I woke.

ODE RECITED AT THE HARVARD COMMEMORATION

JULY 21, 1865

Written for the public commemoration of the returning soldiers and of the Harvard dead, this poem was privately printed at Cambridge in 1865; it then appeared in the *Atlantic Monthly* for September, 1865; then in *Under the Willows* (1868); and finally in *Three Memorial Poems* (1876). The ninth section was added after magazine publication. Lowell had some difficulty in beginning the poem, but once started, it came in a rush—so much so that in the earliest version some of the lines lacked rhymes. The general form is that irregular "Pindaric" ode which Lowell affected for poems intended for solemn public address.

I

Weak-winged is song,
Nor aims at that clear-ethered height
Whither the brave deed climbs for light:
We seem to do them wrong,
Bringing our robin's-leaf to deck their hearse
Who in warm life-blood wrote their nobler verse,
Our trivial song to honor those who come
With ears attuned to strenuous trump and drum,

308. bagnets—bayonets.

And shaped in squadron-strophes their desire,
Live battle-odes whose lines were steel and fire:
Yet sometimes feathered words are strong,
A gracious memory to buoy up and save
From Lethe's dreamless ooze, the common grave
Of the unventurous throng.

II

To-day our Reverend Mother welcomes back
Her wisest Scholars, those who understood
The deeper teaching of her mystic tome,
And offered their fresh lives to make it good:
No lore of Greece or Rome,
No science peddling with the names of things,
Or reading stars to find inglorious fates,
Can lift our life with wings
Far from Death's idle gulf that for the many waits,
And lengthen out our dates
With that clear fame whose memory sings
In manly hearts to come, and nerves them and dilates:
Nor such thy teaching, Mother of us all!
Not such the trumpet-call
Of thy diviner mood,
That could thy sons entice
From happy homes and toils, the fruitful nest
Of those half-virtues which the world calls best,
Into War's tumult rude;
But rather far that stern device
The sponsors chose that round thy cradle stood
In the dim, unventured wood,
The VERITAS that lurks beneath
The letter's unprolific sheath,
Life of whate'er makes life worth living,
Seed-grain of high emprise, immortal food,
One heavenly thing whereof earth hath the giving.

III

Many loved Truth, and lavished life's best oil
Amid the dust of books to find her,
Content at last, for guerdon of their toil,
With the cast mantle she hath left behind her.
Many in sad faith sought for her,
Many with crossed hands sighed for her;
But these, our brothers, fought for her,
At life's dear peril wrought for her,
So loved her that they died for her,
Tasting the raptured fleetness

15. **Reverend Mother**—Harvard personified as Alma Mater. 37. **Veritas**—Veritas (Truth) is the motto of Harvard. 40. **emprise**—undertaking.

Of her divine completeness:
Their higher instinct knew
Those love her best who to themselves are true,
And what they dare to dream of, dare to do;
They followed her and found her
Where all may hope to find,
Not in the ashes of the burnt-out mind,
But beautiful, with danger's sweetness round her.
Where faith made whole with deed
Breathes its awakening breath
Into the lifeless creed,
They saw her plumed and mailed,
With sweet, stern face unveiled,
And all-repaying eyes, look proud on them in death.

IV

Our slender life runs rippling by, and glides
Into the silent hollow of the past;
What is there that abides
To make the next age better for the last?
Is earth too poor to give us
Something to live for here that shall outlive us?
Some more substantial boon
Than such as flows and ebbs with Fortune's fickle moon?
The little that we see
From doubt is never free;
The little that we do
Is but half-nobly true;
With our laborious hiving
What men call treasure, and the gods call dross,
Life seems a jest of Fate's contriving,
Only secure in every one's conniving,
A long account of nothings paid with loss,
Where we poor puppets, jerked by unseen wires,
After our little hour of strut and rave,
With all our pasteboard passions and desires,
Loves, hates, ambitions, and immortal fires,
Are tossed pell-mell together in the grave.
But stay! no age was e'er degenerate,
Unless men held it at too cheap a rate,
For in our likeness still we shape our fate.
Ah, there is something here
Unfathomed by the cynic's sneer,
Something that gives our feeble light
A high immunity from Night,
Something that leaps life's narrow bars
To claim its birthright with the hosts of heaven;
A seed of sunshine that can leaven
Our earthly dullness with the beams of stars,
And glorify our clay
With light from fountains elder than the Day;
A conscience more divine than we,

A gladness fed with secret tears,
A vexing, forward-reaching sense
Of some more noble permanence;
A light across the sea,
Which haunts the soul and will not let it be,
Still beaconing from the heights of undegenerate years.

V

Whither leads the path
To ampler fates that leads?
Not down through flowery meads,
To reap an aftermath
Of youth's vainglorious weeds,
But up the steep, amid the wrath
And shock of deadly-hostile creeds,
Where the world's best hope and stay
By battle's flashes gropes a desperate way,
And every turf the fierce foot clings to bleeds.
Peace hath her not ignoble wreath
Ere yet the sharp, decisive word
Light the black lips of cannon, and the sword
Dreams in its easeful sheath;
But some day the live coal behind the thought,
Whether from Baäl's stone obscene,
Or from the shrine serene
Of God's pure altar brought,
Bursts up in flame; the war of tongue and pen
Learns with what deadly purpose it was fraught,
And, helpless in the fiery passion caught,
Shakes all the pillared state with shock of men:
Some day the soft Ideal that we wooed
Confronts us fiercely, foe-beset, pursued,
And cries reproachful: "Was it, then, my praise,
And not myself was loved? Prove now thy truth;
I claim of thee the promise of thy youth;
Give me thy life, or cower in empty phrase,
The victim of thy genius, not its mate!"
Life may be given in many ways,
And loyalty to Truth be sealed
As bravely in the closet as the field,
So bountiful is Fate;
But then to stand beside her,
When craven churls deride her,
To front a lie in arms and not to yield,
This shows, methinks, God's plan
And measure of a stalwart man,
Limbed like the old heroic breeds,
Who stands self-poised on manhood's solid earth,
Not forced to frame excuses for his birth,
Fed from within with all the strength he needs.

122-126. live coal . . . flame—*Cf.* I Kings 18.

VI

Such was he, our Martyr-Chief,
Whom late the Nation he had led,
With ashes on her head,
Wept with the passion of an angry grief:
Forgive me, if from present things I turn
To speak what in my heart will beat and burn,
And hang my wreath on his world-honored urn.
Nature, they say, doth dote,
And cannot make a man
Save on some worn-out plan,
Repeating us by rote:
For him her Old-World moulds aside she threw,
And choosing sweet clay from the breast
Of the unexhausted West,
With stuff untainted shaped a hero new,
Wise, steadfast in the strength of God, and true.
How beautiful to see
Once more a shepherd of mankind indeed,
Who loved his charge, but never loved to lead;
One whose meek flock the people joyed to be,
Not lured by any cheat of birth,
But by his clear-grained human worth,
And brave old wisdom of sincerity!
They knew that outward grace is dust;
They could not choose but trust
In that sure-footed mind's unfaltering skill,
And supple-tempered will
That bent like perfect steel to spring again and thrust.
His was no lonely mountain-peak of mind,
Thrusting to thin air o'er our cloudy bars,
A sea-mark now, now lost in vapors blind;
Broad prairie rather, genial, level-lined,
Fruitful and friendly for all human kind,
Yet also nigh to heaven and loved of loftiest stars.
Nothing of Europe here,
Or, then, of Europe fronting mornward still,
Ere any names of Serf and Peer
Could Nature's equal scheme deface
And thwart her genial will;
Here was a type of the true elder race,
And one of Plutarch's men talked with us face to face.
I praise him not; it were too late;
And some innative weakness there must be
In him who condescends to victory
Such as the Present gives, and cannot wait,
Safe in himself as in a fate.
So always firmly he:
He knew to bide his time,

150. Martyr-Chief—Lincoln had been assassinated on April 14. **190. Plutarch's**—Plutarch (first century A.D.), the most celebrated biographer of ancient times, had in his *Lives* celebrated famous and heroic Greeks and Romans. **192. innative**—innate, inborn.

And can his fame abide,
Still patient in his simple faith sublime,
Till the wise years decide.
Great captains, with their guns and drums,
Disturb our judgment for the hour,
But at last silence comes;
These all are gone, and, standing like a tower,
Our children shall behold his fame.
The kindly-earnest, brave, foreseeing man,
Sagacious, patient, dreading praise, not blame,
New birth of our new soil, the first American.

VII

Long as man's hope insatiate can discern
Or only guess some more inspiring goal
Outside of Self, enduring as the pole,
Along whose course the flying axles burn
Of spirits bravely-pitched, earth's manlier brood;
Long as below we cannot find
The meed that stills the inexorable mind;
So long this faith to some ideal Good,
Under whatever mortal names it masks,
Freedom, Law, Country, this ethereal mood
That thanks the Fates for their severer tasks,
Feeling its challenged pulses leap,
While others skulk in subterfuges cheap,
And, set in Danger's van, has all the boon it asks,
Shall win man's praise and woman's love,
Shall be a wisdom that we set above
All other skills and gifts to culture dear,
A virtue round whose forehead we inwreathe
Laurels that with a living passion breathe
When other crowns grow, while we twine them, sear
What brings us thronging these high rites to pay,
And seal these hours the noblest of our year,
Save that our brothers found this better way?

VIII

We sit here in the Promised Land
That flows with Freedom's honey and milk;
But 'twas they won it, sword in hand,
Making the nettle danger soft for us as silk.
We welcome back our bravest and our best;—
Ah me! not all! some come not with the rest,
Who went forth brave and bright as any here!
I strive to mix some gladness with my strain,
But the sad strings complain,
And will not please the ear:
I sweep them for a paean, but they wane

232. Promised Land—*Cf.* Ex. 13:5. Colonial New England writers frequently refer to the Puritans as the chosen people, and to New England as their promised land.

Again and yet again
Into a dirge, and die away, in pain.
In these brave ranks I only see the gaps,
Thinking of dear ones whom the dumb turf wraps,
Dark to the triumph which they died to gain:
Fitlier may others greet the living,
For me the past is unforgiving;
I with uncovered head
Salute the sacred dead,
Who went, and who return not.—Say not so!
'Tis not the grapes of Canaan that repay,
But the high faith that failed not by the way;
Virtue treads paths that end not in the grave;
No ban of endless night exiles the brave;
And to the saner mind
We rather seem the dead that stayed behind.
Blow, trumpets, all your exultations blow!
For never shall their aureoled presence lack:
I see them muster in a gleaming row,
With ever-youthful brows that nobler show;
We find in our dull road their shining track;
In every nobler mood
We feel the orient of their spirit glow,
Part of our life's unalterable good,
Of all our saintlier aspiration;
They come transfigured back,
Secure from change in their high-hearted ways,
Beautiful evermore, and with the rays
Of morn on their white Shields of Expectation!

IX

But is there hope to save
Even this ethereal essence from the grave?
What ever 'scaped Oblivion's subtle wrong
Save a few clarion names, or golden threads of song?
Before my musing eye
The mighty ones of old sweep by,
Disvoicèd now and insubstantial things,
As noisy once as we; poor ghosts of kings,
Shadows of empire wholly gone to dust,
And many races, nameless long ago,
To darkness driven by that imperious gust
Of ever-rushing Time that here doth blow:
O visionary world, condition strange,
Where naught abiding is but only Change,
Where the deep-bolted stars themselves still shift and range!
Shall we to more continuance make pretence?
Renown builds tombs; a life-estate is Wit;
And, bit by bit,

253. **grapes of Canaan**—*Cf.* Num. 13:20-27.

The cunning years steal all from us but woe;
Leaves are we, whose decays no harvest sow.
But, when we vanish hence,
Shall they lie forceless in the dark below,
Save to make green their little length of sods,
Or deepen pansies for a year or two,
Who now to us are shining-sweet as gods?
Was dying all they had the skill to do?
That were not fruitless: but the Soul resents
Such short-lived service, as if blind events
Ruled without her, or earth could so endure;
She claims a more divine investiture
Of longer tenure than Fame's airy rents;
Whate'er she touches doth her nature share;
Her inspiration haunts the ennobled air,
Gives eyes to mountains blind,
Ears to the deaf earth, voices to the wind,
And her clear trump sings succor everywhere
By lonely bivouacs to the wakeful mind;
For soul inherits all that soul could dare:
Yea, Manhood hath a wider span
And larger privilege of life than man.
The single deed, the private sacrifice,
So radiant now through proudly-hidden tears,
Is covered up erelong from mortal eyes
With thoughtless drift of the deciduous years;
But that high privilege that makes all men peers,
That leap of heart whereby a people rise
Up to a noble anger's height,
And, flamed on by the Fates, not shrink, but grow more bright,
That swift validity in noble veins,
Of choosing danger and disdaining shame,
Of being set on flame
By the pure fire that flies all contact base
But wraps its chosen with angelic might,
These are imperishable gains,
Sure as the sun, medicinal as light,
These hold great futures in their lusty reins
And certify to earth a new imperial race.

X

Who now shall sneer?
Who dare again to say we trace
Our lines to a plebeian race?
Roundhead and Cavalier!
Dumb are those names erewhile in battle loud;
Dream-footed as the shadow of a cloud,
They flit across the ear:

315. **deciduous**—declining, falling off. 332. **Roundhead and Cavalier**—the Roundheads, or Puritans, as typical of the founding of Massachusetts, and the Cavaliers, or followers of Charles I, supposed to represent the early inhabitants of Virginia.

That is best blood that hath most iron in't,
To edge resolve with, pouring without stint
For what makes manhood dear.
Tell us not of Plantagenets,
Hapsburgs, and Guelfs, whose thin bloods crawl
Down from some victor in a border-brawl!
How poor their outworn coronets,
Matched with one leaf of that plain civic wreath
Our brave for honor's blazon shall bequeath,
Through whose desert a rescued Nation sets
Her heel on treason, and the trumpet hears
Shout victory, tingling Europe's sullen ears
With vain resentments and more vain regrets!

XI

Not in anger, not in pride,
Pure from passion's mixture rude
Ever to base earth allied,
But with far-heard gratitude,
Still with heart and voice renewed,
To heroes living and dear martyrs dead,
The strain should close that consecrates our brave.
Lift the heart and lift the head!
Lofty be its mood and grave,
Not without a martial ring,
Not without a prouder tread
And a peal of exultation:
Little right has he to sing
Through whose heart in such an hour
Beats no march of conscious power,
Sweeps no tumult of elation!
'Tis no Man we celebrate,
By his country's victories great,
A hero half, and half the whim of Fate,
But the pith and marrow of a Nation
Drawing force from all her men,
Highest, humblest, weakest, all,
For her time of need, and then
Pulsing it again through them,
Till the basest can no longer cower,
Feeling his soul spring up divinely tall,
Touched but in passing by her mantle-hem.
Come back, then, noble pride, for 'tis her dower!
How could poet ever tower,
If his passions, hopes, and fears,

339. Plantagenets—the line of English kings (1154-1399) founded by Henry II. **340. Hapsburgs**—the royal family which formerly ruled the Holy Roman Empire, Austria, Spain, et cetera. **340. Guelfs**—members of the papal party in medieval Italy, from which the present royal house in Great Britain is descended.

If his triumphs and his tears,
Kept not measure with his people?
Boom, cannon, boom to all the winds and waves!
Clash out, glad bells, from every rocking steeple!
Banners, advance with triumph, bend your staves!
And from every mountain-peak
Let beacon-fire to answering beacon speak,
Katahdin tell Monadnock, Whiteface he,
And so leap on in light from sea to sea,
Till the glad news be sent
Across a kindling continent,
Making earth feel more firm and air breathe braver:
"Be proud! for she is saved, and all have helped to save her!
She that lifts up the manhood of the poor,
She of the open soul and open door,
With room about her hearth for all mankind!
The fire is dreadful in her eyes no more;
From her bold front the helm she doth unbind,
Sends all her handmaid armies back to spin,
And bids her navies, that so lately hurled
Their crashing battle, hold their thunders in,
Swimming like birds of calm along the unharmful shore.
No challenge sends she to the elder world,
That looked askance and hated; a light scorn
Plays o'er her mouth, as round her mighty knees
She calls her children back, and waits the morn
Of nobler day, enthroned between her subject seas."

XII

Bow down, dear Land, for thou hast found release!
Thy God, in these distempered days,
Hath taught thee the sure wisdom of His ways,
And through thine enemies hath wrought thy peace!
Bow down in prayer and praise!
No poorest in thy borders but may now
Lift to the juster skies a man's enfranchised brow.
O Beautiful! my Country! ours once more!
Smoothing thy gold of war-dishevelled hair
O'er such sweet brows as never other wore,
And letting thy set lips,
Freed from wrath's pale eclipse,
The rosy edges of their smile lay bare,
What words divine of lover or of poet
Could tell our love and make thee know it,
Among the Nations bright beyond compare?
What were our lives without thee?

386. Katahdin . . . —The three mountains are, in order from east to west, in Maine, New Hampshire, and New York. **402. hated**—Upper-class sentiment in Great Britain and France had been hostile to the Union side in the Civil War. Moreover, the threat of invasion by Federal forces was sending French troops out of Mexico, where they had been supporting the ill-fated Emperor Maximilian. **412. enfranchised**—The reference is, of course, to the abolition of slavery.

What all our lives to save thee?
We reck not what we gave thee;
We will not dare to doubt thee,
But ask whatever else, and we will dare!

NEW ENGLAND TWO CENTURIES AGO

This essay, a review of the third volume of *History of New England during the Stuart Dynasty* by John G. Palfrey, and of two volumes published by the Massachusetts Historical Society, first appeared in the *North American Review,* January, 1865; then, after pamphlet publication, in *Among My Books* (1870).

THE HISTORY of New England is written imperishably on the face of a continent, and in characters as beneficent as they are enduring. In the Old World national pride feeds itself with the record of battles and conquests;—battles which proved nothing and settled nothing; conquests which shifted a boundary on the map, and put one ugly head instead of another on the coin which the people paid to the tax-gatherer. But wherever the New Englander travels among the sturdy commonwealths which have sprung from the seed of the Mayflower, churches, schools, colleges, tell him where the men of his race have been, or their influence has penetrated; and an intelligent freedom is the monument of conquests whose results are not to be measured in square miles. Next to the fugitives whom Moses led out of Egypt, the little shipload of outcasts who landed at Plymouth two centuries and a half ago are destined to influence the future of the world. The spiritual thirst of mankind has for ages been quenched at Hebrew fountains; but the embodiment in human institutions of truths uttered by the Son of Man eighteen centuries ago was to be mainly the work of Puritan thought and Puritan self-devotion. Leave New England out in the cold! While you are plotting it, she sits by every fireside in the land where there is piety, culture, and free thought.

Faith in God, faith in man, faith in work,—this is the short formula in which we may sum up the teaching of the founders of New England, a creed ample enough for this life and the next. If their municipal regulations smack somewhat of Judaism, yet there can be no nobler aim or more practical wisdom than theirs; for it was to make the law of man a living counterpart of the law of God, in their highest conception of it. Were they too earnest in the strife to save their souls alive? That is still the problem which every wise and brave man is lifelong in solving. If the Devil take a less hateful shape to us than to our fathers, he is as busy with us as with them; and if we cannot find it in our hearts to break with a gentleman of so much worldly wisdom, who gives such admirable dinners, and whose manners are so perfect, so much the worse for us.

Looked at on the outside, New England history is dry and unpicturesque. There is no rustle of silks, no waving of plumes, no clink of golden spurs. Our sympathies are not awakened by the changeful destinies, the rise and fall, of great families, whose doom was in their blood. Instead of all this, we have the

11. **Moses . . . Egypt**—*Cf.* Ex. 14.

homespun fates of Cephas and Prudence repeated in an infinite series of peaceable sameness, and finding space enough for record in the family Bible; we have the noise of axe and hammer and saw, an apotheosis of dogged work, where, reversing the fairy-tale, nothing is left to luck, and, if there be any poetry, it is something that cannot be helped,—the waste of the water over the dam. Extrinsically, it is prosaic and plebeian; intrinsically, it is poetic and noble; for it is, perhaps, the most perfect incarnation of an idea the world has ever seen. That idea was not to found a democracy, nor to charter the city of New Jerusalem by an act of the General Court, as gentlemen seem to think whose notions of history and human nature rise like an exhalation from the good things at a Pilgrim Society dinner. Not in the least. They had no faith in the Divine institution of a system which gives Teague, because he can dig, as much influence as Ralph, because he can think, nor in personal at the expense of general freedom. Their view of human rights was not so limited that it could not take in human relations and duties also. They would have been likely to answer the claim, "I am as good as anybody," by a quiet "Yes, for some things, but not for others; as good, doubtless, in your place, where all things are good." What the early settlers of Massachusetts *did* intend, and what they accomplished, was the founding here of a *new* England, and a better one, where the political superstitions and abuses of the old should never have leave to take root. So much, we may say, they deliberately intended. No nobles, either lay or cleric, no great landed estates, and no universal ignorance as the seed-plot of vice and unreason; but an elective magistracy and clergy, land for all who would till it, and reading and writing, will ye nill ye, instead. Here at last, it should seem, simple manhood is to have a chance to play his stake against Fortune with honest dice, uncogged by those three hoary sharpers, Prerogative, Patricianism, and Priestcraft. Whoever has looked into the pamphlets published in England during the Great Rebellion cannot but have been struck by the fact, that the principles and practice of the Puritan Colony had begun to react with considerable force on the mother country; and the policy of the retrograde party there, after the Restoration, in its dealings with New England, finds a curious parallel as to its motives (time will show whether as to its results) in the conduct of the same party towards America during the last four years. This influence and this fear alike bear witness to the energy of the principles at work here.

We have said that the details of New England history were essentially dry

1. **Cephas . . . Prudence**—"typical" New England names. 3. **apotheosis**—deification. 9. **General Court**—the colonial legislature in Massachusetts Bay. 11. **Pilgrim Society**—founded in 1819-1820 to commemorate the coming of the Pilgrims to Plymouth. 12. **Teague**—a typical Irish peasant; the name comes from Sir Robert Howard's play *The Committee*. When Lowell wrote, the large Irish immigration into New England had given rise to various social and political problems. 13. **Ralph**—probably a reminiscence of Ralph in Butler's *Hudibras*, a satiric portrait of a "New Light" Presbyterian. 21-22. **nobles . . . lay or cleric**—In Great Britain bishops, by right of their office, sit in the House of Lords with the secular or lay lords. 24. **will ye nill ye**—usually willy-nilly. 26. **uncogged**—not "loaded." 27. **Prerogative**—The king's prerogative was one of the points of political difference in the English Civil Wars, the **Great Rebellion** of line 28 against Charles I. 33. **conduct . . . party**—During the American Civil War the Tories in England were openly sympathetic with the Confederacy. 34. **years**—"Written in December, 1864." (Lowell's note)

and unpoetic. Everything is near, authentic, and petty. There is no mist of distance to soften outlines, no mirage of tradition to give characters and events an imaginative loom. So much downright work was perhaps never wrought on the earth's surface in the same space of time as during the first forty years after the settlement. But mere work is unpicturesque, and void of sentiment. Irving instinctively divined and admirably illustrated in his "Knickerbocker" the humorous element which lies in this nearness of view, this clear, prosaic daylight of modernness, and this poverty of stage properties, which make the actors and the deeds they were concerned in seem ludicrously small when contrasted with the semi-mythic grandeur in which we have clothed them, as we look backward from the crowned result, and fancy a cause as majestic as our conception of the effect. There was, indeed, one poetic side to the existence otherwise so narrow and practical; and to have conceived this, however partially, is the one original and American thing in Cooper. This diviner glimpse illumines the lives of our Daniel Boones, the man of civilization and old-world ideas confronted with our forest solitudes,—confronted, too, for the first time, with his real self, and so led gradually to disentangle the original substance of his manhood from the artificial results of culture. Here was our new Adam of the wilderness, forced to name anew, not the visible creation of God, but the invisible creation of man, in those forms that lie at the base of social institutions, so insensibly moulding personal character and controlling individual action. Here is the protagonist of our New World epic, a figure as poetic as that of Achilles, as ideally representative as that of Don Quixote, as romantic in its relation to our homespun and plebeian mythus as Arthur in his to the mailed and plumed cycle of chivalry. We do not mean, of course, that Cooper's "Leatherstocking" is all this or anything like it, but that the character typified in him is ideally and potentially all this and more.

But whatever was poetical in the lives of the early New Englanders had something shy, if not sombre, about it. If their natures flowered, it was out of sight, like the fern. It was in the practical that they showed their true quality, as Englishmen are wont. It has been the fashion lately with a few feeble-minded persons to undervalue the New England Puritans, as if they were nothing more than gloomy and narrow-minded fanatics. But all the charges brought against these large-minded and far-seeing men are precisely those which a really able fanatic, Joseph de Maistre, lays at the door of Protestantism. Neither a knowledge of human nature nor of history justifies us in confounding, as is commonly done, the Puritans of Old and New England, or the English Puritans of the third with those of the fifth decade of the seventeenth century. Fanaticism, or, to call it by its milder name, enthusiasm, is only powerful and active so long as it is aggressive. Establish it firmly in power, and it

6. **"Knickerbocker"**—Irving's *A History of New York by Diedrich Knickerbocker* (1809). 15. **Daniel Boones**—Daniel Boone (1735-1820), the Kentucky pioneer. His life is supposed to have influenced Cooper's Leather-stocking. 22. **protagonist**—chief figure. 22. **New World epic**—One of the favorite ideals of the Connecticut Wits was to write an epic poem worthy of the young republic. Joel Barlow's *Columbiad* (1807) is typical. 35. **Joseph de Maistre**—Joseph de Maistre (1754-1821), French statesman and philosopher, the most rigorous upholder of the principle of authority in religion and government in the Napoleonic and post-Napoleonic world, and a stanch upholder of Catholicism.

becomes conservatism, whether it will or no. A sceptre once put in the hand, the grip is instinctive; and he who is firmly seated in authority soon learns to think security, and not progress, the highest lesson of statecraft. From the summit of power men no longer turn their eyes upward, but begin to look about them. Aspiration sees only one side of every question; possession, many. And the English Puritans, after their revolution was accomplished, stood in even a more precarious position than most successful assailants of the prerogative of whatever *is* to continue in being. They had carried a political end by means of a religious revival. The fulcrum on which they rested their lever to overturn the existing order of things (as history always placidly calls the particular forms of *dis*order for the time being) was in the soul of man. They could not renew the fiery gush of enthusiasm when once the molten metal had begun to stiffen in the mould of policy and precedent. The religious element of Puritanism became insensibly merged in the political; and, its one great man taken away, it died, as passions have done before, of possession. It was one thing to shout with Cromwell before the battle of Dunbar, "Now, Lord, arise, and let thine enemies be scattered!" and to snuffle, "Rise, Lord, and keep us safe in our benefices, our sequestered estates, and our five per cent!" Puritanism meant something when Captain Hodgson, riding out to battle through the morning mist, turns over the command of his troop to a lieutenant, and stays to hear the prayer of a cornet, there was "so much of God in it." Become traditional, repeating the phrase without the spirit, reading the present backward as if it were written in Hebrew, translating Jehovah by "I was" instead of "I am,"—it was no more like its former self than the hollow drum made of Zisca's skin was like the grim captain whose soul it had once contained. Yet the change was inevitable, for it is not safe to confound the things of Caesar with the things of God. Some honest republicans, like Ludlow, were never able to comprehend the chilling contrast between the ideal aim and the material fulfilment, and looked askance on the strenuous reign of Oliver,—that rugged boulder of primitive manhood lying lonely there on the dead level of the century,—as if some crooked changeling had been laid in the cradle instead of that fair babe of the Commonwealth they had dreamed. Truly there is a tide in the affairs of men, but there is no gulf-stream setting forever in one direction; and those waves of enthusiasm on whose crumbling crests we sometimes see nations lifted for a gleaming moment are wont to have a gloomy trough before and behind.

But the founders of New England, though they must have sympathized vividly with the struggles and triumphs of their brethren in the mother country, were never subjected to the same trials and temptations, never hampered with the same lumber of usages and tradition. They were not driven to win power by doubtful and desperate ways, nor to maintain it by any compro-

16-17. Cromwell . . . scattered—a battle between Cromwell's army and Scotch troops under Leslie, fought Sept. 3, 1650. The quotation seems to be from the *Memoirs* of Captain John Hodgson (died 1684), an officer in the Parliamentary army, published in Slingsby's *Original Memoirs . . . of the Civil War* (1806). **21. cornet**—the color-bearer in a cavalry troop. **23. Jehovah**—The Hebrew *Jahveh* (Jehovah) is connected with the Hebrew root of the verb to be; hence such a passage as Ex. 3:14. **24. Zisca's skin**—John Ziska (1360-1424), the noted Hussite leader, requested that after his death his skin should be used as a drumhead to encourage his followers to battle. **26-27. Caesar . . . God**—*Cf.* Mat. 22:21. **27. Ludlow**—Edmund Ludlow (1617-1692), English general, and one of the regicides, or judges, of Charles I, who signed his death warrant in 1649. **32. tide**—*Cf. Julius Caesar,* Act IV, scene 3, line 218.

mises of the ends which make it worth having. From the outset they were builders, without need of first pulling down, whether to make room or to provide material. For thirty years after the colonization of the Bay, they had absolute power to mould as they would the character of their adolescent commonwealth. During this time a whole generation would have grown to manhood who knew the Old World only by report, in whose habitual thought kings, nobles, and bishops would be as far away from all present and practical concern as the figures in a fairy-tale, and all whose memories and associations, all their unconscious training by eye and ear, were New English wholly. Nor were the men whose influence was greatest in shaping the framework and the policy of the Colony, in any true sense of the word, fanatics. Enthusiasts, perhaps, they were, but with them the fermentation had never gone further than the ripeness of the vinous stage. Disappointment had never made it acetous, nor had it ever putrefied into the turbid zeal of Fifth Monarchism and sectarian whimsey. There is no better ballast for keeping the mind steady on its keel, and saving it from all risk of *crankiness,* than business. And they were business men, men of facts and figures no less than of religious earnestness. The sum of two hundred thousand pounds had been invested in their undertaking,—a sum, for that time, truly enormous as the result of private combination for a doubtful experiment. That their enterprise might succeed, they must show a balance on the right side of the counting-house ledger, as well as in their private accounts with their own souls. The liberty of praying when and how they would must be balanced with an ability of paying when and as they ought. Nor is the resulting fact in this case at variance with the *a priori* theory. They succeeded in making their thought the life and soul of a body politic, still powerful, still benignly operative, after two centuries; a thing which no mere fanatic ever did or ever will accomplish. Sober, earnest, and thoughtful men, it was no Utopia, no New Atlantis, no realization of a splendid dream, which they had at heart, but the establishment of the divine principle of Authority on the common interest and the common consent; the making, by a contribution from the free-will of all, a power which should curb and guide the free-will of each for the general good. If they were stern in their dealings with sectaries, it should be remembered that the Colony was in fact the private property of the Massachusetts Company, that unity was essential to its success, and that John of Leyden had taught them how unendurable by the nostrils of honest men is the corruption of the right of private judgment in the evil and selfish hearts of men when no thorough mental training has developed the understanding and given the judgment its needful means of comparison and correction. They knew that liberty in the hands of feeble-minded and unreasoning

3. thirty . . . Bay—that is, from 1630 to 1660, the date of the Restoration. **14. Fifth Monarchism**—The Fifth Monarchy men were a sect in Cromwell's time which believed it essential to inaugurate the new kingdom of Christ by force. The five great monarchies were Assyria, Persia, Greece, Rome, and the Christian. In 1657 and 1661 there were uprisings by the sect. **16. crankiness**—A ship is crank or cranky when it is insufficiently ballasted; hence the pun in the text on religious cranks. **28. Utopia . . . Atlantis**—The *Utopia* of Sir Thomas More (1516) and the *New Atlantis* of Francis Bacon (1624) are both imaginary commonwealths laid vaguely in the "west." **33-34. private property**—The Massachusetts Bay Colony was sent out by the Massachusetts Company, a private corporation chartered in 1629. **35. John of Leyden**—Johann Bockelson or Bockhold (about 1510-1536), known as John of Leyden, an Anabaptist fanatic.

persons (and all the worse if they are honest) means nothing more than the supremacy of their particular form of imbecility; means nothing less, therefore, than downright chaos, a Bedlam-chaos of monomaniacs and bores. What was to be done with men and women, who bore conclusive witness to the fall of man by insisting on walking up the broad-aisle of the meeting-house in a costume which that event had put forever out of fashion? About their treatment of witches, too, there has been a great deal of ignorant babble. Puritanism had nothing whatever to do with it. They acted under a delusion, which, with an exception here and there (and those mainly medical men, like Wierus and Webster), darkened the understanding of all Christendom. Dr. Henry More was no Puritan; and his letter to Glanvil, prefixed to the third edition of the "Sadducismus Triumphatus," was written in 1678, only fourteen years before the trials at Salem. Bekker's "Bezauberte Welt" was published in 1693; and in the Preface he speaks of the difficulty of overcoming "the prejudices in which not only ordinary men, but the learned also, are obstinate." In Hathaway's case, 1702, Chief-Justice Holt, in charging the jury, expresses no disbelief in the possibility of witchcraft, and the indictment implies its existence. Indeed, the natural reaction from the Salem mania of 1692 put an end to belief in devilish compacts and demoniac possessions sooner in New England than elsewhere. The last we hear of it there is in 1720, when the Rev. Mr. Turell of Medford detected and exposed an attempted cheat by two girls. Even in 1692, it was the foolish breath of Cotton Mather and others of the clergy that blew the dying embers of this ghastly superstition into a flame; and they were actuated partly by a desire to bring about a religious revival, which might stay for a while the hastening lapse of their own authority, and still more by that credulous scepticism of feeble-minded piety which dreads the cutting away of an orthodox tumor of misbelief, as if the life-blood of faith would follow, and would keep even a stumbling-block in the way of salvation, if only enough generations had tripped over it to make it venerable. The witches were condemned on precisely the same grounds that in our day led to the condemnation of "Essays and Reviews."

But Puritanism was already in the decline when such things were possible. What had been a wondrous and intimate experience of the soul, a flash into the very crypt and basis of man's nature from the fire of trial, had become ritual and tradition. In prosperous times the faith of one generation becomes the formality of the next. "The necessity of a reformation," set forth by order

9. **Wierus**—Johann Wierus (1515-1588), author of *De praestigiis daemonum* (1563), a study of witchcraft. 10. **Webster**—John Webster (1610-1682), author of *Displaying of Supposed Witchcraft* (1677), generally skeptical of witchcraft. 10. **Henry More**—(1614-1687) one of the chief of the "Cambridge Platonists." 11. **Glanvil**—Joseph Glanvil (1636-1680), one of the chief proponents of the new science, whose *Sadducismus Triumphatus* appeared in 1681. 13. **Bekker**—Balthazar Bekker (1634-1698), a Dutch theologian, whose *De Betoverde Wereld* advances a view of demoniacal possession. 15. **Hathaway's case**—In 1700 Richard Hathaway accused Sarah Morduck of witchcraft. She was acquitted, and Hathaway punished as an impostor. The presiding justice was Sir John Holt (1642-1710), Chief Justice of the King's Bench, who acquitted all the defendants in cases of witchcraft which came before him. 20. **Turell**—the Rev. Ebenezer Turell (1702-1778), whose entire life was spent at Medford. 21. **1692**—the year of the outbreak of the "Witchcraft Delusion" at Salem. 22. **Cotton Mather**—the Rev. Cotton Mather (1663-1728). Lowell is not fair to Mather, who seems to have been very cautious in his writings on witchcraft. 31. **"Essays and Reviews"**—This volume of liberal essays on theological subjects, published in 1861, aroused great controversy in Great Britain.

of the Synod which met at Cambridge in 1679, though no doubt overstating the case, shows how much even at that time the ancient strictness had been loosened. The country had grown rich, its commerce was large, and wealth did its natural work in making life softer and more worldly, commerce in de-provincializing the minds of those engaged in it. But Puritanism had already done its duty. As there are certain creatures whose whole being seems occupied with an egg-laying errand they are sent upon, incarnate ovipositors, their bodies but bags to hold this precious deposit, their legs of use only to carry them where they may most safely be rid of it, so sometimes a generation seems to have no other end than the conception and ripening of certain germs. Its blind stirrings, its apparently aimless seeking hither and thither, are but the driving of an instinct to be done with its parturient function toward these principles of future life and power. Puritanism, believing itself quick with the seed of religious liberty, laid, without knowing it, the egg of democracy. The English Puritans pulled down church and state to rebuild Zion on the ruins, and all the while it was not Zion, but America, they were building. But if their millennium went by, like the rest, and left men still human; if they, like so many saints and martyrs before them, listened in vain for the sound of that trumpet which was to summon all souls to a resurrection from the body of this death which men call life,—it is not for us, at least, to forget the heavy debt we owe them. It was the drums of Naseby and Dunbar that gathered the minute-men on Lexington Common; it was the red dint of the axe on Charles's block that marked One in our era. The Puritans had their faults. They were narrow, ungenial; they could not understand the text, "I have piped to you and ye have not danced," nor conceived that saving one's soul should be the cheerfullest, and not the dreariest, of businesses. Their preachers had a way, like the painful Mr. Perkins, of pronouncing the word *damn* with such an emphasis as left a doleful echo in their auditors' ears a good while after. And it was natural that men who captained or accompanied the exodus from existing forms and associations into the doubtful wilderness that led to the promised land, should find more to their purpose in the Old Testament than in the New. As respects the New England settlers, however visionary some of their religious tenets may have been, their political ideas savored of the reality, and it was no Nephelococcygia of which they drew the plan, but of a commonwealth whose foundation was to rest on solid and familiar earth. If what they did was done in a corner, the results of it were to be felt to the ends of the earth; and the figure of Winthrop should be as venerable in history as that of Romulus is barbarously grand in legend.

I am inclined to think that many of our national characteristics, which are sometimes attributed to climate and sometimes to institutions, are traceable to

1. **Synod . . . 1679**—A synod is a church assembly, here of representatives of the Presbyterian churches, of higher authority than the presbytery. This particular meeting in Massachusetts was famous. 7. **ovipositors**—egg-laying organs. 15. **Zion**—symbolically, the Christian Church. 21. **Dunbar**—16-17, p. 993. 22. **Charles's block**—Charles I was executed in 1649. 24-25. **"I have piped . . . danced"**—*Cf.* Luke 7:32. 27. **Perkins**—William Perkins (1558-1602), one of the early leaders of English Puritanism. 34. **Nephelococcygia**—Cloud-Cuckoo-Town, from Aristophanes' comedy *The Birds*, used of any fantastic utopian dream. 37. **Winthrop**—John Winthrop (1587-1649), long governor of Massachusetts Bay Colony. 37. **Romulus**—with Remus, the mythical founder of Rome.

the influences of Puritan descent. We are apt to forget how very large a proportion of our population is descended from emigrants who came over before 1660. Those emigrants were in great part representatives of that element of English character which was most susceptible of religious impressions; in other words, the most earnest and imaginative. Our people still differ from their English cousins (as they are fond of calling themselves when they are afraid we may do them a mischief) in a certain capacity for enthusiasm, a devotion to abstract principle, an openness to ideas, a greater aptness for intuitions than for the slow processes of the syllogism, and, as derivative from these, in minds of looser texture, a light-armed, skirmishing habit of thought, and a positive preference of the birds in the bush,—an excellent quality of character *before* you have your bird in the hand.

There have been two great distributing centres of the English race on this continent, Massachusetts and Virginia. Each has impressed the character of its early legislators on the swarms it has sent forth. Their ideas are in some fundamental respects the opposites of each other, and we can only account for it by an antagonism of thought beginning with the early framers of their respective institutions. New England abolished caste; in Virginia they still talk of "quality folks." But it was in making education not only common to all, but in some sense compulsory on all, that the destiny of the free republics of America was practically settled. Every man was to be trained, not only to the use of arms, but of his wits also; and it is these which alone make the others effective weapons for the maintenance of freedom. You may disarm the hands, but not the brains, of a people, and to know what should be defended is the first condition of successful defence. Simple as it seems, it was a great discovery that the key of knowledge could turn both ways, that it could open, as well as lock, the door of power to the many. The only things a New-Englander was ever locked out of were the jails. It is quite true that our Republic is the heir of the English Commonwealth; but as we trace events backward to their causes, we shall find it true also, that what made our Revolution a foregone conclusion was that act of the General Court, passed in May, 1647, which established the system of common schools. "To the end that learning may not be buried in the graves of our forefathers in Church and Commonwealth, the Lord assisting our endeavors, it is therefore ordered by this Court and authority thereof, that every township in this jurisdiction, after the Lord hath increased them to fifty householders, shall then forthwith appoint one within their towns to teach all such children as shall resort to him to write and read."

Passing through some Massachusetts village, perhaps at a distance from any house, it may be in the midst of a piece of woods where four roads meet, one may sometimes even yet see a small square one-story building, whose use would not be long doubtful. It is summer, and the flickering shadows of forest-leaves dapple the roof of the little porch, whose door stands wide, and shows, hanging on either hand, rows of straw hats and bonnets, that look as if they had done good service. As you pass the open windows, you hear whole platoons of high-pitched voices discharging words of two or three syllables with won-

32-37. **"To the end . . read"**—Lowell quotes the preamble of the act of May, 1647, to which he refers. 45. **high-pitched voices**—Formerly, young children learned their "a-b-abs" by reciting them in chorus.

derful precision and unanimity. Then there is a pause, and the voice of the officer in command is heard reproving some raw recruit whose vocal musket hung fire. Then the drill of the small infantry begins anew, but pauses again because some urchin—who agrees with Voltaire that the superfluous is a very necessary thing—insists on spelling "subtraction" with an *s* too much.

If you had the good fortune to be born and bred in the Bay State, your mind is thronged with half-sad, half-humorous recollections. The a-b abs of little voices long since hushed in the mould, or ringing now in the pulpit, at the bar, or in the Senate-chamber, come back to the ear of memory. You remember the high stool on which culprits used to be elevated with the tall paper fool's-cap on their heads, blushing to the ears; and you think with wonder how you have seen them since as men climbing the world's penance-stools of ambition without a blush, and gladly giving everything for life's caps and bells. And you have pleasanter memories of going after pond-lilies, of angling for horn-pouts,—that queer bat among the fishes,—of nutting, of walking over the creaking snow-crust in winter, when the warm breath of every household was curling up silently in the keen blue air. You wonder if life has any rewards more solid and permanent than the Spanish dollar that was hung around your neck to be restored again next day, and conclude sadly that it was but too true a prophecy and emblem of all worldly success. But your moralizing is broken short off by a rattle of feet and the pouring forth of the whole swarm,—the boys dancing and shouting,—the mere effervescence of the fixed air of youth and animal spirits uncorked,—the sedater girls in confidential twos and threes decanting secrets out of the mouth of one cape-bonnet into that of another. Times have changed since the jackets and trousers used to draw up on one side of the road, and the petticoats on the other, to salute with bow and curtsy the white neckcloth of the parson or the squire, if it chanced to pass during intermission.

Now this little building, and others like it, were an original kind of fortification invented by the founders of New England. They are the martello-towers that protect our coast. This was the great discovery of our Puritan forefathers. They were the first lawgivers who saw clearly and enforced practically the simple moral and political truth, that knowledge was not an alms to be dependent on the chance charity of private men or the precarious pittance of a trust-fund, but a sacred debt which the Commonwealth owed to every one of her children. The opening of the first grammar-school was the opening of the first trench against monopoly in church and state; the first row of trammels and pothooks which the little Shearjashubs and Elkanahs blotted and blubbered across their copy-books, was the preamble to the Declaration of Inde-

4. **superfluous**—The quotation from Voltaire (1694-1778) is from *Le Mondain:* "Le superflu, chose très-nécessaire." 18. **Spanish dollar**—Until the creation of a Federal currency, and for some time after, Spanish dollars circulated in this country. The whole passage is reminiscent of Lowell's own childhood experiences. 30. **martello-towers**—small round towers constituting small forts against an invader. They were erected in England when that country feared a Napoleonic invasion. 36. **first grammar-school**—The first free school in Massachusetts was founded in 1635. 37. **trammels**—rings or links to hold a crook over a fire. The writing of untrained children would look like that. 38. **pothooks**—hooks over a fireplace for much the same purpose. 38. **Shearjashubs . . . Elkanahs**—*Cf.* Isa. 7: 3 and Ex. 6: 24. Lowell is making fun of the uncouth biblical names given Puritan children.

pendence. The men who gave every man the chance to become a landholder, who made the transfer of land easy, and put knowledge within the reach of all, have been called narrow-minded, because they were intolerant. But intolerant of what? Of what they believed to be dangerous nonsense, which, if left free, would destroy the last hope of civil and religious freedom. They had not come here that every man might do that which seemed good in his own eyes, but in the sight of God. Toleration, moreover, is something which is won, not granted. It is the equilibrium of neutralized forces. The Puritans had no notion of tolerating mischief. They looked upon their little commonwealth as upon their own private estate and homestead, as they had a right to do, and would no more allow the Devil's religion of unreason to be preached therein, than we should permit a prize-fight in our gardens. They were narrow; in other words they had an edge to them, as men that serve in great emergencies must; for a Gordian knot is settled sooner with a sword than a beetle.

The founders of New England are commonly represented in the after-dinner oratory of their descendants as men "before their time," as it is called; in other words, deliberately prescient of events resulting from new relations of circumstances, or even from circumstances new in themselves, and therefore altogether alien from their own experience. Of course, such a class of men is to be reckoned among those non-existent human varieties so gravely catalogued by the ancient naturalists. If a man could shape his action with reference to what should happen a century after his death, surely it might be asked of him to call in the help of that easier foreknowledge which reaches from one day to the next,—a power of prophecy whereof we have no example. I do not object to a wholesome pride of ancestry, though a little mythical, if it be accompanied with the feeling that *noblesse oblige,* and do not result merely in a placid self-satisfaction with our own mediocrity, as if greatness, like righteousness, could be imputed. We can pardon it even in conquered races, like the Welsh and Irish, who make up to themselves for present degradation by imaginary empires in the past whose boundaries they can extend at will, carrying the bloodless conquests of fancy over regions laid down upon no map, and concerning which authentic history is enviously dumb. Those long beadrolls of Keltic kings cannot tyrannize over us, and we can be patient so long as our own crowns are uncracked by the shillalah sceptres of their actual representatives. In our own case, it would not be amiss, perhaps, if we took warning by the example of Teague and Taffy. At least, I think it would be wise in our orators not to put forward so prominently the claim of the Yankee to universal dominion, and his intention to enter upon it forthwith. If we do our duties as honestly and as much in the fear of God as our forefathers did, we need not

6. every man—*Cf.* Deut. 12: 8. **14. Gordian knot**—In Greek story, an intricate knot tied by Gordius, a Phrygian king. According to the oracle, whoever should untie it would rule Asia. Alexander the Great cut it with his sword. **14. beetle**—See note 492, p. 968. **20-21. non-existent . . . naturalists**—reference to the "unnatural natural history" recorded by such writers as Pliny. **26. noblesse oblige**—nobility obliges; that is, those who are noble ought to act nobly. **29. Irish**—When Lowell wrote, Ireland formed part of the United Kingdom of Great Britain and Ireland. **32. beadrolls**—lists. **33. Keltic**—more commonly, Celtic. **34. shillalah**—An Irishman's stick is his shillalah. The whole passage reflects Lowell's amusement and disgust at the invasion of Massachusetts by the immigrant Irish. **36. Teague . . . Taffy**—generic names for the Irish and the Welsh. Taffy is a corruption of David.

trouble ourselves much about other titles to empire. The broad foreheads and long heads will win the day at last in spite of all heraldry, and it will be enough if we feel as keenly as our Puritan founders did that those organs of empire may be broadened and lengthened by culture. That our self-complacency should not increase the complacency of outsiders is not to be wondered at. As *we* sometimes take credit to ourselves (since all commendation of our ancestry is indirect self-flattery) for what the Puritan fathers never were, so there are others who, to gratify a spite against their descendants, blame them for not having been what they could not be; namely, before their time in such matters as slavery, witchcraft, and the like. The view, whether of friend or foe, is equally unhistorical, nay, without the faintest notion of all that makes history worth having as a teacher. That our grandfathers shared in the prejudices of their day is all that makes them human to us; and that nevertheless they could act bravely and wisely on occasion makes them only the more venerable. If certain barbarisms and superstitions disappeared earlier in New England than elsewhere, not by the decision of exceptionally enlightened or humane judges, but by force of public opinion, that is the fact that is interesting and instructive for us. I never thought it an abatement of Hawthorne's genius that he came lineally from one who sat in judgment on the witches in 1692; it was interesting rather to trace something hereditary in the sombre character of his imagination, continually vexing itself to account for the origin of evil, and baffled for want of that simple solution in a personal Devil. . . .

DEMOCRACY

Inaugural Address on Assuming the Presidency of the Birmingham and Midland Institute, Birmingham, England, 6 October, 1884.

After being delivered at Birmingham, as indicated, this lecture was published in *Democracy and Other Addresses* (1886).

He must be a born leader or misleader of men, or must have been sent into the world unfurnished with that modulating and restraining balance-wheel which we call a sense of humor, who, in old age, has as strong a confidence in his opinions and in the necessity of bringing the universe into conformity with them as he had in youth. In a world the very condition of whose being is that it should be in perpetual flux, where all seems mirage, and the one abiding thing is the effort to distinguish realities from

1-2. broad . . . heads—characteristic of the "Nordic" peoples. **3-4. organs of empire**—oblique reference to the phrenological doctrine that particular capacities are represented by "bumps" or other cranial characteristics. **4. culture**—"It is curious, that, when Cromwell proposed to transfer a colony from New England to Ireland, one of the conditions insisted on in Massachusetts was that a college should be established." (Lowell's note) **19. one**—John Hathorne, one of the judges in the Salem witchcraft trials, sometimes half-humorously blamed by the Hawthorne family for any evils that befell them. **22. Devil**—The rest of the essay is an examination of the various books under review, and lacks the general interest of the first portions. **28. flux**—the doctrine of Heraclitus of Ephesus (6th century B.C.) that everything is in a state of flux.

appearances, the elderly man must be indeed of a singularly tough and valid fibre who is certain that he has any clarified residuum of experience, any assured verdict of reflection, that deserves to be called an opinion, or who, even if he had, feels that he is justified in holding mankind by the button while he is expounding it. And in a world of daily—nay, almost hourly—journalism, where every clever man, every man who thinks himself clever, or whom anybody else thinks clever, is called upon to deliver his judgment point-blank and at the word of command on every conceivable subject of human thought, or, on what sometimes seems to him very much the same thing, on every inconceivable display of human want of thought, there is such a spendthrift waste of all those commonplaces which furnish the permitted staple of public discourse that there is little chance of beguiling a new tune out of the one-stringed instrument on which we have been thrumming so long. In this desperate necessity one is often tempted to think that, if all the words of the dictionary were tumbled down in a heap and then all those fortuitous juxtapositions and combinations that made tolerable sense were picked out and pieced together, we might find among them some poignant suggestions towards novelty of thought or expression. But, alas! it is only the great poets who seem to have this unsolicited profusion of unexpected and incalculable phrase, this infinite variety of topic. For everybody else everything has been said before, and said over again after. He who has read his Aristotle will be apt to think that observation has on most points of general applicability said its last word, and he who has mounted the tower of Plato to look abroad from it will never hope to climb another with so lofty a vantage of speculation. Where it is so simple if not so easy a thing to hold one's peace, why add to the general confusion of tongues? There is something disheartening, too, in being expected to fill up not less than a certain measure of time, as if the mind were an hour-glass, that need only be shaken and set on one end or the other, as the case may be, to run its allotted sixty minutes with decorous exactitude. I recollect being once told by the late eminent naturalist, Agassiz, that when he was to deliver his first lecture as professor (at Zurich, I believe) he had grave doubts of his ability to occupy the prescribed three quarters of an hour. He was speaking without notes, and glancing anxiously from time to time at the watch that lay before him on the desk. "When I had spoken a half hour," he said, "I had told them everything I knew in the world, everything! Then I began to repeat myself," he added, roguishly, "and I have done nothing else ever since." Beneath the humorous exaggeration of the story I seemed to see the face of a very serious and improving moral. And yet if one were to say only what he had to say and then stopped, his audience would feel defrauded of their honest measure. Let us take courage by the example of the French, whose exportation of Bordeaux wines increases as the area of their land in vineyards is diminished.

To me, somewhat hopelessly revolving these things, the undelayable year has rolled round, and I find myself called upon to say something in this place,

12. **one-stringed instrument**—the tongue. 30. **Agassiz**—Jean Louis Rodolphe Agassiz (1807-1873), famous naturalist, who became professor at Harvard in 1848. Lowell has an ode to him. 30. **Zürich**—in Switzerland, Agassiz's own country. 42. **revolving**—a Latin use of the word, which here means pondering. 43. **this place**—The Institute was established to give scientific instruction to the laboring classes.

where so many wiser men have spoken before me. Precluded, in my quality of national guest, by motives of taste and discretion, from dealing with any question of immediate and domestic concern, it seemed to me wisest, or at any rate most prudent, to choose a topic of comparatively abstract interest, and to ask your indulgence for a few somewhat generalized remarks on a matter concerning which I had some experimental knowledge, derived from the use of such eyes and ears as Nature had been pleased to endow me withal, and such report as I had been able to win from them. The subject which most readily suggested itself was the spirit and the working of those conceptions of life and polity which are lumped together, whether for reproach or commendation, under the name of Democracy. By temperament and education of a conservative turn, I saw the last years of that quaint Arcadia which French travellers saw with delighted amazement a century ago, and have watched the change (to me a sad one) from an agricultural to a proletary population. The testimony of Balaam should carry some conviction. I have grown to manhood and am now growing old with the growth of this system of government in my native land, have watched its advances, or what some would call its encroachments, gradual and irresistible as those of a glacier, have been an ear-witness to the forebodings of wise and good and timid men, and have lived to see those forebodings belied by the course of events, which is apt to show itself humorously careless of the reputation of prophets. I recollect hearing a sagacious old gentleman say in 1840 that the doing away with the property qualification for suffrage twenty years before had been the ruin of the State of Massachusetts; that it had put public credit and private estate alike at the mercy of demagogues. I lived to see that Commonwealth twenty odd years later paying the interest on her bonds in gold, though it cost her sometimes nearly three for one to keep her faith, and that while suffering an unparalleled drain of men and treasure in helping to sustain the unity and self-respect of the nation.

If universal suffrage has worked ill in our larger cities, as it certainly has, this has been mainly because the hands that wielded it were untrained to its use. There the election of a majority of the trustees of the public money is controlled by the most ignorant and vicious of a population which has come to us from abroad, wholly unpracticed in self-government and incapable of assimilation by American habits and methods. But the finances of our towns, where the native tradition is still dominant and whose affairs are discussed and settled in a public assembly of the people, have been in general honestly and prudently administered. Even in manufacturing towns, where a majority of the voters live by their daily wages, it is not so often the recklessness as the moderation of public expenditure that surprises an old-fashioned observer. "The beggar is in the saddle at last," cries Proverbial Wisdom. "Why, in the name of all

12. Arcadia—French officers and travelers who came to the United States during the American Revolution and in subsequent decades determinedly interpreted the republic in idealistic terms. See C. H. Sherrill, *French Memories of Eighteenth Century America* (1915). **14. proletary**—composed of the poorest people. **14. testimony of Balaam**—*Cf.* Num. 22:34. **25. twenty odd years later**—that is, during the American Civil War, when the dollar had depreciated to one-third its face value. The British had bought most of the bonds. **29. If universal suffrage**—This paragraph was not in the address as delivered. **39. "The beggar . . ."**—The usual form of the proverb is: Set a beggar on horseback and he'll ride to the devil.

former experience, doesn't he ride to the Devil?" Because in the very act of mounting he ceased to be a beggar and became part owner of the piece of property he bestrides. The last thing we need be anxious about is property. It always has friends or the means of making them. If riches have wings to fly away from their owner, they have wings also to escape danger.

I hear America sometimes playfully accused of sending you all your storms, and am in the habit of parrying the charge by alleging that we are enabled to do this because, in virtue of our protective system, we can afford to make better bad weather than anybody else. And what wiser use could we make of it than to export it in return for the paupers which some European countries are good enough to send over to us who have not attained to the same skill in the manufacture of them? But bad weather is not the worst thing that is laid at our door. A French gentleman, not long ago, forgetting Burke's monition of how unwise it is to draw an indictment against a whole people, has charged us with the responsibility of whatever he finds disagreeable in the morals or manners of his countrymen. If M. Zola or some other competent witness would only go into the box and tell us what those morals and manners were before our example corrupted them! But I confess that I find little to interest and less to edify me in these international bandyings of "You're another."

I shall address myself to a single point only in the long list of offences of which we are more or less gravely accused, because that really includes all the rest. It is that we are infecting the Old World with what seems to be thought the entirely new disease of Democracy. It is generally people who are in what are called easy circumstances who can afford the leisure to treat themselves to a handsome complaint, and these experience an immediate alleviation when once they have found a sonorous Greek name to abuse it by. There is something consolatory also, something flattering to their sense of personal dignity, and to that conceit of singularity which is the natural recoil from our uneasy consciousness of being commonplace, in thinking ourselves victims of a malady by which no one had ever suffered before. Accordingly they find it simpler to class under one comprehensive heading whatever they find offensive to their nerves, their tastes, their interests, or what they suppose to be their opinions, and christen it Democracy, much as physicians label every obscure disease gout, or as cross-grained fellows lay their ill-temper to the weather. But is it really a new ailment, and, if it be, is America answerable for it? Even if she were, would it account for the phylloxera, and hoof-and-mouth disease, and bad harvests, and bad English, and the German bands, and the Boers, and all the other discomforts with which these later days have vexed the souls of them

13-14. **Burke's monition**—In his *Speech on Conciliation with America* Burke said: "I do not know the method of drawing up an indictment against a whole people." 16. **Zola**—Emile Zola (1840-1902), French naturalistic novelist, who had just published *Germinal* (1885), and whose Rougon-Macquart series of novels was a bitter indictment of the Second Empire in France. 37. **phylloxera**—plant lice. 37. **hoof-and-mouth disease**—a disease of cattle, against which quarantine is necessary. 38. **German bands**—of street musicians. 38. **Boers**—In 1877 Great Britain had formally annexed the (Boer) Transvaal in South Africa; the Boers took arms, and in 1881 Great Britain formally recognized their independence.

that go in chariots? Yet I have seen the evil example of Democracy in America cited as the source and origin of things quite as heterogeneous and quite as little connected with it by any sequence of cause and effect. Surely this ferment is nothing new. It has been at work for centuries, and we are more conscious of it only because in this age of publicity, where the newspapers offer a rostrum to whoever has a grievance, or fancies that he has, the bubbles and scum thrown up by it are more noticeable on the surface than in those dumb ages when there was a cover of silence and suppression on the cauldron. Bernardo Navagero, speaking of the Provinces of Lower Austria in 1546, tells us that "in them there are five sorts of persons, Clergy, Barons, Nobles, Burghers, and Peasants. Of these last no account is made, *because they have no voice in the Diet.*"

Nor was it among the people that subversive or mistaken doctrines had their rise. A Father of the Church said that property was theft many centuries before Proudhon was born. Bourdaloue reaffirmed it. Montesquieu was the inventor of national workshops, and of the theory that the State owed every man a living. Nay, was not the Church herself the first organized Democracy? A few centuries ago the chief end of man was to keep his soul alive, and then the little kernel of leaven that sets the gases at work was religious, and produced the Reformation. Even in that, far-sighted persons like the Emperor Charles V. saw the germ of political and social revolution. Now that the chief end of man seems to have become the keeping of the body alive, and as comfortably alive as possible, the leaven also has become wholly political and social. But there had also been social upheavals before the Reformation and contemporaneously with it, especially among men of Teutonic race. The Reformation gave outlet and direction to an unrest already existing. Formerly the immense majority of men—our brothers—knew only their sufferings, their wants, and their desires. They are beginning now to know their opportunity and their power. All persons who see deeper than their plates are rather inclined to thank God for it than to bewail it, for the sores of Lazarus have a poison in them against which Dives has no antidote.

There can be no doubt that the spectacle of a great and prosperous Democracy on the other side of the Atlantic must react powerfully on the aspirations and political theories of men in the Old World who do not find things to their

5. rostrum—platform. **9. Lower Austria**—the country around Vienna. **12. Diet**—"Below the Peasants, it should be remembered, was still another even more helpless class, the servile farm-laborers. The same witness informs us that of the extraordinary imposts the Peasants paid nearly twice as much in proportion to their estimated property as the Barons, Nobles, and Burghers together. Moreover, the upper classes were assessed at their own valuation, while they arbitrarily fixed that of the Peasants, who had no voice. (*Relazioni degli Ambasciatori, Veneti,* Serie I., tomo i., pp. 378, 379, 389." (Lowell's note.) **14. Father of the Church**—presumably St. Augustine. **15. Proudhon**—Pierre Joseph Proudhon (1809-1865), French socialist, to whom is attributed the phrase "Property is theft." **15. Bourdaloue**—Louis Bourdaloue (1632-1704), famous French preacher. **15. Montesquieu**—Charles de Secondat, Baron de la Brède et de Montesquieu (1689-1755), author of *L'esprit des lois* (1748). **16. national workshops**—After the French Revolution of 1848 national workshops were established by the French government on the theory that society must guarantee each citizen an opportunity to work. **20. Charles V.**—(1500-1558) King of Spain and Emperor of the Holy Roman Empire, the greatest monarch of his time. **30-31. Lazarus . . . Dives**—*Cf.* Luke 16:19 ff. *Dives* is the Latin for rich man.

mind; but, whether for good or evil, it should not be overlooked that the acorn from which it sprang was ripened on the British oak. Every successive swarm that has gone out from this *officina gentium* has, when left to its own instincts—may I not call them hereditary instincts?—assumed a more or less thoroughly democratic form. This would seem to show, what I believe to be the fact, that the British Constitution, under whatever disguises of prudence or decorum, is essentially democratic. England, indeed, may be called a monarchy with democratic tendencies, the United States a democracy with conservative instincts. People are continually saying that America is in the air, and I am glad to think it is, since this means only that a clearer conception of human claims and human duties is beginning to be prevalent. The discontent with the existing order of things, however, pervaded the atmosphere wherever the conditions were favorable, long before Columbus, seeking the back door of Asia, found himself knocking at the front door of America. I say wherever the conditions were favorable, for it is certain that the germs of disease do not stick or find a prosperous field for their development and noxious activity unless where the simplest sanitary precautions have been neglected. "For this effect defective comes by cause," as Polonius said long ago. It is only by instigation of the wrongs of men that what are called the Rights of Man become turbulent and dangerous. It is then only that they syllogize unwelcome truths. It is not the insurrections of ignorance that are dangerous, but the revolts of intelligence:—

> "The wicked and the weak rebel in vain,
> Slaves by their own compulsion."

Had the governing classes in France during the last century paid as much heed to their proper business as to their pleasures or manners, the guillotine need never have severed that spinal marrow of orderly and secular tradition through which in a normally constituted state the brain sympathizes with the extremities and sends will and impulsion thither. It is only when the reasonable and practicable are denied that men demand the unreasonable and impracticable; only when the possible is made difficult that they fancy the impossible to be easy. Fairy tales are made out of the dreams of the poor. No; the sentiment which lies at the root of democracy is nothing new. I am speaking always of a sentiment, a spirit, and not of a form of government; for this was but the outgrowth of the other and not its cause. This sentiment is merely an expression of the natural wish of people to have a hand, if need be a controlling hand, in the management of their own affairs. What is new is that they are more and more gaining that control, and learning more and more how to be worthy of it. What we used to call the tendency or drift—what we are being taught to call more wisely the evolution of things—has for some time been setting steadily in this direction. There is no good in arguing with

3. **officina gentium**—factory of peoples. **17-18. "For . . . cause"**—The quotation is from *Hamlet,* Act II, scene 2, line 103. **22-23. "The wicked . . . compulsion"**—misquoted from Coleridge's "France: An Ode":

> "The Sensual and the Dark rebel in vain,
> Slaves by their own compulsion."

the inevitable. The only argument available with an east wind is to put on your overcoat. And in this case, also, the prudent will prepare themselves to encounter what they cannot prevent. Some people advise us to put on the brakes, as if the movement of which we are conscious were that of a railway train running down an incline. But a metaphor is no argument, though it be sometimes the gunpowder to drive one home and imbed it in the memory. Our disquiet comes of what nurses and other experienced persons call growing-pains, and need not seriously alarm us. They are what every generation before us—certainly every generation since the invention of printing—has gone through with more or less good fortune. To the door of every generation there comes a knocking, and unless the household, like the Thane of Cawdor and his wife, have been doing some deed without a name, they need not shudder. It turns out at worst to be a poor relation who wishes to come in out of the cold. The porter always grumbles and is slow to open. "Who's there, in the name of Beelzebub?" he mutters. Not a change for the better in our human housekeeping has ever taken place that wise and good men have not opposed it,—have not prophesied with the alderman that the world would wake up to find its throat cut in consequence of it. The world, on the contrary, wakes up, rubs its eyes, yawns, stretches itself, and goes about its business as if nothing had happened. Suppression of the slave trade, abolition of slavery, trade unions,—at all of these excellent people shook their heads despondingly, and murmured "Ichabod." But the trade unions are now debating instead of conspiring, and we all read their discussions with comfort and hope, sure that they are learning the business of citizenship and the difficulties of practical legislation.

One of the most curious of these frenzies of exclusion was that against the emancipation of the Jews. All share in the government of the world was denied for centuries to perhaps the ablest, certainly the most tenacious, race that had ever lived in it—the race to whom we owed our religion and the purest spiritual stimulus and consolation to be found in all literature—a race in which ability seems as natural and hereditary as the curve of their noses, and whose blood, furtively mingling with the bluest bloods in Europe, has quickened them with its own indomitable impulsion. We drove them into a corner, but they had their revenge, as the wronged are always sure to have it sooner or later. They made their corner the counter and banking-house of the world, and thence they rule it and us with the ignobler sceptre of finance. Your grandfathers mobbed Priestley only that you might set up his statue and make Birmingham the headquarters of English Unitarianism. We hear it said sometimes that this is an age of transition, as if that made matters clearer; but can any one point us to an age that was not? If he could, he would show us an age of stagnation. The question for us, as it has been for all before us, is to make the transition

11. knocking—*Cf. Macbeth,* Act II, scene 2. **11-12. Thane of Cawdor . . . wife**—Macbeth and Lady Macbeth. *Cf.* Act I, scene 3. **12. deed . . . name**—*Cf. gradual and easy, to see that our points are right so that the train may not come to grief. For we should remember that nothing is more natural for people whose education has been neglected than to spell evolution with an initial "r." A great man struggling with the storms of fate has been called a sublime spectacle; but surely a great man wrestling with these new forces that have come into the world, mastering them and controlling them to beneficent ends, would be a yet sublimer. Here is not a danger, and if there were it would be only a better school of manhood, a nobler scope for ambition. I have hinted that what people are afraid of in democracy is less the thing itself than what they conceive to be its necessary adjuncts and consequences. It is supposed to reduce all mankind to a dead level of mediocrity in character and culture, to vulgarize men's conceptions of life, and therefore their code of morals, manners, and conduct—to endanger the rights of property and possession. But I believe that the real gravamen of the charges lies in the habit it has of making itself generally disagreeable by asking the Powers that Be at the most inconvenient moment whether they are the powers that ought to be. If the powers that be are in a condition to give a satisfactory answer to this inevitable question, they need feel in no way discomfited by it.

Few people take the trouble of trying to find out what democracy really is. Yet this would be a great help, for it is our lawless and uncertain thoughts, it is the indefiniteness of our impressions, that fill darkness, whether mental or physical, with spectres and hobgoblins. Democracy is nothing more than an experiment in government, more likely to succeed in a new soil, but likely to be tried in all soils, which must stand or fall on its own merits as others have done before it. For there is no trick of perpetual motion in politics any more than in mechanics. President Lincoln defined democracy to be "the government of the people by the people for the people." This is a sufficiently compact statement of it as a political arrangement. Theodore Parker said that "Democracy meant not 'I'm as good as you are,' but 'You're as good as I am.'" And this is the ethical conception of it, necessary as a complement of the other; a conception which, could it be made actual and practical, would easily solve all the riddles that the old sphinx of political and social economy who sits by the roadside has been proposing to mankind from the beginning, and which mankind have shown such a singular talent for answering wrongly. In this sense Christ was the first true democrat that ever breathed, as the old dramatist Dekker said he was the first true gentleman. The characters may be easily doubled, so strong is the likeness between them. A beautiful and profound

1. **points**—switch points, called frogs by American railway men. 4. **great man . . . fate**—misquoted from Pope's prologue to Addison's "Cato": "A brave man struggling with the storms of fate . . ." (line 21). 14. **gravamen**—burden. 15. **Powers that Be**—*Cf.* Rom. 13:1. 26-27. **"the government . . . people"**—from the conclusion of the Gettysburg Address (1863). 28. **Theodore Parker**—(1810-1860) leading Unitarian minister and abolitionist. 32. **sphinx**—See note 15, p. 407. 36. **Dekker**—Thomas Dekker (1570?-1641?). At the end of Pt. 1 of *The Honest Whore* (1604) occurs the passage:

> "The best of men
> That e'er wore earth about him was a sufferer,
> A soft, meek, patient, humble, tranquil spirit,
> The first true gentleman that ever breath'd."

parable of the Persian poet Jellaladeen tells us that "One knocked at the Beloved's door, and a voice asked from within 'Who is there?' and he answered 'It is I.' Then the voice said, 'This house will not hold me and thee;' and the door was not opened. Then went the lover into the desert and fasted and prayed in solitude, and after a year he returned and knocked again at the door; and again the voice asked 'Who is there?' and he said 'It is thyself;' and the door was opened to him." But that is idealism, you will say, and this is an only too practical world. I grant it; but I am one of those who believe that the real will never find an irremovable basis till it rests on the ideal. It used to be thought that a democracy was possible only in a small territory, and this is doubtless true of a democracy strictly defined, for in such all the citizens decide directly upon every question of public concern in a general assembly. An example still survives in the tiny Swiss canton of Appenzell. But this immediate intervention of the people in their own affairs is not of the essence of democracy; it is not necessary, nor indeed, in most cases, practicable. Democracies to which Mr. Lincoln's definition would fairly enough apply have existed, and now exist, in which, though the supreme authority reside in the people, yet they can act only indirectly on the national policy. This generation has seen a democracy with an imperial figurehead, and in all that have ever existed the body politic has never embraced all the inhabitants included within its territory, the right to share in the direction of affairs has been confined to citizens, and citizenship has been further restricted by various limitations, sometimes of property, sometimes of nativity, and always of age and sex.

The framers of the American Constitution were far from wishing or intending to found a democracy in the strict sense of the word, though, as was inevitable, every expansion of the scheme of government they elaborated has been in a democratical direction. But this has been generally the slow result of growth, and not the sudden innovation of theory; in fact, they have a profound disbelief in theory, and knew better than to commit the folly of breaking with the past. They were not seduced by the French fallacy that a new system of government could be ordered like a new suit of clothes. They would as soon have thought of ordering a new suit of flesh and skin. It is only on the roaring loom of time that the stuff is woven for such a vesture of their thought and experience as they were meditating. They recognized fully the value of tradition and habit as the great allies of permanence and stability. They all had that distaste for innovation which belonged to their race, and many of them a distrust of human nature derived from their creed. The day of sentiment was over, and no dithyrambic affirmations or fine-drawn analyses of the Rights of Man would

1. **Jellaladeen**—Jalal-uddin Rumi (1207-1272), Persian poet, the author of the *Mesnevi*, a series of moral apologues. The story cited by Lowell may be read in N. H. Dole and Belle M. Walker, *Flowers from the Persian Poets*, 1901, p. 206. 13. **Appenzell**—canton in Switzerland which altogether covers only 162 square miles, and which is divided into two parts. 19. **imperial figurehead**—Louis Napoleon, known as Napoleon III (1808-1873), "elected" Emperor of the French in 1852, who proclaimed the "liberal (that is, democratic) empire." 31. **French fallacy**—During the nineteenth century France was twice an empire, twice a kingdom, and twice a republic. 33-34. **roaring . . . time**—The phrase is from Carlyle's version of part of *Faust* in *Sartor Resartus*, Bk. I, Chap. VIII.

serve their present turn. This was a practical question, and they addressed themselves to it as men of knowledge and judgment should. Their problem was how to adapt English principles and precedents to the new conditions of American life, and they solved it with singular discretion. They put as many obstacles as they could contrive, not in the way of the people's will, but of their whim. With few exceptions they probably admitted the logic of the then accepted syllogism,—democracy, anarchy, despotism. But this formula was framed upon the experience of small cities shut up to stew within their narrow walls, where the number of citizens made but an inconsiderable fraction of the inhabitants, where every passion was reverberated from house to house and from man to man with gathering rumor till every impulse became gregarious and therefore inconsiderate, and every popular assembly needed but an infusion of eloquent sophistry to turn it into a mob, all the more dangerous because sanctified with the formality of law.

Fortunately their case was wholly different. They were to legislate for a widely scattered population and for States already practised in the discipline of a partial independence. They had an unequalled opportunity and enormous advantages. The material they had to work upon was already democratical by instinct and habitude. It was tempered to their hands by more than a century's schooling in self-government. They had but to give permanent and conservative form to a ductile mass. In giving impulse and direction to their new institutions, especially in supplying them with checks and balances, they had a great help and safeguard in their federal organization. The different, sometimes conflicting, interests and social systems of the several States made existence as a Union and coalescence into a nation conditional on a constant practice of moderation and compromise. The very elements of disintegration were the best guides in political training. Their children learned the lesson of compromise only too well, and it was the application of it to a question of fundamental morals that cost us our civil war. We learned once for all that compromise makes a good umbrella but a poor roof; that it is a temporary expedient, often wise in party politics, almost sure to be unwise in statesmanship.

Has not the trial of democracy in America proved, on the whole, successful? If it had not, would the Old World be vexed with any fears of its proving contagious? This trial would have been less severe could it have been made with a people homogeneous in race, language, and traditions, whereas the United States have been called on to absorb and assimilate enormous masses of foreign population, heterogeneous in all these respects, and drawn mainly from that class which might fairly say that the world was not their friend, nor the world's law. The previous condition too often justified the traditional Irishman, who, landing in New York and asked what his politics were, inquired if there was a Government there, and on being told that there was,

14. law—"The effect of the electric telegraph in reproducing this trooping of emotion and perhaps of opinion is yet to be measured. The effect of Darwinism as a disintegrator of humanitarianism is also to be reckoned with." (Lowell's note.) **21. ductile**—easily led **39. world was not . . .** —*Romeo and Juliet,* Act v, scene 1, line 72.

retorted, "Thin I 'm agin it!" We have taken from Europe the poorest, the most ignorant, the most turbulent of her people, and have made them over into good citizens, who have added to our wealth, and who are ready to die in defence of a country and of institutions which they know to be worth dying for. The exceptions have been (and they are lamentable exceptions) where these hordes of ignorance and poverty have coagulated in great cities. But the social system is yet to seek which has not to look the same terrible wolf in the eyes. On the other hand, at this very moment Irish peasants are buying up the worn-out farms of Massachusetts, and making them productive again by the same virtues of industry and thrift that once made them profitable to the English ancestors of the men who are deserting them. To have achieved even these prosaic results (if you choose to call them so), and that out of materials the most discordant,—I might say the most recalcitrant,—argues a certain beneficent virtue in the system that could do it, and is not to be accounted for by mere luck. Carlyle said scornfully that America meant only roast turkey every day for everybody. He forgot that States, as Bacon said of wars, go on their bellies. As for the security of property, it should be tolerably well secured in a country where every other man hopes to be rich, even though the only property qualification be the ownership of two hands that add to the general wealth. Is it not the best security for anything to interest the largest possible number of persons in its preservation and the smallest in its division? In point of fact, far-seeing men count the increasing power of wealth and its combinations as one of the chief dangers with which the institutions of the United States are threatened in the not distant future. The right of individual property is no doubt the very corner-stone of civilization as hitherto understood, but I am a little impatient of being told that property is entitled to exceptional consideration because it bears all burdens of the State. It bears those, indeed, which can most easily be borne, but poverty pays with its person the chief expenses of war, pestilence, and famine. Wealth should not forget this, for poverty is beginning to think of it now and then. Let me not be misunderstood. I see as clearly as any man possibly can, and rate as highly, the value of wealth, and of hereditary wealth, as the security of refinement, the feeder of all those arts that ennoble and beautify life, and as making a country worth living in. Many an ancestral hall here in England has been a nursery of that culture which has been of example and benefit to all. Old gold has a civilizing virtue which new gold must grow old to be capable of secreting.

I should not think of coming before you to defend or to criticise any form of government. All have their virtues, all their defects, and all have illustrated

15. **Carlyle said**—in *Latter-Day Pamphlets*, No. 1 (1850): "Cease to brag to me of America, and its model institutions and constitutions. . . . Hitherto she bought ploughs and hammers, in a very successful manner; hitherto, in spite of her 'roast-goose with apple-sauce,' she is not much. 'Roast-goose with apple-sauce for the poorest working-man'; well, surely that is something . . . but that, even if it could continue, is by no means enough. . . . My friend, brag not yet of our American cousins!" **16. States**—probably a memory of Bacon's essay "Of the True Greatnesse of Kingdomes and Estates," though the saying "An army, like a serpent, goes on its belly" is ascribed to Frederick the Great.

one period or another in the history of the race, with signal services to humanity and culture. There is not one that could stand a cynical cross-examination by an experienced criminal lawyer, except that of a perfectly wise and perfectly good despot, such as the world has never seen, except in that white-haired king of Browning's, who

> "Lived long ago
> In the morning of the world,
> When Earth was nearer Heaven than now."

The English race, if they did not invent government by discussion, have at least carried it nearest to perfection in practice. It seems a very safe and reasonable contrivance for occupying the attention of the country, and is certainly a better way of settling questions than by push of pike. Yet, if one should ask it why it should not rather be called government by gabble, it would have to fumble in its pocket a good while before it found the change for a convincing reply. As matters stand, too, it is beginning to be doubtful whether Parliament and Congress sit at Westminster and Washington or in the editors' rooms of the leading journals, so thoroughly is everything debated before the authorized and responsible debaters get on their legs. And what shall we say of government by a majority of voices? To a person who in the last century would have called himself an Impartial Observer, a numerical preponderance seems, on the whole, as clumsy a way of arriving at truth as could well be devised, but experience has apparently shown it to be a convenient arrangement for determining what may be expedient or advisable or practicable at any given moment. Truth, after all, wears a different face to everybody, and it would be too tedious to wait till all were agreed. She is said to lie at the bottom of a well, for the very reason, perhaps, that whoever looks down in search of her sees his own image at the bottom, and is persuaded not only that he has seen the goddess, but that she is far better-looking than he had imagined.

The arguments against universal suffrage are equally unanswerable. "What," we exclaim, "shall Tom, Dick, and Harry have as much weight in the scale as I?" Of course, nothing could be more absurd. And yet universal suffrage has not been the instrument of greater unwisdom than contrivances of a more select description. Assemblies could be mentioned composed entirely of Masters of Arts and Doctors in Divinity which have sometimes shown traces of human passion or prejudice in their votes. Have the Serene Highnesses and Enlightened Classes carried on the business of Mankind so well, then, that there is no use in trying a less costly method? The democratic theory is that those Constitutions are likely to prove steadiest which have the broadest base, that the right to vote makes a safety-valve of every voter, and that the best way of teaching a man how to vote is to give him the chance of practice. For the question is no longer the academic one, "Is it wise to give every man the ballot?" but

6-8. "Lived . . . now"—from Pippa's third song in *Pippa Passes* by Browning.

rather the practical one, "Is it prudent to deprive whole classes of it any longer?" It may be conjectured that it is cheaper in the long run to lift men up than to hold them down, and that the ballot in their hands is less dangerous to society than a sense of wrong in their heads. At any rate this is the dilemma to which the drift of opinion has been for some time sweeping us, and in politics a dilemma is a more unmanageable thing to hold by the horns than a wolf by the ears. It is said that the right of suffrage is not valued when it is indiscriminately bestowed, and there may be some truth in this, for I have observed that what men prize most is a privilege, even if it be that of chief mourner at a funeral. But is there not danger that it will be valued at more than its worth if denied, and that some illegitimate way will be sought to make up for the want of it? Men who have a voice in public affairs are at once affiliated with one or other of the great parties between which society is divided, merge their individual hopes and opinions in its safer, because more generalized, hopes and opinions, are disciplined by its tactics, and acquire, to a certain degree, the orderly qualities of an army. They no longer belong to a class, but to a body corporate. Of one thing, at least, we may be certain, that, under whatever method of helping things to go wrong man's wit can contrive, those who have the divine right to govern will be found to govern in the end, and that the highest privilege to which the majority of mankind can aspire is that of being governed by those wiser than they. Universal suffrage has in the United States sometimes been made the instrument of inconsiderate changes, under the notion of reform, and this from a misconception of the true meaning of popular government. One of these has been the substitution in many of the States of popular election for official selection in the choice of judges. The same system applied to military officers was the source of much evil during our civil war, and, I believe, had to be abandoned. But it has been also true that on all great questions of national policy a reserve of prudence and discretion has been brought out at the critical moment to turn the scale in favor of a wiser decision. An appeal to the reason of the people has never been known to fail in the long run. It is, perhaps, true that, by effacing the principle of passive obedience, democracy, ill understood, has slackened the spring of that ductility to discipline which is essential to "the unity and married calm of States." But I feel assured that experience and necessity will cure this evil, as they have shown their power to cure others. And under what frame of policy have evils ever been remedied till they became intolerable, and shook men out of their indolent indifference through their fears?

We are told that the inevitable result of democracy is to sap the foundations of personal independence, to weaken the principle of authority, to lessen the respect due to eminence, whether in station, virtue, or genius. If these things were so, society could not hold together. Perhaps the best forcing-house of robust individuality would be where public opinion is inclined to be most

33. unity and married calm—*Troilus and Cressida*, Act 1, scene 3, line 100, from the speech of Ulysses on rank.

overbearing, as he must be of heroic temper who should walk along Piccadilly at the height of the season in a soft hat. As for authority, it is one of the symptoms of the time that the religious reverence for it is declining everywhere, but this is due partly to the fact that state-craft is no longer looked upon as a mystery, but as a business, and partly to the decay of superstition, by which I mean the habit of respecting what we are told to respect rather than what is respectable in itself. There is more rough and tumble in the American democracy than is altogether agreeable to people of sensitive nerves and refined habits, and the people take their political duties lightly and laughingly, as is, perhaps, neither unnatural nor unbecoming in a young giant. Democracies can no more jump away from their own shadows than the rest of us can. They no doubt sometimes make mistakes and pay honor to men who do not deserve it. But they do this because they believe them worthy of it, and though it be true that the idol is the measure of the worshipper, yet the worship has in it the germ of a nobler religion. But is it democracies alone that fall into these errors? I, who have seen it proposed to erect a statue to Hudson, the railway king, and have heard Louis Napoleon hailed as the savior of society by men who certainly had no democratic associations or leanings, am not ready to think so. But democracies have likewise their finer instincts. I have also seen the wisest statesman and most pregnant speaker of our generation, a man of humble birth and ungainly manners, of little culture beyond what his own genius supplied, become more absolute in power than any monarch of modern times through the reverence of his countrymen for his honesty, his wisdom, his sincerity, his faith in God and man, and the nobly humane simplicity of his character. And I remember another whom popular respect enveloped as with a halo, the least vulgar of men, the most austerely genial, and the most independent of opinion. Wherever he went he never met a stranger, but everywhere neighbors and friends proud of him as their ornament and decoration. Institutions which could bear and breed such men as Lincoln and Emerson had surely some energy for good. No, amid all the fruitless turmoil and miscarriage of the world, if there be one thing steadfast and of favorable omen, one thing to make optimism distrust its own obscure distrust, it is the rooted instinct in men to admire what is better and more beautiful than themselves. The touchstone of political and social institutions is their ability to supply them with worthy objects of this sentiment, which is the very tap-root of civilization and progress. There would seem to be no readier way of feeding it with the elements of growth and vigor than such an organization of society as will enable men to respect themselves, and so to justify them in respecting others.

Such a result is quite possible under other conditions than those of an

1-2. Piccadilly . . . hat—To walk in Piccadilly, which was the center of fashion in London, required wearing a high hat. Lowell's point is that a democracy that produces no more nonconformists than Piccadilly does is a failure. **16. Hudson**—George Hudson (1800-1871), English speculator and railroad-builder. The proposal to build a statue to him, while he was living, met general disapproval **17. savior of society**—*Cf.* Browning's poem "Prince Hohenstiel-Schwangau: Saviour of Society."

avowedly democratical Constitution. For I take it that the real essence of democracy was fairly enough defined by the First Napoleon when he said that the French Revolution meant "la carrière ouverte aux talents"—a clear pathway for merit of whatever kind. I should be inclined to paraphrase this by calling democracy that form of society, no matter what its political classification, in which every man had a chance and knew that he had it. If a man can climb, and feels himself encouraged to climb, from a coalpit to the highest position for which he is fitted, he can well afford to be indifferent what name is given to the government under which he lives. The Bailli of Mirabeau, uncle of the more famous tribune of that name, wrote in 1771: "The English are, in my opinion, a hundred times more agitated and more unfortunate than the very Algerines themselves, because they do not know and will not know till the destruction of their over-swollen power, which I believe very near, whether they are monarchy, aristocracy, or democracy, and wish to play the part of all three." England has not been obliging enough to fulfil the Bailli's prophecy, and perhaps it was this very carelessness about the name, and concern about the substance of popular government, this skill in getting the best out of things as they are, in utilizing all the motives which influence men, and in giving one direction to many impulses, that has been a principal factor of her greatness and power. Perhaps it is fortunate to have an unwritten Constitution, for men are prone to be tinkering the work of their own hands, whereas they are more willing to let time and circumstance mend or modify what time and circumstance have made. All free governments, whatever their name, are in reality governments by public opinion, and it is on the quality of this public opinion that their prosperity depends. It is, therefore, their first duty to purify the element from which they draw the breath of life. With the growth of democracy grows also the fear, if not the danger, that this atmosphere may be corrupted with poisonous exhalations from lower and more malarious levels, and the question of sanitation becomes more instant and pressing. Democracy in its best sense is merely the letting in of light and air. Lord Sherbrooke, with his usual epigrammatic terseness, bids you educate your future rulers. But would this alone be a sufficient safeguard? To educate the intelligence is to enlarge the horizon of its desires and wants. And it is well that this should be so. But the enterprise must go deeper and prepare the way for satisfying those desires and wants in so far as they are legitimate. What is really ominous of danger to the existing order of things is not democracy (which, properly understood, is a conservative force), but the Socialism which may find a fulcrum in it. If we cannot equalize conditions and fortunes any more than we can equalize the brains of men—and a very sagacious person has said that "where two men ride of a horse one must ride behind"—we can yet, perhaps, do something to correct those methods and influences that lead to enormous inequalities, and to

3. **"la . . . talents"**—opportunity open to the talented man—a phrase much used by Carlyle. 9-10. **Bailli . . . tribune**—Jean Antoine Riquetti, Bailli de Mirabeau, uncle of Honoré Gabriel Riquetti, Comte de Mirabeau (1749-1791), the greatest statesman of the French Revolution. 12. **Algerines**—who formed a despotic, piratical state in northern Africa in the eighteenth century. 30. **Sherbrooke**—Robert Lowe, Viscount Sherbrooke (1811-1892), Liberal English politician.

prevent their growing more enormous. It is all very well to pooh-pooh Mr. George and to prove him mistaken in his political economy. I do not believe that land should be divided because the quantity of it is limited by nature. Of what may this not be said? *A fortiori,* we might on the same principle insist on a division of human wit, for I have observed that the quantity of this has been even more inconveniently limited. Mr. George himself has an inequitably large share of it. But he is right in his impelling motive; right, also, I am convinced, in insisting that humanity makes a part, by far the most important part, of political economy; and in thinking man to be of more concern and more convincing than the longest columns of figures in the world. For unless you include human nature in your addition, your total is sure to be wrong and your deductions from it fallacious. Communism means barbarism, but Socialism means, or wishes to mean, cooperation and community of interests, sympathy, the giving to the hands not so large a share as to the brains, but a larger share than hitherto in the wealth they must combine to produce—means, in short, the practical application of Christianity to life, and has in it the secret of an orderly and benign reconstruction. State Socialism would cut off the very roots in personal character—self-help, forethought, and frugality—which nourish and sustain the trunk and branches of every vigorous Commonwealth.

I do not believe in violent changes, nor do I expect them. Things in possession have a very firm grip. One of the strongest cements of society is the conviction of mankind that the state of things into which they are born is a part of the order of the universe, as natural, let us say, as that the sun should go round the earth. It is a conviction that they will not surrender except on compulsion, and a wise society should look to it that this compulsion be not put upon them. For the individual man there is no radical cure, outside of human nature itself, for the evils to which human nature is heir. The rule will always hold good that you must

"Be your own palace or the world's your gaol."

But for artificial evils, for evils that spring from want of thought, thought must find a remedy somewhere. There has been no period of time in which wealth has been more sensible of its duties than now. It builds hospitals, it establishes missions among the poor, it endows schools. It is one of the advantages of accumulated wealth, and of the leisure it renders possible, that people have time to think of the wants and sorrows of their fellows. But all these remedies are partial and palliative merely. It is as if we should apply plasters to a single pustule of the small-pox with a view of driving out the disease. The true way is to discover and to extirpate the germs. As society is now constituted these are in the air it breathes, in the water it drinks, in things that seem, and which it has always believed, to be the most innocent and healthful. The evil elements it neglects corrupt these in their springs and pollute them in their courses. Let us be of good cheer, however, remembering that the misfortunes hardest to

2. George—Henry George (1839-1897), single-taxer, and author of *Progress and Poverty* (1879). **4. A fortiori**—with greater force. **29. "Be your . . . gaol"**—somewhat misquoted from John Donne: "Be thine own palace, or the world's thy jail."

bear are those which never come. The world has outlived much, and will outlive a great deal more, and men have contrived to be happy in it. It has shown the strength of its constitution in nothing more than in surviving the quack medicines it has tried. In the scales of the destinies brawn will never weigh so much as brain. Our healing is not in the storm or in the whirlwind, it is not in monarchies, or aristocracies, or democracies, but will be revealed by the still small voice that speaks to the conscience and the heart, prompting us to a wider and wiser humanity.

HERMAN MELVILLE

1819-1891

I. "THE MAN WHO LIVED AMONG THE CANNIBALS" (1819–1844)

1819 August 1, born in New York City, second son and third child of Allan and Maria Gansevoort Melville.

1824 Attended elementary schools in New York. Visits to the Gansevoort family in Albany during the summers.

1830 His business failing, Allan Melville removed with his family to Albany. Melville entered the Albany Academy.

1832 Death of the father left the family in straitened circumstances.

1834 Melville became a clerk in the New York State Bank, Albany; and also in his brother's store.

1836 Visited his uncle's home in Pittsfield, Massachusetts. Taught school.

1837–1841 Years of obscurity. Among other activities Melville taught school at Greenbush (East Albany), New York.

1839 Melville's first published articles, two "Fragments from a Writing Desk" in the *Democratic Press and Lansingburgh Advertiser,* May 4 and 18. Sailed for Liverpool on June 5 aboard the *St. Lawrence.* Discharged on return of ship.

1841 January 3, shipped on the *Acushnet* whaling vessel from Fairhaven, Massachusetts, bound for the Pacific.

1842 July 9(?), deserted in the Marquesas Islands; and with Richard Tobias Greene ("Toby") went to live among the Typees (cannibals). "Rescued" and went aboard the *Lucy Ann* whaler. In September, with other members of the crew, under technical arrest in Tahiti, which he left with a companion to work as a laborer on a neighboring island. Taken on the *Leviathan* whaler, and voyaged with her to Japan(?) and the Hawaiian Islands.

1843 August 17, enlisted at Honolulu as a common sailor on the U.S.S. *United States.* During the voyage to Boston, Melville narrowly avoided having to endure an unjust flogging; and just escaped death by drowning.

1844 October 14, discharged at Boston.

II. "FROM MY TWENTY-FIFTH YEAR I DATE MY LIFE" (1844–1853)

1844 Living at Lansingburg (near Albany) with his mother and family, and writing *Typee.*

1845 *Typee* completed; published by John Murray in London (New York ed., 1846; "expurgated" edition, 1849).

1847 January, *Omoo* published. August 4, married Elizabeth Shaw of Boston. Removed to New York City later in the year.

1849 February 16, Malcolm Melville born. *Mardi* published, April; *Redburn,*

August. At work on *Whitejacket*. Sailed to London October 11 to arrange for publication of two last named, returning February 2, 1850.

1850 Melville and the family went to Pittsfield for the summer, and in October bought Arrowhead farm near Pittsfield, Hawthorne being a near neighbor (at Lenox) until November, 1851. At work on *Moby Dick*.

1851 *Moby Dick* published. At work on *Pierre*.

1852 *Pierre* published. Denounced by critics.

1853 Plates of Melville's novels destroyed by fire at the publisher's.

III. DEEPENING SHADOWS (1853–1891)

1853 Sought consular appointment in vain. Contributed to *Putnam's Monthly Magazine* and *Harper's Magazine* (to 1856).

1855 *Israel Potter* published, after appearing serially in *Putnam's*.

1856 *Piazza Tales* published. Trip to London, the Mediterranean, and Palestine laid the foundation for *Clarel*.

1857 *The Confidence Man* published. Tried lecturing, which he continued for three years. Commenced composition of verse.

1860 Trip to San Francisco with his brother, returning by Panama.

1863 October, removed to New York City with the family.

1866 *Battle-Pieces* (first book of verse) published. December 5, Melville appointed customs inspector, holding the post to January, 1886, when an inheritance received by his wife enabled him to resign.

1876 *Clarel* (second book of verse) published.

1888 *John Marr and Other Poems* published.

1891 *Timoleon* published. *Billy Budd* completed. September 28, Melville died in New York City.

1924 *Billy Budd* published.

Sedgwick, *Herman Melville: The Tragedy of Mind,* Harvard University Press, 1944. Eleanor M. Metcalfe, ed., *Journal of a Visit to London and the Continent, by Herman Melville, 1848-1850,* Harvard University Press, 1948.

BIBLIOGRAPHY AND EDITIONS: There is no separate bibliography, but see *Literary History of the United States,* Vol. III, pp. 647-54. The standard edition is *Works of Herman Melville,* Wells, 1922-24, 16 vols., but another edition is in progress, having been passed from publisher to publisher. Of this edition there have appeared *Collected Poems,* ed. Howard P. Vincent, Packard, 1945, 1947; *Piazza Tales,* ed. E. S. Oliver, Hendricks House, 1948; *Pierre,* ed. Henry S. Murray, Hendricks House, 1949. See also *The Shorter Novels of Herman Melville,* ed. Raymond Weaver, Liveright, 1928; *Moby Dick,* ed. Willard Thorp, Oxford, 1947; and *Melville's Billy Budd,* ed. F. B. Freeman, Harvard University Press, 1948.

CRITICISM: The flood of critical articles on Melville should be followed in the usual bibliographical guides. For useful critical books see Charles R. Anderson, *Melville in the South Seas,* Columbia University Press, 1939, and William Braswell, *Melville's Religious Thought,* Duke University Press, 1943. Excellent both for bibliographical guidance and for interpretation is Willard Thorp, ed., *Representative Selections from Herman Melville,* American Book Co., 1938.

The two most remarkable facts about the literary fame of Herman Melville are the almost complete neglect into which he fell in the latter part of the nineteenth

century, and the lyrical enthusiasm of the rediscovery of him in the twentieth. To the nineteenth century he was largely the teller of sea tales—an American rival of Captain Marryat; to the twentieth, he has become the epitome of the bitter fate of the artist under the industrial régime. Pursuing this interpretation, critics have read into his novels symbolical meanings which are perhaps not always intended; and, fortified by large draughts of Freudian psychology, have developed what amounts to a Melville legend. As in other such cases, the pointer is likely to stabilize itself somewhere between these two extremes. The nineteenth century certainly overlooked the larger philosophical implications of works like *Moby Dick* and *Mardi,* and the twentieth has tended to overlook, minimize, or excuse the grave artistic blemishes (especially in point of style) of Melville's novels.

Like Borrow, whom he in many points resembles, Melville spun the stuff of autobiography into books that are neither fiction nor fact but a middle term between the two. His romances are a vast confession, but a confession veiled in both deliberate and unconscious obscurities. These obscurities arise from a number of causes, among which a certain wilfulness must be counted; but they arise also from a certain confusion in Melville himself. In his writing there is a perpetual tension between romantic and realistic elements, between a thirst for epic largeness and a vivid sense of the actual. Thus in "Benito Cereno" Melville bases his tale upon a highly factual record in a forgotten travel book, but certain portions of the narrative are embroidered with much romantic and macabre detail; and not content to let his story speak for itself, he insists at the end on driving home its philosophic implications. Similar threads of artistic method are woven into the huge tapestry which is *Moby Dick*. Touched by the transcendental atmosphere of his creative period, Melville was yet compelled to base what he wrote upon the actual, upon what he had himself seen and experienced and felt; and these "realistic" elements, under the spell of his dilating imagination, frequently swell to abnormal proportions. Hence arise both the greatness and the failure of his method, and hence it is that the riddle of his personality and the enigma of his purposes have so fascinated the contemporary literary world.

BENITO CERENO

"Benito Cereno" was first published serially in *Putnam's Monthly Magazine* for October, November, and December, 1855; and then collected into the *Piazza Tales* (1856). The text of the *Piazza Tales,* here reprinted, was revised, and differs both in minor matters of substance and in punctuation from the magazine version. The most important changes in substance are indicated in the notes. Melville founded his story on Chapter XVIII of *A Narrative of Voyages and Travels, in the Northern and Southern Hemispheres: Comprising Three Voyages Round the World; together with a Voyage of Survey and Discovery, in the Pacific Ocean and Oriental Islands* by Amasa Delano (Boston, 1817). This chapter has been conveniently reprinted in the *Publications of the Modern Language Association,* Vol. XLIII, No. 2 (June, 1928, pp. 502-32), in an article by Harold H. Scudder entitled "Melville's *Benito Cereno* and Captain Delano's Voyages." Melville used his original much as Shakespeare used Holinshed's *Chronicles;* generally speaking, he took over the substance of the narrative, and found most of his characters in Delano's book. He added the atmospheric effects, the macabre details, the detailed description of the Spanish ship, the oakum-pickers and the hatchet-polishers, and various details of the plot. He also changed the names of the ships and the time of the action.

The island of Santa Maria, where the action takes place, is just off the coast of north-central Chile, not very far from the city of Concepción. A study of the map of the Pacific will make clear most of the geographical details.

Where the text of the *Putnam's Monthly Magazine* version differs importantly from that of the version in the *Piazza Tales,* this is indicated in the footnotes by (P).

IN THE year 1799, Captain Amasa Delano, of Duxbury, in Massachusetts, commanding a large sealer and general trader, lay at anchor with a valuable cargo, in the harbor of St. Maria—a small, desert, uninhabited island towards the southern extremity of the long coast of Chili. There he had touched for water.

On the second day, not long after dawn, while lying in his berth, his mate came below, informing him that a strange sail was coming into the bay. Ships were then not so plenty in those waters as now. He rose, dressed, and went on deck.

The morning was one peculiar to that coast. Everything was mute and calm; everything gray. The sea, though undulated into long roods of swells, seemed fixed, and was sleeked at the surface like waved lead that has cooled and set in the smelter's mould. The sky seemed a gray surtout. Flights of troubled gray fowl, kith and kin with flights of troubled gray vapors among which they were mixed, skimmed low and fitfully over the waters, as swallows over meadows before storms. Shadows present, foreshadowing deeper shadows to come.

To Captain Delano's surprise, the stranger, viewed through the glass, showed no colors; though to do so upon entering a haven, however unhabited in its shores, where but a single other ship might be lying, was the custom among peaceful seamen of all nations. Considering the lawlessness and loneliness of the spot, and the sort of stories, at that day, associated with those seas, Captain Delano's surprise might have deepened into some uneasiness had he not been a person of a singularly undistrustful good nature, not liable, except on extraordinary and repeated incentives, and hardly then, to indulge in personal alarms, any way involving the imputation of malign evil in man. Whether, in view of what humanity is capable, such a trait implies, along with a benevolent heart, more than ordinary quickness and accuracy of intellectual perception, may be left to the wise to determine.

But whatever misgivings might have obtruded on first seeing the stranger, would almost, in any seaman's mind, have been dissipated by observing that, the ship, in navigating into the harbor, was drawing too near the land; a sunken reef making out off her bow. This seemed to prove her a stranger, indeed, not only to the sealer, but the island; consequently, she could be no wonted freebooter on that ocean. With no small interest, Captain Delano continued to watch her—a proceeding not much facilitated by the vapors partly mantling the hull, through which the far matin light from her cabin streamed equivocally enough; much like the sun—by this time hemisphered on the rim of the horizon, and, apparently, in company with the strange ship, enter-

4. **southern extremity**—It is not clear why Melville has shifted the position of the island southward. 11. **roods**—A rood is a linear measure of about 7 or 8 yards. 13. **surtout**—"mantle" (P). 17. **glass**—telescope. 24. **incentives**—"excitement" (P). 31-32. **land; a sunken reef**—"land, for her own safety's sake, owing to a sunken reef" (P). 37. **hemisphered**—"crescented" (P).

ing the harbor—which, wimpled by the same low, creeping clouds, showed not unlike a Lima intriguante's one sinister eye peering across the Plaza from the Indian loop-hole of her dusk *saya-y-manta.*

It might have been but a deception of the vapors, but, the longer the stranger was watched the more singular appeared her manoeuvres. Ere long it seemed hard to decide whether she meant to come in or no—what she wanted, or what she was about. The wind, which had breezed up a little during the night, was now extremely light and baffling, which the more increased the apparent uncertainty of her movements.

Surmising, at last, that it might be a ship in distress, Captain Delano ordered his whale-boat to be dropped, and, much to the wary opposition of his mate, prepared to board her, and, at the least, pilot her in. On the night previous, a fishing-party of the seamen had gone a long distance to some detached rocks out of sight from the sealer, and, an hour or two before daybreak, had returned, having met with no small success. Presuming that the stranger might have been long off soundings, the good captain put several baskets of the fish, for presents, into his boat, and so pulled away. From her continuing too near the sunken reef, deeming her in danger, calling to his men, he made all haste to apprise those on board of their situation. But, some time ere the boat came up, the wind, light though it was, having shifted, had headed the vessel off, as well as partly broken the vapors from about her.

Upon gaining a less remote view, the ship, when made signally visible on the verge of the leaden-hued swells, with the shreds of fog here and there raggedly furring her, appeared like a white-washed monastery after a thunderstorm, seen perched upon some dun cliff among the Pyrenees. But it was no purely fanciful resemblance which now, for a moment, almost led Captain Delano to think that nothing less than a ship-load of monks was before him. Peering over the bulwarks were what really seemed, in the hazy distance, throngs of dark cowls; while, fitfully revealed through the open port-holes, other dark moving figures were dimly descried, as of Black Friars pacing the cloisters.

Upon a still nigher approach, this appearance was modified, and the true character of the vessel was plain—a Spanish merchantman of the first class, carrying negro slaves, amongst other valuable freight, from one colonial port to another. A very large, and, in its time, a very fine vessel, such as in those days were at intervals encountered along that main; sometimes superseded Acapulco treasure-ships, or retired frigates of the Spanish king's navy, which, like superannuated Italian palaces, still, under a decline of masters, preserved signs of former state.

As the whale-boat drew more and more nigh, the cause of the peculiar pipe-clayed aspect of the stranger was seen in the slovenly neglect pervading her. The spars, ropes, and great part of the bulwarks, looked woolly, from long unacquaintance with the scraper, tar, and the brush. Her keel seemed laid, her ribs put together, and she launched, from Ezekiel's Valley of Dry Bones.

2. intriguante—flirtatious woman. **3. saya-y-manta**—skirt-and-shawl. **16. soundings**—shallower water near the shore. **36. main**—ocean, that is, main ocean. **37. Acapulco treasure-ships**—In the eighteenth century Spanish ships regularly carried gold from this port in Mexico to Spain. **44. Ezekiel's Valley**—*Cf.* Ezek. 37: 1-10.

In the present business in which she was engaged, the ship's general model and rig appeared to have undergone no material change from their original warlike and Froissart pattern. However, no guns were seen.

The tops were large, and were railed about with what had once been octagonal net-work, all now in sad disrepair. These tops hung overhead like three ruinous aviaries, in one of which was seen perched on a ratlin, a white noddy, a strange fowl, so called from its lethargic somnambulistic character, being frequently caught by hand at sea. Battered and mouldy, the castellated forecastle seemed some ancient turret, long ago taken by assault, and then left to decay. Toward the stern, two high-raised quarter galleries—the balustrades here and there covered with dry, tindery sea-moss—opening out from the unoccupied state-cabin, whose dead-lights, for all the mild weather, were hermetically closed and calked—these tenantless balconies hung over the sea as if it were the grand Venetian canal. But the principal relic of faded grandeur was the ample oval of the shield-like stern-piece, intricately carved with the arms of Castile and Leon, medallioned about by groups of mythological or symbolical devices; uppermost and central of which was a dark satyr in a mask, holding his foot on the prostrate neck of a writhing figure, likewise masked.

Whether the ship had a figure-head, or only a plain beak, was not quite certain, owing to canvas wrapped about that part, either to protect it while undergoing a re-furbishing, or else decently to hide its decay. Rudely painted or chalked, as in a sailor freak, along the forward side of a sort of pedestal below the canvas, was the sentence, *"Seguid vuestro jefe"* (follow your leader); while upon the tarnished head-boards, near by, appeared, in stately capitals, once gilt, the ship's name "SAN DOMINICK," each letter streakingly corroded with tricklings of copper-spike rust; while, like mourning weeds, dark festoons of sea-grass slimily swept to and fro over the name, with every hearse-like roll of the hull.

As, at last, the boat was hooked from the bow along toward the gangway amidship, its keel, while yet some inches separated from the hull, harshly grated as on a sunken coral reef. It proved a huge bunch of conglobated barnacles adhering below the water to the side like a wen—a token of baffling airs and long calms passed somewhere in those seas.

Climbing the side, the visitor was at once surrounded by a clamorous throng of whites and blacks, but the latter outnumbering the former more than could have been expected, negro transportation-ship as the stranger in port was. But, in one language, and as with one voice, all poured out a common tale of suffering; in which the negresses, of whom there were not a few, exceeded the others in their dolorous vehemence. The scurvy, together with a fever, had

3. **Froissart pattern**—This phrase is apparently peculiar to Melville. He seems to have in mind the early Tudor sailing vessels. 4. **tops**—A top is a platform surrounding the head of the lower mast, serving, among other uses, as a standing-place for the sailors. 6. **ratlin**—a transverse rope attached to the shrouds of a vessel; the ratlins serve as ladders. 10. **quarter galleries**—platforms on the after parts of the vessel's sides. 12. **dead-lights**—shutters fitted over the port, or cabin, windows of the ship, to keep out the water. 16. **Castile and Leon**—The kingdom of Spain was formed by the union of the kingdoms of Castile and Leon. 25. **San Dominick**—The proper form would be San Domingo. In reality the Spanish ship was called the *Tryal*. 29 **was hooked**—that is, was held off from the vessel's side with a boat hook, and then hooked along to the gangway.

swept off a great part of their number, more especially the Spaniards. Off Cape Horn, they had narrowly escaped shipwreck; then, for days together, they had lain tranced without wind; their provisions were low; their water next to none; their lips that moment were baked.

While Captain Delano was thus made the mark of all eager tongues, his one eager glance took in all the faces, with every other object about him.

Always upon first boarding a large and populous ship at sea, especially a foreign one, with a nondescript crew such as Lascars or Manilla men, the impression varies in a peculiar way from that produced by first entering a strange house with strange inmates in a strange land. Both house and ship—the one by its walls and blinds, the other by its high bulwarks like ramparts—hoard from view their interiors till the last moment; but in the case of the ship there is this addition; that the living spectacle it contains, upon its sudden and complete disclosure, has, in contrast with the blank ocean which zones it, something of the effect of enchantment. The ship seems unreal; these strange costumes, gestures, and faces, but a shadowy tableau just emerged from the deep, which directly must receive back what it gave.

Perhaps it was some such influence, as above is attempted to be described, which, in Captain Delano's mind, heightened whatever, upon a staid scrutiny, might have seemed unusual; especially the conspicuous figures of four elderly grizzled negroes, their heads like black, doddered willow tops, who, in venerable contrast to the tumult below them, were couched sphynx-like, one on the starboard cat-head, another on the larboard, and the remaining pair face to face on the opposite bulwarks above the main-chains. They each had bits of unstranded old junk in their hands, and, with a sort of stoical self-content, were picking the junk into oakum, a small heap of which lay by their sides. They accompanied the task with a continuous, low, monotonous chant; droning and druling away like so many gray-headed bag-pipers playing a funeral march.

The quarter-deck rose into an ample elevated poop, upon the forward verge of which, lifted, like the oakum-pickers, some eight feet above the general throng, sat along in a row, separated by regular spaces, the cross-legged figures of six other blacks; each with a rusty hatchet in his hand, which, with a bit of brick and a rag, he was engaged like a scullion in scouring; while between each two was a small stack of hatchets, their rusted edges turned forward awaiting a like operation. Though occasionally the four oakum-pickers would briefly address some person or persons in the crowd below, yet the six hatchet-polishers neither spoke to others, nor breathed a whisper among themselves, but sat intent upon their task, except at intervals, when, with the peculiar love in negroes of uniting industry with pastime, two-and-two they sideways clashed their hatchets together, like cymbals, with a barbarous din. All six, unlike the generality, had the raw aspect of unsophisticated Africans.

2. **Cape Horn**—the southernmost point of South America, dreaded for its storms. 8. **Lascars**—East Indian sailors employed on European vessels. 8. **Manilla**—The Philippine Islands then belonged to Spain. 21. **doddered**—deprived of branches through age. 23. **cat-head**—a projecting timber near the bow of the ship, to which the anchor is hoisted. 24. **main-chains**—chains having to do with the mainmast. 25. **junk**—pieces of old cordage. 26. **oakum**—loose fiber picked from old ropes, and used to calk seams. 30. **quarter-deck**—that part of the upper deck abaft of the mainmast, reserved for the officers and passengers.

But that first comprehensive glance which took in those ten figures, with scores less conspicuous, rested but an instant upon them, as, impatient of the hubbub of voices, the visitor turned in quest of whomsoever it might be that commanded the ship.

But as if not unwilling to let nature make known her own case among his suffering charge, or else in despair of restraining it for the time, the Spanish captain, a gentlemanly, reserved-looking, and rather young man to a stranger's eye, dressed with singular richness, but bearing plain traces of recent sleepless cares and disquietudes, stood passively by, leaning against the main-mast, at one moment casting a dreary, spiritless look upon his excited people, at the next an unhappy glance toward his visitor. By his side stood a black of small stature, in whose rude face, as occasionally, like a shepherd's dog, he mutely turned it up into the Spaniard's, sorrow and affection were equally blended.

Struggling through the throng, the American advanced to the Spaniard, assuring him of his sympathies, and offering to render whatever assistance might be in his power. To which the Spaniard returned, for the present but grave and ceremonious acknowledgments, his national formality dusked by the saturnine mood of ill-health.

But losing no time in mere compliments, Captain Delano, returning to the gangway, had his basket of fish brought up; and as the wind still continued light, so that some hours at least must elapse ere the ship could be brought to the anchorage, he bade his men return to the sealer, and fetch back as much water as the whale-boat could carry, with whatever soft bread the steward might have, all the remaining pumpkins on board, with a box of sugar, and a dozen of his private bottles of cider.

Not many minutes after the boat's pushing off, to the vexation of all, the wind entirely died away, and the tide turning, began drifting back the ship helplessly seaward. But trusting this would not long last, Captain Delano sought, with good hopes, to cheer up the strangers, feeling no small satisfaction that, with persons in their condition he could—thanks to his frequent voyages along the Spanish main—converse with some freedom in their native tongue.

While left alone with them, he was not long in observing some things tending to heighten his first impressions; but surprise was lost in pity, both for the Spaniards and blacks, alike evidently reduced from scarcity of water and provisions; while long-continued suffering seemed to have brought out the less good-natured qualities of the negroes, besides, at the same time, impairing the Spaniard's authority over them. But, under the circumstances, precisely this condition of things was to have been anticipated. In armies, navies, cities, or families, in nature herself, nothing more relaxes good order than misery. Still, Captain Delano was not without the idea, that had Benito Cereno been a man of greater energy, misrule would hardly have come to the present pass. But the debility, constitutional or induced by the hardships, bodily and mental, of the Spanish captain, was too obvious to be overlooked. A prey to settled dejection, as if long mocked with hope he would not now indulge it, even when it had ceased to be a mock, the prospect of that day or evening at furthest,

lying at anchor, with plenty of water for his people, and a brother captain to counsel and befriend, seemed in no perceptible degree to encourage him. His mind appeared unstrung, if not still more seriously affected. Shut up in these oaken walls, chained to one dull round of command, whose unconditionality cloyed him, like some hypochondriac abbot he moved slowly about, at times suddenly pausing, starting, or staring, biting his lip, biting his finger-nail, flushing, paling, twitching his beard, with other symptoms of an absent or moody mind. This distempered spirit was lodged, as before hinted, in as distempered a frame. He was rather tall, but seemed never to have been robust, and now with nervous suffering was almost worn to a skeleton. A tendency to some pulmonary complaint appeared to have been lately confirmed. His voice was like that of one with lungs half gone—hoarsely suppressed, a husky whisper. No wonder that, as in this state he tottered about, his private servant apprehensively followed him. Sometimes the negro gave his master his arm, or took his handkerchief out of his pocket for him; performing these and similar offices with that affectionate zeal which transmutes into something filial or fraternal acts in themselves but menial; and which has gained for the negro the repute of making the most pleasing body-servant in the world; one, too, whom a master need be on no stiffly superior terms with, but may treat with familiar trust; less a servant than a devoted companion.

Marking the noisy indocility of the blacks in general, as well as what seemed the sullen inefficiency of the whites, it was not without humane satisfaction that Captain Delano witnessed the steady good conduct of Babo.

But the good conduct of Babo, hardly more than the ill-behavior of others, seemed to withdraw the half-lunatic Don Benito from his cloudy languor. Not that such precisely was the impression made by the Spaniard on the mind of his visitor. The Spaniard's individual unrest was, for the present, but noted as a conspicuous feature in the ship's general affliction. Still, Captain Delano was not a little concerned at what he could not help taking for the time to be Don Benito's unfriendly indifference toward himself. The Spaniard's manner, too, conveyed a sort of sour and gloomy disdain, which he seemed at no pains to disguise. But this the American in charity ascribed to the harassing effects of sickness, since, in former instances, he had noted that there are peculiar natures on whom prolonged physical suffering seems to cancel every social instinct of kindness; as if forced to black bread themselves, they deemed it but equity that each person coming nigh them should, indirectly, by some slight or affront, be made to partake of their fare.

But ere long Captain Delano bethought him that, indulgent as he was at the first, in judging the Spaniard, he might not, after all, have exercised charity enough. At bottom it was Don Benito's reserve which displeased him; but the same reserve was shown toward all but his personal attendant. Even the formal reports which, according to sea-usage, were at stated times made to him by some petty underling, either a white, mulatto or black, he hardly had patience enough to listen to, without betraying contemptuous aversion. His manner upon such occasions was, in its degree, not unlike that which might be sup-

23. **Babo**—In the original narrative the confidential servant is Muri; but Melville apparently preferred the suggestive name of Babo.

posed to have been his imperial countryman's, Charles V., just previous to the anchoritish retirement of that monarch from the throne.

This splenetic disrelish of his place was evinced in almost every function pertaining to it. Proud as he was moody, he condescended to no personal mandate. Whatever special orders were necessary, their delivery was delegated to his body-servant, who in turn transferred them to their ultimate destination, through runners, alert Spanish boys or slave boys, like pages or pilot-fish within easy call continually hovering round Don Benito. So that to have beheld this undemonstrative invalid gliding about, apathetic and mute, no landsman could have dreamed that in him was lodged a dictatorship beyond which, while at sea, there was no earthly appeal.

Thus, the Spaniard, regarded in his reserve, seemed as the involuntary victim of mental disorder. But, in fact, his reserve might, in some degree, have proceeded from design. If so, then here was evinced the unhealthy climax of that icy though conscientious policy, more or less adopted by all commanders of large ships, which, except in signal emergencies, obliterates alike the manifestation of sway with every trace of sociality; transforming the man into a block, or rather into a loaded cannon, which, until there is call for thunder, has nothing to say.

Viewing him in this light, it seemed but a natural token of the perverse habit induced by a long course of such hard self-restraint, that, notwithstanding the present condition of his ship, the Spaniard should still persist in a demeanor, which, however harmless, or it may be, appropriate, in a well-appointed vessel, such as the San Dominick might have been at the outset of the voyage, was anything but judicious now. But the Spaniard, perhaps, thought that it was with captains as with gods: reserve, under all events, must still be their cue. But probably this appearance of slumbering dominion might have been but an attempted disguise to conscious imbecility—not deep policy, but shallow device. But be all this as it might, whether Don Benito's manner was designed or not, the more Captain Delano noted its pervading reserve, the less he felt uneasiness at any particular manifestation of that reserve towards himself.

Neither were his thoughts taken up by the captain alone. Wonted to the quiet orderliness of the sealer's comfortable family of a crew, the noisy confusion of the San Dominick's suffering host repeatedly challenged his eye. Some prominent breaches, not only of discipline but of decency, were observed. These Captain Delano could not but ascribe, in the main, to the absence of those subordinate deck-officers to whom, along with higher duties, is entrusted what may be styled the police department of a populous ship. True, the old oakum-pickers appeared at times to act the part of monitorial constables to their countrymen, the blacks; but though occasionally succeeding in allaying trifling outbreaks now and then between man and man, they could do little or nothing toward establishing general quiet. The San Dominick was in the condition of a transatlantic emigrant ship, among whose multitude of living freight are some individuals, doubtless, as little troublesome as crates and bales;

1. **Charles V.**—Charles V (1500-1558), the most powerful European monarch of his age, retired to a monastery before his death. 7. **pilot-fish**—a species of fish which accompany sharks. 14. **here**—"in Don Benito" (P).

but the friendly remonstrances of such with their ruder companions are of not so much avail as the unfriendly arm of the mate. What the San Dominick wanted was, what the emigrant ship has, stern superior officers. But on these decks not so much as a fourth-mate was to be seen.

The visitor's curiosity was roused to learn the particulars of those mishaps which had brought about such absenteeism, with its consequences; because, though deriving some inkling of the voyage from the wails which at the first moment had greeted him, yet of the details no clear understanding had been had. The best account would, doubtless, be given by the captain. Yet at first the visitor was loth to ask it, unwilling to provoke some distant rebuff. But plucking up courage, he at last accosted Don Benito, renewing the expression of his benevolent interest, adding, that did he (Captain Delano) but know the particulars of the ship's misfortunes, he would, perhaps, be better able in the end to relieve them. Would Don Benito favor him with the whole story.

Don Benito faltered; then, like some somnambulist suddenly interfered with, vacantly stared at his visitor, and ended by looking down on the deck. He maintained this posture so long, that Captain Delano, almost equally disconcerted, and involuntarily almost as rude, turned suddenly from him, walking forward to accost one of the Spanish seamen for the desired information. But he had hardly gone five paces when, with a sort of eagerness Don Benito invited him back, regretting his momentary absence of mind, and professing readiness to gratify him.

While most part of the story was being given, the two captains stood on the after part of the main-deck, a privileged spot, no one being near but the servant.

"It is now a hundred and ninety days," began the Spaniard, in his husky whisper, "that this ship, well officered and well manned, with several cabin passengers—some fifty Spaniards in all—sailed from Buenos Ayres bound to Lima, with a general cargo, Paraguay tea and the like—and," pointing forward, "that parcel of negroes, now not more than a hundred and fifty, as you see, but then numbering over three hundred souls. Off Cape Horn we had heavy gales. In one moment, by night, three of my best officers, with fifteen sailors, were lost, with the main-yard; the spar snapping under them in the slings, as they sought, with heavers, to beat down the icy sail. To lighten the hull, the heavier sacks of mata were thrown into the sea, with most of the water-pipes lashed on deck at the time. And this last necessity it was, combined with the prolonged detentions afterwards experienced, which eventually brought about our chief causes of suffering. When—"

Here there was a sudden fainting attack of his cough, brought on, no doubt, by his mental distress. His servant sustained him, and drawing a cordial from his pocket placed it to his lips. He a little revived. But unwilling to leave him unsupported while yet imperfectly restored, the black with one arm still encircled his master, at the same time keeping his eye fixed on his face, as if to watch for the first sign of complete restoration, or relapse, as the event might prove.

34. **slings**—ropes to support a yard. 34. **heavers**—bars. 35. **mata**—Apparently Melville has a South American plant in mind. 36. **water-pipes**—water casks.

The Spaniard proceeded, but brokenly and obscurely, as one in a dream.

—"Oh, my God! rather than pass through what I have, with joy I would have hailed the most terrible gales; but—"

His cough returned and with increased violence; this subsiding, with reddened lips and closed eyes he fell heavily against his supporter.

"His mind wanders. He was thinking of the plague that followed the gales," plaintively sighed the servant; "my poor, poor master!" wringing one hand, and with the other wiping the mouth. "But be patient, Señor," again turning to Captain Delano, "these fits do not last long; master will soon be himself."

Don Benito reviving, went on; but as this portion of the story was very brokenly delivered, the substance only will here be set down.

It appeared that after the ship had been many days tossed in storms off the Cape, the scurvy broke out, carrying off numbers of the whites and blacks. When at last they had worked round into the Pacific, their spars and sails were so damaged, and so inadequately handled by the surviving mariners, most of whom were become invalids, that, unable to lay her northerly course by the wind, which was powerful, the unmanageable ship, for successive days and nights, was blown northwestward, where the breeze suddenly deserted her, in unknown waters, to sultry calms. The absence of the water-pipes now proved as fatal to life as before their presence had menaced it. Induced, or at least aggravated, by the more than scanty allowance of water, a malignant fever followed the scurvy; with the excessive heat of the lengthened calm, making such short work of it as to sweep away, as by billows, whole families of the Africans, and a yet larger number, proportionably, of the Spaniards, including, by a luckless fatality, every remaining officer on board. Consequently, in the smart west winds eventually following the calm, the already rent sails, having to be simply dropped, not furled, at need, had been gradually reduced to the beggar's rags they were now. To procure substitutes for his lost sailors, as well as supplies of water and sails, the captain, at the earliest opportunity, had made for Baldivia, the southernmost civilized port of Chili and South America; but upon nearing the coast the thick weather had prevented him from so much as sighting that harbor. Since which period, almost without a crew, and almost without canvas and almost without water, and, at intervals, giving its added dead to the sea, the San Dominick had been battle-dored about by contrary winds, inveigled by currents, or grown weedy in calms. Like a man lost in woods, more than once she had doubled upon her own track.

"But throughout these calamities," huskily continued Don Benito, painfully turning in the half embrace of his servant, "I have to thank those negroes you see, who, though to your inexperienced eyes appearing unruly, have, indeed, conducted themselves with less of restlessness than even their owner could have thought possible under such circumstances."

Here he again fell faintly back. Again his mind wandered; but he rallied, and less obscurely proceeded.

"Yes, their owner was quite right in assuring me that no fetters would be needed with his blacks; so that while, as is wont in this transportation, those

13. **scurvy**—a disease due to the lack of fresh fruit and vegetables.

negroes have always remained upon deck—not thrust below, as in the Guineamen—they have, also, from the beginning, been freely permitted to range within given bounds at their pleasure."

Once more the faintness returned—his mind roved—but, recovering, he resumed:

"But it is Babo here to whom, under God, I owe not only my own preservation, but likewise to him, chiefly, the merit is due, of pacifying his more ignorant brethren, when at intervals tempted to murmurings."

"Ah, master," sighed the black, bowing his face, "don't speak of me; Babo is nothing; what Babo has done was but duty."

"Faithful fellow!" cried Captain Delano. "Don Benito, I envy you such a friend; slave I cannot call him."

As master and man stood before him, the black upholding the white, Captain Delano could not but bethink him of the beauty of that relationship which could present such a spectacle of fidelity on the one hand and confidence on the other. The scene was heightened by the contrast in dress, denoting their relative positions. The Spaniard wore a loose Chili jacket of dark velvet; white small-clothes and stockings, with silver buckles at the knee and instep; a high-crowned sombrero, of fine grass; a slender sword, silver mounted, hung from a knot in his sash—the last being an almost invariable adjunct, more for utility than ornament, of a South American gentleman's dress to this hour. Excepting when his occasional nervous contortions brought about disarray, there was a certain precision in his attire, curiously at variance with the unsightly disorder around: especially in the belittered Ghetto, forward of the main-mast, wholly occupied by the blacks.

The servant wore nothing but wide trowsers, apparently, from their coarseness and patches, made out of some old topsail; they were clean, and confined at the waist by a bit of unstranded rope, which, with his composed, deprecatory air at times, made him look something like a begging friar of St. Francis.

However unsuitable for the time and place, at least in the blunt-thinking American's eyes, and however strangely surviving in the midst of all his afflictions, the toilette of Don Benito might not, in fashion at least, have gone beyond the style of the day among South Americans of his class. Though on the present voyage sailing from Buenos Ayres, he had avowed himself a native and resident of Chili, whose inhabitants had not so generally adopted the plain coat and once plebeian pantaloons; but, with a becoming modification, adhered to their provincial costume, picturesque as any in the world. Still, relatively to the pale history of the voyage, and his own pale face, there seemed [illegible] so incongruous in the Spaniard's apparel, as almost to suggest the image of an invalid courtier tottering about London streets in the time of the plague.

The portion of the narrative which, perhaps, most excited interest, as well as some surprise, considering the latitudes in question, was the long calms spoken of, and more particularly the ship's so long drifting about. Without communicating the opinion, of course, the American could not but impute at least part of the detentions both to clumsy seamanship and faulty navigation.

1-2. **Guinea-men**—slave ships bringing Negroes from the African coast to the New World.

Eyeing Don Benito's small, yellow hands, he easily inferred that the young captain had not got into command at the hawse-hole but the cabin-window; and if so, why wonder at incompetence, in youth, sickness, and gentility united?

But drowning criticism in compassion, after a fresh repetition of his sympathies, Captain Delano, having heard out his story, not only engaged, as in the first place, to see Don Benito and his people supplied in their immediate bodily needs, but, also, now further promised to assist him in procuring a large permanent supply of water, as well as some sails and rigging; and, though it would involve no small embarrassment to himself, yet he would spare three of his best seamen for temporary deck officers; so that without delay the ship might proceed to Conception, there fully to refit for Lima, her destined port.

Such generosity was not without its effect, even upon the invalid. His face lighted up; eager and hectic, he met the honest glance of his visitor. With gratitude he seemed overcome.

"This excitement is bad for master," whispered the servant, taking his arm, and with soothing words gently drawing him aside.

When Don Benito returned, the American was pained to observe that his hopefulness, like the sudden kindling in his cheek, was but febrile and transient.

Ere long, with a joyless mien, looking up towards the poop, the host invited his guest to accompany him there, for the benefit of what little breath of wind might be stirring.

As, during the telling of the story, Captain Delano had once or twice started at the occasional cymballing of the hatchet-polishers, wondering why such an interruption should be allowed, especially in that part of the ship, and in the ears of an invalid; and moreover, as the hatchets had anything but an attractive look, and the handlers of them still less so, it was, therefore, to tell the truth, not without some lurking reluctance, or even shrinking, it may be, that Captain Delano, with apparent complaisance, acquiesced in his host's invitation. The more so, since, with an untimely caprice of punctilio, rendered distressing by his cadaverous aspect, Don Benito, with Castilian bows, solemnly insisted upon his guest's preceding him up the ladder leading to the elevation; where, one on each side of the last step, sat for armorial supporters and sentries two of the ominous file. Gingerly enough stepped good Captain Delano between them, and in the instant of leaving them behind, like one running the gauntlet, he felt an apprehensive twitch in the calves of his legs.

But when, facing about, he saw the whole file, like so many organ-grinders, still stupidly intent on their work, unmindful of everything beside, he could not but smile at his late fidgety panic.

Presently, while standing with his host, looking forward upon the decks below, he was struck by one of those instances of insubordination previously alluded to. Three black boys, with two Spanish boys, were sitting together on the hatchets, scraping a rude wooden platter, in which some scanty mess had

2. **hawse-hole**—one of the holes in a ship's bow, through which a cable passes. That is, the captain had not had practical experience as a seaman. 3. **gentility**—"aristocracy" (P). 3. **united?**—"Such was his democratic conclusion" is added in (P). 39. **fidgety**—"fidgeting" (P). 40. **his host**—"Don Benito" (P).

recently been cooked. Suddenly, one of the black boys, enraged at a word dropped by one of his white companions, seized a knife, and, though called to forbear by one of the oakum-pickers, struck the lad over the head, inflicting a gash from which blood flowed.

In amazement, Captain Delano inquired what this meant. To which the pale Don Benito dully muttered, that it was merely the sport of the lad.

"Pretty serious sport, truly," rejoined Captain Delano. "Had such a thing happened on board the Bachelor's Delight, instant punishment would have followed."

At these words the Spaniard turned upon the American one of his sudden, staring, half-lunatic looks; then, relapsing into his torpor, answered, "Doubtless, doubtless, Señor."

Is it, thought Captain Delano, that this helpless man is one of those paper captains I've known, who by policy wink at what by power they cannot put down? I know no sadder sight than a commander who has little of command but the name.

"I should think, Don Benito," he now said, glancing towards the oakum-picker who had sought to interfere with the boys, "that you would find it advantageous to keep all your blacks employed, especially the younger ones, no matter at what useless task, and no matter what happens to the ship. Why, even with my little band, I find such a course indispensable. I once kept a crew on my quarter-deck thrumming mats for my cabin, when, for three days, I had given up my ship—mats, men, and all—for a speedy loss, owing to the violence of a gale, in which we could do nothing but helplessly drive before it."

"Doubtless, doubtless," muttered Don Benito.

"But," continued Captain Delano, again glancing upon the oakum-pickers and then at the hatchet-polishers, near by, "I see you keep some, at least, of your host employed."

"Yes," was again the vacant response.

"Those old men there, shaking their pows from their pulpits," continued Captain Delano, pointing to the oakum-pickers, "seem to act the part of old dominies to the rest, little heeded as their admonitions are at times. Is this voluntary on their part, Don Benito, or have you appointed them shepherds to your flock of black sheep?"

"What posts they fill, I appointed them," rejoined the Spaniard in an acrid tone, as if resenting some supposed satiric reflection.

"And these others, these Ashantee conjurors here," continued Captain Delano, rather uneasily eying the brandished steel of the hatchet-polishers, where, in spots, it had been brought to a shine, "this seems a curious business they are at, Don Benito?"

"In the gales we met," answered the Spaniard, "what of our general cargo was not thrown overboard was much damaged by the brine. Since coming into

22. thrumming—To thrum is to insert short pieces of rope yarn or spun yarn in a piece of canvas to make a rough surface suitable for wrapping about rigging to prevent chafing. **31. pows**—heads. **33. dominies**—masters (usually used of ministers). **38. Ashantee**—a district on the west coast of Africa whence slaves were sold.

calm weather, I have had several cases of knives and hatchets daily brought up for overhauling and cleaning."

"A prudent idea, Don Benito. You are part owner of ship and cargo, I presume; but not of the slaves, perhaps?"

"I am owner of all you see," impatiently returned Don Benito, "except the main company of blacks, who belonged to my late friend Alexandro Aranda."

As he mentioned this name, his air was heart-broken; his knees shook; his servant supported him.

Thinking he divined the cause of such unusual emotion, to confirm his surmise, Captain Delano, after a pause, said: "And may I ask, Don Benito, whether —since awhile ago you spoke of some cabin passengers—the friend, whose loss so afflicts you, at the outset of the voyage accompanied his blacks?"

"Yes."

"But died of the fever?"

"Died of the fever.—Oh, could I but—"

Again quivering, the Spaniard paused.

"Pardon me," said Captain Delano, lowly, "but I think that, by a sympathetic experience, I conjecture, Don Benito, what it is that gives the keener edge to your grief. It was once my hard fortune to lose at sea, a dear friend, my own brother, then supercargo. Assured of the welfare of his spirit, its departure I could have borne like a man; but that honest eye, that honest hand—both of which had so often met mine—and that warm heart; all, all—like scraps to the dogs—to throw all to the sharks! It was then I vowed never to have for fellow-voyager a man I loved, unless, unbeknown to him, I had provided every requisite, in case of a fatality, for embalming his mortal part for interment on shore. Were your friend's remains now on board this ship, Don Benito, not thus strangely would the mention of his name affect you."

"On board this ship?" echoed the Spaniard. Then, with horrified gestures, as directed against some spectre, he unconsciously fell into the ready arms of his attendant, who, with a silent appeal toward Captain Delano, seemed beseeching him not again to broach a theme so unspeakably distressing to his master.

This poor fellow now, thought the pained American, is the victim of that sad superstition which associates goblins with the deserted body of man, as ghosts with an abandoned house. How unlike are we made! What to me, in like case, would have been a solemn satisfaction, the bare suggestion, even, terrifies the Spaniard into this trance. Poor Alexandro Aranda! what would you say could you here see your friend—who, on former voyages, when you, for months, were left behind, has, I dare say, often longed, and longed, for one peep at you—now transported with terror at the least thought of having you anyway nigh him.

At this moment, with a dreary grave-yard toll, betokening a flaw, the ship's forecastle bell, smote by one of the grizzled oakum-pickers, proclaimed ten o'clock, through the leaden calm; when Captain Delano's attention was caught by the moving figure of a gigantic black, emerging from the general crowd below, and slowly advancing towards the elevated poop. An iron collar was about his neck, from which depended a chain, thrice wound round his body; the terminating links padlocked together at a broad band of iron, his girdle.

"How like a mute Atufal moves," mumured the servant.

The black mounted the steps of the poop, and, like a brave prisoner, brought up to receive sentence, stood in unquailing muteness before Don Benito, now recovered from his attack.

At the first glimpse of his approach, Don Benito had started, a resentful shadow swept over his face; and, as with the sudden memory of bootless rage, his white lips glued together.

This is some mulish mutineer, thought Captain Delano, surveying, not without a mixture of admiration, the colossal form of the negro.

"See, he waits your question, master," said the servant.

Thus reminded, Don Benito, nervously averting his glance, as if shunning, by anticipation, some rebellious response, in a disconcerted voice, thus spoke:—

"Atufal, will you ask my pardon now?"

The black was silent.

"Again, master," murmured the servant, with bitter upbraiding eyeing his countryman, "again, master; he will bend to master yet."

"Answer," said Don Benito, still averting his glance, "say but the one word, *pardon,* and your chains shall be off."

Upon this, the black, slowly raising both arms, let them lifelessly fall, his links clanking, his head bowed; as much as to say, "No, I am content."

"Go," said Don Benito, with inkept and unknown emotion.

Deliberately as he had come, the black obeyed.

"Excuse me, Don Benito," said Captain Delano, "but this scene surprises me; what means it, pray?"

"It means that that negro alone, of all the band, has given me peculiar cause of offence. I have put him in chains; I——"

Here he paused; his hand to his head, as if there were a swimming there, or a sudden bewilderment of memory had come over him; but meeting his servant's kindly glance seemed reassured, and proceeded:—

"I could not scourge such a form. But I told him he must ask my pardon. As yet he has not. At my command, every two hours he stands before me."

"And how long has this been?"

"Some sixty days."

"And obedient in all else? And respectful?"

"Yes."

"Upon my conscience, then," exclaimed Captain Delano, impulsively, "he has a royal spirit in him, this fellow."

"He may have some right to it," bitterly returned Don Benito; "he says he was king in his own land."

"Yes," said the servant, entering a word, "those slits in Atufal's ears once held wedges of gold; but poor Babo here, in his own land, was only a poor slave; a black man's slave was Babo, who now is the white's."

Somewhat annoyed by these conversational familiarities, Captain Delano turned curiously upon the attendant, then glanced inquiringly at his master; but, as if long wonted to these little informalities, neither master nor man seemed to understand him.

"What, pray, was Atufal's offence, Don Benito?" asked Captain Delano; "if

it was not something very serious, take a fool's advice, and, in view of his general docility, as well as in some natural respect for his spirit, remit his penalty."

"No, no, master never will do that," here murmured the servant to himself, "proud Atufal must first ask master's pardon. The slave there carries the padlock, but master here carries the key."

His attention thus directed, Captain Delano now noticed for the first time, that, suspended by a slender silken cord, from Don Benito's neck, hung a key. At once, from the servant's muttered syllables, divining the key's purpose, he smiled and said:—"So, Don Benito—padlock and key—significant symbols, truly."

Biting his lip, Don Benito faltered.

Though the remark of Captain Delano, a man of such native simplicity as to be incapable of satire or irony, had been dropped in playful allusion to the Spaniard's singularly evidenced lordship over the black; yet the hypochondriac seemed in some way to have taken it as a malicious reflection upon his confessed inability thus far to break down, at least, on a verbal summons, the entrenched will of the slave. Deploring this supposed misconception, yet despairing of correcting it, Captain Delano shifted the subject; but finding his companion more than ever withdrawn, as if still slowly digesting the lees of the presumed affront above-mentioned, by-and-by Captain Delano likewise became less talkative, oppressed, against his own will, by what seemed the secret vindictiveness of the morbidly sensitive Spaniard. But the good sailor, himself of a quite contrary disposition, refrained, on his part, alike from the appearance as from the feeling of resentment, and if silent, was only so from contagion.

Presently the Spaniard, assisted by his servant somewhat discourteously crossed over from his guest; a procedure which, sensibly enough, might have been allowed to pass for idle caprice of ill-humor, had not master and man, lingering round the corner of the elevated skylight, began whispering together in low voices. This was unpleasing. And more: the moody air of the Spaniard, which at times had not been without a sort of valetudinarian stateliness, now seemed anything but dignified; while the menial familiarity of the servant lost its original charm of simple-hearted attachment.

In his embarrassment, the visitor turned his face to the other side of the ship. By so doing, his glance accidentally fell on a young Spanish sailor, a coil of rope in his hand, just stepped from the deck to the first round of the mizzen-rigging. Perhaps the man would not have been particularly noticed, were it not that, during his ascent to one of the yards, he, with a sort of covert intentness, kept his eye fixed on Captain Delano, from whom, presently, it passed, as if by a natural sequence, to the two whisperers.

His own attention thus redirected to that quarter, Captain Delano gave a slight start. From something in Don Benito's manner just then, it seemed as if the visitor had, at least partly, been the subject of the withdrawn consultation going on—a conjecture as little agreeable to the guest as it was little flattering to the host.

27. **his guest**—"Captain Delano" (P).

The singular alternations of courtesy and ill-breeding in the Spanish captain were unaccountable, except on one of two suppositions—innocent lunacy, or wicked imposture.

But the first idea, though it might naturally have occurred to an indifferent observer, and, in some respects, had not hitherto been wholly a stranger to Captain Delano's mind, yet, now that, in an incipient way, he began to regard the stranger's conduct something in the light of an intentional affront, of course the idea of lunacy was virtually vacated. But if not a lunatic, what then? Under the circumstances, would a gentleman, nay, any honest boor, act the part now acted by his host? The man was an impostor. Some low-born adventurer, masquerading as an oceanic grandee; yet so ignorant of the first requisites of mere gentlemanhood as to be betrayed into the present remarkable indecorum. That strange ceremoniousness, too, at other times evinced, seemed not uncharacteristic of one playing a part above his real level. Benito Cereno—Don Benito Cereno—a sounding name. One, too, at that period, not unknown, in the surname, to supercargoes and sea captains trading along the Spanish Main, as belonging to one of the most enterprising and extensive mercantile families in all those provinces; several members of it having titles; a sort of Castilian Rothschild, with a noble brother, or cousin, in every great trading town of South America. The alleged Don Benito was in early manhood, about twenty-nine or thirty. To assume a sort of roving cadetship in the maritime affairs of such a house, what more likely scheme for a young knave of talent and spirit? But the Spaniard was a pale invalid. Never mind. For even to the degree of simulating mortal disease, the craft of some tricksters had been known to attain. To think that, under the aspect of infantile weakness, the most savage energies might be couched—those velvets of the Spaniard but the velvet paw to his fangs.

From no train of thought did these fancies come; not from within, but from without; suddenly, too, and in one throng, like hoar frost; yet as soon to vanish as the mild sun of Captain Delano's good-nature regained its meridian.

Glancing over once again towards his host—whose side-face, revealed above the skylight, was now turned toward him—he was struck by the profile, whose clearness of cut was refined by the thinness incident to ill-health, as well as ennobled about the chin by the beard. Away with suspicion. He was a true off-shoot of a true hidalgo Cereno.

Relieved by these and other better thoughts, the visitor, lightly humming a tune, now began indifferently pacing the poop, so as not to betray to Don Benito that he had at all mistrusted incivility, much less duplicity; for such mistrust would yet be proved illusory, and by the event; though, for the present, the circumstance which had provoked that distrust remained unexplained. But when that little mystery should have been cleared up, Captain Delano thought he might extremely regret it, did he allow Don Benito to become aware that he

16. **supercargoes**—A supercargo is the officer in charge of the commercial concerns of a voyage. 16-17. **Spanish Main**—See note 39, p. 605. 19. **Rothschild**—the Rothschild family, famous in the banking annals of England, but with branches in other European countries. 21. **cadetship**—Cadet refers here to a young brother or son of a particular family, earning his spurs, in this case in business. 31. **his host**—"Don Benito" (P). 32. **he**—"Captain Delano" (P). 35. **hidalgo**—here about equivalent to blue-blood.

had indulged in ungenerous surmises. In short, to the Spaniard's black-letter text, it was best, for a while, to leave open margin.

Presently, his pale face twitching and overcast, the Spaniard, still supported by his attendant, moved over towards his guest, when, with even more than his usual embarrassment, and a strange sort of intriguing intonation in his husky whisper, the following conversation began:—

"Señor, may I ask how long you have lain at this isle?"

"Oh, but a day or two, Don Benito."

"And from what port are you last?"

"Canton."

"And there, Señor, you exchanged your seal-skins for teas and silks, I think you said?"

"Yes. Silks, mostly."

"And the balance you took in specie, perhaps?"

Captain Delano, fidgeting a little, answered—

"Yes; some silver; not a very great deal, though."

"Ah—well. May I ask how many men have you, Señor?"

Captain Delano slightly started, but answered—

"About five-and-twenty, all told."

"And at present, Señor, all on board, I suppose?"

"All on board, Don Benito," replied the Captain, now with satisfaction.

"And will be to-night, Señor?"

At this last question, following so many pertinacious ones, for the soul of him Captain Delano could not but look very earnestly at the questioner, who, instead of meeting the glance, with every token of craven discomposure dropped his eyes to the deck; presenting an unworthy contrast to his servant, who, just then, was kneeling at his feet, adjusting a loose shoe-buckle; his disengaged face meantime, with humble curiosity, turned openly up into his master's downcast one.

The Spaniard, still with a guilty shuffle, repeated his question:

"And—and will be to-night, Señor?"

"Yes, for aught I know," returned Captain Delano—"but nay," rallying himself into fearless truth, "some of them talked of going off on another fishing party about midnight."

"Your ships generally go—go more or less armed, I believe, Señor?"

"Oh, a six-pounder or two, in case of emergency," was the intrepidly indifferent reply, "with a small stock of muskets, sealing-spears, and cutlasses, you know."

As he thus responded, Captain Delano again glanced at Don Benito, but the latter's eyes were averted; while abruptly and awkwardly shifting the subject, he made some peevish allusion to the calm, and then, without apology, once more, with his attendant, withdrew to the opposite bulwarks, where the whispering was resumed.

At this moment, and ere Captain Delano could cast a cool thought upon

1-2. black-letter text—Early printed books were in black letter, imitative of manuscript letters, and, to modern eyes, difficult to read.

what had just passed, the young Spanish sailor, before mentioned, was seen descending from the rigging. In act of stooping over to spring inboard to the deck, his voluminous, unconfined frock, or shirt, of coarse woolen, much spotted with tar, opened out far down the chest, revealing a soiled under garment of what seemed the finest linen, edged, about the neck, with a narrow blue ribbon, sadly faded and worn. At this moment the young sailor's eye was again fixed on the whisperers, and Captain Delano thought he observed a lurking significance in it, as if silent signs, of some Freemason sort, had that instant been interchanged.

This once more impelled his own glance in the direction of Don Benito, and, as before, he could not but infer that himself formed the subject of the conference. He paused. The sound of the hatchet-polishing fell on his ears. He cast another swift side-look at the two. They had the air of conspirators. In connection with the late questionings, and the incident of the young sailor, these things now begat such return of involuntary suspicion, that the singular guilelessness of the American could not endure it. Plucking up a gay and humorous expression, he crossed over to the two rapidly, saying:—"Ha, Don Benito, your black here seems high in your trust; a sort of privy-counsellor, in fact."

Upon this, the servant looked up with a good-natured grin, but the master started as from a venomous bite. It was a moment or two before the Spaniard sufficiently recovered himself to reply; which he did, at last, with cold constraint:—"Yes, Señor, I have trust in Babo."

Here Babo, changing his previous grin of mere animal humor into an intelligent smile, not ungratefully eyed his master.

Finding that the Spaniard now stood silent and reserved, as if involuntarily, or purposely giving hint that his guest's proximity was inconvenient just then, Captain Delano, unwilling to appear uncivil even to incivility itself, made some trivial remark and moved off; again and again turning over in his mind the mysterious demeanor of Don Benito Cereno.

He had descended from the poop, and, wrapped in thought, was passing near a dark hatchway, leading down into the steerage, when, perceiving motion there, he looked to see what moved. The same instant there was a sparkle in the shadowy hatchway, and he saw one of the Spanish sailors, prowling there, hurriedly placing his hand in the bosom of his frock, as if hiding something. Before the man could have been certain who it was that was passing, he slunk below out of sight. But enough was seen of him to make it sure that he was the same young sailor before noticed in the rigging.

What was that which so sparkled? thought Captain Delano. It was no lamp —no match—no live coal. Could it have been a jewel? But how come sailors with jewels?—or with silk-trimmed under-shirts either? Has he been robbing the trunks of the dead cabin-passengers? But if so, he would hardly wear one of the stolen articles on board ship here. Ah, ah—if, now, that was, indeed, a secret sign I saw passing between this suspicious fellow and his captain awhile since; if I could only be certain that, in my uneasiness, my senses did not deceive me, then——

Here, passing from one suspicious thing to another, his mind revolved the strange questions put to him concerning his ship.

By a curious coincidence, as each point was recalled, the black wizards of Ashantee would strike up with their hatchets, as in ominous comment on the white stranger's thoughts. Pressed by such enigmas and portents, it would have been almost against nature, had not, even into the least distrustful heart, some ugly misgivings obtruded.

Observing the ship now helplessly fallen into a current, with enchanted sails, drifting with increased rapidity seaward; and noting that, from a lately intercepted projection of the land, the sealer was hidden, the stout mariner began to quake at thoughts which he barely durst confess to himself. Above all, he began to feel a ghostly dread of Don Benito. And yet when he roused himself, dilated his chest, felt himself strong on his legs, and coolly considered it—what did all these phantoms amount to?

Had the Spaniard any sinister scheme, it must have reference not so much to him (Captain Delano) as to his ship (the Bachelor's Delight). Hence the present drifting away of the one ship from the other, instead of favoring any such possible scheme, was, for the time at least, opposed to it. Clearly any suspicion, combining such contradictions, must need be delusive. Beside, was it not absurd to think of a vessel in distress—a vessel by sickness almost dismanned of her crew—a vessel whose inmates were parched for water—was it not a thousand times absurd that such a craft should, at present, be of a piratical character; or her commander, either for himself or those under him, cherish any desire but for speedy relief and refreshment? But then, might not general distress, and thirst in particular, be affected? And might not that same undiminished Spanish crew, alleged to have perished off to a remnant, be at that very moment lurking in the hold? On heart-broken pretence of entreating a cup of cold water, fiends in human form had got into lonely dwellings, nor retired until a dark deed had been done. And among the Malay pirates, it was no unusual thing to lure ships after them into their treacherous harbors, or entice boarders from a declared enemy at sea, by the spectacle of thinly manned or vacant decks, beneath which prowled a hundred spears with yellow arms ready to upthrust them through the mats. Not that Captain Delano had entirely credited such things. He had heard of them—and now, as stories, they recurred. The present destination of the ship was the anchorage. There she would be near his own vessel. Upon gaining that vicinity, might not the San Dominick, like a slumbering volcano, suddenly let loose energies now hid?

He recalled the Spaniard's manner while telling his story. There was a gloomy hesitancy and subterfuge about it. It was just the manner of one making up his tale for evil purposes, as he goes. But if that story was not true, what was the truth? That the ship had unlawfully come into the Spaniard's possession? But in many of its details, especially in reference to the more calamitous parts, such as the fatalities among the seamen, the consequent prolonged beating about, the past sufferings from obstinate calms, and still continued suffering from thirst; in all these points, as well as others, Don Benito's

1-2. **revolved the strange questions**—"revolved the point of the strange questions" (P).

story had corroborated not only the wailing ejaculations of the indiscriminate multitude, white and black, but likewise—what seemed impossible to counterfeit—by the very expression and play of every human feature, which Captain Delano saw. If Don Benito's story was, throughout, an invention, then every soul on board, down to the youngest negress, was his carefully drilled recruit in the plot: an incredible inference. And yet, if there was ground for mistrusting his veracity, that inference was a legitimate one.

But those questions of the Spaniard. There, indeed, one might pause. Did they not seem put with much the same object with which the burglar or assassin, by day-time, reconnoitres the walls of a house? But, with ill purposes, to solicit such information openly of the chief person endangered, and so, in effect, setting him on his guard; how unlikely a procedure was that? Absurd, then, to suppose that those questions had been prompted by evil designs. Thus, the same conduct, which, in this instance, had raised the alarm, served to dispel it. In short, scarce any suspicion or uneasiness, however apparently reasonable at the time, which was not now, with equal apparent reason, dismissed.

At last, he began to laugh at his former forebodings; and laugh at the strange ship for, in its aspect someway siding with them, as it were; and laugh, too, at the odd-looking blacks, particularly those old scissors-grinders, the Ashantees; and those bed-ridden old knitting women, the oakum-pickers; and almost at the dark Spaniard himself, the central hobgoblin of all.

For the rest, whatever in a serious way seemed enigmatical, was now good-naturedly explained away by the thought that, for the most part the poor invalid scarcely knew what he was about; either sulking in black vapors, or putting idle questions without sense or object. Evidently, for the present, the man was not fit to be intrusted with the ship. On some benevolent plea withdrawing the command from him, Captain Delano would yet have to send her to Conception in charge of his second mate, a worthy person and good navigator—a plan not more convenient for the San Dominick than for Don Benito; for, relieved from all anxiety, keeping wholly to his cabin, the sick man, under the good nursing of his servant, would probably, by the end of the passage, be in a measure restored to health, and with that he should also be restored to authority.

Such were the American's thoughts. They were tranquilizing. There was a difference between the idea of Don Benito's darkly pre-ordaining Captain Delano's fate, and Captain Delano's lightly arranging Don Benito's. Nevertheless, it was not without something of relief that the good seaman presently perceived his whale-boat in the distance. Its absence had been prolonged by unexpected detention at the sealer's side, as well as its returning trip lengthened by the continual recession of the goal.

The advancing speck was observed by the blacks. Their shouts attracted the

7. **his**—"the Spanish captain's" (P). **8-15. But those . . . dispel it**—Omitted in (P). **15. In short**—(P) here begins a new paragraph, which continues to line 21, the first sentence of which reads "In short, scarce an uneasiness entered the honest sailor's mind but, by a subsequent spontaneous act of good sense, it was ejected." **17. his former**—"these" (P). **20-21. and almost at the dark Spaniard**—"and, in a human way, he almost began to laugh at the dark Spaniard" (P). **25. idle**—"random" (P). **29. a plan not more convenient**—"a plan which would prove no wiser" (P).

attention of Don Benito, who, with a return of courtesy, approaching Captain Delano, expressed satisfaction at the coming of some supplies, slight and temporary as they must necessarily prove.

Captain Delano responded; but while doing so, his attention was drawn to [illegible] passing on the deck below: among the crowd climbing the landward bulwarks, anxiously watching the coming boat, two blacks, to all appearances accidentally incommoded by one of the sailors, violently pushed him aside, which the sailor someway resenting, they dashed him to the deck, despite the earnest cries of the oakum-pickers.

"Don Benito," said Captain Delano quickly, "do you see what is going on there? Look!"

But, seized by his cough, the Spaniard staggered, with both hands to his face, on the point of falling. Captain Delano would have supported him, but the servant was more alert, who, with one hand sustaining his master, with the other applied the cordial. Don Benito restored, the black withdrew his support, slipping aside a little, but dutifully remaining within call of a whisper. Such discretion was here evinced as quite wiped away, in the visitor's eyes, any blemish of impropriety which might have attached to the attendant, from the indecorous conferences before mentioned; showing, too, that if the servant were to blame, it might be more the master's fault than his own, since, when left to himself, he could conduct thus well.

His glance called away from the spectacle of disorder to the more pleasing one before him, Captain Delano could not avoid again congratulating his host upon possessing such a servant, who, though perhaps a little too forward now and then, must upon the whole be invaluable to one in the invalid's situation.

"Tell me, Don Benito," he added, with a smile—"I should like to have your man here, myself—what will you take for him? Would fifty doubloons be any object?"

"Master wouldn't part with Babo for a thousand doubloons," murmured the black, overhearing the offer, and taking it in earnest, and, with the strange vanity of a faithful slave, appreciated by his master, scorning to hear so paltry a valuation put upon him by a stranger. But Don Benito, apparently hardly yet completely restored, and again interrupted by his cough, made but some broken reply.

Soon his physical distress became so great, affecting his mind, too, apparently, that, as if to screen the sad spectacle, the servant gently conducted his master below.

Left to himself, the American, to while away the time till his boat should arrive, would have pleasantly accosted some one of the few Spanish seamen he saw; but recalling something that Don Benito had said touching their ill conduct, he refrained; as a ship-master indisposed to countenance cowardice or unfaithfulness in seamen.

While, with these thoughts, standing with eye directed forward towards

7-8. one of the sailors, . . . which—"one of the sailors, flew out against him with horrible curses, which" (P). **8. they**—"the two blacks" (P). **8. deck, despite**—"deck, and jumped upon him, despite" (P). **22. glance called**—"glance thus called" (P). **23. his host**—"Don Benito" (P).

that handful of sailors, suddenly he thought that one or two of them returned the glance and with a sort of meaning. He rubbed his eyes, and looked again; but again seemed to see the same thing. Under a new form, but more obscure than any previous one, the old suspicions recurred, but, in the absence of Don Benito, with less of panic than before. Despite the bad account given of the sailors, Captain Delano resolved forthwith to accost one of them. Descending the poop, he made his way through the blacks, his movement drawing a queer cry from the oakum-pickers, prompted by whom, the negroes, twitching each other aside, divided before him; but, as if curious to see what was the object of this deliberate visit to their Ghetto, closing in behind, in tolerable order, followed the white stranger up. His progress thus proclaimed as by mounted kings-at-arms, and escorted as by a Caffre guard of honor, Captain Delano, assuming a good-humored, off-hand air, continued to advance; now and then saying a blithe word to the negroes, and his eye curiously surveying the white faces, here and there sparsely mixed in with the blacks, like stray white pawns venturously involved in the ranks of the chess-men opposed.

While thinking which of them to select for his purpose, he chanced to observe a sailor seated on the deck engaged in tarring the strap of a large block, a circle of blacks squatted round him inquisitively eyeing the process.

The mean employment of the man was in contrast with something superior in his figure. His hand, black with continually thrusting it into the tar-pot held for him by a negro, seemed not naturally allied to his face, a face which would have been a very fine one but for its haggardness. Whether this haggardness had aught to do with criminality, could not be determined; since, as intense heat and cold, though unlike, produce like sensations, so innocence and guilt, when, through casual association with mental pain, stamping any visible impress, use one seal—a hacked one.

Not again that this reflection occurred to Captain Delano at the time, charitable man as he was. Rather another idea. Because observing so singular a haggardness to be combined with a dark eye, averted as in trouble and shame, and then, again recalling Don Benito's confessed ill opinion of his crew, insensibly he was operated upon by certain general notions which, while disconnecting pain and abashment from virtue, as invariably link them with vice.

If, indeed, there be any wickedness on board this ship, thought Captain Delano, be sure that man there has fouled his hand in it, even as now he fouls it in the pitch. I don't like to accost him. I will speak to this other, this old Jack here on the windlass.

He advanced to an old Barcelona tar, in ragged red breeches and dirty nightcap, cheeks trenched and bronzed, whiskers dense as thorn hedges. Seated between two sleepy-looking Africans, this mariner, like his younger shipmate, was employed upon some rigging—splicing a cable—the sleepy-looking blacks

1. **one or two of them**—"some of them" (P). 12. **kings-at-arms**—literally, chief heraldic officers. 12. **Caffre**—the Caffre or Kafir tribe of Negroes in South Africa. 18-19. **block, a circle**—"block, with a circle" (P). 31-32. **and then . . . operated upon**—"and then, however illogically, uniting in his mind his own private suspicions of the crew with the confessed ill-opinion on the part of their captain, he was insensibly operated upon" (P). 39. **Barcelona tar**—Barcelona, a seaport in northeastern Spain, was notable for its sailors.

performing the inferior function of holding the outer parts of the ropes for him.

Upon Captain Delano's approach, the man at once hung his head below its previous level; the one necessary for business. It appeared as if he desired to be thought absorbed, with more than common fidelity, in his task. Being addressed, he glanced up, but with what seemed a furtive, diffident air, which sat strangely enough on his weather-beaten visage, much as if a grizzly bear, instead of growling and biting, should simper and cast sheep's eyes. He was asked several questions concerning the voyage—questions purposely referring to several particulars in Don Benito's narrative, not previously corroborated by those impulsive cries greeting the visitor on first coming on board. The questions were briefly answered, confirming all that remained to be confirmed of the story. The negroes about the windlass joined in with the old sailor; but, as they became talkative, he by degrees became mute, and at length quite glum, seemed morosely unwilling to answer more questions, and yet, all the while, this ursine air was somehow mixed with his sheepish one.

Despairing of getting into unembarrassed talk with such a centaur, Captain Delano, after glancing round for more promising countenance, but seeing none, spoke pleasantly to the blacks to make way for him; and so, amid various grins and grimaces, returned to the poop, feeling a little strange at first, he could hardly tell why, but upon the whole with regained confidence in Benito Cereno.

How plainly, thought he, did that old whiskerando yonder betray a consciousness of ill desert. No doubt, when he saw me coming, he dreaded lest I, apprised by his Captain of the crew's general misbehavior, came with sharp words for him, and so down with his head. And yet—and yet, now that I think of it, that very old fellow, if I err not, was one of those who seemed so earnestly eying me here awhile since. Ah, these currents spin one's head round almost as much as they do the ship. Ha, there now's a pleasant sort of sunny sight; quite sociable, too.

His attention had been drawn to a slumbering negress, partly disclosed through the lace-work of some rigging, lying, with youthful limbs carelessly disposed, under the lee of the bulwarks, like a doe in the shade of a woodland rock. Sprawling at her lapped breasts, was her wide-awake fawn, stark naked, its black little body half lifted from the deck, crosswise with its dam's; its hands, like two paws, clambering upon her; its mouth and nose ineffectually rooting to get at the mark; and meantime giving a vexatious half-grunt, blending with the composed snore of the negress.

The uncommon vigor of the child at length roused the mother. She started up, at a distance facing Captain Delano. But as if not at all concerned at the attitude in which she had been caught, delightedly she caught the child up, with maternal transports, covering it with kisses.

There's naked nature, now; pure tenderness and love, thought Captain Delano, well pleased.

This incident prompted him to remark the other negresses more particularly than before. He was gratified with their manners; like most uncivilized women, they seemed at once tender of heart and tough of constitution; equally

ready to die for their infants or fight for them. Unsophisticated as leopardesses; loving as doves. Ah! thought Captain Delano, these, perhaps, are some of the very women whom Ledyard saw in Africa, and gave such a noble account of.

These natural sights somehow insensibly deepened his confidence and ease. At last he looked to see how his boat was getting on; but it was still pretty remote. He turned to see if Don Benito had returned; but he had not.

To change the scene, as well as to please himself with a leisurely observation of the coming boat, stepping over into the mizzen-chains, he clambered his way into the starboard quarter-gallery—one of those abandoned Venetian-looking water-balconies previously mentioned—retreats cut off from the deck. As his foot pressed the half-damp, half-dry sea-mosses matting the place, and a chance phantom cats-paw—an islet of breeze, unheralded, unfollowed—as this ghostly cats-paw came fanning his cheek; as his glance fell upon the row of small, round dead-lights—all closed like coppered eyes of the coffined—and the state-cabin door, once connecting with the gallery, even as the dead-lights had once looked out upon it, but now calked fast like a sarcophagus lid; and to a purple-black, tarred-over panel, threshold, and post; and he bethought him of the time, when that state-cabin and this state-balcony had heard the voices of the Spanish king's officers, and the forms of the Lima viceroy's daughters had perhaps leaned where he stood—as these and other images flitted through his mind, as the cats-paw through the calm, gradually he felt rising a dreamy inquietude, like that of one who alone on the prairie feels unrest from the repose of the noon.

He leaned against the carved balustrade, again looking off toward his boat; but found his eye falling upon the ribbon grass, trailing along the ship's water-line, straight as a border of green box; and parterres of sea-weed, broad ovals and crescents, floating nigh and far, with what seemed long formal alleys between, crossing the terraces of swells, and sweeping round as if leading to the grottoes below. And overhanging all was the balustrade by his arm, which, partly stained with pitch and partly embossed with moss, seemed the charred ruin of some summer-house in a grand garden long running to waste.

Trying to break one charm, he was but becharmed anew. Though upon the wide sea, he seemed in some far inland country; prisoner in some deserted chateau, left to stare at empty grounds, and peer out at vague roads, where never wagon or wayfarer passed.

But these enchantments were a little disenchanted as his eye fall on the corroded main-chains. Of an ancient style, massy and rusty in link, shackle and bolt, they seemed even more fit for the ship's present business than the one for which she had been built.

Presently he thought something moved nigh the chains. He rubbed his eyes,

3. **Ledyard**—"Mungo Park" (P). Why Melville changed the name of the traveler is not evident. John Ledyard (1751-1788) published his *Life and Travels* in 1828, but seems not to have been especially interested in Africa. Mungo Park (1771-1805) is remembered especially for his *Travels in the Internal Districts of Africa* (1799). **8. mizzen-chains**—chains having to do with the mizzenmast. **19. Lima viceroy's**—Lima was formerly the seat of the Spanish viceroy, the nominal ruler of the Spanish possessions in South America. **26. parterres**—A parterre is strictly an ornamental arrangement of flower plots or grass plots. **39. which she had been**—"which probably she had been" (P).

and looked hard. Groves of rigging were about the chains; and there, peering from behind a great stay, like an Indian from behind a hemlock, a Spanish sailor, a marlingspike in his hand, was seen, who made what seemed an imperfect gesture towards the balcony, but immediately, as if alarmed by some advancing step along the deck within, vanished into the recesses of the hempen forest, like a poacher.

What meant this? Something the man had sought to communicate, unbeknown to any one, even to his captain. Did the secret involve aught unfavourable to his captain? Were those previous misgivings of Captain Delano's about to be verified? Or, in his haunted mood at the moment, had some random, unintentional motion of the man, while busy with the stay, as if repairing it, been mistaken for a significant beckoning?

Not unbewildered, again he gazed off for his boat. But it was temporarily hidden by a rocky spur of the isle. As with some eagerness he bent forward, watching for the first shooting view of its beak, the balustrade gave way before him like charcoal. Had he not clutched an outreaching rope he would have fallen into the sea. The crash, though feeble, and the fall, though hollow, of the rotten fragments, must have been overheard. He glanced up. With sober curiosity peering down upon him was one of the old oakum-pickers, slipped from his perch to an outside boom; while below the old negro, and, invisible to him, reconnoitering from a port-hole like a fox from the mouth of its den, crouched the Spanish sailor again. From something suddenly suggested by the man's air, the mad idea now darted into Captain Delano's mind, that Don Benito's plea of indisposition, in withdrawing below, was but a pretense: that he was engaged there maturing some plot, of which the sailor, by some means gaining an inkling, had a mind to warn the stranger against; incited, it may be, by gratitude for a kind word on first boarding the ship. Was it from foreseeing some possible interference like this, that Don Benito had, beforehand, given such a bad character of his sailors, while praising the negroes; though, indeed, the former seemed as docile as the latter the contrary? The whites, too, by nature, were the shrewder race. A man with some evil design, would he not be likely to speak well of that stupidity which was blind to his depravity, and malign that intelligence from which it might not be hidden? Not unlikely, perhaps. But if the whites had dark secrets concerning Don Benito, could then Don Benito be any way in complicity with the blacks? But they were too stupid. Besides, who ever heard of a white so far a renegade as to apostatize from his very species almost, by leaguing in against it with negroes? These difficulties recalled former ones. Lost in their mazes, Captain Delano, who had now regained the deck, was uneasily advancing along it, when he observed a new face; an aged sailor seated cross-legged near the main hatchway. His skin was shrunk up with wrinkles like a pelican's empty pouch; his hair frosted; his countenance grave and composed. His hands were full of ropes, which he was working into a large knot. Some blacks were about him obligingly dipping the strands for him, here and there, as the exigencies of the operation demanded.

3. **marlingspike**—a pointed tool used by sailors in splicing rope; usually, marlinspike.

Captain Delano crossed over to him, and stood in silence surveying the knot; his mind, by a not uncongenial transition, passing from its own entanglements to those of the hemp. For intricacy such a knot he had never seen in an American ship, or indeed any other. The old man looked like an Egyptian priest, making Gordian knots for the temple of Ammon. The knot seemed a combination of double-bowline-knot, treble-crown-knot, back-handed-well-knot, knot-in-and-out-knot, and jamming-knot.

At last, puzzled to comprehend the meaning of such a knot, Captain Delano addressed the knotter:—

"What are you knotting there, my man?"

"The knot," was the brief reply, without looking up.

"So it seems; but what is it for?"

"For some one else to undo," muttered back the old man, plying his fingers harder than ever, the knot being now nearly completed.

While Captain Delano stood watching him, suddenly the old man threw the knot towards him, saying in broken English,—the first heard in the ship,—something to this effect: "Undo it, cut it, quick." It was said lowly, but with such condensation of rapidity, that the long, slow words in Spanish, which had preceded and followed, almost operated as covers to the brief English between.

For a moment, knot in hand, and knot in head, Captain Delano stood mute; while, without further heeding him, the old man was now intent upon other ropes. Presently there was a slight stir behind Captain Delano. Turning, he saw the chained negro, Atufal, standing quietly there. The next moment the old sailor rose, muttering, and, followed by his subordinate negroes, removed to the forward part of the ship, where in the crowd he disappeared.

An elderly negro, in a clout like an infant's, and with a pepper and salt head, and a kind of attorney air, now approached Captain Delano. In tolerable Spanish, and with a good-natured, knowing wink, he informed him that the old knotter was simple-witted, but harmless; often playing his old tricks. The negro concluded by begging the knot, for of course the stranger would not care to be troubled with it. Unconsciously, it was handed to him. With a sort of congé, the negro received it, and, turning his back, ferreted into it like a detective custom-house officer after smuggled laces. Soon, with some African word, equivalent to pshaw, he tossed the knot overboard.

All this is very queer now, thought Captain Delano, with a qualmish sort of emotion; but, as one feeling incipient sea-sickness, he strove, by ignoring the symptoms, to get rid of the malady. Once more he looked off for his boat. To his delight, it was now again in view, leaving the rocky spur astern.

The sensation here experienced, after at first relieving his uneasiness, with unforeseen efficacy soon began to remove it. The less distant sight of that well-known boat—showing it, not as before, half blended with the haze, but with outline defined, so that its individuality, like a man's, was manifest; that boat, Rover by name, which, though now in strange seas, had often pressed the beach of Captain Delano's home, and, brought to its threshold for repairs,

5. Gordian . . . Ammon—See note 14, p. 999. **16. saying**—"and said" (P). **33. congé**—farewell. **41. efficacy**—"efficiency" (P).

had familiarly lain there, as a Newfoundland dog; the sight of that household boat evoked a thousand trustful associations, which, contrasted with previous suspicions, filled him not only with lightsome confidence, but somehow with half humorous self-reproaches at his former lack of it.

"What, I, Amasa Delano—Jack of the Beach, as they called me when a lad—I, Amasa; the same that, duck-satchel in hand, used to paddle along the waterside to the school-house made from the old hulk—I, little Jack of the Beach, that used to go berrying with cousin Nat and the rest; I to be murdered here at the ends of the earth, on board a haunted pirate-ship by a horrible Spaniard? Too nonsensical to think of! Who would murder Amasa Delano? His conscience is clean. There is some one above. Fie, fie, Jack of the Beach! you are a child indeed; a child of the second childhood, old boy; you are beginning to dote and drule, I'm afraid."

Light of heart and foot, he stepped aft, and there was met by Don Benito's servant, who, with a pleasing expression, responsive to his own present feelings, informed him that his master had recovered from the effects of his coughing fit, and had just ordered him to go present his compliments to his good guest, Don Amasa, and say that he (Don Benito) would soon have the happiness to rejoin him.

There now, do you mark that? again thought Captain Delano, walking the poop. What a donkey I was. This kind gentleman who here sends me his kind compliments, he, but ten minutes ago, dark-lantern in hand, was dodging round some old grind-stone in the hold, sharpening a hatchet for me, I thought. Well, well; these long calms have a morbid effect on the mind, I've often heard, though I never believed it before. Ha! glancing towards the boat; there's Rover; good dog; a white bone in her mouth. A pretty big bone though, seems to me.—What? Yes, she has fallen afoul of the bubbling tide-rip there. It sets her the other way, too, for the time. Patience.

It was now about noon, though, from the grayness of everything, it seemed to be getting towards dusk.

The calm was confirmed. In the far distance, away from the influence of land, the leaden ocean seemed laid out and leaded up, its course finished, soul gone, defunct. But the current from landward, where the ship was, increased; silently sweeping her further and further towards the tranced waters beyond.

Still, from his knowledge of those latitudes, cherishing hopes of a breeze, and a fair and fresh one, at any moment, Captain Delano, despite present prospects, buoyantly counted upon bringing the San Dominick safely to anchor ere night. The distance swept over was nothing; since, with a good wind, ten minutes' sailing would retrace more than sixty minutes', drifting. Meantime, one moment turning to mark "Rover" fighting the tide-rip, and the next to see Don Benito approaching, he continued walking the poop.

Gradually he felt a vexation arising from the delay of his boat; this soon merged into uneasiness; and at last—his eye falling continually, as from a stage-box into the pit, upon the strange crowd before and below him, and, by-and-by, recognizing there the face—now composed to indifference—of the

6. **duck-satchel**—satchel made of duck or cotton.

Spanish sailor who had seemed to beckon from the main-chains—something of his old trepidations returned.

Ah, thought he—gravely enough—this is like the ague: because it went off, it follows not that it won't come back.

Though ashamed of the relapse, he could not altogether subdue it; and so, exerting his good-nature to the utmost, insensibly he came to a compromise.

Yes, this is a strange craft; a strange history, too, and strange folks on board. But—nothing more.

By way of keeping his mind out of mischief till the boat should arrive, he tried to occupy it with turning over and over, in a purely speculative sort of way, some lesser peculiarities of the captain and crew. Among others, four curious points recurred:

First, the affair of the Spanish lad assailed with a knife by the slave boy; an act winked at by Don Benito. Second, the tyranny in Don Benito's treatment of Atufal, the black; as if a child should lead a bull of the Nile by the ring in his nose. Third, the trampling of the sailor by the two negroes; a piece of insolence passed over without so much as a reprimand. Fourth, the cringing submission to their master of all the ships' underlings, mostly blacks; as if by the least inadvertence they feared to draw down his despotic displeasure.

Coupling these points, they seemed somewhat contradictory. But what then, thought Captain Delano, glancing towards his now nearing boat—what then? Why, Don Benito is a very capricious commander. But he is not the first of the sort I have seen; though it's true he rather exceeds any other. But as a nation—continued he in his reveries—these Spaniards are all an odd set; the very word Spaniard has a curious, conspirator, Guy-Fawkish twang to it. And yet, I dare say, Spaniards in the main are as good folks as any in Duxbury, Massachusetts. Ah, good! At last "Rover" has come.

As, with its welcome freight, the boat touched the side, the oakum-pickers, with venerable gestures, sought to restrain the blacks, who, at the sight of three gurried water-casks in its bottom, and a pile of wilted pumpkins in its bow, hung over the bulwarks in disorderly raptures.

Don Benito, with his servant, now appeared; his coming, perhaps, hastened by hearing the noise. Of him Captain Delano sought permission to serve out the water, so that all might share alike, and none injure themselves by unfair excess. But sensible, and, on Don Benito's account, kind as this offer was, it was received with what seemed impatience; as if aware that he lacked energy as a commander, Don Benito, with the true jealousy of weakness, resented as an affront any interference. So, at least, Captain Delano inferred.

In another moment the casks were being hoisted in, when some of the eager negroes accidentally jostled Captain Delano, where he stood by the gangway; so that, unmindful of Don Benito, yielding to the impulse of the moment, with good-natured authority he bade the blacks stand back; to enforce his words making use of a half-mirthful, half-menacing gesture. Instantly the blacks paused, just where they were, each negro and negress suspended in his

7. **Yes**—No paragraph in (P). 22. **Why, Don**—"Why, this Don" (P). 25. **Guy-Fawkish**—Guy Fawkes (1570-1606) endeavored to blow up the Houses of Parliament in London with gunpowder, and has become a type of conspirator, in consequence. 30. **gurried**—fouled (on the outside).

or her posture, exactly as the word had found them—for a few seconds continuing so—while, as between the responsive posts of a telegraph, an unknown syllable ran from man to man among the perched oakum-pickers. While the visitor's attention was fixed by this scene, suddenly the hatchet-polishers half rose, and a rapid cry came from Don Benito.

Thinking that at the signal of the Spaniard he was about to be massacred, Captain Delano would have sprung for his boat, but paused, as the oakum-pickers, dropping down into the crowd with earnest exclamations, forced every white and every negro back, at the same moment, with gestures friendly and familiar, almost jocose, bidding him, in substance, not be a fool. Simultaneously the hatchet-polishers resumed their seats, quietly as so many tailors, and at once, as if nothing had happened, the work of hoisting in the casks was resumed, whites and blacks singing at the tackle.

Captain Delano glanced toward Don Benito. As he saw his meagre form in the act of recovering itself from reclining in the servant's arms, into which the agitated invalid had fallen, he could not but marvel at the panic by which himself had been surprised on the darting supposition that such a commander, who, upon a legitimate occasion, so trivial, too, as it now appeared, could lose all self-command, was, with energetic iniquity, going to bring about his murder.

The casks being on deck, Captain Delano was handed a number of jars and cups by one of the steward's aids, who, in the name of his captain, entreated him to do as he had proposed—dole out the water. He complied, with republican impartiality as to this republican element, which always seeks one level, serving the oldest white no better than the youngest black; excepting, indeed, poor Don Benito, whose condition, if not rank, demanded an extra allowance. To him, in the first place, Captain Delano presented a fair pitcher of the fluid; but, thirsting as he was for fresh water, the Spaniard quaffed not a drop until after several grave bows and salutes. A reciprocation of courtesies which the sight-loving Africans hailed with clapping of hands.

Two of the less wilted pumpkins being reserved for the cabin table, the residue were minced up on the spot for the general regalement. But the soft bread, sugar, and bottled cider, Captain Delano would have given the whites alone, and in chief Don Benito; but the latter objected; which disinterestedness not a little pleased the American; and so mouthfuls all around were given alike to whites and blacks; excepting one bottle of cider, which Babo insisted upon setting aside for his master.

Here it may be observed that as, on the first visit of the boat, the American had not permitted his men to board the ship, neither did he now; being unwilling to add to the confusion of the decks.

Not uninfluenced by the peculiar good-humor at present prevailing, and for the time oblivious of any but benevolent thoughts, Captain Delano, who, from recent indications, counted upon a breeze within an hour or two at furthest,

3-4. the visitor's—"Captain Delano's" (P). **22. his captain**—"Don Benito" (P). **28. the Spaniard**—"Don Benito" (P). **29. salutes. A reciprocation**—"salutes: a reciprocation" (P). **33. whites**—"Spaniards" (P). **34-35. disinterestedness not a little**—"disinterestedness, on his part, not a little" (P).

dispatched the boat back to the sealer, with orders for all the hands that could be spared immediately to set about rafting casks to the watering-place and filling them. Likewise he bade word be carried to his chief officer, that if, against present expectation, the ship was not brought to anchor by sunset, he need be under no concern; for as there was to be a full moon that night, he (Captain Delano) would remain on board ready to play the pilot, come the wind soon or late.

As the two captains stood together, observing the departing boat—the servant, as it happened, having just spied a spot on his master's velvet sleeve, and silently engaged rubbing it out—the American expressed his regrets that the San Dominick had no boats; none, at least, but the unseaworthy old hulk of the long-boat, which, warped as a camel's skeleton in the desert, and almost as bleached, lay pot-wise inverted amidships, one side a little tipped, furnishing a subterraneous sort of den for family groups of the blacks, mostly women and small children; who, squatting on old mats below, or perched above in the dark dome, on the elevated seats, were descried, some distance within, like a social circle of bats, sheltering in some friendly cave; at intervals, ebon flights of naked boys and girls, three or four years old, darting in and out of the den's mouth.

"Had you three or four boats now, Don Benito," said Captain Delano, "I think that, by tugging at the oars, your negroes here might help along matters some. Did you sail from port without boats, Don Benito?"

"They were stove in the gales, Señor."

"That was bad. Many men, too, you lost then. Boats and men. Those must have been hard gales, Don Benito."

"Past all speech," cringed the Spaniard.

"Tell me, Don Benito," continued his companion with increased interest, "tell me, were these gales immediately off the pitch of Cape Horn?"

"Cape Horn?—who spoke of Cape Horn?"

"Yourself did, when giving me an account of your voyage," answered Captain Delano, with almost equal astonishment at this eating of his own words, even as he ever seemed eating his own heart, on the part of the Spaniard. "You yourself, Don Benito, spoke of Cape Horn," he emphatically repeated.

The Spaniard turned, in a sort of stooping posture, pausing an instant, as one about to make a plunging exchange of elements, as from air to water.

At this moment a messenger-boy, a white, hurried by, in the regular performance of his function carrying the last expired half-hour forward to the forecastle, from the cabin time-piece, to have it struck at the ship's large bell.

"Master," said the servant, discontinuing his work on the coat sleeve, and addressing the rapt Spaniard with a sort of timid apprehensiveness, as one charged with a duty, the discharge of which, it was foreseen, would prove irksome to the very person who had imposed it, and for whose benefit it was intended, "master told me never mind where he was, or how engaged, always to remind him, to a minute, when shaving-time comes. Miguel has gone to strike the half-hour afternoon. It is *now,* master. Will master go into the cuddy?"

6-7. come the wind—"should the wind come" (P). **46. cuddy**—small cabin.

"Ah—yes," answered the Spaniard, starting, as from dreams into realities; then turning upon Captain Delano, he said that ere long he would resume the conversation.

"Then if master means to talk more to Don Amasa," said the servant, "why not let Don Amasa sit by master in the cuddy, and master can talk, and Don Amasa can listen, while Babo here lathers and strops."

"Yes," said Captain Delano, not unpleased with this sociable plan, "yes, Don Benito, unless you had rather not, I will go with you."

"Be it so, Señor."

As the three passed aft, the American could not but think it another strange instance of his host's capriciousness, this being shaved with such uncommon punctuality in the middle of the day. But he deemed it more than likely that the servant's anxious fidelity had something to do with the matter; inasmuch as the timely interruption served to rally his master from the mood which had evidently been coming upon him.

The place called the cuddy was a light deck-cabin formed by the poop, a sort of attic to the large cabin below. Part of it had formerly been the quarters of the officers; but since their death all the partitionings had been thrown down, and the whole interior converted into one spacious and airy marine hall; for absence of fine furniture and picturesque disarray of odd appurtenances, somewhat answering to the wide, cluttered hall of some eccentric bachelor-squire in the country, who hangs his shooting-jacket and tobacco-pouch on deer antlers, and keeps his fishing-rod, tongs, and walking-stick in the same corner.

The similitude was heightened, if not originally suggested, by glimpses of the surrounding sea; since, in one aspect, the country and the ocean seem cousins-german.

The floor of the cuddy was matted. Overhead, four or five old muskets were stuck into horizontal holes along the beams. On one side was a claw-footed old table lashed to the deck; a thumbed missal on it, and over it a small, meagre crucifix attached to the bulk-head. Under the table lay a dented cutlass or two, with a hacked harpoon, among some melancholy old rigging, like a heap of poor friars' girdles. There were also two long, sharp-ribbed settees of Malacca cane, black with age, and uncomfortable to look at as inquisitors' racks, with a large, misshapen arm-chair, which, furnished with a rude barber's crotch at the back, working with a screw, seemed some grotesque engine of torment. A flag locker was in one corner, exposing various colored bunting, some rolled up, others half unrolled, still others tumbled. Opposite was a cumbrous wash-stand, of black mahogany, all of one block, with a pedestal, like a font, and over it a railed shelf, containing combs, brushes, and other implements of the toilet. A torn hammock of stained grass swung near; the sheets tossed, and the pillow wrinkled up like a brow, as if whoever slept here slept but illy, with alternate visitations of sad thoughts and bad dreams.

The further extremity of the cuddy, overhanging the ship's stern, was pierced with three openings, windows or port-holes, according as men or cannon might

36. **grotesque engine**—"grotesque middle age engine" (P).

peer, socially or unsocially, out of them. At present neither men nor cannon were seen, though huge ring-bolts and other rusty iron fixtures of the woodwork hinted of twenty-four-pounders.

Glancing towards the hammock as he entered, Captain Delano said, "You sleep here, Don Benito?"

"Yes, Señor, since we got into mild weather."

"This seems a sort of dormitory, sitting-room, sail-loft, chapel, armory, and private closet together, Don Benito," added Captain Delano, looking round.

"Yes, Señor; events have not been favorable to much order in my arrangements."

Here the servant, napkin on arm, made a motion as if waiting his master's good pleasure. Don Benito signified his readiness, when, seating him in the Malacca arm-chair, and for the guest's convenience drawing opposite one of the settees, the servant commenced operations by throwing back his master's collar and loosening his cravat.

There is something in the negro which, in a peculiar way, fits him for avocations about one's person. Most negroes are natural valets and hair-dressers; taking to the comb and brush congenially as to the castinets, and flourishing them apparently with almost equal satisfaction. There is, too, a smooth tact about them in this employment, with a marvelous, noiseless, gliding briskness, not ungraceful in its way, singularly pleasing to behold, and still more so to be the manipulated subject of. And above all is the great gift of good-humor. Not the mere grin or laugh is here meant. Those were unsuitable. But a certain easy cheerfulness, harmonious in every glance and gesture; as though God had set the whole negro to some pleasant tune.

When to all this is added the docility arising from the unaspiring contentment of a limited mind, and that susceptibility of blind attachment sometimes inhering in indisputable inferiors, one readily perceives why those hypochondriacs, Johnson and Byron—it may be something like the hypochondriac, Benito Cereno—took to their hearts, almost to the exclusion of the entire white race, their serving men, the negroes, Barber and Fletcher. But if there be that in the negro which exempts him from the inflicted sourness of the morbid or cynical mind, how, in his most prepossessing aspects, must he appear to a benevolent one? When at ease with respect to exterior things, Captain Delano's nature was not only benign, but familiarly and humorously so. At home, he had often taken rare satisfaction in sitting in his door, watching some free man of color at his work or play. If on a voyage he chanced to have a black sailor, invariably he was on chatty, and half-gamesome terms with him. In fact, like most men of a good, blithe heart, Captain Delano took to negroes, not philanthropically, but genially, just as other men to Newfoundland dogs.

Hitherto the circumstances in which he found the San Dominick had repressed the tendency. But in the cuddy, relieved from his former uneasiness, and, for various reasons, more sociably inclined than at any previous period of the day, and seeing the colored servant, napkin on arm, so debonair about

31. **Barber and Fletcher**—For Francis Barber, the devoted Negro servant of Dr. Samuel Johnson, consult the index to a good edition of Boswell's *Life of Johnson*. There seems to be no record that William Fletcher, the body servant of Lord Byron, was a Negro.

his master, in a business so familiar as that of shaving, too, all his old weakness for negroes returned.

Among other things, he was amused with an odd instance of the African love of bright colors and fine shows, in the black's informally taking from the flag-locker a great piece of bunting of all hues, and lavishly tucking it under his master's chin for an apron.

The mode of shaving among the Spaniards is a little different from what it is with other nations. They have a basin, specially called a barber's basin, which on one side is scooped out, so as accurately to receive the chin, against which it is closely held in lathering; which is done, not with a brush, but with soap dipped in the water of the basin and rubbed on the face.

In the present instance salt-water was used for lack of better; and the parts lathered were only the upper lip, and low down under the throat, all the rest being cultivated beard.

These preliminaries being somewhat novel to Captain Delano he sat curiously eying them, so that no conversation took place, nor, for the present, did Don Benito appear disposed to renew any.

Setting down his basin, the negro searched among the razors, as for the sharpest, and having found it, gave it an additional edge by expertly stropping it on the firm, smooth, oily skin of his open palm; he then made a gesture as if to begin, but midway stood suspended for an instant, one hand elevating the razor, the other professionally dabbling among the bubbling suds on the Spaniard's lank neck. Not unaffected by the close sight of the gleaming steel, Don Benito nervously shuddered; his usual ghastliness was heightened by the lather, which lather, again, was intensified in its hue by the contrasting sootiness of the negro's body. Altogether the scene was somewhat peculiar, at least to Captain Delano, nor, as he saw the two thus postured, could he resist the vagary, that in the black he saw a headsman, and in the white a man at the block. But this was one of those antic conceits, appearing and vanishing in a breath, from which, perhaps, the best regulated mind is not free.

Meantime the agitation of the Spaniard had a little loosened the bunting from around him, so that one broad fold swept curtain-like over the chair-arm to the floor, revealing, amid a profusion of armorial bars and ground-colors—black, blue and yellow—a closed castle in a blood-red field diagonal with a lion rampant in a white.

"The castle and the lion," exclaimed Captain Delano—"why, Don Benito, this is the flag of Spain you use here. It's well it's only I, and not the King, that sees this," he added with a smile, "but"—turning towards the black,—"it's all one, I suppose, so the colors be gay;" which playful remark did not fail somewhat to tickle the negro.

"Now, master," he said, readjusting the flag, and pressing the head gently further back into the crotch of the chair; "now, master," and the steel glanced nigh the throat.

Again Don Benito faintly shuddered.

"You must not shake so, master. See, Don Amasa, master always shakes

34. closed castle . . . field diagonal—heraldic terms.

when I shave him. And yet master knows I never yet have drawn blood, though it's true, if master will shake so, I may some of these times. Now, master," he continued. "And now, Don Amasa, please go on with your talk about the gale, and all that; master can hear, and between times, master can answer."

"Ah yes, these gales," said Captain Delano; "but the more I think of your voyage, Don Benito, the more I wonder, not at the gales, terrible as they must have been, but at the disastrous interval following them. For here, by your account, have you been these two months and more getting from Cape Horn to St. Maria, a distance which I myself, with a good wind, have sailed in a few days. True, you had calms, and long ones, but to be becalmed for two months, that is, at least, unusual. Why, Don Benito, had almost any other gentleman told me such a story, I should have been half disposed to a little incredulity."

Here an involuntary expression came over the Spaniard, similar to that just before on the deck, and whether it was the start he gave, or a sudden gawky roll of the hull in the calm, or a momentary unsteadiness of the servant's hand, however it was, just then the razor drew blood, spots of which stained the creamy lather under the throat; immediately the black barber drew back his steel, and remaining in his professional attitude, back to Captain Delano, and face to Don Benito, held up the trickling razor, saying, with a sort of half humorous sorrow, "See, master—you shook so—here's Babo's first blood."

No sword drawn before James the First of England, no assassination in that timid King's presence, could have produced a more terrified aspect than was now presented by Don Benito.

Poor fellow, thought Captain Delano, so nervous he can't even bear the sight of barber's blood; and this unstrung, sick man, is it credible that I should have imagined he meant to spill all my blood, who can't endure the sight of one little drop of his own? Surely, Amasa Delano, you have been beside yourself this day. Tell it not when you get home, sappy Amasa. Well, well, he looks like a murderer, doesn't he? More like as if himself were to be done for. Well, well, this day's experience shall be a good lesson.

Meantime, while these things were running through the honest seaman's mind, the servant had taken the napkin from his arm, and to Don Benito had said—"But answer Don Amasa, please, master, while I wipe this ugly stuff off the razor, and strop it again."

As he said the words, his face was turned half round, so as to be alike visible to the Spaniard and the American, and seemed, by its expression, to hint, that he was desirous, by getting his master to go on with the conversation, considerately to withdraw his attention from the recent annoying accident. As if glad to snatch the offered relief, Don Benito resumed, rehearsing to Captain Delano, that not only were the calms of unusual duration, but the ship had fallen in with obstinate currents; and other things he added, some of which were but repetitions of former statements, to explain how it came to pass that the passage from Cape Horn to St. Maria had been so exceedingly long; now and then mingling with his words, incidental praises, less qualified than before, to

22. James the First—Fearful of assassination, James I of England (1566-1625) wore padded clothing, and forbade the drawing of swords in his presence.

the blacks, for their general good conduct. These particulars were not given consecutively, the servant, at convenient times, using his razor, and so, between the intervals of shaving, the story and panegyric went on with more than usual huskiness.

To Captain Delano's imagination, now again not wholly at rest, there was something so hollow in the Spaniard's manner, with apparently some reciprocal hollowness in the servant's dusky comment of silence, that the idea flashed across him, that possibly master and man, for some unknown purpose, were acting out, both in word and deed, nay, to the very tremor of Don Benito's limbs, some juggling play before him. Neither did the suspicion of collusion lack apparent support, from the fact of those whispered conferences before mentioned. But then, what could be the object of enacting this play of the barber before him? At last, regarding the notion as a whimsy, insensibly suggested, perhaps, by the theatrical aspect of Don Benito in his harlequin ensign, Captain Delano speedily banished it.

The shaving over, the servant bestirred himself with a small bottle of scented waters, pouring a few drops on the head, and then diligently rubbing; the vehemence of the exercise causing the muscles of his face to twitch rather strangely.

His next operation was with comb, scissors and brush; going round and round, shaping him: a curl here, clipping an unruly whisker-hair there, giving a graceful sweep to the temple-lock, with other impromptu touches evincing the hand of a master; while, like any resigned gentleman in barber's hands, Don Benito bore all, much less uneasily, at least, than he had done the razoring; indeed, he sat so pale and rigid now, that the negro seemed a Nubian sculptor finishing off a white statue-head.

All being over at last, the standard of Spain removed, tumbled up, and tossed back into the flag-locker, the negro's warm breath blowing away any stray hair which might have lodged down his master's neck; collar and cravat readjusted; a speck of lint whisked off the velvet lapel; all this being done; backing off a little space, and pausing with an expression of subdued self-complacency, the servant for a moment surveyed his master, as, in toilet at least, the creature of his own tasteful hands.

Captain Delano playfully complimented him upon his achievement; at the same time congratulating Don Benito.

But neither sweet waters, nor shampooing, nor fidelity, nor sociality, delighted the Spaniard. Seeing him relapsing into forbidding gloom, and still remaining seated, Captain Delano, thinking that his presence was undesired just then, withdrew, on pretense of seeing whether, as he had prophesied, any signs of a breeze were visible.

Walking forward to the mainmast, he stood awhile thinking over the scene, and not without some undefined misgivings, when he heard a noise near the cuddy, and turning, saw the negro, his hand to his cheek. Advancing, Captain Delano perceived that the cheek was bleeding. He was about to ask the cause, when the negro's wailing soliloquy enlightened him.

2. at convenient times—"now and then" (P). **37. forbidding**—"forbidden" (P).

"Ah, when will master get better from his sickness; only the sour heart that sour sickness breeds made him serve Babo so; cutting Babo with the razor, because, only by accident, Babo had given master one little scratch; and for the first time in so many a day, too. Ah, ah, ah," holding his hand to his face.

Is it possible, thought Captain Delano; was it to wreak in private his Spanish spite against this poor friend of his, that Don Benito, by his sullen manner, impelled me to withdraw? Ah, this slavery breeds ugly passions in man.—Poor fellow!

He was about to speak in sympathy to the negro, but with a timid reluctance he now re-entered the cuddy.

Presently master and man came forth; Don Benito leaning on his servant as if nothing had happened.

But a sort of love-quarrel, after all, thought Captain Delano.

He accosted Don Benito, and they slowly walked together. They had gone but a few paces, when the steward—a tall, rajah-looking mulatto, orientally set off with a pagoda turban formed by three or four Madras handkerchiefs wound about his head, tier on tier—approaching with a salaam, announced lunch in the cabin.

On their way thither, the two captains were preceded by the mulatto, who, turning round as he advanced, with continual smiles and bows, ushered them in, a display of elegance which quite completed the insignificance of the small bare-headed Babo, who, as if not unconscious of inferiority, eyed askance the graceful steward. But in part, Captain Delano imputed his jealous watchfulness to that peculiar feeling which the full-blooded African entertains for the adulterated one. As for the steward, his manner, if not bespeaking much dignity of self-respect, yet evidenced his extreme desire to please; which is doubly meritorious, as at once Christian and Chesterfieldian.

Captain Delano observed with interest that while the complexion of the mulatto was hybrid, his physiognomy was European—classically so.

"Don Benito," whispered he, "I am glad to see this usher-of-the-golden-rod of yours; the sight refutes an ugly remark once made to me by a Barbados planter; that when a mulatto has a regular European face, look out for him; he is a devil. But see, your steward here has features more regular than King George's of England; and yet there he nods, and bows, and smiles; a king, indeed—the king of kind hearts and polite fellows. What a pleasant voice he has, too?"

"He has, Señor."

"But, tell me, has he not, so far as you have known him, always proved a good, worthy fellow?" said Captain Delano, pausing, while with a final genuflexion the steward disappeared into the cabin; "come, for the reason just mentioned, I am curious to know."

"Francesco is a good man," rather sluggishly responded Don Benito, like a phlegmatic appreciator, who would neither find fault nor flatter.

"Ah, I thought so. For it were strange, indeed, and not very creditable to

27. Chesterfieldian—The reference is to the famous *Letters* of the Earl of Chesterfield (1694-1773), intended to teach polite and worldly conduct. **30. usher-of-the-golden-rod**—An usher bearing a black rod is an official of the English Parliament.

us white-skins, if a little of our blood mixed with the African's, should, far from improving the latter's quality, have the sad effect of pouring vitriolic acid into black broth; improving the hue, perhaps, but not the wholesomeness."

"Doubtless, doubtless, Señor, but"—glancing at Babo—"not to speak of negroes, your planter's remark I have heard applied to the Spanish and Indian intermixtures in our provinces. But I know nothing about the matter," he listlessly added.

And here they entered the cabin.

The lunch was a frugal one. Some of Captain Delano's fresh fish and pumpkins, biscuit and salt beef, the reserved bottle of cider, and the San Dominick's last bottle of Canary.

As they entered, Francesco, with two or three colored aids, was hovering over the table giving the last adjustments. Upon perceiving their master they withdrew, Francesco making a smiling congé, and the Spaniard, without condescending to notice it, fastidiously remarking to his companion that he relished not superfluous attendance.

Without companions, host and guest sat down, like a childless married couple, at opposite ends of the table, Don Benito waving Captain Delano to his place, and, weak as he was, insisting upon that gentleman being seated before himself.

The negro placed a rug under Don Benito's feet, and a cushion behind his back, and then stood behind, not his master's chair, but Captain Delano's. At first, this a little surprised the latter. But it was soon evident that, in taking his position, the black was still true to his master; since by facing him he could the more readily anticipate his slightest want.

"This is an uncommonly intelligent fellow of yours, Don Benito," whispered Captain Delano across the table.

"You say true, Señor."

During the repast, the guest again reverted to parts of Don Benito's story, begging further particulars here and there. He inquired how it was that the scurvy and fever should have committed such wholesale havoc upon the whites, while destroying less than half of the blacks. As if this question reproduced the whole scene of plague before the Spaniard's eyes, miserably reminding him of his solitude in a cabin where before he had had so many friends and officers round him, his hand shook, his face became hueless, broken words escaped; but directly the sane memory of the past seemed replaced by insane terrors of the present. With starting eyes he stared before him at vacancy. For nothing was to be seen but the hand of his servant pushing the Canary over towards him. At length a few sips served partially to restore him. He made random reference to the different constitutions of races, enabling one to offer more resistance to certain maladies than another. The thought was new to his companion.

Presently Captain Delano, intending to say something to his host concerning the pecuniary part of the business he had undertaken for him, especially—since he was strictly accountable to his owners—with reference to the new suit of sails, and other things of that sort; and naturally preferring to conduct such affairs in private, was desirous that the servant should withdraw; imag-

ining that Don Benito for a few minutes could dispense with his attendance. He, however, waited awhile; thinking that, as the conversation proceeded, Don Benito, without being prompted, would perceive the propriety of the step.

But it was otherwise. At last catching his host's eye, Captain Delano, with a slight backward gesture of this thumb, whispered, "Don Benito, pardon me, but there is an interference with the full expression of what I have to say to you."

Upon this the Spaniard changed countenance; which was imputed to his resenting the hint, as in some way a reflection upon his servant. After a moment's pause, he assured his guest that the black's remaining with them could be of no disservice; because since losing his officers he had made Babo (whose original office, it now appeared, had been captain of the slaves) not only his constant attendant and companion, but in all things his confidant.

After this, nothing more could be said; though, indeed, Captain Delano could hardly avoid some little tinge of irritation upon being left ungratified in so inconsiderable a wish, by one, too, for whom he intended such solid services. But it is only his querulousness, thought he; and so filling his glass he proceeded to business.

The price of the sails and other matters was fixed upon. But while this was being done, the American observed that, though his original offer of assistance had been hailed with hectic animation, yet now when it was reduced to a business transaction, indifference and apathy were betrayed. Don Benito, in fact, appeared to submit to hearing the details more out of regard to common propriety, than from any impression that weighty benefit to himself and his voyage was involved.

Soon, this manner became still more reserved. The effort was vain to seek to draw him into social talk. Gnawed by his splenetic mood, he sat twitching his beard, while to little purpose the hand of his servant, mute as that on the wall, slowly pushed over the Canary.

Lunch being over, they sat down on the cushioned transom; the servant placing a pillow behind his master. The long continuance of the calm had now affected the atmosphere. Don Benito sighed heavily, as if for breath.

"Why not adjourn to the cuddy," said Captain Delano; "there is more air there." But the host sat silent and motionless.

Meantime his servant knelt before him with a large fan of feathers. And Francesco coming in on tiptoes, handed the negro a little cup of aromatic waters, with which at intervals he chafed his master's brow; smoothing the hair along the temples as a nurse does a child's. He spoke no word. He only rested his eye on his master's, as if, amid all Don Benito's distress, a little to refresh his spirit by the silent sight of fidelity.

Presently the ship's bell sounded two o'clock; and through the cabin-windows a slight rippling of the sea was discerned; and from the desired direction.

"There," exclaimed Captain Delano, "I told you so, Don Benito, look!"

He had risen to his feet, speaking in a very animated tone, with a view the more to rouse his companion. But though the crimson curtain of the stern-window near him that moment fluttered against his pale cheek, Don Benito seemed to have even less welcome for the breeze than the calm.

Poor fellow, thought Captain Delano, bitter experience has taught him that one ripple does not make a wind, any more than one swallow a summer. But he is mistaken for once. I will get his ship in for him, and prove it.

Briefly alluding to his weak condition, he urged his host to remain quietly where he was, since he (Captain Delano) would with pleasure take upon himself the responsibility of making the best use of the wind.

Upon gaining the deck, Captain Delano started at the unexpected figure of Atufal, monumentally fixed at the threshold, like one of those sculptured porters of black marble guarding the porches of Egyptian tombs.

But this time the start was, perhaps, purely physical. Atufal's presence, singularly attesting docility even in sullenness, was contrasted with that of the hatchet-polishers, who in patience evinced their industry; while both spectacles showed, that lax as Don Benito's general authority might be, still, whenever he chose to exert it, no man so savage or colossal but must, more or less, bow.

Snatching a trumpet which hung from the bulwarks, with a free step Captain Delano advanced to the forward edge of the poop, issuing his orders in his best Spanish. The few sailors and many negroes, all equally pleased, obediently set about heading the ship toward the harbour.

While giving some directions about setting a lower stu'n'-sail, suddenly Captain Delano heard a voice faithfully repeating his orders. Turning, he saw Babo, now for the time acting, under the pilot, his original part of captain of the slaves. This assistance proved valuable. Tattered sails and warped yards were soon brought into some trim. And no brace or halyard was pulled but to the blithe songs of the inspirited negroes.

Good fellows, thought Captain Delano, a little training would make fine sailors of them. Why see, the very women pull and sing, too. These must be some of those Ashantee negresses that make such capital soldiers, I've heard. But who's at the helm? I must have a good hand there.

He went to see.

The San Dominick steered with a cumbrous tiller, with large horizontal pullies attached. At each pulley-end stood a subordinate black, and between them, at the tiller-head, the responsible post, a Spanish seaman, whose countenance evinced his due share in the general hopefulness and confidence at the coming of the breeze.

He proved the same man who had behaved with so shame-faced an air on the windlass.

"Ah,—it is you, my man," exclaimed Captain Delano—"well, no more sheep's-eyes now;—look straight forward and keep the ship so. Good hand, I trust? And want to get into the harbor, don't you?"

The man assented with an inward chuckle, grasping the tiller-head firmly. Upon this, unperceived by the American, the two blacks eyed the sailor intently.

Finding all right at the helm, the pilot went forward to the forecastle, to see how matters stood there.

The ship now had way enough to breast the current. With the approach of evening the breeze would be sure to freshen.

40. The man assented—" 'Si, Señor,' assented the man" (P). **41. intently**—"askance" (P).

Having done all that was needed for the present, Captain Delano, giving his last orders to the sailors, turned aft to report affairs to Don Benito in the cabin; perhaps additionally incited to rejoin him by the hope of snatching a moment's private chat while his servant was engaged upon deck.

From opposite sides, there were, beneath the poop, two approaches to the cabin; one further forward than the other, and consequently communicating with a longer passage. Marking the servant still above, Captain Delano, taking the highest entrance—the one last named, and at whose porch Atufal still stood—hurried on his way, till, arrived at the cabin threshold, he paused an instant, a little to recover from his eagerness. Then, with the words of his intended business upon his lips, he entered. As he advanced toward the seated Spaniard, he heard another footstep, keeping time with his. From the opposite door, a salver in hand, the servant was likewise advancing.

"Confound the faithful fellow," thought Captain Delano; "what a vexatious coincidence."

Possibly, the vexation might have been something different, were it not for the brisk confidence inspired by the breeze. But even as it was, he felt a slight twinge, from a sudden indefinite association in his mind of Babo with Atufal.

"Don Benito," said he, "I give you joy; the breeze will hold, and will increase. By the way, your tall man and time-piece, Atufal, stands without. By your order, of course?"

Don Benito recoiled, as if at some bland satirical touch, delivered with such adroit garnish of apparent good breeding as to present no handle for retort.

He is like one flayed alive, thought Captain Delano; where may one touch him without causing a shrink?

The servant moved before his master, adjusting a cushion; recalled to civility, the Spaniard stiffly replied: "you are right. The slave appears where you saw him, according to my command; which is, that if at the given hour I am below, he must take his stand and abide my coming."

"Ah now, pardon me, but that is treating the poor fellow like an ex-king indeed. Ah, Don Benito," smiling, "for all the license you permit in some things, I fear lest, at bottom, you are a bitter hard master."

Again Don Benito shrank; and this time, as the good sailor thought, from a genuine twinge of his conscience.

Conversation now became constrained. In vain Captain Delano called attention to the now perceptible motion of the keel gently cleaving the sea; with lack-lustre eye, Don Benito returned words few and reserved.

By-and-by, the wind having steadily risen, and still blowing right into the harbor, bore the San Dominick swiftly on. Rounding a point of land, the sealer at distance came into open view.

Meantime Captain Delano had again repaired to the deck, remaining there some time. Having at last altered the ship's course, so as to give the reef a wide berth, he returned for a few moments below.

I will cheer up my poor friend, this time, thought he.

"Better and better, Don Benito,["] he cried as he blithely re-entered: "there

11-12. **the seated Spaniard, he**—"the Spaniard, on the transom, he" (P). 17. **brisk**—"buoyant" (P). 18. **indefinite**—"involuntary" (P). 31. **indeed**—"denied" (P).

will soon be an end to your cares, at least for awhile. For when, after a long, sad voyage, you know, the anchor drops into the haven, all its vast weight seems lifted from the captain's heart. We are getting on famously, Don Benito. My ship is in sight. Look through this side-light here; there she is; all a-taunt-o! The Bachelor's Delight, my good friend. Ah, how this wind braces one up. Come, you must take a cup of coffee with me this evening. My old steward will give you as fine a cup as ever any sultan tasted. What say you, Don Benito, will you?"

At first, the Spaniard glanced feverishly up, casting a longing look towards the sealer, while with mute concern his servant gazed into his face. Suddenly the old ague of coldness returned, and dropping back to his cushions he was silent.

"You do not answer. Come, all day you have been my host; would you have hospitality all on one side?"

"I cannot go," was the response.

"What? It will not fatigue you. The ships will lie together as near as they can, without swinging foul. It will be little more than stepping from deck to deck; which is but as from room to room. Come, come, you must not refuse me."

"I cannot go," decisively and repulsively repeated Don Benito.

Renouncing all but the last appearance of courtesy, with a sort of cadaverous sullenness, and biting his thin nails to the quick, he glanced, almost glared, at his guest, as if impatient that a stranger's presence should interfere with the full indulgence of his morbid hour. Meantime the sound of the parted waters came more and more gurglingly and merrily in at the windows; as reproaching him for his dark spleen; as telling him that, sulk as he might, and go mad with it, nature cared not a jot; since, whose fault was it, pray?

But the foul mood was now at its depth, as the fair wind at its height.

There was something in the man so far beyond any mere unsociality or sourness previously evinced, that even the forbearing good-nature of his guest could no longer endure it. Wholly at a loss to account for such demeanor, and deeming sickness with eccentricity, however extreme, no adequate excuse, well satisfied, too, that nothing in his own conduct could justify it, Captain Delano's pride began to be roused. Himself became reserved. But all seemed one to the Spaniard. Quitting him, therefore, Captain Delano once more went to the deck.

The ship was now within less than two miles of the sealer. The whaleboat was seen darting over the interval.

To be brief, the two vessels, thanks to the pilot's skill, ere long in neighborly style lay anchored together.

Before returning to his own vessel, Captain Delano had intended communicating to Don Benito the smaller details of the proposed services to be rendered. But, as it was, unwilling anew to subject himself to rebuffs, he resolved, now that he had seen the San Dominick safely moored, immediately to quit her, without further allusion to hospitality or business. Indefinitely postponing his

42. smaller—"practical" (P).

ulterior plans, he would regulate his future actions according to future circumstances. His boat was ready to receive him; but his host still tarried below. Well, thought Captain Delano, if he has little breeding, the more need to show mine. He descended to the cabin to bid a ceremonious, and, it may be, tacitly rebukeful adieu. But to his great satisfaction, Don Benito, as if he began to feel the weight of that treatment with which his slighted guest had, not indecorously, retaliated upon him, now supported by his servant, rose to his feet, and grasping Captain Delano's hand, stood tremulous; too much agitated to speak. But the good augury hence drawn was suddenly dashed, by his resuming all his previous reserve, with augmented gloom, as, with half-averted eyes, he silently reseated himself on his cushions. With a corresponding return of his own chilled feelings, Captain Delano bowed and withdrew.

He was hardly midway in the narrow corridor, dim as a tunnel, leading from the cabin to the stairs, when a sound, as of the tolling for execution in some jail-yard, fell on his ears. It was the echo of the ship's flawed bell, striking the hour, drearily reverberated in this subterranean vault. Instantly, by a fatality not to be withstood, his mind, responsive to the portent, swarmed with superstitious suspicions. He paused. In images far swifter than these sentences, the minutest details of all his former distrusts swept through him.

Hitherto, credulous good-nature had been too ready to furnish excuses for reasonable fears. Why was the Spaniard, so superfluously punctilious at times, now heedless of common propriety in not accompanying to the side his departing guest? Did indisposition forbid? Indisposition had not forbidden more irksome exertion that day. His last equivocal demeanor recurred. He had risen to his feet, grasped his guest's hand, motioned toward his hat; then, in an instant, all was eclipsed in sinister muteness and gloom. Did this imply one brief, repentant relenting at the final moment, from some iniquitous plot, followed by remorseless return to it? His last glance seemed to express a calamitous, yet acquiescent farewell to Captain Delano forever. Why decline the invitation to visit the sealer that evening? Or was the Spaniard less hardened than the Jew, who refrained not from supping at the board of him whom the same night he meant to betray? What imported all those day-long enigmas and contradictions, except they were intended to mystify, preliminary to some stealthy blow? Atufal, the pretended rebel, but punctual shadow, that moment lurked by the threshold without. He seemed a sentry, and more. Who, by his own confession, had stationed him there? Was the negro now lying in wait?

The Spaniard behind—his creature before: to rush from darkness to light was the involuntary choice.

The next moment, with clenched jaw and hand, he passed Atufal, and stood unharmed in the light. As he saw his trim ship lying peacefully at her anchor, and almost within ordinary call; as he saw his household boat, with familiar faces in it, patiently rising and falling on the short waves by the

33. **Jew**—*Cf.* Matt. 26: 25.

San Dominick's side; and then, glancing about the decks where he stood, saw the oakum-pickers still gravely plying their fingers; and heard the low, buzzing whistle and industrious hum of the hatchet-polishers, still bestirring themselves over their endless occupation; and more than all, as he saw the benign aspect of nature, taking her innocent repose in the evening; the screened sun in the quiet camp of the west shining out like the mild light from Abraham's tent; as his charmed eye and ear took in all these, with the chained figure of the black, the clenched jaw and hand relaxed. Once again he smiled at the phantoms which had mocked him, and felt something like a tinge of remorse, that, by indulging them even for a moment, he should, by implication, have betrayed an almost atheist doubt of the ever-watchful Providence above.

There was a few minutes' delay, while, in obedience to his orders, the boat was being hooked along to the gangway. During this interval, a sort of saddened satisfaction stole over Captain Delano, at thinking of the kindly offices he had that day discharged for a stranger. Ah, thought he, after good actions one's conscience is never ungrateful, however much so the benefited party may be.

Presently, his foot, in the first act of descent into the boat, pressed the first round of the side-ladder, his face presented inward upon the deck. In the same moment, he heard his name courteously sounded; and, to his pleased surprise, saw Don Benito advancing—an unwonted energy in his air, as if, at the last moment, intent upon making amends for his recent discourtesy. With instinctive good feeling, Captain Delano, withdrawing his foot, turned and reciprocally advanced. As he did so, the Spaniard's nervous eagerness increased, but his vital energy failed; so that, the better to support him, the servant, placing his master's hand on his naked shoulder, and gently holding it there, formed himself into a sort of crutch.

When the two captains met, the Spaniard again fervently took the hand of the American, at the same time casting an earnest glance into his eyes, but, as before, too much overcome to speak.

I have done him wrong, self-reproachfully thought Captain Delano; his apparent coldness has deceived me; in no instance has he meant to offend.

Meantime, as if fearful that the continuance of the scene might too much unstring his master, the servant seemed anxious to terminate it. And so, still presenting himself as a crutch, and walking between the two captains, he advanced with them towards the gangway; while still, as if full of kindly contrition, Don Benito would not let go the hand of Captain Delano, but retained it in his, across the black's body.

Soon they were standing by the side, looking over into the boat, whose crew turned up their curious eyes. Waiting a moment for the Spaniard to relinquish his hold, the now embarrassed Captain Delano lifted his foot, to overstep the threshold of the open gangway; but still Don Benito would not let go his hand. And yet, with an agitated tone, he said, "I can go no further; here I must bid you adieu. Adieu, my dear, dear Don Amasa. Go—go!"

6-7. light . . . tent—The reference is apparently to Abraham's entertaining three strangers; see Gen. 18: 1 ff. **24. withdrawing**—"revoking" (P).

suddenly tearing his hand loose, "go, and God guard you better than me, my best friend."

Not unaffected, Captain Delano would now have lingered; but catching the meekly admonitory eye of the servant, with a hasty farewell he descended into his boat, followed by the continual adieus of Don Benito, standing rooted in the gangway.

Seating himself in the stern, Captain Delano, making a last salute, ordered the boat shoved off. The crew had their oars on end. The bowsmen pushed the boat a sufficient distance for the oars to be lengthwise dropped. The instant that was done, Don Benito sprang over the bulwarks, falling at the feet of Captain Delano; at the same time, calling towards his ship, but in tones so frenzied, that none in the boat could understand him. But, as if not equally obtuse, three sailors, from three different and distant parts of the ship, splashed into the sea, swimming after their captain, as if intent upon his rescue.

The dismayed officer of the boat eagerly asked what this meant. To which, Captain Delano, turning a disdainful smile upon the unaccountable Spaniard, answered that, for his part, he neither knew nor cared; but it seemed as if Don Benito had taken it into his head to produce the impression among his people that the boat wanted to kidnap him. "Or else—give way for your lives," he wildly added, starting at a clattering hubbub in the ship, above which rang the tocsin of the hatchet-polishers; and seizing Don Benito by the throat he added, "this plotting pirate means murder!" Here, in apparent verification of the words, the servant, a dagger in his hand, was seen on the rail overhead, poised, in the act of leaping, as if with desperate fidelity to befriend his master to the last; while, seemingly to aid the black, the three Spanish sailors were trying to clamber into the hampered bow. Meantime, the whole host of negroes, as if inflamed at the sight of their jeopardized captain, impended in one sooty avalanche over the bulwarks.

All this, with what preceded, and what followed, occurred with such involutions of rapidity, that past, present, and future seemed one.

Seeing the negro coming, Captain Delano had flung the Spaniard aside, almost in the very act of clutching him and, by the unconscious recoil, shifting his place, with arms thrown up, so promptly grappled the servant in his descent, that with dagger presented at Captain Delano's heart, the black seemed of purpose to have leaped there as to his mark. But the weapon was wrenched away, and the assailant dashed down into the bottom of the boat, which now, with disentangled oars, began to speed through the sea.

At this juncture, the left hand of Captain Delano, on one side, again clutched the half-reclined Don Benito, heedless that he was in a speechless faint, while his right foot, on the other side, ground the prostrate negro; and his right arm pressed for added speed on the after oar, his eye bent forward, encouraging his men to their utmost.

But here, the officer of the boat, who had at last succeeded in beating off the towing sailors, and was now, with face turned aft, assisting the bowsman at

8. **bowsmen**—"bowsman" (P). 13. **three sailors**—"three Spanish sailors" (P). 17. **Spaniard**—"Benito Cereno" (P). 19. **Don Benito**—"the Spaniard" (P). 44-45. **the towing sailors**—"the towing Spanish sailors" (P).

his oar, suddenly called to Captain Delano, to see what the black was about; while a Portuguese oarsman shouted to him to give heed to what the Spaniard was saying.

Glancing down at his feet, Captain Delano saw the freed hand of the servant aiming with a second dagger—a small one, before concealed in his wool—with this he was snakishly writhing up from the boat's bottom, at the heart of his master, his countenance lividly vindictive, expressing the centred purpose of his soul; while the Spaniard, half-choked, was vainly shrinking away, with husky words, incoherent to all but the Portuguese.

That moment, across the long-benighted mind of Captain Delano, a flash of revelation swept, illuminating in unanticipated clearness his host's whole mysterious demeanor, with every enigmatic event of the day, as well as the entire past voyage of the San Dominick. He smote Babo's hand down, but his own heart smote him harder. With infinite pity he withdrew his hold from Don Benito. Not Captain Delano, but Don Benito, the black, in leaping into the boat, had intended to stab.

Both the black's hands were held, as, glancing up towards the San Dominick, Captain Delano, now with the scales dropped from his eyes, saw the negroes, not in misrule, not in tumult, not as if frantically concerned for Don Benito, but with mask torn away, flourishing hatchets and knives, in ferocious piratical revolt. Like delirious black dervishes, the six Ashantees danced on the poop. Prevented by their foes from springing into the water, the Spanish boys were hurrying up to the topmost spars, while such of the few Spanish sailors, not already in the sea, less alert, were descried, helplessly mixed in, on deck, with the blacks.

Meantime Captain Delano hailed his own vessel, ordering the ports up, and the guns run out. But by this time the cable of the San Dominick had been cut; and the fag-end, in lashing out, whipped away the canvas shroud about the beak, suddenly revealing, as the bleached hull swung round towards the open ocean, death for the figurehead, in a human skeleton; chalky comment on the chalked words below, *"Follow your leader."*

At the sight, Don Benito, covering his face, wailed out: "'Tis he, Aranda! my murdered, unburied friend!"

Upon reaching the sealer, calling for ropes, Captain Delano bound the negro, who made no resistance, and had him hoisted to the deck. He would then have assisted the now almost helpless Don Benito up the side; but Don Benito, wan as he was, refused to move, or be moved, until the negro should have been first put below out of view. When, presently assured that it was done, he no more shrank from the ascent.

The boat was immediately dispatched back to pick up the three swimming sailors. Meantime, the guns were in readiness, though, owing to the San Dominick having glided somewhat astern of the sealer, only the aftermost one could be brought to bear. With this, they fired six times; thinking to cripple the fugitive ship by bringing down her spars. But only a few inconsiderable ropes were shot away. Soon the ship was beyond the gun's range,

11. **his host's**—"Benito Cereno's" (P).

steering broad out of the bay; the blacks thickly clustering round the bowsprit, one moment with taunting cries towards the whites, the next with upthrown gestures hailing the now dusky moors of ocean—cawing crows escaped from the hand of the fowler.

The first impulse was to slip the cables and give chase. But, upon second thoughts, to pursue with whale-boat and yawl seemed more promising.

Upon inquiring of Don Benito what firearms they had on board the San Dominick, Captain Delano was answered that they had none that could be used; because, in the earlier stages of the mutiny, a cabin-passenger, since dead, had secretly put out of order the locks of what few muskets there were. But with all his remaining strength, Don Benito entreated the American not to give chase, either with ship or boat; for the negroes had already proved themselves such desperadoes, that, in case of a present assault, nothing but a total massacre of the whites could be looked for. But, regarding this warning as coming from one whose spirit had been crushed by misery, the American did not give up his design.

The boats were got ready and armed. Captain Delano ordered twenty-five men into them. He was going himself when Don Benito grasped his arm.

"What! have you saved my life, Señor, and are you now going to throw away your own?"

The officers also, for reasons connected with their interests and those of the voyage, and a duty owing to the owners, strongly objected against their commander's going. Weighing their remonstrances a moment, Captain Delano felt bound to remain; appointing his chief mate—an athletic and resolute man, who had been a privateer's-man—to head the party. The more to encourage the sailors, they were told, that the Spanish captain considered his ship as good as lost; that she and her cargo, including some gold and silver, were worth more than a thousand doubloons. Take her, and no small part should be theirs. The sailors replied with a shout.

The fugitives had now almost gained an offing. It was nearly night; but the moon was rising. After hard, prolonged pulling, the boats came up on the ship's quarters, at a suitable distance laying upon their oars to discharge their muskets. Having no bullets to return, the negroes sent their yells. But, upon the second volley, Indian-like, they hurtled their hatchets. One took off a sailor's fingers. Another struck the whale-boat's bow, cutting off the rope there, and remaining stuck in the gunwale like a woodman's axe. Snatching it, quivering from its lodgment, the mate hurled it back. The returned gauntlet now stuck in the ship's broken quarter-gallery, and so remained.

The negroes giving too hot a reception, the whites kept a more respectful distance. Hovering now just out of reach of the hurtling hatchets, they, with a view to the close encounter which must soon come, sought to decoy the blacks into entirely disarming themselves of their most murderous weapons in a hand-to-hand fight, by foolishly flinging them, as missiles, short of the mark, into the sea. But ere long, perceiving the stratagem, the negroes desisted,

25. privateer's-man—to head—"privateer's-man, and, as his enemies whispered, a pirate—to head" (P). **28. worth more than a thousand**—"worth upwards of ten thousand" (P).

though not before many of them had to replace their lost hatchets with handspikes; an exchange which, as counted upon, proved, in the end, favorable to the assailants.

Meantime, with a strong wind, the ship still clove the water; the boats alternately falling behind, and pulling up, to discharge fresh volleys.

The fire was mostly directed towards the stern, since there, chiefly, the negroes, at present, were clustering. But to kill or maim the negroes was not the object. To take them, with the ship, was the object. To do it, the ship must be boarded; which could not be done by boats while she was sailing so fast.

A thought now struck the mate. Observing the Spanish boys still aloft, high as they could get, he called to them to descend to the yards, and cut adrift the sails. It was done. About this time, owing to causes hereafter to be shown, two Spaniards, in the dress of sailors, and conspicuously showing themselves, were killed; not by volleys, but by deliberate marksman's shots; while, as it afterwards appeared, during one of the general discharges, Atufal, the black, and the Spaniard at the helm likewise were killed. What now, with the loss of the sails, and loss of leaders, the ship became unmanageable to the negroes.

With creaking masts, she came heavily round to the wind; the prow slowly swinging into view of the boats, its skeleton gleaming in the horizontal moonlight, and casting a gigantic ribbed shadow upon the water. One extended arm of the ghost seemed beckoning the whites to avenge it.

"Follow your leader!" cried the mate; and, one on each bow, the boats boarded. Sealing-spears and cutlasses crossed hatches and handspikes. Huddled upon the long-boat amidships, the negresses raised a wailing chant, whose chorus was the clash of the steel.

For a time, the attack wavered; the negroes wedging themselves to beat it back; the half-repelled sailors, as yet unable to gain a footing, fighting as troopers in the saddle, one leg sideways flung over the bulwarks, and one without, plying their cutlasses like carters' whips. But in vain. They were almost overborne, when rallying themselves into a squad as one man, with a huzza, they sprang inboard, where, entangled, they involuntarily separated again. For a few breaths' space there was a vague, muffled, inner sound, as of submerged sword-fish rushing hither and thither through shoals of black-fish. Soon, in a reunited band, and joined by the Spanish seamen, the whites came to the surface, irresistibly driving the negroes toward the stern. But a barricade of casks and sacks, from side to side, had been thrown up by the mainmast. Here the negroes faced about, and though scorning peace or truce, yet fain would have had a respite. But, without pause, overleaping the barrier, the unflagging sailors again closed. Exhausted, the blacks now fought in despair. Their red tongues lolled, wolf-like, from their black mouths. But the pale sailors' teeth were set; not a word spoken; and, in five minutes more, the ship was won.

Nearly a score of the negroes were killed. Exclusive of those by the balls,

25. **Sealing-spears**—"Scaling-spears" (P).

many were mangled; their wounds—mostly inflicted by the long-edged sealing-spears—resembling those shaven ones of the English at Preston Pans, made by the poled scythes of the Highlanders. On the other side, none were killed, though several were wounded; some severely, including the mate. The surviving negroes were temporarily secured, and the ship, towed back into the harbor at midnight, once more lay anchored.

Omitting the incidents and arrangements ensuing, suffice it that, after two days spent in refitting, the two ships sailed in company for Conception in Chili, and thence for Lima in Peru; where, before the vice-regal courts, the whole affair, from the beginning, underwent investigation.

Though, midway on the passage, the ill-fated Spaniard, relaxed from constraint, showed some signs of regaining health with free-will; yet, agreeably to his own foreboding, shortly before arriving at Lima, he relapsed, finally becoming so reduced as to be carried ashore in arms. Hearing of his story and plight, one of the many religious institutions of the City of Kings opened an hospitable refuge to him, where both physician and priest were his nurses, and a member of the order volunteered to be his one special guardian and consoler, by night and by day.

The following extracts, translated from one of the official Spanish documents, will, it is hoped, shed light on the preceding narrative, as well as, in the first place, reveal the true port of departure and true history of the San Dominick's voyage, down to the time of her touching at the island of St. Maria.

But, ere the extracts come, it may be well to preface them with a remark.

The document selected, from among many others, for partial translation, contains the deposition of Benito Cereno; the first taken in the case. Some disclosures therein were, at the time, held dubious for both learned and natural reasons. The tribunal inclined to the opinion that the deponent, not undisturbed in his mind by recent events, raved of some things which could never have happened. But subsequent depositions of the surviving sailors, bearing out the revelations of their captain in several of the strangest particulars, gave credence to the rest. So that the tribunal, in its final decision, rested its capital sentences upon statements which, had they lacked confirmation, it would have deemed it but duty to reject.

I, DON JOSE DE ABOS AND PADILLA, His Majesty's Notary for the Royal Revenue, and Register of this Province, and Notary Public of the Holy Crusade of this Bishopric, etc.

Do certify and declare, as much as is requisite in law, that, in the criminal cause commenced the twenty-fourth of the month of September, in the year seventeen hundred and ninety-nine, against the Senegal negroes of the ship San Dominick, the following declaration before me was made:

Declaration of the first witness, DON BENITO CERENO.

The same day, and month, and year, His Honor, Doctor Juan Martinez de Rozas,

1-2. **sealing-spears**—"scaling-spears" (P). 2. **Preston Pans**—At the battle of Prestonpans (1745), the Scotch Highlanders, fighting for the cause of the Stuart Pretender, charged the English army as indicated.

Councilor of the Royal Audience of this Kingdom, and learned in the law of this Intendency, ordered the captain of the ship San Dominick, Don Benito Cereno, to appear; which he did in his litter, attended by the monk Infelez; of whom he received the oath, which he took by God, our Lord, and a sign of the Cross; under which he promised to tell the truth of whatever he should know and should be asked;—and being interrogated agreeably to the tenor of the act commencing the process, he said, that on the twentieth of May last, he set sail with his ship from the port of Valparaiso, bound to that of Callao; loaded with the produce of the country beside thirty cases of hardware and one hundred and sixty blacks, of both sexes, mostly belonging to Don Alexandro Aranda, gentleman, of the city of Mendoza; that the crew of the ship consisted of thirty-six men, beside the persons who went as passengers; that the negroes were in part as follows: . . .

[*Here, in the original, follows a list of some fifty names, descriptions, and ages, compiled from certain recovered documents of Aranda's, and also from recollections of the deponent, from which portions only are extracted.*]

—One, from about eighteen to nineteen years, named José, and this was the man that waited upon his master, Don Alexandro, and who speaks well the Spanish, having served him four or five years; . . . A mulatto, named Francesco, the cabin steward, of a good person and voice, having sung in the Valparaiso churches, native of the province of Buenos Ayres, aged about thirty-five years. A smart negro, named Dago, who had been for many years a grave-digger among the Spaniards aged forty-six years. . . . Four old negroes, born in Africa, from sixty to seventy, but sound, caulkers by trade, whose names are as follows:—the first was named Muri, and he was killed (as was also his son named Diamelo); the second, Nacta; the third, Yola, likewise killed; the fourth, Ghofan; and six full-grown negroes, aged from thirty to forty-five, all raw, and born among the Ashantees—Matiluqui Yan, Lecbe, Mapenda, Yambaio, Akim; four of whom were killed; . . . a powerful negro named Atufal, who being supposed to have been a chief in Africa, his owner set great store by him. . . . And a small negro of Senegal, but some years among the Spaniards, aged about thirty, which Negro's name was Babo; . . . that he does not remember the names of the others, but that still expecting the residue of Don Alexandro's papers will be found, will then take due account of them all, and remit to the court; . . . and thirty-nine women and children of all ages.

[*The catalogue over, the deposition goes on:*]

. . . That all the negroes slept upon deck, as is customary in this navigation, and none wore fetters, because the owner, his friend Aranda, told him that they were all tractable; . . . that on the seventh day after leaving port, at three o'clock in the morning, all the Spaniards being asleep except the two officers on the watch, who were the boatswain, Juan Robles, and the carpenter, Juan Bautista Gayete, and the helmsman and his boy, the negroes revolted suddenly, wounded dangerously the boatswain and the carpenter, and successively killed eighteen men of those who were sleeping upon deck, some with hand-spikes and hatchets, and others by throwing them alive overboard, after tying them; that of the Spaniards upon deck they left about seven, as he thinks, alive and tied, to manoeuvre the ship, and

1. **Audience**—The Spanish colonial possessions in the New World were divided into political units known as *audiencias* (judicial districts). 4. **received**—After "received," (P) inserts "before Don José de Abos and Padilla, Notary Public of the Holy Crusade,". 9. **beside thirty cases of hardware**—Omitted in (P). 34. **The catalogue**—In (P), this line reads "*After the catalogue the deposition goes on as follows:*"

three or four more who hid themselves, remained also alive. Although in the act of revolt the negroes made themselves masters of the hatchway, six or seven wounded went through it to the cockpit, without any hindrance on their part; that in the act of revolt, the mate and another person, whose name he does not recollect, attempted to come up through the hatchway, but being quickly wounded, were obliged to return to the cabin; that the deponent resolved at break of day to come up the companion-way, where the negro Babo was, being the ringleader, and Atufal, who assisted him, and having spoken to them, exhorted them to cease committing such atrocities, asking them, at the same time, what they wanted and intended to do, offering, himself, to obey their commands; that, notwithstanding this, they threw, in his presence, three men, alive and tied, overboard; that they told the deponent to come up, and that they would not kill him; which having done, the negro Babo asked him whether there were in those seas any negro countries where they might be carried, and he answered them, No; that the negro Babo afterwards told him to carry them to Senegal, or to the neighbouring islands of St. Nicholas; and he answered, that this was impossible, on account of the great distance, the necessity involved of rounding Cape Horn, the bad condition of the vessel, the want of provisions, sails, and water; but that the negro Babo replied to him he must carry them in any way; that they would do and conform themselves to everything the deponent should require as to eating and drinking; that after a long conference, being absolutely compelled to please them, for they threatened him to kill all the whites if they were not, at all events, carried to Senegal, he told them that what was most wanting for the voyage was water; that they would go near the coast to take it, and thence they would proceed on their course; that the negro Babo agreed to it; and the deponent steered towards the intermediate ports, hoping to meet some Spanish or foreign vessel that would save them; that within ten or eleven days they saw the land, and continued by it in the vicinity of Nasca; that the deponent observed that the negroes were not restless and mutinous, because he did not effect the taking in of water, the negro Babo having required, with threats, that it should be done, without fail, the following day; he told him he saw plainly that the coast was steep, and the rivers designated in the maps were not to be found, with other reasons suitable to the circumstances; that the best way would be to go to the island of Santa Maria, where they might water easily, it being a solitary island, as the foreigners did; that the deponent did not go to Pisco, that was near, nor make any other port of the coast, because the negro Babo had intimated to him several times, that he would kill all the whites the very moment he should perceive any city, town, or settlement of any kind on the shores to which they should be carried: that having determined to go to the island of Santa Maria, as the deponent had planned, for the purpose of trying whether, on the passage or near the island itself, they could find any vessel that should favor them, or whether he could escape from it in a boat to the neighbouring coast of Arruco, to adopt the necessary means he immediately changed his course, steering for the island; that the negroes Babo and Atufal held daily conferences, in which they discussed what was necessary for their design of returning to Senegal, whether they were to kill all the Spaniards, and particularly the deponent; that eight days after parting from the coast of Nasca, the deponent being on the watch a little after day-break, and soon after the negroes had their meeting, the negro Babo came to the place where the deponent was, and told him that he had determined to kill his master, Don Alexandro Aranda, both because he and his companions could not

5. **but being quickly wounded, were**—"but having been wounded, at the onset, they were" (P). 15. **Senegal**—on the west coast of Africa. 27. **Nasca**—city in Chile. 33. **water easily**—"water and victual easily" (P). 34. **solitary**—"desert" (P).

otherwise be sure of their liberty, and that to keep the seamen in subjection, he wanted to prepare a warning of what road they should be made to take did they or any of them oppose him; and that, by means of the death of Don Alexandro, that warning would best be given; but, that what this last meant, the deponent did not at the time comprehend, nor could not, further than that the death of Don Alexandro was intended; and moreover the negro Babo proposed to the deponent to call the mate Raneds, who was sleeping in the cabin, before the thing was done, for fear, as the deponent understood it, that the mate, who was a good navigator, should be killed with Don Alexandro and the rest; that the deponent, who was the friend, from youth of Don Alexandro, prayed and conjured, but all was useless; for the negro Babo answered him that the thing could not be prevented, and that all the Spaniards risked their death if they should attempt to frustrate his will in this matter, or any other; that, in this conflict, the deponent called the mate, Raneds, who was forced to go apart, and immediately the negro Babo commanded the Ashantee Martinqui and the Ashantee Lecbe to go and commit the murder; that those two went down with hatchets to the berth of Don Alexandro; that, yet half alive and mangled, they dragged him on deck; that they were going to throw him overboard in that state, but the negro Babo stopped them, bidding the murder be completed on the deck before him, which was done, when, by his orders, the body was carried below, forward; that nothing more was seen of it by the deponent for three days; . . . that Don Alonzo Sidonia, an old man, long resident at Valparaiso, and lately appointed to a civil office in Peru, whither he had taken passage, was at the time sleeping in the berth opposite Don Alexandro's; that awakening at his cries, surprised by them, and at the sight of the negroes with their bloody hatchets in their hands, he threw himself into the sea through a window which was near him and was drowned, without it being in the power of the deponent to assist or take him up; . . . that, a short time after killing Aranda, they brought upon deck his german-cousin, of middle-age, Don Francisco Masa, of Mendoza, and the young Don Joaquin, Marques de Aramboalaza, then lately from Spain, with his Spanish servant Ponce, and the three young clerks of Aranda, José Mozairi, Lorenzo Bargas, and Hermenegildo Gandix, all of Cadiz; that Don Joaquin and Hermenegildo Gandix, the negro Babo, for purposes hereafter to appear, preserved alive; but Don Francisco Masa, José Mozairi, and Lorenzo Bargas, with Ponce the servant, beside the boatswain, Juan Robles, the boatswain's mates, Manuel Viscaya and Roderigo Hurta, and four of the sailors, the negro Babo ordered to be thrown alive into the sea, although they made no resistance, nor begged for anything else but mercy; that the boatswain, Juan Robles, who knew how to swim, kept the longest above water, making acts of contrition, and, in the last words he uttered, charged this deponent to cause mass to be said for his soul to our Lady of Succor: . . . that, during the three days which followed, the deponent, uncertain what fate had befallen the remains of Don Alexandro, frequently asked the negro Babo where they were, and, if still on board, whether they were to be preserved for interment ashore, entreating him so to order it; that the negro Babo answered nothing till the fourth day, when at sunrise, the deponent coming on deck, the negro Babo showed him a skeleton, which had been substituted for the ship's proper figurehead—the image of Christopher Colon, the discoverer of the New World; that the negro Babo asked him whose skeleton that was, and whether, from its whiteness, he should not think it a white's; that, upon discovering his face, the negro Babo, coming close, said words to this effect: "Keep faith with the blacks from here to Senegal, or you shall in spirit, as now in body, follow your leader," pointing to the prow; . . .

15. **Martinqui**—This name first appears as Matiluqui, but Melville apparently became confused.
48. **discovering**—"his covering" (P).

that the same morning the negro Babo took by succession each Spaniard forward, and asked him whose skeleton that was, and whether, from its whiteness, he should not think it a white's; that each Spaniard covered his face; that then to each the negro Babo repeated the words in the first place said to the deponent; . . . that they (the Spaniards), being then assembled aft, the negro Babo harangued them, saying that he had now done all; that the deponent (as navigator for the negroes) might pursue his course, warning him and all of them that they should, soul and body, go the way of Don Alexandro, if he saw them (the Spaniards) speak or plot anything against them (the negroes)—a threat which was repeated every day; that, before the events last mentioned, they had tied the cook to throw him overboard, for it is not known what thing they heard him speak, but finally the negro Babo spared his life, at the request of the deponent; that a few days after, the deponent, endeavoring not to omit any means to preserve the lives of the remaining whites, spoke to the negroes peace and tranquillity, and agreed to draw up a paper, signed by the deponent and the sailors who could write, as also by the negro Babo, for himself and all the blacks, in which the deponent obliged himself to carry them to Senegal, and they not to kill any more, and he formally to make over to them the ship, with the cargo, with which they were for that time satisfied and quieted. . . . But the next day, the more surely to guard against the sailors' escape, the negro Babo commanded all the boats to be destroyed but the long-boat, which was unseaworthy, and another, a cutter in good condition, which knowing it would yet be wanted for towing the water casks, he had it lowered down into the hold.

. . . . . .

[*Various particulars of the prolonged and perplexed navigation ensuing here follow, with incidents of a calamitous calm, from which portion one passage is extracted, to wit:*]

—That on the fifth day of the calm, all on board suffering much from the heat, and want of water, and five having died in fits, and mad, the negroes became irritable, and for a chance gesture, which they deemed suspicious—though it was harmless—made by the mate, Raneds, to the deponent in the act of handing a quadrant, they killed him; but that for this they were afterwards sorry, the mate being the only remaining navigator on board, except the deponent.

. . . . . .

—That omitting other events, which daily happened, and which can only serve uselessly to recall past misfortunes and conflicts, after seventy-three days' navigation, reckoned from the time they sailed from Nasca, during which they navigated under a scanty allowance of water, and were afflicted with the calms before mentioned, they at last arrived at the island of Santa Maria, on the seventeenth of the month of August, at about six o'clock in the afternoon, at which hour they cast anchor very near the American ship, Bachelor's Delight, which lay in the same bay, commanded by the generous Captain Amasa Delano; but at six o'clock in the morning, they had already descried the port, and the negroes became uneasy, as soon as at distance they saw the ship, not having expected to see one there; that the negro Babo pacified them, assuring them that no fear need be had; that straightway he ordered the figure on the bow to be covered with canvas, as for repairs, and had the decks a little set in order; that for a time the negro Babo and the negro Atufal conferred; that the negro Atufal was for sailing away, but the negro Babo would not, and, by himself, cast about what to do; that at last he came to the deponent, pro-

22. towing—"lowering" (P).

posing to him to say and do all that the deponent declares to have said and done to the American captain; . . . that the negro Babo warned him that if he varied in the least, or uttered any word, or gave any look that should give the least intimation of the past events or present state, he would instantly kill him, with all his companions, showing a dagger, which he carried hid, saying something which, as he understood it, meant that that dagger would be alert as his eye; that the negro Babo then announced the plan to all his companions, which pleased them; that he then, the better to disguise the truth, devised many expedients, in some of them uniting deceit and defense; that of this sort was the device of the six Ashantees before named, who were his bravoes; that them he stationed on the break of the poop, as if to clean certain hatchets (in cases, which were part of the cargo), but in reality to use them, and distribute them at need, and at a given word he told them; that, among other devices, was the device of presenting Atufal, his right hand man, as chained, though in a moment the chains could be dropped; that in every particular he informed the deponent what part he was expected to enact in every device, and what story he was to tell on every occasion, always threatening him with instant death if he varied in the least: that, conscious that many of the negroes would be turbulent, the negro Babo appointed the four aged negroes, who were calkers, to keep what domestic order they could on the decks; that again and again he harangued the Spaniards and his companions, informing them of his intent, and of his devices, and of the invented story that this deponent was to tell; charging them lest any of them varied from that story; that these arrangements were made and matured during the interval of two or three hours, between their first sighting the ship and the arrival on board of Captain Amasa Delano; that this happened at about half-past seven o'clock in the morning, Captain Amasa Delano coming in his boat, and all glady receiving him; that the deponent, as well as he could force himself, acting then the part of principal owner, and a free captain of the ship, told Captain Amasa Delano, when called upon, that he came from Buenos Ayres, bound to Lima, with three hundred negroes; that off Cape Horn, and in a subsequent fever, many negroes had died; that also, by similar casualties, all the sea officers and the greatest part of the crew had died.

. . . . . .

[*And so the deposition goes on, circumstantially recounting the fictitious story dictated to the deponent by Babo, and through the deponent imposed upon Captain Delano; and also recounting the friendly offers of Captain Delano, with other things, but all of which is here omitted. After the fictitious story, etc., the deposition proceeds:*]

—that the generous Captain Amasa Delano remained on board all the day, till he left the ship anchored at six o'clock in the evening, deponent speaking to him always of his pretended misfortunes, under the forementioned principles, without having had it in his power to tell a single word, or give him the least hint, that he might know the truth and state of things; because the negro Babo, performing the office of an officious servant with all the appearance of submission of the humble slave, did not leave the deponent one moment; that this was in order to observe the deponent's actions and words, for the negro Babo understands well the Spanish; and besides, there were thereabout some others who were constantly on the watch, and likewise understood the Spanish; . . . that upon one occasion, while deponent was standing on the deck conversing with Amasa Delano, by a secret sign the negro Babo drew him (the deponent) aside, the act appearing as if originating with the deponent; that then, he being drawn aside, the negro Babo proposed to him to

gain from Amasa Delano full particulars about his ship, and crew, and arms; that the deponent asked "For what?" that the negro Babo answered he might conceive; that, grieved at the prospect of what might overtake the generous Captain Amasa Delano, the deponent at first refused to ask the desired questions, and used every argument to induce the negro Babo to give up this new design; that the negro Babo showed the point of his dagger; that, after the information had been obtained the negro Babo again drew him aside, telling him that that very night he (the deponent) would be captain of two ships instead of one, for that, great part of the American's ship's crew being to be absent fishing, the six Ashantees, without any one else, would easily take it; that at this time he said other things to the same purpose; that no entreaties availed; that before Amasa Delano's coming on board, no hint had been given touching the capture of the American ship: that to prevent this project the deponent was powerless; . . . —that in some things his memory is confused, he cannot distinctly recall every event; . . . —that as soon as they had cast anchor at six of the clock in the evening, as has before been stated, the American Captain took leave, to return to his vessel; that upon a sudden impulse, which the deponent believes to have come from God and his angels, he, after the farewell had been said, followed the generous Captain Amasa Delano as far as the gunwale, where he stayed, under the pretense of taking leave, until Amasa Delano should have been seated in his boat; that on shoving off, the deponent sprang from the gunwale into the boat, and fell into it, he knows not how, God guarding him; that—

. . . . . .

[*Here, in the original, follows the account of what further happened at the escape, and how the San Dominick was retaken, and of the passage to the coast; including in the recital many expressions of "eternal gratitude" to the "generous Captain Amasa Delano." The deposition then proceeds with recapitulatory remarks, and a partial renumeration of the negroes, making record of their individual part in the past events, with a view to furnishing, according to command of the court, the data whereon to found the criminal sentences to be pronounced. From this portion is the following:*]

—That he believes that all the negroes, though not in the first place knowing to the design of revolt, when it was accomplished, approved it. . . . That the negro, José, eighteen years old, and in the personal service of Don Alexandro, was the one who communicated the information to the negro Babo, about the state of things in the cabin, before the revolt; that this is known, because, in the preceding midnight, he used to come from his berth, which was under his master's, in the cabin, to the deck where the ringleader and his associates were, and had secret conversations with the negro Babo, in which he was several times seen by the mate; that, one night, the mate drove him away twice; . . . that this same negro José was the one who, without being commanded to do so by the negro Babo, as Lecbe and Martinqui were, stabbed his master, Don Alexandro, after he had been dragged half-lifeless to the deck; . . . that the mulatto steward, Francesco, was of the first band of revolters, that he was, in all things, the creature and tool of the negro Babo; that, to make his court, he, just before a repast in the cabin, proposed, to the negro Babo, poisoning a dish for the generous Captain Amasa Delano; this is known and believed, because the negroes have said it; but that the negro Babo, having another design, forbade Francesco; . . . that the Ashantee Lecbe was one of the worst of them; for that, on the day the ship was retaken, he assisted in the defense

26. renumeration—reënumeration.

of her, with a hatchet in each hand, with one of which he wounded, in the breast, the chief mate of Amasa Delano, in the first act of boarding; this all knew; that, in sight of the deponent, Lecbe struck, with a hatchet, Don Francisco Masa when, by the negro Babo's orders, he was carrying him to throw him overboard, alive; beside participating in the murder, before mentioned, of Don Alexandro Aranda, and others of the cabin-passengers; that, owing to the fury with which the Ashantees fought in the engagement with the boats, but this Lecbe and Yan survived; that Yan was bad as Lecbe; that Yan was the man who, by Babo's command, willingly prepared the skeleton of Don Alexandro, in a way the negroes afterwards told the deponent, but which he, so long as reason is left him, can never divulge; that Yan and Lecbe were the two who, in a calm by night, riveted the skeleton to the bow; this also the negroes told him; that the negro Babo was he who traced the inscription below it; that the negro Babo was the plotter from first to last; he ordered every murder, and was the helm and keel of the revolt; that Atufal was his lieutenant in all; but Atufal, with his own hand, committed no murder; nor did the negro Babo; . . . that Atufal was shot, being killed in the fight with boats, ere boarding; . . . that the negresses, of age, were knowing to the revolt, and testified themselves satisfied at the death of their master, Don Alexandro; that, had the negroes not restrained them, they would have tortured to death, instead of simply killing, the Spaniards slain by command of the negro Babo; that the negresses used their utmost influence to have the deponent made away with; that, in the various acts of murder, they sang songs and danced—not gaily, but solemnly; and before the engagement with the boats, as well as during the action, they sang melancholy songs to the negroes, and that this melancholy tone was more inflaming than a different one would have been, and was so intended; that all this is believed because the negroes have said it.

—that of the thirty-six men of the crew, exclusive of the passengers (all of whom are now dead), which the deponent had knowledge of, six only remained alive, with four cabin-boys and ship-boys, not included with the crew; . . . —that the negroes broke an arm of one of the cabin-boys and gave him strokes with hatchets.

[*Then follow various random disclosures referring to various periods of time. The following are extracted:*]

—That during the presence of Captain Amasa Delano on board, some attempts were made by the sailors, and one by Hermenegildo Gandix, to convey hints to him of the true state of affairs; but that these attempts were ineffectual, owing to fear of incurring death, and, furthermore, owing to the devices which offered contradictions to the true state of affairs, as well as owing to the generosity and piety of Amasa Delano, incapable of sounding such wickedness; . . . that Luys Galgo, a sailor about sixty years of age, and formerly of the king's navy, was one of those who sought to convey tokens to Captain Amasa Delano; but his intent, though undiscovered, being suspected, he was, on a pretense, made to retire out of sight, and at last into the hold, and there was made away with. This the negroes have since said; . . . that one of the ship-boys feeling, from Captain Amasa Delano's presence, some hopes of release, and not having enough prudence, dropped some chance-word respecting his expectations, which being overheard and understood by a slave-boy with whom he was eating at the time, the latter struck him on the head with a knife, inflicting a bad wound, but of which the boy is now healing; that likewise, not long before the ship was brought to anchor, one of the seamen, steering

at the time, endangered himself by letting the blacks remark some expression in his countenance, arising from some cause similar to the above; but this sailor, by his heedful after conduct, escaped; . . . that these statements are made to show the court that from the beginning to the end of the revolt, it was impossible for the deponent and his men to act otherwise than they did; . . . —that the third clerk, Hermenegildo Gandix, who before had been forced to live among the seamen, wearing a seaman's habit, and in all respects appearing to be one for the time; he, Gandix, was killed by a musket ball fired through mistake from the boats before boarding; having in his fright run up the mizzen-rigging, calling to the boats—"don't board," lest upon their boarding the negroes should kill him; that this inducing the Americans to believe he some way favored the cause of the negroes, they fired two balls at him, so that he fell wounded from the rigging, and was drowned in the sea; . . . —that the young Don Joaquin, Marques de Aramboalaza, like Hermenegildo Gandix, the third clerk, was degraded to the office and appearance of a common seaman; that upon one occasion, when Don Joaquin shrank, the negro Babo commanded the Ashantee Lecbe to take tar and heat it, and pour it upon Don Joaquin's hands; . . . —that Don Joaquin was killed owing to another mistake of the Americans, but one impossible to be avoided, as upon the approach of the boats, Don Joaquin, with a hatchet tied edge out and upright to his hand, was made by the negroes to appear on the bulwarks; whereupon, seen with arms in his hands and in a questionable attitude, he was shot for a renegade seaman; . . . —that on the person of Don Joaquin was found secreted a jewel, which, by papers that were discovered, proved to have been meant for the shrine of our Lady of Mercy in Lima; a votive offering, beforehand prepared and guarded, to attest his gratitude, when he should have landed in Peru, his last destination, for the safe conclusion of his entire voyage from Spain; . . . —that the jewel, with the other effects of the late Don Joaquin, is in the custody of the brethren of the Hospital de Sacerdotes, awaiting the disposition of the honorable court; . . . —that, owing to the condition of the deponent, as well as the haste in which the boats departed for the attack, the Americans were not forewarned that there were, among the apparent crew, a passenger and one of the clerks, disguised by the negro Babo; . . . —that, beside the negroes killed in the action, some were killed after the capture and re-anchoring at night, when shackled to the ring-bolts on deck; that these deaths were committed by the sailors, ere they could be prevented. That so soon as informed of it, Captain Amasa Delano used all his authority, and, in particular with his own hand, struck down Martinez Gola, who, having found a razor in the pocket of an old jacket of his, which one of the shackled negroes had on, was aiming it at the negro's throat; that the noble Captain Amasa Delano also wrenched from the hand of Bartholomew Barlo, a dagger secreted at the time of the massacre of the whites, with which he was in the act of stabbing a shackled negro, who, the same day, with another negro, had thrown him down and jumped upon him; . . . —that, for all the events, befalling through so long a time, during which the ship was in the hands of the negro Babo, he cannot here give account; but that, what he has said is the most substantial of what occurs to him at present, and is the truth under the oath which he has taken; which declaration he affirmed and ratified, after hearing it read to him.

He said that he is twenty-nine years of age, and broken in body and mind; that when finally dismissed by the court, he shall not return home to Chili, but betake himself to the monastery on Mount Agonia without; and signed with his honor,

1. **some expression**—"a certain unconscious hopeful expression" (P). **8. from the boats**—"from the American boats" (P). **28. disposition**—"decision" (P).

and crossed himself, and, for the time, departed as he came, in his litter, with the monk Infelez, to the Hospital de Sacerdotes.

BENITO CERENO

DOCTOR ROZAS.

If the deposition have served as the key to fit into the lock of the complications which precede it, then, as a vault whose door has been flung back, the San Dominick's hull lies open to-day.

Hitherto the nature of this narrative, besides rendering the intricacies in the beginning unavoidable, has more or less required that many things, instead of being set down in the order of occurrence, should be retrospectively, or irregularly given; this last is the case with the following passages, which will conclude the account:

During the long, mild voyage to Lima, there was, as before hinted, a period during which the sufferer a little recovered his health, or, at least in some degree, his tranquillity. Ere the decided relapse which came, the two captains had many cordial conversations—their fraternal unreserve in singular contrast with former withdrawments.

Again and again, it was repeated, how hard it had been to enact the part forced on the Spaniard by Babo.

"Ah, my dear friend," Don Benito once said, "at those very times when you thought me so morose and ungrateful, nay when, as you now admit, you half thought me plotting your murder, at those very times my heart was frozen; I could not look at you, thinking of what, both on board this ship and your own, hung, from other hands, over my kind benefactor. And as God lives, Don Amasa, I know not whether desire for my own safety alone could have nerved me to that leap into your boat, had it not been for the thought that, did you, unenlightened, return to your ship, you, my best friend, with all who might be with you, stolen upon, that night, in your hammocks, would never in this world have wakened again. Do but think how you walked this deck, how you sat in this cabin, every inch of ground mined into honeycombs under you. Had I dropped the least hint, made the least advance towards an understanding between us, death, explosive death—yours as mine—would have ended the scene."

"True, true," cried Captain Delano, starting, "you saved my life, Don Benito, more than I yours; saved it, too, against my knowledge and will."

"Nay, my friend," rejoined the Spaniard, courteous even to the point of religion, "God charmed your life, but you saved mine. To think of some things you did—those smilings and chattings, rash pointings and gesturings. For less than these, they slew my mate, Raneds; but you had the Prince of Heaven's safe conduct through all ambuscades."

"Yes, all is owing to Providence, I know; but the temper of my mind that morning was more than commonly pleasant, while the sight of so much suffering, more apparent than real, added to my good-nature, compassion, and charity, happily interweaving the three. Had it been otherwise, doubtless,

5. have served—"of Benito Cereno has served" (P). **14. the sufferer**—"Don Benito" (P). **20. friend**—"Don Amasa" (P).

as you hint, some of my interferences might have ended unhappily enough. Besides, those feelings I spoke of enabled me to get the better of momentary distrust, at times when acuteness might have cost me my life, without saving another's. Only at the end did my suspicions get the better of me, and you know how wide of the mark they then proved."

"Wide indeed," said Don Benito, sadly; "you were with me all day; stood with me, sat with me, talked with me, looked at me, ate with me, drank with me; and yet, your last act was to clutch for a monster, not only an innocent man, but the most pitiable of all men. To such degree many malign machinations and deceptions impose. So far may even the best men err, in judging the conduct of one with the recesses of whose condition he is not acquainted. But you were forced to it; and you were in time undeceived. Would that, in both respects, it was so ever, and with all men."

"You generalize, Don Benito; and mournfully enough. But the past is passed; why moralize upon it? Forget it. See, yon bright sun has forgotten it all, and the blue sea, and the blue sky; these have turned over new leaves."

"Because they have no memory," he dejectedly replied; "because they are not human."

"But these mild trades that now fan your cheek, Don Benito, do they not come with a human-like healing to you? Warm friends, steadfast friends are the trades."

"With their steadfastness they but waft me to my tomb, Señor," was the foreboding response.

"You are saved," cried Captain Delano, more and more astonished and pained; "you are saved: what has cast such a shadow upon you?"

"The negro."

There was silence, while the moody man sat, slowly and unconsciously gathering his mantle about him, as if it were a pall.

There was no more conversation that day.

But if the Spaniard's melancholy sometimes ended in muteness upon topics like the above, there were others upon which he never spoke at all; on which, indeed, all his old reserves were piled. Pass over the worst and, only to elucidate, let an item or two of these be cited. The dress so precise and costly, worn by him on the day whose events have been narrated, had not willingly been put on. And that silver-mounted sword, apparent symbol of despotic command, was not, indeed, a sword, but the ghost of one. The scabbard, artificially stiffened, was empty.

As for the black—whose brain, not body, had schemed and led the revolt, with the plot—his slight frame, inadequate to that which it held, had at once yielded to the superior muscular strength of his captor, in the boat. Seeing all was over, he uttered no sound, and could not be forced to. His aspect seemed to say, since I cannot do deeds, I will not speak words. Put in irons in the hold, with the rest, he was carried to Lima. During the passage, Don Benito did not visit him. Nor then, nor at any time after, would he look at him.

1. **might have**—"with the blacks might have" (P). 2. **Besides**—"Besides that," (P). 8. **monster**—"villain" (P). 14. **You generalize**—"I think I understand you. You" (P). 24. **saved,**—"saved, Don Benito," (P)

Before the tribunal he refused. When pressed by the judges he fainted. On the testimony of the sailors alone rested the legal identity of Babo.

Some months after, dragged to the gibbet at the tail of a mule, the black met his voiceless end. The body was burned to ashes; but for many days, the head, that hive of subtlety, fixed on a pole in the Plaza, met, unabashed, the gaze of the whites; and across the Plaza looked towards St. Bartholomew's church, in whose vaults slept then, as now, the recovered bones of Aranda: and across the Rimac bridge looked toward the monastery, on Mount Agonia without; where, three months after being dismissed by the court, Benito Cereno, borne on the bier, did, indeed, follow his leader.

2. Babo.—(P) here inserts "And yet the Spaniard would, upon occasion, verbally refer to the negro, as has been shown; but look on him he would not, or could not."

WALT WHITMAN

1819-1892

I. "A DREAMY IMPRACTICABLE YOUTH" (1819–1855)

1819 Born May 31, on a farm at West Hills, Long Island, the second child of Walter and Louise Van Velsor Whitman, of English, Welsh, and Dutch ancestry, and in the Quaker tradition.

1823 (May?) Family removed to Brooklyn. Whitman later entered the public schools.

1832 Left school. In 1831-32 his first newspaper work done for the *Long Island Patriot.* Employed in a law office, a doctor's office, and a printing-office.

1833–1836 Journeyman printer in New York City; growing interest in the life of the city, and in theater and opera.

1836–1841 Teacher in seven Long Island country schools; much miscellaneous newspaper work.

1839–1841 Contributed to the *Long Island Democrat* immature essays and conventional poems.

1841–1848 Lived a Bohemian existence in New York City and Brooklyn, writing for various papers. Participated in reform movements of the forties.

1842 Published *Franklin Evans; or, The Inebriate: A Tale of the Times* (didactic novel) in the *New World.*

1846–1848 Editor, *Brooklyn Eagle* (March, 1846-January, 1848); forced to resign because of his support of the Free Soil party.

1848 February 11-June 15, traveled South and to the Mississippi Valley with his brother Jeff. Wrote for the *Crescent,* a New Orleans newspaper (March-May). Probable time of a mysterious liaison in New Orleans.

1848–1849 Editor, the *Freeman,* an antislavery paper in Brooklyn.

1850 March, published first poem in free verse, "Blood-Money," in the New York *Evening Post.* "Resurgemus," first poem to be retained in *Leaves of Grass,* published June 21, in the New York *Daily Tribune.*

1850–1854 Supported himself by newspaper work, carpentering, selling houses, and so forth. Member of a literary and newspaper group meeting at Pfaff's Bohemian Restaurant in New York City.

II. LEAVES OF GRASS AND THE WOUNDS OF WAR (1855–1873)

1855 First edition of *Leaves of Grass* (second, 1856; third, 1860-61; fourth, 1867; fifth, 1871; sixth, 1876 ("Centennial" edition); seventh (London), 1881; "suppressed" edition, 1881-82; "Author's" edition, 1882; other editions that same year).

1857–1859 Editor, Brooklyn *Daily Times.*

1862 December, brother George wounded; Whitman went to the army on the Rappahannock to nurse him. Remained in Washington as a nurse and helper of the wounded, living mainly at the home of W. D. O'Connor. Correspondent for the New York *Times* and other papers. His circle of friends included John Burroughs, E. C. Stedman, Trowbridge, C. W. Eldridge; also Peter Doyle, an illiterate Confederate prisoner on parole, to whom the letters in *Calamus* were written.

1864 Breakdown in health from overwork. Temporary recovery.

1865 February, appointed clerk in the Indian Bureau; dismissed June 30 by James Harlan, Secretary of the Department of the Interior, for having written an immoral book. Appointed almost immediately to a clerkship in the Attorney-General's Department.

1866 (Dated September 2, 1865), W. D. O'Connor published *The Good Gray Poet,* a flaming denunciation of Harlan and vindication of Whitman. *Walt Whitman's Drum Taps* published (1865).

1867 John Burroughs published *Notes on Walt Whitman as Poet and Person,* partly written by Whitman. Whitman's reputation in England steadily increasing.

1868 Rossetti published selections from Whitman in England.

1869–1870 Beginning of the "passionate friendship" of Mrs. Anne Gilchrist for Whitman.

1871 Published *Democratic Vistas;* recited "After All Not to Create Only" at the American Institute, New York City (published as a pamphlet); published *Passage to India.*

1872 Delivered "As a Strong Bird on Pinions Free" at the Dartmouth College commencement (published as a pamphlet); and "Song of the Universal" at Tufts College. Traveled in New England and New York State.

III. "THE LONG AFTERNOON" (1873–1892)

1873 February 22, first paralytic stroke suffered in Washington. Whitman went to Camden, New Jersey, where his mother died in the spring.

1875 Published *Memoranda during the War.*

1876 Partial recovery. Published Centennial edition (*Leaves of Grass* and *Two Rivulets*). In the next few years, traveled in the East, to the West (1879), and to Canada (1880).

1881 Published *Poetry of the Future* (from *North American Review,* February, 1881).

1882 Published *Specimen Days and Collect.*

1883 Richard M. Bucke published *Walt Whitman* (biography).

1884 Bought house in Mickle Street, Camden, Mrs. Davis being his housekeeper. Financial straits.

1887 Published *Specimen Days in America.*

1888 Published *November Boughs.* Fresh paralytic attack confined him to a wheeled-chair. Published *Complete Poems and Prose.*

1889 Added *A Backward Glance o'er Travel'd Roads* to *Leaves of Grass.*

1891 Published *Good-bye My Fancy.* Camden had become a mecca for admirers.

1892 Died at Camden March 26.

1893 Traubel, Bucke, and Harned published *In Re Walt Whitman.*

1897 *Calamus* published.

1898 *The Wound-Dresser* published.

A. Stevenson, University of Pennsylvania, 1947. *Leaves of Grass (1850-1881),* with an introduction by S. P. Sherman, Scribner, 1922, and Floyd Stovall, ed., *Walt Whitman: Representative Selections,* American Book Co., 1939 (rev. ed.) are satisfactory.

Until his middle thirties Walt Whitman showed little indication of developing into the poet who in 1855 presented to the world a revolutionary volume of verse. Study of the great mass of writing which he did in the first part of his life reveals, it is true, many ideas in embryo among the editorials and articles of the journalist which later reached fuller expression in *Leaves of Grass* and the subsequent prose. Journalism, in part at least, also accounts for Whitman's genius for striking titles, the uncertainty of his diction, his habit of making catalogues, and his avid eye for vivid detail. Deeper than these details is the fact that his aimless early years, because they threw him into contact with all sorts and conditions of men, strengthened his mystic sense of human brotherhood. When one adds his irregular but eager reading, his love for drama and opera, and his dislike of a merely disciplined existence, one accounts for much that is in him.

Democracy has shown little interest in the singer of democracy. Whitman appeals rather to intellectual and social radicals than to the audience which admires Mr. Edgar Guest. There are a number of explanations for the repudiation by the plain people of the singer of "powerful uneducated persons"; one reason is, of course, the form of his verse and the repetitiousness of his prose. But it is also true, despite a certain element of charlatanism, that Whitman is difficult reading. The intellectual substance of his writing is tough. A mystic is always hard going; but Whitman is especially hard to understand because of the interweaving of scientific, philosophical, and political speculation in his later work. The reader finds much that is simple and immediate; but he finds also philosophical or pseudo-philosophical passages that depend for meaning upon theories which Whitman picked up, and which he restates with his usual generous looseness of meaning.

Perhaps the very lack in him of verbal precision helps to explain why the communist and the capitalist, the Christian and the atheist, the socialist and the individualist, are each likely to discover in Whitman comfortable support for

particular views of human life. Whitman, more than any other great American writer, is all of a piece; his verse and his prose are simply aspects of the vast flowing stuff that is Whitman, so that the influence of his form and his emotional mysticism upon subsequent American literature has been immense and continuous, and is still profound.

PREFACE TO LEAVES OF GRASS

The preface to the original (1855) edition of *Leaves of Grass* is a longer, more rhapsodic, and more eccentrically punctuated document than is the essay here reprinted. The original preface was withdrawn after the edition of 1855, nor did it again appear in conjunction with the poems. Sections of it were worked into poems in the 1856 edition of the *Leaves;* larger and more important sections finally came to rest, much revised, in "By Blue Ontario's Shore" (1870), "To a Foil'd European Revolutionaire" (1870) and "Song of Prudence" (1881). The rest of the original preface, much revised, was then reprinted in the "Collect" section of the *Complete Poems and Prose* of 1882 (1882-83). Meanwhile, the original unrevised preface was reprinted as a pamphlet in London in 1881. The present reprint follows the text of the Camden edition of the *Writings.* Except in minor inaccuracies of capitalization and spelling, the Camden text is, with a few trifling exceptions, an accurate reprint of the 1882 version.

For the "Centennial" edition of his works (1876) Whitman wrote a second, and inferior, preface to *Leaves of Grass,* capitalizing the interest of the centennial year, and laying stress upon the relation of his poetry to politics and science. In addition to this preface, traces of various other prefaces have been discovered; these fragments may be consulted in Furness, *Walt Whitman's Workshop,* pp. 117-74.

AMERICA does not repel the past or what it has produced under its forms or amid other politics or the idea of castes or the old religions—accepts the lesson with calmness—is not impatient because the slough still sticks to opinions and manners in literature while the life which served its requirements has passed into the new life of the new forms—perceives that the corpse is slowly borne from the eating and sleeping rooms of the house—perceives that it waits a little while in the door—that it was fittest for its days—that its action has descended to the stalwart and well-shaped heir who approaches—and that he shall be fittest for his days.

The Americans of all nations at any time upon the earth have probably the fullest poetical nature. The United States themselves are essentially the greatest poem. In the history of the earth hitherto, the largest and most stirring appear tame and orderly to their ampler largeness and stir. Here at last is something in the doings of man that corresponds with the broadcast doings of the day and night. Here is action untied from strings, necessarily blind to particulars and details, magnificently moving in masses. Here is the hospitality which forever indicates heroes. Here the performance, disdaining the trivial, unapproach'd in the tremendous audacity of its crowds and groupings, and the push of its perspective, spreads with crampless and flowing breadth, and showers its prolific and splendid extravagance. One sees it must indeed own the riches of the summer and winter, and need never be bank-

rupt while corn grows from the ground, or the orchards drop apples, or the bays contain fish, or men beget children upon women.

Other states indicate themselves in their deputies—but the genius of the United States is not best or most in its executives or legislatures, nor in its ambassadors or authors, or colleges or churches or parlors, nor even in its newspapers or inventors—but always most in the common people, South, North, West, East, in all its States, through all its mighty amplitude. The largeness of the nation, however, were monstrous without a corresponding largeness and generosity of the spirit of the citizen. Not swarming states, nor streets and steamships, nor prosperous business, nor farms, nor capital, nor learning, may suffice for the ideal of man—nor suffice the poet. No reminiscences may suffice either. A live nation can always cut a deep mark, and can have the best authority the cheapest—namely, from its own soul. This is the sum of the profitable uses of individuals or states, and of present action and grandeur, and of the subjects of poets. (As if it were necessary to trot back generation after generation to the Eastern records! As if the beauty and sacredness of the demonstrable must fall behind that of the mythical! As if men do not make their mark out of any times! As if the opening of the Western Continent by discovery, and what has transpired in North and South America, were less than the small theatre of the antique, or the aimless sleep-walking of the Middle Ages!) The pride of the United States leaves the wealth and finesse of the cities, and all returns of commerce and agriculture, and all the magnitude of geography or shows of exterior victory, to enjoy the sight and realization of full-sized men or one full-sized man unconquerable and simple.

The American poets are to enclose old and new, for America is the race of races. The expression of the American poet is to be transcendent and new. It is to be indirect, and not direct or descriptive or epic. Its quality goes through these to much more. Let the age and wars of other nations be chanted, and their eras and characters be illustrated, and that finish the verse. Not so the great psalm of the republic. Here the theme is creative and has vista. Whatever stagnates in the flat of custom or obedience or legislation, the great poet never stagnates. Obedience does not master him, he masters it. High up out of reach he stands turning a concentrated light—he turns the pivot with his finger—he baffles the swiftest runners as he stands, and easily overtakes and envelopes them. The time straying toward infidelity and confections and persiflage he withholds by steady faith. Faith is the antiseptic of the soul—it pervades the common people and preserves them—they never give up believing and expecting and trusting. There is that indescribable freshness and unconsciousness about an illiterate person, that humbles and mocks the power of the noblest expressive genius. The poet sees for a certainty how one not a great artist may be just as sacred as the greatest artist.

The power to destroy or remould is freely used by the greatest poet, but seldom the power of attack. What is past is past. If he does not expose superior

16. Eastern records—Whitman has in mind the movement of civilization out of the East into America by way of Greece and Rome. **19. transpired**—happened (colloquial meaning). **21. finesse**—probably about equivalent to "sophistication" as that word is now current. **35. confections**—loosely equivalent to trivial artificialities.

models, and prove himself by every step he takes, he is not what is wanted. The presence of the great poet conquers—not parleying, or struggling, or any prepared attempts. Now he has passed that way—see after him! There is not left any vestige of despair, or misanthropy, or cunning, or exclusiveness, or the ignominy of a nativity or color, or delusion of hell or the necessity of hell—and no man thenceforward shall be degraded for ignorance or weakness or sin. The greatest poet hardly knows pettiness or triviality. If he breathes into anything that was before thought small, it dilates with the grandeur and life of the universe. He is a seer—he is individual—he is complete in himself—the others are as good as he, only he sees it and they do not. He is not one of the chorus—he does not stop for any regulation—he is the president of regulation. What the eyesight does to the rest, he does to the rest. Who knows the curious mystery of the eyesight? The other senses corroborate themselves, but this is removed from any proof but its own, and foreruns the identities of the spiritual world. A single glance of it mocks all the investigations of man, and all the instruments and books of the earth, and all reasoning. What is marvellous? what is unlikely? what is impossible or baseless or vague?—after you have once just open'd the space of a peach-pit, and given audience to far and near, and to the sunset, and had all things enter with electric swiftness, softly and duly, without confusion or jostling or jam?

The land and sea, the animals, fishes, and birds, the sky of heaven and the orbs, the forests, mountains and rivers, are not small themes—but folks expect of the poet to indicate more than the beauty and dignity which always attach to dumb real objects—they expect him to indicate the path between reality and their souls. Men and women perceive the beauty well enough—probably as well as he. The passionate tenacity of hunters, woodmen, early risers, cultivators of gardens and orchards and fields, the love of healthy women for the manly form, sea-faring persons, drivers of horses, the passion for light and the open air, all is an old varied sign of the unfailing perception of beauty, and of a residence of the poetic in outdoor people. They can never be assisted by poets to perceive—some may, but they never can. The poetic quality is not marshal'd in rhyme or uniformity, or abstract addresses to things, nor in melancholy complaints or good precepts, but is the life of these and much else, and is in the soul. The profit of rhyme is that it drops seeds of a sweeter and more luxuriant rhyme, and of uniformity that it conveys itself into its own roots in the ground out of sight. The rhyme and uniformity of perfect poems show the free growth of metrical laws, and bud from them as unerringly and loosely as lilacs and roses on a bush, and take shapes as compact as the shapes of chestnuts and oranges, and melons and pears, and shed the perfume impalpable to form. The fluency and ornaments of the finest poems or music or orations or recitations are not independent but dependent. All beauty comes from beautiful blood and a beautiful brain. If the greatnesses are in conjunction

5. ignominy of a nativity—ignominy attaching to birth in a particular social class. **11. president**—a favorite word of Whitman's for master, controller. **22. orbs**—stars. Whitman elsewhere uses the word to mean respectively planet, sun, the earth, eye. **31. some**—that is, some others. **34. rhyme**—Whitman may mean literally rhyme, but it is at least possible he is using the word as loosely meaning rhythm, poetical discourse.

in a man or woman, it is enough—the fact will prevail through the universe; but the gaggery and gilt of a million years will not prevail. Who troubles himself about his ornaments or fluency is lost. This is what you shall do: Love the earth and sun and the animals, despise riches, give alms to every one that asks, stand up for the stupid and crazy, devote your income and labor to others, hate tyrants, argue not concerning God, have patience and indulgence toward the people, take off your hat to nothing known or unknown, or to any man or number of men—go freely with powerful uneducated persons, and with the young, and with the mothers of families—re-examine all you have been told in school or church or in any book, and dismiss whatever insults your own soul; and your very flesh shall be a great poem and have the richest fluency, not only in its words, but in the silent lines of its lips and face, and between the lashes of your eyes, and in every motion and joint of your body. The poet shall not spend his time in unneeded work. He shall know that the ground is always ready plough'd and manured; others may not know it, but he shall. He shall go directly to the creation. His trust shall master the trust of everything he touches—and shall master all attachment.

The known universe has one complete lover, and that is the greatest poet. He consumes an eternal passion, and is indifferent which chance happens, and which possible contingency of fortune or misfortune, and persuades daily and hourly his delicious pay. What balks or breaks others is fuel for his burning progress to contact and amorous joy. Other proportions of the reception of pleasure dwindle to nothing to his proportions. All expected from heaven or from the highest, he is rapport with in the sight of the daybreak, or the scenes of the winter woods, or the presence of children playing, or with his arm round the neck of a man or woman. His love above all love has leisure and expanse—he leaves room ahead of himself. He is no irresolute or suspicious lover—he is sure—he scorns intervals. His experience and the showers and thrills are not for nothing. Nothing can jar him—suffering and darkness cannot—death and fear cannot. To him complaint and jealousy and envy are corpses buried and rotten in the earth—he saw them buried. The sea is not surer of the shore, or the shore of the sea, than he is of the fruition of his love, and of all perfection and beauty.

The fruition of beauty is no chance of miss or hit—it is as inevitable as life—it is exact and plumb as gravitation. From the eyesight proceeds another eyesight, and from the hearing proceeds another hearing, and from the voice proceeds another voice, eternally curious of the harmony of things with man. These understand the law of perfection in masses and floods—that it is profuse and impartial—that there is not a minute of the light or dark, nor an acre of the earth or sea, without it—nor any direction of the sky, nor any trade or employment, nor any turn of events. This is the reason that about the proper expression of beauty there is precision and balance. One part does not need to be

2. gaggery—probably an independent coinage of Whitman's, though gaggery in the sense of hoaxing is a rare word appearing in early nineteenth-century British periodicals. **17. master . . . attachment**—that is, the poet sings of the timeless, the absolute, and so surpasses or transcends temporal events. **19. consumes**—that is, is consumed by. **24. rapport**—another favorite Whitman word; note the construction he forces upon it. **42. precision and balance**—in the sense of organic unity rather than "classical" precision and balance.

thrust above another. The best singer is not the one who has the most lithe and powerful organ. The pleasure of poems is not in them that take the handsomest measure and sound.

Without effort and without exposing in the least how it is done, the greatest poet brings the spirit of any or all events and passions and scenes and persons, some more and some less, to bear on your individual character as you hear or read. To do this well is to compete with the laws that pursue and follow Time. What is the purpose must surely be there—and the clue of it must be there—and the faintest indication is the indication of the best, and then becomes the clearest indication. Past and present and future are not disjoin'd but join'd. The greatest poet forms the consistence of what is to be, from what has been and is. He drags the dead out of their coffins and stands them again on their feet. He says to the past, Rise and walk before me that I may realize you. He learns the lesson—he places himself where the future becomes present. The greatest poet does not only dazzle his rays over character and scenes and passions—he finally ascends and finishes all—he exhibits the pinnacles that no man can tell what they are for, or what is beyond—he glows a moment on the extremest verge. He is most wonderful in his last half-hidden smile or frown; by that flash of the moment of parting the one that sees it shall be encouraged or terrified afterwards for many years. The greatest poet does not moralize or make applications of morals—he knows the soul. The soul has that measureless pride which consists in never acknowledging any lessons or deductions but its own. But it has sympathy as measureless as its pride, and the one balances the other, and neither can stretch too far while it stretches in company with the other. The inmost secrets of art sleep with the twain. The greatest poet has lain close betwixt both, and they are vital in his style and thoughts.

The art of art, the glory of expression and the sunshine of the light of letters, is simplicity. Nothing is better than simplicity—nothing can make up for excess, or for the lack of definiteness. To carry on the heave of impulse and pierce intellectual depths and give all subjects their articulations, are powers neither common nor very uncommon. But to speak in literature with the perfect rectitude and insouciance of the movements of animals, and the unimpeachableness of the sentiment of trees in the woods and grass by the roadside, is the flawless triumph of art. If you have look'd on him who has achiev'd it you have look'd on one of the masters of the artists of all nations and times. You shall not contemplate the flight of the gray gull over the bay, or the mettlesome action of the blood horse, or the tall leaning of sunflowers on their stalk, or the appearance of the sun journeying through heaven, or the appearance of the moon afterward, with any more satisfaction than you shall contemplate him. The great poet has less a mark'd style, and is more the channel of thoughts and things without increase or diminution, and is the free channel of himself. He swears to his art, I will not be meddlesome, I will not have in my writing any elegance, or effect, or originality, to hang in the way between me and the rest like curtains. I will have nothing hang in the way, not the

15. **dazzle**—does not content himself with dazzling characters, scenes, and passions. 16-17. **pinnacles . . . beyond**—The construction is ungrammatical but the sense is clear: pinnacles, the purpose of which no man knows.

richest curtains. What I tell I tell for precisely what it is. Let who may exalt or startle or fascinate or soothe, I will have purposes as health or heat or snow has, and be as regardless of observation. What I experience or portray shall go from my composition without a shred of my composition. You shall stand by my side and look in the mirror with me.

The old red blood and stainless gentility of great poets will be proved by their unconstraint. A heroic person walks at his ease through and out of that custom or precedent or authority that suits him not. Of the traits of the brotherhood of first-class writers, savans, musicians, inventors and artists, nothing is finer than silent defiance advancing from new free forms. In the need of poems, philosophy, politics, mechanism, science, behavior, the craft of art, an appropriate native grand opera, shipcraft, or any craft, he is greatest for ever and ever who contributes the greatest original practical example. The cleanest expression is that which finds no sphere worthy of itself, and makes one.

The messages of great poets to each man and woman are, Come to us on equal terms, only then can you understand us, we are no better than you, what we inclose you inclose, what we enjoy you may enjoy. Did you suppose there could be only one Supreme? We affirm there can be unnumber'd Supremes, and that one does not countervail another any more than one eyesight countervails another—and that men can be good or grand only of the consciousness of their supremacy within them. What do you think is the grandeur of storms and dismemberments, and the deadliest battles and wrecks, and the wildest fury of the elements, and the power of the sea, and the motion of Nature, and the throes of human desires, and dignity and hate and love? It is that something in the soul which says, Rage on, whirl on, I tread master here and everywhere—Master of the spasms of the sky and of the shatter of the sea, Master of nature and passion and death, and of all terror and all pain.

The American bards shall be mark'd for generosity and affection, and for encouraging competitors. They shall be kosmos, without monopoly or secrecy, glad to pass anything to any one—hungry for equals night and day. They shall not be careful of riches and privilege—they shall be riches and privilege—they shall perceive who the most affluent man is. The most affluent man is he that confronts all the shows he sees by equivalents out of the stronger wealth of himself. The American bard shall delineate no class of persons, nor one or two out of the strata of interests, nor love most nor truth most, nor the soul most nor the body most—and not be for the Eastern States more than the Western, or the Northern States more than the Southern.

Exact science and its practical movements are no checks on the greatest poet, but always his encouragement and support. The outset and remembrance are there—there are the arms that lifted him first, and braced him best—there he

9. savans—more commonly, *savants;* literally, "learned persons," but Whitman uses the word with his customary generosity of meaning. **12. native grand opera**—Listening to grand opera in New York City was a favorite pastime of Whitman in his earlier years; and it has been suspected that the rhythms of Italian musical arias, as well as their floridity, have had their influence on Whitman's style. **15. The messages**—Note the transcendental quality of this paragraph, and the following. **29. kosmos**—usually, cosmos, but Whitman wishes to call attention to his special meaning. Cosmos means literally the ordered universe, but Whitman tends to use it as meaning the sum total of experience. **36-37. Eastern . . . Southern**—In 1855 sectionalism was fervid.

returns after all his goings and comings. The sailor and traveler—the anatomist, chemist, astronomer, geologist, phrenologist, spiritualist, mathematician, historian and lexicographer, are not poets, but they are the lawgivers of poets, and their construction underlies the structure of every perfect poem. No matter what rises or is utter'd they sent the seed of the conception of it—of them and by them stand the visible proofs of souls. If there shall be love and content between the father and the son, and if the greatness of the son is the exuding of the greatness of the father, there shall be love between the poet and the man of demonstrable science. In the beauty of poems are henceforth the tuft and final applause of science.

Great is the faith of the flush of knowledge, and of the investigation of the depths of qualities and things. Cleaving and circling here swells the soul of the poet, yet is president of itself always. The depths are fathomless, and therefore calm. The innocence and nakedness are resumed—they are neither modest nor immodest. The whole theory of the supernatural, and all that was twined with it or educed out of it, departs as a dream. What has ever happen'd—what happens, and whatever may or shall happen, the vital laws inclose all. They are sufficient for any case and for all cases—none to be hurried or retarded—any special miracle of affairs or persons inadmissible in the vast clear scheme where every motion and every spear of grass, and the frames and spirits of men and women and all that concerns them, are unspeakably perfect miracles, all referring to all, and each distinct and in its place. It is also not consistent with the reality of the soul to admit that there is anything in the known universe more divine than men and women.

Men and women, and the earth and all upon it, are simply to be taken as they are, and the investigation of their past and present and future shall be unintermitted, and shall be done with perfect candor. Upon this basis philosophy speculates, ever looking towards the poet, ever regarding the eternal tendencies of all toward happiness, never inconsistent with what is clear to the senses and to the soul. For the eternal tendencies of all toward happiness make the only point of sane philosophy. Whatever comprehends less than that—whatever is less than the laws of light and of astronomical motion—or less than the laws that follow the thief, the liar, the glutton and the drunkard, through this life and doubtless afterward,—or less than vast stretches of time, or the slow formation of density, or the patient upheaving of strata,—is of no account. Whatever would put God in a poem or system of philosophy as contending against some being or influence, is also of no account. Sanity and ensemble characterise the great master—spoilt in one principle, all is spoilt. The great master has nothing to do with miracles. He sees health for himself in being one of the mass—he sees the hiatus in singular eminence. To the

2. phrenologist—In 1855 the phrenologist was still regarded by many (including Whitman) as a reputable scientist. **2. spiritualist**—The vogue of spiritualism began with the table-rappings of the Fox sisters in Hydesville, New York, in 1848, and the publication of *Principles of Nature* (1847) by Andrew Jackson Davis, the "Poughkeepsie Seer," (see note 16, p. 781) which ran through innumerable editions. In 1855 the critical examination of alleged spiritualistic phenomena had not begun, and the movement was of formidable proportions. **9. demonstrable science**—laboratory science. **25. Men and women . . . —***Cf.* with this paragraph such an essay of Emerson's as that on "Spiritual Laws."

perfect shape comes common ground. To be under the general law is great, for that is to correspond with it. The master knows that he is unspeakably great, and that all are unspeakably great—that nothing, for instance, is greater than to conceive children, and bring them up well—that to *be* is just as great as to perceive or tell.

In the make of the great masters the idea of political liberty is indispensable. Liberty takes the adherence of heroes wherever men and women exist—but never takes any adherence or welcome from the rest more than from poets. They are the voice and exposition of liberty. They out of ages are worthy the grand idea—to them it is confided and they must sustain it. Nothing has precedence of it and nothing can warp or degrade it. . . .

As the attributes of the poets of the kosmos concentre in the real body, and in the pleasure of things, they possess the superiority of genuineness over all fiction and romance. As they emit themselves, facts are shower'd over with light—the daylight is lit with more volatile light—the deep between the setting and rising sun goes deeper many fold. Each precise object or condition or combination or process exhibits a beauty—the multiplication table its—old age its—the carpenter's trade its—the grand-opera its—the huge-hulled clean-shap'd New York clipper at sea under steam or full sail gleams with unmatch'd beauty—the American circles and large harmonies of government gleam with theirs—and the commonest definite intentions and actions with theirs. The poets of the kosmos advance through all interpositions and coverings and turmoils and stratagems to first principles. They are of use—they dissolve poverty from its need, and riches from its conceit. You large proprietor, they say, shall not realize or perceive more than any one else. The owner of the library is not he who holds a legal title to it, having bought and paid for it. Any one and every one is owner of the library (indeed he or she alone is owner) who can read the same through all the varieties of tongues and subjects and styles, and in whom they enter with ease, and make supple and powerful and rich and large.

These American States, strong and healthy and accomplish'd, shall receive no pleasure from violations of natural models, and must not permit them. In paintings or mouldings or carvings in mineral or wood, or in the illustrations of books or newspapers, or in the patterns of woven stuffs, or anything to beautify rooms or furniture or costumes, or to put upon cornices or monuments, or on the prows or sterns of ships, or to put anywhere before the human eye indoors or out, that which distorts honest shapes, or which creates unearthly beings or places or contingencies, is a nuisance and revolt. Of the human form especially, it is so great it must never be made ridiculous. Of ornaments to a work nothing outré can be allow'd—but those ornaments can be allow'd that conform to the perfect facts of the open air, and that flow out of the nature of the work, and come irrepressibly from it, and are necessary to the completion of the work. Most works are most beautiful without orna-

11. **degrade it**—Here follows in the original form of the preface a long, rhapsodic passage describing the poet as the guardian of liberty and humanity. 19. **steam**—When the preface was originally written, steamships still commonly used sails as an aid. 33. **mouldings**—in the sense of casts. 33. **mineral**—Stone is technically mineral substance, though there seems to be no good reason for Whitman's insistence upon the fact.

ment. Exaggerations will be revenged in human physiology. Clean and vigorous children are jetted and conceiv'd only in those communities where the models of natural forms are public every day. Great genius and the people of these States must never be demean'd to romances. As soon as histories are properly told, no more need of romances.

The great poets are also to be known by the absence in them of tricks, and by the justification of perfect personal candor. All faults may be forgiven of him who has perfect candor. Henceforth let no man of us lie, for we have seen that openness wins the inner and outer world, and that there is no single exception, and that never since our earth gather'd itself in a mass have deceit or subterfuge or prevarication attracted its smallest particle or the faintest tinge of a shade—and that through the enveloping wealth and rank of a state, or the whole republic of States, a sneak or sly person shall be discover'd and despised—and that the soul has never been once fool'd and never can be fool'd—and thrift without the loving nod of the soul is only a fœtid puff—and there never grew up in any of the continents of the globe, nor upon any planet or satellite, nor in that condition which precedes the birth of babes, nor in any time during the changes of life, nor in any stretch of abeyance or action of vitality, nor in any process of formation or reformation anywhere, a being whose instinct hated the truth.

Extreme caution or prudence, the soundest organic health, large hope and comparison and fondness for women and children, large alimentiveness and destructiveness and causality, with a perfect sense of the oneness of nature, and the propriety of the same spirit applied to human affairs, are called up of the float of the brain of the world to be parts of the greatest poet from his birth out of his mother's womb, and from her birth out of her mother's. Caution seldom goes far enough. It has been thought that the prudent citizen was the citizen who applied himself to solid gains, and did well for himself and his family, and completed a lawful life without debt or crime. The greatest poet sees and admits these economies as he sees the economies of food and sleep, but has higher notions of prudence than to think he gives much when he gives a few slight attentions at the latch of the gate. The premises of the prudence of life are not the hospitality of it, or the ripeness and harvest of it. Beyond the independence of a little sum laid aside for burial-money, and of a few clapboards around and shingles overhead on a lot of American soil own'd, and the easy dollars that supply the year's plain clothing and meals, the melancholy prudence of the abandonment of such a great being as a man is to the toss and pallor of years of money-making with all their scorching days and icy nights, and all their stifling deceits and underhanded dodgings, or infinitesimals of parlors, or shameless stuffing while others starve, and all the loss of the bloom and odor of the earth, and of the flowers and atmosphere, and of the sea, and of the true taste of the women and men you pass or have to do with in youth or middle age, and the issuing sickness and desperate revolt at the close of a life without elevation or naïveté, (even if you have

22. alimentiveness—Alimentiveness, like the following **destructiveness**, is part of the jargon of phrenology. **26. Caution . . .** —*Cf.* with the following passage Emerson's essay "Prudence."

achiev'd a secure 10,000 a year, or election to Congress or the Governorship,) and the ghastly chatter of a death without serenity or majesty, is the great fraud upon modern civilization and forethought, blotching the surface and system which civilization undeniably drafts, and moistening with tears the immense features it spreads and spreads with such velocity before the reach'd kisses of the soul.

Ever the right explanation remains to be made about prudence. The prudence of the mere wealth and respectability of the most esteem'd life appears too faint for the eye to observe at all, when little and large alike drop quietly aside at the thought of the prudence suitable for immortality. What is the wisdom that fills the thinness of a year, or seventy or eighty years—to the wisdom spaced out by ages, and coming back at a certain time with strong reinforcements and rich presents, and the clear faces of wedding-guests as far as you can look in every direction running gaily toward you? Only the soul is of itself—all else has reference to what ensues. All that a person does or thinks is of consequence. Nor can the push of charity or personal force ever be anything else than the profoundest reason, whether it brings arguments to hand or no. No specification is necessary—to add or subtract or divide is in vain. Little or big, learn'd or unlearn'd, white or black, legal or illegal, sick or well, from the first inspiration down the windpipe to the last expiration out of it, all that a male or female does that is vigorous and benevolent and clean is so much sure profit to him or her in the unshakable order of the universe, and through the whole scope of it forever. The prudence of the greatest poet answers at last the craving and glut of the soul, puts off nothing, permits no let-up for its own case or any case, has no particular sabbath or judgment day, divides not the living from the dead or the righteous from the unrighteous, is satisfied with the present, matches every thought or act by its correlative, and knows no possible forgiveness or deputed atonement.

The direct trial of him who would be the greatest poet is to-day. If he does not flood himself with the immediate age as with vast oceanic tides—if he be not himself the age transfigur'd, and if to him is not open'd the eternity which gives similitude to all periods and locations and processes, and animate and inanimate forms, and which is the bond of time, and rises up from its inconceivable vagueness and infiniteness in the swimming shapes of to-day, and is held by the ductile anchors of life, and makes the present spot the passage from what was to what shall be, and commits itself to the representation of this wave of an hour, and this one of the sixty beautiful children of the wave—let him merge in the general run and wait his development.

Still the final test of poems, or any character or work, remains. The prescient poet projects himself centuries ahead, and judges performer or performance after the changes of time. Does it live through them? Does it still hold on untired? Will the same style, and the direction of genius to similar points, be satisfactory now? Have the marches of tens and hundreds and thousands of years made willing détours to the right hand and the left hand for his sake?

20. **inspiration down the windpipe**—medical practice with newborn babies, to get them to breathe; but Whitman may mean simply, drawing one's first breath. 24. **glut**—desire(?); that is, wish to be glutted.

Is he beloved long and long after he is buried? Does the young man think often of him? and the young woman think often of him? and do the middle-aged and the old think of him?

A great poem is for ages and ages in common, and for all degrees and complexions, and all departments and sects, and for a woman as much as a man, and a man as much as a woman. A great poem is no finish to a man or woman, but rather a beginning. Has any one fancied he could sit at last under some due authority, and rest satisfied with explanations, and realize and be content and full? To no such terminus does the greatest poet bring—he brings neither cessation nor shelter'd fatness and ease. The touch of him, like Nature, tells in action. Whom he takes with firm sure grasp into live regions previously unattain'd—thenceforward is no rest—they see the space and ineffable sheen that turn the old spots and lights into dead vacuums. Now there shall be a man cohered out of tumult and chaos—the elder encourages the younger and shows him how—they two shall launch off fearlessly together till the new world fits an orbit for itself and looks unabash'd on the lesser orbits of the stars, and sweeps through the ceaseless rings, and shall never be quiet again.

There will soon be no more priests. Their work is done. A new order shall arise, and they shall be the priests of man, and every man shall be his own priest. They shall find their inspiration in real objects to-day, symptoms of the past and future. They shall not deign to defend immortality or God, or the perfection of things, or liberty, or the exquisite beauty and reality of the soul. They shall arise in America, and be responded to from the remainder of the earth.

The English language befriends the grand American expression—it is brawny enough, and limber and full enough. On the tough stock of a race who through all change of circumstances was never without the idea of political liberty, which is the animus of all liberty, it has attracted the terms of daintier and gayer and subtler and more elegant tongues. It is the powerful language of resistance—it is the dialect of common sense. It is the speech of the proud and melancholy races, and of all who aspire. It is the chosen tongue to express growth, faith, self-esteem, freedom, justice, equality, friendliness, amplitude, prudence, decision, and courage. It is the medium that shall well-nigh express the inexpressible.

No great literature, nor any like style of behavior or oratory, or social intercourse or household arrangements, or public institutions, or the treatment by bosses of employ'd people, nor executive detail, or detail of the army or navy, nor spirit of legislation or courts, or police or tuition or architecture, or songs or amusements, can long elude the jealous and passionate instinct of American standards. Whether or no the sign appears from the mouths of the people, it throbs a live interrogation in every freeman's and freewoman's heart, after that which passes by, or this built to remain. Is it uniform with my country? Are its disposals without ignominious distinctions? Is it for the ever-growing communes of brothers and lovers, large, well-united, proud, beyond the old models, generous beyond all models? Is it something grown fresh out of the fields, or drawn from the sea for use to me to-day here? I know that what answers for

14. **cohered**—made to cohere. 26. **who**—which. 28. **terms**—words.

me, an American, in Texas, Ohio, Canada, must answer for any individual or nation that serves for a part of my materials. Does this answer? Is it for the nursing of the young of the republic? Does it solve readily with the sweet milk of the nipples of the breasts of the Mother of Many Children?

America prepares with composure and good-will for the visitors that have sent word. It is not intellect that is to be their warrant and welcome. The talented, the artist, the ingenious, the editor, the statesman, the erudite, are not unappreciated—they fall in their place and do their work. The soul of the nation also does its work. It rejects none, it permits all. Only toward the like of itself will it advance half-way. An individual is as superb as a nation when he has the qualities which make a superb nation. The soul of the largest and wealthiest and proudest nation may well go half-way to meet that of its poets.

ONE'S-SELF I SING

The growth of *Leaves of Grass* from a pamphlet containing a rhapsodic prose preface and a poem of a little more than eighty pages, loosely divided into twelve sections, to the final form of the work, which, in the Camden edition, occupies two volumes and a part of the third (655 pages in all), is among the prodigies of American poetry. As is evident, Whitman was perpetually revising, adding, canceling, turning prose into poetry, lifting passages out of one poem and putting them into another, shifting titles, and the like, so that a genetic study of *Leaves of Grass* is a highly complicated problem. Part of the confusion arises from the changing significance of the title in Whitman's mind. It was originally the name of a book, but the phrase meant at various times to him the title of a book, the name of a long poem, a name for a particular species of long poems, and a symbolic title for all his poetic output. The present selections follow the order of the Camden edition, with which the text has been collated. This edition has been chosen not because the text is entirely satisfactory, but because it at least represents a norm generally agreed upon.

"One's-Self I Sing" first appeared in the 1867 edition of *Leaves of Grass* as "Inscription," the first poem in a section entitled "Inscriptions." The present form of the text dates from 1871, and the poem is kept consistently as the opening poem of *Leaves of Grass* thereafter.

One's-self I sing, a simple separate person,
Yet utter the word Democratic, the word En-Masse.

Of physiology from top to toe I sing,
Not physiognomy alone nor brain alone is worthy for the Muse, I say the Form complete is worthier far,
The Female equally with the Male I sing.

Of Life immense in passion, pulse, and power,
Cheerful, for freest action form'd under the laws divine,
The Modern Man I sing.

4. Many Children—A short passage, omitted by Whitman in his revision, contains the significant sentence: "The poems distilled from other poems will probably pass away." **12. poets**—In the original form of the preface the last sentence reads: "The proof of a poet is that his country absorbs him as affectionately as he has absorbed it," but Whitman did not allow the sentence to stand.

ME IMPERTURBE

This poem was originally number 18 of the "Chants Democratic" section of the 1860 *Leaves*. In 1867 it became independent of any section. In 1871 it formed one of the various groups entitled "Leaves of Grass," and so remained in 1876. In 1881 it was transferred to the "Inscriptions" section. "Imperturbe" is, of course, a coinage from imperturbable.

Me imperturbe, standing at ease in Nature,
Master of all, or mistress of all, aplomb in the midst of irrational things,
Imbued as they, passive, receptive, silent as they,
Finding my occupation, poverty, notoriety, foibles, crimes, less important than I thought,
Me toward the Mexican sea, or in the Mannahatta or the Tennessee, or far north or inland,
A river man, or a man of the woods or of any farm-life of these States, or of the coast, or the lakes, or Kanada,
Me wherever my life is lived, O to be self-balanced for contingencies,
O to confront night, storms, hunger, ridicule, accidents, rebuffs, as the trees and animals do.

I HEAR AMERICA SINGING

This poem first appears as number 20 of the "Chants Democratic" section of the 1860 edition of *Leaves of Grass*. The first line then read: "American mouth-songs!" Its present form dates from 1867. In 1881 it was made part of the "Inscriptions" section.

I hear America singing, the varied carols I hear,
Those of mechanics, each one singing his as it should be blithe and strong,
The carpenter singing his as he measures his plank or beam,
The mason singing his as he makes ready for work, or leaves off work,
The boatman singing what belongs to him in his boat, the deck-hand singing on the steamboat deck,
The shoemaker singing as he sits on his bench, the hatter singing as he stands,
The wood-cutter's song, the ploughboy's on his way in the morning, or at noon intermission or at sundown,
The delicious singing of the mother, or of the young wife at work, or of the girl sewing or washing,
Each singing what belongs to him or her and to none else,
The day what belongs to the day—at night the party of young fellows, robust, friendly,
Singing with open mouths their strong melodious songs.

5. **Mexican sea**—the Gulf of Mexico. 5. **Tennessee**—the Tennessee River.

SONG OF MYSELF

This poem may be regarded as the central poem of *Leaves of Grass,* in so far as any poem deserves that place. It forms the introductory section of the 1855 edition, without title and without section divisions. In 1856 it became "Poem of Walt Whitman, an American." In 1860 it became "Walt Whitman," and the verse paragraphs were numbered consecutively. In 1867 it retained this title and the numbering of the verse paragraphs, but it was also divided into numbered sections. In 1881 this became "Song of Myself," the verse paragraph numbers were dropped, and the section numbers were retained. There are, of course, innumerable textual variations.

1

I celebrate myself, and sing myself,
And what I assume you shall assume,
For every atom belonging to me as good belongs to you.

I loafe and invite my soul,
I lean and loafe at my ease observing a spear of summer grass.

My tongue, every atom of my blood, form'd from this soil, this air,
Born here of parents born here from parents the same, and their parents the same,
I, now thirty-seven years old in perfect health begin,
Hoping to cease not till death.

Creeds and schools in abeyance,
Retiring back a while sufficed at what they are, but never forgotten,
I harbor for good or bad, I permit to speak at every hazard,
Nature without check with original energy. . . .

[Sections 2-5 dwell upon the interpenetration of Whitman's soul with the phenomena of the universe; his refusal to be swallowed up in the flood of merely temporal things; and the deep peace which comes to him as he realizes the fundamental significance of the relation between his deeper self and the universe.]

6

A child said *What is the grass?* fetching it to me with full hands;
How could I answer the child? I do not know what it is any more than he.

I guess it must be the flag of my disposition, out of hopeful green stuff woven.

Or I guess it is the handkerchief of the Lord,
A scented gift and remembrancer designedly dropt,
Bearing the owner's name someway in the corners, that we may see and remark, and say *Whose?*

Or I guess the grass is itself a child, the produced babe of the vegetation.

Or I guess it is a uniform hieroglyphic,
And it means, Sprouting alike in broad zones and narrow zones,

10-11. Creeds . . . forgotten—The looseness of Whitman's syntax is sometimes annoying. The general sense seems to be: Creeds and schools, which no longer suffice me, were yet at one time sufficient, considering what they are. To get the meaning, insert line 13 after "I permit."
18. remembrancer—souvenir.

Growing among black folks as among white,
Kanuck, Tuckahoe, Congressman, Cuff, I give them the same, I receive them the same.

And now it seems to me the beautiful uncut hair of graves.

Tenderly will I use you curling grass,
It may be you transpire from the breasts of young men,
It may be if I had known them I would have loved them,
It may be you are from old people, or from offspring taken soon out of their mothers' laps,
And here you are the mothers' laps.

This grass is very dark to be from the white heads of old mothers,
Darker than the colorless beards of old men,
Dark to come from under the faint red roofs of mouths.

O I perceive after all so many uttering tongues,
And I perceive they do not come from the roofs of mouths for nothing.

I wish I could translate the hints about the dead young men and women,
And the hints about old men and mothers, and the offspring taken soon out of their laps.

What do you think has become of the young and old men?
And what do you think has become of the women and children?

They are alive and well somewhere,
The smallest sprout shows there is really no death,
And if ever there was it led forward life, and does not wait at the end to arrest it,
And ceas'd the moment life appear'd.

All goes onward and outward, nothing collapses,
And to die is different from what any one supposed, and luckier. . . .

[Sections 7-16 dwell upon the poet's mystical union with all things, Sections 8-16 in particular being a long catalogue of varieties of human and animal life which Whitman, in this sense, interpenetrates.]

17

These are really the thoughts of all men in all ages and lands, they are not original with me,
If they are not yours as much as mine they are nothing, or next to nothing,
If they are not the riddle and the untying of the riddle they are nothing,
If they are not just as close as they are distant they are nothing.

This is the grass that grows wherever the land is and the water is,
This the common air that bathes the globe.

24. Kanuck—colloquial term for French Canadian. **24. Tuckahoe**—colloquial term for a Virginian living east of the mountains; a tidewater Virginian. **24. Cuff**—Cuffey, colloquial term for Negro. **27. transpire**—in the literal Latin sense of piercing through (and upward). **46. These**—The general link between this section and the preceding is the thought that, like the grass in widest commonalty spread, so the soul of the poet is everywhere at one with nature and men.

18

With music strong I come, with my cornets and my drums,
I play not marches for accepted victors only, I play marches for conquer'd and slain persons.

Have you heard that it was good to gain the day?
I also say it is good to fall, battles are lost in the same spirit in which they are won.

I beat and pound for the dead,
I blow through my embouchures my loudest and gayest for them.

Vivas to those who have fail'd!
And to those whose war-vessels sank in the sea!
And to those themselves who sank in the sea!
And to all generals that lost engagements, and all overcome heroes!
And the numberless unknown heroes equal to the greatest heroes known! . . .

[Section 19 is a mystical invitation to all persons to share the poet's sense of union.]

20

Who goes there? hankering, gross, mystical nude;
How is it I extract strength from the beef I eat?

What is a man anyhow? what am I? what are you?

All I mark as my own you shall offset it with your own,
Else it were time lost listening to me.

I do not snivel that snivel the world over,
The months are vacuums and the ground but wallow and filth.

Whimpering and truckling fold with powders for invalids, conformity goes to the fourth remov'd,
I wear my hat as I please indoors or out.

Why should I pray? why should I venerate and be ceremonious?

Having pried through the strata, analyzed to a hair, counsel'd with doctors and calculated close,
I find no sweeter fat than sticks to my own bones.

In all people I see myself, none more and not one a barley-corn less,
And the good or bad I say of myself I say of them.

I know I am solid and sound,
To me the converging objects of the universe perpetually flow,
All are written to me, and I must get what the writing means.

57. embouchures—The embouchure is that part of a musical instrument applied to the mouth.

I know I am deathless,
I know this orbit of mine cannot be swept by a carpenter's compass,
I know I shall not pass like a child's carlacue cut with a burnt stick at night.

I know I am august,
I do not trouble my spirit to vindicate itself or be understood,
I see that the elementary laws never apologize,
(I reckon I behave no prouder than the level I plant my house by, after all.)

I exist as I am, that is enough,
If no other in the world be aware I sit content,
And if each and all be aware I sit content.

One world is aware and by far the largest to me, and that is myself,
And whether I come to my own to-day or in ten thousand or ten million years,
I can cheerfully take it now, or with equal cheerfulness I can wait.

My foothold is tenon'd and mortis'd in granite,
I laugh at what you call dissolution,
And I know the amplitude of time.

21

I am the poet of the Body and I am the poet of the Soul,
The pleasures of heaven are with me and the pains of hell are with me,
The first I graft and increase upon myself, the latter I translate into a new tongue.

I am the poet of the woman the same as the man,
And I say it is as great to be a woman as to be a man,
And I say there is nothing greater than the mother of men.

I chant the chant of dilation or pride,
We have had ducking and deprecating about enough,
I show that size is only development.

Have you outstript the rest? are you the President?
It is a trifle, they will more than arrive there every one, and still pass on.

I am he that walks with the tender and growing night,
I call to the earth and sea half-held by the night.

Press close bare-bosom'd night—press close magnetic nourishing night!
Night of south winds—night of the large few stars!
Still nodding night—mad naked summer night.

Smile O voluptuous cool-breath'd earth!
Earth of the slumbering and liquid trees!
Earth of departed sunset—earth of the mountains misty-topt!
Earth of the vitreous pour of the full moon just tinged with blue!

82. carlacue—more commonly, curleycue. **86. level**—carpenter's spirit level. **115. vitreous**—glassy, glasslike.

Earth of shine and dark mottling the tide of the river!
Earth of the limpid gray of clouds brighter and clearer for my sake!
Far-swooping elbow'd earth—rich apple-blossom'd earth!
Smile, for your lover comes.

Prodigal, you have given me love—therefore I to you give love!
O unspeakable passionate love. . . .

[Sections 22-29 are a symphonic development of the mood and thought of the preceding sections, urging faith in the universe and its goodness, declaring that positive science is but a form of this faith, and that all parts of the body, all forms of life, are equally significant to the true spiritual democrat. Section 26 interprets all song as part of a universal song; Sections 27-29 interpret the union of the poet with people and things under various physical symbols.]

30

All truths wait in all things,
They neither hasten their own delivery nor resist it,
They do not need the obstetric forceps of the surgeon,
The insignificant is as big to me as any,
(What is less or more than a touch?)

Logic and sermons never convince,
The damp of the night drives deeper into my soul.

(Only what proves itself to every man and woman is so,
Only what nobody denies is so.)

A minute and a drop of me settle my brain,
I believe the soggy clods shall become lovers and lamps,
And a compend of compends is the meat of a man or woman,
And a summit and flower there is the feeling they have for each other,
And they are to branch boundlessly out of that lesson until it becomes omnific,
And until one and all shall delight us, and we them.

31

I believe a leaf of grass is no less than the journey-work of the stars,
And the pismire is equally perfect, and a grain of sand and the egg of the wren,
And the tree-toad is a chef d'œuvre for the highest,
And the running blackberry would adorn the parlors of heaven,
And the narrowest hinge in my hand puts to scorn all machinery,
And the cow crunching with depress'd head surpasses any statue,
And a mouse is miracle enough to stagger sextillions of infidels.

I find I incorporate gneiss, coal, long-threaded moss, fruits, grains, esculent roots,
And am stucco'd with quadrupeds and birds all over,
And have distanced what is behind me for good reasons,
But call any thing back again when I desire it.

In vain the speeding or shyness,
In vain the plutonic rocks send their old heat against my approach,

133. **compend**—Whitmanesque for compendium. 137. **journey-work**—daily work, as of a journeyman worker. 139. **chef d'œuvre**—French phrase for masterpiece. 140. **running blackberry**—The blackberry sends out runners in the ground. 144. **gneiss**—a metamorphic rock. 144. **esculent**—edible. 149. **plutonic rocks**—igneous rocks. In the first half of the century geologists tended to divide into the Neptunists, or those who accounted for geologic change by water, and the Plutonists, or those who attributed change to fire.

In vain the mastodon retreats beneath his own powder'd bones,
In vain objects stand leagues off and assume manifold shapes,
In vain the ocean settling in hollows and the great monsters lying low,
In vain the buzzard houses herself with the sky,
In vain the snake slides through the creepers and logs,
In vain the elk takes to the inner passes of the woods,
In vain the razor-bill'd auk sails far north to Labrador,
I follow quickly, I ascend to the nest in the fissure of the cliff.

32

I think I could turn and live with animals, they're so placid and self-contain'd,
I stand and look at them long and long.

They do not sweat and whine about their condition,
They do not lie awake in the dark and weep for their sins,
They do not make me sick discussing their duty to God,
Not one is dissatisfied, not one is demented with the mania of owning things,
Not one kneels to another, nor to his kind that lived thousands of years ago,
Not one is respectable or unhappy over the whole earth.

So they show their relations to me and I accept them,
They bring me tokens of myself, they evince them plainly in their possession.

I wonder where they get those tokens,
Did I pass that way huge times ago and negligently drop them?

Myself moving forward then and now and forever,
Gathering and showing more always and with velocity,
Infinite and omnigenous, and the like of these among them,
Not too exclusive toward the reachers of my remembrancers,
Picking out here one that I love, and now go with him on brotherly terms.

A gigantic beauty of a stallion, fresh and responsive to my caresses,
Head high in the forehead, wide between the ears,
Limbs glossy and supple, tail dusting the ground,
Eyes full of sparkling wickedness, ears finely cut, flexibly moving.

His nostrils dilate as my heels embrace him,
His well-built limbs tremble with pleasure as we race around and return.
I but use you a minute, then I resign you, stallion,
Why do I need your paces when I myself out-gallop them?
Even as I stand or sit passing faster than you. . . .

[Sections 33-43 are mainly a huge catalogue of past and present things and events with which the poet in turn identifies himself. Section 43 in particular presents Whitman's faith as embracing all religious faiths. Section 44 (given in the text) is a kind of summing up of the material developed in Sections 21-43.]

156. razor-bill'd auk—one of the three varieties of auk. The report of Kane's expedition to the Arctic was published in 1856; Whitman may have picked up this information about the auk from reports in the newspapers. **172. omnigenous**—Literally, of all kinds; that is, the poet is mystically part of all the genera and species of animals. **173. remembrancers**—here seems to refer to the animals themselves as causing the poet to remember.

44

It is time to explain myself—let us stand up.

What is known I strip away,
I launch all men and women forward with me into the Unknown.

The clock indicates the moment—but what does eternity indicate?

We have thus far exhausted trillions of winters and summers,
There are trillions ahead, and trillions ahead of them.

Births have brought us richness and variety,
And other births will bring us richness and variety.

I do not call one greater and one smaller,
That which fills its period and place is equal to any.

Were mankind murderous or jealous upon you, my brother, my sister?
I am sorry for you, they are not murderous or jealous upon me,
All has been gentle with me, I keep no account with lamentation,
(What have I to do with lamentation?)

I am an acme of things accomplish'd, and I an encloser of things to be.

My feet strike an apex of the apices of the stairs,
On every step bunches of ages, and larger bunches between the steps,
All below duly travel'd, and still I mount and mount.

Rise after rise bow the phantoms behind me,
Afar down I see the huge first Nothing, I know I was even there,
I waited unseen and always, and slept through the lethargic mist,
And took my time, and took no hurt from the fetid carbon.

Long I was hugg'd close—long and long.

Immense have been the preparations for me,
Faithful and friendly the arms that have help'd me.

Cycles ferried my cradle, rowing and rowing like cheerful boatmen,
For room to me stars kept aside in their own rings,
They sent influences to look after what was to hold me.

Before I was born out of my mother generations guided me,
My embryo has never been torpid, nothing could overlay it.

For it the nebula cohered to an orb,
The long slow strata piled to rest it on,
Vast vegetables gave it sustenance,
Monstrous sauroids transported it in their mouths and deposited it with care.

205. fetid carbon—reference to the theory that the earth was originally shrouded in carbonic gas (the **lethargic mist** of line 204). **217. sauroids**—Whitman has huge, prehistoric lizards in mind.

All forces have been steadily employ'd to complete and delight me,
Now on this spot I stand with my robust soul. . . .

[The omitted Section 45 is mainly a restatement of the poet's identity with the evolving universe, the first line of this section being a summation of its thought.]

46

I know I have the best of time and space, and was never measured and never will be measured.

I tramp a perpetual journey, (come listen all!)
My signs are a rain-proof coat, good shoes, and a staff cut from the woods,
No friend of mine takes his ease in my chair,
I have no chair, no church, no philosophy,
I lead no man to a dinner-table, library, exchange,
But each man and each woman of you I lead upon a knoll,
My left hand hooking you round the waist,
My right hand pointing to landscapes of continents and the public road.

Not I, not any one else can travel that road for you,
You must travel it for yourself.

It is not far, it is within reach,
Perhaps you have been on it since you were born and did not know
Perhaps it is everywhere on water and on land.

Shoulder your duds dear son, and I will mine, and let us hasten forth,
Wonderful cities and free nations we shall fetch as we go.

If you tire, give me both burdens, and rest the chuff of your hand on my hip,
And in due time you shall repay the same service to me,
For after we start we never lie by again.

This day before dawn I ascended a hill and look'd at the crowded heaven,
And I said to my spirit *When we become the enfolders of those orbs, and the pleasure and knowledge of every thing in them, shall we be fill'd and satisfied then?*
And my spirit said *No, we but level that lift to pass and continue beyond.*

You are also asking me questions and I hear you,
I answer that I cannot answer, you must find out for yourself.

Sit a while dear son,
Here are biscuits to eat and here is milk to drink,
But as soon as you sleep and renew yourself in sweet clothes, I kiss you with a good-by kiss and open the gate for your egress hence.

Long enough have you dream'd contemptible dreams,
Now I wash the gum from your eyes,
You must habit yourself to the dazzle of the light and of every moment of your life.

234. duds—one's "belongings"; it is characteristic of Whitman's rhetorical punctuation to omit the comma after duds. **236. chuff**—Whitman apparently refers to the plump part of the hand underneath the thumb. **241. lift**—in the sense of height.

Long have you timidly waded holding a plank by the shore,
Now I will you to be a bold swimmer,
To jump off in the midst of the sea, rise again, not to me, shout, and laughingly dash with your hair. . . .

[Section 47 states the poet's companionship with athletic and outdoor persons.]

48

I have said that the soul is not more than the body,
And I have said that the body is not more than the soul,
And nothing, not God, is greater to one than one's self is,
And whoever walks a furlong without sympathy walks to his own funeral drest in his shroud,
And I or you pocketless of a dime may purchase the pick of the earth,
And to glance with an eye or show a bean in its pod confounds the learning of all times,
And there is no trade or employment but the young man following it may become a hero,
And there is no object so soft but it makes a hub for the wheel'd universe,
And I say to any man or woman, Let your soul stand cool and composed before a million universes.

And I say to mankind, Be not curious about God,
For I who am curious about each am not curious about God,
(No array of terms can say how much I am at peace about God and about death.)

I hear and behold God in every object, yet understand God not in the least.
Nor do I understand who there can be more wonderful than myself.

Why should I wish to see God better than this day?
I see something of God each hour of the twenty-four, and each moment then,
In the faces of men and women I see God, and in my own face in the glass,
I find letters from God dropt in the street, and every one is sign'd by God's name,
And I leave them where they are, for I know that wheresoe'er I go,
Others will punctually come for ever and ever. . . .

[Section 50 is a brief section, in which the eternity of the universe is found to be happiness.]

51

The past and present wilt—I have fill'd them, emptied them,
And proceed to fill my next fold of the future.

Listener up there! what have you to confide to me?
Look in my face while I snuff the sidle of evening,
(Talk honestly, no one else hears you, and I stay only a minute longer.)

Do I contradict myself?
Very well then I contradict myself,
(I am large, I contain multitudes.)

I concentrate toward them that are nigh, I wait on the door-slab.

276. **sidle**—Whitman's image is of the slow, secret drift of evening into night.

Who has done his day's work? who will soonest be through with his supper?
Who wishes to walk with me?

Will you speak before I am gone? will you prove already too late?

52

The spotted hawk swoops by and accuses me, he complains of my gab and my loitering.

I too am not a bit tamed, I too am untranslatable,
I sound my barbaric yawp over the roofs of the world.

The last scud of day holds back for me,
It flings my likeness after the rest and true as any on the shadow'd wilds,
It coaxes me to the vapor and the dusk.

I depart as air, I shake my white locks at the runaway sun,
I effuse my flesh in eddies, and drift it in lacy jags.

I bequeath myself to the dirt to grow from the grass I love,
If you want me again look for me under your boot-soles.

You will hardly know who I am or what I mean,
But I shall be good health to you nevertheless,
And filter and fibre your blood.

Failing to fetch me at first keep encouraged,
Missing me one place search another,
I stop somewhere waiting for you.

OUT OF THE ROLLING OCEAN THE CROWD

This poem was originally part of the *Drum-Taps* pamphlet, and as such was united to the 1867 *Leaves*. In 1871 it was made part of "Children of Adam," where it consistently remained. At one time it was divided into two numbered sections.

Out of the rolling ocean the crowd came a drop gently to me,
Whispering, *I love you, before long I die,*
I have travel'd a long way, merely to look on you to touch you,
For I could not die till I once look'd on you,
For I fear'd I might afterward lose you.

Now we have met, we have look'd, we are safe,
Return in peace to the ocean my love,
I too am part of that great ocean, my love, we are not so much separated,
Behold the great rondure, the cohesion of all, how perfect!
But as for me, for you, the irresistible sea is to separate us,
As for an hour, carrying us diverse, yet cannot carry us diverse forever;
Be not impatient—a little space—know you I salute the air, the ocean and the land,
Every day at sundown for your dear sake my love.

288. scud—Scud refers literally to a hurried movement, as of clouds.

NATIVE MOMENTS

This poem was originally number eight of the "Enfans d'Adam" section in 1860. In 1867 this section became "Children of Adam," and the poem remained consistently in this group ever after.

Native moments—when you come upon me—ah you are here now,
Give me now libidinous joys only,
Give me the drench of my passions, give me life coarse and rank,
To-day I go consort with Nature's darlings, to-night too,
I am for those who believe in loose delights, I share the midnight orgies of young men,
I dance with the dancers, and drink with the drinkers,
The echoes ring with our indecent calls, I pick out some low person for my dearest friend,
He shall be lawless, rude, illiterate, he shall be one condemn'd by others for deeds done,
I will play a part no longer, why should I exile myself from my companions?
O you shunn'd persons, I at least do not shun you,
I come forthwith in your midst, I will be your poet,
I will be more to you than to any of the rest.

THE BASE OF ALL METAPHYSICS

This poem was first included in 1871 in the "Calamus" section of the *Leaves,* when it was divided into numbered verse paragraphs. Its present form dates from 1881.

And now, gentlemen,
A word I give to remain in your memories and minds,
As base, and finalè too for all metaphysics.

(So to the students the old professor,
At the close of the crowded course.)

Having studied the new and antique, the Greek and Germanic systems,
Kant having studied and stated, Fichte and Schelling and Hegel,
Stated the lore of Plato, and Socrates, greater than Plato,
And greater than Socrates sought and stated, Christ divine having studied long,
I see reminiscent to-day those Greek and Germanic systems,
See the philosophies all, Christian churches and tenets see
Yet underneath Socrates clearly see, and underneath Christ the divine I see,

6. **Germanic**—When this poem was first printed, Germany was regarded as peculiarly the home of metaphysical thinking. 7. **Kant**—Immanuel Kant (1724-1804), the founder of the transcendental metaphysical theory. 7. **Fichte, Schelling and Hegel**—Johann Gottlieb Fichte (1762-1814) and Friedrich Wilhelm Joseph von Schelling (1775-1854) taught systems of transcendental philosophy derived from Kant; Georg Wilhelm Friedrich Hegel (1770-1831), usually regarded as more "realistic," taught a system partly derived from Kant and partly opposed to him.

The dear love of man for his comrades, the attraction of friend to friend,
Of the well-married husband and wife, of children and parents,
Of city for city, and land for land.

I SAW IN LOUISIANA A LIVE-OAK GROWING

This poem was originally number 20 of the "Calamus" section in 1860. In 1867 it was given its present title. It remained consistently in the "Calamus" section of the *Leaves.*

I saw in Louisiana a live-oak growing,
All alone stood it and the moss hung down from the branches,
Without any companion it grew there, uttering joyous leaves of dark green,
And its look, rude, unbending, lusty, made me think of myself,
But I wonder'd how it could utter joyous leaves, standing alone there, without its friend, for I knew I could not,
And I broke off a twig with a certain number of leaves upon it, and twined around it a little moss,
And brought it away, and I have placed it in sight in my room,
It is not needed to remind me as of my own dear friends,
(For I believe lately I think of little else than of them,)
Yet it remains to me a curious token, it makes me think of manly love;
For all that, and though the live-oak glistens there in Louisiana solitary in a wide flat space,
Uttering joyous leaves all its life, without a friend a lover near,
I know very well I could not.

I HEAR IT WAS CHARGED AGAINST ME

This poem first appears as number 24 of the "Calamus" section of the 1860 edition, when it was without title. The present title and text appear first in 1867.

I hear it was charged against me that I sought to destroy institutions,
But really I am neither for nor against institutions,
(What indeed have I in common with them? or what with the destruction of them?)
Only I will establish in the Mannahatta and in every city of these States inland and seaboard,
And in the fields and woods, and above every keel little or large that dents the water,
Without edifices or rules or trustees or any argument,
The institution of the dear love of comrades.

SONG OF THE OPEN ROAD

As "Poem of the Road" this poem was number 12 of the 1856 *Leaves of Grass,* where it was printed without section numbers. In the 1860 edition the verse para-

3. **uttering**—putting forth.

graphs were numbered. In 1867 it took its present title, and was divided into numbered sections. In 1881 the verse paragraph numbers were dropped, but the section divisions were retained, and the present text was achieved. There are, of course, many textual variations among the different versions.

1

Afoot and light-hearted I take to the open road,
Healthy, free, the world before me,
The long brown path before me leading wherever I choose.

Henceforth I ask not good-fortune, I myself am good-fortune,
Henceforth I whimper no more, postpone no more, need nothing,
Done with indoor complaints, libraries, querulous criticisms,
Strong and content I travel the open road.

The earth, that is sufficient,
I do not want the constellations any nearer,
I know they are very well where they are,
I know they suffice for those who belong to them.

(Still here I carry my old delicious burdens,
I carry them, men and women, I carry them with me wherever I go,
I swear it is impossible for me to get rid of them,
I am fill'd with them, and I will fill them in return.)

2

You road I enter upon and look around, I believe you are not all that is here,
I believe that much unseen is also here.

Here the profound lesson of reception, nor preference nor denial,
The black with his woolly head, the felon, the diseas'd, the illiterate person, are not denied;
The birth, the hasting after the physician, the beggar's tramp, the drunkard's stagger, the laughing party of mechanics,
The escaped youth, the rich person's carriage, the fop, the eloping couple,
The early market-man, the hearse, the moving of furniture into the town, the return back from the town,
They pass, I also pass, anything passes, none can be interdicted,
None but are accepted, none but shall be dear to me.

3

You air that serves me with breath to speak!
You objects that call from diffusion my meanings and give them shape!
You light that wraps me and all things in delicate equable showers!
You paths worn in the irregular hollows by the roadsides!
I believe you are latent with unseen existences, you are so dear to me.

26. call . . . shape—The poet's general interpenetration of the universe of life is given concrete meanings as he sympathizes with particular objects in the universe.

You flagg'd walks of the cities! you strong curbs at the edges!
You ferries! you planks and posts of wharves! you timber-lined sides! you distant ships!
You rows of houses! you window-pierc'd façades! you roofs!
You porches and entrances! you copings and iron guards!
You windows whose transparent shells might expose so much!
You doors and ascending steps! you arches!
You gray stones of interminable pavements! you trodden crossings!
From all that has touch'd you I believe you have imparted to yourselves, and now would impart the same secretly to me,
From the living and the dead you have peopled your impassive surfaces, and the spirits thereof would be evident and amicable with me.

4

The earth expanding right hand and left hand,
The picture alive, every part in its best light,
The music falling in where it is wanted, and stopping where it is not wanted,
The cheerful voice of the public road, the gay fresh sentiment of the road.

O highway I travel, do you say to me *Do not leave me?*
Do you say *Venture not—if you leave me you are lost?*
Do you say *I am already prepared, I am well-beaten and undenied, adhere to me?*

O public road, I say back I am not afraid to leave you, yet I love you,
You express me better than I can express myself,
You shall be more to me than my poem.

I think heroic deeds were all conceiv'd in the open air, and all free poems also,
I think I could stop here myself and do miracles,
I think whatever I shall meet on the road I shall like, and whoever beholds me shall like me,
I think whoever I see must be happy.

5

From this hour I ordain myself loos'd of limits and imaginary lines,
Going where I list, my own master total and absolute,
Listening to others, considering well what they say,
Pausing, searching, receiving, contemplating,
Gently, but with undeniable will, divesting myself of the holds that would hold me.

I inhale great draughts of space,
The east and the west are mine, and the north and the south are mine.

I am larger, better than I thought,
I did not know I held so much goodness.

All seems beautiful to me,
I can repeat over to men and women You have done such good to me I would do the same to you,

30. flagg'd walks—Before the invention of the cement sidewalk, walks were made of flagstones.

I will recruit for myself and you as I go,
I will scatter myself among men and women as I go,
I will toss a new gladness and roughness among them,
Whoever denies me it shall not trouble me,
Whoever accepts me he or she shall be blessed and shall bless me.

6

Now if a thousand perfect men were to appear it would not amaze me,
Now if a thousand beautiful forms of women appear'd it would not astonish me.

Now I see the secret of the making of the best persons,
It is to grow in the open air and to eat and sleep with the earth.

Here a great personal deed has room,
(Such a deed seizes upon the hearts of the whole race of men,
Its effusion of strength and will overwhelms law and mocks all authority and all argument against it.)

Here is the test of wisdom,
Wisdom is not finally tested in schools,
Wisdom cannot be pass'd from one having it to another not having it,
Wisdom is of the soul, is not susceptible of proof, is its own proof,
Applies to all stages and objects and qualities and is content,
Is the certainty of the reality and immortality of things, and the excellence of things;
Something there is in the float of the sight of things that provokes it out of the soul.

Now I re-examine philosophies and religions,
They may prove well in lecture-rooms, yet not prove at all under the spacious clouds and along the landscape and flowing currents.

Here is realization,
Here is a man tallied—he realizes here what he has in him,
The past, the future, majesty, love—if they are vacant of you, you are vacant of them.

Only the kernel of every object nourishes;
Where is he who tears off the husks for you and me?
Where is he that undoes stratagems and envelopes for you and me?

Here is adhesiveness, it is not previously fashion'd, it is apropos;
Do you know what it is as you pass to be loved by strangers?
Do you know the talk of those turning eye-balls?

7

Here is the efflux of the soul,
The efflux of the soul comes from within through embower'd gates, ever provoking questions,
These yearnings why are they? these thoughts in the darkness why are they?
Why are there men and women that while they are nigh me the sunlight expands my blood?

91. **adhesiveness**—friendship. This term, like **efflux**, line 94, Whitman drew from the jargon of phrenology.

Why when they leave me do my pennants of joy sink flat and lank?
Why are there trees I never walk under but large and melodious thoughts descend upon me?
(I think they hang there winter and summer on those trees and always drop fruit as I pass;)
What is it I interchange so suddenly with strangers?
What with some driver as I ride on the seat by his side?
What with some fisherman drawing his seine by the shore as I walk by and pause?
What gives me to be free to a woman's and man's good-will? what gives them to be free to mine?

8

The efflux of the soul is happiness, here is happiness,
I think it pervades the open air, waiting at all times,
Now it flows unto us, we are rightly charged.

Here rises the fluid and attaching character,
The fluid and attaching character is the freshness and sweetness of man and woman,
(The herbs of the morning sprout no fresher and sweeter every day out of the roots of themselves, than it sprouts fresh and sweet continually out of itself.)
Toward the fluid and attaching character exudes the sweat of the love of young and old,
From it falls distill'd the charm that mocks beauty and attainments,
Toward it heaves the shuddering longing ache of contact.

9

Allons! whoever you are come travel with me!
Traveling with me you find what never tires.

The earth never tires,
The earth is rude, silent, incomprehensible at first, Nature is rude and incomprehensible at first,
Be not discouraged, keep on, there are divine things well envelop'd,
I swear to you there are divine things more beautiful than words can tell.

Allons! we must not stop here,
However sweet these laid-up stores, however convenient this dwelling we cannot remain here,
However shelter'd this port and however calm these waters we must not anchor here,
However welcome the hospitality that surrounds us we are permitted to receive it but a little while.

10

Allons! the inducements shall be greater,
We will sail pathless and wild seas,
We will go where winds blow, waves dash, and the Yankee clipper speeds by under full sail.

Allons! with power, liberty, the earth, the elements,
Health, defiance, gayety, self-esteem, curiosity;

101. **What . . .**—that is, why do I seem to interchange personalities with strangers? 114. **Allons!**—"Let us go on!"; one of Whitman's importations from the French.

Allons! from all formules!
From your formules, O bat-eyed and materialistic priests.

The stale cadaver blocks up the passage—the burial waits no longer.

Allons! yet take warning!
He traveling with me needs the best blood, thews, endurance,
None may come to the trial till he or she bring courage and health,
Come not here if you have already spent the best of yourself,
Only those may come who come in sweet and determin'd bodies,
No diseas'd person, no rum-drinker or venereal taint is permitted here.

(I and mine do not convince by arguments, similes, rhymes,
We convince by our presence.)

11

Listen! I will be honest with you,
I do not offer the old smooth prizes, but offer rough new prizes,
These are the days that must happen to you:
You shall not heap up what is call'd riches,
You shall scatter with lavish hand all that you earn or achieve,
You but arrive at the city to which you were destin'd, you hardly settle yourself to satisfaction before you are call'd by an irresistible call to depart,
You shall be treated to the ironical smiles and mockings of those who remain behind you,
What beckonings of love you receive you shall only answer with passionate kisses of parting,
You shall not allow the hold of those who spread their reach'd hands toward you.

12

Allons! after the great Companions, and to belong to them!
They too are on the road—they are the swift and majestic men—they are the greatest women,
Enjoyers of calms of seas and storms of seas,
Sailors of many a ship, walkers of many a mile of land,
Habitués of many distant countries, habitués of far-distant dwellings,
Trusters of men and women, observers of cities, solitary toilers,
Pausers and contemplators of tufts, blossoms, shells of the shore,
Dancers at wedding-dances, kissers of brides, tender helpers of children, bearers of children,
Soldiers of revolts, standers by gaping graves, lowerers-down of coffins,
Journeyers over consecutive seasons, over the years, the curious years each emerging from that which preceded it,
Journeyers as with companions, namely their own diverse phases,
Forth-steppers from the latent unrealized baby-days,
Journeyers gayly with their own youth, journeyers with their bearded and well-grain'd manhood,
Journeyers with their womanhood, ample, unsurpass'd, content,
Journeyers with their own sublime old age of manhood or womanhood,
Old age, calm, expanded, broad with the haughty breadth of the universe,
Old age, flowing free with the delicious near-by freedom of death.

129. **formules**—formulas. In an earlier version Whitman uses the orthodox form of the word.

13

Allons! to that which is endless as it was beginningless,
To undergo much, tramps of days, rests of nights,
To merge all in the travel they tend to, and the days and nights they tend to,
Again to merge them in the start of superior journeys,
To see nothing anywhere but what you may reach it and pass it,
To conceive no time, however distant, but what you may reach it and pass it,
To look up or down no road but it stretches and waits for you, however long but it stretches and waits for you,
To see no being, not God's or any, but you also go thither,
To see no possession but you may possess it, enjoying all without labor or purchase, abstracting the feast yet not abstracting one particle of it,
To take the best of the farmer's farm and the rich man's elegant villa, and the chaste blessings of the well-married couple, and the fruits of orchards and flowers of gardens,
To take to your use out of the compact cities as you pass through,
To carry buildings and streets with you afterward wherever you go,
To gather the minds of men out of their brains as you encounter them, to gather the love out of their hearts,
To take your lovers on the road with you, for all that you leave them behind you,
To know the universe itself as a road, as many roads, as roads for traveling souls.

All parts away for the progress of souls,
All religion, all solid things, arts, governments—all that was or is apparent upon this globe or any globe, falls into niches and corners before the procession of souls along the grand roads of the universe.

Of the progress of the souls of men and women along the grand roads of the universe, all other progress is the needed emblem and sustenance.

Forever alive, forever forward,
Stately, solemn, sad, withdrawn, baffled, mad, turbulent, feeble, dissatisfied,
Desperate, proud, fond, sick, accepted by men, rejected by men,
They go! they go! I know that they go, but I know not where they go,
But I know that they go toward the best—toward something great.

Whoever you are, come forth! or man or woman come forth!
You must not stay sleeping and dallying there in the house, though you built it, or though it has been built for you.

Out of the dark confinement! out from behind the screen!
It is useless to protest, I know all and expose it.

Behold through you as bad as the rest,
Through the laughter, dancing, dining, supping, of people,
Inside of dresses and ornaments, inside of those wash'd and trimm'd faces,
Behold a secret silent loathing and despair.

No husband, no wife, no friend, trusted to hear the confession,
Another self, a duplicate of every one, skulking and hiding it goes,

181. parts—departs, gets out of the way.

Formless and wordless through the streets of the cities, polite and bland in the parlors,
In the cars of railroads, in steamboats, in the public assembly,
Home to the houses of men and women, at the table, in the bedroom, everywhere,
Smartly attired, countenance smiling, form upright, death under the breast-bones, hell under the skull-bones,
Under the broadcloth and gloves, under the ribbons and artificial flowers,
Keeping fair with the customs, speaking not a syllable of itself,
Speaking of any thing else but never of itself.

14

Allons! through struggles and wars!
The goal that was named cannot be countermanded.

Have the past struggles succeeded?
What has succeeded? yourself? your nation? Nature?
Now understand me well—it is provided in the essence of things that from any fruition of success, no matter what, shall come forth something to make a greater struggle necessary.

My call is the call of battle, I nourish active rebellion,
He going with me must go well arm'd,
He going with me goes often with spare diet, poverty, angry enemies, desertions.

15

Allons! the road is before us!
It is safe—I have tried it—my own feet have tried it well—be not detain'd!
Let the paper remain on the desk unwritten, and the book on the shelf unopen'd!
Let the tools remain in the workshop! let the money remain unearn'd!
Let the school stand! mind not the cry of the teacher!
Let the preacher preach in his pulpit! let the lawyer plead in the court, and the judge expound the law.

Camerado, I give you my hand!
I give you my love more precious than money,
I give you myself before preaching or law;
Will you give me yourself? will you come travel with me?
Shall we stick by each other as long as we live?

CROSSING BROOKLYN FERRY

In the 1856 volume this was the eleventh poem, under the title "Sun-Down Poem." The present title appeared in 1860, when the verse paragraphs were numbered. In 1871 the section numbers were added. In 1881 the verse and section numbers were dropped. There are various textual variations.

1

Flood-tide below me! I see you face to face!
Clouds of the west—sun there half an hour high—I see you also face to face.

220. **Camerado**—another coinage: comrade.

Crowds of men and women attired in the usual costumes, how curious you are to me!
On the ferry-boats the hundreds and hundreds that cross, returning home, are more curious to me than you suppose,
And you that shall cross from shore to shore years hence are more to me, and more in my meditations, than you might suppose.

2

The impalpable sustenance of me from all things at all hours of the day,
The simple, compact, well-join'd scheme, myself disintegrated, every one disintegrated yet part of the scheme,
The similitudes of the past and those of the future,
The glories strung like beads on my smallest sights and hearings, on the walk in the street and the passage over the river,
The current rushing so swiftly and swimming with me far away,
The others that are to follow me, the ties between me and them,
The certainty of others, the life, love, sight, hearing of others.

Others will enter the gates of the ferry and cross from shore to shore,
Others will watch the run of the flood-tide,
Others will see the shipping of Manhattan north and west, and the heights of Brooklyn to the south and east,
Others will see the islands large and small;
Fifty years hence, others will see them as they cross, the sun half an hour high,
A hundred years hence, or ever so many hundred years hence, others will see them,
Will enjoy the sunset, the pouring-in of the flood-tide, the falling-back to the sea of the ebb-tide.

3

It avails not, time nor place—distance avails not,
I am with you, you men and women of a generation, or ever so many generations hence,
Just as you feel when you look on the river and sky, so I felt,
Just as any of you is one of a living crowd, I was one of a crowd,
Just as you are refresh'd by the gladness of the river and the bright flow, I was refresh'd,
Just as you stand and lean on the rail, yet hurry with the swift current, I stood yet was hurried,
Just as you look on the numberless masts of ships and the thick-stemm'd pipes of steamboats, I look'd.

I too many and many a time cross'd the river of old,
Watched the Twelfth-month sea-gulls, saw them high in the air floating with motionless wings, [illegible] their bodies,
Saw how the glistening yellow lit up parts of their bodies and left the rest in strong shadow,
Saw the slow-wheeling circles and the gradual edging toward the south,
Saw the reflection of the summer sky in the water,

7. disintegrated—The meaning is obscure, but seems to be that everyone who participates sympathetically in the scene overflows the boundaries of his own personality, and is therefore more than himself; that is, not merely and only himself. **28. Twelfth-month**—In 1860 Whitman dropped the conventional names of the months for the Quaker usage.

Had my eyes dazzled by the shimmering track of beams,
Look'd at the fine centrifugal spokes of light round the shape of my head in the sunlit water,
Look'd on the haze on the hills southward and south-westward,
Look'd on the vapor as it flew in fleeces tinged with violet,
Look'd toward the lower bay to notice the vessels arriving,
Saw their approach, saw aboard those that were near me,
Saw the white sails of schooners and sloops, saw the ships at anchor,
The sailors at work in the rigging or out astride the spars,
The round masts, the swinging motion of the hulls, the slender serpentine pennants,
The large and small steamers in motion, the pilots in their pilot-houses,
The white wake left by the passage, the quick tremulous whirl of the wheels,
The flags of all nations, the falling of them at sunset,
The scallop-edged waves in the twilight, the ladled cups, the frolicsome crests and glistening,
The stretch afar growing dimmer and dimmer, the gray walls of the granite store-houses by the docks,
On the river the shadowy group, the big steam-tug closely flank'd on each side by the barges, the hay-boat, the belated lighter,
On the neighboring shore the fires from the foundry chimneys burning high and glaringly into the night,
Casting their flicker of black contrasted with wild red and yellow light over the tops of houses, and down into the clefts of streets.

4

These and all else were to me the same as they are to you,
I loved well those cities, loved well the stately and rapid river,
The men and women I saw were all near to me,
Others the same—others who look back on me because I look'd forward to them,
(The time will come, though I stop here to-day and to-night.)

5

What is it then between us?
What is the count of the scores or hundreds of years between us?

Whatever it is, it avails not—distance avails not, and place avails not,
I too lived, Brooklyn of ample hills was mine,
I too walk'd the streets of Manhattan island, and bathed in the waters around it,
I too felt the curious abrupt questionings stir within me,
In the day among crowds of people sometimes they came upon me,
In my walks home late at night or as I lay in my bed they came upon me,
I too had been struck from the float forever held in solution,
I too had receiv'd identity by my body,
That I was I knew was of my body, and what I should be I knew I should be of my body.

6

It is not upon you alone the dark patches fall,
The dark threw its patches down upon me also,

46. lighter—barge. **62. float**—stuff that differentiates into the particular. **64. That—That** which.

The best I had done seem'd to me blank and suspicious,
My great thoughts as I supposed them, were they not in reality meagre?
Nor is it you alone who know what it is to be evil,
I am he who knew what it was to be evil,
I too knitted the old knot of contrariety,
Blabb'd, blush'd, resented, lied, stole, grudg'd,
Had guile, anger, lust, hot wishes I dared not speak,
Was wayward, vain, greedy, shallow, sly, cowardly, malignant,
The wolf, the snake, the hog, not wanting in me,
The cheating look, the frivolous word, the adulterous wish, not wanting,
Refusals, hates, postponements, meanness, laziness, none of these wanting,
Was one with the rest, the days and haps of the rest,
Was call'd by my nighest name by clear loud voices of young men as they saw me approaching or passing,
Felt their arms on my neck as I stood, or the negligent leaning of their flesh against me as I sat,
Saw many I loved in the street or ferry-boat or public assembly, yet never told them a word,
Lived the same life with the rest, the same old laughing, gnawing, sleeping,
Play'd the part that still looks back on the actor or actress,
The same old role, the role that is what we make it, as great as we like,
Or as small as we like, or both great and small.

7

Closer yet I approach you,
What thought you have of me now, I had as much of you—I laid in my stores in advance,
I consider'd long and seriously of you before you were born.

Who was to know what should come home to me?
Who knows but I am enjoying this?
Who knows, for all the distance, but I am as good as looking at you now, for all you cannot see me?

8

Ah, what can ever be more stately and admirable to me than mast-hemm'd Manhattan?
River and sunset and scallop-edg'd waves of flood-tide?
The sea-gulls oscillating their bodies, the hay-boat in the twilight, and the belated lighter?

What gods can exceed these that clasp me by the hand, and with voices I love call me promptly and loudly by my nighest name as I approach?

What is more subtle than this which ties me to the woman or man that looks in my face?
Which fuses me into you now, and pours my meaning into you?

We understand then do we not?
What I promis'd without mentioning it, have you not accepted?
What the study could not teach—what the preaching could not accomplish is accomplish'd, is it not?

9

Flow on, river! flow with the flood-tide, and ebb with the ebb-tide!
Frolic on, crested and scallop-edg'd waves!
Gorgeous clouds of the sunset! drench with your splendor me, or the men and women generations after me!
Cross from shore to shore, countless crowds of passengers!
Stand up, tall masts of Mannahatta! stand up, beautiful hills of Brooklyn!
Throb, baffled and curious brain! throw out questions and answers!
Suspend here and everywhere, eternal float of solution!
Gaze, loving and thirsting eyes, in the house or street or public assembly!
Sound out, voices of young men! loudly and musically call me by my nighest name!
Live, old life! play the part that looks back on the actor or actress!
Play the old role, the role that is great or small according as one makes it!
Consider, you who peruse me, whether I may not in unknown ways be looking upon you;
Be firm, rail over the river, to support those who lean idly, yet haste with the hasting current;
Fly on, sea-birds! fly sideways, or wheel in large circles high in the air;
Receive the summer sky, you water, and faithfully hold it till all downcast eyes have time to take it from you!
Diverge, fine spokes of light, from the shape of my head, or any one's head, in the sunlit water!
Come on, ships from the lower bay! pass up or down, white-sail'd schooners, sloops, lighters!
Flaunt away, flags of all nations! be duly lower'd at sunset!
Burn high your fires, foundry chimneys! cast black shadows at nightfall! cast red and yellow light over the tops of the houses!
Appearances, now or henceforth, indicate what you are,
You necessary film, continue to envelop the soul,
About my body for me, and your body for you, be hung our divinest aromas,
Thrive, cities—bring your freight, bring your shows, ample and sufficient rivers,
Expand, being than which none else is perhaps more spiritual,
Keep your places, objects than which none else is more lasting.

You have waited, you always wait, you dumb, beautiful ministers,
We receive you with free sense at last, and are insatiate henceforward,
Not you any more shall be able to foil us, or withhold yourselves from us,
We use you, and do not cast you aside—we plant you permanently within us,
We fathom you not—we love you—there is perfection in you also,
You furnish your parts toward eternity,
Great or small, you furnish your parts toward the soul.

PIONEERS! O PIONEERS!

This poem was originally included in *Drum Taps* (1865), when the stanzas were numbered. By 1871 it was lifted out of the "Drum Taps" section of *Leaves of Grass* and included under "Marches Now the War Is Over." In 1881 it was trans-

107. **float of solution**—temporal phenomena conceived of as floating on the universe and dissolving into it. *Cf.* line 62. 127. **free sense**—senses freed from merely temporal activity.

ferred to the "Birds of Passage" section, where it remained. The verse numberings were dropped with this transfer. There are very few changes in the text during these wanderings.

Come my tan-faced children,
Follow well in order, get your weapons ready,
Have you your pistols? have you your sharp-edged axes?
Pioneers! O pioneers!

For we cannot tarry here,
We must march my darlings, we must bear the brunt of danger,
We the youthful sinewy races, all the rest on us depend,
Pioneers! O pioneers!

O you youths, Western youths,
So impatient, full of action, full of manly pride and friendship,
Plain I see you Western youths, see you tramping with the foremost,
Pioneers! O pioneers!

Have the elder races halted?
Do they droop and end their lesson, wearied over there beyond the seas?
We take up the task eternal, and the burden and the lesson,
Pioneers! O pioneers!

All the past we leave behind,
We debouch upon a newer mightier world, varied world,
Fresh and strong the world we seize, world of labor and the march,
Pioneers! O pioneers!

We detachments steady throwing,
Down the edges, through the passes, up the mountains steep,
Conquering, holding, daring, venturing as we go the unknown ways,
Pioneers! O pioneers!

We primeval forests felling,
We the rivers stemming, vexing we and piercing deep the mines within,
We the surface broad surveying, we the virgin soil upheaving,
Pioneers! O pioneers!

Colorado men are we,
From the peaks gigantic, from the great sierras and the high plateaus,
From the mine and from the gully, from the hunting trail we come,
Pioneers! O pioneers!

From Nebraska, from Arkansas,
Central inland race are we, from Missouri, with the continental blood intervein'd,
All the hands of comrades clasping, all the Southern, all the Northern,
Pioneers! O pioneers!

O resistless restless race!
O beloved race in all! O my breast aches with tender love for all!
O I mourn and yet exult, I am rapt with love for all,
Pioneers! O pioneers!

Raise the mighty mother mistress,
Waving high the delicate mistress, over all the starry mistress, (bend your heads all,)
Raise the fang'd and warlike mistress, stern, impassive, weapon'd mistress,
Pioneers! O pioneers!

See my children, resolute children,
By those swarms upon our rear we must never yield or falter,
Ages back in ghostly millions frowning there behind us urging,
Pioneers! O pioneers!

On and on the compact ranks,
With accessions ever waiting, with the places of the dead quickly fill'd,
Through the battle, through defeat, moving yet and never stopping,
Pioneers! O pioneers!

O to die advancing on!
Are there some of us to droop and die? has the hour come?
Then upon the march we fittest die, soon and sure the gap is fill'd,
Pioneers! O pioneers!

All the pulses of the world,
Falling in they beat for us, with the Western movement beat,
Holding single or together, steady moving to the front, all for us,
Pioneers! O pioneers!

Life's involv'd and varied pageants,
All the forms and shows, all the workmen at their work,
All the seamen and the landsmen, all the masters with their slaves,
Pioneers! O pioneers!

All the hapless silent lovers,
All the prisoners in the prisons, all the righteous and the wicked,
All the joyous, all the sorrowing, all the living, all the dying,
Pioneers! O pioneers!

I too with my soul and body,
We, a curious trio, picking, wandering on our way,
Through these shores amid the shadows, with the apparitions pressing,
Pioneers! O pioneers!

Lo, the darting bowling orb!
Lo, the brother orbs around, all the clustering suns and planets,
All the dazzling days, all the mystic nights with dreams,
Pioneers! O pioneers!

These are of us, they are with us,
All for primal needed work, while the followers there in embryo wait behind,
We to-day's procession heading, we the route for travel clearing,
Pioneers! O pioneers!

73. darting bowling orb—either the earth as it "bowls along," or the sun. Whitman is consistently vague in his use of "orb."

O you daughters of the West!
O you young and elder daughters! O you mothers and you wives!
Never must you be divided, in our ranks you move united,
Pioneers! O pioneers!

Minstrels latent on the prairies!
(Shrouded bards of other lands, you may rest, you have done your work),
Soon I hear you coming warbling, soon you rise and tramp amid us,
Pioneers! O pioneers!

Not for delectations sweet,
Not the cushion and the slipper, not the peaceful and the studious,
Not the riches safe and palling, not for us the tame enjoyment,
Pioneers! O pioneers!

Do the feasters gluttonous feast?
Do the corpulent sleepers sleep? Have they lock'd and bolted doors?
Still be ours the diet hard, and the blanket on the ground,
Pioneers! O pioneers!

Has the night descended?
Was the road of late so toilsome? did we stop discouraged nodding on our way?
Yet a passing hour I yield you in your tracks to pause oblivious,
Pioneers! O pioneers!

Till with sound of trumpet,
Far, far off the daybreak call—hark! how loud and clear I hear it wind,
Swift! to the head of the army!—swift! spring to your places,
Pioneers! O pioneers!

OUT OF THE CRADLE ENDLESSLY ROCKING

After periodical publication, as "A Child's Reminiscence," this poem first appeared in the 1860 edition as "A Word out of the Sea," and the second, and greater, portion of it is split off from the first and entitled "Reminiscences." In 1867 the poem had its present length, the verse paragraphs were numbered, and the poem was split into numbered sections. In 1871 it was transferred to "Passage to India" as part of the section of "Sea-Shore Memories." It does not appear in the 1876 *Leaves,* but does appear in the *Two Rivulets* volume of that year ("Passage to India"). In 1881 it became the leading poem in the section entitled "Sea-Drift," and the numberings were dropped. There are many textual variations.

Out of the cradle endlessly rocking,
Out of the mocking-bird's throat, the musical shuttle,
Out of the Ninth-month midnight,
Over the sterile sands and the fields beyond, where the child leaving his bed wander'd alone, bareheaded, barefoot,
Down from the shower'd halo,
Up from the mystic play of shadows twining and twisting as if they were alive,
Out from the patches of briers and blackberries,

From the memories of the bird that chanted to me,
From your memories sad brother, from the fitful risings and fallings I heard,
From under that yellow half-moon late-risen and swollen as if with tears,
From those beginning notes of yearning and love there in the mist,
From the thousand responses of my heart never to cease,
From the myriad thence-arous'd words,
From the word stronger and more delicious than any,
From such as now they start the scene revisiting,
As a flock, twittering, rising, or overhead passing,
Borne hither, ere all eludes me, hurriedly,
A man, yet by these tears a little boy again,
Throwing myself on the sand, confronting the waves,
I, chanter of pains and joys, uniter of here and hereafter,
Taking all hints to use them, but swiftly leaping beyond them,
A reminiscence sing.

Once Paumanok,
When the lilac-scent was in the air and Fifth-month grass was growing,
Up this seashore in some briers,
Two feather'd guests from Alabama, two together,
And their nest, and four light-green eggs spotted with brown,
And every day the he-bird to and fro near at hand,
And every day the she-bird crouch'd on her nest, silent, with bright eyes,
And every day I, a curious boy, never too close, never disturbing them,
Cautiously peering, absorbing, translating.

Shine! shine! shine!
Pour down your warmth, great sun!
While we bask, we two together.

Two together!
Winds blow south, or winds blow north,
Day come white, or day come black,
Home, or rivers and mountains from home,
Singing all time, minding no time,
While we two keep together.

Till of a sudden,
May-be kill'd, unknown to her mate,
One forenoon that she-bird crouch'd not on the nest,
Nor return'd that afternoon, nor the next,
Nor ever appear'd again.

And thenceforward all summer in the sound of the sea,
And at night under the full of the moon in calmer weather,
Over the hoarse surging of the sea,
Or flitting from brier to brier by day,
I saw, I heard at intervals the remaining one, the he-bird,
The solitary guest from Alabama.

23. Paumanok—Long Island. **37. Day come**—This line usually appears as "Day come white, or night come black," but the reading in the text is that of the Camden edition.

Blow! blow! blow!
Blow up sea-winds along Paumanok's shore;
I wait and I wait till you blow my mate to me.

Yes, when the stars glisten'd,
All night long on the prong of a moss-scallop'd stake,
Down almost amid the slapping waves,
Sat the lone singer wonderful causing tears.

He call'd on his mate,
He pour'd forth the meanings which I of all men know.

Yes my brother I know,
The rest might not, but I have treasur'd every note,
For more than once dimly down to the beach gliding,
Silent, avoiding the moonbeams, blending myself with the shadows,
Recalling now the obscure shapes, the echoes, the sounds and sights after their sorts,
The white arms out in the breakers tirelessly tossing,
I, with bare feet, a child, the wind wafting my hair,
Listen'd long and long.

Listen'd to keep, to sing, now translating the notes,
Following you my brother.

Soothe! soothe! soothe!
Close on its wave soothes the wave behind,
And again another behind embracing and lapping, every one close,
But my love soothes not me, not me.

Low hangs the moon, it rose late,
It is lagging—O I think it is heavy with love, with love.

O madly the sea pushes upon the land,
With love, with love.

O night! do I not see my love fluttering out among the breakers?
What is that little black thing I see there in the white?

Loud! loud! loud!
Loud I call to you, my love!

High and clear I shoot my voice over the waves,
Surely you must know who is here, is here,
You must know who I am, my love.

Low-hanging moon!
What is that dusky spot in your brown yellow?
O it is the shape, the shape of my mate!
O moon do not keep her from me any longer.

Land! land! O land!
Whichever way I turn, O I think you could give me my mate back again if you only would,
For I am almost sure I see her dimly whichever way I look.

O rising stars!
Perhaps the one I want so much will rise, will rise with one of you.

O throat! O trembling throat!
Sound clearer through the atmosphere!
Pierce the woods, the earth,
Somewhere listening to catch you must be the one I want.

Shake out carols!
Solitary here, the night's carols!
Carols of lonesome love! death's carols!
Carols under that lagging, yellow, waning moon!
O under that moon where she droops almost down into the sea!
O reckless despairing carols.

But soft! sink low!
Soft! let me just murmur,
And do you wait a moment you husky-nois'd sea,
For somewhere I believe I heard my mate responding to me,
So faint, I must be still, be still to listen,
But not altogether still, for then she might not come immediately to me.

Hither my love!
Here I am! here!
With this just-sustain'd note I announce myself to you,
This gentle call is for you my love, for you.

Do not be decoy'd elsewhere,
That is the whistle of the wind, it is not my voice,
That is the fluttering, the fluttering of the spray,
Those are the shadows of leaves.

O darkness! O in vain!
O I am very sick and sorrowful.

O brown halo in the sky near the moon, drooping upon the sea!
O troubled reflection in the sea!
O throat! O throbbing heart!
And I singing uselessly, uselessly all the night.

O past! O happy life! O songs of joy!
In the air, in the woods, over fields,
Loved! loved! loved! loved! loved!
But my mate no more, no more with me!
We two together no more.

The aria sinking,
All else continuing, the stars shining,
The winds blowing, the notes of the bird continuous echoing,
With angry moans the fierce old mother incessantly moaning,
On the sands of Paumanok's shore gray and rustling,
The yellow half-moon enlarged, sagging down, drooping, the face of the sea almost touching,

The boy ecstatic, with his bare feet the waves, with his hair the atmosphere dallying,
The love in the heart long pent, now loose, now at last tumultuously bursting,
The aria's meaning, the ears, the soul, swiftly depositing,
The strange tears down the cheeks coursing,
The colloquy there, the trio, each uttering,
The undertone, the savage old mother incessantly crying,
To the boy's soul's questions sullenly timing, some drown'd secret hissing,
To the outsetting bard.

Demon or bird! (said the boy's soul,)
Is it indeed toward your mate you sing? or is it really to me?
For I, that was a child, my tongue's use sleeping, now I have heard you,
Now in a moment I know what I am for, I awake,
And already a thousand singers, a thousand songs, clearer, louder and more sorrowful than yours,
A thousand warbling echoes have started to life within me, never to die.

O you singer solitary, singing by yourself, projecting me,
O solitary me listening, never more shall I cease perpetuating you,
Never more shall I escape, never more the reverberations,
Never more the cries of unsatisfied love be absent from me,
Never again leave me to be the peaceful child I was before what there in the night,
By the sea under the yellow and sagging moon,
The messenger there arous'd, the fire, the sweet hell within,
The unknown want, the destiny of me.

O give me the clew! (it lurks in the night here somewhere,)
O if I am to have so much, let me have more!

A word then, (for I will conquer it,)
The word final, superior to all,
Subtle, sent up—what is it?—I listen;
Are you whispering it, and have been all the time, you sea-waves?
Is that it from your liquid rims and wet sands?

Whereto answering, the sea,
Delaying not, hurrying not,
Whisper'd me through the night, and very plainly before daybreak,
Lisp'd to me the low and delicious word death,
And again death, death, death, death,
Hissing melodious, neither like the bird nor like my arous'd child's heart,
But edging near as privately for me rustling at my feet,
Creeping thence steadily up to my ears and laving me softly all over,
Death, death, death, death, death.

Which I do not forget,
But fuse the song of my dusky demon and brother,
That he sang to me in the moonlight on Paumanok's gray beach,
With the thousand responsive songs at random,
My own songs awaked from that hour,

144. **Demon**—in the sense of *daimon*, or spirit.

And with them the key, the word up from the waves,
The word of the sweetest song and all songs,
That strong and delicious word which, creeping to my feet,
(Or like some old crone rocking the cradle, swathed in sweet garments, bending aside,)
The sea whisper'd me.

ON THE BEACH AT NIGHT ALONE

In the 1856 *Leaves* this poem appears as number 15 ("Clef Poem"); in the 1860 edition, it becomes the twelfth of "Leaves of Grass," and is divided into eight numbered verse paragraphs. In 1867 the title was dropped, the poem was radically reworked, and the structure was reduced to two verse paragraphs. In the *Passage to India* pamphlet the poem appears as part of the "Sea-Shore Memories" section under its present title. It was retained as part of the "Passage to India" "annex" to the 1871 *Leaves;* and in the section of *Two Rivulets* under that title. In 1881 it took its position in the "Sea-Drift" section of *Leaves,* where it has its present form.

On the beach at night alone,
As the old mother sways her to and fro singing her husky song,
As I watch the bright stars shining, I think a thought of the clef of the universes and of the future.

A vast similitude interlocks all,
All spheres, grown, ungrown, small, large, suns, moons, planets,
All distances of place however wide,
All distances of time, all inanimate forms,
All souls, all living bodies though they be ever so different, or in different worlds,
All gaseous, watery, vegetable, mineral processes, the fishes, the brutes,
All nations, colors, barbarisms, civilizations, languages,
All identities that have existed or may exist on this globe, or any globe,
All lives and deaths, all of the past, present, future,
This vast similitude spans them, and always has spann'd,
And shall forever span them and compactly hold and enclose them.

WHEN I HEARD THE LEARN'D ASTRONOMER

This poem first appeared in *Drum-Taps;* remained in the "Drum-Taps" section of the 1867 *Leaves;* was transferred to "Songs of Parting" in the 1871 *Leaves;* and came to rest in "By the Roadside" in 1881.

When I heard the learn'd astronomer,
When the proofs, the figures, were ranged in columns before me,
When I was shown the charts and diagrams, to add, divide, and measure them,
When I sitting heard the astronomer where he lectured with much applause in the lecture-room,

3. **clef**—key to the riddle of the universe. 4. **similitude**—in the sense of likeness merely.

How soon unaccountable I became tired and sick,
Till rising and gliding out I wander'd off by myself,
In the mystical moist night-air, and from time to time,
Look'd up in perfect silence at the stars.

BEAT! BEAT! DRUMS!

This poem first appeared in *Drum-Taps,* where it was divided into three numbered sections. It remained consistently in the "Drum-Taps" section of *Leaves of Grass* after 1867. The present form dates from 1881.

Beat! beat! drums!—blow! bugles! blow!
Through the windows—through doors—burst like a ruthless force,
Into the solemn church, and scatter the congregation,
Into the school where the scholar is studying;
Leave not the bridegroom quiet—no happiness must he have now with his bride,
Nor the peaceful farmer any peace, plowing his field or gathering his grain,
So fierce you whirr and pound you drums—so shrill you bugles blow.

Beat! beat! drums!—blow! bugles! blow!
Over the traffic of cities—over the rumble of wheels in the streets;
Are beds prepared for sleepers at night in the houses? no sleepers must sleep in those beds,
No bargainers' bargains by day—no brokers or speculators—would they continue?
Would the talkers be talking? would the singer attempt to sing?
Would the lawyer rise in the court to state his case before the judge?
Then rattle quicker, heavier drums—you bugles wilder blow.

Beat! beat! drums!—blow! bugles! blow!
Make no parley—stop for no expostulation,
Mind not the timid—mind not the weeper or prayer,
Mind not the old man beseeching the young man,
Let not the child's voice be heard, nor the mother's entreaties,
Make even the trestles to shake the dead where they lie awaiting the hearses,
So strong you thump O terrible drums—so loud you bugles blow.

CAVALRY CROSSING A FORD

The history of this poem is like that of "Beat! Beat! Drums!"

A line in long array where they wind betwixt green islands,
They take a serpentine course, their arms flash in the sun—hark to the musical clank,
Behold the silvery river, in it the splashing horses loitering stop to drink,
Behold the brown-faced men, each group, each person a picture, the negligent rest on the saddles,
Some emerge on the opposite bank, others are just entering the ford—while,
Scarlet and blue and snowy white,
The guidon flags flutter gayly in the wind.

COME UP FROM THE FIELDS FATHER

This poem was first included in *Drum-Taps,* where the verse paragraphs were numbered. It remained consistently in the "Drum-Taps" section of *Leaves of Grass* after 1867. In 1871 it was divided into numbered sections, but in 1881 took its present form.

Come up from the fields father, here's a letter from our Pete,
And come to the front door mother, here's a letter from thy dear son.

Lo, 'tis autumn,
Lo, where the trees, deeper green, yellower and redder,
Cool and sweeten Ohio's villages with leaves fluttering in the moderate wind,
Where apples ripe in the orchards hang and grapes on the trellis'd vines,
(Smell you the smell of the grapes on the vines?
Smell you the buckwheat where the bees were lately buzzing?)
Above all, lo, the sky so calm, so transparent after the rain, and with wondrous clouds,
Below too, all calm, all vital and beautiful, and the farm prospers well.

Down in the fields all prospers well,
But now from the fields come father, come at the daughter's call,
And come to the entry mother, to the front door come right away.

Fast as she can she hurries, something ominous, her steps trembling,
She does not tarry to smooth her hair nor adjust her cap.

Open the envelope quickly,
O this is not our son's writing, yet his name is sign'd,
O a strange hand writes for our dear son, O stricken mother's soul!
All swims before her eyes, flashes with black, she catches the main words only,
Sentences broken, *gunshot wound in the breast, cavalry skirmish, taken to hospital,*
At present low, but will soon be better.

Ah now the single figure to me,
Amid all teeming and wealthy Ohio with all its cities and farms,
Sickly white in the face and dull in the head, very faint,
By the jamb of a door leans.

Grieve not so, dear mother, (the just-grown daughter speaks through her sobs,
The little sisters huddle around speechless and dismay'd,)
See, dearest mother, the letter says Pete will soon be better.

Alas poor boy, he will never be better, (nor may be needs to be better, that brave and simple soul,)
While they stand at home at the door he is dead already,
The only son is dead.

But the mother needs to be better,
She with thin form presently drest in black,

By day her meals untouch'd, then at night fitfully sleeping, often waking,
In the midnight waking, weeping, longing with one deep longing,
O that she might withdraw unnoticed, silent from life escape and withdraw,
To follow, to seek, to be with her dear dead son.

GIVE ME THE SPLENDID SILENT SUN

This poem first appeared in *Drum-Taps,* and remained consistently in the "Drum-Taps" section of the *Leaves* after 1867. The present punctuation dates from 1881. It is one of the few poems in which Whitman writes with equal cogency on opposite sides of a situation.

1

Give me the splendid silent sun with all his beams full-dazzling,
Give me juicy autumnal fruit ripe and red from the orchard,
Give me a field where the unmow'd grass grows,
Give me an arbor, give me the trellis'd grape,
Give me fresh corn and wheat, give me serene-moving animals teaching content,
Give me nights perfectly quiet as on high plateaus west of the Mississippi, and I looking up at the stars,
Give me odorous at sunrise a garden of beautiful flowers where I can walk undisturb'd,
Give me for marriage a sweet-breath'd woman of whom I should never tire,
Give me a perfect child, give me away aside from the noise of the world a rural domestic life,
Give me to warble spontaneous songs recluse by myself, for my own ears only,
Give me solitude, give me Nature, give me again O Nature your primal sanities!

These demanding to have them, (tired with ceaseless excitement, and rack'd by the war-strife,)
These to procure incessantly asking, rising in cries from my heart,
While yet incessantly asking still I adhere to my city,
Day upon day and year upon year O city, walking your streets,
Where you hold me enchain'd a certain time refusing to give me up,
Yet giving to make me glutted, enrich'd of soul, you give me forever faces;
(O I see what I sought to escape, confronting, reversing my cries,
I see my own soul trampling down what it ask'd for.)

2

Keep your splendid silent sun
Keep your woods, O Nature, and the quiet places by the woods,
Keep your fields of clover and timothy, and your corn-fields and orchards,
Keep the blossoming buckwheat fields where the Ninth-month bees hum;
Give me faces and streets—give me these phantoms incessant and endless along the trottoirs!
Give me interminable eyes—give me women—give me comrades and lovers by the thousand!
Let me see new ones every day—let me hold new ones by the hand every day!
Give me such shows—give me the streets of Manhattan!

24. trottoirs—sidewalks.

Give me Broadway, with the soldiers marching—give me the sound of the trumpets and drums!
(The soldiers in companies or regiments—some starting away, flush'd and reckless,
Some, their time up, returning with thinn'd ranks, young, yet very old, worn, marching, noticing nothing;)
Give me the shores and wharves heavy-fringed with black ships!
O such for me! O an intense life, full to repletion and varied!
The life of the theatre, bar-room, huge hotel, for me!
The saloon of the steamer! the crowded excursion for me! the torchlight procession!
The dense brigade bound for the war, with high piled military wagons following;
People, endless, streaming, with strong voices, passions, pageants,
Manhattan streets with their powerful throbs, with beating drums as now,
The endless and noisy chorus, the rustle and clank of muskets, (even the sight of the wounded,)
Manhattan crowds, with their turbulent musical chorus!
Manhattan faces and eyes forever for me.

RECONCILIATION

This poem originally appeared in "Sequel to Drum-Taps," bound up with the *Drum-Taps* pamphlet in 1865-66. In the 1867 *Leaves* it kept this place. In the 1871 *Leaves* it was placed under "Drum-Taps," where it consistently remained.

Word over all, beautiful as the sky,
Beautiful that war and all its deeds of carnage must in time be utterly lost,
That the hands of the sisters Death and Night incessantly softly wash again, and ever again, this soil'd world;
For my enemy is dead, a man divine as myself is dead,
I look where he lies white-faced and still in the coffin—I draw near,
Bend down, and touch lightly with my lips the white face in the coffin.

WHEN LILACS LAST IN THE DOORYARD BLOOM'D

When President Lincoln was assassinated, Whitman had already printed his pamphlet *Drum-Taps*. He poured out his grief in his memorial poems, printed them, and bound them up with his previously printed pamphlet as *Sequel to Drum-Taps,* the extra part being dated 1865-66. In this "When Lilacs Last in the Dooryard Bloom'd" was included, but the first arrangement of the poem was one of 43 numbered verse paragraphs organized into 21 numbered sections. The text, of course, differs from the final text. In adding his war poems to the *Leaves* of 1867, he kept the same arrangement of "Drum-Taps" and "Sequel to Drum-Taps." In 1871 the four memorial poems were grouped together as a section titled "President Lincoln's Burial Hymn," and the portion of the poem now printed in italics was printed in that type face, and headed "Death Carol." In 1876 the same four poems were printed in *Two Rivulets* as part of the "Passage to India" portion of that volume. In the 1881 *Leaves* the present poem is part of the "Memories of President Lincoln" section, and has since remained so. The student should note that Lincoln is not mentioned by name in "When Lilacs Last in the Dooryard Bloom'd."

1

When lilacs last in the dooryard bloom'd,
And the great star early droop'd in the western sky in the night,
I mourn'd, and yet shall mourn with ever-returning spring.

Ever-returning spring, trinity sure to me you bring,
Lilac blooming perennial and drooping star in the west,
And thought of him I love.

2

O powerful western fallen star!
O shades of night—O moody, tearful night!
O great star disappear'd—O the black murk that hides the star!
O cruel hands that hold me powerless—O helpless soul of me!
O harsh surrounding cloud that will not free my soul.

3

In the dooryard fronting an old farm-house near the white-wash'd palings,
Stands the lilac-bush tall-growing with heart-shaped leaves of rich green,
With many a pointed blossom rising delicate, with the perfume strong I love,
With every leaf a miracle—and from this bush in the dooryard,
With delicate-color'd blossoms and heart-shaped leaves of rich green,
A sprig with its flower I break.

4

In the swamp in secluded recesses,
A shy and hidden bird is warbling a song.

Solitary the thrush,
The hermit withdrawn to himself, avoiding the settlements,
Sings by himself a song.

Song of the bleeding throat,
Death's outlet song of life, (for well dear brother I know,
If thou wast not granted to sing thou would'st surely die.)

5

Over the breast of the spring, the land, amid cities,
Amid lanes and through old woods, where lately the violets peep'd from the ground, spotting the gray debris,
Amid the grass in the fields each side of the lanes, passing the endless grass,
Passing the yellow-spear'd wheat, every grain from its shroud in the dark-brown fields uprisen,
Passing the apple-tree blows of white and pink in the orchards,
Carrying a corpse to where it shall rest in the grave,
Night and day journeys a coffin.

81. Carrying—The reference is to the funeral train which took Lincoln's body from Washington to Springfield, Illinois, for burial. The succeeding portions of the poem are historically accurate in describing the mourning. Note how the leitmotif of sorrow is sustained by thematic words like "death," "star," "lilacs," "him I love," and so forth.

6

Coffin that passes through lanes and streets,
Through day and night with the great cloud darkening the land,
With the pomp of the inloop'd flags with the cities draped in black,
With the show of the States themselves as of crape-veil'd women standing,
With processions long and winding and the flambeaus of the night,
With the countless torches lit, with the silent sea of faces and the unbared heads,
With the waiting depot, the arriving coffin, and the sombre faces,
With dirges through the night, with the thousand voices rising strong and solemn,
With all the mournful voices of the dirges pour'd around the coffin,
The dim-lit churches and the shuddering organs—where amid these you journey,
With the tolling tolling bells' perpetual clang,
Here, coffin that slowly passes,
I give you my sprig of lilac.

7

(Nor for you, for one alone,
Blossoms and branches green to coffins all I bring,
For fresh as the morning, thus would I chant a song for you O sane and sacred death.

All over bouquets of roses,
O death, I cover you over with roses and early lilies,
But mostly and now the lilac that blooms the first,
Copious I break, I break the sprigs from the bushes,
With loaded arms I come, pouring for you,
For you and the coffins all of you O death.)

8

O western orb sailing the heaven,
Now I know what you must have meant as a month since I walk'd,
As I walk'd in silence the transparent shadowy night,
As I saw you had something to tell as you bent to me night after night,
As you droop'd from the sky low down as if to my side, (while the other stars all look'd on,)
As we wander'd together the solemn night, (for something I know not what kept me from sleep,)
As the night advanced, and I saw on the rim of the west how full you were of woe,
As I stood on the rising ground in the breeze in the cool transparent night,
As I watch'd where you pass'd and was lost in the netherward black of the night,
As my soul in its trouble dissatisfied sank, as where you sad orb,
Concluded, dropt in the night, and was gone.

9

Sing on there in the swamp,
O singer bashful and tender, I hear your notes, I hear your call
I hear, I come presently, I understand you,
But a moment I linger, for the lustrous star has detain'd me,
The star my departing comrade holds and detains me.

10

O how shall I warble myself for the dead one there I loved?
And how shall I deck my song for the large sweet soul that has gone?
And what shall my perfume be for the grave of him I love?

Sea-winds blown from east and west,
Blown from the Eastern sea and blown from the Western sea, till there on the prairies meeting,
These and with these and the breath of my chant,
I'll perfume the grave of him I love.

11

O what shall I hang on the chamber walls?
And what shall the pictures be that I hang on the walls,
To adorn the burial-house of him I love?

Pictures of growing spring and farms and homes,
With the Fourth-month eve at sundown, and the gray smoke lucid and bright,
With floods of the yellow gold of the gorgeous, indolent, sinking sun, burning, expanding the air,
With the fresh sweet herbage under foot, and the pale green leaves of the trees prolific,
In the distance the flowing glaze, the breast of the river, with a wind-dapple here and there,
With ranging hills on the banks, with many a line against the sky, and shadows,
And the city at hand with dwellings so dense, and stacks of chimneys,
And all the scenes of life and the workshops, and the workmen homeward returning.

12

Lo, body and soul—this land,
My own Manhattan with spires, and the sparkling and hurrying tides, and the ships,
The varied and ample land, the South and the North in the light, Ohio's shores and flashing Missouri,
And ever the far-spreading prairies cover'd with grass and corn.

Lo, the most excellent sun so calm and haughty,
The violet and purple morn with just-felt breezes,
The gentle soft-born measureless light,
The miracle spreading bathing all, the fulfill'd noon,
The coming eve delicious, the welcome night and the stars,
Over my cities shining all, enveloping man and land.

13

Sing on, sing on you gray-brown bird,
Sing from the swamps, the recesses, pour your chant from the bushes,
Limitless out of the dusk, out of the cedars and pines.

Sing on dearest brother, warble your reedy song,
Loud human song, with voice of uttermost woe.

O liquid and free and tender!
O wild and loose to my soul—O wondrous singer!
You only I hear—yet the star holds me, (but will soon depart,)
Yet the lilac with mastering odor holds me.

14

Now while I sat in the day and look'd forth,
In the close of the day with its light and the fields of spring, and the farmers preparing their crops,
In the large unconscious scenery of my land with its lakes and forests,
In the heavenly aerial beauty, (after the perturb'd winds and the storms,)
Under the arching heavens of the afternoon swift passing, and the voices of children and women,
The many-moving sea-tides, and I saw the ships how they sail'd,
And the summer approaching with richness, and the fields all busy with labor,
And the infinite separate houses, how they all went on, each with its meals and minutia of daily usages,
And the streets how their throbbings throbb'd, and the cities pent—lo, then and there,
Falling upon them all and among them all, enveloping me with the rest,
Appear'd the cloud, appear'd the long black trail,
And I knew death, its thought, and the sacred knowledge of death.

Then with the knowledge of death as walking one side of me,
And the thought of death close-walking the other side of me,
And I in the middle as with companions, and as holding the hands of companions,
I fled forth to the hiding receiving night that talks not,
Down to the shores of the water, the path by the swamp in the dimness,
To the solemn shadowy cedars and ghostly pines so still.

And the singer so shy to the rest receiv'd me,
The gray-brown bird I know receiv'd us comrades three,
And he sang the carol of death, and a verse for him I love.

From deep secluded recesses,
From the fragrant cedars and the ghostly pines so still,
Came the carol of the bird.

And the charm of the carol rapt me,
As I held as if by their hands my comrades in the night,
And the voice of my spirit tallied the song of the bird.

Come lovely and soothing death,
Undulate round the world, serenely arriving, arriving,
In the day, in the night, to all, to each,
Sooner or later delicate death.

Prais'd be the fathomless universe,
For life and joy, and for objects and knowledge curious,
And for love, sweet love—but praise! praise! praise!
For the sure-enwinding arms of cool-enfolding death.

Dark mother always gliding near with soft feet,
Have none chanted for thee a chant of fullest welcome?
Then I chant it for thee, I glorify thee above all,
I bring thee a song that when thou must indeed come, come unfalteringly.

Approach strong deliveress,
When it is so, when thou hast taken them I joyously sing the dead,
Lost in the loving floating ocean of thee,
Laved in the flood of thy bliss O death.
From me to thee glad serenades,
Dances for thee I propose saluting thee, adornments and feastings for thee,
And the sights of the open landscape and the high-spread sky are fitting,
And life and the fields, and the huge and thoughtful night.

The night in silence under many a star,
The ocean shore and the husky whispering wave whose voice I know,
And the soul turning to thee O vast and well-veil'd death,
And the body gratefully nestling close to thee.

Over the tree-tops I float thee a song,
Over the rising and sinking waves, over the myriad fields and the prairies wide,
Over the dense-pack'd cities all and the teeming wharves and ways,
I float this carol with joy, with joy to thee O death.

15

To the tally of my soul,
Loud and strong kept up the gray-brown bird,
With pure deliberate notes spreading filling the night.
Loud in the pines and cedars dim,
Clear in the freshness moist and the swamp-perfume,
And I with my comrades there in the night.

While my sight that was bound in my eyes unclosed,
As to long panoramas of visions.

And I saw askant the armies,
I saw as in noiseless dreams hundreds of battle-flags,
Borne through the smoke of the battles and pierc'd with missiles I saw them,
And carried hither and yon through the smoke, and torn and bloody,
And at last but a few shreds left on the staffs, (and all in silence,)
And the staffs all splinter'd and broken.

I saw battle-corpses, myriads of them,
And the white skeletons of young men, I saw them,
I saw the debris and debris of all the slain soldiers of the war,
But I saw they were not as was thought,
They themselves were fully at rest, they suffer'd not,
The living remain'd and suffer'd, the mother suffer'd,
And the wife and the child and the musing comrade suffer'd,
And the armies that remain'd suffer'd.

16

Passing the visions, passing the night,
Passing, unloosing the hold of my comrades' hands,
Passing the song of the hermit bird and the tallying song of my soul,
Victorious song, death's outlet song, yet varying ever-altering song,
As low and wailing, yet clear the notes, rising and falling, flooding the night,
Sadly sinking and fainting, as warning and warning, and yet again bursting with joy,
Covering the earth and filling the spread of the heaven,
As that powerful psalm in the night I heard from recesses,
Passing, I leave thee lilac with heart-shaped leaves,
I leave thee there in the dooryard, blooming, returning with spring.

I cease from my song for thee,
From my gaze on thee in the west, fronting the west, communing with thee,
O comrade lustrous with silver face in the night.

Yet each to keep and all, retrievements out of the night,
The song, the wondrous chant of the gray-brown bird,
And the tallying chant, the echo arous'd in my soul,
With the lustrous and drooping star with the countenance full of woe,
With the holders holding my hand nearing the call of the bird,
Comrades mine and I in the midst, and their memory ever to keep, for the dead I loved so well,
For the sweetest, wisest soul of all my days and lands—and this for his dear sake,
Lilac and star and bird twined with the chant of my soul,
There in the fragrant pines and the cedars dusk and dim.

O CAPTAIN! MY CAPTAIN!

The history of this poem is like that of the preceding. In the original form, and until 1881, the stanzas were numbered. There are minor textual variations in the several editions.

O Captain! my Captain! our fearful trip is done,
The ship has weather'd every rack, the prize we sought is won,
The port is near, the bells I hear, the people all exulting,
While follow eyes the steady keel, the vessel grim and daring;
But O heart! heart! heart!
O the bleeding drops of red,
Where on the deck my Captain lies,
Fallen cold and dead.

O Captain! my Captain! rise up and hear the bells;
Rise up—for you the flag is flung—for you the bugle trills,
For you bouquets and ribbon'd wreaths—for you the shores a-crowding,
For you they call, the swaying mass, their eager faces turning;
Here Captain! dear father!
This arm beneath your head!
It is some dream that on the deck,
You've fallen cold and dead.

My Captain does not answer, his lips are pale and still,
My father does not feel my arm, he has no pulse nor will,
The ship is anchor'd safe and sound, its voyage closed and done,
From fearful trip the victor ship comes in with object won:
Exult O shores, and ring O bells!
But I with mournful tread,
Walk the deck my Captain lies,
Fallen cold and dead.

THERE WAS A CHILD WENT FORTH

This poem, without title, originally formed part of the 1855 volume, being the third section from the end. In 1856, under the title "Poem of The Child That Went Forth, and Always Goes Forth Forever and Forever" it was poem number 25. In 1860 it became number nine of one of the "Leaves of Grass" sections, when it was divided into numbered verse paragraphs. In 1867 it was the first poem in that section, and was further divided into numbered sections. In 1871 the numbered sections disappeared. In 1881 it took its place in the "Autumn Rivulets" section, and the text took its present shape.

There was a child went forth every day,
And the first object he look'd upon, that object he became,
And that object became part of him for the day or a certain part of the day,
Or for many years or stretching cycles of years.

The early lilacs became part of this child,
And grass and white and red morning-glories and white and red clover, and the song of the phoebe-bird,
And the Third-month lambs and the sow's pink-faint litter, and the mare's foal and the cow's calf,
And the noisy brood of the barnyard or by the mire of the pond-side,
And the fish suspending themselves so curiously below there, and the beautiful curious liquid,
And the water-plants with their graceful flat heads, all became part of him.

The field-sprouts of Fourth-month and Fifth-month became part of him,
Winter-grain sprouts and those of the light-yellow corn, and the esculent roots of the garden,
And the apple-trees cover'd with blossoms and the fruit afterward, and wood-berries, and the commonest weeds by the road,
And the old drunkard staggering home from the outhouse of the tavern whence he had lately risen,
And the schoolmistress that pass'd, and the quarrelsome boys,
And the tidy and fresh-cheek'd girls, and the barefoot negro boy and girl,
And all the changes of city and country wherever he went.

His own parents, he that had father'd him, and she that had conceiv'd him in her womb, and birth'd him,
They gave this child more of themselves than that,
They gave him afterward every day, they became part of him.

6. phoebe-bird—The pewit, or pewee. **12. esculent**—edible.

The mother at home quietly placing the dishes on the supper-table,
The mother with mild words, clean her cap and gown, a wholesome odor falling off her person and clothes as she walks by,
The father, strong, self-sufficient, manly, mean, anger'd, unjust,
The blow, the quick loud word, the tight bargain, the crafty lure,
The family usages, the language, the company, the furniture, the yearning and swelling heart,
Affection that will not be gainsay'd, the sense of what is real, the thought if after all it should prove unreal,
The doubts of day-time and the doubts of night-time, the curious whether and how,
Whether that which appears so is so, or is it all flashes and specks?
Men and women crowding fast in the streets, if they are not flashes and specks, what are they?
The streets themselves and the façades of houses, and goods in the windows,
Vehicles, teams, the heavy-plank'd wharves, the huge crossing at the ferries,
The village on the highland seen from afar at sunset, the river between,
Shadows, aureola and mist, the light falling on roofs and gables of white or brown two miles off,
The schooner near by sleepily dropping down the tide, the little boat slack-tow'd astern,
The hurrying tumbling waves, quick-broken crests, slapping,
The strata of color'd clouds, the long bar of maroon-tint away solitary by itself, the spread of purity it lies motionless in,
The horizon's edge, the flying sea-crow, the fragrance of salt marsh and shore mud,
These became part of that child who then went forth every day, and who now goes, and will always go forth every day.

THE CITY DEAD-HOUSE

This poem was added to *Leaves of Grass* in 1867. In 1881 it was made part of the "Autumn Rivulets" section.

By the city dead-house by the gate,
As idly sauntering wending my way from the clangor,
I curious pause, for lo! an outcast form, a poor dead prostitute brought,
Her corpse they deposit unclaim'd, it lies on the damp brick pavement,
The divine woman, her body, I see the body, I look on it alone,
That house once full of passion and beauty, all else I notice not,
Nor stillness so cold, nor running water from faucet, nor odors morbific impress me,
But the house alone—that wondrous house—that delicate fair house—that ruin!
That immortal house more than all the rows of dwellings ever built!
Or white-domed capitol with majestic figure surmounted, or all the old high-spired cathedrals,
That little house alone, more than them all—poor, desperate house;
Fair, fearful wreck—tenement of a soul—itself a soul,
Unclaim'd, avoided house—take one breath from my tremulous lips,

37. **sea-crow**—Eight or nine varieties of birds are popularly known as sea crows. Whitman probably has reference to the pewit gull. 4. **pavement**—that is, the brick platform on which corpses were exposed for identification. Cold water (see line 7) was kept running over them for preservation.

Take one tear, dropt aside as I go, for thought of you,
Dead house of love—house of madness and sin, crumbled, crush'd,
House of life, erewhile talking and laughing—but ah, poor house, dead even then,
Months, years, an echoing, garnish'd house—but dead, dead, dead.

PASSAGE TO INDIA

"Passage to India" first appeared in the pamphlet by that title in 1871 (copyright 1870), and was originally divided into 13 sections and 41 verse paragraphs. This pamphlet was bound in with the 1871 *Leaves* as an "annex" by the same title. In 1876 the whole "Passage to India" section appeared in the *Two Rivulets* volume. The present form of the poem dates from the 1881 edition.

In 1869 the tracks of the Union Pacific, extending westward from Omaha, were joined to the tracks of the Central Pacific, extending eastward from San Francisco. Because of the anxiety over the isolation of the Pacific Coast during the Civil War, this linking of the continent by the first transcontinental railway system was a national event of major importance. The reader of the poem will soon discover, however, that the facilitating of the passage to India becomes for Whitman a symbol of human progress towards richer and more golden futures.

1

Singing my days,
Singing the great achievements of the present,
Singing the strong light works of engineers,
Our modern wonders, (the antique ponderous Seven outvied,)
In the Old World the east the Suez canal,
The New by its mighty railroad spann'd,
The seas inlaid with eloquent gentle wires;
Yet first to sound, and ever sound, the cry with thee O soul,
The Past! the Past! the Past!

The Past—the dark unfathom'd retrospect!
The teeming gulf—the sleepers and the shadows!
The past—the infinite greatness of the past!
For what is the present after all but a growth out of the past?
(As a projectile form'd, impell'd, passing a certain line, still keeps on,
So the present, utterly form'd, impell'd by the past.)

2

Passage O soul to India!
Eclaircise the myths Asiatic, the primitive fables.

Not you alone proud truths of the world,
Nor you alone ye facts of modern science,
But myths and fables of eld, Asia's, Africa's fables,
The far-darting beams of the spirit, the unloos'd dreams,
The deep diving bibles and legends,

4. Seven—the Seven Wonders of the World. See any handbook of classical allusions. **5. Suez canal**—completed in 1869. **7. seas . . . wires**—The first wholly successful transatlantic cable was laid in 1866. **17. Eclaircise**—a Whitmanesque coinage from the French: make clear.

The daring plots of the poets, the elder religions;
O you temples fairer than lilies pour'd over by the rising sun!
O you fables spurning the known, eluding the hold of the known, mounting to heaven!
You lofty and dazzling towers, pinnacled, red as roses, burnish'd with gold!
Towers of fables immortal fashion'd from mortal dreams!
You too I welcome and fully the same as the rest!
You too with joy I sing.

Passage to India!
Lo, soul, seest thou not God's purpose from the first?
The earth to be spann'd, connected by network,
The races, neighbors, to marry and be given in marriage,
The oceans to be cross'd, the distant brought near,
The lands to be welded together.

A worship new I sing,
You captains, voyagers, explorers, yours,
You engineers, you architects, machinists, yours,
You, not for trade or transportation only,
But in God's name, and for thy sake O soul.

3

Passage to India!
Lo soul for thee of tableaus twain,
I see in one the Suez canal initiated, open'd,
I see the procession of steamships, the Empress Eugenie's leading the van,
I mark from on deck the strange landscape, the pure sky, the level sand in the distance,
I pass swiftly the picturesque groups, the workmen gather'd,
The gigantic dredging machines.

In one again, different, (yet thine, all thine, O soul, the same,)
I see over my own continent the Pacific railroad surmounting every barrier,
I see continual trains of cars winding along the Platte carrying freight and passengers,
I hear the locomotives rushing and roaring, and the shrill steam-whistle,
I hear the echoes reverberate through the grandest scenery in the world,
I cross the Laramie plains, I note the rocks in grotesque shapes, the buttes,
I see the plentiful larkspur and wild onions, the barren, colorless sage-deserts,
I see in glimpses afar or towering immediately above me the great mountains, I see the Wind river and the Wahsatch mountains,

42. tableaus twain—the imaginative pictures of the Suez Canal and of the Pacific railroad, which make up this section of the poem. **43-44. I see . . . Eugenie**—When the Suez Canal was opened for traffic, Nov. 17-20, 1869, a fleet of 68 vessels streamed through, headed by the S.S. *Aigle,* with the Empress Eugénie of France on board. **46. picturesque groups**—Construction of the canal had been interrupted by a quarrel over the employment of native laborers, and the problem was in the public mind. Breaking the original contract (which required the employment of native labor) permitted the use of modern machinery. **49-60. I see . . . meadows**—In imagination Whitman traverses the route of the new railroad to the Pacific, going up the Platte River (Nebraska), across the plains of eastern Wyoming, through the Wasatch Mountains of Utah, past the Great Salt Lake, through the Humboldt range in Nevada, past Lake Tahoe (between Nevada and California), and down the slopes of the Sierra Nevada into the great valley of California.

I see the Monument mountain and the Eagle's Nest, I pass the Promontory, I ascend the Nevadas,
I scan the noble Elk mountain and wind around its base,
I see the Humboldt range, I thread the valley and cross the river,
I see the clear waters of lake Tahoe, I see forests of majestic pines,
Or crossing the great desert, the alkaline plains, I behold enchanting mirages of waters and meadows,
Marking through these and after all, in duplicate slender lines,
Bridging the three or four thousand miles of land travel,
Tying the Eastern to the Western sea,
The road between Europe and Asia.

(Ah Genoese thy dream! thy dream!
Centuries after thou art laid in thy grave,
The shore thou foundest verifies thy dream.)

4

Passage to India!
Struggles of many a captain, tales of many a sailor dead,
Over my mood stealing and spreading they come,
Like clouds and cloudlets in the unreach'd sky.

Along all history, down the slopes,
As a rivulet running, sinking now, and now again to the surface rising,
A ceaseless thought, a varied train—lo, soul, to thee, thy sight, they rise,
The plans, the voyages again, the expeditions;
Again Vasco de Gama sails forth,
Again the knowledge gain'd, the mariner's compass,
Lands found and nations born, thou born America,
For purpose vast, man's long probation fill'd,
Thou rondure of the world at last accomplish'd.

5

O vast Rondure, swimming in space,
Cover'd all over with visible power and beauty,
Alternate light and day and the teeming spiritual darkness,
Unspeakable high processions of sun and moon and countless stars above,
Below, the manifold grass and waters, animals, mountains, trees,
With inscrutable purpose, some hidden prophetic intention,
Now first it seems my thought begins to span thee.

Down from the gardens of Asia descending radiating,
Adam and Eve appear, then their myriad progeny after them,
Wandering, yearning, curious, with restless explorations,
With questionings, baffled, formless, feverish, with never-happy hearts,
With that sad incessant refrain, *Wherefore unsatisfied soul?* and *Whither O mocking life?*

65. Genoese—Columbus. **76. Vasco de Gama**—Vasco da Gama (1469?-1524) in 1497-99 sailed around Africa to India and returned to Portugal. **81. Rondure**—the earth. **88. gardens of Asia**—the Garden of Eden.

Ah who shall soothe these feverish children?
Who justify these restless explorations?
Who speak the secret of impassive earth?
Who bind it to us? what is this separate Nature so unnatural?
What is this earth to our affections? (unloving earth, without a throb to answer ours,
Cold earth, the place of graves.)

Yet soul be sure the first intent remains, and shall be carried out,
Perhaps even now the time has arrived.
After the seas are all cross'd, (as they seem already cross'd,)

After the great captains and engineers have accomplish'd their work,
After the noble inventors, after the scientists, the chemist, the geologist, ethnologist,
Finally shall come the poet worthy that name,
The true son of God shall come singing his songs.

Then not your deeds only O voyagers, O scientists and inventors, shall be justified,
All these hearts as of fretted children shall be sooth'd,
All affection shall be fully responded to, the secret shall be told,
All these separations and gaps shall be taken up and hook'd and link'd together,
The whole earth, this cold, impassive, voiceless earth, shall be completely justified,
Trinitas divine shall be gloriously accomplish'd and compacted by the true son of God, the poet,
(He shall indeed pass the straits and conquer the mountains,
He shall double the cape of Good Hope to some purpose,)
Nature and Man shall be disjoin'd and diffused no more,
The true son of God shall absolutely fuse them.

6

Year at whose wide-flung door I sing!
Year of the purpose accomplish'd!
Year of the marriage of continents, climates and oceans!
(No mere doge of Venice now wedding the Adriatic,)
I see O year in you the vast terraqueous globe given and giving all,
Europe to Asia, Africa join'd, and they to the New World,
The lands, geographies, dancing before you, holding a festival garland,
As brides and bridegrooms hand in hand.

Passage to India!
Cooling airs from Caucasus far, soothing cradle of man,
The river Euphrates flowing, the past lit up again.

Lo, soul, the retrospect brought forward,
The old, most populous, wealthiest of earth's lands,
The streams of the Indus and the Ganges and their many affluents,
(I my shores of America walking to-day behold, resuming all,)
The tale of Alexander on his warlike marches suddenly dying,

111. **Trinitas**—Trinity. 119. **doge . . . Adriatic**—While Venice was an independent state, it was the custom for the Doge, in the state barge, annually to throw a gold ring into the Adriatic as a token of the wedding of Venice to the element which had enriched the state. 125. **Caucasus**—Anthropological theory, when this poem was written, held that the Caucasus region was probably the original home of man. 131. **Alexander**—Alexander the Great invaded India, dying 323 B.C. during his return march.

On one side China and on the other side Persia and Arabia,
To the south the great seas and the bay of Bengal,
The flowing literatures, tremendous epics, religions, castes,
Old occult Brahma interminably far back, the tender and junior Buddha,
Central and southern empires and all their belongings, possessors,
The wars of Tamerlane, the reign of Aurungzebe,
The traders, rulers, explorers, Moslems, Venetians, Byzantium, the Arabs, Portuguese,
The first travelers famous yet, Marco Polo, Batouta the Moor,
Doubts to be solv'd, the map incognita, blanks to be fill'd,
The foot of man unstay'd, the hands never at rest,
Thyself O soul that will not brook a challenge.

The mediaeval navigators rise before me,
The world of 1492, with its awaken'd enterprise,
Something swelling in humanity now like the sap of the earth in spring,
The sunset splendor of chivalry declining.

And who art thou sad shade?
Gigantic, visionary, thyself a visionary,
With majestic limbs and pious beaming eyes,
Spreading around with every look of thine a golden world,
Enhuing it with gorgeous hues.

As the chief histrion,
Down to the footlights walks in some great scene,
Dominating the rest I see the Admiral himself,
(History's type of courage, action, faith,)
Behold him sail from Palos leading his little fleet,
His voyage behold, his return, his great fame,
His misfortunes, calumniators, behold him a prisoner, chain'd,
Behold his dejection, poverty, death.

(Curious in time I stand, noting the efforts of heroes,
Is the deferment long? bitter the slander, poverty, death?
Lies the seed unreck'd for centuries in the ground? lo, to God's due occasion,
Uprising in the night, it sprouts, blooms,
And fills the earth with use and beauty.)

7

Passage indeed O soul to primal thought,
Not lands and seas alone, thy own clear freshness,
The young maturity of brood and bloom,
To realms of budding bibles.

135. Brahma . . . Buddha—The religion associated with Brahma greatly antedates that of Buddha (Gautama), who flourished about 500 B.C. **137. Tamerlane**—the great Asiatic conqueror Tamerlane (1336-1405). **137. Aurungzebe**—Aurung-Zebe (1619-1707), the last great emperor of Hindustan. **138. Moslems . . .** —Whitman's list comprises nations and peoples especially associated with Oriental trade and conquest. **139. Marco Polo**—(1254-1324) the famous traveler, who visited the Emperor of Cathay. **139. Batouta**—Muhammed ibn Abd Allah, called Ibn Batutah (1303-1377), whose travels in Asia and Africa were translated into English by Samuel Lee in 1829. **152. histrion**—actor; in this instance, Columbus, the **Admiral** of line 154. **156. Palos**—Columbus sailed from the little Spanish seaport in question.

O soul, repressless, I with thee and thou with me,
Thy circumnavigation of the world begin,
Of man, the voyage of his mind's return,
To reason's early paradise,
Back, back to wisdom's birth, to innocent intuitions,
Again with fair creation.

8

O we can wait no longer,
We too take ship O soul,
Joyous we too launch out on trackless seas,
Fearless for unknown shores on waves of ecstasy to sail,
Amid the wafting winds, (thou pressing me to thee, I thee to me, O soul,)
Caroling free, singing our song of God,
Chanting our chant of pleasant exploration.

With laugh and many a kiss,
(Let others deprecate, let others weep for sin, remorse, humiliation,)
O soul thou pleasest me, I thee.

Ah more than any priest O soul we too believe in God,
But with the mystery of God we dare not dally.

O soul thou pleasest me, I thee,
Sailing these seas or on the hills, or waking in the night,
Thoughts, silent thoughts, of Time and Space and Death, like waters flowing,
Bear me indeed as through the regions infinite,
Whose air I breathe, whose ripples hear, lave me all over,
Bathe me O God in thee, mounting to thee,
I and my soul to range in range of thee.

O Thou transcendent,
Nameless, the fibre and the breath,
Light of the light, shedding forth universes, thou centre of them,
Thou mightier centre of the true, the good, the loving,
Thou moral, spiritual fountain—affection's source—thou reservoir,
(O pensive soul of me—O thirst unsatisfied—waitest not there,
Waitest not haply for us somewhere there the Comrade perfect?)
Thou pulse—thou motive of the stars, suns, systems,
That, circling, move in order, safe, harmonious,
Athwart the shapeless vastnesses of space,
How should I think, how breathe a single breath, how speak, if, out of myself,
I could not launch, to those, superior universes?

Swiftly I shrivel at the thought of God,
At Nature and its wonders, Time and Space and Death,
But that I, turning, call to thee O soul, thou actual Me,
And lo, thou gently masterest the orbs,
Thou matest Time, smilest content at Death,
And fillest, swellest full the vastness of Space.

200. Waitest—Whitman's punctuation obscures the sense: Thou, the Comrade perfect, waitest haply for us somewhere there.

Greater than stars or suns,
Bounding O soul thou journeyest forth;
What love than thine and ours could wider amplify?
What aspirations, wishes, outvie thine and ours O soul?
What dreams of the ideal? what plans of purity, perfection, strength,
What cheerful willingness for others' sake to give up all?
For others' sake to suffer all?

Reckoning ahead O soul, when thou, the time achiev'd,
The seas all cross'd, weather'd the capes, the voyage done,
Surrounded, copest, frontest God, yieldest, the aim attain'd,
As filled with friendship, love complete, the Elder Brother found,
The Younger melts in fondness in his arms.

9

Passage to more than India!
Are thy wings plumed indeed for such far flights?
O soul, voyagest thou indeed on voyages like those?
Disportest thou on waters such as those?
Soundest below the Sanscrit and the Vedas?
Then have thy bent unleash'd.

Passage to you, your shores, ye aged fierce enigmas!
Passage to you, to mastership of you, ye strangling problems!
You, strew'd with the wrecks of skeletons, that, living, never reach'd you.

Passage to more than India!
O secret to the earth and sky!
Of you O waters of the sea! O winding creeks and rivers!
Of you O woods and fields! of you strong mountains of my land!
Of you O prairies! of you gray rocks!
O morning red! O clouds! O rains and snows!
O day and night, passage to you!

O sun and moon and all you stars! Sirius and Jupiter!
Passage to you!

Passage, immediate passage! the blood burns in my veins!
Away O soul! hoist instantly the anchor!
Cut the hawsers—haul out—shake out every sail!
Have we not stood here like trees in the ground long enough?
Have we not grovel'd here long enough, eating and drinking like mere brutes?
Have we not darken'd and dazed ourselves with books long enough?

Sail forth—steer for the deep waters only,
Reckless O soul, exploring, I with thee, and thou with me,
For we are bound where mariner has not yet dared to go,
And we will risk the ship, ourselves and all.

228. Sanscrit—the ancient language of the Hindus, in which the Vedas, or holy books, are written.

O my brave soul!
O farther farther sail!
O daring joy, but safe! are they not all the seas of God?
O farther, farther, farther sail!

THE LAST INVOCATION

This poem first appears in the *Passage to India* pamphlet, in three numbered sections; was united with the contents of that pamphlet to the 1871 *Leaves;* reappeared in the "Passage to India" part of *Two Rivulets;* and finally came to rest in the "Whispers of Heavenly Death" section of the *Leaves* of 1881.

At the last, tenderly,
From the walls of the powerful fortress'd house,
From the clasp of the knitted locks, from the keep of the well-closed doors,
Let me be wafted.

Let me glide noiselessly forth;
With the key of softness unlock the locks—with a whisper,
Set ope the doors O soul.

Tenderly—be not impatient,
(Strong is your hold O mortal flesh,
Strong is your hold O love.)

TO A LOCOMOTIVE IN WINTER

This poem first appeared in the "Poems" section of *Two Rivulets* and in 1881 was transferred to "From Noon to Starry Night" in the *Leaves*. The student should look up a picture of the locomotive of the seventies; a picture will explain such phrases as "Thy great protruding head-light."

Thee for my recitative,
Thee in the driving storm even as now, the snow, the winter-day declining,
Thee in thy panoply, thy measur'd dual throbbing and thy beat convulsive,
Thy black cylindric body, golden brass and silvery steel,
Thy ponderous side-bars, parallel and connecting rods, gyrating, shuttling at thy sides,
Thy metrical, now swelling pant and roar, now tapering in the distance,
Thy great protruding head-light fix'd in front,
Thy long, pale, floating vapor-pennants, tinged with delicate purple,
The dense and murky clouds out-belching from thy smoke-stack,
Thy knitted frame, thy springs and valves, the tremulous twinkle of thy wheels,
Thy train of cars behind, obedient, merrily following,
Through gale or calm, now swift, now slack, yet steadily careering:
Type of the modern—emblem of motion and power—pulse of the continent,
For once come serve the Muse and merge in verse, even as here I see thee,
With storm, and buffeting gusts of wind and falling snow,
By day thy warning ringing bell to sound its notes,
By night thy silent signal lamps to swing.

Fierce-throated beauty!
Roll through my chant with all thy lawless music, thy swinging lamps at night,
Thy madly-whistled laughter, echoing, rumbling like an earthquake, rousing all,
Law of thyself complete, thine own track firmly holding,
(No sweetness debonair of tearful harp or glib piano thine,)
Thy trills of shrieks by rocks and hills return'd,
Launch'd o'er the prairies wide, across the lakes,
To the free skies, unpent and glad and strong.

THE MYSTIC TRUMPETER

This poem first appeared in *As a Strong Bird on Pinions Free* in 1872. In 1876 it appeared in the *Two Rivulets* volume. In 1881 it was made part of "From Noon to Starry Night" in the *Leaves*.

1

Hark, some wild trumpeter, some strange musician,
Hovering unseen in air, vibrates capricious tunes tonight.

I hear thee trumpeter, listening alert I catch thy notes,
Now pouring, whirling like a tempest round me,
Now low, subdued, now in the distance lost.

2

Come nearer bodiless one, haply in thee resounds
Some dead composer, haply thy pensive life
Was fill'd with aspirations high, unform'd ideals,
Waves, oceans musical, chaotically surging,
That now ecstatic ghost, close to me bending, thy cornet echoing, pealing,
Gives out to no one's ears but mine, but freely gives to mine,
That I may thee translate.

3

Blow trumpeter free and clear, I follow thee,
While at thy liquid prelude, glad, serene,
The fretting world, the streets, the noisy hours of day withdraw
A holy calm descends like dew upon me,
I walk in cool refreshing night the walks of Paradise,
I scent the grass, the moist air and the roses;
Thy song expands my numb'd imbonded spirit, thou freest, launchest me,
Floating and basking upon heaven's lake.

4

Blow again trumpeter! and for my sensuous eyes,
Bring the old pageants, show the feudal world.

What charm thy music works! thou makest pass before me,
Ladies and cavaliers long dead, barons are in their castle halls, the troubadours are singing,

Arm'd knights go forth to redress wrongs, some in quest of the holy Graal;
I see the tournament, I see the contestants incased in heavy armor seated on stately
champing horses,
I hear the shouts, the sounds of blows and smiting steel;
I see the Crusaders' tumultuous armies—hark, how the cymbals clang,
Lo, where the monks walk in advance, bearing the cross on high.

5

Blow again trumpeter! and for thy theme,
Take now the enclosing theme of all, the solvent and the setting,
Love, that is pulse of all, the sustenance and the pang,
The heart of man and woman all for love,
No other theme but love—knitting, enclosing, all-diffusing love.

O how the immortal phantoms crowd around me!
I see the vast alembic ever working, I see and know the flames that heat the world,
The glow, the blush, the beating hearts of lovers,
So blissful happy some, and some so silent, dark, and nigh to death;
Love, that is all the earth to lovers—love, that mocks time and space,
Love, that is day and night—love, that is sun and moon and stars,
Love, that is crimson, sumptuous, sick with perfume,
No other words but words of love, no other thought but love.

6

Blow again trumpeter—conjure war's alarums.

Swift to thy spell a shuddering hum like distant thunder rolls,
Lo, where the arm'd men hasten—lo, mid the clouds of dust the glint of bayonets,
I see the grime-faced cannoneers, I mark the rosy flash amid the smoke, I hear the
cracking of the guns;
Nor war alone—thy fearful music-song, wild player, brings every sight of fear,
The deeds of ruthless brigands, rapine, murder—I hear the cries for help!
I see ships foundering at sea, I behold on deck and below deck the terrible tableaus.

7

O trumpeter, methinks I am myself the instrument thou playest,
Thou melt'st my heart, my brain—thou movest, drawest, changest them at will;
And now thy sullen notes send darkness through me,
Thou takest away all cheering light, all hope,
I see the enslaved, the overthrown, the hurt, the opprest of the whole earth,
I feel the measureless shame and humiliation of my race, it becomes all mine,
Mine too the revenges of humanity, the wrongs of ages, baffled feuds and hatreds,
Utter defeat upon me weighs—all lost—the foe victorious,
(Yet 'mid the ruins Pride colossal stands unshaken to the last,
Endurance, resolution to the last.)

8

Now trumpeter for thy close,
Vouchsafe a higher strain than any yet,
Sing to my soul, renew its languishing faith and hope,

Rouse up my slow belief, give me some vision of the future,
Give me for once its prophecy and joy.

O glad, exulting, culminating song!
A vigor more than earth's is in thy notes,
Marches of victory—man disenthrall'd—the conqueror at last,
Hymns to the universal God from universal man—all joy!
A reborn race appears—a perfect world, all joy!
Women and men in wisdom innocence and health—all joy!
Riotous laughing bacchanals fill'd with joy!
War, sorrow, suffering gone—the rank earth purged—nothing but joy left!
The ocean fill'd with joy—the atmosphere all joy!
Joy! joy! in freedom, worship, love! joy in the ecstasy of life!
Enough to merely be! enough to breathe!
Joy! joy! all over joy!

SPIRIT THAT FORM'D THIS SCENE

Written in Platte Cañon, Colorado

This poem was published in the *Critic,* September 10, 1881, and afterwards included in the "From Noon to Starry Night" section of the 1881 *Leaves.* Whitman visited Colorado in the autumn of 1879.

Spirit that form'd this scene,
These tumbled rock-piles grim and red,
These reckless heaven-ambitious peaks,
These gorges, turbulent-clear streams, this naked freshness,
These formless wild arrays, for reasons of their own,
I know thee, savage spirit—we have communed together,
Mine too such wild arrays, for reasons of their own;
Was't charged against my chants they had forgotten art?
To fuse within themselves its rules precise and delicatesse?
The lyrist's measur'd beat, the wrought-out temple's grace—column and polish'd arch forgot?
But thou that revelest here—spirit that form'd this scene,
They have remember'd thee.

YEARS OF THE MODERN

As "Years of the Unperform'd" this poem originally formed part of *Drum-Taps,* and was united with that section to the *Leaves* of 1867. In 1871 it became part of "Songs of Parting" and took its present title. The present text dates from 1881.

Years of the modern! years of the unperform'd!
Your horizon rises, I see it parting away for more august dramas,
I see not America only, not only Liberty's nation but other nations preparing,
I see tremendous entrances and exits, new combinations, the solidarity of races,

9. **delicatesse**—Whitmanesque for "false delicacy."

I see that force advancing with irresistible power on the world's stage,
(Have the old forces, the old wars, played their parts? are the acts suitable to them closed?)
I see Freedom, completely arm'd and victorious and very haughty, with Law on one side and Peace on the other,
A stupendous trio all issuing forth against the idea of caste;
What historic denouements are these we so rapidly approach?
I see men marching and countermarching by swift millions,
I see the frontiers and boundaries of the old aristocracies broken,
I see the landmarks of European kings removed,
I see this day the People beginning their landmarks, (all others give way;)
Never were such sharp questions ask'd as this day,
Never was average man, his soul, more energetic, more like a God,
Lo, how he urges and urges, leaving the masses no rest!
His daring foot is on land and sea everywhere, he colonizes the Pacific, the archipelagoes,
With the steamship, the electric telegraph, the newspaper, the wholesale engines of war,
With these and the world-spreading factories he interlinks all geography, all lands;
What whispers are these O lands, running ahead of you, passing under the seas?
Are all nations communing? is there going to be but one heart to the globe?
Is humanity forming en-masse? for lo, tyrants tremble, crowns grow dim,
The earth, restive, confronts a new era, perhaps a general divine war,
No one knows what will happen next, such portents fill the days and nights;
Years prophetical! the space ahead as I walk, as I vainly try to pierce it, is full of phantoms,
Unborn deeds, things soon to be, project their shapes around me,
This incredible rush and heat, this strange ecstatic fever of dreams O years!
Your dreams O years, how they penetrate through me! (I know not whether I sleep or wake;)
The perform'd America and Europe grow dim, retiring in shadow behind me,
The unperform'd, more gigantic than ever, advance, advance upon me.

THE CALMING THOUGHT OF ALL

This poem first appears in the "Sands at Seventy" annex to the *Complete Poems and Prose* of 1888 (1888-89).

That coursing on, whate'er men's speculations,
Amid the changing schools, theologies, philosophies,
Amid the bawling presentations new and old,
The round earth's silent vital laws, facts, modes continue.

GOOD-BYE, MY FANCY!

From *Good-Bye My Fancy* (1891), which became an "annex" to the *Leaves.*

Good-bye my Fancy!
Farewell dear mate, dear love!

I'm going away, I know not where,
Or to what fortune, or whether I may ever see you again,
So Good-bye my Fancy.
Now for my last—let me look back a moment;
The slower fainter ticking of the clock is in me,
Exit, nightfall, and soon the heart-thud stopping.

Long have we lived, joy'd caress'd together;
Delightful!—now separation—Good-bye my Fancy.

Yet let me not be too hasty,
Long indeed have we lived, slept, filter'd, become really blended into one;
Then if we die we die together, (yes, we'll remain one,)
If we go anywhere we'll go together to meet what happens,
May-be we'll be better off and blither, and learn something,
May-be it is yourself now ushering me to the true songs, (who knows?)
May-be it is you the mortal knob really undoing, turning—so now finally,
Good-bye—and hail! my Fancy.

DEMOCRATIC VISTAS

Democratic Vistas originally appeared in 1871 as a pamphlet of 84 pages entitled *Memoranda. Democratic Vistas.* This was printed in Washington. It was collected into the *Two Rivulets* volume of 1876, and thereafter formed part of the collected prose, assuming the classificatory title of "Collect." The first paragraph printed in the text does not appear in 1871; it was added by the time of the appearance of the essay in *Complete Poetry and Prose* (1888).

Minor variations of spelling and punctuation between the 1871 text and the final version are not noted here, but all changes affecting the sense materially are noted by the symbol (1871). Generally speaking, Whitman spelled the past tense of verbs ending in "ed" regularly in 1871, and omitted the "e" in later versions. Complete appreciation of the essay demands that the political corruption of the Grant administrations be kept in mind.

As THE greatest lessons of Nature through the universe are perhaps the lessons of variety and freedom, the same present the greatest lessons also in New World politics and progress. If a man were ask'd, for instance, the distinctive points contrasting modern European and American political and other life with the old Asiatic cultus, as lingering-bequeath'd yet in China and Turkey, he might find the amount of them in John Stuart Mill's profound essay on Liberty in the future, where he demands two main constituents, or sub-strata, for a truly grand nationality—1st, a large variety of character—and 2d, full play for human nature to expand itself in numberless and even conflicting directions—(seems to be for general humanity much like the influences that make up, in their limitless field, that perennial health-action of the air we call the weather—an infinite number of currents and forces, and contributions, and temperatures, and cross-purposes, whose ceaseless play of

5. **cultus**—culture in the broadest sense. 6-7. **Mill's . . . Liberty**—John Stuart Mill (1806-1873) published *On Liberty* in 1859.

counterpart upon counterpart brings constant restoration and vitality). With this thought—and not for itself alone, but all it necessitates, and draws after it—let me begin my speculations.

America, filling the present with greatest deeds and problems, cheerfully accepting the past, including feudalism (as, indeed, the present is but the legitimate birth of the past, including feudalism), counts, as I reckon, for her justification and success (for who, as yet, dare claim success?) almost entirely on the future. Nor is that hope unwarranted. To-day, ahead, though dimly yet, we see, in vistas, a copious, sane, gigantic offspring. For our New World I consider far less important for what it has done, or what it is, than for results to come. Sole among nationalities, these States have assumed the task to put in forms of lasting power and practicality, on areas of amplitude rivaling the operations of the physical kosmos, the moral political speculations of ages, long, long deferr'd, the democratic republican principle, and the theory of development and perfection by voluntary standards, and self-reliance. Who else, indeed, except the United States, in history, so far, have accepted in unwitting faith, and, as we now see, stand, act upon, and go security for, these things?

But preluding no longer, let me strike the key-note of the following strain. First premising that, though the passages of it have been written at widely different times (it is, in fact, a collection of memoranda, perhaps for future designers, comprehenders), and though it may be open to the charge of one part contradicting another—for there are opposite sides to the great question of democracy, as to every great question—I feel the parts harmoniously blended in my own realization and convictions, and present them to be read only in such oneness, each page and each claim and assertion modified and temper'd by the others. Bear in mind, too, that they are not the result of studying up in political economy, but of the ordinary sense, observing, wandering among men, these States, these stirring years of war and peace. I will not gloss over the appaling dangers of universal suffrage in the United States. In fact, it is to admit and face these dangers I am writing. To him or her within whose thought rages the battle, advancing, retreating, between democracy's convictions, aspirations, and the people's crudeness, vice, caprices, I mainly write this essay. I shall use the words America and democracy as convertible terms. Not an ordinary one is the issue. The United States are destined either to surmount the gorgeous history of feudalism, or else prove the most tremendous failure of time. Not the least doubtful am I on any prospects of their material success. The triumphant future of their business, geographic and productive departments, on larger scales and in more varieties than ever, is certain. In those respects the republic must soon (if she does not already) outstrip all examples hitherto afforded, and dominate the world. . . .

[In eleven omitted paragraphs Whitman reiterates his favorite belief that the production of a great literature is the highest problem before the United States, justifying his argument from the

13. **moral political**—"moral and political" (1871). 15. **self-reliance**—"self-suppliance" (1871). 18. **preluding no longer**—omitted in 1871. 25. **and each . . . assertion**—omitted in 1871. 33. **I shall use**—New paragraph in 1871. 38. **certain**—Whitman here appends a quotation from a speech by Vice President Colfax in 1870, and another quotation from the London *Weekly Times* (June 23, 1882) on the rapid growth in wealth of the United States.

examples of past civilizations, and declaring that the soul of man in America will be satisfied with nothing less. To the problem of spiritual values thus raised "the thinkers of the United States, in general so acute, have either given feeblest attention, or have remain'd, and remain, in a state of somnolence." At this point the text resumes.]

For my part, I would alarm and caution even the political and business reader, and to the utmost extent, against the prevailing delusion that the establishment of free political institutions, and plentiful intellectual smartness, with general good order, physical plenty, industry, &c. (desirable and precious advantages as they all are), do, of themselves, determine and yield to our experiment of democracy the fruitage of success. With such advantages at present fully, or almost fully, possess'd—the Union just issued, victorious, from the struggle with the only foes it need ever fear, (namely, those within itself, the interior ones), and with unprecedented materialistic advancement—society, in these States, is canker'd, crude, superstitious, and rotten. Political, or law-made society is, and private, or voluntary society, is also. In any vigor, the element of the moral conscience, the most important, the verteber to State or man, seems to me either entirely lacking, or seriously enfeebled or ungrown.

I say we had best look our times and lands searchingly in the face, like a physician diagnosing some deep disease. Never was there, perhaps, more hollowness at heart than at present, and here in the United States. Genuine belief seems to have left us. The underlying principles of the States are not honestly believ'd in, (for all this hectic glow, and these melo-dramatic screamings), nor is humanity itself believ'd in. What penetrating eye does not everywhere see through the mask? The spectacle is appaling. We live in an atmosphere of hypocrisy throughout. The men believe not in the women, nor the women in the men. A scornful superciliousness rules in literature. The aim of all the *littérateurs* is to find something to make fun of. A lot of churches, sects, &c., the most dismal phantasms I know, usurp the name of religion. Conversation is a mass of badinage. From deceit in the spirit, the mother of all false deeds, the offspring is already incalculable. An acute and candid person, in the revenue department in Washington, who is led by the course of his employment to regularly visit the cities, North, South and West, to investigate frauds, has talk'd much with me about his discoveries. The depravity of the business classes of our country is not less than has been supposed, but infinitely greater. The official services of America, national, state, and municipal, in all their branches and departments, except the judiciary, are saturated in corruption, bribery, falsehood, mal-administration; and the judiciary is tainted. The great cities reek with respectable as much as non-respectable robbery and scoundrelism. In fashionable life, flippancy, tepid amours, weak infidelism, small aims, or no aims at all, only to kill time. In business, (this all-devouring modern word, business), the one sole object is, by any means, pecuniary gain. The magician's serpent in the fable ate up all the other serpents; and money-making is our magician's serpent, remaining to-day sole master of the field. The best class we show, is but a mob of fashionably dress'd speculators and vulgarians.

12. **verteber**—"vertebrae" (1871). 31. **The official**—"The whole of the official" (1871). 38. **magician's serpent**—*Cf.* Ex. 7:9-12.

True, indeed, behind this fantastic farce, enacted on the visible stage of society, solid things and stupendous labors are to be discover'd, existing crudely and going on in the background, to advance and tell themselves in time. Yet the truths are none the less terrible. I say that our New World democracy, however great a success in uplifting the masses out of their sloughs, in materialistic development, products, and in a certain highly-deceptive superficial popular intellectuality, is, so far, an almost complete failure in its social aspects, and in really grand religious, moral, literary, and esthetic results. In vain do we march with unprecedented strides to empire so colossal, outvying the antique, beyond Alexander's, beyond the proudest sway of Rome. In vain have we annex'd Texas, California, Alaska, and reach north for Canada and south for Cuba. It is as if we were somehow being endow'd with a vast and more and more thoroughly-appointed body, and then left with little or no soul.

Let me illustrate further, as I write, with current observations, localities, &c. The subject is important, and will bear repetition. After an absence, I am now again (September, 1870) in New York City and Brooklyn, on a few weeks' vacation. The splendor, picturesqueness, and oceanic amplitude and rush of these great cities, the unsurpass'd situation, rivers and bay, sparkling sea-tides, costly and lofty new buildings, façades of marble and iron, of original grandeur and elegance of design, with the masses of gay color, the preponderance of white and blue, the flags flying, the endless ships, the tumultuous streets, Broadway, the heavy, low, musical roar, hardly ever intermitted, even at night; the jobbers' houses, the rich shops, the wharves, the great Central Park, and the Brooklyn Park of hills, (as I wander among them this beautiful fall weather, musing, watching, absorbing)—the assemblages of the citizens in their groups, conversations, trades, evening amusements, or along the by-quarters—these, I say, and the like of these, completely satisfy my senses of power, fulness, motion, &c., and give me, through such senses and appetites, and through my esthetic conscience, a continued exaltation and absolute fulfilment. Always and more and more, as I cross the East and North rivers, the ferries, or with the pilots in their pilot-houses, or pass an hour in Wall Street, or the gold exchange, I realize, (if we must admit such partialisms) that not Nature alone is great in her fields of freedom and the open air, in her storms, the shows of night and day, the mountains, forests, seas—but in the artificial, the work of man too is equally great—in this profusion of teeming humanity—in these ingenuities, streets, goods, houses, ships—these hurrying, feverish, electric crowds of men, their complicated business genius (not least among the genuises) and all this mighty, many-threaded wealth and industry concentrated here.

But sternly discarding, shutting our eyes to the glow and grandeur of the general superficial effect, coming down to what is of the only real importance, Personalities, and examining minutely, we question, we ask, Are there, indeed, *men* here worthy the name? Are there athletes? Are there perfect women, to match the generous material luxuriance? Is there a pervading atmosphere

10-11. **have we annex'd**—"do we annex" (1871). 19. **façades**—"the façades" (1871). 26. **trades**—"trade" (1871). 29. **conscience**—consciousness. 36. **hurrying**—"seething, hurrying" (1871). 36. **electric**—omitted in 1871. 40. **superficial**—omitted in 1871.

of beautiful manners? Are there crops of fine youths, and majestic old persons? Are there arts worthy freedom and a rich people? Is there a great moral and religious civilization—the only justification of a great material one? Confess that to severe eyes, using the moral microscope upon humanity, a sort of dry and flat Sahara appears, these cities, crowded with petty grotesques, malformations, phantoms, playing meaningless antics. Confess that everywhere, in shop, street, church, theatre, bar-room, official chair, are pervading flippancy and vulgarity, low cunning, infidelity—everywhere the youth puny, impudent, foppish, prematurely ripe—everywhere an abnormal libidinousness, unhealthy forms, male, female, painted, padded, dyed, chignon'd, muddy complexions, bad blood, the capacity for good motherhood deceasing or deceas'd, shallow notions of beauty, with a range of manners, or rather lack of manners, (considering the advantages enjoy'd), probably the meanest to be seen in the world.

Of all this, and these lamentable conditions, to breathe into them the breath recuperative of sane and heroic life, I say a new founded literature, not merely to copy and reflect existing surfaces, or pander to what is called taste—not only to amuse, pass away time, celebrate the beautiful, the refined, the past, or exhibit technical, rhythmic, or grammatical dexterity—but a literature underlying life, religious, consistent with science, handling the elements and forces with competent power, teaching and training men—and, as perhaps the most precious of its results, achieving the entire redemption of woman out of these incredible holds and webs of silliness, millinery, and every kind of dyspeptic depletion—and thus insuring to the States a strong and sweet Female Race, a race of perfect Mothers—is what is needed.

And now, in the full conception of these facts and points, and all that they infer, pro and con—with yet unshaken faith in the elements of the American masses, the composites, of both sexes, and even consider'd as individuals—and ever recognizing in them the broadest bases of the best literary and esthetic appreciation—I proceed with my speculations, Vistas.

First, let us see what we can make out of a brief, general, sentimental consideration of political democracy, and whence it has arisen, with regard to some of its current features, as an aggregate, and as the basic structure of our future literature and authorship. We shall, it is true, quickly and continually find the origin-idea of the singleness of man, individualism, asserting itself, and cropping forth, even from the opposite ideas. But the mass, or lump character, for imperative reasons, is to be ever carefully weigh'd, borne in mind,

3-4. **Confess**—New paragraph in 1871. 4. **that**—"that rather" (1871). 10. **chignon'd**—A chignon, fashionable in 1870, was a large mass of hair twisted around a pad and worn at the nape of the neck by the women. 13. **world**—"Of these rapidly-sketch'd hiatuses the two which seem to me most serious are, for one, the condition, absence, or perhaps the singular abeyance, of moral conscientious fibre all through American society; and, for another, the appaling depletion of women in their powers of sane athletic maternity, their crowning attribute, and ever making the woman, in loftiest spheres, superior to the man.

"I have sometimes thought, indeed, that the sole avenue and means of a reconstructed sociology depended, primarily, on a new birth, elevation, expansion, invigoration of woman, affording, for races to come, (as the conditions that antedate birth are indispensable), a perfect motherhood. Great, great, indeed, far greater than they know, is the sphere of women. But doubtless the question of such new sociology all goes together, includes many varied and complex influences and premises, and the man as well as the woman, and the woman as well as the man." (Whitman's note) 30. **sentimental**—elevated(?).

and provided for. Only from it, and from its proper regulation and potency, comes the other, comes the chance of individualism. The two are contradictory, but our task is to reconcile them.

The political history of the past may be summ'd up as having grown out of what underlies the words, order, safety, caste, and especially out of the need of some prompt deciding authority, and of cohesion at all cost. Leaping time, we come to the period within the memory of people now living, when, as from some lair where they had slumber'd long, accumulating wrath, sprang up and are yet active, (1790, and on even to the present, 1870), those noisy eructations, destructive iconoclasms, a fierce sense of wrongs, amid which moves the form, well known in modern history, in the Old World, stain'd with much blood, and mark'd by savage reactionary clamors and demands. These bear, mostly, as on one inclosing point of need.

For after the rest is said—after the many time-honor'd and really true things for subordination, experience, rights of property, &c., have been listen'd to and acquiesced in—after the valuable and well-settled statement of our duties and relations in society is thoroughly conn'd over and exhausted—it remains to bring forward and modify everything else with the idea of that Something a man is (last precious consolation of the drudging poor), standing apart from all else, divine in his own right, and a woman in hers, sole and untouchable by any canons of authority, or any rule derived from precedent, state-safety, the acts of legislatures, or even from what is called religion, modesty, or art. The radiation of this truth is the key of the most significant doings of our immediately preceding three centuries, and has been the political genesis and life of America. Advancing visibly, it still more advances invisibly. Underneath the fluctuations of the expressions of society, as well as the movements of the politics of the leading nations of the world, we see steadily pressing ahead and strengthening itself, even in the midst of immense tendencies toward aggregation, this image of completeness in separatism, of individual personal dignity, of a single person, either male or female, characterized in the main, not from extrinsic acquirements or position, but in the pride of himself or herself alone; and, as an eventual conclusion and summing up (or else the entire scheme of things is aimless, a cheat, a crash), the simple idea that the last, best dependence is to be upon humanity itself, and its own inherent, normal, full-grown qualities, without any superstitious support whatever. This idea of perfect individualism it is indeed that deepest tinges and gives character to the idea of the aggregate. For it is mainly or altogether to serve independent separatism that we favor a strong generalization, consolidation. As it is to give the best vitality and freedom to the rights of the States (every bit as important as the right of nationality, the union), that we insist on the identity of the Union at all hazards.

3. task—"The question hinted here is one which time only can answer. Must not the virtue of modern Individualism, continually enlarging, usurping all, seriously affect, perhaps keep down entirely, in America, the like of the ancient virtue of Patriotism, the fervid and absorbing love of general country? I have no doubt myself that the two will merge, and will mutually profit and brace each other, and that from them a greater product, a third, will arise. But I feel that at present they and their oppositions form a serious problem and paradox in the United States." (Whitman's note) **10. amid**—"and amid" (1871). **23. The radiation**—New paragraph in 1871.

The purpose of democracy—supplanting old belief in the necessary absoluteness of establish'd dynastic rulership, temporal, ecclesiastical, and scholastic, as furnishing the only security against chaos, crime, and ignorance—is, through many [illegible] and amid endless ridicules, arguments, and ostensible failures, to illustrate, at all hazards, this doctrine or theory that man, properly train'd in sanest, highest freedom, may and must become a law, and series of laws, unto himself, surrounding and providing for, not only his own personal control, but all his relations to other individuals, and to the State; and that, while other theories, as in the past histories of nations, have proved wise enough, and indispensable perhaps for their conditions, *this,* as matters now stand in our civilized world, is the only scheme worth working from, as warranting results like those of Nature's laws, reliable, when once establish'd, to carry on themselves. . . .

[In 34 succeeding paragraphs, here omitted, Whitman discusses democracy as a political concept, arguing that the failure of the Civil War to split the country is proof of the strength of democracy, that the future of democratic government lies in training individuals to rule themselves under fundamental laws, and declaring that a more nearly universal ownership of property is the "gravitation-hold" of political liberalism. With the din of the crudities of the election of 1868 in his ears, he yet looks forward confidently to the future success of the democratic experiment, believing that the growth of the western part of the country will increase the chances of the success of the great experiment. He experiences "the joy of being toss'd in the brave turmoil of these times," and says of the nation that "we have never deserted, never despair'd, never abandon'd the faith." Here the text resumes.]

So much contributed, to be conn'd well, to help prepare and brace our edifice, our plann'd Idea—we still proceed to give it in another of its aspects—perhaps the main, the high façade of all. For to democracy, the leveler, the unyielding principle of the average, is surely join'd another principle, equally unyielding, closely tracking the first, indispensable to it, opposite (as the sexes are opposite), and whose existence, confronting and ever modifying the other, often clashing, paradoxical, yet neither of highest avail without the other, plainly supplies to these grand cosmic politics of ours, and to the launch'd-forth mortal dangers of republicanism, to-day or any day, the counterpart and offset whereby Nature restrains the deadly original relentlessness of all her first-class laws. This second principle is individuality, the pride and centripetal isolation of a human being in himself—identity—personalism. Whatever the name, its acceptance and thorough infusion through the organizations of political commonalty now shooting Aurora-like about the world, are of utmost importance, as the principle itself is needed for very life's sake. It forms, in a sort, or is to form, the compensating balance-wheel of the successful working machinery of aggregate America.

And, if we think of it, what does civilization itself rest upon—and what object has it, with its religions, arts, schools, &c., but rich, luxuriant, varied personalism? To that, all bends; and it is because toward such result democracy alone, on anything like Nature's scale, breaks up the limitless fallows of humankind, and plants the seed, and gives fair play, that its claims now precede the rest. The literature, songs, esthetics, &c., of a country are of importance princi-

27. Aurora-like—in the sense of dawn-like (not aurora borealis!). **36. The literature**—New paragraph in 1871.

pally because they furnish the materials and suggestions of personality for the women and men of that country, and enforce them in a thousand effective ways. As the topmost claim of a strong consolidating of the nationality of these States, is, that only by such powerful compaction can the separate States secure that full and free swing within their spheres, which is becoming to them, each after its kind, so will individuality, with unimpeded branchings, flourish best under imperial republican forms.

Assuming Democracy to be at present in its embryo condition, and that the only large and satisfactory justification of it resides in the future, mainly through the copious production of perfect characters among the people, and through the advent of a sane and pervading religiousness, it is with regard to the atmosphere and spaciousness fit for such characters, and of certain nutriment and cartoon-draftings proper for them, and indicating them for New-World purposes, that I continue the present statement—an exploration, as of new ground, wherein, like other primitive surveyors, I must do the best I can, leaving it to those who come after me to do much better. (The service, in fact, if any, must be to break a sort of first path or track, no matter how rude and ungeometrical.)

We have frequently printed the word Democracy. Yet I cannot too often repeat that it is a word the real gist of which still sleeps, quite unawaken'd, notwithstanding the resonance and the many angry tempests out of which its syllables have come, from pen or tongue. It is a great word, whose history, I suppose, remains unwritten, because that history has yet to be enacted. It is, in some sort, younger brother of another great and often-used word, Nature, whose history also waits unwritten. As I perceive, the tendencies of our day, in the States, (and I entirely respect them), are toward those vast and sweeping movements, influences, moral and physical, of humanity, now and always current over the planet, on the scale of the impulses of the elements. Then it is also good to reduce the whole matter to the consideration of a single self, a man, a woman, on permanent grounds. Even for the

3. ways—"After the rest is satiated, all interest culminates in the field of persons, and never flags there. Accordingly in this field have the great poets and literatuses signally toil'd. They too, in all ages, all lands, have been creators, fashioning, making types of men and women, as Adam and Eve are made in the divine fable. Behold, shaped, bred by orientalism, feudalism, through their long growth and culmination, and breeding back in return—(when shall we have an equal series typical of democracy?)—behold, commencing in primal Asia, (apparently formulated, in what beginning we know, in the gods of the mythologies, and coming down thence,) a few samples out of the countless product, bequeath'd to the moderns, bequeath'd to America as studies. For the men, Yudishtura, Rama, Arjuna, Solomon, most of the Old and New Testament characters; Achilles, Ulysses, Theseus, Prometheus, Hercules, Aeneas, Plutarch's heroes; the Merlin of Celtic bards; the Cid, Arthur and his knights, Siegfried and Hagen in the Nibelungen, Roland and Oliver; Roustam in the Shah-Nemah; and so on to Milton's Satan, Cervantes' Don Quixote, Shakspere's Hamlet, Richard II., Lear, Marc Antony, &c., and the modern Faust. These, I say, are models, combined, adjusted to other standards than America's, but of priceless value to her and hers.

"Among women, the goddesses of the Egyptian, Indian and Greek mythologies, certain Bible characters, especially the Holy Mother; Cleopatra, Penelope; the portraits of Brunhelde and Chriemhilde in the Nibelungen; Oriana, Una, &c., the modern Consuelo, Walter Scott's Jeanie and Effie Deans, &c., &c. (Yet woman portray'd or outlin'd at her best, or as perfect human mother, does not hitherto, it seems to me, fully appear in literature.)" (Whitman's note) **3. As the**—New paragraph in 1871. **13. cartoon-draftings**—preliminary sketches. **15. primitive**—in the sense of exploratory. **25. As I**—New paragraph in 1871.

treatment of the universal, in politics, metaphysics, or anything, sooner or later we come down to one single, solitary soul.

There is, in sanest hours, a consciousness, a thought that rises, independent, lifted out from all else, calm, like the stars, shining eternal. This is the thought of identity—yours for you, whoever you are, as mine for me. Miracle of miracles, beyond statement, most spiritual and vaguest of earth's dreams, yet hardest basic fact, and only entrance to all facts. In such devout hours, in the midst of the significant wonders of heaven and earth (significant only because of the Me in the centre), creeds, conventions, fall away and become of no account before this simple idea. Under the luminousness of real vision, it alone takes possession, takes value. Like the shadowy dwarf in the fable, once liberated and look'd upon, it expands over the whole earth, and spreads to the roof of heaven.

The quality of BEING, in the object's self, according to its own central idea and purpose, and of growing therefrom and thereto—not criticism by other standards, and adjustments thereto—is the lesson of Nature. True, the full man wisely gathers, culls, absorbs; but if, engaged disproportionately in that, he slights or overlays the precious idiocrasy and special nativity and intention that he is, the man's self, the main thing, is a failure, however wide his general cultivation. Thus, in our times, refinement and delicatesse are not only attended to sufficiently, but threaten to eat us up, like a cancer. Already, the democratic genius watches, ill-pleased, these tendencies. Provision for a little healthy rudeness, savage virtue, justification of what one has in one's self, whatever it is, is demanded. Negative qualities, even deficiencies, would be a relief. Singleness and normal simplicity and separation, amid this more and more complex, more and more artificialized state of society—how pensively we yearn for them! how we would welcome their return!

In some such direction, then—at any rate enough to preserve the balance—we feel called upon to throw what weight we can, not for absolute reasons, but current ones. To prune, gather, trim, conform, and ever cram and stuff, and be genteel and proper, is the pressure of our days. While aware that much can be said even in behalf of all this, we perceive that we have not now to consider the question of what is demanded to serve a half-starved and barbarous nation, or set of nations, but what is most applicable, most pertinent, for numerous congeries of conventional, over-corpulent societies, already becoming stifled and rotten with flatulent, infidelistic literature, and polite conformity and art. In addition to establish'd sciences, we suggest a science as it were of healthy average personalism, on original-universal grounds, the object of which should be to raise up and supply through the States a copious race of superb American men and women, cheerful, religious, ahead of any yet known.

America has yet morally and artistically originated nothing. She seems singularly unaware that the models of persons, books, manners, &c., appropriate for former conditions and for European lands, are but exiles and exotics here.

11. **dwarf**—vague reference to the conventional episodes in certain stories of the Arabian Nights in which the genie, released from a bottle, is at first small, then swells to gigantic dimensions. 17. **idiocrasy**—idiosyncrasy, quality of being individual. 36. **In addition**—New paragraph in 1871. 41. **America . . . nothing**—"America, leaving out her politics, has yet morally originated nothing." (1871)

No current of her life, as shown on the surfaces of what is authoritatively called her society, accepts or runs into social or esthetic democracy; but all the currents set squarely against it. Never, in the Old World, was thoroughly upholster'd exterior appearance and show, mental and other, built entirely on the idea of caste, and on the sufficiency of mere outside acquisition—never were glibness, verbal intellect, more the test, the emulation—more loftily elevated as head and sample—than they are on the surface of our republican States this day. The writers of a time hint the mottoes of its gods. The word of the modern, say these voices, is the word Culture.

We find ourselves abruptly in close quarters with the enemy. This word Culture, or what it has come to represent, involves, by contrast, our whole theme, and has been, indeed, the spur, urging us to engagement. Certain questions arise. As now taught, accepted and carried out, are not the processes of culture rapidly creating a class of supercilious infidels, who believe in nothing? Shall a man lose himself in countless masses of adjustments, and be so shaped with reference to this, that, and the other, that the simply good and healthy and brave parts of him are reduced and clipp'd away, like the bordering of box in a garden? You can cultivate corn and roses and orchards—but who shall cultivate the mountain peaks, the ocean, and the tumbling gorgeousness of the clouds? Lastly—is the readily-given reply that culture only seeks to help, systematize, and put in attitude, the elements of fertility and power, a conclusive reply?

I do not so much object to the name, or word, but I should certainly insist, for the purposes of these States, on a radical change of category, in the distribution of precedence. I should demand a programme of culture, drawn out, not for a single class alone, or for the parlors or lecture-rooms, but with an eye to practical life, the West, the working-men, the facts of farms and jackplanes and engineers, and of the broad range of the women also of the middle and working strata, and with reference to the perfect equality of women, and of a grand and powerful motherhood. I should demand of this programme or theory a scope generous enough to include the widest human area. It must have for its spinal meaning the formation of a typical personality of character, eligible to the uses of the high average of men—and *not* restricted by conditions ineligible to the masses. The best culture will always be that of the manly and courageous instincts, and loving perceptions, and of self-respect—aiming to form, over this continent, an idiocrasy of universalism, which, true child of America, will bring joy to its mother, returning to her in her own spirit, recruiting myriads of offspring, able, natural, perceptive, tolerant, devout believers in her, America, and with some definite instinct why and for what she has arisen, most vast, most formidable of historic births, and is, now and here, with wonderful step, journeying through Time.

The problem, as it seems to me, presented to the New World, is, under permanent law and order, and after preserving cohesion (ensemble-Individuality), at all hazards, to vitalize man's free play of special Personalism, recognizing in

13. **As now**—New paragraph in 1871. 34. **The best**—New paragraph in 1871. 36. **universalism**—in the sense of universality. 38. **offspring**—"men" (1871). 38. **devout . . . her**—"devout, real men, alive and full, believers in her" (1871).

it something that calls ever more to be consider'd, fed, and adopted as the substratum for the best that belongs to us, (government indeed is for it), including the new esthetics of our future.

To formulate beyond this present vagueness—to help line and put before us the species, or a specimen of the species, of the democratic ethnology of the future, is a work toward which the genius of our land, with peculiar encouragement, invites her well-wishers. Already certain limnings, more or less grotesque, more or less fading and watery, have appear'd. We too (repressing doubts and qualms), will try our hand.

Attempting, then, however crudely, a basic model or portrait of personality for general use for the manliness of the States (and doubtless that is most useful which is most simple and comprehensive for all, and toned low enough), we should prepare the canvas well beforehand. Parentage must consider itself in advance. (Will the time hasten when fatherhood and motherhood shall become a science—and the noblest science?) To our model, a clear-blooded, strong-fibred physique, is indispensable; the questions of food, drink, air, exercise, assimilation, digestion, can never be intermitted. Out of these we descry a well-begotten selfhood—in youth, fresh, ardent, emotional, aspiring, full of adventure; at maturity, brave, perceptive, under control, neither too talkative nor too reticent, neither flippant nor sombre; of the bodily figure, the movements easy, the complexion showing the best blood, somewhat flush'd, breast expanded, an erect attitude, a voice whose sound outvies music, eyes of calm and steady gaze, yet capable also of flashing—and a general presence that holds its own in the company of the highest. (For it is native personality, and that alone, that endows a man to stand before presidents or generals, or in any distinguish'd collection, with *aplomb*—and *not* culture, or any knowledge or intellect whatever.)

With regard to the mental-educational part of our model, enlargement of intellect, stores of cephalic knowledge, &c., the concentration thitherward of all the customs of our age, especially in America, is so overweening, and provides so fully for that part, that, important and necessary as it is, it really needs nothing from us here—except, indeed, a phrase of warning and restraint. Manners, costumes, too, though important, we need not dwell upon here. Like beauty, grace of motion, &c., they are results. Causes, original things, being attended to, the right manners unerringly follow. Much is said, among artists, of "the grand style," as if it were a thing by itself. When a man, artist or whoever, has health, pride, acuteness, noble aspirations, he has the motive-elements of the grandest style. The rest is but manipulation (yet that is no small matter).

Leaving still unspecified several sterling parts of any model fit for the future personality of America, I must not fail, again and ever, to pronounce myself on one, probably the least attended to in modern times—a hiatus, indeed, threatening its gloomiest consequences after us. I mean the simple, unsophisticated Conscience, the primary moral element. If I were asked to specify in what quarter lie the grounds of darkest dread, respecting the America of our hopes, I should have to point to this particular. I should demand the invariable appli-

29. cephalic—having to do with the head. **33. Manners**—New paragraph in 1871. **41. hiatus**—gap.

cation to individuality, this day and any day, of that old, ever-true plumb-rule of persons, eras, nations. Our triumphant modern civilizee, with his all-schooling and his wondrous appliances, will still show himself but an amputation while this deficiency remains. Beyond (assuming a more hopeful tone), the vertebration of the manly and womanly personalism of our Western world, can only be, and is, indeed, to be (I hope) its all penetrating Religiousness.

The ripeness of Religion is doubtless to be looked for in this field of individuality, and is a result that no organization or church can ever achieve. As history is poorly retain'd by what the technists call history, and is not given out from their pages, except the learner has in himself the sense of the well-wrapt, never yet written, perhaps impossible to be written, history—so Religion, although casually arrested, and, after a fashion, preserv'd in the churches and creeds, does not depend at all upon them, but is a part of the identified soul, which, when greatest, knows not bibles in the old way, but in new ways—the identified soul, which can really confront Religion when it extricates itself entirely from the churches, and not before.

Personalism fuses this, and favors it. I should say, indeed, that only in the perfect uncontamination and solitariness of individuality may the spirituality of religion positively come forth at all. Only here, and on such terms, the meditation, the devout ecstasy, the soaring flight. Only here, communion with the mysteries, the eternal problems, whence? whither? Alone, and identity, and the mood—and the soul emerges, and all statements, churches, sermons, melt away like vapors. Alone, and silent thought and awe, and aspiration—and then the interior consciousness, like a hitherto unseen inscription, in magic ink, beams out its wondrous lines to the sense. Bibles may convey, and priests expound, but it is exclusively for the noiseless operation of one's isolated Self, to enter the pure ether of veneration, reach the divine levels, and commune with the unutterable.

To practically enter into politics is an important part of American personalism. To every young man, North and South, earnestly studying these things, I should here, as an offset to what I have said in former pages, now also say, that may be to views of very largest scope, after all, perhaps the political (perhaps the literary and sociological), America goes best about its development its own way—sometimes, to temporary sight, appaling enough. It is the fashion among dillettants and fops (perhaps I myself am not guiltless) to decry the whole formulation of the active politics of America, as beyond redemption, and to be carefully kept away from. See you that you do not fall into this error. America, it may be, is doing very well upon the whole, notwithstanding these antics of the parties and their leaders, these half-brain'd nominees, the many ignorant ballots, and many elected failures and blatherers. It is the dillettants, and all who shirk their duty, who are not doing well. As for you, I advise you to enter more strongly yet into politics. I advise every young man to do so.

2. civilizee—A coinage, on the model of employee, meaning one who is civilized. Here used derogatively. **4. Beyond**—New paragraph in 1871. **6. Religiousness**—"The architecture of Individuality will ever prove various, with countless different combinations; but here they rise as into common pinnacles, some higher, some less high, only all pointing upward." (Whitman's note, 1871) **7. The ripeness**—"Indeed, the ripeness" (1871). **9. technists**—specialists. **35. perhaps I**—1871 omits matter in parenthesis. **36. formulation**—"formulation and *personnel*" (1871).

Always inform yourself; always do the best you can; always vote. Disengage yourself from parties. They have been useful, and to some extent remain so; but the floating, uncommitted electors, farmers, clerks, mechanics, the masters of parties—watching aloof, inclining victory this side or that side—such are the ones most needed, present and future. For America, if eligible at all to downfall and ruin, is eligible within herself, not without; for I see clearly that the combined foreign world could not beat her down. But these savage, wolfish parties alarm me. Owning no law but their own will, more and more combative, less and less tolerant of the idea of ensemble and of equal brotherhood, the perfect equality of the States, the ever-over-arching American ideas, it behooves you to convey yourself implicitly to no party, nor submit blindly to their dictators, but steadily hold yourself judge and master over all of them.

So much, (hastily toss'd together, and leaving far more unsaid), for an ideal, or intimations of an ideal, toward American manhood. But the other sex, in our land, requires at least a basis of suggestion.

I have seen a young American woman, one of a large family of daughters, who, some years since, migrated from her meagre country home to one of the Northern cities, to gain her own support. She soon became an expert seamstress, but finding the employment too confining for health and comfort, she went boldly to work for others, to housekeep, cook, clean, &c. After trying several places, she fell upon one where she was suited. She has told me that she finds nothing degrading in her position; it is not inconsistent with personal dignity, self-respect, and the respect of others. She confers benefits and receives them. She has good health; her presence itself is healthy and bracing; her character is unstain'd; she has made herself understood, and preserves her independence, and has been able to help her parents, and educate and get places for her sisters; and her course of life is not without opportunities for mental improvement, and of much quiet, uncosting happiness and love.

I have seen another woman who, from taste and necessity conjoin'd, has gone into practical affairs, carries on a mechanical business, partly works at it herself, dashes out more and more into real hardy life, is not abash'd by the coarseness of the contact, knows how to be firm and silent at the same time, holds her own with unvarying coolness and decorum, and will compare, any day, with superior carpenters, farmers, and even boatmen and drivers. For all that, she has not lost the charm of the womanly nature, but preserves and bears it fully, though through such rugged presentation. . . .

[Here follow in the original two additional portraits of admirable womanhood.]

The foregoing portraits, I admit, are frightfully out of line from these imported models of womanly personality—the stock feminine characters of the current novelist, or of the foreign court poems (Ophelias, Enids, princesses, or ladies of one thing or another) which fill the envying dreams of so many poor girls, and are accepted by our men, too, as supreme ideals of feminine excellence to be sought after. But I present mine just for a change.

2. parties—It should be remembered that party lines were much more tightly drawn in the seventies than since. **39. Ophelias, Enids**—Ophelia in *Hamlet;* Enid in Tennyson's *The Idylls of the King*.

Then there are mutterings (we will not now stop to heed them here, but they must be heeded) of something more revolutionary. The day is coming when the deep questions of woman's entrance amid the arenas of practical life, politics, the suffrage, &c., will not only be argued all around us, but may be put to decision, and real experiment.

Of course, in these States, for both man and woman, we must entirely recast the types of highest personality from what the oriental, feudal, ecclesiastical worlds bequeath us, and which yet possess the imaginative and esthetic fields of the United States, pictorial and melodramatic, not without use as studies, but making sad work, and forming a strange anachronism upon the scenes and exigencies around us. Of course, the old undying elements remain. The task is, to successfully adjust them to new combinations, our own days. Nor is this so incredible. I can conceive a community, to-day and here, in which, on a sufficient scale, the perfect personalities, without noise meet; say in some pleasant Western settlement or town, where a couple of hundred best men and women, of ordinary worldly status, have by luck been drawn together, with nothing extra of genius or wealth, but virtuous, chaste, industrious, cheerful, resolute, friendly and devout. I can conceive such a community organized in running order, powers judiciously delegated—farming, building, trade, courts, mails, schools, elections, all attended to; and then the rest of life, the main thing, freely branching and blossoming in each individual, and bearing golden fruit. I can see there, in every young and old man, after his kind, and in every woman after hers, a true personality, develop'd, exercised proportionately in body, mind, and spirit. I can imagine this case as one not necessarily rare or difficult, but in buoyant accordance with the municipal and general requirements of our times. And I can realize in it the culmination of something better than any stereotyped *éclat* of history or poems. Perhaps, unsung, undramatized, unput in essays or biographies—perhaps even some such community already exists, in Ohio, Illinois, Missouri, or somewhere, practically fulfilling itself, and thus outvying, in cheapest vulgar life, all that has been hitherto shown in best ideal pictures.

In short, and to sum up, America, betaking herself to formative action (as it is about time for more solid achievement, and less windy promise), must, for her purposes, cease to recognize a theory of character grown of feudal aristocracies, or form'd by merely literary standards, or from any ultramarine, full-dress formulas of culture, polish, caste, &c., and must sternly promulgate her own new standard, yet old enough, and accepting the old, the perennial elements, and combining them into groups, unities, appropriate to the modern, the democratic, the West, and to the practical occasions and needs of our own cities, and of the agricultural regions. Ever the most precious in the common. Ever the fresh breeze of field, or hill, or lake, is more than any palpitation of fans, though of ivory, and redolent with perfume; and the air is more than the costliest perfumes. . . .

[In three succeeding paragraphs, here omitted, Whitman insists that a truly American culture will sum up past culture, and "move, self-poised, through the ether, and shine like heaven's own suns!"]

8. yet possess—"yet fully possess" (1871). **11. Of course**—New paragraph in 1871. **34. ultramarine**—here, transatlantic

What, however, do we more definitely mean by New World literature? Are we not doing well enough here already? Are not the United States this day busily using, working, more printer's type, more presses, than any other? Do not our publishers fatten quicker and deeper? (helping themselves, under shelter of a delusive and sneaking law, or rather absence of law, to most of their forage, poetical, pictorial, historical, romantic, even comic, without money and without price—and fiercely resisting the timidest proposal to pay for it.) Many will come under this delusion—but my purpose is to dispel it. I say that a nation may hold and circulate rivers and oceans of very readable print, journals, magazines, novels, library-books, "poetry," &c.—such as the States to-day possess and circulate—of unquestionable aid and value—hundreds of new volumes annually composed and brought out here, respectable enough, indeed unsurpass'd in smartness and erudition—with further hundreds, or rather millions (as by free forage or theft aforemention'd), also thrown into the market—and yet, all the while, the said nation, strictly speaking, may possess no literature at all.

Repeating our inquiry, what, then do we mean by real literature? especially the democratic literature of the future? Hard questions to meet. The clues are inferential, and turn us to the past. At best, we can only offer suggestions, comparisons, circuits. . . .

[In five succeeding paragraphs, here omitted, Whitman pays tribute to the great literature of the past, but finds the United States possesses no such lofty literature. He denounces the ephemeral literature of the day, of which audiences come to tire.]

Compared with the past, our modern science soars, and our journals serve—but ideal and even ordinary romantic literature, does not, I think, substantially advance. Behold the prolific brood of the contemporary novel, magazine-tale, theatre-play, &c. The same endless thread of tangled and superlative love-story, inherited, apparently from the Amadises and Palmerins of the 13th, 14th, and 15th centuries over there in Europe. The costumes and associations brought down to date, the seasoning hotter and more varied, the dragons and ogres left out—but the *thing,* I should say, has not advanced—is just as sensational, just as strain'd—remains about the same, nor more, nor less.

What is the reason our time, our lands, that we see no fresh local courage, sanity, of our own—the Mississippi, stalwart Western men, real mental and physical facts, Southerners, &c., in the body of our literature? especially the poetic part of it. But always, instead, a parcel of dandies and ennuyées, dapper little gentlemen from abroad, who flood us with their thin sentiment of parlors, parasols, piano-songs, tinkling rhymes, the five-hundredth importation—or whimpering and crying about something, chasing one aborted conceit after another, and forever occupied in dyspeptic amours with dyspeptic women.

3. other—"uttering and absorbing more publications than any other?" inserted (1871). **5. law**—The United States had no international copyright law until 1891; the absence of such a statute permitted the republication of English books without royalty to the author. **8. Many**—New paragraph in 1871. **18. democratic**—"American" (1871). **25. Amadises and Palmerins**—Whitman is probably referring to the *Amadis de Gaul* (1540) by the Frenchman Herberay, a compendium of romantic stories; and to *Palmerin de Inglaterra* (1547) by the Spaniard Luis Hurtado. The latter was condensed and translated by Robert Southey. **26. associations**—"associations are" (1871).

While, current and novel, the grandest events and revolutions, and stormiest passions of history, are crossing to-day with unparallel'd rapidity and magnificence over the stages of our own and all the continents, offering new materials, opening new vistas, with largest needs, inviting the daring launching forth of conceptions in literature, inspired by them, soaring in highest regions, serving art in its highest (which is only the other name for serving God, and serving humanity), where is the man of letters, where is the book, with any nobler aim than to follow in the old track, repeat what has been said before—and, as its utmost triumph, sell well, and be erudite or elegant?

Mark the roads, the processes, through which these States have arrived, standing easy, henceforth ever-equal, ever-compact, in their range to-day. European adventures? the most antique? Asiatic or African? old history—miracles—romances? Rather, our own unquestion'd facts. They hasten, incredible, blazing bright as fire. From the deeds and days of Columbus down to the present, and including the present—and especially the late secession war —when I con them, I feel, every leaf, like stopping to see if I have not made a mistake, and fall'n on the splendid figments of some dream. But it is no dream. We stand, live, move, in the huge flow of our age's materialism—in its spirituality. We have had founded for us the most positive of lands. The founders have pass'd to other spheres—but what are these terrible duties they have left us?

Their politics the United States have, in my opinion, with all their faults, already substantially establish'd, for good, on their own native, sound, long-vista'd principles, never to be overturned, offering a sure basis for all the rest. With that, their future religious forms, sociology, literature, teachers, schools, costumes, &c., are of course to make a compact whole, uniform, on tallying principles. For how can we remain, divided, contradicting ourselves, this way? I say we can only attain harmony and stability by consulting ensemble and the ethic purports, and faithfullly building upon them. For the New World, indeed, after two grand stages of preparation-strata, I perceive that now a third stage, being ready for (and without which the other two were useless), with unmistakable signs appears. The First stage was the planning and putting on record the political foundation rights of immense masses of people—indeed all people—in the organization of republican National, State, and municipal governments, all constructed with reference to each, and each to all. This is the American programme, not for classes, but for universal man, and is embodied in the compacts of the Declaration of Independence, and, as it began and has now grown, with its amendments, the Federal Constitution—and in the State governments, with all their interiors, and with general suffrage; those having the sense not only of what is in themselves, but that their certain several things

1. **While**—New paragraph in 1871. 17. **But it**—New paragraph in 1871. 27. **way**—"Note, to-day, an instructive curious spectacle and conflict. Science, (twin, in its fields, of Democracy in its)—Science, testing absolutely all thoughts, all works, has already burst well upon the world—a sun, mounting, most illuminating, most glorious—surely never again to set. But against it, deeply entrench'd, holding possession, yet remains (not only through the churches and schools, but by imaginative literature, and unregenerate poetry) the fossil theology of the mythic-materialistic, superstitious, untaught and credulous, fable-loving, primitive ages of humanity." (Whitman's note) 29. **For the New**—New paragraph in 1871.

started, planted, hundreds of others in the same direction duly arise and follow. The Second stage relates to material prosperity, wealth, produce, labor-saving machines, iron, cotton, local, State and continental railways, intercommunication and trade with all lands, steamships, mining, general employment, organization of great cities, cheap appliances for comfort, numberless technical schools, books, newspapers, a currency for money circulation, &c. The Third stage, rising out of the previous ones, to make them and all illustrious, I, now, for one, promulge, announcing a native expression-spirit, getting into form, adult, and through mentality, for these States, self-contain'd, different from others, more expansive, more rich and free, to be evidenced by original authors and poets to come, by American personalities, plenty of them, male and female, traversing the States, none excepted—and by native superber tableaux and growths of language, songs, operas, orations, lectures, architecture —and by a sublime and serious Religious Democracy sternly taking command, dissolving the old, sloughing off surfaces, and from its own interior and vital principles, reconstructing, democratizing society. . . .

[In five paragraphs, here omitted, Whitman restates with vigor his belief that America needs a new literature; says that good literature is everywhere good, but that there is interwoven in it "the materiality and personality of a land, a race," and finds most current American books "useless and a mockery."]

Of what is called the drama, or dramatic presentation in the United States, as now put forth at the theatres, I should say it deserves to be treated with the same gravity, and on a par with the questions of ornamental confectionery at public dinners, or the arrangement of curtains and hangings in a ball-room—nor more, nor less. Of the other, I will not insult the reader's intelligence (once really entering into the atmosphere of these Vistas) by supposing it necessary to show in detail, why the copious dribble, either of our little or well-known rhymesters, does not fulfill, in any respect, the needs and august occasions of this land. America demands a poetry that is bold, modern, and all-surrounding and kosmical, as she is herself. It must in no respect ignore science or the modern, but inspire itself with science and the modern. It must bend its vision toward the future, more than the past. Like America, it must extricate itself from even the greatest models of the past, and, while courteous to them, must have entire faith in itself, and the products of its own democratic spirit only. Like her, it must place in the van, and hold up at all hazards, the banner of the divine pride of man in himself (the radical foundation of the new religion). Long enough have the People been listening to poems in which common humanity, deferential, bends low, humiliated, acknowledging superiors. But America listens to no such poems. Erect, inflated, and fully self-esteeming be the chant; and then America will listen with pleased ears. . . .

[The omitted paragraphs (eight in all) sketch out in some detail the regional possibilities of a future American literature, and call for books expressing a "wholesome extasy."]

In the prophetic literature of these States (the reader of my speculations will miss their principal stress unless he allows well for the point that a new Litera-

8. promulge—"promulgate" (1871). **21. Of the other**—New paragraph in 1871. **30. democratic**—"original" (1871). **37 ff. the reader . . . Democracy**—The material in parentheses does not appear in 1871.

ture, perhaps a new Metaphysics, certainly a new Poetry, are to be, in my opinion, the only sure and worthy supports and expressions of the American Democracy), Nature, true Nature, and the true idea of Nature, long absent, must, above all, become fully restored, enlarged, and must furnish the pervading atmosphere to poems, and the test of all high literary and esthetic compositions. I do not mean the smooth walks, trimm'd hedges, poseys and nightingales of the English poets, but the whole orb, with its geologic history, the kosmos, carrying fire and snow, that rolls through the illimitable areas, light as a feather, though weighing billions of tons. Furthermore, as by what we now partially call Nature is intended, at most, only what is entertainable by the physical conscience, the sense of matter, and of good animal health—on these it must be distinctly accumulated, incorporated, that man, comprehending these, has, in towering superaddition, the moral and spiritual consciences, indicating his destination beyond the ostensible, the mortal.

To the heights of such estimate of Nature indeed ascending, we proceed to make observations for our Vistas, breathing rarest air. What is I believe called Idealism seems to me to suggest (guarding against extravagance, and ever modified even by its opposite) the course of inquiry and desert of favor for our New World metaphysics, their foundation of and in literature, giving hue to all.

The elevating and etherealizing ideas of the unknown and of unreality must be brought forward with authority, as they are the legitimate heirs of the

19. **all**—"The culmination and fruit of literary artistic expression, and its final fields of pleasure for the human soul, are in metaphysics, including the mysteries of the spiritual world, the soul itself, and the question of the immortal continuation of our identity. In all ages, the mind of man has brought up here—and always will. Here, at least, of whatever race or era, we stand on common ground. Applause, too, is unanimous, antique or modern. Those authors who work well in this field—though their reward, instead of a handsome percentage, or royalty, may be but simply the laurel-crown of the victors in the great Olympic games—will be dearest to humanity, and their works, however esthetically defective, will be treasur'd forever. The altitude of literature and poetry has always been religion—and always will be. The Indian Vedas, the Naçkas of Zoroaster, the Talmud of the Jews, the Old Testament, the Gospel of Christ and his disciples, Plato's works, the Koran of Mohammed, the Edda of Snorro, and so on toward our own day, to Swedenborg, and to the invaluable contributions of Leibnitz, Kant and Hegel—these with such poems only in which (while singing well of persons and events, of the passions of man, and the shows of the material universe,) the religious tone, the consciousness of mystery, the recognition of the future, of the unknown, of Deity over and under all, and of the divine purpose, are never absent, but indirectly give tone to all—exhibit literature's real heights and elevations, towering up like the great mountains of the earth. Standing on this ground—the last, the highest, only permanent ground—and sternly criticising, from it, all works, either of the literary, or any art, we have peremptorily to dismiss every pretensive production, however fine its esthetic or intellectual points, which violates or ignores, or even does not celebrate, the central divine idea of All, suffusing universe, of eternal trains of purpose, in the development, by however slow degrees, of the physical, moral, and spiritual kosmos. I say he has studied, meditated to no profit, whatever may be his mere erudition, who has not absorb'd this simple consciousness and faith. It is not entirely new—but it is for Democracy to elaborate it, and look to build upon and expand from it, with uncompromising reliance. Above the doors of teaching the inscription is to appear. Though little or nothing can be absolutely known, perceiv'd, except from a point of view which is evanescent, yet we know at least one permanency, that Time and Space, in the will of God, furnish successive chains, completions of material births and beginnings, solve all discrepancies, fears and doubts, and eventually fulfil happiness—and that the prophecy of those births, namely spiritual results, throws the true arch over all teaching, all science. The local considerations of sin, disease, deformity, ignorance, death, &c., and their measurement by the superficial mind, and ordinary legislation and theology, are to be met by science, boldly accepting, promulging this faith, and planting the seeds of superber laws—of the explication of the physical universe through the spiritual—and clearing the way for a religion, sweet and unimpugnable alike to little child or great savan." (Whitman's note)

known, and of reality, and at least as great as their parents. Fearless of scoffing, and of the ostent, let us take our stand, our ground, and never desert it, to confront the growing excess and arrogance of realism. To the cry, now victorious—the cry of sense, science, flesh, incomes, farms, merchandise, logic, intellect, demonstrations, solid perpetuities, buildings of brick and iron, or even the facts of the shows of trees, earth, rocks, &c., fear not, my brethren, my sisters, to sound out with equally determin'd voice, that conviction brooding within the recesses of every envision'd soul—illusions! apparitions! figments all! True, we must not condemn the show, neither absolutely deny it, for the indispensability of its meanings; but how clearly we see that, migrate in soul to what we can already conceive of superior and spiritual points of view, and, palpable as it seems under present relations, it all and several might, nay certainly would, fall apart and vanish.

I hail with joy the oceanic, variegated, intense practical energy, the demand for facts, even the business materialism of the current age, our States. But wo to the age or land in which these things, movements, stopping at themselves, do not tend to ideas. As fuel to flame, and flame to the heavens, so must wealth, science, materialism—even this democracy of which we make so much—unerringly feed the highest mind, the soul. Infinitude the flight: fathomless the mystery. Man, so diminutive, dilates beyond the sensible universe, competes with, outcopes space and time, meditating even one great idea. Thus, and thus only, does a human being, his spirit, ascend above, and justify, objective Nature, which, probably nothing in itself, is incredibly and divinely serviceable, indispensable, real, here. And as the purport of objective Nature is doubtless folded, hidden, somewhere here—as somewhere here is what this globe and its manifold forms, and the light of day, and night's darkness, and life itself, with all its experiences, are for—it is here the great literature, especially verse, must get its inspiration and throbbing blood. Then may we attain to a poetry worthy the immortal soul of man, and which, while absorbing materials, and, in their own sense, the shows of Nature, will, above all, have, both directly and indirectly, a freeing, fluidizing, expanding, religious character, exulting with science, fructifying the moral elements, and stimulating aspirations, and meditations on the unknown. . . .

[The remaining fourteen paragraphs of the essay are mainly a vigorous rhetorical restatement of the ideas of the preceding portion.]

2. ostent—ostentatious (?).

EMILY DICKINSON

1830-1886

I. A NEW ENGLAND GIRLHOOD (1830–1856)

1830 Born December 10 in Amherst, Massachusetts. Her father, Edward Dickinson, was for forty years treasurer of Amherst College. Helen Hunt (Jackson), later author of *Ramona,* was an intimate friend and neighbor, and put her into *Mercy Philbrick's Choice.*

1846 Beginning of lifelong acquaintance with Susan Gilbert, her most sympathetic friend and future sister-in-law.

1847 Attended Mount Holyoke Female Seminary, under Mary Lyon; showed somewhat rebellious spirit toward restrictive regulations.

1848 Resumed work in Amherst Academy. Platonic friendship with Benjamin F. Newton, apprentice in her father's law office, who encouraged her writing of verse. He died in 1853.

1852 "Valentine Extravaganza" printed in Samuel Bowles' *Springfield Republican,* February 26.

1854 On the way to Washington, where her father was a member of Congress, she seems to have fallen in love with the Rev. Charles Wadsworth of Philadelphia, her "dearest earthly friend," in whose image she created the "lover" of her poems. The experience confirmed her Puritan mysticism.

1856 Susan Gilbert married her brother Austin and lived next to the Dickinson homestead. To "Sister Sue" Emily sent poetic epistles.

II. THE LEAF AT LOVE TURNED BACK (1862–1886)

1862 With Wadsworth's removal to San Francisco, Emily withdrew from Amherst society and occupied herself increasingly with poetry. Applied to Thomas Wentworth Higginson for advice and criticism, but, though appreciative, ignored it.

1866 "The Snake" sent to the *Springfield Republican,* published February 14.

1870 Colonel T. W. Higginson visited Emily at Amherst, August 16, and became her "teacher."

1874 Death of her father resulted in Emily's almost complete retirement. Mother paralyzed the next year, dying in 1882.

1878 Publication of the third and last poem during Emily's lifetime, "Success," in Helen Hunt Jackson's *A Masque of Poets.*

1884 Emily suffered a breakdown in health.

1886 Died May 15. Asked that her writings be destroyed, but her devoted sister Lavinia saved them.

III. POSTHUMOUS RECOGNITION (1886–1936)

1890 Posthumous publication of *Poems,* ed. by T. W. Higginson and Mabel L. Todd.
1891 *Poems: Second Series,* ed. by Mabel L. Todd and T. W. Higginson.
1896 *Poems: Third Series,* ed. with an introduction by Mrs. Todd.
1914 *The Single Hound,* ed. by Martha Dickinson Bianchi.
1924 *Complete Poems of Emily Dickinson,* ed. with introduction by Martha Dickinson Bianchi.
1929 *Further Poems,* ed. by Martha Dickinson Bianchi and Arthur L. Hampson.
1936 *Unpublished Poems,* ed. by M. D. Bianchi and A. L. Hampson.
1945 *Bolts of Melody: New Poems,* ed. by Mabel L. Todd and Millicent T. Bingham.

BIOGRAPHIES AND CRITICISM: Mabel Loomis Todd, *Letters of Emily Dickinson,* 2 vols., Harper, 1894; new and enlarged ed., 1931; Martha D. Bianchi, *The Life and Letters of Emily Dickinson,* Houghton Mifflin, 5th printing, 1929; MacGregor Jenkins, *Emily Dickinson, Friend and Neighbor,* Little, Brown, 1930; rev. ed., 1939; Josephine Pollitt, *Emily Dickinson: The Human Background of Her Poetry,* Harper, 1930; Genevieve Taggard, *The Life and Mind of Emily Dickinson,* Knopf, 1930; Martha D. Bianchi, *Emily Dickinson Face to Face,* Houghton Mifflin, 1932; G. F. Whicher, *This Was a Poet: A Critical Biography of Emily Dickinson,* Scribner, 1938; Emilio Cecchi, *Emily Dickinson,* Morcelliana (Brescia), 1939; Millicent T. Bingham, *Ancestor's Brocade,* Harper, 1945. See also T. W. Higginson, *Carlyle's Laugh and Other Surprises,* Houghton Mifflin, 1909, pp. 249-83, and Clement Wood, *Poets of America,* Dutton, 1925, pp. 82-96. For a rich bibliography of critical articles see *Literary History of the United States,* Vol. III, pp. 467-70.

BIBLIOGRAPHIES AND EDITIONS: A. L. Hampson, *Emily Dickinson: A Bibliography,* Northampton, 1930; G. F. Whicher, *Emily Dickinson: A Bibliography,* Jones Library, Amherst, 1930; rev. ed., 1931.

Conrad Aiken, *Selected Poems of Emily Dickinson,* London, Jonathan Cape, 1924, has an excellent critical introduction; the poems are chosen from the Todd-Higginson series. *The Poems of Emily Dickinson,* edd. M. D. Bianchi and A. L. Hampson, Little, Brown, 1937, includes *Further Poems* and *Unpublished Poems.* But a knowledge of the true texts of the poems must await the edition to be prepared by T. H. Johnson from the original manuscripts, now in the Houghton Library at Harvard University.

Emily Dickinson, our major woman poet, wrote during the "Indian summer" of New England, but was not fully appreciated until the rebellious, skeptical nineteen twenties. Her brief, sharply imaged stanzas, when they appeared posthumously, inspired poets like Stephen Crane, Amy Lowell, and the postwar naturalists. Drawing her imagery from flowers, the village world, household doings, Biblical story, and legal phrasings, she quietly rejected the world's values, and expressed her notions about nature, love, and God in her own cryptic way. Some of her poems appear to

be communicated in code; a few are fragmentary, or falter to an obscure or inappropriate close. All are touched by mysticism and require an alert imagination for their comprehension. Their elusiveness comes in part from their compression, in part from their whimsical metaphor. They eschew rhyme and assonance, yet have tonal harmony. They are based in part on hymn tunes of her childhood and are the expression of a sensitive soul whose thirst for knowledge of the world about her marks a mind at once daring and naively responsive to simple things, beauty, love, justice. They are the product of an impish, sometimes arch, but intensely human spirit, driven to dramatizing itself and finding outlet in a passion for actuality, in a paradoxical swoop of thought, perhaps in an intimation of immortality. The numbering of the poems is not that of *The Complete Poems,* but of this volume. Poems numbered XXXV-XXXVIII are from the new volume, *Bolts of Melody.*

I*

Success is counted sweetest
By those who ne'er succeed.
To comprehend a nectar
Requires sorest need.

Not one of all the purple host
Who took the flag to-day
Can tell the definition,
So clear, of victory,

As he, defeated, dying,
On whose forbidden ear
The distant strains of triumph
Break, agonized and clear.

II†

If you were coming in the fall,
I'd brush the summer by
With half a smile and half a spurn,
As housewives do a fly.

If I could see you in a year,
I'd wind the months in balls,
And put them each in separate drawers,
Until their time befalls.

If only centuries delayed,
I'd count them on my hand,
Subtracting till my fingers dropped
Into Van Diemen's land,

If certain, when this life was out,
That yours and mine should be,
I'd toss it yonder like a rind,
And taste eternity.

But now, all ignorant of the length
Of time's uncertain wing,
It goads me, like the goblin bee,
That will not state its sting.

III

I cannot live with you,
It would be life,
And life is over there
Behind the shelf

The sexton keeps the key to,
Putting up
Our life, his porcelain,
Like a cup

* First published in Helen Hunt Jackson, ed., *A Masque of Poets,* 1878. **3. nectar**—a drink of the gods, not to be tasted but "comprehended." **5. purple**—royal; the imagery, based on the dying Civil War soldier, suggests value won through deprivation. † Poems II-XIII are an imaginative reconstruction of the stages of Emily Dickinson's emotional experience with Charles Wadsworth, and perhaps earlier with Ben Newton ("My life closed twice"). They progress from the feeling aroused by Wadsworth's departure for California to the conviction that "A death-blow is a life-blow," and finally to the belief that she will be a heavenly bride. **12. Van Diemen's land**—Tasmania, far beyond California, was being settled at this time.

Discarded of the housewife,
Quaint or broken;
A newer Sèvres pleases,
Old ones crack.

I could not die with you,
For one must wait
To shut the other's gaze down,—
You could not.

And I, could I stand by
And see you freeze,
Without my right of frost,
Death's privilege?

Nor could I rise with you,
Because your face
Would put out Jesus',
That new grace

Glow plain and foreign
On my homesick eye,
Except that you, than he
Shone closer by.

They'd judge us—how?
For you served Heaven, you know,
Or sought to;
I could not,

Because you saturated sight,
And I had no more eyes
For sordid excellence
As Paradise.

And were you lost, I would be,
Though my name
Rang loudest
On the heavenly fame.

And were you saved,
And I condemned to be
Where you were not,
That self were hell to me.

So we must keep apart,
You there, I here,
With just the door ajar
That oceans are,
And prayer,
And that pale sustenance,
Despair!

IV

Not with a club the heart is broken,
Nor with a stone;
A whip, so small you could not see it,
I've known

To lash the magic creature
Till it fell,
Yet that whip's name too noble
Then to tell.

Magnanimous of bird
By boy descried,
To sing unto the stone
Of which it died.

V

Pain has an element of blank;
It cannot recollect
When it began, or if there were
A day when it was not.

It has no future but itself,
Its infinite realms contain
Its past, enlightened to perceive
New periods of pain.

VI

A death-blow * is a life-blow to some
Who, till they died, did not alive become;
Who, had they lived, had died, but when
They died, vitality begun.

VII

Heart, we will forget him!
You and I, to-night!

11. Sèvres—French porcelain. **30. served Heaven**—Wadsworth was a clergyman. * **death-blow**—The renunciation of her already married lover seems to be the central fact in her history. The play on words is in the manner of seventeenth-century poets like John Donne.

You may forget the warmth he gave,
I will forget the light.

When you have done, pray tell me,
That I my thoughts may dim;
Haste! lest while you're lagging,
I may remember him!

VIII

My life closed twice before its close;
It yet remains to see
If Immortality unveil
A third event to me,

So huge, so hopeless to conceive,
As these that twice befell.
Parting is all we know of heaven,
And all we need of hell.

IX

The soul selects her own society,
Then shuts the door;
On her divine majority *
Obtrude no more.

Unmoved, she notes the chariot's pausing
At her low gate;
Unmoved, an emperor is kneeling
Upon her mat.

I've known her from an ample nation
Choose one;
Then close the valves of her attention
Like stone.

X

A wife at daybreak I shall be;
Sunrise, hast thou a flag for me?
At midnight I am yet a maid—
How short it takes to make it bride!
Then, Midnight, I have passed from thee
Unto the East and Victory.

Midnight, "Good night."
I hear them call.
The angels bustle in the hall,
Softly my Future climbs the stair,
I fumble at my childhood's prayer—
So soon to be a child no more!
Eternity, I'm coming, Sir,—
Master, I've seen that face before.

XI

Much madness is divinest sense
To a discerning eye;
Much sense the starkest madness.
'Tis the majority
In this, as all, prevails.
Assent, and you are sane;
Demur,—you're straightway dangerous,
And handled with a chain.

XII

Alter? When the hills do.
Falter? When the sun
Question if his glory
Be the perfect one.

Surfeit? When the daffodil
Doth of the dew:
Even as herself, O friend!
I will of you!

XIII†

They say that "time assuages,"—
Time never did assuage;
An actual suffering strengthens,
As sinews do, with age.

Time is a test of trouble,
But not a remedy.
If such it prove, it prove too
There was no malady.

XIV

I taste a liquor never brewed,
From tankards scooped in pearl;

* **majority**—sanctity. † First published in the *Independent*, May 21, 1896.

Not all the vats upon the Rhine
Yield such an alcohol!

Inebriate of air am I,
And debauchee of dew,
Reeling, through endless summer days,
From inns of molten blue.

When landlords turn the drunken bee
Out of the foxglove's door,
When butterflies renounce their drams,
I shall but drink the more!

Till seraphs swing their snowy hats,
And saints to windows run,
To see the little tippler
Leaning against the sun!

XV

He preached upon "breadth" till it argued him narrow,—
The broad are too broad to define;
And of "truth" until it proclaimed him a liar,—
The truth never flaunted a sign.

Simplicity fled from his counterfeit presence
As gold the pyrites would shun.
What confusion would cover the innocent Jesus
To meet so enabled a man!

XVI

I know that he exists
Somewhere, in silence.
He has hid his rare life
From our gross eyes.

'Tis an instant's play,
'Tis a fond ambush,
Just to make bliss
Earn her own surprise!

But should the play
Prove piercing earnest,
Should the glee glaze
In death's stiff stare,

Would not the fun
Look too expensive?
Would not the jest
Have crawled too far?

XVII

It's such a little thing to weep,
So short a thing to sigh;
And yet by trades the size of these
We men and women die!

XVIII

I dreaded that first robin so,
But he is mastered now,
And I'm accustomed to him grown,—
He hurts a little, though.

I thought if I could only live
Till that first shout got by,
Not all pianos in the woods
Had power to mangle me.

I dared not meet the daffodils,
For fear their yellow gown
Would pierce me with a fashion
So foreign to my own.

I wished the grass would hurry,
So when 'twas time to see,
He'd be too tall, the tallest one
Could stretch to look at me.

I could not bear the bees should come,
I wished they'd stay away
In those dim countries where they go:
What word had they for me?

They're here, though; not a creature faile
No blossom stayed away
In gentle deference to me,
The Queen of Calvary.

3. **vats**—The Heidelberg tun was one of the celebrated vats of the winegrowing Rhineland. 15. **tippler**—one who sips. 6. **pyrites**—fool's gold. 11. **glaze**—become glassy. 24. **Queen of Calvary**—She regards herself as crucified.

Each one salutes me as he goes,
And I my childish plumes
Lift, in bereaved acknowledgment
Of their unthinking drums.

XIX

How happy is the little stone
That rambles in the road alone,
And doesn't care about careers,
And exigencies never fears;
Whose coat of elemental brown
A passing universe put on;
And independent as the sun,
Associates or glows alone,
Fulfilling absolute decree
In casual simplicity.

XX

The bustle in a house
The morning after death
Is solemnest of industries
Enacted upon earth,—

The sweeping up the heart,
And putting love away
We shall not want to use again
Until eternity.

XXI

This quiet Dust was Gentlemen and Ladies,
And Lads and Girls;
Was laughter and ability and sighing,
And frocks and curls.
This passive place a Summer's nimble mansion,
Where Bloom and Bees
Fulfilled their Oriental Circuit,*
Then ceased like these.

XXII

I'm nobody! Who are you?
Are you nobody, too?
Then there's a pair of us—don't tell!
They'd banish us, you know.

How dreary to be somebody!
How public, like a frog
To tell your name the livelong day
To an admiring bog!

XXIII

Some keep the Sabbath going to church;
I keep it staying at home,
With a bobolink for a chorister,
And an orchard for a dome.

Some keep the Sabbath in surplice;
I just wear my wings,
And instead of tolling the bell for church,
Our little sexton sings.

God preaches,—a noted clergyman,—
And the sermon is never long;
So instead of getting to heaven at last,
I'm going all along!

XXIV

The sky is low, the clouds are mean,
A travelling flake of snow
Across a barn or through a rut
Debates if it will go.

A narrow wind complains all day
How someone treated him;
Nature, like us, is sometimes caught
Without her diadem.†

XXV

To hear an oriole sing
May be a common thing,
Or only a divine.

It is not of the bird
Who sings the same, unheard,
As unto crowd.

* **Oriental Circuit**—bright career. † **diadem**—symbol of royalty.

The fashion of the ear
Attireth that it hear
In dun or fair.

So whether it be rune,
Or whether it be none,
Is of within;

The "tune is in the tree,"
The sceptic showeth me;
"No, sir! In thee!"

XXVI

To fight aloud is very brave,
But gallanter, I know,
Who charge within the bosom,
The cavalry of woe.

Who win, and nations do not see,
Who fall, and none observe,
Whose dying eyes no country
Regards with patriot love.

We trust, in plumed procession,
For such the angels go,
Rank after rank, with even feet
And uniforms of snow.

XXVII

What soft, cherubic creatures
These gentlewomen are!
One would as soon assault a plush
Or violate a star.

Such dimity * convictions,
A horror so refined
Of freckled human nature,
Of Deity ashamed,—

It's such a common glory,
A fisherman's degree!
Redemption, brittle lady,
Be so, ashamed of thee.

XXVIII

He ate and drank the precious words,
His spirit grew robust;
He knew no more that he was poor,
Nor that his frame was dust.
He danced along the dingy days,
And this bequest of wings
Was but a book. What liberty
A loosened spirit brings!

XXIX†

A thought went up my mind to-day
That I have had before,
But did not finish,—some way back,
I could not fix the year,

Nor where it went, nor why it came
The second time to me,
Nor definitely what it was,
Have I the art to say.

But somewhere in my soul, I know
I've met the thing before;
It just reminded me—'twas all—
And came my way no more.

XXX

I had been hungry all the years;
My noon had come, to dine;
I, trembling, drew the table near,
And touched the curious wine.

'Twas this on tables I had seen,
When turning, hungry, lone,
I looked in windows, for the wealth
I could not hope to own.

I did not know the ample bread,
'Twas so unlike the crumb
The birds and I had often shared
In Nature's dining-room.

10. **rune**—a mystic song. * **dimity**—delicate, like thin cotton dressgoods. In this poem Miss Dickinson expresses her contempt for mere respectability. † This poem refers to a mystic experience akin to Wordsworth's "Intimations of Immortality."

The plenty hurt me, 'twas so new,—
Myself felt ill and odd,
As berry of a mountain bush
Transplanted to the road.

Nor was I hungry; so I found
That hunger was a way
Of persons outside windows,
The entering takes away.

XXXI

After great pain a formal feeling comes—
The nerves sit ceremonious like tombs;
The stiff Heart questions—was it He that bore?
And yesterday—or centuries before?

The feet mechanical
Go round a wooden way
Of ground or air or Ought, regardless grown,
A quartz contentment like a stone.

This is the hour of lead
Remembered if outlived,
As freezing persons recollect the snow—
First chill, then stupor, then the letting go.

XXXII

All overgrown by cunning moss,
All interspersed with weed,
The little cage of "Currer Bell," *
In quiet Haworth laid.

This bird, observing others,
When frosts too sharp became,
Retire to other latitudes,
Quietly did the same.

But differed in returning;
Since Yorkshire hills are green,
Yet not in all the nests I meet
Can nightingale be seen.

Gathered from any wanderings,
Gethsemane can tell
Through what transporting anguish
She reached the asphodel!

Soft falls the sounds of Eden
Upon her puzzled ear;
Oh, what an afternoon for heaven,
When Brontë entered there!

XXXIII

These are the days when birds come back,
A very few, a bird or two,
To take a backward look.

These are the days when skies put on
The old, old sophistries of June,—
A blue and gold mistake.

Oh, fraud that cannot cheat the bee,
Almost thy plausibility
Induces my belief,

Till ranks of seeds their witness bear,
And softly through the altered air
Hurries a timid leaf!

Oh, sacrament of summer days,
Oh, last communion in the haze,
Permit a child to join,

Thy sacred emblems to partake,
Thy consecrated bread to break,
Taste thine immortal wine!

XXXIV

To make a prairie it takes a clover and one bee,—
One clover, and a bee,
And revery.
The revery alone will do
If bees are few.

* **"Currer Bell"**—Charlotte Bronte, to whom this poem is addressed, wrote *Jane Eyre* under this pen name. **14. Gethsemane**—that is, scene of agony. **16. asphodel**—flower of the dead in Greek mythology.

XXXV

Again his voice is at the door,
I feel the old degree,
I hear him ask the servant
For such an one as me;

I take a flower as I go
My face to justify,
He never saw me in this life,
I might surprise his eye.

I cross the hall with mingled steps,
I silent pass the door,
I look on all this world contains—
Just his face—nothing more!

We talk in venture and in toss,
A kind of plummet strain,
Each sounding shyly just how deep
The other's foot had been.

We walk. I leave my dog behind.
A tender thoughtful moon
Goes with us just a little way
And then we are alone.

Alone—if angels are alone
First time they try the sky!
Alone—if those veiled faces be
We cannot count on high!

I'd give to live that hour again
The purple in my vein;
But he must count the drops himself—
My price for every stain!

XXXVI

We learned the whole of love,
The alphabet, the words,
A chapter, then the mighty book—
Then revelation closed.

But in each other's eyes
An ignorance beheld
Diviner than the childhood's,
And each to each a child

Attempted to expound
What neither understood.
Alas, that wisdom is so large
And truth so manifold!

XXXVII

Crumbling is not an instant's act,
A fundamental pause;
Dilapidation's processes
Are organized decays.

'Tis first a cobweb on the soul,
A cuticle of dust,
A borer in the axis,
An elemental rust.

Ruin is formal, devil's work,
Consecutive and slow—
Fail in an instant no man did,
Slipping is crash's law.

XXXVIII

You cannot make remembrance grow
When it has lost its root.
The tightening the soil around
And setting it upright

Deceives perhaps the universe
But not retrieves the plant;
Real memory, like cedar feet,
Is shod with adamant.

Nor can you cut remembrance down
When it shall once have grown,
Its iron buds will sprout anew
However overthrown.

XXXIX

This is my letter to the world,
That never wrote to me,—
The simple news that Nature told,
With tender majesty.

Her message is committed
To hands I cannot see;
For love of her, sweet countrymen,
Judge tenderly of me!

MARK TWAIN

1835-1910

I. FLUSH TIMES ON THE MISSISSIPPI AND IN THE WEST (1835–1870)

1835 Samuel Langhorne Clemens born November 30 in Florida, Missouri, son of John Marshall Clemens and Jane Lampton, of Virginia stock.

1839 Removed with his family to Hannibal, Missouri, where he had irregular schooling, but enjoyed free life of this river town.

1847 Death of the father; son apprenticed as a printer the following year. Began contributing to brother's newspaper (1851).

1853–1856 Worked as journeyman printer and wandering journalist in St. Louis, New York, Philadelphia, Keokuk, Cincinnati, contributing letters and humorous sketches to various papers.

1857–1861 Worked as pilot on the Mississippi River where he met a great variety of people.

1861 Set out by stage for Nevada with his brother Orion, who had been made secretary to the territorial governor.

1862–1866 In Nevada and California mining, printing, reporting.

1865 Published "The Celebrated Jumping Frog" in the New York *Saturday Press,* November 18; it was copied widely. Associated in San Francisco with Bret Harte and Artemus Ward, whom he had first met in Nevada.

1866 October 2, delivered his first lecture, in San Francisco, continuing appearances as a lecturer until 1906.

1867 Published *The Celebrated Jumping Frog of Calaveras County, and Other Sketches;* visited Europe, the Mediterranean, and Palestine.

1869 Published *The Innocents Abroad,* based on reports sent to the *Alta California* on his trip.

II. THE GILDED AGE (1870–1890)

1870 Marriage to Olivia Langdon of a conservative family in Elmira, New York; became part owner of the Buffalo *Express* (1869).

1872 Published *Roughing It,* reflecting his experiences in the Far West.

1873–1890 Established home in Hartford, Connecticut.

1873 Published *The Gilded Age* (with Charles Dudley Warner), based on family history.

1875 Published *Sketches, New and Old,* a compilation of previously published work.

1876 Published *The Adventures of Tom Sawyer.*

1880 Published *A Tramp Abroad,* based on walking trip with the Rev. Joseph Twichell in the Black Forest and Switzerland.

1882 Published *The Prince and the Pauper,* a historical novel of the Elizabethan age.
1883 Published *Life on the Mississippi,* enlarged from "Old Times on the Mississippi," which appeared in the *Atlantic Monthly* in 1875.
1884 Published *The Adventures of Huckleberry Finn.*
1888 Received honorary Master of Arts degree from Yale.
1889 Published *A Connecticut Yankee in King Arthur's Court.*

III. THE YEARS OF DISILLUSION (1890–1910)

1891–1900 Extensive travel abroad. Period of close association with William Dean Howells. Unfortunate investments in a typesetting machine and a publishing house.
1892 Published *The American Claimant,* with reintroduction of Colonel Sellers.
1894 Published *Pudd'nhead Wilson* and *Tom Sawyer Abroad.*
1896 Published *Personal Recollections of Joan of Arc* (anonymous); Susan Clemens died August 18.
1897 Published *Following the Equator,* based on his journey around the world.
1898 Wrote *The Mysterious Stranger,* not published until 1916; *What Is Man?* printed in 1906; and "The Man That Corrupted Hadleyburg," 1899.
1900–1908 Lived in New York City. Death of his wife in 1904. Honorary degree of Litt. D. from Oxford University (1907).
1908–1910 Lived at Redding, Connecticut. Death of his daughter Jean, 1909.
1910 Died April 21, at Stormfield, his house at Redding.
1917 Publication of *Mark Twain's Letters.*
1924 Publication of *Autobiography* in two volumes.

Biographies: A. B. Paine, *Mark Twain: A Biography,* Harper, 1912, 3 vols.; *Mark Twain's Letters,* ed. by A. B. Paine, Harper, 1917, 2 vols.; Mary Lawton, *A Lifetime with Mark Twain,* Harcourt, Brace, 1925; Van Wyck Brooks, *The Ordeal of Mark Twain,* Dutton, 1920, rev. ed., 1933; Stephen Leacock, *Mark Twain,* Appleton, 1933; Edward Wagenknecht, *Mark Twain, The Man and His Work,* Yale University Press, 1935; *Mark Twain's Autobiography,* ed. by A. B. Paine, Harper, 1924, 2 vols.; Friedrich Schonemann, *Mark Twain als literarische Persönlichkeit,* Jena, 1925; *Life in Letters of William Dean Howells,* ed. by Mildred Howells, Doubleday, Doran, 1928; Clara Clemens, *My Father, Mark Twain,* Harper, 1931; Bernard DeVoto, *Mark Twain's America,* Little, Brown, 1932; M. M. Brashear, *Mark Twain, Son of Missouri,* University of North Carolina Press, 1934; A. B. Paine, ed., *Mark Twain's Notebook,* Harper, 1935; Ivan Benson, *Mark Twain's Western Years,* Stanford University Press, 1938; *Mark Twain in Eruption: hitherto unpublished pages about men and events,* ed. Bernard DeVoto, Harper, 1940; Bernard DeVoto, *Mark Twain at Work,* Harvard, 1942; De Lancey Ferguson, *Mark Twain. Man and Legend,* Bobbs, Merrill, 1943; Samuel C. Webster, *Mark Twain: Business Man,* 1946.

Bibliography and Editions: Merle Johnson, *A Bibliography of the Work of Mark Twain,* rev. ed., Harper, 1935; *Literary History of the United States,* Vol. III, pp. 442-50.

Collected editions offer a variety of puzzles as to text and inclusiveness. The "definitive" edition is Albert B. Paine, ed., *Writings of Mark Twain,* 1922-25, 37 vols. Other collections are the "Author's National" *Writings,* 25 vols., 1907-1918; the "Autograph" *Writings,* 22 vols., 1899-1900; the "Underwood" *Writings,* 1901-1907, 25 vols.; and *Mark Twain's Works,* 23 vols., 1933. These are all published in fact by Harper, though the "Autograph Edition" seems to stem from Hartford, Conn. A variety of books containing uncollected material has appeared outside the collected editions; a list of these can be conveniently found in the bibliography in the *Literary History of the United States.* A scholarly book of extracts is F. L. Pattee, ed., *Mark Twain: Representative Selections,* American Book Co., 1935, but this needs revision.

Keepers of the genteel tradition have been reluctant to admit Mark Twain among the "elect," alleging that he was not "literary." Others aver that since he lived in an age lacking "spiritual exuberance," health was not in him. Still others observe that he was but an improviser, not considering that, as he said, the incongruities he brought together in his purposeless way might be the basis of American art.

Certainly Mark Twain did a great deal to establish an indigenous literature. He had the good fortune to know many parts of his country at first hand; he engaged in various occupations that kept him close to the ordinary idiom and the average point of view. As printer, pilot, miner, reporter, traveler, lecturer, author, publisher, and capitalist he maintained an original attitude toward the issues that confronted the "gilded age." A product of the frontier, he was encumbered by no traditions, no conventional standards of value; rather he was a devout hater of all shams. He made many mistakes, of course—his own promptings led him into hoaxes, burlesques, and fanciful adventures below the level of his best powers. Staking his faith on comfort rather than beauty, he developed in the end a pessimism that was, at bottom, sentimental. But who better than he has given the haunting beauty and picturesque romance of the Mississippi, and the thrill of Western adventure in its hazard of new fortunes?

Out of this material Mark Twain drew an infectious and hilarious humor, as free as the conditions that gave it birth. The frontier experience related him to that tradition of oral anecdote and backwoods fun-making which is characteristic of the American "realistic" attitude. But there is another and a bitterer Mark Twain, equally characteristic of the American people in some moods, the cynical and pessimistic disciple of determinism. Between these two extremes the humorist perpetually swings. Both elements appear in a character like Huckleberry Finn, a world-figure created by a great folk artist. Mark Twain is understood by a democratic people because he is theirs, because he has their morals and their beliefs, their spirit and their speech.

THE GILDED AGE

This satirical novel was written in collaboration with Charles Dudley Warner, and published in 1873. The selections here given comprise Chapters VII and VIII. The fantastic quotations which precede the chapters are here omitted. Earlier chapters relate how the Hawkins family, in response to Colonel Beriah Sellers's eloquent

representations of the fortunes to be won, moved from Tennessee to Missouri, and became hopelessly involved. In this chapter Si Hawkins sends his son Washington to his old friend Sellers, for help.

CHAPTER VII

COLONEL SELLERS'S SCHEMES FOR MONEY-MAKING

BEARING Washington Hawkins and his fortunes, the stage-coach tore out of Swansea at a fearful gait, with horn tooting gaily and half the town admiring from doors and windows. But it did not tear any more after it got to the outskirts; it dragged along stupidly enough, then—till it came in sight of the next hamlet; and then the bugle tooted gaily again, and again the vehicle went tearing by the houses. This sort of conduct marked every entry to a station and every exit from it; and so in those days children grew up with the idea that stage-coaches always tore and always tooted; but they also grew up with the idea that pirates went into action in their Sunday clothes, carrying the black flag in one hand and pistoling people with the other, merely because they were so represented in the pictures: but these illusions vanished when later years brought their disenchanting wisdom. They learned then that the stage-coach is but a poor, plodding, vulgar thing in the solitudes of the highway; and that the pirate is only a seedy, unfantastic "rough," when he is out of the pictures.

Toward evening, the stage-coach came thundering into Hawkeye with a perfectly triumphant ostentation—which was natural and proper, for Hawkeye was a pretty large town for interior Missouri. Washington, very stiff and tired and hungry, climbed out, and wondered how he was to proceed now. But his difficulty was quickly solved. Colonel Sellers came down the street on a run and arrived panting for breath. He said:

"Lord bless you—I'm glad to see you, Washington—perfectly delighted to see you, my boy! I got your message. Been on the lookout for you. Heard the stage horn, but had a party I couldn't shake off—man that's got an enormous thing on hand—wants me to put some capital into it—and I tell you, my boy, I could do worse, I could do a deal worse. No, now, let that luggage alone; I'll fix that. Here, Jerry, got anything to do? All right—shoulder this plunder and follow me. Come along, Washington. Lord, I'm glad to see you! Wife and the children are just perishing to look at you. Bless you, they won't know you, you've grown so. Folks all well, I suppose? That's good—glad to hear that. We're always going to run down and see them, but I'm into so many operations, and they're not things a man feels like trusting to other people, and so somehow we keep putting it off. Fortunes in them! Good gracious, it's the country to pile up wealth in! Here we are—here's where the Sellers dynasty hangs out. Dump it on the doorstep, Jerry—the blackest niggro in the state, Washington, but got a good heart—mighty likely boy, is Jerry. And now I suppose you've got to have ten cents, Jerry. That's all right—when a man works for me—when a man—in the other pocket, I reckon—when a man—why, where the mischief *is* that portmonnaie!—when a—well now that's odd—Oh, now I re-

member, must have left it at the bank; and b' George I've left my check-book, too—Polly says I ought to have a nurse—well, no matter. Let me have a dime, Washington, if you've got—ah, thanks. Now clear out, Jerry, your complexion has brought on the twilight half an hour ahead of time. Pretty fair joke—pretty fair. Here he is, Polly! Washington's come, children!—come now, don't eat him up—finish him in the house. Welcome, my boy, to a mansion that is proud to shelter the son of the best man that walks on the ground. Si Hawkins has been a good friend to me, and I believe I can say that whenever I've had a chance to put him into a good thing I've done it, and done it pretty cheerfully, too. I put him into that sugar speculation—what a grand thing that was, if we hadn't held on too long!"

True enough; but holding on too long had utterly ruined both of them; and the saddest part of it was, that they never had had so much money to lose before, for Sellers's sale of their mule crop that year in New Orleans had been a great financial success. If he had kept out of sugar and gone back home content to stick to mules it would have been a happy wisdom. As it was, he managed to kill two birds with one stone—that is to say, he killed the sugar speculation by holding for high rates till he had to sell at the bottom figure, and that calamity killed the mule that laid the golden egg—which is but a figurative expression and will be so understood. Sellers had returned home cheerful but empty-handed, and the mule business lapsed into other hands. The sale of the Hawkins property by the sheriff had followed, and the Hawkins hearts been torn to see Uncle Dan'l and his wife pass from the auction-block into the hands of a negro trader and depart for the remote South to be seen no more by the family. It had seemed like seeing their own flesh and blood sold into banishment.

Washington was greatly pleased with the Sellers mansion. It was a two-story-and-a-half brick, and much more stylish than any of its neighbors. He was borne to the family sitting-room in triumph by the swarm of little Sellerses, the parents following with their arms about each other's waists.

The whole family were poorly and cheaply dressed; and the clothing, although neat and clean, showed many evidences of having seen long service. The Colonel's "stovepipe" hat was napless and shiny with much polishing, but nevertheless it had an almost convincing expression about it of having been just purchased new. The rest of his clothing was napless and shiny, too, but it had the air of being entirely satisfied with itself and blandly sorry for other people's clothes. It was growing rather dark in the house, and the evening air was chilly, too. Sellers said:

"Lay off your overcoat, Washington, and draw up to the stove and make yourself at home—just consider yourself under your own shingles, my boy—I'll have a fire going, in a jiffy. Light the lamp, Polly, dear, and let's have things cheerful—just as glad to see you, Washington, as if you'd been lost a century and we'd found you again!"

By this time the Colonel was conveying a lighted match into a poor little stove. Then he propped the stove-door to its place by leaning the poker against it, for the hinges had retired from business. This door framed a small square of isinglass, which now warmed up with a faint glow. Mrs. Sellers lit a cheap,

showy lamp, which dissipated a good deal of the gloom, and then everybody gathered into the light and took the stove into close companionship.

The children climbed all over Sellers, fondled him, petted him, and were lavishly petted in return. Out from this tugging, laughing, chattering disguise of legs and arms and little faces, the Colonel's voice worked its way and his tireless tongue ran blithely on without interruption; and the purring little wife, diligent with her knitting, sat near at hand and looked happy and proud and grateful; and she listened as one who listens to oracles and gospels and whose grateful soul is being refreshed with the bread of life. By and by the children quieted down to listen; clustered about their father, and resting their elbows on his legs, they hung upon his words as if he were uttering the music of the spheres.

A dreary old haircloth sofa against the wall; a few damaged chairs; the small table the lamp stood on; the crippled stove—these things constituted the furniture of the room. There was no carpet on the floor; on the wall were occasional square-shaped interruptions of the general tint of the plaster which betrayed that there used to be pictures in the house—but there were none now. There were no mantel ornaments, unless one might bring himself to regard as an ornament a clock which never came within fifteen strokes of striking the right time, and whose hands always hitched together at twenty-two minutes past anything and traveled in company the rest of the way home.

"Remarkable clock!" said Sellers, and got up and wound it. "I've been offered—well, I wouldn't expect you to believe what I've been offered for that clock. Old Governor Hager never sees me but he says, 'Come, now, Colonel, name your price—I *must* have that clock!' But my goodness I'd as soon think of selling my wife. As I was saying to—silence in the court, now, she's begun to strike! You can't talk against her—you have to just be patient and hold up till she's said her say. Ah—well, as I was saying, when—she's beginning again! Nineteen, twenty, twenty-one, twenty-two, twen—ah, that's all. Yes, as I was saying to old Judge—go it, old girl, don't mind me. Now how is that? Isn't that a good, spirited tone? She can wake the dead! Sleep? Why you might as well try to sleep in a thunder factory. Now just listen at that. She'll strike a hundred and fifty, now, without stopping—you'll see. There ain't another clock like that in Christendom."

Washington hoped that this might be true, for the din was distracting—though the family, one and all, seemed filled with joy; and the more the clock "buckled down to her work" as the Colonel expressed it, and the more insupportable the clatter became, the more enchanted they all appeared to be. When there was silence, Mrs. Sellers lifted upon Washington a face that beamed with a child-like pride, and said:

"It belonged to his grandmother."

The look and the tone were plain call for admiring surprise, and therefore Washington said—(it was the only thing that offered itself at the moment):

"Indeed!"

"Yes, it did, didn't it, father!" exclaimed one of the twins. "She was my great-grandmother—and George's too; wasn't she, father! *You* never saw her, but Sis has seen her, when Sis was a baby—didn't you, Sis! Sis has seen her

most a hundred times. She was awful deef—she's dead, now. Ain't she, father!"

All the children chimed in, now, with one general Babel of information about deceased—nobody offering to read the riot act or seeming to discountenance the insurrection or disapprove of it in any way—but the head twin drowned all the turmoil and held his own against the field:

"It's our clock, now—and it's got wheels inside of it, and a thing that flutters every time she strikes—don't it, father! Great-grandmother died before hardly any of us were born—she was an Old-School Baptist and had warts all over her—you ask father if she didn't. She had an uncle once that was bald-headed and used to have fits; he wasn't *our* uncle, I don't know what he was to us—some kin or another I reckon—father's seen him a thousand times—hain't you, father! We used to have a calf that et apples and just chawed up dishrags like nothing, and if you stay here you'll see lots of funerals—won't he, Sis! Did you ever see a house afire? I have! Once me and Jim Terry—"

But Sellers began to speak now, and the storm ceased. He began to tell about an enormous speculation he was thinking of embarking some capital in—a speculation which some London bankers had been over to consult with him about—and soon he was building glittering pyramids of coin, and Washington was presently growing opulent under the magic of his eloquence. But at the same time Washington was not able to ignore the cold entirely. He was nearly as close to the stove as he could get, and yet he could not persuade himself that he felt the slightest heat, notwithstanding the isinglass door was still gently and serenely glowing. He tried to get a trifle closer to the stove, and the consequence was, he tripped the supporting poker and the stove-door tumbled to the floor. And then there was a revelation—there was nothing in the stove but a lighted tallow candle!

The poor youth blushed and felt as if he must die with shame. But the Colonel was only disconcerted for a moment—he straightway found his voice again:

"A little idea of my own, Washington—one of the greatest things in the world! You must write and tell your father about it—don't forget that, now. I have been reading up some European scientific reports—friend of mine, Count Fugier, sent them to me—sends me all sorts of things from Paris—he thinks the world of me, Fugier does. Well, I saw that the Academy of France had been testing the properties of heat, and they came to the conclusion that it was a non-conductor or something like that, and of course its influence must necessarily be deadly in nervous organizations with excitable temperaments, especially where there is any tendency toward rheumatic affections. Bless you, I saw in a moment what was the matter with us, and says I, out goes your fires!—no more slow torture and certain death for me, sir. What you want is the *appearance* of heat, not the heat itself—that's the idea. Well, how to do it was the next thing. I just put my head to work, pegged away a couple of days, and here you are! Rheumatism? Why a man can't any more start a case of rheumatism in this house than he can shake an opinion out of a mummy! Stove with a candle in it and a transparent door—that's it—it has been the salvation of this family. Don't you fail to write your father about it, Washington. And tell him the idea is mine—I'm no more conceited than most people,

I reckon, but you know it is human nature for a man to want credit for a thing like that."

Washington said with his blue lips that he would, but he said in his secret heart that he would promote no such iniquity. He tried to believe in the healthfulness of the invention, and succeeded tolerably well; but after all he could not feel that good health in a frozen body was any real improvement on the rheumatism.

CHAPTER VIII

COLONEL SELLERS ENTERTAINS WASHINGTON HAWKINS

The supper at Colonel Sellers's was not sumptuous, in the beginning, but it improved on acquaintance. That is to say, that what Washington regarded at first sight as mere lowly potatoes, presently became awe-inspiring agricultural productions that had been reared in some ducal garden beyond the sea, under the sacred eye of the duke himself, who had sent them to Sellers; the bread was from corn which could be grown in only one favored locality in the earth and only a favored few could get it; the Rio coffee, which at first seemed execrable to the taste, took to itself an improved flavor when Washington was told to drink it slowly and not hurry what should be a lingering luxury in order to be fully appreciated—it was from the private stores of a Brazilian nobleman with an unrememberable name. The Colonel's tongue was a magician's wand that turned dried apples into figs and water into wine as easily as it could change a hovel into a palace and present poverty into imminent future riches.

Washington slept in a cold bed in a carpetless room and woke up in a palace in the morning; at least the palace lingered during the moment that he was rubbing his eyes and getting his bearings—and then it disappeared and he recognized that the Colonel's inspiring talk had been influencing his dreams. Fatigue had made him sleep late; when he entered the sitting-room he noticed that the old haircloth sofa was absent; when he sat down to breakfast the Colonel tossed six or seven dollars in bills on the table, counted them over, said he was a little short and must call upon his banker; then returned the bills to his wallet with the indifferent air of a man who is used to money. The breakfast was not an improvement upon the supper, but the Colonel talked it up and transformed it into an oriental feast. By and by, he said:

"I intend to look out for you, Washington, my boy. I hunted up a place for you yesterday, but I am not referring to that, now—that is a mere livelihood—mere bread and butter; but when I say I mean to look out for you I mean something very different. I mean to put things in your way that will make a mere livelihood a trifling thing. I'll put you in a way to make more money than you'll ever know what to do with. You'll be right here where I can put my hand on you when anything turns up. I've got some prodigious operations on foot; but I'm keeping quiet; mum's the word; your old hand don't go around powwowing and letting everybody see his k'yards and find out his little game. But all in good time, Washington, all in good time. You'll see. Now, there's an operation in corn that looks well. Some New York men are

trying to get me to go into it—buy up all the growing crops and just boss the market when they mature—ah, I tell you it's a great thing. And it only costs a trifle; two millions or two and a half will do it. I haven't exactly promised yet—there's no hurry—the more indifferent I seem, you know, the more anxious those fellows will get. And then there is the hog speculation—that's bigger still. We've got quiet men at work," [he was very impressive here,] "mousing around, to get propositions out of all the farmers in the whole West and Northwest for the hog crop, and other agents quietly getting propositions and terms out of all the manufactories—and don't you see, if we can get all the hogs and all the slaughter-houses into our hands on the dead quiet—whew! it would take three ships to carry the money. I've looked into the thing—calculated all the chances for and all the chances against, and though I shake my head and hesitate and keep on thinking, apparently, I've got my mind made up that if the thing can be done on a capital of six millions, that's the horse to put up money on! Why, Washington—but what's the use of talking about it—any man can see that there's whole Atlantic oceans of cash in it, gulfs and bays thrown in. But there's a bigger thing than that, yet—a bigger—"

"Why, Colonel, you can't want anything bigger!" said Washington, his eyes blazing. "Oh, I wish I could go into either of those speculations—I only wish I had money—I wish I wasn't cramped and kept down and fettered with poverty, and such prodigious chances lying right here in sight! Oh, it is a fearful thing to be poor. But don't throw away those things—they are so splendid and I can see how sure they are. Don't throw them away for something still better and maybe fail in it! I wouldn't, Colonel. I would stick to these. I wish father were here and were his old self again. Oh, he never in his life had such chances as these are. Colonel, you *can't* improve on these—no man can improve on them!"

A sweet, compassionate smile played about the Colonel's features, and he leaned over the table with the air of a man who is "going to show you" and do it without the least trouble:

"Why Washington, my boy, these things are nothing. They *look* large—of course they look large to a novice, but to a man who has been all his life accustomed to large operations—pshaw! They're well enough to while away an idle hour with, or furnish a bit of enjoyment that will give a trifle of idle capital a chance to earn its bread while it is waiting for something to *do*, but—now just listen a moment—just let me give you an idea of what we old veterans of commerce call 'business.' Here's the Rothschilds' proposition—this is between you and me, you understand—"

Washington nodded three or four times impatiently, and his glowing eyes said, "Yes, yes—hurry—I understand—"

"—for I wouldn't have it get out for a fortune. They want me to go in with them on the sly—agent was here two weeks ago about it—go in on the sly" [voice down to an impressive whisper, now] "and buy up a hundred and thirteen wildcat banks in Ohio, Indiana, Kentucky, Illinois, and Missouri—notes of these banks are at all sorts of discount now—average discount of the hundred and thirteen is forty-four per cent.—buy them all up, you see, and then all of

37. **Rothschilds'**—a famous European banking family.

a sudden let the cat out of the bag! Whiz! the stock of every one of those wildcats would spin up to a tremendous premium before you could turn a handspring—profit on the speculation not a dollar less than forty millions!" [An eloquent pause, while the marvelous vision settled into W.'s focus.] "Where's your hogs now! Why, my dear innocent boy, we would just sit down on the front doorsteps and peddle banks like lucifer matches!"

Washington finally got his breath and said:

"Oh, it is perfectly wonderful! Why couldn't these things have happened in father's day? And I—it's of no use—they simply lie before my face and mock me. There is nothing for me but to stand helpless and see other people reap the astonishing harvest."

"Never mind, Washington, don't you worry. I'll fix you. There's plenty of chances. How much money have you got?"

In the presence of so many millions, Washington could not keep from blushing when he had to confess that he had eighteen dollars in the world.

"Well, all right—don't despair. Other people have been obliged to begin with less. I have a small idea that may develop into something for us both, all in good time. Keep your money close and add to it. I'll make it breed. I've been experimenting (to pass away the time) on a little preparation for curing sore eyes—a kind of decoction nine-tenths water and the other tenth drugs that don't cost more than a dollar a barrel; I'm still experimenting; there's one ingredient wanted yet to perfect the thing, and somehow I can't just manage to hit upon the thing that's necessary, and I don't dare talk with a chemist, of course. But I'm progressing, and before many weeks I wager the country will ring with the fame of Beriah Sellers's Infallible Imperial Oriental Optic Liniment and Salvation for Sore Eyes—the Medical Wonder of the Age! Small bottles fifty cents, large ones a dollar. Average cost, five and seven cents for the two sizes. The first year sell, say, ten thousand bottles in Missouri, seven thousand in Iowa, three thousand in Arkansas, four thousand in Kentucky, six thousand in Illinois, and say twenty-five thousand in the rest of the country. Total, fifty-five thousand bottles; profit clear of all expenses, twenty thousand dollars at the very lowest calculation. All the capital needed is to manufacture the first two thousand bottles—say a hundred and fifty dollars—then the money would begin to flow in. The second year, sales would reach two hundred thousand bottles—clear profit, say seventy-five thousand dollars—and in the mean time the great factory would be building in St. Louis, to cost, say, one hundred thousand dollars. The third year we could easily sell one million bottles in the United States and—"

"O, splendid!" said Washington. "Let's commence right away—let's—"

"—one million bottles in the United States—profit at least three hundred and fifty thousand dollars—and *then* it would begin to be time to turn our attention toward the *real* idea of the business."

"The *real* idea of it! Ain't three hundred and fifty thousand dollars a year a pretty real—"

"Stuff! Why, what an infant you are, Washington—what a guileless, short-sighted, easily contented innocent you are, my poor little country-bred know-nothing! Would I go to all that trouble and bother for the poor crumbs a body

might pick up in *this* country? Now do I look like a man who—does my history suggest that I am a man who deals in trifles, contents himself with the narrow horizon that hems in the common herd, sees no further than the end of his nose? Now, *you* know that that is not me—couldn't *be* me. *You* ought to know that if I throw my time and abilities into a patent medicine, it's a patent medicine whose field of operations is the solid earth! its clients the swarming nations that inhabit it! Why what is the republic of America for an eye-water country? Lord bless you, it is nothing but a barren highway that you've got to cross to get *to* the true eye-water market! Why, Washington, in the Oriental countries people swarm like the sands of the desert; every square mile of ground upholds its thousands upon thousands of struggling human creatures—and every separate and individual devil of them's got the ophthalmia! It's as natural to them as noses are—and sin. It's born with them, it stays with them, it's all that some of them have left when they die. Three years of introductory trade in the Orient and what will be the result? Why, our headquarters would be in Constantinople and our hindquarters in Further India! Factories and warehouses in Cairo, Ispahan, Bagdad, Damascus, Jerusalem, Yedo, Peking, Bangkok, Delhi, Bombay, and Calcutta! Annual income —well, God only knows how many millions and millions apiece!"

Washington was so dazed, so bewildered—his heart and his eyes had wandered so far away among the strange lands beyond the seas, and such avalanches of coin and currency had fluttered and jingled confusedly down before him, that he was now as one who has been whirling round and round for a time, and, stopping all at once, finds his surroundings still whirling and all objects a dancing chaos. However, little by little the Sellers family cooled down and crystallized into shape, and the poor room lost its glitter and resumed its poverty. Then the youth found his voice and begged Sellers to drop everything and hurry up the eye-water; and he got his eighteen dollars and tried to force it upon the Colonel—pleaded with him to take it—implored him to do it. But the Colonel would not; said he would not need the capital (in his native magnificent way he called that eighteen dollars capital) till the eye-water was an accomplished fact. He made Washington easy in his mind, though, by promising that he would call for it just as soon as the invention was finished, and he added the glad tidings that nobody but just they two should be admitted to a share in the speculation.

When Washington left the breakfast-table he could have worshiped that man. Washington was one of that kind of people whose hopes are in the very clouds one day, and in the gutter the next. He walked on air, now. The Colonel was ready to take him around and introduce him to the employment he had found for him, but Washington begged for a few moments in which to write home; with his kind of people, to ride to-day's new interest to death and put off yesterday's till another time, is nature itself. He ran up-stairs and wrote glowingly, enthusiastically, to his mother about the hogs and the corn, the banks and the eye-water—and added a few inconsequential millions to each project. And he said that people little dreamed what a man Colonel Sellers was, and that the world would open its eyes when it found out. And he closed his letter thus:

So make yourself perfectly easy, mother—in a little while you shall have everything you want, and more. I am not likely to stint *you* in anything, I fancy. This money will not be for me, alone, but for all of us. I want all to share alike; and there is going to be far more for each than one person can spend. Break it to father cautiously—you understand the need of that—break it to him cautiously, for he has had such cruel hard fortune, and is so stricken by it that great good news might prostrate him more surely than even bad, for he is used to the bad but is grown sadly unaccustomed to the other. Tell Laura—tell all the children. And write to Clay about it if he is not with you yet. You may tell Clay that whatever I get he can freely share in—freely. He knows that that is true—there will be no need that I should swear to that to make him believe it. Good-by—and mind what I say: Rest perfectly easy, one and all of you, for our troubles are nearly at an end.

Poor lad, he could not know that his mother would cry some loving, compassionate tears over his letter and put off the family with a synopsis of its contents which conveyed a deal of love to them but not much idea of his prospects or projects. And he never dreamed that such a joyful letter could sadden her and fill her night with sighs, and troubled thoughts, and bodings of the future, instead of filling it with peace and blessing it with restful sleep.

When the letter was done, Washington and the Colonel sallied forth, and as they walked along Washington learned what he was to be. He was to be a clerk in a real-estate office. Instantly the fickle youth's dreams forsook the magic eye-water and flew back to the Tennessee Land. And the gorgeous possibilities of that great domain straightway began to occupy his imagination to such a degree that he could scarcely manage to keep even enough of his attention upon the Colonel's talk to retain the general run of what he was saying. He was glad it was a real-estate office—he was a made man now, sure.

The Colonel said that General Boswell was a rich man and had a good and growing business; and that Washington's work would be light and he would get forty dollars a month and be boarded and lodged in the General's family—which was as good as ten dollars more; and even better, for he could not live as well even at the "City Hotel" as he would there, and yet the hotel charged fifteen dollars a month where a man had a good room.

General Boswell was in his office; a comfortable-looking place, with plenty of outline maps hanging about the walls and in the windows, and a spectacled man was marking out another one on a long table. The office was in the principal street. The General received Washington with a kindly but reserved politeness. Washington rather liked his looks. He was about fifty years old, dignified, well preserved, and well dressed. After the Colonel took his leave, the General talked awhile with Washington—his talk consisting chiefly of instructions about the clerical duties of the place. He seemed satisfied as to Washington's ability to take care of the books, he was evidently a pretty fair theoretical bookkeeper, and experience would soon harden theory into practice. By and by dinner-time came, and the two walked to the General's house; and now Washington noticed an instinct in himself that moved him to keep not in the General's rear, exactly, but yet not at his side—somehow the old gentleman's dignity and reserve did not inspire familiarity.

LIFE ON THE MISSISSIPPI

Life on the Mississippi was published in 1883. The selections here given (Chapters IV and VII) were published originally in the *Atlantic Monthly* for June and August, 1875. The changes in text were slight.

CHAPTER IV

THE BOYS' AMBITION

When I was a boy, there was but one permanent ambition among my comrades in our village on the west bank of the Mississippi River. That was, to be a steamboatman. We had transient ambitions of other sorts, but they were only transient. When a circus came and went, it left us all burning to become clowns; the first negro minstrel show that ever came to our section left us all suffering to try that kind of life; now and then we had a hope that, if we lived and were good, God would permit us to be pirates. These ambitions faded out, each in its turn; but the ambition to be a steamboatman always remained.

Once a day a cheap, gaudy packet arrived upward from St. Louis, and another downward from Keokuk. Before these events, the day was glorious with expectancy; after them, the day was a dead and empty thing. Not only the boys, but the whole village, felt this. After all these years I can picture that old time to myself now, just as it was then: the white town drowsing in the sunshine of a summer's morning; the streets empty, or pretty nearly so; one or two clerks sitting in front of the Water Street stores, with their splint-bottomed chairs tilted back against the walls, chins on breasts, hats slouched over their faces, asleep—with shingle-shavings enough around to show what broke them down; a sow and a litter of pigs loafing along the sidewalk, doing a good business in watermelon rinds and seeds; two or three lonely little freight piles scattered about the "levee"; a pile of "skids" on the slope of the stone-paved wharf, and the fragrant town drunkard asleep in the shadow of them; two or three wood flats at the head of the wharf, but nobody to listen to the peaceful lapping of the wavelets against them; the great Mississippi, the majestic, the magnificent Mississippi, rolling its mile-wide tide along, shining in the sun; the dense forest away on the other side; the "point" above the town, and the "point" below, bounding the river-glimpse and turning it into a sort of sea, and withal a very still and brilliant and lonely one. Presently a film of dark smoke appears above one of those remote "points"; instantly a negro drayman, famous for his quick eye and prodigious voice, lifts up the cry, "S-t-e-a-m-boat a-comin'!" and the scene changes! The town drunkard stirs, the clerks wake up, a furious clatter of drays follows, every house and store pours out a human contribution, and all in a twinkling the dead town is alive and moving. Drays, carts, men, boys, all go hurrying from many quarters to a common center, the wharf. Assembled there, the people fasten their eyes upon the com-

4. village—"Hannibal, Missouri." (Mark Twain's note)

ing boat as upon a wonder they are seeing for the first time. And the boat *is* rather a handsome sight, too. She is long and sharp and trim and pretty; she has two tall, fancy-topped chimneys, with a gilded device of some kind swung between them; a fanciful pilot-house, all glass and "gingerbread," perched on top of the "texas" deck behind them; the paddle-boxes are gorgeous with a picture or with gilded rays above the boat's name; the boiler-deck, the hurricane-deck, and the texas deck are fenced and ornamented with clean white railings; there is a flag gallantly flying from the jack-staff; the furnace doors are open and the fires glaring bravely; the upper decks are black with passengers; the captain stands by the big bell, calm, imposing, the envy of all; great volumes of the blackest smoke are rolling and tumbling out of the chimneys—a husbanded grandeur created with a bit of pitch-pine just before arriving at a town; the crew are grouped on the forecastle; the broad stage is run far out over the port bow, and an envied deck-hand stands picturesquely on the end of it with a coil of rope in his hand; the pent steam is screaming through the gauge-cocks; the captain lifts his hand, a bell rings, the wheels stop; then they turn back, churning the water to foam, and the steamer is at rest. Then such a scramble as there is to get aboard, and to get ashore, and to take in freight and to discharge freight, all at one and the same time; and such a yelling and cursing as the mates facilitate it all with! Ten minutes later the steamer is under way again, with no flag on the jack-staff and no black smoke issuing from the chimneys. After ten more minutes the town is dead again, and the town drunkard asleep by the skids once more.

My father was a justice of the peace, and I supposed he possessed the power of life and death over all men, and could hang anybody that offended him. This was distinction enough for me as a general thing; but the desire to be a steamboatman kept intruding, nevertheless. I first wanted to be a cabin-boy, so that I could come out with a white apron on and shake a table-cloth over the side, where all my old comrades could see me; later I thought I would rather be the deckhand who stood on the end of the stage-plank with the coil of rope in his hand, because he was particularly conspicuous. But these were only day-dreams—they were too heavenly to be contemplated as real possibilities. By and by one of our boys went away. He was not heard of for a long time. At last he turned up as apprentice engineer or "striker" on a steamboat. This thing shook the bottom out of all my Sunday-school teachings. That boy had been notoriously worldly, and I just the reverse; yet he was exalted to this eminence, and I left in obscurity and misery. There was nothing generous about this fellow in his greatness. He would always manage to have a rusty bolt to scrub while his boat tarried at our town, and he would sit on the inside guard and scrub it, where we all could see him and envy him and loathe him. And whenever his boat was laid up he would come home and swell around the town in his blackest and greasiest clothes, so that nobody could help remembering that he was a steamboatman; and he used all sorts of steamboat technicalities in his talk, as if he were so used to them that he forgot common people could not understand them. He would speak of the "labboard" side of a horse in an

5. **"texas" deck**—a structure on the hurricane deck, containing officers' quarters; the pilot house is directly in front or on top.

easy, natural way that would make one wish he was dead. And he was always talking about "St. Looy" like an old citizen; he would refer casually to occasions when he was "coming down Fourth Street," or when he was "passing by the Planter's House," or when there was a fire and he took a turn on the brakes of "the old Big Missouri"; and then he would go on and lie about how many towns the size of ours were burned down there that day. Two or three of the boys had long been persons of consideration among us because they had been to St. Louis once and had a vague general knowledge of its wonders, but the day of their glory was over now. They lapsed into a humble silence, and learned to disappear when the ruthless "cub"-engineer approached. This fellow had money, too, and hair-oil. Also an ignorant silver watch and a showy brass watch-chain. He wore a leather belt and used no suspenders. If ever a youth was cordially admired and hated by his comrades, this one was. No girl could withstand his charms. He "cut out" every boy in the village. When his boat blew up at last, it diffused a tranquil contentment among us such as we had not known for months. But when he came home the next week, alive, renowned, and appeared in church all battered up and bandaged, a shining hero, stared at and wondered over by everybody, it seemed to us that the partiality of Providence for an undeserving reptile had reached a point where it was open to criticism.

This creature's career could produce but one result, and it speedily followed. Boy after boy managed to get on the river. The minister's son became an engineer. The doctor's and the postmaster's sons became "mud clerks"; the wholesale liquor dealer's son became a barkeeper on a boat; four sons of the chief merchant, and two sons of the county judge, became pilots. Pilot was the grandest position of all. The pilot, even in those days of trivial wages, had a princely salary—from a hundred and fifty to two hundred and fifty dollars a month, and no board to pay. Two months of his wages would pay a preacher's salary for a year. Now some of us were left disconsolate. We could not get on the river—at least our parents would not let us.

So, by and by, I ran away. I said I would never come home again till I was a pilot and could come in glory. But somehow I could not manage it. I went meekly aboard a few of the boats that lay packed together like sardines at the long St. Louis wharf, and humbly inquired for the pilots, but got only a cold shoulder and short words from mates and clerks. I had to make the best of this sort of treatment for the time being, but I had comforting day-dreams of a future when I should be a great and honored pilot, with plenty of money, and could kill some of these mates and clerks and pay for them.

CHAPTER VII

A DARING DEED

When I returned to the pilot-house St. Louis was gone, and I was lost. Here was a piece of river which was all down in my book, but I could make neither head nor tail of it: you understand, it was turned around. I had seen it when coming up-stream, but I had never faced about to see how it looked when it

was behind me. My heart broke again, for it was plain that I had got to learn this troublesome river *both ways.*

The pilot-house was full of pilots, going down to "look at the river." What is called the "upper river" (the two hundred miles between St. Louis and Cairo, where the Ohio comes in) was low; and the Mississippi changes its channel so constantly that the pilots used to always find it necessary to run down to Cairo to take a fresh look, when their boats were to lie in port a week; that is, when the water was at a low stage. A deal of this "looking at the river" was done by poor fellows who seldom had a berth, and whose only hope of getting one lay in their being always freshly posted and therefore ready to drop into the shoes of some reputable pilot, for a single trip, on account of such pilot's sudden illness, or some other necessity. And a good many of them constantly ran up and down inspecting the river, not because they ever really hoped to get a berth, but because (they being guests of the boat) it was cheaper to "look at the river" than stay ashore and pay board. In time these fellows grew dainty in their tastes, and only infested boats that had an established reputation for setting good tables. All visiting pilots were useful, for they were always ready and willing, winter or summer, night or day, to go out in the yawl and help buoy the channel or assist the boat's pilots in any way they could. They were likewise welcomed because all pilots are tireless talkers, when gathered together, and as they talk only about the river they are always understood and are always interesting. Your true pilot cares nothing about anything on earth but the river, and his pride in his occupation surpasses the pride of kings.

We had a fine company of these river inspectors along this trip. There were eight or ten, and there was abundance of room for them in our great pilot-house. Two or three of them wore polished silk hats, elaborate shirt-fronts, diamond breastpins, kid gloves, and patent-leather boots. They were choice in their English, and bore themselves with a dignity proper to men of solid means and prodigious reputation as pilots. The others were more or less loosely clad, and wore upon their heads tall felt cones that were suggestive of the days of the Commonwealth.

I was a cipher in this august company, and felt subdued, not to say torpid. I was not even of sufficient consequence to assist at the wheel when it was necessary to put the tiller hard down in a hurry; the guest that stood nearest did that when occasion required—and this was pretty much all the time, because of the crookedness of the channel and the scant water. I stood in a corner; and the talk I listened to took the hope all out of me. One visitor said to another:

"Jim, how did you run Plum Point, coming up?"

"It was in the night, there, and I ran it the way one of the boys on the *Diana* told me; started out about fifty yards above the wood-pile on the false point, and held on the cabin under Plum Point till I raised the reef—quarter less twain—then straightened up for the middle bar till I got well abreast the old one-limbed cottonwood in the bend, then got my stern on the cottonwood,

32. **Commonwealth**—the Puritan Commonwealth under Oliver Cromwell. 44. **twain**—two fathoms, or twelve feet; but a "quarter less twain" presumably would be ten and one-half feet.

and head on the low place above the point, and came through a-booming—nine and a half."

"Pretty square crossing, an't it?"

"Yes, but the upper bar's working down fast."

Another pilot spoke up and said:

"I had better water than that, and ran it lower down; started out from the false point—mark twain—raised the second reef abreast the big snag in the bend, and had quarter less twain."

One of the gorgeous ones remarked:

"I don't want to find fault with your leadsmen, but that's a good deal of water for Plum Point, it seems to me."

There was an approving nod all around as this quiet snub dropped on the boaster and "settled" him. And so they went on talk-talk-talking. Meantime, the thing that was running in my mind was, "Now, if my ears hear aright, I have not only to get the names of all the towns and islands and bends, and so on, by heart, but I must even get up a warm personal acquaintanceship with every old snag and one-limbed cottonwood and obscure wood-pile that ornaments the banks of this river for twelve hundred miles; and more than that, I must actually know where these things are in the dark, unless these guests are gifted with eyes that can pierce through two miles of solid blackness. I wish the piloting business was in Jericho and I had never thought of it."

At dusk Mr. Bixby tapped the big bell three times (the signal to land), and the captain emerged from his drawing-room in the forward end of the "texas," and looked up inquiringly. Mr. Bixby said:

"We will lay up here all night, captain."

"Very well, sir."

That was all. The boat came to shore and was tied up for the night. It seemed to me a fine thing that the pilot could do as he pleased, without asking so grand a captain's permission. I took my supper and went immediately to bed, discouraged by my day's observations and experiences. My late voyage's note-booking was but a confusion of meaningless names. It had tangled me all up in a knot every time I had looked at it in the daytime. I now hoped for respite in sleep; but no, it reveled all through my head till sunrise again, a frantic and tireless nightmare.

Next morning I felt pretty rusty and low-spirited. We went booming along, taking a good many chances, for we were anxious to "get out of the river" (as getting out to Cairo was called) before night should overtake us. But Mr. Bixby's partner, the other pilot, presently grounded the boat, and we lost so much time getting her off that it was plain the darkness would overtake us a good long way above the mouth. This was a great misfortune, especially to certain of our visiting pilots, whose boats would have to wait for their return, no matter how long that might be. It sobered the pilot-house talk a good deal. Coming up-stream, pilots did not mind low water or any kind of darkness; nothing stopped them but fog. But down-stream work was different; a boat was too nearly helpless, with a stiff current pushing behind her; so it was not customary to run down-stream at night in low water.

There seemed to be one small hope, however: if we could get through the

intricate and dangerous Hat Island crossing before night, we could venture the rest, for we would have plainer sailing and better water. But it would be insanity to attempt Hat Island at night. So there was a deal of looking at watches all the rest of the day, and a constant ciphering upon the speed we were making; Hat Island was the eternal subject; sometimes hope was high and sometimes we were delayed in a bad crossing, and down it went again. For hours all hands lay under the burden of this suppressed excitement; it was even communicated to me, and I got to feeling so solicitous about Hat Island, and under such an awful pressure of responsibility, that I wished I might have five minutes on shore to draw a good, full, relieving breath, and start over again. We were standing no regular watches. Each of our pilots ran such portions of the river as he had run when coming up-stream, because of his greater familiarity with it; but both remained in the pilot-house constantly.

An hour before sunset Mr. Bixby took the wheel, and Mr. W. stepped aside. For the next thirty minutes every man held his watch in his hand and was restless, silent, and uneasy. At last somebody said, with a doomful sigh:

"Well, yonder's Hat Island—and we can't make it."

All the watches closed with a snap, everybody sighed and muttered something about its being "too bad, too bad—ah, if we could *only* have got here half an hour sooner!" and the place was thick with the atmosphere of disappointment. Some started to go out, but loitered, hearing no bell-tap to land. The sun dipped behind the horizon, the boat went on. Inquiring looks passed from one guest to another; and one who had his hand on the door-knob and had turned it, waited, then presently took away his hand and let the knob turn back again. We bore steadily down the bend. More looks were exchanged, and nods of surprised admiration—but no words. Insensibly the men drew together behind Mr. Bixby, as the sky darkened and one or two dim stars came out. The dead silence and sense of waiting became oppressive. Mr. Bixby pulled the cord, and two deep, mellow notes from the big bell floated off on the night. Then a pause, and one more note was struck. The watchman's voice followed, from the hurricane-deck:

"Labboard lead, there! Stabboard lead!"

The cries of the leadsmen began to rise out of the distance, and were gruffly repeated by the word-passers on the hurricane-deck.

"M-a-r-k three! M-a-r-k three! Quarter-less-three! Half twain! Quarter twain! M-a-r-k twain! Quarter-less—"

Mr. Bixby pulled two bell-ropes, and was answered by faint jinglings far below in the engine-room, and our speed slackened. The steam began to whistle through the gauge-cocks. The cries of the leadsmen went on—and it is a weird sound, always, in the night. Every pilot in the lot was watching now, with fixed eyes, and talking under his breath. Nobody was calm and easy but Mr. Bixby. He would put his wheel down and stand on a spoke, and as the steamer swung into her (to me) utterly invisible marks—for we seemed to be in the midst of a wide and gloomy sea—he would meet and fasten her there. Out of the murmur of half-audible talk, one caught a coherent sentence now and then—such as:

"There; she's over the first reef all right!"

After a pause, another subdued voice:

"Her stern's coming down just *exactly* right, by *George!*"

"Now she's in the marks; over she goes!"

Somebody else muttered:

"Oh, it was done beautiful—*beautiful!*"

Now the engines were stopped altogether, and we drifted with the current. Not that I could see the boat drift, for I could not, the stars being all gone by this time. This drifting was the dismalest work; it held one's heart still. Presently I discovered a blacker gloom than that which surrounded us. It was the head of the island. We were closing right down upon it. We entered its deeper shadow, and so imminent seemed the peril that I was likely to suffocate; and I had the strongest impulse to do *something,* anything, to save the vessel. But still Mr. Bixby stood by his wheel, silent, intent as a cat, and all the pilots stood shoulder to shoulder at his back.

"She'll not make it!" somebody whispered.

The water grew shoaler and shoaler, by the leadsman's cries, till it was down to:

"Eight-and-a-half! E-i-g-h-t feet! E-i-g-h-t feet! Seven-and—"

Mr. Bixby said warningly through his speaking-tube to the engineer:

"Stand by, now!"

"Ay, ay, sir!"

"Seven-and-a-half! Seven feet! *Six*-and—"

We touched bottom! Instantly Mr. Bixby set a lot of bells ringing, shouted through the tube, *"Now,* let her have it—every ounce you've got!" then to his partner, "Put her hard down! snatch her! snatch her!" The boat rasped and ground her way through the sand, hung upon the apex of disaster a single tremendous instant, and then over she went! And such a shout as went up at Mr. Bixby's back never loosened the roof of a pilot-house before!

There was no more trouble after that. Mr. Bixby was a hero that night; and it was some little time, too, before his exploit ceased to be talked about by river-men.

Fully to realize the marvelous precision required in laying the great steamer in her marks in that murky waste of water, one should know that not only must she pick her intricate way through snags and blind reefs, and then shave the head of the island so closely as to brush the overhanging foliage with her stern, but at one place she must pass almost within arm's reach of a sunken and invisible wreck that would snatch the hull timbers from under her if she should strike it, and destroy a quarter of a million dollars' worth of steamboat and cargo in five minutes, and maybe a hundred and fifty human lives into the bargain.

The last remark I heard that night was a compliment to Mr. Bixby, uttered in soliloquy and with unction by one of our guests. He said:

"By the Shadow of Death, but he's a lightning pilot!"

THE MYSTERIOUS STRANGER

A ROMANCE

The Mysterious Stranger was written wholly or in part in 1898, but it was published posthumously in 1916 by Harper and Brothers, with illustrations by N. C. Wyeth. This edition retained Mark Twain's own punctuation and is therefore here reprinted. The story later appeared in *The Mysterious Stranger and Other Stories,* 1922, but with unfortunate alterations in the punctuation and a few changes in the text.

CHAPTER I

It was in 1590—winter. Austria was far away from the world, and asleep; it was still the Middle Ages in Austria, and promised to remain so forever. Some even set it away back centuries upon centuries and said that by the mental and spiritual clock it was still the Age of Belief in Austria. But they meant it as a compliment, not a slur, and it was so taken, and we were all proud of it. I remember it well, although I was only a boy; and I remember, too, the pleasure it gave me.

Yes, Austria was far from the world, and asleep, and our village was in the middle of that sleep, being in the middle of Austria. It drowsed in peace in the deep privacy of a hilly and woodsy solitude where news from the world hardly ever came to disturb its dreams, and was infinitely content. At its front flowed the tranquil river, its surface painted with cloud-forms and the reflections of drifting arks and stone-boats; behind it rose the woody steeps to the base of the lofty precipice; from the top of the precipice frowned a vast castle, its long stretch of towers and bastions mailed in vines; beyond the river, a league to the left, was a tumbled expanse of forest-clothed hills cloven by winding gorges where the sun never penetrated; and to the right a precipice overlooked the river, and between it and the hills just spoken of lay a far-reaching plain dotted with little homesteads nested among orchards and shade trees.

The whole region for leagues around was the hereditary property of a prince, whose servants kept the castle always in perfect condition for occupancy, but neither he nor his family came there oftener than once in five years. When they came it was as if the lord of the world had arrived, and had brought all the glories of its kingdoms along; and when they went they left a calm behind which was like the deep sleep which follows an orgy.

Eseldorf was a paradise for us boys. We were not overmuch pestered with schooling. Mainly we were trained to be good Christians; to revere the Virgin, the Church, and the saints above everything. Beyond these matters we were not required to know much; and, in fact, not allowed to. Knowledge was not good for the common people, and could make them discontented with the lot which God had appointed for them, and God would not endure discon-

29. **Eseldorf**—i.e., Donkeytown.

tentment with His plans. We had two priests. One of them, Father Adolf, was a very zealous and strenuous priest, much considered.

There may have been better priests, in some ways, than Father Adolf, but there was never one in our commune who was held in more solemn and awful respect. This was because he had absolutely no fear of the Devil. He was the only Christian I have ever known of whom that could be truly said. People stood in deep dread of him on that account; for they thought that there must be something supernatural about him, else he could not be so bold and so confident. All men speak in bitter disapproval of the Devil but they do it reverently, not flippantly; but Father Adolf's way was very different; he called him by every name he could lay his tongue to, and it made every one shudder that heard him; and often he would even speak of him scornfully and scoffingly; then the people crossed themselves and went quickly out of his presence, fearing that something fearful might happen.

Father Adolf had actually met Satan face to face more than once, and defied him. This was known to be so. Father Adolf said it himself. He never made any secret of it, but spoke it right out. And that he was speaking true there was proof in at least one instance, for on that occasion he quarreled with the enemy, and intrepidly threw his bottle at him; and there, upon the wall of his study, was the ruddy splotch where it struck and broke.

But it was Father Peter, the other priest, that we all loved best and were sorriest for. Some people charged him with talking around in conversation that God was all goodness and would find a way to save all his poor human children. It was a horrible thing to say, but there was never any absolute proof that Father Peter said it; and it was out of character for him to say it, too, for he was always good and gentle and truthful. He wasn't charged with saying it in the pulpit, where all the congregation could hear and testify, but only outside, in talk; and it is easy for enemies to manufacture *that*. Father Peter had an enemy and a very powerful one, the astrologer who lived in a tumbled old tower up the valley, and put in his nights studying the stars. Every one knew he could foretell wars and famines, though that was not so hard, for there was always a war and generally a famine somewhere. But he could also read any man's life through the stars in a big book he had, and find lost property, and every one in the village except Father Peter stood in awe of him. Even Father Adolf, who had defied the Devil, had a wholesome respect for the astrologer when he came through our village wearing his tall, pointed hat and his long, flowing robe with stars on it, carrying his big book and a staff which was known to have magic power. The bishop himself sometimes listened to the astrologer, it was said, for, besides studying the stars and prophesying, the astrologer made a great show of piety, which would impress the bishop, of course.

But Father Peter took no stock in the astrologer. He denounced him openly as a charlatan—a fraud with no valuable knowledge of any kind, or powers beyond those of an ordinary and rather inferior human being, which naturally made the astrologer hate Father Peter and wish to ruin him. It was the astrologer, as we all believed, who originated the story about Father Peter's shocking remark and carried it to the bishop. It was said that Father Peter

had made the remark to his niece, Marget, though Marget denied it and implored the bishop to believe her and spare her old uncle from poverty and disgrace. But the bishop wouldn't listen. He suspended Father Peter indefinitely, though he wouldn't go so far as to excommunicate him on the evidence of only one witness; and now Father Peter had been out a couple of years, and our other priest, Father Adolf, had his flock.

Those had been hard years for the old priest and Marget. They had been favorites, but of course that changed when they came under the shadow of the bishop's frown. Many of their friends fell away entirely, and the rest became cool and distant. Marget was a lovely girl of eighteen when the trouble came, and she had the best head in the village, and the most in it. She taught the harp, and earned all her clothes and pocket money by her own industry. But her scholars fell off one by one now; she was forgotten when there were dances and parties among the youth of the village; the young fellows stopped coming to the house, all except Wilhelm Meidling—and he could have been spared; she and her uncle were sad and forlorn in their neglect and disgrace, and the sunshine was gone out of their lives. Matters went worse and worse, all through the two years. Clothes were wearing out, bread was harder and harder to get. And now, at last, the very end was come. Solomon Isaacs had lent all the money he was willing to put on the house, and gave notice that to-morrow he would foreclose.

CHAPTER II

Three of us boys were always together, and had been so from the cradle, being fond of one another from the beginning, and this affection deepened as the years went on—Nikolaus Bauman, son of the principal judge of the local court; Seppi Wohlmeyer, son of the keeper of the principal inn, the "Golden Stag," which had a nice garden, with shade trees reaching down to the riverside, and pleasure boats for hire; and I was the third—Theodor Fischer, son of the church organist, who was also leader of the village musicians, teacher of the violin, composer, tax-collector of the commune, sexton, and in other ways a useful citizen, and respected by all. We knew the hills and the woods as well as the birds knew them; for we were always roaming them when we had leisure—at least, when we were not swimming or boating or fishing, or playing on the ice or sliding down hill.

And we had the run of the castle park, and very few had that. It was because we were pets of the oldest servingman in the castle——Felix Brandt; and often we went there, nights, to hear him talk about old times and strange things, and to smoke with him (he taught us that) and to drink coffee; for he had served in the wars, and was at the siege of Vienna; and there, when the Turks were defeated and driven away, among the captured things were bags of coffee, and the Turkish prisoners explained the character of it and how to make a pleasant drink out of it, and now he always kept coffee by him, to drink himself and also to astonish the ignorant with. When it stormed

30. commune—here, loosely used for "district." **39. siege of Vienna**—In 1529 a Turkish army unsuccessfully besieged Vienna.

he kept us all night; and while it thundered and lightened outside he told us about ghosts and horrors of every kind, and of battles and murders and mutilations, and such things, and made it pleasant and cozy inside; and he told these things from his own experience largely. He had seen many ghosts in his time, and witches and enchanters, and once he was lost in a fierce storm at midnight in the mountains, and by the glare of the lightning had seen the Wild Huntsman rage on the blast with his specter dogs chasing after him through the driving cloud-rack. Also he had seen an incubus once, and several times he had seen the great bat that sucks the blood from the necks of people while they are asleep, fanning them softly with its wings and so keeping them drowsy till they die.

He encouraged us not to fear supernatural things, such as ghosts, and said they did no harm, but only wandered about because they were lonely and distressed and wanted kindly notice and compassion; and in time we learned not to be afraid, and even went down with him in the night to the haunted chamber in the dungeons of the castle. The ghost appeared only once, and it went by very dim to the sight and floated noiseless through the air, and then disappeared; and we scarcely trembled, he had taught us so well. He said it came up sometimes in the night and woke him by passing its clammy hand over his face, but it did him no hurt; it only wanted sympathy and notice. But the strangest thing was that he had seen angels—actual angels out of heaven—and had talked with them. They had no wings, and wore clothes, and talked and looked and acted just like any natural person, and you would never know them for angels except for the wonderful things they did which a mortal could not do, and the way they suddenly disappeared while you were talking with them, which was also a thing which no mortal could do. And he said they were pleasant and cheerful, not gloomy and melancholy, like ghosts.

It was after that kind of a talk one May night that we got up next morning and had a good breakfast with him and then went down and crossed the bridge and went away up into the hills on the left to a woody hill-top which was a favorite place of ours, and there we stretched out on the grass in the shade to rest and smoke and talk over these strange things, for they were in our minds yet, and impressing us. But we couldn't smoke, because we had been heedless and left our flint and steel behind.

Soon there came a youth strolling toward us through the trees, and he sat down and began to talk in a friendly way, just as if he knew us. But we did not answer him, for he was a stranger and we were not used to strangers and were shy of them. He had new and good clothes on, and was handsome and had a winning face and a pleasant voice, and was easy and graceful and unembarrassed, not slouchy and awkward and diffident, like other boys. We wanted to be friendly with him, but didn't know how to begin. Then I thought of the pipe, and wondered if it would be taken as kindly meant if I offered

7. **Wild Huntsman**—According to a widely disseminated legend a spectral huntsman with his dogs frequents certain forests, usually in stormy weather, because, when he was alive, he would not suffer Jesus to drink out of a horse-trough, and he must accordingly ride forever. **8. incubus**—an evil spirit supposed to descend upon sleeping persons, especially upon women. The "great bat" in the next line is the equally legendary vampire bat.

it to him. But I remembered that we had no fire, so I was sorry and disappointed. But he looked up bright and pleased, and said:

"Fire? Oh, that is easy; I will furnish it."

I was so astonished I couldn't speak, for I had not said anything. He took the pipe and blew his breath on it, and the tobacco glowed red, and spirals of blue smoke rose up. We jumped up and were going to run, for that was natural; and we did run a few steps, although he was yearningly pleading for us to stay, and giving us his word that he would not do us any harm, but only wanted to be friends with us and have company. So we stopped and stood, and wanted to go back, being full of curiosity and wonder, but afraid to venture. He went on coaxing, in his soft, persuasive way; and when we saw that the pipe did not blow up and nothing happened, our confidence returned by little and little, and presently our curiosity got to be stronger than our fear, and we ventured back—but slowly, and ready to fly at any alarm.

He was bent on putting us at ease, and he had the right art; one could not remain doubtful and timorous where a person was so earnest and simple and gentle, and talked so alluringly as he did; no, he won us over, and it was not long before we were content and comfortable and chatty, and glad we had found this new friend. When the feeling of constraint was all gone we asked him how he had learned to do that strange thing, and he said he hadn't learned it at all; it came natural to him—like other things—other curious things.

"What ones?"

"Oh, a number; I don't know how many."

"Will you let us see you do them?"

"Do—please!" the others said.

"You won't run away again?"

"No—indeed we won't. Please do. Won't you?"

"Yes, with pleasure; but you mustn't forget your promise, you know."

We said we wouldn't, and he went to a puddle and came back with water in a cup which he had made out of a leaf, and blew upon it and threw it out, and it was a lump of ice the shape of the cup. We were astonished and charmed, but not afraid any more; we were very glad to be there, and asked him to go on and do some more things. And he did. He said he would give us any kind of fruit we liked, whether it was in season or not. We all spoke at once:

"Orange!"

"Apple!"

"Grapes!"

"They are in your pockets," he said, and it was true. And they were of the best, too, and we ate them and wished we had more, though none of us said so.

"You will find them where those came from," he said, "and everything else your appetites call for; and you need not name the thing you wish; as long as I am with you, you have only to wish and find."

And he said true. There was never anything so wonderful and so interesting. Bread, cakes, sweets, nuts—whatever one wanted, it was there. He ate nothing himself, but sat and chatted, and did one curious thing after another to amuse us. He made a tiny toy squirrel out of clay, and it ran up a tree and sat on a limb overhead and barked down at us. Then he made a dog that was not much

larger than a mouse, and it treed the squirrel and danced about the tree, excited and barking, and was as alive as any dog could be. It frightened the squirrel from tree to tree and followed it up until both were out of sight in the forest. He made birds out of clay and set them free, and they flew away, singing.

At last I made bold to ask him to tell us who he was.

"An angel," he said, quite simply, and set another bird free and clapped his hands and made it fly away.

A kind of awe fell upon us when we heard him say that, and we were afraid again; but he said we need not be troubled, there was no occasion for us to be afraid of an angel, and he liked us, anyway. He went on chatting as simply and unaffectedly as ever; and while he talked he made a crowd of little men and women the size of your finger, and they went diligently to work and cleared and leveled off a space a couple of yards square in the grass and began to build a cunning little castle in it, the women mixing the mortar and carrying it up the scaffoldings in pails on their heads, just as our work-women have always done, and the men laying the courses of masonry—five hundred of these toy people swarming briskly about and working diligently and wiping the sweat off their faces as natural as life. In the absorbing interest of watching those five hundred little people make the castle grow step by step and course by course, and take shape and symmetry, that feeling and awe soon passed away and we were quite comfortable and at home again. We asked if we might make some people, and he said yes, and told Seppi to make some cannon for the walls, and told Nikolaus to make some halberdiers with breastplates and greaves and helmets, and I was to make some cavalry, with horses, and in allotting these tasks he called us by our names, but did not say how he knew them. Then Seppi asked him what his own name was, and he said, tranquilly, "Satan," and held out a chip and caught a little woman on it who was falling from the scaffolding and put her back where she belonged, and said, "She is an idiot to step backward like that and not notice what she is about."

It caught us suddenly, that name did, and our work dropped out of our hands and broke to pieces—a cannon, a halberdier, and a horse. Satan laughed, and asked what was the matter. I said, "Nothing, only it seemed a strange name for an angel." He asked why.

"Because it's—it's—well, it's his name, you know."

"Yes—he is my uncle."

He said it placidly, but it took our breath for a moment and made our hearts beat. He did not seem to notice that, but mended our halberdiers and things with a touch, handing them to us finished, and said, "Don't you remember? —he was an angel himself, once."

"Yes—it's true," said Seppi; "I didn't think of that."

"Before the Fall he was blameless."

"Yes," said Nikolaus, "he was without sin."

"It is a good family—ours," said Satan; "there is not a better. He is the only member of it that has ever sinned."

16. courses—continuous layers. **23. halberdiers**—soldiers armed with a halberd or halbert, a combined spear and battle-axe. **24. greaves**—armor for the lower half of the legs. **41. Fall**—i.e., the fall of Lucifer, not the fall of man. See Isa. 14:12-15.

I should not be able to make any one understand how exciting it all was. You know that kind of quiver that trembles around through you when you are seeing something so strange and enchanting and wonderful that it is just a fearful joy to be alive and look at it; and you know how you gaze, and your lips turn dry and your breath comes short, but you wouldn't be anywhere but there, not for the world. I was bursting to ask one question—I had it on my tongue's end and could hardly hold it back—but I was ashamed to ask it; it might be a rudeness. Satan set an ox down that he had been making and smiled up at me and said:

"It wouldn't be a rudeness, and I should forgive it if it was. Have I seen him? Millions of times. From the time that I was a little child a thousand years old I was his second favorite among the nursery angels of our blood and lineage—to use a human phrase—yes, from that time until the Fall, eight thousand years, measured as you count time."

"Eight—thousand!"

"Yes." He turned to Seppi, and went on as if answering something that was in Seppi's mind, "Why, naturally I look like a boy, for that is what I am. With us what you call time is a spacious thing; it takes a long stretch of it to grow an angel to full age." There was a question in my mind, and he turned to me and answered it, "I am sixteen thousand years old—counting as you count." Then he turned to Nikolaus and said: "No, the Fall did not affect me nor the rest of the relationship. It was only he that I was named for who ate of the fruit of the tree and then beguiled the man and the woman with it. We others are still ignorant of sin; we are not able to commit it; we are without blemish, and shall abide in that estate always. We—" Two of the little workmen were quarreling, and in buzzing little bumblebee voices they were cursing and swearing at each other; now came blows and blood; then they locked themselves together in a life-and-death struggle. Satan reached out his hand and crushed the life out of them with his fingers, threw them away, wiped the red from his fingers on his handkerchief, and went on talking where he had left off: "We cannot do wrong; neither have we any disposition to do it, for we do not know what it is."

It seemed a strange speech, in the circumstances, but we barely noticed that, we were so shocked and grieved at the wanton murder he had committed—for murder it was, that was its true name, and it was without palliation or excuse, for the men had not wronged him in any way. It made us miserable, for we loved him, and had thought him so noble and so beautiful and gracious, and had honestly believed he was an angel; and to have him do this cruel thing—ah, it lowered him so, and we had had such pride in him. He went right on talking, just as if nothing had happened, telling about his travels and the interesting things he had seen in the big worlds of our solar system and of other solar systems far away in the remoteness of space, and about the customs of the immortals that inhabit them, somehow fascinating us, enchanting us, charming us in spite of the pitiful scene that was now under our eyes, for the wives of the little dead men had found the crushed and shapeless bodies and were crying over them, and sobbing and lamenting, and a priest was kneeling there with his hands crossed upon his breast, praying; and crowds and crowds of pitying

friends were massed about them, reverently uncovered, with their bare heads bowed, and many with the tears running down—a scene which Satan paid no attention to until the small noise of the weeping and praying began to annoy them, then he reached out and took the heavy board seat out of our swing and brought it down and mashed all those people into the earth just as if they had been flies, and went on talking just the same.

An angel, and kill a priest! An angel who did not know how to do wrong, and yet destroys in cold blood hundreds of helpless poor men and women who had never done him any harm! It made us sick to see that awful deed, and to think that none of those poor creatures was prepared except the priest, for none of them had ever heard a mass or seen a church. And we were witnesses; we had seen these murders done and it was our duty to tell, and let the law take its course.

But he went on talking right along, and worked his enchantments upon us again with that fatal music of his voice. He made us forget everything; we could only listen to him, and love him, and be his slaves, to do with us as he would. He made us drunk with the joy of being with him, and of looking into the heaven of his eyes, and of feeling the ecstasy that thrilled along our veins from the touch of his hand.

CHAPTER III

The Stranger had seen everything, he had been everywhere, he knew everything, and he forgot nothing. What another must study, he learned at a glance; there were no difficulties for him. And he made things live before you when he told about them. He saw the world made; he saw Adam created; he saw Samson surge against the pillars and bring the temple down in ruins about him; he saw Cæsar's death; he told of the daily life in heaven; he had seen the damned writhing in the red waves of hell; and he made us see all these things, and it was as if we were on the spot and looking at them with our own eyes. And we felt them, too, but there was no sign that they were anything to him beyond mere entertainments. Those visions of hell, those poor babes and women and girls and lads and men shrieking and supplicating in anguish—why, we could hardly bear it, but he was as bland about it as if it had been so many imitation rats in an artificial fire.

And always when he was talking about men and women here on the earth and their doings—even their grandest and sublimest—we were secretly ashamed, for his manner showed that to him they and their doings were of paltry poor consequence; often you would think he was talking about flies, if you didn't know. Once he even said, in so many words, that our people down here were quite interesting to him, notwithstanding they were so dull and ignorant and trivial and conceited, and so diseased and rickety and such a shabby, poor, worthless lot all around. He said it in a quite matter-of-course way and without bitterness, just as a person might talk about bricks or manure or any other

4. them—so the text, but "him" seems to be meant. **24-25. Adam . . . Samson**—*cf.* Gen. 2:7; Judg 16:25-31. **26. Cæsar's death**—*cf.* Shakespeare, *Julius Caesar,* Act III, sc. 1. **40. rickety**—i.e., suffering from rickets (rachitis), a softening and deformation of the bones, especially of the legs.

thing that was of no consequence and hadn't feelings. I could see he meant no offense, but in my thoughts I set it down as not very good manners.

"Manners!" he said. "Why, it is merely the truth, and truth is good manners; manners are a fiction. The castle is done. Do you like it?"

Any one would have been obliged to like it. It was lovely to look at, it was so shapely and fine, and so cunningly perfect in all its particulars, even to the little flags waving from the turrets. Satan said we must put the artillery in place now, and station the halberdiers and display the cavalry. Our men and horses were a spectacle to see, they were so little like what they were intended for; for, of course, we had no art in making such things. Satan said they were the worst he had seen; and when he touched them and made them alive, it was just ridiculous the way they acted, on account of their legs not being of uniform lengths. They reeled and sprawled around as if they were drunk, and endangered everybody's lives around them, and finally fell over and lay helpless and kicking. It made us all laugh, though it was a shameful thing to see. The guns were charged with dirt, to fire a salute, but they were so crooked and so badly made that they all burst when they went off, and killed some of the gunners and crippled the others. Satan said we would have a storm now, and an earthquake, if we liked, but we must stand off a piece, out of danger. We wanted to call the people away, too, but he said never mind them; they were of no consequence, and we could make more, some time or other, if we needed them.

A small storm-cloud began to settle down black over the castle, and the miniature lightning and thunder began to play, and the ground to quiver, and the wind to pipe and wheeze, and the rain to fall, and all the people flocked into the castle for shelter. The cloud settled down blacker and blacker, and one could see the castle only dimly through it; the lightning blazed out flash upon flash and pierced the castle and set it on fire, and the flames shone out red and fierce through the cloud, and the people came flying out, shrieking, but Satan brushed them back, paying no attention to our begging and crying and imploring; and in the midst of the howling of the wind and volleying of the thunder the magazine blew up, the earthquake rent the ground wide, and the castle's wreck and ruin tumbled into the chasm, which swallowed it from sight, and closed upon it, with all that innocent life, not one of the five hundred poor creatures escaping. Our hearts were broken; we could not keep from crying.

"Don't cry," Satan said; "they were of no value."

"B .t they are gone to hell!"

"Oh, it is no matter; we can make plenty more."

It was of no use to try to move him; evidently he was wholly without feelings and could not understand. He was full of bubbling spirits, and as gay as if this were a wedding instead of a fiendish massacre. And he was bent on making us feel as he did, and of course his magic accomplished his desire. It was no trouble to him; he did whatever he pleased with us. In a little while we were dancing on that grave, and he was playing to us on a strange, sweet instrument which he took out of his pocket; and the music—but there is no music like that, unless perhaps in heaven, and that was where he brought it

from, he said. It made one mad, for pleasure; and we could not take our eyes from him, and the looks that went out of our eyes came from our hearts, and their dumb speech was worship. He brought the dance from heaven, too, and the bliss of paradise was in it.

Presently he said he must go away on an errand. But we could not bear the thought of it, and clung to him, and pleaded with him to stay; and that pleased him, and he said so, and said he would not go yet, but would wait a little while and we would sit down and talk a few minutes longer; and he told us Satan was only his real name, and he was to be known by it to us alone, but he had chosen another one to be called by in the presence of others; just a common one, such as people have—Philip Traum.

It sounded so odd and mean for such a being! But it was his decision, and we said nothing; his decision was sufficient.

We had seen wonders this day; and my thoughts began to run on the pleasure it would be to tell them when I got home, but he noticed those thoughts, and said:

"No, all these matters are a secret among us four. I do not mind your trying to tell them, if you like, but I will protect your tongues and nothing of the secret will escape from them."

It was a disappointment, but it couldn't be helped, and it cost us a sigh or two. We talked pleasantly along, and he was always reading our thoughts and responding to them, and it seemed to me that this was the most wonderful of all the things he did, but he interrupted my musings, and said:

"No, it would be wonderful for you, but it is not wonderful for me. I am not limited like you. I am not subject to human conditions. I can measure and understand your human weaknesses, for I have studied them; but I have none of them. My flesh is not real, although it would seem firm to your touch; my clothes are not real; I am a spirit. Father Peter is coming.["] We looked around, but did not see any one. "He is not in sight yet, but you will see him presently."

"Do you know him, Satan?"

"No."

"Won't you talk with him when he comes? He is not ignorant and dull, like us, and he would so like to talk with you. Will you?"

"Another time, yes, but not now. I must go on my errand after a little. There he is now; you can see him. Sit still, and don't say anything."

We looked up and saw Father Peter approaching through the chestnuts. We three were sitting together in the grass, and Satan sat in front of us in the path. Father Peter came slowly along with his head down, thinking, and stopped within a couple of yards of us and took off his hat and got out his silk handkerchief, and stood there mopping his face and looking as if he were going to speak to us, but he didn't. Presently he muttered, "I can't think what brought me here; it seems as if I were in my study a minute ago—but I suppose I have been dreaming along for an hour and have come all this stretch without noticing; for I am not myself in these troubled days." Then he went mumbling along to himself and walked straight through Satan, just as if

11. **Traum**—German for "Dream."

nothing were there. It made us catch our breath to see it. We had the impulse to cry out, the way you nearly always do when a startling thing happens, but something mysteriously restrained us and we remained quiet, only breathing fast. Then the trees hid Father Peter after a little, and Satan said:

"It is as I told you—I am only a spirit."

"Yes, one perceives it now," said Nikolaus, "but we are not spirits. It is plain he did not see you, but were we invisible, too? He looked at us, but he didn't seem to see us."

"No, none of us was visible to him, for I wished it so."

It seemed almost too good to be true, that we were actually seeing these romantic and wonderful things, and that it was not a dream. And there he sat, looking just like anybody—so natural and simple and charming, and chatting along again the same as ever, and—well, words cannot make you understand what we felt. It was an ecstasy; and an ecstasy is a thing that will not go into words; it feels like music, and one cannot tell about music so that another person can get the feeling of it. He was back in the old ages once more now, and making them live before us. He had seen so much, so much! It was just a wonder to look at him and try to think how it must seem to have such experience behind one.

But it made you seem sorrowfully trivial, and the creature of a day, and such a short and paltry day, too. And he didn't say anything to raise up your drooping pride—no, not a word. He always spoke of men in the same old indifferent way—just as one speaks of bricks and manure-piles and such things; you could see that they were of no consequence to him, one way or the other. He didn't mean to hurt us, you could see that; just as we don't mean to insult a brick when we disparage it; a brick's emotions are nothing to us; it never occurs to us to think whether it has any or not.

Once when he was bunching the most illustrious kings and conquerors and poets and prophets and pirates and beggars together—just a brick-pile—I was shamed into putting in a word for man, and asked him why he made so much difference between men and himself. He had to struggle with that a moment; he didn't seem to understand how I could ask such a strange question. Then he said:

"The difference between man and me? The difference between a mortal and an immortal? between a cloud and a spirit?" He picked up a wood-louse that was creeping along a piece of bark: "What is the difference between Cæsar and this?"

I said, "One cannot compare things which by their nature and by the interval between them are not comparable."

"You have answered your own question," he said. "I will expand it. Man is made of dirt—I saw him made. I am not made of dirt. Man is a museum of diseases, a home of impurities; he comes to-day and is gone to-morrow; he begins as dirt and departs as stench; I am of the aristocracy of the Imperishables. And man has the *Moral Sense*. You understand? He has the *Moral Sense*. That would seem to be difference enough between us, all by itself."

He stopped there, as if that settled the matter. I was sorry, for at that time I had but a dim idea of what the Moral Sense was. I merely knew that we

were proud of having it, and when he talked like that about it, it wounded me, and I felt as a girl feels who thinks her dearest finery is being admired and then overhears strangers making fun of it. For a while we were all silent, and I, for one, was depressed. Then Satan began to chat again, and soon he was sparkling along in such a cheerful and vivacious vein that my spirits rose once more. He told some very cunning things that put us in a gale of laughter; and when he was telling about the time that Samson tied the torches to the foxes' tails and set them loose in the Philistines' corn, and Samson sitting on the fence slapping his thighs and laughing, with the tears running down his cheeks, and lost his balance and fell off the fence, the memory of that picture got him to laughing, too, and we did have a most lovely and jolly time. By and by he said:

"I am going on my errand now."

"Don't!" we all said. "Don't go; stay with us. You won't come back."

"Yes, I will; I give you my word."

"When? To-night? Say when."

"It won't be long. You will see."

"We like you."

"And I you. And as a proof of it I will show you something fine to see. Usually when I go I merely vanish; but now I will dissolve myself and let you see me do it."

He stood up and it was quickly finished. He thinned away and thinned away until he was a soap-bubble, except that he kept his shape. You could see the bushes through him as clearly as you see things through a soap-bubble, and all over him played and flashed the delicate iridescent colors of the bubble, and along with them was that thing shaped like a window-sash which you always see on the globe of the bubble. You have seen a bubble strike the carpet and lightly bound along two or three times before it bursts. He did that. He sprang—touched the grass—bounded—floated along—touched again—and so on, and presently exploded—puff! and in his place was vacancy.

It was a strange and beautiful thing to see. We did not say anything, but sat wondering and dreaming and blinking; and finally Seppi roused up and said, mournfully sighing:

"I suppose none of it has happened."

Nikolaus sighed and said about the same.

I was miserable to hear them say it, for it was the same cold fear that was in my own mind. Then we saw poor old Father Peter wandering along back, with his head bent down, searching the ground. When he was pretty close to us he looked up and saw us, and said, "How long have you been here, boys?"

"A little while, Father."

"Then it is since I came by, and maybe you can help me. Did you come up by the path?"

"Yes, Father."

"That is good. I came the same way. I have lost my wallet. There wasn't much in it, but a very little is much to me, for it was all I had. I suppose you haven't seen anything of it?"

7 ff. **Samson**—*cf.* Judg. 15:4-8.

"No, Father, but we will help you hunt."

"It is what I was going to ask you. Why, here it is!"

We hadn't noticed it; yet there it lay, right where Satan stood when he began to melt—if he did melt and it wasn't a delusion. Father Peter picked it up and looked very much surprised.

"It is mine," he said, "but not the contents. This is fat; mine was flat; mine was light; this is heavy." He opened it; it was stuffed as full as it could hold with gold coins. He let us gaze our fill; and of course we did gaze, for we had never seen so much money at one time before. All our mouths came open to say "Satan did it!" but nothing came out. There it was, you see—we couldn't tell what Satan didn't want told; he had said so himself.

"Boys, did you do this?"

It made us laugh. And it made him laugh, too, as soon as he thought what a foolish question it was.

"Who has been here?"

Our mouths came open to answer, but stood so for a moment, because we couldn't say "Nobody," for it wouldn't be true, and the right word didn't seem to come; then I thought of the right one, and said it:

"Not a human being."

"That is so," said the others, and let their mouths go shut.

"It is not so," said Father Peter, and looked at us very severely. "I came by here a while ago, and there was no one here, but that is nothing; some one has been here since. I don't mean to say that the person didn't pass here before you came, and I don't mean to say that you saw him, but some one did pass, that I know. On your honor—you saw no one?"

"Not a human being."

"That is sufficient; I know you are telling me the truth."

He began to count the money on the path, we on our knees eagerly helping to stack it in little piles.

"It's eleven hundred ducats odd!" he said. "Oh dear! if it were only mine—and I need it so!" and his voice broke and his lips quivered.

"It is yours, sir!" we all cried out at once, "every heller!"

"No—it isn't mine. Only four ducats are mine; the rest . . . !" He fell to dreaming, poor old soul, and caressing some of the coins in his hands, and forgot where he was, sitting there on his heels with his old gray head bare; it was pitiful to see. "No," he said, waking up, "it isn't mine. I can't account for it. I think some enemy . . . it must be a trap."

Nikolaus said: "Father Peter, with the exception of the astrologer you haven't a real enemy in the village—nor Marget, either. And not even a half-enemy that's rich enough to chance eleven hundred ducats to do you a mean turn. I'll ask you if that's so or not?"

He couldn't get around that argument, and it cheered him up. "But it isn't mine, you see—it isn't mine, in any case."

He said it in a wistful way, like a person that wouldn't be sorry, but glad, if anybody would contradict him.

"It is yours, Father Peter, and we are witness to it. Aren't we, boys?"

32. **heller**—i.e., "every nickel." A heller was a small silver Austrian coin.

"Yes, we are—and we'll stand by it, too."

"Bless your hearts, you do almost persuade me; you do, indeed. If I had only a hundred-odd ducats of it! The house is mortgaged for it, and we've no home for our heads if we don't pay to-morrow. And that four ducats is all we've got in the—"

"It's yours, every bit of it, and you've got to take it—we are bail that it's all right. Aren't we, Theodor? Aren't we, Seppi?"

We two said yes, and Nikolaus stuffed the money back into the shabby old wallet and made the owner take it. So he said he would use two hundred of it, for his house was good enough security for that, and would put the rest at interest till the rightful owner came for it; and on our side we must sign a paper showing how he got the money—a paper to show to the villagers as proof that he had not got out of his troubles dishonestly.

CHAPTER IV

It made immense talk next day, when Father Peter paid Solomon Isaacs in gold and left the rest of the money with him at interest. Also, there was a pleasant change; many people called at the house to congratulate him, and a number of cool old friends became kind and friendly again; and to top all, Marget was invited to a party.

And there was no mystery; Father Peter told the whole circumstance just as it happened, and said he could not account for it, only it was the plain hand of Providence, so far as he could see.

One or two shook their heads and said privately it looked more like the hand of Satan; and really that seemed a surprisingly good guess for ignorant people like that. Some came slyly buzzing around and tried to coax us boys to come out and "tell the truth"; and promised they wouldn't ever tell but only wanted to know for their own satisfaction, because the whole thing was so curious. They even wanted to buy the secret, and pay money for it; and if we could have invented something that would answer—but we couldn't; we hadn't the ingenuity, so we had to let the chance go by, and it was a pity.

We carried that secret around without any trouble, but the other one, the big one, the splendid one, burned the very vitals of us, it was so hot to get out and we so hot to let it out and astonish people with it. But we had to keep it in; in fact, it kept itself in. Satan said it would, and it did. We went off every day and got to ourselves in the woods so that we could talk about Satan, and really that was the only subject we thought of or cared anything about; and day and night we watched for him and hoped he would come, and we got more and more impatient all the time. We hadn't any interest in the other boys any more, and wouldn't take part in their games and enterprises. They seemed so tame, after Satan; and their doings so trifling and commonplace after his adventures in antiquity and the constellations, and his miracles and meltings and explosions, and all that.

During the first day we were in a state of anxiety on account of one thing, and we kept going to Father Peter's house on one pretext or another to keep

6. **bail**—security.

track of it. That was the gold coin; we were afraid it would crumble and turn to dust, like fairy money. If it did— But it didn't. At the end of the day no complaint had been made about it, so after that we were satisfied that it was real gold, and dropped the anxiety out of our minds.

There was a question which we wanted to ask Father Peter, and finally we went there the second evening, a little diffidently, after drawing straws, and I asked it as casually as I could, though it did not sound as casual as I wanted, because I didn't know how:

"What is the Moral Sense, sir?"

He looked down, surprised, over his great spectacles, and said, "Why, it is the faculty which enables us to distinguish good from evil."

It threw some light, but not a glare, and I was a little disappointed, also to some degree embarrassed. He was waiting for me to go on, so, in default of anything else to say, I asked, "Is it valuable?"

"Valuable? Heavens! lad, it is the one thing that lifts man above the beasts that perish and makes him heir to immortality!"

This did not remind me of anything further to say, so I got out, with the other boys, and we went away with that indefinite sense you have often had of being filled but not fatted. They wanted me to explain but I was tired.

We passed out through the parlor, and there was Marget at the spinet teaching Marie Lueger. So one of the deserting pupils was back; and an influential one too; the others would follow. Marget jumped up and ran and thanked us again with tears in her eyes—this was the third time—for saving her and her uncle from being turned into the street, and we told her again we hadn't done it; but that was her way, she never could be grateful enough for anything a person did for her; so we let her have her say. And as we passed through the garden, there was Wilhelm Meidling sitting there waiting, for it was getting toward the edge of the evening, and he would be asking Marget to take a walk along the river with him when she was done with the lesson. He was a young lawyer, and succeeding fairly well and working his way along, little by little. He was very fond of Marget, and she of him. He had not deserted along with the others, but had stood his ground all through. His faithfulness was not lost on Marget and her uncle. He hadn't so very much talent but he was handsome and good, and these are a kind of talents themselves and help along. He asked us how the lesson was getting along, and we told him it was about done. And maybe it was so; we didn't know anything about it, but we judged it would please him, and it did, and it didn't cost us anything.

CHAPTER V

On the fourth day comes the astrologer from his crumbling old tower up the valley, where he had heard the news, I reckon. He had a private talk with us, and we told him what we could, for we were mightily in dread of him. He sat there studying and studying awhile to himself; then he asked:

"How many ducats did you say?"

"Eleven hundred and seven, sir."

Then he said, as if he were talking to himself: "It is ver-y singular. Yes . . .

very strange. A curious coincidence." Then he began to ask questions, and went over the whole ground from the beginning, we answering. By and by he said: "Eleven hundred and six ducats. It is a large sum."

"Seven," said Seppi, correcting him.

"Oh, seven, was it? Of course a ducat more or less isn't of consequence, but you said eleven hundred and six before."

It would not have been safe for us to say he was mistaken, but we knew he was. Nikolaus said, "We ask pardon for the mistake, but we meant to say seven."

"Oh, it is no matter, lad; it was merely that I noticed the discrepancy. It is several days, and you cannot be expected to remember precisely. One is apt to be inexact when there is no particular circumstance to impress the count upon the memory."

"But there was one, sir," said Seppi, eagerly.

"What was it, my son?" asked the astrologer, indifferently.

"First, we all counted the piles of coin, each in turn, and all made it the same—eleven hundred and six. But I had slipped one out, for fun, when the count began, and now I slipped it back and said, 'I think there is a mistake—there are eleven hundred and seven; let us count again.' We did, and of course I was right. They were astonished; then I told how it came about."

The astrologer asked us if this was so, and we said it was.

"That settles it," he said. "I know the thief now. Lads, the money was stolen."

Then he went away, leaving us very much troubled, and wondering what he could mean. In about an hour we found out; for by that time it was all over the village that Father Peter had been arrested for stealing a great sum of money from the astrologer. Everybody's tongue was loose and going. Many said it was not in Father Peter's character and must be a mistake; but the others shook their heads and said misery and want could drive a suffering man to almost anything. About one detail there were no differences; all agreed that Father Peter's account of how the money came into his hands was just about unbelievable—it had such an impossible look. They said it might have come into the astrologer's hands in some such way, but into Father Peter's, never! Our characters began to suffer now. We were Father Peter's only witnesses; how much did he probably pay us to back up his fantastic tale? People talked that kind of talk to us pretty freely and frankly, and were full of scoffings when we begged them to believe really we had told only the truth. Our parents were harder on us than any one else. Our fathers said we were disgracing our families, and they commanded us to purge ourselves of our lie, and there was no limit to their anger when we continued to say we had spoken true. Our mothers cried over us and begged us to give back our bribe and get back our honest names and save our families from shame, and come out and honorably confess. And at last we were so worried and harassed that we tried to tell the whole thing, Satan and all—but no, it wouldn't come out. We were hoping and longing all the time that Satan would come and help us out of our trouble, but there was no sign of him.

Within an hour after the astrologer's talk with us, Father Peter was in

prison and the money sealed up and in the hands of the officers of the law. The money was in a bag, and Solomon Isaacs said he had not touched it since he had counted it; his oath was taken that it was the same money, and that the amount was eleven hundred and seven ducats. Father Peter claimed trial by the ecclesiastical court, but our other priest, Father Adolf, said an ecclesiastical court hadn't jurisdiction over a suspended priest. The bishop upheld him. That settled it; the case would go to trial in the civil court. The court would not sit for some time to come. Wilhelm Meidling would be Father Peter's lawyer and do the best he could, of course, but he told us privately that a weak case on his side and all the power and prejudice on the other made the outlook bad.

So Marget's new happiness died a quick death. No friends came to condole with her, and none were expected; an unsigned note withdrew her invitation to the party. There would be no scholars to take lessons. How could she support herself? She could remain in the house, for the mortgage was paid off, though the government and not poor Solomon Isaacs had the mortgage-money in its grip for the present. Old Ursula, who was cook, chambermaid, housekeeper, laundress, and everything else for Father Peter, and had been Marget's nurse in earlier years, said God would provide. But she said that from habit, for she was a good Christian. She meant to help in the providing, to make sure, if she could find a way.

We boys wanted to go and see Marget and show friendliness for her, but our parents were afraid of offending the community and wouldn't let us. The astrologer was going around inflaming everybody against Father Peter, and saying he was an abandoned thief and had stolen eleven hundred and seven gold ducats from him. He said he knew he was a thief from that fact, for it was exactly the sum he had lost and which Father Peter pretended he had "found."

In the afternoon of the fourth day after the catastrophe old Ursula appeared at our house and asked for some washing to do, and begged my mother to keep this secret, to save Marget's pride, who would stop this project if she found it out, yet Marget had not enough to eat and was growing weak. Ursula was growing weak herself, and showed it; and she ate of the food that was offered her like a starving person, but could not be persuaded to carry any home, for Marget would not eat charity food. She took some clothes down to the stream to wash them, but we saw from the window that handling the bat was too much for her strength; so she was called back and a trifle of money offered her, which she was afraid to take lest Marget should suspect; then she took it, saying she would explain that she found it in the road. To keep it from being a lie and damning her soul, she got me to drop it while she watched; then she went along by there and found it, and exclaimed with surprise and joy, and picked it up and went her way. Like the rest of the village, she could tell every-day lies fast enough and without taking any precautions against fire and brimstone on their account; but this was a new kind of lie, and it had a dangerous look because she hadn't had any practice in it.

37. **bat**—a specially shaped piece of wood used for pounding clothes when they are washed in a stream.

After a week's practice it wouldn't have given her any trouble. It is the way we are made.

I was in trouble, for how would Marget live? Ursula could not find a coin in the road every day—perhaps not even a second one. And I was ashamed, too, for not having been near Marget, and she so in need of friends; but that was my parents' fault, not mine, and I couldn't help it.

I was walking along the path, feeling very downhearted, when a most cheery and tingling freshening-up sensation went rippling through me, and I was too glad for any words, for I knew by that sign that Satan was by. I had noticed it before. Next moment he was alongside of me and I was telling him all my trouble and what had been happening to Marget and her uncle. While we were talking we turned a curve and saw old Ursula resting in the shade of a tree, and she had a lean stray kitten in her lap and was petting it. I asked her where she got it, and she said it came out of the woods and followed her; and she said it probably hadn't any mother or any friends and she was going to take it home and take care of it. Satan said:

"I understand you are very poor. Why do you want to add another mouth to feed? Why don't you give it to some rich person?"

Ursula bridled at this and said: "Perhaps you would like to have it. You must be rich, with your fine clothes and quality airs." Then she sniffed and said: "Give it to the rich—the idea! The rich don't care for anybody but themselves; it's only the poor that have feeling for the poor, and help them. The poor and God. God will provide for this kitten."

"What makes you think so?"

Ursula's eyes snapped with anger. "Because I know it!" she said. "Not a sparrow falls to the ground without His seeing it."

"But it falls, just the same. What good is seeing it fall?"

Old Ursula's jaws worked, but she could not get any word out for the moment, she was so horrified. When she got her tongue she stormed out, "Go about your business, you puppy, or I will take a stick to you!"

I could not speak, I was so scared. I knew that with his notions about the human race Satan would consider it a matter of no consequence to strike her dead, there being "plenty more"; but my tongue stood still, I could give her no warning. But nothing happened; Satan remained tranquil—tranquil and indifferent. I suppose he could not be insulted by Ursula any more than the king could be insulted by a tumble-bug. The old woman jumped to her feet when she made her remark, and did it as briskly as a young girl. It had been many years since she had done the like of that. That was Satan's influence; he was a fresh breeze to the weak and the sick, wherever he came. His presence affected even the lean kitten, and it skipped to the ground and began to chase a leaf. This surprised Ursula, and she stood looking at the creature and nodding her head wonderingly, her anger quite forgotten.

"What's come over it?" she said. "Awhile ago it could hardly walk."

"You have not seen a kitten of that breed before," said Satan.

Ursula was not proposing to be friendly with the mocking stranger, and she gave him an ungentle look and retorted: "Who asked you to come here

26. sparrow—*cf.* Matt. 10:29.

and pester me, I'd like to know? And what do you know about what I've seen and what I haven't seen?"

"You haven't seen a kitten with the hair-spines on its tongue pointing to the front, have you?"

"No—nor you, either."

"Well, examine this one and see."

Ursula was become pretty spry, but the kitten was spryer, and she could not catch it, and had to give it up. Then Satan said:

"Give it a name, and maybe it will come."

Ursula tried several names, but the kitten was not interested.

"Call it Agnes. Try that."

The creature answered to the name and came. Ursula examined its tongue. "Upon my word, it's true!" she said. "I have not seen this kind of a cat before. Is it yours?"

"No."

"Then how did you know its name so pat?"

"Because all cats of that breed are named Agnes; they will not answer to any other."

Ursula was impressed. "It is the most wonderful thing!" Then a shadow of trouble came into her face, for her superstitions were aroused, and she reluctantly put the creature down, saying: "I suppose I must let it go; I am not afraid—no, not exactly that, though the priest—well, I've heard people—indeed, many people . . . And, besides, it is quite well now and can take care of itself." She sighed, and turned to go, murmuring: "It is such a pretty one, too, and would be such company—and the house is so sad and lonesome these troubled days . . . Miss Marget so mournful and just a shadow, and the old master shut up in jail."

"It seems a pity not to keep it," said Satan.

Ursula turned quickly—just as if she were hoping some one would encourage her.

"Why?" she asked, wistfully.

"Because this breed brings luck."

"Does it? Is it true? Young man, do you know it to be true? How does it bring luck?"

"Well, it brings money, anyway."

Ursula looked disappointed. "Money? A cat bring money? The idea! You could never sell it here; people do not buy cats here; one can't even give them away." She turned to go.

"I don't mean sell it. I mean have an income from it. This kind is called the Lucky Cat. Its owner finds four silver groschen in his pocket every morning."

I saw the indignation rising in the old woman's face. She was insulted. This boy was making fun of her. That was her thought. She thrust her hands into her pockets and straightened up to give him a piece of her mind. Her temper was all up, and hot. Her mouth came open and let out three words of a bitter

40. groschen—small silver coin. The original text misspells the word a little later, but the error is here corrected.

sentence, . . . then it fell silent, and the anger in her face turned to surprise or wonder or fear, or something, and she slowly brought out her hands from her pockets and opened them and held them so. In one was my piece of money, in the other lay four silver groschen. She gazed a little while, perhaps to see if the groschen would vanish away; then she said, fervently:

"It's true—it's true—and I'm ashamed and beg forgiveness, O dear master and benefactor!" And she ran to Satan and kissed his hand, over and over again, according to the Austrian custom.

In her heart she probably believed it was a witch-cat and an agent of the Devil; but no matter, it was all the more certain to be able to keep its contract and furnish a daily good living for the family, for in matters of finance even the piousest of our peasants would have more confidence in an arrangement with the Devil than with an archangel. Ursula started homeward with Agnes in her arms, and I said I wished I had her privilege of seeing Marget.

Then I caught my breath, for we were there. There in the parlor, and Marget standing looking at us, astonished. She was feeble and pale, but I knew that those conditions would not last in Satan's atmosphere, and it turned out so. I introduced Satan—that is, Philip Traum—and we sat down and talked. There was no constraint. We were simple folk, in our village, and when a stranger was a pleasant person we were soon friends. Marget wondered how we got in without her hearing us. Traum said the door was open, and we walked in and waited until she should turn around and greet us. This was not true; no door was open; we entered through the walls or the roof or down the chimney, or somehow; but no matter, what Satan wished a person to believe, the person was sure to believe, and so Marget was quite satisfied with that explanation. And then the main part of her mind was on Traum, anyway; she couldn't keep her eyes off him, he was so beautiful. That gratified me, and made me proud. I hoped he would show off some, but he didn't. He seemed only interested in being friendly and telling lies. He said he was an orphan. That made Marget pity him. The water came into her eyes. He said he had never known his mamma; she passed away while he was a young thing; and said his papa was in shattered health, and had no property to speak of—in fact, none of any earthly value—but he had an uncle in business down in the tropics, and he was very well off and had a monopoly, and it was from this uncle that he drew his support. The very mention of a kind uncle was enough to remind Marget of her own, and her eyes filled again. She said she hoped their two uncles would meet, some day. It made me shudder. Philip said he hoped so, too; and that made me shudder again.

"Maybe they will," said Marget. "Does your uncle travel much?"

"Oh yes, he goes all about; he has business everywhere."

And so they went on chatting, and poor Marget forgot her sorrow for one little while, anyway. It was probably the only really bright and cheery hour she had known lately. I saw she liked Philip, and I knew she would. And when he told her he was studying for the ministry I could see that she liked him better than ever. And then, when he promised to get her admitted to the jail so that she could see her uncle, that was the capstone. He said he would give the guards a little present, and she must always go in the evening after

dark, and say nothing "but just show this paper and pass in, and show it again when you come out"—and he scribbled some queer marks on the paper and gave it to her, and she was ever so thankful, and right away was in a fever for the sun to go down; for in that old, cruel time prisoners were not allowed to see their friends, and sometimes they spent years in the jails without ever seeing a friendly face. I judged that the marks on the paper were an enchantment, and that the guards would not know what they were doing, nor have any memory of it afterward; and that was indeed the way of it. Ursula put her head in at the door now and said:

"Supper's ready, miss." Then she saw us and looked frightened, and motioned me to come to her, which I did, and she asked if we had told about the cat. I said no, and she was relieved and said please don't, for if Miss Marget knew, she would think it was an unholy cat and would send for a priest and have its gifts all purified out of it, and then there wouldn't be any more dividends. So I said we wouldn't tell, and she was satisfied. Then I was beginning to say good-by to Marget, but Satan interrupted and said, ever so politely —well, I don't remember just the words, but anyway he as good as invited himself to supper, and me, too. Of course Marget was miserably embarrassed, for she had no reason to suppose there would be half enough for a sick bird. Ursula heard him, and she came straight into the room, not a bit pleased. At first she was astonished to see Marget looking so fresh and rosy, and said so; then she spoke up in her native tongue, which was Bohemian, and said—as I learned afterward—"Send him away, Miss Marget; there's not victuals enough."

Before Marget could speak, Satan had the word, and was talking back to Ursula in her own language—which was a surprise to her, and for her mistress, too. He said, "Didn't I see you down the road awhile ago?"

"Yes, sir."

"Ah, that pleases me; I see you remember me." He stepped to her and whispered: "I told you it is a Lucky Cat. Don't be troubled; it will provide."

That sponged the slate of Ursula's feelings clean of its anxieties, and a deep, financial joy shone in her eyes. The cat's value was augmenting. It was getting full time for Marget to take some sort of notice of Satan's invitation, and she did it in the best way, the honest way that was natural to her. She said she had little to offer, but that we were welcome if he would share it with her.

We had supper in the kitchen, and Ursula waited at table. A small fish was in the frying-pan, crisp and brown and tempting, and one could see that Marget was not expecting such respectable food as this. Ursula brought it, and Marget divided it between Satan and me, declining to take any of it herself; and was beginning to say she did not care for fish to-day, but she did not finish the remark. It was because she noticed that another fish had appeared in the pan. She looked surprised, but did not say anything. She probably meant to inquire of Ursula about this later. There were other surprises: flesh and game and wines and fruits—things which had been strangers in that house lately; but Marget made no exclamations, and now even looked unsurprised, which was Satan's influence, of course. Satan talked right along, and was entertaining, and made the time pass pleasantly and cheerfully; and although he told

a good many lies, it was no harm in him, for he was only an angel and did not know any better. They do not know right from wrong; I knew this, because I remembered what he had said about it. He got on the good side of Ursula. He praised her to Marget, confidentially, but speaking just loud enough for Ursula to hear. He said she was a fine woman, and he hoped some day to bring her and his uncle together. Very soon Ursula was mincing and simpering around in a ridiculous, girly way, and smoothing out her gown and prinking at herself like a foolish old hen, and all the time pretending she was not hearing what Satan was saying. I was ashamed, for it showed us to be what Satan considered us, a silly race and trivial. Satan said his uncle entertained a great deal, and to have a clever woman presiding over the festivities would double the attractions of the place.

"But your uncle is a gentleman, isn't he?" asked Marget.

"Yes," said Satan indifferently; "some even call him a Prince, out of compliment, but he is not bigoted; to him personal merit is everything, rank nothing."

My hand was hanging down by my chair; Agnes came along and licked it; by this act a secret was revealed. I started to say, "It is all a mistake; this is just a common, ordinary cat; the hair-needles on her tongue point inward, not outward." But the words did not come, because they couldn't. Satan smiled upon me, and I understood.

When it was dark Marget took food and wine and fruit, in a basket, and hurried away to the jail, and Satan and I walked toward my home. I was thinking to myself that I should like to see what the inside of the jail was like; Satan overheard the thought, and the next moment we were in the jail. We were in the torture-chamber, Satan said. The rack was there, and the other instruments, and there was a smoky lantern or two hanging on the walls and helping to make the place look dim and dreadful. There were people there—and executioners—but as they took no notice of us, it meant that we were invisible. A young man lay bound, and Satan said he was suspected of being a heretic, and the executioners were about to inquire into it. They asked the man to confess to the charge, and he said he could not, for it was not true. Then they drove splinter after splinter under his nails, and he shrieked with the pain. Satan was not disturbed, but I could not endure it, and had to be whisked out of there. I was faint and sick, but the fresh air revived me, and we walked toward my home. I said it was a brutal thing.

"No, it was a human thing. You should not insult the brutes by such a misuse of that word; they have not deserved it," and he went on talking like that. "It is like your paltry race—always lying, always claiming virtues which it hasn't got, always denying them to the higher animals, which alone possess them. No brute ever does a cruel thing—that is the monopoly of those with the Moral Sense. When a brute inflicts pain he does it innocently; it is not wrong; for him there is no such thing as wrong. And he does not inflict pain for the pleasure of inflicting it—only man does that. Inspired by that mongrel Moral Sense of his! A sense whose function is to distinguish between right and wrong, with liberty to choose which of them he will do. Now what advantage can he get out of that? He is always choosing, and in nine cases out

of ten he prefers the wrong. There shouldn't be any wrong; and without the Moral Sense there couldn't be any. And yet he is such an unreasoning creature that he is not able to perceive that the Moral Sense degrades him to the bottom layer of animated beings and is a shameful possession. Are you feeling better? Let me show you something."

CHAPTER VI

In a moment we were in a French village. We walked through a great factory of some sort, where men and women and little children were toiling in heat and dirt and a fog of dust; and they were clothed in rags, and drooped at their work, for they were worn and half starved, and weak and drowsy. Satan said:

"It is some more Moral Sense. The proprietors are rich, and very holy; but the wage they pay to these poor brothers and sisters of theirs is only enough to keep them from dropping dead with hunger. The work-hours are fourteen per day, winter and summer—from six in the morning till eight at night—little children and all. And they walk to and from the pigsties which they inhabit——four miles each way, through mud and slush, rain, snow, sleet, and storm, daily, year in and year out. They get four hours of sleep. They kennel together, three families in a room, in unimaginable filth and stench; and disease comes, and they die off like flies. Have they committed a crime, these mangy things? No. What have they done, that they are punished so? Nothing at all, except getting themselves born into your foolish race. You have seen how they treat a misdoer there in the jail; now you see how they treat the innocent and the worthy. Is your race logical? Are these ill-smelling innocents better off than that heretic? Indeed, no; his punishment is trivial compared with theirs. They broke him on the wheel and smashed him to rags and pulp after we left, and he is dead now, and free of your precious race; but these poor slaves here—why, they have been dying for years, and some of them will not escape from life for years to come. It is the Moral Sense which teaches the factory proprietors the difference between right and wrong—you perceive the result. They think themselves better than dogs. Ah, you are such an illogical, unreasoning race! And paltry—oh, unspeakably!"

Then he dropped all seriousness and just overstrained himself making fun of us, and deriding our pride in our warlike deeds, our great heroes, our imperishable fames, our mighty kings, our ancient aristocracies, our venerable history—and laughed and laughed till it was enough to make a person sick to hear him; and finally he sobered a little and said, "But, after all, it is not all ridiculous; there is a sort of pathos about it when one remembers how few are your days, how childish your pomps, and what shadows you are!"

Presently all things vanished suddenly from my sight, and I knew what it meant. The next moment we were walking along in our village; and down toward the river I saw the twinkling lights of the Golden Stag. Then in the dark I heard a joyful cry:

"He's come again!"

It was Seppi Wohlmeyer. He had felt his blood leap and his spirits rise in a

way that could mean only one thing, and he knew Satan was near, although it was too dark to see him. He came to us, and we walked along together, and Seppi poured out his gladness like water. It was as if he were a lover and had found his sweetheart who had been lost. Seppi was a smart and animated boy, and had enthusiasm and expression, and was a contrast to Nikolaus and me. He was full of the last new mystery, now—the disappearance of Hans Oppert, the village loafer. People were beginning to be curious about it, he said. He did not say anxious—curious was the right word, and strong enough. No one had seen Hans for a couple of days.

"Not since he did that brutal thing, you know," he said.

"What brutal thing?" It was Satan that asked.

"Well, he is always clubbing his dog, which is a good dog and his only friend, and is faithful, and loves him, and does no one any harm; and two days ago he was at it again, just for nothing—just for pleasure—and the dog was howling and begging, and Theodor and I begged, too, but he threatened us, and struck the dog again with all his might and knocked one of his eyes out, and he said to us, 'There, I hope you are satisfied now; that's what you have got for him by your damned meddling'—and he laughed, the heartless brute." Seppi's voice trembled with pity and anger. I guessed what Satan would say, and he said it.

"There is that misused word again—that shabby slander. Brutes do not act like that, but only men."

"Well, it was inhuman, anyway."

"No, it wasn't, Seppi; it was human—quite distinctly human. It is not pleasant to hear you libel the higher animals by attributing to them dispositions which they are free from, and which are found nowhere but in the human heart. None of the higher animals is tainted with the disease called the Moral Sense. Purify your language, Seppi; drop those lying phrases out of it."

He spoke pretty sternly—for him—and I was sorry I hadn't warned Seppi to be more particular about the word he used. I knew how he was feeling. He would not want to offend Satan; he would rather offend all his kin. There was an uncomfortable silence, but relief soon came, for that poor dog came along now, with his eye hanging down, and went straight to Satan, and began to moan and mutter brokenly, and Satan began to answer in the same way, and it was plain that they were talking together in the dog language. We all sat down in the grass, in the moonlight, for the clouds were breaking away now, and Satan took the dog's head in his lap and put the eye back in its place, and the dog was comfortable, and he wagged his tail and licked Satan's hand, and looked thankful and said the same; I knew he was saying it, though I did not understand the words. Then the two talked together a bit, and Satan said:

"He says his master was drunk."

"Yes, he was," said we.

"And an hour later he fell over the precipice there beyond the Cliff Pasture."

"We know the place; it is three miles from here."

"And the dog has been often to the village, begging people to go there, but he was only driven away and not listened to."

We remembered it, but hadn't understood what he wanted.

"He only wanted help for the man who had misused him, and he thought only of that, and has had no food nor sought any. He has watched by his master two nights. What do you think of your race? Is heaven reserved for it, and this dog ruled out, as your teachers tell you? Can your race add anything to this dog's stock of morals and magnanimities?" He spoke to the creature, who jumped up, eager and happy, and apparently ready for orders and impatient to execute them. "Get some men; go with the dog—he will show you that carrion; and take a priest along to arrange about insurance, for death is near."

With the last word he vanished, to our sorrow and disappointment. We got the men and Father Adolf, and we saw the man die. Nobody cared but the dog; he mourned and grieved, and licked the dead face, and could not be comforted. We buried him where he was, and without a coffin, for he had no money, and no friend but the dog. If we had been an hour earlier the priest would have been in time to send that poor creature to heaven, but now he was gone down into the awful fires, to burn forever. It seemed such a pity that in a world where so many people have difficulty to put in their time, one little hour could not have been spared for this poor creature who needed it so much, and to whom it would have made the difference between eternal joy and eternal pain. It gave an appalling idea of the value of an hour, and I thought I could never waste one again without remorse and terror. Seppi was depressed and grieved, and said it must be so much better to be a dog and not run such awful risks. We took this one home with us and kept him for our own. Seppi had a very good thought as we were walking along, and it cheered us up and made us feel much better. He said the dog had forgiven the man that had wronged him so, and maybe God would accept that absolution.

There was a very dull week, now, for Satan did not come, nothing much was going on, and we boys could not venture to go and see Marget, because the nights were moonlit and our parents might find us out if we tried. But we came across Ursula a couple of times taking a walk in the meadows beyond the river to air the cat, and we learned from her that things were going well. She had natty new clothes on and bore a prosperous look. The four groschen a day were arriving without a break, but were not being spent for food and wine and such things—the cat attended to all that.

Marget was enduring her forsakenness and isolation fairly well, all things considered, and was cheerful, by help of Wilhelm Meidling. She spent an hour or two every night in the jail with her uncle, and had fattened him up with the cat's contributions. But she was curious to know more about Philip Traum, and hoped I would bring him again. Ursula was curious about him herself, and asked a good many questions about his uncle. It made the boys laugh, for I had told them the nonsense Satan had been stuffing her with. She got no satisfaction out of us, our tongues being tied.

Ursula gave us a small item of information: money being plenty now, she had taken on a servant to help about the house and run errands. She tried to tell it in a commonplace, matter-of-course way, but she was so set up by it and so vain of it that her pride in it leaked out pretty plainly. It was beautiful

to see her veiled delight in this grandeur, poor old thing, but when we heard the name of the servant we wondered if she had been altogether wise; for although we were young, and often thoughtless, we had fairly good perception on some matters. This boy was Gottfried Narr, a dull, good creature, with no harm in him and nothing against him personally; still, he was under a cloud, and properly so, for it had not been six months since a social blight had mildewed the family—his grandmother had been burned as a witch. When that kind of a malady is in the blood it does not always come out with just one burning. Just now was not a good time for Ursula and Marget to be having dealings with a member of such a family, for the witch-terror had risen higher during the past year than it had ever reached in the memory of the oldest villagers. The mere mention of a witch was almost enough to frighten us out of our wits. This was natural enough, because of late years there were more kinds of witches than there used to be; in old times it had been only old women, but of late years they were of all ages—even children of eight and nine; it was getting so that anybody might turn out to be a familiar of the Devil—age and sex hadn't anything to do with it. In our little region we had tried to extirpate the witches, but the more of them we burned the more of the breed rose up in their places.

Once, in a school for girls only ten miles away, the teachers found that the back of one of the girls was all red and inflamed, and they were greatly frightened, believing it to be the Devil's marks. The girl was scared, and begged them not to denounce her, and said it was only fleas; but of course it would not do to let the matter rest there. All the girls were examined, and eleven out of the fifty were badly marked, the rest less so. A commission was appointed, but the eleven only cried for their mothers and would not confess. Then they were shut up, each by herself, in the dark, and put on black bread and water for ten days and nights; and by that time they were haggard and wild, and their eyes were dry and they did not cry any more, but only sat and mumbled, and would not take the food. Then one of them confessed, and said they had often ridden through the air on broomsticks to the witches' Sabbath, and in a bleak place high up in the mountains had danced and drunk and caroused with several hundred other witches and the Evil One, and all had conducted themselves in a scandalous way and had reviled the priests and blasphemed God. That is what she said—not in narrative form, for she was not able to remember any of the details without having them called to her mind one after the other; but the commission did that, for they knew just what questions to ask, they being all written down for the use of witch-commissioners two centuries before. They asked, "Did you do so and so?" and she always said yes, and looked weary and tired, and took no interest in it. And so when the other ten heard that this one confessed, they confessed, too, and answered yes to the questions. Then they were burned at the stake all together, which was just and right; and everybody went from all the countryside to see it. I went, too; but when I saw that one of them was a bonny, sweet girl I used to play with, and looked so pitiful there chained to the stake, and her mother crying

4. **Narr**—i.e., "Fool." 31. **witches' Sabbath**—any midnight meeting of witches and demons.

over her and devouring her with kisses and clinging around her neck, and saying, "Oh, my God! oh, my God!" it was too dreadful, and I went away.

It was bitter cold weather when Gottfried's grandmother was burned. It was charged that she had cured bad headaches by kneading the person's head and neck with her fingers——as she said——but really by the Devil's help, as everybody knew. They were going to examine her, but she stopped them, and confessed straight off that her power was from the Devil. So they appointed to burn her next morning, early, in our market-square. The officer who was to prepare the fire was there first, and prepared it. She was there next—brought by the constables, who left her and went to fetch another witch. Her family did not come with her. They might be reviled, maybe stoned, if the people were excited. I came, and gave her an apple. She was squatting at the fire, warming herself and waiting; and her old lips and hands were blue with the cold. A stranger came next. He was a traveler, passing through; and he spoke to her gently, and, seeing nobody but me there to hear, said he was sorry for her. And he asked if what she confessed was true, and she said no. He looked surprised and still more sorry then, and asked her:

"Then why did you confess?"

"I am old and very poor," she said, "and I work for my living. There was no way but to confess. If I hadn't they might have set me free. That would ruin me, for no one would forget that I had been suspected of being a witch, and so I would get no more work, and wherever I went they would set the dogs on me. In a little while I would starve. The fire is best; it is soon over. You have been good to me, you two, and I thank you."

She snuggled closer to the fire, and put out her hands to warm them, the snow-flakes descending soft and still on her old gray head and making it white and whiter. The crowd was gathering now, and an egg came flying and struck her in the eye, and broke and ran down her face. There was a laugh at that.

I told Satan all about the eleven girls and the old woman, once, but it did not affect him. He only said it was the human race, and what the human race did was of no consequence. And he said he had seen it made; and it was not made of clay; it was made of mud—part of it was, anyway. I knew what he meant by that—the Moral Sense. He saw the thought in my head, and it tickled him and made him laugh. Then he called a bullock out of a pasture and petted it and talked with it, and said:

"There—he wouldn't drive children mad with hunger and fright and loneliness, and then burn them for confessing to things invented for them which had never happened. And neither would he break the hearts of innocent, poor old women and make them afraid to trust themselves among their own race; and he would not insult them in their death-agony. For he is not besmirched with the Moral Sense, but is as the angels are, and knows no wrong, and never does it."

Lovely as he was, Satan could be cruelly offensive when he chose; and he always chose when the human race was brought to his attention. He always turned up his nose at it, and never had a kind word for it.

Well, as I was saying, we boys doubted if it was a good time for Ursula to be hiring a member of the Narr family. We were right. When the people found

it out they were naturally indignant. And, moreover, since Marget and Ursula hadn't enough to eat themselves, where was the money coming from to feed another mouth? That is what they wanted to know; and in order to find out they stopped avoiding Gottfried and began to seek his society and have sociable conversations with him. He was pleased—not thinking any harm and not seeing the trap—and so he talked innocently along, and was no discreeter than a cow.

"Money!" he said; "they've got plenty of it. They pay me two groschen a week, besides my keep. And they live on the fat of the land, I can tell you; the prince himself can't beat their table."

This astonishing statement was conveyed by the astrologer to Father Adolf on a Sunday morning when he was returning from mass. He was deeply moved, and said:

"This must be looked into."

He said there must be witchcraft at the bottom of it, and told the villagers to resume relations with Marget and Ursula in a private and unostentatious way, and keep both eyes open. They were told to keep their own counsel and not rouse the suspicions of the household. The villagers were at first a bit reluctant to enter such a dreadful place, but the priest said they would be under his protection while there, and no harm could come to them, particularly if they carried a trifle of holy water along and kept their beads and crosses handy. This satisfied them and made them willing to go; envy and malice made the baser sort even eager to go.

And so poor Marget began to have company again, and was as pleased as a cat. She was like 'most anybody else—just human, and happy in her prosperities and not averse from showing them off a little; and she was humanly grateful to have the warm shoulder turned to her and be smiled upon by her friends and the village again; for of all the hard things to bear, to be cut by your neighbors and left in contemptuous solitude is maybe the hardest.

The bars were down, and we could all go there now, and we did—our parents and all—day after day. The cat began to strain herself. She provided the top of everything for those companies, and in abundance—among them many a dish and many a wine which they had not tasted before and which they had not even heard of except at second-hand from the prince's servants. And the tableware was much above ordinary, too.

Marget was troubled at times, and pursued Ursula with questions to an uncomfortable degree; but Ursula stood her ground and stuck to it that it was Providence, and said no word about the cat. Marget knew that nothing was impossible to Providence, but she could not help having doubts that this effort was from there, though she was afraid to say so, lest disaster come of it. Witchcraft occurred to her, but she put the thought aside, for this was before Gottfried joined the household, and she knew Ursula was pious and a bitter hater of witches. By the time Gottfried arrived Providence was established, unshakably intrenched, and getting all the gratitude. The cat made no murmur, but went on composedly improving in style and prodigality by experience.

In any community, big or little, there is always a fair proportion of people who are not malicious or unkind by nature, and who never do unkind things

except when they are overmastered by fear, or when their self-interest is greatly in danger, or some such matter as that. Eseldorf had its proportion of such people, and ordinarily their good and gentle influence was felt, but these were not ordinary times—on account of the witch-dread—and so we did not seem to have any gentle and compassionate hearts left, to speak of. Every person was frightened at the unaccountable state of things at Marget's house, not doubting that witchcraft was at the bottom of it, and fright frenzied their reason. Naturally there were some who pitied Marget and Ursula for the danger that was gathering about them, but naturally they did not say so; it would not have been safe. So the others had it all their own way, and there was none to advise the ignorant girl and the foolish woman and warn them to modify their doings. We boys wanted to warn them, but we backed down when it came to the pinch, being afraid. We found that we were not manly enough nor brave enough to do a generous action when there was a chance that it could get us into trouble. Neither of us confessed this poor spirit to the others, but did as other people would have done—dropped the subject and talked about something else. And I knew we all felt mean, eating and drinking Marget's fine things along with those companies of spies, and petting her and complimenting her with the rest, and seeing with self-reproach how foolishly happy she was, and never saying a word to put her on her guard. And, indeed, she was happy, and as proud as a princess, and so grateful to have friends again. And all the time these people were watching with all their eyes and reporting all they saw to Father Adolf.

But he couldn't make head or tail of the situation. There must be an enchanter somewhere on the premises, but who was it? Marget was not seen to do any jugglery, nor was Ursula, nor yet Gottfried; and still the wines and dainties never ran short, and a guest could not call for a thing and not get it. To produce these effects was usual enough with witches and enchanters—that part of it was not new; but to do it without any incantations, or even any rumblings or earthquakes or lightnings or apparitions—that was new, novel, wholly irregular. There was nothing in the books like this. Enchanted things were always unreal. Gold turned to dirt in an unenchanted atmosphere, food withered away and vanished. But this test failed in the present case. The spies brought samples: Father Adolf prayed over them, exorcised them, but it did no good; they remained sound and real, they yielded to natural decay only, and took the usual time to do it.

Father Adolf was not merely puzzled, he was also exasperated; for these evidences very nearly convinced him—privately—that there was no witchcraft in the matter. It did not wholly convince him, for this could be a new kind of witchcraft. There was a way to find out as to this: if this prodigal abundance of provender was not brought in from the outside, but produced on the premises, there was witchcraft, sure.

CHAPTER VII

Marget announced a party and invited forty people; the date for it was seven days away. This was a fine opportunity. Marget's house stood by itself, and it

could be easily watched. All the week it was watched night and day. Marget's household went out and in as usual, but they carried nothing in their hands, and neither they nor others brought anything to the house. This was ascertained. Evidently rations for forty people were not being fetched. If they were furnished any sustenance it would have to be made on the premises. It was true that Marget went out with a basket every evening, but the spies ascertained that she always brought it back empty.

The guests arrived at noon and filled the place. Father Adolf followed; also, after a little, the astrologer, without invitation. The spies had informed him that neither at the back nor the front had any parcels been brought in. He entered and found the eating and drinking going on finely, and everything progressing in a lively and festive way. He glanced around and perceived that many of the cooked delicacies and all of the native and foreign fruits were of a perishable character, and he also recognized that these were fresh and perfect. No apparitions, no incantations, no thunder. That settled it. This was witchcraft. And not only that, but of a new kind——a kind never dreamed of before. It was a prodigious power, an illustrious power; he resolved to discover its secret. The announcement of it would resound throughout the world, penetrate to the remotest lands, paralyze all the nations with amazement—and carry his name with it, and make him renowned forever. It was a wonderful piece of luck, a splendid piece of luck; the glory of it made him dizzy.

All the house made room for him; Marget politely seated him; Ursula ordered Gottfried to bring a special table for him. Then she decked it and furnished it, and asked for his orders.

"Bring me what you will," he said.

The two servants brought supplies from the pantry, together with white wine and red—a bottle of each. The astrologer, who very likely had never seen such delicacies before, poured out a beaker of red wine, drank it off, poured another, then began to eat with a grand appetite.

I was not expecting Satan, for it was more than a week since I had seen or heard of him but now he came in—I knew it by the feel, though people were in the way and I could not see him. I heard him apologizing for intruding; and he was going away, but Marget urged him to stay, and he thanked her and stayed. She brought him along, introducing him to the girls, and to Meidling, and to some of the elders; and there was quite a rustle of whispers: "It's the young stranger we hear so much about and can't get sight of, he is away so much." "Dear, dear, but he is beautiful—what is his name?" "Philip Traum." "Ah, it fits him!" (You see, "Traum" is German for "Dream.") "What does he do?" "Studying for the ministry, they say." "His face is his fortune—he'll be a cardinal some day." "Where is his home?" "Away down somewhere in the tropics, they say—has a rich uncle down there." And so on. He made his way at once; everybody was anxious to know him and talk with him. Everybody noticed how cool and fresh it was all of a sudden, and wondered at it, for they could see that the sun was beating down the same as before, outside, and the sky was clear of clouds, but no one guessed the reason, of course.

The astrologer had drunk his second beaker; he poured out a third. He set

the bottle down, and by accident overturned it. He seized it before much was spilled, and held it up to the light, saying, "What a pity—it is royal wine." Then his face lighted with joy or triumph, or something, and he said, "Quick! Bring a bowl."

It was brought—a four-quart one. He took up that two-pint bottle and began to pour; went on pouring, the red liquor gurgling and gushing into the white bowl and rising higher and higher up its sides, everybody staring and holding their breath—and presently the bowl was full to the brim.

"Look at the bottle," he said, holding it up, "it is full yet!" I glanced at Satan, and in that moment he vanished. Then Father Adolf rose up, flushed and excited, crossed himself, and began to thunder in his great voice, "This house is bewitched and accursed!" People began to cry and shriek and crowd toward the door. "I summon this detected household to—"

His words were cut off short. His face became red, then purple, but he could not utter another sound. Then I saw Satan, a transparent film, melt into the astrologer's body; then the astrologer put up his hand, and apparently in his own voice said, "Wait—remain where you are." All stopped where they stood. "Bring a funnel!" Ursula brought it, trembling and scared, and he stuck it in the bottle and took up the great bowl and began to pour the wine back, the people gazing and dazed with astonishment, for they knew the bottle was already full before he began. He emptied the whole of the bowl into the bottle, then smiled out over the room, chuckled, and said, indifferently, "It is nothing —anybody can do it! With my powers I can even do much more."

A frightened cry burst out everywhere. "Oh, my God, he is possessed!" and there was a tumultuous rush for the door which swiftly emptied the house of all who did not belong in it except us boys and Meidling. We boys knew the secret, and would have told it if we could, but we couldn't. We were very thankful to Satan for furnishing that good help at the needful time.

Marget was pale, and crying; Meidling looked kind of petrified; Ursula the same; but Gottfried was the worst—he couldn't stand, he was so weak and scared. For he was of a witch family, you know, and it would be bad for him to be suspected. Agnes came loafing in, looking pious and unaware, and wanted to rub up against Ursula and be petted, but Ursula was afraid of her and shrank away from her, but pretending she was not meaning any incivility, for she knew very well it wouldn't answer to have strained relations with that kind of a cat. But we boys took Agnes and petted her, for Satan would not have befriended her if he had not had a good opinion of her, and that was indorsement enough for us. He seemed to trust anything that hadn't the Moral Sense.

Outside, the guests, panic-stricken, scattered in every direction and fled in a pitiable state of terror; and such a tumult as they made with their running and sobbing and shrieking and shouting that soon all the village came flocking from their houses to see what had happened, and they thronged the street and shouldered and jostled one another in excitement and fright; and then Father Adolf appeared, and they fell apart in two walls like the cloven Red Sea, and presently down this lane the astrologer came striding and mumbling, and

45. cloven Red Sea—*cf.* Exod. 14:21 ff.

where he passed the lanes surged back in packed masses, and fell silent with awe, and their eyes stared and their breasts heaved, and several women fainted; and when he was gone by the crowd swarmed together and followed him at a distance, talking excitedly and asking questions and finding out the facts. Finding out the facts and passing them on to others, with improvements—improvements which soon enlarged the bowl of wine to a barrel, and made the one bottle hold it all and yet remain empty to the last.

When the astrologer reached the market-square he went straight to a juggler, fantastically dressed, who was keeping three brass balls in the air, and took them from him and faced around upon the approaching crowd and said: "This poor clown is ignorant of his art. Come forward and see an expert perform."

So saying, he tossed the balls up one after another and set them whirling in a slender bright oval in the air, and added another, then another and another, and soon—no one seeing whence he got them—adding, adding, adding, the oval lengthening all the time, his hands moving so swiftly that they were just a web or a blur and not distinguishable as hands; and such as counted said there were now a hundred balls in the air. The spinning great oval reached up twenty feet in the air and was a shining and glinting and wonderful sight. Then he folded his arms and told the balls to go on spinning without his help —and they did it. After a couple of minutes he said, "There, that will do," and the oval broke and came crashing down, and the balls scattered abroad and rolled every whither. And wherever one of them came the people fell back in dread, and no one would touch it. It made him laugh, and he scoffed at the people and called them cowards and old women. Then he turned and saw the tight-rope, and said foolish people were daily wasting their money to see a clumsy and ignorant varlet degrade that beautiful art; now they should see the work of a master. With that he made a spring into the air and lit firm on his feet on the rope. Then he hopped the whole length of it back and forth on one foot, with his hands clasped over his eyes; and next he began to throw somersaults, both backward and forward, and threw twenty-seven.

The people murmured, for the astrologer was old, and always before had been halting of movement and at times even lame, but he was nimble enough now and went on with his antics in the liveliest manner. Finally he sprang lightly down and walked away, and passed up the road and around the corner and disappeared. Then that great, pale, silent, solid crowd drew a deep breath and looked into one another's faces as if they said: "Was it real? Did you see it, or was it only I—and I was dreaming?" Then they broke into a low murmur of talking, and fell apart in couples, and moved toward their homes, still talking in that awed way, with faces close together and laying a hand on an arm and making other such gestures as people make when they have been deeply impressed by something.

We boys followed behind our fathers, and listened, catching all we could of what they said; and when they sat down in our house and continued their talk they still had us for company. They were in a sad mood, for it was certain, they said, that disaster for the village must follow this awful visitation of witches and devils. Then my father remembered that Father Adolf had been struck dumb at the moment of his denunciation.

"They have not ventured to lay their hands upon an anointed servant of God before," he said; "and how they could have dared it this time I cannot make out, for he wore his crucifix. Isn't it so?"

"Yes," said the others, "we saw it."

"It is serious, friends, it is very serious. Always before, we had a protection. It has failed."

The others shook, as with a sort of chill, and muttered those words over—"It has failed." "God has forsaken us."

"It is true," said Seppi Wohlmeyer's father; "there is nowhere to look for help."

"The people will realize this," said Nikolaus' father, the judge, "and despair will take away their courage and their energies. We have indeed fallen upon evil times."

He sighed, and Wohlmeyer said, in a troubled voice, "The report of it all will go about the country, and our village will be shunned as being under the displeasure of God. The Golden Stag will know hard times."

"True, neighbor," said my father, "all of us will suffer—all in repute, many in estate. And, good God!—"

"What is it?"

"That can come—to finish us!"

"Name it—um Gottes Willen!"

"The Interdict!"

It smote like a thunderclap, and they were like to swoon with the terror of it. Then the dread of this calamity roused their energies, and they stopped brooding and began to consider ways to avert it. They discussed this, that, and the other way, and talked till the afternoon was far spent, then confessed that at present they could arrive at no decision. So they parted sorrowfully, with oppressed hearts which were filled with bodings.

While they were saying their parting words I slipped out and set my course for Marget's house to see what was happening there. I met many people, but none of them greeted me. It ought to have been surprising, but it was not, for they were so distraught with fear and dread that they were not in their right minds, I think; they were white and haggard, and walked like persons in a dream, their eyes open but seeing nothing, their lips moving but uttering nothing, and worriedly clasping and unclasping their hands without knowing it.

At Marget's it was like a funeral. She and Wilhelm sat together on the sofa, but said nothing, and not even holding hands. Both were steeped in gloom, and Marget's eyes were red from the crying she had been doing. She said:

"I have been begging him to go, and come no more, and so save himself alive. I cannot bear to be his murderer. This house is bewitched, and no inmate will escape the fire. But he will not go, and he will be lost with the rest."

Wilhelm said he would not go; if there was danger for her, his place was by her, and there he would remain. Then she began to cry again, and it was

21. **um Gottes Willen**—"For God's sake!" 22. **Interdict**—the formal sentence by ecclesiastical authority barring a person or place from ecclesiastical functions or privileges or both.

all so mournful that I wished I had stayed away. There was a knock, now, and Satan came in, fresh and cheery and beautiful, and brought that winy atmosphere of his and changed the whole thing. He never said a word about what had been happening, nor about the awful fears which were freezing the blood in the hearts of the community, but began to talk and rattle on about all manner of gay and pleasant things: and next about music—an artful stroke which cleared away the remnant of Marget's depression and brought her spirits and her interests broad awake. She had not heard any one talk so well and so knowingly on that subject before, and she was so uplifted by it and so charmed that what she was feeling lit up her face and came out in her words; and Wilhelm noticed it and did not look as pleased as he ought to have done. And next Satan branched off into poetry, and recited some, and did it well, and Marget was charmed again; and again Wilhelm was not as pleased as he ought to have been, and this time Marget noticed it and was remorseful.

I fell asleep to pleasant music that night—the patter of rain upon the panes and the dull growling of distant thunder. Away in the night Satan came and roused me and said: "Come with me. Where shall we go?"

"Anywhere—so it is with you."

Then there was a fierce glare of sunlight, and he said, "This is China."

That was a grand surprise, and made me sort of drunk with vanity and gladness to think I had come so far—so much, much farther than anybody else in our village, including Bartel Sperling, who had such a great opinion of his travels. We buzzed around over that empire for more than half an hour, and saw the whole of it. It was wonderful, the spectacles we saw; and some were beautiful, others too horrible to think. For instance— However, I may go into that by and by, and also why Satan chose China for this excursion instead of another place; it would interrupt my tale to do it now. Finally we stopped flitting and lit.

We sat upon a mountain commanding a vast landscape of mountain range and gorge and valley and plain and river, with cities and villages slumbering in the sunlight, and a glimpse of blue sea on the farther verge. It was a tranquil and dreamy picture, beautiful to the eye and restful to the spirit. If we could only make a change like that whenever we wanted to, the world would be easier to live in than it is, for change of scene shifts the mind's burdens to the other shoulder and banishes old, shop-worn weariness from mind and body both.

We talked together, and I had the idea of trying to reform Satan and persuade him to lead a better life. I told him about all those things he had been doing, and begged him to be more considerate and stop making people unhappy. I said I knew he did not mean any harm, but that he ought to stop and consider the possible consequences of a thing before launching it in that impulsive and random way of his; then he would not make so much trouble. He was not hurt by this plain speech; he only looked amused and surprised, and said:

"What? I do random things? Indeed, I never do. I stop and consider possible consequences? Where is the need? I know what the consequences are going to be—always."

"Oh, Satan, then how could you do these things?"

"Well, I will tell you, and you must understand if you can. You belong to a singular race. Every man is a suffering-machine and a happiness-machine combined. The two functions work together harmoniously, with a fine and delicate precision, on the give-and-take principle. For every happiness turned out in the one department the other stands ready to modify it with a sorrow or a pain—maybe a dozen. In most cases the man's life is about equally divided between happiness and unhappiness. When this is not the case the unhappiness predominates—always; never the other. Sometimes a man's make and disposition are such that his misery-machine is able to do nearly all the business. Such a man goes through life almost ignorant of what happiness is. Everything he touches, everything he does, brings a misfortune upon him. You have seen such people? To that kind of a person life is not an advantage, is it? It is only a disaster. Sometimes for an hour's happiness a man's machinery makes him pay years of misery. Don't you know that? It happens every now and then. I will give you a case or two presently. Now the people of your village are nothing to me—you know that, don't you?"

I did not like to speak out too flatly, so I said I had suspected it.

"Well, it is true that they are nothing to me. It is not possible that they should be. The difference between them and me is abysmal, immeasurable. They have no intellect."

"No intellect?"

"Nothing that resembles it. At a future time I will examine what man calls his mind and give you the details of that chaos, then you will see and understand. Men have nothing in common with me—there is no point of contact; they have foolish little feelings and foolish little vanities and impertinences and ambitions; their foolish little life is but a laugh, a sigh, and extinction; and they have no sense. Only the Moral Sense. I will show you what I mean. Here is a red spider, not so big as a pin's head. Can you imagine an elephant being interested in him—caring whether he is happy or isn't, or whether he is wealthy or poor, or whether his sweetheart returns his love or not, or whether his mother is sick or well, or whether he is looked up to in society or not, or whether his enemies will smite him or his friends desert him, or whether his hopes will suffer blight or his political ambitions fail, or whether he shall die in the bosom of his family or neglected and despised in a foreign land? These things can never be important to the elephant; they are nothing to him; he cannot shrink his sympathies to the microscopic size of them. Man is to me as the red spider is to the elephant. The elephant has nothing against the spider—he cannot get down to that remote level; I have nothing against man. The elephant is indifferent; I am indifferent. The elephant would not take the trouble to do the spider an ill turn; if he took the notion he might do him a good turn, if it came in his way and cost nothing. I have done men good service, but no ill turns.

"The elephant lives a century, the red spider a day; in power, intellect, and dignity the one creature is separated from the other by a distance which is simply astronomical. Yet in these, as in all qualities, man is immeasurably further below me than is the wee spider below the elephant.

"Man's mind clumsily and tediously and laboriously patches little trivialities together and gets a result—such as it is. My mind creates! Do you get the force of that? Creates anything it desires—and in a moment. Creates without material. Creates fluids, solids, colors—anything, everything—out of the airy nothing which is called Thought. A man imagines a silk thread, imagines a machine to make it, imagines a picture, then by weeks of labor embroiders it on canvas with the thread. I think the whole thing, and in a moment it is before you—created.

"I think a poem, music, the record of a game of chess—anything—and it is there. This is the immortal mind—nothing is beyond its reach. Nothing can obstruct my vision; the rocks are transparent to me, and darkness is daylight. I do not need to open a book; I take the whole of its contents into my mind at a single glance, through the cover; and in a million years I could not forget a single word of it, or its place in the volume. Nothing goes on in the skull of man, bird, fish, insect, or other creature which can be hidden from me. I pierce the learned man's brain with a single glance, and the treasures which cost him threescore years to accumulate are mine; he can forget and he does forget, but I retain.

"Now, then, I perceive by your thoughts that you are understanding me fairly well. Let us proceed. Circumstances might so fall out that the elephant could like the spider—supposing he can see it—but he could not love it. His love is for his own kind—for his equals. An angel's love is sublime, adorable, divine, beyond the imagination of man—infinitely beyond it! But it is limited to his own august order. If it fell upon one of your race for only an instant, it would consume its object to ashes. No, we cannot love men, but we can be harmlessly indifferent to them; we can also like them, sometimes. I like you and the boys, I like Father Peter, and for your sakes I am doing all these things for the villagers."

He saw that I was thinking a sarcasm and he explained his position.

"I have wrought well for the villagers, though it does not look like it on the surface. Your race never know good fortune from ill. They are always mistaking the one for the other. It is because they cannot see into the future. What I am doing for the villagers will bear good fruit some day; in some cases to themselves; in others, to unborn generations of men. No one will ever know that I was the cause, but it will be none the less true, for all that. Among you boys you have a game: you stand a row of bricks on end a few inches apart; you push a brick, it knocks its neighbor over, the neighbor knocks over the next brick—and so on till all the row is prostrate. That is human life. A child's first act knocks over the initial brick, and the rest will follow inexorably. If you could see into the future, as I can, you would see everything that was going to happen to that creature; for nothing can change the order of its life after the first event has determined it. That is, nothing will change it, because each act unfailingly begets an act, that act begets another, and so on to the end, and the seer can look forward down the line and see just when each act is to have birth, from cradle to grave."

"Does God order the career?"

"Foreordain it? No. The man's circumstances and environment order it. His

first act determines the second and all that follow after. But suppose, for argument's sake, that the man should skip one of these acts; an apparently trifling one, for instance; suppose that it had been appointed that on a certain day, at a certain hour and minute and second and fraction of a second he should go to the well, and he didn't go. That man's career would change utterly, from that moment; thence to the grave it would be wholly different from the career which his first act as a child had arranged for him. Indeed, it might be that if he had gone to the well he would have ended his career on a throne, and that omitting to do it would set him upon a career that would lead to beggary and a pauper's grave. For instance: if at any time—say in boyhood—Columbus had skipped the triflingest little link in the chain of acts projected and made inevitable by his first childish act, it would have changed his whole subsequent life, and he would have become a priest and died obscure in an Italian village, and America would not have been discovered for two centuries afterward. I know this. To skip any one of the billion acts in Columbus's chain would have wholly changed his life. I have examined his billion of possible careers, and in only one of them occurs the discovery of America. You people do not suspect that all of your acts are of one size and importance, but it is true; to snatch at an appointed fly is as big with fate for you as is any other appointed act—"

"As the conquering of a continent, for instance?"

"Yes. Now, then, no man ever does drop a link—the thing has never happened! Even when he is trying to make up his mind as to whether he will do a thing or not, that itself is a link, an act, and has its proper place in his chain; and when he finally decides an act, that also was the thing which he was absolutely certain to do. You see, now, that a man will never drop a link in his chain. He cannot. If he made up his mind to try, that project would itself be an unavoidable link—a thought bound to occur to him at that precise moment, and made certain by the first act of his babyhood."

It seemed so dismal!

"He is a prisoner for life," I said sorrowfully, "and cannot get free."

"No, of himself he cannot get away from the consequences of his first childish act. But I can free him."

I looked up wistfully.

"I have changed the careers of a number of your villagers."

I tried to thank him but found it difficult, and let it drop.

"I shall make some other changes. You know that little Lisa Brandt?"

"Oh yes, everybody does. My mother says she is so sweet and so lovely that she is not like any other child. She says she will be the pride of the village when she grows up; and its idol, too, just as she is now."

"I shall change her future."

"Make it better?" I asked.

"Yes. And I will change the future of Nikolaus."

I was glad, this time, and said, "I don't need to ask about his case; you will be sure to do generously by him."

"It is my intention."

Straight off I was building that great future of Nicky's in my imagination,

and had already made a renowned general of him and hofmeister at the court, when I noticed that Satan was waiting for me to get ready to listen again. I was ashamed of having exposed my cheap imaginings to him and was expecting some sarcasms, but it did not happen. He proceeded with his subject:

"Nicky's appointed life is sixty-two years."

"That's grand!" I said.

"Lisa's, thirty-six. But, as I told you, I shall change their lives and those ages. Two minutes and a quarter from now Nikolaus will wake out of his sleep and find the rain blowing in. It was appointed that he should turn over and go to sleep again. But I have appointed that he shall get up and close the window first. That trifle will change his career entirely. He will rise in the morning two minutes later than the chain of his life had appointed him to rise. By consequence, thenceforth nothing will ever happen to him in accordance with the details of the old chain." He took out his watch and sat looking at it a few moments, then said: "Nikolaus has risen to close the window. His life is changed, his new career has begun. There will be consequences."

It made me feel creepy; it was uncanny.

"But for this change certain things would happen twelve days from now. For instance, Nikolaus would save Lisa from drowning. He would arrive on the scene at exactly the right moment—four minutes past ten, the long-ago appointed instant of time—and the water would be shoal, the achievement easy and certain. But he will arrive some seconds too late, now; Lisa will have struggled into deeper water. He will do his best but both will drown."

"Oh, Satan! oh, dear Satan!" I cried, with the tears rising in my eyes, "save them! Don't let it happen. I can't bear to lose Nikolaus, he is my loving playmate and friend; and think of Lisa's poor mother!"

I clung to him and begged and pleaded, but he was not moved. He made me sit down again, and told me I must hear him out.

"I have changed Nikolaus's life, and this has changed Lisa's. If I had not done this, Nikolaus would save Lisa, then he would catch cold from his drenching; one of your race's fantastic and desolating scarlet fevers would follow, with pathetic after-effects; for forty-six years he would lie in his bed a paralytic log, deaf, dumb, blind, and praying night and day for the blessed relief of death. Shall I change his life back?"

"Oh no! Oh, not for the world! In charity and pity leave it as it is."

"It is best so. I could not have changed any other link in his life and done him so good a service. He had a billion possible careers, but not one of them was worth living; they were charged full with miseries and disasters. But for my intervention he would do his brave deed twelve days from now—a deed begun and ended in six minutes—and get for all reward those forty-six years of sorrow and suffering I told you of. It is one of the cases I was thinking of awhile ago when I said that sometimes an act which brings the actor an hour's happiness and self-satisfaction is paid for—or punished—by years of suffering."

I wondered what poor little Lisa's early death would save her from. He answered the thought:

"From ten years of pain and slow recovery from an accident, and then from

1. **hofmeister**—literally, "court-master," a title of honor.

nineteen years' pollution, shame, depravity, crime, ending with death at the hands of the executioner. Twelve days hence she will die; her mother would save her life if she could. Am I not kinder than her mother?"

"Yes—oh, indeed yes; and wiser."

"Father Peter's case is coming on presently. He will be acquitted, through unassailable proofs of his innocence."

"Why, Satan, how can that be? Do you really think it?"

"Indeed, I know it. His good name will be restored, and the rest of his life will be happy."

"I can believe it. To restore his good name will have that effect."

"His happiness will not proceed from that cause. I shall change his life that day, for his good. He will never know his good name has been restored."

In my mind—and modestly—I asked for particulars but Satan paid no attention to my thought. Next, my mind wandered to the astrologer, and I wondered where he might be.

"In the moon," said Satan, with a fleeting sound which I believed was a chuckle. "I've got him on the cold side of it, too. He doesn't know where he is, and is not having a pleasant time; still, it is good enough for him, a good place for his star studies. I shall need him presently; then I shall bring him back and possess him again. He has a long and cruel and odious life before him, but I will change that, for I have no feeling against him and am quite willing to do him a kindness. I think I shall get him burned."

He had such strange notions of kindness! But angels are made so, and do not know any better. Their ways are not like our ways; and, besides, human beings are nothing to them; they think they are only freaks. It seems to me odd that he should put the astrologer so far away; he could have dumped him in Germany just as well, where he would be handy.

"Far away?" said Satan. "To me no place is far away; distance does not exist for me. The sun is less than a hundred million miles from here, and the light that is falling upon us has taken eight minutes to come; but I can make that flight, or any other, in a fraction of time so minute that it cannot be measured by a watch. I have but to think the journey, and it is accomplished."

I held out my hand and said, "The light lies upon it; think it into a glass of wine, Satan."

He did it. I drank the wine.

"Break the glass," he said.

I broke it.

"There—you see it is real. The villagers thought the brass balls were magic stuff and as perishable as smoke. They were afraid to touch them. You are a curious lot—your race. But come along; I have business. I will put you to bed." Said and done. Then he was gone; but his voice came back to me through the rain and darkness saying, "Yes, tell Seppi, but no other."

It was the answer to my thought.

CHAPTER VIII

Sleep would not come. It was not because I was proud of my travels and excited about having been around the big world to China, and feeling contemptuous of Bartel Sperling, "the traveler," as he called himself, and looked down upon us others because he had been to Vienna once and was the only Eseldorf boy who had made such a journey and seen the world's wonders. At another time that would have kept me awake, but it did not affect me now. No, my mind was filled with Nikolaus, my thoughts ran upon him only, and the good days we had seen together at romps and frolics in the woods and the fields and the river in the long summer days, and skating and sliding in the winter when our parents thought we were in school. And now he was going out of this young life, and the summers and winters would come and go, and we others would rove and play as before, but his place would be vacant; we should see him no more. To-morrow he would not suspect, but would be as he had always been, and it would shock me to hear him laugh, and see him do lightsome and frivolous things, for to me he would be a corpse, with waxen hands and dull eyes, and I should see the shroud around his face; and next day he would not suspect, nor the next, and all the time his handful of days would be wasting swiftly away and that awful thing coming nearer and nearer, his fate closing steadily around him and no one knowing it but Seppi and me. Twelve days—only twelve days. It was awful to think of. I noticed that in my thoughts I was not calling him by his familiar names, Nick and Nicky, but was speaking of him by his full name, and reverently, as one speaks of the dead. Also, as incident after incident of our comradeship came thronging into my mind out of the past, I noticed that they were mainly cases where I had wronged him or hurt him, and they rebuked me and reproached me, and my heart was wrung with remorse, just as it is when we remember our unkindnesses to friends who have passed beyond the veil, and we wish we could have them back again, if only for a moment, so that we could go on our knees to them and say, "Have pity and forgive."

Once when we were nine years old he went a long errand of nearly two miles for the fruiterer, who gave him a splendid big apple for reward, and he was flying home with it, almost beside himself with astonishment and delight, and I met him, and he let me look at the apple, not thinking of treachery, and I ran off with it, eating it as I ran, he following me and begging; and when he overtook me I offered him the core, which was all that was left; and I laughed. Then he turned away, crying, and said he had meant to give it to his little sister. That smote me, for she was slowly getting well of a sickness, and it would have been a proud moment for him, to see her joy and surprise and have her caresses. But I was ashamed to say I was ashamed, and only said something rude and mean, to pretend I did not care, and he made no reply in words, but there was a wounded look in his face as he turned away toward his home which rose before me many times in after years, in the night, and reproached me and made me ashamed again. It had grown dim in my mind, by and by, then it disappeared; but it was back now, and not dim.

Once at school, when we were eleven, I upset my ink and spoiled four

copy-books, and was in danger of severe punishment; but I put it upon him, and he got the whipping.

And only last year I had cheated him in a trade, giving him a large fish-hook which was partly broken through for three small sound ones. The first fish he caught broke the hook, but he did not know I was blamable, and he refused to take back one of the small hooks which my conscience forced me to offer him, but said, "A trade is a trade; the hook was bad, but that was not your fault."

No, I could not sleep. These little, shabby wrongs upbraided me and tortured me, and with a pain much sharper than one feels when the wrongs have been done to the living. Nikolaus was living but no matter; he was to me as one already dead. The wind was still moaning about the eaves, the rain still pattering upon the panes.

In the morning I sought out Seppi and told him. It was down by the river. His lips moved, but he did not say anything, he only looked dazed and stunned, and his face turned very white. He stood like that a few moments, the tears welling into his eyes, then he turned away and I locked my arm in his and we walked along thinking, but not speaking. We crossed the bridge and wandered through the meadows and up among the hills and the woods, and at last the talk came and flowed freely, and it was all about Nikolaus and was a recalling of the life we had lived with him. And every now and then Seppi said, as if to himself:

"Twelve days!—less than twelve."

We said we must be with him all the time; we must have all of him we could; the days were precious now. Yet we did not go to seek him. It would be like meeting the dead, and we were afraid. We did not say it, but that was what we were feeling. And so it gave us a shock when we turned a curve and came upon Nikolaus face to face. He shouted, gaily:

"Hi-hi! What is the matter? Have you seen a ghost?"

We couldn't speak, but there was no occasion; he was willing to talk for us all, for he had just seen Satan and was in high spirits about it. Satan had told him about our trip to China, and he had begged Satan to take him on a journey, and Satan had promised. It was to be a far journey, and wonderful and beautiful; and Nikolaus had begged him to take us, too, but he said no, he would take us some day, maybe, but not now. Satan would come for him on the 13th, and Nikolaus was already counting the hours, he was so impatient.

That was the fatal day. We were already counting the hours, too.

We wandered many a mile, always following paths which had been our favorites from the days when we were little, and always we talked about the old times. All the blitheness was with Nikolaus; we others could not shake off our depression. Our tone toward Nikolaus was so strangely gentle and tender and yearning that he noticed it, and was pleased, and we were constantly doing him deferential little offices of courtesy, and saying, "Wait, let me do that for you," and that pleased him, too. I gave him seven fish-hooks—all I had—and made him take them, and Seppi gave him his new knife and a humming-top painted red and yellow—atonements for swindles practised upon him formerly, as I learned later, and probably no longer remembered by Nikolaus

now. These things touched him, and he said he could not have believed that we loved him so; and his pride in it and gratefulness for it cut us to the heart, we were so undeserving of them. When we parted at last, he was radiant, and said he had never had such a happy day.

As we walked along homeward, Seppi said, "We always prized him but never so much as now, when we are going to lose him."

Next day and every day we spent all of our spare time with Nikolaus, and also added to it time which we (and he) stole from work and other duties, and this cost the three of us some sharp scoldings, and some threats of punishment. Every morning two of us woke with a start and a shudder, saying, as the days flew along, "Only ten days left"; "only nine days left"; "only eight"; "only seven." Always it was narrowing. Always Nikolaus was gay and happy, and always puzzled because we were not. He wore his invention to the bone trying to invent ways to cheer us up, but it was only a hollow success; he could see that our jollity had no heart in it, and that the laughs we broke into came up against some obstruction or other and suffered damage and decayed into a sigh. He tried to find out what the matter was, so that he could help us out of our trouble or make it lighter by sharing it with us; so we had to tell many lies to deceive him and appease him.

But the most distressing thing of all was that he was always making plans, and often they went beyond the 13th! Whenever that happened it made us groan in spirit. All his mind was fixed upon finding some way to conquer our depression and cheer us up; and at last, when he had but three days to live he fell upon the right idea and was jubilant over it—a boys-and-girls' frolic and dance in the woods, up there where we first met Satan, and this was to occur on the 14th. It was ghastly, for that was his funeral day. We couldn't venture to protest; it would only have brought a "Why?" which we could not answer. He wanted us to help him invite his guests, and we did it—one can refuse nothing to a dying friend. But it was dreadful, for really we were inviting them to his funeral.

It was an awful eleven days; and yet, with a lifetime stretching back between to-day and then, they are still a grateful memory to me, and beautiful. In effect they were days of companionship with one's sacred dead, and I have known no comradeship that was so close or so precious. We clung to the hours and the minutes, counting them as they wasted away, and parting with them with that pain and bereavement which a miser feels who sees his hoard filched from him coin by coin by robbers and is helpless to prevent it.

When the evening of the last day came we stayed out too long; Seppi and I were in fault for that; we could not bear to part with Nikolaus; so it was very late when we left him at his door. We lingered near awhile, listening; and that happened which we were fearing. His father gave him the promised punishment, and we heard his shrieks. But we listened only a moment, then hurried away, remorseful for this thing which we had caused. And sorry for the father, too; our thought being, "If he only knew—if he only knew!"

In the morning Nikolaus did not meet us at the appointed place, so we went to his home to see what the matter was. His mother said:

"His father is out of all patience with these goings-on, and will not have

any more of it. Half the time when Nick is needed he is not to be found; then it turns out that he has been gadding around with you two. His father gave him a flogging last night. It always grieved me before, and many's the time I have begged him off and saved him, but this time he appealed to me in vain, for I was out of patience myself."

"I wish you had saved him just this one time," I said, my voice trembling a little; "it would ease a pain in your heart to remember it some day."

She was ironing at the time, and her back was partly toward me. She turned about with a startled or wondering look in her face and said, "What do you mean by that?"

I was not prepared, and didn't know anything to say; so it was awkward, for she kept looking at me; but Seppi was alert and spoke up:

"Why, of course it would be pleasant to remember, for the very reason we were out so late was that Nikolaus got to telling how good you are to him, and how he never got whipped when you were by to save him; and he was so full of it, and we were so full of the interest of it, that none of us noticed how late it was getting."

"Did he say that? Did he?" and she put her apron to her eyes.

"You can ask Theodor—he will tell you the same."

"It is a dear, good lad, my Nick," she said. "I am sorry I let him get whipped; I will never do it again. To think—all the time I was sitting here last night, fretting and angry at him, he was loving me and praising me! Dear, dear, if we could only know! Then we shouldn't ever go wrong; but we are only poor, dumb beasts groping around and making mistakes. I sha'n't ever think of last night without a pang."

She was like all the rest; it seemed as if nobody could open a mouth, in these wretched days, without saying something that made us shiver. They were "groping around," and did not know what true, sorrowfully true things they were saying by accident.

Seppi asked if Nikolaus might go out with us.

"I am sorry," she answered, "but he can't. To punish him further, his father doesn't allow him to go out of the house to-day."

We had a great hope! I saw it in Seppi's eyes. We thought, "If he cannot leave the house, he cannot be drowned." Seppi asked, to make sure:

"Must he stay in all day, or only the morning?"

"All day. It's such a pity, too; it's a beautiful day, and he is so unused to being shut up. But he is busy planning his party, and maybe that is company for him. I do hope he isn't too lonesome."

Seppi saw that in her eye which emboldened him to ask if we might go up and help him pass his time.

"And welcome!" she said, right heartily. "Now I call that real friendship, when you might be abroad in the fields and the woods, having a happy time. You are good boys, I'll allow that, though you don't always find satisfactory ways of improving it. Take these cakes—for yourselves—and give him this one, from his mother."

The first thing we noticed when we entered Nikolaus's room was the time —a quarter to 10. Could that be correct? Only such a few minutes to live! I

felt a contraction at my heart. Nikolaus jumped up and gave us a glad welcome. He was in good spirits over his plannings for his party and had not been lonesome.

"Sit down," he said, "and look at what I've been doing. And I've finished a kite that you will say is a beauty. It's drying in the kitchen; I'll fetch it."

He had been spending his penny savings in fanciful trifles of various kinds, to go as prizes in the games, and they were marshaled with fine and showy effect upon the table. He said:

"Examine them at your leisure while I get mother to touch up the kite with her iron if it isn't dry enough yet."

Then he tripped out and went clattering down-stairs, whistling.

We did not look at the things; we couldn't take any interest in anything but the clock. We sat staring at it in silence, listening to the ticking, and every time the minute-hand jumped we nodded recognition—one minute fewer to cover in the race for life or for death. Finally Seppi drew a deep breath and said:

"Two minutes to ten. Seven minutes more and he will pass the death-point. Theodor, he is going to be saved! He's going to—"

"Hush! I'm on needles. Watch the clock and keep still."

Five minutes more. We were panting with the strain and the excitement. Another three minutes, and there was a footstep on the stair.

"Saved!" And we jumped up and faced the door.

The old mother entered, bringing the kite. "Isn't it a beauty?" she said. "And, dear me, how he has slaved over it—ever since daylight, I think, and only finished it awhile before you came." She stood it against the wall and stepped back to take a view of it. "He drew the pictures his own self, and I think they are very good. The church isn't so very good, I'll have to admit, but look at the bridge—any one can recognize the bridge in a minute. He asked me to bring it up. . . . Dear me! it's seven minutes past ten, and I—"

"But where is he?"

"He? Oh, he'll be here soon; he's gone out a minute."

"Gone out?"

"Yes. Just as he came down-stairs little Lisa's mother came in and said the child had wandered off somewhere, and as she was a little uneasy I told Nikolaus to never mind about his father's orders—go and look her up. . . . Why, how white you two do look! I do believe you are sick. Sit down; I'll fetch something. That cake has disagreed with you. It is a little heavy, but I thought—"

She disappeared without finishing her sentence, and we hurried at once to the back window and looked toward the river. There was a great crowd at the other end of the bridge, and people were flying toward that point from every direction.

"Oh, it is all over—poor Nikolaus! Why, oh, why did she let him get out of the house!"

"Come away," said Seppi, half sobbing, "come quick—we can't bear to meet her; in five minutes she will know."

But we were not to escape. She came upon us at the foot of the stairs, with
