COMMODITY STATISTICS

The 1942

COMMODITY YEAR BOOK

154708

Prepared and Published by
COMMODITY RESEARCH BUREAU, INC
82 BEAVER ST, NEW YORK, N Y

Introduction

COMMODITY STATISTICS, the fourth in the Commodity Year Book Series, will enable the thousands who have purchased previous Year Books to have up-to-date figures for the majority of the statistical tables published in previous editions.

In the above connection, we must point out that with our country at war, certain information and statistics that would be detrimental to the war effort naturally must be withheld from publication.

We are, of course, happy to cooperate with our government in this respect and are therefore including in this edition of the Commodity Year Book only those figures which have been officially released by governmental and quasi-official sources.

When the war is won, we hope to be able to supply our readers with complete statistics on the tables found in the earlier editions of the Commodity Year Book.

THE EDITORIAL BOARD

This volume is being published simultaneously with another Commodity Year Book, the "Master Edition" for use as a permanent reference volume for factual data on the many hundreds of basic commodities that serve to make up our national economy.

TABLE OF CONTENTS

PAGE

ALCOHOL 1
ALUMINUM 4
BARLEY 6
BEER 11
BRICK 12
BURLAP AND JUTE 13
BUTTER 15
CATTLE 21
CEMENT 26
CHEESE 31
COAL AND COKE 34
COCOA 43
COCONUT OIL 46
COFFEE 48
COPPER 56
CORN 61
COTTON 67
COTTONSEED AND COTTONSEED PRODUCTS 83
DISTILLED SPIRITS 91
EGGS 93
ELECTRIC POWER 97
FLAXSEED AND LINSEED OIL 99
GAS 106
GLASS 109
GOLD 112
GRAIN SORGHUMS 114
HAY 116
HEMP 119
HIDES AND LEATHER 121
HOGS 128

[1] Mill margins are the difference between the price of a pound of cotton (August 1933 to December 1935 includes processing tax) and the price of cotton cloth obtainable from a pound of cotton. This is a theoretical margin based on cotton prices at 10 southern markets and a composite cotton cloth price of 17 standard unfinished constructions

[1] Production of cane sirup, sorgo sirup, and edible molasses is of the fall of the preceding year, but it is mostly consumed in the calendar year shown

[2] The production of refiners sirup is reported biannually by the Bureau of the Census. Data in parentheses are estimated. In 1937 the census reports also included 7,030,000 gallons of other sugar sirup produced, in 1939, 26,097,000 gallons

[3] Preliminary estimates
