ZOROASTER

THE PROPHET OF ANCIENT IRAN

The MC Co.

DR. E. W. WEST

AS A MARK OF REGARD

PREFACE

THIS work deals with the life and legend of Zoroaster, **the** Prophet of Ancient Iran, the representative and type of the laws of the Medes and Persians, the Master whose teaching the Parsis to-day still faithfully follow. It is a biographical study based on tradition; tradition is a phase of history, and it is the purpose of the volume to present the picture of Zoroaster as far as possible in its hiipric light.

The suggestion whic - first inspired me to deal with this special theme came from my friend and teacher, Professor Geldner of Berlin, at the time when I was a student under him, ten years ago, at the University of Halle in Germany, and when he was lecturing for the term upon the life and teachings of Zoroaster. It was from him that I received my earliest vivid impression of the historic reality of the Ancient Sage. The special material for the work, however, has grown out of my own lectures, delivered several times in the regular university curriculum of Columbia. Students who may have attended the course will perhaps recognize some of the ideas as discussed with them in the class. As I have had the preparation of this volume in view for some time, I have naturally been constantly adding to my material or collecting new facts to throw light on the subject. It is the aim of the book to bring together all that is generally known at the present time, either from history or from tradition, about this religious teacher of the East.

Our knowledge of Zoroaster has been greatly augmented from the traditional side, during the past few years, especially through the translations made by Dr. West from the Pahlavi texts. This mass **of** Zoroastrian patristic **literature tends**

largely to substantiate much that was formerly regarded as somewhat legendary or uncertain. This has resulted in placing actual tradition on a much firmer basis and in making Zoroaster seem a more real and living personage. It is the object of the book to bring out into bolder relief historically the figure of this religious leader. In emphasizing more especially the reality of the great Master's life instead of elaborating the more mythical views of Zarathushtra which prevailed not so long ago, I may, in the judgment of some, have gone too far on the side of realism. But if I have done so, it seems to me that this is a fault at least in the right direction if we may forecast the future from the present. I can but feel that the old writers, like Anquetil du Perron, were nearer the truth in certain of their views of Zoroaster, than has sometimes been supposed. In taking a position so much in accord with tradition with regard to Zarathushtra I might adopt the plea which the old Armenian annalist, Moses of Khorene, employs in another connection; ' there may be much that is untrue in these stories, there may be much that is true ; but to me, at least, they seem to contain truth.' I may only add that in general where there is so much smoke there must also be fire, and in the book I hope that others may discern some sparks of the true flame amid the cloud.

As to the arrangement of material and the form of the work, I have sought to make the first half of the volume more general; the second half I have allowed to be more technical. The story of the life and ministry of the Prophet is told in twelve chapters ; the more critical discussion of mooted points is reserved for the Appendixes. The general reader may also omit all notes at the bottom of the pages.

In respect to the spelling of proper names the plan has generally been, in the case of Zoroaster, to employ Zarathushtra, Zaratusht, or Zardusht, respectively, if it seemed necessary at any point to indicate the special sources from which I was drawing or to distinguish between Avestan, Pahlavi, and Modern

Persian. I have otherwise called the Prophet by his more familiar name of Zoroaster. The same holds true of his patron Vishtaspa, Vishtasp, Gushtasp, and of other ancient names. I have furthermore aimed at giving authority for all statements that I have made, as the abundant references to the original sources and the citations will show.

With regard to indebtedness, I have always tried to give credit to my predecessors and fellow-workers in the field; a glance at the footnotes, I think, will prove this. Each of those to whom I am under obligation will best recognize my indebtedness, and will best be aware of my appreciation. I should like to have referred also to Professor Tiele's latest book, which deals with the religion of Iran, because some twenty of its interesting pages are devoted to Zarathushtra; it arrived after my work was all printed, so I have been able only to add the title in my bibliographical list on p. xv, and to draw attention to the points which are of importance in connection with the present subject. Furthermore, in various parts of my volume I have made acknowledgment to several friends for kind aid which they have readily given on special points, and which I shall gratefully remember.

I now wish to express to the Trustees of the Columbia University Press my appreciation of their encouragement given to me to carry out the work; and I desire especially to thank President Seth Low for the personal interest he has taken in the book from the beginning, and to acknowledge the kind helpfulness of Dean Nicholas Murray Butler in all matters of detail. The Macmillan Company, likewise, have been constantly ready to meet my wishes in every regard; and I owe my thanks also to the printing firm of Messrs. Cushing and Company, to their compositors and their proof-readers, for their careful and prompt despatch of the work.

But beside these acknowledgments there remain two friends to mention, who come in for a large share of remembrance.

These are my two pupils, Mr. Louis H. Gray, Fellow in Indo-Iranian Languages in Columbia University, and Mr. Montgomery Schuyler, Jr., a member of the class of 1899 in the College, who has been studying Sanskrit and Avestan for the last two years. Since the first proof-sheets arrived, these two generous helpers have been unflagging in their zeal and willingness to contribute, in any way that they could, to giving accuracy to the book. Mr. Gray's indefatigable labor and scholarly acumen are especially to be seen in Appendix V., the completeness of which is due to his untiring readiness to pursue the search farther for texts that might hitherto have escaped notice; and to Mr. Schuyler's hand is owed many a happy suggestion that otherwise would have been lacking in the book, and more than one correction that without his aid might have been overlooked. To both of these scholars I wish to express my thanks; and I feel that they also will recall with pleasure the happy hours spent together in work as chapter after chapter came from the printer's hand. *Forsan et haec olim meminisse juvabit.*

And now I send the book forth, hoping that in some measure it may contribute to a more general knowledge of this Sage of the Past, the Persian Prophet of old, the forerunner of those Wise Men of the East who came and bowed before the majesty of the new-born Light of the World,

This excellent volume dealing with the religion of Iran arrived too late to quote from or to mention except here in the Preface, because the rest of my book was already in the press. I should otherwise certainly have referred to such pages in the work as bear upon Zoroaster, for example the following: pp. 37-38, Gaotema is not identified with Buddha, but rather with the Vedic sage (cf. pp. 177-178 of the present volume); p. 49, age of the Avesta, the oldest passages of the Younger Avesta, according to Professor Tiele, are to be placed not much later than B.C. 800, although they were not necessarily at that time in their present form of redaction; p. 54, allusions to Phraortes and Kyaxares; p. 54, Atropatane; p. 58, Bactrian kingdom; p. 92, Zoroaster in the Gathas ; p. 98, allusions to Z.'s name and its meaning; pp. 99-107, question as to his historical, legendary, or mythical existence; p 121, the cradle of the Zoroastrian reform is to be sought in the north and northwest of Iran, whence it spread probably first toward the east and southeast of Bactria, even as far as India; thence to the south into Media Proper and Persia.

CHAPTER I

INTRODUCTION

εἰπὲ γάρ μοι, διὰ τί τὸν Ζωροάστρην ἐκεῖνον καὶ τὸν Ζάμολξιν οὐδὲ ἐξ ὀνόματος ἴσασιν οἱ πολλοί, μᾶλλον δὲ οὐδέ τινες πλὴν ὀλίγων τινῶν.

ZOROASTER'S POSITION AMONG EARLY RELIGIOUS TEACHERS — ZOROASTER AND BUDDHA — PLAN AND SCOPE OF THE PRESENT WORK — ZOROASTER AS A HISTORICAL PERSONAGE — SOURCES OF INFORMATION — ZOROASTER IN THE CLASSICS — CONCLUSION

Zoroaster's Position among Early Religious Teachers. — Among the early religious teachers of the East, if we leave out the great founders of Judaism and of Christianity, the name of Zarathushtra, or Zoroaster, the Persian sage and prophet of ancient Iran, is entitled to hold one of the most distinguished places. To Zoroaster is due the same rank, the same respect, the same reverential regard that is due to such seekers after light as Buddha, Confucius, Socrates. Even some of the great thoughts of Christianity may be found to have been voiced likewise by Zoroaster — a fact which cannot but be of interest — although it belongs elsewhere to discuss the possibility or impossibility of any closer or more distant bonds of connection between Judaism and Christianity and the faith of ancient Iran. Between India and Iran, however, a natural connection and kinship is acknowledged; and owing to the importance of Buddhism as a contrasted faith, a brief parallel between the teachings

of Zoroaster and the doctrines of Buddha may be drawn by way of introduction.

Both these prophets were filled with a spiritual zeal for relieving a people and ameliorating their condition; both of them were inspired with a righteous hope of bettering their peoples' lives and of redeeming them from misery and sin; and both men became founders of religious faiths. The end and aim in both cases was in general alike; but the nature of the two minds and of the creeds that were developed shows some marked and characteristic, if not radical, differences. The faith of Buddha is the more philosophical; the faith of Zoroaster, themore theological. Buddha's doctrine is a creed rather of renunciation, quietism, and repose; Zoroaster's creed is a law of struggle, action, and reform. India's so-called Prophet Prince is overwhelmed with the wretchedness of human existence, an existence from which the sole release is absorption into Nirvana; Persia's Sage is equally cognizant of the existence of woe, but it is no world-woe without hope of triumphant domination. The misery which Zoroaster acknowledges to exist is due to an Evil Principle against whom man must struggle all his life and fight the good fight which will bring final victory and will win joys eternal at the resurrection. Nevertheless, as a faith in reality, Buddha's belief had in it more of the elements of a universal religion; Zoroaster's faith, asGeldner has said, possessed rather the elements of a national religion. Millions of human souls still take refuge in Buddha; the faithful followers that bear the name of Zoroaster to-day do not number a hundred thousand. In making such a comparison, however, with regard to the relative proportion between the two faiths in the matter of present adherents we must not forget that national events and external changes in the world's history have contributed as much to this apparent disproportion as any inherent and essential difference between the nature of the two creeds has done.

So much may be said by way of bringing Zoroaster into con-

trast with the founder of the Indian religion that came after his own; and as recent discoveries have thrown so much light upon Buddha's life, and archaeological finds have contributed so much to substantiating traditions that long have been familiar but were not always estimated at their true value, it seems worth while to take up the subject of Zoroaster's life anew and to ascertain all that we are in a position just now to find out regarding it. The purpose therefore of the following pages is to gather as much material as is accessible at present for illustrating the life and legend of the Prophet of Ancient Iran, and this will be done with special reference to tradition.

Zoroaster as a Historical Personage. — Before proceeding to details with regard to the prophetic teacher of Iran, one point must be emphasized at the outset, and an opinion must definitely be expressed; this is with reference to the question raised as to whether Zoroaster be a historical personage, a real figure whose individuality is indelibly stamped upon the religion of Persia of old. An affirmative answer must be given, for Zoroaster *is* a historical character. This point is emphasized because it is not so long ago that advanced scholarship for a time cast a cloud of doubt over the subject;[1] but happily the veil of myth is now dispelled. Scholars are generally agreed that although legend or fable may have gathered about the name of the prophet of ancient Iran, the figure of the great reformer, nevertheless, stands out clearly enough to be recognized in its general outlines; and sufficient data for his life can be col-

[1] Among other references noted by Spiegel, *Eranische Alterthumskunde*, i. 708 n., mention may be made of Kern, *Over het Woord Zarathustra en den mythischen Persoon van dien Naam* (1867); observe also Spiegel's remark in *Die arische Periode*, § 43, p. 299 (Leipzig, 1887) ; and especially the late lamented Darmesteter, *Zend-Avesta*, Part i. lected to enable one to give a clear and correct idea of his personality and individuality.[1] There are parts, it is true, in every great man's life regarding which nothing is known (one has only to think of the Shakspere-Bacon controversy); and in the case of all early teachers' lives there are many lacuna to be filled. The broken fragments of the statue are sometimes separated so far that we cannot find many of the missing chips, and we must be content to piece the parts imperfectly together. Caution must necessarily be used in such restorations. The existence of legend, fable, and even of myth, may be admitted in dealing with Zoroaster's life ; some apocryphal literature is acknowledged to have grown up about the hallowed Messiah of Christianity;[2] but the shadowy substance gathered about the figure of Zoroaster must not be allowed to shroud and obscure his true personality. Cautious we must be, conservative we must be, yet not so far as to exclude a willingness to recognize characteristic traits and features, or to define more sharply objects and forms whose outlines are now and then somewhat dimly presented. In the present research an attempt will be made frankly to give warning where points are doubtful; and difficult as it is at this remote day, an endeavor will be made fairly and impartially to distinguish between fiction on the one hand and underlying facts on the other, so far as they may be looked upon as reasonably certain, presumable, or plausible. The achievement undoubtedly falls far short of the aim in the present monograph ; and some will feel that too much weight is given to traditional statements; but in the absence of other authority we have at least these to turn to; and the purpose is to lay these down for reference and for judgment. After this prefatory note has been given, attention may now be directed to the sources of our knowledge in antiquity respecting the life and legend of Zoroaster as a historical personage.

Sources of Information about Zoroaster's Life. — The data for reconstructing an outline of the life of the great reformer may be conveniently classified, first (1) as Iranian, second (2) as non-Iranian. Naturally the various sources are not all of equal importance ; yet each has a certain intrinsic value.

Among (1) the Iranian sources of information the Avesta, of course, stands foremost in importance as the material with which to begin; and in the Avestan Gathas, or Psalms, Zoroaster is personally presented as preaching reform or teaching a new faith. The entire Pahlavi literature serves directly to supplement the Avesta, somewhat as the patristic literature of the Church Fathers serves to supplement the New Testament. Especially valuable is the material in the Pahlavi Dinkart and the Selections of Zat-sparam, material which has been made accessible by Dr. E. W. West in his 'Marvels of Zoroastrianism' *(SBE.* xlvii. Pahlavi Texts, Part V.; Oxford, 1897). Without West's work many of the following pages could not have been written. Of similar character, as based chiefly upon these two sources, is the later Persian Zartusht Namah, which was composed in the thirteenth century of our era.[1] Firdausi's Shah Namah, of the tenth century A.D., contains abundant old material bearing upon the reign of Zoroaster's patron, King Gushtasp Vishtaspa).[2] Some other Parsi works and traditional literature may be included in the list, but these will be mentioned as occasion arises in the course of the investigation.[3] Zoroaster is not mentioned in the Ancient Persian Inscriptions, but the silence may be accounted for.

[2] **FirdausI expressly states that the portion of his chronicle which relates to Zoroaster (Zardusht) is derived from his own poetic predecessor, Daklkl, who was cruelly murdered when he had sung hut a thousand verses. These Firdausi says he has incorporated into the Shah Namah. Scholars are generally inclined to accept the truth of the statement. See Noldeke in *Grundriss der iran. Philol.* ii. 147-150.**

(2) The non-Iranian sources are either (a) Classical or (6) Oriental. **The latter** include **especially the** allusions to Zoroaster in Syriao and Arabic literature,[1] as well as some Armenian references and other incidental mentions.[2] In point of antiquity the classical references, as a **rule,** rank next to the Avesta; and these allusions, even though they are foreign, are often of real importance, as they serve to check or to substantiate results which are based upon various authorities.[8] The Appendixes to the present volume will render most of this material easily accessible.

Zoroaster in the Classics.[4] — All classical antiquity is agreed on the point that Zoroaster was a historical personage, even though his figure was somewhat indistinct in the eyes of these ancient authors. To the writers of Greece and Rome he was thearch-representative of the Magi;[5] and he sometimes seems to be more famous for the magic arts which are ascribed to his power than for either the depth and breadth of his philosophy and legislation, or for his religious and moral teaching. None the less, he was regarded as a great sage and as a prophet whose name was synonymous with Persian wisdom, or as the founder of the Magian priesthood who are sometimes said to be his pupils and followers.[6]

The Magi, as *we* know from Herodotus, were a tribe, not merely a priestly family, and the right of the classics to call Zoroaster a Magian is borne out in other ways. The Pahlavi Dinkart regards the 'Avesta and Zand' as the sacred writings of the Magian priests.[1] The learned Arab chronologist Albiruni adds that ' the ancient Magians existed already before the time of Zoroaster, but now there is no pure unmixed portion of them who do not practice the religion of Zoroaster.'[2] Several Syriac and Arabic writers speak of him as 'a Magian,' head of the Magians,' ' chief of the sect,' 'Magian prophet,'[8] diviner.'[8] This direct association of his name with the Magi is perhaps to be understood with some limitations ; but the Magi were the reputed masters of learning in ancient times, and Zoroaster stood for this learning in antiquity.[4]

Of the Magian teachings and doctrines it is difficult to form a clear picture, except so far as we may believe them to be reflected in Zoroaster, after we have made due allowance for changes or reforms that he may have instituted. The classical tradition that Pythagoras studied under these masters in Babylon may not be altogether without foundation.[5] Plato we know was anxious to visit the Orient and to study with the Magi, but the Persian wars with Greece prevented him.[6]

The followers of the Sophist Prodicus, a contemporary of Socrates, are reported to have boasted their possession of secret writings of Zoroaster ;[1] and even a Magian teacher, one Gobryas, is claimed as instructor of Socrates.[2] Aristotle, Deinon, Eudoxus of Cnidus, and especially Theopompus, were familiar with Zoroastrian tenets.[8] A work bearing the name of Zoroaster by Heraclides Ponticus, a pupil of Plato and of Aristotle, is mentioned in Plutarch.[4] The distinguished philosopher Hermippus (about B.C. 200) made careful studies of Magism and of Zoroastrian writers, according to Pliny (H.N.30. 2.1). Zoroaster and and there are numerous allusions to ideas drawn from these sources in Plutarch, Strabo, Suidas, and others.

Titles of a number of purported books of Zoroaster are also given in the classics, such as *περὶ φύσεως, περὶ λίθων τιμίων, βίβλιοι ἀπόκρυφοι Ζωροάστρου, ἀστεροσκοπικὰ Ζωροάστρου.*[6] Furthermore, some 'sayings' of Zoroaster, like those mentioned by Gemistus Pletho, *Μαγικὰ λόγια τῶν ἀπὸ τοῦ Ζωροάστρου τοῦ Μαγου*, are both reported to have existed, and passages are occasionally claimed to be taken from them. Like other such productions, however, these are all probably apocryphal, although the encyclopaedic character of the titles somewhat recalls the analysis and summaries that we have of the Zoroastrian Nasks.[6] At all events, these references and allusions show how great a reputation was enjoyed by Zoroaster in classical antiquity, even if his name does not occur in Herodotus[7] nor

that in Phoenicia Plato met with Persians who introduced him to Zoroastnan lore. Cf. Appendix V. § 1.

in Xenophon, nor with certainty in the extant fragments of Ctesias. The earliest authenticated classical allusion to Zoroaster by name seems to be the reference in the Platonic Alcibiades ;[1] although, according to Diogenes Laertius *(Procem.* 2), he was mentioned by the earlier Xanthus of Lydia.[2]

Conclusion. — As Zoroaster is one of the great religious teachers of the East, his life as well as his work is worthy of study from its historical importance. Our information regarding his life is to be gathered from the Zoroastrian scriptures, the Avesta and the Pahlavi writings, and other material must be used to supplement or to correct these sources. Due weight must be given to tradition. It must also be remembered that fiction as well as fact has doubtless gathered about the name of this religious reformer. This latter fact is all the more a proof of his great personality.

CHAPTER II

FAMILY HISTORY OF ZOROASTER

THE LINEAGE OF THE MASTER

8a jato yena jatena yati vams'ah. samunnatim.

— HITOPADES'A.

INTRODUCTION — ZOROASTER AN IRANIAN — THE NAME ZOROASTER (ZARATHUSHTRA), ITS FORM AND ITS MEANING — THE DATE OF ZOROASTER — HIS NATIVE PLACE — ZOROASTER'S ANCESTRY AND HIS FAMILY ; GENEALOGIES — CONCLUSION

Introduction. — When a man rises to lasting fame, all that is associated with his name and his times becomes of interest and of importance. Lustre is shed upon his family, and distinction is lent to the line that produced such a son. If great men are the children of their age, the age of a great religious teacher can but deserve attention. His own origin, the influences that may have been formative in his life, his environment and surroundings, alike become worthy of consideration. The nature and condition of the country which called him forth requires some remark, and with regard to Zoroaster it is to be regretted that we do not know more than we do of Iran in early antiquity, and that only a limited space can be devoted here to this special theme, although it receives more or less treatment in different places throughout the book. This prophet's teaching found fruitful soil in the land of Ancient Iran, because the seed was already in the hearts of the people, if we may adapt the phrase of a renowned author.

Zoroaster of Iran. — Zoroaster, it is believed, sprang up in the seventh century before the Christian era, somewhere in

the land between the Indus and the Tigris. Before our mind rises first a picture of the world outside of Iran, the kingdoms of Assyria and Babylon, with their long line of dynasties reaching far back into history which antedates Iran;[1] to the southeast lies India, bound by the ties of Indo-Iranian unity; lastly, and to offset all, Turan, the rival and foe, the synonym of everything crude, uncouth, and barbarous, borders upon the Iranian territory to the north. But to return to the land of Iran itself during this period. There exists, or is claimed to have existed in early times, an eastern Iranian kingdom in Bactria. An uncertainty with regard to this point will be noted hereafter. Media, however, has already been known to fame in history long before this period; and in the eighth century B.C. its power was able to throw off the yoke of Assyria, and at the close of the seventh century (B.C. 606) to crush Nineveh and establish the Median dynasty of Ecbatana, which may be called the first of the great Iranian kingdoms.[2] But the decadence of Media swiftly follows, and its glory is dimmed before the splendor of the rising Persian sun. So much for the period and land in which Zoroaster appeared.

During the very lifetime of Zoroaster—if we accept the traditional dates — the Jews were carried into captivity in Babylon, and their return from exile to Jerusalem takes place less than a generation after his death. If the Persian wars with Greece stand for anything in the world's history, when Orient and Occident met at Marathon, Plataea, Salamis, when the East received its first shock and set-back from the West, certainly we must feel an interest in the life of that man who is commonly spoken of as the lawgiver of the Persians. His

name, his date, and his native place, his family, his ancestry, and his associations, are all matters of some moment. These will be given in this chapter before turning to the more picturesque story of his life. The question of his religious beliefs, teaching, and philosophy, can be dealt with only incidentally, as this is reserved for treatment in another work.

The Name Zoroaster (Zarathushtra), its **Form and** its **Meaning,** — The form of the Prophet's name in the Avesta consistently appears as *ZaraOuHra,* or with the fuller patronymic as *Spitama ZaraOuttra.*[1] The shapes or disguises which this appellative has assumed in other languages show as much variety as does the spelling of the name of the English reformer Wyclif (Wycliff, Wyclyffe, etc.). The familiar form (a) *Zoroaster* is adopted from *Zoroastres* of the Latin, which in turn is modelled after the Greek form. (b) In Greek the name commonly appears as **Ζωροάστρης,**[2] but sporadic variations are found, for example **Ζωρόαδος, Ζαράδης** beside **Ζωροάστρης** in Agathias 2. 24, or the anomalous **Ὠρώαστος** (Georgius Hamartolus), see Appendix V.; or again, the forms *ZdpaTos*[3] *Zapy*[4] which are also quotable from the Greek, seem to be based upon the later Persian form. A graeized Armenian form (Arm. *Zaravest)* is cited from Cephalion;[5] and Diodorus Siculus (1. 94) has *ZaOpavo-rr}*;?* which recalls the Avestan form, Zarathushtra,

of the Prophet's name.[1] (c) An Armenian **rendering** of **the** appellative is given as *Zradasht.*[2] *(d)* The Syriac **and Arabic** writings show the name under a variety of guises, **but** they generally agree with the Pahlavi or Modern Persian form.[3] (e) The Pahlavi version of the name is usually given *Zaratust.*[4] (/) Some of the Modern Persian varieties are *Zartust, Zardust, Zdrdust, Zarduhast, Zardtust, Zaratust, Zaradust, Zaradust, Zdradhust*[5] All these are variations of Avestan *ZaraduStra.*

The question as to the significance of the name of Iran's prophetic teacher is not without interest. India's princely reformer was the 'Enlightened' *(Buddha)* or the 'Sakya Sage' *(Sdkya-muni)*; Jesus of Nazareth, the Son of God, was the Wonderful, the Counsellor, the Anointed (*Christus).* In ancient Iran Zoroaster, the Righteous, was called *ZaraQustra,* or *ZaraQustra Spitama, Spitama Zaraduttra,* or sometimes simply *Spitama.* The title *Spitama* is a family designation, and the name comes from an ancestor of the Prophet, a heros eponymus of the clan.[6] The Spitaman name is elsewhere found early in Media. The derivation of this patronymic *Spitama,* used as an appellative, is apparently from the Av. root *spit-*[4] be white' = Skt. *s'vit-*, and the significance is probably 'descendant of White,' like the English *Whit-ing.* The origin of *ZaraQustra* itself is less

[1] The Greek form **Ζοροάστρης,** or **Ζωροάστρης,** is apparently to be explained as derived from Av. Zarathushtra through a Western Iranian presumable form **Zara*^{n}*ustra,* cf. Bartholomae in *Grundriss d. iran. Philologie,* i. §§ 93, 264 (8).

Zoroaster's daughter is *Pourucista Spitaml,* Ys. 53. 3; his cousin is *Maidyoidanha Spitama,* Ys 51. 19; the members of the family are spoken of as the Spitamas (Ys. 46. 16) *Spitamanho.* In Pahlavi, the Prophet is called *Zaratu i Spitaman,*' Zoroaster of the Spitamas'; the Mod. clear than Spitama and.the derivation has been much discussed. Scholars, however, are now generally agreed upon one point; it is that the second member of the compound (for the form must be a composite) is the word *ustra-* 'camel,'[1] but the precise nature of the compound and the true meaning of its first element are uncertain. The most probable significations that have been proposed are : ' one whose camels are old' *(zar* ' be old ')[2] or ' old camel ' (cf. Skt. *jarad-gava, jarat-kdru-);* or again ' one whose camel is fierce ' *(zar* ' be angry') or possibly ' tormenting the camel'; or ' robbing a camel' (cf. Skt. *bharadvdja).* Numerous other suggestions and 'explanations have been offered ; and some of them show a good deal of fancy; but doubtless the name is an unromantic, unpoetic name, a title which the man retained as his birthright even after he became famed as a spiritual and religious teacher. The very fact of his retaining this somewhat prosaic appellative testifies to a strong personality; Zoroaster remains a man and he is not dubbed anew with a poetic title when later sanctification has thrown a halo of glory about his head. For an outline of the various discussions of Zoroaster's name, the reader is referred to the special Appendix.[3]

The Date of Zoroaster. — With reference to the date at which Zoroaster lived and taught, there has been a wide diversity of opinion, but now a more general agreement between the views of scholars on the subject is beginning to prevail. The consensus of opinion has of late been growing stronger in favor of accepting the traditional view, based on the chronology of the

Bundahishn, which places the era of Zoroaster's activity between the latter half of the seventh century B.C. and the middle of the sixth century, A detailed discussion of the question with a general presentation of the material on the subject has been given by the present writer in a monograph on *The Date of Zoroaster, JAOS.* xvii. 1-22, 1896 (reprinted in Appendix II.). The results are rendered even more precise by a slight chronological correction by Dr. E. W. West,[1] who gives the years B.C. 660-583 as probably the exact date of Zoroaster so far as tradition is concerned. There is space here only to summarize ; for details reference must be made to Appendix II., III.

The statements of antiquity on the subject may conveniently be divided into three groups.

First (1) to be considered are those references that assign to Zoroaster the extravagant age of B.C. 6000. These are confined simply to the classics, but they have a certain claim to attention because they are based upon information possessed by Aristotle, Eudoxus, and Hermippus.[2] These extraordinary figures are due to the Greeks' not having quite rightly understood the statements of the Persians who place Zoroaster's millennium amid a great world-period of 12,000 years, which they divided into cycles, and in accordance with this belief Zoroaster's *fravasi* had actually existed in company with the archangels for several thousands of years. Second (2) come those statements which connect the name of Zoroaster with that of the more or less legendary Ninus and the uncertain Semiramis.[8] Third (3) the direct Zoroastrian tradition

which is found in the Pahlavi book Bundahishn 34. 1-9 and supported by Arta Viraf 1. 2-5 and Zat-sparam 23. 12, as well as corroborated by abundant Arabic allusions (Albiruni, Masudi, and others) unanimously places the opening of Zoroaster's ministry at 258 years before the era of Alexander, or 272 years before the close of the world-conqueror's life (B.C. 323). As Zoroaster was thirty years old, according to the tradition, when he entered upon his ministry; and as he was seventy-seven years old at the time of his death ; and, furthermore, since we may assume an omission of thirty-five years in the Bundahishn chronological list, according to West, we have good reason, on the authority of the tradition, for making B.C. 660-583 as the era of Zoroaster.

Tradition also says that Zoroaster was forty-two years old when he converted King Vishtaspa, who became the patron of the faith. There is no good ground, however, for identifying this ruler with Hystaspes, the father of Darius. Such identification has indeed been made by Ammianus Marcellinus (22. 6. 32), and it has met with support from some; but the doubt on this point which was raised as early as Agathias (2. 24) is unquestionably well founded.[1]

Zoroaster's Native Place. — The question of Zoroaster's native place is a subject that has been much debated. The problem is more complicated because of the uncertainty which exists as to whether his birthplace and early home was necessarily also the chief scene of the teacher's activity. The whole matter may be brought under the heading of two inquiries: first (1), whether the home of Zoroaster is to be placed in the west of Iran, in Atropatene and Media; second (2), whether

ancient Media was the scene also of his ministry, or are we to accept the claim of Bactria and eastern Iran? Possibly he may have taught in both lands. The subject is of interest, moreover, in the light of the recent important developments with regard to Buddha's birthplace, and the archaeological finds which have lately contributed so much towards establishing the exact location where the gentle teacher of India was ushered into the world. Accordingly, the problem of Zoroaster's native place and then the possible scene of his ministry is discussed with considerable fulness in Appendix IV; it suffices merely to summarize here.

If we omit the question of his ministry for the moment and speak simply of his native place, we may say without much hesitation, that the consensus of scholarly opinion at this time is generally agreed in believing that Zoroaster arose in the west of Iran. Oriental tradition seems to be fairly correct in assigning, as his native land, the district of Atropatene or Adarbaijan, to the west of Media, or even more precisely the neighborhood about Lake Urumiah. There is ground, furthermore, for believing in the tradition which says that his father was a native of Adarbaijan, — a region of naphtha wells and oil fountains, — and that Zoroaster's mother was from the Median Ragha (Rai) — consult the map at the end of this volume. Explicit references for these statements will be found in Appendix IV. For the other problem, the one relating to the possible scene or scenes of Zoroaster's ministry, reference must be made to the extended discussion in the same appendix below. Here we need only bear in mind that there is every reason to believe that Zoroaster, for a time at least, wandered about in his missionary labors, and there is certainly a strong tradition to the effect that during the two opening years of his prophetic career he was for a while in the east, in Seistan, and also in Turan — see Map. One is reminded of the peregrinations of the Buddha.

Zoroaster's Ancestry and His Family. — The subject of gene-

alogy has not much interest for most readers, and a treatment of it is apt to recall the 'begat' chapters of the Biblical patriarchs. Nevertheless Zoroaster's line is not without importance, and it deserves to receive attention, as much as would the descent of Mohammed or of Buddha. If Indian legend and tradition in the case of the great Ganges teacher ascribes exalted origin from the princely family of the Sakyas, Iranian story is no less successful, for its part, in tracing Zoroaster's descent from a sort of royal Davidic line that ends in the house of Manushcihar, sovereign of Iran,[1] or ascending still farther back through the forty-fifth generation to Gayomart, the Iranian Adam, the father of all mankind.[2] The Prophet's more immediate ancestors are often referred to. Pourushaspa, the father, is mentioned several times in the Avesta and is frequently referred to in the Pahlavi texts and in the later Zoroastrian literature. The name of Zoroaster's mother is preserved in an Avestan fragment as Dughdhova (Phi. Dughdavo, Dukdav or Duktaubo, Mod. Pers. Dughdu).[8] The name of Zoroaster's great-grandfather Haecat-aspa is mentioned in the Avesta (Ys. 46. 15 ; 53. 3), as is also the latter's sire Cikhshnush or Chakhshni (cf. Yt. 13. 114); and Spitama, the heros eponymus of the family, is referred to in the Gatha allusions to the Prqphet's kinsman Spitamaonho (Ys. 46. 15), whence his own appellative Zarathushtra Spitama, Zoroaster the Spitamid. The locus classicus for tracing Zoroaster's lineage is Bundahishn 32. 1-2; it is supplemented by the Pahlavi Dinkart 7. 2, 70, the Selections of Zatsparam, 13, 6, and by the Vijirkart-i Dinig; compare also the Nirang-i Boidatano va Yatkartano (G*rundriss* ii. 115).[4] The

Zoroaster's grandfather on the maternal side, according to Dk. 7. 2. 3 and Bd. 32. 10, was Frahim-rvanS-zoish or Frahim-rava; his maternal grandmother may have been called Freno (Zsp. 13.1), but the passage is not quite clear. There are several allusions to his paternal uncle Arasti and to the latter's son, Maidhyoi-maonha, who was Zoroaster's cousin and first disciple (Yt. 13. 95; Bd. 32. 2 et passim). According to the Selections of Zat-sparam, Zoroaster was one of five brothers. The passage states: 'Of the four brothers of Zaratusht the names of the two before Zaratusht were Ratushtar and Rangushtar, and of the two after him Notariga and Nivetish.'[1] But in each case the reading of the Pahlavi word is uncertain. A tabular statement of the Sage's family and kin may now be presented.[2]

Tradition furthermore states that Zoroaster was thrice married and had several sons and daughters, and that the three wives survived him (Bd. 32. 5-7; Vjkt. pp. 21-22). The names of the first wife and of the second are not preserved,[3] but the latter is said to have been a widow. By the first, or privi-

leged wife, the Prophet had one son and three daughters. Their names are several times mentioned in the Avesta and in Pahlavi literature.[1] One of the daughters, Pourucista (Ys. 53. 3), was married to the wise Jamaspa. The son Isatvastra, by the second wife, became head of the priestly class and had a son, Ururvija, who is also mentioned by name (Bd. 32. 7). Isatvastra was likewise made guardian of the children of his father's second wife who had borne two sons, Urvatatnara and Hvarecithra, to Zoroaster (Yt. 13. 98). These two sons were respectively regarded as the head of the agricultural class and of the warrior caste. The third wife, Hvovi, was the daughter of Frashaoshtra and niece to Jamaspa, attaches to the court of Vishtaspa (Yt. 13. 139; 16. 15; Dk. 9. 44. 16; 9. 69. 58). By Hvovi no earthly children were born, but she is the noble consort from whom ultimately are descended the future millennial prophets, Ukhshyat-ereta, Ukhshyat-nemah, and the Messiah, Saoshyant (Yt. 13. 128). The marvels of this preternatural conception are narrated in detail in Bd. 32. 8-9, cf. Yt. 13. 62, 128, 141-2, and elsewhere. The later descent from Zoroaster's line may thus be tabulated: —

Summary.—After noticing in this chapter the fact that Zoroaster was an Iranian, we briefly followed in outline the position of Iran in ancient history. We next saw that the oldest form of Zoroaster's name is given as Zarathushtra. The statement was then made that we have reason for believing that he arose in western Iran (Atropatene and Media) about the middle of the seventh century B.C. The scene of his ministry is a question that was reserved for later discussion. As was shown, a long line of ancestry can be traced out for him, and we know something of his immediate family through tradition. But we bid adieu to these external matters to deal with his life itself.

INTRODUCTION—PROPHECIES OF THE COMING OF ZOROASTER, AND THE MIRACLES BEFORE HIS BIRTH — BIRTH AND CHILDHOOD OF ZOROASTER ACCORDING TO TRADITION — ZOROASTER'S YOUTH AND EDUCATION — PERIOD *OF* RELIGIOUS PREPARATION—CONCLUSION

Introduction, Prophecies of the Coming of Zoroaster. — The coming of a prophet or great teacher seems at times in the world's history to be looked for instinctively. We may see the truth of this statement exemplified in our own Gospels when the disciple asks of the Saviour, 'Art thou he that should come, or do we look for another?' And when a blessed Master is at last recognized, the generations vie with each other in repeating how his advent was foretold. In the Zoroastrian scriptures, passages are adduced to show that the Sage's coming had been predicted ages before. In the Avestan Gathas and in Pahlavi literature the soul of the mythical primeval bull, three thousand years before the revelation of the religion, beholds a vision in heaven of the *fravasi* or ideal image of the prophet Zarathushtra, Zaratusht, that is to be.[1] Again, in the golden age of the world, King Yim (Jemshed) forewarns the demons of their destined defeat and overthrow

at the birth of the glorious manchild.[1] Lastly, in the reign of the patriarch ruler, Kai Us, three centuries before the actual appearance of the hallowed saint, a splendid ox is gifted with the power of speech, so as to foretell the promised revelation which the future shall receive from the lips of Zaratusht.[2]

Miracles before His Birth, — From the Avesta we also learn that the divine sacerdotal and kingly Glory *(hvarnath)* is handed onward from ruler to ruler, and from saint to saint, ever with a view to its illumining ultimately the soul of the inspired one.[3] It is ordained of heaven, moreover, that this Glory shall be combined with the Guardian Spirit *(fravasi)* and the Material Body, so as to produce from this threefold union the wonderful child.[4]

First, the Glory descends from the presence of Auharmazd, where it abides in the eternal light; it passes through heaven down to earth; and it enters the house where the future Zaratusht's mother herself is about to be born. Uniting itself with her presence it abides in her until she reaches the age of fifteen, when she brings forth her own first-born, the prophet of Iran. But before this event, as a girl she became so transcendent in splendor by reason of the miraculous nimbus of the Glory that resided in her, that, at the instigation of the demons, her father is convinced that she is bewitched, and he sends her away from his home to the country of the Spitamas, in the district of Alak or Arak, to the village of Patiragtaraspo, whose son Porushaspo (Av. Pourushaspa) she marries. The Glory is therefore upon earth, ready to appear in the form of man. Such at least is the scriptural account found in the Dlnkart.[5]

Second, the archangels Vohuman and Ashavfihisht, descending[1] from heaven, convev to earth another of the three elements,

the Guardian Spirit (Phi. *fravhar,* Av. *fravasi),* bearing it in a stem of the Horn-plant, the height of a man. For a time this precious stem is placed in the nest of two birds whose young have been devoured by serpents: it protects the brood and kills the reptiles. Thus it continues as a talisman in the keeping of the birds,[1] until required again by the archangels, and until Porushaspo (Pourushaspa), who meanwhile had married Duktaub (Dughdh5va), meets with the two presiding seraphim 'in the cattle-pasture of the Spitamas' and receives from them the cherished rod, which he gives to his wife to preserve.[2] Much of all this, it is true, has a mythical ring or an allegorical note.

Third, the Substantial Nature (Phi. *gohar),* or material essence, which completes the holy triad, is miraculously combined with the elements of milk, through the agency of water and the plants, or through the archangels Khurdat and Murdat. The demons vainly seek to destroy this ;[3] but the milk is mixed with Hdm and is drunk by the future prophet's parents. In this roundabout way the Pahlavi text accounts for the combination of the three elements, the glory, the spirit, and the body, and the child is conceived, despite the machinations of the demons.[4] Throughout the narrative the presence of an Oriental tendency to symbolism and ritualistic significance is manifest. The same story is repeated by the Arab writer Shahrastani (A.D. 1086-1153), and it is narrated again in the Dabistan.[5]

The pregnancy of the mother whose womb is hallowed to bear such fruit, is attended by occurrences equally remarkable and by circumstances astounding in their nature. These miraculous occurrences are told and interpreted in the Dinkart, Zat-

Birth and Childhood of Zoroaster, according to Tradition.— The traditional source of information on the subject of the birth and early life of the Prophet, was originally the Spend Nask of the A vesta, which gave an account of the first ten years of Zoroaster's existence. Unfortunately this Nask has been lost; but its substance is worked into the Pahlavi literature, as is known from the summaries of the Nasks that we have in Pahlavi and in Persian;[2] and doubtless much of the actual material from it is preserved in the Dinkart, in the Selections of Zat-sparam, and in the Modern Persian Zartusht Namah.[3] These works stand to Zoroastrianism somewhat as the Lalita Vistara to Buddhism. The general statements which are made in the following pages are based upon them, unless otherwise indicated, and the material they contain is supplemented by incidental allusions in such writers as Shahrastani or in the Dabistan which draw from like sources.

These accounts of the birth and early life are largely legendary and they are colored by fancy. Some of them surpass in power of vivid imagination the stories that have gathered around Zoroaster's miraculous conception. But that need not awaken surprise. Legends have grown up about the birth and youthful years of Buddha,[4] and miraculous incidents are connected with the Mosaic Lawgiver. Persia is not behind in this.[6]

In every religion the birth of its founder must be heralded by supernatural signs and omens and accompanied by wonders and prodigies. A star appears, a comet blazes forth, or the earth is shaken. In the Avesta all nature rejoices at Zoroaster's birth ; the very trees and rivers share in the universal thrill of gladness that shoots through the world ; while Ahriman and the terror-stricken demons take flight into the depths of earth.[1] His birth, moreover, is in answer to pious prayers addressed by his father to Haoma.[2] His fitness for the prophetic mission which he is to undertake is divinely recognized, and Ahura Mazda himself selects this inspired being as his own messenger to the world.[8] So much for the Avesta. The Pahlavi writings also do not tire of recounting how the fiends contended to prevent his birth; how a divine light shone round the house; and a shout of joy arose when life triumphed ; and especially they recount the loud laughter which burst from the child as he came into the world.[4] The tradition that Zoroaster laughed instead of crying at his birth is as old at least as Pliny; it is current in Eastern writers and elsewhere.[6] Pliny at the same time adds that the child's brain throbbed so violently as

saic influences were at work in the Zoroastrian legends. See Kohut, *Zoroastrian Legends and their Biblical Sources* in the *Independent* (N.Y.), March 19, 1891.

to repel the hand laid upon his head — a presage of future wisdom!

Demons and wizards — for all the opponents of Zoroaster are conceived to be such — instinctively now foresee their destined defeat and ruin and Zoroaster's own glorious ascendency.[1] They seek accordingly to compass the young child's death. They fail in their efforts just as the powers of evil had already failed when they strove to prevent his coming into the world. The heretical Kavis and Karpans (Phi. Kigs and Karaps), who are apparently idolatrous priests,[2] are his especial foes. The Turanian Karap Durasrdb5 (Durasarun, Duransarun) is the Herod of the day.[3] His wicked partner and villanous accomplice is one Bratrok-resh, whose name is ultimately connected with Zoroaster's death when the Prophet was of advanced age.[4] Bratrok-resh is one of five Karap brothers: the names of the quintette are given as Brat-rukhsh, Brat-royishn, Brat-resh the Tur (or Tur-i Bratrok-resh), Hazan, and Vadast.[5] The name of this Bratrok-resh (or Bratar-vakhsh) occurs comparatively often in Pahlavi literature at least and it appears under a variety of forms.[6] The machinations of Durasr5bo are particularly violent. It is only the intervention of a divine providence that saves the little Zaratusht, while still an infant in the cradle, from having his head crushed in or twisted off by this fiendish man, or that wards off a pogniard stroke from the same hand which becomes withered as a punishment for its wicked attempt.[7] Some of the resemblances between this monstrous ruler and Pharaoh or Herod would not be uninteresting to trace if there were opportunity.

The malicious Durasr5b5, moreover, is even successful for a time in making Pdrushaspo afraid of his own son,[1] so that he does not prevent the machinations of those who are plotting against the young child's life. No angel is sent from heaven to tell his parents to take the child into another land. Four separate attempts at least are made to destroy the babe in spite of the mother's watchful alertness. An attempt is made, and not without the father's connivance, to burn the infant in a huge fire; but its life is saved by a miracle.[2] An endeavor is made by the sorcerers to have the babe trampled to death by a herd of oxen ; the leading ox stands over the tiny prodigy and prevents it from perishing beneath the feet of the herd.[3] The same experiment is repeated with horses; the babe is rescued in the same marvellous manner.[4] Even wolves whose young have been killed do not harm a hair of the divine child's head; in their very den and lair he is suckled by a sheep.[6] The lion shall lie down with the lamb! In all these accounts, idealization is evidently at work. But after all we may perhaps imagine that a rationalistic background of truth possibly lies at the basis of each of these hairbreadth escapes of childhood's days magnified by coming ages. The allusion to exposure to a wolf throws light at least upon the conditions in the time at which the accounts were written.

Zoroaster's Youth and Education. — Before the boy's seventh year, his father Purshasp (as the Zartusht Namah calls him), knowing that even the demons and wizards[6] had predicted a great future for the youth, places the lad under the care of a wise and learned man, as the Zartusht Namah narrates.[7] The

venerable teacher's name is then given as Burzm-kurus.[1] Pliny *(H.* JV. 30. 2. 1) seems to have understood from Hermippus that the name of Zoroaster's teacher was Aganaces (Azonaces), but the passage is not quite clear. See below, Appendix V. § 5.

In connection with the subject of Zoroaster's youthful days, it is proper to make passing mention at least of some Syriac and Arabic reports which connect his name with Jeremiah (or even with Ezra) and which make Zoroaster a pupil of Jeremiah, or even go so far as to identify him with Baruch, the latter's scribe.[2] These biassed accounts assert that the pupil proved treacherous to his master and was cursed by God with the affliction of leprosy. These passages are quoted elsewhere[8] and the most important are given below in Appendix IV.; it is not necessary therefore to cite them here nor to repeat how the identification probably arose from an erroneous connection of the name *Armiah* (Jeremiah) with *Urmiah* (Urumiah), Zoroaster's presumed birthplace; nor is it necessary to add how the name of *Zaratusht* might become associated with the Hebrew *saraath (ZaraatK)* 'leprosy,'[4] especially if Moslem influence wished to detract as much as possible from Persia's Sage.

The narratives given above are about all that we can gather in the way of tradition regarding Zoroaster's early youth and training. It is to be regretted that we do not know more of the moulding forces that were instrumental in forming so creative a mind; nor are we clear in every detail as to the conditions of the society in which he was brought up or in which he afterwards labored and taught. The picture which is sometimes vaguely outlined by the Gathas or dimly suggested in the 'Younger Avesta,' or which one gains from a perusal of the

traditions in Pahlavi literature is not altogether a bright one, if we are to interpret, as one might interpret, the allusions to devil-worship and Daevas (which recall the present Yezidls) and the references to the slaughter and maltreatment of the kine, a lack of morality, falsehood, oath-breaking, and personal impurity. These are among the many things to which Zoroaster turned his attention when his reformatory work began.

Tradition goes on to say that even when the lad had attained his seventh year,[1] the inimical DurasrobS and Bratrok-resh still continue to connive against him, to harass and assail him. By magic practices they endeavor to daunt his spirit, and they even attempt to destroy his body by poison.[2] It is evident that the real opposition and struggle which was later to arise in the Prophet's life between his own faith and the existing religion which it supplanted or reformed, is projected into the past and conceived of as a case of personal enmity and hatred already developed between the two representatives of the creed and the youthful Zoroaster.

If we are to judge at least from the later literature of the Pahlavi, black art and magic practices, occult science and necromancy were the order of the time. We seem to have a sort of background of Doctor Faustus and the Europe of the Dark Ages. Even Porushaspo (Pourushaspa) himself is not free from the influence of the two sorcerers Durasr5bo and Brafcrdk-resh, with whom he not infrequently associates.[8] All these misguided persons, especially Durasr5bo, are openly rebuked by Zaratusht for their heresy, and are put to confusion by the young reformer when they endeavor to argue with him, much as Christ at the age of twelve disputes with the doctors in the temple, refutes their doctrines and vanquishes his opponents.[4]

The plotting Durasrobo, as **a** punishment for his wickedness in endeavoring to thwart the righteous, comes to **a** violent end, as fearful as it is strange. The circumstances are described in the Dinkart and the Zat-sparam Selections.[1] Zaratusht is next confirmed in the true religious vows by assuming the ' Kusti,' or sacred thread, at the age of fifteen;[2] and when he attains this year of his life the wiles of the fiendish magicians are practically brought to naught.[3] The age of fifteen years, even as early as the A vesta,[4] is regarded as an ideal age or the age of majority. A passage in the Pahlavi texts tells that when Zaratusht attained his fifteenth year[5] he and his brothers 'demanded **a** portion from their father, and their portions were allotted out by him.'[6] As a part of his share Zoroaster chooses a girdle; this signifies the sacred girdle of religion which he assumed.

Period of Religious Preparation; from his Fifteenth to his Thirtieth Year. — From his fifteenth year to the age of thirty the tradition is more meagre in its details. The period is a time not so much of action as it is a time of religious preparation. And yet the lapse of these fifteen years is not devoid of recorded incident. An occurrence to show Zaratusht's compassionate nature and sympathy for the aged is quoted in the Selections of Zat-sparam, and another is cited to illustrate his generous disposition by his dealing out fodder, from his father's supply, to the beasts of burden of others in a time of famine.[7] The Zartusht Namah substantiates this reputation given to him for tender-heartedness and for goodness.[8]

At the age of twenty the Zat-sparam recounts that ' abandoning worldly desires and laying hold of righteousness' he departs from the house of his father and mother and wanders

forth, openly inquiring thus : 'Who is most desirous of righteousness and most nourishing the poor?' And they spoke thus : ' He who is the youngest son of Aurvaito-dih, the Tur.'[1] Zoroaster goes ' to that place' and lends his cooperation in serving the poor with food. A further example of his compassion, as the text says, ' not only upon mankind, but also upon other creatures,' is given in the same passage. A starving bitch who has five puppies is seen by him whose soul is stirred by every misery. Zoroaster hastens to bring some bread to her, but the creature is dead before he reaches her.[2]

Of a different nature, but none the less characteristic, is an incident narrated in the same connection in the chapter. The account declares that when he wished to marry, with the approval of his parents, and 'his father sought a wife for him,' he requested that the bride should show her face before being taken in marriage.[3] This incident seems to point to an idea of social progress and reform in customs that is equally characteristic of the modern Parsis.[4]

Zoroaster's readiness to learn, moreover, and to profit by what is good even in the teachings of the bad is illustrated by additional actions. On one occasion, upon inquiring in open assembly, what may be accounted as the most favorable for the soul, he is told, 'to nourish the poor, to give fodder to cattle, to bring firewood to the fire, to pour Hom-juice into water, and to worship many demons.'[5] Zoroaster gives proof of his eclectic tendency by performing the first four of these injunctions as worthy of a righteous man to do ; but demon-worship he absolutely denounces.

There are no other specific details in Pahlavi literature to fill up the period from this moment to the coming of the revelation

when he was thirty years old. They were undoubtedly the years of meditation, reflection, and religious preparation that correspond to similar periods of divine communings and philosophic introspection in other religious teachers. Parallels might easily be cited. It is to this period of Zoroaster's life that the Scholiast of the Platonic Alcibiades apparently alludes when he relates that Zoroaster kept silent for seven years ;[1] and it is referred to by Pliny in the statement that for twenty years Zoroaster lived in desert places upon cheese.[2] According to Porphyrius and Dio Chrysostom, he passed his time upon a mountain in a natural cave which he had symbolically adorned in a manner to represent the world and the heavenly bodies.[8] The mountain is illuminated by a supernatural fire and splendor. Lightnings and thunders were about the summit of Sinai also, and clouds and thick smoke shrouded its sides, while the base of the mountain quaked violently, when the voice of the Lord spoke unto Moses.[4] The Avesta (Vd. 22. 19) mentions the 'Forest and the Mountain of the two Holy Communing Ones' — Ahura Mazda and Zarathushtra — where intercourse was held between the godhead and his prophetic representative upon earth. Kazwini calls this Iranian Sinai Mount Sabalan ;[5] Mirkhond similarly alludes to the mountains about the city of Ardabil, and adds a quotation that is evidently drawn from the Avestan allusion to the adjoining river Darej.[6] A further

suggestion on the localization is offered below. Magian worship on the high mountains is familiar from the time of Herodotus (1. 131 seq.) onward.[1]

This time of early retirement and seclusion must have been the period in which Zoroaster fought out the fight that raged in his own bosom and in which he began to solve the problem of life, the enigma of the world, and the question of belief, as his religion solved it. Here he doubtless began also to formulate the first general truths out of which his religious system was evolved. It is the stillness of the forest or of some lone retreat that lifts the soul into communion with nature and with God. The long retirement and separation from men, the hours of meditation, introspection and abstraction, had brought the material frame into complete subjection, no doubt, and had lifted the spiritual body into a realm of ecstatic rapture and transcendent exaltation which prepared it for prophetic vision. At this moment came the Revelation and the first of the seven hallowed manifestations which only a soul inspired by the fervor of religious ecstasy was entitled to behold.

Conclusion. — The first few years of the life of Zoroaster are represented by a series of miraculous events which tradition has fancifully colored. When he becomes of age he retires from the world for a number of years which were doubtless given to meditation and religious preparation. At thirty the Revelation comes, and he enters upon his ministry.

Introductory Survey. — The quickening spirit is now ready to bring forth the first fruit of its long labor. At the age of thirty comes the divine light of revelation, and Zoroaster enters upon the true pathway of the faith. It is in this year[1] that the archangel of Good Thought, Vohu Manah, appears unto Zarathushtra in a vision and leads his soul in holy trance into the presence of God, Ahura Mazda. The year of this first inspired revelation is known in the Pahlavi texts as ' the Year of the Religion,' and there are numerous allusions here and elsewhere to the fact that Zoroaster was thirty years of age at the time.[2] Parallels for the beginning of his ministry at this

age are not far to seek. During the ten years that follow this apocalyptic vision, Zoroaster has seven different conferences with Ahura Mazda and the six Amesha Spentas.

Many events occurred during this time, and a number of marvellous incidents are recounted in connection with this opening period of his prophetic career, as narrated in the Dinkart, Zat-sparam, Zartusht Namah, and elsewhere. His teaching does not seem at the outset to have met with favor. Reforms come slowly and the ground must be prepared. Ten years elapsed — years of wandering and struggle, of hope and dejection, of trial and temporary despair — before he won his first convert. This zealous adherent is his own cousin Maidhyoi-maonha (Phl. Metyo-mah), who is often mentioned in the Avesta and other writings.[1] He is a very different character from Buddha's traitorous and schismatic cousin Devadatta, and he stands as the St. John of Zoroastrianism. Finally, in the twelfth year of the Religion,[2] Kavi Vishtaspa (Phi. Kai Vishtasp, Mod. Pers. Gushtasp) is converted and becomes the Constantine of the Faith — the Raja Bimbisara, if not the Asoka, of Buddhism. After the king adopts the Creed, many conversions follow, and the Prophet's own family, relatives, and friends are frequently referred to in the Avesta and elsewhere as having become faithful adherents and believers.

All these events have so important a bearing that they must be discussed in detail. A sort of synoptic view may be gained by gathering together various pieces of the scattered material and by combining stray allusions into a connected narrative. A consecutive account of the occurrences is therefore here attempted, but it must frankly be stated that the exact

sequence **of** events is sometimes difficult to determine with precision. Caution may be used in accepting the results without qualification, as they cannot be freed from subjective tendencies. Nevertheless they represent in general outline the tradition. So much by way of introduction.

Sources of Information and what we gather from them.— The sources from which we obtain material to fill up the first period after the Revelation, the ten or twelve years that elapsed until the meeting between Zoroaster and King Vishtaspa, and the latter's conversion, are the same as ha*ve already been described. But now that we have reached the real period of Zarathushtra's prophetic career this material may be augmented in a special manner by the Gathas or Zoroastrian Psalms. Like the Psalms of David these often indicate situations or conditions in a more or less direct manner, so that they help very much in drawing inferences.

From our various sources of information two facts may be gathered with certainty: one is, that after receiving the Revelation Zoroaster wandered about, as the dervishes of Iran still wander, going from place to place in search of a fruitful soil for his teaching; the other is, that during this period, like the prophets of old, he was inspired from time to time by supernatural visions and manifestations. The truth of both assertions is proved by the Avesta and the Pahlavi texts, and it is substantiated by Arabic and Syriac writers.[1]

The Arab writer Tabari, who calls Zoroaster a disciple of Jeremiah and speaks of him as a native of Palestine, goes on to state in the course of his history that * he wandered to Adarbaijan and preached there the Magian religion; and from there he went to Bishtasp (Vishtaspa), who was in Balkh.'[2] The chronicler Ibn al-Athir (A. D. thirteenth century), who incor-

porated much of Tabari into his own work, is able to add that, preaching from his sacred book, the Avesta, ' (Zardusht) went from Adarbaijan to Faris (Persia) ; but no one understood what was in it. Thence he wandered to India and offered it (the Avesta) to the princes there. Then he went to China and to the Turks, but not one of them would receive him. They drove him out from their country. He travelled to Ferghanah, but its prince wished to slay him.[1] From there he fled and came to Bishtasp, son of Lohrasp (Aurvat-aspa), who commanded that he be imprisoned. He suffered imprisonment for some time.'[2] This statement like the preceding is more fully discussed in Appendix IV. in its relation to the scene of Zoroaster's ministry. Such passages have the value at least of showing the existence of a tradition to the effect that Zoroaster wandered about as an itinerant teacher until fortune led him to Vishtaspa. Zoroaster was performing the part of one of those Athravan priests to whom the Avesta alludes as 'coming from afar.'[3] Nor may his wanderings have been fruitless, for no doubt the seed that had been sown in these places did not prove barren but sprang up later when Zoroastrianism began to spread as the state religion over Iran.

But to return to Pahlavi literature and to Zoroastrian writings. The Zartusht Namah says:' When Zoroaster attained his thirtieth year, he was relieved from danger and his works bare fruit. His heart was directed to Iran. He left his place in company with some others. Of those, some who were his relations accompanied him on this journey.'[4] On the way the party passes through a sea whose waters are lowered by a miracle so as to allow a free crossing.[6] They travel forward more

than a month until they reach the confines of Iran. This day, according to the Pahlavi Zat-sparam **as well** as **the Zartusht Namah,** was **the last** day 'Aneran **of** the month Spendarmat (February 14-March 20) ' — so precise is tradition.[1] Their destination, as the Zat-sparam indicates, is the place 'where people went from many quarters out to the place of festival j*'asnocar).*'[2] The occasion is the celebration of the spring-tide festival. It seems to be a sort of annual religious convocation that they attend. We may remember in this connection **that** Gabriel revealed himself to Mohammed at the celebration **of** Ramadan. Thus Zoroaster, when halting in a plain of a river called Aevatak (one of the four branches of the Daitya), receives the first premonition and manifestation of what is to come. It is a vision of the approach of a victorious army headed by his cousin Metyomah coming northwards to join him.[8]

The Revelation — First Vision — Conference with Ahura Mazda. — The auspicious hour is at hand. The archangel Vohu Manah (Phi. Vohuman) is to reveal himself to Zoroaster. At dawn on the forty-fifth day of the Prophet's journey, or the 15th instant (Dadvo-pavan-Mitro) of the month Artavahishto *(i.e.*. May 5) of the thirty-first year of the reign of Vishtasp,[4] the Revelation comes.[5] Tradition takes delight in making exact statements. The scene where this event occurred is laid on the banks of the Daiti (Av. Daitya) —the Jordan of Zoroastrianism — a river in Airan-Vej or Adarbaijan.[6] The position

of this river is discussed below in Appendix IV. p. 211; it is represented perhaps by the modern Kizel Uzen and its tributaries, which merges into the Sped River of Adarbaijan. It is crossed by Zoroaster at four different depths, or more probably he fords four different streams. These crossings symbolically represent four different eras in the history of the religion.[1] At the dawn, therefore, of the day named, as he stands upon the bank of the third channel, Aevatak, of the river Daiti, after bringing up the holy Horn-water, Zaratusht suddenly beholds a glorified image of the archangel Vohuman (Good Thought) coming toward him from the south, and bearing in his hand a glossy staff —' the spiritual twig of the religion *(mainog tdk-l deno).'*[2]

In a brief space of time, as he reaches the fourth affluent, Aushan-rut, of the good Daiti, the image of Vohuman becomes a realization, and a transcendent figure of colossal proportions, 'nine times as large as a man,' rises before him, reminding us somewhat of the great image that arose before Daniel, by the side of the river which is Hiddekel.[3] Vohuman opens his lips and begins to question the enrapt seer,—this situation is alluded to in the Avestan Gathas, — and after bidding him to lay aside his 'garment' (or the vesture of his material body), the seraphic messenger leads away his soul in ecstatic trance into the glorious and dazzling presence of Auharmazd and the Amshaspands.[4]

No sooner does Zaratusht enter this radiant assembly than he ceases to behold 'his own shadow upon the ground, on account of the great brilliancy of the archangels'; and, as the words of the text continue,' the position of the assembly was in

Iran, and in the direction of the districts on the bank of the water of the Daitih.'[1] He offers homage to Auharmazd and the Amshaspands, saying : ' Homage to Auharmazd, and homage to the archangels'; and then, as the passage adds, 'he went forward and sat down in the seat of the enquirers.'[2] The door of heaven having thus been opened, and the favored of the godhead having been ushered in, the first and most important of all the conferences is begun. The Supreme Being himself presides ; the Prophet is instructed in the great cardinal doctrines of the Faith, by the Omniscient Wisdom ; and thrice in the same day the beatific vision is repeated.[3] Marvellous signs are shown unto Zoroaster, and he is initiated into sublime secrets by ordeals which symbolize future epochs and crises in the history of the Creed.[4] The circumstances of the first vision of God are at least hinted at in the Gathas[5] which makes us still more regret the loss of the original Nasks; but the details are elaborated in Pahlavi literature and in Persian Zoroastrian writings which are probably based upon the older material.[6]

The Next Two Years—Zoroaster begins Preaching. — On the completion of the first conference and Zoroaster's return to earth he proceeds to obey Auharmazd's command by teaching and prophesying, for the next two years, to the ruling heretical priests, Kigs and Karaps, or the Kavis and Karpans, so often mentioned in the Gathas. These are the ' blind and deaf to the Law,' as the commentary describes them. They are the accursed band of unbelievers, or, to use the words of one of the Gathas,—

The Kavis and the Karpans have united themselves with power
For destroying the life of man by their evil deeds;

But their own soul and their religion will make them howl
When they come where the Bridge of the Accountant hereafter is,
To be inmates for ever and ever in the House of Falsehood, *(ie.* Hell) ![1]

To these Zoroaster preaches the Mazda-worshipping religion, and the necessity of anathematizing the Demons, of glorifying the Archangels, and practising the next-of-kin marriage *(xvetukdas).*[2] But in vain.

Zoroaster seeks the Turanian sovereign Aurvaita-dang, whose son has been mentioned above. This potentate, whom the Pahlavi text calls 'scanty-giver,' protects the Missionary, but refuses to be converted to the Creed and to follow its tenets, while his nobles are 'clamorers for Zaratusht's death.' Curses are heaped upon him as a consequence.[8]

Zaratusht at the bidding of Auharmazd next visits a Karap, one Vaedvoisht by name, whom God has blessed with this world's goods. He demands from the Karap a hundred youths, maidens, and teams of four horses, as a gift for the Almighty. An arrogant rebuff greets the Prophet of the Lord, and he flees for refuge to Auharmazd and receives from him the comforting assurance of the fearful punishment by death eternal which shall be summarily meted out upon the proud offender for his misdeed.[4] And so also Elijah pronounced the doom of King Ahaziah because he recognized not that there is a God in Israel!

The fate of this Karap offender recalls some of the anathema passages in the Gathas and that visitation of wrath, both here and hereafter, which these Psalms call down upon powerful and stubborn unbelievers.[5] To the same crew as Vaedvoisht doubtless belong that creature of Satan, Hunu, if the word is a proper name,[6] and the infidel Usij, who, like the Karap, is a

representative of heretical priestcraft,[1] or again such miscreants as the perverse Grehma, Bendva, and Vaepya Kevina, who are anathematized in the Zoroastrian Psalms.[2] It was unhappy incidents like these and encounters with stiff-necked unbelievers who stopped their ears and refused to receive the healing word of the great Revelation, which the Prophet knew he was offering, that led to the embittered outpourings which we find in lines of the Gathas. Such rebuffs could not but produce times of despondency and distress, an echo of which we hear lingering in these Hymns. Zarathushtra more than once breaks forth with a cry against such rulers and powerful lords who use not their sovereignty for the protection of the righteous and for the advancement of virtue. If it were not so, he would not thus have found himself a wanderer knowing not whither to turn.[3] Yet hope is mingled with discouragement, and yet again despair with expectation. We next find Zoroaster a long way off to the south and southeast of Iran in the land of Seistan. Consult the Map.

After failing with Vaedvoisht, Zaratusht receives comfort and direction from Auharmazd. He takes his pilgrim path and missionary road to one 'Parshat,' a ruler whose title is given as ' Tora' (Bull), and who dwells ' at the end of Sagastan' (Seistan).[4] This territory borders upon Afghanistan and Baluchistan, and by the expression ' end of Sagastan' may be meant somewhere in the region of Ghazni.[5] A curious story is

[5] So Dr. West (letter), and see his note on Dk. 7. 4. 31. In this connection we may recall a statement of Am-

now told to **show** the virtue of **Horn-water from the Iranian Jordan, or** river Daiti (Av. Daitya). **With** the name Parshat-t5ra we may compare the Avestan Parshat-gau.[1] This Parshat begs for some of the holy Daitya water. From what follows it is evident that Zoroaster must have combined with the mission of gospel teaching some claims also to medical skill and practice in healing. He first bids Parshat to praise righteousness, to curse the demons, and openly to profess the Faith. Parshat carries out the former two injunctions, but he fails to comply with the third by adopting the Creed. Zaratusht therefore does not fulfil his request, but passes on, and by means of the Hom-water which had not been bestowed upon the weakling, he cures a four-year-old bull that had lost its virile power.[2] The name of Parshat disappears from sight.

The entire allusion to Seistan is of interest in connection with the Prophet's wanderings to remote places and to lands far distant from his home. Two facts also are recalled by it: first, the territory of Seistan is the place of origin of the Kayanian dynasty to which King Vishtaspa belongs; second, the scene cannot have been far removed from that seat of stiff-necked unbelief, the home of Rustam. Certain it is, that one of Vishtaspa's earliest missionary efforts after his own conversion was in the direction of this very scene where Zoroaster's earlier endeavor had been unsuccessful with Parshat, the Bull, who dwelt 'at the end of Sagastan.'[8] From what comes after, it appears that the Prophet now journeyed back, perhaps by a round-about way, towards his own home, for we next find him

Second Vision — Conference with Vohu Manah. — In the seven **or** eight years that follow the first vision of the empyrean throne and the first communing with Ormazd, Zoroaster enjoys the divine favor of six more conferences individually with the six Archangels. We know of these from fragmentary accounts **of** the lost Avestan Nasks, or sacred books, and we have descriptions of them in Pahlavi literature, especially in the Selections **of** Zat-sparam.[1] They are attested also in Yasna 43 of the Gathas and elsewhere in the Avesta. The interviews, questionings, or revelations occur in different places and at different times. The period of the ten years from thirty to forty in the Prophet's life was a time of great spiritual activity as well as of energetic labor. His soul lives partly in the world beyond the present; he sums up within himself the generation of those whose young men saw visions and whose old men dreamed dreams. As the veil is withdrawn from before his eyes the several Archangels appear at different times before his entranced sight. Each Amshaspand enjoins upon him special moral duties and practical obligations including particularly the guardian care of material or living things over which they preside in the physical world — the animals, fire, metals, earth, water, and plants.

The first of these seraphic manifestations, or the second revelation from heaven, is a conference with the archangel Vohuman, or Vohu Manah of the Avesta, who intrusts to the Lord's chosen minister the care and keeping of useful animals, for Vohu Manah's name, even in the Gathas, is especially associated with the protection of the animal kingdom.[2] Accord-

ing to the Selections of Zajfc-sparam, the scene of this special interview granted by Vohuman to Zaratusht, and the giving of injunctions to the inspired Seer, is laid in the region of Iran to the south of the Caspian Sea or in the Alborz mountains, for the text designates it as ' the conference on Hugar and Ausind,' which are regarded as two peaks of that range.[1]

Third Vision — Conference with Asha Vahishta.—The third interview is ' a conference at the T5jan water';[2] this is held with the archangel Artavahisht, who enjoins "upon Zoroaster the care of the Fire and the guardianship of all fires, sacred and secular.[8] The place where this apparition comes to the Prophet is to the south of the Caspian Sea and somewhat to the east, if I am right in identifying ' the Tojan water' with the river Tajan (lat. 36-37; long. 55-56) — see the key to the Map.[4] This identification would agree well with the region of the preceding vision and with the probable situation of the following.[6] The territory, I believe, is volcanic in its character, which would also answer to the kingdom of fire over which Asha Vahishta is the presiding genius.

Fourth Vision — Conference with Khshathra Vairya. — The fourth ecstatic trance which is vouchsafed to the Seer brings him into the presence of the archangel Shatver (Av. Khshathra Vairya), who assigns to him the care and keeping of metals. The scene of this manifestation is not absolutely identified. The Selections of Zat-sparam call the interview the ' conference

at Sarai (?), a settlement on the Mivan (?).'[1] Dr. West draws attention to the fact that his reading of these names is uncertain and that he has not identified the places. I should venture to suggest that we are still in the South Caspian region, in the mountainous territory not far removed from the scene of the preceding interview. On the same river Tajan, that has just been alluded to, is the town of Sari, to the east of Barfrush (see Map), which would correspond to the settlement Sarai of the text, especially if there be mines in the neighborhood under Khshathra Vairya's dominion. The territory is Mazanderan, but we know that Zoroaster, dervish-like, wandered also in the country of fiends, demon-worshippers, and wicked unbelievers before he met with the one truly righteous king and protector.[2]

Fifth Vision — Conference with Spenta Armaiti. — For the fifth transcendent manifestation we must trace our way over Various districts and provinces to the region of Lake Caecista (mod. Urumiah), or back into Adarbaijan.[3] From Zat-sparam we know that this interview took place there, because the text states, that 'for the occurrence of the fifth questioning, which is Spendarmat's, the spirits of the regions, frontiers, stations, settlements, and districts, as many as were desirable, have come out with Zaratusht to a conference where there is a spring which comes out from the Asnavad mountain, and goes into the Daitih.'[4] Mount Asnavad, which is found also in the Avesta and is famous likewise as having been the seat of the Gushnasp fire, is unquestionably to be localized in Adarbaijan.[6] It is not to be confused with the 'Mountain of the two Holy Communing Ones,' described above (p. 34). As a likely identifica-

tion I should suggest that the Mountains of Sahend (lat. 37.50; long. 46.50—see Map, square Bb.) would answer the requirements of the text here and elsewhere. Waters from a 'spring' on the mountain side might well flow in the manner described by the text if the Daitih be associated with the Kizel Uzen and Sped (Sefid), as already proposed (pp. 40-41).

Sixth Vision — Conference with Haurvatat. — The scene of the next hallowed interview is laid at the same place, near Lake Urumiah, and it may best be described by using again the words of the Zat-sparam itself: 'For the occurrence of the sixth questioning, which is Khurdat's (Av. Haurvatat), the spirits of seas and rivers have come with Zaratusht to a conference at the Asnavad mountain, and he was told about the care and propitiation of water.'[1] Like the preceding interview the location therefore is Adarbaijan.

Seventh Vision — **Conference with Ameretat.** — The seventh and last enraptured sight, which completed the Revelation, is a vision accompanied by a conference with the guardian divinity of the plants, Amurdat (Av. Ameretat).[2] This is not confined to a single spot, but Adarbaijan is the scene. To quote the words of tradition, it occurred 'on the precipitous bank of the Dareja, on the bank of the water of Daitih, and different places.'[3] The Dareja or Darej is the ancestral river of Zoroaster, and it is to be localized in Adarbaijan, as discussed above and in Appendix IV. *In* the same appendix, reasons are given for localizing the Daitih (Av. Diiitya) in Adarbaijan.[4] Consequently, Zoroaster must gradually have found his way back to his home, and the scene of the final interview must have been in this territory, although the expression 'different places,' applied to the interview with Amurdat would seem to show that the questionings with this archangel were not confined to these two sites alone.

Other Spiritual Manifestations. — In these various visions of Paradise which are granted to Zoroaster, and which rival the seven heavens of Mohammed, the Prophet becomes quite well acquainted with the empyrean realms and with the celestial hierarchy of God, the angels, and archangels.[1] The tendency to visionary trance is further manifested by the apparition of Haoma, which rises before Zarathushtra at the altar, as described in the Avesta (Ys. 9. I).[2] The Pahlavi commentary on this passage adds that Zoroaster at once recognized Horn 'because he had had conferences with most of the angels (Izads) and he was acquainted with them.'[8] The same idea of heavenly visitations is implied elsewhere in the Avesta, for example, where Ashi Vanuhi is conceived of as conversing with Zarathushtra.[4]

To Summarize the Seven Visions. — At the age of thirty Zoroaster receives a revelation, and during the next ten years he beholds seven visions of Ormazd and the Archangels. In Zoroastrian literature there are several allusions to these manifestations. A chapter in the Selections of Zat-sparam describes the conferences with most detail. Its account implies that the visions occurred during the winters — a time when the Prophet perhaps chose to rest from his itinerant labors, like Buddha during the rainy season. The particular paragraph referring to this point is worth quoting. It runs: 'The seven questions are explained within the length of these winters, which are of five months, and within ten years.[5] As to scene, the text says, at the outset, that 'the seven questions, with reference to religion, of the seven archangels, occurred in seven places.'[6] If

we follow tradition, the scenes of five of the visions, namely, the first, second, fifth, sixth, and seventh, are certainly to be localized in the west of Iran, in Adarbaijan and the southern Caspian territory. If the identification, suggested above, of Tojan and of Sarai be correct, the place of the third and of the fourth conferences likewise is directly to the south of the Caspian Sea. Media Atropatene and Media Rhagiana may therefore be regarded, on the basis of tradition at least, as the place of Zoroaster's apocalyptic visions of heaven.

The Temptation of Zoroaster. — The ten years of interviews and communings with the Divine Beings are now at an end. The Revelation is complete. Zoroaster receives from Ormazd some final admonitions, and he carries with him from heaven the supreme knowledge contained in the Avesta and also the sacred Ahuna Vairya formula—the paternoster of Zoroastrianism. At parting he is warned to guard against the temptations of the fiends who will beset his path as he returns among men. It is the instant when a weaker spirit might be prone to falter, and when a false step would mean ruin and damnation. It is the moment when Mara whispered to the newly Enlightened Buddha, tempting him to enter at once into Nirvana and not to give forth to mankind the illumination which he himself by so hard a struggle had won. The Powers of Evil now gather their forces for a combined attack upon Zarathushtra. A description of the Temptation is given both in the Avesta and in the Pahlavi writings. The demon Buiti (Phl. But) is sent by Ahriman to deceive and to overthrow the holy messenger. But Zoroaster is armed with a breastplate of righteousness and with the spiritual weapons of the Law, as well as materially equipped; and he defeats his spiritual enemies and puts them to flight. The Avesta pictures the situation as follows:—

' From the region of the north, from the regions of the north, forth rushed Anra Mainyu, the deadly, the Demon of Demons. And thus howled the maleficent Anra Mainyu, the deadly: " 0 Fiend, rush

on and kill him," 0 righteous Zarathushtra! The Fiend rushed then along, the demon Buiti, the secret-moving Pestilence, the deceiver.

'Zarathushtra recited the Ahuna Vairya, saying: "As the Lord, etc." He worshipped the good waters of the good Daitya. He recited the creed of the Religion of Mazda-worshippers. And away rushed the Fiend confounded, the secret-moving Pestilence, the deceiver.

' The Fiend then howled back to Anra Mainyu: "Thou tormentor, Anra Mainyu! I can find no destruction for him — for Spitama Zarathushtra. All-glorious is Zarathushtra." Now, Zarathushtra perceived in his heart, "The fiendish maleficent Demons are plotting my destruction."

' Up started Zarathushtra, forward stepped Zarathushtra, undaunted by Evil Thought, by the hardness of his malicious questions, and wielding stones in his hand, stones big as a house, having obtained them from Ahura Mazda, he the righteous Zarathushtra.

' "Whereat in this broad, round earth, whose boundaries are far distant (asked the Demon), dost thou wield (these stones), thou who standest upon the high bank of the river Drej (Dareja), at the abode of Pourushaspa?"

'And Zarathushtra responded to Anra Mainyu: "0 maleficent Anra Mainyu! I shall smite the creation of the Demons, I shall smite the Nasu (demon of Death), who is created by the Demons. (Yea), I shall smite the Enchantress (Pairika Khnathaiti), until the Saviour (Saoshyant), the Victorious shall be born from the waters of Kasava, from the region of the dawn, from the regions of the dawn."[1]

[1] Thereupon to him howled back Anra Mainyu, the Lord of Evil Creation: "Do not destroy my creatures, O righteous Zarathushtra f Thou art the son of Pourushaspa; I was worshipped (?) by thy mother. Renounce the good Religion of the worshippers of Mazda, so as to obtain a boon such as Vadhaghana obtained, the ruler of a nation."[2]

'But Spitama Zarathushtra answered him: "No! I shall not

renounce the good Religion of the worshippers of Mazda, not though life, and limb, and soul should part asunder."

'And again to him howled out Anra Mainyu, the Lord of Evil Creation: "By whose word wilt thou vanquish, by whose word wilt thou withstand, and by what weapon will the good creatures (withstand and vanquish)[1] my creation, who am Anra Mainyu?"

'Spitama Zarathushtra answered him: "With the sacred mortar, with the sacred cup, with the Word proclaimed by Mazda, with my own weapon, and it is the best one. With this word will I vanquish with this word will I withstand, with this weapon will the good creatures (withstand and vanquish thee), O malignant Anra Mainyu! The Good Spirit created these, he created them in the Boundless Time; the Amesha Spentas, the good and wise rulers presented them."

'And Zarathushtra recited aloud the Ahuna Vairya.'[2]

The Dmkart has a briefer account of the episode; and the Zartusht Namah and Dabistan also allude to the assault of the princes of darkness upon Zoroaster as he is returning, and to their specious, guileful, and tempting words.[3] This temptation, therefore, offers an indirect parallel to that in Buddhism and in Christianity. No likeness is familiar in Mohammedanism nor in the Mosaic system. But besides this, another seductive deception awaits the Prophet of Mazda, like the Knight of true Holiness encountering Foul Error and Hypocrisy in the Faerie Queene, a passage which might be compared. For Zoroaster, as forewarned by Auharmazd, is again tempted, this time by a Karap who has assumed the feminine form of Spendarmat; but he discovers the disguise and exorcises the fiend as described in the Dinkart.[4]

success is sounded even though the full triumph and victory is still to be delayed for two years more. Yet only one convert has been made; but the conversion is important; it is Zarathushtra's own cousin Maidhyoi-maonha (Phl. Metyo-mah) already mentioned (p. 20). The Zat-sparam selection states the fact thus: 'On the completion of revelation, that is, at the end of the ten years, Metydmah, son of Arastai,[1] became faithful to Zaratusht.'[2] The fact is definitely alluded to in the Gathas and in the Younger Avesta (which contains lists also of later converts, in the Farvadin Yasht),[3] and it is noticed in other Zoroastrian writings. Quotations are unnecessary. Maidhy5i-maonha's being drawn to the new faith and his acceptance of the creed is a fulfilment of the promise which Zaratusht's first vision gave when he beheld the image of a victorious army under this leader coming to join him.[4] The Zat-sparam rightly interprets the allegory: 'Metyomah was the leader of all mankind who have gone out to the presence of Zaratusht, and he became their guide, so that first Metyomah and afterwards the whole material existence are attracted (to the faith).'[6] The scene of the conversion is laid by the Zat-sparam 'in the forest of reedy hollows, which is the haunt of swine of the wild-boar species.'[6] It would be interesting if one could identify the situation. We may henceforth think of Maidhyoi-maonha as a sort of St. John the disciple.

Conclusion. — The first ten years of the Religion have now passed; seven visions have been seen; the Revelation is complete; Zoroaster has withstood the temptation and assaults of the Powers of Evil; he has also won his first disciple. And yet at this instant, after the exhilaration of success, there comes the moment of depression and despondency. We have

evidence of this; for, to quote the words of a Zafc-sparam selection, 'Afterwards, on having obtained his requests, he came back to the conference of Aiiharmazd, and he spoke thus: "In ten years only one man has been attracted by me."'[1] Ormazd answers paradoxically, but the answer seems to have given an inspiration, for the efforts of the next two years are unceasing, — crucial years as they were,—success attends, the climax is reached, the achievement is won. This achievement is the conversion of Vishtaspa, the triumph of the Faith, as described in the next chapter.

— ANGLO-SAXON CHRONICLE.

INTRODUCTION — ZOROASTER SEEKS VISHTASPA — MEETING BETWEEN ZARATUSHT AND VISHTA8P — ZARATUSHT DISPUTES WITH THE WISE MEN — CONSPIRACY AGAINST HIM; HIS IMPRISONMENT — THE EPISODE OF THE BLACK HORSE — COMPLETE CONVERSION OF VISHTASP — COMING OF THE ARCHANGELS — VISHTASP'S VISION — CONCLUSION

Introduction. — The eleventh and twelfth years of the Religion are stirring years in the Prophet's life ;[1] they are years of struggle, bitter trial, temporary disappointment, but of final triumph; they are the two years devoted to the conversion of Vishtaspa ; and when success finally crowns the effort, they form the great climax in Zoroaster's career. A firm and powerful hand is henceforth to uphold the Faith. The events, incidents, and occurrences, which are recorded by tradition in connection with this important era are presented here in detail; and the words of the texts themselves are employed, as far as possible in narrating them. In order truly to appreciate the spirit of the situation one should call to mind descriptions of similar conversions in the history of the world's great religions.

Zoroaster seeks Vishtaspa. — As already noted, an inspira-

tion seems to have come to Zoroaster that he should turn to the court of Vishtaspa. The Younger Avesta tells how he prayed to Ardvi Sura, the goddess of waters, that he might win Vishtaspa to the Faith.[1] Vishtaspa is a king or princely ruler, but he and his court are represented as having been wrapt in the toils of evil religious influence and fettered by the false belief that was rife in the land. The picture which the Zoroastrian texts give is naturally a distorted one, colored by religious prejudice and animosity; but doubtless its darkness is not without reason. Everything is portrayed as bound by base superstition, or under the thrall of dread magic. There is the stifling atmosphere of the dark ages of the Atharva Veda that was still hanging like a pall over the cousin-land of India. Iran or the court of Vishtasp is dominated by scheming and unscrupulous priests, the Kigs and Karaps, or Kavis and Karpans of the Avesta. Especially powerful among these is one Zak—a name that seems to occur only in the Dinkart, and his ill reputation has destined him otherwise for oblivion. The ITintart gives a number of interesting particulars on the subject, which are translated by West, and are worth quoting in part. 'Zaratusht became aware from revelation about the vileness and perverted religion of Zak of the deadly Karaps of Vishtasp and many other Kais and Karaps who were at the residence of Vishtasp.'[2] Accordingly, 'after the continuance of the last questioning of the ten years of conference [he took] his departure alone, by the advice and command of Auharmazd, to the residence of Vishtasp and the precinct of that terrible conflict.'[3]

The Shikand-gumanik-Vijar, 10. 64-66 also adds that 'Zaratusht came alone on a true mission, to the lofty portal of Kai Gushtasp, and the religion was taught by him, with a powerful tongue, to Kai Gushtasp and the learned, through the speech of wisdom, through manual gestures, through definite words,

through explanation of many doubts, and through the presentation of the visible testimony of the archangels, together with many miracles.'[1]

The Dinkart speaks several times of the 'residence,' ' lofty residence,' * abode,' ' capital or metropolis' of Vishtasp, but it does not make clear where this was located.[2] Neither does the Avesta nor any known Pahlavi text make a precise and definite statement. But the later tradition, Persian and Arabic, persistently maintains that the city of Balkh was the scene of the conversion. A full discussion of this question is given below in Appendix IV., so it is omitted here. It must be remembered therefore when 'Balkh' is mentioned hereafter it is used because the name stands in the particular connection or source from which the material in question is being drawn; a final judgment on the matter is avoided for the present.

It is at this juncture that a curious legend is narrated of a strange incident which happened as Zoroaster was on his way to Vishtasp (Gushtasp). The modern Persian Dabistan, basing its statement upon the authority of a priest who quoted from an old treatise, recounts how two infidel rulers were punished for refusing to adopt the Faith at the holy bidding of the Prophet as he was proceeding to interview the great king. The selection reads : ' The Mobed Surush, the Yazdanian, has

Dr. West (Aug. 2, 1897) writes me: ' In Dk. 7. 4. 64, 65, the word translated "capital" in the *Grundriss,* and "residence" in *SBE.* vol. xlvii. is *baba (* = *dar* Pers.). As a mint-mark on coins it is understood to mean " the capital, or metropolis." It also occurs Dk. 8. 11. 3 *(SBE.* xxxvii. 24). The word *man,"* abode," " house," is also used in 7. 4. 76, 76, 77, etc. Whether the two words are used indifferently, or whether *baba* rather means " the city," and *man,* " the palace," is uncertain. There is no hint in Dk. as to where this capital, or residence, was.[1] Furthermore (Jan. 7, 1898), 'Dk. 7. 4. 76, " lofty residence " = *buland manishno,* where *buland* may mean " high " either in position or character; " tall, exalted, or eminent." ' If ' lofty residence' or 'capital' should perhaps signify Balkh, we might compare Shelley's 'that high capital,[1] meaning Rome.

been heard to say, "It is recorded in the treatise of Mihin Farush that, according to the doctors of the pure faith, when Zardusht had thus obtained the victory over the demons, and was proceeding to an interview with the great King Gushtasp, there happened to be two oppressive and infidel kings in his road; these Zardusht invited to adopt the pure faith and turn away from their evil practices; but they heeded not his words; he therefore prayed to God, and there began to blow a mighty wind, which lifted up these two kings on high and kept them suspended in the air; the people who came around were astonished on beholding this sight; the birds also from every quarter of the sky flocked around the two kings, and with beaks and talons tore off their flesh until the bones fell to the ground."'[1] The legend has a weird picturesqueness, to say the least I

Meeting between Zaratusht and Vishtasp. — If we understand the Dlnkarfc text aright, the moment of the first meeting between Zaratusht and Vishtasp must have been when the king was on the race-course (Phl. *aapdnvar)* ;[2] the Dinkart paragraph speaks of Zoroaster as ' uttering, on the horse-course of Vishtasp, a reminder of the power and triumph of Auharmazd over himself, as he invited Vishtasp to the religion of Auharmazd; and with great wisdom Vishtasp heard the words of Zaratusht, on account of his own complete mindfulness, and would have asked for an outpouring of prophecy. But thereupon — before the words of Zaratusht (were fully) heard by him, and he could have understood the character of Zaratusht — owing to the demonizing of the deadly Zak and the rest of those Kigs and Karaps, spoken out with slanderous knowledge and perverse

In answer to an inquiry if, possibly, a town might be intended, Dr. West says (Jan. 7,1898), ' There is a town Asbanbur, or Asfftnbur, but I have not been able to discover where it is. I am doubtful, however, if a town be meant by the words: *Madam Aspdnvar-i Vishtdspo.* I should be more inclined to read *aspakhvur* for *aspdkhvur, "*a horse-stable."' actions to Vishtasp about Zaratusht, there then (occurred) his consignment of Zaratusht to confinement and punishment/[1]

In the Zartusht Namah[2] the scene of the conversion is laid in Balkh, where Vishtasp's father, the old king Lohrasp (Av. Aurvat-aspa) is generally stated to have lived in retirement after his abdication. Masudi (d. A.D. 957) also makes it Balkh, and his testimony is nearly three hundred years earlier than the Zartusht Namah.[3] The Shah Namah (A.D. 1000) does not make the assertion explicitly in so many words, but it lays all the following scenes at Balkh, as discussed below (Appendix IV. p. 214).[4] The Cangranghacah Namah likewise lays the scene of the rival Brahman's conversion at Balkh.[5]

The later tradition adds details and embellishes the account. According to the Zartusht Namah, King Vishtasp (Gushtasp) was seated in royal estate in his palace when Ormazd's apostle appeared.[6] According to Mohammedan writers, Kazwini and Ibn al-Athir, Zoroaster enters the assembly in no ordinary manner, but by a miracle: the roof parts asunder to give entrance to his hallowed person.[7] Ibn al-Athir also adds, that 'in his hand was a cube of fire with which he played without its hurting him.' The scene might make a subject for a painting. We must remember, furthermore, that Zoroaster originally sprang from the country of naphtha wells; moreover, he may not have been wholly unacquainted with effects produced by chemical experiments if we may judge from accounts of the scientific knowledge attributed to him.[8] The Shah Nainah

similarly alludes to the censer or basin of fire which he brought from Paradise to present to the King.[1] In these fire references there seems to linger a reminiscence of the Burzhin Mitro fire, shortly to be referred to. Kazwini apparently draws from some traditional source or Pahlavi text when he describes an ordeal of molten metal to which Zoroaster has to submit his person to prove the divine truth of his mission.[2] This is at least in harmony with ' the achievement of ordeal' referred to in the Dinkart as instituted or sanctioned by Zaratiisht who is there cited as giving authority for thirty-three kinds of this judicial test.[3] This very achievement of Zoroaster forms the prototype of a fiery ordeal undergone by one of his future apostles in Sassanian times, and of the usage of the ordeal in the religion.

Zaratusht disputes with the Wise Men. — There is evidence enough to show that the Prophet had to win his way step by step during these two years of struggle and probation ; and there is no doubt that he at once encountered the antagonism and vigorous opposition of the wise men of the king's court. According to tradition at least, there were not wanting those to plot against him.

' The Kavigs and Karaps,' says the Zat-sparam, ' in the manner of opponents propounded thirty-three inquiries to him, so that by command of Vishtasp he became the explainer of those thirty-three inquiries.'[4] This and the later debates are alluded to in the Dinkart and elsewhere as ' the terrible conflict,' ' the terrible combat,' ' the great session,' ' the controversy about the religion with the famous learned of the realm ' who were Zoroaster's 'fellow-disputants.'[5] The Zartusht Namah, drawing upon some source not now accessible, or supplying material from imagination, graphically describes the scene with Eastern pomp

and Oriental detail.[1] The sages of Vishtasp are seated in grave council to dispute with the new-comer and stranger, with the herald of Ormazd. The debate and controversy lasts no less than three days.[2] The Priest of the Zend-Avesta comes off triumphant at every point.[8] He claims the office of Prophet and begins to recite the sacred texts to the king.[4]

Conspiracy against Zoroaster; his Imprisonment. — Vishtasp's interest is aroused, and the divine Seer seems to have produced **a** marked effect by being able through his prescience, as the story goes, openly to disclose and tell the thoughts of the king and of others, with astonishing results.[6] A plot, however, is concocted by those whose light the brilliancy of the new luminary has dimmed. The priests who are supplanted in influence enter into a conspiracy, like those who sought to find occasion against Daniel, and they intrigue for Zoroaster's death.[6] By suborning the porter of his lodging, as the tale relates, these wicked schemers succeed in hiding vile material within the holy man's apartments so that it may be used as evidence against him. The hair, nails, heads, of cats and dogs, together with various other paraphernalia of witchcraft and sorcery, are thus slipped in. On this false evidence Zoroaster is accused of being a wizard and necromancer ; he is thrown into prison and is left to starve. Such is the account of the Zartusht Namah, and the Pahlavi Dinkart alludes to the circumstance as well.[7]

The Episode of the Black Horse. — A miracle releases Zardusht. It is the miracle which he wrought by restoring to health the king's Black Horse, as described with great elaboration in the Zartusht Namah and incidentally referred to in the Dinkart.[8] The king has a favorite black horse.[9] Upon the imprisonment

of Ormazd's minister the animal's four legs are suddenly drawn up into its belly and the creature is unable to move. This occurrence is plainly a manifestation of the divine displeasure. In his dungeon cell Zardusht hears of what has happened. He offers, if released, to restore the horse to its former soundness ; but he will do this only upon the fulfilment of specific conditions. These the king must agree to beforehand. Vishtasp is overjoyed and promises to grant the Priest a boon for each foot of the charger that is restored to its proper state. The details which follow seem ludicrous, but such descriptions of cunning practices are not unique. Hocus-pocus has been employed elsewhere, and the situation doubtless had its parallels in other courts of Eastern despots in ancient days. We must not forget that even when St. Augustine preached Christianity to Æthelbert of England, it was in the open air, owing to the king's dread of witchcraft which might exercise a spell upon him if he were within four walls !

The first condition which Zardusht makes, is that Vishtasp shall accept the Faith if one foot of the horse be restored. Upon the king's agreeing to this stipulation, and in answer to the Prophet's earnest prayer, ' the right fore-leg of the horse came out, since the word of the Shah was true.'[1] Before the 'man of God' will grant the second boon, however, the king must promise that his own warlike son Isfendiar (Av. Spento-data, Phi. Spend-dat) shall fight as a crusader in support of the true Faith. Thereupon, [4] the right hind-leg of the steed comes out by the commandment of God.' The third condition results in the granting of a wished-for favor, the privilege of converting the queen to the Faith. Upon its fulfilment the descent of the third leg is accomplished. The last promise includes the revealing of the names of the culprits who had bribed the

bred) in the Shah Nftmah (Mohl, tr. iv. *pp.* 320, 335), unless this name be a merely typical one like ' Black Beauty ' in English. Such at least is the tra•dition. See also Justi, *Namenbuch,* p. 360 (Wehzat), for other horses called by this name.

doorkeeper and had plotted against the Prophet of the Lord. When these are revealed and the offenders appropriately punished by death, the horse is fully restored to health and leaps up upon his four legs as sound as before.

This absurd story, which the Zartusht Namah, as just described, tells minutely with considerable imagination and poetic embellishment, receives only brief notice incidentally in the Dinkart, when it refers to 'the wonder about the splendid horse of Vishtasp,'[1] and when in another part of the work, it mentions ' the splendid horse of Vishtasp' as the nonpareil of horses.[2] The episode is seriously recorded, earlier than the Zartusht Namah, by Shahrastani (born A.D. 1086), who lived in Khorassan.[8] As the author of the Zartusht Namah (A.D. 1277) was a native of Rai in the West, it shows how current the story was. It is later repeated by Mirkhond.[4] How different from the narrative of Constantine and the Cross !

Complete Conversion of Vishtasp. — The conversion of Vishtasp is nearly complete, but he still seeks from Zardusht an additional proof, a vision, a manifestation, some sign or token, before he Will be finally convinced. Inasmuch as he himself has freely granted four favors to Zoroaster in acknowledgment of his services, the king now himself makes four counter-requests, as the narrative tells before he fully adopts the Faith. The Zartusht Namah again relates these in detail, and we can infer from incidental allusions in Avestan and Pahlavi texts that the tradition was a recognized one.[5] The first of these four request by Vishtasp is that he may know his final doom and see his place in Paradise ; the second, that his body may become invul-

nerable; the **third favor is that** he may have **universal knowledge,** knowing the past, present, and future ; and fourth, that his **soul** may not leave his body until the resurrection. The Prophet **of** Ormazd gives assurance that all these requests may be granted ; but he shows that such phenomenal privileges when granted could not be combined in the person of a single individual. The king must choose one boon out of the four. His selection is to have permission to behold the place which he shall occupy in heaven.

Coming of the Archangels. — This moment is the occasion of the coming of three Amshaspands, or Archangels, from heaven, to the palace of the king, as witnesses from Auharmazd to the divinely inspired message of Zaratusht. These three heaven-sent envoys are Vohuman, Ashavahisht, and the Propitious Fire (Burzhin-Mitro, or Spenisht, Av. Spenishta).[1] In its description the Dinkart quotes a passage from ' revelation' as follows: 'Then he who is the creator Auharmazd spoke to them, to Vohumano, Ashavahishto, and also the fire of Auharmazd, the propitious, thus: " Proceed! you who are archangels, unto the abode of Vishtasp, whose resources are cattle and who is far and widely famed, with a view to his reliance upon this religion (that is, till he shall stand up for this religion); and, as regards the answering words of the righteous Zaratusht of the Spitamas, to approve the nature of those words."'[2] And, as the paragraph continues, the archangels proceeded to the abode of Vishtasp in such glorious effulgence that ' their radiance in that lofty residence seemed to him a heaven of complete light, owing to their great power and triumph; this was so that when he thus looked upon it, the exalted Kai-Vishtasp trembled, all his courtiers trembled, all his chieftains were con-

fused, and he of the superior class was like the driver of a chariot-horse.'[1]

The Zartusht Namah colors this part of **the** account by graphically describing these messengers as majestic knights on horseback in cavalier style, bristling with armor and clad in green.[2] The Dinkart goes on to tell how the Fire speaks out **and** reassures the terrified king that they are come, not for alarming him as the two envoys of his mortal foe Arjasp the Khyon later would do, but that they are come with a bidding from heaven that he should receive the religion of Zaratusht. In that event they promise him a long reign and a life of one hundred and fifty years(!), accompanied by many blessings and exalted by an immortal son Peshyotan (Av. Peshotanu). On the contrary, if he will not accept the holy Faith, they threaten that his end will soon ensue. And the Archangels thereupon took up their abode with Vishtasp.[8]

Vishtasp's Vision. — It was after this stirring occurrence and after the obedient Vishtasp had received the Creed, that a glimpse of Paradise and a spiritual revelation of his triumphant success in life is vouchsafed to him. In referring to this the Dinkart says: 'For the sake of daily[4] and visibly showing to Vishtasp the certified victory over Arjasp and the Khyons, and his own superior position, unceasing rule, splendor, and glory, the creator Auharmazd sends, at the same time, the angel Neryosang to the abode of Vishtasp, as a reminder for the archangel Ashavahishto to give to Vishtasp to drink of that fountain of life, for looking into the existence of the spirits, the enlightening food by means of which great glory and beauty are seen by Vishtasp.[5] The king now quaffs an anodyne draft of 'the fountain of life'[6] from a fine saucer which

is proffered to him by Ashavahishto;[1] and at his instigation the queen also accepts the Faith.[2] The Zartusht Namah[3] completes the picture by describing how the king's son Peshotan (Bashutan) receives from the Prophet's hand a cup of milk which he drains and becomes undying until the resurrection.[4] The grand vizir, Jamasp, inhales some magic perfumes and becomes endowed with universal wisdom.[5] The valiant Isfendiar (Av. Spent5-data, Phi. Spend-dat) partakes of a pomegranate, and his body is made invulnerable, so that he may fight the good fight of the Faith.[6] Thus are bestowed the four great boons which were asked by Vishtasp.

Conclusion. — In reviewing the accounts of the conversion of Kavi Vishtaspa one can but feel convinced of the reality of the event. It is not easy, however, to decide how much may be actual fact and how much is fiction in the stories that are told. Nor is it easy to determine of how early or how late origin some of these stories are. Several of them appear to be hinted at in younger portions of the Avesta; they hardly would occur in the existing Gathas, for the nature of those Psalms would rather preclude them. Some of them seem to be built up on the basis of old allusions which have been interpreted to suit a situation. Several of them strike us to-day as silly, but a number of them as picturesque and as tinged with Oriental fancy.

Nevertheless, amid all the dross, grains of gold are undoubtedly to be found ; and beneath the blaze of tinsel and the glare

[4] In connection with this incident, compare also the paragraph on PeshyOtan in Dk. 7. 6. 12 (West, *8BE.* xlvii. 77). In the Avesta, and in Pahlavi writings, PeshOtanu is always spoken of as immortal.

[5] This is the character of ' the w i s e Jamasp' in the Avesta, the Pahlavi books, and the later writings. Compare also the Pahlavi treatise, Jamasp Namak, noted by West in *Grundriss d. iran. Philol.* ii. 110.

[6] In the Shah Namah this quality is conferred by means of an amulet chain (kusti ?) which Zardusht is supposed to have brought from heaven, cf. p. 61, note 1, above. See Mohl, tr. iv. 407, and cf. Spiegel, in Darab D. P. Sanjana, *Geiger's Eastern Iranians*, ii. 211.

of gaudy coloring, a sober shade of truth may be recognized. Other nations and other generations have sought for a sign; the Zoroastrian writings are not the only texts that relate miracles. An Eastern ruler in ancient days may not have been insensible to influences which were of a cajoling character. And as for the intrigues against Zoroaster, his imprisonment and his release, we know that court jealousies and priestly conspiracies against a powerful rival have not been confined to Iran. Fanciful stories of a bewitched horse may likewise be found elsewhere. Banks and his horse, in Shakspere's day, would be an illustration. The conversion also of the queen of the realm opened many another door to influence, as did Emma to St. Augustine. Perhaps Hutaosa was early interested in Zoroaster's preaching. It suffices to say that even if the actual circumstances connected with the momentous event of Vishtasp's conversion were not wholly as tradition later represents them, they might at least have been such or similar. *Voila tout!* The triumph of the Prophet is supreme.

THE COURT OF VISHTASPA AND ITS CONVERSION

ZOROASTER'S PATRON VISHTASPA — ROMANTIC STORY OF HIS YOUTH — INFLUENCE OF VISHTASPA'S ADOPTING THE NEW FAITH — MEMBERS OF VISHTASPA'S COURT; IMMEDIATE CONVERSIONS; LIVING PERSONALITIES IN THE GATHAS — OTHER MEMBERS OF THE COURT CIRCLE CONVERTED — CONCLUSION

Zoroaster's Patron Vishtaspa. — Kavi Vishtaspa, **or King** Vishtasp (Gushtasp), the Constantine of Zoroastrianism and defender of the Faith, presents a figure so important **in** its bearing that some additional details may appropriately be given concerning this pious ruler's history. His name is ever recurring in Avestan and Pahlavi texts, in the Shah Namah, and in Mohammedan writers who allude to Persia. A collection of the references to his name in the Avesta, supplemented by general allusions in other Zoroastrian writings, is given at the bottom of the page.[1] Special points of interest about **him**

[1] 1. The principal Avestan references to Vishtaspa are: Gatha, Ys. 28. 7 (a boon to be granted to Vishtaspa and Zarathushtra); Ys. 46. 14 (warrior V.); Ys. 51. 16 (V. an ideal ruler in wisdom); Ys. 53. 2 (a follower of Zarathushtra). — Yasna, Ys. **12.** 7 (a Zoroastrian); Ys. **23.** 2 and 26. 5 (his *fravaH).* — Yasht, Yt. 5.98 (a Naotairyan); Yt. 5. 105 (Z. prays for his conversion); Yt. 5. 108-109 (V. prays for victory); Yt. 5. **132** (type of successful conqueror); Yt. 9. 29-32 (cf. From this genealogical list we see that the patron of Zarathushtra was the son of Aurvat-aspa (Lohrasp) and was sprung from the old Kayanian line of kings.[1] He belongs to the Naotairyan family (cf. A v. Naotairya, NaotairySna),[2] that is, he was descended from an ancestor Naotara (Firdausi's Naudhar).[3] His wife Hutaosa (Phl. Hutos), the patroness of Zoroaster, is likewise of the Naotairyan family;[4] his brother Zairivairi (Zarer or Zarir), a romantic hero and zealous convert, wins lasting fame by his valiant death in the first Holy War, as described below. King Vishtaspa is the father of many sons and daughters.[6] Two of these sons, Spento-data

2. Pah1avi references. The Phl. Comment, to Ys. 43. 12 (cf. Ys. 27.6), 44.16, and also Dk. 9. 33. 5, take Vishtasp as a type of religious obedience, as representative of SrOsh on earth (see Darmesteter, *Le ZA,* i. 200, n. 24, and p. 283, n. 40; also his Index, s.v. 'Sraosha' in iii. 226). In general, the more important Pahlavi references, and there are many, will be given as occasion arises. (Phl. Spend-dat, Pers. Isfendiar) and Pesh5tanu, have been alluded to already and they will appear again. A daughter Huma (Phl. Pers. Humai), renowned for her beauty, is carried away, along with her sister Beh-Afrid, into captivity, by the king's mortal foe Arjasp; but they both are gallantly rescued by their heroic brother Isfendiar, as told in the Shah Namah.[1]

The principal facts which the Avesta emphasizes about Vishtaspa are, his conversion, his zealous support of the Creed, and his vigorous crusading in behalf of the Faith. It furthermore portrays this nonpareil of kings as the very incarnation of religious obedience and of priestly ideals; he is the representative of the priest-god Sraosha, whom he typifies on earth; and he will serve as an officiating pontiff at the final judgment of the world, among those who are to be selected for that office.[2] This accentuation of the priestly side of Vishtasp's character, which is found in the sacerdotal writings, seems to accord with the tradition that, following historic precedent, he withdrew from active affairs in the latest part of his life, and gave himself up to pious pilgrimage or devotion.[3]

Romantic Story of Vishtasp's Youth. — With respect to the youth of this ideal king we have only a romantic story told by Firdausi in the Shah Namah and repeated by Mirkhond on authority of the Tarikh Ma'jem.[4] According to the great

poetic chronicler, Vishtasp (Gushtasp) has some disagreement with his father King Lohrasp, and quits the city of Balkh which his father has founded. He leaves Iran and wanders westward towards Rum.[1] There, at the court of an emperor, he accomplishes deeds of unparalleled prowess, wins the hand of the princess, Katayun (Kitabun, or Nahid), becomes reconciled to his father through the good offices of his brother Zarir,[2] returns to Iran and receives the crown from Lohrasp's hands. Such is the novelistic story of the Shah Namah.[3]

A similar romantic episode is preserved in Athenseus (19. 275 a), as narrated by Chares of Mitylene, but it is told of the early years of Zariadres (presumably Zarir), brother to Hystaspes of ' Media and the territory below.'[4] According to the account, Zariadres himself rules the territory from the Caspian Gates to the Tanais, in which region the scene is laid. The name of the princess, in this case, is Odatis. Whether this episode, like the preceding, be founded upon fiction or upon some basis of fact, it is of interest because it connects the name of Vishtaspa, for a time at least, with the country west of Asia.[6] When the Shah Namah makes Vishtasp (Gushtasp) return, and, like all the later tradition, it makes him succeed his father at the city of Balkh, we have a new point of contact between the West and the East, Media and Bactria, to add on the side of that theory which believes that the Religion, following Zoroaster himself, gradually changed from West to East.[6]

Far-reaching Influence of Vishtaspa' s Conversion,—Viewed **in** its historic light the conversion of Vishtaspa is the main event of the Religion. The struggling creed now has a royal patron and protector. Zoroaster, therefore, at once proceeds to admonish his new convert concerning the path of holiness. A traditional reminiscence of these admonitions is found in the later Avestan Yasht Fragment, Vishtasp Sasto;[1] and the Zartusht Namah further exemplifies them from tradition by summarizing, in a general sort of way, the main outlines of the teachings of the Avestan Revelation.[2] The Pahlavi Dinkart at this point adds a picturesque statement to the effect that [4] When Zaratusht chanted the revelation in the abode of Vishtasp, it was manifest to the eye that it was danced to with joyfulness, both by the cattle and beasts of burden, and by the spirit of the fires which are in the abode.'[3] A new champion of the Faith, and protector of animal life as well, has been won, and joy reigns supreme. But the demons of Ahriman rush away to darkness.[4]

Members of Vishtaspa's Court — Immediate Conversions — **Living Personalities in the** Gathas. — Two results followed as a natural sequel to the conversion of the king and his queen: one was, that the religion was at once generally adopted by the court; the other was, that it soon began to spread throughout the land. The former of these two results must first be discussed, and with it a brief description of the court personalities is necessary, as well as a few words upon the life and surroundings.

The best picture that we have of Zarathushtra's position at the court of Vishtaspa, and the most real and vivid glimpses that we can get so as to contrast the religious times before him with his present life, are to be found in the Gathas themselves. Here we have the very words of the great Reformer or of his

disciples; and the expressions heard in the Gathas have as true and personal a ring as the cry of the Davidic Psalms. The tone of the Gathas is varied. Hope, despair, exultation, discouragement, succeed each other with rapid change; for the moment, confidence and assurance, but then doubt and hesitancy ; a period of zeal and activity must evidently have been followed by a time of repose and meditation; now admonition, exhortation, and promise ; again philosophic speculation or veiled mystery, the spiritual sense of which could best be appreciated by the initiated ; a shade of darkness, yet illuminated by a burst of light, by vision, by inspiration ; then comes the final fiery outbreak of 'the prophetic soul in a clarion note of triumph and the transport of joyous victory. These are the tones that run in minor chords through the Gatha Psalms. Well indeed would it be for the infidel and heretic if he would hearken unto wisdom and the Faith. The wicked man and the unbeliever, the Dregvant and the Daeva, are fiercely anathematized; the righteous Ashavan and the godly ruler are highly extolled.

The little band of the faithful forms a church militant. Of ritual there is little or none. The communicants at the new altar are few, but they move in procession distinctly before our eyes. The Gathas mention some of them by name; certain of these are Zarathushtra's kinsfolk. The Haecataspas, descendants of Spitama, who must have shared in Zarathushtra's success at the palace, are living personages. We recognize them when the Priest calls upon them in exhortation.[1] His favorite daughter Pourucista, whose marriage to Jamaspa forms a theme in one of these Psalms, may be pictured as a type of filial piety and womanly devotion.[2] His cousin Maidyoi-ma-

onha is already known to us as the earliest convert and as a sort of beloved disciple. The noble Frashaoshtra, vizir and attendant upon Vishtaspa's throne, shows his faithful devotion to the Messenger of Ormazd by giving his daughter Hvogvi (Hv5vi) to be a wife to him. And lastly Jamaspa, the wise counsellor and chancellor of the king, and brother to Frashaoshtra, proves to be so sage an adviser, as time goes on, and so valued a supporter of the Creed, that Zoroaster's prophetic mantle descends upon his shoulders after the death of the great high priest, and King Vishtasp ordains him as the holy successor in the pontifical office.[1] It was he, according to tradition, who originally wrote down the 'Avesta and Zand' from the teachings of Zoroaster.[2] With regard to these personages of the Gathas, it is needless to add references to the Pahlavi literature.[8] Some other details respecting them have been given above in Chapter II. A single quotation from the Avestan Psalms may be added here. It is from the Gatha Ushtavaiti (Yasna 46. 14 seq.). The Prophet with his own lips asks a question, and in rhetorical style he gives the answer himself.

' Who is it, 0 Zarathushtra, that is thy righteous friend; or who is it that wishes to be renowned for his great virtue? It is the warrior Vishtaspa, and, with the words of Vohu Manah (Good Thought) I invoke those in his abode whom he has converted by his praising (the Religion).

' Of you, ye childrenof Hagcat-aspa, descendants of Spitama, will I say this: that ye did distinguish the good from the evil, (and) ye have won for yourselves Asha (Righteousness)[4] by such acts as are the first laws of Ahura.

Similar personal situations and allusions to the faithful are indicated in Ys. 51.16 seq., 53. 1 seq., and elsewhere in these metrical hymns. But enough! The principal points regarding Zoroaster's own immediate family have been presented in Chapter II., which deals with that subject. The genealogical table of the Hvogva family was presented in that chapter because it shows the connections which arose by the intermarriage of Pourucista and Jamaspa, and of Hvdgvl and Zarathushtra himself.[2] It is easy to see how Zoroaster made his position at court still stronger by allying himself closely with those next to the throne. For almost all of the statements that have been made thus far the Avesta itself has been the principal source.

Other Members of the Court Circle converted. — Among other conversions of those belonging to the immediate circle of the court of Vishtaspa, two must at once be mentioned. These are the king's brother Zairivairi (Phi., Mod. Pers. Zarer, Zarir) and the king's gallant son Spent5-data (Phi. Spend-dat, Mod. Pers. Isfendiiir). Their names do not happen to occur in the Gathas, but they are mentioned foremost among the faithful in the Avestan Yashts; and the Pahlavi Dinkart and Shikand Gumanik Vijar commend them to praise among the earliest converts. These special Pahlavi passages also show that many of the nobility were early attracted to the Creed. The Dinkart states : 'At first Zarir, Spend-dat, Frashoshtar, and Jamasp,

several of the realm who were noble, conspicuous, and well-acting, the good and princes of mankind, beheld visibly the will and desirableness of Auharmazd and the archangels, and the progressive religion of the creatures, fit for those completely victorious.'[1] The Shikand Gumanlk Vijar adds its testimony, that ' Kai Spend-dat and Zarir and other (royal) sons, instigating the many conflicts and shedding the blood of those of the realm, accepted the religion as a yoke, while they even wandered to Arum and the Hindus, outside the realm, in propagating the religion.'[2] With regard to Spend-dat (Spentd-data, Isfendiar) it is interesting to observe that the late Persian authority Mirkhond conveys the idea that this heroic youth was largely instrumental in inducing the king, his father, to adopt the Faith which he himself apparently had already accepted.

With the conversion of Zarir to the Religion, later tradition associates also that of the old King Lohrasp (Av. Aurvat-aspa), who has abdicated and is supposed still to be alive, although the Avesta makes no special mention of his name in connection with the Creed.[8] The Shah Namah is not altogether precise, but it includes Lohrasp as 'the old king' among the number who, with Zarir and other nobles, 'girded themselves with the sacred cord and became converted' to the faith which Vishtasp had adopted.[4] The later Persian Dabistan, on the authority of the Behdinians (' those of the good Faith') gives the specific occasion of the conversion of these two, somewhat picturesquely as follows : 'The doctors of the pure faith record that King Lohrasp and Zarir, brother to Gushtasp, having fallen into so violent a malady that the physicians in despair desisted from all attendance upon them ; but having been restored to health

through the prayers of Zardusht, they adopted **the pure faith.'**[1] Another instance of faith cure or healing by Zoroaster, aided, however, by herbs, will be recorded below. Zoroaster himself, however, speaks of his own office as ' the physician of the soul.'[2]

Conclusion.—The real success which Zoroaster won was first due to the influence of the king and the court. The Gathas give us some idea of Zoroaster's preaching before the assembled community. His were new words and they were listened to by those who came from near and far (e.g. Ys. 45.1). With royal authority to back the Religion and noble power to support it, the advance and spread of the Faith must have been rapid, and accounts will next be given of other conversions and of the history of the religious propaganda.

PROMULGATION OF THE GOSPEL

EARLY RELIGIOUS PROPAGANDA

yd jvanto vispmg vauraya. — AVESTA, YS. 31. 3.

INTRODUCTION, THE CYPRESS OF KISHMAR — CONVERSIONS MORE NUMEROUS ; SPREAD OF THE GOSPEL ; EARLY RELIGIOUS PROPAGANDA — SPREAD OF THE RELIGION IN IRAN — SOME CONVERSIONS IN TURAN—AVERRED CONVERSIONS OF HINDUS — STORY OF THE BRAHMAN ' CANGRANGHACAH ' — THE HINDU SAGE ' BIAS ' — FABLED GREEK CONVERSIONS — DID ZOROASTER VISIT BABYLON ? — CONCLUSION

Introduction, the Cypress of Kishmar. — In telling the story of Zoroaster and of Vishtaspa's embracing the new Faith, the Shah Namah narrates how Zardusht planted a cypress-tree before the door of the fire-temple at Kishmar, in the district of Tarshiz in Khorassan or Bactria, as a memento of Vistiispa's conversion, and had inscribed upon its trunk that ' Gushtasp had accepted the Good Religion.'[1] Marvellous became the growth and age of this wonderful tree, the famous cypress of Kishmar *(sarv-i Kishmar),* as recounted by the Farhang-i Jahangiri, Dabistan, and other writings, as mentioned by Hyde and noticed more fully below in Appendix IV.[2] The allegory is rather fine ; the tree typifies by its spreading branches the rapid advance of the Creed under the fostering care of the king and the court.

Other Conversions; Spread of the Gospel; Early Religious Propaganda. — Outside of the immediate circle of the king, conversions begin rapidly to follow. The way no doubt had already been paved among the people, and Vishtaspa's own example and his enthusiastic zeal could but exercise wide-spread influence. With all the spirit and fire of a new convert he is untiring in his efforts for the establishment of the Faith. The unknown author of the Farvadin Yasht, when he comes to Vishtaspa's name (Yt. 13. 99-100), breaks out into a eulogy : —

> ' It was this righteous and bold warrior,
> The hero of redoubtable weapon,
> The very incarnation of the Law
> And devoted to the Lord—
> It was he, who, with advancing weapon,
> Sought out a broad path of Righteousness,
> And, with advancing weapon,
> Found the broad path of Righteousness.
> He, it was, who became the arm
> And the support of the Religion
> Of Zarathushtra, of Ahura;
> He, who dragged from her chains the Religion
> That was bound in fetters and unable to stir;
> And made her take a place
> In the midst (of the nations),
> Exalted with power, advancing and hallowed.'

We can but regret the loss of the eleventh Avestan Nask, which dealt particularly with the promulgation of the Faith. The Pahlavi treatise Dm-Vijirkart tells us of its missing contents as follows : ' In this Nask is the topic of the sovereignty of Gushtasp, and Zaratxisht the Spitaman, having brought the religion from Auharmazd, King Gushtasp accepted it, and made it current in the world,'[1] and the Persian Rivayat of Kamah Bahrah gives the same testimony.[2] It is true that the Bahman Yasht reserves till a generation later the accomplishment of the task of making the religion current in the ' whole' world, which is finally brought about by the Kayanian

'Artashir (Kai), whom they call Vohuman son of **Spend*** dat.'[1] Later writers bear the same testimony to the tradition of Vishtaspa's religious energy. The Arab Ibn al-Athir, for example, states that when Vishtasp accepted the Faith 'he compelled his people to do the same and he killed a large number of them until they adopted it.'[2] This may be a later Mohammedan view, but there is no doubt that fire and the sword were not absent in the Avesta, and further evidences will be seen in the next chapter of propaganda by religious crusades at home and abroad. First we must notice the spread of the Creed in Iran itself.

Spread of the Religion in Iran. — It is tolerably certain that within Iran itself the fire of the Faith of Zoroaster rapidly spread, fanned, as it was, by the breath of sovereign power. Conversions were undoubtedly the order of the day ; adherents continued to multiply and devoted volunteers began to crowd into the ranks which had been captained at the court. From the Avesta and from later literature we know the names of many of these. In the Yashts[3] we have a prose list of nearly a hundred sainted persons who are connected with the Vishtaspa circle. They are evidently the first disciples — the so-called Paoiry5-tkaeshas — of the Zoroastrian Creed.[4] How far and how fast the religion actually spread in the earliest period we do not know. We know, however, that the land of Seistan was one of the earliest scenes of the promulgation of the Faith, as **will** be seen by the sequel and proved by the Pahlavi treatise, ' Wonders of Sagastan,' elsewhere referred to. There were coubtless parts of Iran which were Zoroastrian only in name. **The** surmises on the question of Vishtaspa's exact rank and

sovereignty have also been more than one. The problem of the exact lands and territories concerned, and at how early a period Persia Proper is to be included, requires discussion elsewhere. One thing is certain, that Zoroastrianism was destined to become the national religion of Iran.

Some Conversions in Turan. — Nor is the Creed circumscribed by the borders of Iran alone. From the A vesta we know that other lands and climes came in for a share of the good tidings of the Faith. The 'fravashis,' or guardian spirits of those who are righteous ' outside of the country,' or abroad, are invoked as well as those within the land.[1] All of which implies some lapse of time. And among a dozen such lands and countries, Turan comes in for a share of the blessing. Turanians are mentioned by name in the canonical list of the faithful whose 'fravashis,' or idealized spirits, are glorified (Yt. 13. 111-129). In fact, among those catalogued for sainthood in the list is one Isvant, son of Varaza, whom the Dinkart counts as a Turanian when it includes his name as [1] Isvant, son of Varaz, from the countries of Turan,' among those who will officiate on the last day at the general resurrection.[2] In the Gathas themselves Zarathushtra devotes a stanza to the descendants of Fryana of Turan, as he was one who had been attracted to the Prophet and is selected to receive a destined reward. Zoroaster speaks of him with favoring words (Ys. 46. 12): —

[4] When Asha (Righteousness) [3] came unto those that are to be named as the children, and children's children, of Fryana, the Turanian who zealously doth further the possessions of Armaiti,[4] and when Vohu Manah (Good Thought) took up his

A descendant of this virtuous Turanian house,[2] Yoishto yd FryanSm, is commemorated in a metrical passage of the Avesta, for his wisdom and for his victory over a malicious wizard Akhtya.[3] The episode is fully elaborated in the Pahlavi tale which bears the name Yosht-i Fryano, and it need not be treated here.[4]

Averred Conversions of Hindus. — In the great Persian Chronicle Shah Namah we have mention of the vigorous efforts that were made in the way of religious propaganda; Firdausi (or Dakiki) speaks of Mobeds who were sent on this holy mission all over the world, assisted and aided by Isfendiar's conquering sword.[5] The land of ' Rum,' or Asia Minor and the West, as well as Hindustan are included in the successful missionary fields. The earlier Pahlavi work, Shikand Gumanik Vijar (A.D. ninth century) narrates the same fact when it speaks of the valiant Spend-dat and Zarir, and of those other noble sons of Vishtasp, who accepted the religion, of the con-

flicts and bloodshed, and says 'they even wandered **to Arum** and the Hindus, outside the realm, in propagating the religion.'[1] The claim to Indian converts is quite persistent in the later writings, which is not so strange when we consider the Indo-Iranian kinship and the fact that the Parsis found in India **an** asylum from Mohammedan persecution.

Story of the Brahman 'Cangranghacah.'—The most interesting episode, perhaps, of the foreign conversions is the later Persian story which is told of Cangranghacah, a Brahman sage who comes from India to Vishtasp's court in order to refute Zoroaster's doctrines, but the Hindu teacher himself is taught by the greater master and becomes a devoted convert of the Priest of Iran. This picturesque narrative is recounted, with other matters, in the Cangranghacah Namah, a modern Persian poetical work of the thirteenth century.[2] The author of this treatise is stated to be Zartusht Bahram Pazhdu, of the ancient city of Rai, who also composed the Zartusht Namah; and like the latter work it is claimed to be drawn from Pahlavi sources, if we may agree with Anquetil du Perron, who is our chief source of information on the subject.[3] This story of the Brahman's conversion is briefly repeated in the Dabistan and it is alluded to incidentally in the text of the Dasatir and described in its commentary.[4] All this implies some currency of the tale. A brief abstract of the narrative, so far as it relates to the main event, is worth giving, and it is here presented, being

based on the fuller account of the Cangranghacah Namah found in Anquetil.[1]

Sketch of the Incident. — The aged Brahman sage, Cangranghacah, is a philosopher whose learning and wisdom were far-famed throughout India and known in Iran. He is reported even to have been the teacher of Jamasp, minister to King Vishtasp, whose devotion to Zoroaster is regarded as a fall from grace. Accordingly the Brahman writes to Vishtasp a letter remonstrating with the monarch for believing in the upstart Prophet. At the proposal of Vishtasp he finally comes himself to ' Balkh' with a great following of devoted disciples, in order to debate with Zoroaster and to put the impostor to confusion. But he who came to scoff remains to pray. Zoroaster is prepared by premonition to answer all the seer's questions before he asks them; and amid a great assemblage of learned men who have gathered from many parts of the country to listen for days to the religious debate, the chosen Priest of Ormazd disarms his antagonist before the latter has time to lift his weapons in discussion and conflict. By reading a Nask or book of the Avesta, in which every difficult question prepared by the Hindu controversialist is already answered, he astonishes and utterly confounds the Brahman. So completely is the Hindu philosopher vanquished and convinced, that with remarkable candor he forthwith acknowledges his defeat, is converted, adopts the Faith, receives a copy of the Avesta from Zoroaster's own hands, becomes a zealous adherent, and joins in spreading the Prophet's teachings in Hindustan and the adjacent countries, so that eighty thousand souls in this way receive the enlightenment of the true Faith. A festival is instituted to commemorate this important event. Such in brief is the story, which remotely reminds us of the ecclesiastical convocations and the discussions and disputations of Luther.

This legend, as stated, seems rather to be of later origin, **and**

[1] **Anquetil du Perron, *Zend-Avesta*, i. Pt. 2, pp. 47-53.**

it may have arisen after Zoroastrian believers found refuge in India in Mohammedan days; and where, as time went on, Brahmans and Dasturs perhaps came into debate and conflict. Nevertheless it is as old as the Zartusht Namah, which has been proved to contain old material, and it is by the same author, as already explained; and religious intercourse and connection between India and Iran at all periods in history is undoubted.[1] No great religion is confined to the bounds of its own country. And as for religious controversies and debates, nothing is more common. The Avesta alludes to a victorious debate with Naidyah Gaotema, whom some have tried, among several other suggestions, to identify with this same Brahman Cangranghacah.[2] The Pahlavi texts speak of Zaratusht's discussions with learned men whose questions he is able to answer even before they ask them. The statements on this subject have been given above.[8] It is possible that in the Avesta we may discover the source of the story, which seems to be somewhat legendary, in a mistaken view that the Avestan adjective *canranhdc* (Vsp. 1.1, etc.) contains an allusion to a proper name. Anquetil du Perron himself understood that epithet in the Visperad as an allusion to the Hindu sage.[4] On the other hand some have seen in this tradition of an Indian wise man, who comes to Iran, a late story concocted as an allusion to the famous Vedantist philosopher, .S'ankara-Acarya.[5] This view

is especially based on an identification of the great philosopher's name with the form of the Brahman's name which is found in the Dasatir (vol. ii. 125) as Sankarakas (for which the Commentary understands Cangranghacah).[1] Such a view is to be maintained only by premising that we are to regard the story as **a** later invention, purposely made up to exalt the triumph of an Iranian over **a** Hindu philosopher.

The Hindu Sage 'Bias.' — A sequel to the story of the conversion of Cangranghacah is found in the tale of ' Bias' told in the Dasatir and repeated from this source by the author of the Dabistan.[2] The account describes how, when the news of Cangranghacah's confession became noised abroad, another sage, Bias (i.e. Vyasa) by name, came from India to Iran in order to refute Zoroaster and to convert him. Like his predecessor, however, Bias is soon impressed by Zardusht's superhuman knowledge and divine insight, which penetrates even into the inmost thoughts of his soul, so that he also accepts the religion, or (to quote the actual words of the Dasatir commentary) 'he returned thanks to Yezdan and united himself to the Behdin, after which he returned back to Hind.'[3] This story is merely a counterpart of the preceding — a combination of legend and myth that seeks to bring Vyasa, the fabulous author of the Vedas, into connection with Zarathushtra.

Fabled Greek Conversions. — The statements of the Pahlavi Shikand Gumanik Vijar and of the Persian Shah Namah have already been given as claiming traditionally that the West (Phi. Arum, Pers. Rum)[4] came under Zoroaster's influence. The tradition is late, but in one respect it might not be so far from the truth if we should choose to look at Zoroastrianism simply in the light of Mithra-worship which, as is well known,

pushed its way even far into Europe. It is not unnatural, moreover, for religious devotees to lay claims to extraordinary foreign missionary conquests. This third great debate or theological dispute into which Zoroaster is presumed to have erftered and to have come off victorious, is with a Greek philosopher and master, as recorded in the Dasatir and noticed by the Dabistan.[1] The account is doubtless apocryphal, but it deserves consideration with the other alleged conversions, and there is perhaps a far-off echo of it in Hamzah of Isfahan, in a passage which describes how the Greeks evaded attempts to convert them, and the passage is given below in Appendix IV.[2]

Briefly the Dasatir story of this conversion incident is as follows: In a prophetic passage the text of the Dasatir tells how a wise man, named Tianur (Pers. Tutianush) or Niyatus, as the Dabistan calls him,[8] 'will come from Nurakh (Pers. Yunan, i.e. Greece) in order to consult thee (O Zardusht) concerning the real nature of things. I will tell thee what he asketh and do thou answer his questions before he putteth them.'[4] The commentary upon this passage and also the Dabistan expressly state that the sages of Greece despatched this learned man after Isfendiar had promulgated the Faith in many lands. We may therefore infer that the event, if it occurred at all, took place some years after King Vishtasp had accepted the Religion. The god Mazda, on this occasion likewise, instructs his prophet what he shall say and how he shall respond to the foreigner who is described as coming to 'Balkh.[5][6] Ormazd assures Zardusht of success, and the commentary adds that 'when the Yunani (i.e. Greek) sage heard all these words (of Zardusht), he entered into the Faith and

studied knowledge under the beloved of God, Zardusht the Prophet. (As a reward, moreover), the king of kings, Gushtasp, bestowed on him the office of Chief of the Hirbeds of Yunan, and of the Mobeds of that country. The accomplished man (accordingly), having returned back to Yunan, brought over the inhabitants to the religion of that blessed Prophet.'[1]

This story, whatever may be its worth or its worthlessness, is not uninteresting because it shows the existence of a tradition on the Oriental side regarding early connections between Iran and Greece in which religious matters came into play. There may, of course, lurk in such tradition some reminiscence of intercourse between the nations prior to the Graeco-Persian wars. The note of Hamzah al-Isfahani on some attempt to spread Zardusht's Gospel among the Hellenes has been mentioned above, with a Pahlavi reference also and a tradition in FirdausL[2] We must not forget that the Dinkai;t asserts that a Greek translation was made of the Avesta.[3] We may furthermore recall several allusions of the Greeks themselves to the effect that Plato, Hermodorus, Theopompus, and others came under the influence of Magian doctrines.[4] The name of this Grecian converted sage (Tianur, Tutianush, or Niyatus) is very obscure and the reading is uncertain. But an identification with Pythagoras has been suggested on the basis of the point just presented.[6] Whether founded on fiction, as is likely, or based upon fact, as is unlikely, the account merits recording and is fully given in Appendix V I. below, while the classical passages on Pythagoras, who is said to have studied in Babylon under the Magi, and on Plato might be worth looking over again in Appendix V., and in Chapter **I . ,** p. **7,** n. 5.

Did Zoroaster ever visit Babylon ? — In this same connection, when speaking of Babylon, it may be appropriate perhaps to

mention a statement made by the Pahlavi Dlnkarfc which ascribes to the religion of Zaratusht the overthrow of error and evil in * Bapel,' and it accounts this achievement as one of the marvels of the Faith.[1] The passage speaks of the existence of 'several matters of evil deceit which Dahak had done in Bapel through witchcraft; and mankind had come to idol-worship through that seduction, and its increase was the destruction of the world; but through the triumphant words of the religion which Zaratusht proclaimed opposing it, that witchcraft is all dissipated and disabled.'[2]

There is of course a distant possibility that after the Faith became fairly established Zoroaster himself actually did go on missionary journeys, teaching and preaching and exercising the influence of his own strong personality, We need only think of the three brief years of our Lord's ministry. At all events it is not wholly impossible to believe that several places were visited, perhaps including Persepolis also,[3] even if we are not prepared to accept so extravagant a view as that Babylon was among the number. It is true that some of the classical writers make Pythagoras a follower of Zoroaster or at least of the Magi, who were established at Babylon and into whose mysteries he was initiated.[4] The theory of personal travel need not be pressed too far; where the effect of the Religion came, there also the Master himself had gone in influence, if not in person. In

[2] The text does not indicate at what time in Zoroaster's career this event is supposed to have been brought about, or whether it did not come to pass later through the developments and spread of the Religion. The actual fall of Babylon occurred a generation after the Prophet. One might possibly conjecture from the passage that[4] the Religion ' perhaps joined hands with the conqueror Cyrus in destroying this city, which **is spoken** of with hatred in the Avesta as 'Bawri'; cf. Yt. 5. 29-31; cf. 15. 19-21. In Mkh. 27. 64-67, the old king, Lohrasp, is regarded as having destroyed Jerusalem and dispersed the Jews, a statement which is found elsewhere; see West, *SBE.* xxiv. 64. Somewhat similar is Dk. 5. 1.6, cf. *SBE,* xlvii. 120. Brunnhofer, *Vom Pontus bis zum Indus,* p. 147, might be noticed.

this we have only another phase of the footprints of Buddha. Regarding Babylon, moreover, everything which associates Zoroaster's name with this city can but be of interest to the student of the Exilic Period of the Bible.

Conclusion.—The story of the spread of the Faith, so far as we can gather it from tradition, implies that missionary efforts carried the Avesta to foreign lands as well as throughout the territory of Iran. Tales are told of Hindu conversions, and even Greeks are fabled to have accepted the Creed. Zoroaster himself may possibly have engaged personally in the general movement of the propaganda, but there is no proof that he visited Babylon. His time no doubt was constantly taken up in working for the Faith; some of the results which were achieved and some of the events which happened in the following years of the Religion are recorded in the next two chapters.

CHAPTER VIII

DEVELOPMENT OF THE RELIGION

THE NEXT FEW YEARS OF ZOROASTER'S MINISTRY

Homo in sacerdotio diligentissimus.
— CICERO, *Oratio pro Bab. Perd.* 10. 27.

INTRODUCTION — RECORD OF A NOTEWORTHY CONVERSION — TRADITION OF ZOROASTER'S HEALING A BLIND MAN — QUESTION OP ZOROASTER'S SCIENTIFIC KNOWLEDGE — OTHER ITEMS OF INTEREST, INCIDENTS, AND EVENTS — THE SACRED FIRES — CONCLUSION

Introduction. — Zoroaster's life was a long one and his ministry covered a number of years; yet tradition does not give us all the details which we might wish so as to be able more definitely to mark off into periods or epochs the fifteen years or more that intervened between Vishtaspa's conversion and the beginning of the Holy Wars that were waged against Arejat aspa. In other words, we are not altogether clear in dividing up and distributing the events that seem to have happened, roughly speaking, between Zoroaster's forty-fifth year and the sixtieth year of his life. We certainly know they must have been active years, the years of a man of vigorous mind who has just passed his prime, and no doubt some of the events which have been described in the preceding chapter may belong to this time, or even possibly later. The foregoing chapter, in fact, perhaps leaves an impression of too great precision in the distribution of its incidents. We may therefore take it with some latitude in connection with the present. If an attempted distinction is to be drawn, as the latter chapter dealt mainly with promulgation and conversion, this one may deal

rather with the ministration and organization, with missionary labors and the exercise of priestly functions. It must be kept in mind, however, that trying to locate in it the events which may have occurred at this time is a task that is difficult to perform with much satisfaction, and the work may be regarded rather as tentative, and as an endeavor to use material which remains at hand.

Record of a Noteworthy Conversion, — One event, however, is definitely located for us by tradition as belonging to a specific year in this period. The circumstance must have been regarded as one of real importance, owing to its being so emphatically chronicled; we shall therefore notice it at once. It is the conversion of a heretic, a Kavig or ungodly priest, who is won over to the true Faith. This is recorded in the Selections of Zat-sparam, which say: 'In the twentieth year (of the Religion) the Kavig who is son of Kundah is attracted (to the Faith).[1] Although the name is not definitely known, the incident is none the less sure; and if we accept the traditional date of ' the twentieth year' of the Religion, we may set down this event for B.C. 611,[2] at which time Zoroaster would have been in the fiftieth year of his age. All this makes the incident not without interest.

Tradition of Zoroaster's healing a Blind Man. — In connection with Zoroaster's ministry and possibly as a reminiscence of a missionary journey, or work in that field, unless we are to refer it to an earlier period of his career, we may make mention here of a legendary story of his healing a blind man. The story is told by Shahrastani of Khorassan (A.D. 1086-1153) who locates the scene rather in Persia Proper.[3] The

[1] Zsp. 23. 8, West, *SBE.* xivii. 165. The reading of the proper name from the Pahlavi is not certain. West's note on the passage offers ' Kunlh' as a possibility.

account runs as follows: ' As he (i.e. Zardusht) was passing a blind man in Dinawar,[1] he told them to take a plant, which he described, and to drop the juice of it into the man's eyes, and he would be able to see; they did this and the blind man was restored to sight.'[2] Even if this incident should belong to an earlier period of Zoroaster's life, or to the time of his wandering, it nevertheless serves to show a tradition that miraculous healing power was believed to be exercised both by Zoroaster and by virtue of the Faith itself. The latter point might find sufficient exemplification in the Avestan Vendidad.

Question of Zoroaster's Scientific Knowledge. — The tradition which has just been recounted of the healing of the blind man brings up another point which requires note. This is the question of Zoroaster's scientific knowledge, which is a side of his character that is distinctly recognized by tradition, and which must have come into play in his ministry. There is evidence that he showed a practical bent of mind in his work as well as the theoretical and speculative turn in his teaching. All accounts of the Religion indicate that the necessity of ministering to the wants of the body, as well as to the needs of the soul, was fully comprehended. Nor is medical knowledge to-day regarded as unessential or to be dispensed with in some branches of foreign missionary work. The records of antiquity imply that the Zoroastrian books, by their encyclopsediac character, stood for many sides of life. Some of the original Nasks of the Avesta are reported to have been wholly scientific in their contents, and the Greeks even speak of books purported to be by Zoroaster on physics, the stars, and precious stones.[8] It is true these need not have come from Zoroaster at

all; but this represents a phase of life that Zoroaster or his apostles stood for. Tradition recognizes the presence of this practical element in the Religion which made it appeal to many who might not otherwise have been attracted, and which must have contributed in no small degree to its spread. The priests were the real conservators of knowledge and learning.

As an illustration of their practical knowledge, so serviceable to mankind, we may notice a passage in the Dinkart, which claims that the debt owed to Zoroaster in this respect is extensive. The text reads : 'One marvel is the disclosure by Zaratusht, in complete beneficence, medical knowledge, acquaintance with character, and other professional retentiveness, secretly and completely, of what is necessary for legal knowledge and spiritual perception ; also, the indication by revelation, of the rites for driving out pestilence, overpowering the demon and witch, and disabling sorcery and witchcraft. The curing of disease, the counteraction of wolves and noxious creatures, the liberation of rain.'[1] This and a number of ordinary practices, which have a bearing upon every-day life, are included in this list of what the Pahlavi text calls 'worldly wisdom' *(gehdno-xiratoih),* as contrasted with 'angelic wisdom' or'divine knowledge' *(yazddno-xiratoih).*[2] The brief resume sums up what was expected to be found in the repertory of the wandering Athravan, or descendant of the Prophet, at least in Sassanian times, and quite as likely it represents some of the sides of Zoroaster's own activity during the long period of his ministry.

Other Items of Interest, Incidents, and Events. — Tradition has preserved a few more items of interest, incidents, or occurrences and events which may belong to the period of these years. A suggestion has been made that Zoroaster may have visited his own home in his native land of Adarbaijan. Anquetil even thought that Urumiah is mentioned in the Avesta in

an injunction given by Ahura Mazda bidding **Zarathushtra, as he** conceived it, to **proceed to a certain place. But this is a** mistaken interpretation of the passage.[1] Anquetil also understood that Zoroaster and Vishtasp were together **in Istakhr** (Persepolis).[2] This view is apparently based upon the fact that Zoroaster induces Vishtasp to transfer one of the sacred fires from Khorasmia to Darabjard, in Persia, as stated by Masudi,[8] and based upon Tabari (and Bundari after him) who describes how the Avesta was written down in golden letters upon the hides of twelve thousand oxen and 'Vishtasp placed this at Istakhr in a place called Darbisht (or Zarbisht?).'[4] This may be noticed also in connection with the tradition of Jam asp's writing down the Avesta from Zoroaster's teachings (p. 76), and is also brought up in connection with the tradition that the archetype copy of the Avesta was deposited in the ' treasury of Shapigan' (or however we are to read the name and its variants) as discussed below in Appendix IV.

During this period we can likewise imagine Zoroaster as otherwise much engaged in organizing the new religion, in founding fire-temples as described below, and in exercising in various ways his function as Chief Priest; not the least of these perhaps was in establishing the rite of ordeal as already noticed, or in celebrating the event of Vishtasp's conversion by planting the cypress of Kishmar, before described. There were also times when prophetic visions were granted and hallowed enunciations were made. The Pahlavi Bahman Yasht (and after it the Zartusht Namah) records a favored vision which was allowed to Zoroaster, in which he foresees, during a seven days' trance, the whole future of the Religion.[5] Even the Apocryphal New Testament in one passage claims that Zoroaster prophesied the

coming of Christ;[1] and a Syriac writer, Solomon of Hilat (A.D. 1250) tells a tradition of a special fountain of water, called Glosha of Horin, where the royal bath was erected and by the side of this fountain Zoroaster predicted to his disciples the coming of the Messiah.[2]

The Sacred Fires. — There can be little doubt that much of Zoroaster's time was spent in the care of the sacred fire or in the furthering of the special cult throughout the land. Tradition counts that one of the most important features of Vishtaspa's conversion was his active agency in founding new places in which the holy flame might be worshipped or in reestablishing old Atash-gahs. In a special (prose) chapter, the Avesta describes the various sacred fires recognized by the Faith, and the Bundahishn gives additional details on the subject;[3] Firdausi mentions several so-called Fire-Temples,[4] and Masudi, among other Mohammedan writers, devotes a number of pages to the subject of the Magian pyraea, several of which he says existed before Zoroaster came.[6] Numerous Arabic writers refer to the question, and as .their references are accessible, they need only be summarized here.[6]

Masudi and Shahrastani tell of some ten different Pyraea or places of fire-worship which existed in Iran before Zoroaster's time, and they give the name or location of each. Zoroaster himself causes a new temple to be built in Nishapur, and another in Nisaea.[7] Furthermore, at his request King Vishtasp

seeks **for** the fire of Jemshed, which is found in Khorasmia, and he has it transferred to Darabjard in Persia. This latter fire **is said to be** especially venerated by **the Magi. Other** Pyraea are mentioned in Seistan, Rum (Constantinople), Bagdad, Greece (without the fire), India, and in China. Not without interest is the mention of the fire-temple in Kumis (Comisene) which bore the name of 'Jarir,' apparently after Vishtasp's son Zarir.[1]

Among all the fires there seem to be three which stand, in later times of the Sassanians, as the threefold representative of the sacred element, corresponding to the social division of the community into three classes, priests, warriors, and laboring men.[2] The names of the three great fires are given as follows: —

1. Atur Farnbag, the fire of the priests. This fire, whose name appears as Farnbag, Froba, Khurrad, Khordad, being a corruption of * Hvaren5-bagha or * Hvareno-data, i.e. 'the fire of the Glory Divine, or the fire Glory-Given,' is one of the most ancient and most sacred of the holy fires in Iran.[3] Existing as early as Yima's reign, and having been established in the Khorasmian land or the eastern shore of the Caspian Sea, it was removed by Kavi Vishtaspa to Cabul, if we are to accept the commonly received statements on the subject.[4]

[1] So ShasrastanI, i. 275, but seemingly a different reading or form of the name (i.e. Djerich) is found in MasudI, iv. 74. See also Gottheil, *References to Zoroaster*, pp. 45, 46.

2 Bd. 17. 5-8, and Ys. 17. 11. Cf. Darmesteter, *Le ZA.* i. 149 seq., and MasudI, loc. cit.

[3] Cf. *Arda Viraf*, tr. Haug and West, p. 146, note; and Bd. 17. 5-6.

[4] So Bd. 17. 5-6 if we read the Pahlavi name as 'Kabu' with West *(SBE.* v. 63); otherwise we may understand it was removed, not eastward, but to the west, if we follow Darmesteter, *Le ZA*, i. **154,** in doubting the reading 'Kavul (Kabul)' which West, however, gives *(SBE.* v. 63). Darmesteter follows MasudI, Shahrastani, and Yakut; similarly, Ibn al-Faklh al-Hamadhanl (A.D. 910); AlbirunI (p. 215, tr. Sachau) — all cited by Gottheil, *References to Zoroaster*, pp. 43-47. The subject is also discussed below in connection with the scene of Zoroaster's ministry, Appendix IV., p. 217. It is evident that Shahrastanl's Azarusa is for Adaran shah, 'king of fires,' Darmesteter, *Le ZA.* i. 157, Gottheil, *References to Zoroaster*, p. 47.

2. Atur Gushnasp (Gushasp), the fire of the warriors. The name Gushnasp is probably a corruption from * Varshan-aspa, 'male-horse,' cf. Skt. *vrsan-as'vd,* an epithet of Agni, as noted by Darmesteter. This was a very ancient fire and it early played a part when Kai Khusrav exterminated idol-worship. It was situated in the neighborhood of Lake Urumiah, or on Mount Asnavand upon the shores of that lake.[1] According to the Zaratusht Namah, this was one of the fires which came with the Archangels to aid in Vishtaspa's conversion as described in Chap. V., p. 65, n. 1.

3. Atur Burzhin Mitro, the representative of the laboring class. The name, also in Persian, Burzin Mihr, corresponds to * Berezant Mithra.[2] This third fire, or the special fire of the laborer, played an important part in Vishtaspa's conversion. This is located on Mount Raevant in Khorassan in the vicinity of Lake Sovar (mentioned in the Bundahishn), in the region of Tus, as noticed also below in Appendix IV., p. 216.[3] A similar situation is given to it by Firdausi.[4] Perhaps there is an echo of the name of this fire lingering in the name of the small town Mihr to the west of Nishapur, although for a fuller statement of Houtum-Schindler's view, reference is made to p. 216. Several of the Mohammedan writers, as noticed above, state that the special fire of Zoroaster was in the neighborhood of Nishapur. We recall that Khorassan was the land of the planting of the cypress of Kishmar, and the scene of the closing battles which ended the Holy War — all of which is of interest in connection with the field of Zoroaster's ministry.

Conclusion. — The aim of this chapter has been to present such material as we can gather for the events of Zoroaster's life during the years next preceding the outbreak of the Holy

Wars. In this way **an** impression has been gained of certain other sides of Zoroaster's character and activity, especially the practical side which his nature probably also had. The material from which to judge of these points, however, is found to be rather meagre. Finally, special attention has also been devoted to the subject of the spread of the fire-cult by Zoroaster and the work which was accomplished in founding new Atash-gahs or in reestablishing the old Pyraea. But all these events did not come to pass without a struggle; nor were the actual results achieved without a hard fight. If the Faith which Vishtaspa has adopted is to become the state creed of the realm, this is not destined to come to pass without a struggle, especially with powers outside. Warfare is inseparable from crusading; and we see gathered in the horizon the clouds of the storm about to burst over Iran.

CHAPTER IX

THE HOLY WARS OF ZOROASTRIANISM

THE LAST TWENTY YEARS OF ZOROASTER'S LIFE

'Fight the good fight of faith.'
— TIMOTHY I. 6. 12.

INTRODUCTION — RELIGIOUS WARFARE IN THE AVEBTA — AREJAT-ASPA, OR ARJASP AND THE HOLY WARS — OUTBREAK OF HOSTILITIES; CAUSES AND DATES — ARJASP'S ULTIMATUM — His FIRST INVASION; THE HOLY WAR BEGINS — ARJASP'S ARMY AND ITS LEADERS — VISHTASP'S ARMY AND ITS COMMANDERS — BATTLES OF THE FIRST WAR — ISFENDIAR AS CRUSADER, AND THE FOLLOWING EVENTS — ARJASP's SECOND INVASION; THE LAST HOLY WAR — SUMMARY

Introduction. — Up to this point it might appear as if the progress of the Religion had been one only of success and smooth advance. Such, however, cannot have been the case in reality. We have to do with a church militant, and there is evidence, in its history, of more than one hard-fought battle before victory is achieved. Not all conversions were easily made. The sword rather than the olive-branch would be the more suitable emblem to deck the earlier pages of the history of the Faith.

Owing to circumstances the development **of** the idea **of** universal peace and of general good-will towards neighbors was **not** allowed to play so important **a** part as it might have played theoretically in the first stages of the new Religion. **When** crusading **for** the Faith began, bitter struggles and **antipathies soon** came **into** existence. **The** war-cry of creed ***verms*** **unbelief begins to fill** the **air. Old political and**

national feuds take on a new color — the tinge of religious antagonism. This **latter statement is** especially **true of the** ancient enmity between **Iran and Turan. This breaks out** afresh in the form of a war of creeds between **the Hyaonian** leader Arejat-aspa, as he is called in the Avesta, **or** Arjasp **of** Turan, as he is later generally styled, and the pious hero of Zoroastrianism, Kavi Vishtaspa (Vishtasp, Gushtasp). Victory ultimately attends upon the Creed **of the Fire and** the Sacred Girdle, but the stages of progress have **to** be **fought** step by step. Bloodshed and distress **precede** success **and** triumph.

Religious Wars in the Avesta. — Before **turning to the** great Holy Wars against Arejat-aspa, we must first notice that the Avesta also records several other violent conflicts which **are** looked upon in the light of hallowed warfare against unbelief. The Avesta mentions some eight powerful foes over whom Vishtaspa, or his gallant brother Zairivairi (Zarir) invoke divine aid in battle, and victory descends upon their banners in answer to their prayers. We know at least the names of these vanquished warriors, for they are given in the Yashts. We read of Tathryavant and Peshana,[1] Ashta-aurvant, son of Vispathaurvo-ashti,[2] Darshinika and Spinjaurusha[3] and of Peshocingha and Humayaka.[4] All are spoken of as infidels, heathen, heretics, or unbelievers. The details of the battles against them are unfortunately lost. In point of time some of these occurred in the period of conversions already described. From the claims of the sacred text we know that victory waited upon the faithful.

Arejat-aspa (Arjasp) and the Holy Wars. — The inveterate foe and mortal enemy of Vishtaspa, however, is Arejat-aspa (Arjasp), or the infidel Turk, as later history would have styled him. He stands as the great opponent of the national Faith, and we are fortunate in having considerable traditional

information preserved regarding these wars with him. They are of paramount importance in the history of Zoroaster and his Creed, and they require fuller discussion. Details of the campaigns may be gathered from the Avesta, the Pahlavi writings, the Shah Namah, and from some allusions in Arab chroniclers. The account given in the Shah Namah dates from the tenth century of our era, and it is partly by the hand of Firdausi's predecessor, Dakiki, as Firdausi himself expressly states when he describes the thousand lines which he had received from Dakiki in a dream — the thousand lines relating to Zoroaster and Gushtasp and the founding of the Faith.[1] The principal references are here collected and presented for convenience.[2]

The warfare against Arejat-aspa is known in the Pahlavi writings as 'the war of the religion.'[3] In the Avestan and Pahlavi texts Arejat-aspa (Arjasp) is the leader of the hostile folk known as Hyaonians (Av. H'yaona, Phl. Khyon). This nation has rightly or wrongly been identified with the Chionitae of the classics. This subject is more fully discussed below in Appendix IV. In any event Arejat-aspa stands for the head

of the chief inimical power among the heathen ; the Shah Namah regards him as the head of Turan, Turkestan, China.

We have evidence of two distinct invasions by Arjasp's forces, although the Avesta does not make clear the fact that there were two wars. The Pahlavi texts are not so explicit on the subject as are the Shah Namah and some works, but the traditional dates which cover a period of seventeen years, as given by the Pahlavi writings, allow the inference of the two wars or two invasions. Both these religious conflicts result in victory for Iran ; yet not without severest loss for a time. In the first war, Vishtaspa's brother Zairivairi (Zarer, Zarir) and the latter's son Bastavairi (Bastvar, so read for Nastur)[1] are the heroes of the fight; in the second war, Vishtaspa's son Isfendiar, by his deeds of marvellous prowess, eclipses even the glory of these two heroic combatants. It seems appropriate to give some description of these wars and some discussion of the subject because of its bearing upon the early history of Zoroastrianism. The sources have already been mentioned (pp. 5, 38); truly to appreciate the subject one ought to read the accounts of tradition, or of fiction as some may prefer to call it, in the Yatkar-I Zariran and in the Shah Namah, which have been oftenest drawn upon. Here there is space merely to give excerpts from their descriptions or to give an outline of their contents.

Outbreak of Hostilities; Causes and Dates. — If we accept the date given by the Zoroastrian tradition, which belongs to the time of the Sassanidae, it was some seventeen years after Vishtaspa's conversion that the war against Arejat-aspa (Arjasp) broke out. The Pahlavi selections of Zat-sparam state that ' in the thirtieth year (of the Religion) the Khyons arrive, who make an incursion into the countries of Iran.'[2] On the basis of traditional chronology, as worked out by Dr. E. W. West,

[1] These names belong to the Avesta, and the Pahlavi, and the Shah Namah.

[2] Zsp. **23. 8, tr. West, *SBE.* xlvii.** 165.

we may place this event in the year B.C. 601.[1] The Shah Namah likewise shows that, after the conversion of the king, some time must have elapsed before the great war began.[2] The day of the final battle of this war, it may be added, is given by the Yatkar-i Zariran as Farvadin[3]

As for causes, the ostensible ground for the original difficulty was found in Vishtasp's refusal to continue the payment of tribute and revenue to Arjasp and in the latter's consequent and persistent pressing of his demand. So much, at least, for the pretence. The actual ground for difficulty, however, seems to have been the religious difference ; for Vishtasp's adoption of the new Faith really lies at the basis of the trouble. The religious question is certainly mixed up with the tribute matter. Perhaps one could hardly expect the two to be separated. The affair of the tribute is recorded in the Pahlavi Dinkart as well as in the Shah Namah.[4] On the other hand, the Yatkar-i Zariran makes the religious issue the main one.[5] In the Shah Namah, when the question comes up, Zoroaster appears practically in the position of a cardinal vested with regal power and wielding a vigorous hand in matters of state. He urges Gushtasp (Vishtaspa) absolutely to refuse payment of the tax. The great Priest's personal interest in the political situation and problem to be settled is evidently largely governed by religious motives ; Arjasp, it is known, had declined to accept the true Faith.[6] In the Prophet's eyes, therefore, Turan is destined to be damned. Accordingly it is the Powers of Hell itself that rise up to inflame Arjasp's fury against Iran. The Dinkart

[2] Cf. Shah Namah, ed. Vullers-Landauer, iii. 1500, *candi rozgdr,* and Mohl, iv. 293, 'quelque temps.' Note also that Zoroaster is now spoken of as 'old' *(pir)* ; according to tradition he would have been sixty at the time. The Yatkar hardly implies the lapse of so long an interval, and it makes Zaratusht play a lesser part than Jamasp who seems rather to be the religious adviser of the king.

believes that no less a personage than Aeshma, the demon of Wrath, conveyed clandestinely to Arjasp the tidings of Vishtasp's fixed and unswerving refusal. The statement tells the whole story: 'When Vishtasp, accepting the religion, praises righteousness, the demons in hell are disabled; and the demon Aeshm (Av. Aeshma) rushes to the country of the Khyons and to Arjasp, the deadly one of the Khyons, because he was the mightiest of tyrants at that time; and the most hideous of all, of so many of them in the country of the Khyons, are poured out by him for war.'[2]

Arjasp's Ultimatum. — Arjasp forthwith makes a formal demand in writing and states the conditions upon which alone he will remain at peace; and he adds an ultimatum to the effect that Gushtasp (Vishtaspa) must abandon the new creed or be prepared to have the country of Iran invaded within two months.[2] The authority for these statements is to be found in the Yatkar and in the Shah Namah; the details of the messages, whether fictitious or actual, are preserved in their purport and intention, at least, in these same works. The names of the two messengers whom Arjasp despatches to convey this decisive letter have been preserved as Vidrafsh and Namkhvast of the Hazars.[3] The problem of the location of Arejat-aspa's kingdom and of the Hyaonians of the Avesta has already been alluded to and it is more fully discussed below in Appendix IV.[4] Here we shall only note that the Shah Namah locates the Turanians on the other side of the Oxus and makes Arjasp despatch his envoys from the city of Khallakh or Khallukh to Vishtasp in Balkh. Although Zoroaster was the chief

instigator of the trouble between the two rulers,[1] it is not unnatural, perhaps, that we find Jamasp assuming the chief role as counsellor, for he was prime minister, chancellor, and grand vizir.[2] On the receipt of the arrogant message, Vishtasp's warlike brother Zarir (Av. Zairivairi, Phl., Mod. P. Zarer, Zarir) at once steps forward and boldly hurls defiance in the face of Arjasp's messengers ; he endites in response a stern letter, to which the king gives approval, and he hands it to the envoys to deliver on their return.[3] War is forthwith declared.

First Invasion of Arjasp, and the Holy War.—The Dinkart states that the missing Vishtasp-sasto Nask of the Avesta contained an account of ' the outpouring of Arjasp the Khyon, by the demon of Wrath, for war with Vishtasp and disturbance of Zaratusht; the arrangements and movements of King Vishtasp for that war, and whatever is on the same subject.'[4] This brief but clear outline makes us regret the more keenly the loss of so interesting a book of the Avesta. But doubtless considerable of the material has actually been preserved, as in other cases, in the Pahlavi and later Persian literature ; and this fact lends more weight to the statements of the Pahlavi Yatkar-i Zariran and of the Shah Namah as being actually based on old foundations and therefore worthy of real consideration. This should be kept in mind in the following pages and in the descriptions which they present.

The Yatkar-i Zariran and the Shah Namah both give vivid pictures, with imaginative coloring, of the marshalling of the forces and the numbers of the opposing hosts. As is common even in modern historical records, the estimates of the number of men actually under arms differ considerably. For Arjasp's

army one section of the Yatkar gives the number as **131,000** men.[1] The Shah Namah is not so explicit, but puts the forces of the two wings of Arjasp's host, and of the reserve, at 300,000, without including the main body of the army.[2] On the other side Vishtasp's army is actually estimated by the Yatkar at 144,000 men,[3] although it once speaks as if the number were innumerable;[4] whereas in the Shah Namah the strength is merely stated in a vague way as 1000 x 1000.[6]

Arjasp's Army and its Leaders. — The tradition upon which Firdausi, or rather Dakiki, based his poetic chronicle is consistent throughout with respect to making the city of Khallakh the place from which Arjasp set out upon his campaign. Again we miss the lost Vishtasp-sasto Nask of the Avesta alluded to above! The poet is even able to give the order in which Arjasp arranged his troops for the invading march. This .differs considerably from the actual plan of marshalling his forces and commanders when in battle array; but even a poet would recognize the likelihood of changes and alterations according to the exigencies of the campaign and situation. On the march the troops were disposed of in the order given in the diagram on page **110.**[6]

The advance guard is entrusted to Khashash. The two wings are assigned respectively to Arjasp's own brothers Kuhram and Andariman (cf. Av. Vandaremaini) with three hundred thousand picked men. The chief in command is given to Gurgsar, while the flag is entrusted to Bidrafsh. Arjasp himself occupies the centre for safety and convenience; and Hushdiv brings up the rear.

As already noted, the above line of march, however, differs

from the arrangement of the forces in action on the field of battle. According to the picturesque account which is given in the Shah Namah, we can imagine Arjasp's forces drawn up in battle array in the manner indicated below. From the descriptions of the engagement it is evident that in Oriental fights, as often elsewhere, single deeds of great daring by brilliant leaders gain the day rather than combined efforts and the manoeuvring of massed troops. We may conceive of the fortunes of the battle as guided by Ormazd and by Ahriman. The description in the Shah Namah may indeed be poetic or journalistic, but it is worth reading, and the array of the enemy appeared as follows:[1] —

Bidrafsh and Gurgsar are given charge of the two wings with 100,000 men each. Namkhvast with picked troops has

the centre where Arjasp himself is stationed.[1] The reserve of 100,000 men is disposed in such a way as to support all the divisions. This time Kuhram[2] guards the rear, whereas Hushdiv had held that position on the invading march. Among Arjasp's leaders only two are really known to fame in the conflict: these are Namkhvast and Bidrafsh.[3]

Vishtasp's Army and its Leaders. — The strength of Vishtaspa's forces has already been mentioned. The three principal heroes who win renown on the Iranian side are, first, Vishtasp's intrepid brother, the valiant Zarir (Av. Zairivairi, YZ. Zarer, ShN. Zarir);[4] second, the latter'sson Bastvar (Av. Bastavairi, YZ. Bastvar, ShN. Nastur);[5] and third, Vishtaspa's own glorious son Isfendiar (Av. Spento-data, YZ. ShN. Isfendiar).[6] In the Yatkar, mention is likewise made of another of Vishtaspa's brothers, named Pat-khusrav,[7] and also of a favorite son of Vishtasp whose name apparently is Frashokart or Frashavart.[8] The Shah Namah furthermore mentions Ardashir, who is a son of Vishtaspa, Shero or (according to Mohl)

[8] YZ. §30 (text corrupt), 39, 44. As the MS. at § 30 is corrupt (cf. Geiger, p. 75), one might think of A v. FrashCkara (Yt. 13. 102), which is the reading of all good Avestan MSS. *(not Frasho-kardta,* as Geiger, YZ. p. 75); but West (personal communication) thinks they are all the same name. As Frash . . . falls in this battle, we must not (as does Darmesteter, *Le ZA.* ii. 533) confuse him with Farshidvard, of the Shah Namah, who does not fall now, but is slain in the second battle. Possibly it might be Av. Frash-hSmvareta (Yt. 13. 102) if we set aside Darmestetcr's connection with Pers. Farshidvard. In any case Justi, *Iran. Namenbuch,* p. 104 should be consulted.

paigns he is the same ideal hero, *sans peur et sans reproche.* Twenty-two other sons of the family of Vishtaspa are slain according to the Yatkar-i Zariran (§ 29), but this treatise does not seem to take account of the second holy war against Arjasp. The Shah Namah makes the number of Vishtasp's sons that were slain to have been thirty-eight,[1] but this number on the other hand seems to comprise both wars. On the field of battle Vishtasp's troops, according to the Shah Namah, were drawn up as presented in the preceding table.[2] We must regret once more that we have not the missing Vishtasp-sast5 Nask which the Dinkart says described ' the arrangement and movements of King Vishtasp for that war.'

Battles of the First War. — The location of the seat of war in the first great conflict is not wholly clear. The Shah Namah speaks of the Jihun or Oxus — see Map ; the Yatkar-I Zariran seems to allude to Merv (also in the northeast) as the seat, but the text is not precise on the subject. The whole question is discussed below in Appendix IV., reference to which should be made.

It is evident, in this first war, that there were two principal battles, separated by a slight interval; some of the apparent differences and discrepancies between the Yatkar and the Shah Namah are possibly to be accounted for in that way. As to the interval, the Shah Namah recognizes a lapse of two weeks *(du haftah)* between the first attack by Arjasp and the combat which resulted in Zarir's death.[8] As to the action, the Yatkar-I Zariran naturally selects those situations and incidents which bring its hero Zarir into the foreground. Both accounts tell how, on the eve of battle, the sage Jamasp in prophetic vision foresees all the gains and all the losses on each side ; and he foretells to the king the joys and sorrows, the temporary defeat, but final, conclusive, and decisive victory of the following day.[4]

Vishtasp beholds the fight from a **neighboring elevation.**[1] **In the first** action a number fall on **the** side of the Zoroastrian faith. Several of the names may be gathered; they are mostly sons of the king: Ardashir, Ormazd (or Shero), Shedasp, Nevzar, PaJ-khusrav, and Frashavart(?).[2] Most of these are slain by the listful demon Namkhvast. Of all the descriptions, one of the most picturesque, perhaps, is the account of the chivalrous deed of Jamasp's indomitable son Garami (YZ. Garamik-kart). In a moment of critical suspense he rescues the imperial banner by an act of heroism which is all-inspiring, and he saves the gonfalon, holding it between his teeth, and fights till he falls.[3]

The second and decisive battle follows this first sharp engagement after a brief interval. In this action there is no question that the hero is Zarir (Zarer, Zairivairi). He does not fall in open attack, but by an act of stealth at the hand of the sorcerer Bidrafsh, whom he had challenged to mortal combat. Zarir's unfortunate death is gloriously avenged by his young son Bastvar (Nastur) and by the valiant Isfendiar. In the words of the Yatkar-i Zariran, as the battle opens, ' the dashing leader Zarir began the fight as fiercely as when the god of Fire bursts into a hay-rick and is impelled onward by a blast of the storm. Each time as he struck his sword down, he killed ten Khyons ; and, as he drew it back, he slew eleven. When hungry and thirsty he needed only to look upon the blood of the Khyons and he became refreshed.'[4] But treachery, as before stated, undoes the noble knight; he falls, pierced through the heart by a poisoned spear hurled from behind by the magician Vidrafsh (Vedrafsh, Bidrafsh) who is promised the fair hand of Arjasp's daughter Zarshtan as a reward.[6] The hero fallen, Vishtasp now turns and offers his own lovely daughter Humak (Humai)

to whosoever will avenge Zarir's death.[1] The latter's youthful son Bastvar (Nastur), a child in years but a giant in strength and courage, dashes forward and, accompanied by Isfendiar, slays the treacherous Vldrafsh, routs the Turanian hosts, hews them down as he drives them before him, and with Isfendiar's aid sends Arjasp defeated, humbled, mutilated, back to his own capital.[2]

The gallant Isfendlar now grants respite to the vanquished Turanians, which is in keeping with the nobility of his character, although his soldiers, as the poet describes, were inclined to butcher the entire army of refugees.[8] The Shah Namah is able to give the numbers of those who fell in battle. Of Vishtasp's forces the number of the slain is estimated at 30,000 including thirty-eight sons of the king.[4] On Arjasp's side the list of those who were killed is reckoned to be more than 100,000. With the boldness of precision worthy of an epic writer who is giving details, the poet is able to add that 1163 of this number were men of rank, beside 3200 wounded.[5] Terms of peace with religious stipulations are entered into and the first great victory of Zoroastrianism is achieved.

The war over, Vishtasp marches back through his own country of Iran to the city of Balkh, to celebrate the victory. In Persian fashion he is said to have given his daughter Humai to the intrepid Isfendlar,[6] and he assigns to this young hero Bastvar (Nastur) an army of 100,000 picked soldiers, bidding him to advance toward Arjasp's capital, Khallakh, in order to complete the conquest. One other son, Farshidvard,[7] is made suzerain over Khorassan, the territory which afterwards becomes famous as a seat of the second holy war against Arjasp. Vishtasp himself next founds a new fire-temple and makes Jamasp

high priest over it. His final and most important act for the Religion is to depute the dauntless Isfendiar upon **a** hallowed mission, a great crusade to foreign lands, enjoining upon him to convert all peoples and nations to the Faith of Zardusht. When this is accomplished he promises to recompense the valiant crusader and dutiful son by awarding him the crown and throne of Iran.

Isfendiar as Crusader, and the Following Events. — Tradition tells how fortune favors the gallant knight. So successful is his pious zeal, according to the Shah Namah, that the countries even of ' Rum and Hindustan' are among those who despatched messengers to Vishtasp, requesting to have 'the Zend-Avesta of Zardusht' sent to them. Vishtasp eagerly complies with the request and sends a copy of the bible to every land.[1] An allusion to the Dinkart of crusading efforts in the direction of ' Arum and the Hindus' in connection with the name of Spenddat (Isfendiar) has already been noticed above.

There must have been a considerable lapse of time for all this to transpire, and a number of the events narrated in the chapters on conversions and the spread of the Religion perhaps belong here.[2] The interval of peace at home was doubtless used to advantage ; and possibly about this time the Avesta was written down by Jamasp from the teachings of Zoroaster as referred to in the Dinkart.[3] All goes well. Each effort of Isfendiar is divinely crowned, and at last he feels himself entitled by his successes to turn to his father with the expectation of receiving the crown according to the royal promise. But he receives it not. A mischievous brother, Kurazm (Av. Kavarazem, Yt. 13. 103)[4] with lying lips calumniates the valiant hero to his father. Isfendiar is rewarded by being

thrown into chains and imprisoned upon **a** mountain in **the** fortress citadel of Gumbadan in Khorassan or Mount Spento-data of the Avesta and Bundahishn as described below in Appendix IV. The Shah Namah goes on to tell how King Vishtasp (Gushtasp) leaves Balkh shortly after this incident and goes for ' two years' **to** Seistan and Zabulistan to visit Rustam.

It is at this point in the Shah Namah that the narrative of Firdausf s predecessor Dakiki is stated to end, and the story is taken up by Firdausi himself. This fact may account for certain differences of view and manner of treatment which are noticeable.[1]

Arjasp's Second **Invasion; the Last Holy War.** — The chronicle of the Shah Namah, as poetic history, seems to allow some years to elapse between the invasions of Arjasp as already mentioned, and the traditional Zoroastrian chronology bears out this fact if we combine the dates which may be gathered.[2] The state of affairs in Iran begins to assume a different aspect. The Turanian Arjasp, taking advantage of Isfendiar's im-prisoment, reunites his forces and prepares to strike a blow of retaliation upon his former conqueror. Once more he invades Iran and the second war begins. The tradition which Firdausi follows is claimed by him to be ancient. It is curious, how-ever, in some of its details, and it presents an odd picture of the management of a kingdom. Vishtasp's absence from his capital seems to have left Balkh weakened or unprotected. Arjasp successfully storms the city ; the aged Lohrasp falls in the fight before the city walls;[3] the temple of Nush-Adar is sacked and destroyed; the priests are slain in the very act of their pious worship ; the sacred fire is quenched by their

[2] The date of Zoroaster's death is set at B.C. 583, and this is supposed to have occurred during the Turanian invasion, as discussed in the next chapter.

hallowed blood; and, worst of all, the Prophet Zardusht falls a martyr **at** the hands of the murderous and fanatical invaders of Turan, as he stands in the presence of the altar's holy flame which the Faith so devoutly cherished. The details of these particular circumstances are given more fully in the next chapter, together with some additional traditions regarding Zoroaster's death. This sad event serves to place the date of the second war at about B.C. 583 on the basis of the Bundahishn chronology.[1]

Events now follow in rapid succession. Vishtasp learns in Seistan of the death of Lohrasp and of the martyrdom of Zoroaster. He hastens to join forces with his son, Farshidvard of Khorassan. The Shah Namah states that Vishtasp took the route towards Balkh, but from its description and from a Pahlavi allusion to the 'White Forest,' as discussed hereafter, it appears that Vishtasp joined Farshidvard in Khorassan, of which the latter was suzerain. We may recall here that Firdausi himself was a native of Khorassan and he must have been familiar with the tradition. The question of the scene of this opening battle is entered into more fully below in Appendix IV. So it need not be discussed here. We need only follow Firdausi's brief description of the drawing up of the opposing lines, and if we glance at Khorassan on the Map we shall have an idea, at least traditionally, of the battlefields on which the final victory of Zoroastrianism was won.

Alas ! the valiant Isfendiar is no longer in command of the host that is fighting for the Avesta and the Faith of Iran. The princely Farshidvard receives a wound that shortly proves fatal. Vishtasp is routed, and he finds refuge only in **the** region of Nishapur or of the Jagatai chain, as discussed in detail below, Appendix IV. The Iranians are beleagured on a lonely height; the Faith of Zoroaster seems about to totter and fall before the hated Arjasp and Turan. But Isfendiar is

[1] **See note above, and compare West, *SBE.* xlvii. Introd. § 65, and Appendix III. below.**

once more the saviour of the hour. In the dire emergency it is universally felt that the captive prince, chained within the fortress which even in the Avesta has given his name to the

mountain, can save the State from its impending overthrow. According to the Chronicle, Jamasp secretly visits Isfendiar,

and finally induces him to forget his cruel wrongs and to preserve his country from the certain ruin that hangs over it. Freed from the galling shackles, he hastens to the rescue and leads the hosts of Zoroastrianism once more to victory. Under the inspiration of his command a final battle is begun. Isfendiar receives full power and sway. The only change in the organization of Vishtasp's forces, as noted in the Shah Namah, is that Gurdde (Kerdul) succeeds to the place of Farshidvard, who had died from the fatal wound received in the preceding fight, and Bastvar (Nastur) consequently occupies the right wing.[1] Arjiisp's troops are marshalled in a manner differing but slightly from that before adopted. The disposition of the armies, as given by Firdausi, is shown in the diagram on page 122.

Isfendiar wins a complete and signal victory. Arjasp flees back to Turan. But no quarter this time is granted. His country is mercilessly invaded by the invincible Isfendiar, his capital stormed and taken, and he himself is finally slain. The Dinkart likewise in one passage seems to contain an echo of the note of exultation over this event.[2] Victory rests everywhere upon the banners of Iran and upon the triumphant standards of Zoroaster's Faith.

Thus closed the second invasion of the great Holy War, which really served to establish the future of Zoroastrianism, for the Faith gained strength from the shock it withstood and the power it overcame. According to tradition, victory led to other attempts at universal conversion, but not all were unqualifiedly successful. The gallant Isfendiar, so zealous ever for the cause, is himself ultimately slain in single combat with Rustam, whom he sought to convert to the creed in accordance with King Vishtasp's urgent desire and his own unflagging readiness for crusading. The story which Firdausi tells of

of Zoroaster's Faith, at least so far as we can gather history from sources which are chiefly chronicles. In the A vesta and in the Pahlavi writings Arejat-aspa is a Hyaonian (Av. H'ya-ona, Phl. Khyon); in the Shah Namah and elsewhere he is understood to be a Turanian. Both designations apparently amount ultimately to the same thing. Furthermore, according to tradition, there were two separate wars or invasions by Arjasp, although the earliest accounts do not make this point wholly clear. If we accept the Zoroastrian chronology based upon the Pahlavi Bundahishn, the defeat of Arjasp in the first war must have occurred about B.C. 601. The principal battle of this war was the fight in which King Vishtasp's brother Zarir was slain. A considerable interval, nearly twenty years, is believed to have elapsed before Arjasp began his second invasion. The date of this event is placed by the tradition as about B.C. 583, the year being given by the death of Zoroaster which seems to have occurred at this time. The amphitheatre in which the final engagements in this war took place appears to be Khorassan. Isfendiar, the great crusader, wins the final victory that establishes the Faith of Iran on a firm foundation, even though Zoroaster is no longer living to enjoy the fruits of triumph.

CHAPTER X

THE DEATH OP ZOROASTER

THE END OF A GREAT PROPHETIC CAREER

' Shall the priest and the prophet be slain in the sanctuary of the Lord ?'
— LAMENTATIONS 2. 20.

INTRODUCTION — GREEK AND LATIN ACCOUNTS OF ZOROASTER'S DEATH BY LIGHTNING OR A FLAME FROM HEAVEN — THE IRANIAN TRADITION OF HIS DEATH AT THE HAND OF AN ENEMY — CONCLUSION

Introduction. — Those who have read Marion Crawford's novel 'Zoroaster' may perhaps recall the graphic scene describing the death of the Prophet of ancient Iran, with which the romance closes. Whatever may have been the novelist's source of information — if he had any source beyond his own vivid imagination — his picture is so well drawn that it seems real, and it may possibly not be so far, after all, from the truth. There is no authority, however, for believing that Zoroaster's death took place at Stakhar (Persepolis); but there is ground for believing that he may possibly have been slain while at worship in the sanctuary. Traditions on the subject differ; but it is the purpose of this chapter briefly to bring together the material that is accessible on the question of Zoroaster's death.

Greek and Latin Accounts of Zoroaster's Death. — From the fate of Empedocles we are not surprised to find a miraculous departure attributed to a great sage; and the Greek and Latin patristic writers give a fabulous account of the passing of Zoroaster. His is no ordinary end; he perishes by lightning or a flame from heaven, which recalls the descent of the fiery chariot and the whirlwind in the apotheosis of Elijah. For

such a description our principal source is the Pseudo-Clementine *Recognitiones* and the spurious Clementine *Homilies* whose statements are followed by later writers. All these passages are given in Appendix V., so they are simply summarized here.[1]

(a) A passage in the *Clementinae Mecognitiones* (dating about A.D. second century, and existing in the Latin translation of Rufinus),[2] identifies Zoroaster with Ham or Mesraim of the family of Noah, and anathematizes him as a magician and astrologer. To deceive the people, it is said, he was wont to conjure the stars until finally the guardian spirit or presiding genius of a certain star became angry at his control and emitted a stream of fire in vengeance and slew the arch-magician. But the misguided Persians deified the ashes of his body consumed by the flame, and they gave adoration to the star which had thus charioted him into the presence of God. Hence after his death he received the name Zoroaster, that is, 'living star,'—an interpretation by those who understood the Greek form of his name to have this meaning![3]

(b) The statement in the spurious Clementine *Homilies*[4] differs but slightly. Zoroaster is identified with Nimrod, who, in the pride of his heart, seeks for universal power from the star, whereat the lightning falls from heaven and Nimrod is destroyed, and he accordingly receives the surname Zoroaster for the 'stream of the star': **Ζωροάστρης μετωνομάσθη, διὰ τὸ τὴν τοῦ ἀστέρος κατ' αὐτοῦ ζῶσαν ἐνελθῆναι ῥοήν.** But the Persians, it is added, built a temple over the remains of his body and cherished the sacred flame that came from the

(c) Gregory of Tours (A.D. 538-593)* repeats the identification of Zoroaster with Ham (Cham, or Chus) and records the etymology of his name as 'living star,' stating that the Persians worshipped him as a god because he was consumed by fire from heaven. See Appendix V., § 37.

(d) The *Chronicon Paschale* or *Chronicon Alexandrinum* (last date A.D. 629)[3] makes Zoroaster foretell his fiery death, and bid the Persians to preserve the ashes of his charred bones. As he is praying to Orion, he is slain by the descent of a heavenly shaft, and the Persians carefully keep his ashes down to the present time. See text in Appendix V., § 39.

They all look upon Zoroaster as an astrologer who perished by a shaft from heaven, and they usually interpret this as a mark of divine displeasure.

It might be added, simply by way of greater completeness, that Orosius (A.D. fifth century) *Hist.* i. 4 (col. 700, ed. Migne) follows the current later classical story about Ninus and Zoroaster, and adds that Ninus conquered and killed him in battle, which perhaps is an echo of the war against Arjasp.[1]

The Iranian Tradition of Zoroaster's Death. — Passing from the realm of fanciful legend to the more solid ground of tradition we have a very persistent statement in the later Zoroastrian sacred writings regarding the death of the Prophet, even if, for reasons to be easily understood, that event is not mentioned in the A vesta itself.[2] This tradition with absolute uniformity makes his death to have occurred at the age of seventy-seven years, and ascribes it to a Turanian, one Bratrokresh.[8] Whether this occurred at the storming of Balkh or under other circumstances, will be discussed below. For the latest accessible material on the subject we may refer especially to West, *SBE.* xlvii. According to the Pahlavi selections of Zat-sparam, Zoroaster passed away at the age of seventy-seven years and forty days in the 47th-48th year of the religion, or B.C. 583, of the Iranian chronology.[4] The month and the day are specifically named, as will be recorded below. The statement of his age being seventy-seven years is repeated elsewhere[5] and the name of his murderer occurs a number of times as the following passages will show.

(a) The Selections of Zat-sparam, 23. 9 (West, *SBE.* xlvii. 165) contain the following entry: ' In the forty-seventh year

(of the Religion) Zaratusht passes away, who attains seventy-seven years and forty days, in the month Artavahishto, on the day Khur; and for eight rectified months, till the month Dadvo and day Khur, he should be brought forward as to be reverenced.' The day of his death, according to tradition, is the day Khur in the month Artavahishto, on the eleventh day of the second month of the Zoroastrian year.[1]

(b) In Dinkart, 7. 5. 1 (West, *SBE.* xlvii. 73) we read, [4] About the marvellousness which is manifested from the acceptance of the Religion by Vishtasp onwards till the departure *(vlxezo)* of Zaratusht, whose guardian spirit is reverenced, to the best existence, when seventy-seven years had elapsed onwards from his birth, forty-seven onwards from his conference, and thirty-five years onwards from the acceptance of the Religion by Vishtasp.'

(c) Dinkart, 7. 6. 1 (West, *SBE.* xlvii. 77) speaks, among other miracles, ' About the marvellousness which is manifested after the departure *(vixezo)* of Zaratusht, whose guardian spirit is reverenced, to the best existence (i.e. Heaven), and manifested also in the lifetime of Vishtasp.'

(d) Datistan-I Dinik, 72. 8 (West, *SBE.* xviii. 218) states that among the most heinous sinners, 'one was Tur-i Bratarvakhsh, the Karap and heterodox wizard, by whom the best of men [i.e. Zaratusht] was put to death.' If this be the same Karap that plotted against Zoroaster as a youth, it would imply an extraordinary longevity (p. 28, n. 4).

(e) Dinkart 5. 3. 2 (West, *SBE.* xlvii. 126) mentions among the events in the history of the Religion, 'the killing of Zaratusht himself by Bratro-resh.' See also the note by Darab D. P. Sanjana in Geiger's *Eastern Iranians,* ii. p. 216. Compare likewise Dinkart translated by Peshotan Dastur Behrainjee

Sanjana, vol. vii. p. 485: 'Among wicked priests the most wicked was Tur-e-Baratrut (i.e. Tur-i Bratar-vakhsh) of evil nature and desirous of destroying Zarthusht's faith.'

(f) The Great Iranian Bundahishn in a passage cited and translated by Darmesteter *(Le ZA.* ii. 19, cf. also iii. Introd. lxxix.) describes the demon and wizard Malkos, who shall appear at the end of a thousand years to bring distress upon the earth, as a manifestation of ruin springing 'from the race of Tur-i Bratrok-resh who brought about Zaratusht's death.'[1]

(g) The Persian prose treatise Sad-dar, 9. 5 (West, *SBE.* xxiv. 267) includes among the list of sinners who are on a par with Ahriman, the same 'Tur-i Bratar-vakhsh who slew Zaratusht.' The metrical Sad-dar repeats it also (Hyde, *Hhtoria Religionis,* p. 441).

(h) The Pahlavi Bahman Yasht, 2. 3 (West, *SBE.* v. 195) alludes to the same tradition, for when Zaratusht in a vision asks immortality of God, Auharmazd declines it, responding thus: 'When (i.e. if) I shall make thee immortal, O Zaratusht the Spitaman! then Tur-i Bratar-vakhsh the Karap will become immortal, and when Tur-i Bratar-vakhsh the Karap shall become immortal, the resurrection and future existence are not possible.'

The Pahlavi-Parsi tradition is therefore unanimous that Zoroaster perished by the hand of Tur-i Bratar-vakhsh or Bratrok-resh, but it gives no specific details. Firdausi must be following an Iranian tradition in keeping with this when he assigns this event to the time of the Turanian invasion of Iran, and ascribes Zoroaster's death to the storming of Balkh and the destruction of the temple Nush-Adar. Other Persian writers seem to accept the same tradition. The extracts are given.

(i) Shah Namah, ed. Vullers-Landauer, iii. 1559 graphically describes the final scene. I give a version of it, following Mohl iv. 363 and Vullers, *Fragmente,* 103: 'The army (of Turan) there-

[1] ***Malkos sej-cihari min toxmak-l Tur-i Bratrdk-res, i os Zaratust yahvunt; see Darmesteter.***

upon entered Balkh, and the world became darkened with rapine and murder. They advanced toward the Temple of Fire *(ataskadah)* and to the palace and glorious hall of gold. They burned the Zend-Avesta entire and they set fire to the edifice and palace alike. There (in the sanctuary) were eighty priests whose tongues ceased not to repeat the name of God ; all these they slew in the very presence of the Fire and put an end to their life of devotion. By the blood of these was extinguished the Fire of Zardusht. Who slew this priest I do not know.'[1] The story is told over again, a few lines farther on, where the messenger bears to the absent Vishtasp the awful news of the sacking of the city, the death of Lohrasp, 'the king of kings,' and the slaying of the Sage or Master *(rad),* by which none other than Zardusht is meant. The lines run (cf. Vullers-Landauer, iii. 1560, and Mohl, trad. iv. 364): ' They have slain Lohrasp, the king of kings, before the city of Balkh ; and our days are darkened and full of trouble. For (the Turks) have entered the temple Nush-Adar and they have crushed the head of the Master (Zardusht) and of all the priests ; and the brilliant Fire has been extinguished by their blood.'

(j) The prose chronicle Shah Namah Nasr, which Hyde terms an abstract of Firdausi made by some Magian,[2] states similarly with reference to this event: 'They say that when Arjasp's army invaded Iran, Lohrasp left the place of divine worship as soon as he learned of this, and took to the field of battle. He killed a great many, but he himself was slain, together with eighty priests (who were in the temple at Balkh Bami). The fire was quenched by their blood; and among the number of the eighty priests was Zardusht the prophet, who also perished in this war.'[3]

(k) The later Persian work Dabistan (beginning of 17th

century A.D.), claims that its statement is based upon ancient Iranian authority and gives a picturesque description of the manner in which the martyred Zoroaster avenged himself upon his slayer Turbaraturhash (i.e. Tur-I Bratar-vakhsh) by hurling his rosary at his murderer and destroying him. Or as the passage reads: 'It is recorded in the books composed by Zar dusht's followers, and also in the ancient histories of Iran, that at the period of Arjasp's second[1] invasion, King Gushtasp was partaking of the hospitality of Zal, in Seistan, and Isfendiar was a prisoner in Dazh Gumbadan; and that Lohrasp, notwithstanding the religious austerities he performed through divine favor, laid aside the robes of mortality in battle, after which the Turks took the city. A Turk named Turbaratur, or Turbaraturhash,[2] having entered Zardusht's oratory, the prophet received martyrdom by his sword. Zardusht, however, having thrown at him the rosary *(Shumar Afin* or *Yad Afraz)* which he held in his hand, there proceeded from it such an effulgent splendor that its fire fell on Turbaratur and consumed him.'[3]

(l) Two other late Persian passages imply that Zoroaster's end was violent. Both of these are noticed by Hyde, from whom they are adopted here.[4] The first is from the Persian historian Majdi (A.D. sixteenth century), who, after mentioning the dreadful invasion of Arjasp and the death of the priests in the temple of Balkh, goes on to say: ' He quenched the fire of Zardusht with the blood of the Magi; and some one from Shiraz then slew Zardusht himself.'[5]

(m) The second of these two passages is an allusion found in the Farhang-i Jahangiri, which apparently refers to the day of Zoroaster's death as well as to the day on which he first undertook his mission to Vishtasp, for the dates resemble those

in Pahlavi sources as already described. The sentence reads: ' On the thirtieth day, Aniran, he entered Iran (or Persia), and on the fifteenth day, Deybamihr, he departed in sorrow from Iran.' Hyde, p. 325, seems rightly to have interpreted the allusion thus, and he should be consulted in connection with pp. 40, 128, above.

Conclusion. — The accounts of Zoroaster's death by lightning or a flame from heaven, as found in Greek and Latin patristic literature, seem to be legendary. According to Iranian tradition his death was violent, and it occurred at the hand of a Turanian whose name is preserved to ill-renown. Whether his martyrdom took place in the temple when Balkh was stormed, as later Iranian writers all state, cannot positively be asserted, although such may have been the case.

THE SEQUENCE OF EVENTS AFTER ZOROASTER'S DEATH

INTRODUCTORY STATEMENTS ; THE COURSE OF EVENTS — TnE FIRST TEN YEARS AFTER ZOROASTER'S DEATH — EVIDENCE OF FURTHER SPREAD OF THE RELIGION — DEATH OF THE FIRST APOSTLES — LATER DISCIPLES AND SUCCESSORS — PROPHECIES AND FUTURE EVENTS — SUMMARY

Introductory Statements; the Course of Events. — With the great Prophet dead, with the holy flame of the sacred shrine quenched in the blood of the martyred priests, we might have supposed for a moment that the Religion must perish too. Happily, as we have seen, this was destined not to be the case. Fate, circumstances, and merit issued other decrees. We have watched the spark of the altar flame kindling anew; the story of the glorious victories won in hallowed battles for Ormazd has been told; the banner of the Creed waves once more aloft. Little more remains to be chronicled beyond briefly tracing the course which events took in the years that followed Zoroaster's death. In other words, we are presently to enter the realm where actual history goes hand in hand with tradition.

Tradition according to the Bahman Yasht asserts that 'Artashir the Kayan, whom they call Vohuman son of Spenddat,' and whom we know as Ardashir Dirazdast, or the 'long-handed,' is the one who 'made the Religion current in the

whole world'[1] Actual history agrees with this in so far as it shows that Artaxerxes Longimanus, or the 'long-handed,' was an ardent Zoroastrian ruler.[2] From the pages of history, furthermore, we learn that by the time of the last Achaemenians, at least, Zoroastrianism is practically acknowledged to have become the uational religion of Iran. History, alas, has also to chronicle in its memorial chapters the cruel blow which Alexander dealt to the whole Persian empire upon his triumphal march of world-conquest. Tradition again is in harmony in recording how the ' evil-destined' or' accursed Iskander' brought ruin everywhere by his sword, and how he burned the sacred books of the Avesta, the archetype of the bible of Zoroaster, with the treasury of the ancient Persian kings. This last tragic event stands out as the darkest day in the history of Zoroastrianism until its final overthrow by Islam, when the Koran superseded the Avesta and Ormazd gave place to Allah.

But the two centuries or more between the death of Zoroaster and the coming of Alexander are filled by various religious events which the patristic literature of Sassanian times carefully records and which it is proper here to notice in connection with the history of Zoroaster's life. It certainly seems curious that we have no mention of Cyrus nor of the pious Mazda-worshipper Darius, unless we are to understand that the events of their reigns are merged in a general way into the achievements of Isfendiar. This is one of the problems which belong rather to the history of the Religion to discuss. For the years themselves that follow Zoroaster's death' the Pahlavi texts give enough general events or incidents to mark off the periods or epochs in a loose sort of way. The first few years at least are certainly worth recording on the lines of the tradition, and a glance should be taken at the

chronological table in Appendix I I I . , which gives some idea of the current **of** events.

The First Ten Years after Zoroaster's Death.—From tradition we know that King Vishtaspa outlived Zoroaster, **and it** is interesting to see from the assertions of tradition how **the** miraculous events which attended the Prophet's life do **not** cease with his death, but wonders and prodigies still continue to be witnessed during the reign of the patron king. **The** influence of the veil and glamour of the heavenly personage is not yet removed. The first decade after Zoroaster's death was certainly eventful for Vishtasp, and we have a fanciful story told in Pahlavi of a wonder that came to pass and a sign that was manifested, which illustrates that the divine favor has descended upon the king and which symbolizes the progress of the Religion under the guise of a chariot in its onward course.

The Dlnkart narrates how the soul of the old warrior Srito, who had been dead several hundred years, appears again, visits the zealous monarch, and presents to him a wonderful chariot. The chariot instantly becomes twofold in form, the one being spiritual, the other material.[1] And, as the Dlnkart passage continues, 'in the worldly chariot the exalted Kai Vishtasp travelled forth unto the village of the Notars, in the joyfulness of good thoughts; and in the spiritual chariot the soul of Srito of the Visraps travelled forth unto the best existence (i.e. returned again to heaven).'[2] This allegory of the chariot appears to smack somewhat of Buddhism and the Wheel of the Law; and we may also recall a classical tradition which implies Vishtasp's acquaintance with the secret lore of **the** Brahmans, and the legendary wisdom and prophetic vision which was ascribed to Vishtaspa down to mediaeval times.[8]

Evidence of Further Spread of the Religion. — The Dlnkarfc text declares that ' Vishtasp the king, when he became relieved

from the war with Arjasp, sent **to** the chief rulers about the acceptance of the religion, and the writings of the Mazda-worshipping religion, which are studded with all knowledge.' The text then goes on to affirm the rapid spread which the Faith saw by the end of the few years. The seed of the Religion was the blood of its martyrs slain. And so rapid does the progress seem to have been that the text claims as one of the marvels of history, the fact that at the end of fifty-seven years from the first revelation of the Religion, its advent is ' published in the seven regions' of the world, as was described in the lost Spend Nask of the Avesta.[1] All this is supposed to have occurred while Vishtasp still lives. As a proof, moreover, of the general acceptance of the Creed, the same passage adduces the fact of ' the coming of some from other regions to Frash5shtar of the Hvdbas for enquiry about the religion.'[2] Two of the high priests who came on this holy quest from abroad are from the southeastern and the southwestern regions. Their names are given as Spiti and Erezraspa — names which are found in the Avesta.[3] And, similarly, the Apostles went into many lands to preach the Gospel after the death of Christ.

Death of the First Apostles. — Frashaoshtra, Zoroaster's devoted friend, follower, and relative by marriage, lives for a number of years to exemplify the tenets and expound the doctrines of the Master who has 'passed away.' He himself is summoned, as the Zat-sparam selections tell us,[4] some fifteen years after Zaratusht, 'in the month Artavahishto, in the sixty-third year of the Religion.'[6] His distinguished brother Jamasp, the wise Jamaspa, grand vizir of the king, and successor of Zoroaster in the pontifical office of the realm, outlives Frashaoshtra but a year; or, as the selections of Zat-sparam

proceed to chronicle, ' in the sixty-fourth year of **the** Religion passed away Jamasp, the same as became the priest of priests after Zaratusht.'[1] This sage was indeed a Mobed of Mobeds. Then in the seventy-third year he is followed by his son Hangaurush, whose name appears also in the Avesta (Yt. 13.104).[2] Still another event is recorded in the eightieth year of the Faith; this is the death of the pious Asmok-Khanvato (Av. Asmo-hvanvat), as well as that of the wizard Akht, who is killed, and his name also appears in the Avesta as elsewhere.[3]

Later Disciples and Successors. — The same Pahlavi text from which the quotations have been made, furnishes also the names of 'six great upholders of the religion.'[4] These are Zoroaster's two daughters, ' Freno and Srito, with Aharubostoto, son of Metyomah' — three names which appear in the Avesta and which have been given in Chapter II. Next is mentioned Vohunem (Av. Vohu-nemah, Yt. 13. 104), whose birth occurred in the fortieth year of the Religion, or seven years before Zoroaster's death. But most important is Seno of Bust, in the land of Sagastan,[5] who is said to have flourished for a hundred years and to have left behind him, as the sixth prop and support of the Religion, a hundred pupils whose teaching fills the century until the coming of Alexander brought ruin and desolation upon the Faith.[6]

The Greeks likewise recognize a long line of apostles and dis-

ciples, or Magian priests, descending from Zoroaster. Diogenes Laertius (A.D. second and third century) *de Vit Philos.* Procem 2, seems to base his statement on the older authority **of Hermodorus** (B.C. 250) when he states that ' after Zoroaster there were many different Magians in unbroken succession, such as Ostanes, Astrampsychus, Gobryas, Pazates, until the overthrow of the Persians by Alexander.'[1] The Latin writer Pliny employs the name of a Magian, Apuscorus, and he designates as Osthanes the Magian priest who accompanied Xerxes on his great Hellenic expedition and introduced the Magic Art into Greece.[2] And so the chain runs on, link after link in unending sequence; and in spite of the changes and chances of transitory fortune, the line of apostolic succession remains unbroken to the present, down to its representatives to-day in the priesthood that cherishes the sacred flame in the fire-temple of Bombay!

Prophecies and Future Events. — As several times alluded to already, the Pahlavi Bahman Yasht describes an apocalyptic vision in which Zoroaster is supposed to have beheld, unfolded before him, the whole future history of the Religion. The four or seven branches of the tree which rises before his eyes, symbolize emblematically the gold, silver, steel, and iron, or other eras, of the Faith down to the final Millennium, all of which is foretokened. These prophecies are not ancient, however, but they date rather from the times that came after the Mohammedan Conquest, when Zoroastrianism sank before the rising power of Islam. Nevertheless, they sweep in rapid glance the whole history of the Religion and they summarize

the great eras which the Founder himself **in his wise judgment and** prophetic insight might in a general way have forecast **as the** history of nations and of faiths, even though **he did not** express it.

Summary. — Zoroastrianism does not die with its founder. National events have changed the course of its history, but **it** lives on. The occurrences of the years that intervened between the death of the Prophet and the coming of Alexander, so far as they are chronicled by tradition, are worth recording as the result, in a way, of Zoroaster's life, and they are interesting from the standpoint of comparison between tradition and actual history.

CHAPTER XII

CONCLUSION

'Read the conclusion, then.'
— SHAKSPERE, *Pericles*, 1. 1. 56.

AND now the story of the life and legend of the Prophet of ancient Iran — the sage who was born to leave his mark upon the world, who entered upon his ministry at the age of thirty, and who died by violence at the age of seventy-seven — is at an end. Hurriedly we may scan once more the pages of his career. Born in the fulness of time, he appears as a prophet in the latter half of the seventh century before the Christian era, and the period of his activity falls between the closing years of Median rule and the rising wave of Persian power. He himself stands as the oldest type and representative of what we may call, in the language of the Bible, the laws of the Medes and Persians. His teaching had already taken deep root in the soil of Iran when the Jews were carried up into captivity in Babylon and had learned of that law which altereth not, or before a Daniel came to interpret the ominous handwriting on the wall which the soothsayers failed to read. Zoroaster is the contemporary of Thales, of Solon, or of the Seven Sages of classical antiquity. He is the forerunner of Confucius, the philosopher who was to arise to expound to China the tenets of her people's faith. By him is sounded in Iran the trumpet-call that afterwards echoes with a varied note in India when the gentle Buddha comes forth to preach to thirsting souls the doctrine of redemption through renunciation. Zoroaster, finally, is the father, the holy prototype, of those

Wise Men from the East who came and bowed before the new-born Light of the World in the manger-cradle at Bethlehem.

Zoroaster was a Magian ; the Magi, as Herodotus tells us, were a Median tribe. Although he was born in Atropatene in the west, it is not impossible that much of his prophetic careei was spent in the east, in Bactria or in that region of country. We certainly have evidence that the seeds of his teaching found fruitful soil in eastern Iran. Crusading achieved the rest. The story of the Holy Wars between Iran and Turan, the storming of Balkh, the final victories in the great battles of Khorassfm or Bactria, have all been told. The spread of the Creed continues. Media itself doubtless generally accepted the reform of the Prophet. The Median name Fravartish has been interpreted by Justi to mean' Confessor' (i.e. of the Zoroastrian Faith), and has been instanced as a proof of its acceptance, although this appellation seems rather to be an old Magian name, agreeing with the concept *fravasi,* which apparently existed before the Zoroastrian reform. The Magians themselves were known long prior to the time of Zoroaster, as Albiruni (p. 314) expressly states; but, as he adds, in the course of time there remains ' no pure, unmixed portion of them who do not practise the religion of Zoroaster.' This tends to prove how universally the doctrines had found acceptance. The question as to the time when and the manner in which the Faith entered Persia Proper is reserved for discussion elsewhere.

As to the general deductions which have been drawn, we may say that time will doubtless prove or disprove the accuracy or inaccuracy of many of the statements upon which they are based. Some of these may be shown to rest upon a foundation of fact rather than fiction, especially if we may judge from the tendency of recent years in finding confirmation for tradition. Some, however, may be proved to be purely fanciful. We can but gain by the truth in either case. The historic import of

some, moreover, may be shown to be not without interest. In the light of such, perhaps, the current views with regard to the relationship between Zoroastrianism and Judaism may take on a new aspect, particularly if we emphasize the fact that Zoroaster arose in the west, in Atropatene and Media, about the time of the early Prophetic Period of Israel. From the Bible we know that captive Jews were early carried up from Samaria into certain cities of the Medes. From the Avesta, on the other hand, we know that Zoroaster had rung out a trumpet note and clarion cry of reform, of prophecy, and of Messianic promise, before the days of Babylonian Exile.

From our knowledge, too, of contemporaneous history we recall in the current of events that the reputed empire of Bactria, if it existed, had yielded the prestige to Media; and that the sovereignty of Media was swept away before the glorious power of Persia. In Persia, Greece recognized a culmination of the glory of Iran. Though the Greek vanquishes the Persian in battle, he still has stories to tell of Magian wisdom and of Eastern philosophy. Plato, Pythagoras, and other great thinkers are claimed to have emulated the teachings of the Magi; and later Moslem or Zoroastrian tradition asserts that the ancient sacred writings of Iran, the quintessence of all knowledge, were translated into Greek.

And as for imperial times, the Persian wars brought Rome into contact with Zoroastrians, as they had brought the Greeks. A phase of Zoroastrianism known as Mithraism penetrated into Rome and into Western Europe. The rise of the Neo-Platonic school was certainly not without influence from Zoroastrianism, nor without influence upon later Zoroastrianism. The tenets of Zoroastrian Manichseism even disturbed Christian thought for a time. In all such cases the relations doubtless are more or less reciprocal. Even the pages of the Koran and the doctrines of Mohammed are not free from the influence of the Faith which they vanquished by the sword. The spark of the sacred fire has never been quenched; the holy flame continues to

blaze; and the Religion of Zoroaster still lives on. Yes, and whatever may be the changing fates, it will live on, so long as there are successors worthy to bear the name of the Master, as are the Parsis to-day, those faithful followers of the Creed of the Prophet of Ancient Iran.

SUGGESTED EXPLANATIONS OF ZOROASTER'S **NAME**

THE number of etymologies or explanations for Zoroaster's name (cf. p. 14) is almost legion. In Greek classical antiquity, Deinon offered an interpretation or paraphrase, as he defined the Prophet's name as ' Star-worshipper' (**ἀστροθύτης**); see citation in Diogenes Laertius, *Proœm,* 1. 6: **Δείνων . . . ὃς καὶ μεθερμηνευόμενόν φησι τὸν Ζωροάστρην ἀστροθύτην εἶναι.** The Scholiast of the Platonic *Alcibiades* I. p. 122, evidently accepts this derivation when he says: **Ζωροάστρης . . . οὗ δὲ εἰς Ἑλληνικὴν φωνὴν μεταφραζόμενον τοὔνομα τὸν ἀστροθύτην δηλοῖ.** See Appendix V. below. In this explanation the first part of the name (**Ζωρ-**) seems to be associated in some way with the later Persian *zōr* == A *zaoθra*, ' libation'; the latter portion of the name is Graecized as **ἀστήρ**; cf. Windischmann, *Zoroastrische Studien,* p. 275, and see also Pott, *ZDMG.* xiii. 425-428.

Somewhat similar appears to be the attempt of the Clementine Homilies and Kecognitions to interpret as **ζῶσα ῥοὴ ἀστέρος,** or as *vivum sidus,* as given below in Appendix V., *Clem. Homil.* 9. 3-6: **διὰ τὸ τὴν τοῦ ἀστέρος κατ' αὐτοῦ ζῶσαν ἐνεχθῆναι ῥοήν** = *Recognitiones,* 4. 27-29: *quasi vivum astrum. . . . Hinc enim et nomen post mortem eius Zoroaster, hoc est vivum sidus.* See Appendix V., § 12, and cf. Rapp, *ZDMG.* xix. 34.

The next explanations, if we follow chronological sequence, are to be found in the Syro-Arabic Lexica of Bar 'Ali (c. A.D. 832) and of Bar Bahlul (c. A.D. 936) as 'golden kingdom' or 'royal gold,' *zar,* ' gold' + *wast,* ' kingship'; cf. Gottheil, *References to Zoroaster,* pp. 27-28.

Lapse of time has not caused conjectures to cease, and etymologies have still continued to be offered. Hovelacque *(L'Avesta, Zoroastre et le Mazdiisme,* p. 135 seq., Paris, 1880) enumerates various suggestions that have been made, including the Clementine *vivum sidus* given above and recorded by Barnabe Brisson, *De Regio Persarum*

Principatu, p. 387, Argentorati, 1710 (orig. ed. Paris, 1590); or another interpretation as "friend of fire' proposed by Henry Lord, *Religion of the Par sees,* p. 152, London, 1630 = p. 332 a, Churchill ed. London, 1732; cf. likewise d'Herbelot, *Bibliotheque orientate,* art. ' Zoroastre'; or, again (as stated on Parsi authority), a proposed significance, 'bathed in gold,' ' melted silver/ *Zaer-sios, Zaersioest,* found in C. Le Bruyn, *Voyages en Perse et aux Indes orientates,* ii. p. 388. Most of these attempts are futile, as they were made without an acquaintance with the actual Avestan form *ZaraOuStra.*

The discussion by Anquetil du Perron *{Zend-Avesta,* i. Part 2, p. 2 seq., Paris, 1771) is of interest because he knew Avestan, but his conjecture *'Taschter* (astre) d'*or'*— connecting the name with Tishtrya—had little to recommend it. Eugene Burnouf was the first who rightly saw *ustra, '* camel,' in the name and he explained *ZaraQ-ustra* as ' f ulvos camelos habens' (*Comm. sur le Yagna,* pp. 12-14, Paris, 1833); but he afterwards gave *'astre d'or' {Notes,* p. 166), see Brockhaus, *Vendklad Sade,* p. 361, Leipzig, 1850, and Windischmann, *Zor. Stud.* pp. 46-47, or earlier in *Jen. Litt. Zt.,* 1834, nr. 138, pp. 138-139. In the year 1855, Sir Henry Rawlinson made a guess that the name might be Semitic, i.e. *Zarathustra = Ziru-isar '* seed of Ishtar, descendant of Venus' *JRAS., Gt. Brit, arid Ireland,* xv. 227, 246 (cf. George Rawlinson, *Herodotus,* vol. iii. p. 455). On the contrary Haug, *Die fiinf Gathas,* ii. p. 246, *Abh. f. Kunde d. Morgenlandes,* Leipzig, 1860, suggested ' trefflicher Lobsanger' (cf. Skt. *jarat '* praising' + *uttara '* superior') but he afterwards abandoned such a view. It was criticised also by Weber, *Lit. C. Bl.,* nr. 28, p. 457 (1861), nr. 27, p. 647 (1863) = *Ind. Streif.* pp. 449, 466 (1869). Also discussed by Mills, *Zoroastrian Gathas,* p. 426 seq. (1892-4). Another scholar (Lassen, I believe, if we may judge from Windischmann, *Zor. Stud.* pp. 46-47; Pott, *ZDMG.* xiii. 426 seq.) offered ' gold-smith' (cf. Skt. *hari + tvastar).* Jules Oppert made Zoroaster 'splendeur d'or' in his *KHonover, le Verbe Criateur de Zoroastre,* p. 4, *Extrait des Ann. de Philos. Chritienne,* Jan., 1862.

In the same year as Oppert (1862), Fr. Muller summarized a number of views that were current at the time and he explained *zaraO-uitra* as 'muthige Kamele besitzend' *{Zendstudien,* i. 635-639, *Sitzungsberichte der Akademie,* Dez., 1862, Wien, 1862 = transl. by Darab Peshotan Sanjana *Geiger's Eastern Iranians,* ii. 172 seq.). [But cf. *Lit. Centralblatt,* 1863, p.614; and later Muller offers the bizarre interpretation as *zaQra usta* 'von der Geburt an Gluck habend'

(WZKM. vi. 264, Wien, 1892).] Spiegel proposed 'Kamele peinigend' *(Sitzb. kgl. layer, Akad. phil. ch* p. 10, Jan. 5, 1867). In 1871, the Spanish scholar Ayuso accepted the more or less familiar identification of part of the name with 'star,' as shown by his ' estrella de oro' (*El Estudio de la Filologia,* p. 180, Madrid, 1871) ; and he repeats the same view in his *Los Pueblos iranios y Zoroastro,* p. 7, Madrid, 1874.

Returning to France, it may next be noted that J. Darmesteter *(Ormazd et Ahriman,* p. 194, n., Paris, 1877) first proposed * *zarat-vat-tra,* comparative degree of an adj. signifying 'rouge, couleur d'or'; but he later suggests 'aux chameaux jaunes' *zaraQu-ustra, Le ZA.* iii. Introd. p. 76, n., Paris, 1893; but on this see Bartholomae, *IF.* vi. Anz. p. 47. Ascoli once offered * *zarat-vdstra* 'der bebauung des feldes zugewogen, zugethan' *Beitrdge z. vgl. Spr.* v. 211, 1868. More recently Casartelli hinted at ' ploughing with camels' (cf. Skt. *halo-* 'plough'), *Academy,* vol. 31, p. 257, April 9, 1887. Other suggestions have been made such as Paulus Cassel, explaining as Hebraic ' Sternensohn' (*Zoroaster, sein Name und seine Zeit,* Berlin, 1886, cited from *Gi-undriss d iran. Philol.* ii. 40, n.). Brunnhofer, *Vom Pontus bis zum Indus,* p. 147, Leipzig, 1890. Kern's 'Goldglanz' *(Zara-thuatra)* and Brodbeck's 'Gold-stern' (evidently after Anquetil's etymology, cf. Brodbeck, *Zoroaster,* p. 30, Leipzig, 1893) are noted by Rindtorff, *Die Religion des ZarathvMra,* p. 13 (Weimar, 1897). E. Wilhelm has also incidentally dealt with the subject of Zoroaster's name in connection with the form **Ζαθραύστης,** which is found in Ctesias, in *Le Musfon,* x. 569-571, Louvain, 1891.

APPENDIX II

ON THE DATE OF ZOROASTER[1]

Presented to the American Oriental Society April 18th, 1895.

[Reprinted from the Journal of the American Oriental Society, Vol. xvu., pp. 1-22,1896. A few slight additions which have been made are indicated by enclosing them in square brackets. Some trivial changes made for the sake of uniformity, and several unimportant corrections require no notice.]

GREAT men are the children of their age. Heirs to the heritage of the past, they are charged with the stewardship of the possessions to be handed down to the future. Summing up within themselves the influences of the times that call them forth, stamped with the impress of their day, their spirit in turn shows its reflex upon the age that gives them birth. We read them in their age; we read their age in them. So it is of the prophets and sages, religious teachers and interpreters, which have been since the world began. The teaching of a prophet is the voice of the age in which he' lives; his preaching is the echo of the heart of the people of his day. The era of a prophet is therefore not without its historic significance; it is an event that marks an epoch in the life of mankind. The age of most of the great religious teachers of antiquity is comparatively well known; but wide diversity prevails with regard to the date at which Iran's ancient prophet Zoroaster lived and taught; yet his appearance must have had its national significance in the land between the Indus and the Tigris; and the great religious movement which he set on foot must have wrought changes and helped to shape the course of events in the early history of Iran. The treatment of this question forms the subject of the present paper.[2]

[1] This paper forms a companion-piece to the present writer's discussion of ' Zoroaster's Native Place' in *JAOS.* xv. 221-232.

[3] [Since the appearance of the monograph on the ' Date of Zoroaster,[1] which is here reprinted, the general subject of Zoroastrian chronology has been ably treated by E. W. West *(SBE.* xivii. Introd. p. xxvii. seq.). Dr. West's researches confirm the results here obtained; and he is in a position to define the date of Zoroaster still more precisely, at least on the basis of tradition, as B.C. 660-583. His entire discussion should be read. An extract from his chronological table is given in Appendix I I I .]

The A vesta itself gives us no direct information in answer to the inquiry as to the date of Zoroaster. It presents, indeed, a picture of the life and times; we read accounts of King Vishtaspa, the Constantino of the Faith; but the fragments that remain of the sacred texts present no absolutely clear allusions to contemporary events that might decisively fix **the** era. **The** existing diversity of opinion with reference to Zoroaster's date is largely due to this **fact** and to certain incongruities in other ancient statements on **the** subject. The allusions of antiquity to this subject may conveniently be divided into three groups:[3] —

[3] **[The results of earlier investigators of the subject, Brisson, Stanley, Hyde, Buddeus, Prideaux, and others, as mentioned by Anquetil du Perron, are practically included in his examination of the problem of Zoroaster's date. AnquetiPs treatise, together with Foucher's previous inquiries into the subject, are accessible in Kleuker, *Anhang zum ZA.* i. Thl. 1, pp. 325-374, and Thl. 2, pp. 55-81. They are of interest to the specialist. Cf. also Spiegel, *Avesta Uebersetzt,* i. 43, n. The later bibliography of the subject is given below in the course of the investigation.]**

I. First, those references that assign to Zoroaster [= orig. P- 2] the extravagant date B.C. 6000.

I I . Second, such allusions as connect his name with the more or less legendary Ninus and the uncertain Semiramis.

I I I . Third, the traditional date, placing the era of Zoroaster's teaching at some time during the sixth century B.C.

All the material will first be presented under the headings A. I., A. I I . , and A. I I I . ; then a detailed discussion of the data, pages **16-19** = pp. 170-174, under the heading B; and, finally, **a** summary of results, under the heading C, pages **19-22** = **pp. 174-177,**

A. DATA FOR THE AGE OF ZOROASTER.

A. I. Allusions placing Zoroaster at 6000 B.C.

The allusions of the first group comprehend those classical references that assign to Zoroaster the fabulous age of B.C. 6000 or thereabouts.[1] These references are confined chiefly to the classics, and their chief claim to any consideration is that they [= orig. p. 3] purport to be based upon information handed down from Eudoxus, Aristotle, and Hermippus. Such extraordinary figures, however, are presumably due to the Greeks' having misunderstood the statements of the Persians, who place Zoroaster's millennium amid a great world-period of 12,000 years, which they divided into cycles of 3000 years,[2] and in accordance with which belief Zoroaster's *fravashi* had in fact existed several thousands of years. The classical material on the subject is here presented. •

[1] So the general classical statements of '5000 years before the Trojan war,' or the like, although some variant readings 500 (for 5000) are found. The number 5000 (6000) is, however, the correct one.

[2] According to the chronology of the Biindahishn 34. 7, Zoroaster appeared at the end of the ninth millennium: compare, West, *Bundahish transl. 8BE.* v. 149-151 notes; Spiegel, *Eranische Alterthumskunde,* i. 500-508; Windischmann, *Zoroastrische Studien,* 147-165; also Plutarch *Is. et Os.* 47, Θεόπομπος δέ φησι κατὰ τοὺς μάγους ἀνὰ μέρος τρισχίλια ἔτη τὸν μὲν κρατεῖν, τὸν δὲ κρατεῖσθαι τῶν θεῶν, ἄλλα δὲ τρισχίλια μάχεσθαι καὶ πολεμεῖν καὶ ἀναλύειν τὰ τοῦ ἑτέρου τὸν ἕτερον· τέλος δ' ἀπολείπεσθαι τὸν Ἅιδην.

(a) Pliny the Elder (A.D. 23-79), *JST. H.* 30. 2. 1 [Wn. 279, 288], cites the authority of Eudoxus of Cnidus (B.C. 368), of Aristotle (B.C. 350), and of Hermippus (c. B.C. 250), for placing Zoroaster 6000 years before the death of Plato or 5000 years before the Trojan war: *Eudoxus, qui inter sapientiae sectas clarissimam utilissimamque earn (artem magicam) intellegi voluit, Zoroastrem hunc sex milibus annorum ante Platonis mortem fuisse prodidit; sic et Aristoteles. Hermippus qui de tota ea arte diligentissime scripsit et viciens centum milia versuum a Zoroastre condita indicibus quoque voluminum eius positis explanavit, praeceptorem, a quo institutum diceret, credidit Agonacen, ipsum vero quinque milibus annorum ante Troianum bellum fuisse.* For that reason apparently (N. *H.* 30. 2. 11) he speaks of Moses as living *multis milibus annorum post Zoroastrem.* But Pliny also expresses uncertainty as to whether there was one or two Zoroasters, and he mentions a later Proconnesian Zoroaster: N.H. 30. 2. 1 *sine dubio illic (ars Magica) orta in Perside a Zoroastre, ut inter auctores convenit. Sed unus hiv fuerit, anpostea et alius, non satis constat;* and after speaking of Osthanes, the Magian who accompanied Xerxes to Greece, he adds: *(N. H.* 30. 2. 8.) *diligentiores paulo ante hunc (Osthanem) ponunt Zoroastrem alium Proconnesium.* Pliny's Proconnesian Zoroaster must have flourished about the seventh or sixth century. [See Appendix V. § 5, below.]

(b) Plutarch (A.D. 1st century), adopts likewise the same general statement that places the prophet Zoroaster about 5000 years before the Trojan war: *Is. et Os.* 46 (ed. Parthey, p. 81), Ζωρόαστρις (*sic*) ὁ μάγος, ὃν πεντακισχιλίοις ἔτεσι τῶν τρωικῶν γεγονέναι πρεσβύτεραν ἱστοροῦσιν. [See Appendix V. § 6, below.]

(c) The Scholion to the Platonic *Alcibiades* I. 122 (ed. Baiter, Orelli et Winckelmann, p. 918), makes a statement, in substance tantamount to the last one, as follows: Ζωροάστρης ἀρχαιότερος *ifaKurxtMois* lr€(rtv clvai \cverat IIA.ðTa>vos. [See Appendix V. § 7.]

[=orig.p.4] (d) Diogenes Laertius (A.D. 2d, 3d century), *de Vit Philos.* Prooem. 2 (recens. Cobet, Paris, 1850, p. 1), similarly quotes Hermodorus (B.C. 250?), the follower of Plato, as authority for placing Zoroaster's date at 5000 years before the fall of Troy, or, as he adds on the authority of Xanthus of Lydia (B.C. 500-450), Zoroaster lived 6000 years (some MSS. 600) before Xerxes. The text runs: ἀπὸ δὲ τῶν Μάγων, ὧν ἄρξαι Ζωροάστρην τὸν Πέρσην, Ἑρμόδωρος μὲν ὁ Πλατωνικὸς ἐν τῷ περὶ μαθημάτων φησὶν εἰς τὴν Τροίας ἅλωσιν ἔτη γεγονέναι πεντακισχίλια· Ξάνθος δὲ ὁ Λυδὸς εἰς τὴν Ξέρξου διάβασιν ἀπὸ τοῦ Ζωροάστρου ἑξακισχίλιά φησι, καὶ μετ' αὐτὸν γεγονέναι πολλούς τινας Μάγους κατὰ διαδοχήν, Ὀστάνας καὶ Ἀστραμψύχους καὶ Γωβρύας καὶ Παζάτας, μέχρι τῆς τῶν Περσῶν ὑπ' Ἀλεξάνδρου καταλύσεως. [See Appendix V. § 15.]

(e) Lactantius, *Inst.* 7. 15, must have entertained some similar opinion regarding Zoroaster; for he speaks of Hystaspes (famous as Zoroaster's patron) as being an ancient king of Media long before the founding of Rome: *Hystaspes quoque, qui fait Medorum rex antiquissimus . . . sublatum iri ex orbe imperium nomenque Romanum multo ante praefatus est, quam illa Troiana gens conderetur* (cf. Migne, *Patrolog.* torn. 6 and Windischmann, *Zor. Stud.* p. 259, 293),

(f) Suidas (10th century A.D.), S. V. Ζωροαστρ^ς, speaks of two Zoroasters, of whom one lived 500 (read 5000) years before the Trojan war, while the other was an astronomer of the time of Ninus — cycVcro 8c *irpb* rtov TptoiKwy cVcciv <*f*>.

(g) Georgius Syncellus, *Chronographia*, i. p. 147, ed. Dindorf, alludes to a Zoroaster as one of the Median rulers over Babylon. Cf. Windischmann, *Zor. Stud.* p. 302, and Haug, *A Lecture on Zoroaster*, p. 23, Bombay, 1865. On Syncellus' citation of Cephalion, see next page.

A. I I . Allusions associating Zoroaster's Name with Semiramis and Ninus.

Second to be considered is a series of statements which connect the name of Zoroaster with that of the more or less uncertain Ninus and Semiramis.[1] These references also are confined almost exclusively to the classics, and the difficulty with them is that, in addition to their general character, which bears a legendary coloring, they are based apparently upon a misinterpretation of the name

[9]0$vdprr)s or its variants in a fragment of Ctesias (discussed below), which has been understood as an allusion to Zoroaster.

[1] The date of Semiramis, however, is regarded by Lebmann (*Berliner Philolog. Wochenblatt*, Nr. 8, coh 239-240, 17 Febr. 1894, comparing Hdt. 1. 184) to be about B.C. 800.

(a) The authority of Ctesias (B.C. 400) is quoted by Diodorus Siculus (A.D. 1st century) 2. 6, for the statement that Ninus with a large army invaded Bactria and by the aid of Semiramis gained a victory over King Oxyartes. See Fragments of the Persika of Ktesias, ed. Gilmore, p. 29. Instead of the name Ὀξυάρτης, the manuscript variants show Ἐχαόρτης, Χαόρτης, Ζαόρτης. The last somewhat recalls the later Persian form of the name Zoroaster j and Cephalion, Justin, Eusebius, and Arnobius, drawing on Ctesias, make Zoroaster a Bactrian or the opponent [= orig. p. 5] of Ninus (see below); but Ὀξυάρτης y very well be an independent name, identical as far as form goes with Av. *uxšyaŋ-ərəta*, Yt. 13. 128, and it is doubtless the better Greek reading. The other statements are here given as they similarly come into consideration with respect to Zoroaster's native place. They are: —

(b) Fragments of Cephalion (A.D. 120), preserved in the Armenian version of Eusebius, *Chron.* 1. 43, ed. Aucher: a passage describes the defeat of Zoroaster the Magian, king of the Bactrians, by Semiramis: "*Incipio scribere de quibus et alii commemorarunt atque imprimis Hellanicus Lesbius Ctesiasque Cnidius, deinde Herodotus Halicarnassus.*[1] *Primum Asiae imperarunt Assyrii, ex quibus erat Ninus Belt (Jilius), cuius regni aetate res quam plurimae celeberrimaeque virtutes gestae fuerunt." Postea his adiciens profert etiam generationes Semiramidis atque (narrat) de Zoroastri Magi Bactrianorum regis certamine ac debellatione a Semiramide: nec non tempus Nini LII annos fuisse, atque de obitu eius. Post quern quum regnasset Semiramis, muro Babylonem circumdedit ad eandem formam, qua aplerisque dictum est: Ctesia nimirum et Zenone Herodotoque nee non aliis ipsorum posteris. Deinde etiam apparatum belli Semiramidis adversus Indos eiusdemque cladem et fugam narrat, etc.* This statement is recorded by Georgius Syncellus (c. A.D. 800), *Chron.*, ed. Dind. i. p. 315: "Ἄρχομαι γράφειν, ἀφ' ὧν ἄλλοι τε ἐμνημόνευσαν, καὶ τὰ πρῶτα Ἑλλάνικός τε ὁ Λέσβιος καὶ Κτησίης ὁ Κνίδιος, ἔπειτα Ἡρόδοτος ὁ Ἁλικαρνασεύς. τὸ παλαιὸν τῆς Ἀσίας ἐβασίλευσαν Ἀσσύριοι, τῶν δὲ ὁ Βήλου Νίνος." εἶτ' ἐπάγει γένεσιν Σεμιράμεως καὶ Ζωροάστρου μάγου (MSS.

βάτου) ἔτει νβ' τῆς Νίνου βασιλείας. μεθ' ὃν Βαβυλῶνα, φησὶν, ἡ Σεμίραμις ἐτείχισε, τρόπον ὡς πολλοῖς λέλεκται, Κτησίᾳ, Ζήνωνι (Müller, Δείνωνι), Ἡροδότῳ καὶ τοῖς μετ' αὐτούς· στρατείην τε αὐτῆς κατὰ τῶν Ἰνδῶν καὶ ἥτταν κ. τ. λ. Cf. also Windischmann, *Zor. Stud.* p. 303, Spiegel, *Eran. Alter.* 1. 676-677; Muller, *Frag. Hist. Gr.* iii. 627. Furthermore, on the reputed work of the Armenian Moses of Khorene, i. 16, see Gilmore, *Ktesias Persika,* p. 30, n.; Spiegel, *Eran. Alter,* i. 682; Windischmann, *Zor. Stud.* pp. 304-305; Muller, *Frag. Hist. Gr.* iii. 627, v. 328; Langlois, *Historiens de VArm6nie,* ii. 45-175, Paris, 1867-1869. [The Armenian Thomas Arzrouni associates Zoroaster's name with Semiramis. See Appendix VI.]

[1] This mention of Herodotus might possibly be adduced as an argument that Herodotus was at least acquainted with the name of Zoroaster.

(e) Arnobius (A.D. 297), *Adversus Gentes,* 1. 5, in like manner mentions a battle between the Assyrians and the Bactrians under the leadership respectively of Ninus and Zoroaster: *inter Assyrios et Bactrianos Nino quondam Zoroastreque ductoribus.* See Gilmore, *Ktesias,* p. 36. [See Appendix V. § 16.]

(i) In the Snorra Edda Preface, Zoroaster is identified with Baal or Bel, cf. Jackson in *PA08.,* March, 1894, vol. xvi. p. cxxvi. [See Appendix VI.]

(j) In some Syriac writers and elsewhere an identification of Zoroaster with Balaam is recorded, for example in the Lexicon of Bar 'All (c. A.D. 832), s. v. *Balaam,* 'Balaam is Zardosht, the diviner of the Magians.' See Gottheil, *References to Zoroaster in Syriac and Arabic Lit.* pp. 27, 30 n., 32 (Drisler Classical Studies, N. Y., 1894). Sometimes he is only compared with Balaam. [An association of his name with Ham, Seth, and Abraham, is also found.]

A. III. The Native Tradition as to Zoroaster's Date.

Third, the direct Persian tradition comes finally into considerar tion. This tradition is found in the chronological chapter of the Bundahishn, 34. 1-9, is supported by the Arta Viraf, 1. 2-5 [and Zat-sparam, 23. 12], and is corroborated by abundant Arabic allusions (AlbirunI, Mastldl, *et al).* It unanimously places the opening of Zoroaster's ministry at 258 years" before the era of Alexander, or 272 years before the close of the world-conqueror's dominion. According to these figures, the date of Zoroaster would fall between the latter half of the seventh century B.C. and the middle of the sixth century; his appearance in fact would be placed
in the period just preceding the rise of the Achae- (= orig. P- 7] menian dynasty. This merits attention also in detail.

(a) The Arta Viraf 1. 1-5 in round numbers places Zoroaster three hundred years before Alexander's invasion. Compare Haug and West, *Arda Viraf,* p. 141. ' The pious Zaratusht made the religion which he had received, current in the world, and till the end of 300 years the religion was in purity and men were without doubts. But afterwards the accursed Evil Spirit, the wicked one, in order to make men doubtful of this religion, instigated the accursed Alexan-

der, the Raman, who was dwelling in Egypt, so that he came to the country of Iran with severe cruelty and war and devastation; he also slew the ruler of Iran, and destroyed the metropolis and empire.' [The Zat-sparam 23. 12 likewise alludes to the fact that the religion remained undisturbed 'until the 300th year'].

(b) The Bundahishn chapter (ch. 34) 'on the reckoning of the years' (to which one MS. adds —'of the Arabs') more exactly computes the various millenniums that made up the 12,000 years of the great world-cycle recognized by the worshippers of Mazda. In this period the era of Zoroaster falls at the close of the first 9000 years. He is placed in reality at the beginning of the historic period, if the long reigns attributed to Kal-Vishtasp and to Vohuman son of Spend-dat (Av. Spento-data, N. P. Isfendiar), may with reasonably fair justice be explained as that of a ruling house. There seems at least no distinct ground against such assumption. [West also explains the fabulous length of 120 years for Vishtasp's reign, or B.C. 660-540, as representing a short dynasty — *SBE.* xlvii. Introd. § 70]. The Bundahishn passage, 34. 7-8, in West's translation *(SBE.* v. 150-151) reads, (7) 'Kal-Vishtasp, till the coming of the religion, thirty years, altogether a hundred and twenty years. (8) Vohuman, *son* of Spend-dat, a hundred and twelve years; Humai, who *was* daughter of Vohuman, thirty years; Darai, son of Clhar-azad, that is, *of the daughter* of Vohuman, twelve years; Darai, son of Darai, fourteen years; Alexander the Raman, fourteen years/

Humai.		. 30
Darai-I	Cihar-azat	. 12

		272

The result therefore gives 272 years from 'the coming of the religion' until the close of the dominion of Alexander the Great, or 258 years before the beginning of his power. A repeated tradition exists that Zoroaster was forty-two years old when he first converted King Vishtaspa, who became his patron. If we interpret 'the coming of the religion' to mean its acceptance by Vishtaspa, we must add 42 years to the number 258 before Alexander in order to obtain the traditional date of Zoroaster's birth. This would answer

to the '

three hundred years before Alexander' **of the Arta if. If,** however, we take the phrase ' coming of the religion' to mean the date of Zoroaster's entry upon his ministry [=orig. p. 8] (as does West, *SBE.* v. 219), we must then add 30 years, which was Zoroaster's age when he beheld his first vision of Ormazd. [The latter view is the correct one as shown by West. It is worth remarking that as Zoroaster's revelation and the ' coming of the religion' are placed in the thirtieth year of Vishtasp's reign as well as of the Prophet's life, both men accordingly would be represented as born in the same year if we adopt an Oriental custom in dating a king's accession to the throne from the day of his birth.]

A calculation based upon the figures of this tradition would place Zoroaster's birth 42 years + 258 years (= 300 years) before B.C. 330, the date of the fall of the Iranian kingdom through Alexander's conquest; in other words it would assign Zoroaster's birth to about B.C. 630. [But as West has shown *(SBE.* xlvii. §§ 53-54), there is an evident omission of 35 years in the reckoning; he accounts for this error and combines the items, 272 years of Bd. 34. 7-8 with this date of Alexander's death, B.C. 323, and with the 30th year of Zoroaster's life in which the Revelation came, and he finds B.C. 660 as the traditional date of the birth of Zoroaster and of Vishtasp's accession. See below, Appendix I I I .] According to the same tradition the duration of the various reigns of the Kayanian dynasty would be about as follows [West's corrected chronology now included]: —

King.	Reigned years.	Fictitious date B.O.	[West's correction, Including 85 years.]
Vishtasp.	**.120**	**618-498**	**660-540**
Vohuman (Ardashlr Dirazdast) .	**112**	**498-386**	**540-428**
Humal.	**.30**	**386-356**	**428-363**
Darai.	**.12**	**356-344**	**363-351**
Darai-Daral.	**.14**	**344-330**	**351-337**
[Accession of Alexander to his invasion. . . .	**.337-331]**		

The results would be somewhat altered if the computation be made according to lunar years or if a different point of departure be taken. The excessive lengths of the reigns of Vishtasp and Vohuman seem suspicious and suggest round numbers unless we are to interpret them as comprising successive rulers; for example, in historic times, beside Hystaspes, the father of Darius, we have the names of two -other Hystaspes, later connected with the ruling house of Bactria.[1]

The historic reigns of the Achaemenians may be compared (cf. Stokvis, *Manuel d'Histoire*, p. 107).

Cyrus	B.C. 558-529
Cambyses	529-521
Darius I.	521-485
Xerxes	485-465
Artaxerxes Longimanus	465-425
Darius Nothos	425-405
Artaxerxes Mnemon	405-362
Artaxerxes Ochus	362-340
[Arses]	340-337
Darius Codomannus	337-330

Comparison may be made, as with West,[2] identifying the long reign of Vohuman who is called Ardashir (Artaxerxes or Ardashir Dirazdast 'the long-handed') with Artaxerxes Longimanus and his successors. Historical grounds throughout seem to favor this. For Humai, West suggests Parysatis as a possibility. The last two Darais answer to Ochus and Codomannus, and the reign of Kal-Vishtasp 'seems intended to cover the period from Cyrus to Xerxes' (West).[3] There seems every reason to identify Vohuman Ardashir Dirazdast with Artaxerxes Longimanus, according to the Bahman Yasht (Byt. 2. 17), as this Kayanian king 'makes the religion current *in* the whole world.'[4] One might be possibly tempted to regard the Vishtasp reign as representing the Bactrian rule until Artaxerxes, and assume that Zoroastrianism then became the faith of Persis.[5] This might account for the silence as to [= orig. p. 9] the early Achaemenians and shed some light on the problem concerning the Achaemenians as Zoroastrians; but there seems to be no historic foundation for such assumption. Suffice here to have presented the tradition in regard to the reigns of the Kayanian kings as bearing on Zoroaster's date and the traditional 258 years before Alexander as the era of 'the coming of the religion.'

[5] Dubeux, *La Perse,* p. 67, sharply separates the Oriental account of the Persian kings from the historical account.

(c) The sum of 258 years is given also by so careful an invest tigator as AlblrunI (A.D. 973-1048). His statements are based on the authority of 'the scholars of the Persians, the HSrbadhs and Maubadhs of the Zoroastrians.'[1] In his *Chronology of Ancient Nations,* p. 17, 1. 17 (transl. Sachau), is found a statement of the Persian view in regard to Zoroaster's date: 'from his *(i.e.* Zoroaster's) appearance till the beginning of the Æra Alexandri,[2] they count 258 years.' Several times he gives the received tradition that Zoroaster appeared in the 30th year of the reign of Vishtasp. In another place, *Chron.* p. 196 (transl. Sachau), he gives further information in regard to Zoroaster's time: 'On the 1st Ramadan A.H. 319 came forward Ibn 'Abl-Zakarriya. . . . If, now, this be the time *(i.e.* A.H. 319 = A.D. 931) which Jam asp and Zaradusht meant, they are right as far as chronology is concerned. For this happened at the end of the Æra Alexandri 1242, *i.e.* 1500 years after Zaradusht.' Prom this statement we may compute back to the year B.C. 569 as a date when a prophecy is supposed to have been made by Zoroaster and Jamasp. AlblrunI is not exhausted yet. In *Chron.* 121 (transl. Sachau), he says, 'we find the interval between Zoroaster and Yazdajird ben Shapur to be nearly 970 years.' This gives the date about B.C. 571 if we count Yazdajird's reign as A.D. 399-420. Furthermore the carefully constructed tables which AlblrunI gives from various sources are interesting and instructive, owing to their exact agreement with the reigns of the Kayanian kings as recorded in the Bundahishn. Thus, *Chron.* p. 112, 107-114 (transl. Sachau): —

Kai Vishtasp till the appearance of Zoroaster	30
The same after that event	90
Kai Ardashir Bahman (Vohuman)	112
Khuniani (Huinai)	30
Dara	12
Dara hen Dara	14

On p. 115 he contrasts these dates with those given by [= orig. p-10] early occidental authorities. Finally, *Chron.* p. 32 (transl. Sachau), the name of Thales is brought into connection with

Zoroaster,

. p. 169, n. 3 below. So much for the information furnished by Albiruni

[1] Albirunl, *Chronology of Ancient Nations,* transl. and ed. by Sachau, p. 109.

[2] According to AlblrunI, p. 32 (transl. Sachau) the Æra Alexandri would **date** from the time when Alexander left Greece at the age of twenty-six years, preparing to fight with Darius.

(d) Of somewhat earlier date but identical in purport is the statement found in Masudi's *Meadows of Gold,* written in A.D. 943-944 (Masudl died A.D. 957). Like the Bundahishn and like AlblrunI, MasudI reports that 'the Magians count a period of two hundred and fifty-eight (258) years between their prophet Zoroaster and Alexander.'[1] He reiterates this assertion in *Indicatio et Admonitio*[2] by saying 'between Zoroaster and Alexander there are about three hundred years.' Nearly the same, but not exactly identical figures, are found as in the Bundahishn, regarding the length of the reigns of the various Kayanian kings; Zoroaster is stated, as elsewhere, to have appeared **in** the thirtieth (30) year of Vishtasp's reign and he dies at the age of seventy-seven (77) after having taught for thirty-five (35) years.[8] The statement that Zoroaster lived to the age of 77 years is also found elsewhere.[4] What MasudI has to say on the subject of Nebuchadnezzar's being a lieutenant of Lohrasp (A.urvat-aspa) and regarding Cyrus as contemporary with Bahman will be mentioned below, **as a** similar statement occurs in the Dlnkart (Bk. 5). [West, *SBE.* xlvii. 120.]

[1] MasudI (Magoudl), *Les Prairies d'Or, Texte et traduction par Barbier de Meynard,* iv. 107 ' Les Mages comptent entre leur prophete Zoroastre, fiis d'Espiman, et Alexandre, une pe'riode de deux cent cinquante-huit ans. Entre Alexandre, qu'ils font re'gner six ans, et Pave'nement d'Ardechir, cinq cent dix-sept ans ; enfin entre Ardeechir et l'hgire cinq cent soixante-quatre ans . . . du regne d' Alexandre a la naissance du Messie, trois cent soixante-neuf ans; de la naissance du Messie a celle du Prophete cinq cent vmgt et un ans.' Observe especially that MasudI in *Indicatio et Admonitio,* (p. 327-328) accounts for the intentional shortening of the period between Alexander and Ardashlr. What he has to say on this subject is worth looking up in connection with *SBE.* v. 151 n.

[2] MasudI, *Le Livre de Vindication et de Admonition* (in *Prairies d'Or,* ix. p. 327), ' Zoroastre fils de Poroschasp fils d'Asinman, dans PAvesta, qui est le livre qui lui a ete revele annonce que, dans trois cents ans, Tempire des Perses Sprouvera une grande revolution, sans que la religion soit dtouite ; mais qu'au bout de mille ans, *V*empire et la religion periront en meme temps. Or entre Zoroastre et Alexandre il y a environ trois cents ans; car

a p a r u du temps de Calbistasp, fils **de Caflohrasp,** comme **nous P**avons dit ci-devant.' See MasudI, *Kitab al-Tanbih,* p. 90 seq., ed. de Goeje, Leyden, 1894. Compare also Gottheil, *References to Zoroaster,* p. 86 (in Drisler Classical Studies, New York, 1894); [and *Le Livre de VAvertissement,* traduction par B. C. de Vaux (Socie'te' Asiatique), p. 140, Paris, 1896],

[8] MasudI, *Prairies d' Or,* ii. p. 123, ed. Barbier de Meynard. 'Youstasf (Gustasp) re'gna apres son pere (Lohrasp) et resida a Balkh. II e'tait sur le trdne depuis trente ans, lorsque Zeradecht, fils d'Espiman se presenta devant lui . . . (p. 127). Youstasf re'gna cent [=orig. p. 11] vingt ans avant d'adopter la religion des Mages, puis il mourut. La predication de Zeradecht dura trente-cinq ans, et il mourut age de soixante et dix-sept ans.' The detailed reigns (MasudI, op. cit. ii. 126-129) are Vishtasp 120 years, Bahman 112, Humai 30 (or more), Dara 12, Dara son of Dara 30, Alexander 6 (cf. vol. iv. p. 107 'Alexandre, qu'ils font regner six ans'). The latter would answer pretty nearly to the commonly received years of Alexander in Persia, B.C. 330-323. Observe that the years of the last three reigns vary somewhat from the Biindahishn. Deducting from Vishtasp's reign the 30 years till Zoroaster appeared and counting simply to the coming of Alexander, the resulting 274 years would place Zoroaster's appearance at B.C. 604 or, if 42 years old at the time, his birth at B.C 646. [See now West's correction which gives B.C. 660.] But notice that instead of 274 years as here, MasudI elsewhere says *(Prairies d' Or,* iv. 106, quoted above) there were 258 years between Zoroaster and Alexander.

[4] E.g. Dlnkarfc Bk. 7.5.1 (communication from West) and in the Rivayats.

(e) The period at which the Arabic chronicler Tabari (died A.D. 923)[1] places Zoroaster in his record of Persian reigns, is practically-identical with the preceding in its results, although he occasionally differs in the length of the individual reigns, e.g. Bahman 80 years (although he mentions that others say 112 years), Humai about 20 years, Dara 23 years. He tells also of a tradition that makes of Zoroaster one of the disciples of Jeremiah. The latter, according to the generally accepted view, began to prophesy about B.C. 626. These points will be spoken of again below.

[1] See Zotenberg, *Chronique de Tabari, traduite sur la version persane d'Abou-AU Mo'hammed BeVami,* tome i. 491-508, Paris, 1867.

(f) The Dabistan (translated by Shea and Troyer, i. 306-309) narrates that the holy cypress which Zoroaster had planted at Kishmar in Khorassan [I formerly wrongly read Kashmir] and which was cut down by the order of Mutawakkal, tenth khalif of the Abbassides (reigned A.D. 846-860), had stood ' fourteen hundred and fifty years (1450) from the time of its being planted, to the year 232 of

the Hejirah (A.D. 846)/ If these years be reckoned as solar years, according to the custom of the ancient Persians, and counted from the beginning of Mutawakkals reign, the date of the planting of the cypress would be B.C. 604; but if reckoned according to the lunar calendar of the Mohammedans (i.e. equivalent to 1408 solar years), the epoch would be B.C. 562.[1] The former date (B.C. 604) recalls the reckoning of Masudl alluded to above, on p. 10 [= p. 162]. The event of the planting must have been an occasion of special moment; from a reference to the same in Firdausi (translation by Mohl, iv. 291-293, Paris, 1877), the conversion of Vishtaspa is perhaps alluded to. If the conversion of Yishtaspa really be alluded to, 42 years must be added to give the approximate date of Zoroaster's birth. Perhaps, however, some other event in the prophet's life is commemorated.[2] In any case the results lead us to the latter part of the seventh century B.C. and the first part of the sixth century. [See now above, p. 80.]

[1] See the calculation [of Anquetil du Perron, in Kleuker, *Anh. zum ZA.* i. Thl. 1. pp. 346-347, and] of Shea and Troyer, *Dabistdn*, [= orig. p. 12] *translated*, i. 308, n., Paris, 1843 and Mirkhond's *History of the Early Kings of Persia*, transl. Shea, p. 281-282, London, 1832. According to E. Roth, 'Zoroastrische Glaubenslehre' in *Geschichte unserer abendllindischen Philosophies* i. 350, the era of the cypress is B.C. 660. This is adopted by Floigl, *Cyrus und Herodot*, p. 15, 18 (Leipzig, 1881). [On Kishinar consult also Vullers, *Fragmented* p. 113].

[2] In case the 1450 years be reckoned back from the date of Mutawakkal's death (A.D. 860) instead of from the beginning of his power, the numbers would be respectively B.C. 590 (if solar), or B.C. 548 (if lunar).

(g) The figures of the chapter-headings in the *Shah Narnah* of Firdausl (A.D. 940-1020) likewise place the opening of Vishtaspa's reign at about three hundred years before Alexander's death.[1]

[1] Firdusii *Schahnarne*, ed. Vullers-Landauer, iii. p. 1495 seq. See also Shea and Troyer's *Dabistan*, Introd. i. p. lxxxvi and p. 380. Consult the chapter-headings of the reigns in Mohls translation of FirdausI, vols, iv.-v. Observe that Bahman is assigned only 99 years instead of the usual 112; the duration of Vishtaspa's reign is given in Mohl, vol. iv. 687, 'cent vingt ans' in harmony with the usual tradition.

(h) The Persian historical work, Mujmal al-Tawarlkh (A.H. 520 = A.D. 1126),[1] following the authority of the Chronicle of the Kings of Persia, brought from Farsistan by Bahrain, son of Merdanshah,

Mobed of Shapur, enumerates *258* years before Alexander.[2] The Ulama-I Islam counts three hundred.[8]

[1] See *Extraits du Modjmel al-Tewarikh, relatifs a Vhistoire de la Perse, traduits du persan, par Jules Mohl* (Journal Asiatique, tome xi. pp. 136, 258, 320, Paris, 1841).

[2] Cf. op. cit. p. 230. The author acknowledges indebtedness also to Hamzah of Isfahan, Tabari, and Firdausl. His chronology may be deduced from pp. 330-339 of the work cited; it runs, Lohrasp 120 years, Gusht&sp 120 years, Bahman 112, Humai 30, Darab 12 [or 14], Dara son of Darab 14 [or 16], Alexander 14 [or 28]. Observe the alternative figures in the case of the last three numbers.

According to Roth, *Geschichte unserer abendldndischen Philosophic,* i. 361, the author of the Mujmal al-Tawarikh places Zoroaster 1700 years before his own time ; on this ground Roth places the death of Zoroaster at B.C. 522, and is followed by Floigl, *Cyrus und Herodot,* p. 18. Cf. Kleuker's *Zend-Avesta,* Anh. Bd. i. Theil 1, p. 347.

[3] See Vullers, *Fragmente uber Zoroaster,* p. 68.

(i) Interesting is the fact noticed by Anquetil du Perron[1] that a certain religious sect that immigrated into China A.D. 600 is evidently of Zoroastrian origin and that these believers have an era which dates approximately from B.C. 559; this date Anquetil regards as referring to the time when Zoroaster left his home and entered upon his mission — a sort of Iranian Hejirah.

[1] See Anquetil du Perron quoted by Kleuker, *Anhang zum Zend-Avesta,* Bd. i. Thl. 1, pp. 349-351; cited also by Shea, *Mirkhond's History,* p. 282, and by Roth in *Geschichte abendldnd. Philosophie,* i. 353 and note 566, and followed by Floigl, *Cyrus und Herodot,* p. 18.

(j) Similar in effect as far as concerns the period at which they place the prophet, although of doubtful value or otherwise to be explained, are those Syriac and Arabic [=orig. p. 13] reports which connect the name of Zoroaster with Jeremiah and which make him the latter's pupil or even identify him with Baruch the scribe of Jeremiah.[1] Presumably this association is due to confusing the Arabic form of the name Jeremiah *Armiah* with Zoroaster's supposed native place *Urmiah* (Urumiyah).[2]

[1] (a) The Syro-Arabic Lexicon of Bar Bahlftl (about A.D. 963) s.v. Consult especially Gottheil, *Beferences to Zoroaster* (Drisler Classical Studies, New York, 1894).

(8) Tabari (died A.D. 923) likewise notices the association of Zoroaster with Jeremiah. According to him * Zoroaster was of Palestinian origin, a servant to one of the disciples of Jeremiah the prophet, with whom he was a favorite. But he proved treacherous and false to him. Wherefore God cursed him, and he became leprous. He wandered to Adarbaijan, and preached there the Magian religion. From there he went to Bishtasp (Vishtaspa), who was in Balkh. Now when he (Zoroaster) had come before him, and preached his doctrine to him, it caused him to marvel, and he compelled his people to accept it, and put many people to death on its account. Then they followed it (the religion). Bishtasp reigned one hundred and twelve (112) years.' Gottheil, R*eferences to Zoroaster,* p. 37. See also *Chromque de Tabari traduite* par H. Zotenberg, i. p. 499. [In the story of the leprosy can there be some reminiscence of Elisha's servant Gehazi, who was cursed with leprosy for falsehood after the cleansing of Naaman ? See I I . Kings, v. 1-27 and compare *sara'ath,* p. 30 above, and Hyde, p. 314.]

(c) The same general statements of Tabari are repeated by Ibn al-Athir (13th century) in his *Kitab al-Kamil fi al-ta'arikh.* See Gottheil, *Beferences to Zoroaster,* p. 39.

(f) Once the Syrian Gregorius Bar 'Ebhrayft Abulfaraj (c. A.D. 1260) calls Zoroaster a disciple of Elijah (mistake for Jeremiah?), see Gottheil, *Beferences to Zoroaster,* p. 32.

(n) Similarly the Arab historian Abu Mohammed Mustapha calls Zoroaster a disciple of Ezlr (Ezra), see Hyde, *Hist. Belig. veterum Persarum,* p. 313.

[2] So suggested by de Sacy, *Notices et Extraits des Manuscrits de la Bibl. du Boi,* ii. 319, see Gottheil, R*eferences to Zoroaster* (Drisler Classical Studies, p. 30 n.). [Anquetil du Perron's view was, that this is owing to an unwillingness to attribute to the Persians a prophet of their own, without Semitic influence ; see his paragraph in Kleuker, *Anh. zum ZA.* i. Thl. 1, p. 341. This is no doubt also true. See likewise p. 30 above.]

(k) Pointing to a similar era are the Pahlavi (Dlnkart Bk. 5. and Mkh.) and Perso-Arabic allusions to Nebuchadnezzar as lieutenant

of Vishtasp's predecessor, Lohrasp, and of Vishtasp himself as well as of his successor Bahman (Vohuman). [See also above, p. 91, n. 2.] In the same connection Cyrus's name is joined with Vishtasp and Bahman.[1]

[1] (a) According to Tabarl (10th century A.D.) and Mastidi, [= orig. p. 14] Nebuchadnezzar was lieutenant successively under Lohrasp, Vishtasp, and Bahman ; the tradition regarding Lohrasp's taking of Jerusalem is found in the Pahlavi DInkarfc Bk. 5 and MalnOg-I Khirafc 27. 66-67, transl. West, S*BE.* xxiv. 65. T abarl (or rather the Persian version of the latter by Bel'ami) gives two different versions of the story (see *Chronique de Tabari, traduite sur la version persane de Belami par H. Zotenberg,* vol. i. pp. 491-507, Paris, 1867), and (Tabarl op. cit. p. 503) the return of the Jews to Jerusalem is placed in the 70th year of Bahman. Signs of confusion are evident. So also in Mirkhond (15th century A.D.) who in his history repeats Tabarl's statement with reference to Nebuchadnezzar and Lohrasp, and makes Cyrus a son of Lohrasp although he is placed in the reign of Bahman. He regards Bahman (Vohuman) as a contemporary of Hippocrates (B.C. 460-357) and Zenocrates (B.C. 396-314) which would harmonize properly with the traditional dates above given (pp. 8-9 = pp. 159-160) for Bahman's reign. See Shea, *Mirkhond' s History,* pp, 264,291, 343).

(b) Masudl is worth consulting on the same point, especially in respect to certain presumed relations between the Persians and the Jews. See Barbier de Meynard, *Macoudi Les Prairies d' Or,* ii. 119-128.

(1) At this point may be mentioned two other allusions that place Zoroaster's activity in the sixth century before the Christian era, although the former of these rests upon the identification of the prophet's patron Vishtaspa with Hystaspes the father of Darius. The first of these allusions, that given by Ammianus Marcellinus (5th century A.D.),[1] directly calls Vishtaspa (Hystaspes) the father of Darius, although Agathias (6th century A.D.)[2] expresses uncertainty on this point. The second allusion is found in Eutychius, the Alexandrine Patriarch, who makes Zoroaster a contemporary of Cambyses and the Magian Smerdis,[3] a view which is shared by the Syrian Gregorius Bar TSbhraya Abulfaraj (c. A.D. 1250)[4] [and by the Arab chronologist al-Makln[5]].

[5 See Hyde *Hist. Relig. vet. Pers.* pp. 528-529.]

(m) Finally two other allusions are here added for the sake of completeness, as they have been interpreted as pointing to the fact that Zoroaster lived about the sixth century B.C. There seems to be nothing in them, however, to compel us to believe that Zoroaster is regarded as living only a short time before the events to which they allude. The first is a passage in Nicolaus Damascenus (1st century B.C), who represents that when Cyrus was about to burn the unfortunate Croesus, his attention was called t **Ζωροάστρου λόγια,** c h forbade that fire should be defiled.[1] The second item of information is found in such references as represent Pythagoras as following Zoroaster's doctrines.[2] Lastly, the association of Zoroaster's name with that of Thales, by AlblrunX, has been noted above.[8]

[2] The principal references are to be found in Windischmann, *Zoroastrische Studien,* pp. 260-264,274, from whose work they are taken. Several of these allusions mention Zoroaster's name directly; in others we may infer it, since Pythagoras is made a student of the Magi, whom classical antiquity regards as the exponents of Zoroaster's teaching. Such allusions are : (a) Cicero, *de Fin.* 5. 29, *ipse Pythagoras et Aegyptum lustravit et Persarum Magoi adiit;* (0) Valerius Maximus 8. 7 extern. 2, *inde ad Persas profectus Magorum exactissimae prudenliae seformandum tradidit;* (7) Pliny, *N.H.* 30. 2.1, *Pythagoras, JEJmpedocles, Democritus, Plato ad hanc (magicen) discendam navigavere;* (5) Porphyrius, *Vita Pythag.* 41, ἐπεὶ καὶ τοῦ θεοῦ, ὡς παρὰ τῶν Μάγων ἐπυνθάνετο, ὃν Ὡρομάζην καλοῦσιν ἐκεῖνοι; and *Vita Pythag.* 12, ἵν τε Βαβυλῶνι τοῖς τ' ἄλλοις Χαλδαίοις συνεγένετο καὶ πρὸς Ζάβρατον [Ζάρατον, Nauck] (Zoroaster ?) ἐφίκετο; (e) Plutarch, *de animae procr. in Timaeo* 2. 2, Ζαράτας ὁ Πυθαγόρου διδάσκαλος; (0 Clemens Alexandrmus, *Stromata,* 1, p. 357 (ed. [[8] See p. 161 above. The particular passage is one in which Alblrtini discusses the various possibilities as to the date of Thales. He adds that ' if he (i.e. Thales) lived at the time of Kai Kubadh, he stands near to Zoroaster, who belonged to the sect of the Harranians' *(Chron.* p. 32, 1. 15, transl. Sachau).]

B. DISCUSSION OF THE DATA.

The material above collected presents most of the [= orig. p. 16] external evidence that we have in regard to the age at which Zoroaster lived. We are now prepared for a more comprehensive view of the subject, for a discussion of the data in hand, for a presentation of certain internal evidences that need to be brought out, and for arguments and possible deductions. Several points immediately suggest themselves for comment.

First, in discussing the classical allusions above presented, one is justified from the connection in assuming that such allusions as are

made to the name of Zoroaster as a religious teacher or sage, all refer to the one great prophet of ancient Iran. No account, I think, need therefore be taken of such views as assume the existence of two or of several Zoroasters, belonging to different periods in the world's history. Such a view was held by Suidas (s.v. *Zoroastres)* and was evidently earlier shared by Pliny;[1] it met with acceptance also among some of the old-fashioned writers in more recent times;[2] but there is no real evidence in its favor, and it is due to an attempt to adjust the discrepancy existing in classical statements with regard to Zoroaster's date. History knows of but one Zoroaster.

[1] Pliny N. *H.* 30. 2. 1. *sine dubio illic orta (ars Magica) in Perside a Zoroastre, ut inter auctores convenit. Sed unus hicfuerit, anpostea et alius, non satis constat.* He adds a little later (30. 2. 8) *diligentiores paulo ante hunc* (i.e. *Osthanem) Zoroastrem alium Proconnesium.*

[2] E.g. Kleuker (quoting the Abbs' Foucher), *Anhang zum Zend-Avesta,* Bd. i. Tkl. 2, p. 68-81.

Second, among the three dates which may be deduced from the material above collected and which are summarized on p. 2 [= p. 152], we are justified upon reasonable grounds, I think, in rejecting the excessively early date of B.C. 6000 or thereabouts. The explanation above offered to account for the extravagant figures seems satisfactory enough.

Third, such dates as might be arrived at from the sporadic allusions that associate the name of Zoroaster with Semiramis and Ninus, with Nimrod and Abraham, or with Baal, Bel, Balaam, as above discussed, have little if any real foundation. In each instance there seem to me to be reasonable grounds for discarding them.

There remains finally a comparatively large body of material that would point to the fact that Zoroaster flourished between the latter part of the seventh century and the middle of the sixth century before the Christian era. The material when sifted reduces itself: first, to the direct tradition found in two Pahlavi books, Bundahishn and Arta Viraf, which places Zoroaster's era three hundred years, or more exactly 258 years, before Alexanders day; second, to the Arabic allusions which give the same date in their [= orig. p. 17] chronological computations and which in part lay claim to being founded upon the chronology of the Persians themselves;[1] third, to similar allusions elsewhere which place Zoroaster at about this period.

[1] Compare Alblrttnl, *Chronology of Ancient Nations,* p. 109, 112 (transl. Sachau); and the *Modjmel al-Tewarikh,* p. 142, 320, 330 (traduit Mohl, Journal Asiatique, xi. 1841), stating that the account is based on the Chronicle of Mobed Bahrain.

Certain objections may be raised to a view based upon this material last given.

First among these objections is a claim often urged, that the traditional date rests upon an erroneous identification of Visht&spa with Hystaspes the father of Darius. I cannot see, from the allusions or elsewhere, that the Persians made any such identification; the impression gained from the material presented is rather in fact to the contrary; one may recall, for example, how widely different the ancestry of Vishtaspa is from the generally received descent of Hystaspes the father of Darius (a point which Floigl and Bdth seem to have overlooked). It was only the classical writer Ammianus Marcellinus who, in antiquity, made any such identification. The point has already been sufficiently dealt with above, p. 14 [= p. 167, and West now also treats it in like manner—*SBE.* xlvii. Introd. § 70].

A second objection may be brought on the plea that the traditional date (7th to middle of Cth century B.C.) would not allow of the lapse of sufficient time to account for the difference in language between the Gathjis and the Old Persian inscriptions and for certain apparent developments in the faith. Furthermore, that a longer period of time must be allowed to account for the difference between the fixed title *Auramazda, 'Qpofiao-brjs,* current in western Persia in Achaemenian times, and the divided form of the divine name *Ahura Mazda* (or *Ahura* alone and *Mazda* alone) as found in the Avesta, especially in the Zoroastrian Gathas. This point has been noticed in the interesting and instructive paper of Professor Tiele, *Over de Oudheid van het Avesta,* p. 16,[1] who comes to the result that Zoroastrianism must have existed as early as the first half of the 7th century B.C.[2] If we accept, as I believe we should, the theses that Vishtaspa ruled in eastern Iran, and that, although Zoroaster was a native of Adarbaijan, the chief scene of his religious activity was eastern Iran,[8] and that the faith spread from Bactria westwards,[4] I cannot see that these arguments militate against the traditional date under discussion. Dialectic differences between the Bactrian region and Persia Proper would sufficiently account for arguments based on language alone. This, added to national and

individual differences, might well account for the fixed form of the name *Auramazda* among the Achaemenians as contrasted with the Avestan form. Who can say how rapidly the creed spread from the east to the west and what changes consequently in a short time may have resulted? New converts in their zeal are often more radical in progressive changes than first reformers. Per-
[= orig. p. 18] sis, with its original difference in dialect, may in short time have developed the single title *Auramazda* from *Ahura Mazda* as watchword of church and state. See also note, p. 20, top [= p. 174].

[2] Tielo's little work argues admirably for the antiquity of the A vesta as opposed to Darmesteter's views for the lateness of the Gathas. I wish I could be convinced by Professor Tiele (p. 19) that the names of the Median kings, Phraortes *(fravasi)*, Kyaxares *(uvaxtatara)*, Deiokes *(*dahyuka)* as well as Eparna, Sitiparna of the early Esarhaddon inscription (explained as containing *hvamiah*, 'glory'), are due to concepts originated by Zoroaster and are not merely marks of beliefs which Zoroastrianism inherited directly from existing Magism. The name of Darius's contemporary Khsathrita (Bh. 2. 15; 4. 19, Bh. e. 6) is not so important for the argument. I confess I should like to place Zoroaster as early as the beginning of the 7th century. The earlier, the better. [On Phraortes viewed as a Zoroastrian, compare more recently, Justi, in *Preuss. Jahrbucher*, Bd. 88, p. 208; *Grundriss d. iran. Philol.* ii. p. 411.]

[3] On eastern Iran, cf. Geiger, *Ostiranische Kultur* (Erlangen, 1882) and English translation of same, Darab D. P. Sanjana, *Eastern Iranians* (London, 1885-1886).

[4] See Jackson, *Zoroaster's Native Place, JA OS.* xv. 230 seq. So in spite of Spiegel, *ZDMG.* xlv. 198 seq.

A final objection may be raised as to the real historic worth and chronological value of the Persian tradition which places Zoroaster three centuries before Alexander. This it must frankly be said is the real point of the question. Is there a possibility of Arabic influence at work upon the statements of the Bundahishn and Arta Viraf [and Zat-sparam]? Is the whole chronology of the Bundahishn and that of the Persians artificial?[1] And did the Zoroastrians intentionally tamper with history and bring Zoroaster down as late as possible in order that the millennial period might not be regarded as having elapsed without the appearance of a Saoshyant, or Messiah?

[1] Spiegel, *Eranische Alterthumskunde,* i. 506, with Windischmann, regards the data of the Bfndahishn as ' unzuverlassig,' but it must be remembered that his figures, ' 178' years for the period between Zoroaster and Alexander, now require correction to 258, which alters the condition of affairs. See West, *SBE.* v. 160-151, and Spiegel, *ZDMG.* xlv. 203. Compare especially de Harlez, *Avesta traduit,* Introd. p. ccxxviii.

These questions require serious consideration in detail. The introduction to the chronological chapter of the Bundahishn (Bd. 34) does indeed read, according to one MS., 'on the reckoning of the years of the Arabs' (see Bundahishn translated by West, *SBE.* v. 149), but the word Tazhikan 'of the Arabs' is not found in the other manuscripts. Moreover, the scientific investigator AlbirunI, and also the Mujmal al-Tawarlkh, whose data agree exactly with the Bundahishn, affirm that the dates given for the Kayanian kings are obtained from the records of the Persians themselves.[1]

There seems no reason, therefore, to doubt that the [= orig. p. 19] Bundahishn really represents the Persian chronology.

But what the value of that chronology may be, is another matter. Personally I think it has real value so far as giving the approximate period of three centuries before Alexander as Zoroaster's era. Every student of the classics knows the part that chronology plays with reference to the Magi; every reader of the Avesta is familiar with 'the time of long duration;' every one who has looked into the scholarly work of AlbirunI will have mote respect for Persian chronology. Errors indeed there may be; attention has been called above to the lack of agreement between the years assigned by tradition to the reigns of the Zoroastrian Kayanian monarchs and the generally accepted dates of the reigns of Cyrus, Darius, and Xerxes[1]; to the dynasty of these three kings there corresponds only the long rule of Vishtaspa (120 years) and a part of that of Bahman Ardashlr Birazdast, some of whose reign answers to that of Artaxerxes Longimanus. As above said, it is difficult to identify the Kayanians of the tradition with the early Achaemenians of Greek history, but this need not nullify the real value of the traditional ' three centuries before Alexander' What MasudI (c. A.D. 943) in his *IndiccUio et Admonitio* can add on this subject is full of interest. Little attention seems thus far to have been drawn to this important passage and to the explanation which it contains.[2] MasudI is fully aware of the difference that exists between the Persian and the generally accepted chronology and he shows how it was brought about by

Ardashlr's purposely shortening the period between Alexander and himself by causing about half the number of years to be dropped from the chronological lists, but the 300 years of Zoroaster before Alexander were allowed to remain untouched, for the old prophecy regarding the time of Alexander's appearance had been fulfilled. The passage in Barbier de Meynard is well worth consulting.[3]

C. RESULTS.

To draw conclusions, — although open to certain objections, still, in the absence of any more reliable data or until the discovery of some new source of information to overthrow or to substantiate the view, there seems but one decision to make in the case before us. From the actual evidence presented and from the material accessible, one is fairly entitled, at least, upon the present merits of the case, to accept the period between the latter half of the seventh century and the middle of the sixth century B.C. [perhaps still better, between the middle of the seventh century and the first half of the sixth century B.C], or just before the rise of the Achaemenian power, as the approximate date of Zoroaster's life.[1]

[= orig. p. 20] [1] Since the above was written Dr. E. W. West writes me (under date December 19, 1895) the interesting piece of information that his investigations into the history of the Iranian calendar have led him to the date B.C. 605 as the year in which a reform in the Persian calendar must have been instituted. He suggests that Darius, upon the conclusion of his wars and during the organizing of his kingdom and putting in force new acts of legislation, may with the aid and counsel of his priestly advisers have introduced the Zoroastrian names of the months which have supplanted the old Persian names which were given in the inscriptions. If this be so, the point may have a special bearing towards showing that the Achaemenians were Zoroastrians. From Albiruni, *Chronology,* pp. 17, 12 ; 55, 29 ; 205, 2 ; and 220, 19 (transl. Sachau), we know that Zoroaster himself must have occupied himself with the calendar. Benfey u. Stern, *Ueber die Monatsnamen einiger alter Volker,* p. 116, regarded the Medo-Persian year as having been introduced into Cappadocia probably

as early as B.C. 750. [Dr. West's paper on the Parsi calendar has just appeared in *The Academy* for April 23, 1896.] [Later postscript (1898), West gives his results in *SBE*. xlvii. Introd. § 70 seq.]

Similar results have been reached by others, or opinions to the same effect have been expressed; for example, Haug,[1] Justi (private letter),[2] Geldner (personal communication),[3] Casartelli,[4] and several names familiar to those acquainted with the field.[5] Some effort might be made perhaps if the premises will allow it, and some attempts have been made, to define the period more exactly by a precise interpretation of the various time-allusions with reference to cardinal events in Zoroaster's life — the beginning of his ministry at the age of 30, the conversion of Vishtaspa in the prophet's 42d year, the death of Zoroaster at the age of 77 years.[6] [See Appendix III.]

[1] Cf. Haug, *Essays on the Par sis* (West's Introduction, p. xlv.) ; although Haug had previously adopted various earlier eras for Zoroaster, e.g. B.C. 2300 *{Lecture on Zoroaster),* Bombay, 1865), not later than B.C. 1000 *(Essays,* p. 299, where the subject is discussed; cf. also *Essays,* pp. 15, 136, 264).

[2] Personal letter from Professor Justi, dated June 14, 1892.

[5] The best collections of material on the subject are to be found in de Harlez, *Avesta traduit,* 2d ed. Introduction, pp. xx-xxv, ccxiv. [See also de Harlez, *The Age of the Avesta,* in *JAOS.,* New Series, xvii. 349, London, 1885, who finds no reason to place the Avesta earlier than 600 or 700 B.C, or in broader terms fixes 'the epoch of Zoroastriamsm and the Avesta between 700 and 100 B.C.'], Spiegel, *EA.* i. 673-676, and Windischmann, *Zoroastrische Studien,* pp. 147, 162, 305 ; the latter suggested *(Zor. Stud,* p. 164) about B.C. 1000 as Zoroaster's date. The present writer *(Avesta Grammar,* p. xi) once held the opinion that Zoroaster lived 'more than a thousand years before the Christian era.' The date assigned by the Parsi Orientalist K. R. Kama is about B.C. 1300.

[6] E.g. Anquetil du Perron, *Zend-Avesta,* i. Pt. 2, p. 6, 60-62, assigns B.C. 589-512 as the age of Zoroaster ; compare also Kleuker, *Anhang zum Zend-Avesta,* Bd. i. Thl. 1, pp. 327-374 ; Thl. 2, pp. 51-81 (Foucher). [Anquetil's monograph should be consulted.] Floigl *(Cyrus und Herodot,p-* 18), following Roth, gives B.C. 509-522 as Zoroaster's era and identifies Vishtaspa with Hystaspes the father of Darius. Neither Floigl nor Roth seem to take any account of the difference between the genealogy of Vishtaspa's ancestors as given in the Old Persian inscriptions and the lineage given in the Avesta, Pahlavi, and later Persian works. Floigl does not, moreover, sufficiently take into consideration (p. 17) that 42 years (or at least 30) must be

added in every instance to the 268 years before Alexander, as that was Zoroaster's age when Visht&spa accepted the Faith. This would in any event place the date of Zoroaster's birth before
. 600.

[= orig. p. 21] The above results, if they be accepted in the light at least of our present information on the subject, seem to be not without importance for the history of early religious thought and of the development of ethical and moral teaching. If one carefully works through the material, it must be acknowledged that the most consistent and the most authoritative of all the actual statements upon the subject place the appearance of the prophet at a period between the closing century of Median rule and the rising wave of Persian power, that is, between the latter half of the seventh century and the middle of the sixth century B.C.; [better between the middle of the seventh century and the former half of the sixth century B.C.]. It is the sowing of the fallow land that is to bring forth the rich fruits of the harvest. The teaching of Zoroaster must have taken deep root in the soil of Iran at the time when the Jews were carried up into captivity at Babylon (586-536), where they became acquainted with 'the law of the Medes and Persians which altereth not'; the time was not far remote when the sage Confucius should expound to China the national tenets of its people, and the gentle Buddha on Ganges' bank should preach to longing souls the doctrine of redemption through renunciation. How interesting the picture, how full of instruction the contrast! And in this connection, the old question of a possible pre-historic Indo-Iranian religious schism[1] comes perhaps once again into consideration.[2] Certain theological and religious phenomena noticeable in Brahmanism are possibly not so early, after all, as has generally been believed. It may perchance be that Zoroastrianism in Iran was but the religious, social, and ethical culmination of the wave that had been gathering in strength as it moved along, and that was destined in India to spend its breaking force in a different way from its overwhelming course in the plateau land northwest of the mountains of Hindu Kush.

[1] The view strongly upheld by Haug.

[2] Deductions that might perhaps be made in the light *of* Hopkins, *Religions of India,* pp. 177,186, 212, n. 3. Consult especially the suggestive hints of Geldner, article ' Zoroaster' *Encyclopaedia Britannica,* where the much-mooted question of *asura-ahura, daeva-deva, '* god-demon,' is discussed.

The kingdom of
was the scene of Zoroaster's zealous ministry, as I presume. [The question raised on this point is noticed in the present volume.] Born, as I believe, in Atropatene, to the west of Media, this prophet without honor in his own country met with a congenial soil for the seeds of his teaching in eastern Iran. His ringing voice of reform and of a nobler faith found an answering echo in the heart of the Bactnan king, Vishtaspa, whose strong arm gave necessary support to the crusade that spread the new faith west and east throughout the land of Iran. Allusions to this crusade are not uncommon in Zoroastrian literature. Its advance must have been rapid. A fierce religious war which in a way was fatal to Bactria seems to have ensued with Turan. This was that same savage race in history at whose door the death of victorious Cyrus is laid. Although tradition tells the
sad story that the fire of the sacred altar was quenched [= orig. p. 22]
in the blood of the priests when Turan stormed Balkh,
this momentary defeat was but the gathering force of victory; triumph was at hand. The spiritual spark of regeneration lingered among the embers and was destined soon to burst into the flame of Persian power that swept over decaying Media and formed the beacon-torch that lighted up the land of Iran in early history. But the history of the newly established creed and certain problems in regard to the early Achaemenians as Zoroastrians belong elsewhere for discussion.

[Addendum 1. In an article on ' The Date of the A vesta,' *The Times of India,* March 11, 1808, now draws attention to the fact that Darab Dastur Peshotan Sanjana has again called up the proposed identification of Avestan Naidhyah Gaotema (in Yt. 13. 16) with the *rishi* Gautama whose son is Nodhas in the Veda. See this pamphlet *Observations on Darmesteter's Theory,* pp. 25-31, Leipzig, 1898. On his point and on the other suggested identifications of the Avestan Gaotema with Gotama the Buddha, or with the Brahman Cangranghacah (see pp. 85-88 above), we may refer to what has been said by Windischmann, *Mithra,* p. 29, and to the references and discussion given by Justi, *Handbuch der Zendsprache,* p. 99 (Leipzig, 1864), where good material will be found. Justi's statement in his *Iran. Namenbuch,* p. 110 (Marburg, 1895) reads: ' Gaotema, vielleicht Name eines Gegners der Zarathustrischen Religion Yt. 13.16; das Wort kbnnte auch appellativ sem; Sanskrit gdtama.'

In the passage I do not think that the words *nd vydxano* necessarily refer to Zoroaster at all, but that they allude to some later follower of the Faith who may have vanquished in debate some opponent of the Zoroastrian creed. Notice also Justi's ' eines Gegners der Zarathustrischen Religion.' I cannot therefore see that we shall lose anything if we accept the view which was first suggested

by

, and interpret this allusion to Gaotama as a thrust at Buddhism, and regard *ndidydh* as a derogatory attribute, or connected with the Vedic root *nddh.*

Color is given to such an interpretation because, farther on in the same Yasht (Yt. 13. 97), mention is made of the pious Sa6na, a great religious teacher and successor of Zoroaster, who flourished between one hundred and two hundred years after the prophet himself, or B.C. 531-431, if we accept the traditional Zoroastrian chronology, and who might therefore have been a contemporary with Buddha. Upon the date of Saena, see also Jivanji Jamshedji Modi, *The Antiquity of the Avesta,* Bombay, June, 1896. Saena belonged to the ancient territory of Saka-stana (Seistan) and thus to the region of White India; cf. p. 46, n. 4, 72, n. 3, 87, n. 1, and Appendix IV.

Now if in the particular case of Saena (and the lines are metrical and therefore probably original) the Yasht actually makes mention of a Zoroastrian apostle who lives a century or more after the great teacher, I do not think we are necessarily forced to place Gaotama back into the Vedic period. In other words, in the case of Gaotema as of Saena, the Yasht may be alluding to one who is born after Zarathushtra, and may be hurling anathemas against an opposing and heretical religion (and that religion Buddhism) which began to flourish about the same time as the Yasht may have been written. Of the various identifications I should prefer that of Gotama the Buddha, rather than to call in the Vedas and Gautama whose son is Nodhas.]

[Addendum 2. My pupil, Mr. Schuyler, draws my attention to a reference in a work that was published in the middle of the last century, which is of interest because it deals with the Huns and places the date of Zoroaster about the year '683 avant Jesus-Christ.' The reference is Deguignes, *Histoire genirale des Huns,* i. Pt. 2, p. 376, Paris, 1766.]

DR. WEST'S TABLES OF ZOROASTRIAN CHRONOLOGY

AS BASED UPON THE MILLENNIAL SYSTEM OF THE BUNDAHISHN

(From *Sacred Books of the East,* xlvii. Introd. § 55.)[1]

AFTER investigating the traditional Zoroastrian chronology of the Bundahishn, and the statements of the other Pahlavi texts, which have been recorded in the preceding Appendix, Dr. E. W. West has compiled a series of chronological tables, synchronizing the Zoroastrian and European systems. The statement of Bd. 34. 7, 8, places the death of Alexander 272 years after the coming of the religion, i.e. after the thirtieth year of Zoroaster's life and of Vishtaspa's reign. Combining these dates, and allowing for an apparent omission of thirty-five years (which is explained), the items 323 + 272+ 35 give as a result B.C. 6G0-583 as the date of Zoroaster, and B.C. 660-540 for Vishtaspa's reign,[2] which in Oriental manner is apparently conceived of as dating from the king's birth. West's tables are now presented *(SBE.* xlvii. Introd. pp. xxviii-xxx) : —

' If we adopt the abbreviations A.R. for " *anno religionis* " and B.R. for "*before the religion*" we are prepared to compile the following synopsis of Zoroastrian Chronology according to the millennial system of the Bundahishn, extended to the end of time, but dealing only with traditional matters, combined with the European dates of the same events, deduced from the synchronism of A.R. 300 with B.C. 331, as stated above in § 54:' —

B.R. 9000, B.C. 9630. Beginning of the first millennium of Time; and formation of the Fravashis, or primary ideas of the good creations, which remain insensible and motionless for 3000 years (Bd. I, 8 ; XXXIV, 1).

[2] See *SBE.* xlvii. Introd. § 70.

B.R. 6000, B.C. 6000. Beginning of the fourth millennium, when the spiritual body of Zaratusht is framed together, and remains 3000 years with the archangels (Dk. VII, ii, 15, 16), while the primeval man and ox exist undisturbed in the world, because the evil spirit is confounded and powerless (Bd. I, 20, 22 ; III, 1, 3, 6; XXXIV, 1).

B.R. 3000, B.C. 3000. Beginning of the seventh millennium, when the evil spirit rushes into the creation on new-year's day, destroys the primeval ox, and distresses Gayomarfc, the primeval man (Bd. I, 20; III, 10-20, 24-27 ; XXXIV, 2). Z. appears to remain with the archangels for 2969 years longer.

B.R. 2970, B.C. 3600. GaySmarfc passes away (Bd. Ill, 21-23; XXXIV, 2).

B.R. 2930, B.C. 3560. Masye" and MasyaOi had grown up (Bd. XV, 2; XXXIV, 3).

B.B. 2787, B.C. 3417. Accession of Hoshang (Bd. XXXIV, 3).

B.R. 2747, B.C 3377. Accession of Takhmorup (ibid. 4).

B.R. 2717, B.C. 3347. Accession of Yim (ibid.).

B.R. 2000, B.C 2630. Beginning of the eighth millennium. Accession of Dah&k (ibid. 4, 5).

B.R. 1000, B.C 1630. Beginning of the ninth millennium. Accession of Fretun (ibid. 5, 6).

B.R. 500, B.C 1130. Accession of Manushcihar (ibid. 6).

B.R. 428, B.C 1058. Spendarmat comes to Manushcihar at the time of Frasiyav's irrigation works (Zs. XII, 3-6). [West's brief remarks on correction of the MSS. here omitted.]

B.R. 380, B c. 1010. Accession of Auzobo (Bd. XXXIV, 6).

B.R. 375, B.C. 1005. Accession of KaI-Kobat (ibid. 6, 7).

B R. 360, B.C. 990. Accession of Kai-Us (ibid. 7).

B.R. 300, B.C. 930. Zaratusht first mentioned by the ox that Srito" killed (Zs. XII, 7-20).

B.R. 210, B.C. 840. Accession of Kai-Khusroi (Bd. XXXIV, 7).

B R. 150, B.C. 780. Accession of Kal-Lohrasp (ibid.).

B.R. 45, B.C 675. The Glory descends from heaven at the birth of Duktak (Zs. XIII, 1).

B.R. 30, B.C 660. Accession of KaI-Vishtasp (Bd. XXXIV, 7). VohumanG and AshavahishtO descend into the world with a stem of Hom (Dk. VII, ii, 24). Zaratusht is born (ibid, v, 1).

B.R. 23, B.C. 653. Z. is seven years old when two Karaps visit his father, and Durasrobo dies (Dk. VII, hi, 32, 34, 45).

B.R. 15, B.C. 645. Z. is fifteen years old when he and his four brothers asK for their shares of the family property (Zs. XX, 1).

B.R. 10, B.C. 640. Z. leaves home at the age of twenty (ibid. 7).

A.R. 1, B.C. 630. Beginning of the tenth millennium. Z. goes forth to his conference with the sacred beings on the 45th day of the 31st year of Vishtasp's reign (Dk. VII, iii, 51-62; VIII, 51; Zs. XXI, 1-4).

A.R. 3, B.C. 628. Z. returns from his first conference in two years, and preaches to Aurvalta-dang and the Karaps without success (Dk. VII, iv, 2-20).

A.X. 11, B.C. 620. After his seventh conference, in the tenth year he goes to*

Vishtasp; Metyomah is also converted (ibid. 1, 66; Zs. XXI, **3;** XXIII, **1,2,8).**

A.R. 13, B.C. 618. Twelve years after Z. went to conference, Vishtasp accepts the religion, though hindered for two years by the Karaps (Dk. VII, v, l;Zs. XXIII, 6, 7).

A.R. 20, B.C. 611. A Kavlg, son of Kfindah, is converted (Zs. XXIII, **8).**

A.R. 30, B.C. 601. Defeat of Arjasp and his KhyGns (ibid).

A.R. 40, B.C. 691. VohunSm is born (ibid.). About this time the Avesta is written by Jamasp from the teaching of Z. (Dk. IV, 21; V, iii, 4; VII, v. 11). [Compare also Dk. III. vii, 1, *SBE.* xxxvii. 406.]

A.R. 48, B c. 683. Z. passes away, or is killed, aged seventy-seven years and forty days, on the 41st day of the year (Dk. V. iii, 2; VII. v, 1; Zs. XXIII, 9).

A.R. 68, B.C. 673. Arrival of the religion is known in all regions (Dk. VII, vi, 12). [Compare also Dk. IV, 21-22, *SBE.* xxxvii. 412-413.]

A.R. 63, B.C. 568. Frash5shtar passes away (Zs. XXIII, **10).**

A.R. 64, B.C. 567. Jamasp passes away (ibid.)

A.R. 63, B.C. 558. Hangaurush, son of Jamasp, passes away (ibid.).

A.R. 80, B.C, 551. Asmok-khanvato passes away, and Akht the wizard is killed (ibid.).

A.R. 91, B.C. 540. Accession of Vohuman, son of Spend-dat (Bd. XXXIV, **7, 8).**

A.R. 100, B.C. 531. Seno is born (Dk. VII, vii, 6).

A.R. 200, B.C. 431. Seno passes away (ibid.; Zs. XXIII, **11).**

A.R. 203. B.C. 428. Accession of Humal (Bd. XXXIV, **8).**

[Some additional dates are given by Dr. West, which include the invasion of Alexander (A.R. 300 = B.C. 331) and his death (A.R. 308 = B.C. 323), and carry the chronology down to the final millennium of the world (A.R. 3028, A.D. 2398).]

INTRODUCTION[1]

WITH regard to the native place of the founders of three of the great Oriental religions — Buddhism, Confucianism, Mohammedanism — the authorities are in agreement for the most part, and the recent discoveries with reference to Buddha's birthplace have rendered assurance doubly sure at least in his case. With respect to Zoroaster's native land, however, and with regard to the exact early-home of Zoroastrianism, the case is different. In classic times

[1] [The question with regard to Zoroaster's native place has been examined by the present writer in *JAOS.* xv. 221-232. Some of the material which was briefly presented at that time is reproduced here, but it has been largely augmented and rewritten, and the subject is now treated entirely anew, especially with regard to the scene of Zoroaster's ministry.]

seven cities claimed a share in the honor of being the birthplace of the poet

hardly less can be said of the prophet Zoroaster, if we take into account the various opinions which have been held on the subject of his origin. The question is one of interest, for with this problem there is also closely connected the question as to where we shall place the cradle of the religion of Mazda.

The natural uncertainty as to whether a religious teacher's birthplace or early home is necessarily identical with the scene of his religious activity complicates the problem considerably. Manifestly it is fallacious to assume that the scene of Zoroaster's ministry must likewise of necessity have been his place of origin. This fact must be kept in mind when we examine the arguments that have been brought forward by some to prove that the east of Iran, or Bactria, must assuredly have been the original home of Zoroaster as well as the scene of the reform work of the so-called 'Bactrian Sage/ The same fact, on the other hand, must be kept equally in view when the claim is made that Zoroaster came from western Iran, whether from Atropatene or from Media Proper, or from Persia. In the present memoir an endeavor will be made to keep the two sides of the question apart, and to discuss, (1) first, the question of Zoroaster's native place; (2) second, the scene of his ministry.

With regard to the disposition of the subject, authorities are agreed that we must look either to the east of Iran or to the west of Iran for a solution of the problem. The question of north or of south is excluded by the nature of the subject. Since this is the case, we may examine the general points of view, and resolve these into three classes: —

1. First, the view that the home of Zoroaster is to be placed in the east of Iran, in the Bactrian region, and that the scene of his religious reform belongs especially to that territory.

2. Second, the view that the home of Zoroaster is to be placed in western Iran, either in Media Proper (Media Rhagiana) or in Adarbaijan (Atropatene), and that the scene of his ministry was confined to that region.

3. Third, a compromise view, which maintains that Zoroaster arose in western Iran, in Adarbaijan (Atropatene), or in Media Proper (Media Rhagiana), but that he taught and preached in Bactria as well.

In this threefold summary it will be noticed in the first place that Persis, or Persia in the restricted sense, is left out of considera-

tion — a justifiable omission because there is no especial ground **for** believing that Zoroaster originated in Persia itself. In the second place, it may be stated that there seem to be just reasons for coming to a definite conclusion that Zoroaster actually arose in the west of Iran. In the third place, it may be added that a definite conclusion as to the scene of Zoroaster's ministry need not for the moment be drawn, but that this problem must be discussed as a sequel to the question of his place of origin.

With these points to be kept in mind by way of introduction, and with this word of caution, we may proceed to examine the testimony of antiquity on the subject, which is the source from which we draw our information; after that we may go on to present arguments, or to draw deductions, which are based upon the material that is gathered. A division of the sources may be made into two classes: *(a)* Classical sources, Greek or Latin; *(b)* Oriental authorities, either Iranian or non-Iranian. The testimony of these witnesses will be taken first with reference to the light they may throw upon the native country of the Prophet.[1]

[1] **Partial Bibliography. For general references, see Jackson, *Where was Zoroaster's Native Place ? JAOS.* xv. pp. 221-232. Consult also Appendix V. below. The principal classical passages have likewise already been given by Windischmann, *Zoroastrische Studien,* p. 260 seq. (tr. by Darab D. P. Sanjana, *Zarathushtra in the Gathas and in the Greek and Roman Classics,* p. 65b, Leipzig, 1897). This material is now to be supplemented considerably by references which have since become accessible in Pahlavi literature, and by abundant allusions found in Arabic and Synac writers. For the latter, see Gottheil, *References to Zoroaster in Syriac and Arabic Literature,* Drisler Classical Studies (Columbia University Press), New York, 1894; for example, pp. 32, 33 *(bis),* 34, 37, 39, 40 *(bis),* 42 n., 44, 48 *(bis).* These latter ' References to Zoroaster' will be constantly referred to in the present article. Furthermore, the general question of Zoroaster's native place has often been discussed; it is sufficient to mention Hyde, *Historia Religionis veterum Persarum,* p. 310 seq., Oxon. 1700; Barnabe' Brisson, *Be regio Persarum Principatu,* p. 385 seq., editio Argent. 1710 (orig. ed. Paris, 1690) ; Anquetil du Perron, *Zend-Avesta,* tome i. Pt. 2, p. 5 seq., Paris, 1771; Spiegel, *Eranische Alterthumskunde,* i. 676-684 (tr. by Darab D. P. Special notice is not taken here of works relating to the home of the Avesta itself as a sacred book, although this question is more or less directly connected with the present subject.

I. ZOROASTER'S NATIVE PLACE

A. Classical References to Zoroaster's Nationality

The classical references which allude to the country of Zoroaster seem very contradictory if they be viewed alone, and they are doubtless responsible for much of the uncertainty which has prevailed on the subject. It must also be remembered that a man is sometimes known to fame through his adopted country rather than through the land of his nativity. Although often conflicting, these classical references are of service in argument; it is well, therefore, briefly to present them, first giving those statements which connect Zoroaster's name with the west of Iran, with Media or Persia; second, giving those citations which imply that Zoroaster belonged to Bactria or eastern Iran. Most of the allusions date from the earlier centuries of the Christian era, or somewhat later, although claims may be made in one or two instances that the statements rest directly upon older authority.

1. Bactria—Classical References placing Zoroaster in Eastern Iran

Several allusions in the classical writers of Greece and Rome point to the fact that Zoroaster was thought of as a Bactrian, or, at least, as exercising his activity in the east of Iran. The writers seem to have somewhat of a hazy notion that Zoroaster was not a Magian only, but that he was a king and military leader, the opponent of Ninus and Semiramis. There appears to be a reminiscence of an early struggle between a presumable eastern Iranian monarchy and the Assyrian power of the west. Most of the classical allusions to Bactria seem to indicate a common source; this source may reasonably be traced back to a misunderstood allusion

cal material on the subject of the Avestan cradle noted by Geiger, *Vaterland und Zeitalter des Awestd und seiner Kultur*, Abhandlungen der kgl. bayr. Akad. d. Wiss. philos.-philol. CI. 1884, pp. 316-385. Geiger's list may be supplemented by de Harlez, *Der Avestische Kalender und die Heimath der Avesta-Religion*, Berliner Orientalische Congress, Abhdgn. ii. 237 seq., Berlin, 1882 ; Geiger's views are criticized also by de Harlez, *Das Alter und Heimath des Avesta*, Bezzenberger's Beitrage, xii. 109 seq., 1887 ; and by Spiegel, *Ueber das Vaterland und Zeitalter des Awestd, Zweiter Artikel*, in *ZDMG.* xli. 280 seq., 1887. Consult Darmesteter, *Le Zend-Avesta*, iii. Introd. pp. 89-90, Paris, 1893.

in Ctesias.[1] In his legendary accounts, Ctesias refers to wars carried on between Ninus and Semiramis and 'Οξυάρτης (variants, 'Εξαόρτης, Χαόρτης, Ζαόρτης); the allusion in Oxyartes (Av. *Uxšyaŋrəta*) is not to Zoroaster, although Cephalion, Justin, and Arnobius, who draw on Ctesias, make Zoroaster a Bactrian and the opponent of Ninus. The matter has been commented upon above (Appendix II. 154 seq.). The statements of these particular writers, however, are added for the sake of completeness, and they are supplemented by other classical citations. See also Appendix II.

(a) Fragments of Cephalion (A.D. 120) which are preserved in the Armenian version of Eusebius, *Chron.* 1. 43, ed. Aucher, describe the rebellion of the Magian Zoroaster, King of the Bactrians, against Semiramis: *de Zoroastri Magi Bactrianorum regis certamine ac debellatione a Semiramide.* Compare also, in this connection, Georgius Syncellus, Appendix V. § 41 below (cf. ed. Dind. 1. p. 315), and the reputed work of Moses of Khorene, 1.6, 'le mage Zoroastre, roi des Bactriens, c'est a-dire des Medes'; or, on the other hand, Moses of Khorene, 1. 17, ' Zoroastre (Zeratasd), mage et chef religieux des Medes (Mar)' — see Langlois, *Collections des Historiens de l'Armenie,* ii. 59 and 69, also Appendix VI. § 1 below; here Zoroaster is a contemporary of Semiramis, and he seizes the government of Assyria and Nineveh; Semiramis flees before him, and she is killed in Armenia (Langlois, ii. 69). See also Gilmore, *Ktesias' Persika,* p. 30 n.; Spiegel, *Eran. Alterthumskunde,* i. *682*; Windischmann, *Zor. Stud.* pp. 302,303; Muller, *Fragm. Hist Or.* iii. 627, v. 328. (b) Theon (A.D. 130) *Progymnasmata,* 9, περὶ συγκρίσεως, ed. Spengel, *Rhet. Græc* ii. 115, speaks of ' Zoroaster the Bactrian' — Ζωροάστρου τοῦ Βακτρίου — in connection with Semiramis. See Appendix V. § 8 below, and cf. Windischmann, *Zor. Stud.* p. 290; Spiegel, *Eran. Alterthumskunde,* i. 677.

(c) Justin (c. A.D. 120), in his epitome of Pompeius Tragus' *Hist. Philippic.* 1. 1. 9-10, makes Zoroaster a king of Bactria, a Magian, and the opponent of Ninus — *bellum cum Zoroastre rege Bactrianorum.* See Appendix V. § 10 below.

(d) Arnobius (A.D. 297), *Adversus Gentes,* 1. 5, also mentions a battle between the Assyrians and the Bactrians, under the leadership respectively of Ninus and Zoroaster: *inter Assyrios et Bactrianos, Nino quondam Zoroastreque ductoribus.* See Appendix V. § 16.

[1] See also Justi in *Grundr. d. iran. Philol.* ii. 402.

(e) Eusebius (A.D. 300), *Chron.* 4. 35, ed. Aucher, has a like allusion to Zoroaster, Bactria, and Ninus: *Zoroastres Magus rex Bactrianorum clarus habetur adversum quern Ninus dimicavit;* and again (Windischmann, p. 290), *Pmparatio Evang.* 10. 9. 10, ed. Dind. p. 560, **Νίνος, καθ' ὃν Ζωροάστρης ὁ Μάγος Βακτρίων ἐβασίλευσε.** See Appendix V. § 18 below.

(f) Epiphanius of Constantia (A.D. 298-403) *Adv. Hcereses,* Lib. I. torn. i. 6 (torn. i. col. 185 seq., ed. Migne) associates Zoroaster's name with Nimrod, and states that Zoroaster came to the east and founded Bactria: **Ζωροάστρης, ὃς πρόσω χωρήσας ἐπὶ τὰ ἀνατολικὰ μέρη ῥικιστὴς γίγνεται Βάκτρων.** See Appendix V. § 21 below. The same statement is later repeated by Frocopius of Gaza, see Appendix V. § 33 below.

(g) Ammianus Marcellinus, 23. 6. 32, in discussing magic rites, connects Zoroaster's name with Bactria, but identifies Hystaspes (Vishtaspa) with the father of Darius: *cuius scientiae saeculis priscis multa ex Chaldaeorum arcanis Bactrianus addidit Zoroastres, deinde Hystaspes rex prudentissimus, Darei pater.* See Appendix V. § 22 below.

(h) Paulus Orosius (5th century A.D.) states that Ninus conquered and slew Zoroaster of Bactria, the Magician. For the citation and for the Anglo-Saxon version see p. 157 and Appendix V. § 27 below.

(i) Augustine (A.D. 354-430), *de Civ. Dei,* 21. 14 (torn. vii. col. 728, ed. Migne) follows the same idea in making Zoroaster a Bactrian whose name is associated with Ninus: *a Nino quippe rege Assy riorum, cum esset ipse (Zoroastres) Bactrianorum, bello superatus est.* See Appendix V. § 28 below.

(j) Isidorus (A.D. 570-636), *Etymol* 8. 9 (torn. iii. col. 310, ed. Migne): *Magorum primus Zoroastes rex Bactrianorum, quern Ninus rex Assyriorum proelio interfecit;* and he alludes to a statement of Aristotle regarding Zoroaster's writings. See Appendix V. § 38 below. Again Isidorus, *Chron.* (torn. v. col. 1024, ed. Migne): *hac aetate magica ars in Perside a Zoroaste Bactrianorum rege reperta. A Nino rege occiditur.*

(k) Hugo de Sancto Victore (died A.D. 1140), *Adnot. Elucid. in Pentateuchon — in Gen.* (torn. i. col. 49, ed. Migne): *rex Bactriae Nino vicinus et vocatus Zoroastes, inventor et auctor malejkiae mathematical artis.*

2. Media or Persia—Classical References placing Zoroaster in Western Iran

There are nine or ten classical allusions, on the other hand, which connect Zoroaster's name with Media, or rather with Persia, the latter term often being used doubtless in a broader sense.

(a) Pliny the Elder (A.D. 23-79), *N. H.* 30. 2. 1, for example, gives his opinion that the art of the Magi arose in Persia with Zoroaster, but he is in doubt as to whether there were two Zoroasters or only one, and he alludes to a Proconnesian Zoroaster. Thus, in his first statement, he writes, *N. H.* 30. 2. 1, *sine dubio illic (ars Magica) orta in Perside a Zoroastre, ut inter auctores convenit. Sed unus hie fuerit, an postea alius, non satis constat.* Again, in his second statement, when speaking of the Magian Osthanes, who accompanied Xerxes to Greece, he says, *N. H.* 30. 2. 8, *diligentiores paulo ante hunc (Osthanem) ponunt Zoroastrem alium Proconnesium.* See Appendix V. § 5.

Perhaps in this same connection may be mentioned the curious remark of the Scholiast to the Platonic Alcibiades (see Appendix V. § 1 below), to the effect that, according to some, Zoroaster was **a** ' Hellenian,' or that he had come from the mainland beyond the sea: **Ζωροάστρης . . . ὃν οἱ μὲν Ἕλληνα, οἱ δὲ τῶν ἐκ τῆς ὑπὲρ τὴν μεγάλην θάλασσαν ἠπείρου ὡρμημένων [παῖδά] φασι, κ. τ. λ.** See Appendix V. § 1, and cf. Windischmann, *Zor. Stud.* p. 275 n.

(b) Clemens Alexandrinus (A.D. 200) speaks of Zoroaster either as a Mede or as a Persian, with an allusion incidentally to Pamphylia: *Strom,* i. (torn. i. col. 773, ed. Migne), **Ζωροάστρην τὸν μάγον τὸν Πέρσην;** and *Strom,* i. (torn. i. col. 868, ed. Migne), **Ζωροάστρης ὁ Μῆδος.** Cf. again *Strom,* v. on **Πάμφυλος.** See Appendix V. § 13 below.

(c) Origenes (A.D. 185-254), *Contra Celsum* i. (torn. i. col. 689, ed. Migne), speaks of Zoroaster as a Persian—**τὸν Πέρσην Ζωροάστρην.** See Appendix V. § 14.

(d) Diogenes Laertius (flor. c. A.D. 210), *de Vit. Philos. Proozm.* 2, writes of ' Zoroaster the Persian,' —**Ζωροάστρην τὸν Πέρσην,**— and apparently bases various statements which he makes about him on the authority of Hermodorus (B.C. 250?) and Xanthus of Lydia (B.C. 500-450). The text should be consulted; see Appendix V. § 15 below.

(e) Porphyrius (A.D. 233-304), *de Antro Nymph.* 6. 7, refers, at

least, to Zoroaster's retirement into a cave ' in the mountains of Persia': **Ζωροάστρου αὐτοφυὲς σπήλαιον ἐν τοῖς πλησίον ὄρεσι τῆς Περσίδος.** The context shows that the region of Persia in a general sense is intended. See Appendix V. § 17, and cf. Windischmann, *Mithra*, Abh. f. Kunde d. Morgenl. i. *62*, Leipzig, 1857.

(f) Lactantius (about A.D. 300), *Inst.* 7. 15, refers to Hystaspes (Zoroaster's patron) as an ancient king of Media, long antedating the founding of Rome: *Hystaspes quoque, qui fait Medorum rex antiquissimus* (cf. Migne, *Patrolog. Lat.* torn. 6, and Windischmann, *Zor. Stud.* p. 259, 293).

(g) Gregory of Tours (A.D. 538-593), *Hist. Francor.* 1. 5 (col. 164 seq., ed. Migne), identifying Zoroaster with Chus (Cham or Ham), places him among the Persians, to whom he is said to have immigrated: *hiv ad Persas transiit; hunc Persae vocitavere Zoroastrem.* See Appendix V. § 37.

(h) Chronicon Paschale or Chron. Alexandrinum (A.D. 7th century, but with spurious additions A.D. 1042), col. 148 seq., ed Migne, has **<ὁ Ζωρόαστρος ὁ ἀστρονόμος Πέρσων ὁ περιβόητος.** Again the allusion is very general in sense. See Appendix V. § 39.

(i) It may be noted merely in passing that Georgius Syncellus (about A.D. 800), *Chron.* i. p. 147, alludes to a Zoroaster who was one of the Median rulers over Babylon more than a thousand years before the Christian era. No emphasis need be laid upon the passage, nor any stress upon identifying the name necessarily with the Prophet; the chief interest of the allusion consists in its showing that the name Zoroaster was found in Media. See Justi, *Orundriss der iran. Phil.* ii. 402; Windischmann, *Zor. Stud.* p. 302; Haug, *A Lecture on Zoroaster*, p. 23, Bombay, 1865. Consult Appendix V. § 41 below.

(j) Suidas (about A.D. 970), s.v. **Ζωροάστρης,** assumes a second famous representative of the name, a Perso-Median sage **(Περσομήδης, σοφός).** This is evidently the Prophet. See Appendix V. § 45.

(k) Michael Glycas (flourished about A.D. 1150), *Ann. Pars* ii. col. 253, ed. Migne, repeats the statements current about Ninus, Semiramis, and Zoroaster, whom he speaks of under the general term of Persian, **Ζωρόαστρος ὁ περιβόητος Περσῶν ἀστρονόμος,** — and he adds several allusions to the magic art in Media and Persia: **τὴν ἀστρονομίαν λέγονται πρῶτον εὑρηκέναι Βαβυλώνιοι διὰ Ζωροάστρου, δεύτερον δὲ ἐδέξαντο οἱ Αἰγύπτιοι; τὴν δὲ μαγείαν εὗρον Μῆδοι, εἶτα Πέρσαι.** See Appendix V. § 47.

Estimate of **the Classical Allusions.** — The classical allusions on the subject of Zoroaster's nationality are rather contradictory **and** conflicting. They refer to Bactria on the one hand and to Media and Persia on the other. The allusions to Persia are doubtless to be taken in a broad and general sense. It will be noticed, moreover, that the direct place of birth is not necessarily implied in these national appellatives. In point of time, few of the classical passaged are much older than the more direct Oriental allusions; some of them are even later. They are of value chiefly for bringing out both sides of the question of eastern Iran and western Iran, and they are of importance when checked by tradition or when used for throwing additional light on tradition.

B. Oriental References to Zoroaster's Place of Origin —The Tradition

Laying the classical authorities aside, we may now have recourse to the more direct Oriental tradition. For the most part the Oriental material is either directly Iranian or it is Arabic matter drawn from Iranian sources. This gives it a special value. The statements on the subject may therefore be taken up in detail; the allusions found in the Pahlavi or patristic writings of Zoroastrianism will first be presented; these will then be elucidated further by references in Arabic and Syriac authors; and, finally, they will be judged in the light of the Avesta itself. If the Oriental citations be examined critically, they will be found generally to be quite consistent in their agreement on the place of Zoroaster's origin.

Western Iran—Atropatene, Media— the Scene of Zoroaster's Appearance according to Oriental Sources

There is a general uniformity among Oriental writings which touch on the subject in locating the scene of Zoroaster's appearance in western Iran, either in Adarbaijan (Atropatene) or in Media Proper (Media Rhagiana). The city of Urmil (mod. Urumiah, Oroomiah), Shlz, or the district round about Lake Oroomiah (Av. Caecasta or Caecista), and Rai (Av. Ragha) are the rivals for the honor of being his home. The sea of Caecista is the Galilee of Zoroastrianism; Shlz and Ragha, the Nazareth and the Bethlehem of Iran. Urmi and Shlz represent Atropatene; Rai (Ragha) stands for Media Proper.

The rivalry between the two regions mentioned, and the association of Zoroaster's name, first with Media Atropatene (Adarbaijan), and then with the Median Rai (Media Ehagiana), happily finds an explanation in a remark made by Shahrastani (A.D. 1086-1153).[1] This Arab writer gives us the key to the problem when he says of Zoroaster that 'his father was of the region of Adarbaijan; his mother, whose name was Dughdu, came from the city of Rai.'[2]

This statement of Shahrastanl is apparently vouched for by the Dinkart (7. 2. 7-13), from which source we learn that Zoroaster's mother before her marriage with Pourushaspa (Portishaspo) resided in a different district from the latter. As a girl she becomes filled with a divine splendor and glory; the phenomenon causes her to be suspected of witchcraft, and her father is induced by idolatrous priests to send her from his home. She goes to Patiragtaraspo, ' father of a family in the country of the Spitamas, in the district of Alak (or Arak),[3] where she marries Pourushaspa the son. This district is probably connected with the 'Arag province' (Zsp. 20. 4), which latter is undoubtedly a part of Adarbaijan.[4] Furthermore, by way of localization, we note that the village of Patiragtaraspo is stated to have been situated in a valley (Dk. 7. 2. 11-13); and the house of the son Pourushaspa, Zoroaster's father, is elsewhere spoken of as occupying the bank of the river Darej, which may have been the home of the Prophet's parents after they married.[5]

Lastly, by way of introduction, it must be noticed that there is an old proverb in Pahlavi literature which characterizes anything that is preposterous as something that could hardly happen 'even if Rak (or Ragh) and Notar should come together' (Dk. 7. 2. 51; 7. 3. 19; Zsp. 16. 11-13, and cf. Dk. 7. 3. 39). In Zsp. 16. 12-13, these proper names, Ragh and Notar, are explained as 'two provinces which are in Atur-patakan (Adarbaijan), such as are at sixty leagues (para-

sang, i.e. 210 to 240 miles) from Cist;[1] Zaratttsht arose from Ragh, and Vishtasp from Notar. And of these two provinces, Ragh was according to the name of Erico, son of Durssrobo, son of Mtotish-clhar, from whom arose the race of Zaratusht; and Notar was according to the name of Notar, son of Manushclhar, from whom arose the race of Vishtasp.'[2]

So much by way of introduction. We may now proceed to discuss Adarbaijan (Atropatene) and Media (Media Rhagiana) respectively.

1. Adarbaijan (Atropatene)

The connection of Zoroaster with Lake Cascista, Urumiah, Shiz, and the territory round about, may be further illustrated by quotations in Zoroastrian literature.

a. ALLUSIONS IN ZOROASTRIAN LITERATURE

The allusions to Adarbaijan will first be presented, and then an attempt will be made to localize, if possible, the region known in the Avesta as Airyana Vagjah (Phi. Airan-Vej), and the river called Darej or Daraja.

(a) The Bundahishn places the home of Zoroaster in Airan Vej, by the river Daraja. Bd. 20. 32, *Daraja rut pavan Airan Vej, munaS man-l PoruSaspo abitar-i Zaratust pavan bar yehevant, '* the Daraja river is in Airan Vej, on whose bank *(bar)* was the abode of Porushasp, the father of Zaratusht'[3]

(b) The Bundahishn, in another passage, also states that Zoroaster was born near the Daraja River. Bd. 24. 15, *Daraja rut rut-bar an rat, mamanas man-l abltar-l Zaratust pavan balx;*[4] *Zaratust tamman zat*, 'the Daraja River is the chief of exalted rivers, for the abode of Zaratusht's father was upon its banks; and Zaratusht was born there.'

[1] If we assume that Cist (Av. Caecista) is Lake Urumiah, then ' 60 parasangs ' (210-240 miles) would place Ragh and Notar considerably outside of the boundaries of the present Adarbaijan. So noticed by West (personal letter, dated Nov. 1,1897). This would favor the common identification of R&gh, the home of Zoroaster's mother, with the ruins of Ral.

[2] Zsp. 16.11-12 (West's translation, *SBE.* xlvii. 146-147). In the Avesta, Vishtaspa is of the family of Naotairyans, and so also is Hutaosa his wife. Cf. Yt. 5.98 ; 15. 35 and *SBE.* xlvii. 80, n. 1 and p. 70 above.

[3] See also West, *SBE.* v. 82, and p. 204 below.

[4] To be emended ; see the remarks on the reading of the word by West, *SBE.* v. 89, n. 6.

(c) Zat-sparain, 22. 12, makes one of Zoroaster's conferences with the archangels to have taken place ' on the precipitous bank of the Dareja' *(pavan Darejln zbar).* See West, *SBE.* xlvii. 162 n. There can be little doubt that this assertion, like the unequivocal statements of the Bundahishn, rests upon good old tradition; the three allusions accord perfectly with hints which are found in the Avesta itself.

(d) In the Avesta, Vd. 19. 4; 19. 11, we likewise learn that Zoroaster's temptations by Ahriman, as well as his visions of Ormazd and the archangels, took place, in part at least, upon the banks of the river Darej, where stood the house of his father Pourushaspa: Vd. 19. 4, *Drdjya paiti zbarahi nmanahe Pourushaspahe,* 'by the Darej, upon its high bank, at the home *(loc. gen,)* of Pourushaspa.' Compare Phi. *pavan Darejln zbar* in the preceding paragraph. A little farther on in the same chapter we read: Vd. 19. 11, ***pərəsaṯ Zaraθuštrō*** *Ahurdm Mazdam . . . Drdjya paiti zbarahe, Ahurai Mazdāi vaŋhave,, Vohu-Maite dwhano, A$ai* ***Xšaθrāi*** *i,Vairyai,* ***Spəntayāi Ārmatōe,,*** *'* Zoroaster communed with Ahura Mazda on the high bank of the Darej, sitting (?) before the good Ahura Mazda, and before Good Thought, before Asha Vahishta, Khshathra Vairya, and Spenta Armaiti.'[1]

With regard to localizations, there is good ground for believing that Airan j (A v. Airyana Vaejah) is to be identified in part at least with Adarbaijan, and that the ancient Darej of the Avesta (Phl. Daraja) is identical with the modern Daryai. The Daryai RtLd flows from Mt. Savalan (Sebilan), in Adarbaijan, northward into the Aras (Araxes).[2] If the identification be correct and the

ancient Darej, Daraja, was in Atropatene, it is wholly in keeping with what follows; for in this connection may be noticed a later non-Iranian tradition which associates Zoroaster's name with Shiz (cf. Av. Caecista) and with Mt. Savalan. Consult the Map.

This tradition which supports the assumed identification Darej, Daraja, Daryai, is found in the Arabic writer KazwInI (about A.D. 1263).[1] The passage in which Kazwini speaks of Shiz in Adarbaijan is as follows: ' Zaradusht, the prophet of the Magians, takes his origin from here *(i.e.* Adarbaijan). It is said that he came from Shlz. He went to the mountain Sabalan, separated from men. He brought a book the name of which was *Basta.* It was written in Persian, which could not be understood except with the assistance of a commentator. He appeared, claiming the gift of prophecy, at the time of Gushtasp, the son of Lohrasp, the son of Kai-Khusrau, king of Persia.'[2] Mount Sabalan (Savalan) may be the Avestan ' Mount of the Holy Communicants,' with a sacred tree perhaps (Vd. 22. 19, *gairlm spdnto-frasnA, vardhm spdntd-frasnd),* for KazwInI elsewhere says of Sabalan: ' It is related that the Prophet (i.e. Mohammed) said: Sabalan is a mountain between Armenia and Adarbaijan. On it is one of the graves of the prophets. He said further: On the top of the mountain is a large spring, the water of which is frozen on account of the severe cold; and around the mountain are hot springs to which sick people come. At the foot of the mountain is a large tree, and under this there is a plant to which no animal will draw near. If it comes near it, the animal flees away; if it eat of it, it dies.'[3] The religious character of the place, the mountain, the tree, the springs, would answer well for the identification suggested for the modern Daryai Rud in Adarbaijan.

This much having been prefaced with reference to Adarbaijan and with regard to the river near which the Prophet probably passed some of his early years, or in the neighborhood of which he

may have been born (Bd. 24. 15), if not at Urumiah, we are next prepared to take up the question of Alran Vej.

Direct Iranian tradition explicitly connects the opening of Zoroaster's prophetic career with Airy ana VaSjah of the A vesta, or Airan Vsj in Pahlavi. This land is sometimes regarded as mythical; but, like a number of other scholars, I do not agree with that view. I am inclined strongly to favor the opinion of those who think we have good reason for believing that Airyana Vaejah is to be localized in the west of Iran, as the Pahlavi locates it, and that this also points to the notion that Zoroaster originally came from that direction eastward. The Bundahishn expressly connects Alran Vej with Atropatene : Bd. 29. 12, *Alran Vej pavan kust-i Aturpatakan.* The present opinion of scholars tends to uphold this localization.[1] The river Darej, near which stood the house of Zoroaster's father, was in Alran Vej, as already stated, and an identification was accordingly suggested. In the Avesta, moreover, Zoroaster is familiarly spoken of as 'renowned in Airyana Vaejah (Ys. 9. 14, *sruto airyene vaejahe).* The Prophet is also there represented as offering sacrifice in Airyana Vaejah by the river Daitya (see below): Yt. 5. 104; 9. *25;* 17. 45, *airyene vaejahi vawhuyd daityayd.* The Bundahishn likewise alludes to the fact that Zoroaster first offered worship in Alran Vej and received Metyomah (Av. *Maityoi-mciialia)* as his first disciple. The passage reads, Bd. 32. 3,[i] Zaratusht, when he brought the religion, first celebrated worship in Airan Vej and Metyomah received the religion from him.'[2] In the Dinkart also, as well as in the Avesta, the river Daltl and its affluents in the land of Alran Vej form the scene of Zoroaster's first revelation and of certainly one of his interviews with the archangels, the majority of which took place in Atropatene (Dk. 7. 3. 51-54; 4. 29; 8. 60; 9. 23; Zsp. 21.5; 21. 13; 22. 2; 22. 9).[3] In the later Persian Zartusht Namah, Zoroaster passes the Daitl before he proceeds on his mission to King Vishtasp.[4]

The hallowed Daitya[1] — a sort of Iranian Jordan—was perhaps a border stream between two territorial divisions; we recall that Vishtaspa sacrifices ' on the other side of it' (cf. *pasne,* Yt. 17. 49) as discussed elsewhere, p. 211. The proposed identification of the Daitya and its affluents, with the modern Kizel Uzen, Sped or Safed Kud and its tributaries in Adarbaijan has already been mentioned as satisfying most of the conditions of the problem.[2]

/3. ALLUSIONS IN MOHAMMEDAN WRITERS

Having examined the direct Iranian sources in the light of possible allusions to Atropatene, we may now turn to other material on the subject. Mohammedan writers are almost unanimous in placing the first part of Zoroaster's prophetic career in Adarbaijan (Azarbaijan) or in stating that he came originally from that region.[3] The traditions cluster about Urumiah (UrmI) and Shiz. The Arabic name Shiz is the counterpart of an Iranian Clz (from CaScista), or Lake Urumiah.[4] The Arab geographer Yakut (A.D. 1250) describes ' Shiz, a district of Azarbaijan . . . which is believed to be the country of Zaradusht, the prophet of the fire-worshippers. The chief place of this district is Urmiah';[5] and under Urmiah he writes: ' It is believed that this is the city of Zaradusht and that it was founded by the fire-worshippers.' [6]

There are a dozen other such statements which will be given below, but before presenting them it will be well merely to note that two or three Arabic authors allude to Zoroaster as being of Palestinian origin, and they state that he came from that land to Adarbaijan; and they proceed to identify him with Baruch, the scribe of Jeremiah. This confusion is presumably due to their having confounded the Arabic form of the name Jeremiah, *Armiah* («uyo>!)

with Zoroaster's supposed native place Urumiah, *Urntiah* (auyoj).[1] Having noticed this point we may present the Arabic and Syriac allusions to Zoroaster's native place, which are almost unanimous in mentioning Adarbaijan (Azarbaijan).

(a) Ibn Khurdadhbah (about A.D. 816),[2] *Kitdb alrMasdlik wa'l Mamalikf* p. 119 (ed. De Goeje, Leyden, 1889) writes of 'Urmiah, the city of Zaradusht, and Salamas and Shiz, in which last city there is the temple of Adharjushnas, which is held in high esteem by the Magians.'[3]

(b) Ahmad ibn Yahya al-Baladhurl (about A.D. 851) in his *Kitdb Futuh al-bulddn* (De Goeje, *Liber Expugnationis Regnorum,* p. 331. 1, Leyden, 1866), in mentioning the conquest of Adarbaijan, adds the following note: 'Urmiah is an ancient city (of Adarbaijan); the Magians think that Zaradusht, their master, came from there.'[4]

(c) Ibn al-Faklh al-Hamadhanl (about A.D. 910), in his geographical account (ed. De Goeje, Leyden, 1885, p. 286) mentions as cities of Adarbaijan: 'Janzah, Jabrawan, and Urmiah, the city of Zaradusht, and Shiz, in which there is the fire-temple, Adharjushnas, which is held in high esteem by the Magians.'[5]

(d) Tabari (d. A.D. 923), in his history, gives considerable attention to Zoroaster; out of a number of allusions one passage may be selected. It will be noticed, as explained above, pp. 38,166, that Tabari mentions a belief that Zoroaster was a native of Palestine who came to Adarbaijan. In his *Annates,* Part I. p. 648 (Brill, Leyden, 1881), the passage runs: 'During the reign of Bishtasp (Vishtasp) Zaradusht appeared, whom the Magians believe to be their prophet. According to some learned men among the people of the book (i.e. the Jews), he was of Palestinian origin, a servant to one of the disciples of Jeremiah the prophet, with whom he was a favorite; but he proved treacherous and false to him. Wherefore

It is not necessary at this point to repeat also the allusion to 'Persia' in the Christian patriarch Eutychius of Alexandria (A.D. 876-939) when he mentions Zoroaster. This author wrote in Arabic; the passage is given above in a Latin version in Appendix II. p. 168, and it may be found rendered into Latin in Migne, *Patrolog. Gr.,* torn. 111.

God cursed him, and he became leprous.[1] He wandered to Adarbaijan, and preached there the Magian religion. From there he went to Bishtasp, who was in Balkh. Now when he (Zoroaster) had come before him and preached his doctrine to him, it caused him to marvel, and he compelled his people to accept it, and put many of his people to death on its account. They then followed it (the religion). Bishtasp reigned one hundred and twelve years.'?

(e) MasudI (writing A.D. 943-944, died 951) states in his *Meadows of Gold:* ' Gushtasp reigned after his father (Lohrasp) and resided at Balkh. He had been on the throne thirty years when Zardusht, son of Espiman, presented himself before him ... he (Zardusht) was originally from Adarbaijan and he is ordinarily called Zardusht, son of Espiman' [3]

(f) Hamzah al-Isfahanl (A.D. eleventh century) in his *Annals,* p. 22, *26* (Gottwaldt, *Hamzae Ispahanensis Annalium,* Libri x, Lipsiae, 1848) states: ' While King Lohrasp was still living, the sovereignty was handed over to his son Gushtasp; and in the thirtieth year of Gushtasp's reign, when he himself was fifty years old, Zardusht of Adarbaijan came to him and expounded the religion to him. He not only embraced the religion himself, but he also sent messengers to the Greeks in behalf of this faith and invited them to adopt it. They, on the contrary, produced a book which had been given them by Feridun, in which it was agreed that they should be allowed to keep whatsoever religion they had themselves chosen.'[4]

(g) Shahrastani (born A.D. 1086) has the famous statement already noticed, pp. 17, 192: ' They (the Zaradushtiya) are the followers of Zaradusht ibn Burshasb (Purshasp), who appeared in the time of King Kushtasf (Gushtasp) ibn Lohrasp; his father was from Adarbaijan, and his mother, whose name was Dughdu, was from Rai.'[5] According to Shahrastani the Prophet's birth takes place in Adarbaijan.

(h) Ibn al-Athir (A.D. 13th century) incorporates the greater part of Tabari's history into his *Kitab al-Kamil fl al-ta'arikh,* with slight

additions from other sources, and with a more concise arrangement. His account of Zoroaster closely follows Tabarl's lines, including the statement regarding Zoroaster's relation to Jeremiah,[1] and his wandering to Adarbaijan: 'It is said, he adds, that he was a foreigner,[2] and that he had composed a book with which he went around in the land. No one knew its meaning. He pretended that it was a heavenly tongue in which he was addressed. He called it *Ashta*.[3] He went from Adarbaijan to Faris (Persia). But no one understood what was in it, nor did they receive him. Then he went to India and offered it to the princes there. Then he went to China and to the Turks, but not one of them would receive him. They drove him out from their country. He travelled to Ferghanah, but its prince wished to kill him. From there he fled and came to Bishtasp (Vishtasp), son of Lohrasp, who commanded that he be imprisoned. He suffered imprisonment for some time.'[4] And Ibn al-Athir farther on relates: 'Then Bishtasp caused Zaradusht, who was in Balkh, to be brought to him. When he stood before the king he explained his religion to him. The king wondered at it, followed it, and compelled his people to do the same. He killed a large number of them until they accepted (the new religion). The Magians believe that he took his rise in Adarbaijan and that he came down to the king through the roof of the chamber. In his hand was a cube of fire with which he played without its hurting him; nor did it burn any one who took it from his hands. He caused the king to follow him and to hold to his religion, and to build temples in his land for the fires. From this they lighted the fire in the fire-temples'[5]

(i) Yakut (about A.D. 1250) has already been cited, but the allusions from GottheiFs collection (p. 42) are added here for completeness. The *Kitdb Mxijam al-btddan* (vol. iii. p. 354, ed. Wustenfeld) remarks of Shiz: 'It is said that Zaradusht, the prophet of the Magians, comes from this place. Its chief city is Urmiah. . . . In it is a fire-temple which is held in great esteem. From it are lighted the fires of the Magians from the east unto the west' Also, vol. i.

p. 219, Yakut has: 'Urmiah . . . people believe it to be the city of Zaradusht, the prophet of the Magians.'[1]

(j) Kazwini (about A.D. 1263), *Cosmography*, ii. p. 267 (ed. Wtlstenfeld, G6ttingen, 1848), speaking of Shlz in Adarbaijan, recounts: 'Zaradusht, the prophet of the Magians, takes his origin from here. It is said that he came from Shlz. He went to the mountain Sabalan, separated from men. He brought a book the name of which was *Basta.* It was written in Persian which could not be understood except with the assistance of a commentator. He appeared, claiming the gift of prophecy, at the time of Kushtasp, the son of Lohrasp, the son of Kai Khusrau, king of the Persians. He wished to get to Bishtasp, but he did not succeed. Bishtasp was sitting in the hall of state, when the roof of the hall parted in two, and Zaradusht came down from it.' And, after describing some of the details of Vishtasp's conversion, Kazwini concludes: 'Zaradusht commanded that fire-temples should be built in all the kingdom of Bishtasp. He made the fire a Kibla, not a god. This sect continued to exist until the prophet of God (Mohammed) was sent. They say that even to-day a remnant of it is to be found in the land of Sajistan.'[2]

(k) The Syriac writer, Gregorius Bar TEbhraya (about A.D. 1250) in his *Arabic Chronicon*, p. 83 (ed. Salhani, Beirut, 1890), following his Arab masters, says: 'In those days (of Cyrus and Cambyses) Zaradosht, chief of the Magian sect, by birth of Adarbaijan, or, as some say, of Athor (Assyria). It is reported that he was one of Elijah's disciples, and he informed the Persians of the sign of the birth of Christ, and that they should bring him gifts.'[3]

(l) Abulfeda (A.D. 1273-1331), *Annals*, vol. iii. p. 58, as cited by Hyde, states that Zoroaster arose in (*-AS) Urmi* or (auyo J) *Urmiah.* See Hyde, *Hist. Relig. vet. Pers.* p. 311 (1st ed.). Hyde discusses other Arabic references, pp. 312-317. See below, Appendix VI. § 2.

Estimate of the Mohammedan Allusions.—According to the Arabic statements one would be justified in assuming that Zoroaster arose in Adarbaijan; there seems also to be a preponderance of statements to the effect that Balkh was the scene of the Prophet's conversion of Vishtasp.

2. Ragha, Rai (Media Rhagiana)

All the above traditional Oriental allusions have **been** unanimous in placing Zoroaster's origin in Adarbaijan, or Media Atropatene, whether in Urumiah, Shlz, or on the river Darej. There are yet two other passages, drawn from the Avesta, which connect Zoroaster's name with Ragha.

agha is generally identified with the city of Rai (Gk. 'Payat) of Media, whose ancient ruins are still pointed out near modern Teheran. This was a famous city in antiquity, the ' Rages of Media' in the 0. T. Apocrypha.[1] The Pahlavi texts seem to regard it as part of Atur-patakan.[2] Perhaps the boundaries of Adarbaijan were wider extended then than now, although Darmesteter suggests that possibly there may have been a Ragha in Adarbaijan independent of Rai[3] This seems hardly necessary from what follows. We must also remember that Raga in the Ancient Persian inscriptions is a district or province, *dahyu.* The subject of Ragha requires further discussion, but it may be stated at the outset that these allusions, in any event, lend additional weight to the view of Zoroaster's belonging originally to western Iran.

But before taking up the detailed question of Av. *Ragha,* Phl. *Ragh,* Mod. Pers. *Rai,* it will be well to cite an extract from the Dabistan, a work that is late in its present form (about A.D. 1650), but a book which contains old traditions. The passage runs: ' It is generally reported that Zardusht was of Adarbaijan or Tabriz; but those who are not *Beh-dinians,* or "true believers," assert, and the writer of this work has also heard from the Mobed Torru of Busawari, in Gujarat, that the birthplace and distinguished ancestors of the prophet belong to the city of Rai.'[4] With this information we may turn to the Avesta itself.

(a) The first of the two Avesta texts which evidently associate Zoroaster's name in some way with Ragha is Vd. 1. 15, and the Pahlavi version of the passage is interesting. The Avesta passage reads: Vd. 1. 15, *dvadasəm asaŋhąmca ϑōiθranąmca vahiϑəm frāθ-*

vərəθəm azəm yō ahurō mazdā raγąm θrizantūm, , ^ ^e **twelfth most** excellent of localities and places, **I** who am **Ahura Mazda created** Ragha of the three races.' The Pahlavi commentary renders, ***rak*** i *8 toxmak atur-patakano,* i **Rak** of three races, of Atur-patakan,'[1] **and** he adds the gloss, *aetun mun rei yemaleluneto,* 'some say it is Rai' Notice the footnote.[2]

(b) The second of the Avestan passages which connects the name of Zoroaster with Ragha is in Ys. 19. 18. Mention is there made of five regular rulers, ' the lord of the house, the village, the province, and the country, and Zarathushtra as the fifth' This order, as the text continues, holds good for all countries ' except the Zarathushtrian Raji (or *Baghi;* is it Rai ?)." The Zarathushtrian Ragha *(Raya Zara6utri)* has four lords, the lord of the house, the village, the province, and Zarathushtra as the fourth.' The text is appended.

Ys. 19. 18, *Kaya ratavō? nmānyō vīsyō zantunid daKyumo zarctr θuštrō puxδō. dəhąm dahyunąm yā anyā rājōiţ zaraθuštrōiţ. caθru-ratuš raγa zaraθuštriš. kaya aitihd ratavo f nmdnyasca visyasca zantumasca zaraθuštrō tūiryō.* This construction evidently signifies that the *Dahyuma,* or governor, is everywhere the supreme head, but there is acknowledged one who stands above him as representative of the church, as well as state, the chief pontiff Zoroaster *(Zarathushtra),* or the supreme Zoroaster' *(Zarathushtrotema),* as he is elsewhere termed (e.g. Ys. 26. 1; Yt. 10. 115, etc.). In the papal see of Ragha, however, the temporal power (Dahyuma) and the spiritual lordship (Zarathushtra) are united in the one person.[3] For some reason Ragha is plainly the seat of the religious government. The Pahlavi version (ad loc.) speaks of it in connection with Zoroaster as being ' his own district' *(mata-i nafsmari);*[4] the Sanskrit of Ngryosang glosses the allusion by asserting that

[1] Cf. Darab D. P. Sanjana, *Pahlavi Version of the Avesta Vendidad,* p. 8, Bombay, 1895.

[2] Allusion has been made above (p. 202) to the question of a Ragha in Adarbaijan as possibly contrasted with the *'Vdyai* of the Greek, or possibly to a *Raya ZaraBuMrif* different from Rai; cf. also the Anc. Pers. *Ragd* as a district or province, *dahyu;* but that is uncertain.

[3] See also Darmesteter, *Le ZA.* i. p. 170.

[4] Notice the use of ' district,' and elsewhere Ragha is a region as well as a town of Media. On Greek allusions to 'Pcfryai, see also Haug, *Ahuna-Vairya-Formel,* pp. 133-134 (=45-46), Mtinchen, 1872, and the article which is referred to on the preceding page (p. 202, n. 1).

Zoroaster was the fourth lord in this village, because it is his own —*tasmin grame yat sviyam asit asdu gurus caturtho 'bhut.*[1] Ragha is plainly a centre of ecclesiastical power, as remarked above. This fact is further attested by Yakut (i. p. 244), who says there was a celebrated fortress ' in the district of Dunbawand, in the province of Eal' (notice the latter expression), which was the stronghold of the chief priest of the Magians.[2] If Ragha enjoyed such religious prominence there must have been ground for it, and we recall what was said above, in the Dabistan and Shahrastani's statement, which connects Zoroaster's mother's family with Rai.

(c) As a sequel to this, comes an interesting comment in the Selections of Zat-sparam; this has already been noticed (p. 192), but it is worthy of being taken up again at this point, for it is a sort of Iranian adage like Macbeth's Birnam wood and Dunsinane. In Zsp. 16. 11-12, an old proverbial affirmation is used to assert that something is impossible, and that it would not happen—'not though both the provinces of Ragh and Notar should arrive here together'; and the explanatory comment on these proper names is added, ' two provinces which are in Atur-patakan, such as are sixty leagues (parasang, i.e. 210 to 240 miles) from Cist.[3] Zaratusht arose from Ragh, and Vishtasp from Notar.' The rest of the passage and the Dlnkart occurrences of the proverb have been given above (pp. 192-193), and should be consulted.

Ragha (Av. Ragha) like Arabic Shiz is evidently a territorial designation as well as a town title, and certainly the Prophet's family on the maternal side came from there, if we are to place any reliance on tradition. Now, if the Prophet was born in a city of Adarbaijan, whether in Urumiah, in the region of Shiz (Av. CaScista, prob. Urumiah), or on the Darej River—and even Ragh itself appears frequently in Pahlavi to have been regarded as a part of this land—it is by no means unlikely that a man with a mission like Zoroaster would have been drawn to so important a place as Ragha was in antiquity, especially if it was the home of his mother. All which would account for the association of the names together. An attempt has been made by the present writer, in *JAOS.* xv. p. 228-232, more fully to amplify this connection of Ragha with Zoroaster's teaching

[1] Cf. Spiegel, *Neriosengh Skt. Ue- Diet de la Perse*, p. 33; Darmesteter, *bersetz. des Yacna*, Leipzig, 1861, p. 99. *SBE.* iv. p. xlviii. (1st ed.).

and preaching, especially by an attempted explanation of the word *rajii* in Ys. 53. 9.[1] But the passage and the commentary alike are difficult, and enough has been said already to show Zoroaster's with this region.

Conclusion as to Zoroaster's Native Place. — Zoroaster arose in western Iran. Apparently he was born somewhere in Adarbaijan. The places specially mentioned are Urumiah, Shiz (Av. CaScista, prob. anc. Urumiah) and the river Darej. His mother's family was connected with Ragha, which accounts for associating his name with that place; but it is not clear that this was the Median Kal ('Payot of the Greeks) although it was in the west. The latter seems to have been a district as well as town, and is sometimes regarded as a part of ancient Atur-patakan. Zoroaster's youth was also certainly passed in western Iran.

II. SCENE OF ZOROASTER'S MINISTRY

General Remarks

The question regarding Zoroaster's native place may be looked upon as having been answered by placing it in western Iran, at least on the basis of present evidence and opinion. The question as to the scene or scenes of his religious activity, however, is a more unsettled problem. The uncertainty is doubtless due to the conditions of the case; missionary work by a reformer is not confined to a single field. Taking a general view, however, as stated on p. 186, scholars are divided between Media, in the broader sense, and Bactria, with a preponderance perhaps in favor of the former. The present writer has elsewhere maintained the ground that both sides of this question are possibly correct, in part, and that the conflicting views may be combined and reconciled on the theory that the reformer's native place was not necessarily the scene of his really successful prophetic mission.[2] In other words, the opinion was held that Zoroaster may have been a prophet without honor in his own country; that he arose, indeed, in western Iran, probably somewhere in Atropatene; that he presumably went at one time to

[1] First suggested by Geldner, *KZ.* xxviii. 202-203, and further discussed by the present writer in the article alluded to in the next note.

Bagha (perhaps Media Ehagiana), but on finding this an unfruitful field he turned at last to Bactria. Under the patronage of Vishtaspa, his faith became an organized state religion; and then it spread, possibly through religious crusades, westward to Media and Persia. Progress was rapid; the fire of religious zeal was contagious; the district of Ragha, which was once a hot-bed of heresy *(uparo-vimandhim)*, became the head of the established faith of Media. Persia follows suit when she rises into power. That at least was suggested at the time — in other words that we have an earlier instance of the same story as Mohammed, or Mecca and Medina.

Such a view, however, is mere theory or speculation, at least so far as Bactria and the exact spreading of the Creed is concerned. Nevertheless it is not speculation built entirely upon baseless fabric. It has this in its favor, that it is based upon a combination of various statements in Zoroastrian literature which may be united with Arabic and Syriac material, and with Latin and Greek references, so as to make, in part at least, a fairly solid structure. The assumption of a double scene for Zoroaster's life, first for his birth and earlier years, and second for his later years and death, has also been inferred by others, naturally from the tradition.[1] It has an advantage in saving several points of tradition which would otherwise fall; but it is open to several serious objections which will be pointed out as the investigation proceeds. For the present, it will be a better plan simply to bring forward both sides of the question, the eastern and the western view, and to reserve final decision for later. The Bactrian side will first be presented; the arguments in favor of Media will then be arrayed to offset this.

Before proceeding to the discussion, it is proper to recall that we have no direct evidence to prove that Zoroaster spent the first thirty years of his life anywhere but in his native land, if we assume that to be Adarbaijan. At the age of thirty came the Eevelation, the opening of his ministry, and the first of the seven visions that filled the ten or twelve years which elapsed until Maidhyoi-maonha adopted the creed, and King Vishtaspa was converted. The whole of this question has been examined in Chapter IV. As it was there stated

we have information from the DlnkarJ (see pp. 43-46 above), that Zoroaster went and preached before the Turanian AurvaitSrdang after the first conference with Ormazd; furthermore, that he expounded the tenets of his faith to Parshat-gau in Sagastan. From this it is manifest that during the first two years he must, at all events, have been in the east, apparently both northeast and southeast, even if one maintains the view that Vishtaspa lived nearer to the region of his own native land.

This tradition of wanderings to remote lands is in keeping with the Gatha psalm of dejection, *Kara mmdi zam, kuQra namoi ayeni,* 'to what land am I to turn, whither am I to turn' Ys. 46. 1 seq. An echo of it, moreover, as already stated (p. 200), is perhaps to be recognized in Ibn al-Athlr, who recounts how Zoroaster goes from Adarbaijan to Persia, then to India,[1] China, Turkestan, Ferghanah, and that he finally converts Vishtaspa, who seems in this account to be in the east. Perhaps these statements regarding India are due to Zoroaster's having been in Sagastan or Seistan (see also footnote below) which forms part of the territory of White India.[2] It may be noticed that Ammianus Marcellinus also makes Hystaspes (or is it Zoroaster) pass some time studying in India (see Appendix II., p. 167). So much for the two years that followed the first ecstatic vision, and which correspond to different scenes in Zoroaster's missionary labors!

By the close of this period, Zoroaster appears to have wended his way gradually back again toward his native country, as may be inferred from the different localities in which the visions of the next eight years took place. Consult the Map. The second, third, and fourth visions took place on the homeward route to the south of the Caspian Sea, if the identifications in Chapter IV. be correct. The fifth and sixth visions were beheld in the region of the river Daitya and Mount Asnavant (Mount Sahend and the Kizel Uzen; cf. pp. 41, 48). Finally, the last interview with the archangels was manifested to him at his own home on the river Darej (pp. 34, 49,194), which would agree with the Avesta (Vd. 19. 4,11), as this vision is also associated with the temptation by Ahriman. But now for the Bactrian question!

1. Bactria and the East, or the View that Zoroaster's Ministry was in Eastern Iran

Irrespective of the question of the scene of Zoroaster's activity, the whole problem of the home of the Avesta itself, as a literary composition and religious work, has long been a common subject of discussion.[1] The assumption of a Bactrian kingdom which antedated the Median empire, or at least preceded the rise of the Achaemenian power, has generally been maintained by scholars, especially by the historian Duncker.[2] Criticisms of this view will be mentioned later; but it is important to notice that one of the strongest supporters of an eastern Iranian civilization, judging from geographical and ethnographical allusions in the Avesta, is the Iranist, Wilhelm Geiger.[3]

The Avesta itself does not give any definite statement with respect to the situation of Vishtaspa's capital, nor do the Pahlavi texts, to be discussed below, seem more explicit. Nevertheless, the Avestan geographical allusions tend to gravitate toward the east, rather than toward the west.[4] The heroic sagas of the royal line of kings in the Avestan Yashts are located for the most part in the east. According to the Zamyad Yasht (esp. Yt. 19. 66-69), the home of the Kavi dynasty is in Seistan, and this is important to consider because of its bearing on the claim for the east and for Bactria. FirdausI, a native of Tus, moreover, places the scene of the Vishtaspa-Gushtasp cycle in eastern and northeastern Iran, as will be more fully explained below.[5] According to FirdausI (Dakiki), Yakut, Mirkhond, and others, Balkh was founded by Vishtasp's father, Lohrasp.[6] On the Grseco-Bactrian coins is found an

APOOACnO (i.e. Aurvat-aspa, Lohrasp), evidently as heros eponymos of the place.[1] Alblrunl states that Balkh was the original residence of the Kayanians' and Mirkhond speaks of Lohrasp as 'the Bactrian.'[2] Tabarl similarly states that Lohrasp 'established his residence at Balkh' where he places the seat likewise of Lohrasp's son and successor, Vishtasp;[3] yet it must not be forgotten in this connection that Tabarl also considers Nebuchadnezzar and Cyrus to have been generals under Lohrasp and Vishtasp.* Masudi joins in regarding Balkh as the royal capital until the seat of government was transferred westward to Irak in the time of Humai.[5] Other Persian and Arabic chroniclers and geographers place the seat of the Kayanian empire, at the time of Lohrasp and Vishtasp, in Bactria, i.e. to the north of Seistan, and there is a tradition about a portrait of Zoroaster at Balkh, as will be noticed in Appendix VII. The author of the Zartusht Namah and the Cangranghacah Nam ah, who was himself a native of Eai, localizes the scene of the meeting between Zoroaster and Vishtasp in Balkh, where he also represents the famous debate between Zoroaster and the Brahman Cangranghacah to have taken place (cf. p. *85* seq. above). This is interesting when we consider that the writer came from the west and from a city which was so closely associated with Zoroaster's name; he must have had some strong tradition to that effect; his work, moreover, is known to be based upon Pahlavi authorities.[6] In the Dinkart, the meeting took place first on a ' race-course' *(aspanvar)*, but the locality is not indicated, cf. p. 59, n. 2 above. From the Pahlavi treatise ' Wonders of Sagastan' it appears that at one time (perhaps after his conversion) Vishtaspa had conferences with Zoroaster and his apostles in Seistan — see passage translated below, p. 212.

To return to Firdausi. As mentioned above, the Shah Namah connects Lohrasp with Balkh, and describes how the youthful Vishtasp quits the realm and passes the first years of his life in the west, in Rum (the Byzantine Empire).[1] He returns from thence to assume the sceptre of authority. It is not specifically stated that the years which directly followed were actually passed in Balkh, but it is certain that the last part of his reign is regarded as being passed there. Lohrasp himself lives there in retirement after Vishtasp had mounted the throne, and the lapse of time is shown also by the fact that Zoroaster is now spoken of as an old man (Pers. *pir).*[2] Perhaps Vishtasp formed a link between the east and the west, if the texts seem to imply a break in the regular succession as he came to the throne; see p. 223, n. 1 below.

At this point we may turn again to our earlier Iranian sources. As previously observed, neither the Avesta nor the Pahlavi writings are explicit in their statements as to the situation of Vishtaspa's capital. The Dinkart, it is true, speaks several times of the abode' *(man),*'residence' *(baba),* or ' lofty residence' *(buland manisno)* of Vishtasp, but there is nothing precise as to the location.[3] The general allusions to Notar, moreover, have already been noticed above, p. 192, and they will be referred to again, p. 222. The nearest approach in the Avesta to a definite statement regarding Vishtaspa's whereabouts is found in two references to places where he offers sacrifice for victory in battle over Arejat-aspa in the holy war of the Eeligion, or when on a religious crusade. One of these sacrifices is offered ' on the farther side of the water of Frazdanava' (Yt. 5. 108, *pasne apam frazdanaom)* for victory over three unbelievers one of whom is the inveterate foe, Arejat-aspa (Yt. 5. 109, *TaOryavantdm duzdaendni \ PdSandmca daevayasndm | drvantdmca Ardjatraspdm)* But in Yt. 9. 29 = Yt. 17. 49, the same sacrifice is offered again by Vishtaspa for victory over exactly the same three foes, but including also the names of a number of other enemies; and (important to keep in mind) the sacrifice of this latter passage is not celebrated

[4] It might possibly be suggested'that we have in the name Tathryavant a distant allusion to the Tantra philosophy of India; the Shah Namah includes India among the lands to which Vishtasp spread the gospel of Iran (cf. Mohl, iv. pp. 343-344; and above, p. 84 seq.; observe likewise Darmesteter, *Le ZA.* iii. Introd. p. 90). But such a conjecture could add little in favor of the eastern view.

near the Frazdanava, but is offered up on the farther side of the river Daitya. Still further, Vishtaspa's brother Zairivairi (Zarir), who is mentioned directly after Vishtaspa's sacrifice by the Frazdanava in the earlier passage, likewise offers similar worship on the same spot (Daitya), with an identical wish (Yt. 5. 112-113, *pasne cpb Daityayti)*; and directly afterwards in the same Yasht (Yt. 5. 116) Arejat-aspa invokes the same divinity near Vourukasha (Caspian Sea) for victory over Vishtaspa. This latter point will be taken up hereafter, pp. 212-213.

It is necessary to comment anew on the suggested identification of these places. From the discussion above, pp. 41,197, it is to be inferred that the Daitya was a sort of border stream in the west, to be identified with the Kizel Uzen or Safed RM. The river Kizel Uzen is the classic "A/xap8os of Ptolemaeus, in Atropatene, and Andreas describes it as a natural ' markscheide.'[1] The Avestan word pasne is apparently used with a river name like the Latin usage of *trans* in Trans-Rhenanus (opp. Cis-Alpinus), compare the modern Iranian designation of Bia-Pis, ' before the rivers,' as opposed to Bia-Pas, ' back of the rivers,' used in the adjoining territory of Gllan.[2] The various streams which flow into the river to-day would answer to the tributaries of the Daitya that are mentioned in the Dlnkart and Zat-sparam.[3] This is the river of the ' Law,' and the river which Zoroaster apparently crosses on his way to convert Vishtasp.[4]

The Frazdanava, on the other hand, is to be sought in Seistan, in the east, if we accept the statement of the Bundahishn (Bd. 22. 5), and is probably to be identified with the Ab-istadah lake, south of GhaznI.[5] Being a member of the Kayanian line, Kavi Vishtaspa

[5] This view is opposed to Lagarde's *Hrazdan* in Armenia *(Beitrage zur baktr. Lex.* p. 28), but I agree with Geigcr's estimate of Hrazdan in *OIK.* p. 108. The identification of Frazdanava with *Ab-istadah* is mentioned by West *(SBE.* v. 86, n. 3) as being from Justi (see his *Handb. der Zendsprache,* p. 197 b), although Justi now seems

is naturally associated with Seistan and Lake Frazdan. The Pahlavi treatise, 'Wonders of the Land of Sagastan,' makes Seistan the place of Vishtasp's first religious propaganda, and apparently also a place where Vishtasp conferred with Zoroaster and other apostles of the Faith, on matters of religious importance.[1] I am indebted to Dr. West's kindness for a translation of the 'Wonders'; the passage (Wond. of Sag. § 6) reads: ' King Vishtasp produced the progress of religion on Lake Frazdan, first in Sagastan, and afterwards in the other provinces; also King Vishtasp, in conference with Zaratusht, and Seno, son of Ahumstut of Bust,[2] because his disciples of Zaratusht have been the first in his long discipleship, (made) the various Nasks proceed in a family of the good, for the purpose of keeping the religion of Sagastan progressive for being taught' We remember also that Zoroaster went in his earlier years to Seistan to preach to Parshat-gau (pp. 44-45). According to FirdausI, King Vishtasp (Gushtasp) was engaged upon a religious crusade in Seistan and Zabulistan,[3] and was at the abode of the old hero Rustam, who still held out against conversion to Zoroastrianism, when the Turanians under Arjasp stormed Balkh, slew Lohrasp in battle before the walls, and killed Zoroaster.[4] Vishtasp returns from Seistan for the finally routing of Arjasp.[5]

It must be acknowledged that the twofold sacrifice by Vishtasp, once on the Frazdanava and once on the Daitya, causes some difficulty in connection with the identification of scenes in the Holy Wars. As already observed, the Frazdanava sacrifice, when placed in Seistan, certainly refers to the second and final invasion. The

rather to incline toward the view of Hrazdan in Armenia, judging from *Preuss. Jahrb.* Bd. 88, pp. 266-267. Geiger, *OIK.* p. 108, notices the identification of Frazdanava with the Ablstadah, but he prefers to explain the matter differently.

[5] Mohl, iv. 354, 355, 366.

Daitya sacrifice, we may presume, refers to the first invasion, if we make the twofold division mentioned on p. 105; but it is not easy to reconcile this with the assumption that the scenes of the first war belong rather to the territory of Merv (p. 114). Perhaps the Daitya sacrifice is not to be pressed as referring to a special incident, and perhaps the prayer was general; or Vishtasp was crusading in the west at the time; history offers examples of a Christian king of Europe offering up his prayers in the land of the Saracens. Darmesteter[1] does not seem to think it imperative to take the Daitya sacrifice too seriously in the face of the Frazdanava passage which gives a scene located in Seistan; or, he thinks, the Daitya allusion may be a reminiscence of the Median origin of Vishtaspa himself. Nevertheless, there is a certain discrepancy which must fairly be noticed, and having stated the difficulty we may turn to such arguments as can be brought up to show that Vishtaspa's foe, Arejat-aspa, belongs rather to the east than to the west. This introduces the problem of the situation of Arejat-aspa's kingdom, and the scene of the Holy Wars already alluded to.

In the Avesta, Arejat-aspa is a Hyaonian *(Av.H'yaona,* Phi. *Xyori)}* The name h. *yaona,* according to the ordinarily accepted view, is identical with the nation of the classic Chionitae.[3] The identification, however, has been doubted by some. The subject is commented on by Darmesteter,[4] and especially by Geiger, and both of these scholars think (as well as Justi, see footnote) that there is authority also for the tradition which places the Hyaonians toward the east, even if they were located in the Gilan territory in the time of Ammianus Marcellinus (19. 1. 2). The Shah Namah tradition certainly looks upon Arjasp as a Turanian, and places his kingdom on the other side of the Jlhun (Oxus), and it makes him despatch envoys from the city of Khallakh to Vishtasp (Gushtasp) in Balkh.[5] In the native lexicons, according to Vullers, Khallakh or Khallukh

(^.Jti*) is described as 'a great city in Turkestan in the district of Khatai.'[1] In any case, it is evident that the kingdoms of Arjasp and Vishtasp cannot have been far separated from each other. The question of the invasion or invasions may now be taken up.

According to the sources which the Shah Namah must have made use of (and we may infer the same from the Dlnkart and Zat-sparam)[2] there were, apparently, two separate invasions by Arjasp, although the Avesta seems to speak of the war singly as 'the War of Keligion.' The special chapter above on this subject (Chap. IX.) should be consulted. The Yatkar-I Zariran alludes only to what we may regard as the first of Arjasp's wars, and lays the scene in the neighborhood of the plain of Merv.[8] Similarly, in this connection, the Shah Namah speaks of the JlhtLn or Oxus, and the territory adjacent[4] (consult the Map). The scene of the battles of the second war was Khorassan, if we follow the Shah Namah and notice an incidental allusion in the Bundahishn.[5] The circumstances of Arjasp's second invasion need not be repeated; see Chapter IX. If we follow the Shah Namah we may presume that Vishtaspa, after receiving news of the storming of Balkh, started from Seistan to join the forces of his son, Farshldvard, whom he had appointed ruler of Khorassan. The first meeting between Vishtasp and the invader Arjasp may therefore have resulted in an engagement in Khorassan. From Firdausi, we may judge that this opening engagement of the second war, which is evidently counted as a part of the Balkh misfortune, was not successful for the Iranians.[6] An attempt may be made to locate the scene.

Now, the Bahman Yasht (3. 9), when speaking of three distinct times of crisis and trial in the history of the Religion, says: 'the second was when thou, O Zaratusht the Spitaman! receivedst the Religion, and hadst thy conference, and King Vishtasp and Arjasp, miscreated by Wrath, were, through the War of the Religion, in the combat of SpSt-razhtlr ("the hoary forest");' and the text adds a

comment: ' some have said it was in **Pars.**' [1] The Avesta **mentions** the ' White Forest' but not in connection with Arejat-aspa's name. The *Spaeitita Razura* in the Avesta, is the amphitheatre of the great conflict between the earlier Iranian king, Haosrava, and his enemy, Aurvasara.[2] According to Justi, the White Forest is in Kohistan, a part of Khorassan (lat. 33, long. 59; consult Map), between Kain and Birjand.[3] As a mere conjecture, in order to endeavor to reconcile difficulties, it might be suggested that we have here an allusion, perhaps, to the engagement that preceded the last in the war. In other words, as the White Forest seems to have been a designation covering a good deal of territory, it might be argued that Vishtasp pushed onward, then northward to the mountains of Nishapur and Mesh-hed, not far from the high citadel where his son Isfendiar was confined.

This citadel, as related by the Shah Namah, was the mountain fortress of Gumbadan or Gunbedan (jjljuJtf).[4] Its location is in Khorassan,[5] for this fastness of Isfendiar is evidently Mount Spento-data of the Avesta (Yt. 19. 6), and Spend-yat of the Pahlavi (Bd. 12. 2, 23), situated on the ' Var of Revand,' which latter has been identified with the Bar mountains, northwest of Nishapur, in an interesting article by Houtum-Schindler.[6] The Bundahishn adds details of the battle that enable us still further to locate the scene where Vishtasp himself had to take refuge in a mountain in Khorassan, where he was beleaguered,[7] until the heroic Isfendiar is released from his chains and gains the victory. All this has been described above (p. 119 seq.), but the Bundahishn passage is important enough to repeat it again in full:—

[7] For allusions to the ' mountain,'

Bd. 12. 17-18: ' The Padashkhv&rgar mountain is that which is in Taparistan and the side of Gllan. The Revand mountain is in Khurasan, on which the Bttrzhln fire was established. (32-34): From the same Padashkhvargar mountain unto Mount Kumish, which they call Mount Madof ryat (" Come-to-help ") — that in which Vishtasp routed Arjasp — is Mount Mlyan-i-dasht (" mid-plain "), and was broken off from that mountain there. They say, in the War of the Religion, when there was confusion among the Iranians it broke off from that mountain, and slid down into the middle of the plain; the Iranians were saved by it, and it was called " Come-to-help " by them. The Ganavat mountain is likewise there, on the Ridge of Vishtasp *(pust-i Vtitaspan)* at the abode of the Burzhln-MitrO fire, nine leagues to the west.'[1] Mount Madof ryat (Come-to-help) has been identified by Houtum-Schindler with the mountain near the present town of Earlumad, northward of the high road between Abbasabad and Mazlnan, and it is thus evidently a part of the Jagatai range.[2] The Ridge of Vishtasp may be identical with the mountains, Binalud Kuh, running northwest from Nishapur, a little to the west of the modern Gunabad (lat. 36. 40; long. 59. 5 — see Map). The region where the final battle took place, with the utter rout of Arjasp and the triumph of Iran over Turan, may be regarded as occupying a territory to the east of Mian-i-dasht in Khorassan (lat. 36. 30; long. *56.* 10 — see Map, square Gb). The caravan road between Mian-i-dasht and Zaidar is still famous to-day for marauding attacks of the Turkomans upon pilgrims and travellers.[3]

The location of the sacred fires may be taken up in this connection. Vishtasp's special fire, Burzhln Mitro, is in Khorassan as already discussed in the pages devoted to the subject of the Sacred Fires (Chap. VIII.). From the passage just quoted (Bd. 12. 17-18, 32-34) and from Bd. 17. 8 there seems to remain little doubt on that point. The Shah Namah implies a similar location, and three Mohammedan writers state that the special fire of Zoroaster, which is the Burhzm Mitro, was in the neighborhood of Nishapui. For the references, see p. 100. But more important still in connection with

the ancient pyraea of Zoroastrianism, is the tradition of the Bundahishn (Bd. 17. 6) regarding the second famous fire, the fire Frobak (Farnbag). This fire originally was located in Khorasmia or Chorasmia (Phl. *Khvariiem)* on the eastern side of the Caspian Sea—the region of igneous oil fountains, and it was removed by Vishtasp to the east, to Cabul, or as the text reads: ' In the reign of King Vishtasp, upon revelation from the religion, it was established out of Khvarizem, at the Roshan (" shining ") mountain in Kavulistan, the country of Kavul (Kabul), just as it remains there even now.'[1] his latter would make another distinct association of Vishtasp with the east.[2]

In addition to the central or eastern location of two of the sacred fires which are directly connected with Vishtasp's name, we may also recall the story of the cypress which Zoroaster planted to commemorate the event of Vishtasp's conversion. This hallowed tree was planted at Kishmar in Khorassan, and it is spoken of in the Shah Namah as 'the cypress of Kishmar'[3] It must also be remembered that, according to the Shah Namah, Khorassan was under the suzerainty of one of Vishtasp's sons, as well as it was the amphitheatre of the final Holy War.

These latter points are of interest also in connection with FloigPs claim that Vishtaspa, of the Avesta, is identical with the historical Hystaspes, father of Darius; and that he belonged in the region of Hyrcania and ancient Parthia. FloigPs monograph should be consulted.[4]

It may incidentally be added that the Armenian historian, Thomas ArzrounI (A.D. tenth century) follows the tradition that Zoroaster was the opponent of Ninus and Semiramis and was defeated by them, but Semiramis made him commander of Babylon, Khoujistan, and of all eastern Persia, and he adds, 'Zradasht, although possessing the countries to the east of Persia, did not cease to harass Assyria'[5] This would associate him also with the east.

Furthermore, it should be noticed that Mills upholds the eastern region, at least as the place of origin of the Gathss.[1] He reviews some of the indications which point to the west, as presented by Darmesteter; but after examining into the character of the civilization, and noticing points of Indo-Iranian unity and likeness to the Veda, and judging also from the spirit of the Gath&s, whose antiquity he emphasizes, Mills is led to believe that 'the scene of the Gathic and original Zoroastrianism was in the northeast of Iran, and that the later Avesta was composed during the hundreds of years during which the Zarathushtrian tribes were migrating westward into Media.'[2] A discussion of the Avestan calendar led the Sanskrit scholar Roth strongly to support Bactria.[8] The younger Iranist Horn favors eastern Iran as the first scene, at least, of Zoroastrianism.[4] On the views of Tiele, see note below.[5]

Resume' of the Eastern View.—Among various points that may be brought up in favor of placing Vishtaspa in eastern Iran, and of believing that Zoroaster's prophetic career, at least, was associated chiefly with that territory, is the predominance of geographical allusions in the Avesta rather to eastern Iran. The Avesta does not state where Kavi Vishtaspa's kingdom was located; but it recognizes that the Kavi dynasty came from Seistan (Yt. 19. *66* seq.). The Iranian tradition which is found in Mohammedan writers is almost unanimous in placing Vishtasp's kingdom in the east, in Bactria. Among arguments which may be drawn from Pahlavi literature is the fact that the Bandahishn clearly locates the scene of the routing of Arjasp in the territory of Khorassan. One of the sacred

fires is connected with Khorassan; another was removed from Khorasmia to the east. And now that so much has been said in favor of eastern Iran, including Bactria, we may pass without comment to **the** west and consider the claims of Media.

2. Media and the West, or the View that Zoroaster's Ministry was in his Native Country, Western Iran

It has been indicated sufficiently that a number of specialists, de Harlez, Spiegel, Justi, and others, associate the earliest history of Zoroastrianism not with Bactria and the east, but alone with Media, in its broad sense, and the west.

C. de Harlez, for example, in treating of the origin and home of the Avesta, as noted above, leaves eastern Iran out of consideration.[1] His discussion of the subject should be read; there is space here only to outline the reasons which lead him to confine the Avesta and Zoroastrianism to Media. I summarize them from the last article mentioned in the footnote: (1) Zoroastrianism and the Avesta is the work of the Magi, a tribe of Media, and the Magi are the Atharvans *(TrvpaiOot)* of the Avesta. (2) The chief seat of the religion was the southern and southeastern coast of the Caspian Sea, as shown by the peculiar manner in which the peoples of the Caspian region and Hyrcania dispose of their dead. (3) Rgha in Media was the chief seat of the priesthood, and Media, therefore, was the centre of the Avestan religion. (4) The legend which makes Bactria the cradle of Zoroaster's faith, and claims that Vishtaspa was king and ruler of Bactria, is late; it comes, in fact, from mediaeval times. Eastern Iran, in general, remains in the background until the time of the Achaemenidae.[2] Finally (5), the Parsi books themselves regard Zoroaster as arising from Media; and, even though many mediaeval sources connect Vishtasp with Bactria, as mentioned, there is not entire consistency in this, for some of them place him in Persis. The epitomist KhvSudamlr, for example, in his life of Gushtasp,[3] says that this king had the city of Istakhr

(Persepolis) as a royal seat — *Istakhr-i Fdrs ra ddr aVmnlh kardd-did.* Again, Beidawi *(Life of Oushtdsp)* says that Zardfisht occupied a mountain, Naphaht, near Istakhr.[1] And Majdi *(Zinat aUMajdlis),* after assuming that Zoroaster came from Palestine, adds that he gave himself out as a prophet in Adarbaijan.[2] For these various reasons de Harlez concludes: 'Alles erklart sich, wenn man unterstellt, dass der Zoroastrismus aus Medien stammt; Alles wird dunkel, wenn man dessen Wiege in Baktrien sucht.'

Spiegel has two or three times specially treated the question of the home of the Avesta and its bearing upon the Zoroastrian problem.[3] In his historical article on Vishtaspa and the Bactrian kingdom, in Sybel's *Zeitschrift,* he brings up most of the points that may be argued in favor of the east, — and these are such as have been stated above; he then weighs the west over against them. He particularly emphasizes the identification of Arejat-aspa's nation, the Hyaona, with the Chionitae, who are to be placed, it is claimed, to the west of the Caspian Sea. Again, he approves rather of de Lagarde's identification of the name and locality, Frazdanava, with the Armenian river Hrazdan; and he points out some other names that refer especially to the west. As a result of this, although 'Baktra' is mentioned in the title of his monograph, he inclines to favor Media or Arran, rather than Bactria, as the realm of Vishtaspa and also as the home of Zoroaster. In his latest article on the subject *(ZDMG.* xlv. 280 seq., 1887), Spiegel points out one or two more points to strengthen the western view. An allusion to Armenia, for example, is claimed to be found in the Avesta (Yt. 5. 72). He draws attention also to the association of Hystaspes' name with Media and the west, by Chares of Mitylene (cf. p. 73 above),[4] and by Lactantius, who makes Hystaspes a king of Media (p. 154 above); and he throws renewed doubts upon the existence of the Bactrian kingdom maintained by Duncker.[5]

Several other scholars are of like opinion regarding Media and

western Iran. Eugen Wilhelm upholds Spiegel's identification of the Hyaonians with the Chionitse and locates them on the west side of the Caspian Sea. The associated Avestan word *vardSaka* (Yt. 9. 31 = Yt. 17. 51) is likewise a proper name, i.e. Varedhaka, cf. Vertae, of Ammianus Marcellinus; and Av. *hunu* (Yt. 5. 54) designates the Huns.[1] Lehmann expresses his opinion very strongly that the ancient Vishtaspa was not a Bactrian prince, but that he ruled in western Iran, in Media j that Zoroaster had nothing whatsoever to do with Bactria, where the crude civilization of his time would have been unsuited for his teaching, but that Media furnished exactly the soil that was needed for it to bear fruit.[2] Darmesteter several times expressed himself in favor of the west for the entire scene of early Zoroastrianism, because he considered the Bactrian tradition rather to be late.[3]

Justi. The most recent authority to touch upon the question and to uphold the western view is Justi *(Die alteste iranische Religion und ihr Stifier Zarathushtra)** A brief summary of the deductions on this point in his important treatise is given. The numbered divisions are my own: —

1. The Avesta itself does not place either the home of Zoroaster or the kingdom of Vishtaspa in Bactria, nor mention either name in alluding incidentally to the city of Bactria. The rise of the Bactrian kingdom was post-Achaemenian. The transferrence of Vishtaspa's capital to Bactria, as is done in later times, is purely artificial. Spiegel's arguments are sufficient to overthrow the whole theory of a Bactrian origin of the Iranian religion.

2. The allusions to the sacrifices by Vishtaspa and Zairivairi on the Frazdanava and Daitya, and to Arejat-aspa as a Hyaona, are examined in their eastern aspect and in the western light. In Justi's opinion the Daitya may be the Araxes on the northern boundary of Adarbaijan, and the Frazdanava is more likely, perhaps, to be the Armenian Hrazdan. Acts of worship performed in the Adarbaijan territory would be appropriate to Iranians.

[4] **In *Preussische Jahrbttcher,* Bd. 88, p. 255 seq., 1897.**

More weight also is laid on the likelihood of the Chionitae being placed in the Caucasus region and Gllan. Like the later Huns, the invasion of Arejat-aspa may have been made through the mountainous country to the west of the Caspian Sea.

3. It is notable that of the three most sacred fires one (Adhar Gushnasp) belongs originally to Adarbaijta, one (Adhar Xurrah, or Farnbag) to Persis (Istakhr), and one (Adhar Btirzhin Mithr) to Khorassan, but none to Bactria. Yet see note at foot of this page.[1]

4. Media was the native place of Zoroaster, and it was also the home and realm of Vishtaspa. But Kavi Vishtaspa was not a great king, not a 'king of kings' (Anc. Pers. *x$aya6iya xSayaQiyanam)*; he was rather a minor prince *(daitihupaiti)* of Median Eagha. The suggestion is conjecturally put forward that we might, perhaps, assume that some great king of Media later accepted the religion and made it current in the world. Such a monarch would have been the Median Fraoreta (Phraortes) ' Confessor,' who may have adopted the faith and have thus received a Zoroastrian name. The father of Phraortes also had a Zoroastrian name as he was called Kyaxares (i.e. Huvaxsatara), beside his ordinary title Dahyauka.

5. Finally, by way of illustration, Atropates and his successors in Atropatene were zealous adherents of Zoroastrianism from Achaemenian times, and the Gathas themselves show a religious intolerance that still remains typical of the Magi in Sassanian times, and is characteristic of the fanaticism that marks the later Assassins who likewise had their origin in Atropatene.[2] I may also add that Justi wrote me that it was only after long and careful consideration that he came to these conclusions and abandoned the view that Bactria was the home of Zoroastrianism or that Zoroaster perished there.[8]

Additional Arguments. — Some other arguments might be added to these already given in support of the west. For example:—

1. Vishtaspa and Hutaosa in the Avesta both were Naotairyans. The comment in Zat-sparam places Notar in the west, sixty leagues from Cist, as explained above (p. 193, n. 1). If Vishtasp be asso-

[1] Justi, op. cit. p. 257 ; but with regard to the Farnbag fire he seems to have overlooked the statement in Bd. 17. 6 ; see p. 99, n. 4 and p. 217 above. The question whether Bactria has any volcanic or petroleum fires might account for their not generally being connected with that particular region,

[2] Cf. op. cit. pp. 269, 256.

* Letters dated Jan. 8, 1897, **and** June 12, 1897.

ciated with Balkh, one would then have to assume **that only his** family came from the west. It is true that this might be quite possible in royal lines, and there actually seems to have been some change of dynasty or break in the succession when Vishtasp came to the throne, as noted by Justi,[1] so this argument would not necessarily militate finally against the east; it is only a matter of proportionate probability. On account of the Ragh and Notar allusion it would be convenient to accept Vishtasp as also belonging to the west.

2. The two Avestan Yasht fragments (Yt. 23. 4, 24. 2) give among the blessings which Zoroaster wished might accrue to Vishtaspa the boon: 'Mayest thou be able to reach the Ragha, whose shores lie afar, as Vafra Navaza was able.' According to Darmesteter the circumambient stream Ragha in the Avesta is to be identified with the Tigris.[2] This might, therefore, be used as a ground for placing Vishtaspa's kingdom in the west, but not necessarily so; the wish of a wide-extended kingdom might hold equally good if the star of Vishtasp's empire were moving from the east westward.

3. As the Avesta constantly speaks of idolaters, unbelievers, devil-worshippers *(daeva-yasna)* it might be suggested that Zoroaster's reform was especially directed against the Yezidls, or devil worshippers, of the region about the Caspian Sea.[8]

4. Arejat-aspa as noted above, p. 211, is represented in the Avesta (Yt. 5. 116) as offering sacrifice near the sea Vourukasha (the Caspian Sea) — *upa zrayo vouru-kasam* — asking for victory over Yishtaspa and (later addition) Zairivairi.[4] It might be claimed that we have Visht&spa's enemy not only on the Caspian Sea, but possibly on the west side of it, although the expression with *upa* might equally refer to the eastern side of the Caspian which is still occupied by Turkomans.

5. A somewhat fanciful conjecture might be made that we may

perhaps have an allusion to the west (possibly Persepolis ?) in the Dinkart reference to the 'treasury of Shapigan' (or Shaspag&n, Shapan, or Shlzigan — for such are the readings allowed by the MSS.), in which Vishtasp deposited the original codex of the Avesta.[1] As further related in the Dinkart this fell into the hands of the Greeks and was translated into their tongue. The treasury of the archives is usually associated with Persepolis.[2]

6. Hamzah of Isfahan connects Vishtasp with Persia, for he makes him build a city in the district of Darabjard in the province of Persia.[3]

Rasume' of the Western View. — The more general claim in favor of western Iran is, that the religion was probably developed in the country where Zoroaster himself arose; that in his day Bactria was still in the earliest stages of civilization and its name is not connected either with his or with Vishtasp's in the older texts; that Media, on the other hand, would have been a suitable field for his teaching and that the allusions to the west give a more consistent theory for ancient times. It is claimed, moreover, that Vishtaspa's foe, Arejataspa, belonged to western Iran, on the ground of identifying the Hyaona with the classic Chionitae and of placing these in the Caspian region. Finally, Vishtaspa was a minor king, and it is possible that the Median ruler Fraortes *Q* Confessor') may have made Zoroastrianism the national religion of Media. The devil-worshippers of the Avesta would answer to the later Yezldls of the western territory.

General Summary

Although we may agree that Zoroaster by birth arose in western Iran, we cannot be equally sure that the chief seat of his activity was also there. Both sides of the latter question have been presented, as were the former. The classical references (as early as the second century A.D.) would imply the possibility of Bactria or the

east, as a scene, as well as of Media (Persia) and the west. This fact might be interpreted that he taught in the east, though he arose in the west. The Avesta does not decide the case. An allusion to the scene of Vishtaspa's two sacrifices may equally refer to Seistan, and to Media and Atropatene. From evidence in Pahlavi literature, we know that Zoroaster himself was in Seistan for a while, during the early part of his prophetic career. From the same source we also know he was in Turan, and the Gathas allude to a Turanian adherent. This would seem to speak, in part at least, for eastern Iran, even if his patron Vishtaspa ruled in western Iran. From the Pahlavi and later Zoroastrian literature, the scenes of the Holy Wars would appear to have been located rather toward the east, in Merv and Khorassan. On the other hand, the silence of the Avesta on some vital points in connection with the east, together with an inference that Vishtaspa belonged to the same country as Zoroaster, and spoke the same dialect, would argue rather in behalf of western Iran. This latter view would be strengthened if the existence of a Bactrian kingdom at an early period be doubted. The majority of Iranian specialists, perhaps, seem to have felt that a stronger case can be made for Media and the west as the scene alike of Zoroaster's activity and his birth. On the other hand, later tradition, which includes Mohammedan-Iranian sources, is almost unanimous in placing Vishtasp's kingdom in Bactria, which is claimed to have been founded by Lohrasp. Having now presented both sides of the question, we may refrain from drawing a conclusion between the two views, for the present, and content ourselves with recalling what was said at the outset, that Zoroaster was a reformer, and he had a mission; in modern times the field of a great missionary's work is not usually confined to a single part of a country, whatever it may have been in ancient times.

APPENDIX V

CLASSICAL PASSAGES MENTIONING ZOROASTEK'S NAME

COLLECTED with the help of my student and friend Louis H. Gray, Fellow in Indo-Iranian Languages in Columbia University, to whom I wish to express my thanks with sincerity for his constant readiness to give assistance, especially in collecting the so-called Zoroastrian Logia. His kind aid is much appreciated. — A. V. W. J.

The list is confined simply to such passages as mention Zoroaster by name. Its compass might have been greatly extended if allusions to Magi, Persians, Hystaspes, or the like, had been included.

Much material from the Classics had already been gathered by Barnabe' Brisson, *Be Hegio Persarum Principatu,* Paris, 1690 ; Hyde, *Beligio veterum Persarum,* Oxon. 1700. The first systematic and excellent collection, however, of classical references on Persian subjects in general was made by J. F. Kleuker, *Zend-Avesta,* Anhang z. 2ten Bd. 3ter Theil, Leipzig und Riga, 1783. This is still one of the standards. A different arrangement of the material is found in Rapp, *Die Religion der Perser und der ubrigen Iranier nach d. Griechischen und Romischen Quellen,* in *ZDMG.* xix. p. 4 seq., xx. p. 49 seq. (translated into English by K. R. Cama, *Religion and Customs of the Persians,* Bombay, 1876-1879) ; it should be consulted, as it includes also Persian and Magian subjects. Consult also Windischmann, *Zoroastrische Studien,* pp. 260-313, Berlin, 1863 (translated into English by Darab D. P. Sanjana, *Zarathushtra in the Gathas,* pp. 65-141, Leipzig, 1897). On special classical references, see, likewise, Jackson in *JAOS.* xv. 221-232; xvii. 1-22.

§ 12. Clemens Romanus

(About A.D. 30-100, but probably written later)

Recognitiones, IV. 27-29 (torn. i. col. 1326 f., ed. Migne) (only in Latin transl. of Eufinus; dates about end of A.D. second century. Cf. Schoell, *Histoire Abre'ge'e de la litt. grecque sacr4e et eccUsiastique*, Paris, 1832, p. 220 f.; Christ, *Griechische Literaturgeschichte*, 2d ed. p. 732). 27: Ex quibus unus Cham nomine, cuidam ex filiis suis qui Mesraim appellabatur, a quo Aegyptiorum et Babyloniorum et Persarum ducitur genus, male compertam magicae artis tradidit disciplinam; hunc gentes quae tunc erant Zoroastrem appelauerunt, admirantes primum magicae artis auctorem, cuius nomine etiam libri super hoc plurimi habentur. hie ergo astris multum ac frequenter intentus et uolens apud homines uideri deus, uelut scintillas quasdam ex stellis producere et hominibus ostentare coepit, quo rudes atque ignari in stuporem miraculi traherentur, cupiensque augere de se huiusmodi opinionem, saepius ista moliebatur usquequo ab ipso daemone, quern importunius frequentabat igni succensus concremaretur.

28: Sed stulti homines qui tunc erant, cum debuissent utique opinionem, quam de eo conceperant, abicere, quippe quam poenali morte eius uiderant confutatam, in maius eum extollunt. extructo enim sepulcro ad honorem eius, tanquam amicum dei ac fulminis ad caelum uehiculo subleuatum, adorare ausi sunt, et quasi uiuens

astrum colere. hinc enim et nomen post mortem eius Zoroaster, hoc est uiuum sidus, appellatum est ab his, qui post unam generationem graecae linguae loquela fuerant repleti. hoc denique exemplo etiam nunc multi eos qui fulmine obierint, sepulcris honoratos tamquam amicos Dei colunt. hie ergo cum quartadecima generatione coepisset, quintadecima defunctus est, in qua turris aedificata est, et linguae hominum multipliciter diuisae sunt.

29: Inter quos primus, magica nihilominus arte, quasi corusco ad eum delato, rex appellatur quidam Nemrod, quern et ipsum Graeci Ninum uocauerunt; ex cuius nomine Niniue ciuitas uocabulum sumsit, sic ergo diuersae et erraticae superstitiones ab arte magica initium sumpsere.

Et eius, quern supra diximus indignatione daemonis, cui nimis molestus fuerat, conflagrasse, busti cineres tanquam fulminei ignis reliquias colligentes hi, qui erant primitus decepti, deferunt ad Persas, ut ab eis tanquam diuinus e caelo lapsus ignis perpetuis conseruaretur excubiis, atque ut caelestis deus coleretur.

Homilies (also spurious), IX. 4 f. (tom. ii. col. 244, ed. Migne): *ἐκ τοῦ γένους τούτου γίνεταί τις κατὰ διαδοχὴν μαγικὰ παρειληφώς, ὀνόματι Νεβρώδ, ὥσπερ γίγας ἐναντία τῷ θεῷ φρονεῖν ἐλόμενος, ὃν οἱ Ἕλληνες Ζωροάστρην προσηγόρευσαν. οὗτος μετὰ τὸν κατακλυσμὸν βασιλείας ὀρεχθεὶς καὶ μέγας ὢν μάγος τοῦ νῦν βασιλεύοντος κακοῦ τὸν ὡροσκοποῦντα κόσμον ἀστέρα πρὸς τὴν ἐξ αὐτοῦ βασιλείας δόσιν μαγικαῖς ἠνάγκαζε τέχναις. ὁ δὲ ἅτε δὴ ἄρχων ὢν καὶ τοῦ βιαζομένου τὴν ἐξουσίαν ἔχων, μετ' ὀργῆς τὸ τῆς βασιλείας προσέχεε πῦρ, ἵνα πρός τε τὸν ὁρκισμὸν εὐγνωμονήσῃ, καὶ τὸν πρώτως ἀναγκάσαντα τιμωρήσηται.*

ἐκ ταύτης οὖν τῆς ἐξ οὐρανοῦ χαμαὶ πεσούσης ἀστραπῆς ὁ μάγος ἀναιρεθεὶς Νεβρώδ, ἐκ τοῦ συμβάντος πράγματος Ζωροάστρης μετωνομάσθη, διὰ τὸ τὴν τοῦ ἀστέρος κατ' αὐτοῦ ζῶσαν ἐνεχθῆναι ῥοήν. οἱ δὲ ἀνόητοι τῶν τότε ἀνθρώπων, ὡς διὰ τὴν εἰς θεὸν φιλίαν κεραυνῷ μεταπεμφθεῖσαν τὴν ψυχὴν νομίσαντες, τοῦ σώματος τὸ λείψανον κατορύξαντες, τὸν μὲν τάφον ναῷ ἐτίμησαν ἐν Πέρσαις, ἔνθα ἡ τοῦ πυρὸς καταφορὰ γέγονεν, αὐτὸν δὲ ὡς θεὸν ἐθρήσκευσαν. τούτῳ τῷ ὑποδείγματι καὶ οἱ λοιποὶ ἐκεῖσε τοὺς κεραυνῷ θνήσκοντας ὡς θεοφιλεῖς θάπτοντες ναοῖς τιμῶσιν, καὶ τῶν τεθνεώτων ἰδίων μορφῶν ἱστᾶσιν ἀγάλματα . . .

Πέρσαι πρῶτοι τῆς ἐξ οὐρανοῦ πεσούσης ἀστραπῆς λαβόντες ἄνθρακας τῇ οἰκείᾳ διεφύλαξαν τροφῇ καὶ ὡς θεὸν οὐράνιον προτιμήσαντες τὸ πῦρ, ὡς πρῶτοι προσκυνήσαντες, ὑπ' αὐτοῦ τοῦ πυρὸς πρώτῃ βασιλείᾳ τετίμηνται· μεθ' οὓς Βαβυλώνιοι ἀπὸ τοῦ ἐκεῖ πυρὸς ἀνθρακας κλέψαντες καὶ διασώσαντες εἰς τὰ ἑαυτῶν καὶ προσκυνήσαντες καὶ αὐτοὶ ἀκολούθως ἐβασίλευσαν.

(About A.D. 264–340)

This passage is usually assigned to Philo Byblius (flor. circ. A.D. 125), Fragm. 9, apud Euseb. Praep. Evang. I. 10 (tom. iii. col. 88, ed. Migne): καὶ Ζωροάστρης δὲ ὁ μάγος ἐν τῇ ἱερᾷ συναγωγῇ τῶν Περσικῶν φησι κατὰ λέξιν· Ὁ δὲ θεός ἐστι κεφαλὴν ἔχων ἱέρακος. οὗτός ἐστιν ὁ πρῶτος ἄφθαρτος, ἀΐδιος, ἀγέννητος, ἀμερής, ἀνομοιότατος, ἡνίοχος παντὸς καλοῦ, ἀδωροδόκητος, ἀγαθῶν ἀγαθώτατος, φρονίμων φρονιμώτατος· ἐστὶ δὲ καὶ πατὴρ εὐνομίας καὶ δικαιοσύνης, αὐτοδίδακτος, φυσικός, καὶ τέλειος, καὶ σοφός, καὶ ἱεροῦ φυσικοῦ μόνος εὑρετής. τὰ δὲ αὐτὰ καὶ Ὀστάνης φησὶ περὶ αὐτοῦ ἐν τῇ ἐπιγραφομένῃ Ὀκτατεύχῳ.

Ibid. X. 9, 10 (col. 805 seq., ed. Migne): οὗ Νίνος ἐπώνυμος πόλις, ἣ Νινευὶ παρ' Ἑβραίοις ὠνόμασται, καθ' ὃν Ζωροάστρης ὁ μάγος Βακτρίων ἐβασίλευσε. Νίνου δὲ γυνὴ καὶ διάδοχος τῆς βασιλείας Σεμίραμις· ὥστ' εἶναι τὸν Ἀβραὰμ κατὰ τούτους.

Eusebius Chron. II. 35, ed. Aucher (to year 9 of Abraham): Zoroastres magus rex Bactrianorum clarus habetur: aduersum quem Ninus dimicauit.

§ 42. Anathemas against Manichaeism

(About 835)

Cited by Cotelerius, SS. Patrum qui temporibus apostolicis florue-runt opera. Paris, 1672; notes coll. 368-376.[1] These 'Anathemas' were to be recited by converts from Manichaeism to Christianity. In this long and valuable document, Zarades (probably Zoroaster) and his prayers (the Avesta?) are declared accursed as being connected with the Manichaean faith. Anathemas: dvaθεματίζω Ζαραδ-ῆην ὃν ὁ Μάνης θεὸν ἔλεγε πρὸ αὐτοῦ φανέντα παρ' Ἰνδοῖς καὶ Πέρσαις, καὶ ἥλιον ἀπεκάλει· σὺν αὐτῷ δὲ καὶ τὰς Ζαραδείους ὀνομαζομένας εὐχάς. . . . Ἀναθεματίζω τοὺς τὸν Ζαράδην καὶ Βουδᾶν καὶ τὸν Χριστὸν καὶ τὸν Μανιχαῖον καὶ τὸν ἥλιον ἕνα καὶ τὸν αὐτὸν εἶναι λέγοντας. . . . ἀναθεματίζω τὸν πατέρα Μανέντος Πατέκιον οἷα ψεύστην καὶ τοῦ ψεύδους πατέρα, καὶ τὴν αὐτοῦ μητέρα Κάροσσαν, καὶ Ἱέρακα καὶ Ἡρακλείδην καὶ Ἀφθόνιον τοὺς ὑπομνηματιστὰς καὶ ἐξηγητὰς τῶν τούτων συγγραμμάτων, καὶ τοὺς λοιποὺς αὐτοῦ μαθητὰς ἅπαντας, Σισίννιον τὸν διάδοχον τῆς τούτου μηνίας, Θωμᾶν τὸν συνταξάμενον τὸ κατ' αὐτὸν λεγόμενον εὐαγγέλιον, Βουδᾶν, Ἑρμᾶν, Ἄδαν, Ἀδείμαντον, Ζαρουάν,[2] Γαβριάβιον, Ἀγάπιον, Ἰλάριον, Ὀλύμπιον, Ἀριστόκριτον, Σαλμαῖον, Ἰνναῖον, Πάαπιν, Βαραίαν, κ.τ.λ.

Similarly Goarius, Εὐχολόγιον siue Rituale Graecorum, Paris, 1647, p. 885: ἀναθεματίζω καὶ καταθεματίζω Σαράδην καὶ Βοδδᾶν καὶ Σκυθιανὸν τοὺς πρὸ Μανιχαίων γεγονότας. . . . πρὸς δὲ τούτοις ἀναθεμα-τίζω καὶ καταθεματίζω σὺν τοῖς προγεγραμμένοις πᾶσιν Ἱέρακα καὶ Ἡρα-κλείδην καὶ Ἀφθόνιον τοὺς ἐξηγητὰς καὶ ὑπομνηματιστὰς τοῦ αὐτοῦ ἀνόμου καὶ βεβήλου Μανέντος καὶ Θωμᾶν καὶ Ζαρουὰν καὶ Γαβριάβιον.[3]

Abdiae Apostolica Historia, Lib. VI. 7. PassioSS. Simoniset Iudae: Atque haec de Iacobo. cuius fratres maiores natu, Simon cognominatus Chananaeus et Iudas, qui et Thaddaeus et Zelotes, et ipsi apostoli Domini nostri Iesu Christi, cum per reuelationem Spiritus Sancti per fidem fuissent religionem ingressi, inuenerunt statim inter initia suae praedicationis duos ibi magos, Zaroen et Arfaxat, qui a facie Sancti Matthaei Apostoli de Aethiopia fugerunt. erat autem doctrina eorum praua, ita ut Deum Abraham et Deum Isaac et Deum Iacob blasphemantes, Deum dicerent tenebrarum, et Moysen dicerent maleficum fuisse, denique omnes prophetas Dei a deo tenebrarum missos adsererent. praeterea animam hominis partem Dei habere dicerent, corporis vero figmentum a Deo malo factum esse, et ideo ex contrariis substantiis constare, in quibus laetatur caro, anima contristatur, et in quibus exultat anima, corpus affligitur. solem et lunam deorum numero applicantes, aquam simul deitatem habere docebant. Dei autem Filium, Dominum nostrum Iesum Christum, phantasiam fuisse, nec uerum hominem, nee ex uera uirgine natum, nee uere tentatum, nec uere passum, nec uere sepultum, nec uere tertia die resurrexisse a mortuis adfirmabant. hac praedicatione polluta Persida post Zaroen et Arfaxat, magnum meruit inuenire doctorem, per beatos apostolos Simonem et Iudam, id est Dominum Iesum Christum.

Ibid. 13: Haec et alia cum dux apud regem Xerxen disseruisset, excitati in zelum, qui cum rege fuerant Zaroes et Arfaxat magi, simul indignabundi rumores sparserunt: malignos eos homines esse, qui contra deos gentis contraque regnum tarn astute molirentur. nam si uis scire rex — inquiunt — quod ea uera sunt quae dicimus, non prius permittemus hos loqui quam deos tuos adorauerint. turn

[1] This is cited because Zaroes (Za-*p6t\s)* has been identified with Zoroaster by Noldeke in p. 76 of *Ergdnzungsheft zu Lipsius Die apokryphen Apostelgeschichten und Apostellegenden*, Braunschweig, 1883-1890. But Gutschmid, *Bhein. Mus.* xix. 380 seq. identifies Zaroes with Zarvan.

dux: audetisne cum illis habere conflictum, ut si uiceritis eos, turn demum abiciantur? dixerunt magi: aequum est ut sicut nos adoramus deos nostros, ita adorent et illi. respondit dux: hoc scilicet conflictus uester ostendet. ad haec iterum magi: uis uidere — inquiunt — potentiam nostram ut probes quia non poterunt loqui nobis praesentibus: iube adstare hie qui sint eloquentes in Unguis, acutissimi in argumentis, et clamosi in uocibus. et si tunc ausi fuerint nobis praesentibus loqui, probabis nos esse imperitissimos. tunc iussu regis et ducis omnes aduocati praesto facti, ita sunt a duce admoniti ut quanta possent constantia haberent cum his magis contentiones et eos a defensionum proposito, argumentorum suorum proposito excluderent. et cum in praesentia regis et ducis cunctorumque sublimium magi locuti essent, omnis ilia aduocatio ita muta facta est, ut nec nutibus quod loqui non poterat indicaret. et cum unius fere horae transisset spatium, dixere magi ad regem: ut scias nos ex deorum esse numero, perraittimus eos quidem loqui, sed ambulare non posse, quod cum fecissent, adiecerunt dicentes: ecce reddimus eis gressum, sed faciemus eos apertis oculis nihil uidere. cumque et hoc fecissent, expauit cor regis et ducis, dicentibus amicis eorum, non debere contemni hos magos, ne et regi et duci inferant debilitatem in membris. igitur hoc spectaculum a primo mane usque ad horam sextam dum spectatur, aduocati maerore confecti, ad suas reuersi sunt quique domos, nimio animi impulsu fatigati.

Ibid. 17: Haec cum dixissent apostoli, deportati sunt ad hospitalia magi, qui per triduum nec cibum capere nec bibere ullo modo poterant, sed in his sola uociferatio doloribus extorta incessabilis extitit. postea cum iam res in eo esset ut pariter expirarent magi Zaroes et Arfaxat, accesserunt eos apostoli dicentes: non dignatur Deus habere coacta seruitia. igitur surgite sani habentes liberam facultatem conuertandi a malo ad bonum et exeundi a tenebris ad lumen, at illi permanentes in perfidia sua, sicut a facie Matthaei apostoli fugerunt, sic et ab his duobus apostolis fugientes, ad simulacrorum cultores, per totam Persidis regionem, ut apostolis inimicitias excitarent, ubique dicebant: ecce ueniunt ad uos inimici deorum nostrorum, etc.

Ibid. 20: Quippe Zaroes et Arfaxat magi facientes scelera multa per ciuitates Persidis, et dicentes se esse ex genere deorum, semper a facie apostolorum fugientes, tamdiu erant in quacunque ciuitate, quamdiu cognoscerent apostolos aduenire.

Ibid. 23: Quo tempore et duo, de quibus diximus, magi Zaroes et Arf axat ictu coruscationis adusti ad carbonem conuersi sunt.[1]

Lib. VII. 1 de S. Matthaeo: In quam [sc. Aethiopiam] profectus ipse, cum in ciuitate magna quae dicitur Naddauer moraretur, in qua rex Aeglippus sedebat, contigit ut duo magi Zaroes et Arfaxat simul essent, qui regem miris modis ludificabant, ut se deos esse remota ambiguitate crederet. et credebat eis rex omnia et omnis populus non solum memoratae urbis sed ex longinquis etiam regionibus Aethiopiae ueniebant quotidie ut adorarent eos. faciebant enim subito hominum gressus figi, et tamdiu immobiles stare quamdiu ipsi uoluissent. similiter et uisus hominum et auditus a suo officio refrenabant. imperitabant serpentibus ut percuterent, quod et Marsi facere solent et ipsi incantando multos curabant. et ut dici uulgo solet, malignis maior reuerentia exhibetur ex timore quam benignis ex amore, sic et illi uenerabiles apud Aethiopes, in magno diu pretio fuerunt.

Ibid. 4: Conabantur autem interea arte sua magica excitare eos [sc. suos duos dracones ante pedes Matthaei apostoli dormientes] Zaroes et Arphaxat, et non poterant neque oculos aperire neque penitus commouere quidquam.

§ 51. The So-called Zoroastrian Logia or Chaldaean Oracles

MATIKA AOriA
TON AIIO TOY ZflPOAZTPOY MATflN

Introductory Note by Louis H. Gray.—Amid the luxuriant growth of apocryphal and prophetic literature, which sprang up in the first centuries of our era, no small part is ascribed to the faith of Iran. The wonderful eschatology of the Persian religion made a deep impression on the Hellenic mind at an early date, and this was to bring forth fruit in the development of Gnosticism and Neo-Platonism. Apparently in this way arose the so-called Chaldaean Oracles, which bear the mark of Gnostic and Neo-Platonic mysticism and somewhat recall the Christian forgery of the Sibylline Oracles.

The pseudo-Zoroastrian compositions had but a short shrift. The great Porphyry ruthlessly attacked them and suppressed them, and they are lost to us forever. Doubtless they were no better and no worse than the great majority of similar writings which have survived; perhaps we may even say that the

[1] **Is this a reminiscence of the legend of Zoroaster's death by lightning, p. 124 seq.?**

Oneirokritikon of Astrampsuchos, a Christian forgery of about the fifth century, affords a type of some of these lost books.

But in the writings of the Neo-Platonic philosophers there lay hid a mass of citations, termed ' Chaldaean Logia,' or more usually, simply ' Logia,' or again, introduced by the formula: ' As saith one of the Gods,' or even appearing without any introductory phrase whatsoever.[1] These Logia date in general about the end of the second century A.D., and they present to us a heterogeneous mass, now obscure and again bombastic, of commingled Platonic, Pythagorean, Stoic, Gnostic, and Persian tenets.[2] I am inclined to doubt that the entire mass comes from a single source, although some have suggested that a certain Julian the Chaldaean or his son, who lived in the period of the Antonines, may perhaps have been the author.[8] However trivial the Logia justly appear to us, they received the serious attention of Iamblichos, Proklos, Simplikios, Damaskios, and Iohannes Ludos, while Hierokles and later Plethon wrote * compends of the Zoroastrian and Platonic Systems.'[4]

In the fifteenth century Georgios Gemistos Plethon, led on, as I venture to suggest, by some such allusion to *Zapod<rrpov \6yia* as the reference contained in the citation from Xanthos, preserved by Nikolaos of Damascus, boldly foisted upon Zoroaster the Logia which had been hitherto only 'Chaldaean.[1] This we may term the first recension. It consists of sixty lines and was first published by Ludovicus Tiletanus, together with Plethon's commentary, at Paris in 1563.[6] This text was also commented upon by Psellos as early as the eleventh century. Possibly we may even regard Psellos as the compiler who gathered the scattered fragments which go to make up this collection.

The second recension, if we may employ so dignified a term, was made by Franciscus Patricius in 1591. A second edition of this appeared at Venice in 1593. This second edition forms the basis of Stanley in his *History of Philosophy,* 4 ed., London, 1743, Latin translation, Leipzig, 1711, and it was the only one accessible to me except Stanley. On this new collection of Patricius the present edition is based. The object of my work here has been to secure as good a text as possible. My chief aid, or rather my only aid, has been the masterly discussion by Kroll, " De Oraculis Chaldaicis," in the seventh volume

[1] See Kroll, *de Oraculis Chaldaicis,* pp. 6-9, Breslau, 1894.

[2] Kroll, pp. 66-72.

[3] Ibid. 71.

[4] Ibid, passim; *Kleuker Anhang zum Zend-Avesta,* ii. Theil 1, pp. 8-9, 16-18. Plethon's *Compend.* is edited by Migne in his *Patrol. Grcec.* torn. 160. 973-974.

[5] This has unfortunately been inaccessible to me. I have used instead the edition by Servatius Gallseus in his StjSvAAiofcol *Xp-qcrfxoL,* Amstelod. 1639, and by Migne in his *Patrol. Grcec.* torn. 122. 1115-1154, including also Psellos's comment. In addition to the books already cited, I should mention the valuable compendium of the tenets of the Oracles contained in the seventeenth letter of Michael Italikos (for this identification see Treu, *Byzant. Zeitschrift,* iv. 1-22) edited by Cramer in *Anecdota Oxoniensia,* iii. 180-183 (Oxford, 1836), and for the entire subject the valuable discussion in Harles's edition of Fabricius's *Bibliotheca Grceca,* I. 307-315 (Hamb. 1790).

of the *Breslauer Philologische Abhandlungen* (Breslau, 1894). That his readings are given in the notes does not signify a rejection of them. They would generally appear in the text if I did not desire to preserve Patricius's text except where the latter is absolutely unintelligible. The motive for preserving this has been purely historical. The Breslau professor has practically collected the Logia anew, and he has learnedly discussed their sources and philosophical import. To him, moreover, the references to the Neo-Platonic authors cited in my footnotes are mainly due. Mine has been the humbler task to reprint an obsolescent collection, with only those emendations which are absolutely necessary. I have made a translation of the Oracles or Logia, which I hope later to publish with a version of the other Greek and Latin citations found in this Appendix.

The Oracles have never had many friends, and as a comment on them I may note that good old Thomas Hyde prayed that these 'pseudoracula pessime conficta carmine Graeco' might perish like others of their stamp (cf. *Hist, Relig. vet. Pers.*, Pref. p. vi.). His prayer has been in great part fulfilled. In estimating, moreover, the general value of the Logia, we may say, in the words of Shakspere, that the good points in them, like Gratiano's reasons, * are as two grains of wheat hid in two bushels of chaff.'

Allusions to Zoroaster in Armenian Literature

THE references to Zoroaster in Armenian literature, so far as I know, are few, but other scholars may be able to add to the list. Those allusions easiest to be found are in Langlois, *Collection des Historiens anciens et modernes de l'Armenie*, 2 vols., Paris, 1867-1869; see tome i. pp. 28, 29; ii. pp. 59, 69, 189,191, n., 230 (377), 381. These references are used here in part.

(a) The So-called Armenian History of Khorene. — The chapters of the so-called Armenian history of Moses of Khorene which refer to Zoroaster give the same or a similar record as Cephalion and others[1] in associating his name with Semiramis. Zoroaster is a Magian and religious chief of the Medes. Semiramis gives into his charge the government of Assyria and Nineveh, and entrusts to him the greatest power, while she withdraws to her favorite city in Armenia. Zoroaster raises a rebellion against Semiramis, and the issue of the war is told.

Several translations of Moses or of this passage are accessible: Whiston, *Moses Chorenens.*, London, 1736,1. ch. 16 (quoted in Muller's *Frag. hist Or.* iii. p. 627, and in Gilmore, *Persika of Ktesias,* **London,** 1888, p. 30, n.); Langlois, *Collection des Historiens anciens et modernes de VArminie,* Paris, 1867-1869, tome ii. 59, 69; ii. *ibid.* i.

[1] E.g. Agathias; cf. Hyde, *Hist. Relig, vet. Pers.* p. 412.

p. 28 (Mar Apas Catina, ch. 10); Lauer, *Moses von Ghorene, Geschichte Oross-Armeniens iibersetzt,* Regensburg 1869, p. 13 seq. The sources are discussed by Carrtere, *Nouvelles sources de Mo'ise de Khoren,* Vienna, 1893; cf. also Vetter in *Festgruss an Both,* p. 81 seq.

For a rendering of the passages, in which Zoroaster is alluded to in Moses of Khorene, I am indebted to the kind help of my colleague, Mr. Abraham Yohannan, of Columbia University, whose version is here given for convenience.

Mos. Khor. 1. 6 [in speaking of Zrvan and basing the narrative on the legendary Berosian Sibyl, Moses of Khorene alludes to three princes of the earth, 'Zrvan, Titan, and Japhet' (Zrvan, Didan, Habedost). In his opinion these are identical with' Shem, Ham, and Japhet' (Sem, Kam, Habet). He then goes on to state, upon the authority of the Berosian Sibyl], ' These divided the whole world between them. Over the other two, Zrvan gained the mastery,—he, of whom Zoroaster (Zradasht) king of the Bactrians, that is the Medes, states that he is the source and father of the gods.'

Mos. Khor. 1. 17 (16) ' About Semiramis — The reason why she slew her sons—How she fled from Zoroaster (Zradasht) the Magian into Armenia — And how she was put to death by her son Ninyas (Ninouas): — This queen was always accustomed, for her recreation, to pass the summer in the northern region, in the fortified city which she had built in Armenia. She left Assyria and Nineveh in charge of the governor Zoroaster, a Magian and patriarch of the Medes. And having repeatedly done this, she (finally) entrusted the sovereignty entirely to him.'

' Being herself often rebuked by her sons because of her wanton and meretricious character, she put them all to death; only Ninyas (Ninouas) escaped. She chose to bestow upon her paramours all the power and treasures, without any regard to her sons. Her husband Ninus was not dead, nor buried by her in the palace of Nineveh, as is reported; but he abandoned the realm and fled to Crete, because he was aware of her vice and shameless behavior.'

' It was then that her grown-up sons reminded her of all this in hopes of restraining her from her devilish and warlike desires and of having the power and treasures entrusted to them. Becoming excessively enraged thereat, she killed them all, and only Ninyas remained as we have described above.'

' But when some misunderstanding occurred on the part of Zoroaster with reference to the queen, and enmity arose between the two, Semiramis made war against him because he was designing to rule by force over all. In the midst of the war Semiramis fled before Zoroaster into Armenia.'

' At this juncture, Ninyas (her son), taking advantage of the opportunity for revenge, killed his mother and reigned over Assyria and Nineveh.'

(b) Elisaeus, who is presumably a contemporary of Vartan (A.D. fifth century), in his history of the latter, and of the wars which the Armenians waged against the Persians, alludes incidentally to the

' Magians,' and the ' religion of Zoroaster'; see Langlois, op. cit. ii. 189, 230.

(c) The Armenian Eznik (A.D. fifth century,) in his refutation of the sects and of heretical opinions, devotes an entire division (ii.) of his work to the false tenets of the Persians who maintain the doctrine of Ormazd, Ahriman, and Zrvan, and, in this connection, he incidentally mentions ' Zradasht' (Zoroaster) as responsible for the heretical views as to the origin of the sun and moon, cf. Langlois, op. cit. ii. 381. Most of this passage is translated in Wilson, *Parsi Religion,* pp. 542-551, but not the paragraph relating to Zoroaster; cf. also Haug, *Essays on the Parsis,* p. 13.

(d) Thomas Arzrouni, the learned Armenian annalist (A.D. ninth-tenth century),[1] gives a series of statements regarding Zoroaster and the Persian belief in Ormazd. Some of his allusions are identical with the common accounts which associate Zoroaster's name with Ninus and Semiramis. One passage is also of importance in connection with the prescriptions of the Vendldad. It gives a legendary explanation of the origin of the injunction which Zoroaster gave for killing noxious animals. The passage is to be found translated in the valuable publication of Brosset, *Collection d'historiens armSniens; Th. Ardzrouni,* etc., tome i, S. Petersbourg, 1874. As this work is not easily accessible and as the passage does not seem to be generally familiar to Zoroastrian students, it is worth while to reproduce Brosset's translation (op. cit., livre 1, § 3, pp. 19-22, 25; § 4, p. 27).

1. 3, ' De 1'empire des Assyriens ; que Zradacht et Manithop furent chefs des contrees orientales ; leurs dogmes absurdes.

' Des temps ecoules entre Bel et Ninos, il ne reste dans les livres anciens, ainsi que nous l'avoms dit pr ecedemmnent, aucune trace considerable et t^latante, et ceia, sans doute, par plusieurs raisons. D'abord, par suite de la confusion des langues, il regnait une facheuse meintelligence, puis les annalistes chaldeens ne retrac,aient pas les faiblesses des homines de haut rang. Et encore, si meme les exploits et actes de bravoure de Ninos ont ete racontes, comme Bel et pis encore, il en Tint a un tel degre' d'orgueil, qu'il se regardait comme le premier des heros, comme le premier des rois, et ayant fait rassembler en un tas, en grande hate, tous les Merits anciens, il les livra aux flammes, afin que par la suite il ne restat plus de souvenir d'autre personne illustre que la sienne.[2] III passe donc pour avoir regnee sur toute l'Asie, l'lnde excepted et sur la Libye. II fit aussi Spreparer, pour Ihonneur de son nom, la ville de Ninive, autrefois construite par Assour, pour etre la residence royale, et qu'avait ravaged Nebroth. II derdna ensuite le mage Zradacht, roi des Bactriens et des Medes, et le chassa.

1 Cf. Neumann, *Geschichtederarmen.* 2 Mr. Gray notes a similar act by Tsin-Chi-hoang-ti.
[L]*it.,* pp. 123-125, Leipzig, 1836.

jusqu'aux frontieres des Hephtalites, devint le maitre puissant de tout le Khoujastan, des contrees de P orient et de la Perse, jusque par-dela Balkh et Depouhan; de Comaid, de Gauzpan, de Chfribamamacan, de Khodjihrastan, et pour vrai dire, il soumit durant 52 ans, avec une incroyable valeur, tout le pays jusqu'a la mer des Indes. Lorsqu'il mourut, ne laissant que de tres jeunes enfants, il remit Pautorite' a sa femme Chamiram, qui Pexerca elle-meme avec plus de vigueur que Ninos ; car elle enceignit Babylone de murailles, dompta la rebellion de Zradacht et le reduisit en servitude. Mais Pivresse des voluptes lui faisant oublier ses fils, elle prodigua ses tresors a ses amants favoriset e t a b l i t Zradacht commandant de Babylone, du Khoujastan et de toute la Perse orientale. Pour elle, elle passa en Armeiie, ou Pattirait la renommee d'un descendant d' Haic. Quant a son arrived en ce pays, aux details de la bataille, a la construction de superbes Edifices, veritablement admirables, a la revolte de Zradacht, a la mort de Chamiram, aux remits des magiciens, a ce sujet, tout cela a ete raconte par d'autres. Elle avait regnee 42 ans. L'autorite' passa a son fils Zarmia, qui fut appele' Ninovas, du nom de son pere. Celui-ci fut maitre de PAssyrie et, durant un temps, de PArmlnie. Peu soucieux d'agrandissements, doue d'un caractere paisible et non belliqueux, il passa tranquillement ses jours.'

' Cependant Zradacht, posselant les contrees a Porient de la Perse, cessa depuis lors d'inquteter PAssyrie. Dedaignant comme vieillenes et choses par trop obscures, les remits sur Bel et sur les autres descendants des genies, il debita sur son propre compte de nouvelles fables, afin de sSparer du meme coup les Perses et les Mars des Babyloniens, et, par ses doctrines et par des noms, de se mettre en communication avec les Assyriens. II se mit done a appeler [de ?][1] nouveau Zrovan et souche des dieux Sem, fils de Noee. " Celui-ci, dit-il, voulant devenir pere d'Ormizd, dit: ' Qu'ainsi soit, j'aurai pour fils Ormizd, qui fera le ciel et la terre." Zrovan con gut done deux jumeaux, dont Pun fut assez ruse' pour se hftter de paraitre le premier, "Qui es-tu? lui dit Zrovan.—Ton fils Ormizd. — Mon fils Ormizd est lumineux et de bonne odeur, et toi tu es obscur et mauvaise langue." Celui-ci ayant beaucoup insiste, il lui donna le pouvoir pour mille ans. Ormizd, etant ne au bout de ce terme, dit a son frere: " Je t'ai cede' pendant mille ans; cede-moi preentement." Connaissant son inferiority, Ahrman reista et se revolta, et devint un dieu opposee a Ormizd. Quand Ormizd crea la lumiere, Ahrman fit les tenebres; quand Ormizd crea la vie, Ahrman fit la mort; quand Ormizd crei le feu, le bien, Ahrman fit Peau et le mal. Pour ne point dire tout, Pun apres Pautre, tout ce qui est bon et les gens vertueux proviennent d'Ormizd ; d'Ahrman, tout ce qui est mauvais et les demons. Maintenant a celui qui pensera que ces doctrines ne meitent qu'une explosion de rire, et qui traite de fou le roi Zradacht, reponds que ce dieu impuissant, Ormizd, ne travaille pas en vain, et que les deux freres, bien qu'ennemies mutuels, se courrouceront a la fois pour Pexterminer."'

'Le meme insense' Zradacht raconte encore qu'une guerre setant elevee entre Ormizd et Ahrman, le premier eprouva une faim enragee et courut les champs, pour trouver de la nourriture. H rencontra un boauf, qu'il deYoba.

[1] Added by Mr. Schuyler, who also notes from Brosset that ArzrounI always writes *Ormzd, Ahrmn.*

L'ayant tue' et cache' sous un tas de pierres, il attendit le crgpuscule, pour enlever chez lui le produit de son larcin et rassasier sa faim. Le soir venu, il etait tout joyeux et allait se gorger de nourriture, mais il trouva le bceuf gate' devore' par les lizards, par les araign6es, les stellions et les mouches, qui avaient fait leur proie de son gibier. Maintenant done la legion des cloportes et des jjacs vinrent, et comme ils firent beaucoup de mal au dieu, Zradacht prescrivit une quantity de reglements puerils. Ce n'est point a la legere que nous sommes decide' a ecrire ces choses, mais parce que cette doctrine satanique a cause' bien des catastrophes sanglantes a notre Armenie, quelle a ruinee entierement, ainsi que le fait voir l'histoire des saints Vardanians, 6crite par le v£n£rable prtoe Eghiche. Les fils des pyrolatres sont la, pour Taffirmer encore.'

' Cependant Manithop, roi des Hephtals, ajoute et affirme encore ceci: le feu, suivant lui, n'est pas la creature d'Ormizd, mais sa substance. Hephestos et Promithos, *i.e.* le soled et la lune, ayant derobe le feu d'Ormizd, en donnerent une partie aux hoinmes. La terre est Tasyle du dieu Spandaramet—Bacchus; — elle n'a ete creee par personne, mais elle existait, telle qu'elle existe; elle continue d'etre, et Phomine est ne de eui-meme.'

Three pages farther on (p. 25) is found another allusion to Zoroaster : ' Quant aux autres assertions des mythologues, et a leurs dires sans fondements, j'en prendrai, pour le refuter, ce qu'il y a de plus raisonnable dans les traditions confuses, transmises a leurs sectateurs par les orientaux Zradacht et Manithop.'

[In the next chapter Thomas ArzrounI summarizes the reigns of the successive Assyrian rulers down to the rise of the kingdom of Persia under Cyrus, and Zoroaster's death is incidentally mentioned. From the allusions to Ninus and Semiramis and Abraham, it is evident that he places Zoroaster at an early period. The text runs] : ' Nous avons suivi me'thodiquement la sCrie des generations et range' avec soin les ancStres de 1' empire d'Assyrie, dont le premier heritier fut Zamlsos *[i.e.* Zarmia, plus haut], le meme que Ninovas, fils de Ninus et de Chamiram, en la 53e annee de la vie du patriarche Abraham, qui rlgna sur toute l'Asie et r Armenie. Zradacht etant mort, il fut de nouveau, 38 ans durant, monarque pacifique de tout ce qui est a PO. de la Perse, qui lui obelt et lui paya tribut. Apres lui, son fils Arias, le 4e depuis Ninus, durant 30 ans. Apres lui les rois d'Assyrie, se succedant au pouvoir, de pere en fils, ne firent rien de remarquable, et pas un seul d'entre eux ne regna moins de 20 ans.'

Allusions to Zoroaster in Chinese Literature

For my first direct information on this subject, a year ago, I am personally indebted to the Sinologist, Dr. F. Hirth, of Munich, whose kindness I cordially appreciate, and whose suggestions I gratefully acknowledge. Dr. Hirth recently wrote me that some of the material of which he spoke to me is easily accessible in the monographs of Messieurs Chavannes and Dev^ria, from which I give

selections, as they can but be of special interest to students of Zoroastrianism. Dr. Frederick W. Williams, of Yale University, **New** Haven, furthermore draws my attention to the existence of a number of references in Chinese literature to the religion of Zoroaster as *Po-sz king kian,* 'religion of Persia/ or Po-sz. I am sincerely indebted to these gentlemen, and I hope that, joined perhaps by Mgr. C. de Harlez and others, they may pursue their researches farther in this particular line, and add to our knowledge of the Prophet of Ancient Iran, and his influence in the Far East.

In a letter which Dr. Hirth wrote to me, he says: (What I consider to be the Chinese transcription of the name *Zoroaster* occurs in a work called *Si-kirtsung-yii* (chap. 1, p. 20). Speaking of the deity, Mahesvara (in Chinese *Moryirschou-lo),* the author, who wrote about the middle of the twelfth century (cf. Wylie, *Notes on Chinese Literature,* p. 128) says: "It [the deity] originally came from the great country of Persia, and is [there] called *Su4u-tsche.* The god had a disciple by the name of *Yuan-tchen,* who studied the doctrine of his master, etc., in Persia, and afterwards travelled to China to spread it there." '[1]

M. Ed. Chavannes, *Le Nestorianisme et VInscription de Kara-Balgassoun* in *Journ. Asiatique,* Janv. Fev. 1897, p. 61 seq., gives some very interesting allusions to the Persian religion and its spread in China, onward from the seventh century of our era. I select two extracts which mention Zoroaster. The monograph itself should be consulted.

Chavannes, op. cit. p. 61, notes, by way of introduction: 'A la date de la 5[e] annee *tcheng-koan* (631),[2] le *Fo-tsou t'ong ki* dit (Chapter xxxix. p. 71 V°, 9[e] cahier de la lettre[3] dans Pedition japonaise du Tripitaka de la Societe Asiatique):—

" Autrefois *Sou-litche* (Zarathushtra, Zoroastre), du royaume de Perse, avait institue' la religion mo-ni-enne du dieu celeste du feu; un edit imperial ordonna detablir a la capitale un temple de *Ta-tsin"*[4]

' Dans le mime ouvrage (chap. liv. p. 151 r°), on lit:—

[1] On seeing Deve'ria's citation of the same passage (given above), Dr. Hirth supplements his note by adding that it is perhaps the intention of the passage to indicate that the doctrine rather than Yiian-tchen travelled to China. See Deveria's quotation.

"Pour ce qui est de la religion mo-ni-enne du dieu celeste du feu,[1] autrefois, dans le royaume de Perse il y eut Zoroastre ; il mit en vigueur la religion du dieu celeste du feu; ses disciples vinrent faire des conversions en Chine; sous les jHawgr, la [5.] anne'e *tcheng-koan* (631), un de ses sectateurs, le niage *Ho-lou* vint au palais apporter la religion du dieu celeste; un decret imperial ordonna detablir a la capitaie un temple de *Ta-ts'n."'*

M. G. Deveria, *Musulmans et ManicMens CMnois* in *Journ. Asiatique,* Nov. Dec. 1897, p. 445 seq., especially discusses certain Chinese material on the subject of Manichseism; he cites and translates (on p. 456) the last passage given by Chavannes, and notes also the one to which Hirth had already called attention.

Dev^ria, op. cit. p. 462 : 'Yao-Koan des Song dit: les caracteres [. . .][2] deignent PEsprit stranger du ciel; [. . .] se prononce *hien;* son culte est celui que les livres sacre's bouddhiques appellent le culte de Mahesvara; c'est dans la grande Perse qu'il prit naissance ; on l'*y* nomme (culte de) Zoroastre ; celui-ci eut un disciple appete Hiuan-tchen (Celeste ve'rite' ou Ve'ridique celeste), qui 6tudia la religion du maitre ; il descendait de Jouhouo-chan (Joukhshan ou Soukhshan ou Djoukhshan ?), grand gouvemeur ge'ne'ral de la Perse; sa propagande s'exerga en Chine.[1 8]

References to some Syriac, Arabic, and other Mohammedan or Persian Allusions to Zoroaster

The most convenient collection of material on Syriac and Arabic allusions to Zoroaster is by Gottheil in the book so often quoted above and easily accessible. I merely repeat the title below. To supplement this, see brief remark in *AJSL.* xiii. 225 and I note also (by pages) such references as I have observed in Hyde, Barbier de Meynard, Vullers, or elsewhere, as the works can be consulted.

7. Dasatir. This curious collection, with its commentary, professes to be old; but it is criticised adversely by Wilson, *Parsi Religion,* pp. 411-412. It is quoted by the Dabistan. Some selections, with commentary, from the chapter on Zardusht's philosophy are added here from the only edition with translation that is accessible. The spelling of the edition is preserved practically unchanged, but with a few corrections of accents. The title of the edition reads: *The Desatir or Sacred Writings of the Ancient Persian Prophets;* in the Original Tongue; together with the Ancient Persian Version of the Fifth Sasan; carefully published by Mulla Bin Firuz Kaus. With English translation. 2 vols. Bombay, 1818.

come from Nurakh[1] in order to consult thee concerning the real nature of things.'

§ 43. ' I will tell thee what he asketh, and do thou answer *(his questions)* before he putteth them'

Commentary. —' It is said that when the fame of the excellence of the nature of Zertusht had spread all over the world, and when Isfendiftr went round the world, erected fire-temples, and raised domes over the fires; the wise men of Yun&n selected a sage named Tutianush, who at that time had the superiority In acquirements over them all, to go to Iran and to enquire of Zertusht concerning the real nature of things. If he was puzzled and unable to answer, he could be no real prophet; but if he returned an answer, he was a speaker of truth. When the Yunani Sage arrived at Balkh, Gushtasp appointed a proper day, on which the Mobeds of every country should assemble ; and a golden chair was placed for the Yun&n! Sage. Then the beloved of Yezdan, the prophet Zertusht advanced into the midst of the assembly. The YunS.nl Sage on seeing that chief said, " This form and this gait cannot lie, and nought but truth can proceed from them." He then asked the day of the prophet's nativity. The prophet of God told it. He said, " On such a day and under such a fortunate star a deceiver cannot be born." He next enquired into his diet and mode of life. The prophet of God explained the whole. The Sage said, " This mode of life cannot suit an impostor." The prophet of Yezdan then said to him : " I have answered you the questions which you have put to me ; now, retain in your mind what the famed Yun&ni Sages directed you to enquire of Zertusht and disclose it not; but listen and hear what they ask; for God hath informed me of it, and hath sent his word unto me to unfold it " The Sage said," Speak." Thereupon the prophet Zertusht ordered the scholar to repeat the following texts:'

Dasat. p. 121, § 44. 'The friend of acuteness will say unto thee, The Nurakh[2] Sages ask, What use is there for a prophet in this world?'

[Here follow a number of the supposed questions that will be asked, and then a prophecy is made of Vishtasp and an account given of how the Avesta came into the hands of Alexander the Great.]

Dasat. p. 123, §§ 58-59. [The sacred book of the Iranians is referred to in the text and the commentary says, among other things]:

Commentary' —' That book is the inspired volume which the prophet of God, Zertusht, asked of God that he should send down as his book for the purpose of advice; that when the time of Sekander should arrive, the Desturs might exhibit it, and he being gratified with it, become more attached to the faith of the Pure. Yezd&n, approving of the request of his prophet, sent down a part of

his word in the form of an Advice to Sekander; and the King (i.e. Gushtasp) placed it, sealed with the seals of the Desturs, in the Treasury. When Sekander gained the ascendency in Iran, Peridukht Roushenek and the Desturs delivered that volume into his hands. He read it, applauded the religion of Abad (on which be blessings), praised the greatness of Zertusht and the truth of that Religion, and commanded the Mobeds that they should make that book a portion of the Desatlr. That sacred volume is known under the name of Sekander, as it is for his instruction that it was revealed to Zertusht; and the beginning of it is, " I n the name of the Giver of Knowledge Mezdam." '

Dasat. p. 125, § 64. '0 prophet and friend! Hertush son of Heresfetmad! When Senkerakas[1] arrived, he was turned into the right road by one fershem of the Navissh[2],[2] and returned back into Azend.'[3]

Commentary. — Chengerengacheh was a sage renowned for his acuteness and wisdom, and the Mobeds (wise-men)of the earth gloried in being his scholars. When he heard of the greatness of the prophet of Yezdan, Zertusht the son of Isfentem&n, he came to Iran with the intention of overturning the Good Religion. When he reached Balkh, before he had dropped a single word from his tongue, and before he had asked a single question, the prophet of Yezd£n, Zertusht, said into him, " Commit not to your tongue what you have in your heart, but keep it secret." He then addressed a Sage who was his disciple, saying, " Read to him one section (Nisk) of the Awesta." In this blessed section of the Awesta were found the questions of Chengerengacheh with the answers, which He (God") himself had communicated to the prophet; forewarning him, that such a person, of such a name would come ; that his first question would be *this,* and that the answer was to be *so.* When Chengereng&cheh saw this miracle, he was converted to the Good Faith, and returning to the land of Hind remained steady in this blessed religion. May Yezdan the Bountiful grant to us and our friends this best of Faiths '

Dasat. p. 126, § 65. 'Now a Brahman named Biras[4] will come from Azend very wise, insomuch that there are few such persons on earth!'

§ *66* 'He, in his heart, intendeth to ask of thee, first, Why is not Mezdam the immediate maker of all things having being ?'

§ 67. 'Say thou unto him; Mezdam is the Maker of all things; and used the medium of no instrument in bestowing existence on the Chief of Angels; but in regard to all other existence he made use of an instrument.'

Commentary. —' The First Intelligence received being from the Bestower of Being without the intervention of any instrument; while all other beings received existence by the intervention of instruments and media.'

[Here a long series of questions and answers are given to Zoroaster so as to prepare him. The text then continues as follows.]

Page 143, § 162. 'When you have expounded this matter to him, he will become of the true faith, and be converted to your religion.'

Commentary. —' It is said that when Bias, the Hindi, came to Balkh, Gusha tasp sent for Zertusht, and informed the prophet of YezdSn of that wise man's coming. The prophet said, "May Yezdan turn it to good!" The Emperor then commanded that the Sages and Mobeds should be summoned from all countries. When they were all assembled, Zertusht came from his place of Worship; and Bias, also having joined the assembly, said to the prophet of Yezdan; "0 Zertusht, the inhabitants of the world, moved by the answers and expounding of Secrets given to Chengerengacheh, are desirous to adopt thy religion. I have heard, moreover, of many of thy miracles. I am a Hindi man, and, in my own country, of unequalled knowledge. I have in my mind several secrets, which I have never entrusted to my tongue, because some say that the Ahermans (devils) might give information of them to the idolaters of the Aherman faith: so no ear hath heard them, except that of my heart. If, in the presence of this assembly, you tell me, one after another, what those secrets are that remain on my mind, I will be converted to your faith. Shet Zertusht said, O Bias, Yezdan communicated to me your secrets, before your arrival. He then mentioned tho whole in detail from beginning to end. When Bias heard, and asked the meaning of the *words,* and had them explained[1] to him, he returned thanks to Yezdan and united himself to the Behdin, after which he returned back to Hind.'

§ 163. 'In the name of Mezdam! 0 Zertusht! my prophet! After thee shall Simkendesh[2] appear, and afterwards the *First* Sas(in, the prophet, shall come and make thy Book known by a translation.'

§ 164. 'And no one but he shall know the meaning of my words.'

Commentary. —'Hence it was that Shet Sasan made an *interpretation* of the Book of Shet Zertusht agreeably to its sense.'

Allusion to Zoroaster in the Snorra Edda Preface

[Reprinted, with unimportant omissions, from my *Notes on Zoroaster and the Avesta,* in *Proceedings AOS.*, March, 1894, vol. xvi. pp. cxxvi.-viii.]

In the preface to the Younger Edda there is a passage relating to Zoroaster which is perhaps worth recording among the allusions to his name found in non-Oriental literature. The preface to the Snorra Edda, after giving a brief sketch of the history of the world down to the time of Noah and the Flood, proceeds to an account of the Tower of Babel and the dispersion of the races through the confusion of tongues. Foremost among the builders of the tower was Zoroaster; the text adds that he became king of the Assyrians, and that he was the first idolater. In consequence of the confusion of tongues he was known by many names, but chief among these was Baal or Bel.

The text *Edda Snorra Sturlusonar, formali* 2, ed. Jonsson, p. 6, is here given for convenience of future reference : *Ok sa, er fremstr var, hit Zordastres ; hann hid, fyrr enn hann grit, er hann kom i veroldina; enn forsmithir voru* II *ok* LXX, *ok svd margar tungur hafa slthan dreifst urn veroldina, eptir thvl sem risarnir skiptust slthan til landa, ok thjothirnar fjolguthust. I thesum sama stath var gjdr ein hin agcetasta borg ok dregit af nafni stopulsins, ok kollut Babllon. Ok sem tungnaskiptit var orthit, tha fjolguthust svd nofnin mannanna ok annara hluta, ok sjd sami Zordastres hafthi morg nofn; ok tho at hann undirstcethi, at hans ofsi vceri Icegthr of sagthri smith, tha fcerthi hann sik tho fram til veraldligs metnathar, ok let taka sik til konungs yflr morgum thjothum Assirlorum. Af honum hdfst skurthgotha villa; ok sem hann var blotathr, var hann kallathr Baal; thann kdllum ver Bel; hann hafthi ok morg onnur nofn. Enn sem nofnin fjolguthust, tha tyndist meth thl sannleikrinn.*

5 (p. 7). *Ok af thessu hofst onnur villa milium Krltarmanna ok Macedoniorum, svd sem hinfyrri methal Assirlorum ok Kaldeis af Zdrdastre.*

This may be rendered: ' He who was the foremost (builder of the tower) was called Zoroaster; he laughed before he cried when he came into the world. But there were (in all) seventy-two master-builders ; and so many tongues have since spread throughout the world, according as the giants afterwards were scattered over the land and the nations multiplied. In this same place was

built a most renowned town, and it derived its name from the tower, and was called Babylon. And when the confusion of tongues had come to pass, then multiplied also the names of men and of other things; and this same Zoroaster had many names. And although he well understood that his pride was humbled by the said work, nevertheless he pushed his way on to worldly distinction, and got himself chosen king over many peoples of the Assyrians. From him arose the error of graven images (i.e. idolatry) ; and when he was sacrificed unto, he was called Baal; we call him Bel; he had also many other names. But, as the names multiplied, so was the truth lost withal.'

6. '(From Saturn) there arose another heresy among the Cretans and Macedonians, just as the above mentioned error among the Assyrians and Chaldseans arose from Zoroaster/

This passage is interesting for several reasons.

First, it preserves the tradition elsewhere recorded regarding Zoroaster's having laughed instead of having cried when he was born into the world. [This has already been discussed above, p. 27.]

Second, the two allusions here connecting Zoroaster with Assyria, Chaldaea, and Babylon are to be added to those references which associate his name also with these places (e.g. consult Windischmann, *Zor. Studien,* p. 303 seq.); or again they are to be placed beside the statement of the Armenian Moses of Khorene, Thomas ArzrounI and others who make Zoroaster a contemporary of Semiramis, and appointed by her to be ruler of Nineveh and Assyria. (See Spiegel, *Eranische Alterthumskunde,* 1. 682 [and the quotation of the passage in this Appendix].)

Third, in connection with the reputed multiplicity of names of Zoroaster, and the association of his name with *Baal, Bel,* attention might be called to the citation in the Syro-Arabic Lexicon of Bar 'All (c. A.D. 832) s.v. *Balaam,* ' Balaam is Zardosht, the diviner of the Magians' (cf. Gottheil, *References,* in the *Drisler Classical Studies).*

APPENDIX VII

NOTES ON SCULPTURES SUPPOSED TO REPRESENT ZOROASTER

THERE is a supposition that we are not wholly without some representation of the personal appearance of Zoroaster, at least according to the conception which prevailed in Sassanian times. One sculptured image, in particular, has been supposed to represent in effigy an ideal of the great Master. It is also stated that there is a picture of Zoroaster in a fire-temple at Yezd, which is said to be taken from an old sculpture that exists at Balkh. This tradition, together with other facts and material on the subject of portraiture of Zoroaster, is given in the following pages. The modern Zoroastrians themselves can doubtless add much more valuable information on this interesting subject. It is hoped that they will do so.

(a) In the first place we may refer to a very old tradition on the subject of an effigy of Zoroaster; this is found in the Syriac work called the 'Oration of Meliton the Philosopher; who was in the presence of Antoninus Caesar, and bade the same Caesar know God,' etc. This interesting allusion is quoted by Gottheil, *References to Zoroaster* (p. 27), from the translation of Cureton, *Spicilegium Syriacum*, London, 1855, p. 44, cf. p. 91, n. 36; it mentions an [i] image of Orpheus, a Thracian Magus; and Hadran is the image of Zaradusht, a Persian Magus.' The special point of importance is that it shows the existence of a tradition as to a representation of Zoroaster.

(b) E. G. Browne, in his valuable work, *A Year amongst the Persians*, London, 1893, p. 374, describes a visit which he paid to three Zoroastrian fire-temples at Yezd. The third temple which he mentions, serves as a theological college for training youths for the priesthood, and it contains a relic of interest. On the walls of one of the rooms of this building, Dr. Browne saw a picture which attracted his notice, or to use the words of his own description (p. 374) : ' A picture of Zoroaster (taken, as Ardashir [the host and guide] told me, from an old sculpture at Balkh), and several inscriptions on the walls

of the large central room, were the only other points of interest presented by the building.' It would be highly interesting if we could secure a copy of this portrait or of its reputed original at Balkh, because this would best represent the modern Zoroastrian traditional idea of the appearance of the great High Priest. Possibly we may obtain it. The mention of Balkh, moreover, is interesting if this be a different representation from the supposed effigy at Takht-i Bostan. Should this be the case, and the location of the sculptured figure be found to be at the old temple Nubahar, we should have a new proof of the traditional association of Zoroaster's name with Balkh.

(c) The modern Par si historian Dosabhai Framji Karaka, whose work, *History of the Parsis,* London, 1884, is indispensable to students of Zoroastrianism in our day, presents in his second volume (ii. 146) an idealized colored portrait of the founder of the Faith, which is here reproduced (see Figure I.), without the coloring, however. The portrait is evidently based upon the sculptures next to be described, and it has the value of giving the Parsi conception directly.

(d) The Takht-i Bostan Sculpture. Not far distant from Behistan, and near the city of Kermanshah (see Map, — square Be), in the valley of Takht-i Bostan or Tek-i Bostan, on a hillside, is to be found a series of six historic bas-reliefs. The sixth or last of these bas-reliefs comprises a group of four sculptured figures, reproductions of which are presented below, being based upon the copies found in Sir Bobert Ker Porter, *Travels in Georgia, Persia, Armenia,* etc., London, 1822, vol. ii. 191; Flandin et Coste, *Voyage en Perse,* i. Planche 14, texte p. 6; George Bawlinson, *The Seventh Oriental Monarchy,* London, 1876, p. 64; K. D. Kiash, *Ancient Persian Sculptures,* Bombay, 1889, p. 211; and especially the photographic copy of de Morgan, *Mission Scientijique en Perse,* Paris, 1894, vol. ii. plate xxxiv. p. 104-5; vol. iv. plate xxxv. p. 310-11. The photograph of the sculpture taken by M. de Morgan is so interesting that it seems appropriate to make it accessible to those who cannot consult the valuable original work. A brief description of the possible subject of this four-fold group, which, unfortunately, bears no inscription, is not out of place here.

Sir B. K. Porter (p. 191) records that this rock-sculptured group is called by the natives 'The Four Calendars,' but he does not explain why the name is given (see Figures II. and III.). He regards

the figure on the extreme left (or to the right as we face the picture) as the god Ormazd presenting the ring or emblem of sovereignty to Ardashlr Babagan, who stands in the centre of the group, ' and both are trampling upon a similar royally-habited figure symbolical of the fallen Arsacidse.' Of the fourth or remaining figure, the one in which we are particularly interested, Sir Ker Porter says (p. 192): 'The personage to the right of the centre figure [or to the left as we face the group] is of rather a singular appearance. His head is protected by a similar kind of cap, but without the ball, and with the extraordinary addition of a circle of rays blazing round his head and down to below his shoulders. He holds in both hands a fluted staff, or sceptre, of great length. The rest of his vesture nearly resembles that of the murally crowned figure. He stands upon a plant, not unlike a sunflower, the stalk of which is short and thick, and curved down into a lower part of the rock. The prostrate person is greatly mutilated; but his pearl-wreath, collar, and sword show that his consequence was not inferior to the two who trample on him. . . . The radiated personage [the one under discussion] may either be a personification of the Mithratic religion restored by him [i.e. by Ardashlr, the central figure]; which the sunbeams round the head and the full-blown flower rising under their influence at his feet, seem to typify; or the figure may be meant for the glorified Zoroaster himself; some Persian writers ascribing to him the reflected honor of that god-like attribute. The altar-platform near this bas-relief, and also the source of the river (two sacred Mithratic appendages), support the idea that this sculpture contains more than human images/

Sir John Malcolm, *History of Persia,* new edition, London, 1829, vol. i. p. 545 (cf. earlier edition i. 258), speaks of the two figures with the circle or ring as' two sovereigns upon a prostrate Roman soldier;' and he adds: ' A figure supposed to be the prophet Zoroaster stands by their side; his feet rest upon a star, and his head is covered with a glory or crown of rays.' And he adds in a foot-note : 'I am informed by the Parsees, or Guebres, that in almost all the paintings or sculptures that represent Zoroaster he is always distinguished by a crown of rays, or glory, as I have described.' This shows, at least, the prevalence of a tradition that representations of Zoroaster were thought to be not uncommon, whatever we may think on the subject. Flandin also believed the radiated figure to be Zoroaster *{Voyage en Perse* de MM. Flandin et Coste, i. 442, Relation de Voyage, Paris, 1851).

Edward Thomas, *Sassanian Inscriptions,* in the *Journ. of the Royal Asiatic Society of Gt. Brit and Ireland,* new series, vol. iii. p. 267, n. 3, London, 1868 (= *Early Sassanian Inscriptions, Seals and Coins,* p. 27, London, Triibner, 1868), argues that the figure with the rays and staff represents the god Ormazd, and he bases his identification upon an acknowledged representation of Ormazd in a Naksh-i Eustam bas-relief (op. cit. p. 269).[1] As for the rays, he adds in a note that a similar form is given to Ormazd's headgear in a coin of Hormisdas II. The other two figures in our group he regards, as do others, to be the representation of Ardashlr presenting the crown of Iran to his son Shapfir.[2]

Canon George Eawlinson (op. cit. p. 64) agrees with Thomas that the radiated figure is Ormazd, not Zoroaster; that the other two are Ardashir and Shapfir, and that the prostrate figure represents ' either Artabanus or the extinct Parthian monarchy, probably the former; while the sunflower upon which Ormazd stands, together with the rays that stream from his head, denote an intention to present him under a Mithraic aspect, suggestive to the beholder of a real latent identity between the two great objects of Persian worship.' Professor Kawlinson, therefore, like Thomas, is not of the same opinion as those who presume that the figure represents Zoroaster. Similarly also, M. Dieulafoy, *Suse,* iv. 409, and Curzon, *Persia,* i. 563.

The Parsi scholar, Kawasjee Dinshah Kiash, who visited Takht-i Bostan in 1878 and sketched the group, gives, in his serviceable book *(The Ancient Persian Sculptures,* p. 212), an interesting tradition regarding this bas-relief which seems not to be recorded by other writers on the subject. But first we may notice the details that he gives concerning the special figure, which, like the other effigies, stands about seven feet in height. 'The head of the first figure [the one we are discussing] is covered up with a piece of cloth, and a *serpach* flows down the back. He is clad in a short, plain coat, and wears a belt. He holds in both hands a club three feet long and three inches thick. The rays of the sun shine direct upon his head, and a star glitters beneath him.' Kiash next notes that some scholars call this a 'sunflower' rather than a star, and he further describes the other three figures of the group. Then follows the interesting tradition:—

[1] Some notes on sculptured images of Ormazd will appear in my article on *Ormazd* in *The MonisU* Chicago, Dec, 1898.

[2] On the subject of Ardashlr and his history, see Darab D. P. Sanjana, *Kdrndme i Artakhshir* t *Pdpakdn,* new ed., Bombay, 1896.

3 Owing to the deficiency in the inscription, tradition says: " The first figure with the club is that of Prophet Zoroaster, the second is that of Gustasp, the fifth king of the Kayanian dynasty, the third is that of his son, the mighty Asphandiar [Isfendlar], who had established the Zoroastrian religion through the whole of Persia, and the last is that of Arjasp, the grandson of Afrasiab of Tooran, or Tartary. The circlet shows that the whole world is in their possession."'

He then adds: ' The above tradition, I believe, is taken from the Shah Nameh. The Persians take great pride in speaking of their by-gone kings. Ancient and modern writers contradict these statements, and doubtless the figures were not sculptured by the Kayanian kings, but by Ardeshir Babighan, the first ruler of the last dynasty of the Zoroastrians.' Mr. Kiash goes on to say he agrees with the view that the sculpture is of Sassanian origin, that the second and third figures apparently represent Ardashir and Shapur I., and the dead figure is emblematical of the downfall of the Parthian dynasty. As to the first only is he in doubt, as it is of peculiar construction and differs from others I have seen in different parts of Persia. On comparing it with the two figures holding clubs at Nacksh-i-Rajab (op. cit. p. 112) and Nacksh-i-Roostum (p. 121), both the dress and crown differ. I am unable to give the name of any religious personage or celestial being, but simply state that it must be a sign of the Mithraic religion. According to the opinion of my co-travellers, it is believed to be a form of the Prophet Zoroaster/

Whatever may be the origin and worth of the 'tradition' which Mr. Kiash quotes as connecting the figures with Vishtaspa and his contemporaries, it certainly is very interesting in connection with Chapter X. and the characters who act in the drama of the Holy War, especially Arjasp, the foeman of the Faith, with whom we have become sufficiently acquainted. The statement which the Parsi writer records of the opinion of his co-travellers to the effect that the figure is that of the Prophet Zoroaster, shows, like kindred statements, a preponderance of traditional authority on the side of the Zoroastrians, at least, in identifying this figure with their Prophet. Everything of that kind has its weight and importance when we enter upon the question of such identifications or endeavor to interpret sculptured remains.

The evidence on the subject of this particular sculpture, as we look it over, seems to be about evenly balanced. Tradition apparently favors the identification of the effigy with Zoroaster; the

more technical scholarly opinion of recent times, on the other hand, seems rather to regard the figure as a representation of Ormazd. The claim to Mithraic characteristics is not so easy to recognize. This much may be said in favor of tradition, that the figure would answer well to the glorified image, with 'dazzling wand' and 'lustrous glory' around the head, which is the guise under which the Zoroastrian writer of the Zartusht Namah, in the thirteenth century, describes the vision of the Prophet's appearance (see Wilson, *Parsi Religion'* p. 481). It is to be regretted that M. de Morgan (iv. 310; observe his note) does not especially discuss the figure. For the sake of sentiment we should, perhaps, best like to imagine that the whole group really represents a Sassanian conception of a scene from the Holy War of Zoroastrianism, in which the great High Priest figured so prominently, and to which Kiash alludes in his 'tradition'; but, after all, we should have to acknowledge that this is due, perhaps, to our sentiment and fancy.[1]

The whole subject of the portraiture of Zoroaster requires further investigation.[2] Much will dovbtless be added on this question from time to time.[3] Let us hope especially that additional information

[1] Murray's *Handbook of Asia Minor, Transcaucasia,* Persia, Vtc., London, 1895, p. 327, merely gives the common statement that tins is a Sassanian panel, which is supposed to represent the investiture of Shapiir I. with part of the kingdom, by hs3 father, Ardeshir'

[2] A figure has been published as a portrait of Zoroaster in Dr. Wallace Wood's *Hundred Greatest Men,* p. 125, London, 1885, but I have not been able to find authority for attributing the likeness to Zoroaster. It represents the head of a grave-faced priest and counsellor, with the familiar mitre-shaped pontifical head-covering of Sassanian times. On p. 496 of the volume, a note is added that the figure is copied irom a bas-relief at Persepolis. Mention is made of Thomas, *Early Sassanian Inscriptions.* The portrait is reproduced as a frontispiece to an article on *Mazdaism* in the *Open Court,* xi. 129, Chicago, 1897. In a following number of *The Open Court,* xi. 378, a Parsi, N. F. Bihmoria, writes that the portrait was new to him and to his co-religionists. As an ideal it is good; but it seems to lack traditional authority. I may learn more about it.

3 At the moment when I am sending the final proof-sheets to the press, there arrives from my friend Professor Charles R. Lanman, of Harvard University, a prospectus of an important work just issued by Mr. Quaritch of London, and the Harvard Library kindly forwards to me the magnificent facsimile. It is entitled *A Florentine Picture- Chronicle by Maso Finiguerra,* and it is a reproduction of a fifteenth century folio of Italian drawings now in the British Museum. Among these drawings are '14. Zoroaster, '49. Oromasdes raising the Dead,' and '50. Hostanes.' The 'Zoroaster' is a typical magician with books of black art and imps rather than an antique sage.

or suggestion on this special theme may be obtained particularly from the Zoroastrians themselves. Any material that can be found to throw more light on the problem will be welcomed. The subject is one that is worthy of earnest consideration because it stands, in a certain manner, for an ideal. I shall be glad if these notes have contributed anything by drawing attention to this interesting theme for research. And with these words I close the book, adding only a line which the Pahlavi scribes of old liked to add in the colophon;

Frajaftpavan drut va satlh va ramisn.

PROM THE PRESS

" Many glimpses of fields almost untrodden in Greek and Latin literature are given in this volume."— *The New York Tribune.*

" A recent publication which will appeal to every American scholar. . . . The papers are kept strictly within the lines of scholarship and criticism in which Dr. Drisler himself has been engaged. On the part of the contributors they are an offering of what is choicest and best in their own profession, a rich and delightful mosaic of American scholarship, which will bear study part by part, and which, in the combined setting of the parts, is an incomparable tribute to the incomparable Nestor of our American Greek schools.*'— *The Indeptndent.*

" The circumstances of the issue of this handsome volume give it an emotional interest, which makes it a volume separate and distinct among the collected records of the investigations of scholars. It is a gathering of twenty-one studies of classical problems, printed as a tribute to one of the best-known classical students of the present day, at the conclusion of fifty years of his service in a single institution. . . . These circumstances give this volume an interest to all persons concerned with scholarship and university influences. The studies themselves, for the most part, appeal in the first instance to specialists, but many of them have a much wider interest. . . . The book is a credit to American scholarship, as well as a fit tribute to the honored name of Professor Drisler." — *The Outlook.*

" Entirely apart from the special interest which its contents possess for the student of the classics, the publication of this handsomely printed volume has some features that are of general significance. It gives evidence, for one thing, of the Germanization of our classical scholars, not only in their methods of research and the other weightier matters of the law, but also in the minor points of academic custom and tradition. In Germany it has long been the practice for the friends and former pupils of a distinguished scholar to celebrate some epoch of his career by the publication, in his honor, of a collection of scientific monographs relating to the special subjects in which his life-work has been spent and his reputation won. . . . So far as the writer knows, the work that has just appeared from the new Columbia University Press—the first to be issued by that organization — is the only one of the kind yet published in honor of an English-speaking scholar. . . . This collection of monographs is particularly instructive as practically illustrating the economic principle of the division of labor applied to scholarly pursuits. The stock charge that has been brought against the intense and minute specialization of the present day, is that specialists in their devotion, each to his own limited field of research, lose their sense of perspective, despise the equally important labors of their fellow-specialists, and come to feel that the part is greater than the whole. Such a volume as the present affords a practical and ample refutation of that view. Here we see investigators in many different fields of study, not only using in their own work the garnered results of other specialists, but ably and effectively throwing upon the problems of other workers the special knowledge that their own research has enabled them to give. . . . The appearance of the volume is unusually attractive and reflects credit upon the Columbia University Press, whose work of publication is thus so appropriately and so auspiciously begun."— *The Educational Review.*
