The modern continental Teut. words seem to have chiefly sense 2 below, but dialect glossaries often give sense 1 as locally current The etymological notion is obscure, but the parallel forms disprove the notion that the word is a 'corruption' of *grace-widow*

It has been suggested that in sense 1 *grass* (and G *stroh*) may have been used with opposition to *bed*, cf. the etymology of Bantam. Sense 2 may have arisen as an etymologizing interpretation of the compound (cf Grass *sb* ! 5) after it had ceased to be generally understood, in Eng it seems to have appeared first as Anglo-Indian.)

No 14 294 In case its (specifick) gravity were considerably alter'd 1685 *Phil Trans XV* 1004 As if they were different fluids of different specific gravities (as the word is now a-days) or (as it was wont to be called, and I think, better) Intensive gravity, one from the other 1700 Whiston *Theory Earth* I (1722) 62 Fluids are capable of all degrees of Density and specifick Gravity, as Solids 1758 Reid tr *Macquer's Chym* I 234 As the fire carried away the mercurial part, the other which remains in the retort increases in specific gravity. 1820 Imison *Sci & Art* I 120 The Hydrometer is the most eligible instrument for finding the specific gravity of fluids 1831 Lardner *Cycl Sci* 138 By the weights of equal bulks bodies may be separated and arranged in species. 5. The attractive force by which all bodies tend to move towards the centre of the earth, the degree of intensity with which a body in any given position is affected by this force, measured by the amount of acceleration produced. Also often in wider sense, the degree of intensity with which one body is affected by the attraction of gravitation exercised by another body.

Some writers who restrict the word to terrestrial attraction apply it to the resultant of the earth's attraction of gravitation and the centrifugal force due to the earth's rotation, while others apply it to the gravitational component only

The receipts quoted under sense 1 below are substantially identical with receipts in 15th century books, in which the word is *grané*. For the OF word the reading *grané* seems certain (though in printed texts *grané* usually appears), it is prob. corr. with OF *grané* 'anything used in cooking' (Godef.), and with Grenade, Grenadine; also *Mod. Prov. grenou* = 'gravy bastard'. But in the Eng MSS the word has nearly always either a *v* or a letter which looks more like *u* than *n* (the *n* is always written in the 'table' to *Liber Cocorum*, which has thrice *grane*, while the text has *gruue*). As the ME. word was therefore identical in form with the mod word, it was difficult, in spite of the difference in sense, to regard them as unconnected. In the present state of the evidence, the most probable conclusion is that the OF *grané* was early mistaken for a *gravé*, and that form became current as a term of English cookery]

(Wanting in Gothic and Scandinavian.)

On the assumption that the primary sense is 'coarse' (sense 1 below), some scholars regard the word as cognate with ON. *grautr* porridge, OE *grīt* fine meal, *grēot* particle, *grȳt* coarse meal, *grēot* sand, gravel, ON. *grjōt* stones. But the connection is not free from difficulty as the cognates of these words outside Teut. point to a root meaning 'to pound', a sense from which that of the adj. is not easily derived. It has been suggested (Stoket in Pick *Btg Wb* 1 p. 219) that a cognate of the Teut. adj. may exist in the Oirish *greaut* fl. –pre-Celtic **ghrowdes*) check fl. ht. 'thick or fleshy' of the face: cf. sense 2 below, and the contrasted notion in OE. *hunsweg* lit 'thin cheek', the temple). The prevailing senses in OE are 'coarse, thick, stout, big', but the word also appears as an intensive synonym of *micel* Mickle, which in the later language it superseded. In OHG *grōz* had the senses of 'big, awkwardly large', and of 'pregnant', but it also used as a synonym of *mahtīg* (though not with reference to length); in OS *grōt* is recorded only in the sense of 'great', in which it is less frequent (and possibly more emphatic) than *mikil*. The development by which *great* has superseded *mickle* (not only in Eng. but also in Du., Ger., and Fris.) may be illustrated by reference to the mod. colloquial substitution of *big* for *great*, and to the supersession of *L. magnus* in Rom. by *grandis* big, full grown (see Grand *a.*)

In this word, as in *break*, the influence of the preceding *r* has caused ME. *ē* to become lengthened by (*e*) instead of the usual (*i*), cf. *breed* with *ē* instead of *e*. The pronunciation (grīt) was, however, very common, and approved by the majority of orthoepists, throughout the 18th c., as seems to have been merely an artificial fashion. Many modern dialects have (*grei*), and others have metathetic forms such as (*grīt*), a common Sc form, esp. in senses 1 and 2, as *greit* (*grēt*).]

II. Having a high position in a scale of measurement or quantitative estimation. Opposed to *small*.

With words like *as, so, how*, the adj., like some other adjs. and advs. of cognate meaning (cf Far *adv.* 6), admits of being used in a weakened sense, expressing size or quantity in the abstract, = 'as great as', 'so great as' 'how great', merely 'equal in size or amount to', without any implication that the things compared are 'great'. See also Greater.

6 Of material objects, with reference to size.

In numerous uses the word in this application is now superseded by *large* or (colloquially) *big*. To use *great* with reference to size now implies either some kind of feeling on the speaker's part, a mixture of some other sense, or an adj. Thus 'I found a *large* table in my room' would simply state a fact, but if *great* were used the sentence would indicate annoyance, amusement, or surprise. Often preceding a partly synonymous adj., as in *great big, great thick*, etc. The adj. has never had, like the F. *grand* and the L. *grossus*, the sense of 'tall', if used with reference to stature it expresses some form of such as surprise, contempt, or admiration, as in 'that great boy', 'a great tall man'.

A similar coalescence occurs in the case of OE *hefelice*, *hefelice* HEAVILY. The primary sense is uncertain: the senses of early occurrence in continental Teut. are 'to approach', 'to call upon', 'to provoke or compel to action', 'to salute', 'to weep, lament, annoy', 'to address, salute' In mod Ger and Du as in Eng the sense 'salute' has become the prominent one, such other senses as survive being now apprehended as transferred from this. (The sb., which may be only a back-formation, expresses the action of the vb in all senses.) The ultimate etymology is equally uncertain with the radical meaning; many scholars refer the word to OAryan **ghrēd-* *ghrēd-* to resound (see GRED, v.), on which supposition the primary sense should be 'to call on'. Another view is that the Teut root **grōt-* is an extension of the root which appears in Gr. as χρά with the sense 'to approach closely, touch', etc.]

MDu *graw*, *gra* (Du *grauw*), OHG *grâo*, pl *grâwe* (MHG *grâ*, mod G *grau*), ON. *grár* (Sw *grå*, Da *graa*), repr two OTeut. types **grǽgo-* and **grǽwo-*—pre-Teut **ghrēgho-* (or **ghrēgh-wo-*, the suffix *-wo-* being frequent in colour adjs), with variable accent. Outside Teut no affinities have been found, the word has no connexion with OHG *grîs* (Ger *greis*), or Gr. *γρῑός*.

Each of the current spellings has some analogical support. The only mod Eng words repr OE words ending in *-æg* are *key* (which is irregular on account of its pronunciation), *obey*, and *clay*. If we further take into consideration the words repr OE. words in *-ræw*, viz *blay* or *May*, *hey*, *ney*, we have three (or four) instances of *ey* as of only two or one) of *ay*. On the other hand, this advantage in favour of *grey* is counterbalanced by the facts that *clays* is the only word of the five which is in very general use, and that *grey* is phonetically ambiguous, while *gray* is not. With regard to the question of usage, an inquiry by Dr Murray in Nov 1893 elicited a large number of replies, from which it appeared that in Great Britain the form *grey* is the more frequent in use, notwithstanding the authority of Johnson and later Eng lexicographers, who have all given the preference to *gray*. In answer to questions as to their practice, the printers of *The Times* stated that they always used the form *grey*, Messrs Spottiswoode and Messrs. Clowes always used *grey*, other eminent printing firms had no fixed rule. Many correspondents said that they used the two forms with a difference of meaning or application the distinction most generally recognized being that *grey* denotes a more delicate or a lighter tint than *gray*. Others considered the difference is that *gray* is a 'warmer' colour, or that it has a mixture of red or brown (cf also the quot. under 1 c below). There seems to be nearly absolute unanimity as to the spelling of 'The Scots *Grays*', a pair of *greys*. As the word is both etymologically and phonetically one, it is undesirable to treat its orthographic forms as differing in signification.]

4. A grasshopper or cricket. *dial.*

The genuineness of the following is doubtful, as the dialect glossaries containing it usually quote as their sole example the phrase ‘merry as a grig’ (see 5).

5 *A merry* (or † *mad*) *grig* (rarely without adj) an extravagantly lively person, one who is full of frolic and jest Also in phrase *as merry* (or *lively*) *as a grig*.

[Commonly associated with sense 4, but it is possible that sense 4 is itself merely an erroneous inference from the equivalence of the above phrases with ‘a merry crick’; ‘merry as a cricket’, &c. Also, the allusion in ‘a merry grig’ may originally have been to sense 3 or even to sense 2. The relation of *merry grig* to the earlier recorded synonym *merry Greek* is obscure; no doubt one of them must have been a perversion of the other, but the difference of recorded date is too slight to afford ground for saying that *merry Greek* is the original. The probability seems indeed rather on the other side, as it is not easy to explain why *Greek* should be used in this sense, for which there is no precedent in Fr. Cf. also Gig.]

The evidence of metre seems to show that there were two distinct Os. forms, *grin* neut. (= *gren*) and *grin* fem., but the ME. and mod E. words descend exclusively from the form with short vowel. The form *grin*, standing alone, might be cogn. with Grane and Gyn *sb*[1]; but the existence of a form with ī can hardly be reconciled with this.]

Grin (grin), *v.*[2] Forms: a. 1 grennian, 3 grennen, 4–6 grenne, (5 grennyn), 6 gren, 4–5 grynn, 5–6 grynne, 7 grinn, 4–7 grenn. [The OE. *grennian* (=OTeut type **granjanan*) is cognate with OHG *grennan* to mutter (MHG *grennen* to grin).—OTeut. **granjan*, possibly related to **grand* moustache A root of identical form appears in OHG *granôn* to grunt (MHG *granen, grannen* to grunt, wail), ON. *grenja* to howl, OSw *granita* to roar, to gnash or show the teeth threateningly

The root-long *grin* appears to be only a phonetic development, orig. northern, of the older *gren-* (cf. *glent* and *glint*, *hent* and *hint*), but it presents a remarkable contact of sense and form with a number of Teut words belonging to a different ablaut-series: OHG *grînan* str vb to show the countenance, gnash the teeth, grin, weep profusely (MHG *grînan*, mod G *greinen* wk), mod Du *grijnen* (the usual Du word), Sw *gråna*, Da *grine* to grin, are perh from LG.), further MHG *grinnen* to gnash the teeth, MDu *grinsen* (mod.Du *grynsen*), mod G *grinsen* to grin. The last is probably best explained as a confluence between the two Teut forms *gran-* and *grîn-*, the latter of which appears to be an extension of the root *grî-* of OE. *grîma* mask The vb Grin is a northern metathetic form of *gren*.]

Groap(e, obs form of Grope.

Groat (grōʊt, grǫt). Forms: 4-6 groot(e, grote, 5-6 grott(e, 6 grot, groate, grootte, *Sc.* and *north.* groit, groyt, 6- groat. [a. MDu. *groot*, properly an elliptical use of the adj etymologically = *great* (in the sense 'thick'); cf. MHG *grôze pfenninge* 'thick pennies', Grochen. The equivalent of *groat* is *grossus*, OF *gros* (see Gross *sb.*) occur earlier than the Teut forms.

The pronunciation (grǫt), for which compare (brǫd) *bread*, is recognized by many Dicts, but is now old fashioned]

1. *Hist* A denomination of coin (in med. Latin *grossus*, *n. groot*, *li. grosso*, MDu. *groot*) which was recognized from the 13th c. in various countries of Europe Its standard seems to have been in the 14th c. theoretically one-eighth of an ounce of silver, but its actual intrinsic value varied greatly in different countries and at different periods (The adoption of the Du. or Flemish form of the word into English shows that the 'groat' of the Low Countries had circulated here before a coin of that denomination was issued by the English sovereigns.) + *A shilling, found of groats* A Flemish money of account, bearing the same proportion to the ordinary 'shilling' or 'pound' as the groat or 'thick penny' did to the ordinary penny.

2. The English groat coined in 1351-2 was made equal to four pence. This ratio between the groat and the penny continued to be maintained; but owing to the progressive debasement of both coins, the 'old groats' which remained in circulation were valued at a higher rate (see quots. 1465, *c* 1483, also 1552 in b). The groat ceased to be issued for circulation in 1662, and was not afterwards coined under that name. The 'fourpence' (popularly 'fourpenny bit,' 'fourpenny piece'), which was issued from 1836 to 1856 (and since 1888 reissued for colonial circulation) was occasionally called a 'groat,' but the name was neither officially recognized nor commonly used. The Scottish fourpenny piece, first struck in 1358, is called a 'groat' (AF. *grote*) in an English Act of 1390, and this name was used in Scotland itself in the 15th c. Its value was already only 3*d.* English in 1373, and 2*d.* in 1390; later it fell much lower. In Ireland the groat was first struck in 1460. *Hen. grotian, but this admits of no known etymology, and is irreconcilable with the phonetic history of the word

As to the possible origin of F *gromil, grémil*, several suggestions have been made. Its derivation from *grānum milli* is impossible on account of the early form *gromil*, but the L. variants *grunnil, grenil* perhaps exhibit some popular etymologizing approximation to *grain*. The relation, if any, between the Eng. or the Du. word and OF. *gromet* Grummet, is unascertained; but in AF and Anglo-L documents *gromet* and its latinized form *grometus* appear to be used for *groom* in the senses 3–5 below]

see GROTTO and -ESQUE. (Cf Sp., Pg. *grutesco*, an alteration of the It. word after Sp Pg *gruta* = It. *grotta*.) It is remarkable that Florio in both his Dicts. (1598 and 1611) has *crotecca* as an It word, explained as 'antique, fretted, or carued worke'; this, if genuine, would seem to be a re-adoption from Fr. Before the end of the 16th c. the Fr word was occasionally spelt *grotesque*, after the original It; this form was adopted into Eng. about 1640, and has been the prevailing form ever since. But early in the 17th c. writers acquainted with It. had introduced the masc form of the adj., *crotesco*, which occurs as late as 1646, the more usual It. form *grotesco* appears as Eng first in the 1632 edition of Florio's transl. of Montaigne, and did not become obsolete until the 18th c

The etymological sense of *grotteca* would be 'painting appropriate to grottos'. The special sense is commonly explained by the statement that *grotte*, 'grottoes', was the popular name in Rome for the chambers of ancient buildings which had been revealed by excavations, and which contained those mural paintings which were the typical examples of 'grotesque'. (See *Ver. della Cruca*, s.v. *Grotta*, § iv.) Although this seems to be only a late conjecture, without any actual evidence, it appears to be intrinsically plausible.]

Unless the word be corruptly adopted from some foreign language, the second element is evidently akin to Dutch *zwelgen* to swallow, absorb. The earliest recorded form *grundeswelge* has the appearance of being *f. grund* pus (see Gound), the resulting sense 'pus-absorbing' referring to the use of stopped leaves of the plant are still (in country places) used in poultices for reducing abscesses. If this be the true etymology, the form *grundeswelge*, wherein the most word is descended, must be due to popular perversion of the word being associated with *ground* Ground *sb.*, as if meaning 'ground-swallower', with reference to the rapid spread of the weed. There is, however, an alternative explanation in the form of the first element (*gunde* instead of the normal *grund*), and it cannot be positively affirmed that the form without the *r* is not a mistake, as in the only instance in which it occurs are too closely related to be considered independent witnesses.)

1840 D. Mushet *Papers Iron & Steel* 12 Fifty years ago this process of granulation was carried on at the Cyfarthfa iron works to some extent. Grundy[3] (grʌ·ndi). The surname of an imaginary personage (*Mrs. Grundy*) who is proverbially referred to as a personification of the tyranny of social opinion in matters of conventional propriety.

In Morton's play *Speed the Plough* (1798), Dame Ashfield is represented as constantly fearing to give occasion for the sneers of her neighbour, Mrs. Grundy. Her frequent question 'What will Mrs. Grundy say?' became proverbial (prob. with especial reference to the passage quoted below) as expressing the attitude of those who regard the disapproval of society as the worst of evils

Guess (gɛs), *a. dial.* Also **guest, guessed.** [Cf. LG. *gast* of the same meanings.] Of a cow or ewe. Barren; temporarily barren (see quots.). Also, not yielding milk.

Guess (gɛs), *v.* Pa. t and pa. pple. **guessed** (gɛst). Forms: 4 **gesse, gesse, gessen**, 4–7 **gess(e**, 5 **gessen**, 5–7 **ges**, (6 **gessee**); 6–7 **guesse**, 6–8 **ghesse**, 6– **guess**. *Pa. t.* and *pa. pple* (contracted forms) 4–5 **gest**, 6 **ghest**, 6–8 **guest**. [ME *gessen*, cognate with the synonymous MLG., MDu. and mod.Du., Fris. *gessen* (MDu also *gessen*, N Fris. *geasen, gedsen*), MSw. *gissa, gitta*, Sw. *gissa*, MDa. *gidse, gitse, getse*, Da. *gisse*, mod Icel. has a derivative form *giska*. The relation between the various forms is obscure. According to Tamm *Versuch Etym Ordb* the Scandinavian forms are adopted from LG *gissen*, a phonetic alteration of *gessen* (cf LG *kissen*, var of *kessen*, a. HG *kessen* to hunt). It seems, however, more probable that the Sw and Da. forms are native, as the Eng. word can hardly be referred to any other than a Scandinavian source. The word cannot well descend from an Ob. form = HG *giozzan*, as the initial would then have been *y* (ME *ȝ*). The only remaining possibility would be that it was adopted from continental Low Dutch, there is nothing in the nature of the consonants to account for its having come from that source in or before the early 14th c. The forms may represent one, or probably more than one, of the Oteut types **getissan, *getaisan, *getaisnan*, in any case the word is a derivative of the root of Got *ita*, of ON *geta* v., to get, guess, *geta* wh. see a guess.

In the 14th c. the word was the usual rendering of *I estimare*, the influence of which probably affected some of the early senses.]

(2) OE. had also *zegild* str. neut, where the prefix *ze-* (see Y- *prefix*) expresses the notion of combined or collective action. This has not been found later than OE, but as the prefix *ge-* regularly disappeared in substantives (cf *reeve*) its representative in the 14th c. would coincide with that of the simple *gyld*. (3) The pronunciation with (*g*) must be due to adoption of, or influence from, the ON. *gildi* str. neut gen‖d, guild-feast, banquet, also payment, value (Sw *gille*, Da *gilde* guild).—OTeut. **geldjo*.

In continental Teut the sense of 'guild' was expressed by a fourth formation from the same root, repr OTeut type **guldjōn* wk fem, and occurring as MLG., MDu *gilde* fem and neut, (Du, *gild*), whence mod G *gilde*, in Carolingian Latin the word appears as *geldonia*, *gildonia*, explained by *confraternitas*, the later med Lat. form is *gilda*, OF had *gilde*, *ghilde*, *ghulde*, *jode*, etc, in the senses 'guild, band of conspirators']

The root **geld* in these derivatives is prob. to be taken in the sense 'to pay, contribute', so that the sh. would primarily mean an association of persons contributing money for some common object As, however, the root also means 'to sacrifice, worship', some have supposed that guilds were so called as being combinations for religious purposes, heathen or Christian

The sense 'member of a guild, guild brother', was expressed by OE *gilda* and *gegylda*, MLG *gilde* wk masc., the Teut word appears in OE. also as in *cangyldi*, *congyldai*, and in OF *gelde*, *geldon* (with many variants), one of a company (*geldei* of foot soldiers)

1. A confraternity, brotherhood, or association formed for the mutual aid and protection of its members, or for the prosecution of some common purpose

a. *Primarily* applied to associations of mediæval origin

The guilds mentioned in OE pre Conquest documents fulfilled much the same functions as modern burial and benefit societies, but their objects included the providing of masses for the souls of deceased members, and the payment of *wergild* in cases of justifiable homicide They had always originally a strong religious element in their constitution Their meetings were apparently also regarded (cf ON *gilds* banquet, GUILD ALE, and quot *a* 1109 below) In later times the guilds of this 'social religious' type under went development in various directions, some becoming purely religious confraternities, while others acquired secular rights and privileges, eventually developing into municipal corporations

The *guild of merchants*, *merchant guild* (or *guild merchant*, late OF *ctiapmanna gild*), an incorporated society of the merchants of a town or city, having exclusive rights of trading within the town, is an institution which in England has not been found before the Conquest, on the Continent the name and thing were older. In many English towns, and in the royal burghs of Scotland, the merchant guild became the governing body of the town, in Scotland the name of 'guild' is still preserved (cf. *Dean of Guild* v *Dean*)

The *trade guilds*, which in England come into prominence in the 14th c, were associations of persons exercising the same craft, formed for the purpose of regulating and promoting their common interests In some towns the representatives of these bodies superseded the older organizations as the municipal authority The trade guilds are theoretically represented in London by the Livery Companies, but these are not ordinarily known as guilds, and retain little of their original functions. The trade guilds of mediæval Europe closely resemble the ancient Roman *colleges*, with which they may perh have been historically connected.

II. The coin so called, or its value

3 An English gold coin, not coined since 1813, first struck in 1663 with the nominal value of 20*s.*, but from 1717 until 1816 appreciated and circulating as legal tender at the rate of 21*s. Double guinea*, a coin equal in value to two guineas. *Spade guinea*, a guinea of the pattern coined 1787–1800, so called from the form of the escutcheon on the reverse.

In 1663 the Royal Mint was authorized to coin gold pieces of the value of 20*s.* "in the name and for the use of the Company of Royal Adventurers of England trading with Africa", these pieces were to bear for distinction the figure of a little elephant, and 446 of them were to contain 1 lb troy of Fine Crowne gold . The coin pieces of the African company received the popular name of *guineas* almost as soon as they were issued, as being intended for use in the Guinea trade, and made of gold from Guinea, and the name was extended to later coins of the same intrinsic value . As silver was the sole standard till 1816, the value of the guinea was from the first subject to market fluctuations, according to the condition of the silver coin, which became so bad that the guinea rose as high as 30*s.* in 1695 . In Dec 1717 it was fixed at 21*s.*, after which it underwent no further alteration . The ulterior etymology is disputed · the word coincides in form with the pl of the Fr and med Lat word for 'throat'. If the heraldic term is the original, the allusion may be to the colour of the open mouth of a heraldic beast It seems more likely, however, that the heraldic use is transferred from the sense 'red ermine', in which case the word may represent some oriental form, as the tradition of derivation from Pers *gul*, rose (Hatz Darm.), is very improbable]

Gun (gʌn), *sb.* Forms : 4–6 **gonne, gounne, gune,** 5 **gownne, gune,** 6 **gon(e, gonn, goon(he,** *Sc.* **gown,** 5– **gun.** [ME *gunne, gonne* (rhyming with *sonne* = sun) ; hence already in 14–15th c. the word was adopted as Welsh *gunn*, Irish (also Sc. Gaelic) *gunna*, Anglo-L. *gonna, gunna.*

With regard to the ultimate etymology, a suggestion has been made by Prof Skeat that ME *gunne* may represent a hypocoristic form of a Scandinavian female name com pounded with *Gunn-*. This conjecture receives a strong confirmation from the fact (communicated to us by Mr. W. H. Stevenson) that an account of munitions at Windsor Castle in 1330-1 (Exchequer Accts. Q R Bundle 18, no. 24, Pub. Rec. Office) mentions 'una magna balista de corni quæ vocatur Domina Gunilda' There are other instances of the practice of bestowing personal names on engines of war, but there was no distinguished lady named Gunilda (= ON. *Gunnhildr-*, spelt *Cunnild* in Havelok) in the 14th c, and it seems highly probable that this use of the name may have come down from Scandinavian times, when its exceedingly appropriate etymology would be understood (both *gunn-r* and *hildr* mean 'war') If *Gunnhildr*, as is likely, was a name frequently given to *ballistæ* and the like, it would naturally, on the introduction of gunpowder, be given also to cannon Indeed, there is some appearance of evidence that an explosive engine was actually called by this name many years before the earliest recorded instance of the use of gunpowder in warfare The 'song against the retinues of the great people' in *Pol. Songs* (Camden) 237, which must have been written in the reign of Edw II, contains the following passage :—'The gedelynges were gedered *Of gonnylde gnoste*; Palefreours ant pages, And botyeres in boste, Alle weren ȳ-hatt Of an horne poste The correct translation of this passage, which has hitherto been unexplained, seems to be as follows :—'The lackeys were gathered out of Gunnild's spark [OE *gnâst* see Grant and Dalziel] and pages, the varlets with their boasting, all were hatched of a horse's dung' According to analogy, the regular 'pet name' in ON for *Gunnhildr-* would be *Gunn-*, as we would give *Anne* to Mrs. Nicholas *Sr. dial-ler*, mentions *Gunne* as a female Christian name still surviving in Swedish country districts (In Iceland *Gunni* is now a male name, but it is taken to stand for *Gudni*.) The other suggestions that have been made as to the origin of the word are obviously unsatisfactory. The assumed OF *mangonne*, of which *gonne* has been supposed to be a shortening, is merely a variant of the ordinary form Mangonel, and is not philologically possible, unless as a back formation. The F *gonne*, large cask, does not occur before the 16th c., and is regarded by Littré as derived from the Eng *gun* The conjecture that ME *gunne* is of echoic origin perh involves no impossibility, but it has no positive support, and little intrinsic probability]

The current but phonologically untenable view is that the word is an adoption of some one of the Scandinavian or LG words representing the Teut. root **geus-* (: **gous-* *gūs-*), several of which closely resemble it in sound and sense; cf., for instance, ON. *gjōsa* str vb., to spurt, gush, mod Icel. *gusa* n gush, *gusa* wk vb., to gush, MDu. *goysen* (Du *dial. geuzen, guischen, guizeren*), Du. *gutten, gudren* to gush. b. Of sounds or utterance: Produced in the throat

By non phoneticians any mode of pronunciation which is harsh or grating in effect is often supposed to be 'guttural', with this notion the designation is popularly applied by Englishmen to the German *ch*, but not to *h* or *r*, although technically it belongs equally to them As a technical term of phonetics, the word was first used to denote the Hebrew spirant *ch* (Arabic *kh*), and the Hebrew consonants *h*, *ḥ*, *ʿ* are commonly so called, though inaccurately, if its etymological sense be regarded: to the sounds formed by the back of the tongue and the palate, as (*k*, *g*, K, N, *y*).

Gy, Sc var Guy *sb*.1; var. Guy *v*.1 *Obs*

Gy-, in words of Greek etymology, is in this Dictionary marked to be pronounced with (dʒ), in accordance with the general principle that in words of Gr derivation (but latinized spelling) Eng. pronunciation follows the rule of the Romanic langs for the 'softening' of *c* and *g*. The pronunciation (dʒ) is now practically universal in the case of those few words beginning with *gy-* that have much colloquial currency (*gymnasium, gymnast, gymnastic*), but with regard to the many less common words, chiefly scientific terms of recent origin, beginning with *gymn-, gyn-, gyro-*, there are many, especially among professional Greek scholars, who prefer the 'hard *g*' The (g) is very commonly heard in *misogynist*, somewhat frequently in *gypsum*, esp from mineralogists educated in Germany, and occasionally in *gyrate, gyration*.

The orthoepists of the 18th C (Sheridan, Nares, Walker) advocate the 'soft' pronunciation in *gymnastic*, but admit that prevailing usage may be against them All the pronouncing dictionaries of the 19th C have (dʒ) throughout, exc Enfield, Jameson, and Cassell's Encyclopædic Dict, the last named restricts the 'hard *g*' to those terms of science and of classical antiquities 'which have not passed, and probably will not pass, into general use

Gyroscope (dʒaɪəˈskəʊp). *Dynamics* [ad. F *gyroscope* (Foucault, 1852): see GYRO- and -SCOPE.] An instrument designed to illustrate the dynamics of rotating bodies, and consisting essentially of a solid rotating wheel mounted in a ring, and having its axis free to turn in any direction

The form of this apparatus invented by Foucault is contrived so as to render evident the rotation of the earth, through the tendency of the wheel (being free from the influence of disturbing forces) to maintain its rotation in a fixed plane independently of the earth's motion

Gyve (dʒaɪv), *sb.* Chiefly *pl.* Now *arch.* or *poet.* Forms: *pl.* 3, 6, 7 **gives**, (5 **gyvys**). 5–6 **guyv(i)es**, (7 **gieves**), 7–8 **guives**, 4– **gyves**. *sing.* 6 **give**, 7 **guive**, 7– **gyve**. [ME. *give*, of obscure origin.

The alliteration in ME. poetry shows that the word was originally pronounced with initial (g), and from the spelling *gyves* it would appear that this pronunciation continued until the 18th c.; indeed, it is indicated in the pronouncing Dicts. of Sheridan (1780) and Scott (1797). The now prevailing pronunciation with (dʒ) is due to misinterpretation of the graphic form of a word that had become obsolete in oral use. The form points to an OF. **gwive* (spelt *give* in *French Chron. Lond.*, 148c.); Prof Skeat suggests that this may represent an adoption of some derivative of the Teut. root **wīþ-* (OHG *wīfan* to wind round, AS. *wīþ*, a straw-band). But the absence of any record of the word in continental OF. constitutes a serious objection to this conjecture. Can AF. *guive* be an adoption of the synonymous ME and OF *widde*, the initial *w* being represented by *gw*, and the unfamiliar Englandental spirant represented by *v*? If this suggestion be correct, Layamon used both the Eng. and the Fr. form of the word; cf. with quot. *c* 1205 below the following (line 29833): 'Nimeð me þene ilke mon, and God wibb-e an his sweore.']
