OHG *gifēh* at feud, odious (MHG *gevēch, gevē*) :— OTeut **ga-faho-*, where the prefix imports the notion of 'mutually' (see V-) As in many other sbs., the prefix *ge-*, *i-*, fell away in early ME., so that the compound sb and the absolute use of the simple adj became coincident

The Teut adj **faho-* (represented only in W Ger) is referred to the Aryan root **peig-peg-pig*, whence Oirish *aich* enemy :—**paigo-* by Pedersen, Luth *pīkis* angry. The current statement that the word is etymologically akin to Heno depends on the doubtful hypothesis that the root **peig-* is an extension of **pei-* to hate]

Fogger[1] (fɒ gər) [f. somewhat obscure history, but prob. derived from *Fugger*, the surname of a renowned family of merchants and financers of Augsburg in the 15th and 16th c. The name passed as an appellative into several European langs. In German *fugger*, *fucker*, *focker* (see Grimm) has had the senses 'monopolist, engrosser', 'usurer', 'man of great wealth', 'great merchant', and, in certain dialects (doubtless originally through ironical use), 'huckster, pedlar'. Kilian 1598 has Dan. *fokker* 'monopolist, universal dealer' (*monopolia, pantopolia*); and *fuggerns* and *fuccardus* as popular mod. L equivalents, and in mod Du. *vijfkar fokker* is an avaricious rich man. Walloon *fokker* and sp. *fucar* are contemptuous designations for a man of great wealth. A 'petty Fugger would mean one who on a small scale practises the dishonourable devices for gain popularly attributed to great financiers. It is possible, that the phrase 'petty fogger of the law', applied in this sense to some notorious person, may have caught the popular fancy, and so have given rise to the specialised use in sense 1. Sense 2 was already developed in Ger. dialects (see Gramm), though the channel by which it came to England is unknown Cf FOOKER.]

Fold, var. form of FOLD, *suffix* (OE. *-feald*, Northumb. *-fald*, ME. *-fald*, *-fold*), corresponds to OFris., OS. *-fald* (Du. *-voud*), OHG *-falt* (MHG *-valt*, mod.Ger. *-falt*), ON *-faldr* (Sw *-fald*, Da *-fold*), Goth *-falps*, cognate with FOLD *v.*[1], and with the equivalent Gr. *-πλάτος*, *-πλασιος*, also, more remotely, with Gr. *-πλο-* in *ἁπλόος* single, *διπλόος* double (= L. *duplus*), and probably with the L. (*uni-*, *du-*, *tri-*) *plex* Like the Gr and L. equivalents, the Teut suffix is appended to cardinal numerals (and also to words meaning 'many'), forming adjs. of which the primary sense is 'folded in two, three, four, etc.', or 'plaited of two, three, four, etc. strands' (cf. 'a threefold cord'), but which serve also and chiefly as arithmetical multiplicatives. The OE. forms, *twi-*, *twoe-*, *tuwefeald*, *þrifeald*, *fyþerfeald*, which retain the combining form of the cardinal inherited from OTeut., were superseded in early ME. by new formations on the analogy of *fivefold*, etc., where the cardinal has the ordinary form.

The adjs were already in OE. used absol. in the neut. (e.g. *þrifeald* threefold, three times as much) and as advbs (= doubly, triply, etc.), and these uses still continue. In OE. the adverbial notion was also expressed by phrases like *be fiftefealdum*, *be manig fealdum*, in later Eng. *by fivefold*, *by manyfold*. The introduction of the Romanic synonyms *double* and *treble* or *triple*, to which were afterwards added the adapted Latin *quadruple*, *quintuple*, etc., has considerably narrowed the use of the derivatives in *-fold*; indeed the latter seem to be (in many dialects) no longer current among the uneducated. The educated use the strictly multiplicative sense survives chiefly in the adv. and quasi-sb., and with reference to somewhat large numbers ('He has reared as many as a thousandfold worse'), the adjs. express rather a plurality of things, more or less different, than mere quantitative multiplication of 'a double charm' with 'a two fold charm'.

In ME. a few new and unanalogical compounds were formed with the suffix, as *thickefold* (=frequent, -ly), *doublefold* *a.*, but these did not survive into the modern period. Of the nonce combinations, formed by attaching *fold* to indefinite numerals, interrogatives, and the like, the following quotes afford examples:

†**Folkland.** *Obs.* exc. *Hist.* A term of OE law, designating land held by a certain kind of tenure, opposed to Bookland

As to the nature of the antithesis between folkland and bookland there have been many conjectures. Since the publication of Allen's *Inquiry into the Growth of the Royal Prerogative*, 1830, the prevailing view has been that *Folkland* was land belonging to the state, which the king or the witan might grant to a person for his life, but which did not descend to heirs, while *bookland* was land held by charter or deed. But in the *Eng. Hist. Rev.* VIII (1893) Prof. Vinogradoff has forcibly argued that *folkland* was simply land heritable by *folkright* or common law, while the estate in *bookland* was conferred by charter or deed, and could be alienated freely

a 1000 *Laws Edgar* § 2 Obbe on boc lande obbe on folc lande. 1041 *Termes de la Ley* 54 His land was held with more ease and freedom, called Folkland. 1769 Blackstone *Comm.* II 91 Folk land . . . was held by no assurance in writing, but distributed among the common folk or people at the pleasure of the lord. 1830 J. Allen *A Prerog.* (1849) 135 Folkland, as the word imports, was the land of the folk or people. It was the property of the community. It might be occupied in common, or possessed in severalty, as the lawgiver or the witan should direct. It probably parcelled out to individuals in the folcgemôt. But while it continued to be folkland, it could not be alienated in perpetuity; and therefore, on the expiration of the estate to which it had been granted, it reverted to the community, and was again distributed by the same authority. 1871 Freeman *Norm. Conq.* (1876) IV xvii 24 The folkland, the common land of the nation, was now (1066-7) changed, fully and for ever, into *terra Regis*, the land of the King.

Folk-lore (fōʊk,lōə). [f. Folk + Lore.] The traditional beliefs, legends, and customs, current among the common people; the study of these.

1846 Ambrose Merton [W. J. Thoms] in *Athenæum* 22 Aug. 862/3 What we in England designate as Popular Antiquities, or Popular Literature (though it would be most unphilosophical to speak of) would be termed, in Germany, the Lore of the People). 1862 *Ecclesiologist* XXIII 279 Mr. Lee gives us a piece of folk lore. 1863 Max Müller *Chips* (1868) II v. 211 A beautiful instance of mistaletoe in German folk lore to the mistletoe. 1884 A. Follow (*fɒ lɒu*), *sb.* [f. next verb.]

1 The action of the verb FOLLOW

1870 HARDY & WARE *Mod. Hoyle*, Dominoes 93 It is sometimes an advantage to hold heavy dominoes, as they not unfrequently enable you to obtain what we called a good 'follow'. 1889 *Spectator* 9 Nov 633/1 And hark! the view holloo! 'Tis Mack in full follow

2 *Billiards.* A stroke which causes the player's ball to roll on after the object-ball which it has hit in motion. Called also *follow-stroke*, and *following stroke*. Also, the impulse given to the ball by such a stroke.

1873 BENNETT & CAVENDISH *Billiards* 321 The reason for playing with side is that, when the balls are so close, sufficient 'follow' cannot be got. 1881 H. W. COLLINGRIDGE *Mod. Billiards* 38 The follow stroke. *Ibid.* 39 The 'follow' can also be executed with the cue delivered as far as one fourth below centre

3 Follow on *Cricket.* The act of 'following on' (see FOLLOW *v.* 19 d), also applied to the innings itself. Also simply *follow.*

1881 *Standard* 14 June 3/8 A 'follow on' was necessary. 1884 *Lillywhite's Cricket Ann.* 60 With the follow saved there was no chance of completion of the game. 1892 *Sat. Rev.* 9 July 33/1 In the follow on things altered very much

Follow (*fɒ lɒu*), *v.* Forms *α* 1–2 folgian, 2–3 folgie(n, (folghi), folege(n, (folegi), 3 follen, folhen, 2–4 folge(n, 3 *Orm* follghenn, 4 *south* uolge(n, uolgy), 3–5 folow(en, (3 *south* uolewen, 4 follow,e), folwe(n, (4 follwe,n), folu(n, folu-w,en, (3 *south* uolwenn), 4–6 folowe(n, folow, (5 folow'e, folowe, folouȝ, 4 6 followe(n, 6 foolow(e), 6 *Sc* follow, 4–7 followe, 4 follow *β* 1–2 fylgan, fylʒan, fylgan, fylian, 2–3 fulien, (3 *south* fa t vuiede), 3–4 fulu(n, fil-ȝe(n, flig(en, flyh(en, flyh(en, folu(n, 4–5 flow, fylow, felow, 5 floe [The two OE types, *folgan* (*o-* stem) and *fylgan* (*-jo-* stem), are, as is usual in similar pairs of conjugational variants, representatives of an OTeut vb of the *-ǰan* class, cf. OFris. *folga, folia, fulta*, Os. *folgôn* (Du *volgen*), OHG *folgên* (MHG *volgen*, mod. *folgen*), ON *fylgja* (Da *følge*, Sw *följa*), not recorded in Goth. Beside these forms, several of the Teut langs have synonymous and phonetically resembling words which are compounds of GANG and Go *ubs*, OE has *fulgangan*, pa t *ful-ēode* (from *ēode*, serving as pa t of *gān*) = OS *fulgangan*, OHG *folle gēn* The most natural explanation of these parallel forms is that the apparently simple vb was originally a compound or a phrasal combination. The first element appears in OE *fylstan. fulhstan*, OHG *follesten* to help, succour, minister to (cf Goth *laistjan* to follow), OHG *follazihan* to assist, support (= Os. **fullion*, whence *fulleam, fullum* assistance), Goth *fullafahjan* to worship, serve, minister to the needs of in these cases the prefix seems to add to the sense of the simple vbs the notion of doing something by way of service to another (so that sense 3 of the present vb is probably nearest to the original meaning). It is no formal grounds probable that the prefix is identical with FULL, its function in the above-cited instances is perh. due to the circumstance that in some vbs compounded with it the primary sense of 'satisfying' developed into the cognate sense of 'ministering to', 'serving'.]

2 The device of a 'fool's cap' used as a watermark for paper

It has been asserted that the fool's cap mark was introduced by Sir John Spielman, a German by birth, who built a paper mill at Dartford in 1580, but we have failed to find any trustworthy authority for this statement. The first MS. copy of Rushworth's *Hist Coll* (1659) is marked with this device. The watermarks called by Sotheby (*Princ* III) a 'fool's cap', and said by him to occur in some copies of Caxton's *Golden Legend*, seems not to be correctly so called: the catalogue of the Caxton Exhibition (1877) states that examples of the fool's cap, dating from 1470, are found in a German collection there exhibited There is no foundation for the repeated story that the Stationers' Parliament ordered a fool's cap to be substituted for the royal arms in the watermark of the paper used for the journals of the House

1795 Dibdin in *Archæologia* XII 121 The Fool's cap is not in either the Paston Letters or Mr Ord's Plates. The date of that device in Mr Fisher's is as late as 1660

For-, *pref* 1 Also † **fer-**, 3 *Orm* forr-, 3-4 *south.* vor-, ver-, 4 fur-, 6-7 fore- [OE *for-*, *fær-* — OFris *for-*, *fer-*, OS *for-*, *far-* (Du *ver-*), OHG *far-*, *fir-*, *fer-* (MHG and mod G *ver-*), ON. *for-* (Sw *for-*, Da. *for-*), the ON *fyrer-* (see Fore- *pref*) though formally distinct, often corresponds in use with this prefix The OE form (like the other forms quoted) seems to represent (with obscured vowel due to absence of stress) the three OTeut prefixes **for-*, **fra-*, **fur-* (Goth *fair-*, *fra-*, *faiir-*), which correspond formally to Gr περι-, προ-, παρα-, representing various ablaut-grades of the Aryan root **pi-* see For and Fore. Functionally, the three prefixes do not seem to be clearly distinguished even in Gothic; but in most cases when a vb with OE *for-* or Ger *ver-* has a Goth equivalent, the prefix appears as *fra-*, which seems to have been orig its *stressed* form of the two OE forms *fra-eat* and *forcit* (see Forgo(u)t), which are believed to be exact ital variants of the representative of pre-Teut. **prqnto-*, despicable

From the predominant meaning of the root, it may be inferred that the primary notion expressed by the prefix is that of 'forward, forth' The various uses in the Teut langs may be plausibly explained as originating from this, though the exact process of their development is in many points uncertain see Grimm's *Deutsches Wb* s v *ver-* The vbs formed with this prefix often correspond in signification to Gr vbs formed with one or other of the cognate prefixes περι-, προ-, παρα-, and to Lat vbs with *per* or *pro-* I A prefix used to form verbs and adjs, primarily quarring in OE words of Com Teut or WGer origin, but employed in the formation of new words down to the beginning of the mod Eng. period, it is now entirely obsolete Its various functions are enumerated below The words here explained

and illustrated are all obsolete; the surviving words formed with the prefix, and those obsolete ones which require extended treatment, are given as main words in their alphabetical place.

I. Forming verbs.

Cf. ON *for-litill*, very little, *for-mikill*, very great, etc.; also the use of *for-*, *fyr-*, in the sense 'out of doors'. It is remarkable that nearly all Chaucer's examples of these compounds admit of being explained as instances of *for* prep governing an adj.; this in the quotations below, *for black* may be taken as = 'for (the) blackness', *for dreye*, as 'what as (the) dreye be read, omitting the comma, 'as white as chalk for dry (thirst or want)'. On account of being so close to the noun that Chaucer himself may have apprehended the combinations in this manner.]

c The cause of any one of the classes of physical phenomena, e g of motion, heat, electricity, etc, conceived as consisting in principle or power inherent in, or coexisting with, matter; such principles or powers regarded generally

According to the now generally received view that all physical changes in modes of motion, *force* in its generic sense comes to denote the one principle of which the separate *forces* are species. Some of the latter no longer used, recognized as belonging to the technical language of physics.

1732 Berkeley *Alciphr* VII § 9 Force is that in bodies which produces motion and other sensible effects. 1842 3 Grove *Corr Phys Forces* (1846) 8, I therefore use the term Force as meaning that active principle inseparable from matter which induces its various changes *Ibid* 22 If Heat be a force capable of producing motion, and motion be capable of producing the other modes of force 1851 Carpenter *Man Phys* (ed 2) 10 A large number of phenomena ... resulting from the agency of forces as distinct from those of Physics and Chemistry, as they are from each other the forces from whose operation we assume them to result, are termed vital forces

Fore, obs pa t of FARE

Fore-, *prefix* In OE the adv FORE (like its equivalent in various other Teut langs) was used as a prefix (1) to verbs, giving the additional sense of 'before' (either in time, position, rather, order, and (2) to sbs either forming designations of objects or parts of objects occupying a front position, or expressing anteriority in time Cf Obs *forewerdan*, Goth *faurapiþan*, OHG *forapedan* to predict, OE *forgangan*, Goth *faurgaggan* to precede, OE *forcēðð*, Ger *vorzahn* front tooth, etc) The prefix has through all stages of the language continued to be a living formative in all its uses The principal combinations are in this work treated as Main words in their alphabetical place, those which are of merely occasional use, or self explanatory, are enumerated in this article

I In verbs, ppl adjs, agent-nouns and nouns of action (Stress on the verb)

2 = 'Beforehand,' 'previously', 'in advance',

Formerly, esp in 16–17th c, the prefix was used with any vb to which it was deemed to give this addition il meaning The number of recorded combinations of this kind is then, for enormous, and only a selection of them can here be given Now, however, the use of the prefix, except in established combinations such as *foresee, foretell*, or in new combinations closely analogous to these, is felt to be some what archaistic or affected, in ordinary prose usage the meaning is expressed by the addition of an adverb, or the verbs of obvious l or or Rom derivation by the prefix *pre-*

D Forth- in composition In OE and MF the combinations of *forth* adv with vbs are hardly to be considered compound words, whether the adv precedes or follows the vb depends on euphonic or other conditions which do not affect the sense The agent nouns, nouns of action, and ppl adjs corresponding to these verbal locutions were formed by prefixing *forth* to the verbal noun or ppl corresponding to the verb In mod Eng compound vbs formed with *forth-* are rare; but *forth-* is often used as a prefix in the formation of nouns of agent and action, and ppl adjs corresponding to the verbal phrases (compound verbs in sense but not in form) in which the adv follows the verb More frequently, however, the agent noun, etc is followed by the adv, thus we have *a setter forth*, but *forthsetter* is app not recorded for use as Main words, those enumerated in this article are none-words or of rare occurrence

Forwards (*fɔ·*wədz, *adv* (and *a*.) [f. FORWARD with adv. genitive -*s*: see WARDS.]
A *adv* = FORWARD *adv.* in its various senses.
The present distinction in usage between *forward* and *forwards* is that the latter expresses a definite direction viewed in contrast with other directions. In some contexts either form may be used without perceptible difference of meaning, the following are examples in which only one of them can now be used: ' The ratchet-wheel can move only *forwards* ', the right side of the paper has the maker's name reading *forwards* ', ' if you move at all it must be *forwards* ', ' my companion has gone *forward* ' (stating a matter *portrait*), ' from this time *forward* ' The usage of earlier periods, and of modern dialects, varies greatly from that of most standard English writers. It is now generally used, to the exclusion of *forwards*, which was stigmatized by Webster (1828) as ' a corruption '.
