Gnome[2] (nōum). [a F *gnome*, ad mod L. *gnomus*, used by Paracelsus
Paracelsus (*De Nymphis* etc Wks. 1658 II 391, and elsewhere) uses *gnomus* as synonym of *Pygmæus*, and says that the beings so called have earth as their element (or, as he calls it, their *chaos* cf etymological note on GAS), through which they move unobstructed as fish do through water, or birds and land animals through air The context in the passage above referred to suggests that the name was *not* invented by Paracelsus himself, and that it means 'earth-dweller', possibly it may be a blunder for *γνόμευς*, representing a Gr type *γνώμος* (for which cf. *θαλασσόμοιος* dwelling in the sea). The term, however, may possibly be a mere arbitrary invention, like many others found in Paracelsus The connexion commonly assumed with Gr *γνώμη* (see prec.) or *γνώμων* (cf GNOMON) seems unlikely]

B. Signification.

gen. An intransitive verb of motion, serving as the most general expression (I) for a movement viewed without regard to its point of departure or destination; (II) for a movement *away from* the speaker, or from the point at which he mentally places himself, and (III) for a movement *to* or *towards* a place which is neither in fact nor in thought that occupied by the speaker. The verb is thus on the whole co-extensive in meanıng with the Latin *ire*; in the branches II and III it admits of being contrasted with *Come* (= L. *venire*). Besides this general sense, it had formerly a special application to *walking* as distinguished from other modes of progression; possibly this may be the primitive sense, but only faint traces of it remain in current English. Like *come*, it is applied both to self-originated and to impressed movement, but the former application is felt to be the primary one.

1 Of movement, irrespective of the point of departure or destination

†1. = To walk; to move or travel on one's feet (opposed to *creep, fly, swim, ride*, etc); to move on foot at an ordinary pace (opposed to *run*, etc). *To go alone* to walk without support *Obs*

Goal (gōl), *sb.* Forms: 4 gol, 6 gowle, 6–7 go(a)le, 7– goal [Of difficult etymology.

After its solitary (but app unquestionable) occurrence in Shoreham's Poems (*c* 1313) the word first appears in 1531, and soon after wards is very common, prob. it had survived only as a technical term of some rustic sport, and so failed to be recorded in literature.

Shoreham's form *gol*, rimng with *y-hol*, suggests (though it does not necessarily imply) descent from an OE **gōl* (This would be quite certain if the word could be positively identified with the *gale* found in *Lyrsor St.* 8170 (Cott) 'O þe quick þat hath wald be Moder And auther wald þat he ware Dede, þat ilke þeyr com to þat *gale*'. But it is not unlikely that in this passage *gale*, obviously chosen for the sake of rime, is merely a forced use of Gale *sb*^{2} in the sense of 'joy'.) Of the existence of this sb., the verb, with the sense 'obstacle, barrier', some indirect evidence is afforded by the apparent derivatives *gælan*, *ágælan*, to hinder, delay The transition from the sense of 'barrier' to that of 'boundary' is not difficult, and further sense-development is parallel to that of L. *méta*, and of Door *sb*^{2}, in view of the history of the latter word, Halliwell's alleged *Norf. goals*, 'gates or turnstiles', might be accepted, if there were any ground for believing it to be genuine But the absence of any record of OE **gāl* or of its equivalent in any but long (ON *geil*, narrow passage, leaning too remote in sense) renders its etymology very insecure

The suggestion of Henshaw (in *Skinner's Etymologicon* 1671), accepted by all subsequent etymologists, that the word is "corruption of *le gaule*, pole, stick, with b, has nothing to recommend it There is no evidence that F *gaule* ever meant 'goal,' or that Eng *goal* ever meant 'pole' or 'stick'. The forms in Shoreham, the rhythm and Fr derivation appears to be phonologically inadmissible.

A Welsh *gôl* is given by Davies *Antiq. Ling Brit Dict.* (1632) as = 'præcedaneum, præludium, initium, *statio*' which would make it equivalent to Eng *goal* If this word be genuine (which seems to be doubtful) it must apparently be an early adoption from English; the suggestion in *Trans Philol Soc* 1876-7 (1), that it represents an Old Welsh **gaalh* stone, being phonologically untenable (Prof Rhys) The current word in most parts of Wales for 'goal' with reference to games is *cōd*, mutated *gōl* (gŏl), which probably has obtained this meaning through its similarity of sound to the Eng word] The Windhill dialect has a word pronounced *gōl* explained as meaning 'goal', used in a certain game played with brass buttons (cf Goo^{2}), but its identity with this word is doubtful]

The young animal is called a Kid.

The goat is indigenous to the Eastern Hemisphere, but by domestication naturalized in all parts of the world It is especially noted for its hardy, lively and wanton nature, and its strong odour Most of the species have hollow horns, curving backwards, and the male is usually bearded.

Goclenian (gŏklī'nĭăn), *a. Logic.* [f. *Goclenius* (see below) + -AN.] Epithet of a variety of the Sorites first formulated by Rudolf Goclenius (1547–1628), otherwise called the *descending sorites*, opposed to the *Aristotelian* or *ascending sorites* (See SORITES.)

God (gŏd) Also 3–4 **godd** [Com Teut · OE *god* (masc in sng, pl *godu*, *godo* neut, *godas* masc) corresponds to OFris, OS., Du *god* masc, OHG. *got*, *cot* (MHG *got*, mod Ger *gott*) masc., ON. *goð*, *guð* neut. and masc., pl. *goð*, *guð* neut. (later Icel pl. *guðir* masc, Sw, Da *gud*), Goth *guþ* (masc. in sing; pl *guþa*, *guda* neut.) The Goth and ON words always follow the second declension, though when used in the Christian sense they are syntactically masc. The OTeut type is therefore ***guđo-*n neut, the adoption of the masculine concord being presumably due to the Christian use of the word. The neuter sb, in its original heathen use, would answer rather to L. *numen* than to L. *deus*. Another approximate equivalent of *deus* in OTeut was ***ansu-z* (Goth in latinized pl. form *anses*, ON *ár*, pl, OE *Ós* in personal names, *Ea* genitive). This also seems to have been applied only to the higher deities of the native pantheon, never to foreign gods, and it never came into Christian use

The ulterior etymology is disputed Apart from the unlikely hypothesis of adoption from some foreign tongue, the Teut **guđo-n* appears as the pre-Teut type either ***ghu-tó-m* or ***ghuto-m* The former does not appear to admit of explanation, but the latter would represent the neut of the passive participle of the verb-root to Aryan *ghu-* (Sanskrit *hu-*) required form (both ***gʰu-tó-m*, with palatal aspirate) one meaning 'to invoke' (Skr *hū*), the other 'to pour, to offer sacrifice' (Skr *hu*, Gr χεύω, Lith *gúlstan* Yeth *gu*) Hence ***gʰuto-n* has been variously interpreted as 'what is invoked' (cf Skr *puru hūta* 'much-invoked', an epithet of Indra) and as 'what is worshipped by sacrifice' (cf Skr *huti*, which occurs in the sense 'sacrificed to' as well as in that of 'offered in sacrifice') Either of these conjectures is fairly plausible, as they both yield a sense practically coincident with the most obvious direct derivation from the root-verb, viz. 'object of worship' Some scholars, accepting the derivation from the root **gʰeu-* to pour, have supposed the etymological sense to be 'molten image' (=Gr χυτόν), but the assumed development of meaning seems very unlikely

From a desire to utter the name of God more deliberately than short vowel naturally allows, the pronunciation is often (gŏd) or even (gād), and an affected form (gŏd) is not uncommon see GUD (For the variations in oaths see 3 and 11.) In Sc the usual pron is (gŏd), but *Gods* (gŏdz), = *Gosh!*, is frequently substituted in such expressions as *Godzeake*, *Godz keep't*, etc.]

I. The original pre-Christian sense, and uses thence derived.

1. A superhuman person (regarded as masculine see GODDESS) who is worshipped as having power over nature and the fortunes of mankind, a deity (Chiefly of heathen divinities; when applied to the One Supreme Being, this sense becomes more or less modified see 6 b).

Even when applied to the objects of polytheistic worship, the word has often a colouring derived from Christian associations As the use of *God* as a proper name has throughout the literary period of English been the predominant one, it is natural that the original heathen sense should be sometimes apprehended as a transferred use of this, 'a *god*', in this view, it is supposed being put in the place of *God*, or an imperfect conception of *God* in some of His attributes or relations

Besides having been thus modified by the influence of the Christian use, this sense as expressed in the definition has been affected by the pagan uses of L. *deus* and Gr θεός, of which *god* is the accepted rendering Thus, in speaking of Greek mythology, we distinguish the *gods* from the *demons* or supernatural powers of inferior rank, and from the *heroes* or *demigods*, who, though objects of worship, and considered as immortal, were not regarded as having ceased to be men; and the analogy of this nomenclature is often followed in speaking of modern polytheistic religions

When the word is applied to heathen deities disparagingly, it is now written with a small initial, when the point of view of the worshipper is to any extent adopted, a capital may be used

14. In possessive combinations serving as assevertive or adjuratory formula. Preceded by *by* or (in adjuratory use cf 11) by *for*, also with omission of prep (Cf *God* sb 5 3.)

Corrupt or minced forms of these oaths are also common, *God's* being altered or shortened to *Gad, Gadzbe, Gadzooks, Gads, Gadsbud, Gadsfish, Hat's, Odd's, 'S, Uds, 'Z* (in *Zoobs, Zounds*), of these only *Cocks* and *Gogs* are old, the others coming into use about 1600 or later, the full forms are rarely found after that date except in archaisms The form *Gars* is assigned to foreigners, as *gare blue, garsoone* in *Doctor Dodypoll* (Bullen *O Pl* III 129), *garcoon* in Farquhar (*Beaux Strat* iv 1)

a. With ordinary sbs, sometimes preceded by an adj ; also with the adj used substantivally, as *God's blest, precious*, etc.

In some of these oaths the sb denotes an attribute of Deity, more usually, *God's* = Christ's, as in *God's arms, body, blood*, etc In popular catchs, as in *God's brother, fish, hat, malt*, the sb has no meaning in its connexion, being substituted for some word of solemn import

1. A male sponsor considered in relation to his god-child

According to the practice of the Roman, Greek, Anglican, and some other churches, certain persons (commonly two at least, a man and woman) assist at the administration of baptism, make profession of the Christian faith on behalf of the person baptized, and guarantee his or her religious education In accordance with the view that these persons enter into a spiritual relationship with the baptized person and with each other, they were in OE. denoted by designations formed by prefixing *god-* to the words expressing natural relationship, as *godsib, godfæder, godmoder, godbearn*, etc. The same terms are employed in the Scandinavian languages (ON *guðfaðir, -móðir*, etc., and corresponding forms in Sw. and Da.), prob. as adoptions from OE. The Du. *godmoeder, godvader* (also *goud*), recorded in Kilian, are obsolete (if they were ever used) in Holland, but are still current in certain parts of Belgium

In many dialects there is a difference in pronunciation between this sb. and Gold 1 in the name of the plant, as also in *mould* —OE *molde*, the northern dials have generally the vowel ordinarily corresponding to OE *á*, ME close *ō*, while in Gold 1 the pronunciation descends normally from OE. *gold*, ME *gold* (Cf esp *Sc. gowd*, corn marigold, with *gowd*, the metal) The difference is doubtless due to the fact that the one word was disyllabic, the other monosyllabic, in OE. and early ME.

Commonly supposed to be an adoption of Du. *kolf*, *kolve* (=G. *kolbe*, ON. *kólfr*, etc.), 'club', the name of the stick, club, or bat, used in several games of the nature of tennis, croquet, hockey, etc. But none of the Dutch games have been convincingly identified with golf, nor is it certain that *kolf* was ever used to denote the game as well as the implement, though the game was and is called *kolven* (the infinitive of the derived vb.). Additional difficulty is caused by the absence of any Scottish forms with initial *c* or *k*, and by the fact that golf is mentioned much earlier than any of the Dutch games. Some mod Sc. forms have *gowf* 'a blow with the open hand', also vb to strike

The Sc pronunciation is (gouf), the pronunciation (gɛf), somewhat fashionable in England, is an attempt to imitate this.]

A game, of considerable antiquity in Scotland, in which a small hard ball is struck with various clubs into a series of small cylindrical holes made at intervals, usually of a hundred yards or more, on the surface of a moor, field, etc. The aim is to drive the ball into one hole, or into all the holes successively, with the fewest possible strokes, commonly two persons, or two couples (a 'foursome'), play against each other.

Goodwill (gudwi'l). [Orig. two words (still often so written exc. in sense 4 b): see GOOD *a.* 5, 7.]

† 1. Virtuous, pious, or upright disposition or intention. *Obs.*

In the pre-Reformation versions of *Luke* ii 14, which follow the Vulgate, the phrase *good will* means the will of God. The 16th c. versions and that of 1611, following the 'received' Gr text, retain the phrase, but use it in sense 2. The Revised Version of 1881 adopts the Gr text presupposed by the Vulgate, but renders 'On earth peace among men in whom he is well pleased'.

Du. *wat goedtjaar.* Plantijn (1573) renders *Wat goet saer is dat?* by F *Que bon heur est cela?* and L. *Quid hoc omens?* The Du. lexicographers suggest that the idiom probably arose from an elliptical use of *good year* as an exclamation, = 'as I hope for a good year'. One example of *good year* approximating to the later Eng. sense (b below) is quoted in the *Wb der Nederl Taal* V. 311

Sir T. Hanmer, in his edition of Shaks (1744), suggested that in the three Shaks. passages *good yeares* had the sense of the French disease ', and was a 'corruption' of *gouyeres*, a hypothetical derivative of 'the French word *gouye*, which signifies a common Camp-Trull ' So far as the sense is concerned, this explanation is curiously plausible, as it seems to be applicable without any violence to all the examples of the word (*cf. what the pox*, etc) But there is no evidence that the definite meaning of 'pox' was really intended by any of the writers who used the word , and the alleged etymology is utterly indefensible Hanmer's spurious form *gouyeres* or *gouyeers* has, however, found its way into many editions of Shakspere, and was adopted as the standard form in Johnson's Dict 1755, and hence in every later Dict which contains the word]

Goth *þiuþspillōn* 'to preach the gospel' (εὐαγγελίζεσθαι), f *þiuþs* good + *spillōn* to announce (cogn. w Spell.) When the phrase *gód spel* was adopted as the regular translation of *evangelium*, the ambiguity of its written form led to its being interpreted as a compound, *gód-spel*, f. God + *spel* in the sense of 'story': see Spell. The misinterpretation was natural, as the resulting sense was much more obviously appropriate than that of 'good tidings' for a word which was chiefly known as the name of a sacred book or of a portion of the liturgy. From OE the word passed, in adapted forms, into the languages of the Teutonic peoples evangelized from England. OS. *godspell*, OHG. *gotspell*, ON. *guð-, goðspell*; in each case the form of the first element is conspicuously that it was identified with *God*, not with *good* The ON. form has survived into mod Icel.; the continental Teut. langs early discarded the word for adoptions of L *evangelium*.

Although the *d* in OE. *godspel* would necessarily in time have been shortened by the regular operation of phonetic law, it does not appear that this process could have taken place early enough to account for the form of the word in Os and OHG. The form *godspel* must therefore (as above explained) be due to a misinterpretation of the written form, originating before the word had any oral currency]

The origin of the Rom word is obscure. Some scholars regard it as of Celtic origin, comparing the Welsh *gŵn*, Irish *fdan* 'lacerna', which are referred by Stokes (Fick's *Idg Wb* 4 II 281) to an Ocltic **wo-uno-*, f *wo-* (= Gr *νυ* unded) + root *nu-* to clothe (cf L. *ex-u-ere*, *indu-ere*, *sub-ŭcula*) But Loth (*Rev Celt* XX 353) raises phonological objections, and believes the Welsh word to be adopted from Eng (as are the Irish *gunn*, Gael *gŵn*, Manx *goon*). In any case the Celtic origin of the Rom word does not seem to accord with the geographical probabilities Albanian has *gunë* cloak, but it is uncertain whether this is native or adopted from Gr.]

9. In University language a † Originally, a dispensation, granted by the Congregation of a University or by some Faculty in it, from some of the statutable conditions required for a degree. As in the English universities the full performance of such conditions ceased to be required, 'grace' came to be an essential preliminary to any degree. Hence the word has now the sense b. The leave of Congregation to take a degree. c Other decrees of the Governing Body, being very often dispensations from the permanent statutes, were sometimes styled *graces*, and at Cambridge every such decree is called a Grace of the Senate. d. In mod. use, the term is also applied to the permission which a candidate for a degree is required to obtain from his College or Hall.

Græco-, Greco- (grī'ko), mod. combining form of L. *Græcus* GREEK. Like other comb. forms of ethnic adjs (as ANGLO-, CELTO-, FRANCO-, GALLO-, IUDÆO-), it is modelled on the form occurring in Greek compounds like *Συρορφοίνιξ*, and in late L. imitations of these, like *Graiugræcus*. Apart from the words *Græcomania*, *Grecophil*, which are formed strictly on Gr. analogies, it occurs only in compound adjs. (now always written with hyphen), the sense of which is either 'relating to the Greek settlements or states established in certain regions abroad', as in *Græco-Asiatic*, *-Bactrian*, *-Phrygian*, or 'partly Greek and partly something else', as in *Græco-Latin*, *-Mohammedan*, *-Oriental*, *-Roman*, *-Trojan*, *-Turkish*.

-gram (gram), repr. (chiefly) Gr. γράμμα something written, letter (of the alphabet). The older Eng. abs with this ending fall into three classes. (1) adaptations of actual or assumable Gr. sbs. in -γραμμα, derived from vbs. f. prep. + γράφειν to write, and expressing the result of the action of the verb, as *anagram, diagram, epigram, paragram, program* (usu in Fr spelling *programme*); (2) compounds of a Gr. sb with γράμμα, f. legitimately assumable Gr. types, as *chronogram*, and (later) *telegram, logogram*, (3) compounds of a numeral with γράμμα, or more frequently with γραμμή line, of which the Gr. type, where one exists, is a neut. adj in -γραμμον, as *monogram, hexagram, pentagram*. (Yet a fourth kind of formation has one example in Lipogram) In the year 1887 the need for a shorter term for 'telegraphic message' was supplied by the introduction of *telegram* (previously proposed in 1852), which violates Gr. analogy, as an adv. like τηλε could not correctly form a compound with a vb or sb, but which was found so convenient that it quickly became established, and has been adopted into several foreign langs. Later formations suggested by this word are the hybrids *cablegram* for 'cable telegram', *pstelgram* for an instantaneous photograph. Another recent formation, also suggested by *telegram*, but not open to the same objection, is *phonogram* for the record of sound made by the phonograph In the denominations of weight in the metric system, *decagram(me, kilogram(me*, etc., *-gramme* see Gramme

Johnson, 1755, who regards the word as shortened from *grand me mercy*, gives as the only application of the word, but both his examples belong to sense 1. Grammar (græ·mə(r)), *sb.* Forms. 4-5 **gram(m)ere,** 4-6 **gramer,** 4-7 **grammer,** (4 **gramaire,** 5 **gramayre,** -eer), 6- **grammar.** [ad. OF. *gramaire* (= *grammaire*), an irregular semi-popular adoption (for the form of which cf. OF. *mire* repr L. *medicum, artimaire* repr. L. *artem magicam* or *mathematicam*) of L. *grammatica*, ad. Gr. γραμματική (scil τέχνη art), fem. of γραμματικός adj, of or pertaining to letters or literature, f. γράμματα letters, literature, pl. of γράμμα letter, written mark, f. root of γράφειν to write. Cf. Fr. *gramaire* (prob. from Fr). Old Fr. had also a learned adoption of the L. word, *gramatique*, parallel with Sp. *gramática*, Pg., It. *grammatica*, G. *grammatik*, Welsh *gramadeg*

In classical Gr. and L. the word denoted the methodical study of literature (= 'philology' in the widest modern sense), including textual and æsthetic criticism, investigation of literary history and antiquities, explanation of allusions, etc., besides the study of the Greek and Latin languages. Post-classically, *grammatica* came to be restricted to the linguistic portion of this discipline, and eventually to 'grammar' in the mod sense. In the Middle Ages, *grammatica* and its Rom forms chiefly meant the knowledge or study of Latin, and were hence often used as synonymous with learning in general, the knowledge peculiar to the learned class. As this was popularly supposed to include magic and astrology, the OF *gramaire* was sometimes used as a name for these occult sciences. In these applications it still survives in certain corrupt forms. F *grimoire*, Eng. GLAMOUR, GRAMARYE.]

1 That department of the study of a language which deals with its inflexional forms or other means of indicating the relations of words in the sentence, and with the rules for employing these in accordance with established usage; usually including also the department which deals with the phonetic system of the language and the principles of its representation in writing Often preceded by an adj. designating the language referred to, as in *Latin, English, French* grammar.

In early Eng use *grammar* meant only Latin grammar, as Latin was the only language which was studied grammatically In the 16th c there are some traces of a perception that the word might have an extended application to other languages (cf quot 1530 under GRAMMATICAL 1), but it was not before the 17th c that it became completely a generic term that there was any need to speak explicitly of '*Latin* grammar' Ben Jonson's book, written *c* 1600, was app the first to treat of 'English grammar' in that sense

As above defined, grammar is a body of statements of fact=a 'science', but a large portion of it may be viewed as consisting of rules for practice, and so be looked up as 'art' The old fashioned definition of grammar as 'the art of speaking and writing a language correctly' is from the modern point of view in one respect too narrow, because it applies only to a portion of that branch of study; in another respect it is too wide, and was so even from the older point of view, because many questions of 'correctness' in language were decidable on principles independent of grammar e g the use of a word in a wrong sense, or a bad pronunciation or spelling, would not have been called a *grammatical* mistake At the present day it is not customary, on grounds of convenience, for books professedly treating of grammar to include more or less information on points not strictly belonging to that subject

Until a not very distant date, Grammar was divided by Eng. writers (following the precedent of Latin grammarians) into Orthography, Etymology, Syntax, and Prosody, to which Orthoëpy was added by some authors Of these terms (except 'Syntax) were used more or less inaccurately (see the several words) The division now usual is that into Phonology, treating of the various sounds of the language, Accidence, of the inflexional forms or equivalent combinations, and Syntax, of the structure of sentences, the branch of grammar dealing with the functions of the alphabetic letters is usually treated along with the phonology

4. The phenomena which form the subject-matter of grammar; the system of inflexions and syntactical usages characteristic of a language

Languages not possessing an elaborate system of inflexions and concords are often said to have 'little or no grammar.' This seems to have been partly the meaning of the reproach against the English language quoted by Sidney *Apol Poetrie* (Arb) 70, 'that it wanted grammar', though it may also have meant that English had not been refined and improved, as the classic tongues were supposed to have been, by the labours of grammarians.

Graph (graf), *sb.*[1] [Orig an abbreviation of *graphic formula* see Graphic] 1

1. A kind of symbolic diagram (used in *Chemistry, Mathematics*, etc.) in which a system of connexions is expressed by spots or circles, some pairs of which are colligated by one or more lines. Also, *occas.* the system expressed by one of these diagrams.

'Graphs' were first employed (under the name of 'graphic formulæ' see Graphic *a.* 5) in Chemistry for expressing the relations of the elements forming a compound The application to Mathematics (app also the shortened name) is due to Sylvester

-graph (graf), repr. F. *-graphe*, L. *-graphus*, Gr. *-γράφος* The Greek termination was used to form adjectives, sometimes in the passive sense of 'written', e.g. *αὐτόγραφος* written with one's own hand, *χειρόγραφος* written with the hand, sometimes in the active sense, 'that writes, delineates, or describes' chiefly used *absol.* as sbs.; one who writes, delineates, or describes': e g *ζωγράφος* a painter from life, *βιβλιογράφος* a writer of books, *γεωγράφος* a delineator of the earth, a geographer Many of the passive formations in *-γραφος* have been anglicized, being for the most part used both as adjs and sbs., as in *autograph, chirograph, holograph.* These words have been imitated in a few modern sbs. formed on Gr. types, as *lithograph, photograph*, and these in turn have been imitated in hybrid formations, such as *pictograph*, jocular nonce-words, like *blurrygraph* for 'a hurried sketch', are occasionally met with. The Gr active formations in *-γράφος*, where they have been anglicized, take in mod Eng the ending -**grapher**, which is used also for new formations denoting persons (exceptions, such as *calligraph*, are rare) The great bulk of the words in *-graph* is composed of technical terms of very recent invention, mostly formed on Gr elements, and expressing the general sense of 'that which writes, portrays, or records', as *actinograph, heliograph, hygrograph, ideograph, phonograph, seismograph, telegraph*, etc.

-grapher (gráfər), an ending of many Eng. words of Greek derivation First found in the earlier half of the 16th c The analogy of *astronum er* (really f. *astronomy*, but having the appearance of being f. L *astronom-us* + -ER[1]) naturally suggested the use of the suffix *-er* as a means of anglicizing L. words in *-γράφος* without altering their rhythm, as in *cosmographer* (recorded 1527) In the 16th c. there also occur a few derivatives in *-er* from nouns in *-graphy*, as *geographer* (1542), *chronographer* (1548), but these were soon superseded by the forms in *-grapher*. (In Chirographers, q.v., the ending has a different source.) From the latter part of the 16th c. the formation with *-grapher* has been the normal mode both of anglicizing a real or assumed Gr. word in *-γράφος* (see -GRAPH) denoting a personal agent, and of providing a personal designation correlative to sb. in -GRAPHY denoting an art or science. It would often be impossible to determine in which of these two ways an individual word actually originated; but the question is unimportant, because Gr. words in *-γράφος* were themselves influenced in sense by their derivatives in *-γραφία*, so that, e g. *γεωγράφος* meant not so much 'one who describes the earth' as 'one versed in *γεωγραφία*'.

The suffix *-ist* has sometimes been used instead of *-er* in anglicizing Gr words in *-γράφος* or forming derivatives from sbs in *-graphy*; of *biographist* for the more usual *biographer*, *telegraphist* is more common than *telegrapher*

-graphic (græ fik), the ending of the adjs. corresponding in sense with the sbs in -GRAPH, -GRAPHER, -GRAPHY, represents Gr *-γραφικος*, which occurs in a few words derived from adjs or sbs. in *-γράφος* (see -GRAPH), some of which have been anglicized, as *ἱστοριογραφικὸς historiographic* Any of the Eng adjs in *-graphic* might conceivably have been formed on an assumed Gr type, but it is probable that they have been mostly formed with suffix -IC directly on Eng sbs. in *-graphy* (or less frequently *-graph*) The prevailing sense is 'of or pertaining to —graphy'.
