b *Free school* 'a school in which learning is given without pay' (J)

It has been denied that this was the meaning of 'free (grammar) school'; I *Johnia schola grammaticalis*, as the official designation of many schools founded under Edw VI The denial rests on the two assertions (both disputable) that the Free School was a foundation of the Latin, not the reverse; and that *liber* could not mean 'gratuitous' in mediæval any more than in classical Latin Many different interpretations of the Act have been proposed (1) exempt from ecclesiastical control, (2) exempted by licence from the operation of the statute of mortmain, and hence entitled to hold property (to a limited amount), (3) giving a liberal education as distinguished from a select number or class of scholars, and there is abundant proof that this interpretation was already current *before* the time of Edw VI

Freemason (frī'mēisn, -sn). [f. FREE *a.* + MASON.]

The precise import with which the adj. was originally used in this designation has been much disputed. Three views

have been propounded. (1) The suggestion that *free mason* stands for *free-stone mason* would appear unworthy of attention, but for the curious fact that the earliest known instances of any similar appellation are *mestre macon de franche pere*,' 'master mason of free stone' (Act 25 Edw III at II c 3, A.D 1350), and *sculptores lapidum liberorum*, 'carvers of free stones', alleged to occur in a document of 1217 (in *Fraudet's Hist Mas* 51, citing Wyatt Papworth); the coincidence, however, seems to be merely accidental (2) The view most generally held is that *free masons* were those who were 'free' of the masons' guild (see FREE a 29). Against this explanation many forcible objections have been brought by Mr G W Speth, who suggests (3) that the itinerant masons were called 'free' because they claimed exemption from the control of the local guilds of the towns in which they temporarily settled (4) Perhaps the best hypothesis is that the term refers to the medieval practice of emancipating skilled artisans, in order that they might be able to travel and render their services wherever any great building was in process of construction]

†1 A member of a certain class of skilled workers in stone, in the 14th and following centuries often mentioned in contradistinction to 'rough masons', 'ligiers', etc They travelled from place to place, finding employment wherever important buildings were being erected, and had a system of secret signs and passwords by which a craftsman who had been admitted on giving evidence of competent skill could be recognized Under the (16–18th c.) the term seems often to be used merely as a more complimentary synonym of 'mason', implying that the workman so designated belonged to a superior grade *Obs.*

2 A member of the fraternity called more fully, *Free and Accepted Masons*

Early in the 17th c, the societies of freemasons (in sense 2) began to admit honorary members, not connected with the building trades, but supposed to be eminent for architectural or antiquarian learning. These were called as *accepted masons*, though the term *free masons* was often loosely applied to them, and they were admitted to a knowledge of the secret signs, and instructed in the legendary history of the craft, which had already begun to be developed The distinction of being an 'accepted mason' became a fashionable object of ambition, and before the end of the 17th c the object of the societies of freemasons seems to have been chiefly social and convivial In 1717, under the guidance of the physical J I Desaguliers, four of these societies or 'lodges' in London united to form a 'grand lodge', with a new constitution and ritual, and a system of secret signs, the object of the society as reconstituted being mutual help and the promotion of benevolently feeling among its members. The London 'grand lodge' became the parent of other 'lodges' in Great Britain and abroad, and there are now powerful bodies of 'freemasons', more or less recognizing each other, in most countries of the world

Frill (fril), *sb*[1] [This and the related FRILL *v*[1] are of uncertain origin. The common view is that FRILL *v* 3, to shiver, gave rise to *n* sb. (see FRILL *sb* 3) meaning the ruffling of a hawk's feathers when shivering', and that the word as applied to an article of costume is a transferred use of this. But this hypothesis finds no support in the rare early instances of the words, and there is no proof that the sb. ever had the alleged sense Sense 2 of the vb suggests that it may be a metathetic form of FURL, but this is app peculiar to Knolles, and should perh. be regarded as an unconnected word The sb as used by butchers (sense 3 below) is commonly regarded as a transferred sense from the 'frill' of a shirt; but the analogy of CHITTERLING and of F. *frasst* (mesentery of a calf, 14th c; tuff, frill, 16th c) suggests the possibility that the butchers' sense may be the original (though not recorded until quite recently) Godef. has one quot for an OF pple. *froillé* (v r *freroleti*) = 'frilled' (said of a shirt), and it is noteworthy that in the 17th c. the F equivalent of FERL *v.* (cf FRILL *v*[1] 2) was *frestler*, which seems to belong to OF *freseler* to frill, adorn, *I fresel, -elle*, dim of *fresse* ruff, but it is not easy to see how Eng. *frill* can be connected with these words]

The Welsh *ffridd*, *ffrith*, often given as the etymon, are adjusted forms of the Eng word

To the scanty evidence for the OE *fyrhðe* must be added the place name Firbright in Surrey, which in documents of 13th and 14th c appears as Firthebrith, Firthebrith, Furthright —OE **furæ-fyrhðe* pear · frith —see *Cal Close Rolls* 1326 p 622, Manning & Bray *Surrey* I 145, *Surrey Fines* (Surrey Archæol Soc) 1 21

In the later quots the word occurs only as a poetical archaism of vague meaning In the earlier quots it may have had the more definite sense explained under 2 In sense 1, 2 there may be confusion with Frith *sb*.2 2

[OE. *frogga* wk. masc ; a hypocoristic formation (peculiar to Eng.), from the root contained in the various Teut synonyms, of which there are three different types: (1) OE *frox*, (**frocz*, *forsc* str. masc (see FROSH)) = Du. *vorsch*, OHG. *frosk* (MHG. *vorsch*, mod G *frosch*), ON. *frosk-r*—OTeut **froskoz*; (2) ME. *frūske*, FROUD, frog or toad, related by ablaut to ON *fraud-r*, OSw pl *frøþlar* (Da *frø*), cf. OE *frōit*, *frot* toad, which is perh of Scandinavian origin; (3) ON *frauke*, whence perh the ME. *froke*, given among the forms of the present word. The etymological relations between the various Teut words involve some unsolved difficulties. Some scholars, on the ground of OE *frogca*, and ON *frauka*, assume a root-end ing in a guttural, and explain OTeut **froskoz*-as=**frosk-skoz* This does not account for the ME. *froke*, the Du *paddevorsch*, and hence it has been suggested that the common root of all the words is *fraud* (*frod*), *froud*, *frūd* ; OTeut *frud* + suffix *-ko* would by phonetic law be **frodde*, **frudde*, and *frogga* appears to be for **frudde* With regard to OE *frogga* it may be remarked that the ending *-gga* occurs in several other names of animals, cf *hagga*, *docga*, *wicga* It is possible that *frogga* may owe its form to the analogy of other animal names with this termination

1 A tailless amphibious animal of the genus *Rana*, or, in wider sense, of the family *Ranidæ*.

Fudge (fʊdʒ), *int* and *sb* [Origin obscure

The int as used by Goldsmith (quot 1766) seems from the context merely to represent an inarticulate expression of indignant disgust, though later writers who adopted it from him use it with a more definite meaning The sb appears to have been developed partly from the int, partly from FUDGE *v.* The etymology suggested in the annexed quot 1700 can hardly be correct, though Captain Fudge, 'by some called Lewis Fudge' (*Voyages* of 1664 in Granger's *Pantheon Christianus* 1512, p 87) was a real person (the surname is still common in Dorset) The nautical phrase 'You fudge it', associated in 1700 with the name of the mendacious captain, prob belongs to FUDGE *v.* 1 In a dialogue of 1709 'The Present Condition of the English Navy', one of the interlocutors is called 'Young Fudg of the Admiralty', perh with allusion to the same word

1700 *Remarks on the Navy* in D Jeake's *Corr. Lit., Neology* (1841), There was, sir, in our time one Captain Fudge who always brought home his owners a good cargo of lies, so much that now aboard ship the sailors, when they hear a great lie told, cry out, 'You fudge it'!

-fuge (fiūdʒ), *suffix*, occurring in words (adj. and sb.) f.mod L types in *-fugus*, According to classical L. analogy, this ending should be connected with *fugĕre* to flee (cf. *profugus*), and should have the sense 'fleeing from' (cf. *lucifugus*, *erifuge*). In the medical words *febrifuge*, lit. driving away fevers, *vermifuges* expelling worms, however, the ending derives its sense from L. *fugāre*, to put to flight. In imitation of the anglicized forms of these, nonce-wds in *-fuge* have occasionally been formed ; chiefly on Lat. stems, as Demonifuge (q.v.), dolorifuge, something to drive away pain ; but occasionally on Eng. words, as *mendacity-fuge*

Ful, obs. form of Foul.

-ful, *suffix*, originally identical with Full *a*

1 Forming adjs In OE the adj. *full*, like its equivalent in the other Teut langs, was used in composition with a preceding sb., forming adjs., the etymological sense of which (= 'full of ...') is usually somewhat weakened, so that the words may be rendered 'having', 'characterized by' (the attribute denoted by the sb); the meaning of the suffix thus differs little from that of L. *-tus*, -ous. In ME and in mod.E many new formations of this type have arisen, some of them from Romanic sbs; as *beautiful*, *graceful*; and the suffix is still to some extent productive In the 14th c. a few new forms arose in which the suffix had the force of 'possessing the qualities of'; e g *masterful*, *manful* In OE *full* was not ordinarily appended to adjs.; an instance occurs in *deorcfull*, Darkful, used to render L. *tenebrosus*, and prob formed in imitation of it In the 16th and 17th c. a few new words appear f adjs or L adj stems + *full*, e.g *direful*, *grateful*. *trustful*. *fiercful*; prob these were due to the analogy of older synonyms having this suffix, though it is possible that they may have been in part suggested by It words like *gratevole* (*gradevole*), the ending of which has an accidental resemblance to the Eng suffix As the sb to which *-ful* is appended are often nouns of action or state coincident in form with the stems of related vbs; it happens frequently that a word really f a sb + *-ful* is associated in ordinary apprehension rather with the vb than the sb (For this there are sometimes special causes, e g the sb. *thanl* being obsolete in the sing. while *thank* vb is current, the adj *thankful* is naturally viewed as a derivative of the latter) Hence in mod.Eng adjs. in *-ful* are sometimes formed directly on verb-stems, the sense of the suffix being 'apt to', 'able or accustomed to', as *distrustful*, *distractful*, *crossful*, *mournful*, an example of a passive sense (= *-able*) occurs in *bashful*.

2 Forming sbs. In the Teut langs. the form of expression in which a sb. denoting a receptacle is followed by the adj Full in concord with it and governing a genitive (e g 'a hand full of corn') was used, not only in its proper sense, but in the transferred sense of 'the quantity that fills or would fill' (the receptacle); see Full *a* 1 b. The ambiguity thus arising is partly obviated by a differentiation of form; the sb and adj are treated as independent words when they retain their proper sense, but as forming a compound when the sense is transferred This differentiation has not been carried out to an equal extent in the various langs. In Ger, *handvoll* 'handful', *mundvoll* 'mouthful' are written as single words, but this makes no real difference in their syntactical value, the gender of the quasi-compound is determined by that of its first element, and there is no inflexion. In OE the development had proceeded a step further in the case of *handfull*, which, although retaining the fem gender of *hand*, was so completely one word as to be declinable (accus *-fulle*, pl *-fulla*, after the prevailing declension of feminines); in the 14th c the pl was *handfullis* No other compound of this class is found in OE, commonly the notion was expressed in the original Teut manner by the adj *full* in concord with the sb. This continued also in ME.; but owing to the practice of using the sing of a noun of quantity instead of the pl. after a numeral, there is seldom any evidence to show whether the ME. antecedent of a word like *thisthful* is to be regarded as a sb instructural combination or as a single word In mod Eng *-ful* has become a suffix forming derivatives with the general sense 'quantity that fills or would fill' (something), and may be attached at pleasure to any sb denoting an object that can be regarded as holding or containing a more or less definite quantity of anything; thus we have not only *bottleful*, *box/ul*, *cupful*, *spoonful*, etc, but *handful*, *churchful*, *houseful*, *townful*, etc. The plural forms *spoonsful*, *cupsful*, etc, which are still sometimes heard, represent either a survival of, or (much more probably) a return to, the older grammatical view, but though they have thus some appearance of historical justification, they are contrary to good modern usage, and are objectionable on account of their ambiguity

The ON *-fyllr handfyllir* handful, *munnfyllir* mouthful, etc.) is not identical with the Eng suffix, but is the sb *fylle* fem = Fill *sb*1, and the compounds are therefore all fem, whatever the gender of the first element

Arts* I. 98 When the lead is wasted to a certain degree, a very thin film of it only remains on the silver, which causes the iridescent appearance, like the colours of soap bubbles, a phenomenon, called by the old chemists, fulguration.

6. *Math.* A variable quantity regarded in its relation to one or more other variables in terms of which it may be expressed, or on the value of which its own value depends.

[This use of the L. *functio* is due to Leibnitz and his associates. A paper in the *Acta Eruditorum* for 1692, pp. 169-170, signed 'G. V. L.' but prob. written by Leibnitz, uses *functiones* in a sense hardly different from its ordinary untechnical sense, to denote the various 'offices' which a straight line may fulfil in relation to a curve, viz. its tangent, normal, etc. In the same journal for 1694, p. 316, Leibnitz defines *functio* as 'a part of a straight line which is cut off by straight lines drawn solely by means of a fixed point, and of a point in the curve which is given together with its degree of curvature'; the examples given being the ordinate, abscissa, tangent, normal, etc. As the *functiones* (in Leibnitz' sense) of a curve are variable quantities having a fixed mutual relation, the use of the word soon developed into the modern sense, which occurs in the writings of the Bernoullis early in the 18th c. A somewhat peculiar use occurs about 1713, in Leibnitz *Hist et Origo Calc Diff* (*Math Schriften* ed Gerhardt V 408), where he says that just as constant quantities have their 'functions', viz. powers and roots, so variables have also 'functions' of a third kind viz differentials]

1 Originally, the length of the furrow in the common field, which was theoretically regarded as a square containing ten acres as a linear measure, the furlong therefore varied according to the extent assigned at various times and places to the ACRE, but was usually understood to be equal to 40 poles (rods, perches). As early as the 9th c it was regarded as the equivalent of the Roman *stadium*, which was ⅛ of a Roman mile ; and hence *furlong* has always been used as a name for the eighth part of an English mile, whether this coincided with the agricultural measure so called or not. The present statute furlong is 660 yards, and is equal both to the eighth part of a statute mile, and to the side of a square of 10 statute acres.

1 An apparatus consisting essentially of a chamber to contain combustibles for the purpose of subjecting minerals, metals, etc. to the continuous action of intense heat.

In modern use it chiefly denotes a building of masonry lined with firebrick, used for metallurgical operations, the baking of pottery, or the like, but it is also applied to smaller apparatus (usually constructed of iron) used in chemistry, assaying, etc.
