Kenya (kĕn'yu, kēn'yu), British colony and protectorate (224,960 sq mi, pop 3,040,940), E Africa, on the Indian Ocean The capital is Nairobi Lying across the equator, it is bordered on the north by Anglo-Egyptian Sudan, Ethiopia, and Italian Somaliland, on the west by Uganda, and on the south by Tanganyika The Kenya protectorate, included within the colony, is a coastal strip, 10 mi wide, leased from the sultan of Zanzibar, within it is Mombasa, the chief overseas port In the north much of the land is poorly watered The south and the central plateau, including the Great Rift Valley, offer greater possibilities for agricultural development than almost any other part of Africa Here there are large cattle ranches, and wheat, maize, peanuts, coffee, tea, sisal, and cotton are grown There is salt mining in the south The Kenya-Uganda RR (built 1901) connects the main cities and the productive hinterland As early as the 7th cent A D the coastal strip of Kenya was settled by Arabs and Persians trading in ivory and slaves They were supplanted by the Portuguese, who controlled the coast from 1498 until their defeat in 1729 by the Oman Arabs Great Britain, after having gained commercial control through the British East Africa Company (chartered 1888), established the protectorate (1890) and the inland colony (1895) In 1897 Hugh Cholmondeley, Baron Delamere, the first British settler, arrived, he was followed by other white settlers from England and South Africa and by Indian laborers from E Africa During the Second World War parts of N Kenya were briefly occupied by Italian forces Kenya is ruled by an appointed governor with the advice and consent of the legislative council, on which representatives of the white settlers (1941 estimated pop 23,284) have a majority of the elective seats See Elspeth Huxley, *White Man's Country* (1935), L S B Leakey, *Kenya* (1936), Marjorie R Dilley, *British Policy in Kenya Colony* (1937)

Kenyon, Sir Frederic George, 1863–, English Greek scholar, educated at Winchester College and at New College, Oxford From 1909 to 1930 he was director and principal librarian of the British Museum His publications include the definitive texts of Aristotle's *Constitution of Athens* (1891, rev ed, 1920), of the newly found odes of Bacchylides (1897), and of other papyrus texts, as well as studies concerning the Greek Bible and editions of the poems and letters of Browning

Kenyon, William Squire, 1869–1933, U S Senator from Iowa, b Elyria, Ohio, grad State Univ of Iowa, 1890 He practiced law at Fort Dodge, Iowa, was county prosecutor, and became a state district court judge before he served (1910–11) as assistant to the U S Attorney General in the Federal beef-trust prosecutions He was elected to the U S Senate in 1911 to succeed Jonathan P DOLLIVER and served there until 1922 Kenyon immediately joined the Republican insurgents, backed much progressive legislation, was the co-author of the Webb-Kenyon Act (1913) prohibiting the shipment of intoxicating beverages in interstate commerce, and was the first leader of the Senate farm bloc Kenyon later served (1922–33) as judge of the U S Circuit Court of Appeals and was (1929–30) a member of the Wickersham Commission (see WICKERSHAM, GEORGE WOODWARD)

Kenyon, village (pop 1,530), SE Minn, E of Faribault, in a farm region, settled 1856, inc 1885

Kenyon College, at Gambier, Ohio, near Mt Vernon; for men, chartered 1824 by Bishop Philander CHASE as an Episcopal theological seminary with college work, renamed 1891 It still includes a divinity school The college publishes a literary quarterly, the *Kenyon Review*

Keokuk (kē'ŭkŭk), c 1780–1848, American Indian, chief of the Sac and Fox tribes, b near present Rock Island, Ill When Black Hawk supported the British in the War of 1812, Keokuk refused to join him, thereby gaining recognition and support from the U S government. After Black Hawk's defeat, in 1832, Keokuk's tribes were given a large tract of land in SE Iowa Keokuk visited Washington in 1833 and 1837 His grave and a statue of him are at Keokuk, Iowa, which was named for him. See biography by Myna Lockwood (1943)

Keokuk, city (pop. 15,076), a co seat of Lee co, extreme SE Iowa, on the Mississippi river at the foot of the Des Moines rapids, platted 1837, inc 1847 The first cabin was erected in 1820, and a trading post was founded in 1829 and named for Keokuk, Sac Indian chief A trade and manufacturing center in a farm area, Keokuk produces flour, dairy products, rubber products, and chemicals Heavy river traffic brought prosperity until the mid-19th cent, when the arrival of railroads diverted the river shipping. In 1877 the U S government completed a ship canal (9 mi long) around the rapids A gravity dam (a mile long, built 1910–13) and powerhouse on the Mississippi furnish hydroelectric power The U S dry dock and locks here are among the largest ever built The dam forms Lake Keokuk, reaching to Burlington The National Cemetery (1861) has a monument to the Unknown Soldier, in Rand Park is the grave of Keokuk, with a monument Mark Twain worked as a printer in Keokuk, and mementos of his stay are preserved.

Keos (kā'ŏs, kē'ŏs) or **Kea** (kā'ä), Latin *Ceos* (sē'ŏs), island (61 sq mi, pop 3,749), Greece, in the Aegean Sea, one of the CYCLADES The main town is Kea (pop 2,869) on the site of ancient Iulis The poet Bacchylides was born here In the Middle Ages and under Turkish rule Keos was a hiding place of pirates It is also known as Zea

Keosauqua, (kē'sŏk'wu), town (pop 1,040), SE Iowa, in a bend of the Des Moines river NW of Keokuk, settled 1836, inc 1851 The river was the scene of a boundary dispute between Iowa and Missouri in 1839

Keota (kē'ŏ'tu), town (pop 1,032), SE Iowa, SW of Iowa City, settled 1871, inc 1873 It is a shipping center for dairy products and livestock.

Kep i Gjuhezes, Albania see ACROCERAUNIA

Kepler, Johannes (yōha'nus kĕp'lur), 1571–1630, German astronomer From his student days at the Univ of Tübingen, he was influenced by the Copernican teachings From 1593 to 1598 he was professor of mathematics at Graz and while there wrote his *Mysterium cosmographicum* (1596). This work opened the way to friendly intercourse with Galileo and Tycho Brahe, and in 1600 Kepler became Tycho's assistant in his observatory near Prague Upon Tycho's death, in 1601, Kepler succeeded him as imperial mathematician to Rudolph II In 1609 he published the results of Tycho's calculations of the orbit of Mars In this memorable work were stated the first two laws known by Kepler's name In 1612, becoming mathematician to the states of Upper Austria, he moved to Linz He wrote an epitome of the astronomy of Copernicus in 1618, and in 1619 *De cometis* and *Harmonice mundi* (in which was announced the third of Kepler's laws) In 1626 Kepler moved to Ulm After his death his manuscript writings, bought by Catherine II of Russia, were placed in the observatory of Pulkovo See biography by Olaf Sale (1940)

Kepler's laws may be summarized as follows (1) The orbit of each planet is an ellipse, of which the center of the sun is one of the foci (2) The radius vector of each planet (the line joining its center with the center of the sun) moves over equal areas of the ellipse in equal times (3) The square of the period of each planet (the time for completing its journey around the sun) is proportional to the cube of its mean distance from the sun

Keppel, Arnold Joost van see ALBEMARLE, ARNOLD JOOST VAN KEPPEL, 1ST EARL OF

Keppel, Frederick Paul, 1875–1943, American administrator, dean of Columbia College (1910–17) and president of the Carnegie Corp (1923–41), b Staten Island, N Y, grad Columbia, 1898 He was assistant secretary (1900–1902) and secretary (1902–10) of Columbia College before he became dean—a position he left to serve (1918–19) as Third Assistant Secretary of War He was director (1919–20) of foreign operations of the American Red Cross after the First World War After administering the endowments of the Carnegie Corp, Keppel served (1941–43) in the Dept of State as a member of the board of appeal on alien laws His several books include *Columbia University* (1913), *Some War-Time Lessons* (1920), and *The Foundation* (1930). *Philanthropy and Learning* (1936) is a collection of his papers

Keppler, Joseph, 1838–94, American cartoonist and founder of *Puck*, b Vienna Coming to America in 1867, he established (1871) with Adolph Schwarzmann in St Louis a German humorous periodical, *Puck* Upon its failure, he joined the staff of *Frank Leslie's Illustrated Newspaper* in New York and in 1876 started a second German *Puck*, followed in 1877 by the English edition Both organs became famous for their political cartoons, which espoused the cause of the national Democratic party. His cartoons were usually large, with many figures, skillfully designed and drawn, and notable for their penetrating satire He was the first in the United States to apply color lithography to caricature

Kerbela (kŭr'bûlû) or **Karbala** (kär'bûlû, kûr'–), city (pop. c 65,000), SW Iraq, at the edge of the

Syrian Desert It contains the tomb of HUSEIN, killed here in 680, and is the greatest shrine of pilgrims of the Moslem Shiite sect Husein's tomb, with a gilded dome and three minarets, is the most notable building, it was destroyed by the Wahabis in 1801, but it was quickly restored by contributions from Persians and other Shiites Persian pilgrims to Mecca usually begin their journey at Kerbela, and many pious Moslems bring the bones of their dead for burial in this holy soil The city's trade is in religious objects, hides, wool, and dates

Kerch (kyĕrch), city (pop 104,471), S European RSFSR, in E Crimea, a fortified Black Sea port It lies on the Kerch Strait and at the eastern end of the Kerch Peninsula, a land strip (60 mi long and from 20 to 30 mi wide) between the Sea of Azov and the Black Sea Kerch, which tripled its population between 1926 and 1939, is a major industrial center, with iron and steel mills, a coking plant, shipyards, and various manufactures Its fisheries and canneries are important The ancient Panticapaeum, the city was founded (6th cent B C) by Greek colonists and became the capital of the kingdom of Bosporus (see CRIMEA) It was conquered (c 110 B C) by Mithridates VI of Pontus, later passed under Roman and Byzantine rule, became (13th cent) a Genoese colony and trade center, and was conquered (1475) by the Crimean Tatars The Russians took it in 1771 In the Second World War, Kerch fell to the Germans in 1941 and, after being briefly recaptured by the Russians, was again held by the Germans from 1942 to 1944 There are ruins of the ancient acropolis on top of the steep Hill of Mithridates Archaeological remains, discovered in catacombs and burial mounds near the city, are in the archaeological museum, which is famous for its Greco-Scythian antiquities The Church of St John the Baptist dates from the 8th cent

Kerch Strait, shallow channel, 25 mi long, RSFSR, connecting the Sea of Azov and the Black Sea and separating the Crimea in the west from the Taman peninsula in the east Its northern end, opening into the Sea of Azov, is narrowed to a width of from 2 to 3 mi by the narrow Chushka landspit, the southern end, into the Black Sea, is 9 mi wide The city of Kerch lies near the middle of the strait, on the Crimean side The Cimmerian Bosporus of the ancients, the strait is also known by its Tatar name, Yenikale In the Second World War the Russians twice retreated across the strait (1941, 1942) and twice recrossed it to counterattack (1941, 1944)

Keren-Happuch (kē'run-hă'puk) [Heb =horn of antimony, antimony was a cosmetic], Job's third daughter after his affliction Job 42 14

Kerens (kĕr'ĭnz), town (pop 1,287), E central Texas, SSE of Dallas and near Corsicana, settled 1881

Kerensky, Aleksandr Feodorovich (kurĕn'skē, Russ ŭlyĭksan'dŭr fyô'dŭrŭvĭch kă'rĭnskē), 1881–, Russian revolutionist A representative of the moderate Labor party in the fourth Duma, he became, after the February Revolution of 1917 (see RUSSIAN REVOLUTION) minister of justice, then war minister in the government of Prince Lvov He succeeded (July, 1917) Lvov as provisional premier His moderation and vacillation enabled the Bolsheviks, under the leadership of Lenin, to overthrow his government in 1917 He fled to Paris, where he continued as an active propagandist against the Soviet regime In the Second World War, Kerensky fled (1940) to the United States, he subsequently continued to tour the world as a lecturer Among his writings are *The Prelude to Bolshevism* (1919), *The Catastrophe* (1927), and *Crucifixion of Liberty* (1934)

Kerguelen (kûr'gulĕn, Fr kĕrgălĕn'), subantarctic island of volcanic origin, in the S Indian Ocean, belonging to the French since 1893 The largest of the Kerguelen Islands (comprising c 300 islands), it is about 85 mi long and rises to more than 6,000 ft It was discovered in 1772 by the French navigator Yves Joseph de Kerguélen-Trémarec, (1734?–1797), who named it Desolation Island

Kerioth (kĕ'rē–) [Heb, =cities] **1** Town, E of the Jordan in Moab Jer 48 24,41 Kirioth Amos 2 2 **2** Town, S Palestine In AV what had been one name is given as two "Kerioth and Hesron" Another name was Hazor Joshua 15 25

Kerki (kyĭrkĕ'), city (1933 estimated pop 14,200), Turkmen SSR, a port on the Amu Darya river It has metal, cotton, and food-processing plants It was founded in the late 19th cent as a Russian fort on the Bukhara-Afghanistan trade route

Kerkrade (kĕrk'rā"du), municipality (pop 40,372), Limburg prov, SE Netherlands, E of Maastricht, on the German border It is a coal-mining center

Kermadec Islands (kurmă'dĕk), volcanic group (13 sq mi., pop 23), S Pacific, 500 mi NE of Auckland New Zealand annexed them in 1887 Sunday Island, the largest, is mountainous and fertile

Kerman (kĕrmän'), city (pop 50,048), SE central Iran It is the capital of the Eighth Prov and formerly was the capital of Kerman prov (anc *Carmania*), which consists of mountains rising to 14,700 ft and desert country, with occasional fertile valleys yielding wheat, barley, dates and opium Iron and turquoise were formerly mined. Under the Seljuk Turks in the 11th and 12th cent Kerman was almost independent and conquered Oman and Fars Marco Polo described Kerman Historical reminders are the medieval mosques in the city, beautiful faience found among the extensive ruins outside the walls, and 15th-century mosaics with Chinese motifs From Aga Mohamad Khan's ruthless destruction (1794), Kerman recovered very slowly It is noted for its carpets and fine goat's wool shawls

Kermanshah (kĕrman"shā'), city (pop 88,622), W Iran A secondary royal residence of Medes, Sassanians, Harun, and others, it was later a border fortress against the Turks, whose last occupation (1915–17) was ended by the Russians under Baratov Kermanshah exports local grain and transships fruit and carpets from the interior. It contains an oil refinery, a large arsenal, and numerous caravansaries crowded semiannually with pilgrims to Kerbela Near by are Behistun and notable Sassanian rock sculptures

kermes (kûr'mēz), brilliant red natural dye extracted from the bodies of the adult females of a genus of scale insect parasitic upon oak trees The male insects are small and inconspicuous, the females large and similar in appearance to galls A very ancient dye, kermes has largely been replaced by cochineal and artificial dyes. The insect yields only about one tenth as much dye as the cochineal

Kermit, town (1940 pop 2,584, 1947 estimated pop 5,300), co seat of Winkler co, W Texas, S of the N Mex line and N of the Pecos, inc 1938 The region has cattle ranches, but Kermit is primarily a thriving oil town with carbon-black plants near by

Kern, Jerome (kûrn), 1885–1945, American composer, b New York city After studying in New Jersey and New York he studied composition in Germany and England, making his debut as a composer in England in 1905 His first success in New York was the operetta *The Red Pettcoat* (1911) Among those which followed are *The Girl from Utah* (1914), containing the song *They Didn't Believe Me; Very Good Eddie* (1915), *Sally* (1920), containing *Look for the Silver Lining*, *Sunny* (1925), *The Cat and the Fiddle* (1931), and *Roberta* (1933), containing *Smoke Gets in Your Eyes* After 1931 he wrote scores for many moving pictures, including moving-picture versions of several of his stage successes His outstanding work is *Show Boat* (1929), for which Edna Ferber wrote an adaptation of her own novel and from which came *Ol' Man River* and several other excellent songs

Kern, John Worth, 1849-1917, American political leader, b Howard co, Ind, grad Univ of Michigan, 1869 Admitted (1869) to the bar, Kern practiced law at Kokomo, Ind, where he was (1871–84) city attorney After he had removed (1885) to Indianapolis, he served as reporter (1885–89) of the Indiana supreme court, state senator (1893-97), and city solicitor (1897 1901) He ran (1904, 1908) unsuccessfully on the Democratic ticket for governor and met with defeat in 1908 as vice presidential candidate on the ticket with William J Bryan In 1910, however, Kern was elected to the U S Senate over Albert J BEVERIDGE He became (1914) the Democratic floor leader and supported the legislation of the Wilson administration

Kern, river rising in E California, in the S Sierra Nevada in Sequoia National Park, and flowing c 150 mi S and SW past Bakersfield to a reservoir in the northern part of what was Buena Vista Lake, now nearly dry In wet seasons, the river's waters may reach Tulare Lake Construction was begun in 1945 on the Friant-Kern Canal to bring the waters of the San Joaquin to the region (see CENTRAL VALLEY PROJECT) The canyon of the upper Kern river is noted for its beauty

Kerner, Justinus Andreas Christian (yôstē'nôs andrā'as krīs'tyan kĕr'nur), 1786-1862, German lyric poet, of the Swabian school A physician, he became a believer in spiritualistic phenomena and wrote a novel on this subject, *The Seeress of Prevorst* (1829, Eng tr, 1845) His poems, often in folk style, include the popular "Wanderer's Song," set to music by Schumann, who used a number of his lyrics

Kernersville, textile-mill town (pop 2,103), central N C, E of Winston-Salem, settled before 1770 by Germans

Kernstown, village near Winchester, N Va T. J (Stonewall) JACKSON attacked a Union force here, March 23, 1862, and was repulsed

Keros (kē'rŏs), family which returned from Babylon Ezra 2 44, Neh 7 47

kerosene, colorless, oily liquid (density=0 75–0 85 g per c c), a mixture of hydrocarbons commonly obtained in the fractional distillation of PETROLEUM as the portion boiling off between about 175°C and 300°C Formerly, because of the great demand for kerosene as an illuminant and fuel, the temperature limits of the kerosene fraction were broader, but now with less demand for it and the increasing demand for gasoline, these limits have been reduced Kerosene has also been prepared from coal (hence another name, coal oil), oil shale, wood, and various other substances. The flash point, i e, the temperature at which it forms inflammable vapors, should not be below about 45°C Kerosene is rendered more valuable as a fuel for special-type engines and as an illuminant for lamps by the removal of certain impurities through treatment with sulphur dioxide It is used also in INSECTICIDE sprays. Abraham Gesner discovered kerosene in 1852

Kerrville (kûr'vĭl), city (1940 pop 5,572, 1947 estimated pop 8,000), co seat of Kerr co, S central Texas, on the Guadalupe and NW of San Antonio, settled 1847 In the cool hill country on the edge of the Edwards Plateau, Kerrville is a busy shipper of wool and mohair, dairy products, and poultry and has small industries, but it is better known for the scenery and the invigorating air that have made it a vacation and health resort It is the seat of Schreiner Institute, a junior college A state park is near by

Kerry, maritime county (1,815 sq mi, pop 133,893), W Ireland, in Munster The county town is Tralee Kerry is made up of a series of mountainous peninsulas which extend into the Atlantic The shore line is deeply indented by Dingle Bay, Tralee Bay, and the Kenmore river Carrantuohill (3,414 ft), in the mountains known as Macgillycuddy's Reeks, is the highest point in Ireland The streams are short and precipitous and there are many bogs and lakes, the most famous of which are the Lakes of Killarney, a popular tourist attraction Farming (despite the extremely moist climate and generally unsuitable soil), dairying, and fishing are the chief occupations Dolmens, stone forts, round towers, castles, and abbeys are many and are often in an unusually fine state of preservation The county was organized as a shire by the English c 1200, but long resisted English influence Irish is still spoken by many of the inhabitants

Kerry blue terrier see TERRIER

Kershaw (kûr'shô), town (pop 1,264), N S C, NE of Columbia A gold mine is near by

Kerulen (kĕ'rōōlĕn), river, E Mongolian People's Republic, rising c 75 mi E of Ulan Bator and flowing c 650 mi W to the Argun river at the Chinese border

Kesselring, Albert (al'bŭrt kĕ'sulrĭng), 1887–, German field marshal A veteran of the air force of the First World War, Kesselring rapidly rose in rank under the Hitler regime In the Second World War he commanded air operations in Poland (1939), on the Western Front (1940), in central Russia (1941-42), and in Italy (1942–43) In Sept, 1943, Kesselring replaced Rommel as commander in Italy and in March, 1945, he replaced Rundstedt in the West He surrendered (May, 1945) to American troops He was tried (1946–47) and convicted of war crimes, his sentence was commuted to life imprisonment

Kesteven, Parts of, administrative division see LINCOLNSHIRE, England.

Keswick (kĕs'ĭk), urban district (1931 pop 4,635, 1943 estimated pop 4,437), Cumberland, England, in the Lake District, on the Greta and near Derwentwater It is a market and tourist center Greta Hall was the home of Southey for nearly 40 years, his tomb is in the Crosthwaite parish church Coleridge lived here for a time Just outside the town is the ancient Druids' Circle The **Keswick Convention** is an interdenominational religious gathering held annually in Keswick since 1875

Ket (kĕ'tyu), river, 842 mi long, rising in central Siberia, RSFSR, N of Krasnoyarsk and flowing NW and W into the Ob It is connected with the Kas (a tributary of the Yenisei) by the Ob-Yenisei canal system

Ketchikan (kĕ'chĭkăn"), town (1939 pop 4,695, 1949 estimated pop 7,000), on Revillagigedo Island, in the Alexander Archipelago, SE Alaska A supply point for miners in the gold rush of the 1890s, it has become a center of the salmon industry, with a fishing fleet and packing and cold-storage plants Its excellent harbor makes it an important port on the Inside Passage and a distribution center for a large lumbering, fur-farming, and mining area The town has U S coast guard and lighthouse service stations and is a port of entry. It has municipally owned public utilities

Ketchwayo. see CETEWAYO

Kett, Robert, d 1549, English rebel He lead a democratic agrarian revolt in 1549 as a protest against the enclosure of common land for sheep grazing With 16,000 men he blockaded Norwich, but was defeated and executed

Kettering, municipal borough (1931 pop 31,220, 1947 estimated pop. 36,850), Northamptonshire, England, NNW of London It is a center for the manufacture of shoes and other leather products.

kettledrum, in music, percussion instrument consisting of a hemispherical metal vessel over which a membrane is stretched, played with soft-headed wooden drumsticks. Of ancient origin, it appeared

early in Europe, copied from the Saracens These early kettledrums were small and appeared in pairs, often hung about the player's waist The large, noisy kettledrum was used in the baroque period to express joy or triumph and was introduced into the opera orchestra by Lully in the 17th cent Unique among percussion instruments, it can be tuned to definite pitches by adjusting the tension of the head Usually there are two or more in the modern orchestra, the tuning of which varies Berlioz used eight pairs in his *Requiem* Several improved methods of tuning were developed in the 19th cent , common today is a single pedal capable of giving the instrument a full chromatic range of over an octave Kettledrums are also called timpani

Keturah (kĕtū'ru) [Heb ,=incense], mother of six sons of Abraham Gen 25 1, 1 Chron 1 32

Keuka College see PENN YAN, N Y

Keuka Lake (kū'ku), c 18 mi long and ½ to 2 mi wide, W central N Y , one of the FINGER LAKES It drains into Seneca Lake from the north end Penn Yan here and Hammondsport at the south are trade centers for the surrounding resort and grape-growing region

Kewanee (kĭwn'nē), industrial city (pop 16,901), NW Ill , SE of Rock Island, in a coal and farm area, inc 1855 Its manufactures include boilers, pumps, and other metal products, gloves, and cheese

Kewaunee (kĭwô'nē), city (pop 2,533), co seat of Kewaunee co , NE Wis , on Lake Michigan at the mouth of the Kewaunee and E of Green Bay, settled 1795, inc 1883 The North West Company set up a fur-trading post on this site in 1795 Kewaunee has varied manufactures A coast guard station is here

Keweenaw (kē'wĭnô), peninsula, extreme N Mich , projecting northeastward from the W Upper Peninsula into Lake Superior Portage Lake and a connecting ship canal cut across the middle of Keweenaw peninsula, converting its upper portion into an island and creating an important waterway The peninsula is known for its copper, it is also a resort area Its settlements include Houghton, Hancock, Calumet, and Laurium

Keweenawan system see PROTEROZOIC ERA

Kew Gardens (kū), Surrey, England, on the Thames just W of London Royal Botanic Gardens is the official name The gardens were founded by the dowager princess of Wales in 1760 and consisted of about 11 acres In 1840 they were presented to the nation as a royal gift They now cover 288 acres and contain thousands of species of plants, four museums, and laboratories and hothouses Air raids in 1940 damaged the hothouses and destroyed many rare plants Near the main entrance is Kew Palace, a red-brick mansion, once the home of George III and of Queen Charlotte, who died here in 1818

Key, David McKendree (kē), 1824 1900, American politician and jurist, b Greene co , Tenn , grad Hiwassee College, 1850 He practiced law in Chattanooga, Tenn , from 1853 to 1870, except during the Civil War, when he was an officer of a Tennessee regiment in the Confederate army He served in the U S Senate (1875 77) to complete Andrew Johnson's term In 1877 President Rutherford B Hayes chose Key to be his Postmaster General, an action which provoked sharp criticism from Republicans, who felt that the presence of an ex-Confederate in the cabinet violated party principles From 1880 to 1894 Key served as U S judge for the eastern and middle districts of Tennessee, distinguishing himself by his humanity and deep understanding of the mountain people, many of whom were involved in revenue "moonshine" cases

Key, Ellen (kā), 1849–1926, Swedish author and feminist She believed that women are primarily fitted for motherhood and advocated political and educational equality to prepare them for this role, but deplored feminist claims to equality in competitive occupations For this, she was bitterly attacked by men of her contemporaries and as vigorously defended Her ideas have influenced social legislation in many countries Among her best-known works published in English are *Love and Marriage* (1911, reissued with critical and biographical notes by Havelock Ellis, 1931), *The Century of the Child* (1909), *The Woman Movement* (1912), *The Younger Generation* (1914), and *War, Peace, and the Future* (1916) See biographies by John Landquist (1909) and Louise Nystrom-Hamilton (1913)

Key, Francis Scott (kē), 1779–1843, American poet, author of the STAR-SPANGLED BANNER, b present Carroll co , Md From 1833 to 1841 he was U S attorney for the District of Columbia See biography by F S K Smith (1911)

key, in mechanics see LOCK AND KEY

key, in music, term used to indicate the SCALE from which the tonal material of a given composition is derived To say, for example, that a composition is in the key of C major means that it uses as its basic tonal material the tones of the C major scale and that its harmony employs the chords built on the tones of that scale. C is then the keynote, and the C major triad (CEG) the tonic CHORD of the composition In addition to the seven tones of the C major scale, however, the remaining five tones of the chromatic scale may appear as auxiliary tones, and chords may be borrowed from other keys MODULATION to another key may take place, but if there is a return to the original key the whole composition is said to be in the key of C At the beginning of a composition its key is usually indicated by a key signature (see MUSICAL NOTATION) A term usually used synonymously with key is TONALITY Absence of a feeling of key is called ATONALITY Polytonality, the employment of two or more keys simultaneously, has been used by some 20th-century composers In reference to musical instruments the term *key* refers to a lever depressed by the player's fingers or, in the case of the pedal keyboard of the organ, his feet These levers are arranged in order of pitches on the keyboard instruments In wood wind instruments the keys control covers on the holes which shorten the vibrating column of air In brass winds they control the valves which lower the pitch of the instrument by lengthening the tube

Keyes, Erasmus Darwin (kēz, klz), 1810–95, Union general in the Civil War, b Brimfield, Mass , grad West Point, 1832 He fought at the first battle of Bull Run (July, 1861) and in the PENINSULAR CAMPAIGN

Keyes, Sir Roger John Brownlow (kēz), 1872–1945, British admiral In the First World War, Keyes achieved his greatest fame as commander of the Dover patrol that raided Zeebrugge and Ostend in Belgium (April 23, 1918) to cripple the last German submarine campaign in the English Channel He became admiral of the fleet in 1930 and retired in 1935, but was recalled to active duty in the Second World War as director of combined operations (1940–41) and organizer of the COMMANDO forces From 1935 to 1943 he served as a Conservative member of Parliament, and in 1943 he was raised to the peerage as Baron Keyes of Zeebrugge and Dover In 1944 Keyes was observer on a U S warship in the landings at Leyte in the Philippines

Key Islands, Indonesia see KAI ISLANDS

Key Largo, narrow island, c 30 mi long, off S Fla , one of the FLORIDA KEYS

Keynes, John Maynard, 1st **baron of Tilton** (kānz), 1883–1946, English economist and monetary expert, studied at Cambridge He joined the civil service, where he was concerned with problems of Indian currency He was principal British treasury representative at the peace conference at the end of the First World War, resigning in protest against what he considered the inequitable and unworkable economic provisions of the Versailles Treaty His *Economic Consequences of the Peace* (1919) vividly presented his views and won him world fame Keynes criticized the Versailles Treaty from the viewpoint of a classical economist, contrasting the economic nationalism inherent in the treaty unfavorably with the relatively free pre-1914 economy based on gold and low tariffs He foresaw that German economic weakness stemming from the Versailles provisions would involve the whole of Europe in ruin Keynes's departure from classical concepts of free economy dates from 1929, when he endorsed Lloyd George's campaign pledge to promote employment by a program of government spending on public works Keynes came to believe that such a program would increase national purchasing power as well as promote employment in complementary industries For the sake of full employment Keynes also abridged his classical belief in international free trade In the world depression of the 1930s, Keynes's theories influenced governments in several nations in the direction of spending programs that aimed to maintain a high level of national income His ideas were based on the supposition of large-scale economic planning by governments In the years of the Second World War, Keynes was a consultant to the chancellor of the Exchequer and a director of the Bank of England At Bretton Woods (1944) he influenced proposals for the establishment of a world bank to stimulate the development of backward areas Keynes profoundly influenced economic thought and governmental policy in democratic nations Though he favored a planned economy and wide control of the economic life by democratic public-service corporations, he never wavered in his faith in the capitalist system His chief work was *The General Theory of Employment, Interest, and Money* (1936) Keynes's use of data and illustrations from many fields reflected the breadth of his interests See L R Klein, *The Keynesian Revolution* (1947)

Keyport, borough (pop 5,147), E N J , a resort and fishing center with a harbor on Raritan Bay SE of South Amboy; settled before 1700, inc 1908 Cork products are made here

Keyser, Cassius Jackson (kī'zur), 1862 1947, American mathematician, b Rawson, Ohio, grad Univ of Missouri (B S , 1892), Ph D Columbia, 1901 He taught at Columbia Univ from 1897, serving as Adrain professor of mathematics (1904–27) and as head of the department (1910–16) He wrote many works on mathematics, logic, and mathematical philosophy.

Keyser, Nicaise de (nēkāz'), 1813–87, Belgian historical and portrait painter of the romantic school He was director of the Antwerp Academy from 1855 He early won recognition for his large historical paintings, of which *Battle of Worringen* (Brussels) is a well-known example

Keyser, Thomas de, c 1596–1667, Dutch portrait and figure painter of Amsterdam He was the outstanding practitioner in his field in Amsterdam until the arrival of Rembrandt De Keyser's work is distinguished for its clear, warm color, masterly characterization, and strong light and shade Among his best-known paintings are *Burgomasters of Amsterdam* and *Portrait of a Savant* (The Hague), *Merchant and His Clerk* (National Gall , London), *Members of the Civic Guard* and *Theseus and Ariadne* (town hall, Amsterdam), and portrait of Cornelis de Graef

Keyser (kī'zur), city (pop 6,177), co seat of Mineral co , W Va , among the hills in the Eastern Panhandle, on the North Branch of the Potomac and SW of Cumberland, Md , settled 1802 It has railroad shops and a woolen mill The city was an important supply base during the Civil War A state junior college is here

Keyserling, Eduard, Graf von (ā'dōōärt gräf' fŭn kī'surlĭng), 1855-1918, German novelist Belonging to an old and aristocratic family of Courland, he depicts with delicate precision and understanding the life of his own class Several of his novels have been translated—*Beate und Mareile* (1903, Eng tr , *The Curse of the Tarnitis*, 1928), *Dumala* (1907, Eng tr , *Man of God*, 1930), and *Wellen* (1911, Eng tr , *Tides*, 1929).

Keyserling, Hermann, Count (hĕr'mān, kī'surlĭng), 1880–1946, German philosopher and man of letters, b Estonia Of the Russian nobility, he was dispossessed in the Russian Revolution and after that considered Germany his home He traveled extensively, and his thinking was colored by the mysticism of the Orient At Darmstadt he founded a "school of wisdom," which sought to combine the values of Eastern and Western thought He was a determined opponent of fascism Among his most popular writings in English translation are *The Travel Diary of a Philosopher* (1925), *America Set Free* (1929), and *From Suffering to Fulfilment* (1938)

Keystone, rail city (pop 2,942), S W Va , NW of Bluefield, in a coal area, inc 1909

Key West, city (pop 12,927), co seat of Monroe co , on the westernmost of the FLORIDA KEYS, S Fla It is the southernmost city of the United States and a port of entry, resort (with a subtropical climate), fishing center, and military base Early Spanish sailors called the place Cayo Hueso (Bone Island), for some human bones found here In 1815 it was granted to Juan Pablo Salas, who sold it, in 1822, to an American Settlement began, and gradually the city's industries developed It was successively a ship-salvage center, an important cigar-manufacturing point, and a fishing center A railroad, completed in 1912, spanned the keys from the mainland to serve these industries It was abandoned after damage in the hurricane of 1935, and a 123-mile highway, formally opened in 1944 (passable since 1938), replaced it The industries had deteriorated by 1934, when the Federal government took over the bankrupt city A redevelopment program helped it The island has long been a key military point, the government maintains a naval station here and a coast guard base (at Fort Taylor, built 1844-46) Other places of interest include the sponge pier, center of important sponge fisheries, the aquarium, the lighthouse (1846, replacing one of 1825), and two old Civil War forts The city has a picturesque, heterogeneous population, with descendants of Cubans, Spaniards, Negroes, and Englishmen See Federal Writers' Project, *A Guide to Key West* (2d ed , revised, 1950)

Kezia (kēzī'u) [Heb ,=cassia], second daughter of Job after his affliction Job 42 14

Keziz (kē'), unidentified border town, in the vicinity of Jericho Joshua 18 21

Khabarovsk (khŭbŭrôfsk', khōō'rufsk), city (1926 pop 52,045, 1939 pop 199,364, 1946 estimated pop 300,000), capital of Khabarovsk Territory, RSFSR, in E Siberia, on the Amur river near its junction with the Ussuri and on the Trans-Siberian RR An industrial center and a major transportation point, it has an oil refinery (for oil from the Sakhalin fields) and automobile, aircraft, and agricultural-machinery plants The population includes Chinese and Korean elements The city, founded in 1858, was named for the explorer Khabarov, who established a fort here in 1652

Khabarovsk Territory, administrative division (965,400 sq mi , 1946 estimated pop 1,250,000), RSFSR, in the eastern and northeastern extremity of Siberia It is separated from Manchuria in the southwest by the Amur river and extends from the Okhotsk and Bering seas to the Arctic Ocean Khabarovsk is the capital The territory includes the Jewish Autonomous Oblast (see BIROBIDZHAN), the KAMCHATKA peninsula and oblast, and the CHUKCHI PENINSULA and Chukchi National Okrug. It is traversed from southwest to northeast by a succession of mountain chains—the STANOVOI,

Kolyma, and Anadyr ranges—and is very rich in gold iron, coal, petroleum, and nonferrous metals, which are mined with increasing intensity Industry is concentrated in Khabarovsk and Komsomolsk and along the Trans-Siberian RR In the north the chief occupations are reindeer raising, seal hunting, fur trapping, and fishing Magadan is the chief northern port Agriculture is largely confined to the Amur valley For history, see Far Eastern Territory

Khachaturian, Aram Ilich (ärəm' ĭlyĭch' khä"chŭtōōryə.n'), 1904?–, Russian composer, b Tiflis, of Armenian parents, grad Moscow Conservatory, 1934 He first studied the cello and c 1926 began to compose His compositions contain many themes from Russian folk music and are full of energy and drive Those which have been played in the United States include a piano concerto (1935), a violin concerto (1940), the ballets *Gayne* (1942) and *Masquerade* (1944), and his Second Symphony (1942, revised 1944), which won the Stalin Prize in 1946 His name also appears as Khatchatourian

Khafre (khä'frə) or **Chephren** (kĕf'rĭn), fl 2869? B C , king of the IV dynasty of ancient Egypt and builder of the second pyramid at Gizeh An obscure king Dedefre may have come between Khufu and Khafre in the dynasty

Khaifa, Palestine see Haifa

Khair ad-Din see Barbarossa

Khairpur (kĭr'pōōr), princely state (5,989 sq mi , pop 305,787), West Pakistan The capital is Khairpur (pop 17,510) The state is mainly an arid plain with a small irrigated area where grains and cotton are grown

Khakass Autonomous Oblast (khŭkäs'), administrative division (24,000 sq mi , pop 270,665), SW Krasnoyarsk Territory, RSFSR, in S central Siberia, between the upper Yenisei river and the Kuznetsk Ala-Tau Abakan is the capital Drained by the Abakan and Chulym rivers, the region has agriculture, dairy farms, and lumber There are rich coal, gold, barite iron, copper, and zinc mines The autonomous oblast was formed in 1930, its population is half Russian and half Khakass (a Turkic-speaking people)

khaki (kä'kē, kă'kē), closely twilled cloth of linen or cotton dyed "khaki" or dust-color It was first used (1848) for uniforms for the English regiment of Sir Harry Burnett Lumsden in India and later by other armies It finally became popular for hunting and outing wear, as in the uniforms of the Boy Scouts, the Camp Fire Girls and similar groups, and for heavy working clothes

Khalid (khä'lĭd), d 642, Arab warrior He assisted the Meccans in attacking Mohammed and the inhabitants of Medina (625) after the battle of Badr Khalid and the Meccans were victorious in the battle of Ohud, but did not follow up their victory Not long afterwards Khalid submitted to Islam and became the chief Moslem general in the attack on Syria

Khanaqin or **Khanikin** (both khənŭkēn'), town (pop c 18,000), E Iraq, near the Iranian line There is a refinery, and oil fields are near by

Khangai (khän'gī'), mountain range, NW Mongolian People's Republic Its axis lies east to west Many rivers, notably the Orkhon and the Selenga, rise in this range

Khania, Crete see Canea

Khanikin see Khanaqin

Khan Tengri see Tien Shan

Khanty-Mansi National Okrug (khŭntē'-mănsē'), administrative division (215,500 sq mi , 1946 estimated pop 110,000), RSFSR, in NW Siberia, drained by the lower Irtysh and Ob rivers Fur trapping (sable and beaver) fishing, lumbering, and cattle and reindeer raising are the chief occupations There are c 80,000 Russians, the rest of the population consists of Mansi (Voguls) in the west and of Khanty (Ostyaks) in the east Both native groups belong to the Finno-Ugric linguistic family The region was conquered by Russia in the 16th cent. The okrug, formed in 1930, was known until 1940 as the Ostyak-Vogul National Okrug Its capital is **Khanty-Mansisk** (khŭntē' mănsēsk') (1939 pop over 2,000), at the confluence of the Ob and Irtysh

Kharbin, China see Harbin

Kharga (khär'gə), valley, S central Egypt It is an oasis supporting c 8,000 persons The chief settlement, El Kharga, is the terminus of a railroad connecting with the Nile valley line The oasis was prosperous in ancient times, and there are ruins of temples of Darius and of the Romans

Kharkov (kär'kŏf, Rus khär'kŭf), city (1926 pop 417,342, 1939 pop 833,432), capital of Kharkov oblast, SE Ukraine At the junction of six railroad lines and of several highways, it is a major industrial center, producing tractors and other agricultural machinery, turbogenerators, locomotives, machine tools, and ball bearings, and it is the seat of a university (founded 1804) and of many technical and scientific institutes and schools. Founded by Cossacks in the early 17th cent , it became a trade center and grew rapidly after the industrialization of the S Ukraine in the late 19th cent **Kharkov** became (1920) the capital of the Ukraine, but was superseded (1934) by Kiev. Under the Soviet regime Kharkov grew to be one of the largest cities of the USSR and the engineering center of the Ukraine It was thoroughly rebuilt and expanded along modern lines. Its many fine parks, wide avenues, apartment houses, and public buildings made it a showpiece of Soviet accomplishment In the Second World War the city fell (Oct , 1941) to the Germans after suffering severe damage from aerial bombardment and artillery fire It was briefly recovered (Feb.–March, 1943) by the Russians and was finally retaken from the Germans in Aug , 1943 In the great battles that raged around and in the city, Kharkov was more than half destroyed

Kharput, Turkey see Harput

Khartoum (kärtōōm'), city (pop 61,800), capital of Anglo-Egyptian Sudan, on the Blue Nile just above its junction with the White Nile Founded in 1822, it was destroyed (1885) in the war between Great Britain and the Mahdists Gen Charles Gordon, the British defender long withstood attack but was finally killed, the siege was one of the most notable events in British imperial history Khartoum was recovered by Lord Kitchener in 1898 It is on a railroad to Cairo and to Port Sudan It is mainly a commercial and educational center Fine bridges connect it with the suburbs (notably Khartoum North), where there are railroad workshops and much trade in local products and handicrafts Khartum is a variant spelling

Khatanga (kutäng'gu, Rus khŭtän'gŭ), river, 340 mi long, RSFSR, in NE Siberia, formed by the union of the Kotui (500 mi long) and the Movero (435 mi long) It flows N past Khatanga village and NE into the Khatanga Gulf of the Arctic Ocean, forming the southeastern limit of the Taimyr peninsula The river abounds in fish

Khatchatourian, Aram Ilich see Khachaturian

Khatti see Hittites

Khayyam, Omar, see Omar Khayyam

Khazars (kazarz', khä'zärz), ancient Turkic people, partly nomadic, partly settled, who appeared in Transcaucasia in the 2d cent A D and subsequently settled in S Russia between the Volga and the Don Subjugated by the Huns in the 5th cent , they emerged again in the 7th cent and rose to great power They conquered the Crimea, levied tribute from the eastern Slavs, including Kiev, and warred with the Arabs, the Persians, and the Armenians With the Byzantine Empire they entertained generally friendly relations The supreme ruler (khakan or khagan) of the Khazars and the Khazar nobility embraced Judaism c 740 However Cyril and Methodius subsequently made some Christian converts among them The khakan's religious choice was intended as a compromise between Christianity and Islam and as a safeguard of national independence Religious tolerance was complete in the Khazar empire, which reached a relatively high degree of civilization Itil, its capital in the Volga delta, was a great commercial center The Khazar empire fell when Sviatoslav, duke of Kiev defeated its army in 969 The Khazars (also spelled Chasars) are believed by some to have been the ancestors of many of the Russian Jews

Khemnitser, Ivan Ivanovich (ēvən' ēvə'nuvĭch khĕmnyē'tsyĭr), 1745–84, Russian fabulist, of German origin Several of his fables, translated by John Bowring in *Specimens of the Russian Poets* (1820), were widely used in early American readers

Kherson (khĕrsŏn'), city (pop. 97,186), capital of Kherson oblast, SW Ukraine, on the Dnieper, 15 mi above its mouth on the Black Sea The city was founded in 1778 by Potemkin as a shipbuilding center and a grain and wool port It declined after the rise of Odessa and Nikolaev, but the development, after 1932, of navigation on the Dnieper revived its importance and stimulated its growth The population was 25 per cent Jewish until the Second World War, when the city was held (1941–44) by the Germans The cathedral contains Potemkin's tomb

Khibinogorsk, RSFSR see Kirovsk

Khingan, Great (khĭn'gän', shĭng'an'), Mandarin *Ta-hsing-an*, mountain range, Hainan prov , NE China, extending southwest and northeast It is the eastern edge of the Mongolian plateau From its average elevation of c 4,000 ft the range rises in peaks, to c 8,000 ft The **Lesser Khingan,** Mandarin *Hsiao-hsing-an*, a branch of the Great Khingan, extends from northwest to southeast and is a continuation of the Bureya range of Siberia It is mainly in Heilungkiang prov

Khios: see Chios

Khiva (kē'vu, Rus khē'vŭ, khēvä'), city (1932 estimated pop 23,700), Uzbek SSR, in the Khiva oasis and near the Kara-Kum desert It has cotton mills, metalworks, and carpet manufactures It was after the 7th cent the capital of the Khorezm kingdom In the late 16th cent it became the capital of the khanate of Khiva (see separate article) The ancient part of Khiva has preserved the mysterious splendor of its medieval past It contains the khan's palace and gardens, mosques, minarets, Moslem schools, and innumerable bazaars

Khiva, khanate of, former state of central Asia, S of the Aral Sea and of the Amu Darya river It rose in the 16th cent as a Moslem Uzbek state and maintained its independence until 1873, when it was conquered by Russian troops. The khans continued to rule the country as a Russian protectorate until the Russian Revolution Forming (1920–24) the Khorezm Soviet People's Republic, the territory was divided (1924) between the Uzbek SSR and the Turkmen SSR For earlier history, see Khorezm.

Khlesl, Melchior: see Klesl, Melchior.

Khmelnitsky, Bohdan: see Chmielnicki, Bohdan

Khmer Empire (kumär') In the 6th cent. the Cambodians or Khmers established in Indo-China a kingdom roughly corresponding to modern Cambodia and Laos Divided during the 8th cent., it was reunited in the 9th, the capital was established in the area of Angkor c 900 At its greatest extent, the Khmer Empire extended over the valleys of the lower Menam (in present-day Thailand) and the lower Mekong (present-day Cambodia and Cochin China), as well as N into Laos The Khmers fought repeated wars against the Annamese and Chams, in the early 12th cent they invaded Champa, but in 1177 Angkor was sacked by the Chams After the founding of Ayuthia (c 1350), Cambodia was subjected to repeated invasions from Thailand and the Khmer power declined, in 1434 the capital was transferred to Pnom Penh The Khmer civilization was largely formed by Hindu influences Buddhism flourished side by side with the worship of Siva and other Hindu gods (with which came the cult of the linga), while both religions coalesced with the cult of the deified king The great achievement of the Khmers was in architecture and sculpture The earliest known Khmer monuments, isolated towers of brick, probably date from the 7th cent Small temples set on stepped pyramids next appeared The development of covered galleries led gradually to a great elaboration of plan Brick was largely abandoned in favor of stone The combination of these various elements marked the culmination of Khmer architecture in Angkor Wat and the Bayon at Angkor Thom, generally attributed to the 12th cent Khmer architecture was limited by deficiencies in building technique, the Khmers never, for example, discovered the true arch In sculpture they showed a steady development from relative naturalism to a more conventionalized technique Bas-reliefs, lacking in the earliest monuments, came to overshadow in importance statues in the round, in the later stages of Khmer art hardly a wall was left bare of bas-reliefs, conveying in their richness of detail and vitality a vivid picture of Khmer life

Khodzhent, Tadzhik SSR see Leninabad

Khoi (khoi), town (pop 35,470), NW Iran, NW of Tabriz It is on an important trade route and near the Turkish and Russian borders

Khokand, Uzbek SSR see Kokand

Kholmogori (khōl"mugō'rē), village, N European RSFSR, at the mouth of the Northern Dvina and SE of Archangel It was the chief port of the region until the rise of Archangel in the 17th cent Lomonosov was born near by

Khoper (khŭpyôr'), river, 583 mi long, S European RSFSR It rises SW of Penza and flows generally southwesterly through steppe country, past Borisoglebsk, into the Don It is not navigable

Khorasan, Iran see Khurasan

Khorezm (khŭrĕ'zŭm) or **Khwarazm** (khwärä'zum), medieval empire, central Asia, centered around its capital, Urgench, and contained by the Caspian, the Aral Sea, the Amu Darya river, and Persia Conquered (7th cent) by the Arabs and converted to Islam, it rose to great power in the 12th cent under a dynasty of Seljuk Turks The shahs of Khorezm conquered (12th–13th cent) Bukhara, Samarkand, and most of Persia and even threatened Baghdad itself The empire was conquered (1218–24) by Jenghiz Khan Khorezm is also the name of an oblast in the Uzbek SSR which includes Khiva and has Urgench as its capital

Khorog (khŭrŏk'), city (pop over 2,000), capital of Mountain-Badakhshan Autonomous Oblast, Tadzhik SSR, in the Pamir

Khorramshahr (khŏrəm"shur'), city (1947 estimated pop 40,000), SW Iran, on the Karun at its influx into the Shatt el Arab It is an active port and was of importance in the Second World War Many dates are exported

Khorsabad (khōrsäbad'), village, NE Iraq, near the Tigris river and 12 mi NE of Mosul It is built on the site of Dur Sharrukin, an Assyrian city (founded 8th cent. B C by Sargon), which covered one square mile Its mounds were excavated by P E Botta in 1842 and in 1851, and statues of Sargon and of huge winged bulls which guarded the gates were taken to the Louvre In 1932 there were discovered hundreds of cuneiform tablets in the Elamite language and a list of kings ruling from c 2200 B C to 730 B C

Khortitsa, Ukraine see Zaporozhe

Khosru I (Khosru Noshirwan) (khŏsrō', nōshĭrwän'), d 579, king of Persia (531–79), greatest of the Sassanid or Sassanian monarchs. He is also known as Chosroes I He succeeded his father, Kobad I or Qobad I, but before becoming king Khosru was responsible for a great massacre (c.528) of the communistic Mazdakites. He extended

Persian rule E to the Indus with the capture (560) of Bactria, W across Arabia by establishing (570) at least nominal rule over Yemen, and north and northwest by taking part of Armenia and Caucasia from the Byzantine Empire He fought against Belisarius and the other generals of Justinian and against Justin II. Khosru is revered by the Persians as a just though despotic ruler who encouraged learning, stimulated commerce, rebuilt cities, and set up a just system of taxation

Khosru II (Khosru Parviz) (pärvēz'), d 628, king of Persia of the Sassanid or Sassanian dynasty, grandson of Khosru I He is also called Chosroes II He succeeded his father Hormizd or Hormoz in 590, but he was faced with the opposition of the usurper Bahram, was defeated, and fled to the Byzantine Empire Emperor Maurice aided him in overthrowing Bahram. When Maurice was murdered by Phocas, Khosru declared a war of revenge and conquered much Byzantine territory until he was finally defeated by Heraclius Khosru lived a life of luxury unequaled by any other Sassanid king He was murdered by his son and successor, Shiroe or Shiruya

Khotan (kō'tän'), oasis region, SW Sinkiang prov, China It was an early center for the spread of Buddhism from India into China Its cities became large and wealthy on the proceeds of the trade which traveled the route between China and the West The conquest of Khotan by Jenghiz Khan brought its prosperity to an end After many political changes the region became permanently part of China in the late 18th cent See M A Stein, *Sand-buried Ruins of Khotan* (1903)

Khotin (khôtyĭn'), city (1930 pop 15,334, 1941 pop 7,579), W Ukraine, in N Bessarabia, on the Dniester river and NE of Chernovtsy It is an agricultural market center Khotin was a leading town of Moldavia in the 17th and 18th cent but suffered often in the wars among Poles, Moldavians, Russians, Turks, and Tatars, owing to its central location From 1812 it shared the history of BESSARABIA There are remains of an imposing fortress built (13th cent) by the Genoese and restored (18th cent) by the Turks The name also appears as Hotin and Chotin

Khufu (khōō'fōō) or **Cheops** (kē'ŏps), fl 2900? B C, king of ancient Egypt for 23 years He was the founder of the IV dynasty and was famous as the builder of the greatest PYRAMID at Gizeh

Khurasan (khōōräsän') or **Khorasan** (khōräsän'), region (124,981 sq mi, pop 2,036,549), NE Iran, corresponding to the Ninth Prov Once Khurasan extended to Merv in Russia and Herat and Balkh in Afghanistan The chief city is Meshed It produces cotton, cereals and fruit, tobacco, carpets, turquoises, and the world's finest opium The Ghuzz (1153, 1157) and Mongol (1220-22) devastations of Khurasan were followed by its invasion by Tamerlane

Khuzistan (khōōzĕstän'), region of SW Iran, now comprising the Sixth Prov, with its capital at Ahwaz The ancient province of Susiana, it is partly mountainous and is drained by the Karun river The climate is hot, and many dates are exported The region has large oil deposits Dizful and Shushtar are in Khuzistan The name is also spelled Khuzestan It was in recent times also called Arabistan

Khwarazm· see KHOREZM

Khyber Pass (kī'bur), on the border of West Pakistan and Afghanistan It is part of the main trade route between Kabul and Peshawar, and a road and a railroad run through it The pass, which never exceeds 3,500 ft in height, was one of the principal approaches for armies invading India from Afghanistan Alexander the Great, Baber, and Mahmud of Ghazni were among those who sent some of their forces along this route It was of great importance in the Afghan Wars fought by the British in the 19th cent Afridi tribesmen, who asserted control, were paid by the British to guard the Khyber Pass, but the British were obliged to patrol it constantly and had much trouble with the Afridis

Kiakhta, RSFSR see KYAKHTA

Kialing (kyä'lĭng', jĕä'-), Mandarin *Chia-ling*, river, c 450 mi long, China, rising in S Kansu prov and flowing generally S through Szechwan prov to join the Yangtze river at Chungking It is navigable from the Szechwan border to Chungking

Kiamusze (kyä'mōō'sō, jĕä'-), Mandarin *Chiamu-szu*, city and county (pop 168,000), Hokiang prov, NE China The city is the provincial capital A port on the Sungari river, it is connected by rail with Harbin

Kiangsi (kyäng'sē', jĕän'sē'), Mandarin *Chiang-hsi*, province (63,806 sq mi., pop 12,643,007), SE China Nanchang is the capital The largely hilly and mountainous surface is drained by many rivers, the longest is the navigable Kan, which flows NE to Poyang Lake—reputedly the scene of Confucius' teachings With a mild climate and adequate rainfall, agriculture flourishes, rice, wheat, sugar cane, tea, and cotton are leading crops Timber is cut in the uplands and floated down the rivers Coal and tungsten are plentiful The white clay found near Poyang Lake and considered the finest in China is manufactured into pottery in Fowliang The rivers are the chief transportation routes of Kiangsi There are two railroads, one which connects with the Peiping to Canton line and one to Shanghai

Kiangsu (kyäng'sōō', jĕäng'sōō'), Mandarin *Chiangsu*, province (41,820 sq. mi, pop 35,670,038), on the central coast of China, on the Yellow Sea The capital, Nanking, served also as the regular capital of the Nationalist government of China Kiangsu largely consists of the alluvial plain of the Yangtze river and includes much of its delta The elevation rarely rises above sea level The fairly warm climate, the moderate rainfall, and the fertile soil make it a major food-growing area, often three crops are harvested annually In the north kaoliang, wheat, beans, and peanuts are grown, and in the south rice, cotton, sugar cane, tea, and mulberry trees (for silk culture) Fish are abundant in the many lakes (of which Lake Tai is the most famous), in the slow-flowing streams, and off the Yangtze delta Kiangsu is crossed by the Yangtze, which can be navigated by large steamers, and by a portion of the Grand Canal It contains many smaller canals, good roads, and a fairly extensive railroad system Communications are among the best in China This is the most densely populated province and perhaps the most prosperous, being deficient only in timber and minerals Almost half of China's foreign trade clears through the port of Shanghai Because foreign raw materials are available for processing and there are export facilities, much of Chinese industry (particularly cotton spinning and weaving) is concentrated in Kiangsu, especially in Shanghai, Wusih, and Soochow. The capture of Kiangsu in 1937 was an important phase of Japan's effort to conquer all China (see CHINO-JAPANESE WAR, SECOND) The province fell to the Chinese Communists in 1949

Kiangtu, China see YANGCHOW

Kiaochow (kyou'chou', jŏu'jō'), Mandarin *Chiao-chou*, former German territory, area c 200 sq mi, south coast of Shantung prov, China Its administrative center was the city of Tsingtao Kiaochow was leased by Germany in 1898, seized by Japan in 1914, and returned to China in 1922

Kibo see KILIMANJARO

Kibroth-hattavah (kĭb'rŏth-hătä'vu) [Heb,=graves of lust], unidentified desert camp Here the Israelites were punished with a plague Num 11 34, 33 16, Deut 9 22

Kibzaim (kĭb'zā'ĭm, kĭbzā'ĭm) see JOKMEAM

Kickapoo Indians (kĭ'kupōō), North American tribe of the Algonquian linguistic stock, who in the late 17th cent occupied SW Wisconsin Their culture was essentially that of the Eastern Woodlands area, but they also hunted buffalo, one of the few traits that the conservative Kickapoo adopted from their neighbors in the Plains area After the allied Kickapoo, Ojibwa, Ottawa, Potawatomi, and Sac and Fox tribes destroyed (c 1769) the ILLINOIS INDIANS, they partitioned the Illinois territory The Kickapoo moved S to central Illinois, where they established a camp They then numbered some 3,000 Later, the tribe split in two, the Vermilion band settled on the Vermilion river, a tributary of the Wabash and the Prairie band on the Sangamon river The Kickapoo, a power in the region, opposed the Americans in the American Revolution and in the War of 1812, when they aided Tecumseh By the Treaty of Edwardsville (1819) the Kickapoo ceded all their lands in Illinois to the United States Later a territory was set aside for them in Missouri, but since that region was occupied by the hostile Osage Indians, the Kickapoo were loath to move there There arose a prophet, Kanakuk, who exhorted the Kickapoo to remain where they were, promising that if they avoided liquor and infractions of the white man's law, they would inherit a land of plenty His pleas were unavailing, and the Kickapoo, after aiding the Sac and Fox in the Black Hawk War, were forced to leave Illinois The Kickapoo moved to Missouri and thence to Kansas A large band, dissatisfied with conditions on the reservation, went (c 1852) to Mexico, where they became known as the Mexican Kickapoo After the Civil War, the Mexican band proved so constant an annoyance to border settlements that the United States made efforts to induce them to return The negotiations were successful, and a number returned to settle (1873-74) on a reservation in Oklahoma The remaining Mexican Kickapoo are settled about Santa Rosa in Coahuila, Mexico, and number some 400 The Kickapoo living on reservations in Kansas and Oklahoma number some 650. See William Jones, *Kickapoo Tales* (1915)

Kicking Horse, river of SE British Columbia, rising on the west slopes of the main Rocky Mt range and flowing SW and NW to Golden, where it enters the Columbia Its course is rapid, with several high falls **Kicking Horse Pass,** 5,339 ft high, NW of Lake Louise, in Banff National Park, connects the Bow river with the Kicking Horse and is one of the principal rail and highway passes over the Continental Divide.

Kid, Thomas. see KYD, THOMAS.

Kidd, Benjamin, 1858–1916, English social philosopher. After extensive travel for economic study, **Kidd lived a scholar's life** His noted work, *Social Evolution* (1894), sets forth his doctrine of the constant strife between individual and public interest He points out that only through a widening application of the family principle can the group maintain itself and that progress depends on religion His works also include *Control of the Tropics* (1898) and *The Principles of Western Civilization* (1902)

Kidd, William, c 1645–1701, British privateer As Captain Kidd, pirate, he has become a semilegendary figure Born in Scotland, he early went to sea and later settled in New York, where he married and owned property. **He was rewarded** (1691) for his services against French privateers In 1696 he was commissioned by the earl of Bellomont, William III's governor of New York, as a privateer to defend English ships from pirates in the Red Sea and Indian Ocean, and in 1697 he went to Madagascar Failure to take prizes, disease, and mutiny apparently caused him to turn pirate Returning (1698) to the West Indies with his richest prize, the Armenian *Quedagh Merchant*, he learned of piracy charges against him and sailed to New York to clear himself by claiming that the vessels he had attacked were lawful prizes Arrested in 1699, he was taken to London and tried on five charges of piracy and one of murder The trial seems to have been unfair and was complicated by the fact that four Whig peers who had backed him were politically embarrassed by his career He was convicted of murder and piracy and was hanged The barbaric cruelty and buried treasure of Captain Kidd are unsubstantiated bits of the legends about him. The Kidd legend has been referred to over and over in literature, for instance in Poe's *Gold Bug* and Stevenson's *Treasure Island* See Don C Seitz, ed., *The Tryal of Captain William Kidd* (1935), W H Bonner, *Pirate Laureate the Life and Legends of Captain Kidd* (1947).

Kidder, Alfred Vincent, 1885–, American archaeologist, b Marquette, Mich, grad Harvard (B A, 1908, Ph D, 1914) He engaged in exploration and excavation work in Colorado, New Mexico, and Utah (1907–8) and traveled in Egypt and Greece (1909) Teaching at Harvard, research work, and a curatorship occupied him until 1915, when he began to direct excavations at Pecos, N Mex, for Phillips Academy, Andover, Mass Services in the First World War interrupted this work, which continued until 1929 Kidder became associate, in charge of archaeological investigations, of the Carnegie Institution (1927–29) and chairman of the division of historical research (1930) and held simultaneously with these positions important posts in other organizations engaged in archaeological and anthropological work Among his numerous writings are *An Introduction to the Study of Southwestern Archaeology* (1924), *The Pottery of Pecos* (2 vols, 1931–36), *The Artifacts of Pecos* (1932), *Archaeology of Northwestern Venezuela* (1944), and, with others, *Excavations at Kaminaljuyu, Guatemala* (1946)

Kidderminster, municipal borough (1931 pop 28,917, 1947 estimated pop 37,480), Worcestershire, England, N of Worcester The making of Kidderminster carpets was begun in 1735, other industries include worsted spinning and dyeing and the making of metalware

Kiddush (kĭ'dŭsh) [Heb,=sanctification], ancient Jewish religious ceremony indicating the beginning (and sometimes the end) of the Sabbath or any other Hebrew festival Kiddush is "made" at mealtime and consists of a prayer of benediction over the day, the wine, and the bread

kidnaping, in law, the unlawful and willful taking away of a person by force, threat, or deceit with intent to cause him to be detained against his will The term more especially means the unlawful leading away of a child under a given age to keep him or her from his proper legal guardianship Kidnaping is usually done for ransom but may be for political or other purposes A parent whose legal rights to custody of a child have been taken away can be guilty of the crime if he takes his own child Consent of the kidnaped person is a defense, unless he was incompetent at the time The crime differs from a seduction, in that the intent of sexual intercourse is not required and from false imprisonment, in which there is no attempt to abduct Under English common law it was only a MISDEMEANOR, but in most states of the United States it is punishable by death if there are no extenuating circumstances The kidnaping and murder of the son of Charles A Lindbergh in 1932 stirred public sentiment and led to a Federal statute prescribing very severe penalties for persons transporting the victims of kidnaping across state or national boundaries An earlier crime that awakened much interest in America was the kidnaping in 1874 of Charley Ross, whose ultimate fate remained a mystery The practice of kidnaping, in the wider and not strictly legal sense, has been known since the beginnings of man's history It was common as a method for procuring slaves, and it has been prominent as a more or less systematic means for groups of brigands and revolutionary bands to obtain money through ransom Notable examples may be seen in the pirates of the BARBARY STATES,

the Italian secret societies, the Camorra and the Mafia, in the 19th cent., groups in the Balkans and in some Latin American countries, and followers of the war lords in China, in the 19th and 20th cent Because a price was paid for recruiting sailors, shanghaiing [from Shanghai, principal city in the China trade] was common from the late 18th cent to the 20th cent in many ports of the world

kidneys, two reddish, somewhat bean-shaped organs about 4 in long, situated near the vertebral column just below the last rib, behind the peritoneum The left lies slightly higher than the right They are present in all mammals, and at least one must function in order to maintain life URINE is secreted in the outer zone of the kidney and collects in tubules which make up the inner zone These tubules join and finally the urine passes down the ureter to the bladder The kidney is subject to inflammation from toxins, chemical and bacterial (BRIGHT'S DISEASE) and from various bacteria actually present in kidney tissue, to the formation of stones (CALCULUS), to changeable position (floating), to changes in the walls of its arteries, and to tumor formation

Kidron (kĭd'-) [Heb ,=black] or **Cedron** (sē'-), deep valley or ravine, E of Jerusalem between the city and the Mount of Olives 2 Sam 15 23, 1 Kings 2 37, 2 Kings 23 4,6,12, John 18 1 See also JEHOSHAPHAT

Kieft, Willem (kēft), 1597–1647, Dutch director general of New Netherland Arriving in New Amsterdam in 1638 to succeed Wouter VAN TWILLER, Kieft immediately assumed absolute control His arbitrary rule and tactless handling of the Indians resulted in almost continuous Indian warfare during his administration He was replaced by Peter STUYVESANT (1647) and was lost at sea on his way to Holland

Kiel (kēl), city (1939 pop 273,735, 1946 pop 214,-190), capital of Schleswig-Holstein, N Germany, an important port on the Baltic Sea at the head of the Kiel Canal Until the end of the Second World War it was the chief naval station of Germany Chartered in 1242, Kiel joined the Hanseatic League and became the residence of the dukes of Holstein With Holstein, it passed to Prussia in 1866 The sailors' mutiny, which began at Kiel on Nov 3, 1918, at the close of the First World War, touched off the German socialist revolution In the Second World War, Kiel suffered very heavily from air attacks, and the naval installations were dismantled after 1945 The Univ of Kiel was founded in 1665

Kiel, farm trade city (pop 1,898), E Wis , on the Sheboygan and NE of Fond du Lac, inc 1920 St Nazianz, near by, was founded in 1854 as a German communistic religious colony

Kiel Canal, artificial waterway, c 60 mi long, Schleswig-Holstein, N Germany, connecting the North Sea with the Baltic Sea Opened in 1895, it extends from Kiel on the Baltic to Brunsbuttel at the mouth of the Elbe, opposite Cuxhaven Because of its great military and commercial importance the canal was internationalized by the Treaty of Versailles (1919) Hitler repudiated its international status in 1936 The canal is also known as Kaiser Wilhelm Canal, for William II of Germany, and as the Baltic–North Sea Canal

Kielce (kyĕl'tsĕ), city (pop 49,960), S Poland. It dates from at least the 12th cent The city passed to Austria in 1795 and to the Russian Empire in 1815 It became a Polish provincial capital in 1919 A trade center, Kielce also has metal- and woodworking industries The province of Kielce (c 7,000 sq mi , pop 1,717,303) is mainly an arable lowland There are iron, copper, zinc, manganese, coal, peat, and other deposits The main cities are Kielce, Czestochowa, and Radom

Kielland, Alexander Lange (dŭksan'dŭr lang'u khĕ'län), 1849–1906, Norwegian novelist His first book, *Tales of Two Countries* (1879, Eng tr , 1891, also tr as *Norse Tales and Sketches*, 1897), immediately popular, placed him among the realists In the next decade he produced his most important novels, all dealing with phases of social reform and written in a witty style Translated volumes include *Else* (1881, Eng tr 1885), *Skipper Worse* (1882, Eng tr , 1885), one of his best works, and *Garman and Worse* (1885, Eng tr , 1885)

Kiepert, Heinrich (hin'rĭkh kē'purt), 1818–99, German geographer and cartographer He was director (1845–52) of the Weimar Geographical Institute and became professor of geography in the Univ of Berlin in 1859 He was an authority on historical geography, especially that of ancient Asia Minor His works include *Topographisch-historischer Atlas von Hellas* (1841–44), *Historisch-geographischer Atlas der alten Welt* (1848), *Neuer Handatlas der Erde* (1857–61), and *Atlas antiquus* (1854), issued in six languages

Kierkegaard, Søren, Dan *Søren Kierkegaard* (sō'-run kyĕr'kugôr), 1813–55, Danish philosopher, writer on religious subjects In his *Either/Or* (1843, Eng tr , 1944) he investigates the problem of knowledge, coming to the position that knowledge follows experience, that subjectivity constitutes truth, and that religion is a personal affair This position brought him into conflict with the state religion. In *Stages on Life's Way* (1845, Eng. tr., 1940) he described how the antitheses of life increase tension and energy By stages of increasing tension, he said, man progresses from the pursuit of momentary pleasure to the constant pain of the religious person who feels steadily the antithesis between temporal existence and eternal truth He is led to the conclusion that the suffering of God is greater than that endured by any man Kierkegaard did important work in aesthetics and exerted profound influence on Danish literature. Many of his ideas were adopted by the existentialists Translations of his works include *Philosophical Fragments* (1936), *Concluding Unscientific Postscript* (1941), *The Gospel of Suffering and The Lilies of the Field* (1947), and *A Kierkegaard Anthology* (ed by Robert Bretall, 1946) See his journals (ed by Alexander Dru, 1938), biographies by E L Allen (1935) and Walter Lowrie (1938)

kieselguhr. see DIATOM

Kiev (kēĕf', kē'ĕv, kē'ĕf, Rus kē'uf), city (1926 pop 513,637, 1939 pop 846,293), capital of Kiev oblast and of the Ukraine, on the Dnieper It is the third largest city of the USSR It is the historic "mother of Russian cities," a leading cultural, industrial, and commercial center, and the see of a metropolitan of the Russian Orthodox Church Kiev has a university (transferred here from Vilna in 1833) and numerous scientific, technical, medical, and pedagogical institutes, theaters, museums, and libraries Its chief industries produce machinery, rolling stock, textiles, and clothing A Slavic settlement on the great trade route between Scandinavia and Constantinople, Kiev was tributary to the Khazars when the VARANGIANS under Oleg, son of Rurik, established themselves here in 882 It became the capital of medieval Russia under Oleg's successors and was one of the greatest cultural and commercial centers of Europe (For the history of the Kievan state, see RUSSIA) Kiev began to decline in the late 12th cent and was stormed and devastated by the Mongols in 1240 From that date until the 14th cent Kiev paid tribute to the Golden Horde It then passed under Lithuania, which in 1569 was fully united with Poland From 1654, when the Cossacks under Chmielnicki voted the union of the Ukraine with Russia, the city shared the history of the UKRAINE Its trade and industry developed rapidly in the 19th cent In 1917 Kiev became the capital of the newly proclaimed Ukrainian Soviet Republic, but in the Russian civil war (1917–20) it was occupied in succession by Ukrainian nationalist, German, "White" Russian, Polish, and Soviet troops. From 1920 to 1934 the capital of the Ukraine was transferred to Kharkov German troops again occupied the city in the Second World War in 1941 On its liberation (1943), only 200,000 of its population remained The Germans massacred more than 50,000 Jews and wrecked large sections of the city before abandoning it Reconstruction work began immediately and progressed swiftly, Kiev soon was reported to have again reached its pre-war population The many cathedrals churches, and monasteries of Kiev point to its past role as the cradle of Christianity in Russia and to its close link with Byzantium The Kievan period of Russian art (11th–13th cent) has profoundly influenced all subsequent art and architecture and is directly rooted in Byzantine tradition The 11th-century Cathedral of St Sophia, originally modeled on Hagia Sophia in Constantinople, remains almost undamaged, it has splendid mosaics, frescoes, and icons Among the structures that suffered damage or destruction in the Second World War are the Uspenski Cathedral (11th cent) and the celebrated Lavra, a monastery founded in the 11th cent , which formed a separate walled compound The underground caves of the Lavra, its most ancient part, contained numerous holy relics and were a major pilgrims' shrine until the Russian Revolution

Kigoma (kĭgō'mä'), town (pop c 14,000), W Tanganyika, on the eastern shore of Lake Tanganyika It was an important settlement of Arab slave traders until the late 19th cent It became the western terminus of the railroad to Dar-es-Salaam in 1914 and was made a free port for Belgian vessels after the First World War

Kilauea (kē'läwā'u), crater, 4,000 ft high, on Hawaii, T H , 30 mi S of Hilo, on the southeastern slope of MAUNA LOA in Hawaii National Park One of the largest active craters in the world, Kilauea has a circumference of c 8 mi and is surrounded by a wall of volcanic rock 200 to 500 ft high In its floor is Halemaumau, a fiery pit The usual level of the lake of molten lava is c 740 ft below the rim of the pit.

Kilbourn, Wis see WISCONSIN DELLS

Kildare (kĭldâr'), inland county (654 sq mi ; pop 64,849), S Ireland, in Leinster The county town is Kildare The region, which lies SW of Dublin, is a flat agricultural plain, having the Bog of Allen in the northwest and the fertile plain of CURRAGH in center The principal rivers are the Liffey, the Greese, the Blackwater, and the Barrow. Oats, barley, turnips, potatoes, sheep, and cattle are the chief products of the county, and there is some distilling and manufacture of paper. Naas was the capital of the ancient kingdom of Leinster. There are many early Christian and pre-Christian remains in Kildare The history of the region is associated with St Bridget and the legendary Finn mac Cumhail Kildare was organized as a county in 1296

Kildare, town (pop 2,106), Co Kildare, Ireland An agricultural market, it originated as a religious foundation of St Bridget in the 5th cent The monastic buildings suffered at the hands of the Danes and in the Elizabethan wars Adjoining the ancient cathedral is a round tower, and there are remains of a 13th-century castle and a Carmelite monastery

Kilgore, city (pop 6,708), E Texas, W of Shreveport, La , and near the Sabine, settled 1872, inc. 1931 Transformed from a sleepy pine-woods town to a roaring boom town after the East Texas oil field was discovered in 1930, Kilgore startles the visitor with the many oil wells crowding the very stores and houses

Kilham, Alexander (kĭl'ŭm), 1762–98, English Methodist minister, founder of the Methodist New Connection He took a leading part in Methodist affairs after the death of John Wesley, advocating separation from the Church of England He supported the right of preachers to administer the Lord's Supper and sought to have powers of church government distributed between clerical and lay members For a series of pamphlets which he wrote he was brought to trial at the conference of 1796 and expelled from the connection The next year he and three other preachers formed the Methodist New Connection In 1907 it became a part of the UNITED METHODIST CHURCH

Kilimanjaro (kĭl"ĭmunja'rō), mountain, NE Tanganyika, of volcanic origin It rises in two snow-capped cones, connected by a broad saddle The taller peak, Mt Kibo, 19,565 ft high, is the highest in Africa The lower peak, Mt Mawenzi, is c 16,-900 ft high

Kilindini, Kenya see MOMBASA.

Kilkenny (kĭlkĕ'nē), inland county (796 sq mi ; pop 66,712), SE Ireland, in Leinster The county town is Kilkenny It is a generally flat agricultural region, part of the central plain of Ireland, with low hills to the south The principal rivers are the Suir, the Nore, and the Barrow Oats, barley, turnips, potatoes, sheep, cattle, pigs, and poultry are the chief products of the county There is a considerable anthracite coal field in the region around Castlecomer Kilkenny, which is roughly coextensive with the ancient kingdom of Ossory, was organized as a county in 1210

Kilkenny, urban district (pop 10,289), county town of Co Kilkenny, Ireland, on the Nore Irishtown is across a little stream from Kilkenny proper, or Englishtown Strife between the inhabitants of the two districts to the near destruction of both may have given rise to the stories of the Kilkenny cats, who ate each other up Kilkenny was originally an English settlement, Strongbow founded a fort here in the 12th cent Parliaments and assemblies were held in the 14th, 16th, and 17th cent Among noted pupils at the Protestant school of Kilkenny were Swift, Bishop Berkeley, and Congreve In Irishtown is the great Cathedral of St Canice (13th cent), the seat of the Protestant dioceses of Ossory, Ferns, and Leighlin The Roman Catholic Cathedral of St Mary (seat of the diocese of Ossory), a round tower, and remains of Dominican and Franciscan abbeys (mostly 13th cent) are noteworthy The castle, begun by Strongbow, stands conspicuously above the Nore The Statute of Kilkenny (1366) forbade marriage between the English settlers and the Irish population

Killarney, town (pop 1,091), SW Man , near the N Dak border, on Killarney Lake and SSE of Brandon It is a trade center for a lumbering and dairying region, with grain elevators

Killarney, urban district (pop 5,943), Co Kerry, Ireland The Roman Catholic cathedral for the Kerry and Aghadoe diocese was planned by Pugin The town is a tourist center for the three Lakes of Killarney They are surrounded by wooded mountains The islands of Lough Leane or Lower Lake include Ross and "sweet Innisfallen" of Thomas Moore's poem, with the ruins of a 6th-century abbey founded by St Finian On the shore of Muckross Lake, Middle Lake, or Lough Tore are the remains of 15th-century Muckross Abbey. Upper Lake is the third

killdeer, North American upland PLOVER, grayish brown above and white below, with reddish brown on the rump and tail, and a double black band across the breast Its cry sounds like "kill-deer."

Kill Devil Hill National Memorial see KITTY HAWK.

Killeen (kĭlēn'), city (1940 pop. 1,263, 1948 special census pop 4,218), central TEXAS, SW of Waco, settled 1882, inc. as a city 1908 Near this market town for a farm area is the military establishment, Camp Hood

Killiecrankie, Pass of (kĭl"ĭkrăng'kē), wooded pass, Perthshire, Scotland, through which the Garry river flows A road and a railroad traverse the pass. The battle of Killiecrankie was fought (1689) at the north end of the pass. The Jacobites won a victory over the forces of William III under Gen. Hugh,

Mackay. The Jacobite leader, John Graham of Claverhouse (Bonnie Dundee), was killed here.

Killigrew, Thomas, 1612–83, English dramatist and theater manager In 1641 he produced two tragicomedies, *The Prisoners* and *Claracilla* In 1647 he followed Prince Charles into exile and at the Restoration was rewarded by being made groom of the bedchamber to Charles II and chamberlain to the queen In 1660 Charles granted to Killigrew and to Sir William D'Avenant patents to build two new theaters and to form companies of players Killigrew was first to establish his company, the King's Servants, at Gibbon's tennis court, Vere St , three years later moving to his new building, the Theatre Royal, in Drury Lane He produced Shaksperian drama—much garbled—the plays of Dryden and Aphra Behn, and his own plays, among them *The Parson's Wedding* (1664) See study by A B Harbage (1930)

Killingly (kĭl'ĭngle), town (pop 9,547), NE Conn , bordered on the west by the Quinebaug and on the east by Rhode Island, settled c 1700, inc 1708 It includes Danielson and South Killingly village

Killingworth, town (pop 531), S Conn , bordered on the west by the Hammonasset river and on the south by the town of Clinton It has 18th-century houses, a noted church (1817), and Ely House, in which Longfellow supposedly wrote "The Birds of Killingworth "

Kill Van Kull (kĭl" văn kŭl'), channel connecting Upper New York Bay with Newark Bay, between Bayonne, N J , and Staten Island, New York city It is crossed by the Bayonne Bridge (1931, 1,675 ft long)

Kilmainham (kĭlmā'ŭm), suburb of Dublin, Co Dublin, Ireland It was the site of an abbey in the 7th cent The commander of the royal forces in Ireland had his headquarters here Parnell was imprisoned here when he signed (1882) the "Treaty of Kilmainham" with Gladstone by which Parnell was released

Kilmarnock (kĭlmar'nŭk), burgh (1931 pop 38,100, 1948 estimated pop 42,573), Ayrshire, Scotland, NE of Ayr and on Kilmarnock Water It is an industrial town in a mining region, its manufactures include carpets, farm machinery, leather, shoes, whisky, pharmaceuticals, and electromagnetic, and it has textile-printing plants The burgh is the site of a Burns memorial and a library of Burnsiana

Kilmer, Joyce, 1886–1918, American journalist and poet, b New Brunswick, N J , educated at Rutgers College and Columbia (B A , 1908) Killed in the First World War, he is known chiefly for his poem 'Trees," in *Trees and Other Poems* (1914) See biography by R C Holliday (1918)

kiln (kĭl, klĭn), furnace for firing pottery and enamels, for making brick, charcoal, lime, and cement, and for roasting ores to expel moisture and undesirable elements Kilns may be updraft or downdraft, round, conical, annular, or rectangular, arranged for intermittent or for continuous firing, or of the muffle (double-wall) or direct-contact type, as required Brickkilns are temporary (the bricks themselves forming the walls) or permanent (having fixed masonry side walls) The fuel used may be electricity, oil, or gas for indoor kilns of moderate size for firing pottery, stained glass enamel, or dental work and coal or wood for large outdoor kilns The temperature of firing and the length of time required depend on the size of the kiln and the type of work

kilowatt see WATT

Kilpatrick, Hugh Judson, 1836–81, Union general in the Civil War, b near Deckertown (now Sussex), N J , grad West Point, 1861 Wounded at Big Bethel (June, 1861), he organized a regiment of New York cavalry and served (1862–64) in nearly all the important cavalry operations in the East Kilpatrick was made a brigadier general of volunteers in June, 1863 In 1864–65 he led a cavalry division in Sherman's campaigns through Georgia and the Carolinas, winning the brevets of brigadier general and major general He was minister to Chile from 1865 to 1869 and again in 1881

Kilpatrick William Heard, 1871–, American philosopher, b White Plains, Ga , grad Mercer College, 1891, Ph D Columbia, 1912, and studied at Johns Hopkins He taught at Teachers College, Columbia, from 1909, becoming professor of the philosophy of education in 1918, he retired in 1938 His teaching has done much to broaden the knowledge and understanding of the philosophy of John Dewey Among his writings are *Source Book in the Philosophy of Education* (1923) and *Education and the Social Crisis* (1932), he was editor and co-author of *The Educational Frontier* (1933)

Kilpatrick, New or East [Gaelic, =church of Patrick], parish (pop 28,894), Dumbartonshire and Lanarkshire, Scotland, NW of Glasgow It has iron foundries The Wall of Antoninus passes the town

Kilpatrick, Old or West, parish (pop 55,641), Dumbartonshire, Scotland, NW of Glasgow It is one of the places claiming to be the birthplace of St. Patrick

Kilsyth (kĭlsĭth'), burgh (pop 7,551), Stirlingshire, Scotland, NE of Glasgow In 1645 Montrose defeated the Covenanters under Baillie near here The Wall of Antoninus passes Kilsyth.

Kilung, Formosa see Keelung.

Kilwinning (kĭlwĭ'nĭng) [Scottish Gaelic, =church of Winnin (British form of name of the Irish St Finian)], burgh (pop 5,325), Ayrshire, Scotland, SW of Glasgow There are remains of an abbey founded in 1140 and dedicated to St Winnin, who is supposed to have lived here Kilwinning is the traditional birthplace of Freemasonry in Scotland It has long been celebrated for its archery meets——there was formerly an annual shooting match at a popinjay in a local steeple, described in Scott's *Old Mortality*

Kimball, Fiske (Sidney Fiske Kimball), 1888–, American architect and writer, b Newton, Mass , grad Harvard (B A , 1909, M Arch , 1912), Ph D Univ of Michigan, 1915 He was professor of architecture and fine arts at the Univ of Michigan (1912–19) and of art and architecture at the Univ of Virginia (1919–23) and was in charge of the fine arts department, New York Univ (1923–25) In 1925 he became director of the Philadelphia Museum of Art Much of his architectural work has consisted of the restoration of old houses, e g , of Monticello near Charlottesville, Va , and Stratford, the home of Robert E Lee in Virginia His writings include *Domestic Architecture of the American Colonies* (1922), *American Architecture* (1928), *The Creation of the Rococo* (1943), and, with Lionello Venturi, *Great Masterpieces of Painting in America* (1948)

Kimball, Sumner Increase, 1834–1923, organizer of the U S Life-Saving Service, b Lebanon, Maine, grad Bowdoin College, 1855 He was put in charge (1871) of the revenue marine service of the Treasury Dept , and his investigations into shipwrecks along the Atlantic coast led to a reorganization of lifesaving methods Kimball introduced the coast guard system and commanded the Life-Saving Service from its inception in 1878 until it became part of the U S Coast Guard in 1915 He wrote *Organization and Methods of the U S Life Saving Service* (1889) and *Joshua James, Life Saver* (1909)

Kimball, William Wirt, 1848–1930, American naval officer, b Paris, Maine, grad Annapolis, 1869 One of the first to serve on torpedo boats, he was a torpedo officer in 1874 In the 1880s he did much to develop magazine and machine guns, then designed armored cars In the '90s he did important work in the development of the submarine, and in the Spanish-American War, having organized the navy's first torpedo-boat flotilla, he commanded the Atlantic torpedo-boat flotilla He was made rear admiral in 1908, and in 1909 he commanded the expeditionary forces sent to Nicaragua, retiring from active duty in 1910

Kimball 1 City (pop 1,725), co seat of Kimball co , W Nebr , near the Wyo line, inc 1885 It is a wheat-shipping point and a trade center for a Great Plains potato-growing area 2 Railroad city (pop 1, 580), S W Va , NW of Bluefield, in a coal-mining area, inc 1911 The first all-Negro American Legion Post and a state mine rescue station are in Kimball

Kimberley (kĭm'burlē), mining town and district, SE British Columbia, NW of Cranbrook The Sullivan mine, a great producer of silver, lead, and zinc, is here

Kimberley (kĭm'burlē), city (pop 40,231), Cape Prov , Union of South Africa Founded in 1871, it grew out of gold- and diamond-mining settlements Since 1888 its mines have been controlled by the trust organized by Cecil Rhodes It was besieged briefly in 1899 by the Boer general Piet Cronje Today it is an important diamond-cutting center More than a third (15,741) of the population is European

Kimberley Goldfield, 47,000 sq mi , NE Western Australia Gold was discovered here in 1882

Kimberly, village (pop 2,618), E Wis , on the Fox and NE of Appleton, inc 1910 Paper products are made here

Kimhi (kĭm'hē) or **Kimchi** (kĭm'khē), family of Hebrew scholars and grammarians **Joseph ben Isaac Kimhi,** 1105?–1170, besides writing a Bible commentary, making numerous translations, and writing poems of merit, introduced the long and short divisions of vowels (increasing their number from 7 to 10) and elaborated the passive verb forms **Moses Kimhi,** d 1190, son of Joseph, wrote *The Paths of Knowledge*, a grammatical textbook, which is a mine of philological information **David Kimhi,** 1160?–1235?, another son, wrote *Book of Completeness*, long the leading Hebrew grammar, and *The Pen of the Scribe*, a manual of punctuation

kin, a group of people who have, or believe they have, a common ancestry Groups differ in their ideas of kinship It may be traced through either the male or the female line or, as in the Western family, through both lines Where totemism prevails, persons who have the same totem, though members of different tribes, sometimes believe that they are related to one another Such groups as the clan, gens, phratry, and tribe are based on ideas of kinship Larger groups, e g , the Greeks, have believed themselves united by kinship The descent of nations and races from Noah's sons, Shem, Ham, and Japheth, is traced in Genesis Consanguinity as affecting marriage and the descent of property is determined differently in different systems of law

Kinabalu or Kinibalu, Mount (both kĭ"nŭbŭlōō'), peak, 13,455 ft high, North Borneo, ENE of Jesselton, highest peak on Borneo

Kinah (kī'nu) [Heb , =lamentation], unidentified town, extreme S Palestine Joshua 15 22

Kinaston, Edward see KYNASTON, EDWARD.

Kincaid, village (pop 1,749), central Ill , just SE of Springfield in a coal area, inc 1915

Kincardine (kĭn-kar'dĭn, kĭng-), town (pop 2,507), S Ont , on Lake Huron and SW of Owen Sound It is a resort, with knitting and woolen mills and a furniture factory

Kincardineshire (kĭngkär'dĭnshĭr) or **Kincardine,** maritime county (379 sq mi , 1931 pop 39,865, 1948 estimated pop 28,946), E Scotland The county town is Stonehaven, near which is situated the famous Dunnottar Castle The bold, rocky coast extends along the North Sea from the North Esk river (on the south) to the Dee The interior is largely mountainous, the Grampian range, which extends into the county, rises to 2,555 ft in Mt Battock Sheep grazing is the leading occupation on the uplands Oats and barley are the principal crops Along the coast fishing is of importance and there is some quarrying The Romans apparently penetrated into the district, which was long inhabited by the Picts The county is sometimes called the Mearns (mārns)

Kinchinjunga see Kanchenjunga

Kinder (kĭn'dur), town (pop 1,415), SW La , near the Calcasieu river NE of Lake Charles, in a lumber, rice, cotton, and cattle-raising area.

kindergarten [Ger , =garden of children], system of preschool education Friedrich Froebel designed (1837) a system to provide an educational situation less formal than that of the elementary schools in which children's creative play instincts are organized constructively Through the use of songs, stories, games, simple manual materials, and group activities for which the furnishings of a kindergarten are adapted, children develop cooperation and application, and the transition from home to school is made less formidable This theory of education through expression and social cooperation has greatly influenced elementary education and parent education, especially in the United States, where kindergartens are generally a part of public school systems The first kindergarten in America was founded in 1856 by Mrs Carl Schurz It was followed by Elizabeth Peabody's in 1861 and by a public kindergarten established in 1873 by Susan Blow See also NURSERY SCHOOL See J C Foster and N E Headley, *Education in the Kindergarten* (1936), Ruth Updegraff and others, *Practice in Preschool Education* (1938), D W Baruch, *Parents and Children Go to School* (1939)

Kinderhook (kĭn'-), village (pop 745), SE N Y , NE of Hudson, settled before the Revolution, inc 1838 Richard Upjohn designed St Paul's Church (1851) Martin Van Buren was born and is buried here, the Van Buren homestead, "Lindenwald," is S of Kinderhook The House of History, maintained by the Columbia County Historical Society, occupies an early-19th-century mansion

Kindersley, town (pop 1,235), SW Sask , NW of Swift Current, in a farming and ranching area

Kindi or **Al-Kindi** (Abu Yusuf Yakub ibn Ishak Al-Kindi) (alkĭn'dē), 9th cent , Arabian philosopher He studied at Basra and Baghdad and is noted in the East as one of the earliest scholars there to become thoroughly versed in the writings of Aristotle In his own teachings he undertook to make clear the essential harmony between the views of Plato and those of Aristotle There were in his philosophical ideas some elements of Neoplatonism The Arabs regarded him as one of the Peripatetics in Islam, and as the earliest of the Moslem philosophers of Arabian descent he has been called "the philosopher of the Arabs " He emphasized the righteousness as well as the unity of God, and considered it a reasonable truth to believe in a Creator revealing himself in prophecy In his doctrine of manifold intelligence he defined four types of reason Besides his translations and commentaries on Aristotle's works, he produced over 250 treatises on a great variety of subjects but only a few on medicine and astrology are extant Through these he was known to the Christian scholars of the Middle Ages He wrote strongly in opposition to alchemy and some kinds of belief in miracles During the rule of Mutawakkil, at a time when philosophy was looked upon with suspicion, the library of Kindi was confiscated

King, Clarence, 1842–1901, American geologist, b Newport, R I, grad Sheffield Scientific School, Yale, 1862 After serving as a volunteer assistant in the California state geological survey (1863–65, 1866), he persuaded Congress to appropriate funds for the Fortieth Parallel Survey (1867–72), of which he was made geologist in charge For the Survey's reports he wrote the geological sections of J D Hague's *Mining Industry* (1870), a classic in economic geology, and *Systematic Geology* (1878), a thorough and clearly presented reconstruction of the geologic history of the Cordilleran region King was appointed director of the newly created U S Geological Survey (1879), which he organized, introducing high standards of efficiency and scholarship, he then retired to private practice as a mining engineer (1881) His "Age of the Earth" was published in the *American Journal of Science* (1893) He also wrote *Mountaineering in the Sierra Nevada* (1872) and *Catastrophism and the Evolution of Environment* (1877) See King Memorial Committee, *Clarence King Memoirs* (1904)

King, Edward Skinner, 1861–1931, American astronomer, b Liverpool, N Y He was associated with Harvard College Observatory from 1887 He gave much attention to photographic photometry on a uniform scale and wrote *Photographic Photometry* (1912) Among the subjects of his particular study were forms of images in stellar photography, transforming of prismatic spectra to normal spectra, and the photometry of stars and other sources of light He is also the author of *Manual of Celestial Photography* (1931)

King, Ernest Joseph, 1878–, American admiral, commander in chief of the U S fleet, b Loram, Ohio, grad Annapolis, 1901 He distinguished himself in many branches of naval service, including the submarine and air arms In the First World War he was assistant chief of staff to Admiral Henry T Mayo King commanded (Feb -Dec , 1941) the Atlantic Fleet and then became commander in chief of the U S naval forces King also became (March, 1942) chief of naval operations and directed the naval strategy that took the U S fleet into Japanese waters He was made (1944) admiral of the fleet ("five-star admiral") and retired from the navy a year later

King, Grace Elizabeth, 1852–1932, American author, b. New Orleans She wrote stories and sketches of the French life and culture of New Orleans—*Monsieur Motte* (1888), *La Dame de Sainte Hermine* (1924), and *Balcony Stories* (new ed , 1925). Her books of local history include *New Orleans· the Place and the People* (1895)

King, Henry, 1592–1669, English poet He was bishop of Chichester and friend and executor of John Donne Of his poems the best are "The Exequy," an elegy on his wife, and the familiar "Tell me no more how fair she is " See his *Life and Works* (ed by Lawrence Mason, 1913)

King, Henry Churchill, 1858–1934, American theologian and educator, b Hillsdale, Mich , grad Oberlin Theological Seminary, 1882, and studied at Harvard At Oberlin from 1884, he taught, in succession, mathematics, philosophy, and theology He was president of the college from 1902 to 1907 Prominent in the councils of the Congregational church, he was moderator (1919–21) of its National Council and chairman (1921–27) of the Congregational Foundation for Education Among his many books are *Rational Living* (1905), *The Ethics of Jesus* (1910), *Fundamental Questions* (1917), and *Seeing Life Whole* (1923)

King, James Gore: see KING, RUFUS.

King, John Alsop: see KING, RUFUS.

King, Rufus, 1755–1827, American statesman, b. Scarboro, Maine (then a district of Massachusetts), grad Harvard, 1777 He served briefly in the American Revolution and practiced law at Newburyport, Mass , before becoming a member of the Massachusetts General Court (1783–85). He was (1784–87) a delegate to the Continental Congress, where he helped draft the Ordinance of 1787, and he also attended the Federal Constitutional Convention (1787), where he spoke effectively in support of a strong central government. In the Massachusetts ratifying convention his knowledge and ability in debate greatly helped to win the affirmative vote Moving to New York city, King was elected to the state assembly and by the assembly was chosen (1789) to be one of New York's first two U S Senators He strongly supported Alexander Hamilton's measures and later defended Jay's Treaty As minister to Great Britain (1796–1803) he reconciled many differences between the two countries and proved himself an able diplomat The Federalist candidate for Vice President in 1804 and 1808 and for President in 1816, he was defeated each time From 1813 to 1825 he again served as U S Senator Though at first an opponent of the War of 1812, he later came to the support of the administration's war measures King opposed the Missouri Compromise, advocated solving the slavery problem by emancipating and colonizing the Negroes outside the country on the proceeds of the sale of public lands, and was the author of legislation that reduced the price of public lands In 1824 he declined reelection but was again minister to Great Britain (1825–26) See Charles King, ed , *The Life and Correspondence of Rufus King* (6 vols , 1894–1900), biography by E H. Brush (1926) His son **John Alsop King,** 1788–1867, b New York city, was a Whig leader and governor (1857–58) of New York after serving as a Whig Congressman from New York (1849–51) Another son, **James Gore King,** 1791–1853, b New York city, was promoter and president of the Erie RR and a Congressman from New Jersey (1849–51) Charles KING (1789–1867) was also his son

King, Thomas Starr, 1824–64, American Unitarian clergyman, lecturer, and author, b New York city Family responsibilities interrupted his schooling, but he continued educating himself and taught school for several years While at the Hollis St (Unitarian) Church in Boston (1848–60), he became prominent as a preacher and lecturer As pastor of the Unitarian Church in San Francisco (1860–64) he was active in keeping California loyal to the Union at the beginning of the Civil War His contributions to the Boston *Transcript* made known the natural beauties of the Pacific coast, as his book *The White Hills Their Legends, Landscapes, and Poetry* (1860) had spread knowledge of the New Hampshire region Peaks in the White Mts and Yosemite National Park bear his name, and a statue of him, given by California, stands in the Capitol at Washington *Christianity and Humanity* (1877) contains a collection of his sermons See biography by C W Wendte (1921)

King, William, 1650–1729, archbishop of Dublin from 1702 He wrote *De origine mali* (1702, Eng tr , 1731), important for its influence on Viscount Bolingbroke

King, William, 1663–1712, English poet, a supporter of the Tory and High Church party He is noted for his humorous and satirical writings, which include *Dialogues of the Dead* (1699)—attacks against Richard Bentley—and *Miscellanies in Prose and Verse* (1707?) See Samuel Johnson, *The Lives of the English Poets* (1781)

King, William Lyon Mackenzie, 1874–, Canadian statesman, leader of the Liberal party, and prime minister for over 21 years, b Berlin (now Kitchener), Ont , grandson of William Lyon Mackenzie At Toronto, Chicago, and Harvard universities he devoted himself to the study of political economy and political science An expert on labor questions, he served in Laurier's administration as deputy minister of labor (1900–8) and minister of labor (1909–11), and was editor (1900–1908) of the *Labour Gazette* In 1908 he was elected to the Canadian Parliament During the First World War he was engaged (1914–17) in investigating industrial relations in the United States under the auspices of the Rockefeller Foundation His *Industry and Humanity* (1918) has passed through several editions Chosen in 1919 to succeed Sir Wilfrid Laurier as leader of the Liberal party, Mackenzie King led the opposition in Parliament until 1921, when he became prime minister, a post he filled, except for an interval (June 28–Sept. 25, 1926) until 1930 Leader of the opposition during Richard Bedford Bennett's government (1930–35), he afterward again served (1935–48) as prime minister When he retired in 1948 for reasons of health, it was with the record of the longest service as prime minister in British history, although his tenure of the post was not continuous Called upon to guide Canadian affairs during the Second World War, Mackenzie King enunciated his position in *Canada at Britain's Side* (1941) and *Canada and the Fight for Freedom* (1944). In 1940 he concluded with President Roosevelt the Ogdensburg Agreement and in 1941 the Hyde Park Declaration; by these Canada and the United States agreed to create a permanent joint board of defense and to cooperate in the production of defense materials. A representative of Canada at the Imperial Conferences in London in 1923, 1926, and 1937, he joined the sessions of the prime ministers in 1944 and 1946 and served as chairman of the Canadian delegation at the conference (1945) in San Francisco to draft the Charter of the United Nations and at the Paris Conference of 1946. With President Truman and Prime Minister Attlee of Great Britain, he signed in 1945 the Washington declaration on atomic energy See biography by N M Rogers (1935); Emil Ludwig, *Mackenzie King a Portrait Sketch* (1944).

King, William Rufus Devane, 1786–1853, U S Senator from Alabama (1819–44, 1848–52), b Sampson co , N C , grad Univ of North Carolina, 1803 A Democratic Congressman from North Carolina (1811–16), he settled (1818) in Alabama and became one of its first Senators King resigned in 1844 to become minister to France, he successfully urged France to refrain from joining England in a protest against U S annexation of Texas Two years after his return to Alabama he again entered (1848) the Senate In 1852 he was elected Vice President under Franklin Pierce, but died in Alabama soon after he took the oath of office in Cuba

kingbird, widely distributed North American flycatcher The Eastern species is sometimes called tyrant flycatcher and bee martin It eats some bees, mostly drones, but destroys many noxious insects It is dark gray above and light gray and white below and has an orange crest on the crown and a black tail with a terminal white band Fearlessly and persistently it attacks crows and hawks, driving them from its territory

King Charles Land see SPITSBERGEN

King City. 1 City (pop 1,768), S Calif , on the Salinas and SE of Monterey, in a large irrigated farm area, founded 1868, inc 1911 2 City (pop 1,103), NW Mo , NE of St Joseph in a farm area

king crab or **horseshoe crab,** marine arthropod with a cephalothorax (fused head and thorax) covered by a domed, horseshoe-shaped carapace, a triangular abdomen with a carapace, and a spinelike tail or telson It has one pair of simple eyes and one of compound eyes and six pairs of legs Internally it shows a closer relationship to the arachnid or spider group than to the crustaceans The species found from Maine to the Gulf of MEXICO is often called limulus from its generic name, its total length ranges up to about 20 in Many are destroyed for use as fertilizer Four species are Asiatic

king devil see HAWKWEED

King Edward VII Land, peninsula, Antarctica, extending NW from Marie Byrd Land into the Ross Sea Sighted in 1842 by Sir James C Ross, sailing eastward along the Ross Shelf Ice or Ross Barrier, it was discovered (1902) by Robert F SCOTT who named it King Edward VII Land It is now more generally known as Edward VII Peninsula

Kingfield, textile town (pop 860), W Maine, NNW of Augusta, settled 1805, inc 1816 William King, Maine's first governor, lived here

Kingfisher, city (pop 3,352), co seat of Kingfisher co , central Okla , NW of Oklahoma City, founded 1889 It is a center of the wheat industry

kingfisher, member of a family of about 250 species and subspecies, the majority of which are found in the Malayan region and on Pacific islands, although there are representatives on all continents The birds usually have large, crested heads, long, heavy bills, small, weak feet, and short bodies and tails Some of the Old World species live in forests and subsist on insects, small lizards, and mammals The American kingfishers are chiefly fish-eaters and catch their prey by diving into the water They are usually seen near lakes or ponds, sometimes along the coast They nest in sandy banks, making a long burrow with an enlarged chamber at the end Both sexes of the Eastern belted kingfisher are blue gray above, gray and white below, with a bluish breastband The female has chestnut brown on its sides, flanks, and lower breast The Western belted kingfisher is similar but larger The green, or Texas, kingfisher is found from S Texas to Panama, and the ringed kingfisher is confined mainly to Central America and the West Indies In Australia the kookaburra, or laughing jackass, is a large kingfisher which lives on dry land The European kingfisher is the bird of the legend of HALCYONE

King George V Land, part of the coast of Antarctica, between Oates Coast and Adélie Land (now usually known as Adélie Coast) Discovered by Sir Douglas Mawson, commander of an Australian expedition (1911–14), and named by him, it is now generally called George V Coast

King George's War see FRENCH AND INDIAN WARS

Kingisepp (kĭng'gĭsĕp, Rus kĕn"gĭsyĕp'), formerly **Yamburg** (yăm'bo͝ork), city (pop 5,003), RSFSR, c 70 mi SW of Leningrad, near the Estonian border. It is an agricultural center and has sawmills and paper mills Founded (13th cent) as the fortress of Yam on the border of the republic of Novgorod, it was chartered (1703) after its recapture by the Russians from the Swedes In 1923 it was renamed for an Estonian Communist leader.

Kinglake, Alexander William, 1809–91, English traveler and historian His *Eöthen* (1844) is a classic account of his journey to the Far East in 1835 *The Invasion of the Crimea* (8 vols., 1863–87) is a detailed history of the Crimean War, somewhat marred by personal prejudices.

Kingman, 1 Unincorporated town (pop 2,956), co. seat of Mohave co, NW Ariz, in a gold-mining area, with stock ranches, founded 1882 Hoover Dam is 70 mi north 2 City (pop 3,213), co seat of Kingman co., S Kansas, W of Wichita, founded c 1872, inc 1883 It is the trade center of an agricultural area

Kingman Reef, islet, central Pacific, triangular atoll, NW of Palmyra island It was discovered (1874) by Americans and became a U S naval reservation in 1934.

King Philip's War: see PHILIP (King Philip)

King Ranch, S Texas, S and W of Corpus Christi, with headquarters at Kingsville Of almost legendary size, it covers nearly a million acres in several divisions, of which the best known is Santa Gertrudis, the "home" ranch The recently developed Santa Gertrudis breed of beef cattle has gained attention, and race horses from the King Ranch have won some of the most celebrated stakes in the country The ranch was founded c 1853 by Richard King, who had been a steamboat captain on the Rio Grande From 1860 to 1868 he had as his partner Mifflin Kenedy, another former steamboat captain The giant holdings were managed after King's death by Robert Kleberg, who married Alice King Later their son Robert Kleberg succeeded to the management The property was divided in 1935, but the central ranches are still large enough to be a semifeudal domain Oil rights and farming have been added to the income from great beef herds

Kings, books of the Old Testament, a single work in the Hebrew canon, called in AV 1 and 2 Kings, in the Greek versions and the Western canon 3 and 4 Kings (the books of Samuel are called 1 and 2 Kings in this enumeration) These books occupy the 11th and the 12th place in AV They continue the historical narrative of Samuel from the death of David until the destruction of the southern Hebrew kingdom (Judah), i e, roughly, 1000 B C – 560 B C The major divisions of the history are as follows first, the reign of Solomon (1 Kings 1-11), including the end of David's reign (1 Kings 1-2) and a lengthy account of the Temple (1 Kings 5-8), second, a synchronizing parallel account of the two Hebrew kingdoms (1 Kings 12–2 Kings 17), beginning with the division between Rehoboam and Jeroboam (1 Kings 12-14) and including as its major single portion the rise and fall of the house of Ahab of Israel, with which is woven the careers of the prophets Elijah and Elisha (1 Kings 16 16-2 Kings 9), and, third, the end of the southern kingdom (2 Kings 18-25) Although the books of Kings continue Samuel, they differ in having more frequent condemnation and praise of actions The events of Kings are told with a different point of view in Chronicles A noteworthy feature is the constant allusion to books containing historical data left out of Kings For bibliography, see OLD TESTAMENT

Kings, county, N Y see BROOKLYN, borough

Kings, river rising in E California, in the high Sierra Nevada N of Sequoia National Park, and flowing W and SW into the San Joaquin Valley Such of its waters as do not disappear into the sandy valley floor enter Tulare Lake, at times of exceptional flood, the Kings river may reach the San Joaquin The Kings river canyons lie within Kings Canyon National Park

Kings Bay, inlet, c 14 mi long, in the northwest coast of West Spitsbergen New Alesund is on it In 1926 Kings Bay was the base of successful polar flights by R E BYRD, in an airplane, and by Roald AMUNDSEN, with Ellsworth and Nobile, who crossed in the dirigible *Norge* to Alaska

Kingsburg, city (1940 pop 1,504, 1947 special census pop 2,083), S central Calif, SE of Fresno, in a fruit and cotton area of the San Joaquin Valley, settled in the 1870s, inc 1908

Kings Canyon National Park, 452,824 82 acres, E Calif, est 1940 This majestic wilderness in the heart of the Sierra Nevada is dominated by a number of peaks towering over 13,000 ft and by the magnificent canyons of the Kings river So wild and rugged is the terrain that many sections are not accessible by automobile The former General Grant National Park, with the tree named for Grant and with other giant sequoias, is a detached section of the park. The park adjoins Sequoia National Park

King's College: see CAMBRIDGE UNIVERSITY, COLUMBIA UNIVERSITY, LONDON, UNIVERSITY OF

King's College, University of, see DALHOUSIE UNIVERSITY.

King's County, Ireland see OFFALY.

King's Daughters and Sons, International Order of the, interdenominational organization for spiritual and philanthropic service It was founded (1886) by a group of women in New York to work among the city's underprivileged Men were later admitted to the membership. There are now some 60,000 members, organized in circles and branches, in the United States, Canada, Europe, Asia, and elsewhere. Hospitals, orphanages, homes for aged persons, libraries, and other institutions are maintained by the order. *The Silver Cross* is its publication; a Maltese cross is its membership badge.

Kingsford, city (pop 5,771), W Upper Peninsula, N Mich., on the Menominee and near Iron Mountain; inc as a village 1923, as a city 1947 The Ford Motor Company's property here is extensive

Kingsley, Charles, 1819–75, English clergyman and novelist, one of the initiators of the Broad Church movement From 1848 to 1852 he published tracts advocating CHRISTIAN SOCIALISM and embodied his views in the novels *Alton Locke* (1850) and *Yeast* (1851) A statement made by Kingsley in a review started a controversy in 1864 with John Henry NEWMAN which resulted in Newman's famous *Apologia* Kingsley is best known for his historical novels *Hypatia* (1853), *Westward Ho!* (1855), and *Hereward the Wake* (1866) and for the children's books *The Heroes* (1856) and *The Water-Babies* (1863) From 1860 to 1869 he was professor of modern history at Cambridge and in 1873 was appointed canon of Westminster See *Letters and Memories* (ed by his wife, 1877), biographical studies by C W Stubbs (1899), W H Brown (1924), M F Thorp (1937), and Una Pope-Hennessy (1948)

Kingsley, Mary Henrietta, 1862–1900, English author, niece of Charles Kingsley In *Travels in West Africa* (1897) and *West African Studies* (1899) she recorded her experiences and ethnological observations

Kingsley, town (pop 1,145), NW Iowa, E of Sioux City, inc 1884

King's Lynn, Lynn Regis (rē'jĭs), or **Lynn**, municipal borough (1931 pop 20,583, 1943 estimated pop 24,110), Norfolk, England, on the Great Ouse near its influx to the Wash Once one of the chief ports of England, it dates from Saxon times The market places are interesting for their ancient buildings and for the fairs, still held A gate remains of 15th-century town walls The town is a center of fishing, flour milling, beet-sugar refining, shipbuilding, and metalworking It is the birthplace of Fanny Burney

Kingsmill Group see GILBERT ISLANDS

Kings Mountain, town (pop 6,547), SW N C, near the S C line It has textile mills The name comes from a ridge which crosses the state boundary parallel to and E of the Blue Ridge On its crest, just south of the state line, a party of backwoodsmen under Isaac Shelby, John Sevier, and William Campbell defeated (Oct 7, 1780) a British and Tory force, led by Patrick Ferguson, in the CAROLINA CAMPAIGN in the American Revolution The site is marked by a national military park (4,012 acres, est 1931)

king snake, nonvenomous, egg-laying constrictor snake of North America which shows much variation in color and markings The common king snake or chain snake of the E United States is usually about 3 to 5 ft long and black or brown in color with yellow and white rings or bands which form a chainlike pattern It eats rodents, birds, and snakes It is immune to the venom of the rattlesnake and the copperhead The milk snake, which belongs to the same genus as the king snake, is useful to farmers because it eats rodents It is not capable of milking cows as legend says

Kings Park, unincorporated village (pop 2,464), on the north shore of Long Island, SE N Y, E of Huntington A state hospital is here, and Sunken Meadow State Park is near by

Kings Peak, 13,498 ft high, NE Utah, in the Uinta Mts E of Salt Lake City, highest point in Utah

Kings Point, residential village (pop 1,247), on NW Long Island, SE N Y, near Great Neck, inc 1924 A U S merchant marine academy was established here in 1942

Kingsport, city (pop 14,404), NE Tenn, on the Holston river and NNW of Johnson City, near the Va line The city, the first in the state to adopt (1917) the city-manager type of government, stands on the site of a fort built in 1761 on the old Wilderness Road It has a large book-printing plant and produces book cloth, paper, chemicals, cement, and cellulose acetate yarn

Kingston, city (pop 30,126), co seat of Frontenac co, S Ont, on the north shore of Lake Ontario, near the head of the St Lawrence and at the end of Rideau Canal from Ottawa Kingston has probably the best harbor on the lake Here stood Fort Frontenac (see FRONTENAC, FORT), of great importance in the French and Indian Wars The present city was founded by United Empire Loyalists in 1784 It was prosperous during the War of 1812 as the Canadian naval base for operations against the Americans From 1841 to 1844 it was the capital of United Canada Fort Henry, built in the war of 1812 and rebuilt in 1840–46, survives, as does the building which housed the first government of Upper Canada Kingston is the seat of Queen's Univ. (coeducational, 1841), of the Royal Military College (the West Point of Canada), and of Anglican and Roman Catholic bishoprics and cathedrals Industries include the manufacturing of locomotives, textiles, machinery, and nylon and the processing of food See A M Machar, *The Story of Old Kingston* (1908)

Kingston, port (pop c.120,000), capital and largest city of JAMAICA, British West Indies Kingston was founded in 1693 on a deep, landlocked harbor The former capital, Port Royal, at the tip of the long narrow peninsula that forms the harbor, was engulfed by the sea after an earthquake in 1692, the capital was established at SPANISH TOWN until Kingston was chosen in 1872 After the fire which destroyed the newer Port Royal in 1703, Kingston became the island's leading commercial city It has suffered occasionally from severe hurricanes and in 1907 was leveled by an earthquake The modern city is well planned, with fine public buildings and a lovely residential section

Kingston, 1 Town (pop 2,783), SE Mass, on the coast between Plymouth and Duxbury, set off from Plymouth 1726 Textiles are produced 2 Rural town (pop 1,002), SE N H, SW of Exeter, inc 1694 3 City (pop 28,589), co seat of Ulster co, SE N Y, on the west bank of the Hudson at the mouth of Rondout Creek and S of Albany, in a fruit area First called Esopus, it was permanently settled by the Dutch in 1652, it was incorporated as a village in 1805 and as a city (union of Kingston and Rondout) in 1872 The Catskills rise to the west, and Ashokan Reservoir is near The DELAWARE AND HUDSON CANAL stimulated the city's early growth Of the historic sites remaining, notable are the senate house (1676), meeting place of the first New York state legislature, and the adjoining museum, containing paintings and historical material Kingston's varied manufactures include shirts, bricks, and machinery 4 Industrial borough (pop 20,679), NE Pa, on the Susquehanna opposite Wilkes-Barre, settled 1769, inc 1857 Its products include cigars, rayon and nylon, and anthracite In the Revolution an American defeat here (1778) by the British and the Seneca Indians prefaced the WYOMING VALLEY massacre 5 Village, R I see SOUTH KINGSTOWN

Kingston-on-Thames (-tĕmz), municipal borough (1931 pop 39,055, 1947 estimated pop 41,200), Surrey, England, SW of London In 838 it was the scene of Egbert's council meetings, and here the Saxon coronations took place—the stone used at these functions is preserved in the market place The last battle of the civil war took place in Kingston-on-Thames in 1648 It is a residential suburb and resort, with engineering industries and manufactures of aircraft, varnish and paint, leather goods, plastics, and storage batteries

Kingussie (kĭng-yo͞o'sē, -go͞o'sē), burgh (pop 1,067), Inverness-shire, Scotland, on the Spey It is a health resort and tourist center of the Badenoch district

King William Island, off N Canada, in the Arctic Ocean, one of the islands of the ARCTIC ARCHIPELAGO It is W of Boothia Peninsula, SE of Victoria Island, and N of Keewatin dist The island was discovered by Sir James C Ross in 1831 He explored the northern coast, and in 1837 Thomas Simpson of the Hudson's Bay Company traced the southern coast In the neighborhood the expedition of Sir John FRANKLIN came to grief, and further exploration came from Franklin searchers, notably John Rae (who in 1854 established its insularity) and Sir Francis L McClintock Roald Amundsen wintered here in 1903 and 1904 while on his way through the Northwest Passage and crossed the island by sledge

King William's War see FRENCH AND INDIAN WARS

Kingwood, town (pop 1,676), co seat of Preston co, N W Va, SE of Morgantown, in a mining, lumbering, and farming area, founded 1811

Kinibalu, Mount, see KINABALU, MOUNT

kinkajou (kĭng'kŭjo͞o"), nocturnal, arboreal mammal found from Mexico to Brazil, related to the raccoon and characterized by a long, prehensile tail and soft, short, woolly hair It eats small animals, fruits, and honey

Kinloch, city (1949 special census pop 5,101), E Mo, NNW of St Louis, inc 1948 According to the special census, there are 5,097 nonwhite persons and four white

Kinmundy (kĭn'mŭndē), city (pop 1,015), S central Ill, NE of Centralia, in a farm area, inc 1867

Kinnarodden, see NORDKYN, CAPE

Kino, Eusebio Francisco (āōsā'vyō fransē'skō kē'nō), c 1644–1711, missionary explorer in the American Southwest, b Segno, in the Tyrol He was in 1669 admitted to the Jesuit order He was a distinguished mathematician and at Cádiz observed the comet of 1680–81, publishing his results in his *Exposición astronómica de el* [sic] *cometa* (1681) He arrived as a missionary in New Spain in 1681 and was appointed royal cosmographer to accompany the expedition to colonize Lower California When the settlement in S California was abandoned, he went to Pimería Alta (now N Sonora and S Arizona), where he labored as a missionary, explorer, and colonizer until his death He and his companions pushed the frontier of missionary work northward to the Gila and Colorado rivers in Arizona, founding a number of missions, including two near the present Nogales (Guevavi in 1692 and Tumacacori in 1696) and one near present Tucson (San Xavier del Bac) He made more than 50 journeys from his base, the mission of Nuestra Señora de los Dolores in Sonora, frequently with only Indian guides as companions He established agriculture at the missions and brought in cattle, horses, and sheep, he distributed cattle and seed grain among the Indian tribes In 1701–2 he made two expeditions down the Colorado, on the second reaching the head of the Gulf and proving anew that California was not an island He was the first to map Pimería Alta on the basis of actual exploration, and his map, published in 1705, and many times reproduced, remained the basis for maps of the region until the 19th cent His valuable historical and autobiographical chronicle, *Favores celestiales*, was edited by H E Bolton as *Kino's Historical Memoir of Pimería Alta* (2 vols , 1919, reissued in a single volume, 1948) See H. E Bolton, *The Padre on Horseback* (1932) and *Rim of Christendom* (1936)

Kinross, burgh (pop 2,525), county town of Kinrossshire, Scotland, near Loch Leven S of Perth

Kinross-shire (kĭnrŏs'shĭr), inland county (81 sq mi , 1931 pop 7,454, 1948 estimated pop 7,981), central Scotland The county town is Kinross The region is a level plain surrounded by the hills of the Ochils and the East Lomonds Agriculture is the chief occupation There is some manufacture of woolens and linen Kinross-shire was organized as a separate county in 1252

Kinsale (kĭn-sāl'), urban district (pop 2,086), Co Cork, Ireland, at the head of the Bandon estuary It is a fishing port and seaside resort Kinsale is of Anglo-Norman settlement and was the site of a castle in the 13th cent In 1601 Kinsale was held for 10 weeks by a Spanish force St Multose Church dates from the 12th cent Charles Fort, built in 1677, was several times the object of siege James II landed at Kinsale in 1689 The town surrendered to the English under Marlborough (1690) after the fall of Cork

Kinsha see YANGTZE

Kinsley, city (pop 2,178), co seat of Edwards co , W central Kansas, on the Arkansas, founded c 1875, inc 1878 The Santa Fe Trail ran here, and near by a battle with the Indians was fought in 1848 It is the center of a wheat-growing and dairying area

Kinston, city (pop 15,388), co seat of Lenoir co , E N C , on the Neuse and NW of New Bern, founded 1762 It is the trade, market, and processing center for a tobacco, lumber, and cotton region

Kintyre (kĭntīr') or **Cantire** (kăntīr') [Scottish Gaelic,=head of land], peninsula, 42 mi long and 10 mi wide, Argyllshire, Scotland, connected with the mainland by the narrow isthmus of Tarbert between West Loch Tarbert and East Loch Tarbert The southern extremity, the Mull of Kintyre, is c 13 mi from Northern Ireland Campbeltown, on the east coast, is the leading town

Kioto, Japan see KYOTO

Kiowa (kī'uwu), city (pop 1,379), S Kansas, near the Okla line SW of Wichita, inc 1885 Carry Nation's first violent acts of bottle breaking in saloons took place here in 1900

Kiowa Indians (kī'uwu), tribe of North American Indians Their language comprises its own stock, the Kiowan (it is believed to be related to the Tanoan language of the Pueblos) The Kiowa, a typical nomadic tribe of the Plains area, had several distinctive traits, including a pictographic calendar and the worship of a stone image, the *taimay* In the 17th cent they occupied W Montana, but by c 1700 they had moved to an area SE of the Yellowstone river. Here they came into contact with the Crow Indians, who gave the Kiowa permission to settle in the Black Hills While living there, they acquired (c 1710) the horse, probably from the Crow Their trade was mainly with the Arikara, the Mandan, and the Hidatsa After the invading Cheyenne and the Sioux drove the Kiowa from the Black Hills, they were forced to move south to Comanche territory, the Kiowa reached (1790) a permanent peace with the Comanche after a bloody war. According to Lewis and Clark the Kiowa were on the North Platte river in 1805, but not much later they were occupying the Arkansas river region. Later the Kiowa, who allied themselves with the Comanche, raided as far south as Tamaulipas, Mexico, attacking Mexicans, Texans, and Indian tribes, principally the Navaho and the Osage. It was in a war with the Osage that the U S army, which had intervened, defeated (1834) the Kiowa In 1837 the Kiowa were forced to sign their first treaty, providing for the passage of Americans through Kiowa-Comanche land, the presence of white strangers in increased numbers accelerated hostilities After 1840, when the Kiowa made peace with the Cheyenne, four groups—the Kiowa, the Cheyenne, the Comanche, and the Apache—combined to fight the eastern Indians, who had migrated to Indian Territory This naturally caused more hostility between the Indians and the U S government, and U S forces finally defeated the confederacy and imposed the Treaty of Medicine Lodge (1867) This confederated the Kiowa, the Comanche, and the Apache and provided that the tribes should settle in Oklahoma The Kiowa were still at large, but in 1868, after Colonel Custer had defeated them, they surrendered Oncoming white settlers, unaware of treaty rights, caused friction with the Kiowa, and there was a series of minor outbreaks In 1874 the Kiowa were involved in a serious conflict, which was suppressed by the U S army American soldiers killed the horses of the Kiowa, and the government deported the Kiowa leaders to Florida By 1879 most of the tribe was settled on their present reservation in Oklahoma They now number some 2,600 The **Kiowa Apache,** a small band of North American Indians of the Athapascan linguistic stock, traditionally were associated with the Kiowa from the earliest times and now live with them on their reservation The Kiowa Apache retain their own language See Robert Lowie, *Societies of the Kiowa* (1916)

Kipawa, Que see TIMISKAMING

Kipchaks see CUMANS

Kipling, Rudyard, 1865–1936, English poet, novelist, and short-story writer, b Bombay, India Educated at the United Services College in England, Kipling returned to India to edit a Lahore paper and later to write for the Allahabad *Pioneer* His poems were collected in *Departmental Ditties* (1886), *Barrack-Room Ballads* (1892), and other volumes, his first short stories of Anglo-Indian life appeared in *Plain Tales from the Hills* (1888) and *Soldiers Three* (1888) In 1889 he returned to London, where his novel *The Light That Failed* appeared (1890) Kipling's stories and poems interpreted India in all its heat, strife, and ennui, his romantic and somewhat narrow imperialism is reflected in such well-known poems as "The White Man's Burden," "Loot," "Mandalay," "Gunga Din," and the austere *Recessional* (1897) In London in 1892 Kipling married Caroline Balestier, an American, and lived in Vermont for four years There he wrote children's stories, *The Jungle Book* (1894) and *Second Jungle Book* (1895), *Kim* (1901), *Just So Stories* (1902), and *Captains Courageous* (1897). *Stalky and Co* , a story of a boys' school, appeared in 1899 In later life he lived in Sussex, the setting of *Puck of Pook's Hill* (1906) Besides his famous poem *If* (1910), his best later work is in *Debits and Credits* (1926) and *Limits and Renewals* (1932) England's first Nobel prize winner in literature (1907), he was buried in Westminster Abbey See his *Something of Myself* (1937), studies by Edward Shanks (1940) and Hilton Brown (1945)

Kir (kûr) [Heb ,=walled] **1** Unidentified Assyrian land to which Tiglath-pileser banished the Syrians 2 Kings 16 9, Isa 22 6, Amos 1 5, 9 7 **2** Place in Moab, identified with the place called **Kir-haraseth, Kir-hareseth** (-hăr'useth), **Kir-haresh** (hā'-ĕsh), and **Kir-heres** (hē'rēs) 2 Kings 3 25, Isa 15 1, Isa 16 17,11, Jer 48 31,36 It is customary to identify this with Kerak, Jordan, c 10 mi E of the Dead Sea, on the high road

Kirby, Rollin, 1875–, American cartoonist and illustrator, b Galva, Ill, studied under Twachtman and Whistler For many years he was a popular illustrator for leading American magazines, but he is best known for his graphic political cartoons appearing in the New York *World* (1914–31) and *World-Telegram* (1931–39) and in the New York *Post* (1939–42) After 1942 he was cartoonist for *Look* He won three Pulitzer prizes

Kirby, William, 1759–1850, English clergyman and entomologist He wrote a noted monograph on the bees of England (1802) and, with William Spence, *An Introduction to Entomology* (4 vols , 1815–26)

Kirby, William, 1817–1906, Canadian author, b England He came from England with his family in 1832, finally settling (1839) at Niagara-on-the-Lake, where he was appointed collector of customs. Besides obscure volumes of verse and tales, in 1877 he produced *Le Chien d'Or*, also published as *The Golden Dog* The great success of this romance of 17th-century Quebec was instrumental in establishing the popularity of the historical novel in Canadian fiction

Kirby-Smith, Edmund: see SMITH, EDMUND KIRBY

Kirbyville, city (pop 1,088), E Texas, N of Beaumont, founded 1895, inc 1926. It is a lumbering and farm center in a pine-woods region

Kircher, Athanasius (ätänā'syŏos kĭr'khûr), 1601?–1680, German Jesuit archaeologist, mathematician, biologist, and physicist. A pioneer in the deciphering of hieroglyphics, he was interested in all branches of science, especially in subterranean forces and in linguistic relations At first professor of ethics and mathematics at the Univ of Würzburg, he later became professor of physics, mathematics, and Oriental languages at the College of Rome, resigning in 1643 to devote himself to archaeological research His studies with the microscope led him to the belief, which he was possibly the first to hold, that disease and putrefaction were caused by the presence of invisible living bodies He also perfected the AEOLIAN HARP His remarkable collection of antiquities became the nucleus of the Museum Kircherianum of the College of Rome His writings filled 44 folio volumes and included an autobiography

Kirchhoff, Gustav Robert (gōos'täf rō'bĕrt kĭrkh'-hôf), 1824–87, German physicist He served as professor of physics at the universities of Breslau (1850–54), Heidelberg (1854–74), and Berlin (from 1875) He is known especially for his work with the SPECTROSCOPE in association with Bunsen, with whom he discovered the elements cesium and rubidium, and for his explanation of the Fraunhofer lines in the solar SPECTRUM He did important research also in electricity and thermodynamics

Kirensk (kĭrĕnsk'), city (1939 pop over 10,000), RSFSR, in central Siberia, on the Lena river It was founded in 1630

Kirghiz Soviet Socialist Republic (kĭrgēz', kûr'gēz, Rus kĭrgĕs') or **Kirghizia** (kĭrgē'zhŭ) or **Kirghizstan** (kĭrgĕstän'), constituent republic (c 76,000 sq mi , 1946 estimated pop 1,500,000), central Asiatic USSR It borders on China in the southeast and on the Kazakh SSR, the Uzbek SSR, and the Tadzhik SSR in the north, west, and southwest Frunze, the capital, and Osh are the chief cities Kirghizia is a mountainous country in the Tien Shan and Pamir systems, rising to 24,406 ft in Pobeda Peak at the Chinese border The grass highland valleys and meadows are used for sheep and cattle grazing The main agricultural areas concentrated in the valleys of the Chu, Talas, and Naryn rivers, in the FERGANA VALLEY, and in the basin of the ISSYK KUL, produce barley, oats, and rye in the upper regions and cotton, silk, grapes fruit, tobacco, sugar beets, and fiber crops in the low-lying areas Industry is based on mineral resources (notably mercury, antimony, uranium wolfram, lead, salt, and some coal and petroleum) and on agricultural processing The Kirghiz, a Moslem, Turkic-speaking pastoral people with definite Mongol strains, constitute 67 percent of the population, the rest are Russians, Ukrainians and Uzbeks Formerly known as Kara [black] Kirghiz to distinguish them from the Kazakhs (formerly called Kirghiz), the Kirghiz migrated here (about the 16th cent) from the region of the upper Yenisei and came (19th cent) under the rule of the khanate of Kokand, with which they passed (1876) to Russia An autonomous oblast since 1924, Kirghizia was raised to an autonomous (1926) and a constituent (1936) republic

Kirkaldy of Grange, Sir William (kûrkŏl'dē), c 1520–1573, Scottish soldier and politician

Prominent in the Scottish religious wars, he was associated with his father in the brutal murder of Cardinal Beaton in 1546 Seized by the French in 1547, he was held prisoner in France until 1550, when he escaped to become a secret agent of Edward VI in France On the accession of Mary I to the English throne in 1553 he entered the service of the king of France Pardoned for his part in the murder of Beaton, he returned to Scotland in 1557 and became a prominent Protestant leader, taking a stand against the marriage of Mary Queen of Scots with Lord Darnley He was implicated in the assassination of Rizzio After Mary's marriage to Bothwell, Kirkaldy was the leader to whom she surrendered at Carberry in 1557, bringing to an end Mary's actual reign While she was a prisoner in England, Kirkaldy shifted his allegiance to Mary's supporters and held Edinburgh castle for her, bringing upon himself the denunciation of his former friend, John Knox, and of other Presbyterian leaders In 1573 he was forced to surrender the castle to a Scottish-English force and was hanged See L A Barbé, *Kirkaldy of Grange* (1897), Andrew Lang, *History of Scotland*, Vol II (1902)

Kirkcaldy (kurkô'dĭ, -kôl'dĭ), burgh (1931 pop 43,874, 1948 estimated pop 48,671), Fifeshire, Scotland, N of Edinburgh and on the Firth of Forth It includes DYSART Kirkcaldy's main street, 4 mi along the coast, gave rise to the name "Lang Toun" The burgh is the birthplace of Adam Smith, and Thomas Carlyle and Edward Irving were schoolmasters here at the same time Kirkcaldy's industries include textile printing and the manufacture of farm machinery and boilers

Kirkcudbright (kurkōō'brĭ), burgh (pop 2,311), county town of Kirkcudbrightshire, Scotland, at the head of the Dee estuary and SW of Dumfries The ruined castle of the McClellans is here

Kirkcudbrightshire (kûrkōō'brĭshĭr) [Scottish, = Church of St Cuthbert] maritime county (899 sq mi, 1931 pop 30,341, 1948 estimated pop 31,217), SW Scotland The county town is Dalbeattie The county is bordered on the south by the Solway Firth, along which it extends in a bold, rugged coast line The northwest portion of the county is wild and hilly country Agriculture (oats, turnips, and potatoes) is the chief occupation, and much of the land is devoted to cattle grazing The region, sometimes referred to as East GALLOWAY, led a turbulent, semi-independent existence even after it was formally annexed to the crown in 1124

Kirke, Sir David (kûrk) 1596–1654, French-born English merchant adventurer In 1627 he and his brothers Lewis and Thomas sailed in a fleet outfitted by their father, Gervase Kirke, and Sir William Alexander to root out the French settlement in Canada and settle Nova Scotia Near Newfoundland they seized 20 French vessels They then reduced the French stations in Nova Scotia, David went back to England with captive leaders and spoils In 1629 he returned and forced Samuel de CHAMPLAIN to surrender Quebec Meanwhile Charles I had made peace with France and all possessions taken after April 24, 1629, were restored Knighted in 1633, Sir David went to Newfoundland in 1638 as governor and colonizer In the civil war the brothers were royalist, and Thomas died fighting in England Sir David was deprived of Newfoundland when the Commonwealth came into power A portion of his properties were restored to him shortly before his death See Henry Kirke, *First English Conquest of Canada* (1871)

Kirkintilloch (kûrkĭntĭ'lŏkh), burgh (pop 11,817), Dumbartonshire, Scotland It became a burgh in 1170 There are remains of the fort at the end of the Wall of Antoninus and fragments of the wall

Kirk-Kilissa, Turkey, see KIRKI KILISI

Kirkland, Samuel, 1741–1808, American missionary to the Oneida Indians, b Norwich, Conn, grad College of New Jersey (now Princeton), 1765 After 1766, he went among the Oneida lived according to their customs preached to them, and became their valued counselor He is credited with a part in preventing the Iroquois from joining a confederacy against the whites which the Shawnee Indians urged at the time of Lord Dunmore's War (1774) Kirkland kept the Oneida loyal to the colonists throughout the American Revolution, after the war he assisted in making treaties of peace with the Iroquois and in working out plans for their welfare He again (1790–92) pacified the Six Nations, when there was some danger of their joining the Ohio tribes in revolt He realized one of his life's ambitions when (1793) he received—through the aid of Alexander Hamilton—a charter from New York state to found Hamilton Oneida Academy for the education of American and Indian youth Few Indians attended, however, and as Hamilton College it changed over to a regular curriculum

Kirkland, town (pop 2,084), W Wash, on Lake Washington opposite Seattle, settled 1872, inc 1905.

Kirkland Lake, mining town (1948 estimated pop 19,734), E Ont, N of Sudbury and near Quebec Three of Ontario's largest gold mines are here

Kirklareli (kĭrklä'rĕlē), town (14,412), European Turkey, E of Adrianople A trade center, it is noted for its numerous mosques and Greek churches Here in the First Balkan War the Bulgarians defeated (1912) the Turks The town was formerly known as Kirk-Kilissa

Kirklees (kûrk"lēz'), village, West Riding of Yorkshire, England, NE of Huddersfield It has ruins of a Cistercian convent There is a legend that Robin Hood died here

Kirksville, city (pop 10,080), co seat of Adair co, N Mo, N of Moberly, founded c 1841, inc 1857 It is the trade and industrial center of a dairy, livestock, poultry, and coal area, shoes are made here Northeast Missouri State Teachers College and Kirksville College of Osteopathy and Surgery are in Kirksville

Kirkuk (kĭrkōōk'), town (pop c 30,000), NE Iraq, c 230 mi N of Baghdad It is built on a mound containing the remains of settlements going back to 3000 B C It is in a region yielding fruit and wheat and is one of the chief market towns of Kurdistan The great Kirkuk oil fields are linked by pipe line to the Mediterranean, one branch going to Tripoli (Lebanon), the other to Haifa, (Israel)

Kirkwall (kûrk'wôl, -wul), burgh (1931 pop 3,517, 1948 estimated pop 4,376), capital of the Orkney Islands, Scotland, on the east coast of Pomona It has a good harbor and carries on trading, fishing, and boatbuilding The Cathedral of St Magnus was founded by Rognvald, jarl of Orkney, in 1137 The adjoining bishop's palace, in ruins, dates also from the 12th cent King Haakon IV of Norway died here in 1263

Kirkwood, Daniel, 1814–95, American astronomer and teacher, b Bladensburg, Md He became professor of mathematics in Delaware College in 1851 and was president of the college from 1854 to 1856 Then he went to the Univ of Indiana as professor of mathematics He was much interested in mathematical astronomy, and in 1891 he was appointed lecturer on astronomy at Stanford Univ His research work was principally devoted to comets and meteors and to the lacunae in the distribution of the orbits of the asteroids and in the ring system of Saturn Among his publications are *Meteoric Astronomy* (1867), *Comets and Meteors* (1873), and *The Asteroids* (1887) His detailed criticism of the nebular hypothesis of Laplace gained notice

Kirkwood, Samuel Jordan, 1813–94, Civil War governor of Iowa (1860–64), b Harford co, Md Moving to Ohio in 1835, he served (1845–49) as prosecuting attorney for Richland co and was a member (1850 51) of the Ohio constitutional convention In 1855 he settled in Iowa and was elected (1856) to the state legislature and then to the governorship for two terms A thoroughgoing radical Republican, he supplied the Union army with over 50 regiments of infantry and cavalry, partly fitted out with his own money Conscription was unnecessary during his stay in office, and he also successfully quelled internal dissension In 1866 Kirkwood was appointed to the U S Senate to fill an unexpired term and served until 1867 He was elected governor for a third term (1876–77), was in the U S Senate again (1877 81) and served as Secretary of the Interior (1881–82) by appointment of President James A Garfield See biography by Dan E Clark (1917), William B Hesseltine, *Lincoln and the War Governors* (1948)

Kirkwood, city (pop 12,132), E Mo, business and residential suburb of St Louis, laid out 1852, inc 1865

Kirov, Sergei Mironovich (sĭrgā' myĭrô'nuvĭch kē'ruf), 1888–1934, Russian Communist leader He fought in the civil war of 1917–20 and rose to power as one of Stalin's most trusted aides A member of the Politburo from 1930, he urged the democratization of the administrative system and the abolition of class distinctions He was secretary of the Communist party at Leningrad when he was assassinated The arrests that followed his murder led to the announcement of the discovery of an alleged plot fomented by TROTSKY, ZINOVIEV, KAMENEV, RYKOV, and others The party purge and the treason trials of the following years were the outgrowth of Kirov's murder The new constitution of the USSR, promulgated in 1936, is said to have been based on Kirov's reform project

Kirov (kē'ruf), formerly **Vyatka** (vyät'kŭ), city (pop 143,181), capital of Kirov oblast, E European RSFSR, on the Vyatka river It is an industrial and historic center and an important communications point Founded (12th cent) by Novgorod colonists as Khlynov, it soon became the capital of an independent republic which in 1482 was annexed to Moscow by Ivan III In the 19th cent, Vyatka was used as a place of political exile The industrial growth of the city began after the Russian Revolution Vyatka was renamed for S M Kirov in 1934 There is a citadel with an 18th-century cathedral

Kirovabad (kē"ruvŭbät'), city (pop 98,743), W central Azerbaijan SSR, on the Gandsha river Formerly named Gandsha or Ganja, it was the capital of a khanate under Persian suzerainty until its conquest (1804) by the Russians, who named it Elisavetpol It became Gandzha again after the Russian Revolution, but in 1935 it was renamed in honor of S M Kirov The city is an industrial center, producing cotton textiles, cottonseed oil, copper sulphate, and wine It has a 17th-century mosque

Kirovograd (kē"ruvŭgrät'), city (pop 100,331), capital of Kirovograd oblast, S central Ukraine, on the Ingul river It is the center of an agricultural region It was founded as a fortress in 1754 and named Elisavetgrad (also spelled Yelisavetgrad) for Empress Elizabeth Between 1881 and 1919 it was the scene of several pogroms (massacres of Jews) It was renamed Zinovievsk in 1924, Kirovo in 1936, and Kirovograd in 1939 In the Second World War it was held (1941–43) by the Germans

Kirovsk (kē'rufsk), city (1939 estimated pop 50,000), N European RSFSR, on the Kola Peninsula and the Murmansk RR Founded in 1929, it is the center of the apatite, nephelite, and titanium mines in the Khibiny mts It was called Khibinogorsk until 1934

Kirriemuir (kĭrĭmūr'), burgh (pop 3,326), Angus, Scotland, NW of Forfar It is a linen-weaving village and is the "Thrums" of James M Barrie, who was born here

kirschwasser (kĭr'shvä"sur) [Ger, = cherry water], a LIQUEUR made principally in Germany from the pulp and crushed stones of the cherry, fermented, then distilled and sweetened

Kirsehir (kērshĕ'hĕr), town (pop 13,783), central Turkey, c 85 mi SE of Ankara It is noted for its carpet manufacture

Kirshon, Vladimir Mikhailovich (vlädē'mĭr mēkhī'luvĭch kērshôn'), 1902–37, Russian dramatist He began his career with *Red Rust* (1927, Eng tr, 1930), a play showing the degeneration of a revolutionist under the New Economic Policy His play *Bread* (1930, Eng tr, 1934) deals with the struggle against hoarding on collective farms He was an ardent spokesman for the new order in Russia

Kirtland Hills, village (pop 237), NE Ohio, NE of Cleveland, settled 1808–9, inc 1926 The first Mormon temple was built here, 1833–36, by Joseph Smith and his followers

Kirun, Formosa, see KEELUNG

Kiruna (kē'runa), village (pop 10,684), Norrbotten co, N Sweden It is the center of the Lappland iron-mining district A model town, which was built after the opening of the mines (c 1900), Kiruna is run entirely by electricity from the PORJUS power station The ore, more than 70 percent pure, is mined on the surface and shipped on the Lappland RR (completed 1903) to the Baltic port LULEÅ and to the ice-free Atlantic port, NARVIK, Norway It was to prevent shipment of Kiruna ore to Germany that, in the Second World War, the Allies attempted to seize Narvik (1940)

Kirwan, Richard (kûr'wĭn), 1733–1812, Irish chemist and geologist He was one of the last defenders of the PHLOGISTON theory, which he upheld in his *Essay on Phlogiston and the Constitution of Acids* (1787) His arguments were answered by Lavoisier and other French chemists, and he finally gave up the theory in 1791

Kiryat Haim (kĭr'yät hīm'), town (pop c 10,000), N Israel, 5 mi E of Haifa, founded 1933 It is chiefly a settlement of farmers The name is also spelled Kiriat Haim and Qiryat Hayim

Kiryu (kĭrū'), city (1947 pop 91,482), Gumma prefecture, central Honshu, Japan It is a major center in the production of silk and rayon

Kisfaludy, Charles (kĭsh'fŏlōdĭ), Hung *Kisfaludy Károly* (kä'roi), 1788–1830, Hungarian dramatist, founder of the Hungarian national drama His *Tatars in Hungary* (1819) was the first genuinely dramatic Hungarian play and the first of the many successes by which he established the national drama He was cofounder (1822), with his brother, and editor of the literary journal *Aurora*, in which Michael Vorosmarty and other poets were introduced Among his works are the comedies *The Suitors* and *The Rebels* and the tragedy *Irene* His brother, the poet **Alexander Kisfaludy,** Hung *Kisfaludy Sándor* (shän'dôr), 1772–1844, founded the Hungarian school of lyric poetry He is especially famous for his two volumes of love lyrics, *The Loves of Himfy* (1801, 1807)

Kish 1 Father of Saul 1 Sam 9 1, 10 21 Chr Acts 13 21 **2** Uncle of Saul 1 Chron 8 30, 9 36 **3** Ancestor of Mordecai Esther 2 5 **4** Merarite 1 Chron 23 21, 24 29, 2 Chron 29 12

Kish, ancient city of Mesopotamia, in the Euphrates valley, c 8 mi E of Babylon It was occupied from very ancient times and was a Sumerian city in the 4th millennium B C, when it seems to have been powerful and rich The site, first visited by a European in modern times in 1816, has been thoroughly excavated since 1922 The finds in the earliest city are invaluable for understanding early Mesopotamia, and nearer the surface there were also valuable discoveries, especially a palace of Sargon of Agade and a great temple built by Nebuchadnezzar and Nabonidus in the later Babylonian period

Kishi (kĭ'shĭ), Levite see KUSHAIAH

Kishinev (kĭshĭnyôf'), Rumanian *Chisinau*, city (1930 pop 114, 896), capital of the Moldavian SSR First mentioned c 1420, it was the cultural,

spiritual, commercial, and (after annexation by Russia in 1812) political center of BESSARABIA. Until 1941 about 40 per cent of the population was Jewish, and it was the scene of a severe pogrom in 1903. The region produces wine and agricultural products.

Kishion (kĭ'shĕôn) [Heb. =hardness], unidentified Levitical border town, W of the Sea of Galilee. Joshua 19:20. Kishon. Joshua 21:28. Kedesh. 1 Chron. 6:72.

Kishon (kĭ'shŏn) [Heb. =tortuous], river of central Palestine, rising below Mt. Gilboa, flowing NW through the Vale of Esdraelon, and emptying into the Mediterranean near Haifa. On its banks occurred the defeat of Sisera and the slaying by Elijah of the prophets of Baal. Judges 4:7,13; 5:21. 1 Kings 18:40. Kison. Ps. 83:9. In Arabic the name is Nahr el-Mukatta. For another Kishon, see KISHION.

Kiska, island, c 20 mi. long, off W Alaska, in the Rat Islands group, one of the ALEUTIAN ISLANDS. It is mountainous, rising to nearly 4,000 ft. in Kiska Volcano. It lies about halfway between Adak and Attu and was important in the Second World War. It was occupied and strongly garrisoned by the Japanese in 1942. In 1943 it was cut off by the U. S. recapture of Attu and the Japanese evacuated it in Aug., 1943. An American air and naval base was established.

Kiskunfelegyhaza, Hung. *Kiskunfélegyháza* (kĭsh'-kōōnfā"lĕ-dyuhä"zŏ), city (pop. 38,930), central Hungary, 15 mi. SSE of Kecskemet, sometimes called only Felegyhaza. Destroyed by the Turks, it was rebuilt in the 1740s. It is the market center for a cattle-raising and fruit-growing region.

Kislovodsk (kĕslŭvôtsk') [Rus., =acid water], city (pop. 51,289), S Stavropol Territory, RSFSR, in the central Greater Caucasus, SW of Pyatigorsk. It is a famous health resort with mineral springs and has sanatoriums and a physico-therapeutical institute. During the Second World War it was held (1942–43) by the Germans.

Kismarton, Austria: see EISENSTADT.

Kismayu (kĭsmī'ōō), Ital. *Chisimaio* (kēzēmä'yō), town (pop. 10,000), S Italian Somaliland, a port on the Indian Ocean. It was founded in 1872 by the sultan of Zanzibar. Great Britain held it from 1887 until 1924, when it was transferred to Italy. There are mosques and a fort, which were constructed by the sultan.

Kison (kī'sŏn), river of Palestine: see KISHON.

Kispest (kĭsh'pĕsht), industrial suburb (pop. 65,149), Hungary, SE of Budapest.

Kiss, August (ou'gōōst kĭs') 1802–65, German sculptor, especially known for his animals in bronze. He attained fame with the model of his *Mounted Amazon Attacked by a Tiger* (1839), later it was executed in marble for Louis I of Bavaria and in bronze for the steps at the entrance to the Berlin Museum. Among his other works are *St. George Slaying the Dragon* for the Old Palace, Berlin, and an equestrian *Frederick the Great* at Breslau.

Kissimmee (kĭsĭm'ē), city (pop. 3,225), co. seat of Osceola co., central Fla., on Tohopekaliga Lake S of Orlando. It is a hunting and fishing resort and a trade center for cattle country.

Kissimmee, Lake, central Fla., N of Lake Okeechobee, E of Tampa, one of the state's largest freshwater lakes.

Kissingen, Bavaria: see BAD KISSINGEN.

Kistna (kĭst'nu) or **Krishna** (krĭsh'nu), river, c 800 mi. long, rising in Bombay state, in the Western Ghats. It flows generally SE and E across Hyderabad, then forms the Hyderabad-Madras border for a short distance, and crosses Madras prov. to empty into the Bay of Bengal. The river supplies water for irrigation. Its association with the Hindu god Krishna makes it sacred.

Kitasato, Shibasaburo (shĭbä'sähbōōrō kē'täsä'tō), 1852–1931, Japanese physician. He worked with Robert Koch in Germany (1885–91), and after returning to Japan he founded an institute for the study of infectious diseases of which he became director (1891). His most noted contribution to bacteriology was the discovery (1894) of the infectious agent of bubonic plague which he described simultaneously with Alexandre Yersin.

Kit Carson Peak, 14,100 ft. high, S central Colo., in the Sangre de Cristo Mts. of the Rockies.

Kit-Cat Club, London social and political club, active c 1700–1720. It was organized by Jacob TONSON, a publisher, and other Whig supporters of the Hanoverian dynasty. Membership included Sir Robert Walpole, Congreve, Addison, Steele, and Sir Godfrey KNELLER, who painted portraits of 48 of the members. The club was probably named after Christopher Cat in whose bakery and tavern early meetings were held.

kitchen. When cooking first moved indoors, it was performed, with other domestic labors, in the common room, where the fire burned on the hearth, or—even more primitively, before chimneys were known—on the floor in the center of the room. With the building of larger houses, the kitchen became a separate room. Little is known of the culinary arrangements of antiquity. Excavations at Pompeii show separate rooms fitted with the simple equipment still used by some Orientals. A large brasier, or metal basket on legs, held burning charcoal over which a single basin could be simmered. In homes of wealthy Romans a bench or "range" of brick or masonry contained several holes, so that a number of dishes could be cooked at once. Water was kept in jars and heated in large caldrons. Although the peoples of N Europe used stoves from ancient times for heating, they cooked over open fires, and baked in outdoor ovens. In the Middle Ages, many of the finest kitchens were in the monasteries, the kitchens were in separate buildings and were equipped for cooking, brewing, and baking on a large scale. In rustic communities and poorer homes, the kitchen still holds its ancient place as center of the house. In American colonial and pioneer days it was large enough to accommodate the operations of spinning, weaving, sewing, knitting, and harness mending, as well as cooking. Early American manor houses, especially in the South, usually had separate kitchens, often connected with the house by a covered way or porch. Many farmhouses, before the use of gas or oil stoves, had a summer kitchen where canning and preserving and the preparation of meals for harvest hands could be carried on without heating the house. The study of HOME ECONOMICS has resulted in kitchens which are scientifically planned to save steps and time.

Kitchen Cabinet, popular name for the group of intimate, unofficial advisers of President Andrew JACKSON. Jackson early in his administration abandoned official cabinet meetings and used his department heads almost entirely to execute departmental duties, while the policies of his administration were formed in meetings of the Kitchen Cabinet. The members of the informal cabinet included the elder Francis P. BLAIR, Duff GREEN, Isaac Hill, Amos KENDALL, and William B. Lewis. John H. EATON of the regular cabinet met with the group. Martin VAN BUREN also was taken into its confidence. The members of the Kitchen Cabinet were able journalists, editors of influential regional newspapers. They continued to wield effective pens in defense of the administration measures after they came to Washington. Kendall—perhaps the ablest and most influential member—vigorously defended the policies of Andrew Jackson in the *Globe*, the administration journal edited by Francis P. Blair.

Kitchener, Horatio Herbert Kitchener, 1st Earl, 1850–1916, British field marshal and statesman. Trained at the Royal Military Academy, Woolwich (1868–70), he was commissioned second lieutenant in the Royal Engineers (1871) after a brief period of service in the French army. After duty in Palestine, Cyprus, and Egypt, he was attached (1883) to the Egyptian army, then in the course of British reorganization. He attempted unsuccessfully (1884) to relieve Gen. Charles George GORDON, who was besieged by Mahdists at Khartoum. He was governor general of Eastern Sudan (1886–88) and helped turn back the last Mahdist invasion of Egypt (1889). In 1892 he was made sirdar (commander in chief) of the Egyptian army and in 1896, on the formation of Salisbury's imperialist ministry, began the reconquest of the Sudan, preparing the way by careful administrative work and the construction of a railway along the Nile. He won brilliant victories at Firket (1896), at Abu Hamed (1896), near Atbara (1898), and at Omdurman (1898) and finally established himself at Khartoum. He was made governor general of the Sudan. In 1899 he was called to the SOUTH AFRICAN WAR as chief of staff to Lord Roberts. As second in command he reorganized transport, led an unsuccessful attack on Paardeberg, and suppressed the Boer revolt near Priska. In 1900, when Roberts returned to England, believing the Boer resistance crushed, Kitchener was left to face the continued guerrilla warfare led by Christian De Wet and Louis Botha. By a slow extension of fortified blockhouses and the systematic denudation of the farm lands—a method for which he was much criticized—Kitchener finally secured Boer submission (1902). Kitchener was created viscount and sent to India as commander in chief of British forces there. He redistributed the troops and gained greater administrative control of the army in the face of serious opposition from the viceroy, Lord Curzon. He left India in 1909, was made field marshal, and served (1911–14) as consul general in Egypt. At the outbreak of the First World War, Kitchener was recalled to England as secretary of state for war. Virtually alone in his belief that the war would last a number of years, he planned and carried out a vast expansion of the army from 20 divisions in 1914 to 70 in 1916. In 1915 he was attacked by the newspapers owned by NORTHCLIFFE for the British lack of munitions. His relations with the cabinet were strained, and he even offered to resign. Kitchener greatly feared Russia's inability to continue resistance. In 1916 he sailed on H.M.S. *Hampshire* to confer with the tsar and Russian military leaders. The *Hampshire* was sunk under mysterious circumstances off the Orkney Islands and Kitchener was drowned. He was idolized by many Englishmen as one of the great military leaders of British imperial expansion. See biographies by R. B. Esher (1921), George Arthur (3 vols., 1920), and Arthur Hodges (1936).

Kitchener, city (pop. 35,657), co. seat of Waterloo co., S Ont., in the Grand River valley W of Toronto. Settled largely by Germans from Pennsylvania in 1806, it was known as Berlin until 1916, when it was renamed in memory of Lord Kitchener. Its industries include manufacturing, tanning, and meat packing. The town of Waterloo adjoins the city. St. Jerome's College (junior) is here, and Victoria Park is notably attractive.

kitchen midden, refuse heap left by a prehistoric community. Middens were first studied in Denmark as furnishing material of value to anthropology. They vary in age and are found in both hemispheres. Those near coasts, as in Denmark and in Inwood Park, New York city, usually consist largely of shells of edible molluscs. Bones indicate what fishes, birds, and mammals were used as food. Pottery and implements of stone and bone are found in middens, giving evidence as to the race and the time of the people who occupied a site.

kite, bird of prey allied to the hawk and the eagle and noted for grace in flying. The swallow-tailed, white-tailed, and Everglade kites, found chiefly in marshes and woodlands of the S United States, are known in South America, while the Mississippi kite is found only rarely as far south as Guatemala. Kites feed mainly on small reptiles and insects. The Everglade kite limits its diet to a fresh-water snail. The common kite of England, once abundant and now one of the rarest birds of prey, used to act as a scavenger in the streets of London.

kite, an aircraft restrained by a towline and deriving its lift from the aerodynamic force of the wind upon it. Commonly the kite consists of a light framework upon which paper, silk, or other thin material is stretched. Some consist of one plane surface, some have more than one surface with the surfaces in different planes, and others are compound, i.e., they are a combination of the features of plane-surface kites with those having more than one plane surface. Those having one plane surface generally require a tail for balancing. Kites are often made in the shape of animals and in other forms. Kite making has long been practiced in China, Japan, Java, and the Malay Peninsula. It is thought that the first use of kites to secure meteorological information was made by Alexander Wilson of Scotland, who in 1749 used them to carry thermometers aloft. In 1752 Benjamin Franklin used kites to study the electricity of lightning. The box kite was invented c 1893 by Lawrence Hargrave, an Australian, and in variously modified forms it was utilized for carrying aloft self-recording meteorological instruments from c 1894. After airplanes became available this use of kites was gradually discontinued. The tetrahedral kite was used by Alexander Graham Bell for making experiments on problems of airplane construction. See L. H. Hunt, *25 Kites That Fly* (1929).

kithara (kĭ'thurŭ) or **cithara** (sĭ'thŭru), musical instrument of the ancient Greeks. It was a larger form of the LYRE, used by professional musicians both for solo playing and for the accompaniment of poetry. It consisted of a wooden frame with a resonator box and was strung originally with 5 strings. Later there were 7 strings, and finally (5th cent. B.C.) 11 strings.

Kithlish (kĭth'-), unidentified town, SW Palestine. Joshua 15:40.

Kitron (kī'trŏn), unidentified town, N central Palestine. Judges 1:30.

Kittanning (kĭtă'nĭng), industrial borough (pop. 7,550), co. seat of Armstrong co., W Pa., on the Allegheny river and N of Pittsburgh, settled 1796, laid out 1804, inc. 1821. It has collieries, foundries, and brick and clay works. The original site an Indian village, was destroyed (1756) by John Armstrong.

Kittatinny Mountain (kĭtŭtĭn'ē), ridge of the Appalachian system, extending from its junction with the Shawangunk Mt. in SE New York across New Jersey to join Blue Mt. in E Pennsylvania.

Kittery (kĭ'turē), town (pop. 5,374), extreme SW Maine. It is at the mouth of the Piscataqua opposite Portsmouth, N.H., with which it is connected by two bridges (1923, 1940). A settlement called Piscataqua was made here in 1622; it was incorporated as Kittery (the first town in Maine) in 1647 and grew as a trading, fishing, lumber-shipping, and shipbuilding place. John Paul Jones's ship *Ranger* was built (1777) in Kittery by Portsmouth shipwrights; the *Kearsarge* of Civil War fame was also built here. The Portsmouth naval base (see PORTSMOUTH, N.H.) is located on islands formerly part of Kittery, now Federal property, and is connected with Kittery by two bridges. At Kittery Point, now a resort, is the old William Pepperrell house (1682). Celia Thaxter's home was on Cutts Island, part of Kittery town.

Kittim or **Chittim** (both kĭ'tĭm), biblical term for Cyprus, but often extended to include lands in general W of Syria. The name is connected with that of the Cyprian port CITIUM. Gen. 10:4; Num. 24:24; 1 Chron. 1:7; Isa. 23:1,12; Jer. 2:10, Ezek. 27:6, Dan. 11:30; 1 Mac. 1:1.

Kittredge, George Lyman, 1860–1941, American scholar, b. Boston, grad Harvard, 1882 He joined the faculty of Harvard in 1888 and was professor of English there from 1896 until his retirement in 1936. An authority on Chaucer, Shakspere, the English language, balladry, and witchcraft, he wrote and edited books on all these subjects His one-volume edition of the complete works of Shakspere appeared in 1936, the first of his more detailed editions of the separate plays appeared in 1939, but the series was not completed

Kitty Hawk or **Kittyhawk,** sandy peninsula, NE N C , E of Albemarle Sound It was the scene from 1900 to 1903 of the Wright brothers' experiments with gliders and airplanes On the sand dunes here was established in 1927 the Kill Devil Hill National Memorial (314 40 acres) to commemorate their first successful flight

Kitzbühel (kĭts'bü"hul), town (pop 7,910), Tyrol, W Austria, NNE of Innsbruck It is a world-famous winter resort and skiing center.

Kiungchow, China see KIUNGSHAN

Kiungshan (kyôông'shän'–), Mandarin *Chung-shan,* city and county (pop 376,294), on Hainan, an island of Kwangtung prov , China Formerly a TREATY PORT, Kiungchan now exports hops, ginger, copra, sugar, coffee, and rubber It was formerly called Kiungchow

Kiuprili see KUPRILI

Kiushu: see KYUSHU

kiva (kē'vŭ), large, underground ceremonial chamber, peculiar to the ancient and modern PUEBLO INDIANS The modern kiva probably evolved from the slab houses (i e , storage pits and dwellings, which were partly underground and lined with stone slabs set on edge) of their cultural ancestors, the Basket Makers Modern kivas are either rectangular or circular structures with timbered roofs They are entered through a hatchway by means of ladders The floor is made of smooth sandstone slabs, and the walls of fine masonry There is a dais at one end, a fire pit in the center, and an opening in the floor at the other end This orifice represents the entrance to the lower world and the place of emergence through which animals and people come to this world The walls also have a symbolic significance and are decorated with mythological figures Although women keep the outside of the wall well plastered and bring food to the men, they are not allowed to enter the kiva Men use the kiva for secret ceremonies, as a lounging place, and as a workshop where weaving is done

Kivu (kē'vōō), lake, c 65 mi long, on the border of Belgian Congo and Tanganyika It is c 4,900 ft high in the Mfumbiro range

Kiwanis International (kĭwä'nĭs), organization of business and professional men, founded in 1915 at Detroit, Mich The local Kiwanis clubs meet weekly, their activities are carried on through committees and include agriculture, public affairs, business standards, support of churches, work with boys and girls, and vocational guidance Besides several pamphlets dealing with its various activities, Kiwanis publishes the *Kiwanis Magazine,* the *Monthly Club Bulletin,* and the *Keynoter,* publication of the Key-Club International, an organization of outstanding high school students Each local club has a voice in Kiwanis International and is entitled to two delegates at the annual convention There are clubs throughout the United States, Canada, Alaska, Hawaii, and the Yukon

kiwi (kē'wē) or **apteryx** (ăp'tĕrĭks), flightless bird of New Zealand, 17 to 30 in long Its wings are vestigial and it walks with its back hunched Nocturnal in habit, it hunts its food (worms, insects, and grubs) largely by scent Its nostrils open at the tip of its long, slender, slightly curved bill One or two eggs, which may weigh a pound each, are laid The male utters a hoarse, shrill whistle, often like "kee-wee " The Maoris' pursuit of the bird for food may lead to its extinction

Kiyonaga (kyō'nägä), 1752?–1815, Japanese painter and designer of woodcuts of the Toru school After working as a bookseller in Tokyo, he took lessons from the Toru master Kiyomitsu but created a more individual linear style He is best known for his cuts of beautiful women and of warriors He published (1785–1811) over 100 illustrated books as well as many single sheets His unmannered, vivid style had wide appeal and won him many followers See study by Chie Hirano (1939)

Kizel (kēzyĕl') city (1933 estimated pop 40,000), RSFSR. It is a leading coal-mining center of the central Urals, the Kizel coal basin (560 sq mi) has an estimated reserve of 3,435,000,000 tons of bituminous coal and has been exploited since the mid-19th cent

Kizil or **Kyzyl** (both kĭzĕl'), city (1939 pop over 10,000), capital of Tuva Autonomous Oblast, RSFSR, on the Yenisei

Kizil Irmak (kĭ'zĭl ĭrmäk'), anc *Halys,* river, 715 mi long, rising in N central Turkey, E of Sivas, and flowing in a wide arc SW, N, and NE into the Black Sea.

Kizil Kum or **Kyzyl-Kum** (both· kĕzĕl' kōōm'), desert, **Kazakh SSR** and **Uzbek SSR,** in central Asia. It stretches eastward from the Aral Sea between the Amu Darya and Syr Darya rivers, rises to 3,380 ft. in its central section, and is partly covered by sand dunes Its seminomadic population raises karakul sheep

Klabund (klăbŏŏnt'), pseud of **Alfred Henschke,** (äl'frät hĕnsh'ku), 1890–1928, German poet, novelist, and dramatist Most of his lyrics appeared first in the periodical *Pan* Those in *Totenklage* (1918-19) were written in memory of his wife The so-called "Chinese" poems were original, not translations, his Chinese play, *Kreidekreis* (1924, Eng tr , *Circle of Chalk,* 1929), was very popular Several of his short novels have been translated—*Bracke* (1918, Eng tr , *Bracke the Fool,* 1927), *Pjotr* (1923, Eng tr , *Petr the Czar,* 1926), and *Borgia* (1928, Eng tr , *The Incredible Borgias,* 1929).

Kladno (klad'nō), industrial city (pop 19,166), central Bohemia, Czechoslovakia, c 10 mi W of Prague The center of a coal basin, it has large iron and steel plants

Klagenfurt (klä'gunfōōrt), city (pop 65,799), capital of Carinthia, S Austria, on the Glan river in a mountain lake area SW of Graz An episcopal see since the late 18th cent , it has a cathedral and a theological seminary The picturesque Lindwurmbrunnen [fountain of the dragon] was erected in 1590 The city is a well-known winter sports center and has varied manufactures.

Klaipeda see MEMEL

Klamath (klă'muth), river, c 270 mi long, with its main source in Upper Klamath Lake, SW Oregon, flowing generally SW into NW California and across to the Pacific

Klamath Falls, city (pop 16,497), co seat of Klamath co , SW Oregon, at the southern tip of Upper Klamath Lake near the Calif line, settled c 1866 as Linkville, platted 1878, inc 1889, named Klamath Falls 1893, reinc 1905 The Klamath irrigation project (1900) and the coming of the railroad (1909) stimulated growth from a hamlet to a thriving industrial city, center of an area carrying on lumbering, farming, canning, and sheep and cattle raising The Klamath Indian Reservation is near

Klamath Indians, tribe of North American Indians In the 19th cent they lived in SW Oregon They constitute the northern branch of the Lutuamian linguistic stock, their neighbors, the Modoc Indians, belong to the southern branch The material for the first description of the Klamath was collected by Peter Skene Ogden, who visited them in 1829 and opened trade relations They lived by hunting, fishing, root digging, and collecting wokas (lily pond) seeds The Klamath were peaceful towards the whites but not towards the N California Indians They raided those tribes periodically and carried off the women and children, keeping their captives as slaves or selling them to other Indians By the treaty of 1864 with the United States, the practice of slavery was abolished and their land NE of Upper Klamath Lake was set aside as the Klamath Indian Reservation Today they are farmers and number some 1,100 A relationship has been suggested among Lutuamian, Shahaptin, and Wanlatpuan linguistic families See Albert Gatschet, *The Klamath Indians* (1890), Leslie Spier, *Klamath Ethnography* (1930)

Klaproth, Martin Heinrich (mär'tēn hīn'rĭkh klap'rōt), 1743–1817, German chemist In 1810 he became professor of chemistry at the Univ of Berlin In 1789 he had recognized the presence of zirconium in the ore zircona and of uranium in a precipitate of pitchblende, but did not have the technical equipment to isolate the elements in a pure state, he also worked on other elements, including titanium (which he rediscovered) and tellurium

Klatovy (klä'tôvē), Ger *Klattau* (klä'tou), city (pop 12,236), W Bohemia, Czechoslovakia It has tanning, chemical, and clothing industries There are Gothic and baroque churches and many quaint old houses

Klausenburg, Rumania see CLUJ.

Klaypeda. see MEMEL.

Kléber, Jean Baptiste (zhäN' baptēst' klābĕr'), 1753–1800, French general, b Strasbourg He studied architecture and later military engineering, served in the Bavarian army from 1777 to 1785, and in 1789 entered the French National Guard He fought with distinction in the French Revolutionary Wars and accompanied Napoleon to Egypt Left in command when Napoleon returned to France (1799), he defeated the Turks at Heliopolis (March 20, 1800) He was assassinated (June 14) at Cairo by a Moslem fanatic

Klebs, Edwin (klāps), 1834–1913, German-American pathologist, b. Prussia He was an assistant of Virchow and professor of pathology at Zurich (1872–92) and from 1896 at Rush Medical College, Chicago He is known for his many original observations on the pathology of infectious diseases He worked on tuberculosis, anthrax, and syphilis and saw the diphtheria bacillus and typhoid bacillus although he did not demonstrate them to be the causes of these diseases. The diphtheria bacillus is also known as the **Klebs-Löffler** bacillus.

Klee, Paul (poul' klā'), 1879–1940, German expressionist painter, b Switzerland, son of a music master He taught in the Bauhaus in Weimar and in Dessau and was professor in the Düsseldorf Academy in 1930 His nonrepresentational paintings are enjoyed for their charming color and entertaining design Klee is represented in the Museum of Modern Art, New York, in the Phillips Memorial Gallery, Washington, D C , and in galleries in Detroit and The Hague See *Paul Klee on Modern Art* (with introduction by Herbert Read, 1949)

Klein, Charles (klīn), 1867–1915, American playwright, b London His plays, originally popular for their timely topics, have disappeared because of their melodramatic construction pointed toward the effect of the big scene *The Auctioneer* (1901) and *The Music Master* (1904) both starred David Warfield under Belasco's management

Klein, Felix (fā'lĭks klīn), 1849–1925, German mathematician He is noted for his work in geometry and on the theory of functions His program (1872) for unifying the diverse forms of geometry through the study of equivalence in transformation groups was influential, especially in the United States, for over 50 years Klein was professor of mathematics successively at the Univ. of Erlangen, the Technical Institute, Munich, and the universities of Leipzig and Gottingen and was a prolific writer and lecturer on the theory, history, and teaching of mathematics His works include *Famous Problems of Elementary Geometry* (1895, Eng tr , 2d ed , 1930) and *Elementary Mathematics from an Advanced Standpoint* (2 vols , 1907–8, Eng tr , 1932–40)

Kleist, Heinrich von (hīn'rĭkh fŭn klīst'), 1777–1811, German dramatic poet He served (1792–99) in the army and led an unhappy, unsuccessful life, which he ended by suicide His seven plays rank among the great productions of the German theater and are distinguished by powerful emotion, dramatic skill, and bold poetry They include *The Feud of the Schroffensteins* (1803, Eng tr , 1916), the brilliant comedy *Der zerbrochene Krug* [the broken jug] (1806), *Käthchen von Heilbronn* (1807), and his masterpiece, *Der Prinz von Homburg* (1821) He also wrote a powerful tale, *Michael Kohlhaas* (1808, Eng tr in Oxenford and Feiling, *Tales from the German,* 1844) See E A Silz, *Early German Romantics* (1929), J C Blankenagel, *The Dramas of Heinrich von Kleist* (1931)

Klemperer, Otto (ō'tō klĕm'purur), 1885–, German conductor, studied at the Frankfurt Conservatory In 1907 he became musical director of the German National Theater in Prague and afterward conducted opera in Hamburg, Bremen, Strasbourg, Cologne and Wiesbaden He first conducted the Berlin State Opera in 1927 Denounced because he was a Jew, he left Germany in 1932 and came to the United States, where he conducted (1933–40) the Los Angeles Philharmonic In 1938 he directed the reorganization of the Pittsburgh Orchestra In 1946 he returned to Europe and became in 1948 conductor of the Budapest Opera

Klenze, Leo von (lā'ō fŭn klĕn'tsu), 1784–1864, German architect and landscape and portrait painter He was court architect to Jérôme Bonaparte of Westphalia and to Louis I of Bavaria, for whom he built many structures in the Italian Renaissance and neo-Greek styles His chief works in Munich were the Glyptothek (1816–30) and the Pinakothek and the Odeon (1826–36) In 1838 he began additions to the Hermitage in Leningrad

kleptomania (klĕp"tumā'nēu) [Gr ,=craze for stealing], condition of mental unbalance in which the individual is subject to an overwhelming desire to steal No specific cause is known, the condition being considered generally as the result of some underlying emotional disturbance, rather than a form of insanity in itself Legally kleptomania is not classified as insanity, and the individual is held responsible except when complete lack of control over his actions is definitely established

Klesl or **Khlesl, Melchior** (both mĕl'khyôr klā'sul), 1552–1630, Austrian statesman, cardinal of the Roman Church, adviser of Emperor MATTHIAS, and leader of the Catholic Reform in Austria The son of a Protestant baker, he was converted to Roman Catholicism and became chancellor of the Univ. of Vienna and, in 1598, bishop of Vienna He was created cardinal in 1615 After helping to secure the election of Matthias, Klesl sought to obtain a compromise between Catholics and Protestants but without much success Archduke Ferdinand (FERDINAND II), attributing the emperor's delay in putting down the Prague insurrection (the prelude to the THIRTY YEARS WAR) to Klesl's influence, had Klesl imprisoned (1618) Later released and transferred to Rome (1622), he returned to Vienna in 1627

Kleve, Germany see CLEVES

Klikitat Indians (klī'kĭtăt"), tribe of North American Indians of the Shahaptin linguistic stock, inhabiting S central Washington in the early 19th cent Lewis and Clark visited (1805) them and estimated their population to be some 700. They were energetic traders, acting as middlemen between the tribes of the coast and those of the interior By the Yakima treaty (1855) they ceded their territory to the United States, and most of

them went to live on the Yakima reservation, where they have lost their identity as a tribe A few of them are at the Warm Springs reservation in Oregon See C O. Bunnell, *Legends of the Klikitats* (1933)

Klinger, Friedrich Maximilian von (frē'drĭkh mäk"sēmē'lyän fün klĭng'ur), 1752–1831, German dramatist A member of the "Salzmann circle," he was a friend of the young Goethe, studied at Giessen, was for a time playwright for a theatrical troupe, and, joining the Austrian and later the Russian army, rose to high honors His early work typified the *Sturm und Drang* period so named after his play *Wirrwarr, oder, Sturm und Drang* [confusion, or, storm and stress] (1776), his later plays, influenced by Schiller and Iffland, are more reserved in tone His other works include the play *Die Zwillinge [the twins]* (1776) and the novel *Faust's Life, Deeds, and Journey to Hell* (1791, Eng tr by George Borrow, 1825) See W A Braun, *Types of Weltschmerz in German Poetry* (1905)

Klinger, Max (mäks' klĭng'ur), 1857–1920, German painter, sculptor, and etcher Before 1886 he produced chiefly cycles of etchings, original, unconventional, and somewhat morbidly imaginative—*Phantasies upon the Finding of a Glove, Deliverances of Sacrificial Victims Told in Ovid, Brahms-Phantasie* From 1886 to 1894 he devoted himself primarily to painting, usually on a monumental scale with little concern for conventional pictorial qualities Among his paintings are *Judgment of Paris* and *Christ on Olympus* (both Vienna) After 1894 sculpture became his chief activity, and in this medium Klinger's best work was done Notable examples are *Salome, Cassandra,* and the polychromatic statue of Beethoven (all Leipzig) and the bust of Nietzsche (Weimar) His book *Malerei und Zeichnung* [painting and drawing] (1891) was influential

Klodzko, Lower Silesia see GLATZ

Klondike (klŏn'dīk), region of YUKON territory, NW Canada, just E of the Alaska border It lies about Klondike Creek, a small stream which enters the Yukon river from the east at Dawson The discovery of rich placer gold diggings on this creek in 1896 caused the Klondike stampede of 1897–98 The news reached the United States in June, 1897, and within a month thousands were on their way Most of them landed at Skagway at the head of Lynn Canal and crossed by Chilkoot or White Pass to the upper Yukon, which they descended to Dawson Others went in by the Copper River Trail or over the Teslin Trail by Stikine river and Teslin Lake, and some by the all-Canadian Ashcroft and Edmonton trails The rush continued by these passes all the following winter The other great doorway was up the Yukon river, 1,600 mi , by steamer Many of those using this route late in 1897 were caught by winter ice below Fort Yukon and had to be rescued With unexpected thousands in the region a food famine threatened, and supplies were commandeered and rationed The number in the Klondike in 1898 was c 18,000 Thousands of others who did not find claims drifted down the Yukon and found placers on Alaskan streams, notably at Nome, to which there was a new rush Others went back to the United States The hardships of the trails and the color of Klondike days are described in many personal narratives, among the best are W B Haskell, *Two Years in the Klondike* (1898), Frederick Palmer, *In the Klondike* (1899), R A Bankson, *The Klondike Nugget* (1935), James Wickersham, *Old Yukon Tales—Trails—and Trials* (1938)

Klopstock, Friedrich Gottlieb (frē'drĭkh gôt'lēp klôp'shtôk), 1724–1803, German poet His greatest work was the epic *Messias* (1821–22, Eng tr, *The Messiah*), begun in his student days and finished 25 years later The appearance of the first three cantos (in the *Bremen Beitrage*) was a literary sensation In its earlier cantos the poem has the merit of being the first major modern work by a truly inspired German poet, but the poem as a whole is weak, for Klopstock's genius was lyrical He also wrote several volumes of odes (1747–80, Eng tr , 1848) and a trilogy of dramas about the national hero Arminius (Hermann), inspired by Macpherson's Ossian There have been various entire or partial translations of *The Messiah* See F H. Adler, *Herder and Klopstock* (1914)

Klosterneuburg (klōs"türnoi'bōrk), city (pop, 13,710), Lower Austria, on the Danube and 6 mi. N of Vienna It has a wealthy Augustinian monastery (consecrated 1136), the oldest in Austria; the extensive library contains many incunabula, and the wine cellars are three stories high and contain a cask of prodigious size

Kloster-Zeven, Convention of (klō'stûr-tsā'fun), 1757 Early in the Seven Years War the duke of Cumberland, defeated by the French at Hastenbeck, capitulated at the former Benedictine abbey near Zeven (a small town in Hanover, N Germany, NE of Bremen) and allowed the French to occupy Hanover. The convention was disavowed by the English government and Cumberland was dismissed The name is known in English as Kloster-Seven or Closter-Seven.

Klyuchevskaya Sopka, RSFSR: see KAMCHATKA.

Knackfuss, Hermann (hĕr'män knäk'fŏos), 1848–1915, German historical painter and art historian He was a professor at Kassel Academy His best-known paintings include *Battle of Muhldorf, Entry of the German Emperor into Jerusalem,* and various mural decorations He is better known as an art historian and as editor of, and contributor to, *Künstlermonographien,* a series of popular monographs on great artists

Knapp, Seaman Asahel, 1833–1911, American agricultural leader, b Schroon Lake, N Y He went to Iowa in 1866 and began publication in 1872 at Cedar Rapids of the *Western Stock Journal* In 1879 he became manager of the Iowa State College farm, and from 1884 to 1886 he was president of the college He resigned to conduct farm demonstration work in Louisiana, and later, under James Wilson as Secretary of Agriculture, Knapp was employed by the department as a special agent to promote better farming methods in the South He was sent also to the Orient to investigate the growing and handling of rice, he did much for Southern rice growing His greatest work was his impressive demonstration of methods of fighting the boll weevil Under his direction these demonstrations were repeated, and gradually there developed the Farmer's Cooperative Demonstration Work division in the department with Knapp at its head See biography by J C Bailey (1945) His work was carried forward by his son, **Bradford Knapp,** 1870–1938, b Vinton, Iowa He had been his father's assistant and was his successor until the reorganization of the department in 1914, until 1920 he headed the extension work in the South He served as president at Oklahoma Agricultural and Mechanical College (1923–28), at Alabama Polytechnic Institute (1928–32), and at Texas Technological College (from 1932)

Knaresborough (nârs'-), urban district (1931 pop 5,942, 1943 estimated pop 7,900), West Riding of Yorkshire, England, on the Nidd and NW of York Of the royal castle, a 14th-century keep remains St Robert's Chapel is a wayside shrine In St Robert's Cave near by Eugene Aram hid the body of the murdered Daniel Clark in 1745

Knaus, Ludwig (lōōd'vĭkh knous'), 1829–1910, German genre painter, studied in Dusseldorf and Paris His *Morning after Kermess* won the gold medal of the Salon of 1853, *The Promenade in the Tuileries Gardens* is in the Louvre He practiced chiefly in Paris, in Dusseldorf, and in Berlin, where he was a professor (1874–82) in the Academy His paintings, many of them anecdotal, were immensely popular Knaus's art is known for its facile and vigorous technique and its fine coloring, reminiscent of the Dutch masters Among his works in the United States are *The Holy Family* and *Old Woman and Cats* (Metropolitan Mus), *Mud Pies* (Walters Art Gall , Baltimore), *The Quarrel* (N Y Public Library), and others in private collections

Kneeland, Samuel, 1821–88, American physician and naturalist, b Boston, Mass , grad Harvard (B A , 1840, M A and M D , 1843) He practiced and taught medicine in Boston, served as a surgeon in the Union army, and taught zoology and physiology at the Massachusetts Institute of Technology Kneeland traveled widely and made scientific collections in the United States, Iceland, Brazil, and the Philippines He wrote a number of works on his travels and scientific observations He translated Felix Andry's *Manual of Diagnosis of Diseases of the Heart* (1846) and edited (1866–69) the *Annual of Scientific Discovery,* which he had helped found

Kneipp, Sebastian (zābäs'tyän kunīp'), 1821–97, German priest, the founder of a system of hydrotherapy He wrote *My Water-Cure* (1880, Eng tr , 6th ed , 1935)

Kneisel, Franz (fränts' kunī'zŭl, nī'zŭl), 1865–1926, violinist, b Bucharest, of German parents, studied in Vienna He was concertmaster and soloist (1885–1903) of the Boston Symphony Orchestra In 1886 he formed the Kneisel Quartet, one of the finest string quartets of its day, which did great service in promoting chamber music in the United States until 1917, when it was disbanded Kneisel became head of the violin department of the Institute of Musical Art, New York, in 1905

Kneller, Sir Godfrey (nĕl'ur), or **Gottfried von Kniller** (gôt'frēt fün knĭl'ur), 1646–1723, English portrait painter, b Germany After study in Amsterdam, Rome, and Venice, he settled in England in 1675 Here he became court painter to Charles II on the death of Lely (1680) Kneller was a clever practitioner who maintained an army of apprentices and produced a vast number of portraits In addition to the English kings from Charles II to George I, he painted Louis XIV Famous examples of his work are *Ten Beauties of the Court of William III* (Hampton Court) and portraits of Francis Couplet (Windsor Castle) and Lady Mary Berkeley (Metropolitan Mus) He painted portraits of the members of the KIT-CAT CLUB The National Portrait Gallery, London, contains many portraits by his hand. See C H. C Baker, *Lely and Kneller* (1923)

Knickerbocker (nĭ'kurbŏ"kur), term used almost synonymously with the adjective "Dutch" in respect to Dutch families and customs and the Dutch region of early New York state. *A History of New York* (1809), written by Washington Irving under the pseudonym Diedrich Knickerbocker, popularized the term The Knickerbocker family was founded in America by **Harmen Jansen Knickerbocker,** c 1650–c 1716, b Friesland, Netherlands, who came from Holland c 1674. The Knickerbockers lived chiefly in Albany co See G C. Martin, *The Knickerbacker or Knickerbocker Family* (1912)

knife see CUTLERY

Knight, Daniel Ridgway, 1840?–1924, American painter in France, b Philadelphia, studied at the Pennsylvania Academy of the Fine Arts and with J L Meissonier in Paris Most of his work was done in France. His paintings of the French peasantry were popular, many of his subjects being taken from the Poissy-on-the-Seine countryside where he had his studio Among his pictures are *Bas de Laine* (painted for the French Government), *Hauling the Ferry* (Pa Acad of the Fine Arts), *The Shepherdess* (Brooklyn Mus), and *The Shearer* (Mus of Fine Arts, Boston) He is also represented in the museums of Omaha and Milwaukee

Knight, Dame Laura, 1877?–, English painter and etcher She was elected a member of the Royal Academy of Arts in 1936 and was created Dame Commander of the Order of the British Empire in 1929 Her pictures, chiefly of circus life, are in most of the British museums and in the Art Institute of Chicago and the Carnegie Institute, Pittsburgh Born Laura Johnson, she married (1903) Harold Knight, also a painter See her autobiography, *Oil Paint and Grease Paint* (1936)

Knight, Ridgway. see KNIGHT, DANIEL RIDGWAY

Knight, Sarah Kemble, 1666–1727, American teacher, b Boston She was known as Madam Knight in connection with her writing school and her work as a recorder of public documents Her famous *Private Journal of a Journey from Boston to New York in the Year 1704* (pub 1825) is a source of information on colonial customs and conditions, especially of the inns In later life she herself maintained an inn near New London, Conn See E A Dexter, *Colonial Women of Affairs* (1924)

knight 1 In ancient history, as in Rome and in Athens, a noble of the second class who in military service had to furnish his own mount and equipment In Roman society, the knights (Latin *equites*) ranked below the senatorial class and above ordinary citizens A knight forfeited his status if his fortune sank below the assessed value of 400,000 sesterces (about $16,000) The master of the horse was the military commander of the equestrian order **2** In medieval history, an armed and mounted warrior belonging to the nobility The private warfare that characterized the early medieval times instituted a permanent military class and made fighting the acknowledged occupation of a noble By the 10th cent the institution of knighthood, of which all origins cannot be traced, was well established The knight was essentially a military officer, though with the growth of FEUDALISM the term tended to assume place not only in the ranks of nobility but also in the ranks of landholders The knight generally held by military tenure whatever lands he might have, thus knight service was a military service normally expected by an overlord from a single knight, usually said to be 40 days in the year, though this is merely a conventional designation All military service was measured in terms of knight service Thus, a vassal might owe any number of knight services All true nobles of military age were necessarily knights Knighthood, in its true meaning, has never been hereditary but had to be earned In the late Middle Ages it had become normal for the son of a noble to serve first as page, then as squire, before being made a knight Knighthood was conferred by the overlord with the accolade (a blow, usually with the flat of the sword, on the neck or shoulder), the ceremony was preceded, especially in the later period of feudalism, by the religious ceremony of the vigil before an altar A knight fighting under another's banner was called a knight bachelor, a knight fighting under his own banner was a knight banneret Knights were ordinarily accompanied in battle by personal attendants (squires, pages) and by vassals (see YEOMAN) and servants Military tenure was generally subject to the law of PRIMOGENITURE As a result, there grew up a class of landless knights, at the time of the Crusades these formed the great military orders of knighthood, which were religious as well as military bodies Important among these were the KNIGHTS TEMPLARS, KNIGHTS HOSPITALERS, TEUTONIC KNIGHTS, Knights of CALATRAVA, and Knights of AVIZ Secular orders, patterned on the religious ones, also grew up, principally as honorary establishments by the kings or other great nobles Such in England were the orders of the Garter and of the Thistle, in Burgundy the Order of the Golden Fleece. The most important of these orders have survived and many new ones have been added (e g , the orders of the Bath, of Victoria, and of the British Empire in England and the Legion of Honor in France, see also DECORATIONS, CIVIL AND MILITARY). As the feudal system disintegrated, knight service was with growing frequency commuted into cash pay-

ments In England the payment was known as SCUTAGE Moreover, many of the landowners found the duties of knighthood too onerous for their meagre resources and contented themselves with the rank of squire This was particularly true in England, where gentlemen landowners are still termed squires The military value of a cavalry consisting of heavily armored knights lessened with the rise of the infantry, of artillery, and of mercenary armies In Germany, where the institution of knighthood persisted somewhat longer than in England and France, knighthood in its feudal meaning may be said to have come to an end in the early 16th cent with the defeat of Franz von SICKINGEN The title knight (Ger *Ritter*, Fr *chevalier*) was later used as a noble title in Germany and in France In the French hierarchy of nobles the title chevalier is borne by a younger son of a duke, marquis, or count In modern England, knighthood is not a title of nobility, but is conferred by the king (upon recommendation of the government) on commoners or nobles for civil or military achievements A knight is addressed with the title Sir (e g , Sir John), a woman, if knighted in her own right, is addressed as Dame

knighthood and chivalry. The ethical ideals that arose from FEUDALISM and found their highest expression in the 12th and 13th cent originated chiefly in France and Spain and spread rapidly to the rest of the Continent and to England They represented a fusion of Christian and of military ideals and still form the basis of the ethics of gentlemanly conduct The chief chivalric virtues are piety, bravery, loyalty, and honor Loyalty is due to the spiritual master, i e , God, the temporal master, i e , the suzerain, and to the mistress of the heart, i e , one's sworn love Love, in its chivalrous sense, was largely Platonic, as a rule, only a virgin or another man's wife could be the chosen object of chivalrous love The cult of the Virgin, with which chivalrous love is intimately connected, was the supreme expression of the glorification of womanhood Besides the battlefield, the TOURNAMENT was the chief arena on which the virtues of chivalry could be proved The code of chivalrous conduct was worked out with great subtlety in the courts of love which flourished in France and Flanders There the most arduous questions of love and honor were argued before the noble ladies who presided The judgments were often put into writing The last knight said to have embodied the ideals of chivalry was BAYARD Medieval secular literature was primarily concerned with knighthood and chivalry ARTHURIAN LEGEND and the CHANSONS DE GESTE furnished the material and patterns for many later romances and epics The work of CHRESTIEN DE TROYES and the ROMAN DE LA ROSE also had tremendous influence on later European literature The endless chivalrous and pastoral romances which were still widely read in the 16th cent were satirized with deadly effect by Cervantes in *Don Quixote* In the 19th cent , however, the romantic movement brought a revival of chivalrous ideals and literature For the lyric poetry of the age of chivalry, see TROUBADOUR, TROUVÈRE, MINNESINGER See Léon Gautier, *Chivalry* (Eng tr , 1881), Francis Warre Cornish, *Chivalry* (1901), W S Davis, *Life on a Mediaeval Barony* (1923), W C Meller, *A Knight's Life in the Days of Chivalry* (1923), Sydney Painter, *French Chivalry* (1940)

knight service see KNIGHT

Knights Hospitalers (hŏ'spĭtulurz), members of the military religious Order of the Hospital of St John of Jerusalem, sometimes called the Knights of St John and the Knights of Jerusalem The increasing number of pilgrimages to the holy city of Jerusalem led some Italian merchants to obtain early in the 11th cent the right to maintain a Latin-rite church there In connection with this church a hospital for ill or infirm pilgrims was established There seems also to have been an earlier hospice or inn in Jerusalem which had some connection with the new hospital, and there seems to have been one hospital for men and one for women When the Crusaders took Jerusalem, the master of the hospital was Gerard de Martignes The work of the hospital immediately expanded Gerard created a separate order, the Friars of the Hospital of St John of Jerusalem, and in 1113 Pope Paschal II recognized it The object of the order was to aid the pilgrims, and it soon became apparent that military protection was necessary Gerard's successor, Raymond du Puy, reconstituted the order as a military one, the members henceforth undertook to bear arms in support of the Latin Kingdom of Jerusalem and of the Crusaders The members were divided into three classes—the knights of justice, who had to be of noble birth and had to be already knights, the chaplains, who served the spiritual needs of the establishment, and the serving brothers, who merely carried out orders given them Besides these, there were the honorary members, the men who contributed estates and funds to the order, they were called donats From the innumerable estates given them, the Hospitalers obtained a great income, and the necessity of caring for the estates led to the formation of subsidiary establishments all over Europe, the preceptories The primary duty of the Knights of St John was to oppose the infidel, the Moslem They took a prominent part (with the Templars) in the siege and capture of Ascalon (1154) and in all of the military adventures of the Latin Kingdom After Jerusalem fell once more to the Saracens (1187), the Hospitalers established themselves at Margat and then (1189) at Acre, which was recaptured by the Christians in the Third Crusade The period from then until the fall of Acre in 1291 was one of disaster violent quarrels between the Hospitalers and the Templars, of long standing, grew worse, Jerusalem, which fell again to the Christians, was captured from them with great slaughter, the renewal of the Saracenic war went against the Christians, and the crusades of St Louis (Louis IX of France) and of Edward I of England did nothing to stem the tide of disaster The hospital work of the order went on, though it was somewhat obscured by the military labors Driven from the Holy Land by the fall of Acre, the knights established themselves in Cyprus They continued to combat the Moslems, but now by sea rather than by land, the Hospitalers became the principal agents of convoy for pilgrims Cyprus, however, was not the ideal place for the establishment, and the grand master, William de Villaret, planned the conquest of Rhodes from the Saracens, a conquest achieved by his brother and successor, Fulk (or Foulques) de Villaret in a special crusade (1310) On Rhodes the order waxed stronger They had received some benefit from the dissolution of the Knights Templars, and the wealth of their grand priories all over Europe had greatly increased To some extent, at least, the change was accompanied by a decline in moral standards The Knights of Rhodes, as they came to be known, maintained their reputation as courageous and successful fighting men In 1365 the knights, in conjunction with the king of Cyprus, captured Alexandria, which, however, they were unable to retain The island of Rhodes was an important strategic point, and the Turks on their advance after the capture of Constantinople determined to take it One of the most stirring and heroic episodes in the military history of the Middle Ages was the successful defense of Rhodes by the grand master, Pierre (later Cardinal) d'Aubusson, against the forces sent by Sultan Mohammed II But the knights could not summon the means to resist forever, and in 1522 the grand master Philippe de L'Isle Adam was forced to capitulate The knights had to leave Rhodes They wandered homeless until in 1530 Emperor Charles V conferred upon them the sovereignty of the island of Malta Malta now became the fixed home of the knights, who were henceforth generally known as the Knights of Malta Under Jean de la Valette they built the great fortifications and defended Malta against Turks in 1565 Meanwhile, the REFORMATION had dealt a severe blow to the order The order refused to yield to HENRY VIII in England, and the English branch was suppressed In Malta the order continued to live in fear of the Turks The city of Valetta was built, and, as in Rhodes, the rule of the order was beneficial The battle of Lepanto (1571) freed the Mediterranean of the Turks and a period of relative quiet began The hospital at Malta was the equal of any other in Europe, and the knights continued their charitable work There was some reorganization of the order, and admission became more and more a test of nobility of birth The order received its death blow when Napoleon on his Egyptian campaign took Malta (1798) The knights were compelled to surrender and to leave They chose Tsar Paul of Russia as grand master by an illegal election, which was later validated Many of the knights went to St Petersburg Thus a Catholic order, with the permission of the pope, passed under the rule of an Orthodox emperor. The order was practically at an end Nelson took Malta, and though by earlier agreement the island was to be returned to the knights, it was by the Congress of Vienna permanently ceded to England After Paul's death there was a period of some indecision and deliberation The pope named as grand master Tommasi, who in 1802 became the last regular head of the order, which moved to Catania After 1805 the knights had no regular head and the fraternity continued but had little more than nominal existence in Catania, then Ferrara, then Rome In 1879 the pope restored the office of grand master, but the reconstructed order which grew up has little relation to the old Knights of Malta It is a charitable organization especially devoted to the care of the sick and the wounded, it expanded considerably, and in 1926 an association was founded in the United States The English branch was revived under Mary Tudor in 1557, but disappeared completely in Elizabeth's time. The reestablishment of the grand priory in conjunction with the efforts of some French Hospitalers who had attempted to revive the order in France took place in 1827, but the reconstituted order had no organic connection with the old order. The symbol of the Order of St John came to be a white cross worn on a black robe, thus the Hospitalers were the Knights of the White Cross in contradistinction to the Templars, the Knights of the Red Cross The Maltese cross (see CROSS) has been used by various secret organizations, which have been falsely alleged to have a connection with the Knights of St John See E J King, *The Knights Hospitallers in the Holy Land* (1931), *The Grand Priory of the Order of the Hospital of Saint John of Jerusalem in England* (1924), and *The Seals of the Order of St John of Jerusalem* (1932), R A de Vertot, *The History of the Knights Hospitallers* (Eng tr , 1818), L E Hume, *Medical Work of the Knights Hospitallers* (1940)

Knights of Columbus (K C or K of C), American Roman Catholic society for men, founded at New Haven, Conn , in 1882 Its objects are to encourage fraternity and benevolence among its members, to promote tolerance, to encourage civic loyalty, and to protect the interests of the Roman Catholic Church The society claims credit for extension of the celebration of Columbus Day (Oct 12)

Knights of Jerusalem see KNIGHTS HOSPITALERS

Knights of Labor, American labor organization, started by Philadelphia tailors in 1869 and fathered by Uriah S Stephens It became a body of national scope and importance in 1878 and grew more rapidly after 1881, when its earlier secrecy was abandoned Organized on an industrial basis, with women, colored workers (after 1883), and employers welcomed, excluding only bankers, lawyers, gamblers, and stockholders, the Knights of Labor aided various groups in strikes and boycotts, winning important strikes on the Union Pacific in 1884 and on the Wabash RR in 1885 But failure in the Missouri Pacific strike in 1886 and the HAYMARKET SQUARE riot (for which it was, although not responsible, condemned by the press) caused a loss of prestige and strengthened factional disputes between the craft unionists and the advocates of all-inclusive unionism With the motto "an injury to one is the concern of all," the Knights of Labor attempted through educational means to further its aims—an 8-hour day, abolition of child and convict labor, equal pay for equal work, elimination of private banks, cooperation—which, like its methods were highly idealistic The organization reached its apex in 1886, when under Terence V Powderly its membership reached a total of 702,000 Among the causes of its downfall were factional disputes, too much centralization with a resulting autocracy from top to bottom, mismanagement, drainage of financial resources through unsuccessful strikes, and the emergence of the American Federation of Labor By 1890 its membership had dropped to 100,000, and in 1900 it was practically extinct See T V Powderly, *Thirty Years of Labor* (1889)

Knights of Malta and **Knights of Rhodes:** see KNIGHTS HOSPITALERS

Knights of Saint Crispin, union of shoemakers, organized in 1867 by Newell Daniels of Milwaukee in protest against the increasing industrialization of the shoe industry, which was replacing the skilled workers with new unskilled factory labor As a result of a series of successful strikes, it became for a time the largest trade union in the country, with a membership of from 40,000 to 50,000 Interference in politics, the dishonesty of its officers, the combination of employers against it, and the financial crisis of 1873 caused its downfall By 1878 it was defunct, many of its members having passed over into the KNIGHTS OF LABOR, in which they became the largest trade element See D D Lescohier, *The Knights of St Crispin, 1867–1874* (1910, Univ of Wisconsin, Bul 355)

Knights of Saint John of Jerusalem see KNIGHTS HOSPITALERS

Knights of the Golden Circle, secret order of Southern sympathizers in the North during the Civil War Dr George W L Bickley, a Virginian who had moved to Ohio, organized the first "castle," or local branch, in Cincinnati in 1854 and soon took the order to the South, where it was enthusiastically received Its principal object was to provide a force to colonize the northern part of Mexico and thus extend proslavery interests, and the Knights became especially active in Texas Secession and the formation of the Confederacy, both of which it had urged, followed by the outbreak of the Civil War, prompted a shift in its aims from filibustering in Mexico to support of the new Southern government Obviously the order could best serve this purpose among the South's friends in the North, and it soon spread to Kentucky, Indiana, Ohio, Illinois, and Missouri Its membership in these states, where it became strongest, was largely composed of Peace Democrats, who felt that the Civil War was a mistake and that the increasing power of the Federal government was leading toward tyranny They did not, however, at this time engage in any treasonable activity. In late 1863 the Knights of the Golden Circle was reorganized as the Order of American Knights and again, early in 1864, as the Order of the Sons of Liberty, with Clement L VALLANDIGHAM, most prominent of the COPPERHEADS, as its supreme

commander Membership in the Sons of Liberty was perhaps between 200,000 and 300,000 in 1864, when it reached its maximum A minority of this membership was radical enough in some localities to discourage enlistments, resist the draft, and shield deserters Numerous peace meetings were held A few extreme agitators, some of them encouraged by Southern money, talked of a revolt in the Old Northwest, which, if brought about, would end the war Southern newspapers wishfully reported stories of widespread disaffection in the Northwest, and John Hunt Morgan's raid (1863) into Kentucky, Indiana, and Ohio was undertaken in the expectation that the disaffected element would rally to his standard Gov Oliver P. Morton of Indiana and Gen Henry B Carrington effectively curbed the Sons of Liberty in that state in the fall of 1864 With mounting Union victories late in 1864, the order's agitation for a negotiated peace became ludicrous, and it soon dissolved See C H Morrow, *Political-military Secret Societies of the Northwest, 1860–1865* (1929), Wood Gray, *The Hidden Civil War the Story of the Copperheads* (1942), G F Milton, *Abraham Lincoln and the Fifth Column* (1942)

Knights of the White Camellia: see KU KLUX KLAN

Knights Templars, in Freemasonry see FREEMASONRY.

Knights Templars, in medieval history, members of the military religious Order of the Poor Knights of Christ, called the Knights of the Temple of Solomon from their house in Jerusalem The order had a brief but important history Like the other military orders, the KNIGHTS HOSPITALERS and the TEUTONIC KNIGHTS, the Templars were formed in the period of the CRUSADES The Templars were in the beginning purely military and had no such charitable aims as the Hospitalers The order originated in a band of nine knights headed by Hugh de Payens who joined together c 1118 for the purpose of protecting pilgrims The group increased in number and adopted the Benedictine Rule They were given quarters next the building that was called Solomon's Temple Hugh went to Europe, where he sought the sanction of the pope for the order He obtained the support of St Bernard of Clairvaux, who aided the Templars in the Council of Troyes (1128) They were established with a complete rule and many young noblemen joined the order, which at first was poverty-stricken but soon began to receive the gifts of estates and of money from all over Europe The Templars rapidly became one of the most powerful organizations of Europe Their ideal—the protection of Christianity—and their dashing military exploits won them great fame The Templars in a sense represent the highest actualization of chivalry They were important in all the military adventures of the Latin Kingdom and their strongholds in the Holy Land welcomed the leaders of the later Crusades They were important in the internal struggles between the Crusaders as well as in the fight against the infidel, and almost from the beginning charges were hurled against them They were accused, probably unjustly, of going so far as to conspire with the Saracens in order to advance their order But the Templars, who bore the red cross, were apparently even more active than the Knights of the White Cross (the Hospitalers) in war There was from early times a constant rivalry between them The Templars had charge of the fortress of Gaza, which fell to Nureddin, but was later recaptured The knights were involved in all the important sieges and battles They were the chief force in securing the throne of the Latin Kingdom for Guy of Lusignan and Sibyl The conquests of Saladin forced the Templars, like the Hospitalers, out of Jerusalem After the capture of Acre, the knights established themselves there and played an important part in the Third Crusade More and more the Templars, the Hospitalers, and the Teutonic Knights became the warriors against the Saracens, to the exclusion of the later Crusaders The orders were involved in deadly rivalry among themselves and by their internecine strife weakened the Christian cause The Templars also were involved in trouble with Emperor Frederick II when he was on crusade Difficulties and calamities grew worse for the Crusaders The Mohammedans slowly won back all the Holy Land In 1291 Acre fell Both the Hospitalers and the Templars withdrew to Cyprus The order of the Templars, however, had long ceased to be primarily a fighting organization, they had become even in the 12th cent the bankers of Europe The wealth which had poured upon them had made them very significant in almost every country of Europe Their establishments in England and France especially were numerous and splendid Place names in those countries recall the breadth and scope of Templar activity The fact that the knights had establishments all over Europe made them particularly useful for the handling of money, and their strongholds became the principal money stores of the world This financial control made them very powerful and aroused the jealousy and cupidity of temporal princes, particularly of Philip IV (Philip the Fair) of France The Templars were unpopular with many of the secular clergy because of their special privileges The Templars had, particularly since the failure of the Crusades, become more and more worldly and there can be no doubt that there was considerable licentiousness among them. They had awakened the universal hatred that is so often the lot of the moneylender In a sense they were the makers of their own doom Yet there is today little doubt that the suppression and extirpation of the order was caused by the cupidity of Philip IV, who was in need of money and wanted to confiscate that of the Templars The persecution of the Templars (1308–14), which effectively ended the order, is one of the most disputed questions of medieval history It was begun on the grounds of scurrilous accusations made by an apostate member of the order, and Philip instituted proceedings against them with the aid of Pope Clement VI, who was practically a pawn in the hands of Philip In 1308 the persecution was in full process The knights were arrested and were forced by the extremities of torture to confess to sacrilegious and revolting practices The confessions were made, retracted, and again extorted, so that the evidence is completely confusing and there cannot and will not be any definite decision as to the justice of the charges, but it is the general opinion that most of them were unjust and untenable The last act of the persecution in France occurred in 1314 The last grand master, Jacques de Molay, had confessed to crimes, he recanted, again confessed, and finally, with the prior of Normandy, stood out against Philip, who, without the sanction of the Church, had them burned to death The Order of the Poor Knights of the Temple was at an end The prosecution of the knights is a very dark chapter of history The property of the Templars, which was theoretically to go to the Hospitalers, actually went for the most part to Philip IV and to Edward II, who suppressed the order in England Of the vast literature concerning the Templars, the major portion is devoted to arguing one way or the other concerning the fate of the Templars, their alleged secret rites and Satanism, and their achievements A good defense of the order is that of Charles G Addison, *The History of the Knights Templars* (rev ed, 1912), see also E J Martin, *The Trial of the Templars* (1928), J B Williamson, *History of the Temple, London* (1924), bibliography under CRUSADES

Knightstown, town (pop 2,323), E Ind , E of Indianapolis, settled 1825, inc 1827 A home for orphans of Indiana soldiers and sailors is here

Kniller, Gottfried von see KNELLER, SIR GODFREY

Knipperdollinck or **Knipperdolling, Bernhard** (bĕrn'-härt kunĭ"pərdô'lĭngk, -lĭng), d 1536, German ANABAPTIST leader He came under the influence of the visionaries and extreme social reformers who controlled the Anabaptist movement In Münster, of which he was briefly (1534) burgomaster, he supported JOHN OF LEIDEN When the city was captured, Knipperdollinck was executed

knitting, construction of a fabric made of interlocking loops of yarn by means of needles Knitting, allied in origin to weaving and the netting and knotting of fishnets and snares, was apparently unknown in Europe before the 15th cent , when it was practiced in Italy and Spain The Scots claimed its invention and also its introduction into France Hand-knitting needles are of bone, wood, steel, ivory, or celluloid Two needles with heads are required for flat or selvage work, three or more, pointed at both ends, for tubular work such as hose, and for larger tubular work, a circular needle The first knitting machine, invented in England in 1589 by William Lee, was refused a patent by Queen Elizabeth on the grounds that it would curtail the work of hand knitters Lee's machine, marketed abroad, was the forerunner of the warp and circular frames of the 18th cent , these in turn developed into the two modern types of power machines, the warp and the weft The springbeard needle of Lee's frame was supplemented in 1847 by Matthew Townsend's latch needle, commonly used for coarse work In 1864 William Cotton patented a machine by which garments and the heels and toes of hosiery might be shaped In weft knitting, which includes hand knitting, the fabric is constructed in horizontal courses with one continuous yarn The basic stitches are the plain or jersey, purl, and rib Either flat-bed or circular machines may be used The warp or chain loom machine, generally flat bed, builds vertical chains or wales, each with a separate yarn and tied together by zigzagging the yarns from needle to needle in the basic tricot or milanese stitches or variants of these The warp knit fabric is run-resistant but less elastic than the weft See Zelma Bendure and G B Pfeiffer, *America's Fabrics* (1946), W. E Shinn, *Principles of Knitting* (1940).

Knobelsdorff, Georg Wenzeslaus von (gā'ôrk vĕn'-tsuslous fŭn knō'bŭlsdôrf), 1699–1753, German architect and portrait and landscape painter He was overseer of buildings for Frederick the Great His chief architectural works, masterpieces of German classic style, are the palace of Sans Souci, Potsdam, and the State Opera House, Berlin.

Knolles, Richard (nōlz), 1550?–1610, English historian. His *General Historie of the Turkes* (1603) with continuations to 1699 in an edition by Sir Paul Ryeaut and others (3 vols. 1687–1700) was highly praised for its fine prose by Dr. Johnson and by Lord Byron

Knolles or Knollys, Sir Robert (both nōlz), d 1407, English military commander He fought in Brittany in the French wars of Edward III of England He became a leader of a company of mercenaries, fought against Bertrand du Guesclin, and assisted Edward the Black Prince in the Spanish campaign, especially at Nájera (1367) He continued to fight throughout France, either for the English or for his own plunder; he ravaged Normandy and the Loire valley In 1381 he helped to disperse the Wat Tyler insurrection in England

Knossos see CNOSUS

knot, in the general sense, a fastening made by interlacing cordage, such as the hitch, splice, tie, and bend In the restricted sense a knot is a knob, loop, or noose in a rope Many knots date from prehistoric times They have been used to record dates and numbers and to make astronomical reckonings, have been objects of superstition and of legend, as the Gordian knot (see GORDIUS), and appear in heraldry as symbols and badges A large percentage of the almost unlimited number of knots were devised by sailors Knots are used in some 90 occupations, including farming, trucking, lumbering, and surgery The knot, or nautical mile, is about 6,080 ft See C L Day, *Sailors' Knots* (1935), C W Ashley, *The Ashley Book of Knots* (1944).

Knott, James Proctor, 1830–1911, American political leader and college professor, b Marion co , Ky Admitted (1851) to the bar in Missouri, he served in the state legislature (1857–59) and was state attorney general when the Civil War began His sympathy with the South, although he opposed secession, caused him to be imprisoned briefly, he then returned to Kentucky He was elected to the U S House of Representatives from Kentucky for the terms 1867–71 and 1875–83, serving several times as chairman of the judiciary committee and gaining a national reputation as an orator As governor of Kentucky (1883–87), he reformed the tax system and established a board of equalization In 1892 he became professor of civics and economics at Centre College, Danville, Ky Knott helped organize the law school there and from 1894 until his retirement in 1901 served it as a professor and the first dean

knowledge, main branch of philosophy It has three major problems, the origin and nature of knowledge (epistemology), the investigation of the processes and presuppositions of knowledge (psychology), and the study of the methods and validity of inquiry (logic) Whole systems of philosophy have been built about varying theories of knowledge, and it is generally admitted that the way of looking at truth will influence what is found Philosophers have always been concerned with the problems of knowledge, but until the 17th cent they were more interested in the question of ethics and metaphysics For many, knowledge was accepted on authority and was regarded as existing prior to the act of learning DESCARTES ushered in a new era of inquiry by actively investigating the relationships between thought and existence This was the beginning of systematic epistemology although the term was not used until the 19th cent The question of the origin and nature of knowledge was, for several centuries, to absorb the interest of such philosophers as Leibniz, Locke, Berkeley, Hume, Kant, and many others While there is no precise method of classifying varying theories of knowledge, certain broad outlines may be indicated RATIONALISM (Descartes, Spinoza, Leibniz) held that all knowledge is based wholly or in great measure upon what is revealed through reason EMPIRICISM (Locke, Berkeley, Hume, Mill), denying the existence of innate ideas, claimed that all knowledge proceeds from experience, defining experience as the sum of impressions A development of this position was mentalism, which affirmed that only mind and ideas exist (Berkeley) Kant's position as to the nature of knowledge encompassed both rationalistic and empirical methods of knowing and posited a character of the mind which enables it to grasp a priori truths This latter method is transcendentalism, which views knowledge as arising from sources beyond the reach of the senses or of reason Intuition, as a method of knowing, has been used by philosophers of various schools (Spinoza, Leibniz, Locke) It is generally regarded as the most certain type of knowledge, in which the mind immediately perceives the consistency or inconsistency of relationships without any other factors being involved Theories of truth, or the validity of knowledge, have been variously expressed and often are implicit in the theory of knowledge The popular definition of truth requires the agreement of sense perception and reason This concept is commonly held in systems of philosophy which admit both thought and sense perception as parts of the process of knowing Spinoza elaborated upon this idea of internal consistency and included the complete development of the matter investigated as a necessity for the per-

fection of knowledge Kant presented the synthesis of thought and matter as essentials of knowledge and added a principle of continuity The scientific method, which is a way of testing the validity of knowledge, has been in process of development since the times of Vico and Bruno. Both PRAGMATISM (James) and instrumentalism (Dewey) test truth in terms of the effectiveness of results See George Berkeley, *Principles of Human Knowledge* (1710), A H Smith, *Treatise on Knowledge* (1943), C I Lewis, *Analysis of Knowledge and Valuation* (1946)

Knowles, James Sheridan (nōlz), 1784–1862, Irish actor and dramatist, cousin of Richard Sheridan He was one of the foremost playwrights of his time His chief works, now seldom produced, are the tragedies *Caius Gracchus* (1815), *Virginius; or, The Liberation of Rome* (1820), and *William Tell* (1825) and the comedies *The Beggar's Daughter of Bethnal Green* (1828), *The Hunchback* (1832), and *The Love Chase* (1837) See L H Meeks, *Sheridan Knowles and the Theatre of His Time* (1933)

Knowlton, Frank Hall (nōl'tun), 1860–1926, American paleobotanist, b Brandon, Vt , grad Middlebury College, 1884 He served in the botany and paleontology departments of the National Museum (1884–1900) and in the U S Geological Survey as paleontologist (1900–1907) and as geologist (from 1907) An authority on fossil plants, he wrote *Catalogue of the Mesozoic and Cenozoic Plants of North America* (1919) and *Plants of the Past* (1927)

Know-Nothing movement, in U S history The increasing rate of immigration in the 1840s had encouraged nativism In Eastern cities where Roman Catholic immigrants especially had concentrated and were welcomed by the Democrats, local nativistic societies were formed to combat "foreign" influences and to uphold the "American" view The American Republican party, formed (1843) in New York, spread into neighboring states as the Native American party, which became a national party at its Philadelphia convention in 1845 The movement was temporarily eclipsed by the Mexican War and the debates over slavery When the slavery issue was temporarily quieted by the Compromise of 1850 nativism again came to the fore Many secret orders grew up, of which the Order of United Americans and the Order of the Star-spangled Banner came to be the most important These organizations baffled political managers of the older parties, since efforts to learn something of the leaders or designs of the movement were futile, all their inquiries of supposed members were met with a statement to the effect that they know nothing Hence members were called Know-Nothings, though there was never a political organization bearing the name Efforts were concentrated on electing only native Americans to office and on agitating for a 25-year-residence qualification for citizenship Growing rapidly, the Know-Nothings allied themselves with the group of Whigs who followed Millard Fillmore and almost captured New York state in the 1854 election, while they did sweep the polls in Massachusetts and Delaware and had local successes in other states The disintegration of the WHIG PARTY aided them in their strides towards national influence In 1854 they looked towards extension into the South, and in the following year they openly assumed the name American party and cast aside much of their characteristic secrecy In June, 1855, a crisis developed, at a meeting of the national council in Philadelphia, Southerners seized control and adopted a resolution calling for the maintenance of slavery The slavery issue, after the passage of the Kansas-Nebraska Bill, again came to the front, and this time the slavery issue split apart the Know-Nothing movement as it had the Whigs The anti-slavery men went into the newly organized Republican party Millard Fillmore, the American party candidate for President in 1856, polled a small vote and won only the state of Maryland The national strength of the Know-Nothing movement thus was broken The movement did continue until 1860, nevertheless, mainly in Eastern cities and in border states where Southern Unionists were offered no other national organization acceptable to them See R A Billington, *The Protestant Crusade, 1800–1860* (1938)

Knox, Frank, 1874–1944, U S Secretary of the Navy (1940–44), b. Boston He joined the Rough Riders in the Spanish-American War and also served in the First World War In 1901 he bought the Sault Sainte Marie *News* and later merged two newspapers in Manchester, N H He was general manager (1928–31) of the Hearst papers and after 1931 owner of the Chicago *Daily News* This paper, like his others, strongly opposed the New Deal, and he was the unsuccessful Republican candidate for Vice President in 1936 In 1940 President F D Roosevelt, seeking to create national unity in defense preparations, made Knox Secretary of the Navy He died in office and was succeeded by James V. Forrestal.

Knox, Henry, 1750–1806, patriot general in the American Revolution, b. Boston. In 1775 he went to Ticonderoga to bring back the captured cannon and mortar there, making the trip in 20 days over trails that had never before borne heavy loads. The fortification of Dorchester Heights with this artillery compelled the evacuation of Boston by the British. From this time he was a trusted companion of Washington. The artillery, under his charge, took a conspicuous part in the battles of Princeton, Brandywine, Germantown, Monmouth, and Yorktown He commanded at West Point (1782–84) and was a founder of the Society of the Cincinnati Knox was Secretary of War both under the Articles of Confederation and under the Constitution (1785–94) A conservative, he attempted to raise a Federal force to oppose Shays's Rebellion, and he favored a strong Federal government His later home is preserved at Thomaston, Maine See biography by Noah Brooks (1900)

Knox, John, 1505?–1572, Scottish religious reformer, founder of Scottish PRESBYTERIANISM, b near Haddington Of his life before 1545 little is recorded He probably attended the Univ of Glasgow or the Univ of St Andrews He entered the Roman Church as a priest and from 1540 to 1543 was engaged as an ecclesiastical notary and as a private tutor Corruption of the clergy at the time was notorious, and at St Andrews Knox apparently became acquainted with some of the new heresies By late 1545 he had attached himself closely to George WISHART, shortly before that reformer's death Soon after Wishart's execution, a mob of peasants took revenge by murdering Cardinal BEATON, they occupied St Andrews castle Knox himself, now definitely a Protestant, took refuge with them and preached in the parish church His sincerity and his vehemence made him successful in the pulpit Attacked by both Scottish and French forces, the castle eventually was surrendered, and Knox served 19 months in the French galleys before his release (1549) through the efforts of the English government of Edward VI For the next several years Knox preached in Berwick and Carlisle as a licensed minister of the crown and served briefly as a royal chaplain He helped to revise the second Book of Common Prayer of Edward VI, but he declined a bishopric in the newly established church of England In 1554, shortly after the accession of Mary Tudor, Knox went into exile on the Continent, chiefly in Geneva, where he served as pastor to the English congregation There he conferred much with John Calvin, whom he later frequently consulted on church doctrine and civil authority Meanwhile he exerted considerable influence among the faithful in England and Scotland by frequent letters, with his "Admonition" pamphlet in 1554 he began to urge the duty of the righteous to overthrow hostile monarchs and to persecute "idolatrous" Catholics In 1555–56 he visited Scotland, preaching in private and counseling the Protestant nobles—the "Lords of the Congregation" who made their first covenant in 1557 (see SCOTLAND, CHURCH OF) In the same year they invited Knox back from Geneva to help them in their fight against the Catholic regent of Scotland, Mary of Guise, but Knox delayed his return until 1559 Meanwhile he wrote the *First Blast of the Trumpet against the Monstrous Regiment* [i e , Regimen] *of Women*, a fiery tract directed against the Scottish regent, her daughter Mary Queen of Scots, and Queen Mary of England Civil war opened in 1559 between the Protestants and the regent with her French soldiers Aided by England and by the regent's death in 1560, the reformers forced withdrawal of the French and won their freedom and the dominance of the new religion Under Knox's direction as minister of Edinburgh and secretary of the Congregation, a confession of faith was drawn up (1560) and passed by the estates, abolishing the authority of the pope and condemning all creeds and practices of the old Church The Book of Discipline, however, which would have enforced the new religion concretely and officially, failed to get adequate approval from the nobles in 1561 When Mary arrived from France to take her throne that same year, many Protestant lords deserted Knox and his cause, and some even joined the queen From his pulpit and in his personal debates with Mary on questions of theology and the loyalty owed by the subject to his monarch, Knox stubbornly defied Mary's authority and charm and thundered against her religion The queen's marriage to Lord Darnley, her apparent complicity in his murder, and her quick marriage to James Hepburn, earl of Bothwell stirred the Protestant commoners and lords to revolt She was forced to abdicate in favor of her young son, James VI (later James I of England) All the acts of 1560 were confirmed to establish Presbyterianism as the official religion With the new faith safely in power, Knox's importance declined, but he continued to preach violently even throughout the ill-health of his last years It has been said of Knox that "rarely has any country produced a stronger will." His single-minded zeal made him the outstanding leader of the Scottish Reformation and an important influence on the Protestant movements in England and on the Continent but closed his mind to tolerance The biblical passage that opened the door to his unshakable faith in election, special grace and assured salvation was John 17 His influence over the people gave him considerable political power, which he often used against those in authority. His *History of the Reformation in Scotland*, finished in 1564 but published in 1584 after his death, is a striking record of that conflict, but includes misstatements and omissions resulting from his strong bias The standard edition of his works is that edited by **David Laing** (1864). See Andrew Lang, *John Knox and the Reformation* (1895), biographies by P Hume Brown (1895), Edwin Muir (1930) and E S C Percy (1937).

Knox, Philander Chase, 1853–1921, U S cabinet officer, b Brownsville, Pa , grad. Mt Union College (Ohio), 1872 He built up a fortune as a corporation lawyer in Pittsburgh He was Attorney General (1901 4) in the cabinets of McKinley and Theodore Roosevelt He was prominently identified with trust prosecutions, but failed to dissolve any significant organizations, except that of the Northern Securities Company He served as U S Senator by appointment (1904–5) and was elected for the succeeding full term, but resigned in 1909 to become Secretary of State under Taft Continuing the policies of his predecessors, John Hay and Elihu Root, Knox sought to protect financial interests abroad, particularly in Latin America and China—a policy much attacked as "dollar diplomacy" Knox returned to the Senate in 1917 and allied himself with those who fought ratification of the Treaty of Versailles and participation in the League of Nations See S F Bemis, ed , *The American Secretaries of State*, Vol IX (1929)

Knox. 1 Town (pop 2,165), co seat of Starke co., NW Ind , N of Logansport Mint and onions are grown in this area **2** Borough (pop. 1,098), Clarion co , W Pa , SE of Franklin

Knox, Fort [for Henry Knox], U S military reservation, 33,000 acres, N Ky , c 30 mi SW of Louisville It was established (1917) in the First World War as a training camp and in 1932 was made a permanent post In the steel and concrete vaults of the U S. Depository, built here by the Dept of the Treasury in 1936, is stored the bulk of the nation's gold bullion. Fort Knox was again an important training center in the Second World War, especially for armored divisions

Knox City, town (pop 1,127), N TEXAS, SW of Wichita Falls, in a farming area, inc 1916

Knox College, at Galesburg, Ill , nonsectarian, coeducational, chartered 1837, opened 1841 by Congregationalists and Presbyterians under George W. GALE It was a manual-labor college until 1857 In 1930 it absorbed Lombard College (chartered 1851, opened 1852) Among its noted alumni are Eugene Field, Don Marquis, and George Fitch, whose "Siwash" stories are about the college Old Main Hall, where Lincoln debated with Douglas, was made a national historic shrine in 1936 See E E Calkins, *They Broke the Prairie* (1937)

Knoxville. 1 City (pop 2,241), W Ill , near Galesburg, in a farm area, inc 1832 **2** City (pop 6,936), co seat of Marion co , S Iowa, SE of Des Moines, in a farm and mine area, settled 1845, inc 1854 A large U S veterans' hospital is here **3** City (pop 111,580), co seat of Knox co , E Tenn , on the Tennessee, settled c 1786 and known as White's Fort, laid out and name changed 1791 It was the capital of the Territory South of the River Ohio from 1792 to 1796 and twice (1796–1812, 1817–19) served as the state capital In the Civil War, Knoxville, loyal to the Union, was held by Confederates until Sept , 1863, when it was abandoned to Federals under Gen A E Burnside Gen James Longstreet's subsequent siege (Nov -Dec , 1863) failed to recapture the town The present-day city, a livestock and tobacco market, is an important industrial, commercial, and shipping center for a farm, marble, and coal area, among its manufactures are textiles, clothing, and marble and wood products The Univ of Tennessee (see TENNESSEE, UNIVERSITY OF), Knoxville College (Negro, Presbyterian, coeducational, 1875), and a state school for the deaf are here Norris Dam, from which Knoxville procures its power, is near by, as is Great Smoky Mountains National Park, for which the city is a point of departure Among the points of interest are the graves of John Sevier, William Blount, and James White, the Blount Mansion (1792), Chisholm Tavern (1791), and other old buildings

Knudsen, William S (nōōd'sun), 1879–1948, American industrialist and U S government official, b Denmark He came to the United States at 20, worked in various factories, and became production manager in the Ford Motor Company Employed (1922) by the General Motors Corp , Knudsen became (1937) president He was called (1940) to Washington to take charge of production on the National Defense Advisory Commission He was appointed (1940) director general of the Office of Production Management on its formation and then served (1941–45) as lieutenant general in the U S army directing production for the War Dept

Knut see CANUTE

Knutsford (nŭts'fûrd), urban district (1931 pop. 5,879, 1943 estimated pop 6,500), Cheshire, Eng-

land Knutsford is the Cranford of Mrs Gaskell's novel

Knutson, Paul: see PAUL KNUTSON

Knyphausen, Wilhelm, Baron von (vĭl'hĕlm bärōn' fŭn kŭnŭp'houzun), 1716-1800, German general in British service in the American Revolution He had served in the army of Frederick the Great before coming to America with the Hessian troops in 1776 Knyphausen fought well at White Plains, Brandywine, Germantown, and Monmouth. He commanded (1779–80) New York in the absence of Sir Henry Clinton

Koa (kō'ä), obscure name associated with the Assyrians Ezek 23 23

koala (kōä'lu) or **Australian bear**, arboreal marsupial animal native to Australia Once abundant, it is now found in much-reduced numbers in Queensland and Victoria It has a grayish, thickly furred, tailless body, usually 2 to 2½ ft in height, a protuberant, curved, black nose, and large furry ears Well fitted for grasping and climbing, it has five toes with sharp claws on each foot It often sleeps in trees during much of the day and feeds at night on the leaves and shoots of certain species of eucalyptus trees The single cub is about ¾ in long at birth and is carried and fed in the mother's pouch, from which it emerges for the first time when about six months old Until it is about eight months old it continues to use the pouch, and until about a year old it is carried on its mother's back or in her arms Koalas are harmless and defenseless and have been brutally hunted, chiefly for fur but also for food Disease has also taken a heavy toll Protective measures have been adopted to prevent their extinction

Kobe (kō'bā), city (1940 pop 967,234, 1947 pop 607,079), capital of Hyogo prefecture, S Honshu, Japan, on Osaka Bay One of the most important Japanese ports, it is also a railroad center and an industrial metropolis, with shipbuilding yards, sugar refineries, and chemical and rubber plants It is the seat of two universities, a nautical college, and several ancient Buddhist temples and shrines The city lies at the base of Mt Rokko (3,061 ft) Since 1878 it has included Hyogo (formerly Hiogo), a port which had been of some prominence since before the 9th cent and which became very important with its opening (1868) to foreign trade Kobe was heavily bombed (1945) in the Second World War Hyogo prefecture is extensively devoted to agriculture Among its industrial centers are Amagasaki, Nishinomiya, and Himeji

Koberger, Anton (än'tōn kō'bĕr'gur), c 1445–1513, German printer He established in 1470 the first printery in Nuremberg Here in 1483 he produced a German Bible and in 1484 the first book printed in the Hungarian language He was primarily a publisher He had agencies in many cities, employed traveling salesmen, and issued one of the first of advertising circulars

Koblenz, Germany see COBLENZ

Koch, Johannes see COCCEIUS, JOHANNES

Koch, Lauge (lou'gu kôk'), 1892–, Danish geologist and explorer, noted for his scientific work in Greenland He accompanied Rasmussen's second Thule expedition (1916–18) as geologist and cartographer and was chief of a notable expedition (1920–23) to N Greenland during which he completed the mapping of the Greenland coast and gave for the first time the geological picture of the northern portion of the island Thereafter Koch was almost continuously in Greenland, as leader of Danish expeditions In 1938 his air photographs over N Greenland proved the much-sought Peary Channel to be only a fjord

Koch, Robert (rō'bĕrt kôkh'), 1843–1910, German bacteriologist As a country practitioner in Wollstein, Posen, he devoted much time to microscopic studies of bacteria, for which he devised not only a method of staining with aniline dyes but also techniques of bacteriological culture still in general use He established the bacterial cause of many infectious diseases and discovered the microorganisms causing anthrax (1876), wound infections (1878), tuberculosis (1882), infectious conjunctivitis or Egyptian ophthalmia (1883), Asiatic cholera (1884), and other diseases He was professor at the Univ of Berlin from 1885 to 1891 and head of the Institute for Infectious Diseases (founded for him) from 1891 to 1904 In the course of his investigations for the British and German governments he traveled to South Africa, India, Egypt, and other countries and made valuable studies of sleeping sickness, malaria, bubonic plague, rinderpest, and other diseases For his work in developing tuberculin as a test for tuberculosis he received the 1905 Nobel Prize in Physiology and Medicine

Kochanowski, Jan (yän kôkhanôf'skĕ), 1530–84, greatest Polish Renaissance poet Of especial note is his Polish version of the Psalms of David His poems have been translated into English (1928)

Kocher, Emil Theodor (ā'mēl tā'ôdôr kô'khur), 1841–1917, Swiss surgeon, M D Univ of Bern, 1865. He was professor of surgery at Bern (1872–1911) For his work on the physiology, pathology, and surgery of the thyroid gland—which he was the first (1876) to excise in cases of goiter—he received the 1909 Nobel Prize in Medicine A skilled surgeon in many fields and a pioneer in the applications of asepsis, he was also the author of a textbook of operative surgery (1894)

Kochi (kō'chē), city (1940 pop 106,644, 1947 pop 147,120), capital of Kochi prefecture, S Shikoku, Japan An important port, it exports dried fish, ornamental coral, and paper, all products of Kochi prefecture, which also yields agricultural products

Kock, Hieronymus see COCK, HIERONYMUS

Kodaly, Zoltan (zōl'tän kô'dälē), Hung *Kodály Zoltán*, 1882–, Hungarian composer and collector of folk songs, grad Univ of Budapest (Ph D, 1906) He worked with BARTOK in the collection of folk tunes and has used them extensively in his compositions, though without being so radical an experimenter as Bartok His style is strongly individual, but is lyrical and stays within the framework of tonal harmony In 1906 he began to teach at the Budapest Hochschule, of which he became assistant director in 1919 He began to lecture at the Univ of Budapest in 1930 His best-known compositions are the opera *Hary Janos* (1927), the *Psalmus Hungaricus* (1923) for chorus and orchestra, and the orchestral *Dances of Marosszek* (1929) and *Dances of Galanta* (1933)

Kodiak Island (kō'dēĕk), c 100 mi long and from 10 to 60 mi wide, off S Alaska This largest of the islands of Alaska is separated from the Alaska Peninsula by Shelikof Strait It is mountainous and heavily forested in the north and the east, the native grasses in the south offer good pasturage for cattle and sheep The Kodiak bear is native to the island Discovered by Stepan Glotov in 1764, the island was the scene of the first permanent Russian settlement in Alaska, planted by Grigori Shelikhov on Three Saints Bay in 1784 and moved to Kodiak village later It was the center of the fur trade of the Russian American Company until Aleksandr Baranov moved his headquarters to Sitka Salmon fishing is now the chief occupation, and the Karluk river is famous for its salmon run The U S navy established a large base at Womens Bay in 1940

Kodok (kō'dŏk), formerly **Fashoda** (fushō'du), village, Anglo-Egyptian Sudan, on the White Nile It trades in produce In 1898 it was the scene of the FASHODA INCIDENT, which caused an Anglo-French diplomatic crisis

Koelreuter, Joseph Gottlieb see KOLREUTER

Koerber, Ernest von (ĕrn kûr'bur), 1850-1919, Austro-Hungarian statesman A career civil servant, he became prime minister (1900–1904) and made a vigorous but vain attempt to reconcile the national factions of the monarchy by liberal, parliamentary methods His second tenure, after the assassination (1916) of Count Sturgkh was brief, because of differences with the new emperor, Charles I

Koestler, Arthur (kĕst'lur), 1905–, Hungarian-English author He was a correspondent for a German newspaper chain in the Middle East, Paris, and Berlin In 1936 he went to Spain to cover the Franco revolt for the London *News Chronicle*, was captured, and was imprisoned Released through the efforts of the British government (1937), he went to France (1938) to edit an anti-Nazi, anti-Soviet weekly In 1939 he was sent to a concentration camp His release was effected by the British in 1940 He escaped to England, where he has lived since 1941 His works published in English include *Spanish Testament* (1937, American ed, *Dialogue with Death*, 1942), *The Gladiator* (1939), *Scum of the Earth* (1941), *The Yogi and the Commissar* (1945), *Insight and Outlook an Inquiry into the Common Foundations of Science, Art, and Social Ethics* (1949), *Promise and Fulfilment Palestine, 1917–1949* (1949), three novels, *Darkness at Noon* (1941), *Arrival and Departure* (1943), and *Thieves in the Night* (1946), and a play, *Twilight Bar* (1945)

Koffka, Kurt (kôf'ku, Ger kôôrt' kôf'kä), 1886–1941, American psychologist, b Germany, Ph D Univ of Berlin, 1908 Before settling permanently in the United States in 1928 as a professor at Smith College, he had taught at Cornell and at the Univ of Wisconsin With Max Wertheimer and Wolfgang Kohler he is credited with developing the theories that gave rise to the school of GESTALT psychology His book *Die Grundlagen der psychischen Entwicklung* (1921, Eng tr, *Growth of the Mind*, 1924) was considered responsible for awakening much interest in Gestalt concepts See his *Principles of Gestalt Psychology* (1935)

Kofoid, Charles Atwood (kō'foid), 1865–1947, American zoologist, b Granville, Ill, grad Oberlin College (B A, 1890) He was superintendent of the Univ of Illinois biological station (1895–1900) and later taught at the Univ of California (1900–1936) A specialist in marine zoology, he accompanied expeditions in Pacific waters, invented apparatus for deep-sea sampling, and edited several scientific journals and also the Univ. of California Publications in Zoology (1909–36)

Kofu (kō'fōō), city (1947 pop 104,993), capital of Yamanashi prefecture, central Honshu, Japan. It is a collection center for silk cocoons and raw silk, with manufactures of silk textiles and crystal ware Yamanashi prefecture is a major production area for raw silk and grapes

Kohala (kōhä'lä), peninsula, N Hawaii, T H The region is rich in relics of ancient Hawaii, such as burial caves and *heiau* (temples) Kamehameha I was born near the village of Kapaau-Halaula Sugar cane is grown in the fertile valleys The Kohala Mts here rise to a height of 5,489 ft

Kohath (kō'hăth), founder of a family of the Levites It comprised four groups, the Amramites, Izeharites, Hebronites, and Uzzielites. Gen 46 11, Num 3 19,27,29,30, 4, 7 9, 10 21, Joshua 21, 1 Chron 6, 9 32; 15 5, 26, 2 Chron. 20 19, 29 12, 34 12

Koh-i-noor. see DIAMOND

Kohler, Kaufmann (kouf'mun kō'lur), 1843–1926, American rabbi, scholar, and leader in reformed Judaism, b Bavaria He came to the United States in 1869, from 1879 to 1903 he was rabbi of Temple Beth-El in New York, from 1903 to 1922 president of the Hebrew Union College in Cincinnati He called the conference (1885) at which the "Pittsburgh Platform" of reformed Judaism was adopted One of the editors of *The Jewish Encyclopedia*, he also wrote *Backwards or Forwards Lectures on Reform Judaism* (1885), *Jewish Theology Systematically and Historically Considered* (1918), *Heaven and Hell in Comparative Religion* (1923), and *The Origins of the Synagogue and the Church* (1929) His *Studies, Addresses, and Personal Papers* (1931) contains a short autobiography See *Studies in Jewish Literature in Honor of Kaufmann Kohler* (1913)

Kohler, village (pop 1,789), E Wis, near Sheboygan and on the Sheboygan river, inc 1913 It is a garden city, home of the Kohler plumbing-fixtures plant

kohlrabi (kōl'rä'bē) [Ger partly from Ital, =rape cabbage], variety of CABBAGE, with a turniplike, swollen stem—the edible part of the plant It is grown more in Europe, where some varieties are used for fodder, than in America It is a cool-weather plant The flavor is finer than that of some of the other cabbage plants

Koil, India see ALIGARH

Koiso, Kuniaki (kōōnēä'kē koi'sō), 1880–, Japanese general He was chief of staff of the Kwantung army and governor of Korea before he became prime minister in July, 1944, succeeding Tojo In April, 1945, after the loss of the Philippines and Iwo Jima, he resigned He was arrested as a war criminal in 1945, was tried, and in 1948 was sentenced to life imprisonment

Kokand or **Khokand** (both kōkänd', Rus kûkant'), city (pop 84,665), Uzbek SSR, in the Fergana Valley An important city since the 10th cent, it became the capital of an Uzbek khanate that emerged (16th cent) from the ruins of Tamerlane's empire and reached its flower in the 18th cent In 1876 Kokand fell to the Russians and the khanate ceased to exist Kokand is a center of cotton and silk manufacture and also produces cottonseed oil, sugar, superphosphates, and machinery There are remains of the khan's palace

Koken, Johannes see COCCEIUS, JOHANNES

Kokomo (kō'kumō), city (pop 33,795), co seat of Howard co, N central Ind, on Wildcat Creek and N of Indianapolis, founded c 1843, laid out 1844 It is an agricultural trading center, and its manufactures include steel, metal products, gas ranges, automobile and tractor parts, and radio receiving sets The first practical automobile was successfully tested in Kokomo by its inventor, Elwood Haynes, in 1894, gas shells used in the First World War were made here At the time of founding, Kokomo was an Indian trading post

Koko Nor. see TSING, lake

Kokoschka, Oskar (ôs'kar kôkôsh'kä), 1886–, Austrian expressionist painter and writer, now living in England After teaching (1920–24) at the art academy in Dresden he traveled extensively in Europe and the East, living for a time in Prague before settling (1938) in London In 1937 all his works in German galleries were summarily removed Among his portraits are those of Ambassador Maisky (Tate Gall, London) and Dr Tietze and his wife and a self-portrait (both Mus of Modern Art, New York); his landscapes include *Jerusalem* (Detroit Inst of Arts) and *View of Prague* (Phillips Memorial Gall, Washington, D C) Among other works are *Bride of the Wind* (Basel) and *Might of Music* (Art Inst, Chicago) He wrote expressionist verse dramas, such as *Der brennende Dornbusch*, performed (1919) in Berlin, and *Orpheus und Eurydike* (1923), orchestrated by Krenek. See biography by Edith Hoffmann (1947)

Koksoak (kōk'sōăk', kōk'–), river of NE Quebec, formed by the Kaniapiskau and Larch rivers SW of Fort Chimo, a Hudson's Bay Company post The river flows 90 mi NE and N to Ungava Bay.

Kokura (kōkōō'rä), city (1947 pop. 168,119), Fukuoka prefecture, N Kyushu, Japan, a port on the Inland Sea A railroad and industrial center, with steel mills, cotton textile mills, porcelain manufacture, and chemical plants, it was heavily bombed (1945) in the Second World War

kola or **cola** (both kō'lu), tropical tree (genus *Cola*), native to Africa and grown also in the West

Indies, **Brazil**, India, and other tropical regions. The fruit is a pod containing the seeds known as kola nuts or gourounuts, which contain caffeine, an essential oil, and a glucoside (kolanin) In Africa and other regions where the fresh nuts are chewed as a stimulant they are an important commercial item among the native populations Some nuts are exported and used in beverages and medicines

Kolaiah (kōlā'yŭ) [Heb ,=voice of God] **1** Benjamite family in Jerusalem Neh 11 7 **2** Father of Ahab, a false prophet Jer 29 21

Kola Peninsula (kō'lu, Rus kô'lĭĭ), large peninsula, area c 50,000 sq mi , N European RSFSR, between the Barents Sea in the north and the White Sea in the south, mostly N of the Arctic Circle Forming an eastern extension of the Scandinavian peninsula, it consists of tundras in the north and forests in the south There are rich mineral deposits, notably around KIROVSK in the Khibiny mts , which rise to c 4,000 ft The population is mostly Russian along the coasts In the interior there are Lapps, who subsist largely on reindeer raising MURMANSK, at the base of the peninsula, is the chief city Near Murmansk is the ancient town of Kola (1926 pop 614), founded in the 13th cent, by colonists from Novgorod

Kolar Gold Fields (kōlar'), city (pop 134,859), Mysore state, India The city, founded in the late 19th cent , is the center of the Indian gold-mining industry

Kolbe, Georg (gā'ôrk kôl'bu), 1877-1947, German sculptor He studied painting in Dresden, Munich, and Paris and then in Rome (1898–1900) turned to sculpture Later he worked in Paris under Rodin He is best known for his figure studies, many of which are in American museums

Kolberg (kôl'bĕrk) or **Kolobrzeg**, Pol *Kolobrzeg*, city (1939 pop 36,617, 1946 pop 2,816), N Pomerania, a seaport on the Baltic at the mouth of the Persante river, transferred to Polish administration in 1945 (see POMERANIA) Kolberg was mentioned as early as 1000, and its cathedral was built in 1280 A fortified town from 1631 to 1873, it was three besieged by the Russians in the Seven Years War before it fell in 1761 Gneisenau defended it against the French in 1807 Kolberg is a spa, and there are salt springs and salt domes in the vicinity

Kolchak, Aleksandr Vasilyevich (ŭlyĭksän'dur vŭsē'lyuvĭch kŭlchak'), 1874–1920, Russian admiral and counterrevolutionist He distinguished himself in the Russo-Japanese War, and in the First World War he commanded the Black Sea fleet After the Bolshevik Revolution of Oct , 1917, Kolchak organized a counterrevolutionary army which, with the help of the Czech Legion, established an anti-Bolshevik government in Siberia In Nov , 1918, Kolchak by a coup d'état assumed dictatorship over Siberia At first brilliantly successful against the Bolshevik forces, he was recognized by the Allies as well as by General DENIKIN as representing the provisional Russian government However, his great offensive of 1919 (in which he intended to join the British intervention forces and the Russian counterrevolutionists on the coast of the White Sea) collapsed rapidly and exposed Denikin's army in S Russia Kolchak retreated to Irkutsk, lost most of his following—especially the Czechs, who controlled the Trans-Siberian RR—and was betrayed into the hands of the Bolsheviks, who shot him His defeat left all Siberia in Bolshevik control, except the Far Eastern portion, which was controlled by Japanese intervention troops

Kolding (kôl'dĭng), city (pop 27,660), E Jutland, Denmark A port on the Kolding Fjord (an inlet of the Little Belt), it has shipbuilding, machinery, and dairy-processing plants and is a fishing base The Koldinghus is a 13th-century castle

Kolguyev (kŏlgō'vĭf), island (1,350 sq mi , 1939 estimated pop 300), off N European RSFSR, in the Barents Sea, E of the Kanin peninsula and 50 mi from the mainland It is a tundra region, inhabited mainly by Nentsy (Samoyedes), who subsist on reindeer raising and fur trapping There is a government observation station on the north coast

Kolhapur (kōlupōōr'), town (pop 93,032), SW Bombay state, India There are ancient Buddhist remains, notably a stupa (3d cent B C) with inscriptions in characters of the Asoka style Cotton and woolen goods are manufactured The town was the capital of the former native state of Kolhapur, which merged (1949) with Bombay

Kolin, Czech *Kolín* (kô'lēn), city (pop 19,820), central Bohemia, Czechoslovakia, on the Elbe It manufactures metal products, chemicals, foodstuffs, and furniture The Church of St Bartholomew is noted for its rich Gothic choir Frederick the Great of Prussia was defeated (1757) near Kolin by the Austrians under Field Marshal Daun

Kolkhida, Georgian SSR see COLCHIS

Kollar, Jan, Czech *Kollár* (yän' kô'lar), 1793–1852, Slovak poet who wrote in Czech He was an ardent proponent of cultural Pan-Slavism, which he promoted in a famous essay on Slavonic reciprocity (1836) and in his best-known poem, *The Daughter of Slava* (1821-24)

Kölliker, Albert von (äl'bĕrt fŭn kû'lĭkur),1817–1905, Swiss anatomist and physiologist He was professor of physiology and of microscopic and comparative anatomy at Würzburg from 1847 His researches on animal tissues were important contributions to the development of embryology and histology. He reported his findings in numerous memoirs and in a textbook of microscopic anatomy (1850) *Erinnerungen aus meinen Leben* (1899) is his autobiography

Kollontai, Aleksandra Mikhailovna (ŭlyĭksän'drŭ mēkhī'luvnŭ kŭluntī'), 1872?–, Russian revolutionist, diplomat, and novelist, whose maiden name was Aleksandra M Domontovich The daughter of a general, she early rebelled against her society and went to study abroad After returning to Russia she spread revolutionary propaganda among working women, and in 1908 she was forced to flee abroad because of her revolutionary activities, notably her criticism of tsarist policy in Finland She appeared in France, Italy, Belgium, and Germany, was deported in the First World War from Germany to Sweden and from Sweden to Denmark, and in 1916 visited the United States—carrying on pacifist and socialist propaganda wherever she went In 1917 she returned to Russia to take part in the Bolshevik Revolution Her independent ways were overlooked by Lenin and later by Stalin Mme Kollontai became (1920) people's commissar for social welfare and (1923) minister to Norway—the first woman to hold that diplomatic rank She later was minister to Mexico and after 1930 represented Russia at the Swedish court Raised (1943) to ambassadorial rank, she is said to have been instrumental in bringing about the Finnish-Russian armistice of 1944 Her reputation as a proponent of free love was partly due to several romantic escapades in her life, partly to slander, and partly to her novels, notably *Red Love*, of which an unauthorized English translation appeared in 1927 She also wrote extensively on social questions See Isabel de Palencia, *Alexandra Kollontai* (1947)

Kollwitz, Käthe Schmidt (kā'tu shmĭt' kôl'vĭts), 1867–1945, German painter, lithographer, and etcher In 1891 she married Karl Kollwitz, a Berlin physician Her activities as wife, mother, and ardent socialist and pacifist did not prevent her artistic development She first gained a reputation with her illustrations for Hauptmann's *Weavers* and Zola's *Germinal* She is best known for her superb lithographs of poor people Her art is one of compassion and understanding, with an immediate appeal which is simple, direct, and human In 1932 she was director of the department of graphic arts at the Berlin Academy, but the advent of the Nazi party ended her public career in Germany In 1943 she was evacuated from Berlin She died in a village in the Harz mts Her diary was privately printed in Germany in 1948 See *Kaethe Kollwitz* (1946), a collection of 72 reproductions with an introduction by Carl Zigrosser.

Kolmar, France see COLMAR

Köln, Germany see COLOGNE

Kolobrzeg, Pomerania see KOLBERG.

Kolomea, Ukraine see KOLOMYYA

Kolomna (kŭlôm'nŭ) city (1926 pop 30,767; 1939 pop 75,139), central European RSFSR, on the Moskva river near its confluence with the Oka and SE of Moscow It is an industrial center, producing locomotives, railroad cars, and machinery Founded in 1177, it passed to Moscow in 1301 and until the 16th cent played an important part in the defense of Moscow against the Tatars There are remains of the wall of the 16th-century kremlin and several old churches

Kolomyya (kŭlumĭ'yŭ), Ger *Kolomea* (kōlōmā'ă), Pol *Kolomyja* (kôvômĭ'yă), city (1931 pop 33,385), W Ukraine, in Galicia, on the Pruth river and in the Carpathian foothills An old Polish frontier city, it was frequently attacked (15th–16th cent) by the Tatars and the Walachians It passed to Austria in the first Polish partition (1772), reverted to Poland in 1919, and was ceded to the USSR in 1945 The city has several old churches and a fine old town hall It is a transportation center, and its industries include petroleum refining

Kolozsvar, Rumania see CLUJ

Kölreuter or **Koelreuter, Joseph Gottlieb** (both yō'zĕf gôt'lēp kûl'roi"tur), 1733 1806, German botanist He taught at the Univ of Karlsruhe and directed the botanical gardens He experimented with hybridization of plants, studied their fertilization and development, and pointed out the importance of insects and of wind in the pollination of flowers

Koltsov, Aleksey Vasilyevich (ŭlyĭksyā' vŭsē'lyuvĭch kŭltsôf'), 1809–42, Russian poet A peasant and without formal education, he received encouragement from Belinsky and composed peerless lyrics in the peasant idiom See Leo Wiener, *Anthology of Russian Literature* (1902)

Kolyma (kôlō'mŭ, kôlĭma', Rus kŭlĭ'mŭ), river, c.1,500 mi long, RSFSR, in NE Siberia It flows generally N into the Arctic Ocean and is navigable (June–Oct) for c 1,000 mi Its upper course traverses the rich Kolyma gold-mining area The **Kolyma Range** roughly parallels the river in the east and rises to 6,000 ft.

Komandorski Islands (kŏmŭndôr'skē) or **Commander Islands,** Rus *Komandorskiye Ostrova*, group, off Kamchatka Peninsula, RSFSR, in SW Bering Sea They consist of BERING ISLAND, Medny Island, and two islets These foggy islands, composed of volcanic rock and visited by frequent earthquakes, are a whaling and sealing base They are populated mainly by Aleuts The largest village is Nikolskoye.

Komarno (kô'mārnô) or **Komarom** (kô'marôm), Ger *Komorn*, Hung *Komárom*, Slovak *Komárno*, city of Czechoslovakia and Hungary, on both sides of the Danube, at its confluence with the Nitra and Vah rivers Komarno (pop 15,461) on the left bank, belongs to Slovakia It has machinery and textile plants, shipyards, and flour mills, and it has retained part of its fortifications of the 15th to 17th cent Hungarian Komarom (pop 8,876), on the right bank, has lumber yards, sawmills, and textile plants Both parts of the city have port installations A Hungarian royal city until its partition between Czechoslovakia and Hungary after the First World War it was an important grain-trading center in the 18th cent

Komi (kô'mĭ, kô'mē), Finnic people, numbering c 250,000, formerly known as Zyrians (zĭ'rēunz) They speak a Finno-Permian language and live mostly in the Komi ASSR of NE European Russia The Komi are very closely related to the Permyaks (c 150,000), who inhabit the Komi-Permyak National Okrug, NW of Molotov (formerly Perm), in the upper Kama basin

Komi Autonomous Soviet Socialist Republic, administrative division (156,200 sq mi , 1946 estimated pop 450,000), NE European RSFSR, extending westward from the N Urals across the sparsely populated basins of the Pechora, Vychegda, and upper Mezen rivers Syktyvkar is the capital Nearly half of the area has permanently frozen soil The north is a wooded tundra, in the center, the TIMAN ridge crosses a forested and swampy lowland The population is concentrated in the south, where it engages in lumbering, agriculture and stock raising The main crops are flax and potatoes In the north, fur trapping, reindeer raising, and fishing are the chief occupations There are coal mines in the Pechora basin and an oil field at Ukhta, situated on a railroad (built 1940) that traverses the region from southwest to northeast The Komi form the greater part of the population The region, constituted in 1921 as the Zyrian Autonomous Oblast, became an autonomous republic in 1936

Komi-Permyak National Okrug (kô'mē-pûrm'yăk, Rus kô'mē-pĭrmyak'), administrative division (8,920 sq mi , 1946 estimated pop 300,000), RSFSR, in the western foothills of the central Urals It is included in Molotov oblast Kudymkar is the capital It is heavily forested in the north and west and agricultural in the center and south The population consists mainly of Permyaks, a Finnic group closely related to the KOMI

Komorn, Czechoslovakia see KOMARNO

Komotau, Czechoslovakia see CHOMUTOV

Komsomolsk (kŭmsumôlsk') or **Komsomolsk-on-Amur** (–amōōr), Rus *Komsomolsk-na-Amure* (–nŭ-umōōr'yĭ), city (1939 pop 70,746, 1946 estimated pop 150,000), S Khabarovsk Territory, RSFSR, in E Siberia, on the lower Amur river It is the center of heavy industries in the Soviet Far East, with steel mills, shipyards, lumber and paper mills, petroleum refineries, and aircraft plants Founded in 1932 by pioneers of the Komsomol (Communist youth organization), it experienced spectacular growth

Kona (kô'nŭ), district, W Hawaii, T H , commercially important as the coffee belt of the territory and also as a favorite area for tourists, with fine deep-sea fishing off the coast On Kealakekua Bay stands the Captain Cook monument The ancient City of Refuge is at Honaunau Kailua Bay was the landing place for the first group of American missionaries (1820)

Konakry see CONAKRY

Konarak (kōnu'rŭk, kō'nurŭk), Hindu temple, Orissa state, India, built in the 13th cent Of red sandstone, it is called the Black Pagoda in contrast to the whitewashed pagoda of nearby Puri Though Konarak is partly ruined, enormous wheels carved in high relief about the base still suggest the chariot of the sun god to whom the temple is dedicated Many of the carvings are licentious

Konawa (kŏn'uwô), town (pop 2,205), S central Okla , SE of Oklahoma City, in a farm and oil-producing area

Kondouriotis, Paul (kôndōōryô'tĭs), 1857–1935, Greek admiral and statesman He became a national hero through his victories over the Turkish fleet in the Greco-Turkish War of 1897 and in the Balkan War of 1912-13 He was regent after the departure (1923) of King George II from Greece and in 1924 was elected provisional president of the newly formed Greek republic Early in 1926 General PANGALOS made himself dictator and Kondouriotis resigned, but in August, General KONDYLIS overthrew Pangalos and recalled Kondouriotis A new constitution was promulgated Kondouriotis sought to resign several times dur-

ing the premierships of ZAIMIS (1926–28) and VENIZELOS, and in 1929 his resignation was final. Zaimis succeeded him as president The name also appears as Condouriotis and Koundouriotis

Kondylis, George (kôndhē'lĭs), 1879–1936, Greek general and statesman He fought in the Balkan Wars and at Salonica in the First World War and entered politics in the turbulent post-war years. He overthrew the dictatorship of General PANGALOS in 1926 After 1933 he suddenly passed into the royalist camp As minister of war under Panayoti TSALDARIS, he suppressed (1935) the Cretan uprising in favor of VENIZELOS, late in 1935 he ousted Tsaldaris by a coup d'état and induced the parliament to recall King GEORGE II, who, however, soon dismissed him as premier. The name also appears as Condylis.

Konev, Ivan Stepanovich (ēvän' styĭpa'nuvĭch kô'nyĭf), 1897–, Russian field marshal He rose from the ranks after the Bolshevik Revolution and in the Second World War reconquered (1944–45) the Ukraine and S Poland from the Germans, took Silesia, and participated in the conquest of Czechoslovakia and the capture of Berlin He became (1945) military governor of the Russian occupation zone in Austria and (1946) commander in chief of the Russian ground forces

Kongo San. see DIAMOND MOUNTAINS

Kongsberg (kôngs'bĕr), town (pop 7,852), Buskerud co , S Norway, WSW of Oslo Formerly a silver-mining center, it now is the seat of an arms industry and of a hydroelectric plant.

Konia, Turkey see KONYA

Königrätz see HRADEC KRALOVE and SADOWA

Königinhof (kū"nĭginhôf'), Czech *Dvůr Králové* (dvōōr' kra'lôvā), town (pop 13,675), N Bohemia, Czechoslovakia, on the Elbe It has textile manufactures Here in 1817 were "discovered" several manuscripts purporting to be early medieval Czech poems One of the scholars who exposed the poems as patriotic forgeries was Thomas G Masaryk

Königsberg (kū'nĭkhsbĕrk), since 1945 **Kaliningrad** (kălyĕ'nyĭngrät'), city (1939 pop 372,164), capital of Kaliningrad oblast, RSFSR, in former East Prussia, an ice-free Baltic seaport on the Pregel river near its mouth on the Frisches Haff It was transferred to the USSR at the Potsdam Conference of 1945 The historic capital of East Prussia, Königsberg was founded (1255) as a fortress of the Teutonic Knights by King Ottocar II of Bohemia, for whom it is supposedly named It joined (1340) the Hanseatic League and became (1457) the seat of the grand master of the Teutonic Order after the knights had lost Marienburg to Poland It was the residence of the dukes of Prussia from 1525 until the union (1618) of Prussia and Brandenburg and became (1701) the coronation city of the kings of Prussia The Univ of Königsberg (founded 1544) reached its greatest fame when Kant (who was born and lived his entire life at Königsberg) taught here. A major Baltic port and an important commercial center, Königsberg prospered until the Second World War, when it was virtually destroyed during a two-month siege (1945) by the Russians. The old castle, the university building, and the 14th-century cathedral, next to which Kant is buried, were destroyed The population of Königsberg had largely fled on the approach of the Russian army, and Kaliningrad, which was laid out in the northwestern section, in former residential suburbs, has a Russian population The chief industries are the construction of freight cars, machinery, and ships and food processing Kaliningrad oblast is that part of EAST PRUSSIA which was transferred to the USSR in 1945 and incorporated into the RSFSR, from which it is separated by Lithuania.

Königshütte, Poland see CHORZOW

Königsmark, Countess Maria Aurora (märē'ä ourōō'rä ku'nĭgsmärk), 1666?–1728, Swedish noblewoman, sister of Count Philipp Christoph Königsmark. She went to Dresden in search of her brother and there became the mistress of Augustus II of Poland and Saxony Their son, Maurice, was the famous Marshal de SAXE In her last years she was abbess coadjutor at Quedlinburg

Königsmark, Count Philipp Christoph (fē'lĭp krĭs'tôf), d 1694?, Swedish nobleman, an officer in the service of Hanover Accused of having an intrigue with SOPHIA DOROTHEA, wife of Elector George Louis (later George I of England), the count disappeared in 1694. It is believed that he was killed by order of the elector.

Königstein (kū'nĭkhshtīn), fortress, Saxony, E Germany, above the Elbe. Dating from the 12th cent., it was used in both world wars as an officers' prison camp Here in 1942 Gen Henri Giraud made his dramatic escape

Koninck or **Coningh, Philips de** (fē'lĭps du kō'nĭngk, kō'nĭng), 1619–88, Dutch landscape and portrait painter, one of Rembrandt's best pupils His rather panoramic landscapes, rich and warm in tone, have atmosphere and space His works are rare, among the best are *Entrance to a Forest* and *Landscape* (both Rijks Mus.) and *View of the Mouth of a River* (The Hague; replica, National Gall , London) The Metropolitan Museum has one landscape

Koninkloo, Gillis van: see CONINXLOO, GILLIS VAN.

Konotop (kônŭtôp', kŭnŭtôp'), city (pop. 33,571), N Ukraine At the junction of the railroad lines to Kiev, Voronezh, Gomel, and Moscow, it has an agricultural machinery plant and flour mills In the Second World War, Konotop was held (1941–43) by the Germans.

Konoye, Fumimaro, Prince (fōō"mēmärō' kônoi'), 1891–1945, Japanese statesman. A descendant of the ancient Fujiwara family and protégé of Prince Saionji, he became president of the house of peers in 1933 In May, 1937, he was persuaded to accept the premiership A former liberal, he now laid the basis for a one-party system by his coalition efforts Shortly afterward, war with China broke out In March, 1938, the National Mobilization Law was passed, and in November, Konoye proclaimed Japan's aim of a "new order in East Asia" He resigned in Jan , 1939, and became president of the privy council and minister without portfolio Recalled to the premiership in July 1940, he concluded an alliance with the Axis and mobilized the home front through the Imperial Rule Assistance Association Having failed to reach an agreement with the United States, he resigned in Oct., 1941, to be followed by Hideki Tojo After the war he was listed for trial as a war criminal, but committed suicide in Dec , 1945

Konrad von Würzburg see CONRAD OF WÜRZBURG.

Konstantinovka (kŭnstuntyē'nŭfkŭ), city (1926 pop 25,303, 1939 pop 95,087), SE Ukraine, in the Donets Basin. A metallurgical center, it has iron and steel mills and zinc works

Konstanz, Germany see CONSTANCE

Konya (kôn'yä), city (pop 58,457), S central Turkey The market center of a rich agricultural and livestock-raising area, it also has manufactures of carpets and of leather, cotton, and silk goods Konya prov , the largest in Turkey, has important mineral resources, including lead, silver, gold, mercury, salt, and magnesium sulphate As the ancient ICONIUM, the city was important in Roman times, but it reached its peak after the victory (1071) of Alp Arslan over the Byzantines at Manzikert, which resulted in the establishment of the sultanate of Iconium or Rum (so called after Rome), one of the most powerful states of the Seljuk TURKS The sultans of Rum played an important part in the age of the Crusades, they were sometimes allied, sometimes at war, with their neighbors, the Byzantine emperors, the kings of Armenia, and the other Turkish rulers in Asia Minor Emperor Manuel I was severely defeated (1176) in an attempt to take Konya, Emperor Frederick I occupied the city—but not its citadel—in 1190 In the late 13th cent the Seljuks of Iconium were defeated by the allied Mongols and Armenians Their territories in S central Asia Minor subsequently passed to the emirs of Karamania (see KARAMAN) and (15th cent) to the Ottoman Turks Konya lost its political importance but remained a religious center as the chief seat of the whirling dervishes, whose order was founded here in the 13th cent The tomb of the founder, several medieval mosques, and the old city walls have been preserved In 1832 an Egyptian army under Ibrahim Pasha completely routed the Turks at Konya The Armenian population of Konya, once very numerous, was largely deported in the First World War One of the alternate spellings of Konya is Konia

Koo, Vi Kuyuin Wellington (vē' jün' wē'lĭngtŭn kōō'), Mandarin *Ku Wei-chun*, 1887–, Chinese diplomat, b Shanghai Koo was educated at Columbia Univ (B A , 1908, M A , 1909, Ph D., 1912), where he specialized in international law In 1912 Wellington Koo was secretary to Yuan Shih-kai, president of China He was made minister to the United States (1915) and to Great Britain (1921) He served as delegate to the Paris Peace Conference (1919) and then was a representative on the Council of the League of Nations At various times he was minister of foreign affairs and prime minister Koo represented China in France (1932–41) and in Great Britain (1941–46) He headed the Chinese delegation to the San Francisco Conference which founded (1945) the United Nations In 1946 he became Chinese ambassador to the United States

Koolau Range (kō'ulou'), mountain chain, on Oahu, T H , extending northwest-southeast and rising to 3,105 ft in Konahuanui It is cut by two scenic passes, NUUANU PALI and Waimanalo Pali.

Kootenai (kōō'tĭnā), river rising in SE British Columbia Part of the Columbia river system, it flows into NW Montana, W into N Idaho, and then northward past Bonners Ferry, to the southern end of Kootenay Lake, in Canada The Canadian name is spelled Kootenay

Kootenai Indians, group of North American Indian tribes, which in the 18th cent. occupied the so-called Kootenai country (i.e., N Montana, N Idaho, and SE British Columbia). They belong to a distinct linguistic stock, the Kootenai (for a supposed relationship, see ALGONQUIAN). The Upper Kootenai lived near the headwaters of the Columbia river, and the Lower Kootenai lived on the Lower Kootenai river. According to tradition the Kootenai once lived E of the Rocky Mts., from whence they were driven by their enemies the Blackfoot Indians. Kootenai culture was essentially that of the Plateau area, but after the advent of the horse the Kootenai adopted many Plains area traits including a seasonal buffalo hunt. White contact began early in the 19th cent., when the North West Company established Rocky Mountain House on the upper Saskatchewan river. In 1807 David Thompson of the same company opened the first trading post in Kootenai country Today most of the Kootenai live with the Salish Indians on a section of the Flathead Reservation in NW Montana Both tribes number some 3,300. The name is sometimes spelled Kootenay or Kutenai See H H. Turney-High, *Ethnography of the Kutenai* (1941)

Kootenay Lake (kōō'tĭnā), SE British Columbia, E of the Selkirk range, an expansion of the Kootenay (in the United States, Kootenai) river

Kootenay National Park, 543 sq mi , SE British Columbia, est 1920 In the mountain area E of Kootenay Lake, it contains high peaks, deep canyons, and hot mineral springs The Banff-Windermere Highway crosses the park.

Kooweskoowe see ROSS, JOHN

Kopparberg, Swed *Kopparbergs län* (kô"pärbĕryus lĕn'), county (11,648 sq mi , pop 253,507), central Sweden, virtually identical with the historical province of DALARNA Its copper mines, from which its name is derived, are now exhausted, but rich iron mines are worked in the Grangesberg district in the south There are large iron, steel, and lumber mills along the Dal river In the north, about Lake Siljan, there is an agricultural district The county seat and industrial center is FALUN, other centers are DOMNARVET, Kvarnsveden, and Avesta

Koppel, industrial borough (pop 1,064), W Pa , NW of Pittsburgh and on the Beaver river Quarrying and a freight-car factory are its main industries

Köprülü. see KUPRILI

Koprulu, Yugoslavia see TITOV VELES.

Korah (kō'rä) **1** Levite leader, with Dathan and Abiram, of the unsuccessful revolt in the desert against Moses which ended by the rebels' being consumed by fire and earthquake Num 16, 26 9 11 Core Jude 11 **2** Son of Esau Gen 36 5,14,18 **3** Another descendant of Esau Gen 36 16 **4** Descendant of Caleb 1 Chron 2 43. **5** Levitical family, perhaps descended from **1**, which had duties as doorkeepers and singers Ex 6 24, 1 Chron 9 19,31, 2 Chron 20 19, titles of Pss 42, 44–49, 84, 85, 87, 88 Kore 1 Chron 26 19

Koran or **Quran** (kōrän', -rän') [Arabic, = reading, lection], the sacred book of ISLAM According to Islamic belief, it was revealed by God to MOHAMMED the Prophet in separate revelations over the major portion of the Prophet's life at Mecca and at Medina The canonical text was established A H 30 (A D 651–52), under the caliph OTHMAN, by Arabic editors, who used for their basis a collection made by Zaid ibn Thabit, the Prophet's secretary The caliph had all collections destroyed save Zaid's and thus made the new edition unique The revelations are divided into 114 suras [chapters], but many of the suras include several revelations The arrangement of the suras is mechanical the first (Fatihah) is a short exultation in God, the rest are graded generally by length, from longest to shortest It is thus impossible to tell from the book the chronological order of revelations, generally, however, the shorter suras, more electric and fervent than the rest, are the earlier, while many of the longer suras (and all those revealed at Medina) are later The Koran is in classical Arabic, that is to say, the Arabic of the Koran is the classic language The Koran is undoubtedly the most influential book in the world after the Bible Moslems memorize much or all of it, and Islam considers all science but a commentary on the Koran. It is probably true that the Koran accounts for the remarkable unity of Islam, one of the most widespread of religions

Korat (kōrät') or **Nakhon Ratchsima** (nukôn' rächsē'mä), town (pop 21,774), Thailand It is the trade and communication center of the Korat plateau, E Siam, which lies to the north and the east The name also appears as Nakhon Rajasima

Korbel, Mario (kôr'bl), 1882–, American sculptor, b Bohemia He came to the United States in 1900 He is known for his fountains and dancing figures Representative works are the *Dancing Group* (Cleveland Mus), *Andante* (Metropolitan Mus), marble bust (Art Inst , Chicago), *St Therese* (Vatican), and the McPhee monument (Denver, Colo.)

Korça or **Korçë,** Albania see KORITSA.

Korcula (kôr'chōōlä), Ital *Curzola* (kōōrtsō'lä), Serbo-Croatian *Korčula* (kôr'chōōlä), island, area 107 sq mi , off Dalmatia, in the Adriatic It belongs to Yugoslavia. It is covered with forests, pastures, and vineyards The chief town is Korcula (pop 2,012), which has retained its fine medieval cathedral and fortifications.

Kore (kō'rē) **1** Family of temple doorkeepers 1 Chron. 9 19 **2** Levite under Hezekiah. 2 Chron 31.14. **3** See KORAH **5.**

Korea (kôrē'ŭ, kŭ–), Korean *Choson*, Jap. *Chosen* or *Tyosen*, country (85,228 sq. mi.; 1944 pop. 25,900,142), E Asia. A peninsula, it is bounded

on the west by Korea Bay (an arm of the Yellow Sea), on the south by Korea Strait (connecting the Yellow Sea and the Sea of Japan) and the Yellow Sea, and on the east by the Sea of Japan; its land boundaries with China and the USSR on the north are marked in the main by the Yalu and Tumen rivers Off the heavily indented coast (c 5,000 mi long) lie some 3,400 islands, most of them rocky and uninhabited, the main island group is the Korean Archipelago in the Yellow Sea The Korean peninsula is largely mountainous, the principal series of ranges, extending along the east coast, rises to 8,337 ft at Mt Kwanmo, the highest peak in the country Korea has large timber resources, but little virgin forest Gold, iron, tungsten, and coal are the principal mineral resources, and copper, silver, molybdenum, zinc, and bauxite occur in small quantity The limited arable land, located mostly in the lowlands to the west of the coastal range, provides the livelihood for most of the population Rice is grown in paddies, frequently terraced on the mountain slopes, other crops are barley, millet, soybeans, fruit, tobacco, and cotton Much food is obtained from the extensive salt-water fishing grounds Heavy industry, often run by hydroelectric power, is chiefly centered in the north, but there is some industry in the south, mainly at Seoul and Pusan Textiles, ceramics, paper, leather goods, and divers other products are made The country's transportation system comprises its railroads (mostly north-south lines) and several navigable rivers The Korean elementary education system has produced a largely literate nation There are about 50 colleges and universities, some under Christian sponsorship Christians are a small minority, however, and most Koreans practice a mixture of Buddhism and Confucianism (introduced from China in the 4th cent A D) and of native shamanism The documented history of Korea begins in the 12th cent B C , when a Chinese scholar Ki-tze (Kija) founded a colony at Pyongyang China intervened in Korean affairs in the 7th cent A D to establish the Silla kingdom over the entire country Mongol forces, invading from China, occupied Korea from 1231 to 1260 In 1592 an invasion of the Japanese conqueror Hideyoshi was turned back at Pyongyang by combined Chinese and Korean forces Korea was made a vassal of China in the early 17th cent and was so isolated from other foreign contact as to be called the Hermit Kingdom All non-Chinese influences were excluded until 1876 when Japan forced a commercial treaty with Korea, and soon the United States and the countries of Europe were also admitted to trade Japan's control was completed after her victories in the First CHINO-JAPANESE WAR (1894–95) and the RUSSO-JAPANESE WAR (1904–5), and in 1910 Korea was formally annexed to the Japanese Empire Japan built modern industries and railroads, but despite repression it could not stifle the Korean longing for freedom In the Second World War at the Cairo Conference (1943) the United States, Great Britain, and China promised Korea independence After the Japanese capitulation the country was arbitrarily divided into two occupation zones, the Russians north and the Americans south of the line of lat 38° N Industry and trade were concentrated in the north and agriculture in the south When relations between the USSR and the United States worsened, trade between the zones was shut off and great economic hardship resulted Several international discussions failed, and in 1948 the division was formalized by establishing two regimes, the southern Korean republic with its capital at Seoul and the People's Republic of Korea with its capital at Pyongyang An election was held in S Korea under United Nations supervision, and Syngman Rhee, a veteran nationalist, was elected the first president by the parliament By mid-1949 all Soviet and American troops had been withdrawn from Korea Opposition between the two governments was bitter Northern propaganda condemned the government of the south as an American puppet regime and claimed jurisdiction over its territory See A J Grajdanzev, *Modern Korea* (1944), Elizabeth Keith and E K Robertson-Scott, *Old Korea* (1946)

Koreish (kôrĭsh'), family of Mecca to which Mohammed belonged It was one of the principal tribes of the city, wealthy and powerful Most of the Koreishites were bitterly opposed to the Prophet, especially at the beginning of his mission

Korin, Ogata (ōgä'tä kō'rēn), c 1655–1716, Japanese decorator and painter, renowned for his lacquer work His inlays in white metal and mother-of-pearl show the influence of an earlier artist, Koetsu, but he departed from traditions, conventions, and natural forms, creating his own style The Korin school is distinctly Japanese in feeling

Koritsa (kŏrĭt'sä, kô'rētsä"), Albanian *Korçë* or *Korça* (both· kôr'chu), city (pop. 24,035), SE Albania, in Epirus, near the Greek border. It is the commercial and agricultural center of a fertile plain Flour milling, dairying, distilling, brewing, and knitwear and cigarette manufactures are the chief industries. First mentioned in 1280, Koritsa was destroyed (1440) by the Turks but developed again after the 16th cent. Ever since Albania gained independence in the Balkan Wars, Koritsa has been claimed by Greece Greek troops occupied it in 1912–13 during the Balkan Wars and again early in the First World War From 1916 to 1920 it was occupied and administered by the French in the name of the Allies, and in the Second World War it was held (Nov , 1940–April, 1941) by the Greeks after the Italian attack on Greece Koritsa has a large 15th-century mosque and several modern government buildings

Kormendi, Francis (kûr'mĕndē), Hung *Körmendi Ferenc* (fĕ'rĕnts), 1900–, Hungarian novelist. His *Escape to Life* (1932) won the international novel competition of 1932 Among his translated novels are *The Happy Generation* (1934, Eng tr , 1945) and *That One Mistake* (1938, Eng tr , 1947)

Körner, Karl Theodor (karl' tā'ōdôr kûr'nur), 1791–1813, German poet and soldier who was killed in battle He owes his fame to the martial lyrics collected as *Lever und Schwert* [lyre and sword] (1814) by his father, who also wrote his biography

Kornilov, Lavr Georgyevich (la'vur gĕyôr'gyĭvĭch kûrnyô'luf), 1870–1918, Russian general He fought in the Russo-Japanese War, and in the First World War he was captured (1915) by the Austrians and escaped (1916) After the February Revolution of 1917 Kerensky made him commander in chief, and Kornilov proceeded to restore discipline among the troops In Sept , 1917, however, Kerensky—who feared that Kornilov planned to establish a military dictatorship—dismissed Kornilov and, upon Kornilov's refusal to accept his dismissal, arrested him and his assistants, including Denikin Shortly after the Bolshevik Revolution of 1917 Kornilov escaped from Petrograd and joined Gen M V ALEKSEYEV in S Russia Their volunteer army was greatly weakened by the virtual defection of the Don Cossacks early in 1918, under Kornilov's leadership it fell back to the Kuban region He was killed while attacking Ekaterinodar (now Krasnodar) and was succeeded by Denikin as counterrevolutionary commander in the south

Korolenko, Vladimir Galaktionovich (vlŭdyē'mĭr gŭlŭktyô'nŭvĭch kŭrulyĕn'kô), 1853–1921, Russian story writer and publicist In his early career he was famous as a liberal and gave Russian liberals one of their great slogans, "There are still lights ahead!" found in his *Lights* (1888) He wrote graceful and sentimental stories (many have been translated into English) In 1917 he welcomed the overthrow of tsardom but later was unable to accept the Bolshevist Revolution

Koros (kô'rŭsh), river, E Hungary Its official Hungarian name is *Harmás Körös* (hŏr'mäsh) [Triple Koros] Formed by the junction of three headstreams that rise in Transylvania, Rumania, it flows c 50 mi W into the Theiss

Korsor, Dan *Korsør* (both kôrsûr'), city (pop 10,667), W Zealand, Denmark, a port on the Great Belt It is connected by ferry with Nyborg on Fyn island

Kortrijk, Belgium see COURTRAI.

Koruk, Algerian corsair see BARBAROSSA.

Koryak National Okrug, RSFSR see KAMCHATKA.

Korzybski, Alfred Habdank (kôrzĭb'skē), 1879–1950, Polish-American scientist, b Warsaw In his system, which he called General Semantics, Korzybski aimed at a distinction between the word and the object it describes and between the individual objects all described by the same word, demanding also that the effect of time be taken into consideration He was founder, president, and director of the Institute of General Semantics (1938), moved from Chicago to Lakeville, Conn , in 1946 He lectured (1949) at Yale on his system and wrote two books on it—*Manhood of Humanity the Science and Art of Human Engineering* (1921) and *Science and Sanity an Introduction to Non-Aristotelian Systems and General Semantics* (1933)

Kos (kŏs, kôs), Latin *Cos*, island (111 sq mi , pop 18,545), Greece, in the Aegean Sea, second largest of the DODECANESE It is 2½ mi distant from the coast of Asia Minor Though it rises to 2,870 ft in the southeast, it is mostly low-lying and produces grain, tobacco, olive oil, fruit, almonds, and wine Cattle, horses, sheep, and goats are raised Kos has some lignite, lead, iron, copper, and salt deposits and several sulphur springs Fishing and sponge fishing are important occupations. The chief city, Kos (pop. 7,955), on the north shore, has tobacco and brandy manufactures In ancient times the island was controlled in turn by Athens, Macedon, Syria, and Egypt Under the Romans it enjoyed great privileges It was an important cultural center and was the home of Hippocrates. It is called Coos in AV. Acts 21 1.

Kosciusko, Thaddeus (kŏ"sēŭ'skō), Pol *Tadeusz Andrzej Bonawentura Kościuszko* (tädĕ'ōōsh än'jā bô"navĕntôō'rä kôsh-chôōsh'kô), 1746–1817, Polish general. Trained in military academies in Warsaw and Paris, he offered his military skill to the patriot cause in the American Revolution out of devotion to the ideal of liberty Kosciusko arrived in America in 1777 and took part in the Saratoga campaign; it was he who advised Horatio Gates to fortify Bemis Heights. Later he fortified (1778) West Point and fought (1780) with distinction under Gen Nathanael Greene in the Carolina campaign After his return to Poland he became a champion of Polish independence. He fought in the campaign before the second partition (1793) of Poland In 1794 he issued at Cracow a call for a national uprising and led the Polish forces against both Russians and Prussians in a gallant but unsuccessful rebellion He was imprisoned, and after being freed (1796) he went to the United States and later (1798) to France, where after the fall of Napoleon he pleaded with Alexander I of Russia for Poland He died in Solothurn, Switzerland, and is buried in Cracow. His whole-souled devotion to liberty and Polish independence have made him one of the great Polish heroes See M Haiman, *Kosciuszko in the American Revolution* (1943) and *Kosciuszko, Leader and Exile* (1946)

Kosciusko (kŏ"sēŭ'skō), city (pop 4,291), co seat of Attala co , central Miss , NE of Jackson, in a dairy area, settled in the early 1830s on the old Natchez Trace, inc 1836

Kosciusko, Mount (kŏzēŭ'skō), 7,305 ft high, SE New South Wales, in the Australian Alps, highest peak of Australia Winter sports are held on its slopes A near-by peak, Mt TOWNSEND, was formerly called Mt Kosciusko

Kose no Kanaoka see KANAOKA

kosher [Heb ,=proper, i e , fit for use], term applied to food which is in accordance with the Jewish dietary laws Kosher meat is the flesh of animals which chew the cud (as the cow and sheep) and which have cloven hoofs, the animal must have been slaughtered with a skillful stroke by a specially trained and highly learned and pious Jew (the slaughterer has a very honorable standing in the Jewish community), it must be carefully inspected, and the meat, unless it is cooked by broiling, must be salted and soaked to remove all traces of blood Kosher fish are those which have scales and fins (mollusks and eels are forbidden) The rules which apply to the slaughter and preparation of fowl are the same as those for the slaughter of animals The cooking and eating of milk products with, or immediately after, meats or meat products is unkosher, even the use of the same kitchen and table utensils and towels is forbidden. The cleansing of newly acquired utensils and the preparation of articles for Passover use are also called koshering The antitheses of kosher is *tref* (trāf) [from Heb ,=animal torn by wild beasts] Many of the kosher laws are directly traceable to measures for the preservation of health under the conditions in ancient Palestine The observation of these laws, more than anything else, marks a Jew as orthodox.

Koshtan-Tau (kŭshtan"tou', kôsh"tan-), peak, 16,880 ft high, USSR, in the central Greater Caucasus

Kosice (kô'shĭtsā), Ger *Kaschau* (kä'shou), Hung *Kassa* (kô'shô), Slovak *Košice* (kô'shĭtsā), city (pop 51,689), SE Slovakia, Czechoslovakia An important trade center, it also has textile, machinery, food, tobacco, and other manufactures and is an episcopal see Kosice belonged to Hungary until 1918, in 1938 it again was awarded to Hungary as a result of the Munich Pact, but early in 1945 it became the provisional capital of the Czechoslovak government after its return from Moscow, and it was restored to Czechoslovakia There are many palatial residences of the former Magyar nobility and the beautiful Gothic Cathedral of St Elizabeth (14th cent).

Kosovo, Yugoslavia see KOSSOVO

Kossak, Sophia (kô'säk), Pol *Zofja Kossak-Szczucka*, 1890–, Polish novelist She is a leading figure in Polish historical fiction and in the Catholic literary renaissance Among the novels which have been translated are *The Blaze* (1922, Eng tr , 1927), describing the Bolshevist invasion of 1917–18, *The Leper King* (1937, Eng tr , 1945), and *Blessed Are the Meek* (1938, Eng tr , 1944).

Kosseir (kôsēr'), town (pop c 3,000), central Egypt, a port on the Red Sea It is much reduced since the Abbasid period Near by are deposits of lead, tin, and phosphates

Kossel, Albrecht (al'brĕkht kô'sŭl), 1853–1927, German physiologist He was professor at Heidelberg (1901–27) He specialized in physiological chemistry, studying particularly proteins and the cell and its nucleus For this work he received the 1910 Nobel Prize in Physiology and Medicine He wrote *Protamines and Histones* (Eng tr , 1928).

Kossovo, Serbo-Croatian *Kosovo* (both kô'sôvô), plain, SW Serbia, Yugoslavia, W of Pristina Here in 1389 the Turks under Murad I crushingly defeated the Serbs and their Bosnian, Montenegrin, Bulgarian, and other allies Before the battle Milosh Obilich, a Serb posing as a deserter, was taken into the tent of Murad, whom he stabbed to death, he was immediately slain, as was Prince Lazar of Serbia after his capture. The battle of the Field of Kossovo (the name means "field of the black birds") broke the power of Serbia and of Bulgaria It figures prominently in Serbian poetry. A second battle was fought here in 1448, when Sultan Murad II defeated a Hungarian army led by John Hunyadi, who was captured but soon freed.

Kossuth, Louis' (kŏs'ōōth'), Hung *Kossuth Lajos* (kŏsh'ŏōt lŏ'yŏsh), 1802–94, Hungarian revolutionary hero Born of a Protestant family and a lawyer by training, he entered politics as a member of the diet and soon won a large following for his liberal and nationalist program, he did not shrink from the possibility of dissolving the union of the Hungarian and Austrian crowns He was arrested in 1837, but popular pressure forced the Metternich regime to release him in 1840 Kossuth, a fiery orator, was one of the principal figures of the Hungarian revolution of March, 1848 When, in April, Hungary was granted a separate government, Kossuth became finance minister Kossuth continued and intensified his anti-Austrian agitation His extreme nationalism, which was opposed to the fulfillment of the national aspirations of the Slavic, Rumanian, and German minorities in Hungary, was particularly resented in Croatia When the Austrian government, supported by the ban of Croatia, JELLACHICH DE BUZIM, prepared to move against Hungary, Kossuth became head of the Hungarian government of national defense and virtual dictator His government withdrew to Debrecen before the advance of the Austrians under WINDISCHGRATZ In April, 1849, it declared Hungary an independent republic and Kossuth became president The Hungarians won several victories, but in 1849 Russian troops intervened in favor of Austria, and Kossuth was obliged to resign the government to General GORGEY The Hungarian surrender at Vilagos marked the end of the republic Kossuth fled to Turkey After visiting England and the United States, where he received ovations as a champion of liberty, Kossuth lived in exile in England and (after 1865) in Italy He unsuccessfully tried to stir up risings in Hungary in 1859 and 1866 He was dissatisfied with the *Ausgleich* of 1867, by which the Austro-Hungarian Monarchy was created, and he refused an offer of amnesty in 1890 After his death at Turin, Italy, his body was brought to Budapest and buried in state.

Koster or **Coster, Lourens Janszoon** (lou'rŭns vän'sŏn kō'stur), c 1370–c 1440, sexton of a church in Haarlem, one of the men to whom has been ascribed the invention of printing with movable types His name was Lourens Janszoon, but he is known by his office, as Koster or Coster [sexton] No evidence that he was a printer has been found of earlier date than more than a century after his death Crude specimens of Dutch printing from movable types have been found, however, that may be older than the excellent work attributed to GUTENBERG the evidence is inconclusive

Kostroma (kŭstrumä'), city (pop 121,205), capital of Kostroma oblast, central European RSFSR, on the Volga at the mouth of the Kostroma river It is a major linen-milling center Founded (12th cent) on the right bank of the Volga, it was transferred to the left bank after its destruction (1238) by the Mongols It became a commercial center and the capital of a principality, which was annexed to Moscow in 1364 Here in 1613 Michael Romanov was elected tsar Among the ancient buildings of Kostroma are the Ipatiev monastery (14th cent) and the Uspenski Cathedral (c 1250)

Kota Bahru (kō'tä bä'rōō), town (pop 22,736), capital of Kelantan state, NE Malaya, at the mouth of the Kelantan river Here the Japanese first landed in Malaya in the Second World War

Kotelny Island or **Kotelnyy Island** (both kŏtĕl'nĕ), 100 mi long and 60 mi wide, off Yakut Autonomous SSR, RSFSR, largest island of the Anjou group of the NEW SIBERIAN ISLANDS There is an arctic observation post on the northwest coast The island was discovered in 1775 by Lyakhov, a Russian merchant

Köthen (kh'tun), city (pop 42,588), Anhalt, E central Germany, WSW of Dessau There are lignite mines, sugar refineries, and textile mills First mentioned in 1115, it was until 1847 the residence of the dukes of Anhalt-Kothen, at whose court J S Bach was musical director from 1717 to 1723 A former spelling was Cöthen

Kotka (kōt'kä), city (pop 22,482), S Finland, E of Helsinki, a seaport on the Gulf of Finland and at the southern end of the PAIJANNE waterway It is the main Finnish export center for paper, pulp, and timber, and its industries include sawmills, cellulose mills, and a fertilizer plant

Kotor (kō'tôr), Ital *Cattaro* (kät'tärō), town (pop 5,402), Montenegro, Yugoslavia It is on the Bay of Kotor (Serbo-Croatian *Boka Kotorska*, Ital *Bocche di Cattaro*), an inlet of the Adriatic Founded by the Romans and later under Byzantine, Serbian, and Bosnian rule, it was held by Venice from the 15th cent until 1797, when it passed to Austria It was an important Austrian naval base In 1918 it passed to Yugoslavia Kotor has retained its medieval fort and walls The Cathedral of St Tryphon was built in the 9th cent and rebuilt in the 17th cent

Kottbus, Germany see COTTBUS

Kotzebue, August Friedrich Ferdinand von (ou'gōōst frē'drĭkh fĕr' dēnant fŭn kōt'subōō), 1761–1819, German dramatist He wrote over 200 popular plays, many translated into English, including *Menschenhass und Reue* (1789; Eng tr, *The Stranger*, 1798), long popular in England, *Das Kind der Liebe* (1791, Eng tr, *The Natural Son*, 1798), *Die Spanier in Peru, oder, Rolla's Tod* (1795, Eng tr by M G Lewis, *Rolla*, 1797), and *Die beiden Klingsberg* (1810, Eng tr, *Father and Son*, 1914) Though aggressively unliterary, Kotzebue was a gifted playwright and perhaps the strongest single influence on the development of the European drama After a stay in Russia he returned to Germany as a paid agent of Alexander I and was detested for his reactionary propaganda His assassination at Mannheim by a student led to the suppression of German student organizations (see BURSCHENSCHAFT) through the Carlsbad Decrees

Kotzebue, Otto von (ō'tō), 1787–1846, Russian naval officer and explorer, son of A F F von Kotzebue He accompanied A J von Krusenstern on his circumnavigation (1803–6) and commanded two voyages around the world (1815–17, 1823–26) He discovered new island groups in Oceania, checked the location of others, and gathered new information on the Pacific coast of Siberia He sailed N through Bering Strait, explored the northwest coast of Alaska hoping to find the western end of a Northwest Passage, and in 1816 discovered and explored Kotzebue Sound Scientists accompanying his expeditions made valuable reports on ethnography and natural history Kotzebue's own narratives were translated into English as *A Voyage of Discovery* (3 vols , 1821) and *A New Voyage round the World* (2 vols , 1830)

Koublai Khan see KUBLAI KHAN.

koumiss see FERMENTED MILK

Koussevitzky, Serge (Sergei Aleksandrovich Koussevitzky) (sĕr'gā' kōōsuvĭt'skē, Rus sĭrgā' ŭlyĭksän'druvĭch kōōsyĭvĕt'skē), 1874–, Russian-American conductor, studied at the Moscow Philharmonic Society School of Music He began his career as a player of the double bass, and in 1908 in Berlin he made his debut as a conductor In 1910 he and his wife formed an orchestra which Koussevitzky conducted until 1918, touring by boat along the Volga until 1914 In 1917 he was made conductor of the State Symphony Orchestra in Petrograd In 1920 he left Russia, in Paris the following year he established the Concerts Koussevitzky, which he conducted until 1928 He came to the United States in 1924 and was conductor (1924–49) of the Boston Symphony Orchestra In 1936 he began to direct the Berkshire Symphonic Festivals, and in 1940 the Berkshire Music Center He has given new works not only their initial performances but repeated hearings See biographies by Arthur Lourié (Eng tr , 1931) and Moses Smith (1947)

Kovalevsky, Aleksandr Onufrievich (ŭlyĭksän'dur ŭnōō'frēuvĭch kŭvulyĕf'skē), 1840–1901, Russian zoologist and embryologist He is noted especially for the work which demonstrated the origin of vertebrates from invertebrates He showed that the early stages in development of certain invertebrates and of *Amphioxus*, a primitive vertebrate, are the same

Kovalevsky, Sonya or **Sophie** (sō'nyu), 1850–91, Russian mathematician She studied at the universities of Heidelberg and Berlin (under K T Weierstrass) and in 1874 received a Ph D *in absentia* from the Univ of Göttingen for her remarkable thesis on partial differential equations From 1884 she taught at the Univ of Stockholm In 1888 she won the Bordin Prize of the French Academy of Sciences for a memoir on the rotation of a solid body about a fixed point Her childhood reminiscences, published in 1890, were translated into English under the title *Sonya Kovalevsky Her Recollections of Childhood* (1895), with a biographical study by Anna Leffler Edgren

Kovel (kō'vul, Rus kō'vĕl), Pol *Kowel* (kō'vĕl), city (1931 pop 27,650), W Ukraine, in Volhynia It is a rail junction and an agricultural center It passed to Russia in the third Polish partition (1795), reverted to Poland in 1921, and was again ceded to the USSR in 1945 Its population was largely Jewish until the Second World War

Kronstadt, Rumania see BRASOV

Kronstadt (krōn'stät, -stät, Rus. krŭnshtät'), city (1939 estimated pop 50,000), RSFSR, on the small island of Kotlin in the Gulf of Finland, near Leningrad It was founded (1703) by Peter I as a port and a fortress to protect the site of St. Petersburg; it is now the naval base of the Baltic fleet of the USSR and has extensive arsenals, docks, and shipyards Strong fortifications command the sea approach to Leningrad The port lost its commercial value after the dredging (1875–93) of a deep-sea canal which enabled ocean-going vessels to approach St Petersburg directly The visit (1891) of a French squadron to Kronstadt was followed by a Franco-Russian military agreement heralding the formation of the Triple Entente of France, England, and Russia Mutinies of the naval garrison played a part in the revolutions of 1905 and 1917 An outbreak of the sailors in 1921 was instrumental in establishing Lenin's New Economic Policy In the Second World War, Kronstadt played a major role in the defense of Leningrad against the besieging Germans.

Kropotkin, Peter (krōpōt'kĭn), Rus. *Piotr Alekseyevich Kropotkin* (pyô'tŭr ŭlyĭksyā'vĭch krŭpōt'kĭn), 1842–1921, Russian anarchist, b Moscow He was a prince and of a wealthy family As a boy he was a page to the tsar Later he held high civil and military positions and won distinction as a geographer His interest in the peasantry led him to beliefs that caused him to discontinue the use of his title For these beliefs he was imprisoned in Russia, escaping after two years, and his property was confiscated Later he was imprisoned in France, but after three years his pardon was secured by Georges Clemenceau and other friends Through most of his remaining years he lived in England Twice he visited the United States Among the English-speaking peoples he met no hostility, he was respected and esteemed Writings by him appeared in such publications as the *Nineteenth Century*, the *Atlantic Monthly*, and *The Encyclopaedia Britannica* Institutions that sponsored his addresses included the Lowell Institute, Harvard Univ, and Wellesley College He was idolized by workingmen in many countries; in France he was known as *notre Pierre* After the Russian Revolution he returned to Russia, where, as among Anglo-Saxons, he found tolerance and esteem, though his opposition to Bolshevism was fundamental and unconcealed On his death his family, respecting his principles, declined the offer of a state funeral The government made his birthplace a museum to contain his books and other suitable collections and gave his name to a street in Moscow In *Fields, Factories, and Workshops* (1899) Kropotkin advocated the decentralization of industry and the combining of agriculture with other work of hand and brain Roger N Baldwin edited (1927) a collection of his revolutionary pamphlets, with a biographical introduction and a bibliography

Krout, John Allen, 1896–, American historian, b Tiffin, Ohio He studied at Heidelberg College (1914–17), the Univ of Michigan (B A, 1918), and Columbia (M A, 1920, Ph D, 1925) Krout began teaching history at Columbia in 1922 and became a full professor in 1940 In 1948 he was appointed acting director of Columbia's School of General Studies and in 1949 he became dean of graduate studies at Columbia Among his books are *The Origins of Prohibition* (1925), *Annals of American Sport* ("Pageant of America" series, Vol XV, 1929), *American History for Colleges* (with David S. Muzzey, 1933, rev ed, 1943), and *The Completion of Independence, 1790–1830* (with Dixon Ryan Fox, "History of American Life" series, Vol V, 1944) Dean Krout also early became editor of the *Political Science Quarterly* and of the *Proceedings* of the Academy of Political Science

Krüdener, Julie de (du krü'dünur), 1764–1824, Russian novelist and pietist, whose maiden name was Barbara Juliana von Vietinghof Of a Livonian noble family, she married at 17 Baron von Krüdener, a Russian diplomat Dissatisfied with her marriage, she finally left her husband in 1801, a year before his death In Paris and Switzerland she wrote a sentimental novel, *Valérie* (1804), which was a literary sensation Converted to Moravian pietism a few years later, she devoted the rest of her life to traveling over Europe preaching her faith For a time she wielded an enormous influence Among those who fell under her spell was Alexander I of Russia, and she played a part, though an incidental one, in the formation of the Holy Alliance See E J Knapton, *The Lady of the Holy Alliance* (1939)

Krug, Julius Albert (krōōg), 1907–, U S Secretary of the Interior (1946–49), b Madison, Wis, grad Univ of Wisconsin (B A, 1929, M A, 1930) Utilities expert of the FCC (1935–37) and chief power engineer for the TVA (1938), he served (1941–42) in the Office of Production Management and later (1942–44) was vice chairman of the War Production Board and also headed (1943–44) the Office of War Utilities He was made Secretary of the Interior after directing the conversion to peacetime production as chairman of the War Production Board He resigned three years later after a dispute with the President

Kruger, Stephanus Johannes Paulus (krōō'gŭr, Afrikaans stäfä'nus yōhä'nŭs pou'lŭs krŭ'gur), 1825–1904, South African Transvaal statesman, known as Paul Kruger or Oom Paul As a child he accompanied (1836) his family northward from the Cape Colony in the Great Trek that was eventually to cross the Vaal river and establish the Dutch-speaking republic of Transvaal (1852). Kruger played an important role in the development of the country from his childhood, as a pioneer, soldier, farmer, politician. The Transvaal was annexed by Great Britain in 1877, Kruger at first cooperating with the British, but shortly thereafter dismissed because of his demands for retrocession. He was one of the triumvirate (with Piet Joubert and Martinus Pretorius) who negotiated the Pretoria agreement with the British (1881) granting the Boers independence. Kruger was elected president in 1883 and reelected in 1888, 1893, and 1898. His

policy was one of continual resistance to the British, who came to be personified in South Africa by Cecil RHODES. Colonization of Rhodesia N of the Transvaal and the increasing importance of gold mining merely brought only greater resistance on Kruger's part to Rhodes's dream of a unified South Africa. In the 1890s Kruger adopted a stringent policy against the enfranchisement of the Uitlanders who were settling in the Transvaal The Jameson Raid (see JAMESON, SIR LEANDER STARR) into the Transvaal (1896), undertaken with Rhodes's knowledge, created an international crisis The Kaiser congratulated Kruger (the "Kruger telegram") for the successful repulsion of the British, with the implication that Germany had a right to interfere in the Transvaal The message caused great indignation in England Kruger fought in the early stages of the SOUTH AFRICAN WAR, but in 1900 he went to Europe in a Dutch cruiser in a vain effort to enlist aid for his country He died an exile in Switzerland See his memoirs (1902), Stuart Cloete, *African Portraits* (1946)

Krugersdorp (krōō'gûrzdôrp), town (pop 72,909), Transvaal prov, Union of South Africa It is named for Paul Kruger, the last president of the Transvaal republic Its educational facilities include a technical college The town has many Europeans (23,544)

Krupp (krōōp), family of German armament manufacturers The family settled in Essen in the 16th cent, and a member of it was engaged in the manufacture of arms in the Thirty Years War The core of the great Krupp concern was, however, started by **Friedrich Krupp** (frē'drĭkh), 1787–1826, who built a small steel plant c 1810 His son, **Alfred Krupp** (al'frät), 1812–87, the "cannon king," introduced new methods for producing large quantities of cast steel After the Franco-Prussian War he specialized more and more in armaments and acquired mines all over Germany Under his son, **Friedrich Alfred Krupp** (Fritz Krupp), 1854–1902, who was interested in the financial rather than the technical aspects of the enterprise, the Krupp family vastly extended its operations Bertha Krupp, his daughter, married Dr Gustav von Bohlen und Halbach, who assumed the name **Gustav Krupp von Bohlen und Halbach** (gōōs'täf, fŭn bō'lun ōont hal'bakh), 1870 1950 He took over the management of the firm, which had become a company in 1903 After 1933 the Krupp works became the center of German rearmament In 1943, by special order from Hitler, the company was again converted into a family holding and **Alfred Krupp von Bohlen und Halbach**, 1907–, son of Gustav and Bertha, took over the management Imprisoned by the Allies in 1945, he was tried as a war criminal at Nuremberg and sentenced (1948) to imprisonment for 12 years See Bernhard Menne *Blood and Steel* (1938)

Krusenstern, Adam Johann von (ä'dăm yō'hän fŭn krōō'zŭnshtĕrn), 1770–1846, Russian navigator In 1803–6 he circumnavigated the globe Although the voyage was undertaken to stimulate the fur trade of the Pacific coast and to revive trade with China and Japan, its real contribution was to the knowledge of the hydrography of the N Pacific coast of America Krusenstern was director (1827–42) of the royal naval academy and was promoted to the rank of admiral He wrote an account of his voyage (3 vols, 1810, Eng tr, 1813)

Krusevac, Serbo-Croatian *Kruševac* (krōō'shĕvats), town (pop 14,104), Serbia, Yugoslavia, near the Western Morava and SE of Belgrade A capital of medieval Serbia, it now has chemical and munitions industries

Krusne Hory: see ERZGEBIRGE

Krutch, Joseph Wood (krōōch), 1893–, American author, editor, and teacher, b Knoxville, Tenn., grad Univ of Tennessee, 1915, Ph D Columbia, 1923 In 1924 he became associate editor and dramatic critic of the *Nation*, and in 1925 he began his career as a teacher, becoming professor of English at Columbia in 1937 Well known as an authority on the drama and as a literary critic, he has written *Comedy and Conscience after the Restoration* (1924), *Edgar Allan Poe: a Study in Genius* (1926), *The Modern Temper* (1929), *Five Masters: a Study in the Mutations of the Novel* (1930), *The American Drama since 1918* (1939), *Samuel Johnson* (1944), and *Henry David Thoreau* (1948) *The Twelve Seasons* appeared in 1949

Krylenko, Nikolai Vasilyevich (nyĭkŭlĭ' vŭsē'lyŭvĭch krĭlyĕn'kō), 1885–?, Russian revolutionist. An early Bolshevik, he was raised late in 1917 by Leon Trotsky from the rank of ensign to commander in chief of the Russian forces for the purpose of concluding an armistice with the Central Powers He resigned in 1918 and subsequently became public prosecutor and commissar of justice In 1938 he was dismissed, accused of plotting treason with Trotsky, and presumably he was executed

Krylov, Ivan Andreyevich (ēvän' undrā'yĭvĭch krĭlôf'), 1768–1844, great Russian fabulist. One of the chief literary figures of his period, he wrote more than a half dozen volumes of fables, many of which were classics of their type See translations by C F Coxwell (1921) and Bernard Pares (1926). The name also appears as Kriloff

Krynica (krĭnē'tsä), region (pop 2,649; alt 1,640–2,300 ft), SW Poland. It is a resort with mineral baths and winter sports in the Carpathians, near the Czechoslovak border The world ice hockey championship games were played here in 1930–31.

kryolite see CRYOLITE

krypton (krĭp'tŏn) [Gr, =hidden], inert, colorless, odorless, tasteless gaseous element (symbol=Kr, for physical constants, see ELEMENT, table) One normal liter of the gas at 0°C and 760 mm pressure weighs 3.708 g Krypton is present in the atmosphere in minute quantities and was first obtained from that source by William Ramsay and Morris Travers in 1898 It is classed with the other inert gases, helium, neon, argon, and xenon, in the periodic system, it forms no known compounds.

Krzemieniec, Ukraine see KREMENETS

Ku-. For some Chinese names beginning thus, see Kw-, e g, for Kunngu, see KWANGSI

Kuala Lumpur (kwa'lu lōōm'pōōr), town (pop. 111,418), Selangor state, SW Malaya It is the capital of Selangor and of the federation of Malaya Its growth to its present size has taken place largely since 1895, when it became the capital of the Federated Malay States

Kuban (kōōbän', -bän', Rus kōōbä'nyu), river, 560 mi long, Georgian SSR and RSFSR It rises in the Greater Caucasus on the western slopes of Mt Elbrus and flows northward in a wide arc past Klukhori, Cherkessk, and Armavir, then W past Krasnodar, entering the Sea of Azov and the Black Sea through two arms Its upper course is precipitous and leads through several gorges, it then meanders slowly through the Kuban Steppe, a rich black-earth area and one of the major grain districts of the USSR The last 150 mi are navigable Russia annexed the khanate of Crimea, of which the Kuban area was a part, in 1783 Cossacks were settled in the fertile region and helped to protect it from the hostile Circassian mountaineers to the south, they displaced the nomadic Nogai Tatars, who now live mainly farther east, in the Cherkess Autonomous Oblast The Kuban Cossacks fought against the Bolsheviks after the October Revolution of 1917 and aided the army of Kornilov and Denikin In the Second World War there was severe fighting (1942–43) in the Kuban area during the Germans' drive on the Caucasus and their retreat

Kubango see OKAVANGO

Kubelik, Jan (yan' kōō'bulĭk), 1880–1940, Czech violinist, studied with Sevcik at the Prague Conservatory He made his debut in Vienna in 1898 and was thenceforward acclaimed for his great virtuosity in England, on the Continent, and in the United States, where he first appeared in 1901

Kublai Khan (kōō'blī kän'), 1215?–1294, Mongol emperor, founder of the Yuan dynasty of China He succeeded (1260) his brother Mangu as khan of the empire which their grandfather JENGHIZ KHAN had founded The empire reached its greatest territorial extent with Kublai's final defeat (1279) of the Sung dynasty of China, however, his campaigns against Japan, SE Asia, and Indonesia failed Kublai's rule was nominal except in Mongolia and China He fostered Chinese scholarship and arts He favored Buddhism but tolerated other religions Kublai encouraged foreign commerce, and his magnificent capital at Cambaluc (now Peiping) was visited by several Europeans, notably Marco Polo who described it It is perhaps this city which figures in Coleridge's poem *Kubla Khan* Kublai's name is also spelled Kubilai, Koublai, and Kubla

Kuching (kōō'chĭng), city (pop 37,949), on W Borneo, capital of Sarawak, on the Sarawak river 18 mi inland The largest city of Sarawak, it is a commercial center with exports of sago flour and pepper Here are the British governor's residence, and Anglican and Roman Catholic cathedrals

Kuchuk Kainarji, Treaty of (kōōchōōk' kīnär'jē), 1774, peace treaty signed at the end of the first of the Russo-Turkish Wars undertaken by Catherine II of Russia against Sultan Mustafa III It was signed at the village of Kuchuk Kainarji, now Kaynardzha, NE Bulgaria, in the Dobruja, near the Danube and SE of Silistra The treaty ceded Kerch and several other places in the Crimea to Russia and declared the rest of the khanate of Crimea independent Moldavia and Wallachia were restored to the suzerainty of the sultan, but Russia obtained the right of intervening with the Sublime Porte on behalf of those two principalities Russia furthermore acquired certain rights of representation on behalf of the Greek Orthodox subjects of the sultan By a separate treaty (1775) Turkey ceded Bukovina to Austria The Treaty of Kuchuk Kainarji facilitated the eventual Russian annexation (1783) of the Crimea and was the basis of the later claims of Russia as protector of the Christians in the Ottoman Empire. The Russian ascendancy over Turkey, of which the treaty was a symptom, made the EASTERN QUESTION acute Varied spellings include the forms Kutchuk and Kainardji

Kudalur, India see CUDDALORE

Kudrun, several Germanic heroines, see GUDRUN

Kuds, El see JERUSALEM

kudzu (kōōd'zōō), perennial leguminous vine (*Pueraria thunbergiana*). A broad-leaved plant with a woody stem and purple flowers borne in clusters, it is noted for its rapid growth Indigenous in Japan, it is grown in the Orient for its edible tubers and hemplike fiber. It was introduced in the United States c 1895 as a decorative vine and is now widely used in the South as a ground cover to arrest erosion, as a soil-enriching crop, and as a forage crop The leaves have a protein content at least equal to that of alfalfa and are used for grazing or for hay

Kufa (kōō'fu), ancient Mesopotamian city, near the Euphrates, c 110 mi S of Baghdad. Founded in 638, it soon rivaled Basra in size The Arab governor of Mesopotamia resided here until 702 For a time Kufa was the seat of the Abbasid caliphate, and Ali, the fourth caliph, is supposed to have been murdered here Husein, Ali's son, was on his way to Kufa when he was killed in battle The city was repeatedly plundered by the Karmathians in the 10th cent and lost its importance.

Kufstein (kōōf'shtīn), town (pop 11,844), Tyrol, W Austria, a summer and winter resort near the German border The fortress of Geroldseck, built by Emperor Maximilian I, contains a modern organ famous for its spectacular size and loudness

Kühlmann, Richard von (rĭkh'ärt fŭn kül'män), 1873–, German statesman Appointed foreign secretary in Aug, 1917, he negotiated (March, 1918) the Treaty of Brest-Litovsk, and in July of the same year he was removed from office for publicly declaring that the war could not be ended by military action alone and without recourse to diplomacy

Kuhn, Richard (rĭkh'ärt kōōn'), 1900–, Austrian chemist, director of the Kaiser Wilhelm Institute, Heidelberg For his research on the carotinoids and vitamins (he isolated riboflavin or B_2) he was awarded the 1938 Nobel Prize in Chemistry, a Nazi decree prevented his acceptance of the award

Kuhn, Walt (kŭn), 1880–, American painter, b New York city At 19 he worked as a cartoonist in San Francisco, contributing later to *Life* After travel and study in Europe he devoted himself largely to oil painting In 1913, in cooperation with his friend Arthur B Davies, he was instrumental in assembling the famous Armory Show He is best known for his bold and brilliant interpretive portraits and figure studies of circus and back-stage types, of which *Blue Crown* (Whitney Mus, New York) is a good example He is represented in the galleries of Andover, Mass, Brooklyn, New York city, Denver, Los Angeles, San Francisco, Washington, D C, and Dublin, Ireland

Kuibyshev (kwē'bĭshĕf, Rus kōō'bĭbĭshĭf), formerly **Samara** (sumä'ru, Rus sŭma'rŭ), city (1939 pop 253,655, 1940 estimated pop 600,000), capital of Kuibyshev oblast, E European RSFSR, on the left bank of the Volga and at the mouth of the Samara river It is a major river port and rail center and has important industries (aircraft, locomotive, machinery, ball bearings, synthetic rubber, and textiles and petroleum refining) Grain and livestock are the chief exports There are several technical, medical, and pedagogical institutes Founded in 1586 as a Muscovite stronghold, Samara was attacked by the Nogai Tatars (1615) and the Kalmucks (1644) and opened its gates to the Cossack rebels under Stenka Razin in 1670 It grew to be the chief grain center on the Volga river and was the seat of immensely rich grain merchants Its industrial expansion dates from the early 20th cent when railroads to Siberia and central Asia were built In 1935 Samara was renamed Kuibyshev in honor of a Soviet leader Samara was (1918) the seat of the anti-Bolshevik provisional government and constituent assembly of Russia During the Second World War the central government of the USSR was transferred to Kuibyshev (1941–43) from exposed Moscow As a result, the population rose tremendously, and the city limits were vastly expanded A large oil field, stretching from Kuibyshev eastward to the Urals, was recently discovered, and its exploitation is likely to enhance still further the industrial importance of the city

Kukawa (kōō'kawä") or **Kuka** (kōō'ka), town (pop 3,282), N Nigeria Founded in 1814, it was in the early 19th cent the capital of the native state of Bornu and had a population of c 60,000

Ku Klux Klan (kū' klŭks' klăn', kōō'), name of two distinct secret societies which have played a part in American history, the first as an organization in the South during the RECONSTRUCTION period following the Civil War and the second as a nationwide organization which flourished after the First World War 1 The original Ku Klux Klan was organized by the ex-Confederate element to oppose the Reconstruction policies of the radical Republican Congress and to maintain "white supremacy" After the Civil War, when local government in the South was weak or nonexistent and there were fears of Negro outrages and even of an insurrection, there were formed in almost all communities informal vigilante organizations or armed patrols These were linked together in societies, such as the Men of Justice, the Pale Faces, the Constitutional Union Guards, the White Brotherhood, and the

Order of the White Rose. The Ku Klux Klan was the best known of these, and as it spread it absorbed many of the smaller organizations It was organized at Pulaski, Tenn, in Dec, 1865 Its strange disguises, its silent parades, its midnight rides, its mysterious language and commands, were found to be most effective in playing upon the fears and superstitions of the blacks The riders muffled their horses' feet and covered the horses with white robes They themselves, dressed in flowing white sheets, their faces covered with white masks, and with skulls at their saddle horns, posed as spirits of the Confederate dead returned from the battlefields It was not often necessary to resort to violence to terrify the Negroes, but warnings, followed frequently by whippings and sometimes tar-and-feather parties, were necessary to subdue the CARPETBAGGERS and SCALAWAGS A general organization of the local Klans was effected in April, 1867, at Nashville, Tenn Gen N B FORREST, the famous Confederate cavalry leader, was made Grand Wizard of the Empire, who was assisted by 10 Genii Each state constituted a Realm under a Grand Dragon with eight Hydras as a staff, several counties formed a Dominion controlled by a Grand Titan and six Furies, a county was a Province ruled by a Grand Giant and four Night Hawks, the local Den was governed by a Grand Cyclops with two Night Hawks as aides The private members were called Ghouls Control over local Dens was not as complete as this organization would seem to indicate, and reckless and even lawless local leaders sometimes committed acts which the leaders could not countenance General Forrest, in Jan, 1869, seemingly under some apprehension as to the use of its power, ordered the abandonment of the Klan and resigned as Grand Wizard Local organizations continued, some of them for many years The Klan was particularly effective in systematically keeping the Negroes away from the polls, so that the ex-Confederates gained political control in many states. Congress in 1870 and 1871 passed legislation to combat it (see FORCE BILL) The Klan was especially strong in the mountain and piedmont areas In the Lower South the Knights of the White Camellia were dominant This order, founded in Louisiana in 1867, is reputed to have had even more members than the Ku Klux Klan, but its membership was more conservative and its actions less spectacular It had a similar divisional organization, with headquarters in New Orleans Albion W Tourgée's *Fool's Errand* (1880) and Thomas Dixon's *Clansman* (1905), on which David W Griffith based his famous moving picture *The Birth of a Nation*, were two popular novels about the original Klan See Walter L Fleming's edition (1905) of J C Lester and D L Wilson, *Ku Klux Klan*; Stanley F Horn, *Invisible Empire the Story of the Ku Klux Klan, 1866–1871* (1939) **2** The second Ku Klux Klan was founded by William J Simmons, an ex-minister and promoter of fraternal orders, in 1915, its first meeting was held on Stone Mt, Ga The new Klan had a wider program than its forerunner, for it added to "white supremacy" an intense nativism and anti-Catholicism (it was also anti-Semitic) closely related to that of the KNOW-NOTHING MOVEMENT of the middle 19th cent Consequently its appeal was not sectional, and, aided after 1920 by the activities of Elizabeth Tyler and Edward Y Clarke, professional promoters, it spread rapidly throughout the North as well as the South It also furnished an outlet for the militant patriotism aroused by the First World War, and it stressed fundamentalism in religion Professing itself nonpolitical, the Klan nevertheless controlled politics in many communities and in 1922, 1924, and 1926 elected many state officials and a number of Congressmen Texas, Oklahoma, Indiana, Oregon, and Maine were particularly under its influence In Indiana its political activities led to the indictment and conviction of the mayor of Indianapolis and the governor of the state The Klan frequently took extra-legal measures, especially against those guilty of offenses difficult to reach by law As was the case with the earlier Klan, some of these measures, whether authorized by the central organization or not, were extreme At its peak in the mid-1920s its membership was estimated at 4,000,000 to 5,000,000 Although the actual figures were probably much smaller, the Klan nevertheless declined with amazing rapidity to an estimated 30,000 by 1930 The Klan spirit, however, was a factor in breaking the Democratic hold on the South in 1928, when Alfred E Smith, a Catholic, was that party's presidential candidate Its collapse thereafter was largely due to state laws which forbade masks and eliminated the secret element, to the bad publicity the organization received for its thugs and swindlers, and apparently from the decline in interest of the members With the depression of the 1930s, its dues-paying members shrank to almost nothing Meanwhile, many of its leaders had done extremely well financially from the dues and the sale of Klan paraphernalia The organization was almost forgotten until 1937, when Hugo L Black, appointed to the U.S. Supreme Court, was accused of having once been a Klansman Black, while admitting the charge, said that he had only belonged to the organization for a very short time (in the early 1920s virtually every ambitious Southern politician did) and never had subscribed to its program After the Second World War there was a concerted attempt to revive the Klan, but it failed dismally when state after state specifically barred the order Along with similar organizations, it still exists in incipient form in several of the Southern states, notably Georgia. See J M Mecklin, *The Ku Klux Klan* (1924)

Kukulcán see QUETZALCOATL

Kuldiga (kōōl'dĭgu), Ger *Goldingen* (gōl'dĭng-ŭn), city (pop 7,180), W Latvia It has lumber, textile, and leather manufactures There are ruins of a 13th-century castle, and Kuldiga was a residence of the dukes of Courland

Kulja (kōōl'jä), Mandarin *Ining*, city and county (pop 59,947), Sinkiang prov, China The city is on the Ili river near the Russian frontier On the main road of Sinkiang, it is a trading center in a fruitgrowing district

Kulikovo, battle of (kōōlyĭkô'vu), 1380, victory of Grand Duke DMITRI DONSKOI of Moscow over Khan Mamai of the Golden Horde It was fought on a plain by the Don near the present village of Kurkino, RSFSR, SE of Tula The victory, which gave Dmitri his surname Donskoi, was not decisive, but it greatly promoted Russian resistance to Mongol domination and made Moscow the center of that resistance

Kulm, Poland see CHEŁMNO

Kulmbach, Hans von (hans' fŭn kōōlm'bäkh), c 1476–1522, German painter and engraver, follower and probably a student of Dürer His real name was Hans Süss (zūs) He worked chiefly in Cracow, where he was court painter (1514–18), and in Nuremberg, where he painted an altar predella for the Church of St Lorenz and his masterpiece, the Tucher altar for the Church of St Sebald His *Adoration of the Magi*, *Finding the Cross*, and *Ascension* (Metropolitan Mus) are also well-known works In addition, many fine portraits and designs for stained glass are attributed to Kulmbach

Kulmbach, city (pop 21,812), Upper Franconia, N Bavaria, on the White Main and NNW of Bayreuth Among its industries are textile manufactures and breweries First mentioned in 1035, it was (1340–1603) the residence of the margraves of Kulmbach (later known as margraves of Bayreuth) of the house of Hohenzollern It was devastated by imperial troops in 1553 and passed (1810) to Bavaria On a near-by hill is the fortress of Plassenburg (12th cent, rebuilt in Renaissance style in the 16th cent), which has been a prison since 1808

Kulpmont, borough (pop 6,159), E Pa, SE of Sunbury, settled 1905, inc 1916 Anthracite is mined

Kulturkampf (kōōltōōr'kampf") [Ger, =conflict of cultures], name usually given to the conflict between the German government under BISMARCK and the Roman Catholic Church The struggle arose from numerous issues Bismarck, anxious to strengthen the central power of the new German Empire, feared the strongly organized Church, which had considerable influence in the state and had a political voice in the active Center party (founded 1870) He felt that the hegemony of Prussia in Germany, vital to his state, was threatened by Catholic opposition to Protestant government, and he was especially alarmed after the enunciation of the dogma of the INFALLIBILITY of the pope in matters of faith and morals within the Church (made at the Vatican Council), the dogma, he feared, concealed some danger to the state Therefore, he showed favor to the group of men who were unwilling to accept the infallibility More important was his desire to win the favor of the liberals, who opposed the Church this factor was perhaps the most potent in shaping German policies Moreover, the groups of minorities who were disaffected, such as the supporters of the Guelphic monarch of Hanover, the suppressed Poles in Prussia, and the Bavarians, were intimately allied with the Catholic party Other issues helped to bring on the warfare, which began with anti-Catholic laws against Church marriage and against papal jurisdiction over priests accused of crime The state assumed strict supervision over the education of the clergy and sought to break down the system of the Catholic schools These May Laws (of May, 1873) created much bitterness The struggle, begun by the expulsion of the Jesuits and other measures in 1872, assumed tremendous proportions, especially in Prussia All means—harsh fines, imprisonment, exile—were brought to bear on the Catholic clergy and their supporters The condition of affairs is well illustrated in the case of Cardinal LEDOCHOWSKI, whom the Prussian government declared deposed. These measures had the somewhat unexpected result of increasing the Catholic party tremendously; in 1878 the Center party showed great gains Bismarck, now fearing also the rising tide of socialism, changed his policy and decided to seek the friendship of the Center He retreated from his position, the anti-Catholic measures were gradually discarded and in 1887 a *modus vivendi* was reached with Pope LEO XIII The interference of state in Church affairs ended. The contest, however, cleared the air and did away with the fear of Church interference in imperial affairs See Georges Goyau, *Bismarck et l'église* (4 vols, 1911–13), bibliography under BISMARCK, OTTO VON

Kulun, Mongolian People's Republic see ULAN BATOR

Kum, Qum, or **Qom** (all kōōm), city (pop 52,037), central Iran, SSW of Teheran In a semiarid region, it is a transportation center on the Trans-Iranian RR and on the highway from Teheran to Isfahan Building of a branch railroad to Kashan and Yezd was delayed by the Second World War It is a Shiite holy place with many mosques and tombs The Afghans ruined the city in 1721 but spared the rich tombs

Kumamoto (kōō'mänmô'tō), city (1940 pop 194,139, 1947 pop 245,841), capital of Kumamoto prefecture, W Kyushu, Japan, on a great plain An important castle town in the 17th cent, it is today a manufacturing center and the seat of Kumamoto Medical Univ The prefecture has the volcanic peaks, Aso-san, and many islands

Kumanovo (kōō'mänôvô), town (pop 19,798), N Macedonia, S Yugoslavia, NE of Skoplje It is the center of a tobacco-growing region Here in 1912 the Serbs decisively defeated the Turks in the First Balkan War

Kumasi (kōōmä'sē, -mä'sē), city (pop 70,705), capital of Ashanti, W Africa It was twice taken (1874, 1896) by British troops and held (1900) by them against a native revolt Cotton cloth is woven It is a road and railroad junction and a center of the cacao trade

Kumbakonam (kōōmbukō'num), town (pop 67,008), S Madras state, India, on the Cauvery With many Hindu temples, it is the goal of pilgrimage every 12 years It is a center of delta farming, silk and cotton are woven, and jewelry is made The name was formerly spelled Combaconum

kumiss see FERMENTED MILK

kümmel (kĭ'mul, Ger kŭ'mul), sweet LIQUEUR, popular in the Baltic states and produced chiefly in Riga, Latvia Cumin and caraway seeds give the predominating flavor A fine variety is Allasch or doppelkümmel

Kummer, Clare (kŭ'mur), contemporary American dramatist She wrote several successful comedies, including *Good Gracious, Annabelle* (1916), *A Successful Calamity* (1917), *Rollo's Wild Oat* (1920), and *Her Master's Voice* (1933) She also has written one-act comedies, adaptations from the French, dialogue for moving pictures, and popular songs, including *Dearie* Her son-in-law, Roland Young, has appeared in several of her plays

kumquat (kŭm'kwŏt), ornamental shrub of the genus *Fortunella*, closely related to the lemon and the orange It has evergreen leaves, sweet-scented white flowers, and small, orange-yellow edible fruits, which are eaten fresh or in preserves Three or four varieties of the kumquat, which is probably a native of China, are cultivated as house and hedge plants in the Gulf states and California They are much hardier than most oranges The kumquat is also called kinkan

Kun, Bela (bä'lô kōōn'), 1886–?, Hungarian Communist A prisoner of war in Russia after 1915, he embraced Bolshevism, after the outbreak of the Russian Revolution he was sent to Hungary as a propagandist In 1919 Count Michael KAROLYI and his government resigned and the Communists and Social Democrats formed a coalition government under Kun Kun set up a dictatorship of the proletariat, nationalized banks, large businesses and estates, and all private property above a certain minimum, and ruthlessly put down all opposition He raised a Red Army and overran Slovakia The Allies forced Kun to evacuate Slovakia, and a counterrevolution broke out Kun was at first victorious over the counterrevolutionists, but he was defeated by a Rumanian army of intervention and was forced to flee to Vienna Kun's Red Terror was followed by a White Terror Stephen HORTHY DE NAGYBANYA became regent of Hungary Kun, after being held at an insane asylum in Vienna, eventually went to Russia He reappeared (1928) in Vienna and was briefly imprisoned, but the Austrian government refused to extradite him to Hungary and Kun was allowed to return to Russia According to unconfirmed rumors he died in prison after the Communist party purges of the 1930s See Oszkar Jaszi, *Revolution and Counter-Revolution in Hungary* (1924)

Kunersdorf (kōō'nursdôrf"), Pol *Kunowice* (kōōnôvē'tsĕ), village, Polish-administered Brandenburg, 3 mi E of Frankfurt-an-der-Oder Here in the Seven Years War, Frederick II of Prussia suffered a critical defeat at the hands of the Austrians and Russians

Kungalv, Swed *Kungälv* (kŭng'ĕlv"), town (pop 3,632), Goteborg and Bohus co, SW Sweden, N of Goteborg and on the Kattegat In the Middle Ages it was one of the chief cities of Norway, known as Konghelle and mentioned in the sagas It was plundered (1135) by the Wends, seized (1368) by the Hansa merchants, and ceded to Sweden in 1612 The later town, Kungalv, dates from 1680. A park surrounds the ruins of its citadel

Kungei Ala-Tau see ALA-TAU

Kung Hsiang-hsi (kŏŋ'shyang'shē'), 1881–, Chinese banker and political leader, educated at Oberlin College and Yale Univ He is deemed a direct descendant of Confucius in the 75th generation Throughout his career he supported Sun Yat-sen and Chiang Kai-shek His first important position was minister of industry, commerce, and labor (1927) After 1931 he belonged to the central executive committee of the Kuomintang He was minister of finance (1933–44), governor of the Central Bank of China (1933–45), and president (1938) and vice president (1939–45) of the Executive Yuan He married Soong Ai-ling (see SOONG, family) He is also known as H H Kung

Kunié, New Caledonia see PINES, ISLE OF

Kunigunde, Saint see HENRY II, emperor

Kuniyoshi, Yasuo (yäsōō-ō' kōōn"ēyō'shē), 1892–, American painter, b Okayama, Japan He came to the United States at 13 and studied art in Los Angeles and at the Art Students League of New York under Kenneth Hayes Miller He visited Europe in 1925 and in 1928 Kuniyoshi's work has been described as Oriental in spirit but Western in technique It has a brilliant accent despite his preference for somber color His paintings, drawings, and prints are original and highly decorative They are best seen in the galleries of New York city, where is also his well-known mural in Radio City Music Hall Kuniyoshi was long a popular teacher at the Woodstock Summer Art School

Kunlun (kōōn'lōōn'), mountain system, Tibet and W China, adjoining the Himalayas and forming the natural northern boundary of Tibet Described as "an ocean of tumbling peaks," the Kunlun reach 24,000 ft in the main range (the Min Shan), which lies S of the Tsaidam, a swamp of Tsinghai prov, China A branch range, called the Altyn Tagh in N Tibet and S Sinkiang and the Nan Shan elsewhere in China, lies generally N of the Tsaidam and in China joins the Min Shan near the upper Yellow River valley The Tsinglings range of central China, which rises to 12,000 ft, is an eastern branch of the Kunlun In the high mountain passes yaks are the beasts of burden

Kunming or **K'un-ming** (kōōn'mĭng'), city (pop 300,297), capital of Yünnan prov, S China North of a series of large lakes at an elevation of 6,200 ft, it is the terminus of a railroad to Haiphong, Indo-China, and is connected by short lines with near-by cities In the Second World War, Kunming was the Chinese terminus of the Burma Road and a major shipping point for military supplies The city was formerly named Yünnanfu

Kunsan (kōōn'sän'), Jap *Gunzan*, city (1946 pop 66,715), S Korea, a port on the Yellow Sea A rail terminus, it has light industries

Kunya-Urgench, Turkmen SSR see URGENCH

Kunz, George Frederick (kōōnts), 1856–1932, American authority on gems, b New York city He was associated with Tiffany & Co, New York, from 1879 and also served in a special capacity on the U S Geological Survey (1883–1909) and on the U S Fish Commission investigation of American pearls (1892–98) Among his writings are books on the gems and precious stones of North America (1890) and of Mexico (1907) Kunzite a variety of spodumene, was named for him

Kuomintang or **Kuo-min-tang** (kwō'mĭntäng', kōō'ō–) [Chinese,=national people's party] SUN YAT-SEN organized this party in 1912 to succeed his Revolutionary Alliance (T'ung Meng Hui) Its program called for an independent republic and moderate socialism In 1913 Yüan Shih-kai, the president of China, suppressed the Kuomintang although it held a majority in the first national assembly The party established unrecognized governments at Canton in 1918 and 1921 The USSR assisted it to reorganize in 1922 At the party congress in 1924 at Canton a coalition including Communists adopted Sun's political theory, which included the Three People's Principles (San Min Chu I), namely, nationalism, democracy, and a guaranteed livelihood Sun thought that Chinese National reconstruction must follow the stages of military government, tutelage under the Kuomintang, and popular sovereignty Soon a Kuomintang army under CHIANG KAI-SHEK advanced N from Canton, halting temporarily in 1927 when the Communists were purged and the civil war between the two factions began The Kuomintang government at Nanking received diplomatic recognition in 1928 and opened the period of tutelage By 1930 all China was conquered except for distant regions in the north where the Communists maintained their power The Kuomintang controlled the Chinese government absolutely until 1947, when it permitted some participation by minor liberal parties Full-scale civil war and an apparently inevitable Communist victory made unfeasible the sovereignty stipulated in the national constitution of 1947. See P M Linebarger, *The China of Chiang K'ai-shek* (1941).

Kuopio (kōō'ôpēō), city (pop 25,343), central Finland, on Lake Kallavesi, in the principal forest region of Finland. Its industries are based on timber At the head of the SAIMA lake system, Kuopio is also a tourist and inland navigation center.

Kupka, Frank, Czech *František Kupka* (frän'tyĭshĕk kōōp'kä), 1871–, Czech painter, etcher, and illustrator He settled (1894) in Paris and became a caricaturist on Parisian papers He illustrated works by Reclus and Leconte de Lisle and an edition of Aristophanes' *Lysistrata* He is a realist and symbolist His paintings are in private collections

Kuprili (kuprē'lē, Turkish kū'prēlē), distinguished Turkish family of Albanian descent, several members of which served as grand viziers The name is also spelled Kuprili, Köprili, and Köprulü

Mohammed Kuprili, 1583–1661, became grand vizier of MOHAMMED IV in 1656 Though an upstart and illiterate, he displayed remarkable statesmanship and efficiency He reorganized the Turkish fleet, conquered (1658) Transylvania, restored internal order, reformed the finances, and built forts along the Don and Dnieper During his vizierate the Ottoman Empire regained some of its former prestige and vitality He was succeeded as vizier by his son **Ahmed Kuprili** (ä'mĕd), 1635–76 An able statesman and soldier, he took (1669) the last Venetian stronghold in Crete, but he was severely defeated (1664) by Montecucculi at Szent-Gotthard in Hungary and suffered reverses in his campaigns against John III of Poland Ahmed, who died from overindulgence, especially in drinking, was succeeded as vizier by Kara MUSTAFA, his brother-in-law Ahmed's brother, **Mustafa Kuprili** (mōō'stäfä), 1637–91, became vizier in 1689, at a time when the Austrians and their allies were advancing victoriously into the Ottoman Empire He continued his predecessors' administrative and fiscal reforms and improved the status of the Christian subjects He drove the Austrians from Serbia but was killed in the battle of Slankamen His cousin, **Hussein Kuprili** (hüsän'), d 1702, was vizier from 1697 He negotiated the humiliating Treaty of KARLOWITZ He too was a reformer and a patron of the arts and letters Mustafa Kuprili's son, **Numan Kuprili** (nōō-man'), d 1719, was vizier in 1710–11 Another son, **Abdullah Kuprili** (ŭbdōōlä'), d 1735, was acting vizier from 1723 till his death

Kuprin, Aleksandr Ivanovich (ülyĭksän'dur ēva'nuvyĭch kōō'prĭn), 1870–1936, Russian novelist and short-story writer He won fame with *The Duel* (1905, Eng tr, 1916), a novel of protest against the Russian military class In 1909 *The Pit* (Eng tr, 1922), a novel dealing with prostitution in Odessa, created a sensation Kuprin left Russia after the revolution but returned in 1937 shortly before his death Some of his best short stories appear in English in *The River of Life* (1916), *A Slav Soul* (1916), *The Bracelet of Garnets* (1917), and *Sasha* (1920)

Kura (kōōrä'), anc *Cyrus*, river, 940 mi long, the chief river of the Georgian SSR and the Azerbaijan SSR It rises in Turkish Armenia, NW of Kars, at 6,500 ft and flows northeast, then southeast paralleling the Greater Caucasus, into the Caspian Sea Its rapid upper course is utilized by a large hydroelectric plant near Tiflis Navigation begins 300 mi above the mouth In its lower course the Kura is joined by the Aras and runs through an extensive irrigated plain that extends into NW Iran Rich cotton crops are grown in this region, which lies partly below sea level

Kurdistan (kûr'dĭstăn", kōōrdĭstän'), extensive plateau and mountainous region of indefinite limits (c 74,000 sq mi, pop c 2,000,000), inhabited by Kurds or Carduchis and including parts of E Turkey, Soviet Armenia, NE Iraq, and NW Iran In Iran, the Kurds are principally in Azerbaijan and Khurasan, and some in Fars In Turkey, they dwell near the Turko-Persian frontier in the region around Lake Van Large colonies of Kurds are also around Diyarbakir and Erzerum In Iraq, the Kurds are centered about Mosul, Kirkuk, and Sulaimania, the latter being populated entirely by Kurds In Russian Transcaucasia, the Kurds of Erivan and neighboring towns constitute a small minority In all, there are upward of 1,500,000 Kurds In close ethnical relation to the Persians, they are a nomadic people engaged mainly in sheep raising and agriculture, and their chief industry is carpet making The majority are fanatic Sunnite Moslems A warlike people, the Kurds throughout their history have never submitted to foreign rule for long In a narrower sense, the name Kurdistan is applied to an old Persian province now incorporated mostly in the Fifth Prov and partly in the Third Prov and Fourth Prov For centuries the Kurds struggled for autonomy from Ottoman rule, and at the Paris Peace Conference in 1919 they reaffirmed their claims to independence The Treaty of Sèvres (1921) provided for the creation of an autonomous Kurdish state, but the Treaty of Lausanne (1923), which superseded it, failed to mention Kurdistan. Subsequent revolts in 1925 and 1930 on the part of the Kurds have had no definite result in the achievement of autonomy In 1946 the Kurds of Iran, parallel with the autonomous movement in Azerbaijan, Iran, staged a revolt for autonomy against the Persian government The revolt was suppressed and the leaders were executed

Kurds: see KURDISTAN.

Kure (kōō'rā), city (1940 pop 238,195, 1947 pop. 185,740), Hiroshima prefecture, SW Honshu, Japan, on Hiroshima Bay A major naval base and port, with shipbuilding yards and factories, it was heavily bombed (1945) in the Second World War

Kure Island (kōō'rā), formerly **Ocean Island,** a circular atoll in the northwestern part of the Hawaiian group, c 50 mi NW of Midway Kure was annexed (1886) by **Hawaii** and was worked for guano In 1936 it was placed under the U S navy The name is also spelled Curé

Kurgan (kōōrgän'), city (pop 53,224), capital of Kurgan oblast, RSFSR, in W Siberia, on the Tobol river and at the junction of two branches of the Trans-Siberian RR Founded in 1616, it is the center of a wheat-growing and dairy-farming district

Kurhessen, Germany see HESSE

Kurile Islands or **Kuril Islands** (both kōōrel', kōō'rĭl), Jap *Chishima-Retto*, Rus *Kuril'skiye Ostrova*, island chain (5,700 sq mi, pop 17,549), RSFSR, in the N Pacific, stretching between Kamchatka and Hokkaido There are 30 large and 20 small islands, mainly of volcanic origin Sulphur mining, hunting, and fishing sustain the population In the 18th cent Russia and Japan both penetrated the islands, which in 1875 became entirely a Japanese possession The USSR occupied and annexed the Kuriles in 1945 pursuant to an agreement at the Yalta Conference

Kurisches Haff (kōō'rĭshus häf'), coastal lagoon (56 mi long and 28 mi wide, maximum depth, 33 ft), Lithuania and former East Prussia It is separated from the Baltic Sea by the Kurische Nehrung, a sandspit 60 mi long and 1 to 2 mi wide, which leaves only a narrow opening at the Memel channel in the north The Niemen river empties into the Kurisches Haff

Kurland see COURLAND

Kuropatkin, Aleksey Nikolayevich (ülyĭksyä' nyĭkulĭ'uvĭch kōōrōpät'kĭn), 1848–1925, Russian general He distinguished himself in the Russo-Turkish War of 1877–78, and in 1881 he took part in Skobelev's 500-mile march from Tashkent to Geok-Tepe and in the storming of that fortress Made minister of war in 1898, he opposed the course which precipitated the Russo-Japanese War of 1904–5, but after its outbreak he took command of the troops in Manchuria Gen M V Alekseyev, who was commander in chief, is usually blamed for the Russian defeat at Mukden, but Kuropatkin resigned He was (1916–17) governor of Turkistan. See his book, *The Russian Army and the Japanese War* (Eng tr, 1909)

Kuroshio see JAPAN CURRENT

Kursk (kōōrsk), city (pop 119,972), capital of Kursk oblast, S central European RSFSR, on the Seim river It is an important railroad junction and a manufacturing center, producing chiefly machinery Founded in the 9th cent and chartered in 1095, it became the seat of a principality in the 11th cent Kursk was completely destroyed by the Mongols in 1238 and remained in ruins until it was rebuilt (1586) as a fortress The center of heavy fighting in the Second World War, it was held (1941–43) by the Germans

Kurume (kōō rōō'mā), city (pop 90,999), Fukuoka prefecture, W Kyushu, Japan It is a manufacturing center and the seat of Kurume Medical College

Kurunegala (kōō"rōōnā'gulu), town (pop 13,510), on W central Ceylon It is overlooked by Elephant Hill, a stronghold in the 14th cent, when the Singhalese kings made Kurunegala their capital

Kurusu, Saburo (sa"bōōrō' kōōrōō'su), 1888–, Japanese diplomat As ambassador to Germany, he signed the Pact of Berlin in Sept, 1940, and in Nov, 1941, he flew to the United States for the last-minute negotiations preceding the attack on Pearl Harbor

Kurzeme see COURLAND

Kusatsu (kōōsa'tsōō), town, Gumma prefecture, central Honshu, Japan As early as the 12th cent its hot sulphur springs were known for their medicinal properties

Kushaia (-shā'yu) [Heb,=God's bow], Levite. 1 Chron 15 17 Kishi 1 Chron 6 44

Kushiro (kōōshē'rō), city (1947 pop 61,421), SE Hokkaido, Japan, a port on the Pacific It is the main port of E Hokkaido, with exports of timber, fish, and coal

Kuskokwim (kŭs'kōkwĭm) river rising on the northwest slopes of the Alaska Range, W Alaska, and flowing generally SW to Kuskokwim Bay of Bering Sea There are mining settlements on the upper reaches, and Goodnews Bay is an inlet of Kuskokwim Bay

Küssnacht (küs'näkht), village (pop 5,152), Schwyz canton, Switzerland, on the Lake of Lucerne A chapel commemorates the legendary shooting of Gessler by William TELL

Kustanai (kōōstŭnī'), city (1936 estimated pop. 38,900), capital of Kustanai oblast, Kazakh SSR, on the Tobol river It is an agricultural center

Küstrin (kustrēn'), town (1939 pop. 23,771), Brandenburg, E Germany, on the Warthe and Oder rivers The section on the left (western) bank of the Oder was wiped out in the Second World War The section E of the Oder passed (1945) under Polish

administration and is named in Polish Kostrsyn (kôs'chĭn) (pop 634) From 1535 until its destruction Küstrin was an important fortress city Here Crown Prince Frederick (later Frederick II) of Prussia was imprisoned after his attempted flight in 1730 A former spelling is Custrin

Kutahya (kōōtä'yä, kütäyä'), city (pop 19,849), W central Turkey. It is an agricultural market center and has ceramic and carpet manufactures. A former spelling was Kutaiah

Kutais (kōōtĭs'e') or **Kutaisi** (kōōtĭsē'sē), city (pop 81,479), W Georgian SSR, on the Rion river, in an orchard and garden region It is the largest city of Georgia An important manufacturing center, it produces trucks, machinery, chemicals, and woolen, cotton, and silk textiles Founded in the 6th cent B C, Kutais was the capital of ancient IMERITIA It was taken by the Russians in 1804 There are ruins of an old Imeritian castle and of an 11th-century cathedral, destroyed in the 17th cent by the Turks

Kutch or **Catch** (both kŭch, kōōch), state (exclusive of the Rann 8,461 sq mi, pop 500,800), W India, bounded on the north by Pakistan Bhuj is the capital The land is barren except for a band along the Arabian Sea The Rann (rŭn) of Kutch is a salt waste (9,000 sq mi), mainly in the north Between March and October it is frequently inundated Salt is its only product

Kutchin Indians (kŭ"chĭn'), group of North American Indian tribes of the Athapascan linguistic stock They inhabit the Yukon valley in NW Canada and E Alaska and also the valley of the Peel river, a tributary of the Mackenzie Before the advent of the white man the Kutchin were caribou hunters of the north central Canadian area They practiced polygamy, and they sometimes killed female children to prevent overpopulation Sir Alexander Mackenzie was the first European to visit (1789) this area, and by c 1810 a trading post was established The Kutchin are extremely hospitable, sometimes entertaining guests for weeks at a time In the mid-19th cent they numbered some 1,200, but today they number 1,700 The Kutchin are also called the Loucheux See Cornelius Osgood, *Contributions to the Ethnography of the Kutchin* (1930)

Kutchuk Kainardji or **Kutchuk Kainarn, Treaty of** see KUCHUK KAINARJI, TREATY OF

Kut-el-Amara (kōōt'-ĕl"-umä'ru), town, Iraq, on the Tigris river and c 100 mi SE of Baghdad It was the scene of prolonged struggle between the British and the Turks in the First World War It was taken in 1915 by Gen Charles Townshend, who, advancing north to take Baghdad, suffered defeat and retreated back to this base The small British army withstood the determined siege of the Turks for 143 days (Dec 8, 1915–April 29, 1916) before surrendering The town was recovered by Gen Frederick Maude in 1917 in his successful advance on Baghdad Construction of a dam across the Tigris here was completed in 1939 The name is also spelled Kut-al-Amara or Kut-el-Imara

Kutenai Indians see KOOTENAI INDIANS

Kutna Hora, Czech *Kutná Hora* (kōōt'na hô'rä), city (pop 12,119), central Bohemia, Czechoslovakia Its abundant silver mines largely created the power and greatness of the medieval kings of Bohemia The miners held special privileges until the 16th cent In 1421–22 Kutna Hora was captured by the Hussites, recaptured by Emperor Sigismund, and captured again by John Ziska Till then a stronghold of Catholicism, the city became for two centuries the center of Bohemian Protestantism Kutna Hora is rich in medieval architecture, with two notable churches—St Barbara (14th cent.) is a splendid example of Bohemian Gothic, and the Gothic St James (14th cent) has a tower 266 ft high The "Italian Court," begun in the 12th cent, is a castle once used both as a mint and as a residence of the kings of Bohemia

Kutno (kōōt'nô), town (pop 20,066), Poland, N of Lodz In its vicinity the Poles fought (1939) a long and bloody battle against the German invaders Chiefly a trade center, it also manufactures metal products and foodstuffs

Kuttawa (kŭtô'wŭ), town (pop 1,125), SW Ky, on the Cumberland river and E of Paducah Near by is Kuttawa Mineral Springs Park

Kutuzov, Mikhail Illarionovich (mēkhüyēl' ēlüryôn'uvĭch kōōtōō'zŭf), 1745–1813, Russian field marshal He fought against the Polish Confederation of BAR and served in the RUSSO-TURKISH WARS of 1768–74 and 1787–92, in which he lost an eye He took part (1805) in the battle of Austerlitz, which was fought against his advice In 1811-12 he again took command against the Turks and defeated them in a brief and brilliant campaign which brought Bessarabia to Russia. In Aug, 1812, Kutuzov, recently created a prince, replaced BARCLAY DE TOLLY as commander in chief against the invading armies of NAPOLEON I His appointment was purely political, and Kutuzov was expected to give battle to the French and to abandon his predecessor's delaying tactics The bloody battle of BORODINO was the result; after that butchery, Kutuzov resumed Barclay's wise policy of retreat, which eventually led to Napoleon's ruin. He pursued Napoleon relentlessly after the retreat of the *Grande Armée* from MOSCOW (1812–13) Created prince of Smolensk for a victory late in 1812, he died while campaigning in Germany

Kuttstown (kŏōts'toun), industrial borough (pop 2,966), SE Pa, NE of Reading, settled by Germans in 1733, inc 1815. Its manufactures include textiles, metal products and limestone There are much-visited caves near here. It has a state teachers college

Kuwait (kōōwīt', -wāt') or **Kowait** (kō-, kōō-), emirate (c.2,000 sq mi, pop. over 100,000), Arabia, near the head of the Persian Gulf. The emirate, a British protectorate, is bounded by Saudi Arabia and neutral territory on the south and by Iraq on the north It is generally barren and sparsely populated Its capital, Kuwait (pop c 25,000), is a port and trade center with shipyards building native craft It is a stop on the British air line along the Persian Gulf See Alan Villiers, *Sons of Sinbad* (1940)

Kuyp, family of Dutch painters see CUYP

Kuyper, Abraham (ab'rahəm koi'pur), 1837–1920, Dutch theologian and statesman After holding important pastorates, he became interested in politics and engaged in political and theological controversies In 1886 he founded the Free Reformed Church He edited an encyclopedia of sacred theology Kuyper was elected to the States-General in 1874, where he served at various times thereafter until his death

Kuzbas, RSFSR see KUZNETSK BASIN.

Kuznetsk, RSFSR see STALINSK

Kuznetsk Ala-Tau see ALA-TAU

Kuznetsk Basin (kōōznyĕtsk'), coal basin, area c 10,000 sq mi, RSFSR, in S central Siberia, between the Kuznetsk Ala-Tau in the east and the Salair Ridge in the West Its abbreviated name is Kuzbas It is the richest coal basin of the USSR Its coal reserves, estimated at 400,000,000,000 to 450,000,000,000 tons, in thick seams to 4,500 ft in depth, are of high quality and great variety The main mining centers are ANZHERO-SUDZHENSK, KEMEROVO, and LENINSK-KUZNETSKI The region has undergone tremendous industrial development in recent years STALINSK is the center of the new metallurgical industry

Kwajalein (kwä'julăn,–lēn,–līn) or **Kwajalong** (kwa'jälông), atoll (pop 832), central Pacific, one of the Ralik Chain and largest of the Marshall Islands It is district headquarters of the U S Trust Territory of the Pacific Islands In the Second World War the U S conquest of the Marshalls began with the capture (1944) of Kwajalein and its islets, Roi (the site of an airfield) and Namur U S naval and air bases were established here in 1945 There is a radio beacon

Kwakiutl Indians (kwä'kēōō"tul), group of closely related North American Indian tribes who inhabit N Vancouver Island and the adjacent mainland of British Columbia They together with the Nootka Indians, their southern neighbors, comprise the Wakashan linguistic stock Kwakiutl culture was typical of the Pacific Northwest Coast Their population, before the coming of the whites, was estimated to be some 15,000, but in 1949 it had been reduced to some 3,500 In recent years the literature concerning the Kwakiutl has grown out of proportion to their historical significance, because of the study Franz Boas devoted to them See Franz Boas, *The Kwakiutl of Vancouver Island* (1909), Ruth Benedict, *Patterns of Culture* (1934).

Kwangchowan, China see CHANKIANG

Kwang Hsü (gwang'shü'), 1872–1908, emperor of China (1875-98) Although he was not in the direct line of succession, he was appointed to the throne by his aunt, the dowager empress and regent, Tz'u Hsi He began his rule in 1889 In 1898, during the "hundred days of reform," he issued many decrees modernizing the political and social structure of China His aunt thereupon forced him to abdicate and kept him imprisoned for the remainder of his life while she ruled China in a conservative manner

Kwangsi (kwäng'sē', gwäng'sē'), Mandarin *Kuangsi*, province (84,526 sq mi, pop 14,535,868), S China, bordering Indo-China The capital is Kweilin Kwangsi is drained by the navigable Si river and its many tributaries and has one of the best systems of hard-finished roads in China, thus transportation facilities are good There is little industry Besides the capital, major cities are Nanning and Wuchow In climate, natural resources, and agriculture the province is much like KWANGTUNG

Kwangtung (kwäng'tôông', gwäng'dôông'), Mandarin *Kuang-tung*, province (84,367 sq mi, pop 28,771,277), S China, on the China Sea. A small portion borders Indo-China The capital is Canton The province includes the island of HAINAN On islands off the coast of Kwangtung and on adjacent mainland territories are the British colony of HONG KONG and the Portuguese colony of MACAO The coast line is the longest of any province, but because the coast is mostly hilly, there are only a few breaks to the interior, chiefly at Canton and Swatow. Inland transportation, particularly by water routes, is good. Besides a few short local lines, the province is served by the Peiping to Canton railroad. In the canals and off the coast there is considerable fishing. Only about 10 percent of the land is level and suitable for agriculture, notably the Canton delta, one of the most densely populated areas of China. As the climate is subtropical and the rainfall heavy most of the year, three crops are generally harvested and famines are rare. However, some rice must be imported for local needs Silk culture is important, the province producing one third of the Chinese total Tobacco, peanuts, vegetables, fruits (including bananas), and fan palms are grown. In the river uplands cassia (cinnamon) bark is gathered and some timber is cut The considerable mineral wealth, especially coal, is little exploited Industries include the manufacture of silks, lacquer ware, and pottery. The people are noted for their industry and their use of modern Western business methods About half the Chinese who have emigrated abroad come from Kwangtung

Kwantung region, China see LIAONING

Kweichow (kwā'chou', gwā'jō'), Mandarin *Kueichou*, province (65,713 sq mi.; pop 10,528,298), S central China Kweiyang is the capital. The surface is almost entirely a high plateau with many deep river valleys, notably that of the Wu The climate is mild and the rainfall adequate, but poor and scanty soil hamper agriculture Rice, corn, wheat, and tea are the principal crops. The reputedly large mineral wealth of the province is little exploited With but one railroad, few highways, and unnavigable rivers, communications are unsatisfactory A minority of the population is Chinese, the majority is made up of aborigines, mostly Miaos, Ikia, and Lolos

Kweilin (gwā'lĭn'), Mandarin *Kuei-lin*, city (pop 142, 202), capital of Kwangsi prov, China It is noted for its scenic setting on the Kwei river Kweilin has cotton mills and is the seat of Kwangsi National Univ

Kweisui (gwā'swā'), Mandarin *Kuisui*, city and county (pop 169,659), Suiyuan prov, NW China The city is the capital of the province It is the seat of a living Buddha and has several Lamaist temples The terminus of caravan routes to Sinkiang and to the Mongolian People's Republic, Kweisui is connected by rail with Peiping and is a major trade center of NW China

Kwidzyn, former Prussia see MARIENWERDER

Kyakhta or **Kiakhta** (both kyäkh'tŭ), city (1936 estimated pop 12,300), SE Buryat-Mongol ASSR, RSFSR, on the Mongolian border and on the highway from Ulan-Ude to Ulan Bator It is a transit point for trade between Mongolia and the USSR It was founded (1728) as a fortress on what was then the Chinese frontier and developed as a trade center Until c 1935 part of the city was known as Troitskosavsk, the name of the original fortress

Kyburg (kē'bōork), noble family in present Switzerland which attained great power in the 13th cent Ruling most of the present cantons of Thurgau and Zurich, it took its name from a castle near Winterthur After the death (1218) of Berthold V of ZÄHRINGEN, the Zähringen lands on the right bank of the Aar river passed to Berthold's brother-in-law, Count Ulrich III of Kyburg Ulrich's daughter married Count Albert IV of Hapsburg, their son was King Rudolf I, who inherited the Kyburg lands on the death (1264) of his brother-in-law Count Hartmann IV of Kyburg Thus most of N Switzerland passed under Hapsburg sway, from which it freed itself after 1291

Kyd or **Kid, Thomas**, 1558–94, English dramatist He was the best-known exponent of the English "tragedy of blood," and his *Spanish Tragedy* (1592) may have been the source of the ghost and the play-within-a-play of Shakspere's *Hamlet*, an earlier version of which has been attributed to Kyd. See biographical notice in Kyd's works (ed by F. S Boas, 1901), J M. Robertson, *The Problem of Hamlet* (1919)

Kyffhäuser (kĭf'hoisur), forested mountain, c 1,550 ft high, N Thuringia, central Germany It is crowned by the two ruined castles of Rothenburg and Kyffhausen and by a huge, atrocious monument to Emperor William I According to legend, Emperor Frederick I (Frederick Barbarossa) sleeps bewitched in a limestone cave in the mountain, sitting at a stone table through which his beard has grown There he awaits the time when he will come forth to restore German greatness. The legend, treated in poems by Uhland, Heine, and others, originally applied to Emperor Frederick II

Kynaston or **Kinaston, Edward** (both. kĭ'nustun), 1640?–1706, English actor. One of the last male actors of female roles, he first appeared at the Cockpit, Drury Lane, in 1659 From 1665 he played male roles, such as Cassio in *Othello*, and acted (1682–99) with Betterton's company at Lincoln's Inn Fields and Drury Lane See John Downes, *Roscius Anglicanus* (1708); Samuel Pepys, *Diary*.

kyogen see JAPANESE DRAMA.

kyongsong, Korea see SEOUL.

Kyosai, Shofu (shô'fōō kyō'sī), 1831–89, Japanese painter, illustrator, and cartoonist. He was probably the first political cartoonist of Japan. His sketches and paintings usually depict native folk-

lore with free and vivid fancy. Many are preserved in the British Museum, the Musée Guimet, Paris, and the Museum of Fine Arts, Boston. He wrote and illustrated *Kyosai Gwaden* (4 vols., 1887) under a pseudonym.

Kyoto (kyō'tō), city (1940 pop. 1,089,726; 1947 pop. 999,660), capital of Kyoto prefecture, S Honshu, Japan, on the Kamo river Founded in the 8th cent as Uda and named Heian-kyo when it became (794) the capital of Japan, it was popularly called Miyako or Kyoto (sometimes Kioto) Since 1868, when the capital was shifted to Tokyo, Kyoto has often been referred to as Saiko [western capital] For centuries it has been the cultural heart of Japan It contains magnificent art treasures, its cloisonné, bronzes, damascene work, porcelain, lacquer ware, and fabrics are famous Although today the third largest city in the country, it remains a center of the handicrafts, without large industrial developments Its port is Yodo Rich in historical interest, Kyoto is the site of the tombs of Emperor Kwammu (founder of the city), Hideyoshi, and Emperor Meiji and of the old imperial palace as well as the palace of the shoguns (with their fine parks and gardens). A center of Buddhism, with many ancient temples, it is noted for a 58-foot statue (Daibutsu) of Buddha. The city is the seat of Kyoto Imperial Univ, and of Doshisha Univ (founded 1873 as an American mission college) In the Second World War, Kyoto was the only major Japanese city to escape bombing The prefecture is principally urban, with the greater part of its population centered in the Kyoto area

Kyrie eleison (kē'rēā ālā'ēsŏn) [Gr ,=Lord, have mercy], in the Roman Catholic Church, prayer of the Mass coming after the introit, the only ordinary part said not in Latin but in Greek It consists of nine lines "Lord have mercy (thrice), Christ have mercy (thrice), Lord have mercy (thrice)" As the first invariable hymn, the *Kyrie* is often the first piece in a musical Mass The name is also used for similar prayers (not in Greek) in the Church of England and in the Russian Orthodox Church

Kyrle, John (kûrl), 1637–1724, English philanthropist, called the Man of Ross, famous from Pope's praise of him in the third epistle of the *Moral Essays* Kyrle's special interest was in the improvement and beautifying of homes and parks

Kyushu (kyōō'shōō), island (c 13,770 sq mi , with offshore islands c 14,990 sq mi , 1940 pop 8,963,715; 1947 pop 11,398,976), S Japan It is 210 mi. long and 120 mi. wide and is the third in size, southernmost, and most densely populated of the four major islands of Japan It is just S of Honshu, with which it is connected by a tunnel under Shimonoseki Strait The mountainous terrain rises to 5,850 ft at Mt Kuju The island has many hot springs. A mild climate favors the production of rice, tea, tobacco, sweet potatoes, oranges and other fruits, and soybeans Gold, silver, iron, and tin are mined on Kyushu, and raw silk is extensively produced. The island is noted for its fine porcelain (Satsuma and Hizen ware) Near the major industrial centers of Yawata, Wakamatsu Kokura, and Moji lies Japan's principal coal field On the west coast is Nagasaki, first Japanese port to receive Western trade The name of the island is sometimes spelled Kiushu or Kiushiu

Kyzyl, RSFSR see KIZIL

Kyzyl-Kum, Uzbek SSR see KIZIL KUM.

L

L, 12th letter of the ALPHABET It is a usual symbol for a lateral consonant, as in English The Greek correspondent is lambda or labda It is the Roman numeral for 50

La. For names beginning thus and not listed here, see second element, e g , for La Ceiba, see CEIBA, LA

La, chemical symbol of the element LANTHANUM

Laadah (lā'ŭdu), Judah's grandson 1 Chron 4 21

Laadan (lā'ŭdăn) 1 Ancestor of Joshua 1 Chron 7 26, 27 2 See LIBNI 1

Laaland or **Lolland** (both lō'lan), island (479 sq mi , pop 87,150), Denmark, in the Baltic Sea, S of Zealand It does not rise more than 97 ft above sea level and is largely agricultural, with forests in the north and east Sugar beets are the main crop The chief cities are Maribo and Nakskov

Laar or **Laer, Pieter van** (both pē'tur vän lar'), c 1600–c 1674, Dutch landscape and genre painter and etcher He spent some 15 years in Italy, where he was nicknamed Il Bamboccio (ēl bämbōt'chō) [the cripple] His landscapes show the influence of Nicolas Poussin, but the lively figures, taken from daily life, with which he peopled them are wholly Dutch His best works depict scenes of rustic life Their heavy brown tone has in many cases darkened badly *Paying the Vintagers* and *Travelers Leaving the Inn* (Louvre) are characteristic Laar produced 20 notable etchings

Labadie, Jean de, or **Jean de la Badie** (zhä dŭ lä bädē'), 1610–74, French mystic, founder of the Labadists He had been a Catholic priest, but c 1650 he embraced Protestantism He was a minister in Geneva (1659–66), then in Holland (until 1670) There under his leadership his congregation at Middelburg became a religious community dedicated to simple living, holding goods and children in common The Dutch authorities found him too independent of the ecclesiastical tests and discipline, and the community moved to Westphalia in 1670 and later to Altona By 1732 the movement was dead Labadists settled in Maryland (1684), but the community failed before 1730

Laban (lā'bān) [Heb ,=white] 1 Father of Leah and Rachel and uncle of Jacob Gen 24 29–60, 29–31 2 Unidentified place in the desert Deut 1 1

Labat, Jean Baptiste (zhä' batēst' läbä'), 1663–1738, French Dominican missionary Sent to the West Indies, he explored the islands, founded the city of Basse-Terre, and defended Guadeloupe against the English He wrote several volumes on his travels in Europe and America

Labé, Louise (lwēz' läbā'), c 1520–1566, French poet She wrote elegies and sonnets (1555) that are among the best love poems in the French literature of her time She was also called Louise Charly and nicknamed "La Belle Cordière."

Labe, river see ELBE

Labiche, Eugène Marin (ŭzhĕn' mărē' läbēsh'), 1815–88, French playwright His *Le Chapeau de paille d'Italie* (1851) was the first of a long series of successful comedies, including *L'Affaire de la rue de Lourcine* (1857); *Le Voyage de M Perrichon* (1860), his best-known comedy written in collaboration with Édouard Martin, *La Poudre aux yeux* (1861), and *La Cagnotte* (1864).

Labienus (Titus Atius Labienus)[‡](lā"bīē'nŭs), c 100 B C –45 B C., Roman officer An able lieutenant of Julius Caesar in the Gallic wars, he fought for Pompey in the civil war, escaped from the battle of Pharsalia, and was killed at the battle of Munda.

La Boétie, Étienne de (ātyĕn' dŭ lä bōāsē'), 1530–63, French judge and writer He is remembered for his friendship with Montaigne, with whom he served in the Bordeaux parlement Except for a few of his sonnets, preserved by Montaigne, his only work is a long essay attacking absolute monarchy, *Discours sur la servitude volontaire, ou, Contr'un* (Eng trs , *A Discourse of Voluntary Servitude*, 1735, *Anti-Dictator*, 1942)

labor, term used both for the effort of performing a task and for the social group (in some cultures almost the whole society) doing the work In the ancient world most physical work was done by slaves (see SLAVERY), and the status of labor was therefore low Agricultural labor was in the feudal period performed by the SERF In the towns, however, the skilled artisans of the craft GUILDS were influential citizens With the introduction of machinery (mid-18th cent) for many processes which had required manual skill, the status of town labor was depressed (see INDUSTRIAL REVOLUTION) A form of labor contract used in England and in the English colonies was INDENTURE, by which a child was hired out or a man hired himself out for a certain number of years Early economists, such as Adam Smith and Ricardo, evolved the labor-land-capital formula as factors of equal importance In the economic theory of Karl Marx, however, labor was of paramount importance From the last quarter of the 19th cent the status of all labor except agricultural has been definitely raised in industrial countries through organization (see UNION, LABOR), permitting collective bargaining with employers and successful pressure on governments to achieve their ends In fact, the term *labor* is most frequently used today to signify organized labor, in common parlance it refers to manual labor, either skilled or unskilled, rather than to clerical workers For labor disputes, see STRIKE, see also CHILD LABOR, MIGRATORY LABOR, PEONAGE See J R Commons and others, *History of Labour in the United States* (4 vols , 1918–36), P H Douglas and others, *The Worker in Modern Economic Society* (1923), N J Ware, *Labor in Modern Industrial Society* (1935), Allen Hutt, *The Post-War History of the British Working Class* (1937), John Price, *The International Labour Movement* (1945), Alene Austin, *The Labor Story* (1949)

labor, in medicine see BIRTH

labor, division of see DIVISION OF LABOR

labor, hours of. Until the Industrial Revolution, when the hours of work became a social and economic problem, the work day varied from 11 to 14 hr With the growth of capitalism, the introduction of expensive machinery, and the establishment of large factories, longer hours began to prevail in most industrial establishments, with little or no vocal opposition from the workers, who, because of the large reserve of labor and the resulting competition for work, were forced to accept any conditions imposed by the employer A day of 16 hr was not uncommon, with 14 to 15 hr the accepted working day With the growth of trade unions and an increased interest in social reform, there began a movement for shorter hours with no decrease in pay The first attempts were made in England in 1833, when a law was passed limiting to 12 hr the work day for miners and to 8 hr the day for children under 13 The 10-hr day was legally established in 1848, and gradually after the middle of the 19th cent shorter hours were achieved. In the United States the Federal government introduced a 10-hour day among its employees in 1840 and tried unsuccessfully to introduce an 8-hour day in 1868, but few private businesses used the 10-hour day until after the Civil War In 1866 a workmen's congress at Baltimore demanded the 8-hour day and organized the National Labor Union to secure it. In 1867 Illinois and Connecticut made 8 hr a legal day "unless otherwise agreed" Similar laws were passed in Pennsylvania in 1868 and in New York in 1870 In 1872 strikes among wool workers won them the 8-hour day temporarily, but the depression of 1873 slowed the movement In 1874 the Knights of St Crispin were instrumental in getting an 8-hour law for Massachusetts, and since 1880 nearly all the states have enacted 8-hour laws, usually restricting them to state employees A strike of 200,000 men for the 8-hour day occurred in 1886, and four years later a partial general strike forced some employers to grant the 8-hour day temporarily Congress in 1892 required the 8-hour day on all District of Columbia public works Frequent strikes gradually won the 8-hour day for the printing industry and the building trades, and by 1912 it was the working day accepted by many employers in the United States and Great Britain But large industries, like common carriers, continued to demand 10 hr Railroads engaged in interstate commerce achieved the 8-hour day by the Adamson Act of 1916, which provided for overtime pay if this number of hours was exceeded By the 1920s most states had adopted laws fixing the 8-hour day for public workers, while the average working week ranged from 45 to 49 hr , depending upon the trade and skill of the worker The passage of the Public Contracts Act in 1936 forbade all government contractors to make their employees work more than 8 hr a day and five days a week The WAGES AND HOURS ACT of 1938 provided a maximum work week of 44 hr , with a reduction later to 40 hr , and created the Wage and Hour Division in the Dept of Labor In the Second World War longer hours became the standard policy Insistence on the part of the unions in post-war years for higher wages without lengthening the workday brought about a series of strikes in automobile, mining, and other industrial fields In Australia, where the movement started in 1856, the 8-hour day for women in factories, underground miners, and public-service employees was achieved as early as 1877 With the inauguration of compulsory arbitration, the 44-hour and 46-hour week became common there In Europe the movement dates back to the International of 1864 and the Paris Trade Union Congress of 1883 Since the First World War most European nations have adopted the 8-hour day and 48-hour week for practically all industrial and commercial undertakings Germany and Czechoslovakia adopted it in 1918, France, Great Britain, Switzerland, and the Netherlands in 1919, and Belgium in 1921 In the Soviet Union the 8-hour day which had been sanctioned by the Kerensky provisional regime was modified by the 1927 law reducing the working day to 7 hr In 1929 a five-day week, with four days of work and one day of rest, was tried, but in 1941 a six-day week (i e , a year of 61 weeks with 305 working days and 61 rest days) was put in force, the working day was 7 hr During the Second World War 8 and 9 hr a day became again general practice See J M Vian *Hours and Wages in American Organized Labor* (1939)

Labor, United States Department of, organized in 1913 under the Secretary of Labor by act of the U S Congress In 1884 the Federal government had created the Bureau of Labor in the U S Dept of Interior Demands for a separate department led to the establishment of an independent labor department, which was organized (1888) without representation in the cabinet In 1903 it was again made the Bureau of Labor, this time in the U.S Dept of Commerce and Labor In 1913 a separate department of labor was created under the Secretary of Labor, who is the 10th ranking cabinet member With the aid of the Undersecretary, assistant secretaries, and the solicitor of labor, the Secretary of Labor supervises the activities of several bureaus and divisions within the department. In addition to the offices for administration,

the Dept of Labor includes the following major units the Bureau of Labor Statistics (direct descendant of the Bureau of Labor dating from 1884), which is an important agency for gathering data in the field of labor economics, the Women's Bureau (est 1920), which is charged with formulating standards and policies for the welfare of wage-earning women, the U S Employment Service, founded (1933) to promote and develop a national system of public employment offices, the Bureau of Labor Standards, established (1934) by departmental order to develop desirable labor standards in industrial practice, labor legislation, and labor administration, the Bureau of Apprenticeship, created (1937) to formulate standards of apprenticeship for the training of skilled workers by industry, the Wage and Hour and Public Contract Divisions, consolidated (1942) to administer jointly the provisions of the Walsh-Healy Act, (1936) and the Fair Labor Standards Act (1938), and the Bureau of Veterans' Reemployment Rights, formed (1947) to assist former members of the armed forces and the merchant marine to exercise their reemployment rights as provided by the draft act of 1940

L'Abord-à-Plouffe (läbôr"däplōōf'), village (pop. 1,773), on Île Jésus, S Que., on the north bank of the Rivière des Prairies and W of Montreal In a market-gardening area, it has tomato canneries

Labor Day, holiday celebrated in the United States and Canada on the first Monday in September to honor the workingman It was inaugurated by the Knights of Labor in 1882 and made a national holiday by the U S Congress in 1894 In most other countries—and among the leftists in the United States and Canada—May Day (May 1) is the workingman's holiday instead

Labori, Fernand Gustave Gaston (fĕrnä' gŭstäv' gastō' läbôrē'), 1860–1917, French lawyer, known for his brilliant defense of Dreyfus and Zola in the Dreyfus Affair

labor law, legislation dealing with human beings in their capacity as workers or wage earners The Industrial Revolution by introducing the machine and factory production created a class of workers dependent on wages as their source of income The terms of the labor contract, working conditions, and the relations between workers and employers very early became matters of public concern In England, Parliament was averse to legislating on these subjects owing to the prevailing policy of LAISSEZ FAIRE The earliest factory law (1802) dealt with the health, safety, and morals of children employed in textile mills, and subsequent laws regulated their hours and working conditions An act of 1833 provided for inspection to enforce the law Young mine workers were first protected in 1842, women in 1844 Labor unions were legalized in 1825, but agreements among their members to seek better hours and wages were punishable as conspiracy under the common law until they were legalized by acts of Parliament in 1871 and 1906 Other industrialized and partially industrialized countries have sought in various ways to meet the new problems In the United States legislation has been aimed at improving conditions of employment and at making factories and mines safer and more healthful Indenture and the importation of contract labor have been prohibited, and immigration has been restricted to minimize competition in the labor market Night work and work in hazardous occupations have been prohibited to women and children Legal minimums have been set for wages (see MINIMUM WAGE), and other laws require rest periods and sanitary conveniences for women in industry and fix the minimum age at which children may be employed Sweatshop labor and child labor have been discouraged through laws regulating interstate commerce The working conditions of railway employees and seamen on shipboard have been standardized Employees of the Federal government were early granted the eight-hour day, and by the WAGES AND HOURS Act of 1938 Congress established minimum standards of hours and wages in many basic industries in all parts of the country A number of laws have provided for workmen's compensation, old-age pensions, and a system of old-age insurance Like the British unions, early American labor organizations labored under the disability of the common-law doctrine of conspiracy, but this doctrine was not invoked by the courts after 1842 By an act of Congress unions were exempted (1916) from the antitrust laws, and the use of injunctions in labor disputes, begun in 1877, was outlawed by Congress in 1932 The National Labor Relations Act of 1935 established the right of workers to organize and required employers to accept collective bargaining as a ruling principle in industry See J. R Commons and J B Andrews, *Principles of Labor Legislation* (4th ed., 1936), Albion G Taylor, *Labor Problems and Labor Law* (1938), H. W Metz, *Labor Policy of the Federal Government* (1945).

Labor Relations Act: see NATIONAL LABOR RELATIONS BOARD and TAFT-HARTLEY LABOR ACT.

labor union see UNION, LABOR

Labouchere, Henry du Pre (lā"bōōshâr'), 1831–1912, English politician and journalist Following diplomatic service (1854–64), he sat in the House of Commons (1880–1906) as a Radical He was a supporter of Gladstone and an anti-imperialist He founded (1877) and edited *Truth*, a magazine devoted to the exposure of social fraud. See Hesketh Pearson, *Labby* (1937)

Laboulaye, Édouard René Lefebvre de (ädwär' rünä' lufĕ'vrŭ du läbōōlā'), 1811–83, French jurist. In 1849 he became professor of comparative jurisprudence at the Collège de France He was a moderate member of parliament under the Third Republic He believed that democracy is truly exercised by participation in local government and that mere use of the right of national suffrage is insufficient Besides works on Roman and French law he wrote a sympathetic study, *Histoire politique des États-Unis* [political history of the United States] (1855–66)

Labourd (läbōōr'), small region, SW France, in the Basque country Bayonne is the chief city Before the French Revolution, Labourd was a dependency of Gascony prov

La Bourdonnais, Bertrand François Mahé de (bĕrträ' fräswa' mä' du la bōōrdônā'), 1699–1753, French naval officer He entered the service of the French India Company and in 1725 distinguished himself in the capture of Mahé Governor of Mauritius and Réunion (1735–46), he was placed (1740) in command of the French fleet in India, he relieved Mahé (1741), succored DUPLEIX at Pondichéry (1745), and captured Madras (1746), but quarreled with Dupleix and was removed from his governorship On his return to France (1748) he was imprisoned in the Bastille on charges of treason, in 1751 he was released and acquitted, largely through pressure of popular opinion

Labour party, British political party The Labour party was founded in 1900 as an outgrowth of a long history of trade-union activity that became politically effective after the Reform Act of 1867 enfranchised the urban worker The Labour Representation League, organized in 1869, had elected candidates to Parliament, but they were absorbed into the ranks of the Liberal party Local labor groups elected 14 trade unionists to Parliament in 1892, these groups had been founded under the impetus given the movement by the Social Democratic Federation (founded 1881) and the Fabian Society (founded 1883) The Independent Labour party, organized in 1893 by Keir Hardie, was chiefly engaged in forming a politically potent trade-union alliance The Labour party, or Labour Representation Committee as it was known until 1906, was organized as a result of the Trades Union Congress of 1899 Until 1918 the party was distinctly a federation of trade unions and socialist groups and had no individual members In 1906 the party elected 29 members to Parliament, in 1910 it elected 42 Faulty organization and widely divergent political beliefs handicapped the party before the First World War At this period, the Labour party resembled a radical wing of the Liberal party and there was close cooperation between the two groups The outbreak of the war proved a crisis for the Labour party A strenuous effort was made to prevent Great Britain's participation, after war was declared (Aug., 1914), the party was divided A group under Ramsay MACDONALD and Philip SNOWDEN sharply criticized the foreign policy of the government, bitterly opposed conscription, and advocated peace by negotiation MacDonald resigned from the chairmanship of the party and was succeeded by Arthur HENDERSON, a moderate who favored cooperation with the government A third group advocated full participation in the government until the Central Powers were crushed The Labour party declared an industrial truce for the duration of the war and in May, 1915, joined the coalition government The party continued to oppose conscription and to advocate a conciliatory peace Its decision to send representatives to the international peace conference at Stockholm (1917) was resented by leaders of other British parties, and Arthur Henderson resigned from the cabinet (Aug., 1917) In Nov., 1918, the Labour party, now national in scope, withdrew entirely from the cabinet The party, again led by MacDonald, increased its representation at the 1922 election and for the first time became the official opposition Two years later the Labour party came into office, with MacDonald as its first prime minister Labour representatives constituted less than a third of the total membership of Parliament, and for this reason legislation proved difficult The government's domestic program included relief of unemployment and inauguration of housing and internal improvement projects The MacDonald ministry recognized the USSR, attempted to restore peace in the Ruhr, and tried to effect a settlement of the reparations question The Labour party was forced from office in Oct., 1924, chiefly because the Conservative party exploited the forged ZINOVIEV LETTER. The party continued to grow, however, and in 1929 it returned to power, with MacDonald as prime minister. Again the achievements of the Labour ministry were largely in the field of diplomacy; its domestic policy did not fulfill the expectations of the British laborer The deepening economic crisis hampered the Labour ministry When MacDonald and other members of his cabinet proposed reducing the dole, the majority of the cabinet refused to accede, and the Labour government was replaced by a coalition ministry headed by MacDonald (1931). MacDonald and other Labour leaders who joined him in the coalition were read from the party In the succeeding general election, the Labour party suffered an almost complete reverse, but it soon recovered its prestige In later municipal and by-elections the party registered striking gains After the 1931 defeat, Labour moved toward the left, the nationalization of key industries, the inauguration of a comprehensive and coordinated program of social reform, and the adoption of a new trade policy were advocated At its 1932 conference the party voted to take no part in any future war and, if necessary, to declare a general strike to prevent Great Britain from entering any foreign war Like the other major parties, Labour was divided into factions after 1931 but continued to function as an influential opposition to the National government By 1937 the party had developed a new leadership exemplified by Herbert Morrison, Ernest BEVIN, and Clement Richard ATTLEE, all outspokenly socialist but anti-Communist in their attitudes Such men as Hugh Dalton and Harold Laski represented the intellectual leadership At the outbreak of the Second World War the party again abandoned its traditionally pacifist stand and entered the coalition government of Winston Churchill, demanding bold socialist planning after the war as the price of its cooperation Bevin served as minister of labor (1940–45), and Attlee as deputy prime minister (1942–45) In the general election of July, 1945, the party won an overwhelming victory at the polls, securing 392 seats in Parliament Attlee became prime minister, Bevin was made foreign minister, Morrison was made House leader, and Sir Stafford Cripps was made president of the Board of Trade In the first year of its administration the party passed a comprehensive national health bill and nationalized the Bank of England, the coal industry, civil aviation, and atomic-energy production Thereafter the program was continued more slowly Electricity and transport were nationalized in 1947 The Labour government was faced with the difficulties of postwar shortages and the demands of reconstruction at home and the unsettled state of the world abroad The problem of India was settled (1947) by the establishment of the two dominions of India and Pakistan, satisfying the aspirations of Indian nationalism British foreign policy under the Labour government pursued a generally conservative course, looking to the United States for financial assistance and political cooperation, but attempting to maintain friendly relations with the Soviet Union In the general elections of Feb., 1950, the Labour party was returned to power in the House of Commons by a very narrow majority and managed to defeat motions of censure from the opposition, which declined, for the time, to press for new elections See Arthur Henderson, *The Aims of Labour* (1919), Paul Blanshard, *Outline of the British Labor Movement* (1923), R H Tawney, *The British Labor Movement* (1925), J F D Hall, *Labour's First Year* (1947), G D H Cole, *History of the Labour Party* (1948), C R Attlee, *The Labour Party in Perspective* (1949)

Labrador (lă'brudôr"), dependency of NEWFOUNDLAND (c 110,000 sq mi., 1947 estimated pop 5,639), NE North America The capital is Battle Harbour Labrador has one representative in the parliamentary government The name is often used synonymously with Ungava to denote the entire northeastern peninsula (four fifths of which became part of Quebec prov by the 1927 decision of the British privy council) Labrador comprises the eastern tip of Canada The dependency, shaped like a triangle with its north tip at Cape Chidley on Hudson Strait, is bounded by the Atlantic Ocean along its fjord-lined eastern shore S to Blanc Sablon at the northeast entrance of the Strait of Belle Isle, which separates Labrador from Newfoundland It is bounded on the south and west by Quebec prov Steep cliffs rise from the ocean's edge, with the interior generally high land topped with snow-capped peaks and cut by mountain streams The cold Labrador Current, bringing temperatures below freezing eight months of the year, the difficult terrain, and a lack of all save limited water and air transportation have left the country relatively undeveloped until recent years Tremendous deposits of iron ore in the southwestern lake district at the headwaters of Hamilton river, which flows east through a well-timbered valley, have led to the development of some 20,000 sq mi in the region of GRAND FALLS, which constitute a vast source of potential hydroelectric power Aside from transient laborers, the population of Labrador contains inland, nomadic Algonquian tribes, a decreasing number of Eskimo, largely confined to the northern coast, and a limited number of white settlers at the missions and fishing ports of Battle Harbour, Cartwright, Rigolet, Hopedale, and Nain Between April and October fishing fleets, to which the lumber and fur industries are

secondary, fill their boats with the plentiful cod, salmon, herring, and trout also furnish valuable income The history dates from the probable visits of the vikings (c 1000) and to the explorations of John CABOT (1498), CORTE REAL (1500), and Jacques CARTIER (1534) French fishermen and Basque whalers lost their concessions when the British officially obtained Canada in the Treaty of Paris of 1763 The Moravian missions were first established in the 1760s and since that time have shared the fur trade with the Hudson's Bay Company, which had virtual jurisdiction of the entire peninsula until 1870 In the Second World War the huge Goose Bay airport at Hamilton Inlet was a strategic link in trans-Atlantic transport, and the continued improvement of transportation has increased exploitation of resources and the development of vacation facilities See Sir W T Grenfell, *Forty Years for Labrador* (1932) and *Romance of Labrador* (1934), Elliott Merrick, *True North* (new ed , 1933) and *Northern Nurse* (1942), Alexander Forbes, *Northernmost Labrador, Mapped from the Air* (1938), J D Leechman *Eskimo Summer* (1946)

Labrador Current see OCEAN CURRENTS

labradorite (lă'brudōrīt", lăbrudo'rīt), a variety of translucent plagioclase FELDSPAR, usually gray, brown, or greenish in color Some varieties exhibit a play of yellow, red, blue, and green (labradorescence), which probably is caused by its thin-layered structure or by microscopic inclusions These varieties, sometimes called Labrador spar, are used for ornamental and decorative purposes Labradorite occurs in igneous rocks, e g , gabbro diabase, and basalt, in the Adirondack Mts of New York and the Wichita Mts of Arkansas and in Labrador, Sweden, Greenland, and Mt Etna

La Brea (lu brā'u), area, S Calif , formerly in Rancho La Brea The La Brea asphalt pits, which yielded prehistoric animal and plant remains, are in Hancock Park, Los Angeles

Labrouste, Henri (ārē' labrōōst'), 1801–75, French architect He was among the first to make effective architectural use of metal construction, as in his treatment of the reading room of the Bibliothèque Ste Genevieve (1844–50), Paris, in which the ceiling domes were supported upon an exposed iron framework He also made extensive alterations on the Bibliotheque nationale

La Bruyère, Jean de (zhă' du la bruyĕr'), 1645–96, French writer of the classical period, b Paris He entered as tutor the house of the prince de Conde (1684) and lived there thenceforth His great work, *Les Caractères de Théophraste, traduits du grec, avec Les Caractères ou les mœurs de ce siècle*, appeared in 1688 and subsequently in revised and augmented editions until the ninth (1696), published just after his death The first, and least, part of the work is a translation of THEOPHRASTUS the rest is a series of character sketches, maxims, and brief discussions on diverse themes, falling helter-skelter under a series of general headings The descriptions of persons are unexcelled, a few are of specific individuals rather than types, though the attempt to identify has been successful in but few cases The maxims are sometimes as neat as those of La Rochefoucauld, and the longer observations are often singularly pungent La Bruyère's application of his strong moral views to the contemporary economy, to the widespread poverty, and to the otiose life of the nobility has gained wide attention, but he is to be regarded less as a reformer than as a detached, realistic observer La Bruyere's works include also his inaugural address to the French Academy (1693) and nine dialogues attacking quietism (pub posthumously, 1699)

Labuan (lubōō'un, la"bōōan'), island (35 sq mi, pop, 8,500), off NW Borneo, administratively attached to British North Borneo since 1946 It produces rubber, sago, copra, and livestock Victoria, the chief town, has a fine harbor and an airport

laburnum (lubûr'nup) or **golden chain**, small tree (*Laburnum anagyroides* or *L vulgare*) of the pulse family, with decorative dark green leaves and sprays of bright yellow flowers The plant is a native of Europe, where, as in America, it is much grown for ornament The leaves and seeds are poisonous to cattle The heartwood is durable and hard and takes a high polish, it is used in cabinetwork for inlays. The laburnum is also called the bean tree

labyrinth (lă'burinth), intricate building of chambers and passages, often constructed so as to perplex and confuse a person inside The great labyrinth of ancient times was near Lake Moeris in Egypt, it was built by Amenemhet IV (XII dynasty) for an unknown purpose. More celebrated was a labyrinth in Crete built, according to Greek myth, by DAEDALUS to house the MINOTAUR

lac (lăk), resinous exudation from the bodies of the females of a species of scale insect (of the same family as the cochineal insect) from which SHELLAC is prepared India is the chief source of shellac, although some is obtained from Burma, Thailand, and Indo-China The insects feed on the sap of the twigs of certain tropical trees, some of which are cultivated for this purpose. The resinous secretion hardens upon exposure to air and forms a protective incrustation around the female and young, which are thus held fast to the twigs By scraping the twigs the incrustation is removed and this crude lac material is known as stick-lac If the stick-lac is crushed, the wood splinters and other foreign materials are removed, and the red coloring matter produced by the insects is dissolved out, the residue when dried is seed-lac, which is processed to make shellac The red coloring matter extracted from the stick-lac is similar to cochineal and is sometimes used as a dye and a pigment although it has been largely replaced by synthetic dyes

Lacaille, Nicolas Louis de (nēkôlă' lwē' du laka'yu), 1713–62, French astronomer As a result of his success in making meridional measurements in France under the patronage of the duke of Bourbon and the authority of Jacques CASSINI, he was elected to the French Academy in 1741 He also became professor of mathematics at the College Mazarin, where he established an observatory in 1746 He was at the head of an astronomical expedition (1750–54) to the Cape of Good Hope There he made observations of 10,000 or more southern stars, recording their positions, made the first measurement of an arc of the meridian of South Africa, and determined the lunar and solar parallax Among his works are *Astronomiae fundamenta* (1757), *Tables solaires* (1758), *Coelum australe stelliferum* (1763), and *Journal historique du voyage fait au cap de Bonne-Espérance* (1763)

La Calprenède, Gautier de Costes, sieur de (gōtyā' du kôst' syûr' du la kalprunĕd'), b 1609 or 1610, d 1663, French novelist and dramatist Of his works only the novel *Cléopâtre* (12 vols , 1647) retained popularity long The novel, of an austere morality, is a rambling romance full of adventures and sentiment

Lac au Saumon (lăk ō sōmō'), village (pop 1,703), E Que , on Lac au Saumon and N of Matapedia The lake was once a salmon-spawning ground

Laccadive Islands (lă'kudiv), group of coral atolls (10 sq mi , pop 18,355), Madras state, India, in the Arabian Sea The main products are copra, coir (coconut fiber), and fish

lace, patterned openwork fabric made by plaiting, knotting, looping, or twisting The finest lace is made from linen threads Handmade laces include needlepoint and bobbin lace, tatting, CROCHET WORK, and some fabrics made by netting and darning Needlepoint lace, allied in origin with EMBROIDERY, is worked with a needle in variations of the buttonhole stitch and is the most costly of the handmade laces Venetian point or *punto in aria*, literally a "stitch in the air" (without linen ground), developed in Italy from cutwork, more particularly from reticella with its groundwork of rectangular linen threads The laceworker soon sought relief from the restrictions of rectangular design, and the illogical but beautiful designs of *punto in aria* are the outcome, this was the first genuine lace The richest, most sumptuous of the needlepoint laces was the Venetian raised point of the 17th cent Flanders and Italy dispute the invention of lace, and it is certain that Flanders was not far behind in the production of laces of quality, Flanders was particularly noted for its exquisite bobbin laces In France, during the reign of Louis XIV, his minister Colbert developed the lace industry to an extraordinary degree The earlier laces made in France were somewhat in the style of the late Venetian point, and from these developed the wonderful designs of *point de France* Later the laces of Alençon, Argentan, and Valenciennes exemplified the French style and design Brussels is a name applied to either needlepoint or bobbin lace of a certain style Pillow, bone, or bobbin lace, woven with bobbins, includes *point d'Angleterre*, Binche, Valenciennes Mechlin, torchon, Honiton, Cluny, duchesse, *point de Paris*, Maltese, and Chantilly Valenciennes is a fine, diamond-meshed lace much used for trimmings and ruffles Mechlin is of similar type, but flimsier, torchon is a simple loose lace, made and used by the peasants all over Europe, Honiton, one of the fine English laces, has a net foundation with appliqués of delicate, handmade braid Duchesse has exquisite patterns with much raised work Maltese is coarse and heavy, usually made of silk Chantilly is a delicate mesh with ornate patterns, originally made of the yellowish undyed silk, later, often in black, used for shawls, fichus, wedding veils, fans, and parasols A number of laces fall outside a strict classification, Guipure (gēpyōōr') has a heavy pattern formed by a braid with a cheap core covered with fine silk, gold, or silver thread Limerick lace is tambour work on net Renaissance or Battenberg lace is of heavy tape formed into a pattern and filled in with lace stitches Carrickmacross is cutwork lace So-called English point or *point d'Angleterre* is Flemish point, at one time smuggled into England and renamed *Filet* is a combination of knotting and darning, reminiscent of the earliest lace forms attempted. Cutwork, or various combinations of early lace forms with embroidery, also formed an important step in lacemaking. The better-known knotted laces are tatting and macramé, macramé evolved from the early Italian *punto a groppo* Crocheted lace reached its finest development in Ireland Knitted laces, for which many intricate patterns survive, have been mainly of peasant acceptance The chief modern centers of lacemaking are France, Belgium, England, Ireland, and Italy Machine-made lace first appeared in the latter part of the 18th cent , and by 1813 a bobbinet machine was perfected Lace manufacture has developed rapidly, largely superseding the handmade variety Lace and net curtains are an important phase of modern lace manufacture See Fanny Palliser, *A History of Lace* (ed by M Jourdain and Alice Dryden, 1902), Gertrude Whiting, *A Lace Guide for Makers and Collectors* (1920), J F Caplin, *The Lace Book* (1932), Jeannette E Pethebridge, *Manual of Lace* (1948)

Lacedaemon (lăsudē'mun), in Greek mythology, ruler of Laconia or Lacedaemon, son of Zeus He gave the capital of his state his wife's name, Sparta

Lacépède, Bernard Germain Étienne de la Ville, comte de (bĕrnär' zhĕrmē' ātyĕn' du la vēl' kōt' du lwäpĕd'), 1756–1825, French naturalist Before the age of 20 he showed considerable talent in both music and physics and won the favor of Gluck and of Buffon Buffon secured him a position in the royal museum Lacépède took an active part in politics, sitting in the Constituent and Legislative Assemblies, in the senate of the Consulate and the empire, and in the house of peers under Louis XVIII He was noted for the systematic precision of his classifications, which were, however, frequently based on superficial and misleading evidence His best-known works dealt with the oviparous quadrupeds, snakes, fishes, and whales, they are frequently printed with Buffon's works, which they supplement

La Chaise, François d'Aix de (frāswa' dāks' du la shĕz'), 1624 1709, French Jesuit, confessor of Louis XIV after 1675 His influence at court was considerable The great cemetery in NE Paris called Père-Lachaise is named for him

Lachaise, Gaston (lushāz'), 1882–1945, American sculptor, b Paris, son of a cabinetmaker He studied at the École Bernard Palissy and at the Académie des Beaux-Arts, where he remained several years Despite academic successes he left the academy in 1904 at the instigation of Isabel Nagel, an American girl who later became his wife He worked for a year for René Lalique, successful designer of glass and jewelry, and in 1906 came to America For 12 years he worked in Boston and New York, chiefly for the sculptors H H Kitson and Paul Manship, who employed him to execute details on some of their commissions Meanwhile he evolved his own very original style and held his first exhibition in 1918 After that he was largely independent but never scorned decorative tasks or portraits working for many private patrons He also made admirable decorations in New York for the Telephone and Telegraph Building, the RCA Building, and the International Building at Rockefeller Center Perhaps his most famous works however, are single figures, such as his *Standing Woman* (J Dunbar Coll , New York), in which the figure is handled freely as a motif through which he expresses his highly contemporary feeling for life His philosophy has been described as one of maturity, acceptance, and affirmation Only by dint of an extraordinary command over his varied materials was Lachaise able to reach his audience He is represented in the Whitney Museum and the Museum of Modern Art, New York See monograph by Lincoln Kirstein (1935)

Lachesis see FATES

Lachine (lushēn'), city (pop 20,051), S Que , on Montreal island, at the east end of Lake St Louis, just SW of Montreal Its industries include iron and steel foundries and the manufacture of tires, wire, and tiles First settled in 1675, Lachine was the scene (1689) of a massacre by the Iroquois The city is the southwest terminal of the **Lachine Canal**, connecting Lake St Louis with the St Lawrence at Montreal, begun in 1821 (rebuilt 1843) to by-pass the Lachine Rapids of the St Lawrence, 3 mi long, with a drop of 42 ft The canal has five locks and carries a heavy volume of shipping

Lachish (lā'kĭsh), ancient city, S Palestine It was one of the Amorite cities allied against the Gibeonites and destroyed by Joshua Rehoboam fortified it, and there Amaziah was murdered It was besieged by Sennacherib, and later Micah denounced it Joshua 10, 15 39, 2 Kings 14 19, 18 14,17, 19 8, 2 Chron 11 9, Neh 11 30 Micah 1 13 It has been identified with TELL AD-DUWEIR

Lachute (lushōōt'), town (pop 5,310), SW Que , on the North River and W of Montreal It has woolen and paper mills, lumbering, and dairying

Lackawanna (lăkuwa'nû), city (pop 24,058), W N Y , on Lake Erie just S of Buffalo, inc. 1909 There are large steel mills, and cement and concrete products are made. The basilica and charitable institutions of Our Lady of Victory are here.

Lackawanna, river, 50 mi long, rising in NE Pennsylvania and flowing generally south-southwest to join the Susquehanna near Pittston It passes through the chief anthracite region of the state, its banks being lined with cities almost entirely dependent on coal mining and allied industries—Scranton, Dunmore, Dickson City, Carbondale.

Laclede, Pierre (pyĕr' läklĕd'), c 1724–1778, French pioneer in the United States. He came to New Orleans in 1755 and was a member of the fur-trading firm that received (1762) a monopoly of the fur trade of the Missouri region He and young René Auguste CHOUTEAU were leaders of the party to found a post near the French settlements on the east bank of the Mississippi Because that region was transferred to Great Britain in 1763, a site on the west bank was chosen where a post was started in 1764 This was the beginning of the city of St. Louis Laclede is also called Laclede Liguest

Laclos, Pierre Ambroise François Choderlos de (pyĕr' äbrōzĕz' frăswa' shôdĕrlō' du läklō'), 1741–1803, French novelist and general, known as Choderlos de Laclos He is best known for *Les Liaisons dangereuses* (1782, Eng trs, *Dangerous Connections*, 1784, and *Dangerous Acquaintances*, 1924, by Richard Aldington), a savage novel of manners contrasting with the vogue for high moral tone established by Jean Jacques Rousseau He was the author also of *Poésies fugitives* (1782) and collaborated on *Galerie des États Généreaux* (1789) Laclos commanded troops both under the Directory and under Napoleon

Lac Mégantic, Que see MÉGANTIC

Lacombe, Albert (älbĕr' läkôb'), 1827–1916, French Canadian Roman Catholic missionary He studied at Assomption College in Quebec prov before he joined the Oblate order and was ordained (1849) Lacombe was one of the first Roman Catholic missionaries sent (1850) to the Canadian Northwest There he served the Indians and was known as the Apostle of the Cree and the Blackfoot He translated the New Testament into Cree and also wrote a grammar (1874) and dictionary (1874) of the Cree language See biography by Katherine Hughes (1911)

Lacombe (läkôm'), town (pop 1,808), S central Alta, S of Edmonton and on the Red Deer and Blindman rivers, in a ranch and mixed farming area A dominion government experimental farm is here

Lacon (lā'kŭn), city (pop 1,627), co seat of Marshall co, N central Ill, on the Illinois river above Peoria, in a grain region, laid out 1826, inc 1839

La Condamine, Charles Marie de (sharl' mărē' du la kôdămēn'), 1701–74, French traveler and mathematical geographer He was one of a group sent to Peru in 1735 to measure the length of an arc of one degree of the meridian at the equator While in South America he made the first scientific exploration of the Amazon region His journal was published in 1751

Laconia (lŭkō'nēŭ) or **Lacedaemon** (läsudē'mun), ancient region, S Peloponnesus, Greece, bounded on the west by Messenia and on the north by Arcadia and Argolis On the Eurotas, the principal river, stood SPARTA, the capital There were approximately 100 towns in the region Laconia or Lakonia is today a nome of Greece

Laconia, city (pop 13,484), co seat of Belknap co, central N H, N of Concord and on the Winnipesaukee river, inc as a town 1855, as a city 1893 It is the industrial and trade center of a resort region of lakes and rivers, with hosiery mills and manufacture of metal castings, knitting machines, and wood and paper products North of the city are the suburbs Lakeport, headquarters of the U S mail boat on Lake Winnipesaukee, and The Weirs, a resort Laconia's broadcasting station was the first in the state An international dog-sled derby is held here annually

Lacordaire, Jean Baptiste Henri (zhäN' batēst' ārē' läkôrdĕr'), 1802–61, French Roman Catholic preacher and liberal He was ordained (1827) and came under the influence of LAMENNAIS and collaborated with him on *Avenir*, a journal to support ultramontanism and absolute liberty for the Church in the state After papal condemnation of the journal Lacordaire retired with Lamennais and then submitted He returned to Paris to preach at Notre Dame and became known as one of the greatest of Catholic preachers In his sermons, the literary and social sensation of the day, he never ceased to praise liberalism, although less extremely than before He entered the Dominican order in 1840 He greeted the Revolution of 1848 with joy and sat for a while as a deputy The coup d'état of Napoleon III sent him into voluntary exile, after he had attacked the government unsparingly In 1861 he was elected to the French Academy Father Lacordaire is said by his preaching to have converted countless souls See M V Woodgate, *Père Lacordaire, Leader of Youth* (1939)

Lacoste, René (runā' läkôst'), 1905–, French tennis player He first learned tennis in 1919 in England, and in a few years he was one of the top players in France He won the British singles championship (1925, 1928) and the U S. singles championship (1926, 1927). He was a member of the French team that won the Davis Cup in 1927, and until 1929 he helped defend the trophy for France. He is the author of *Lacoste on Tennis* (1928).

lacquer (läk'kŭr), a solution of film-forming materials, either natural resins or synthetic, usually applied as a coating, transparent or pigmented Quick-drying synthetic lacquers, commonly made from a cellulose base dissolved in a volatile organic solvent, are used to coat automobiles, furniture, textiles, paper, cables, and metalware The formula may be varied to impart durability, hardness, waterproofness, gloss, or adherence or to reduce brittleness Nitrocellulose (pyroxylin) lacquers are the most widely employed The slower-drying natural lacquers are oleoresins obtained from the juice of trees, especially of *Rhus vernicifera*, a sumac of SE Asia Lacquer work was one of the earliest industrial arts of the Orient It was highly developed in India, the Chinese inlaid it with ivory, jade, coral, or abalone and were unrivaled in making articles carved from lacquer The art spread to Korea, then to Japan, where it attained new expressions, as in gold lacquer Fine Oriental ware may have over 30 coats, each coat is dried and smoothed with a whetstone The ware may be decorated in color, gold, or silver and enhanced by modeled reliefs, engraving, or carving Buddhist monasteries encouraged the art and now preserve some of the oldest pieces extant, the temple of Horyu-ji, near Nara, Japan, possesses a Chinese-made sword scabbard of the 8th cent Notable lacquer artists include Ogata Korin (17th cent) and Shibata Yeshin (19th cent) In the 17th cent, Western European imitations were popularized as JAPANNING and carried to great perfection in France in the VERNIS MARTIN developed by the Martin brothers under Louis XV Commercial work of the 19th cent brought a decline in artistic merit See E F Strange, *Catalogue of Japanese Lacquer in the Victoria and Albert Museum* (1924) and *Chinese Lacquer* (1926), J J Mattiello, ed, *Protective and Decorative Coatings*, Vols I and III (1941)

La Crosse (lu krôs) **1** City (pop 1,407), co seat of Rush co, W central Kansas, NW of Great Bend, in an oil and natural-gas region, founded 1876, inc 1886 **2** City (pop 42,707), co seat of La Crosse co, W Wis, at the foot of high bluffs on the Mississippi, where the Black and La Crosse rivers enter, in a dairy area, inc 1856 A French fur-trading post was here in the late 18th cent Later the city had a thriving lumber industry, which in turn gave way to numerous manufactures (air-conditioning systems, rubber footwear, brewery products, and farm implements) La Crosse is the seat of a state teachers college and a Catholic normal school Points of interest are Riverside Park, containing a U S fish hatchery, Myrick Park, with a zoo and an Indian mound, and Grandad Bluff, the city's highest crag

lacrosse (lukrôs'), national sport of Canada played by two teams of 10 players each—goalkeeper, point, cover point, first defense, second defense, center, first attack, second attack, inside home, and outside home The rectangular, grass-covered playing field is 60 to 70 yd wide by 110 yd long Two goals face each other 80 yd apart, each goal, square (6 ft x 6 ft) at the mouth, tapers off for 7 ft A facing-off circle, 10 ft in radius at the center of the field, is the area of initial play The ball, 7¾ to 8 in in circumference and 5 to 5¼ oz in weight, is made of sponge rubber The stick, or crosse—from which the game gets its name because of its resemblance to a bishop's crosier—consists of a handle and an adjustable, pocketlike, meshwork head in which the ball is received, carried, and passed Teams direct their play toward advancing the ball so that it can be hurled with the crosse or kicked into the opponent's goal (each goal counting one point) and toward defending their own goal The team scoring the most points wins Only the goalkeeper may touch the ball with his hands, and no field man may enter the crease (the 18 ft x 12 ft area surrounding the goal) Much physical contact is permitted, but personal and technical fouls are penalized by disqualification or by temporary suspensions, thus leaving the team with a player handicap A referee and a judge are the officials A game is divided into four quarters of 15 min each, and overtime periods of 1 min each are played in the event of a tie The game was developed, without many fixed rules, by North American Indians on open fields and was played in a battering, rough-and-tumble manner It was adopted and named lacrosse by French settlers in Canada, and it became increasingly popular By 1856 the Montreal Lacrosse Club was organized, and by 1860 the rules of the game were standardized After the Canadian Parliament adopted (1867) lacrosse as the national game of Canada, the National Lacrosse Association (now the Canadian Lacrosse Association) was established as the governing body of the sport Lacrosse has enjoyed wide following as a sport for amateurs since that time, and the game was played professionally in Canada by 12-man teams between 1920 and 1932. In the 1930s "box lacrosse"—played by teams of seven on a smaller and usually indoor field—was introduced. Meanwhile, lacrosse gained a following after the 1880s in the United States—particularly in the North Atlantic states—and today it is played, under the supervision of the U.S. Intercollegiate Lacrosse Association, in many colleges in the NE United States. From time to time the number of players on lacrosse teams has fluctuated; today a woman's lacrosse team is composed of 12 players. See Tad Stanwick, *Lacrosse* (1940)

La Cruz, Ramón de: see CRUZ, RAMÓN DE LA.

Lactantius, Lucius Caelius Firmianus (lŏk'shus sē'lĭŭs fûrmē'ănŭs läktăn'shus), c 260–340, Christian author and apologist, b. Africa, where he studied Latin rhetoric and literature He taught rhetoric at Diocletian's school in Nicomedia and was converted to Christianity Later (c 316) he was Latin tutor at Trier to Crispus, Constantine's son His works, which were influenced by Cicero and Seneca, were sincere, well-written expositions of Christian doctrine, but erroneous in theological details Such were *The Divine Institutions* (*Divinae institutiones*), the *Epitome*, and *On God's Wrath* (*De ira Dei*) *On the Death of the Persecutors* (*De mortibus persecutorum*), telling of the horrible end of such anti-Christian emperors as Nero, Domitian, and Decius, was very popular in the Middle Ages The poem *On the Phoenix* (*De ave phoenice*), a source of Cynewulf's *Christ*, may possibly have been by Lactantius

lactic acid, organic acid, a colorless, liquid compound of carbon, hydrogen, and oxygen It occurs in three forms, differing in their effect on polarized light—dextro- or d-lactic acid, levo- or l-lactic acid, and the optically inactive or ordinary form The ordinary acid is present in sour milk and in kumiss, causing the sour taste and being formed by the fermentation of the milk sugar, lactose The acid is formed in animals as a result of muscular activity, and some thus formed is changed back to glycogen It is miscible with water and alcohol in all proportions For commercial and industrial purposes lactic acid is usually prepared by bacterial fermentation of glucose The acid and some of its salts are used in medicine Calcium lactate, for example, a soluble salt, is used as a source of calcium for the human system The commercial acid is used in tanning and dyeing

lactose (läk'tōs) **or milk sugar,** white, crystalline, not as sweet as sucrose (cane sugar), occurring in the milk of mammals, in the cells of the mammary glands, and sometimes in the urine during pregnancy It is not found in plants Chemically, it is a CARBOHYDRATE, a disaccharide with a molecule consisting of the same number of atoms of carbon (12), hydrogen (22), and oxygen (11) as sucrose and maltose, but differing from both in structure It yields, on hydrolysis, the sugars d-glucose and d-galactose, which are also produced from lactose by the action of the enzyme lactase, and it yields LACTIC ACID on fermentation by certain bacteria, although it is not affected by ordinary yeast It reacts with Fehling's solution It is important in the diet of the young of mammals Commercially it is produced from the lactose in the whey of cow's milk

La Cueva, Juan de. see CUEVA, JUAN DE LA

Ladd, Edwin Fremont, 1859–1925, American chemist and political leader, b Somerset co, Maine, grad. Univ of Maine, 1884 From 1890 to 1916 he was dean of the school of chemistry and pharmacy at the North Dakota Agricultural College and later (1916–21) was president of the college He served (1902–21) as food commissioner of North Dakota, his campaign against adulterated food products and his efforts to protect the farmers from speculators and distributors brought him national prominence With the support of the NONPARTISAN LEAGUE, he was elected (1920) to the U S Senate and thereafter was associated with the farm bloc He advocated recognition of the USSR and visited that country in 1923 He supported Robert M La Follette for President in 1924 and was read out of the Republican party

Ladd, George Trumbull, 1842–1921, American philosopher, b Painesville, Ohio, grad Western Reserve Univ, 1864, and Andover Theological Seminary, 1869 He taught at Yale from 1881 until his retirement in 1906 Much influenced by Lotze and the German philosophers, he was one of the first to introduce experimental psychology into America, being the founder of the psychology laboratory at Yale Among the writings of Ladd are *Elements of Physiological Psychology* (1887, rev ed, 1911), *Philosophy of Mind* (1895), and *Knowledge, Life, and Reality* (1909).

Ladd, William, 1778–1841, American peace advocate, b Exeter, N H, grad Harvard, 1797 He commanded sailing vessels until the outbreak of the War of 1812, when he retired to a farm in Maine. In 1820 he began to write and speak against war and in 1828 founded the American Peace Society, of which he was president until his death He wrote *An Essay on a Congress of Nations* (1840, ed with introduction by James Brown Scott, 1916), which contained a concrete plan for a world organization involving both a congress of nations and a court of nations In popularizing this plan, Ladd had the help of Elihu BURRITT, who carried on his work. See M E Curti, *The American Peace Crusade, 1815–1860* (1929); biography by Georg Schwarzenberger (1935).

Ladd, village (pop. 1,156), N Ill., NW of La Salle, in a farm area; inc. 1890.

Ladd-Franklin, Christine, 1847–1930, American scientist, b. Windsor, Conn., grad. Vassar, 1869.

She was the first woman student to enter Johns Hopkins (1878), her special studies being directed toward logic and the theory of color In 1882 she married Fabian Franklin, mathematician and editor She studied in Göttingen (1891–92) and worked in Helmholtz's laboratory, evolving from her studies of the theories of Ewald Hering and Helmholtz the theory of color vision which bears her name and which is described in *Colour and Colour Theories* (1929), a collection of her papers

Ladies' Peace see CAMBRAI, TREATY OF

Ladislas. For rulers thus named, see LADISLAUS, LANCELOT, ULADISLAUS

Ladislaus I, king of Bohemia· see LADISLAUS V, king of Hungary

Ladislaus II, king of Bohemia see ULADISLAUS II, king of Hungary

Ladislaus I or **Saint Ladislaus,** Hung *László I,* 1040–95, king of Hungary (1077–95). At the invitation of his sister, the widowed queen of Croatia, he invaded and conquered that country in 1091 He successfully fought the CUMANS, compelling those whose lives he spared to turn Christian and to settle in designated regions He supported Pope Gregory VII against Emperor Henry IV, but rejected Gregory's suggestion that he swear fealty to the papacy He modified the Hungarian criminal code and issued laws safeguarding private property In Hungarian tradition he is the model of chivalry and valor He secured the canonization of St Stephen, and he was canonized himself in 1108 Feast June 27

Ladislaus IV, Hung *László IV,* 1262 90, king of Hungary (1272–90), son and successor of Stephen V His mother was a Cuman, and Ladislaus became unpopular by adopting Cuman customs and surrounding himself with Cuman followers During his reign Hungary fell into anarchy, the great landowners seizing power and the lower classes forming leagues for protection against them There were several revolts against the king, who was finally slain by the Cumans He died heirless, his successor, Andrew III (1290–1301), who issued from another branch of the Arpad dynasty, was succeeded as king of Hungary by King Wenceslaus III of Bohemia

Ladislaus V or **Ladislaus Posthumus** (pos'chōōmus), Hung *László V,* 1440–57, king of Hungary (1444–57) and, as Ladislaus I, king of Bohemia (1452–57), posthumous son of the German king, ALBERT II Ladislaus was duke of Austria by birth, was claimed as king by the majority of the Bohemian diet, and was elected king of Hungary at the death (1444) of LADISLAUS III of Poland who after 1440 had ruled Hungary as Uladislaus I However, his guardian, Emperor FREDERICK III at whose court Ladislaus Posthumus grew up, refused to surrender the boy to Austria or to Hungary or to Bohemia In 1451 the Austrians rebelled and demanded that Frederick return their young duke, this was done in 1452 In 1453 Ladislaus was crowned king of Bohemia and entered Hungary He governed neither realm however, GEORGE OF PODEBRAD was regent in Bohemia John HUNYADI in Hungary After the death (1456) of Hunyadi, Ulrich Cillei, a powerful magnate under whose influence the king had come, became regent Cillei was murdered in 1457, and the king procured the assassination of Ladislaus Hunyadi, John's son, whom he suspected of the crime He then fled to Prague, where he died of the plague He was succeeded in Austria by his Hapsburg relatives, in Bohemia by George of Podebiad, and in Hungary by MATTHIAS CORVINUS

Ladislaus, king of Naples see LANCELOT

Ladislaus I, Pol *Władysław Łokietek* [the short], 1260–1333, Polish ruler (1306–33), crowned king in 1320 He restored the Polish kingdom partitioned since 1138 (see PIAST), but lost Pomerania to the Teutonic Knights His son and successor was Casimir III

Ladislaus II or **Ladislaus Jagiello** (yägyĕ'lō), 1350?–1434, king of Poland (1386–1434), grand duke of Lithuania (1377–86), founder of the JAGIELLO dynasty. He acceded to the Polish throne by marrying Queen JADWIGA, was baptized, and converted Lithuania to Christianity The resulting union of the two nations, Jagiello's victory over the Teutonic Knights at Tannenberg (1410), and the First Peace of TORUN (1411) were the main events of his reign His son, Ladislaus III, succeeded him

Ladislaus III, 1424–44, king of Poland (1434–44) and, as Uladislaus I, king of Hungary (1440–44), son of Ladislaus II and Jadwiga of Poland and grandson of Louis I of Hungary He led two crusades against the Turks, the first (1443) was highly successful, but the second ended in his defeat and death at the battle of Varna

Ladislaus IV, 1595–1648, king of Poland (1632–48), son and successor of SIGISMUND III His reign was marked by struggles with his subjects and wars with the Swedes, the Russians, and the Turks Ladislaus in the later years vainly sought to establish his authority against that of the nobles The Chmielnicki revolt broke out and was unsettled at his death He was succeeded by his brother, JOHN II (John Casimir)

Ladislaus Herman, 1043–1102, king of Poland (1079–1102); brother of BOLESLAUS II His reign was marked by weakness At his death the kingdom was divided between his two sons (see BOLESLAUS III)

Ladoga, Lake (la'dōgŭ, Rus lä'dŭgŭ), Finnish *Laatokka* (lä'tôk-ku), Rus *Ladozhskoye Ozero* (lä'dŭzhskŭyŭ ô'zyĭrŭ), lake, area c.7,000 sq mi, S Karelo-Finnish SSR and NW European RSFSR, in Karelia, NE of Leningrad The largest lake in Europe, it is 130 mi long and 80 mi wide and has a maximum depth of 732 ft Its shores are low and marshy in the south, rocky and indented in the north The lake is subject to autumn storms and freezes every year for two months in the north and four months in the south, navigation is difficult Chief among the many rivers that feed the lake are the Svir, descending from Lake Onega; the Vuoksi, which forms the outlet of the Saima lake system of Finland, and the Volkhov, coming from Lake Ilmen The main outlet is the Neva, which flows W into the Gulf of Finland Schlüsselburg (now Petrokrepost) commands the Neva exit Among the many islands in the northern part of the lake is that of Valaam (Finnish *Valama* or *Valamo*), with a famous Russian monastery dating from the 12th cent or earlier Until the Finnish-Russian War of 1939–40, the northern part of the lake belonged to Finland, cession of the Finnish shore to the USSR was confirmed by the peace treaty of 1947 During the defense of Leningrad against the Germans in the Second World War, the frozen Lake Ladoga was the lifeline by which Leningrad was supplied in the winters from 1941 to 1943 Because of the difficulties of navigation, the southern shore of Lake Ladoga is paralleled by the

Ladoga Canals, 100 mi long, connecting the Svir and Neva rivers and forming part of the MARIINSK SYSTEM and the Baltic-White Sea Canal System

Ladonia, town (pop 1,279), NE Texas, NE of Dallas, in a farm area

Ladrones Islands see MARIANAS ISLANDS

Ladue (lədōō', -dū'), city (pop 3,981), E Mo, near St Louis, inc as a town 1928 as a city 1936

ladybird or **ladybug,** member of a widely distributed family of beetles, the Coccinellidae The ladybird is oval or round and nearly hemispherical, usually reddish or yellow spotted with black or black spotted with red or yellow Both the adult and the larva of most species feed chiefly on aphids, scale insects, and other injurious insects One of the imported species is the Australian ladybird, which devours the cottony-cushion scale, a threat to the citrus fruit crops There are two injurious herbivorous species, the Mexican bean beetle, which has spread through the E United States and N to Canada, and the squash beetle, which eats leaves of squash, pumpkin, and related plants

Lady Day or **Annunciation** see MARY

Lady Margaret Hall see OXFORD UNIVERSITY

Lady of the Lake, a vague figure, endowed with magical powers, who gave the sword Excalibur to King Arthur According to one story she inhabited a miragelike castle on an island in a wonderful lake She has been identified variously with Morgan le Fay and Vivien See ARTHURIAN LEGEND The poem *The Lady of the Lake,* by Sir Walter Scott, is a completely different romantic story

Ladysmith (lā'dĭsmĭth), town (pop 1,706), on SE Vancouver Island, SW British Columbia, on an inlet of the Strait of Georgia SSE of Nanaimo Its industries include coal mining and oyster culture

Ladysmith, town (pop 14 083), N Natal prov, Union of South Africa It was named for the wife of the colonial governor Sir Harry Smith a Spanish woman whom he rescued in the Peninsular War Sir George White's British forces were besieged here (1899–1900) by the Boers under Petrus Joubert There are light industries The population includes 4,970 Europeans

Ladysmith, city (pop 3,671), co seat of Rusk co, N Wis, NNE of Eau Claire and on the Flambeau, in a lake and woods region, inc 1905 Woodworking and canning are done

lady's-slipper or **moccasin flower,** handsome wild flower of the genus *Cypripedium* of the orchid family, represented in nearly 30 species, about 10 of which are native to North America Among those of North America are white-, yellow-, and pink-flowered forms Both the stemless lady's-slipper (*Cypripedium acaule*) and the showy lady's-slipper (*C spectabile* or *C reginae*), which is the floral emblem of Minnesota, have pink flowers The flowers appeared in Indian ceremonial rites One of the easiest of the native orchids to grow in the garden is the yellow lady's-slipper (*C pubescens*) The roots of this species as well as those of the small yellow lady's-slipper (*C parviflorum*) have been used medicinally The name lady's-slipper is sometimes applied to garden balsam or impatiens

Lae (la'ā, lī), town, on E New Guinea, in the Morobe dist, Territory of New Guinea, on Huon Gulf It was founded in 1927 to serve air transport lines into near-by gold fields In the Second World War it was occupied in 1942 by the Japanese and regained in 1943 by Allied forces

Laeken, Belgium see LAKEN.

Lael (lā'ĕl), father of a Gershonite Num 3 24.

Laelius, Caius (kā'yus lē'lĭŭs), d. c.165 B C, Roman general, consul in 190 B C. He was the intimate friend and companion of SCIPIO AFRICANUS MAJOR from youth, and he was with him in campaigns, always holding commands under his friend His son **Caius Laelius Sapiens** (sā'pēuns), b c 186 B C, consul in 140 B C, was famous for his friendship with Scipio Africanus Minor Cicero named one of his great works *Laelius, sive, De amicitia* [Laelius, or, on friendship]

Laënnec, René Théophile Hyacinthe (runā' tāôfēl' yasĭnt lāānĕk'), 1781–1826, French physician While connected with the Necker Hospital in Paris he invented the stethoscope, which he described in his book (1819), and devised the method of auscultation for diagnosis of diseases of the chest, which, with the percussion method of Leopold Auenbrugger, established the modern technique See study by Nolie Mumey (1932)

Laer, Pieter van see LAAR, PIETER VAN

Laertes (lāûr'tēz), in Greek mythology, king of Ithaca He was the father of Odysseus and helped to kill Penelope's suitors when Odysseus returned from his adventures Laertes was one of the ARGONAUT heroes, and he also took part in the CALYDONIAN HUNT

Laértius, Diogenes see DIOGENES LAËRTIUS

Laessle, Albert (lĕs'lē), 1877–, American sculptor, b Philadelphia He studied at the Pennsylvania Academy of the Fine Arts, where he later taught (1919–39) His bronzes present animal life with grotesque and droll humor In the parks of Philadelphia are *Billy* (a goat) and two bronze penguins Other works are *Chanticleer, Turtle and Lizards,* and *Blue-eyed Lizard* (all Pa Acad of the Fine Arts) and *Victory* (an eagle) and *Turning Turtle* (both Metropolitan Mus)

Laetare (lāta'rā) [Latin,=rejoice], in the Roman Catholic Church, the name of the fourth Sunday in Lent, so called from the first word of the introit On Laetare Sunday the Golden Rose is blessed, this is a gift from the pope to a sovereign or other person or to a city, a kingdom or the like, given in appreciation of service to the Church An analogous custom is the annual award by the Univ of Notre Dame of the Laetare medal to a leading American Catholic layman

La Farge, John (lu färzh'), 1835–1910, American artist, writer, and worker in stained glass, b New York city, studied with William Morris Hunt in Newport, R I, and Couture in Paris He began as a painter of landscapes and figure compositions, but in 1876 was commissioned to decorate Trinity Church Boston, and thereafter devoted himself primarily to mural painting and the manufacture and design of stained glass For his achievements in this latter field he received the insignia of the Legion of Honor from the French government An eclectic artist and a man of the widest culture, friend of Henry Adams and Henry James, La Farge did much to create a sound tradition of the fine arts in America. His murals in Trinity Church and the Church of the Ascension, New York, set a standard for the art unsurpassed in the United States A lifelong Catholic, he did much of his best work for churches He invented opaline glass, and his splendid windows may be admired in the churches of Buffalo, N Y, and Worcester, Mass, and the chapels of Harvard and Columbia universities La Farge worked in many media His water colors and drawings are well known, particularly those commemorating his visit to the South Seas in 1890 His easel paintings are in many leading American museums His writings and lectures on art are distinguished for their urbanity, balanced judgment and admirable style Among them are *Considerations on Painting* (1895), *An Artist's Letters from Japan* (1897), *The Higher Life in Art* (1908), and *Reminiscences of the South Seas* (1912) See study by Royal Cortissoz (1911)

La Farge, Oliver (lu färzh'), 1901–, American writer and anthropologist, b New York city, grad Harvard (B A, 1924, M A, 1929) He conducted three archaeological expeditions to Arizona and two ethnological expeditions to Guatemala and one to Mexico He uses his field experience and knowledge to authenticate his reflective stories of Indian habit and character *Laughing Boy* (1929), a novel of Navaho life, won the Pulitzer Prize in 1929 Other works are *The Sparks Fly Upward* (1931), *The Enemy Gods* (1937), and the stories *All the Young Men* (1935) See his autobiographical *Raw Material* (1945)

Lafargue, Paul (pôl' lăfarg'), 1842–1911, French socialist, b Cuba, son-in-law of Karl Marx With Jules Guesde he helped found a Marxist socialist party in France His many writings, which were influential in other countries, include *The Religion of Capital* (1887, Eng tr, 1894) and *The Evolution of Property from Savagery to Civilization* (1891; Eng tr, 1894)

Lafayette or **La Fayette, Marie Joseph Paul Yves Roch Gilbert du Motier, marquis de** (marē' shōsĕf' pôl' ēv' rôk zhēlbĕr' du môtyā' märkē' dŭ läfāĕt'), 1757–1834, French general and statesman He was born of a distinguished family and early entered the army Enthusiastic over the news of the American Revolution, he evaded all obstacles laid in his way by the officially neutral French government and left France to join George Washington's army He arrived (1777) in Philadelphia, where Congress

appointed him a major general He quickly won the close friendship of Washington, was wounded at Brandywine (1777), shared the hardships of Valley Forge, and obtained a divisional command After a trip to France (1779–80), where he negotiated for French aid, he distinguished himself in the YORKTOWN CAMPAIGN. Returning to France in 1781, Lafayette later became active in the French Revolution, was elected vice president of the National Assembly, and was acclaimed commander of the National Guard the day after the fall of the Bastille (July, 1789) In this key position he sought to exploit his immense popularity and to maintain order by acting as moderator between the contending factions However, his fear of civil war, his lack of a positive program, and the hostility of the court prevented him from stemming the mounting tide of mob rule He took command (1791) of the "army of the center," formed in preparation for war against Austria After a brief visit to Paris (June, 1792), when he vainly attempted to save the monarchy, he returned to the front, but could not bring himself to turn his army against the republican factions While he wavered, the extremists seized the power in Paris Lafayette left his army, fled across the border (Aug 19, 1792), and was captured and imprisoned in Austria Liberated (1797) by Napoleon, he returned to France (1799), where he lived in retirement during the First Empire In 1824–25 he visited the United States, where he was given an unparalleled welcome A consistent liberal, Lafayette took part in the July Revolution (1830) as a leader of the moderates His unswerving courage, integrity, and idealism have made him a popular symbol of the bond between France and the United States His direct descendants, the Chambrun family, are honorary U. S. citizens The modern French flag was created by Lafayette in July, 1789, by combining the royal white with the blue and red of Paris See biographies by Brand Whitlock (1929), Bayard Tuckerman (1889), Charlemagne Tower (2 vols, 1895), Joseph Delteil (Eng tr, 1928), and Louis Gottschalk (4 vols, 1935–50) See also S W. Jackson, *La Fayette a Bibliography* (1930)

La Fayette, Marie Madeleine Pioche de la Vergne comtesse de (märē' madulĕn' pôsh' du la vĕr'nyu, kôtĕs'), 1634–92, French novelist of the classical period, whose chief, and only living, work, *La Princesse de Clèves* (1678), is the first great French novel The psychological realism of this story of a woman's renunciation of an illicit love, treated as it is with chaste simplicity and quiet wit, has given the novel universal appeal Mme de la Fayette's friendship with the duc de LA ROCHEFOUCAULD has given credence but no credibility to the theory that he appears in her novel as the unhappy lover

LaFayette (lufā'ĭt), city (pop 3,509), co seat of Walker co, extreme NW Ga, S of Chattanooga, Tenn, founded 1835 It is a farm trade center, with some industries The arrival of the railroad in 1888 stimulated La Fayette's growth During the Civil War several skirmishes took place here

Lafayette. 1 (lufā'ĭt) City (pop 2,138), co seat of Chambers co, E Ala, near the Ga line NE of Montgomery, in a cotton area, settled 1883 It has textile mills **2** (lā''fēĕt') Town (pop 2,052), N central Colo, NNW of Denver, in a coal and farm area, inc 1890 **3** (lā''fēĕt') City (pop 28,798), co seat of Tippecanoe co, W Ind, on the Wabash and NW of Indianapolis, settled 1825, inc 1853 Lafayette is a market for grain and livestock and a coal-mining center, and its manufactures include rubber products and automobile gears PURDUE UNIVERSITY is here The battle of TIPPECANOE was fought at Battle Ground just north of the city in Nov, 1811 There is a monument on the site of an important Indian trading post 7 mi west of the city **4** (lā''fēĕt') City (pop 19,210), parish seat of Lafayette parish, S La, on the Vermilion river N of Vermilion Bay It was laid out c 1824 by Acadians, who called it Vermilionville First incorporated in 1836, it was reincorporated in 1869 and renamed in 1884, in 1914 it was incorporated as a city with a commission government The shipping and commercial center for a rich area producing sugar, rice, cotton, livestock, dairy products, oil, salt, and sulphur, Lafayette has also railroad shops, sugar refineries, canneries, and cotton gins Besides historic landmarks, there is a Roman Catholic cathedral, a Carmelite monastery, and Southwestern Louisiana Institute (coeducational, 1898)

Lafayette, Mount, peak, 5,249 ft. high, N N H, highest peak of the Franconia range.

Lafayette College see EASTON, Pa

Lafayette Escadrille (ĕskûdrĭl'), group of American volunteer aviators in the First World War, created (April, 1916) as Escadrille Americaine in the French air service It was renamed the Lafayette Escadrille in December of the same year, and the outfit saw much front-line action and heavy casualties In Jan, 1918, the Lafayette Escadrille was reorganized in the U S army as the 103d Pursuit squadron. See E C. Parsons, *The Great Adventure* (1937)

La Feria (lä fĕr'ēä), city (pop 1,644), extreme S Texas, NW of Brownsville, in the irrigated area of the lower RIO GRANDE valley

Laffan, William Mackay (mă'kē lă'fŭn), 1848–1909, American journalist and art expert, b Ireland He became city editor of the San Francisco *Chronicle* and, later, managing editor of the *Bulletin* He was connected (1870–77) with the Baltimore *Daily Bulletin*, becoming its owner and editor Next he joined the staff of the New York *Sun*, of which, in 1902, he became the owner Though not editor, he closely supervised all departments and frequently wrote editorials His illustrations had been a feature of his newspaper work since San Francisco days, and his *Engravings on Wood* was published in 1887 As a trustee of the Metropolitan Museum he took an important part in its development Noted for his wide knowledge of art, he was J P Morgan's chief adviser in assembling his art collections Laffan wrote *Oriental Ceramic Art* (1897).

Laffite, Jean (zhä' lăfēt'), c 1780–c 1825, leader of a band of privateersmen and smugglers The name is more commonly spelled Lafitte He and his men operated first off the Barataria coast S of New Orleans and, after 1817, from the island site of the present city of Galveston, Texas His ships preyed on Spanish commerce, the booty being brought from Barataria through bayous to New Orleans, where it was disposed of chiefly through the agency of Pierre Laffite, a brother A naval force in Sept, 1814, raided their establishment at Barataria and their ships Laffite, a few days before, had refused a British offer of £30,000 and a commission in the royal navy if he would aid the British in their attempt on New Orleans Instead Laffite turned his information over to the Americans and offered his services to them in return for the pardon of his men Jackson accepted their help and many of the Barataria participated with credit in the battle of New Orleans and were subsequently pardoned by President Madison Laffite returned to his old life, moving his base of operations to the disputed Texas area, where he gathered about him almost a thousand followers He was unmolested until several members of his colony attacked American property, whereupon the U S government again dispatched a naval force against him Laffite with his closest followers departed peaceably in a favorite vessel His final end is not certainly known In his lifetime he was a romantic figure, and after his death legend heightened his fame See Lyle Saxon, *Lafitte the Pirate* (1930)

Laffitte, Jacques (zhak' lăfēt'), 1767–1844, French banker and politician He rose from a boyhood of poverty to become one of the wealthiest and most influential men in France He was governor of the Bank of France (1814–19), but his interests were injured in the reign of CHARLES X by the indemnity laws passed in favor of the émigrés Thrown into the opposition, he brought all his influence to bear and, particularly by encouraging journalists such as Thiers, helped to effect the JULY REVOLUTION of 1830 and to put Louis Philippe on the throne He was made premier by the new king, but his policy failed to satisfy any of the parties and he resigned in 1831 By then he had lost most of his fortune

Lafitte, Jean see LAFFITE, JEAN

La Flesche, Francis (lu flĕsh'), c 1860–1932, American ethnologist, born on the Omaha Reservation, Nebr, grad National Univ, Washington, D C (LL B, 1892) La Flesche, of Indian ancestry, was educated at the Presbyterian Mission School of Bellevue, Nebr He was appointed (1881) clerk in the Bureau of Indian Affairs, Washington, and while there he obtained his degree from the National Univ In 1910 he was transferred to the Bureau of American Ethnology, where he remained until his retirement in 1929 La Flesche wrote *The Middle Five* (1900) and, in collaboration with Alice Fletcher, *The Omaha Tribe* (1907) His field studies of the Osage Indians are of some importance He was a brother of **Susette La Flesche**, 1854–1903, known as Bright Eyes, ardent advocate of Indian rights

La Follette, Robert Marion (lufŏl'ĭt), 1855–1925, American statesman, b Primrose, Dane co, Wis., grad Univ of Wisconsin, 1879 He studied law, was admitted (1880) to the bar, and practiced in Madison, Wis He was district attorney (1880–84) of Dane co, Wis, then for three terms (1885–91) the U S Representative, he helped draft the McKinley Tariff Act (1890) and generally followed traditional Republican party policies He returned to law practice, formulated a detailed reform program, and, appealing directly to the people of his state, built up a constituency which, independent of political parties, remained loyal to him for the remainder of his career Twice (1900, 1902) elected governor, he secured a direct primary law, tax-reform legislation, railroad-rate control, and other measures, collectively known as the Wisconsin Idea La Follette—crusading, courageous, and independent—was a member of the U.S Senate from 1906 until he died. He generally supported reform measures of the Wilson administration, championing Federal railroad regulation, sponsoring the act (1915) which elevated and regulated conditions of maritime employment, and advocating passage (1916) of the Seventeenth Amendment to the U S Constitution He broke with the Wilson administration, however, when he resisted the increasing tendency to side with the Allies; he led the resistance to arming merchant ships and voted against the U.S declaration of war. He afterwards supported war legislation, but made every effort to place the financial burden on the wealthy The legislature of his state censured him, and a movement to expel him from the Senate almost succeeded From 1919 to 1925 he was the leader of the group which held the balance of power in the Senate He opposed the League of Nations and the Permanent Court of International Justice (the World Court) and fought the U S post-war deflation policy In 1924 he ran for President on the PROGRESSIVE PARTY ticket, in losing he polled 5,000,000 votes The strain of the campaign sapped his strength, and he died the following summer. His wife, **Belle Case La Follette**, 1859–1931, b Juneau co, Wis, LL B. Univ of Wisconsin, 1885, actively worked for woman suffrage, engaged in journalism, and ably advised her husband throughout his life Their older son, **Robert Marion La Follette, Jr.**, 1895–, b Madison, Wis, assisted (1919–25) his father as secretary, then succeeded him to the U S Senate, and served there until 1947, when he was defeated in the Wisconsin primaries He too championed tax reform, he backed New Deal legislation until the passage of the 1938 naval expansion bill Another son, **Philip Fox La Follette**, 1897–, b Madison, Wis, LL B Univ of Wisconsin, 1922, served (1931–33, 1935–39) as governor of Wisconsin See the elder Robert La Follette's autobiography (1913), E N Doan, *The La Follettes and the Wisconsin Idea* (1947)

La Follette (lŭ fŏl'ĭt), city (pop 4,010), E Tenn, on Norris Lake and NNW of Knoxville, at the eastern base of the Cumberland Plateau, inc 1897 The city is a coal-mining center

La Fontaine, Henri (ärē' lăfōtĕn'), 1854–1943, Belgian jurist and statesman A senator from 1894 to 1936, he was a lifelong advocate of international cooperation, headed the International Peace Bureau from 1907 onward, and was awarded the 1913 Nobel Peace Prize He wrote extensively on international law

La Fontaine, Jean de (zhă' du), 1621–95, French poet, author of fables, b Chateau-Thierry, of a bourgeois family His adult life was passed mostly at Paris For 20 years from c 1673 he lived in the home of Mme de la Sablière Among his works are *Contes et nouvelles en vers* (1st ed, 1664), imitations in verse of Boccaccio and Ariosto, poems on classical themes, e g, *Adonis* (1669) and *Philémon et Baucis* (1684), and long, more original poems, notably the *Élégie aux nymphes de Vaux* (1671), a beautiful complaint written on the disgrace (1661) of Nicolas Fouquet, La Fontaine's patron He also wrote comedies and opera books But La Fontaine's masterpiece is the collection of *Fables choisies, mises en vers* [selected fables versified] (1668–94), containing 12 books of about 230 fables The fables place La Fontaine beside Racine and Molière as a master because of perfection of verse, fidelity to human nature, and narrative interest Each fable is a short story of beasts who act like men Each has a point expressed in a moral, a moral intended less to teach than to make a generalization on human behavior illustrated by the fable The charm and simplicity of the narratives have made them popular reading for children The fables, however, are really satires, sometimes bitter, often cynical, always sophisticated They had enormous success, 37 editions appeared before La Fontaine's death The fables have been frequently translated into English, e g, by Elizur Wright (1907), by Joseph Auslander and Jacques Le Clercq (1930), and by Edward Marsh (1933)

LaFontaine, Sir Louis Hippolyte, 1807–64, Canadian statesman, b Quebec prov, educated at the Collège de Montréal He supported Papineau in his opposition to the British administration, but did not approve of the rebellion of 1837. After the rebellion, with Papineau in exile, LaFontaine became the accepted leader of the French Canadians and of the Reform party in Lower Canada Sir Charles Bagot, as governor general, recognized the powerful coalition formed by the French Canadians and the moderate reformers of Upper Canada led by Robert BALDWIN and called into being in 1842 the first Baldwin-LaFontaine ministry When Bagot died, the ministry soon found itself in opposition to Sir Charles Metcalfe, his successor, on the issue of responsible government and resigned in 1843 With the triumph of the Reform party in 1847, Lord Elgin called into existence the second Baldwin-LaFontaine administration, notable for its reforms and achievement of genuine responsible government The test of the latter was the Rebellion Losses Bill (1849), brought in by LaFontaine, to compensate persons in Lower Canada who had suffered property loss during the rebellion of 1837 It was denounced as a "rebel measure" but was upheld by Lord Elgin at the cost of personal violence to himself. LaFontaine resigned in 1851, from 1853 until his death he served with distinction as chief justice of Lower Canada He was made a baronet in 1854. See Stephen Leacock, *Mackenzie, Baldwin, LaFontaine, Hincks* (rev. ed., 1926).

Laforgue, Jules (shül' läfôrg'), 1860–87, French poet, one of the SYMBOLISTS His vers libre shows a bizarre, ironic, and melancholy originality

Lafosse, or La Fosse, Charles de (shärl' du là fôs'), 1636–1716, French painter He was a pupil of Le Brun and studied also in Italy Louis XIV entrusted him with important decorations for the Tuileries, Marly, and the Trianon Perhaps his outstanding achievement, however, is his enormous fresco, *St Louis at the Feet of Christ*, which decorates the dome of the Hôtel des Invalides, Paris

Lafourche, Bayou (bī'ŏŏ' läfōōsh'), SE La , flowing to the Gulf of Mexico Formerly an outlet of the Mississippi, it has been cut off from the river by a dam at Donaldsonville

Lagan (lă'gŭn), river of Northern Ireland, rising in central Co Down and flowing 45 mi NW and then NE past Dromore and Lisburn to Belfast Lough at Belfast It is joined by canal to Lough Neagh, and it forms the boundary between Counties Down and Antrim

Lagarde, Paul Anton de (pōl ätōn' du lugard'), 1827–91, German Orientalist His father's surname was Bottticher, his adoptive mother's name was Lagarde He was one of the most important biblical critics and Oriental philologists of his century His work included studies in Iranian, Syriac, Greek, Arabic, and Aramaic, but perhaps his best contributions were to the criticism of the biblical text

Lagash (lā'găsh) or **Shirpurla** (shĭrpōōr'lu), ancient city of Sumer, S Babylonia It flourished c 3000 B C and at one time controlled a large part of S Babylonia, its power extending over Nippur Excavations begun on the site in 1877 revealed the ruins of a great palace on the site of a much older temple (c 2700 B C) of the city's patron deity, Ningirsu Some 30,000 inscribed tablets and a great variety of objects were recovered The inscriptions revealed that the city was a rival of Kish and Umma, that it was invaded, had its temples destroyed, and rose to new supremacy under Gudea, c 2450 B C

Lagerkvist, Par Fabian, Swed *Pär Fabian Lagerkvist* (pär' fa'bēan la'gurkvĭst'), 1891–, Swedish poet, dramatist, and novelist His early works, strongly affected by the First World War, were expressionistic in form In two autobiographical volumes, *Guest of Reality* (1925, Eng tr , 1936) and *Life Conquered* (1927), he states his faith in the spirit of man Later works reflect his interest in political and social problems, they include the plays *Man without a Soul* (1936) and *Victory in Darkness* (1939) and the novel *The Dwarf* (1944, Eng tr , 1945) The purity of his verse has had a marked influence on Swedish poetry In 1940 he was elected to the Swedish academy

Lagerlof, Selma, Swed *Lagerlöf* (sĕl' ma la'gürlûv), 1858–1940, Swedish novelist Winner of the 1909 Nobel Prize in Literature she was also the first woman to be elected (1914) to the Swedish academy She was born on the family estate "Marbacka" in Varmland, the province which is the background for much of her fiction Most of her novels and short stories have been translated Novels include *The Story of Gosta Berling* (1894, Eng tr , 1898), *Jerusalem* (1901, Eng tr , 1901–2), *The Outcast* (1918), *Charlotte Lowenskold, The General's Ring*, and *Anna Svard*, which form a series issued in 1931 as *The Ring of the Lowenskolds* Among collections of short stories are *Invisible Links* (1894), *From a Swedish Homestead* (1899), and *The Wonderful Adventures of Nils* (1906, Eng tr , 1907), which is a children's classic Autobiographical volumes are *Marbacka* (1922), *Memories of My Childhood* (Eng tr , 1934), and *The Diary of Selma Lagerlof* (Eng tr , 1936) See biography by H A Larsen (1936)

Lagoon Islands see ELLICE ISLANDS

Lagos (la'gŏs, la'gōs), city (pop 126,108), capital of Nigeria, a port on the Atlantic Ocean It comprises two islands (Lagos and Iddo) and a mainland section Founded c 1700 by the Yoruba tribe, Lagos for about a century was a notorious slave market Off Lagos, in 1759, Admiral Boscawen defeated the French Lagos became a British protectorate in 1851 and a colony in 1861 It was made the capital of Nigeria in 1914 Lagos is the terminus of a railroad to the exterior, and it exports palm oil and peanuts

Lagos (la'gōsh), city (pop 7,339), extreme SW Portugal, in Algarve, a port on the Atlantic, WNW of Faro and near Cape St Vincent The excellent harbor shelters much coastwise trade and an important sardine and tuna fishing fleet Sancho I with the help of bands of Crusaders took (1189) the city, later it was recaptured by the Moors but was soon restored to the Portuguese It was of much importance as a starting port for the Portuguese navigators in the time of Prince Henry the Navigator, who was first buried at Lagos The disastrous expedition of King Sebastian set out from Lagos

La Grande (la grānd'), city (pop 7,747), co. seat of Union co , NE Oregon, at the eastern foot of the Blue Mts , SE of Pendleton and on the Grande Ronde; founded 1861, inc 1886 Commission-manager government was adopted in 1913 The city processes and ships the products of a fruit, livestock, and lumber area and has railroad shops It is the site of a state teachers college

Lagrange, Joseph Louis, Comte (zhōzĕf' lwē' kōt' lăgrāzh'), 1736–1813, French mathematician and astronomer, b Turin, of French and Italian descent Before the age of 20 he was professor of geometry at the royal artillery school at Turin With his pupils he organized (1759) a society from which the Turin Academy of Sciences developed Among his early successes were his method of solving isoperimetrical problems, on which the calculus of variations is based in part, his researches on the nature and propagation of sound and on the vibration of strings, and his studies on the libration of the moon and on the satellites of Jupiter On the recommendation of Euler and D'Alembert, Frederick the Great invited him (1766) to succeed Euler as director of mathematics at the Berlin Academy of Sciences The memoirs of the academy were enriched by his distinguished treatises, and during this time he wrote his chief work, *Mécanique Analytique* This was published (1788) in Paris, where he had been called by Louis XVI in 1787 In 1793 he became president of the commission on weights and measures, he was influential in causing the adoption of the decimal system A professor at the École polytechnique from 1797, he developed the use in teaching of the analytic method which he so skillfully employed in his research He wrote *Théorie des fonctions analytiques* (1797) and *Leçons sur le calcul des fonctions* (1806), both based on his lectures Under Napoleon, Lagrange was made senator and count, he is buried in the Panthéon His contributions to the development of mathematics include also the application of differential calculus to the theory of probabilities and notable work on the solution of equations In astronomy he is known for his calculations of the motions of planets His complete works were published in 14 volumes (1867–92)

La Grange (lu grānj'), **1** City (pop 21,983), co seat of Troup co, W Ga , SW of Atlanta near the Chattahoochee river, inc 1828 It is an industrial center (with textile mills) which has retained its charm as a beautiful residential city There are a number of fine old houses in classic revival style La Grange College (Methodist, for women, 1831) is here The city was a storm center in the statewide textile strike of 1934 **2** Residential village (pop 10,479), NE Ill , west suburb of Chicago, settled in the 1830s, inc 1879 A junior college is here Aluminum products are manufactured, and limestone quarries are in the area **3** Town (pop 1,334), co seat of Oldham co , N Ky , NW of Frankfort, in a farm area The penitentiary here (built 1939–40) replaced one at Frankfort **4** City (pop 1,222), NE Mo , on the Mississippi above Hannibal, platted 1830 An iron foundry is here **5** Town (pop 1,647), E N C , on the Neuse river and SE of Goldsboro, inc 1869 It is a trade center with some manufacturing **6** City (pop 2,531), co seat of Fayette co , S central Texas, on the Colorado and SE of Austin, settled 1828 Early a wealthy market for blackland cotton plantations, it now serves a varied farm region and processes dairy products A large monument marks the tomb of La Grange men killed near San Antonio by Mexican invaders in 1842 and also of the Texans who perished in the ill-fated expedition against Mier, Mexico, of 1842

Lagrange, town (pop 1,814), co seat of Lagrange co , NE Ind , E of Elkhart, platted 1836, inc 1855 It is a dairying center

La Grange Park, village (pop 3,406), NE Ill , west suburb of Chicago, inc 1892

LaGuardia, Fiorello Henry (fyōrĕ'lō, lugwar'dēu), 1882–1947, U S public official, Congressman and mayor of New York city (1934–45), b New York city, grad New York Univ (LL B 1910) After his father—an army bandmaster who had come from Italy to America—died (1898), Fiorello LaGuardia accompanied his mother to Europe and was employed by the American consulate in Hungary, Trieste, and Fiume He returned (1906) to New York city, studied law while working (1907–10) in the U S immigration service and was admitted (1910) to the bar He ran for Congress on the Republican ticket unsuccessfully in 1914, but, again nominated, he launched a vigorous campaign and won (1916) against the Tammany machine He entered (1917) Congress, joined in the successful fight for the liberalization of the House rules, but resigned (1917) to command American air forces on the Italian-Austrian front in the First World War He then (1920–21) was president of the New York city board of aldermen Again (1923–33) in the House of Representatives, he fought for numerous labor reforms and sponsored the Norris-LaGuardia anti-injunction bill With the backing of Samuel SEABURY (1873–), LaGuardia successfully ran (1933) for mayor of New York city on the Fusion ticket As mayor he executed a vast program of reform He reduced political corruption, forwarded the modernizing and beautification of New York city, brought about the adoption (1938) of a new city charter, introduced slum-clearance projects, and improved health and sanitary conditions "The Little Flower" (from his first name)—as stubby, turbulent LaGuardia came to be called—was reelected mayor of New York city for three consecutive terms, but refused to run in 1945 Succeeded as mayor by William O'DWYER, LaGuardia served (1946) as director of the United Nations Relief and Rehabilitation Administration See his *Making of an Insurgent an Autobiography, 1882–1919* (ed by M L Werner, 1948)

LaGuardia Field (lugwar'dēu), municipal airport, 558 acres, in N Queens borough of New York city, on the East River at Flushing Bay, opened 1939 It has accommodations for seaplanes and landplanes and is administered by the Port of New York Authority

Laguna (lugōō'nu), North American Indian pueblo, W central N Mex , 45 mi W of Albuquerque It has 2,932 inhabitants Laguna, most recent of the New Mexican pueblos, was founded in 1699 The PUEBLO INDIANS have retained many old ceremonials, the principal feast is that of San José (St Joseph) on March 19 The chief villages are Old Laguna, Mesita, and Paguate The inhabitants of Laguna speak a Western Keresan language

Laguna, La (la lugōō'na), city (pop c 18,000), on Teneriffe island, Canary Islands An educational center, it is the seat of the Univ of San Fernando

Laguna Beach (lugōō'nu), residential and resort city (1940 pop 4 460, 1945 special census pop 6 524), S Calif , SE of Los Angeles, inc 1927 It has art studios and an art gallery

Laguna District [Span , =lake, so called from shallow lakes on the plain], irrigated area under cultivation, c 900,000 acres, E Durango and W Coahuila, Mexico The water comes from the NAZAS river Formerly consisting of large estates owned by Spanish and British settlers, the land was reapportioned (1936) as part of the agrarian reform of LÁZARO CÁRDENAS and distributed to Mexican farmers on the EJIDO system Cotton and wheat are the major crops.

La Habra (lu hă'bru), city (pop 2,499), S Calif , SE of Los Angeles, inc 1925 Citrus fruit is packed

Lahad (lā'-), Zorathite family 1 Chron 4 2

Lahaina (luhī'nu), city (pop 5,217), on the west coast of W Maui T H Formerly a whaling port, it now exports sugar Lahaina was the capital (1810–45) of the Hawaiian Islands, the first white settlement in the islands was made here The city is the site of the Lahainaluna School (est 1831)

Lahai-roi (lāhā'roi) [Heb , =He who lives and sees me] or **Beer-lahai-roi** (bē'ur–) [Heb , =well of Lahai-roi], well, probably in the western part of the Sinai peninsula Gen 16 14, 24 62, 25 11

La Halle, Adam de see ADAM DE LA HALLE

La Harpe, Frédéric César de (frādārēk' sāzur' du la arp'), 1754–1838, Swiss statesman He went (1782) to St Petersburg, Russia, where he became the tutor of Grand Duke Alexander (later Alexander I), in whom he instilled liberal and democratic ideals After the outbreak of the French Revolution, La Harpe returned to Switzerland and sought to stir up a revolution in his native VAUD against the Bernese authorities Having failed, he went to Paris to solicit the intervention of the Directory in favor of Vaud After the establishment (1798) of the HELVETIC REPUBLIC with the help of French arms, La Harpe was one of its directors, but in 1800 the conservatives, backed by Bonaparte, ousted him as a Jacobin La Harpe retired to Paris When the allies entered Paris in 1814, Alexander I gave La Harpe the rank of a Russian general La Harpe represented Vaud and Ticino at the Congress of Vienna (1814–15), where with the help of the tsar he secured recognition of the two cantons as sovereign members of the Swiss Confederation

La Harpe, Jean François de (zhā' frāswā' du la arp'), 1739–1803 French critic He was author of the monumental *Cours de littérature ancienne et moderne*, lectures he delivered after his appointment (1786) at the lycée in Paris His judgments on the classical period especially have been approved by time He also wrote plays, commentaries (notably on Racine) and critical essays

La Harpe (lu härp'), city (pop 1,322), W Ill , E of Fort Madison, Iowa, in a farm area, inc 1859

La Hire (la ēr'), c 1390–c 1443, French commander in the Hundred Years War, whose real name was Étienne de Vignoles or Vignolles, He entered (1418) the service of the dauphin (later King Charles VII) and was a loyal companion of Joan of Arc, whom he helped to defeat the English at Patay (1429) For a time La Hire ravaged N France at the head of a band of ÉCORCHEURS but in 1437 he resumed the fight against the English

La Hire or La Hyre, Laurent de (both lōrā' du la ēr'), 1606–56, French painter, one of the founders of the Académie royale de Peinture et de Sculpture He produced many portraits and historical paintings a few landscapes, important decorative works for Richelieu Pierre Séguier, and others, and tapestry designs for the Gobelins His paintings include *Pope Nicolas V Opening the Tomb of St Francis* and *St Peter Healing the Sick* (Louvre), *The Trinity* (Lyons), *Vision of St Francis* (Strasbourg), and the *Judgment of Paris* (Dijon)

Lahmam (lā'măm), unidentified town, S central Palestine Joshua 15 40.

Lahmi (lä'mī), giant brother of Goliath killed by Elhanan. 1 Chron. 20 5

Lahnda (län'dù), language of the Indic group of the Indo-Iranian subfamily of Indo-European languages See LANGUAGE (table)

Lahontan, Louis Armand, baron de (lwē' ärmä' bärō' du läōtä'), 1666–c 1713 French explorer in America He entered the army and came to New France in 1683 as captain of a regiment which he led in expeditions against the Iroquois He was a close student of Indian life and in 1687 was sent West with Duluth to be placed in command of the new Fort St Joseph on the St Clair river This post he abandoned in 1688 Traveling westward by the Fox-Wisconsin portage, he reached the upper Mississippi In his *Nouveaux Voyages dans l'Amérique Septentrionale* (1703, critical Eng ed , *New Voyages to America*, 1905), he claims to have ascended the River Long, a mighty stream flowing into the Mississippi from the west, and to have wintered there He gives elaborate descriptions of the physical features and tribes The River Long, which appeared on maps for several generations, long puzzled historians and could not be satisfactorily identified with any existent river of the region It is now treated, along with the corresponding descriptions, as fictitious The rest of the book is generally accurate and forms one of the first extended descriptions of the West and its life which we possess It greatly influenced European thought, especially the "Dialogues," which by contrasting savage with civilized life were influential in the creation of the "noble savage" and "natural man" traditions

Lahontan, Lake (luhŏn'tun, läōtä'), extinct lake of W Nevada and NE California It was brought into existence by the glacial age and, with Lake Bonneville, occupied a part of the Great Basin region. Geologists have concluded that Lake Lahontan vanished shortly after the Pleistocene epoch and that several lakes of W Nevada—e g , Pyramid Lake, Winnemucca Lake, and Walker Lake—remain as remnants The area, and especially Lovelock Cave, Nev , became a rich field for the investigation of fossils

Lahore (luhōr'), city (pop 671,659), capital of West Punjab prov , Pakistan, on the Ravi river It is the largest city of Pakistan Little is known of Lahore before it became the capital (12th cent) of a Moslem line of kings from Ghazni in Afghanistan It endured repeated capture and destruction from the 13th cent until the 16th cent , when it became one of the Mogul capitals The architectural remains of this period, though imperfectly preserved, are among the most splendid of Moslem art in India Especially notable are the palace of the emperor Jahangir and the Shalimar gardens (1667), which lie a little outside the city, only three sections of the gardens survive of the original seven which symbolized the divisions of the Islamic paradise After more than a century of strife and destruction, the Sikhs seized Lahore (early 19th cent) and made it their capital Great Britain conquered it from them in 1849 Lahore's museum of Indian antiquities, which figures in Kipling's *Kim*, is among the most noted in the East Educational institutions include Lahore Univ and several colleges In place of the decorative arts, for which Lahore was once famed, today it processes food and has diverse light manufactures

Lahti (lä'tē), city (pop 27,878), central Finland, NNE of Helsinki, at the southern end of the PAIJANNE lake system It has many large factories and is the center of the Finnish furniture industry Its fine town hall (1912) was designed by Eliel Saarinen.

La Huerta, Adolfo de. see HUERTA, ADOLFO DE LA.

La Hyre, Laurent de see LA HIRE, LAURENT DE

Laibach, Yugoslavia see LJUBLJANA

Laibach, Congress of (lī'bakh), conference of European powers in 1821 The chief powers at the congress were Russia, Austria, Prussia, and Great Britain, and the meeting was convened in accordance with a decision at the Congress of Troppau The congress saw the breach between Great Britain and the three conservative powers of Austria, Prussia, and Russia (popularly called the Holy Alliance) widen. FERDINAND I of the Two Sicilies was present upon invitation, and the chief action of the congress was the countenancing of the suppression of the Naples insurrection by Austrian forces

Laidler, Harry Wellington (lād'lur), 1884–, American economist and Socialist leader, b Brooklyn, N Y , grad. Wesleyan Univ , 1907, and Brooklyn Law school, 1910, Ph D, Columbia, 1914 He was a founder and long secretary of the Intercollegiate Socialist Society, which he built into a live organization He came to be recognized as the leading economist in the Socialist party in the United States, since 1920 he has served as a director of the National Bureau of Economic Research He was Socialist candidate for governor of New York in 1936 and for the U S Senate in 1938 and was a member (1940-41) of the New York city council His writings include *Boycotts and the Labor Struggle* (1914), *Socialism in Thought and Action* (1920), *A History of Socialist Thought* (1927), *Concentration and Control in American Industry* (1931), *A Program for Modern America* (1936), and *Social-Economic Movements* (1944)

Lainez, Diego (dēā'gō līnĕth'), 1512-65, Spanish theologian, leader in the Catholic Reform, general of the Society of Jesus He was one of the little band that formed the original Society of Jesus under St IGNATIUS OF LOYOLA At the Council of Trent (see TRENT, COUNCIL OF) he was papal theologian and made a sensation by his brilliant expositions of doctrine, and his words were exactly incorporated in some of the canons At St. Ignatius's death he was vicar general of the Jesuits, and in 1558 he was made general The next year he avoided being made pope only by hiding He represented the Church in disputation with the Calvinists in the Colloquy of Poissy (1561) The name also appears as Lavnez

Lairesse, Gerard de (gä'rärt du lärĕs'), 1641–1711, Flemish painter of allegorical and religious subjects, b Liége Most of his life was spent in Holland, where he achieved great success in decorating the homes and palaces of Amsterdam with allegorical themes somewhat in the manner of Nicolas Poussin His numerous religious paintings are less successful His book on the principles of drawing and painting, dictated after he became blind, illustrated with his own etchings, was translated into English, French, and German Among his best-known paintings are *Revolution, Mars,* and *Venus and Cupid* (Rijks Mus), *Cleopatra Landing at Tarsus* (Louvre), and *Baptism of Achilles*

Laish (lā'ĭsh), original name of DAN 2

laissez faire (lĕ"sā fâr'), in economics and politics, the doctrine that an economic system functions best when there is no interference by government The basic idea is belief in a natural economic order that tends, when undisturbed by artificial stimulus or regulation, to secure the maximum of well-being for the individual and therefore of the community as a whole Historically, laissez faire was a reaction against MERCANTILISM, a system of commercial controls imposed by governments who looked upon industry and trade, especially foreign trade, merely as a means of strengthening the state Navigation laws, trade monopolies, taxes, and paternalistic regulations of all kinds bore heavily upon the rising class of merchants in the period of European colonial expansion It was in behalf of this class that the French physiocrats, pioneer economists in the 18th cent , first formulated the principles of laissez faire The phrase from which the name originated is usually attributed to Vincent de Gournay With the physiocrats state noninterference became a cardinal teaching, they especially opposed the taxation of mercantile pursuits It was opposition to mercantilism and state paternalism that also motivated Adam Smith, the father of classical economics, whose name more than any other is connected with British laissez-faire doctrines Smith believed that individual welfare rather than national power was the proper ideal, to further this, trade was to be freed from government restrictions When individuals were free to follow the motive of self-interest, rivalry or competition among them would become a more effective regulator of the economic life than would the state Smith did not believe in laissez faire in an absolute sense, he found a place for government in public works such as canals and docks to facilitate trade and in the regulation of foreign commerce to protect certain home industries At the hands of Jeremy Bentham the doctrine of laissez faire became a philosophy of individualism and utilitarian ethics, and John Stuart Mill brought it to what was probably its highest point The strong individualism of the theory naturally appealed to the factory owners and merchants who while they were transforming society through the Industrial Revolution were hampered by old laws and the opposition of the landed interests The so-called Manchester school of economics, especially Richard Cobden and John Bright, popularized the doctrines of free trade and laissez faire, which from being radical doctrines were becoming the accepted theory of classical economics Both successful merchants and manufacturers, Cobden and Bright brought laissez faire into the arena of politics, securing the repeal of the corn laws or duties on imports that kept high the price of food needed by industrial workers, they opposed the minimum provisions of the factory acts by which Parliament was obliged to regulate abuses such as long hours and woman and child labor in the factories Laissez-faire principles were nowhere embodied fully in legislation Statesmen like Alexander Hamilton and economists like H. C Carey in the United States and Friedrich List in Germany advocated government protection of manufactures by means of tariffs. As the system of capitalist enterprise evolved in the 19th cent., more and more businessmen found it to their interest to combine with their competitors in huge trusts or cartels for the control of prices and production Competition, which had been relied upon to regulate the market, seemed to be issuing in monopoly The principle of state noninterference was discarded; indeed, the state was called upon to restore and preserve freedom of competition where it appeared to be in danger of disappearing. Agreements in restraint of trade and practices of "unfair" competition were outlawed Thus the practice of laissez faire was modified, but the theory was not given up; it became a tenet of the conservative opponents of socialism. "Big business" was defended as the means of eliminating the high costs of competition and so cheapening goods to the consumer The emphasis was shifted from competition to the importance of profit as an incentive to production and of individual initiative as necessary to economic progress See J W McConnell, *Basic Teachings of the Great Economists* (1943); L V Chandler, *A Preface to Economics* (1947).

Laius see OEDIPUS

La Jolla (lù hoi'yu), resort, S Calif., northern suburb within the city limits of San Diego The beaches and the sea-washed caves attract visitors and year-round residents, among them many literary figures The Scripps Institution of Oceanography is at La Jolla See Max Miller, *The Town with the Funny Name* (1948)

La Junta (lu hōōn'tu, hün'tu), city (pop. 7,040), co seat of Otero co , SE Colo , on the Arkansas river below Pueblo, in a sugar-beet, melon, and grain area The city has an airport, railroad shops, a creamery, and other plants

Lake, Kirsopp, 1872–1946, noted English biblical scholar He was curate of St Mary the Virgin (Oxford) until 1904, when he became a professor at the Univ of Leiden (until 1913) After 1914 he was at Harvard, first as professor of early Christian literature, from 1919 to 1932 as professor of ecclesiastical history, and from 1932 to 1937 as professor of history Lake was also interested in archaeology and participated in many expeditions He periodically visited Mt Sinai, Mt Athos, and other centers of ancient culture, in Greece he did valuable research work on old manuscripts. Among his many publications are *Early Days of Monasticism on Mt Athos* (1909), *The Beginnings of Christianity* (5 vols , 1920–32), *Immortality and the Modern Mind* (1922), and *Religion of Yesterday and Tomorrow* (1925)

Lake, Simon, 1866–1945, American inventor of submarines, b Pleasantville, N J He demonstrated his even-keel submarine torpedo boat in 1894 and later developed the Lake-type, level-keel submarine, completing the *Argonaut* in 1897 This type, disregarded by the U S navy in favor of the type developed by J P Holland, was used with great success by the Germans in the First World War, at that time the United States ordered 55 of the type Lake later devoted himself to developing freight-carrying submarines See his autobiography, *Submarine* (as told to Herbert Corey, 1938), Frank T Cable, *The Birth and Development of the American Submarine* (1924)

lake, body of standing water surrounded by land Most lakes originate in the action of a glacier Such an action consists either in the excavation and subsequent filling of a depression (e g , Lake Superior) or in the damming of a river by ice or moraine (e g , Lake Agassiz) Other types of lake are those caused by accidental interference with the course of a river, oxbow lakes or bayous caused by slow-flowing rivers, coastal lagoons formed through deposit of silt or sand near the mouth of a river, parts of the ocean separated by volcanic action, and craters of extinct volcanoes which collect water and become lakes From the time of its formation a lake is destined to disappear The historical period is not long enough to enable man to investigate the life history of one of the greater lakes, but enough information has been collected to show the various stages of the disappearance of a lake In a humid climate two factors are responsible for a lake's extinction—deposit of detrital matter and the lowering of the affluent stream In arid regions the lake disappears because the evaporation is greater than the precipitation In an arid climate salt and bitter lakes prevail Some of them are descendants from fresh-water ancestors after a change of climate from humid to arid, e g , the Great Salt Lake and the Dead Sea, others are isolated parts of an ocean, e g , the Caspian Sea and the Aral Sea. The largest lakes of the world are the Caspian Sea, Lake Superior, Victoria Nyanza, the Aral Sea, Lake Michigan, and Lake Huron The highest lake of the world is Lake Titicaca, 12,500 ft above sea level, the lowest, the Dead Sea, 1,292 ft below sea level Canada is the richest region of the earth in lakes, South America the poorest The Scottish loch and the Irish lough may be either an inland lake or an arm of the sea

lake, in dyeing, an insoluble compound formed in the cloth or other material by the action between an organic dye and a MORDANT The color of a lake depends upon the nature of the mordant used as well as upon the dye Lakes are not in general so fast (permanent) as many inorganic dyes, but their colors are more brilliant

Lake Arthur, town (pop. 2,131), SW La , on Lake Arthur and SE of Lake Charles, in a fishing, hunting, and rice-producing area; inc. 1909

Lake Bluff, village (pop. 1,729), NE Ill., on Lake Michigan N of Chicago, inc. 1895. The Great Lakes Naval Training Station is just north.

Lake Charles, city (pop. 21,207), parish seat of Calcasieu parish, SW La., a port of entry on Lake Charles, c 35 mi from the Gulf of Mexico, settled c 1852, inc as a town 1867, as a city 1904 A deepwater port, it ships the oil, lumber, rice, and cotton of the region Boat construction and the making of chemicals, synthetic rubber, and turpentine are important There are also food-processing plants A state junior college is here

Lake City. 1 City (pop 5,836), co seat of Columbia co, N Fla, W of Jacksonville and near the Suwannee, in a farm area; founded in the 1830s as a military post It deals in farm produce, lumber, and lumber products It is the headquarters for near-by Osceola National Forest and is the seat of a U S veterans' hospital Historic OLUSTEE is east **2** City (pop 2,216), W central Iowa, SW of Fort Dodge, inc 1887 **3** City (pop 3,204), SE Minn, on Lake Pepin between Red Wing and Wabasha, platted 1856, inc 1872 It is a resort, mill town, and nursery center **4** Town (pop 2,522), E central S C, S of Florence, in a vegetable and tobacco area **5** Town (pop 1,520), E Tenn, NNW of Knoxville, in a coal area, named Coal Creek until 1939 Norris Dam is just east

Lake Crystal, city (pop 1,319), S Minn, SW of Mankato, platted 1857, inc as a village 1870, as a city 1930 It is a trade center in a farm area

Lake District, region of mountains and lakes, in Cumberland, Westmorland, and Lancashire, England It is c 30 mi in diameter and includes part of Furness peninsula There are 15 lakes, among them Comston Water, Ullswater, Derwentwater, Buttermere, Windermere, Grasmere, and Thirlmere, several beautiful falls, and some of England's highest peaks—Scafell, Skiddaw, and Helvellyn Numerous ancient relics remain, as the Druids' Circle near Keswick, and there are ruins of old castles and churches and remains of Roman occupation This scenic district is a favorite resort of artists and writers, Wordsworth, Samuel Taylor Coleridge, and Southey were known as the Lake poets, and Gray, Hartley Coleridge, De Quincey, Ruskin, Keats, Shelley, Tennyson, and many others lived in the district See Doreen Wallace, *English Lakeland* (1941)

lake dwelling, habitation built over the shallow waters of a lake shore or a marsh, usually erected on piling-supported platforms, but sometimes on artificial mounds Such a site affords easy access to a varied food supply, the availability of fish, marsh fowl, and good crop lands favor lacustrine dwelling in many parts of the world Africa, Asia, and the New World have had lake-dwelling peoples, but the most famous of these are the Neolithic inhabitants of the Alpine regions of Europe They were skilled agriculturists and had highly developed weaving and ornamental arts As many as 50 village clusters have been found on a single lake, attesting the peaceful and prosperous way of life of its inhabitants They are known to have traded with the Danube regions c 2500 B C and apparently were undisturbed in their territory until the 7th cent B C, when they were driven to the forests by the invading Celts The ethnic origins of the Swiss lake dwellers are not definitely known.

Lake Erie College see PAINESVILLE, Ohio

Lakefield, village (pop 1,349), S Ont, on the Trent Valley Canal and NNE of Peterborough It has dairying, woodworking, and granite quarrying

Lakefield, village (pop 1,699), SW Minn, near the Iowa line, settled 1879, inc 1887 It is a farm trade center

Lake Forest, residential city (pop. 6,885), NE Ill., on Lake Michigan N of Chicago, settled 1835, platted 1856, inc 1861 It is the seat of Lake Forest College (Presbyterian, coeducational, 1857) and Barat College of the Sacred Heart

Lake Geneva, resort city (pop 3,238), SE Wis, on Lake Geneva and SW of Milwaukee, settled before 1845, inc 1883

Lake George, resort village (pop 803), co seat of Warren co, E N Y, on the southern tip of Lake George and in the foothills of the Adirondacks, inc 1903 It is a year-round sports center Vestiges of Fort William Henry, built by Sir William JOHNSON, and of Fort George, begun by Jeffrey AMHERST, are here

Lakehurst, borough (pop 827), E N J, SW of Lakewood It is the site of a U S naval air station with an 800-foot hangar and other works for dirigibles The *Shenandoah* (1923) was the first airship to use the station Transatlantic airships made it their American terminal from 1924 The burning of the hydrogen-filled *Hindenburg* here as she was about to be moored, May 6, 1937, took 36 lives The *Los Angeles* was dismantled here in 1939

Lakeland. 1 City (pop. 22,068), central Fla, E of Tampa, inc 1885 It was settled in the 1870s and developed with the railroad's coming in 1884 It is an important processing and shipping center for a productive citrus-fruit, vegetable, dairy, and berry region also yielding phosphates Amphibian tractors are made here There are numerous lakes in and near the city Points of interest are FLORIDA SOUTHERN COLLEGE, a fine civic center, and a Hindu temple. **2** City (pop. 1,502), co seat of Lanier co., S Ga., NE of Valdosta, in a farm area.

3 Town (pop. 1,160), La Porte co., NW Ind, near La Porte.

Lakeland terrier: see TERRIER

Lake Linden, village (pop 1,631), **Keweenaw** peninsula, extreme N Mich, on Torch Lake near the mouth of Trap Rock River and SE of Calumet, in a copper region; inc 1885

Lake Mills. 1 Town (pop 1,677), N Iowa, near the Minn line NW of Mason City, inc 1880 Rice Lake State Park is near by **2** City (pop 2,219), S Wis, on Rock Lake and between Milwaukee and Madison, settled c 1836, inc 1905 Dairy machinery is made At near-by Aztalan Mound Park are several Indian mounds and a museum containing Indian collections

Lakemore, village (pop 1,832), NE Ohio, near Akron, inc 1920

Laken (lä'kun), northern suburb of Brussels, Belgium The palace built here by Napoleon I still serves as a royal residence A former spelling is Laeken

Lake Odessa (ōdĕ'su), village (pop 1,417), S Mich, on Tupper Creek and Tupper Lake and SE of Grand Rapids, in a farm and resort area, settled c 1870, inc 1889

Lake of the Woods, c 70 mi long, in the pine forest region of N Minnesota and SE Manitoba and W Ontario, with an irregular shore line and many islands It is fed by the Rainy River and drained to the northwest by the Winnipeg It separates the Northwest Angle, northernmost land of the United States, from the rest of Minnesota Abundant in fish and game, the region is a favorite resort

Lake Orion, resort village (pop 1,933), S Mich, N of Pontiac, in a farm and lake area; inc 1859

Lake Placid, resort village (pop 3,136), NE N Y, in the Adirondacks E of Saranac Lake, surrounding Mirror Lake and extending to the south end of Lake Placid, settled c 1850, inc 1900 It is one of the most noted sports centers in the East The 1932 Olympic winter games were held in the Olympic Arena, social and sports center The famous bobsled run (opened 1930) is on Mt Van Hoevenberg The Northwood School for boys is in Lake Placid Near by is the farm of John Brown with his grave

Lakum (lä'kŭm), unidentified town, N Palestine. Joshua 19 33

Lalande, Jean (Saint John Lalande) (zhäʹläländʹ), d 1646, French missionary in Canada and New York, a Jesuit priest. He came to the New World in 1644 He accompanied (1646) Father Isaac JOGUES on his mission to the Mohawk and was martyred with him He was beatified in 1925 and canonized in 1930 and is one of the Jesuit Martyrs of North America Feast Sept 26 or (among the Jesuits) March 16

Lalande, Joseph Jérôme Lefrançais de (shôzĕfʹ zhärōmʹ lüfräsäʹ du lalädʹ), 1732–1807, French astronomer Under the direction of the French Academy he went to Berlin in 1751 to make observations on the parallax of the moon for comparison with those which Nicolas Lacaille was making at the Cape of Good Hope In spite of his youth, he was admitted to the Berlin Academy He was professor of astronomy in the Collège de France for 46 years (1761–1807), and his influence upon his pupils was very great In 1768 he became director of the Paris Observatory. The Lalande Prize, which he established in 1802, is awarded for the outstanding achievement in astronomy each year Lalande was noted for his popular works on astronomical subjects as well as for his more serious scientific publications His planetary tables were unsurpassed in his time His works include *Traité d'astronomie* (1764), *Histoire céleste française* (1801), including a catalogue of 47,000 stars, and *Bibliographie astronomique* (1803)

Lalemant, Charles (shärlʹ läləmäʹ), 1587–1674, French missionary in North America, a Jesuit, brother of Jerôme Lalemant and uncle of Gabriel Lalemant He arrived in Quebec in 1625 and acted as novice master and superior His account, the earliest of the JESUIT RELATIONS, is valuable He was noted as a mystic In 1639 he returned to France, where he acted as forwarding agent for the Canadian missions

Lalemant, Gabriel (Saint Gabriel Lalemant) (gäbrēĕlʹ), 1610–49, French missionary in North America, a Jesuit, nephew of Charles Lalemant and Jérôme Lalemant He entered the order in 1632 and was sent to Quebec in 1645 He was assistant to Jean de BRÉBEUF at a mission among the Huron, when the Iroquois took the village and tortured the priests to death He is one of eight men beatified in 1925 and canonized in 1930, the group is known as the Jesuit Martyrs of North America or the Martyrs of North America Feast Sept 26 or (among the Jesuits) March 16

Lalemant, Jérôme (zhärōmʹ), 1593–1673, French missionary in North America, a Jesuit, brother of Charles Lalemant and uncle of Gabriel Lalemant He was an active missionary among the Huron (1638–45) and then was director (1645–56) of all Jesuit missions in Canada He returned to France but went again to Canada, where he was again the director of missions and served as vicar general to Bishop Laval

Lalique, René (runäʹ läləkʹ), 1860–1945, French designer of jewelry and glass His jewelry became world famous following a display at the International Exhibition at Paris in 1900 Later he became a leading designer and manufacturer of decorative glass objects and larger works including fountains and murals He was a member of the French Higher Council of Fine Arts

Lally, Thomas Arthur, baron de Tollendal, comte de (tômäʹ artürʹ barōʹ du tôlädälʹ kôtʹ du läléʹ), 1702–66, French general, son of an Irish Jacobite resident in France As governor of the French possessions in India (1758–61) he failed to take Madras (1758–59) and had to surrender to the English at Pondichéry This defeat put an end to the French Empire in India Paroled, Lally returned to France to answer charges of treason After imprisonment for more than two years, he was tried, and though the procedure of the trial was universally criticized he was executed His son **Trophime Gérard, marquis de Lally-Tollendal** (trôfĕmʹ zhärarʹ märkēʹ), 1751-1830, politician and writer, was helped by Voltaire in procuring the posthumous vindication (1778) of his father

Lalo, Édouard Victor Antoine (ādwärʹ vēktôrʹ ätwanʹ lalōʹ), 1823–92, French composer An opera, *Le Roi d' Ys* (1888), *Symphonie espagnole* for violin and orchestra (1875), and a ballet, *Namouna* (1882), gained him a distinguished place in the music of his time

Lamaism (läʹmuĭzm), form of BUDDHISM prevailing in Tibet, Mongolia, and parts of China To the Tibetans it is known as 'the orthodox religion" or the "religion of Buddha " Except for a comparatively small number in remote places who retain some of the practices of the Bon, a primitive animistic religion of Tibet, there is little difference between the beliefs and worship of Tibetan Buddhism and those of the Mahayana form of Buddhism in India, from which they were derived The word *Lamaism* comes from the name of the Tibetan monks, the lamas [superior ones] The traditional account is that Buddhism was introduced into Tibet by an Indian and a Chinese princess, devout Buddhists, who became (7th cent A D) the wives of a Tibetan king The new religion was actually established by one of the successors of that king when he called from India a monk who founded a monastery near Lhasa in 749 Translation of Buddhist writings from Sanskrit followed in two rescensions, the *Ka-gyur* or *Kanjur*, the canon of sacred books, and the *Tan-gyur* or *Tanjur*, a mass of varied lore The early lamas and their successors constituted the Red Hat order After a brief

period of persecution, the priests built up their power rapidly. About 1038 a great reformer, Atisa or Kah-dam-pa, a monk from India, unified the priesthood, improved the moral tone by such measures as enforcing celibacy, and tried to eliminate Bon In the 13th cent, after the conversion of Kublai Khan, temporal rule was bestowed by the sovereign upon the abbots of the Sas-Kya monastery This gave them political supremacy in W Tibet, especially from 1270 to 1340 Under a second great reformer, the lama Tsong-kha-pa, Atisa's sect was reorganized (early 15th cent) as the Virtuous Order of the Yellow Hat order In 1640 the ruling Mongol prince bestowed temporal and spiritual control of all Tibet upon the fifth grand lama of the order, whose title was Ta-lai or Dalai [ocean] Lama A palace monastery was erected at Lhasa The Dalai Lama receives divine honors While in the Sas-kya hierarchy son succeeds father, the succession among the celibate Yellow Hats depends upon direct reincarnation The spirit of the Dalai Lama passes from his body into some infant just born Tests determine the proper boy, who is carefully trained for his great responsibility The Tashi or Panchen Lama, the abbot of a powerful monastery, is second to the Dalai Lama The lamaist order includes the abbots at the head of the various monasteries, the ordained religious mendicants, novices who have formally become candidates, and neophytes, who are children on probation The standing of nuns is inferior Priests preside over the ritual performances of Lamaism The worship includes reciting prayers and intoning hymns, often to the sound of great horns and drums Strings of beads and prayer wheels keep the tally of prayers Many saints are worshiped, and there are besides, gods, spirits, genii, and other beings to whom various forms of recognition are given The 14th Dalai Lama was installed in 1940 and the present Tashi Lama was installed in 1944 See Sir Charles Bell, *Religion of Tibet* (1931), L A Waddell, *Buddhism of Tibet* (2d ed, 1934), Marco Pallis, *Peaks and Lamas* (rev ed, 1949)

La Malbaie (la malbā') or **Murray Bay,** village (pop 2,324), S Que, on the north shore of the St Lawrence at the mouth of the Malbaie, or Murray, river and NE of Quebec It is a well-known resort, in dairy-farming country

Lamar, Joseph Rucker (lumu'), 1857–1916, American jurist, b Elbert co, Ga, grad Bethany College (W Va), 1877 He was admitted to the Georgia bar in 1878, served several terms in the state legislature, and compiled *The Code of the State of Georgia* (2 vols, 1896) He served (1904–6) on the state supreme court and was Associate Justice of the U S Supreme Court (1911–16) See biography by C P Lamar (1926)

Lamar, Lucius Quintus Cincinnatus, 1825–93, American statesman, b Putnam co, Ga, grad Emory College (now Univ), 1845 He practiced law in Oxford, Miss, and was a Democrat in Congress (1857–60) Although he at first opposed secession, Lamar drafted the Mississippi ordinance of secession In Nov, 1862, he was appointed Confederate commissioner to Russia, but was recalled from Paris before reaching Russia He returned to the Army of Northern Virginia, in which he had previously served as lieutenant colonel of a Mississippi regiment, as a judge advocate After the Civil War he resumed his practice at Oxford and taught at the Univ of Mississippi He was a U S Representative (1873–77), Senator (1877–85), and Secretary of the Interior in President Cleveland's cabinet from 1885 to 1888, when he resigned to become (1888–93) an Associate Justice of the Supreme Court His efforts after the war to restore friendly relations between North and South brought him into particular prominence See biographies by Edward Mayes (1896) and W A Cate (1935)

Lamar, Mirabeau Buonaparte, 1798–1859, Texas statesman, b Georgia He went to Texas in 1835 and immediately became affiliated with the revolutionary faction At the battle of San Jacinto he commanded the cavalry, and shortly afterward he was appointed major general He then successively held the offices of attorney general, secretary of war, vice president, and (1838–41) president of Texas In his term as president he secured the recognition of Texas independence by France, England, and Holland, carried out a vigorous Indian policy, particularly against the Cherokee, whom he forced out of E Texas, laid the foundations of the present system of public education in Texas, and founded a new capital at Austin He also sent an expedition to Santa Fe, N Mex, hoping to persuade the New Mexicans to join Texas, but the members of the expedition were captured and sent to Mexico Lamar did not favor Texan annexation to the United States at this time and planned to make the area self-sufficient, but his various ventures had disarranged the republic's finances and currency and increased the hostility of the Indians, and in 1841 the people again turned to Sam Houston Lamar afterwards came to favor annexation, served in the Mexican War, and was (1858–59) minister to Nicaragua and Costa Rica, where he combated British influence and tried vainly to secure a treaty which should give the United States special interests in Nicaragua He wrote a number of lyrics in the romantic manner See biographies by A K Christian (1922) and H P Gambrell (1934), Philip Graham, *The Life and Poems of Mirabeau B Lamar* (1937)

Lamar (lumar') **1** City (pop 4,445), co seat of Prowers co, SE Colo, on the Arkansas and E of Pueblo, inc 1886 It is a processing center in a farm area **2** City (pop 2,992), co seat of Barton co, SW Mo, on a branch of the Spring river and NNE of Joplin, in a coal and farm area, founded c 1856

Lamarck, Jean Baptiste Pierre Antoine de Monet, chevalier de (zhäⁿ' baptēst' pyĕr' ätwanⁿ' du mōnā' shuvalyā' du lamärk'), 1744–1829, French naturalist He is noted for his study and classification of invertebrates and his introduction of evolutionary theories A native of Picardy, he studied medicine in Paris, but his interest was soon directed to botany, and recognition of his skill followed upon the publication of *Flore française* (1778) He was elected to the Academy of Sciences, and, aided by Buffon, he traveled (1781–82) over Europe, under the title of royal botanist, visiting museums and collecting material for the museum of the academy He was, for a time, keeper of the herbarium at the Jardin du Roi (later Jardin des Plantes) and after 1793 professor of zoology at the Museum of Natural History His ideas concerning the origin of species were first made public in his *Système des animaux sans vertèbres* (1801) Lamarck introduced the use of the term *Invertebrata*, and he is regarded as the founder of invertebrate paleontology It was his belief that life forms underwent a slow modification through a long course of geological history His later works were *Philosophie zoologique* (1809) and *Histoire naturelle des animaux sans vertèbres* (1816–22) He also wrote meteorological reports (1799–1810) Blindness and poverty marred his later life **Lamarck's theory of evolution** is based upon the belief that characteristics that develop in an organism as a result of a need created by its environment are passed on to its offspring, the result being the gradual evolution of new species This concept is known as that of the inheritance of acquired characteristics Cuvier's opposition to the theory was influential in discrediting Lamarck during his lifetime Lamarck's work is, however, important as a forerunner to that of Charles Darwin, who came to recognize environment as a factor in evolution See A S Packard, *Lamarck, the Founder of Evolution* (1901), Edmond Perrier, *Lamarck* (1925)

La Marmora (lä mär'mōrä), distinguished Italian noble family Its best-known member was **Alfonso Ferrero, marchese della Marmora** (älfōn'sō fārā'rō markā'zā dĕl'lä), 1804–78, Italian general and statesman He fought for Sardinia against Austria in the wars of 1848–49 and 1859, completely reorganized the Sardinian army, and led (1855–56) the Sardinian expeditionary force in the Crimean War He was twice premier (1859, 1865–66) His conduct of Italian operations in the Austro-Prussian War (1866) was unsatisfactory, and he resigned after the Italian rout at Custozza

Lamartine, Alphonse Marie Louis de (älfōs' marē' lwē' du lämärtēn'), 1790–1869, French poet, novelist, and statesman After a trip to Italy and a brief period in the army, Lamartine began to write and achieved immediate success with his first publication, *Méditations poétiques* (1820) This group of 24 poems, including the famous "Le Lac," expressed his own feelings—religious, melancholy, or amorous—as he came in contact with nature and the land He drew from tradition, from Ronsard as well as from the 18th cent, while adding something new in the form of a very personal lyricism expressed in a verse that was intended to be musical This musicality was developed in *Harmonies* (1829) His religious orthodoxy becomes a kind of pantheism in *Jocelyn* (1836) and *La Chute d'un ange* (1838) In politics, Lamartine held aloof from all parties, his idealism made him embrace the principles of democracy, social justice, and international peace His *Histoire des Girondins* (1847), a glorification of the GIRONDISTS, was immensely popular, and after the FEBRUARY REVOLUTION of 1848 Lamartine briefly headed the provisional government and was a member of the executive committee that replaced it His moderation soon cost him the support of both the right and the left wings of the revolutionists He competed unsuccessfully for the presidency with Louis Napoléon Bonaparte (later Napoleon III) Lamartine left politics and devoted himself entirely to writing, spending much of the remainder of his life in a hopeless effort to repay the fantastic debts he had accumulated in his youth His later prose works include *Les Confidences* (1849) and the novel *Graziella* (1849, Eng tr, 1876). See study by H Remsen Whitehouse (1918)

Lamb, Lady Caroline. see MELBOURNE, WILLIAM LAMB, 2D VISCOUNT

Lamb, Charles, 1775–1834, English essayist, b London He went to school at Christ's Hospital, where his lifelong friendship with Coleridge began Lamb was a clerk at the India House from 1792 until he was pensioned in 1825 His life was overturned (1796) when his sister Mary Ann Lamb (1764–1847) in a fit of temporary insanity attacked their father and stabbed and killed their mother. Lamb had himself declared her guardian to save her from permanent commitment to an asylum, and after 1799 they lived together They collaborated on children's books for Godwin's "Juvenile Library," producing *Tales from Shakespear* and *Mrs Leicester's School* (both 1807) and *The Adventures of Ulysses* (1808) Lamb's dramatic ventures were unsuccessful, both the pseudo-Elizabethan, blank-verse tragedy *John Woodvil* (1802) and the farce *Mr H——* (1805) *Specimens of English Dramatic Poets* (1808) established his reputation as a judicious editor and critic and, with his critical essays, materially aided in reviving the popularity of Shakspere and his contemporaries He wrote intermittently for periodicals from 1800 on, the major contribution being the famous *Essays of Elia* (*London Magazine*, 1820–25), which were collected in 1823 and 1833 There are echoes of Sir Thomas Browne, Robert Burton, and Thomas Fuller in his writing, but Lamb's style is peculiarly his own, and the close-knit, subtle organization, the accurate observation of life, and the gift for humor, fantasy, and pathos combine to make him the great master of the familiar style Lamb was a gifted conversationalist and was intimate with all the major literary figures of his time See his letters (ed by E V Lucas, 3 vols, 1935) and biography appended to his works (ed by Lucas, 1903–5), biography by Alfred Ainger (1882), Edmund Blunden, *Charles Lamb and His Contemporaries* (1933), W D Howe, *Charles Lamb and His Friends* (1944)

Lamb, John, 1735–1800, American Revolutionary leader, b New York city As tension between patriots and British increased in the period just before the Revolution, he did much for the patriot cause, was a leader in the Sons of Liberty in New York prov, and helped form the New York committee of correspondence to coordinate anti-British action He was appointed (1775) to the committee to enforce the nonimportation agreement (see CONTINENTAL CONGRESS), and he and Isaac Sears led the seizure of the New York customhouse and the expedition to seize British arms at Turtle Bay He served in the Quebec campaign and in later battles and was a subordinate of Benedict Arnold at the time of the treason

Lamb, Roger, 1756–1830, British soldier in the American Revolution, b Dublin, Ireland In the Royal Welch Fusileers, he saw much service under Burgoyne in the Saratoga campaign (1777) and in the South under Sir Henry Clinton and Cornwallis His works, *An Original and Authentic Journal of Occurrences during the Late American War* (1809) and *Memoir of His Own Life* (1811), are valuable source material Robert Graves used them for *Sergeant Lamb's America* (1940) and *Proceed, Sergeant Lamb* (1941)

Lamballe, Marie Thérèse Louise de Savoie-Carignan, princesse de (märē' tārēz' lwēz' du säVwakarēnyā', prēsĕs' du läbal'), 1749–92, devoted friend and favorite of MARIE ANTOINETTE Intensely unpopular, she was killed by a mob in the September massacres, and her head was displayed on a pike under the queen's windows

Lamber, Juliette see ADAM, JULIETTE LAMBER

Lambert, Johann Heinrich (yō'hän hīn'rĭkh läm'bĕrt), 1728–77, German-French philosopher and scientist, b Alsace He developed many basic concepts in mathematics including that of the hyperbolic functions in trigonometry In physics he accomplished valuable results in work on the measurement of the intensity of light, degrees of heat, and humidity In his philosophical work, *Neues Organon* (1764), he pointed out the importance of beginning with experience and using the analytical method to investigate any theory of knowledge Other important books are *Photometria* (1760) and *Pyrometer* (1779)

Lambert, John (läm'bŭrt), 1619–83, English parliamentary general A consistent follower of Parliament in the first civil war (1642–45), he supported Oliver Cromwell when the army and Parliament quarreled in 1648 He sat in Cromwell's Parliament and in the council of state, but broke with the Protector in a quarrel (1657) growing out of the offer of the crown to Cromwell At the fall of Richard Cromwell it is likely that Lambert assisted in dissolving the Rump Parliament and restoring the Long Parliament His opposition to the restoration of Charles II ended his political career. He was defeated by the forces under George Monck, was tried for treason, and was banished to the island of Guernsey

Lambert, town (pop. 1,016), NW Miss, just E of Clarksdale

Lambertville, city (pop. 4,447), W N J, on the Delaware above Trenton, opposite New Hope, Pa, founded 1732, inc 1849

Lambèse (läbĕz'), village (1936 pop. 1,155), NE Algeria, S of Constantine It is noted for the ruins

of a Roman town (Lambaesis) founded early in the 2d cent. as the encampment of the third Augustan Legion and destroyed in the 5th cent The modern village has a noted penitentiary

Lambeth, metropolitan borough (1931 pop 296,147, 1948 estimated pop 226,600) of S London, England, on the south side of the Thames Here are St Thomas's Hospital (9th cent), Waterloo Station, the potteries making DOULTON WARE, and Lambeth Palace, the chief residence of the archbishop of Canterbury At Lambeth Palace are held the decennial conferences of bishops of the Anglican Communion See Dorothy Gardiner, *The Story of Lambeth Palace* (1930)

Lamb of God see AGNUS DEI

lamb's-quarters, common European weed (*Chenopodium album*), widely naturalized in North America It is related to the beet and spinach and similarly used for greens when young and tender, but it is seldom cultivated The lamb's-quarters, also called goosefoot and pigweed, is an annual with inconspicuous green flowers, whitish leaves, and small seeds that are used to produce the granular effect of some shagreen leathers The name is sometimes used for several related species

Lambton, John George see DURHAM, JOHN GEORGE LAMBTON, 1ST EARL OF

Lamech (lā'mĕk) **1** Descendant of Cain and therefore accursed He was the father of Jabal, Jubal, and Tubal-cain Gen 4 18-24 **2** Descendant of Seth and father of Noah Gen 5 25-31

Lamennais or **La Mennais, Felicité Robert de** (fēlēsētā' rōbĕr' du lămunā'), 1782-1854 French Roman Catholic apologist and liberal, b Saint-Malo He was largely self-educated by wide, indiscriminate reading He was converted (1804) to active Catholicism and resolved to serve the Church In 1817 he was ordained and began a brilliant campaign against Gallicanism and anti-Christian philosophy He soon became the most celebrated French cleric, and for long he was the most open ultramontane in France He felt that the Church could have no real liberty under a royal government and that free speech and free press were necessary After founding a society to encourage ultramontanism, he and his friends MONTALEMBERT and LACORDAIRE founded (1830) the journal *Avenir* His work created a sensation, and he was soon embroiled with the conservative, royalistic Gallicans among the clergy In 1831 he went to Rome to submit his quarrel to the pope, Gregory XVI, only to be condemned in the encyclical *Mirari vos* He retired for two years and appeared in public as a non-Christian His *Paroles d'un croyant* (1834) was the greatest work of this period In it he voiced his broad liberal humanitarianism He died excommunicate Paradoxically, Lamennais probably did more than any other to break down Gallicanism and to open the way for the universal acceptance of the papal authority by French Catholics

Lamentations, book of the Old Testament, placed in AV immediately after Jeremiah, to whose authorship it has been ascribed since ancient times It is a series of five poems mourning the fallen Jerusalem Each poem is an alphabetical acrostic, the third having three verses to the letter, instead of one, the fifth is a prayer Critics generally—including those denying the traditional authorship—would place these poems in the years soon after the fall of the city (586 B C) For bibliography, see OLD TESTAMENT

La Mesa (lu mā'su), city (1940 pop 3,925, 1949 special census pop 10,180), S Calif, near San Diego, in a farm area, inc 1912

Lamesa (lumē'su), city (1940 pop 6,038, 1947 estimated pop 9,100), co seat of Dawson co, NW Texas, on Sulphur Springs Creek and S of Lubbock, on the southern part of the Llano Estacado, settled 1903, inc 1917 Dry farming and irrigation in the region produce cotton, small grains, black-eyed peas, and soybeans

La Mettrie, Julien Offray de (zhulyĕ' ôfrā' du la mătrē'), 1709-51, French physician and philosopher On the basis of personal observation he claimed that psychical activity is the result of the organic construction of the brain and nervous system and developed this theory in *Histoire naturelle de l'âme* (1745) The protest against this monistic materialism was so strong that La Mettrie had to leave the country He further alienated the public with *L'Homme machine* (1748), the final development of the mechanical explanation of man and the world He was patronized by Frederick the Great, living in Berlin under the monarch's protection His ethics, purely hedonistic, are set forth in *L'Art de jouir* (1751)

Lamia (lā'mēu), in Greek mythology, grief-crazed woman whose name was used to frighten children Her own children were killed by Hera, jealous of Zeus' love for her, and thereafter Lamia, out of envy for happy mothers, stole and killed their children The name Lamia was also used for a woman who lured a youth to his destruction

Lamia (lā'mēu, Gr lămē'ä), city (pop 16,542), E central Greece. It is an agricultural trading center Founded about the 5th cent B C, it was the chief city of the small region of Malis and developed as an Athenian ally It gave its name to the Lamian War (323–322 B C), waged by the confederate Greeks against ANTIPATER, who took refuge in the city and was besieged there for several months Antipater finally defeated (322 B C) the confederates at Crannon, SW of Larissa Lamia suffered some damage in the Second World War It was known as Zitsuni from the 10th to the 19th cent

Lammermuir Hills (lămurmŭr', lā'murmŭr) or **Lammermoor Hills** (lămurmōr', lā'murmōr), broad range of hills, S East Lothian and N Berwickshire, Scotland, extending from Gala Water ENE to St Abb's Head Says Law or Meikle Says Law (1,749 ft) is the highest point, and Lammer Law (1,733 ft) next highest

Lamoni (lămō'nē), town (pop 1,567), S Iowa, near the Mo line S of Des Moines, platted 1879 by the Reorganized Church of Jesus Christ of Latter-Day Saints, inc 1885 Graceland College (junior, coeducational) and a home for the aged are here

Lamont, Daniel Scott (lumŏnt), 1851–1905, American cabinet officer, b Cortland, N Y A journalist, through his work on the Albany *Argus* he became acquainted with Grover Cleveland He became Cleveland's private secretary and was advanced to be Secretary of War in Cleveland's second administration

Lamont, Johann von (yō'hän fŭn la'mônt), 1805–79, Scottish-German astronomer and magnetician, b Scotland In 1817 he went to Ratisbon to study at the seminary, and he remained in Germany, working in a new observatory at Bogenhausen He became its director in 1835 and professor of astronomy at the Univ of Munich in 1852 His most important work was in the field of terrestrial magnetism, he made (1849–58) magnetic surveys in Bavaria, France, Spain, N Germany, and Denmark In 1850 he set forth the theory of the magnetic decennial period, and in 1862 the discovery of earth currents In astronomy he accomplished the cataloguing of 34,674 stars, measurement of nebulae and clusters, and studies of Uranus Lamont is the author of *Handbuch des erdmagnetismus* (1849)

Lamont, Robert Patterson (lumŏnt'), 1867–1948, U S Secretary of Commerce (1929–32) b Detroit, grad Univ of Michigan, 1891 He began working as an engineer in Chicago in 1891, and in 1912 he became president of the American Steel Foundries Corp, later associating with banking and other manufacturing companies In 1932 President Herbert Hoover appointed him Secretary of Commerce After he resigned (1932) from the cabinet, Lamont remained active in the steel industry for a short while before he retired.

Lamont, Thomas William, 1870–1948, American banker, b Claverack, N Y, grad Harvard, 1892 Lamont entered (1903) the banking business in New York city and by 1911 he became a partner of J P Morgan & Company In the 1920s and the 1930s Thomas W Lamont was sent on special missions to several countries—e g, China, Japan, Mexico, and Egypt—to help transact loans and to advise on financial matters He served on the U S commission to the Paris Peace Conference and was (1933) a U S delegate to the World Economic Conference After the reorganization (1940) of J P Morgan & Company, Lamont became (1943) chairman of the board of directors His many philanthropies included $2,000,000 to Harvard and $500,000 for the restoration of the Canterbury cathedral after the Second World War He recounted the story of his youth in *My Boyhood in a Parsonage* (1940)

Lamoricière, Christophe Léon Louis Juchault de (krēstôf' lā' lwē' zhüshō' du lamorēsyĕr'), 1806–65, French general He distinguished himself in Algeria at the head of his celebrated Zouaves and led the final expedition against Abd al-Kadir (1847) He opposed Napoleon III and went into exile In 1860, as commander of the papal army, he was routed by a superior Piedmontese force

La Motte-Fouqué, Friedrich Heinrich Karl, Baron de see FOUQUÉ

lamp. Originally a lamp was a vessel for holding oil which could be burned through a wick, but use of the term has been extended to other lighting devices Stones, shells, and other objects of suitable shape were used for burning oil in the Paleolithic period In Egypt and the East saucerlike pottery lamps were early known In Greece torches were supplemented in the 6th cent B C with potterv and metal lamps. The Greeks often used a cylindrical spout for the wick The Romans used a superior closed type of lamp, often with multiple spouts The float-wick lamp, in which the wick is supported above the oil, was probably of Egyptian origin, it survived in the West chiefly as a sanctuary lamp, but is in widespread use in the East The seven-branched "candlestick" of the Hebrews is believed to have been a support for a group of float-wick lamps Its symbolical descendant is the eight-branched Hanukkah lamp, usually of the spouted saucer type Lamps, many of which were of the primitive open-cruse type, burning vegetable or animal oils, were common from the Middle Ages to the 19th cent The Betty lamp of the American colonists and pioneers was a spouted saucer lamp with a lid. Lamps were smoky because the center of the round wick received too little air for complete combustion Flat wicks, introduced late in the 18th cent, made less smoke, but the light was dim at the edges of the wick At about the same time a circular wick with an open center was invented in France by Aimé Argand, who also introduced the glass lamp chimney One- and two-burner lamps were common from the late 18th cent, and these often burned whale oil Kerosene, used from the mid-19th cent, almost entirely superseded other oils for lamps, the kerosene lamp is still used for lighting where gas and electricity are not available and in many safety, signal, and hurricane lamps In literature and art the lamp symbolizes learning, in religious ritual, honor to the divine For the development of the electric lamp, see LIGHTING See F W Robins, *The Story of the Lamp* (1939)

Lampasas (lămpă'sus), city (pop 3,426), co seat of Lampasas co, central Texas, NNW of Austin, settled 1854, inc 1874 An early cow town, it today ships principally mohair, wool, dairy products, furs, and pecans Hancock Springs here have medicinal properties

lampblack see CARBON and SOOT

Lampedusa (lămpädōō'zä), Mediterranean island (77 sq mi, pop 3,821), largest of the Pelagic Islands, between Malta and Tunis It belongs to Italy Sponge and sardine fishing and agriculture are the main occupations

Lampman, Archibald, 1861–99, Canadian poet, b Morpeth, near Chatham, Ont A civil servant by profession, he was a noted nature poet, whose work appeared in *Among the Millet* (1888) and two later volumes A collected edition was edited by D C Scott (1900) and a further volume by E K Brown (1943) See C Y Connor, *Archibald Lampman* (1929)

Lamprecht, Karl (kärl' läm'prĕkht), 1856–1915, German historian He advocated a new kind of history writing, based on broad social, cultural, and psychological trends His chief works are *Die kulturhistorische Methode* (1900) and a monumental multivolume history of Germany (1901–13) Several of his lectures have been translated as *What Is History?* (1905)

lamprey see FISH

Lampsacus (lămp'sukŭs), ancient Greek city-state, Mysia, on the Hellespont opposite Callipolis (Gallipoli) It was known as Pityusa prior to colonization by Ionian Greeks from Phocaea and Miletus The king of Persia assigned it to Themistocles, to provide him with wine After the battle of Mycale (479 B C) the citizens joined with the Athenians, and the city continued to flourish under the Greeks and Romans It was the seat of the cult of Priapus

Lamy, Jean Baptiste (zhä' bätēst' lămē'), 1814–88, Roman Catholic archbishop in the U S Southwest, b France He was ordained in 1838 and was sent shortly afterwards as missionary to S Ohio. Ordered to New Mexico in 1850 as vicar apostolic, he and a companion, Father MACHEBEUF, reached Santa Fe by way of New Orleans and Texas In Santa Fe he found resentment among the Spanish and Indians Leaving Father Machebeuf in charge, he made the long journey to Durango to see the authorities Though the Spanish priests were at first hostile, Lamy won their devotion In 1852 he was responsible for the establishment of the first school for teaching English in Santa Fe, and he brought from France and the eastern states nuns and priests to establish other schools He was advanced to bishop in 1853 and to archbishop in 1875 Until 1885 he worked tirelessly in his vast region, which included, besides present New Mexico, most of Arizona and parts of Utah, Nevada, and Colorado His labors were in large part responsible for the renewed hold of the Catholic faith upon whites and Indians in the Southwest Willa Cather's novel, *Death Comes for the Archbishop* (1927), is based on his career

Lanai (lunī'), island (141 sq mi, pop 3,720), c 7 mi. W of Maui, across Auau Channel, one of the Hawaiian Islands The highest point is Mt Palawai (3,370 ft) Used for years only for cattle grazing, Lanai was developed as a pineapple-growing center after 1922 Kaumalapau was made a port, and Lanai City was built

Lanai City, town (pop 3,597), on E Lanai, T H, founded 1922 by the Hawaiian Pineapple Company

Lanark, county, Scotland see LANARKSHIRE

Lanark (lă'nurk, -ärk), burgh (pop 6,178), co seat of Lanarkshire, Scotland, SE of Glasgow and on the Clyde near a series of falls It is a cattle market The burgh was the scene of some of Sir William Wallace's activities On an adjacent moor is a racecourse Robert Owen made industrial and social experiments at New Lanark (to the southwest), which was founded by his father-in-law, David DALE, in 1785 Arkwright also worked there

Lanark, city (pop 1,292), NW Ill, NW of Dixon, inc 1867 It is a farm trade center

Lanarkshire (lă'nurkshĭr, lă'nark-) or **Lanark,** county (892 sq mi, 1931 pop 1,586,047, 1948 estimated pop 1,639,523), S central Scotland The county town is Lanark The region, which lies in the valley of the Clyde and is sometimes referred to as Clydesdale, has a varied terrain, rising from the

level valley in the north to more than 2,000 ft. in the mountainous southern portion (Tinto Hill, 2,335 ft.) In the north, on the Clyde, is the great port and industrial center of Glasgow; in and near this city are extensive shipyards, engineering works, brick factories, textile plants, and various other manufactures In this district, too, are the rich mineral deposits of the county—coal, ironstone, fire clay, shale, and lead. The central part of the county is an undulating agricultural region Oats, wheat, potatoes, turnips, and market produce for Glasgow are raised Clydesdale work horses, cattle, and sheep are bred, and dairying is important The region was never wholly subjugated by the Romans In the Christian era it became part of the kingdom of Strathclyde and was subdued by the Northumbrian Saxons in the 7th cent Langside saw the defeat of Mary Queen of Scots, and in the 17th cent Lanarkshire was the scene of battles between the Covenanters and the king.

Lancashire (lăng'kushĭr, -shŭr), **Lancaster** (lăng'kustur), or **Lancs** (lăngks), county (1,878 sq mi.; 1931 pop 5,039,455, 1948 estimated pop 5,064,720), NW England, on the Irish Sea The county seat is Lancaster The eastern and northern portions of the county are part of the picturesque Lake District; in the west and south are lowlands and occasional moors, with rich deposits of iron ore, coal, slate, and sandstone The principal rivers are the Mersey and the Ribble The coast line is low and much broken by estuaries. Morecambe Bay separates FURNESS from the rest of the county Lancashire is the most populous county of England, and its two great cities, MANCHESTER and the famous port of LIVERPOOL, are the heart of one of the great industrial regions of the world. The chief manufactures are iron and steel products, textiles, paper, chemicals, rubber goods, and glass There are large shipyards, notably at Liverpool and Barrow-in-Furness. Throughout the 19th cent Manchester was the greatest cotton-manufacturing center in the world, but its importance has declined somewhat in recent years Lancashire in Anglo-Saxon times was part of the kingdom of Northumbria In 1351 it was made a county palatine, and in 1399 the palatine rights were vested in the king, one of whose ministers to the present time has the title chancellor of the duchy of Lancaster. Lancashire's prosperity began in medieval times with the introduction of the woolen industry, but the process was accelerated by the Industrial Revolution, and the population increased greatly in the 19th and early 20th cent See *Victoria History of Lancaster* (8 vols, 1906–14), Arthur Mee, *Lancashire* (1937)

Lancaster, Joseph, 1778–1838, English educator In 1801 he founded a free elementary school, using a type of MONITORIAL SYSTEM for which he acknowledged his debt to Andrew BELL The Royal Lancasterian Society was later established to direct the school, and its founder, embittered by controversy with the society and with Bell, whose system had the support of the Established Church—Lancaster was a Quaker—came to America to lecture His efforts to establish a school at Baltimore were ended by his failing health He removed to Venezuela, and later to Canada and to New York city, to promote his educational ideas His writings on his system include *Report of Joseph Lancaster's Progress from 1798* (1810)

Lancaster, Thomas, earl of see LANCASTER, HOUSE OF.

Lancaster, county, England see LANCASHIRE

Lancaster (lăng'kustur), municipal borough (1931 pop. 43,383, 1947 estimated pop 51,110), co seat of Lancashire, England, on the Lune river not far from the sea There are textile factories, manufactures of farm machinery, linoleum, and soap, and flour mills Lancaster Castle occupies the site of a Roman camp It has an ancient keep and a Norman tower (built 1170) with a turret called John o' Gaunt's Chair St. Mary's Church dates mostly from the 15th cent.

Lancaster. 1 City (pop 1,999), co. seat of Garrard co, central Ky, S of Lexington, in the bluegrass region, settled 1798 Near by is the site of Kennedy House, Harriet Beecher Stowe is said to have used in *Uncle Tom's Cabin* stories associated with the Kennedys 2 Town (pop 2,963), central Mass., NE of Wachusett Reservoir, settled 1643, inc 1653 It has one of Bulfinch's finest churches (1817). A bird museum is here Luther Burbank was born in Lancaster 3 Town (pop 3,095), co seat of Coos co, NW N.H, at the influx of the Israel into the Connecticut, ENE of St Johnsbury, Vt.; inc 1764 It is a trade center for White Mt. resorts Artemus Ward was an apprentice on the *Coos County Democrat* here 4 Residential village (pop 7,236), W N Y, E of Buffalo, settled 1810, inc 1849 Glass products are made here. 5 City (pop 21,940), co. seat of Fairfield co., S central Ohio, SE of Columbus and on the Hocking river; founded 1800 as New Lancaster. It has extensive flint-glass manufacture. Shoes, farm implements, foundry products, and electrical products are also made. William Tecumseh Sherman and Thomas Ewing were born here. Near by is the state industrial school for boys 6 City (pop. 61,345), co. seat of Lancaster co., SE Pa, on the Conestoga river and c 65 mi W of Philadelphia; settled c 1721, laid out 1730, inc as a borough 1742, as a city 1818 In the heart of the Pennsylvania Dutch region, it is the commercial center for one of the most productive agricultural counties in the country. The chief products are tobacco, small grains, and livestock It is an important tobacco market and has one of the largest stockyards E of Chicago Lancaster manufactures linoleum, watches, cork, cigars, silk goods, and metal products It is the seat of FRANKLIN AND MARSHALL COLLEGE and of a theological seminary The language and customs of the city reflect the effect of settlement by various German religious groups A munitions center during the Revolution, it was briefly in 1777 a meeting place of the Continental Congress and was capital of the state for more than 10 years before 1812 It was the western terminus of the Lancaster Turnpike Robert Fulton was born here, and President Buchanan is buried in the city His home, "Wheatland," was dedicated as a historic memorial in Oct., 1937. 7 Town (pop 4,430), co seat of Lancaster co, N S C, NNE of Columbia and near the N C line It is a textile-milling center in a farm area The jail and the courthouse (both designed by Robert Mills and built in 1823) are notable 8 City (pop 1,151), N Texas, SSW of Dallas, in a blackland farming area, settled 1846, inc 1886 9 City (pop 2,963), co seat of Grant co, SW Wis, N of Dubuque, Iowa, in a farm and dairy area, settled before 1840, inc 1878

Lancaster, house of (lăng'kustur), royal family of England The title began when Henry III gave it (1267) to his second son, Edmund, earl of Lancaster (1245–96) Earlier (1254) the prince had been made titular king of Sicily when the pope had offered that crown to Henry III in order to keep it from being allied with the empire, but the English refused financial support for the Sicilian wars and the title lapsed From the cross which he wore on a crusade to Palestine in 1271 he was called Edmund Crouchback, or crossed back, a name which he made famous by his military commands in his later years Edmund's son Thomas, earl of Lancaster (1277?–1322), inherited the title and lands, under Edward II opposed the king's favorite, Piers Gaveston, and led the baronial party which tried unsuccessfully to drive Hugh Despenser and his son from England When the Despensers were victorious, Thomas was beheaded for treason His brother Henry, earl of Lancaster (1281?–1355), was the chief adviser to the young Edward III in getting rid of the dominance of the queen mother, Isabella, and her paramour, Roger Mortimer, 1st earl of March His son, also Henry, earl of Lancaster (1299?–1361), for his excellent service as a military commander in the early part of the Hundred Years War, was made duke When he died without male heirs, his daughter Blanche married the fourth son of Edward III, JOHN OF GAUNT, who inherited the Lancaster lands in her right, and who was made duke of Lancaster in 1362 His son Henry ascended the throne as HENRY IV (after deposing RICHARD II), and later Lancastrian kings were HENRY V and HENRY VI The rival royal house of York based its claims on descent from John of Gaunt's brother, Lionel, duke of Clarence, as well as from his brother Edmund, duke of York, and the Wars of the Roses (see ROSES, WAR OF) was the result of the struggle of the houses of Lancaster and York for the throne Moreover, through John of Gaunt's sons by his third wife, the Beauforts, the royal claim passed to their descendants, the house of TUDOR

Lancaster Sound, c 200 mi long and 40 mi wide, arm of Baffin Bay, E Franklin Dist., Northwest Territories It extends west between Devon Island and Baffin and Somerset islands and leads by way of Barrow Strait to the Beaufort Sea. It was discovered in 1616 by William Baffin

Lancelot (lăn'sulŏt, -lō̆t) or **Ladislaus** (lă'dĭslôs, -lûs), c 1376–1414, king of Naples (1386–1414), son and successor of Charles III Almost his entire reign was consumed by his struggle with the ANGEVIN rival king of Naples, LOUIS II, and with the antipope John XXIII (see COSSA, BALDASSARRE) Fortunes shifted repeatedly, but at his death Lancelot was able to make over his kingdom to his sister, Joanna II Lancelot occupied Rome several times under various pretexts and in 1413 had it sacked.

Lancelot du Lac: see ARTHURIAN LEGEND.

Lanchow or **Lan-chou** (län'jō'), city (pop 156,468), capital of Kansu prov, W China. It lies on the Yellow River and on the main trade route to Sinkiang and Tibet Tobacco is processed

Lanciani, Rodolfo Amadeo (rōdôl'fō ämädā'ō länchä'nē), 1847–1929, Italian archaeologist. From the age of 20 he was almost continuously in the service of the Italian government He discovered many important Roman antiquities and was made director of excavations (1875), professor of Roman topography in the Univ. of Rome (1878), and a senator (1911). He wrote and lectured about his work, appearing on the American platform in 1886–87 Among his works in English are *Wanderings in the Roman Campagna* (1909) and *Ancient and Modern Rome* (1925).

Lancret, Nicolas (nēkôlä' läkrā'), 1690–1743, French painter. A fellow student with Watteau, he may be said to have popularized his manner. His favorite subjects were balls, fairs, and similar festivities, of which he painted a vast number in a vivid and pleasing style While his work is not equal to Watteau's in color or poetic quality, it is brilliant and able Examples are in the Louvre and in the National Gallery, London. See Edmond Pilon, *Watteau et son école* (1912).

Lancs see LANCASHIRE

Land, Emory Scott, 1879–, American admiral and chairman of the U S Maritime Commission (1938–46), b Canon City, Colo, grad. Annapolis, 1902, M S Massachusetts Institute of Technology, 1907 He was assigned (1904) to construction work in the U S navy and served in the First World War with the naval Bureau of Construction and Repair In 1932 he became the head of the bureau Admiral Land resigned (1937) from the navy and shortly afterward was appointed by President F D Roosevelt to the U S Maritime Commission As chairman of the U S Maritime Commission in the Second World War, Land led in the construction of the largest merchant fleet the United States ever had.

land, in law, any ground, soil, or earth regarded as the subject of ownership, including trees, water, buildings added by man, the air above, and the earth below Private ownership of land does not exist in groups that live by hunting, fishing, or herding, such as the Indians of pre-Columbian times in America, for example, when the tribe owned the land and each tribesman had equal access to it and equal rights to its use In simple agricultural groups, as in early Europe, the VILLAGE community made an annual allotment of land to individuals for cultivation Similar allotments were made under the MANORIAL SYSTEM A communal form of rural landholding persisted in Russia into the 20th cent and still exists in India The modern sovereign state asserts dominion over all property within its territorial limits, including the land, and by the right of eminent domain can seize privately owned land for public use In Soviet Russia ownership to all land is vested in the nation outright, individuals and organizations being granted provisional rights to its use Widely distributed ownership of farm land has been regarded in Western countries as economically and socially advantageous. The concentration of landholding in few hands has led to political unrest and upheaval, as in Mexico, Spain, Italy, Eastern Europe, and China In economics the term *land* is used to designate one of the main factors of production, it is another name for nature or natural resources. It includes not only farm land but pasture land, forests, mineral lands, water-power sites, building sites, and land for roads and railroads But few natural resources are free, farm land, for instance, is useless without cultivation Man must apply to it labor and capital if he would extract from it the crops that are capable of satisfying his wants In economic theories of value, the share assigned to land as a factor in production is called rent

Landau, Mark Aleksandrovich see ALDANOV, MARK

Landeck (län'dĕk"), town (pop 5,406), Tyrol, W Austria, on the Inn and WSW of Innsbruck On a near-by height is the old castle of Landeck.

Lander, Frederick West, 1821–62, American civil engineer, Union general in the Civil War, b Salem, Mass Educated at Norwich (Vt.) Univ, he first did survey work on Eastern railroads In 1853 he was an engineer in the survey conducted by I I STEVENS for a northern railway to the Pacific. He was later superintendent of the great overland wagon route In the Civil War he was made a brigadier general of volunteers and served with G. B McClellan in West Virginia He died before taking part in any major engagement

Lander, Richard Lemon, 1804–34, English explorer He accompanied Clapperton to the Niger in 1827 and brought back Clapperton's journal, which was published (1829) with an account of Lander's return to the coast Accompanied by his brother John Lander (1807–39), he led an expedition (1830–31) to determine the course of the lower Niger and discovered that the river emptied into the Bight of Benin The brothers published their combined journals (3 vols, 1832) Richard Lander died of wounds received on a trading expedition to the Niger (1832–34); an account of the trip was published by survivors, Macgregor Laird and R. A K. Oldfield

Lander, city (pop. 2,594; alt. c 5,360 ft.), co. seat of Fremont co, W central Wyo., on the Popo Agie river, settled c 1870, inc. 1890 It is a tourist center in a dude-ranch, livestock, farm, and mineral (coal and oil) area and is headquarters for Washakie National Forest. Fort Washakie, trade center for the near-by Wind River Indian Reservation, is northwest.

Landes (lăd'), **region, SW France,** a vast flat tract of sand and marshland, stretching along the Atlantic coast for more than 100 mi. between the Adour river and the Médoc region and reaching inland as much as 40 mi. It thus covers most of Landes dept and part of Gironde dept. Sheep grazing used to be the only occupation in this insalubrious country, but much of the land has been reclaimed through drainage and the planting of pine forests. Agriculture is progressing, and lumber and resins are important products. The chief towns are Mont-de-Marsan, Dax, and Arcachon, a popular beach resort.

Landes, department (3,614 sq. mi., pop. 248,395), SW France, in Gascony, on the Atlantic coast. It is the southern part of the Landes region. Mont-de-Marsan is the capital.

land-grant colleges and universities, institutions benefiting from the provisions of the Morrill Act of 1862. The Hatch Act (1887) provided for research and experiment station divisions, the Smith-Lever Act (1914) for extension work in agriculture and home economics. The 69 institutions include the universities of Alaska, Hawaii, and Puerto Rico. See E. D. Ross, *Democracy's College* (1942).

Landis, James McCauley, 1899–, American lawyer and public official, b. Tokyo, Japan, of American parents, grad. Princeton (B. A., 1921) and Harvard (LL. B., 1924). At first a law clerk (1925) to Associate Justice Louis Brandeis, Landis was assistant professor (1926–28) and professor (1928–34) at Harvard Law School, of which he later became dean (1937–39). He was appointed (1933) by President F. D. Roosevelt to the Federal Trade Commission, and he then served (1934–37) on the Securities and Exchange Commission, becoming its chairman in 1935. After he resigned (1946) as dean at Harvard, he served (1946–47) as chairman of the Civil Aeronautics Board. With Felix Frankfurter he wrote *The Business of the Supreme Court* (1927). His books also include *Cases on Labor Law* (1934) and *The Administrative Process* (1938).

Landis, Kenesaw Mountain, 1866–1944, American jurist and commissioner of baseball (1921–44), b. Millville, Butler co., Ohio, grad. Union College of Law (now Northwestern Univ. law school), 1891. He practiced law in Chicago after 1891, the year he was admitted to the bar, and later served (1905–22) as a U. S. district judge in N. Illinois. In 1907 he imposed a $29,240,000 fine on the Standard Oil Company of Indiana in a rebate case. The decision won him wide acclaim, though it was reversed by a higher court. In 1917 he sentenced William D. Haywood, American labor leader, to a 20-year prison term. After organized baseball was confronted (1920) with the "Black Sox" scandal, a committee of baseball executives appointed (1921) Landis—who had presided at the case in which the newly organized Federal League brought suit against the National and American Leagues for violating the Sherman Anti-Trust Act—to the new post of baseball commissioner. Landis immediately barred from organized baseball the eight Chicago White Sox players charged with bribery in the 1919 world series. The strict discipline he imposed on baseball players and managements did much to restore public faith in the national pastime. See biography by J. G. T. Spink (1947).

Landis, town (pop. 1,650), W. central N. C., SSW of Salisbury, in a cotton-growing area.

Land League see Irish Land Question.

Landon, Alfred Mossman, 1887–, American politician, b. West Middlesex, Pa., grad. Univ. of Kansas, 1908. He was a banker and oil operator before he ran for public office. Landon served (1933–37) as governor of Kansas and gained a national reputation by his economical administration. As Republican candidate for President of the United States in 1936, he carried only Maine and Vermont. He was a delegate (1938) to the Pan American Conference at Lima.

Landon, Letitia Elizabeth, pseud. **L. E. L.,** 1802–38, English poet and novelist, whose contributions in verse to the *Literary Gazette* had wide appeal. A well-known literary figure, she married George Maclean, governor of Cape Coast, Africa, and died there under circumstances which have remained a mystery. See D. E. Enfield, *L. E. L.* (1928).

Landor, Walter Savage, 1775–1864, English author and poet, educated at Oxford. After a quarrel with his father, he retired to Wales, where he wrote the poem *Gebir* (1798). Landor inherited the family estates after his father's death, served (1808) in the Spanish rising against Napoleon, and purchased Llanthony Abbey in 1809. His dramatic poem *Count Julian* appeared in 1812. The later and more productive years of his life were mostly spent in Italy, where he died. The best known of his writings, *Imaginary Conversations* (1824–53), consisting of nearly 150 prose dialogues between notables both ancient and modern, are written in a style of dignity and restrained splendor. Landor's verse ranges from the epic to the epigrammatic, including some lyrics of great simplicity and intensity, such as the lines on Rose Aylmer. His other works include *Poems* (1795), *Citation and Examination of Shakespeare* (1834), *Pericles and Aspasia* (1836), *Pentameron* (1837), *Hellenics* (1847), and *Heroic Idylls* (1863). See his complete works (ed. by T. E. Welby and Stephen Wheeler, 1927–36); biographies by John Forster (1869), Sidney Colvin (1881), and Malcolm Elwin (1941).

Landowska, Wanda (vän'däländôf'skä), 1877–, Polish-French harpsichordist and pianist, studied at the Warsaw Conservatory. She taught piano (1900–1912) at the Schola Cantorum, Paris, and harpsichord (1912–19) at the Berlin Hochschule. At Saint-Leu-la-Forêt, near Paris, she established her École de Musique ancienne and there, between 1919 and 1940, gave many concerts of early music. She made her American debut on both harpsichord and piano with the Philadelphia Orchestra in 1923. Largely responsible for the revival of interest in the harpsichord and its music, she is also the author of *Music of the Past* (Eng. tr., 1924). Manuel de Falla and Francis Poulenc wrote concertos for her.

Landrum, town (pop. 1,289), NW S. C., at the N. C. line NW of Spartanburg.

Landsberg (lants'bĕrk'), town (pop. 11,946), Upper Bavaria, on the Lech and W. of Munich. Its fortress served as a political prison. Adolf Hitler wrote *Mein Kampf* while imprisoned here.

Landsberg an der Warthe (lants'bĕrk an dĕr vär'tu) or **Gorzow Wielkopolski,** Pol. *Gorzów Wielkopolski* (gôr'zōōf vyĕlkôpôl'skē), town (1939 pop. 48,053, 1946 pop. 19,796), E. Brandenburg, on the Warthe river, transferred to Polish administration in 1945 (see Brandenburg). Incorporated in 1257, it fell to the Swedes four times and was destroyed in the Thirty Years War. The town rose again in the 18th cent. In the Second World War it again suffered great destruction. Mainly a transportation and trade center, it also has several industries, and there are lignite deposits near by. Landsberg is now an episcopal see. The Polish government plans to make it a center of Polish culture. The present population is entirely Polish.

landscape architecture or **landscape gardening,** the art of modifying natural scenery around dwellings, public buildings, and housing projects and of planning parks, playgrounds, and exposition grounds. The formal style of landscaping emphasizes balanced plantings and geometric design, the naturalistic style seeks to give an effect of natural growth. The Egyptians made formal walled gardens. In Mesopotamia were developed private parks and terraced gardens usually on artificial mounds or supported on columns, as the Hanging Gardens of Babylon. The Persians were especially skilled in devising water features. The Moors carried the styles of the Near East to Spain. In the East the planting of sacred groves was carried by the Buddhists from India to China and set a style there for naturalistic gardens. Landscapes were imitated and were scaled to the selected tract, every tree and rock carried its symbolism. Japan simplified the Chinese mode and extended its symbolical character. In Europe landscaping was highly developed under the Roman Empire; formal gardens, often terraced and ornamented with statuary, were designed by architects. Classical styles were revived in Italy during the Renaissance, and Italian gardens, planned by leading artists, were widely imitated. In Spain, Italian influence was modified by Moorish features. The Dutch notably developed topiary work. France became the leader in formal landscaping with the work of André Lenôtre, exemplified in the gardens of Versailles. In the 18th cent. England inaugurated a reaction toward naturalism under such leaders as William Kent, Lancelot Brown, and Humphrey Repton. The 19th cent. brought a partial reversion to formal landscaping and interest in horticulture as well as in design. American landscape artists have generally worked in the spirit of the English masters. Interest in landscaping, especially of public parks and buildings, was stimulated by the work of A. J. Downing, Calvert Vaux, and F. L. Olmsted. Today landscape design stresses practical use as well as aesthetic features, styles are eclectic, and emphasis is on naturalism. See trees and garden. See Richardson Wright, *The Story of Gardening* (1934), M. E. Bottomley, *The Art of Home Landscape* (1935), M. O. Goldsmith, *Designs for Outdoor Living* (1941).

landscape painting. As an independent art landscape painting was a late development in the West. El Greco's *View of Toledo* (Metropolitan Mus.), painted in the early 17th cent., is thought to be one of the earliest ambitious works of the kind. Despite the splendid achievements of the Dutch 17th-century landscape painters (see Dutch art) and of Claude Lorrain, the art did not enjoy a very high status or general popularity in Europe until the 19th cent., when it had an unprecedented development. The great English landscape painters, J. M. W. Turner and John Constable, and the Barbizon school in France were succeeded by the French plein-air, impressionist school (see impressionism) which dominated the close of the century. In the United States the Hudson River school was the first manifestation of a lively interest in landscape painting. In China the art reached extraordinary perfection as early as the 8th cent. and engaged the highest talents during the Sung, T'ang, and Ming dynasties, and this prominence given to landscape painting is also seen in the paintings and prints of Japan. See C. L. Hind, *Landscape Painting from Giotto to the Present Day* (1923), Adrian Stokes, *Landscape Painting* (1925), Wolfgang Born, *American Landscape Painting* (1948), Kenneth Clarke, *Landscape Painting* (1950).

Landseer, Sir Edwin Henry (lăn'sēr), 1802–73, most popular of English animal painters, especially remembered for his appealing interpretation of dogs. His animals seem endowed with almost human characteristics. He was one of the most prolific and successful artists of his period, and innumerable engravings were made of such works as *The Stag at Bay* and *Dignity and Impudence*. He became an Academician in 1831, was knighted in 1850, and in 1865 declined the presidency of the Royal Academy. See study by W. Cosmo Monkhouse (1879–80).

Lands End, promontory, Cornwall, forming the westernmost extremity of England. It is the Bolerium of Ptolemy and the Bellerium of the Romans. Of wave-carved granite, it has cliffs 100 ft. high. There are reefs and rocky islets, on one of which is Longships Lighthouse.

Landshut (lants'hōōt), city (pop. 43,881), capital of Lower Bavaria, on the Isar river. It has manufactures of food products and precision instruments. The castle dates from the 12th cent., and there are several old churches. From 1800 until 1826 it was the seat of the Bavarian university, now at Munich.

Landskrona (lanskrōō'nə), seaport (pop. 23,010), Malmohus co., S. Sweden on the Oresund. It has an excellent harbor. Shipbuilding, flour milling, sugar refining, and the making of chemicals are the chief industries. Founded in 1413, the town was burned by Hansa merchants in 1428 and devastated in wars in the 16th and 17th cent. when its citadel (built 1540) was rebuilt and strengthened. In 1677 the Swedes won a naval victory at Landskrona over the Danes, and in 1680 it was strongly fortified. The old fort now houses a public institution. Near by is the island Ven.

landslide, the slipping or sliding down of a mass of rock debris and earth from the face of an elevation to a lower level. The cause of most landslides is the saturation of the rock and earth with water derived either from rainfall or from the melting of frost, which increases the weight of the mass and at the same time lubricates it so as to overcome the friction which holds it in place. Landslides are also caused by jarring of the ground in the course of an earthquake. Landslides are very destructive to forests, tilled fields, and human habitations. They sometimes cause floods by damming up streams or by raising the level of bodies of water. See C. F. S. Sharpe, *Landslides and Related Phenomena* (1938).

Landsteiner, Karl (karl' länt'shtīnur), 1868–1943, American medical research worker, b. Vienna, M. D. Univ. of Vienna, 1891. In 1922 he came to the United States to join the staff of the Rockefeller Institute. He later became a citizen. As emeritus member of the institute after 1939, he actively continued his research. For his discovery of human blood groups he won the 1930 Nobel Prize in Physiology and Medicine. He made contributions of great value as a result of his research in immunology and the chemistry of antigens and serological reactions, in hemolysis, and in methods of studying poliomyelitis. In 1940 he identified, in collaboration with A. S. Wiener, the Rh blood factor. Besides numerous papers he wrote *The Specificity of Serological Reactions* (1936).

Landsting see Rigsdag.

land tax, probably the earliest direct tax and formerly the chief source of government revenue. It was known in ancient China and Egypt. In ancient times conquered peoples were taxed, i.e., paid tribute, for their use of the land taken in conquest. Until modern times European countries depended almost exclusively on this form of taxation. In the United States the land tax (including the tax on all real property) has been the chief method of collecting local revenue, though many states have added an income tax. The tax may be based on the sale value of the property, though a fairer method is the classification of the land according to its productiveness. Australia and New Zealand have land taxes differentiated according to the size of the estate and the nature of its tenure, i.e., an absentee landlord is taxed at a higher rate. The argument against the land tax is that it raises the cost of agricultural production. For special theories of land tax, see physiocrats and single tax. See R. T. Ely and E. W. Morehouse, *Elements of Land Taxation* (1924), S. E. Leland, *The Classified Property Tax in the United States* (1928).

Lane, Edward William, 1801–76, English Orientalist. He went (1825) to Egypt for his health and became an authority on Egypt and the Arabic language. He wrote *Account of the Manners and Customs of the Modern Egyptians* (1836), translated the *Thousand and One Nights*, and began to compile an Arabic lexicon, which was continued after his death by his grandnephew, Stanley E. Lane-Poole.

Lane, Franklin Knight, 1864–1921, American lawyer, Secretary of the Interior (1913–20), b. near

Charlottetown, P E I , educated at the Univ of California Admitted to the bar in 1889, he practiced law in San Francisco, edited progressive newspapers, and entered reform politics His unsuccessful campaigns for governor of California (1902) and mayor of San Francisco (1903) won national attention, and in 1905 President Theodore Roosevelt appointed him to the Interstate Commerce Commission, of which he was chairman from Jan to March, 1913 As Secretary of the Interior under President Wilson, he was a conservationist, and he also sought to increase the self-reliance and independence of the Indians He promoted self-government in Alaska and sponsored the Alaska RR from Seward to Fairbanks to tap the interior He served on special commissions and on the Council of National Defense See his letters (ed by his wife, Anne W Lane, and L H Wall, 1922)

Lane, Henry Smith, 1811–81, American politician, b Bath co , Ky He moved to Crawfordsville, Ind , where he practiced law He served in the state legislature, was a Whig in Congress (1840–43), and rose to be a lieutenant colonel in the Mexican War Lane was a leader in the organization of the Republican party in his state and presided over the party's first national convention in 1856 Elected governor of Indiana in 1860, he soon resigned to become U S Senator (1861–67)

Lane, James Henry, 1814–66, American politician, called the "Liberator of Kansas" He was probably born in Lawrenceburg, Ind where he practiced law Lane commanded an Indiana regiment in the Mexican War and was lieutenant governor (1849–53) and Congressman (1853–55) Having voted for the Kansas-Nebraska Bill, he moved to Kansas, where he soon joined the Free State forces and united their several factions He was president of the convention at Topeka that framed a Free State constitution and set up a state government, with himself as Senator-elect After the Senate refused to admit Kansas under this constitution, Lane traveled throughout the Old Northwest, encouraging antislavery men to emigrate to Kansas He led the Free State militia in subsequent armed clashes with proslavery troops and directed the campaign by which his party won control of the territorial legislature When Kansas was granted statehood (1861), Lane was chosen one of its first Senators He was a close friend and supporter of Lincoln throughout the Civil War He led the "Kansas Brigade" in operations (1861) against Gen Sterling Price in Missouri, was for a brief time a brigadier general of volunteers, and raised (Jan , 1863) one of the first regiments of Negro troops In the Senate he favored the homestead and Pacific railroad bills and land grants to Western railroads Lane supported President Andrew Johnson's Reconstruction policy, thus losing political support in Kansas and, depressed by this and other events, finally shot himself See W H Stephenson, *The Political Career of General James H Lane* (1930)

Lane, Joseph, 1801–81, American general in the Mexican War and territorial governor of Oregon, b Buncombe co , N C Having settled in Indiana, he served a number of terms in both houses of the state legislature between 1822 and 1846 In the Mexican War he commanded a brigade under Gen Zachary Taylor at Buena Vista, later received a brevet major generalship for gallantry in action, and emerged as one of the heroes of the war In 1848 he was commissioned governor of newly organized Oregon Territory and superintendent of Indian affairs there Arriving early in 1849, he traveled through the territory settling matters between the Indians and the whites He prepared for Congress one of the most complete reports on record of the Indians of the region After resigning as governor in 1850, he became territorial delegate to the U S. Congress (1851–59) and upon admission of Oregon as a state (1859) served (1859–61) as one of its first U S Senators In 1853 he led the settlers against the Rogue Indians, defeated them, and concluded a peace treaty. See biography by Sister M Margaret Jean Kelly (1942)

Lane, Sir Ralph, c 1530–1603, leader of the first attempted English settlement in America, on ROANOKE ISLAND, N C. The expedition of over 100 colonists, sent by Sir Walter RALEGH, left (April, 1585) England in a fleet of seven ships commanded by Sir Richard Grenville They landed on Roanoke in August, but returned to England with Sir Francis DRAKE in the summer of 1586. Lane's account of the settlement appeared in Richard Hakluyt's *The Principal Navigations ... of the English Nation* (1589).

Lane, Ralph Norman Angell: see ANGELL, SIR NORMAN

Lane College: see JACKSON, Tenn.

Lane Poole, Reginald, 1857–1939, English historian, educated at Balliol College and Wadham College, Oxford, Ph D, Univ of Leipzig, 1882; brother of Stanley Lane-Poole and grandnephew of Edward William Lane He was long a lecturer on diplomatics (paleography of documents, charters, and the like) and was an outstanding authority on chronology and medieval intellectual history He was also long editor of the *English Historical Review* His work was offered mostly in lectures and articles Some of them are collected in *Illustrations of the History of Medieval Thought* (1884), *The Exchequer in the Twelfth Century* (1912), *Lectures on the History of the Papal Chancery* (1915), and *Studies in Chronology and History* (1934)

Lane-Poole, Stanley Edward, 1854–1931, English Orientalist, educated at Corpus Christi College, Oxford, brother of Reginald Lane Poole and grandnephew of Edward William Lane He worked in the coin department of the British Museum (where his uncle, R S Poole, was an official), then was (1895–97) an archaeologist for the Egyptian government He undertook to continue his grand-uncle's Arabic lexicon but did not complete it He was an authority on medieval Islam Among his better-known works (some of them very popular) were *The Moors in Spain* (1887), *The Barbary Corsairs* (1890), and *The History of the Moghul Emperors of Hindustan* (1892)

Lanesboro. 1 Town (pop 1,321), NW Mass , near Pontoosuc Lake N of Pittsfield, settled c 1753, inc 1765 2 Village (pop 1,100) SE Minn , SE of Rochester near the Root river, in hilly farm country

Lanett (lănĕt'), cotton-milling city (pop 6,141), E Ala , on the Chattahoochee and ENE of Montgomery, inc 1893

Lanfranc (lăn'frăngk), d 1089, Italian churchman, archbishop of Canterbury (from 1070), b Pavia He was educated in civil law and became a good advocate He turned to theology and became a pupil of BERENGAR OF TOURS He taught in Avranches and then went to Bec (c 1040), where he founded an illustrious school and became prior (c 1043) Among his pupils were ST ANSELM and Pope Alexander II In 1049 Berengar impugned Lanfranc's orthodoxy, and Lanfranc, successfully clearing himself, attacked Berengar in turn Some 10 years later Lanfranc wrote the treatise *De Corpore et Sanguine Domini* [concerning the Body and Blood of the Lord], which, while ineffective as a rebuttal of Berengar, became a medieval classic He was closely associated with Duke William of Normandy (William I of England) and probably helped secure papal recognition of the duke's marriage and the papal blessing for the conquest of England In 1070 William replaced STIGAND as archbishop with Lanfranc, who accepted, but only on direct command of the pope Thereafter king and archbishop worked together Lanfranc was one of the reform party of the Church (led by GREGORY VII) He replaced English abbots and bishops with Normans (a course often denounced but quite essential to any reform), reduced the archbishop of York to subjection to Canterbury, legislated against clerical marriage and concubinage, built churches, reformed ecclesiastical finance, established ecclesiastical courts, strengthened the monasteries, and removed the bishoprics from small towns to important cities Occasional friction between Church and state caused no quarrels until the reign of WILLIAM II Lanfranc had favored young William, and crowned him, but the king did much displeasing to the archbishop and barely kept from trouble until Lanfranc's death See A J MacDonald, *Lanfranc* (2d ed , 1944)

Lang, Andrew (lăng), 1844–1912, Scottish scholar and man of letters, b Selkirk, educated at the universities of St Andrews, Glasgow, and Oxford Lang wrote graceful poetry, much of it in the old forms of ballades, triolets, and rondeaus in such volumes as his *Ballades in Blue China* (1880, 1881) He was one of the first to apply anthropology to the study of myths and folklore, his best work on his theory was *Myth, Literature, and Religion* (2 vols , 1887, rev ed , 1899) He is famous for his prose translations from the Greek—the *Odyssey* (1879), with S H Butcher, and the *Iliad* (1883), with Walter Leaf and Ernest Myers—and for his defense of the unity of Homer in *The World of Homer* (1910) His translations *Aucassin and Nicolete* (1887) and *Perrault's Popular Tales* (1888) became standard He collected traditional stories for children, rewritten by Mrs Lang or himself, in his *Blue Fairy Book* (1889), followed by the *Red, Green,* and *Yellow* books Lang wrote an excellent biography of J G Lockhart (2 vols , 1896), several works on Scottish history, culminating in his *History of Scotland from the Roman Occupation to the Suppression of the Last Jacobite Rising* (4 vols , 1900–1907), and monographs on French history His poetical works were edited (1923) by his wife, Leonora Blanche Lang See biography by R L Green (1946)

Lang, Anton (ăn'tŏn lang'), 1875–1938, member of the Oberammergau Passion Players He portrayed the Christus in 1900, 1910, and 1922, and in 1930 he spoke the prologue

Lang, Cosmo Gordon (lăng), 1864–1945, English churchman, archbishop of York (1908–28), archbishop of Canterbury (1928–42), b Aberdeen, Scotland From 1901 to 1908, while suffragan bishop of Stepney, London, and canon of St Paul's Cathedral, his efforts to improve slum conditions attracted wide attention. He was an acknowledged leader in the House of Lords and supported in Parliament the proposed revision (1928) of the Book of Common Prayer Archbishop Lang, who was considered influential in the abdication of Edward VIII, crowned George VI as king in 1937 Shortly after his resignation as archbishop in 1942, Lang was created baron

Langdell, Christopher Columbus (lăng'dul), 1826–1906, American teacher of law, grad Harvard (LL B , 1853) He practiced in New York city from 1854 to 1870, when he was appointed Dane professor of law, in 1875 he became dean of Harvard Law School Together with J B AMES, who succeeded him as dean in 1895, he remade the curriculum of the school Langdell is especially famed for the introduction of the "case method" of law study In his view the principles of law are best learned by inductive study of the actual legal situations (the cases) in which they occur Much opposition was expressed by conservative teachers who believed that an abstract formulation of the law was the essential need of the student. Langdell's theory was first adopted at Harvard, then at Columbia Law School, and in time gained almost universal acceptance In recent years many schools have modified his methods by using textbooks to explain established principles and reserving case study for evolving principles Langdell prepared casebooks in the fields of contracts, equity, and sales His treatises include *A Summary of Equity Pleading* (1877) and *A Brief Survey of Equity Jurisdiction* (1905)

Langdon, John, 1741–1819, American statesman, b Portsmouth, N H A prosperous merchant, Langdon was active in pre-Revolutionary activities and in Dec , 1774, took part in capturing British military stores at Portsmouth In 1775 he became a delegate to the Continental Congress, and in Nov , 1775, he accompanied Robert R Livingston and Robert Treat Paine on an unsuccessful mission to win Canada to the patriot cause In the Saratoga campaign (1777), he offered his entire fortune to finance John Stark and saw action himself at Bennington and Saratoga After the war he was (1785–86, 1788–89) president of New Hampshire Langdon was a delegate to the Federal Constitutional Convention, and it was largely through his efforts that New Hampshire ratified the Constitution as the ninth state, thus making the instrument effective As U S Senator (1789–1801) he served briefly as first pro tempore president of the Senate After voting against Jay's Treaty, he aligned himself more and more with the Jeffersonians, but he declined national offices Langdon was governor of New Hampshire from 1805 to 1809 and from 1810 to 1812 See biography by L S Mayo (1937)

Langdon, city (pop 1,546), co seat (since 1884) of Cavalier co , NE N Dak., NW of Grand Forks, inc 1888 It is a shipping point for wheat An agricultural experiment station of the state agricultural college is here

Lange, Christian Louis (krĭs'tyan lōō'ē lang'u), 1869–1938, Norwegian pacifist and Nobel Prize winner In his youth he belonged to the radical Young Norway movement and worked for the separation of Norway from Sweden He taught in the Norwegian Nobel Institute, represented his country at The Hague Conference of 1907 and at the League of Nations, and was secretary (1909–33) of the Interparliamentary Union With Hjalmar Branting he shared the 1921 Nobel Peace Prize He wrote much on international affairs

Lange, Friedrich Albert (frē'drĭkh al'bĕrt lang'u), 1828–75, German neo-Kantian philosopher Accepting the materialistic method of investigating phenomena, he rejected its concept of nature He regarded consciousness as subjective experience, not merely the effect of matter, and submitted that speculative and idealistic concepts should be supported in their relations to the values of human existence He is celebrated for his *Geschichte des Materialismus und Kritik seiner Bedeutung in der Gegenwart* (1866, Eng tr , *A History of Materialism,* 1877)

Langeais (lăzhā'), town (pop 1,925), Indre-et-Loire dept , W central France, in Touraine, on the Loire Its handsome castle, where Charles VIII married (1491) Anne of Brittany, was slightly damaged in the Second World War

Langeland (lang'ulăn), island (110 sq. mi , pop 20,354), Denmark, in the Baltic Sea, between Fyn and Laaland It is 33 mi long and 3 mi wide Rudkoping is the main town Largely agricultural, the island produces grain The Langeland Belt, a strait c 8 mi wide between Langeland and Laaland, joins the Great Belt and the Baltic Sea

Langendijk, Pieter (pē'tur lang'dĭk), 1683–1756, Dutch dramatist His best work is perhaps the comedy of manners *De Spiegel der vaderlandsche Kooplieden* [the mirror of Dutch merchants], completed by two unknown writers after his death

Langensalza (lang"unzal'tsă), town (pop 16,013), Thuringia, central Germany, on the small Salza river and near Mühlhausen. It has machinery, cotton, and other manufactures Near by is Bad Langensalza, with sulphur springs. An early seat (13th cent) of the Teutonic Knights, the town has retained part of its medieval walls and its 13th-century castle. It was transferred (1945) from Prussian Saxony to Thuringia. Here in 1075 Em-

peror Henry IV defeated the rebellious Saxons and Thuringians, and here in 1866 the Prussians defeated the Hanoverians in the Austro-Prussian War.

Langer, William (läng'ûr), 1886–, American political leader, b Cass co, N Dak, grad Univ of North Dakota (LL B, 1906) and Columbia (B A, 1910) He served as county attorney (1914–16) and then as attorney general (1916–20) of North Dakota In the 1920s he supported Robert M. La Follette and backed Hiram Johnson for the presidency He was elected (1930) governor of the state and served until July, 1934—when he was removed by decision of the state supreme court He was sentenced to prison, and while there he was again elected (1936) governor In 1940 he was elected to the U S Senate In a close vote, the U S Senate decided (1942) not to unseat Langer on the charges of moral turpitude, and in 1947 he was again elected Senator

Langerhans, Paul (poul' läng'urhäns), 1849–88, German physician He described in 1869 the **islands of Langerhans,** insulin-producing cells in the pancreas, the malfunction of which causes diabetes See his *Contributions to the Microscopic Anatomy of the Pancreas* (1869, Eng tr, 1937)

Langevin, Sir Hector Louis (läzhuvĕ'), 1826–1906, b Quebec, studied law under Georges Étienne Cartier. He sat (1857–67) in the legislative assembly of Canada and was solicitor general (1864–66) for Lower Canada in "the great coalition" government and postmaster general (1866–67) After confederation, Langevin was a member (1867–96) of the Canadian House of Commons, secretary of state (1867–69), minister of public works (1869–73, 1879–91), and postmaster general (1873–79) He succeeded Cartier in 1873 as leader of the French Canadian Conservative party There were charges of corruption (1891) in Langevin's public works department, though acquitted of complicity, he was found guilty of negligence in office and was forced to resign

Langevin, Paul (pôl' läzhuvĕ'), 1872–1946, French physicist and chemist He was professor of experimental physics at the College de France from 1909 and at the École municipale de Physique et de Chimie, Paris, from 1904 (director from 1925), dismissed by the Vichy government in 1940, he resumed his posts in 1944 He is noted for his work on the electron theory of magnetism and for his research on sound devices for submarine detection His contributions in the field of education were also valuable

Langham, Simon, d 1376, English prelate and statesman, cardinal of the Roman Church He ruled the abbey of Westminster with such skill that Edward III appointed (1360) him treasurer and promoted (1363) him to the chancellorship Created bishop of Ely in 1362, Langham rose to be archbishop of Canterbury (1366) His acceptance of the red hat without royal permission led to a breach with Edward, and Langham resigned (1368) He went to Avignon, where he held office at the court of Pope Gregory XI Langham's bequests to Westminster Abbey, including 116 books, earned him the title of its second founder

Langhorne, borough (pop 1,221), SE Pa, NE of Philadelphia "Byberry," the birthplace of Benjamin Rush, is here

Langlade, Augustin (ôgüstĕ' läglad'), c 1695–c 1771, French Canadian fur trader, b probably Nicolet co, Quebec He was the father of Charles Michel de Langlade and is sometimes called Augustin de Langlade His family name was Mouet, but following the custom in families claiming gentle blood that all sons except the eldest take new names, he adopted Langlade He became a fur trader and went (c 1727) to Mackinac, in what became Michigan, where he married an Indian About 1745 he and his son, Charles, went to Green Bay, in what is now Wisconsin, laid claim to a tract of land, built the first house in the settlement, and established a thriving fur trade there

Langlade, Charles Michel de (sharl' mĕshĕl' du), 1729–1800, pioneer in present Wisconsin, leader in the French and Indian Wars and the American Revolution, b Mackinac, Mich, son of Augustin Langlade and his Indian wife In the French and Indian Wars he is credited with having planned the ambush of Gen Edward Braddock's army near Fort Duquesne (1755), with having defeated Robert Rogers's Rangers on Lake Champlain (1757), and with having served in the Quebec campaign under Montcalm (1759) After surrendering the fort at Mackinac to the English, he became a British citizen In 1763 he warned the western posts of Pontiac's Conspiracy In the American Revolution he led a force of Indians to Burgoyne's assistance, but the Indians deserted upon being reprimanded for a murder. He also fought in the West against George Rogers Clark After the war he retired to his trading post at Green Bay, Wis, where he lived in patriarchal fashion and became known as the Father of Wisconsin.

Langland, William, c.1332–c 1400, putative author of PIERS PLOWMAN He was born probably at Ledbury near the Welsh Marches and may have gone to school at Great Malvern Priory. He took minor orders but, because of his marriage, never became a priest Later in London he eked out his living by saying Masses for money and lived in poverty with his wife and one daughter on Cornhill

Langley, Samuel Pierpont, 1834–1906, American scientist, b. Roxbury, Mass, received only a high school education, but continued his studies in science in Boston libraries He became, in 1867, professor of physics at the Western Univ of Pennsylvania (now Pittsburgh Univ) and director of the Allegheny Observatory there He did much to popularize astronomy, his book *The New Astronomy* (1888) was widely read He invented the bolometer, still the most sensitive instrument for recording variations in heat radiation, and with it first measured the distribution of heat in the solar and lunar spectra His pioneer work in the infrared radiations resulted in a wide extension of the knowledge of the solar spectrum In 1887 Langley went to Washington to succeed Spencer F Baird as secretary of the Smithsonian Institution, which position he held until his death He established there the Astrophysical Observatory, secured funds for it, and continued his mapping of the solar spectrum He made new determinations of the solar constant of radiation and, in 1904, announced his conclusion that this solar constant was a variable Systematic studies of this variation have been carried on by his successor, Charles G Abbot Langley's studies of the mechanics of flight and his experiments with heavier-than-air flying machines entitle him to rank among the great pioneers in aviation He constructed power-driven models, with especially designed light motors, which, in 1896, performed successfully in the air, thus proving to Langley's satisfaction and to the satisfaction of a few of his followers that mechanical flight was possible Few others were convinced The War Dept, however, appropriated $50,000 for the development of a man-carrying machine, and Langley, assisted by Charles M Manly, who was chiefly responsible for the high-powered, lightweight engine, built a machine which in 1903 he twice attempted to launch on the Potomac His failures brought upon him a tremendous amount of unmerited ridicule, and the governmental support was withdrawn He maintained that the failures were due to defects in the launching apparatus and not to the machine itself In 1914 the machine as reconstructed, and with a higher-powered engine, was actually flown Most of Langley's many papers are in the publications of the Smithsonian Institution See *Biographical Memoirs of the National Academy of Sciences,* Vol VII

Langmuir, Irving (läng'mûr), 1881–, American chemist, b Brooklyn, N Y Associated with the research laboratory of the General Electric Company from 1909, he introduced atomic-hydrogen welding, evolved a theory of atomic structure, invented a gas-filled tungsten lamp, and by his work on the high vacuum contributed greatly to the development of the radio vacuum tube In his researches on surface tension and surface chemistry he developed a new technique (employing monolayers, i e, layers of molecules one molecule thick) for the study of molecules, which has applications in research on microorganisms and toxins and in other studies contributing to advances in immunology For his contributions in surface chemistry he received the 1932 Nobel Prize in Chemistry

Langres (läˈgru), town (pop 5,624), Haute-Marne dept, NE France An episcopal see since the 3d cent, Langres has preserved part of its medieval fortifications It has an old and famous cutlery industry Diderot, whose father was a cutler, was born here

Langres Plateau, wooded but generally arid and windswept tableland around Langres, NE France The highest point is c 1,790 ft

Langside, district of Glasgow, Scotland At the battle of Langside (1568), James Stuart, 1st earl of Murray, won a victory over the forces of Mary Queen of Scots led by the 5th earl of Argyll

Langston University, at Langston, near Guthrie, Okla, land-grant and state supported, coeducational, chartered 1897 as Colored Agricultural and Normal University

Langton, Stephen, c 1155–1228, English prelate, cardinal of the Roman Church He was educated at Paris Innocent III created him cardinal in 1206, and he became archbishop of Canterbury the following year The opposition of King JOHN prevented his occupation of the see until 1213 He acted with the barons in securing the Magna Carta and opposed the papal legate, Pandulf Because of his continued opposition to John after the reconciliation of pope and king, he was suspended in 1215, but was restored after the accession of Henry III and continued his efforts to reform Church and state He was a learned and voluminous writer, and the present chapter division of the Scriptures is derived from Langton He probably composed the hymn *Veni, sancte spiritus* See F M. Powicke, *Stephen Langton* (1928) and *Christian Life in the Middle Ages* (1935).

Langtry, Lillie, 1852–1929, English actress, known as the Jersey Lily, daughter of Dean Le Breton of the Isle of Jersey. Her beauty attracted the attention of the prince of Wales, Millais and Burne-Jones painted her She married Edward Langtry in 1874 After her husband's financial failure, she appeared at the Haymarket theater (1881) as Kate Hardcastle in *She Stoops to Conquer* In 1882 she toured the United States, playing in *As You Like It, As in a Looking-Glass,* and *Lady Windermere's Fan,* which Oscar Wilde wrote for her Her last tour of the United States was in 1915 In 1899 she married Sir Hugo Gerald de Bathe See her memoirs, *The Days I Knew* (1925)

Langtry, unincorporated village, W Texas, on the Rio Grande above the mouth of the Pecos At the old town of Langtry near by, Judge Roy Bean, the "law west of the Pecos," sold drinks and meted out justice at his saloon

language, systematic human vocal communication It is a distinctive, exclusive, and universal mark of the human species Nothing is known of its origin, and scientists generally hold that it has been so long in use that the length of time WRITING is known to cover (6 500 years at most) is trifling in comparison Just as languages spoken now by peoples of the most primitive cultures are as subtle and as intricate as those of the peoples of civilization, similarly the forms of languages known (or hypothetically reconstructed) from the earliest records show no trace of being more "primitive" than their modern forms Every person belongs to a speech community (a group of people who speak the same language) There are more than 1,000 speech communities, with numbers ranging from many millions of speakers down to a few dozen or even less The following list probably includes (in approximate descending order) all languages spoken by more than 50,000,000 people North Chinese, English, Russian, Cantonese, German, Spanish Japanese, and Bengali Many persons speak more than one language, the language first learned is one's maternal or native language—figurative expressions, for language is in no sense inherited but is a learned behavior When a person learns a second language very well, he is said to be bilingual He may abandon his native language entirely, because of moving (as coming from Europe to the United States) or because of politico-economic and cultural pressure (as among American Indians and speakers of the Celtic languages in Europe) Such abandonment may lead to the disappearance of languages Individuals differ in speech, though usually not markedly within a small area The differences between speakers in the same speech community, can, however, be considerable, there can then be said to be different dialects of the language (see DIALECT) From this fact and from the known history of a few languages it is believed that all languages are continuously changing If there is a common direction of change, however, it has never been convincingly shown Various factors, especially the extended use of writing, have led to the development of the standard language in most of the major speech communities—a special official form of a language which is theoretically maintained unchanged This is the school form of a language, and by a familiar fallacy it has been supposed to be the norm from which the everyday language deviated Rather, the standard language is a development of some local dialect which has had prestige, thus the standard English of England is derived from London English and standard Italian from that of Tuscany Use of the standard language is often a mark of polite behavior, thus in America using standard English, "good grammar," and approved pronunciation marks a man as cultivated Ordinary speech may be affected by the standard language, thus, many forms of expression come to be widely considered substandard and are regarded as badges of ignorance or "low class," such as *you was* in place of the standard *you were* As in other fields of etiquette, there is variation, thus, *he don't* is acceptable in England but often reproved in America The literary standard may differ from the colloquial standard of educated people at home, and the jargon of a trade or school group may be unintelligible to outsiders, such linguistic variations are in English mainly a matter of vocabulary An auxiliary language is a non-native language adopted for specific use, such are the LINGUA FRANCA (e g, PIDGIN ENGLISH) and the UNIVERSAL LANGUAGE The differences between languages are not uniform When languages resemble each other in a systematic way they are held to be genetically related Such relationships have been scientifically established in many cases, but always on the basis of the sounds of the languages and the way the sounds are grouped in systematic patterns, no certainty has been attained in comparing the fundamental grammatical structures of languages. Maximal groups of related languages are called families and stocks Languages of the Indo-European and Semitic families have received vastly more attention than the others These languages represent actually a very small part of the world linguistic spectrum, as a consequence, most generalized statements about language, grammar, and related matters made before 1920 are not valid as generalisations at all. For a survey of the impor-

An asterisk indicates a dead language SMALL CAPITALS are cross references to articles

tant languages by families, see tables on pages 1092–93 No two authorities agree on all points, and in some parts of the globe (as in South America and in the arctic, where the Hyperean languages, e g , Chukchi, have been meagerly studied) knowledge of the languages is still too scanty to permit proper classification In the tables, asterisks indicate extinct languages, and locations are general, commas separate languages most closely related, and dashes separate groups of such closely related languages See DICTIONARY, ETYMOLOGY, GRAMMAR, INFLECTION, LINGUISTICS, PART OF SPEECH, PHONETICS, SIGN LANGUAGE, SLANG See Edward Sapir, *Language* (1921), Leonard Bloomfield, *Language* (1933), Edgar H Sturtevant, *Introduction to Linguistic Science* (1947)

Languedoc (lägdôk'), region and former province, S France, within the area marked by the foot of the Pyrenees, the upper Garonne river, the Auvergne Mts , the Rhone, and the Mediterranean It is now administratively divided into the departments of Ardèche, Aude, Gard, Hérault, Lozère, and Tarn and parts of Haute-Garonne, Haute-Loire, and Tarn-et-Garonne The Garonne plains, centering around Toulouse, the chief city, are fertile agricultural and wine-growing districts Lower Languedoc, along the Mediterranean, is an alluvial plain, with a warm climate, wine is the chief product, Montpellier, Nîmes, Sète, and Narbonne the chief cities In the north and the east rises the Plateau Central, including the CÉVENNES and VIVARAIS and VELAY, Alès, Privas, and Le Puy are among the few important towns Historically, Languedoc roughly corresponds to Narbonensis prov of Roman GAUL, the later SEPTIMANIA Its history from the Frankish conquest (completed 8th cent) to its final incorporation into the French royal domain (1271) is largely that of the counts of TOULOUSE Under the old regime Languedoc had its own PARLEMENT, sitting at Toulouse

langue d'oc and langue d'oïl (läg dôk', dôcl', dô'yü), names of the two principal groups of medieval French dialects, *oc* and *oïl* being their respective words for *yes* *Langue d'oc* was spoken south of a line running, roughly, from Bordeaux to Grenoble A composite literary language was used in the south by the TROUBADOURS Of the *langue d'oïl* dialects, that of the Paris region gradually supplanted all others as the standard idiom and developed into modern French Both *langue d'oïl* and *langue d'oc* dialects (*patois*) persisted, however, in some rural regions, and Provençal (a *langue d'oc* dialect) had a literary revival in the 19th cent , notably in the work of Frédéric MISTRAL In the Middle Ages the STATES-GENERAL of the regions of Langue d'Oïl and Langue d'Oc sat separately

Lanier, Sidney (lunēr'), 1842–81, American poet and musician, b Macon, Ga , grad Oglethorpe College, 1860 At 19 he became a Confederate soldier, he fought at Chancellorsville, was later taken prisoner, and emerged from the war with ruined health To earn his living, he taught school, was a law clerk in Macon, and in 1873 became first flutist of the Peabody Orchestra, Baltimore His unsuccessful novel *Tiger Lilies* appeared in 1867, his *Centennial Meditation a Cantata* in 1876, and his *Poems* in 1877 His lectures at Johns Hopkins on the interrelation of music and poetry were published as *The Science of English Verse* (1880) His adaptations for boys include *The Boy's Froissart* (1879) and *The Boy's King Arthur* (1880) His poems "The Symphony," "Corn," "Song of the Chattahoochee," and "The Marshes of Glyn" have been widely quoted See Centennial edition of his works (ed by C R Anderson and associates, 10 vols , 1945), biography by A H Starke (1933)

Laning, Edward (lān'ing), 1906–, American painter, b Petersburg, Ill , studied at the Art Institute of Chicago and the Art Students League of New York and in Europe (1929–30) His murals at Ellis Island and in the New York Public Library are well known, as is his oil *T R in Panama* (Whitney Mus , New York) Laning was a war correspondent for the U S army in the Aleutians, 1942–43

Lanka see CEYLON

Lankester, Sir Edwin Ray (lăng'kustur), 1847–1929, English zoologist He was professor at University College, London (1874–90), and at Oxford (1891–98) and was director of the natural history departments at the British Museum (1898–1907) He was a founder (1884) of the Marine Biological Association which established an important station at Plymouth Influential as teacher and writer on biological theories and comparative anatomy, he made special studies of the protozoa, mollusca, and arthropoda He was knighted in 1907

Lannes, Jean (shă' lan'), 1769–1809, marshal of France He fought under Napoleon in the Italian and Egyptian campaigns, accompanied him to France in 1799, and distinguished himself at Montebello, Austerlitz, Jena, Eylau, Friedland, and Saragossa Napoleon created him duke of Montebello He was killed at Essling

lanolin (lă'nulĭn), greasy, yellow substance extracted from wool When purified, it is commonly used as a base for ointments and creams It is also used in finishing and preserving leather and is a constituent of some varnishes and paints. Chemically, it is chiefly a mixture of cholesterol and the esters of several fatty acids With water it forms an emulsion. It is known also as wool wax, wool fat, and wool grease

La Noue, François de (frāswä' dŭ la nōō'), 1531–91, French Protestant general in the Wars of Religion He fought at Jarnac (1569) and Moncontour (1569), in 1570 he lost his left arm in battle and had it replaced with an iron hook, whence he became known as *Bras-de-fer* [ironarm] He took part in the Netherlands expedition sponsored by COLIGNY and was captured at Mons (1572) His reputation for fairness and integrity led to his being sent by Charles IX to treat with La ROCHELLE (1572–73), after the failure of his embassy he assumed the leadership of the Protestant forces in W France (1574–78) He subsequently fought for the Dutch Protestants against the Spanish, but was captured (1580) and held prisoner for five years At this time he wrote his *Politicke and Militarie Discourses* (1587, Eng tr , 1587) He fought under HENRY IV, at Arques, Ivry, and Paris

Lanrezac, Charles Louis (sharl' lwē' lănzăk'), 1852–1925, French general One of the chief commanders at the commencement of the First World War, he took part in the early French offensive, but when the superior force of the German army struck him at Charleroi he was compelled to retreat Lanrezac was sacrificed to public opinion, he was relieved of command Sept 3, 1914

Lansbury, George (lănz'bŭrē), 1859–1940, British Labour party leader He edited for many years the *Daily Herald*, which he founded in 1912 and which became the voice of British labor He was a member of Parliament (1910–12, 1922–40), an early advocate of woman suffrage, and a lifelong pacifist and reformer He campaigned constantly for the amelioration of the conditions of the poor, the unemployed, and the inmates of workhouses He was (1931–35) head of the Labour party in Parliament and spokesman for the opposition to the National government of Ramsay MacDonald In 1935 he resigned as party chief to protest the application of League of Nations economic sanctions against Italy for the Ethiopian campaign —a move he felt would lead to war See his autobiographical *Looking Backwards—and Forwards* (1935)

Lansdale, industrial borough (pop 9,316), Montgomery co , SE Pa , N of Philadelphia, settled 1857, inc 1872 Tile products, hosiery, and radio tubes are made here

Lansdowne, Henry Charles Keith Petty Fitzmaurice, 5th **marquess of** (lănz'doun), 1845–1927, British statesman In his period as governor general of Canada (1883–88) beginning was made to settle the dispute over the North American FISHERIES and RIEL'S REBELLION was suppressed He was viceroy of India (1888–94) and war secretary in the cabinet (1895–1900) As foreign secretary, he sought to end England's comparative diplomatic aloofness by concluding an alliance with Japan (1902), the Anglo-French entente (1904, see TRIPLE ALLIANCE AND TRIPLE ENTENTE), and arbitration treaties with the United States Later he was a powerful opponent of Home Rule in Ireland, was a member of the wartime coalition government, and in 1917 sought to hasten the end of the war by having published in a newspaper a letter which set forth terms on which the Allies would make peace See biography by Baron Newton (1929)

Lansdowne, William Petty Fitzmaurice, 1st **marquess of** see SHELBURNE, WILLIAM PETTY FITZMAURICE, 2D EARL OF

Lansdowne, residential borough (pop 10,837), SE Pa , near Philadelphia, inc 1893 Brass is made

L'Anse (lăns), resort village (pop 2,564), co seat of Baraga co , W Upper Peninsula, N Mich , at the head of Keweenaw Bay, inc 1873 A fur-trading post and a mission were here

Lansford, industrial borough (pop 8,710), E Pa , S of Hazleton, inc 1877 It has anthracite mines and machine works

Lansing, John, 1754–1829?, American statesman and jurist, b Albany, N Y Admitted to the bar in 1775 he became, after serving as military secretary to Gen Philip J Schuyler in the American Revolution, a prominent lawyer and political leader He served in the Continental Congress, and in 1787 he was a delegate to the Federal Constitutional Convention He felt that the convention was not empowered to do more than revise the Articles of Confederation, and he supported the New Jersey Plan as protective of state interests When he thought that the body had overstepped its powers he withdrew, he led the opposition in New York to the Constitution He was later a state supreme court justice and from 1801 to 1814 chancellor of New York In 1829 he disappeared, and no trace was ever found His notes on the Federal Constitutional Convention were edited by J R Strayer in *Delegate from New York* (1939).

Lansing, Robert, 1864–1928, U S Secretary of State (1915–20), b Watertown, N Y He was admitted (1889) to the bar, and after his association with John W Foster, whose daughter he married, he devoted himself to international law and became an authority in the field He founded the *American Journal of International Law* in 1907 and remained an editor of it until his death He served as counsel for the United States in the Bering Sea Fur-Seal Controversy (1896–97), before the Alaska Boundary Tribunal (1903), and in the North Atlantic Coast Fisheries Arbitration (1909–10) He became attached (1914) to the U S Dept of State, and when Secretary of State William J Bryan resigned over President Wilson's diplomatic treatment of the *Lusitania* matter in 1915, Lansing was appointed to succeed him Lansing, from the very start of the secretaryship, was a strong, though not outspoken, advocate of U S participation in the First World War on the side of the Allies Wilson, however, gave Lansing comparatively little freedom in the negotiations leading up to the declaration of war against Germany In 1917 Lansing concluded with Kikujiro Ishii of Japan the Lansing-Ishii agreement in which both nations reaffirmed the Open Door policy in China However, the circumstances of war forced Lansing to give U S recognition to Japan's special interests in China Lansing, who was nominal head of the American commission to the Paris Peace Conference, lost Wilson's confidence because he did not look with favor on the Covenant of the League of Nations as a part of the peace treaty The breach between the two was widened when the Senate in its debates explored Lansing's objections to the treaty, and it was complete when Wilson learned that in his illness Lansing had on several occasions called the cabinet together for consultations In Feb , 1920, at Wilson's request, Lansing resigned He later returned to his law practice His writings include *The Big Four and Others at the Peace Conference* (1921), *The Peace Negotiations* (1921), and *Notes on Sovereignty* (1921) *The War Memoirs of Robert Lansing* (1935) were published posthumously

Lansing 1 Village (pop 4,462), NE Ill , S of Chicago near the Ind line, founded in the 1860s, inc 1893 2 Town (pop 1,388), extreme NE Iowa, on the Mississippi, laid out 1851, inc 1867 The town has a pearl-button factory Near by are a large group of Indian effigy mounds and a state fish hatchery The Black Hawk Toll Bridge crosses the river here The region to the west is known as "Little Switzerland" 3 City (pop 78,753), state capital, S Mich , on the Grand at its confluence with the Cedar river, settled 1837, inc 1859 The city grew after it was made the state capital (1847), and industrial development came with the railroads (1870s) and the automobile industry (1901) Fire-fighting equipment, fruit sprayers, and construction machinery are made The capitol houses a museum, and the state office building contains the state library and the state historical commission offices A "People's University" for adult education was organized here in 1933 There is a state school for the blind and a state vocational school for boys Ray Stannard Baker was born here

Lanston, Tolbert, 1844–1913, American inventor, b Troy, Ohio He grew up on an Iowa farm, served throughout the Civil War, and thereafter for 22 years was a clerk in the U S Pension Office, meanwhile studying law and gaining admission to the bar His first patents for his typesetting machine the MONOTYPE, were granted in 1887 He resigned his government position and gave the rest of his life chiefly to perfecting and manufacturing this machine, introduced commercially in 1897

lantana (lănta'nu, -tā-), any plant of the genus *Lantana*, tropical shrubby plants, one species in particular cultivated as a tender bedding or greenhouse plant This species (*Lantana camara*), also called red or yellow sage, has small flowers in clusters, often ranging from yellow to red A trailing lantana is also cultivated

lantern, device for shielding a light from wind and rain The Romans used lanterns with sides of thin horn to shield oil lamps The horn lantern was revived in the Middle Ages and furnished with candles Perforated or openwork metal lanterns became common during the Renaissance but were largely replaced by the glass-shielded form Coverings of paper or of textiles are widespread in the East, and these are often collapsible Openwork brass lanterns are common in the Near East and Middle East, clay lanterns are used in parts of Africa

lanthanum (lăn'thunum), relatively common metallic element of the RARE EARTHS group, gray white, ductile, and malleable (symbol=La, for physical constants, see ELEMENT, table) With oxygen it forms a basic oxide which reacts with water to yield the hydroxide, and it also forms compounds with chlorine, carbon, and sulphur It reacts readily with acids Neither the metal nor its compounds are of importance commercially, although some compounds are used in making mantles for gaslights Lanthanum was discovered in 1839 by K G Mosander, who found it in the mineral cerite It occurs also in the mineral lanthanite (a hydrous lanthanum carbonate)

Lantsan: see MEKONG.

Lanuvium (lunū'vēŭm), ancient city of Latium, Italy, c 20 mi S of Rome, in the Alban Hills near the Appian Way. It was celebrated for its temple of Juno The modern village is Lanuvio; there are ruins of a temple and Roman walls.

Lanzi, Luigi (lwē'jē län'tsē), 1732–1810, Italian archaeologist, Etruscan scholar, and art historian He wrote on the Etruscan language and art and on ancient sculpture His *Storia pittorica dell' Italia* (3 vols , 1792–96; Eng tr , *The History of Painting in Italy*, 6 vols , 1828) was notable

Laoag (lä'wäg'), municipality (pop 44,406), on NW Luzon, Philippine Islands It is the trade center for a rice-growing area

Laocoön (lā-ŏk'ō-ŏn), in Greek legend, priest of Apollo who warned the Trojans not to touch the wooden horse made by the Greeks in the TROJAN WAR. Two sea serpents, sent (according to different versions) by ATHENA, POSEIDON, or ZEUS, killed Laocoön and his two sons A magnificent Greek statue, now in the Vatican, shows Laocoon and his sons struggling with the serpents Pliny names Agesander, Athenodorus, and Polydorus, Greek sculptors of the 1st cent B C , as the creators of the work This Hellenistic masterpiece was rediscovered in 1506 and has been much admired, particularly in the baroque period and in the late 18th cent Winckelmann, Lessing (whose *Laokoon* is a critical landmark), and Goethe all wrote on it See Margarete Bieber, *Laocoon* (1942)

Laodamia (lā"ŏ-dā'mē-ŭ), in Greek legend, daughter of ACASTUS, whom PROTESILAUS married the day before he went to the TROJAN WAR She mourned his heroic death immoderately, and the gods allowed his shade to visit her for three hours When he returned to Hades, she killed herself Another story says she loved a wax image of Protesilaus and killed herself when her father destroyed it

Laodicea (lā-ŏd"ĭ-sē'ŭ), name of several Greek cities of Asia and Asia Minor founded by the Seleucids The most important (Laodicea ad Lycum) was N of Colossae and SE of Smyrna, near the present DENIZLI, it was in a fertile region on the river LYCUS The city withstood wars and earthquakes and achieved importance and prosperity under Rome It was early a Christian center, the seat of one of the Seven Churches in Asia (Col 2 1, 4 16, Rev 3 14) Extensive Roman ruins include theaters, an aqueduct, a gymnasium, and sarcophagi Laodicea ad Mare was a seaport of Syria S of Antioch, the modern LATAKIA Under the Romans it flourished with exports of wine and fruit

Laoighis (lā'ĭsh) or **Leix** (lā'ĭsh, lāks), inland county (664 sq mi , pop 49,697), S central Ireland, in Leinster The county town is Port Laoighise (Maryborough) It was formerly Queen's County A part of the central plain of Ireland, Laoighis is generally level except in the north where the Slieve Bloom Mts rise to 1,730 ft The Barrow and the Nore are the chief rivers Agriculture (oats, barley, potatoes, and turnips) and dairy farming are the main occupations The region was organized as a shire in 1556

Laomedon (lā-ŏm'ĭ-dŏn), in Greek mythology, king of Troy, father of Priam Laomedon failed to pay Poseidon for building the walls of Troy Poseidon, therefore, sent a sea monster, who could be appeased only by the sacrifice of a maiden from time to time The lot fell to Laomedon's daughter, Hesione, Hercules saved her upon the promise that Laomedon would give Hercules his famous horses, but the king broke his word, and Hercules killed Laomedon and all his sons except Priam

Laon (lä), city (pop 14,868), Aisne dept , N France, NW of Rheims It is situated on a rocky height c 300 ft above the plain and was fortified as early as Roman times An episcopal see from the 6th cent until the French Revolution, it was during the Middle Ages torn by bitter struggles against the bishops by the burghers, who ultimately succeeded in obtaining recognition of their charter The vast Church of Notre Dame (formerly a cathedral), dominating the plain, was built in the 12th and 13th cent It remained intact, though much of the town was damaged in the Second World War Jacques Marquette and the brothers Le Nain were born here

Laos (lä'ŏs, lä'ōs), state (c 90,000 sq mi , pop c 1,200,000), NW Indo-China The capital is Vientiane The high mountains of N Laos join those of Yünnan prov on the north, Tonkin on the northeast and Annam on the east In general, the Mekong river forms the boundary of N Laos with Burma on the northwest and with Siam on the west and south For one stretch of over 300 mi , however, the Mekong flows entirely through the territory of Laos, the Siamese boundary having been fixed at the watershed to the west S Laos is a narrow strip separated from Siam on the west by the Mekong and from Annam on the east by the crest of the Annamese cordillera The southern boundary marks off the Laotian uplands from the Cambodian plain Of the regions of Indo-China, Laos is the one least touched by modern civilization More than half of the people—Laos is culturally allied to the Shans of Burma and to the Thai—live in the deep river valleys, the mountains and the plateaus are inhabited by primitive tribes Agriculture is simple, and the only industries are local crafts Throughout their history, the petty chiefs in Laos have fallen subject to their powerful neighbors—the Khmers, the Burmese, the Thai, and the Annamese. In the early 19th cent., Siam was dominant over the two Laotian kingdoms of Vientiane and Luang Prabang, though Siamese claims were disputed by Annam After French explorations in the late 19th cent , Siam was forced (1893) to recognize a French protectorate over Laos, which was incorporated into the union of Indo-China Since 1946 all of Laos has been united under the Luang Prabang dynasty, and French rule has been modified to give more power to native officials

Lao-tze or **Lao-tzu** (both lou'dzŭ'), b c 604 B C , Chinese philosopher, reputedly the founder of Taoism. It is uncertain that Lao-tze [Chinese, = old person or old philosopher] is historical Knowledge of him is derived from the history of Ssu-ma Ch'ien (1st cent B C) and from legends He is supposed to have been born in Honan after, according to legend, 60 years of gestation His original name was Li Erh and he was the librarian of the Chou court A meeting with his younger contemporary Confucius is reported Lao-tze is traditionally deemed the author of the *Tao-teh-king*, but the text must have been composed several centuries after his supposed lifetime This work and the figure of Lao-tze are central to TAOISM

La Paz (lu päz', Span lä päs'), city (1948 estimated pop 319,600), W Bolivia, *de facto* capital and largest city of Bolivia SUCRE is the legal capital of the republic Founded by Alonso de Mendoza in 1548, La Paz is at an altitude of more than 12,000 ft and is crowded into a long, narrow valley cut by the La Paz river The site was chosen by the Spanish because it offered some modicum of protection in winter from the cold and the winds of the barren high plateau c 1,400 ft above Because of the narrowness of the valley, the city could not be laid out in the customary Spanish gridiron pattern The plaza, with the national palace, cathedral, and other buildings, is small, there are only a few broad, long avenues, the streets ascend steeply on either side Since the climate is generally chill and extreme variations in temperature are a common daily feature, what trees and flowers there are must be carefully tended Lacking natural fuel, La Paz, in order to operate as a modern, comfortable city, uses electric transportation and heating Its location on colonial trade routes made it the commercial and political focus of colonial life, once established, it held its preeminence, in spite of gradual extension and modernization of Bolivian communications Industry, hampered by lack of fuel and power, is limited to flour and textile mills, a cannery, glass, cement tobacco, and shoe factories, and beverage plants ILLIMANI, Lake TITICACA, and the tropical YUNGAS are the principal tourist attractions of the region The original official name Pueblo Nuevo de Nuestra Señora de la Paz, was later altered to La Paz de Ayacucho

La Paz, city (pop 10,401), capital of the southern district of Lower California, Mexico On La Paz Bay, near the entrance of the Gulf of California, La Paz is a pearl-fishing center The town was briefly captured in 1853 by the American filibuster, William WALKER

Lapeer (lupēr'), city (pop 5,365), co seat of Lapeer co , S Mich , E of Flint and on the South Branch of the Flint river, in a farm and lake region, settled 1831, inc as a city 1869 It has varied manufactures There is a large state home and school for the feeble-minded and the epileptic

Lapel (lupĕl'), town (pop 1,146), Madison co , central Ind , NE of Indianapolis

La Pérade (la pārad') or **Sainte Anne de la Pérade,** town (pop 1,014), S Que , NE of Trois Rivières on the north shore of the St Lawrence

La Pérouse, Jean François de Galaup, comte de (zhäⁿ' frāswä' du galō' kōt' du la pārōōz'), 1741–c 1788, French navigator He joined the navy and fought against the British in the Seven Years War In 1782 he was sent to Canada to attack the British forts on Hudson Bay In 1785 he was placed in command of a French government expedition of discovery He was to search for the Northwest Passage from the Pacific side and to explore along the coasts of America, China, and Siberia and in the South Seas He reached Alaska, visited the Hawaiian Islands, Macao, and the Philippines, then went to Japan and Kamchatka, and discovered La Pérouse Strait in 1787 He touched at Samoa and the Friendly Islands From Botany Bay he sailed (1788) on his last voyage In 1826 the wrecks of what appeared to be his ships were discovered in the New Hebrides La Pérouse's journals have appeared in French in several editions

La Pérouse Strait (lä purōōz'), channel, 25 mi wide, separating the north point of Hokkaido island, Japan, from the south end of Sakhalin island, USSR, and connecting the Sea of Japan on the west with the Sea of Okhotsk on the east It is sometimes called Soya Strait

Lapidoth (lă'pĭdŏth) [Heb , = torches], Deborah's husband Judges 4 4

lapis lazuli (lă'pĭs lăz'yŭlī, -lē), a gem, deep blue, violet, or greenish blue in color and usually flecked with yellow iron pyrites. It is composed of lazurite mixed with other minerals and is usually found in masses, rather than in crystals, in metamorphosed limestones Sources of supply are Afghanistan, Chile, Siberia, Upper Burma, California, and Colorado It was formerly made into vases and bowls and has been used from ancient times for beads and small ornaments Once highly valued for grinding into a pigment (natural ultramarine), it has now been replaced for this purpose by artificial ultramarine It was also extensively used in mosaics and was the "sapphire" of the ancients

Laplace, Pierre Simon, marquis de (pyĕr' sēmō' markē' du la plās'), 1749–1827, French astronomer and mathematician At 18 he went to Paris, proved his gift for mathematical analysis to Alembert, and was made professor of mathematics in the École militaire of Paris He had a seat in the senate (1799) and became its vice president and (1803) chancellor He was elected to the French Academy in 1816 He investigated the variations of the moon's motions, especially as affected by the eccentricity of the earth's orbit, the inequalities in the motions of Jupiter and Saturn, the motion of the satellites of Jupiter, the aberration in the movements of comets, and the theory of the tides With J L Lagrange, he established beyond a doubt Newton's hypothesis of gravitation The results of his researches were published in his famous *Mécanique céleste* (1799–1825, Eng tr by Nathaniel Bowditch, 1829–39) In the more popular work, *Exposition du système du monde* (1796), a summary of the history of astronomy is included This work contains also a statement of the NEBULAR HYPOTHESIS which is linked with the name of Laplace His *Théorie des attractions des sphéroïdes et de la figure des planètes* (1785) introduced "Laplace's coefficients" and the potential function, two important means of applying analysis to physical problems The *Théorie analytique des probabilités* (1812), a mathematical classic, was followed by *Essais philosophique sur les probabilités* (1814) An edition of Laplace's works was published by the French government (1843–47), and in 1878 the academy began another edition

Lapland (lăp'lănd") Finnish **Lappi** (läp'pē), Nor *Lapland* (läp'län), Swed *Lappland* (lap'land), vast region of N Europe, largely within the Arctic Circle It includes the Norwegian counties of FINNMARK and TROMS and part of NORDLAND, the Swedish historic province of Lappland, N Finland, and the KOLA PENINSULA of the RSFSR Swedish Lappland (42,349 sq mi , pop 126,198) is now comprised in the administrative counties of NORRBOTTEN and VÄSTERBOTTEN Lapland is mountainous in N Norway and Sweden, reaching its highest point in the KEBNEKAISE (Sweden), it consists largely of tundra in the northeast There also are extensive forests and many lakes and rivers The climate is arctic, and the vegetation is generally sparse, except in the forested southern zone Lapland is very rich in mineral resources, particularly in high-grade iron ore at Gallivare and KIRUNA (Sweden), in copper at SULITJELMA (Norway), in nickel at PECHENGA (RSFSR), and in apatite at KIROVSK (RSFSR) Kirkenes and Narvik are the chief maritime outlets for Scandinavian Lapland and Murmansk is the port for Russian Lapland The region abounds in sea and river fisheries and in aquatic and land fowl Reindeer herds are essential to its economy The **Lapps** or **Lapplanders,** who constitute the indigenous population, number c 30,000 and are concentrated mainly in Norway, where they are called Finns (hence the name Finnmark) They speak a Finno-Ugric language Largely nomadic, the majority of the Lapps follow their reindeer herds, wintering in the lowlands and summering in the western mountains Their movements are more restricted than in former times Others are sea and river fishermen and hunters Little is known of their early history, it is believed that they came from central Asia and were pushed to the northern extremity of Europe by the migrations of the Finns, Goths, and Slavs They may have assumed their Finnic language within the last millennium B C Though nominally conquered by Sweden and Norway in the Middle Ages, the Lapps long resisted Christianization, which was completed only in the 18th cent by Russian and Scandinavian missionaries See J O Turi, *Turi's Book of Lapland* (1931), O M Chapman, *Across Lapland* (1932), Halliday Sutherland, *Lapland Journey* (1938)

La Plata (lä plä'tä), city (pop 217,738), capital of Buenos Aires prov , E Argentina, SE of Buenos Aires and 5 mi inland from Ensenada, its port on the Río de la Plata It is a modern, well-planned, and well-built city, with wide streets and fine public buildings La Plata's chief function is that of provincial capital, but some manufacturing has developed, and large quantities of meat, meat products, and grain are exported The port suffers, however, from its proximity to Buenos Aires. The city was founded in 1882 as the capital of the province after Buenos Aires had been federalized (1880) as the national capital

La Plata, Bolivia see SUCRE

La Plata (lu plä'tu), city (pop 1,421), N Mo., SSE of Kirksville, in a farm area, laid out 1855.

La Plata, Río de see PLATA, RÍO DE LA.

Lapointe, Ernest (lapwĕt'), 1876–1941, Canadian statesman, b Quebec prov., studied at Laval Univ.

He practiced law at Rivière du Loup and in Quebec From 1904 to 1941 he was a member of the Canadian House of Commons. After the death of Laurier in 1919, Lapointe was regarded as the leader of the French Canadian Liberal party Appointed (1921) minister of marine and fisheries, he negotiated and signed (1923) with the United States a treaty concerning fisheries in the Pacific, this was the first treaty signed by a Canadian alone and with full powers from the king A close friend and adviser of W. L Mackenzie King, he was powerful in the dominion government and was minister of justice from 1924 to 1930 and again from 1935 to 1941, he was also attorney general (1935–41) A delegate (1922) to the League of Nations, he attended the imperial conferences in London in 1926 and 1937 and firmly supported Canada's entry into the Second World War although he opposed conscription

La Pointe (lu point'), town (pop 236), on Madeline Island (largest of the APOSTLE ISLANDS), N Wis A French fortified trading post was built here in 1693, evacuated in 1698, and reoccupied from 1718 to 1759 Later (early 19th cent) the American Fur Company had a post here

Laporte, Roland (rōlä' lapôrt'), 1675–1704, a leader of the CAMISARDS, known as Roland He was noted for his fearlessness, his knowledge of military tactics, and his ability at organizing guerrilla warfare Unlike his colleague CAVALIER, Roland refused (1704) to treat with Marshal Villars unless the Edict of Nantes was restored Shortly afterward he was betrayed and fell defending himself

La Porte (lu pôrt') **1** City (pop 16,180), co seat of La Porte co , NW Ind , midway between South Bend and Gary, settled 1830, inc as a town 1835, as a city 1852 Its products include road-building material and farm implements Nine lakes are clustered to the north and west of the city, and two are within city limits **2** Town (pop 3,072), S Texas, on Galveston Bay SE of Houston, settled 1889, inc. 1892 It is a summer resort with many sailboats and also has small industries

La Porte City, town (pop 1,594), E central Iowa near the Cedar river below Waterloo, inc 1871

Lappa (läp'pä'), Mandarin *Kung-pei*, former TREATY PORT, Kwangtung prov , S China, near Macao, opened in 1887 to check smuggling

Lappeenranta (lap'pänran"ta), city (pop 13,464), SE Finland The southern terminus of traffic on Lake Saima, it is an important commercial and industrial center, producing sulphuric acid, lime, cement, machines, and lumber

Lapps · see LAPLAND

Laprairie (läprä'rē), town (pop 2,936), S Que , on the south shore of the St Lawrence and S of Montreal Founded in 1673, it was the scene of fighting in 1691 between the French and raiding forces under Major Peter Schuyler from New York It has several old religious establishments

La Providence (la prō"vidäs'), village (pop 1,924), S Que , near St Hyacinthe Formerly part of the old town of St Hyacinthe, it was made a separate village in 1899

Laptev Sea (läp'tyif), section of the Arctic Ocean It is bounded in the south by the coast of E Siberia, in the west by Severnaya Zemlya and the Taimyr peninsula, and in the east by the New Siberian Islands The Khatanga and Lena rivers empty into the Laptev Sea, which is navigable only in August and September Formerly called Nordenskjold Sea for the Swedish explorer, it has been renamed in honor of Khariton Laptev and Dimitri Laptev, two Russian navigators of the 18th cent

lapwing, crested PLOVER of the Old World, also called the green plover or pewit, which is a casual visitor in North America Its back is an iridescent deep green, the crown and crest are greenish black, the throat and upper breast black, the under parts white, and the tail coverts fawn During courtship the male indulges in unusual aerial feats The use of the bird and its eggs for food reduced its numbers Its "screaming" cry is referred to in Robert Burns's "Flow Gently Sweet Afton "

Larache (lärish'), Arabic *El Araish* (ĕl ärish'), city (pop 41,286), Spanish Morocco, a fishing and trading port on the Atlantic coast The town, near the site of Punic and Roman colonies, was captured by Andalusian Christians (1270), was later frequented by Genoese and Venetian merchants, and was held by Spain (1610–89) It was used as a base for pirates in the 18th and 19th cent

Laramie (lă'rumē), city (pop 10,627, alt 7,145 ft), co. seat of Albany co , SE Wyo , on the Laramie river and WNW of Cheyenne. It is a rail, air, trade, and industrial center for a cattle and sheep region and has brick, tile, and cement plants The city was settled in 1868 with the arrival of the railroad and grew with the development of the surrounding ranch country The Univ of Wyoming (see WYOMING, UNIVERSITY OF) is here. Laramie is headquarters for the Medicine Bow National Forest. Near by is the site of Fort Sanders, established in 1866 for the protection of the Overland Trail and workers on the Union Pacific RR.

Laramie, river rising in N Colorado in the S Medicine Bow Mts and flowing 216 mi generally NE to the North Platte above Torrington, Wyo.

Laramie, Fort: see FORT LARAMIE NATIONAL MONUMENT

Laramie Mountains, range, chiefly in SE Wyoming but extending into N Colorado near the Cache la Poudre river They are part of the Front Range.

Laranda (lürăn'dù), ancient city of Pisidia, near the Isaurian border, in Asia Minor, on the site of the present Karaman, Turkey It was in ancient days a stronghold of Isaurian pirates, and it is said that they burned their city rather than let Perdiccas capture it.

larceny, in law, the unlawful taking and carrying away of the property of another, with intent to deprive the owner of its use or to appropriate it to the use of the perpetrator or of someone else. It is usually distinguished from EMBEZZLEMENT and FALSE PRETENSES in that the actual taking of the property is accomplished unlawfully and without the victim's consent (see ROBBERY), along with the taking there must be a carrying-off Recent statutes in some states of the United States have enlarged the scope of larceny to include embezzlement and false pretenses Grand larceny, usually a FELONY, is distinguished from petty larceny, usually a MISDEMEANOR, by the value of the property stolen

larch or **tamarack** (tă'murăk), any of several trees of the genus *Larix*, conifers of the pine family which are unusual in that they are not evergreen The various species are widely distributed in the Northern Hemisphere Needles of the larches are mostly borne in characteristic radiating clusters A western American larch (*Larix occidentalis*) achieves a great height, and its lumber is used in interior construction, ties, posts, and cabinetmaking The American or black larch, commonly called also tamarack and hackmatack (*L laricina*), ranges from the Arctic Circle eastward to Newfoundland, westward to Alaska, and south through the northeastern states, where it prefers bogs but is cultivated elsewhere for its beauty The wood of this species has been used in shipbuilding and for posts, ties, and poles The European larch has long been valued for its durable wood and as a source of Venice turpentine The European and Japanese larches are also cultivated for ornament. The golden larch is *Pseudolarix amabilis*.

Larchmont (lärch'mŏnt"), suburban village (pop 5,970), SE N Y , in Westchester co , on Long Island Sound between New Rochelle and Mamaroneck, developed c 1845, inc. 1891 The Larchmont Yacht Club holds annual regattas Joyce Kilmer lived here

Larcom, Lucy (lär'kum), 1824–93, American poet, b Beverly, Mass Precocious and idealistic, she worked in the Lowell, Mass , cotton mills, and contributed to the mill operatives' literary journal, the *Lowell Offering* Whittier became interested in her poetry, and eventually they collaborated in making anthologies She was a teacher (1854–62) at Wheaton Female Seminary (now Wheaton College) and was on the staff (1865 73) of *Our Young Folks*, which was later merged with *St Nicholas* Among her books of verse are *Similitudes* (1854), *Poems* (1869), and *Childhood Songs* (1873) See her autobiographical *New England Girlhood* (1899)

lard, hog's fat melted and strained from the tissues, an important by-product of the packing industry The highest grade, leaf lard, is from the fat around the kidneys, the next best is from the back, the poorest from the small intestines Lard is classed by method of preparation as prime steam, rendered in a closed vessel into which steam is injected, neutral, melted at low temperature, the highest grades used chiefly for oleomargarine, kettle-rendered, heated with added water in steam-jacketed kettles, and dry-rendered, hashed, then heated in cookers equipped with agitators Good lard melts quickly and is free from disagreeable odor

Larder Lake, mining town (pop 1,464), E Ont , N of Haileybury, inc 1938

Lardner, Ring (Ringgold Wilmer Lardner), 1885–1933, American humorist and short-story writer, b Niles, Mich He was a sports reporter in Chicago, St Louis, and Boston from 1907 to 1919, and his first collection of short stories, *You Know Me Al* (1916), showed his talent at the racy sports idiom he made famous *How to Write Short Stories (with Samples)* (1924), his first clear demonstration of bitterness and contempt for American sports heroes, contains "The Champion," a character sketch of a mean and brutal pugilist Lardner collaborated successfully with George S. Kaufman on the comedy *June Moon*, produced in New York in 1929–30 Other volumes which reveal his satirical genius and sardonic humor are *Round Up* (1929) and *The Portable Lardner* (ed by Gilbert Seldes, 1946)

Laredo (lurā'dō), city (pop 39,274), co seat of Webb co , SW Texas, on the Rio Grande A border city and important port of entry, connected by international bridge with Nuevo Laredo, Mexico, it has a semi-Mexican air. It was founded by the Spanish in the 1750s and grew as a post on the road to San Antonio and other Texas cities After the Texas Revolution it was in Mexican hands but in territory disputed until it was ceded to the United States following the Mexican War. The railroads in the 1880s enhanced the position of this ranching center; later the development of irrigated farming to produce onions and truck and still later the discovery of oil and gas speeded the city in its growth. The opening of a good highway to Mexico city in 1936 forwarded the tourist industry. Laredo has an antimony smelter, foundries, an oil refinery, a hat factory, and processing plants The former army post Fort McIntosh, founded as Camp Crawford in 1849 and later intermittently occupied and rebuilt, now houses a junior college

La Reine, Fort (la rĕn'), S Man , on the Assiniboine river and near the present Portage la Prairie Built (1738) by Vérendrye on the fur-trading route between the Assiniboine and Lake Manitoba, it was near the site of a later Hudson's Bay Company post

Larentia or **Larentina** · see ACCA LARENTIA

lares and penates (lā'rēz, pūnā'tēz), in Roman religion, household gods The normal custom was that each house have a lar and two penates The images were placed in a niche together, the lar between the two penates The lar was a youth in a high-girt tunic carrying a cup and a drinking horn, the penates were dancing youths with drinking horns in their hands Before each meal and on all festive occasions, offerings were made to the lar and the penates, and sometimes they were garlanded The state, the clans, the emperor, had each its lar and its penates The lar was originally apparently a god of the fields, each ploughed tract having its lar The penates were gods of the storeroom and kitchen, hence Romans often had niches in one of these rooms for the penates In the later republic and in the empire the lar and penates were confused and called lares, penates, or lares and penates

Largillière, Nicolas de (nēkôlä' dù larshēlyĕr'), 1656–1746, French portrait painter, b Paris He was brought up in Antwerp, and the influence of Rubens is discernible in his vigorous and colorful style Favored by Le Brun, he became a successful portrait painter in Paris and London One of his best-known pictures is *The Painter and His Family* (Louvre) Fine examples of his work are in the National Portrait Gallery and the Wallace Collection, London, and in the Metropolitan Museum

Largo, city (pop 1,031), W Fla , on the Pinellas peninsula NW of St Petersburg It is a packing, canning, and shipping center in a citrus-fruit area

Largo Caballero, Francisco (fränthĕ'skō lar'gō kabulyä'rō), 1869–1946, Spanish Socialist leader and statesman A stone mason, he became a trade union leader and was imprisoned under the monarchy for his revolutionary activities He led in the overthrow of the monarchy in 1931 and was minister of labor in 1931 and 1933 and premier (1936 37) of a leftist coalition cabinet in the civil war. He fled to France in 1939 Arrested in 1941, he was liberated from a German concentration camp in 1945 He died in Paris

Largs (lärgs), burgh (pop 6,134), Ayrshire, Scotland, on the Firth of Clyde It is a port and a resort At the battle of Largs (1263) an attempted invasion by Haakon IV of Norway was defeated

lariat. see LASSO.

Larimore, city (pop 1,222), E N Dak , W of Grand Forks, in a livestock and poultry area, inc 1883

Larissa (lurĭ'su, Gr lă'rēsa), city (pop 35 344), Thessaly, N Greece, on the Peneus river It is an agricultural trading center The chief city of ancient Thessaly, it was annexed (4th cent B C) by Philip II of Macedon and in 196 B C became a Roman ally It was taken from the Byzantine Empire by Bulgaria and later was held by Serbia, with which it passed (15th cent) under Turkish rule Turkey ceded Larissa to Greece in 1881 In the Second World War the city suffered partial destruction by aerial bombardments (1940–41) and by an earthquake

lark, member of a large family of perching birds of terrestrial habits, chiefly of the Old World and best known through the SKYLARK The horned larks belong to the one species native to America They vary in color and markings in different geographic areas but are generally protectively plumaged in mixed browns and grays above, with light under parts and with black and yellow or white about the head and throat. Dark feathers form the tufts on their heads On the ground they run rather than hop They have a melodious flight song The prairie larks' song is less pleasing The MEADOW LARK belongs to the blackbird family.

Larkin, James, 1877?–1947, Irish labor leader The Irish Transport and General Workers' Union, which he organized and of which he was secretary, had for its purpose the combining of all Irish industrial workers, skilled and unskilled, into one organization After his activity in the general strike of 1913 he was tried by the British for sedition and jailed briefly. When the First World War began, Larkin came to the United States with the purpose of raising funds for the Irish to fight the English. He turned to radicalism and was an organizer, with other left-wing Socialists, of the American Communist party. In 1920 he was convicted of criminal anarchy and imprisoned. Pardoned in 1923 by Gov. Alfred E. Smith, Larkin was deported.

Larkin, Thomas Oliver, 1802–58, American merchant and consul, b. Charlestown, Mass. After

spending some time in North Carolina and South Carolina, Larkin settled (1832) at Monterey, Calif., where he became a successful merchant trading with Mexico and the Hawaiian Islands He was (1844–48) U S consul in California and was confidential agent of the U.S. government His insistence on the danger of possible British and French acquisition of California and his pro-U S propaganda launched in the state helped to bring about U S. seizure of California in the Mexican War After serving as navy agent (1847–49), Larkin retired from public life See R L Underhill, *From Cowhides to Golden Fleece* (1939, new ed , 1946)

Larkspur, residential town (1940) pop 1,558, 1945 special census pop 2,549), W Calif , N of San Francisco and near Mt Tamalpais, inc 1908 Larkspur Canyon, near by, has a redwood grove

larkspur or **delphinium,** any plant of the genus *Delphinium,* annual or perennial herbs, many popular for garden cultivation The annuals are commonly referred to as larkspur and the perennials as delphinium Blue is the most common color of the flowers—borne in a spire above the deeply cut leaves—but there are also white, purple, pink, scarlet, and yellow kinds, which, if cut back after blossoming, will often bloom again Most native North American larkspurs are poisonous to cattle, garden kinds are chiefly derived from Old World species The cultivation of larkspurs is encouraged by the American Delphinium Society See L H Bailey, *The Garden of Larkspurs* (1939).

Larksville, anthracite-mining borough (pop 8,467), NE Pa , near Wilkes-Barre, inc 1909

Larnaca (lär'näku), town (pop 14,772), SE Cyprus It is a port trading in local products The modern section of the town, called Scala, occupies the site of ancient CITIUM

Larne (lärn), urban district (pop 11,090), Co Antrim, Northern Ireland, at the mouth of Lough Larne, an inlet of the North Channel It is a seaport and a tourist center It exports bauxite, alumina, iron ore, beef, and potatoes and has bauxite refineries, linen mills, and clothing factories Early in the 14th cent Edward Bruce landed here with his men before his conquest of Ireland

Larned, Josephus Nelson (lär'nĕd), 1836–1913, American librarian and author, b Canada After 12 years on the editorial staff of the Buffalo *Express,* he was superintendent of education in Buffalo (1871–76) and director of the Buffalo library (1877–97) He was active in municipal affairs and a leader in the cultural life of the city Besides school histories, he wrote *Books, Culture, and Character* (1906), *A History of Buffalo* (1911), and, best remembered, *History for Ready Reference* (5 vols , 1894–95), which was revised in 1922 and issued in 12 volumes

Larned, city (pop 3,534), co seat of Pawnee co , central Kansas, SW of Great Bend, on the Arkansas and on the old Santa Fe Trail, laid out 1873, inc 1886 Larned is a trade center, and dairy products are made Pawnee Rock, near by, was the scene of bitter Indian battles, it is included in a state park Neighboring Fort Larned, established in 1859 to protect Santa Fe Trail traffic, was abandoned in 1878 The state hospital for the insane is near by

La Rochefoucauld, François, duc de (fräswä', dük du la rôshfōōkō'), 1613–80, French writer of the classical period, b Paris As leader of an ancient family (in his youth he bore the courtesy title prince de Marcillac) he opposed Richelieu and later was active in both Frondes Wounded and disheartened, he made his peace (1652) and lived quietly at Paris Thereafter he moved in the literary circle of Mme de SABLÉ, which included Mme de LA FAYETTE, whose close friendship was an important influence His *Mémoires* are among the great French memoirs, and they are interesting historically But La Rochefoucauld's place in French literature is assured by his maxims It had been fashionable for some time, especially at Mme de Sablé's salon, to coin epigrams of a reflective or moral type, La Rochefoucauld's were by far the most successful, and in 1665 a collection was published, *Réflexions ou sentences et maximes morales* The fifth edition, which appeared in his lifetime, contained 504 maxims They are usually either observations on human nature or maxims on conduct La Rochefoucauld's ideas spring from the pessimistic view that selfishness is the center of all man's behavior, a famous maxim is "The virtues join with self-interest as the rivers join with the sea " La Rochefoucauld's style is peerless in its diamond brilliance and incisive clarity, and it is his work perhaps that has made the maxim a major genre in French literature There are translations of both *Mémoires* and *Maximes,* e g , Louis Kronenberger, *La Rochefoucauld the Maxims* (1936)

La Rochefoucauld-Liancourt, François Alexandre Frédéric, duc de (fräswä' älĕksä'drü frädārĕk' dük dü la rôshfōkō'-lyäkôr'), 1747–1827, French philanthropist Before the French Revolution he established a model farm, two factories, and a trade school on his Liancourt estate and as a member (1789) of the Constitutional Assembly urged the necessity of public welfare. With the progress of the Revolution he fled to America; as a result of his studies here, he produced *Voyage dans les États-Unis d'Amérique* (1799). Returning to France, he took up his previous activities, working for many different reforms He was instrumental in founding a society to promote national industry

La Rochejaquelein or **La Rochejacquelin, Henri du Vergier, comte de** (both ärĕ' du vĕrshyä' kôt' du la rôshzhäkulĕ'), 1772–94, French commander, leader of the counterrevolutionary army in the VENDÉE His legendary gallantry and tactical abilities were of little avail against superior republican armies He was killed in battle

Larra, Mariano José de (märyä'nô hôsā dā la'rä), 1809–37, Spanish essayist He wrote under different pseudonyms (of which the most famous is "Fígaro") a series of satirical articles on Spanish politics, customs, and characteristics published in a small periodical, the *Pobrecito hablador* (1832–33) He also wrote novels and plays, of which the best known are the novel *El doncel de don Enrique el Doliente* [the page of Don Enrique el Doliente] (1834), the drama *Macías,* and *No más mostrador* [good-by to the shop counter], an adaptation of a play of Scribe

Larreta, Enrique Rodríguez (ānrĕ'kā rôdrē'gĕs lrä'tä), 1875–, Argentine novelist A man of means, he lived in Spain and in France, where for a while he was Argentine minister plenipotentiary His admiration for things Spanish led him to write in polished style a historical novel of the days of Philip II, *La gloria de don Ramiro* (1908, Eng tr , 1924) He also wrote *Zogoibi* (1926), an unsuccessful novel about the gaucho

Larrey, Dominique Jean (dômēnēk' zhä' lärā'), 1766–1842, French military surgeon While surgeon in chief of Napoleon's army he introduced (1792) "flying ambulances," light vehicles which carried aid to the wounded on the battlefield and were the precursors of modern ambulance service

Larsa (lär'su), ancient city of S Babylonia, between the Tigris and Euphrates rivers c 30 mi NE of Eridu It was the biblical Ellasar In the time of Abraham (Gen 14 1) Arioch, king of Larsa, invaded Canaan The city, dedicated to the sun-god, Shamash, was the capital of a Semitic dynasty and later, under the Elamites, conquered N Babylonia, becoming, in turn, subject to Babylon In the ruins temple libraries and important documents have been found

Larsen, Peter Laurentius, 1833–1915, American educator, b Norway He came to America in 1857 as a Lutheran missionary From 1859 to 1861 he was a professor of theology at Concordia College, St Louis, but left that institution to become president of the new Luther College, established by the Norwegian Synod Larsen directed it until his resignation from the presidency in 1902 and taught there until 1911 He was also a prominent theological leader and was long editor of the weekly *Evangelisk luthersk kirketidende* [Evangelical Lutheran Church times] See Karen Larsen, *Laur Larsen* (1936)

Lars Porsena or **Lars Porsenna** (lärz' pôr'sunù, pôrsĕ'nù) [Etruscan *Lars*=lord] semilegendary king of Clusium (modern Chiusi) in Etruria, who to reinstate Tarquinius Priscus, marched against Rome It was said that the heroism of such Romans as Horatius, Scaevola, Cloelia, and Publicola moved him to grant honorable terms of peace and to withdraw Actually the city was completely conquered by Porsena The Romans recovered their independence after Aruns, son of Porsena, was defeated before Aricia by the united forces of the Latin cities Roman annalists dated these events c 500 B C , but with no evidence

Larsson, Carl (kärl' lär'sôn), 1853–1919, Swedish painter and illustrator He was early a popular and imaginative illustrator and was equally successful as a water-color painter He is perhaps best known, however, for his historical mural decorations in fresco for the Fürstenberg Gallery and the national museum in Stockholm

larva (lär'vu), term usually referring to the stage between egg and pupa in the life of an insect which undergoes a complete metamorphosis or to the nymph stage of insects with an incomplete metamorphosis It is also used to refer to the immature stages of some other animals which undergo changes in form before becoming adults, e g , mollusks, crustaceans, fish, and amphibia Larvae of the beetle and of the bee and some of its relatives are called grubs Some beetle grubs are aquatic, and others are either terrestrial or subterranean Certain fly larvae are known as maggots Mosquito larvae are called wigglers or wrigglers Insect larvae are frequently called worms although they are not true worms Inchworms, measuring worms, or loopers are larvae of geometrid moths, bagworms or basketworms are larvae of psychid moths; wireworms are larvae of the elater or click beetle Sawfly larvae are sometimes mistaken for caterpillars Larvae usually eat ravenously, and many do great damage to crops, stored foods, textiles, and other products Caterpillars are the larvae of moths and butterflies Some remain caterpillars for two or three months, others for about 10 months, hibernating over the winter in this stage In the arctic regions are some forms which require two or three years to develop from egg to adult Caterpillars have distinct heads and are segmented and wormlike, with three pairs of short jointed legs on the thorax and unjointed, fleshy prolegs on some abdominal segments Some have smooth skin; others are hairy, e g , the woolly bear or hedgehog caterpillar of the Isabella tiger moth. The mature luna moth caterpillar is about 3 in long, smooth, and yellowish green, turning to pink when ready to pupate. The tubercles vary in color, and there is a yellow line along each side The larva of the polyphemus moth is similar, but brownish The green larva of the Io moth has sharp spines connected with glands which secrete an irritating substance Almost all caterpillars are vegetarian and have strong jaws for chewing The adult moth or butterfly has a coiled tube for sucking nectar A caterpillar molts its skin, usually four or five times, before it becomes a pupa The larva of the eel is very small and transparent The larvae of some mollusks, such as the oyster, are free-swimming, while the adults are sessile The tadpole or larva of amphibians differs in many ways from the adult (see FROG)

larvae (lär'vē), in Roman religion, ghosts of the dead To keep them from returning to frighten the living, in May the Romans held rites, the Lemuria, to quiet these spirits—also called *lemures* (singular *lemur*)—and keep their evil influence away from the home The rites, like many of those for the underworld (chthonian) gods were performed at night and in silence See MANES

Larvik (lär'vĭk), city (pop 9,824), co seat of Vestfold co , SE Norway It is a seaport at the head of the Larvik Fjord and SSW of Oslo

larynx (lă'rĭngks), the organ of voice, located between the oral pharynx and the trachea (windpipe) It is also a mechanism for protecting the airway to the lungs, the epiglottis, a flap at the base of the tongue, closes it against the entrance of solids and liquids The larynx is composed of a number of cartilages and elastic membranes Two elastic cords which extend from the front to the back wall of the larynx form the vocal cords Between them is the opening called the glottis A number of muscles act upon the cartilages of the larynx, producing changes in the relative position of the vocal cords Mucous membrane lines the inner surface of the voice box The largest cartilage is sometimes called the Adam's apple Colds extending to the larynx cause laryngitis, which may be accompanied by loss of voice Tuberculosis and cancer are possible causes of persistent hoarseness

Las For names beginning thus and not listed here, see last element, e g , for Río de las Balsas, see BALSAS, RÍO DE LAS

La Salle, Jean Baptiste de see JOHN BAPTIST DE LA SALLE, SAINT

La Salle, Robert Cavelier, sieur de (rôbĕr' kävülyä' svûr' du la sal') 1643–87, French explorer in North America He entered a Jesuit novitiate as a boy but left the religious life to become one of the most celebrated explorers and builders of New France In 1666 he went to Canada, where he developed a seigniory at Lachine He may have made a journey in 1669, possibly to the Ohio river, but there are no records In 1673 the governor, Frontenac, made him commandant of Fort Frontenac (see FRONTENAC, FORT) La Salle after a visit to France, where he was granted a patent of nobility, began in 1675 to develop the trade at the post In 1677 he was in France again and obtained a patent to build forts, explore, and trade When he came back he brought with him Henri de TONTI, who was his lieutenant in later enterprises In 1679 a blockhouse was built at the outlet of the Niagara river, and in August they set out across the Great Lakes in the *Griffon,* which Tonti had built This first sailing vessel on the lakes took the adventuring traders to Green Bay (an arm of Lake Michigan in present Wisconsin), the party then went by land The *Griffon* was lost a little later, probably in a storm La Salle went along Lake Michigan, erected a fort (Fort Miami) on the site of present St Joseph, Mich , then went to the Illinois river On that stream Fort Creve Coeur (Fr *Crèvecœur*) was built La Salle sent out Michel Acau and Father HENNEPIN on an expedition to the upper Mississippi, while he himself went back to Fort Frontenac for supplies Tonti, left on the Illinois, started to build a fort on Starved Rock but was interrupted when the Iroquois attacked the village of Illinois Indians beneath the rock La Salle, returning, found the Illinois posts deserted He set out to find Tonti and also organized (1681) an Indian federation of the Illinois, the Miami, and smaller tribes to fight the Iroquois He was reunited with Tonti at Mackinac Island, and the two men with Father Zenobe Membré and a small party went to the Mississippi They descended the river to its mouth, where they arrived on April 9, 1682 La Salle took possession of the whole valley, calling the region Louisiana Tonti went back to the Illinois and at Starved Rock began reconstruction of the Illinois village, La Salle joined him, and Fort St Louis was completed (1682–83) La Salle was deprived of his authority by the new governor in 1683 and went again to France, leaving Tonti in the Illinois country He was given power to colonize and to govern the region between Lake Michigan and the

Gulf of Mexico, and he set out with four ships for the mouth of the Mississippi He never reached it Disaster hung on the expedition one vessel was captured by the Spanish, a second was wrecked, a third turned back to France The coast of the Gulf stretched in sandy sameness, and La Salle could not find the Mississippi He and his men landed on the Texas shore, probably on Lavaca Bay (an arm of Matagorda Bay) They made futile attempts to reach the Mississippi overland, and the men grew mutinous On the third attempt the great explorer died, murdered by his own men Original narratives are translated in I J Cox, *The Journeys of René Robert Cavelier, Sieur de La Salle* (1905) A classic account is that of Francis Parkman in *La Salle and the Discovery of the Great West* See F O Gaither, *Fatal River* (1931), biography by R F Lockridge (1931)

Lasalle (lusăl') or **Ville Lasalle,** town (pop 4,651), S Que , SW of Montreal and on the north shore of the St Lawrence at the head of the Lachine Rapids La Salle built a fort here

La Salle (lă săl'), city (pop 12,812), N Ill , on the Illinois river and NNE of Peoria, contiguous to Peru, in an area mining coal and other minerals, laid out 1837, inc 1852 For several decades after the opening of the Illinois and Michigan Canal in 1848 it developed as an important water transportation center Zinc products, Portland cement, and clocks are made here There is a junior college Near by is Starved Rock A fort begun in 1680 by Henri de Tonti was completed by La Salle and Tonti in 1682–83 on the rock itself

Las Animas (lăs a'nĕmas, ăn'I-), city (pop 3,232), co seat of Bent co , SE Colo , on the Arkansas and E of Pueblo, founded 1869 near by, moved here 1873, inc 1886 It is a processing center in a farm region Near by are Kit Carson Museum, a U S veterans' hospital, and the site of BENT'S FORT

La Sarre (lă sar'), village (pop 2,167), W Que , on the transcontinental line of the Canadian National Railways and E of Cochrane, Ont It is the center of a rich agricultural area

Lasca, Il see GRAZZINI, ANTONIO FRANCESCO

Lascaris (lă'skŭrĭs), family name of the Greek emperors of Nicaea (see NICAEA, EMPIRE OF) The empire was founded in 1204 by THEODORE I, a son-in-law of Alexius III (Alexius Angelus) Theodore I was succeeded (1222) by his son-in-law, JOHN III (John Ducas Vatatzes) John's son, THEODORE II (1254–58), assumed the family name Lascaris He was succeeded by his son JOHN IV, who was forced (1259) to share his throne with Michael VIII, founder of the Palaeologus dynasty John was deposed in 1261

Lascaris, Constantine (kŏn'stuntēn lă'skurĭs), d 1501?, Greek grammarian After the fall of Constantinople he came to Italy, and in Milan he obtained the patronage of Francesco Sforza His Greek grammar (1476) was the first book printed in Greek characters He earned fame as a teacher of Greek and may be considered a herald of the new learning of the Renaissance in Italy So was his brother, **Andreas Joannes Lascaris** (ăn'drēus jō'ă-nēz) or **Janus Lascaris** (jā'nus), c 1445–1535 He taught Greek in Florence, Paris, and Rome

Las Casas, Bartolomé de (bartōlōmā' dā lăs kā'sas), 1474–1566, Spanish missionary and historian, called the Apostle of the Indies He went to Hispaniola with his father in 1502, and eight years later he was ordained a priest In 1514 he began to work for the improvement of the lot of the Indian, especially abolition of Indian slavery and the forced labor of the ENCOMIENDA He devoted the rest of his life to that cause, going to Spain to urge the government to action, converting uncivilized tribes, and striving to break the power of Spanish landholders over Indian laborers He tried unsuccessfully to establish a model Indian colony (1520–21), went to Peru with a royal cedula prohibiting Indian enslavement, worked among the natives of Guatemala, and for a brief time (1544–47) was bishop of Chiapa In his anxiety to help the Indians he indorsed the proposal to import Negro slaves, but repented his action almost immediately Chiefly through his agency, humanitarian laws, called the New Laws, were adopted (1542) to protect the Indians in Spanish colonies, though later alterations rendered them almost impotent The writings of Las Casas contain good anthropological and historical material He spent much of his time writing the monumental *Historia de las Indias* (first pub. 1875–76).

Las Cases, Emmanuel, comte de (ĕmänŭĕl' kōt dŭ lăs käz'), 1766–1842, French historian He accompanied Napoleon into exile to St Helena, where the emperor dictated to him a part of his memoirs His famous *Mémorial de Sainte-Hélène* was published simultaneously in French and in English translation with the subtitle, *Journal of the Private Life and Conversations of the Emperor Napoleon at Saint Helena* (8 vols in 4, 1823). A primary source for Napoleon's last years and his judgment of himself, the *Mémorial* also became the bible of Napoleon-worshipers

Lascelles, Henry George Charles· see HAREWOOD, HENRY GEORGE CHARLES LASCELLES, 6TH EARL OF.

Las Cruces (lăs krōō'sĭs), town (pop. 8,385), co. seat of Dona Ana co , SW N Mex , on the Rio Grande and NNW of El Paso, Texas, in a rich irrigated farm and dairy area, founded 1848, inc 1907 The historic village MESILLA, the NEW MEXICO COLLEGE OF AGRICULTURE AND MECHANIC ARTS, and Tortugas, an Indian village, are near by.

Lasea (lăsē'ă), ancient town, Crete, S of Candia It is known from Acts 27 8, it was near the harbor called the Fair Havens, where Paul landed Some ruins remain

Lasharon (lăshā'rŏn), unidentified town, N Palestine, W of the Sea of Galilee Joshua 12 18

Lashio (lăsh'yō, lushyō'), town (pop 4,038), capital of the Shan State, E Burma It is the terminus of a railroad from Mandalay and the head of the BURMA ROAD

Lashkar (lŭsh'kŭr), city (pop 113,718), capital of Madhya Bharat, India It adjoins Gwalior town It is a communications center with extensive trade in agricultural produce and various light manufactures Places of interest include Victoria College, a palace of the maharaja of Gwalior, and a museum

Lasker, Emanuel (ămŭ'nōōĕl), 1868–1941, German chess player and mathematician He won the world's championship in 1894 when he defeated Steinitz and held it until he was defeated by CAPABLANCA in 1921 Lasker studied the games of his opponents for their weaknesses and predilections in technique and played primarily against the temperament of his opponents He was a master in closed positions See his *Common Sense in Chess* (1896) and *Lasker's Manual of Chess* (1934)

Laski, Harold Joseph (lă'skē), 1893–1950, English political scientist, economist, and writer, chairman (1945–46) of the British Labour party, grad New College, Oxford, 1914 A member (1922–36) of the executive committee of the Fabian Society, he was in 1936 made a member of the Labour party executive committee He was a lecturer in history at McGill Univ (1914–16), Harvard (1916–20), Amherst (1917), and Yale (1919–20, 1933) and in political science at Magdalene College, Cambridge (1922–25), the Institute of Soviet Law, Moscow (1934), and Trinity College, Dublin (1936) He was in 1920 appointed to the faculty of the London School of Economics and in 1926 made professor of political science at the Univ of London He held various government posts, official and semi-official, but is best known for his books on political science and for his speeches in England and the United States on political, social, and economic trends His books include *Studies in the Problem of Sovereignty* (1917), *Authority in the Modern State* (1919), *Political Thought in England from Locke to Bentham* (1920), *Karl Marx* (1921), *Communism* (1927), *An Introduction to Politics* (1931), *Nationalism and the Future of Civilization* (1932), *Democracy in Crisis* (1933), *The American Presidency* (1940), *Where Do We Go from Here?* (1941), *Reflections on the Revolution of Our Time* (1943), *Faith, Reason, and Civilization* (1944) *The American Democracy* (1948), and *Liberty in the Modern State* (1949)

Laski, John (lă'skē), Pol *Jan Łaski* (yan' wă'skē), Latin *Johannes Alasco* or *à Lasco,* 1499–1560, Polish Protestant reformer A learned priest, he went in 1523 to Basel, where he was a close friend of Erasmus After returning to Poland he rose to be archbishop of Warsaw, but because of his Calvinistic views he had to leave He became pastor of a Protestant church at Emden in 1542 and a little later went to England, where in 1550 he was superintendent of the church for Protestant foreigners and had some influence on ecclesiastical affairs in the reign of Edward VI On the accession of the Catholic Queen Mary he fled to the Continent In 1555 he was recalled to Poland, where he was secretary to King Sigismund II and was a leader in the Calvinistic Reformation

Las Palmas, Canary Islands see PALMAS, LAS

Lassalle, Ferdinand (fĕr'dēnant lusăl'), 1825–64, German socialist, son of a Jewish merchant He studied at the universities of Breslau and Berlin, where he became a disciple of Hegel A long-drawn and famous lawsuit (1846–54) brought him wide recognition In this period he became acquainted with Marxian doctrines and, partly influenced by them, developed a theory of state socialism He emphasized the role of the state and nationalism in contrast to Marx's teachings Thus he believed in state action rather than revolution and favored a state system of workers' cooperatives Lassalle's influence on German politics was great, particularly in introducing into the contest between Bismarck and the Prussian liberals the laborer as a third element He played a key part in establishing (1863) the first workers' political party in Germany, this later developed into the Social Democratic party He was killed in a duel over a love affair. He is the hero of *The Tragic Comedians* by George Meredith His collected writings have been published in German (10 vols , 1899–1909) See biographies by Arno Schirokauer (Eng tr , 1931) and D. J. Footman (1946)

Lassell, William (lusĕl'), 1799–1880, English astronomer He is noted for the construction of reflecting telescopes of such power that some of the planetary satellites discovered by him were not seen by other astronomers until many years later. He discovered the satellite of Neptune in 1846, Hyperion, the 8th satellite of Saturn (simultaneously with G. P Bond), in 1848; and two new satellites of Uranus (Ariel and Umbriel), in 1851.

Lassen Volcanic National Park (lă'sun), 103,429 28 acres, N Calif , est 1916 In a volcanic area of the Cascade Range, not far from the beginning of the Sierra Nevada, the park exhibits volcanic peaks, lava formations, and like phenomena The chief peak is Lassen Peak, 10,453 ft high, the only active volcano in the United States proper It erupted in 1914 and was intermittently active until 1921 It was discovered by Luis Argüello, probably in 1821, and later named for Peter Lassen, pioneer and guide

Lasso, Orlando di (ôrlän'dō dē lăs'sō), Latin *Orlandus Lassus* (ôrlän'dus lă'sus), 1532?–1594, composer of the Flemish school, b Mons At about 12 he entered the service of the viceroy of Sicily He studied in Milan and in Rome, where he became choirmaster (c 1553) in St John Lateran The first collection of his compositions was published at Antwerp in 1555 He went to Munich in 1556 to enter the service of the duke of Bavaria and in 1563 became court musical director, a position he held for the rest of his life His compositions represent the culmination of the Flemish choral school Although he knew and occasionally used all the stylistic innovations of his contemporaries, his own compositions are conservative Among his more than 2,000 compositions are works in every form known in his day Early in his career he composed in secular forms—French chansons and Italian *frottole,* villanelle, and madrigals—but later he turned increasingly toward sacred composition, writing Masses, motets, his great penitential psalms (pub 1584), and works which he called *madrigali spirituali.* Though not in every respect Palestrina's equal, Lasso was the more versatile and cosmopolitan master and was often more dramatic, certain of his sacred works are almost indistinguishable from Palestrina's

lasso (lă'sō, lăsōō'), light, strong rope, usually of horsehair, rawhide, or hemp, used primarily for catching large animals, as cattle and horses At one end of the rope is a running knot or a metal ring by means of which a loop or noose is made The loop is thrown around the horns or the feet of an animal and drawn tight The lasso was invented by American Indians and was used by them effectively in war against the Spanish invaders In the W United States and in parts of Latin America the lasso is regularly a part of the equipment of a cowboy To use it on horseback requires great skill of the rider and his horse If the skill is inadequate, the pull of the captured animal may throw the rider's horse, or the horse or rider may be entangled in the rope The lasso is often called a lariat, but this name is applied also to a rope used in picketing animals

L'Assomption (lăsōsyō'), town (pop 1,829), S Que , on L'Assomption river and NE of Montreal It is in a tobacco-growing district

L'Assomption (lăsōsyō'), river of S Quebec, rising in the Laurentians and flowing SE to Joliette, then S past L'Assomption to the St Lawrence at the northern end of Montreal island

Last Judgment see JUDGMENT DAY

Last Supper, of Jesus and his disciples (Mat 26 17–30, Mark 14 12–26, Luke 22 7–39, John 13–17, 1 Cor 11 23–29) For the sacrament, see EUCHARIST It has been a favorite subject of painting Duccio di Buoninsegna's painting of this ceremony is now in the Academy of Fine Arts, Siena, and in Florence are the interpretations of Ghirlandaio (refectory of Ognissanti), Andrea del Castagno (Sant' Apollonia monastery), and Andrea del Sarto (San Salvi) The best-known painting of all, that by Leonardo da Vinci, still forms a wall decoration at Santa Maria delle Grazie, Milan, a place of pilgrimage for art lovers, and in the Church of San Giorgio Maggiore, Venice, is Tintoretto's imposing and spirited composition Hans Holbein, the younger, painted this subject in Basel, and Nicolas Poussin, for the royal chapel, Versailles (now in the Louvre)

Lasus (lă'sus), fl 6th cent B C , Greek poet of Hermione in Argolis He is said to have been Pindar's teacher and to have written the first book on music Lasus contributed to the development of the dithyramb

Las Vegas (lăs vā'gŭs). **1** City (pop 8,422), co seat of Clark co , S Nev , near the Colorado, inc 1911. By the springs which made this a watering place on the trail to S California the Mormons built a fort in 1855 It was abandoned in 1857, but in 1864 the U S army established Fort Baker here The city grew rapidly after the arrival of the railroad in 1905. Las Vegas is principally an active resort city in a ranching and mining area The offices for HOOVER DAM were in Las Vegas until Boulder City could accommodate them in 1932 **2** City (pop 5,941, alt. 6,398 ft.), sometimes called East Las Vegas, co seat of San Miguel co., N N Mex , ESE of Santa Fe It forms one community with the town (pop. 6,421) of Las Vegas, sometimes called West Las Vegas, which was settled c 1835 on the west side of the Gallinas river and on the Santa Fe

Trail. Las Vegas is a mountain and health resort in a dude-ranch area and a shipping center for a sheep, cattle, and farm region New Mexico Highlands Univ and the state hospital for the insane are here. The ruins of Fort Union (1851–91), an important post on the Santa Fe Trail and a military base in the Civil War, lie to the northeast.

Latacunga (lätäkōōng'gä), city (1944 estimated pop 20,357), N central Ecuador A town of the ancient Incas, it is in a high mountain basin between the eastern and western Andean cordilleras Not far from COTOPAXI volcano, it has suffered from several earthquakes, one of which destroyed it in 1797 The porous volcanic soil makes the region poor for farmers, but rail and highway connections give it some commercial importance

Latakia (lätūkē'u, lätü-), city (pop c 35,000), W Syria, a port on the Mediterranean opposite Cyprus It was an ancient Phoenician city and later prospered as the Roman Laodicea ad Mare It remained in Byzantine hands until captured (1103) by the Crusaders under Tancred It throve in the 12th cent until after it was taken (1188) by Saladin In modern times it has been most famous for the kind of tobacco called Latakia It has much commerce During the period when Syria was under French mandate, Latakia was the capital of the territories of the Alawites It was incorporated into Syria in 1942

Latané, John Holladay (lä'tunā), 1869–1932, American historian, b Staunton, Va, grad Johns Hopkins (B A, 1892, Ph D, 1895) He was professor of history at Washington and Lee Univ (1902–13) and professor of American history and head of the department of history at Johns Hopkins (1913–30) He helped found the Walter Hines Page School of International Relations at Johns Hopkins in 1930 and was a member of its research staff until his death A champion of Woodrow Wilson and the League of Nations, he was especially interested in diplomatic history Among his books are *America as a World Power, 1897–1907* (1907), *From Isolation to Leadership* (1918), *The United States and Latin America* (1920), and *A History of American Foreign Policy* (1927, 2d ed, revised by David W Wainhouse, 1941)

La Tène (lä tĕn'), ancient Celtic settlement, Lake Neuchâtel, Switzerland, which, because of the antiquities of the period found here, gives its name to the culture of the second Iron Age The earliest phase of Tenian culture, from the 6th to the late 5th cent B C, spread from the middle Rhine region to E France, E Bavaria, and W Bohemia and is represented by metal swords, knives helmets, rings, etc, and by pottery showing Greek and Etruscan influence In its second phase (into the 3d cent B C), Tenian culture spread to Britain on the northwest, beyond Budapest on the east, and into Italy on the south Celtic coins were, perhaps, first made at this time, but they appear more generally in use in the third phase This ends in the late 2d cent B C and witnesses the penetration of Celtic influence into Asia Minor In the Late Tenian period, or the fourth phase, lasting up to the Christian era, Celtic art in Britain reached a high stage of development, while that on the Continent had lost much of its vigor At Glastonbury and at Aylesford in Kent, England, are interesting characteristic remains of the 1st cent B C

Lateran (lä'turun), name applied to a group of buildings of SE Rome facing the Piazza San Giovanni They are on land once belonging to the Laterani, it was presented to the Church by Constantine The Lateran basilica is the cathedral of Rome, the pope's church, the first-ranking church of the Roman Catholic Church, officially named the Basilica of the Savior, familiarly called St John Lateran, from a monastery of St John formerly near by The basilica, built perhaps before 311, was restored in the 5th and the 10th cent, rebuilt in the 14th and the 15th, and altered again in the 16th, the 17th, and the 18th cent, the main façade was added in 1734 Much of the decoration dates from the Middle Ages and includes the mosaics of the apse, which are among the most celebrated The Lateran baptistery, built probably in the 4th cent, was much restored The Lateran palace, the papal residence until the 14th cent, survived, greatly changed, until the 16th cent, when it was demolished to make way for the present palace, much smaller than the old one It now contains the pontifical museum of Christian antiquities The older palace was the scene of the five Lateran Councils, and the new one of the signing of the Lateran Treaty.

Lateran Council, First, 1123, the ninth ecumenical council of the Roman Catholic Church, summoned by CALIXTUS II to signalize the end of the INVESTITURE controversy by confirming the Concordat of Worms (1122) Some hundreds of bishops attended, at the Lateran Palace Its most important canons forbid the marriage of clerics or their cohabitation with women

Lateran Council, Second, 1139, the 10th ecumenical council of the Roman Catholic Church, convened at the Lateran Palace by INNOCENT II to heal the wounds left by the schism of the anti-pope Anacletus II (d. 1138). It punished the more obstinate followers of Anacletus. Among its canons were prohibitions of clerical concubinage and marriage and of the use of bows and crossbows in fighting Christians, usury also was condemned.

Lateran Council, Third, 1179, the 11th ecumenical council of the Roman Catholic Church It was convened at the Lateran Palace by ALEXANDER III after the Peace of Venice (1178) had reconciled Emperor Frederick I It was well attended and included an envoy from the Orthodox Greeks. The most important legislation was the first canon, which provided that the election of the pope was thereafter to be in the hands of the cardinals alone, two-thirds being necessary to elect Among the social decrees of the council were condemnations of usury, tournaments, and brigandage

Lateran Council, Fourth, 1215, the 12th ecumenical council of the Roman Catholic Church, convened at the Lateran Palace by INNOCENT III to crown the work of his pontificate It was one of the most brilliant councils ever held, and its canons sum up Innocent's ideas for the Church They include a statement of faith with a definition of transubstantiation, confirmation of all kinds of previous disciplinary canons, regulations for the trials of ecclesiastics, arrangements for a new crusade, and many other important matters This council established as the minimum of church membership the precept of annual confession and communion at Easter time, this is the Easter duty, still binding on all Roman Catholics

Lateran Council, Fifth, 1512–17, the 18th ecumenical council of the Roman Catholic Church, convened by JULIUS II and continued by LEO X, at the basilica and palace of the Lateran at Rome Julius called the council to counter an attempt begun (1510) by Louis XII of France to revive the conciliar theory of a hundred years before (see SCHISM, GREAT) and thus precipitate a schism In this maneuver the council was a success, at it was ratified a papal settlement with France, the Concordat of 1516 Otherwise the council did not accomplish much, the reforming party had to wait until the Council of Trent It did republish the bull of Julius (1503) which declared that simony invalidated a papal election—a signal reform Interesting provisions of the council include a decree legalizing the charitable pawnshops the Franciscans had been establishing and another which set up a censorship of printed books

Lateran Treaty, a concordat between the Holy See and the kingdom of Italy signed in 1929 in the Lateran Palace by Cardinal GASPARRI for PIUS XI and by MUSSOLINI for Victor Emmanuel III One of the important negotiators was Cardinal Pacelli, later Pope Pius XII In 1871 the unity of Italy was perfected by restricting the papal sovereignty to a few buildings and awarding to PIUS IX and his successors an annual indemnity for the lost Papal States The Roman Catholic Church never recognized this arrangement and never accepted the indemnity, and the popes considered themselves prisoners in the Vatican The problems involved were called the Roman Question, and the treaty solved them It states that the Roman Catholic is the only state religion of Italy and that Italy recognizes as fully sovereign and independent the new state called Vatican City Italy guarantees Vatican City public services and protection and recognizes as parts of it certain buildings outside it The Italian government will punish crimes committed within Vatican City, when so requested, and the Holy See will extradite to Italy persons accused of acts recognized by both parties as crimes As to the reestablishment of the canon law in Italy, matrimony is a sacrament, and banns must be published, nullity of marriages is a question for the Church, while separations are adjudicated by the state Religion is to be taught in primary and secondary schools, and the Holy See guarantees that Catholic organizations will abstain from politics The Italian government guarantees the inviolability of the pope The Holy See, pursuant to its perpetual mission of peace, will remain apart from temporal competitions of other states and from international congresses for peace, unless a unanimous appeal is made to its mission, the Holy See will use its moral and spiritual power to prevent warfare when it sees fit The Holy See announced in the treaty that it had its proper liberty, that the Roman Question was closed, and that it recognized the kingdom of Italy under the house of Savoy The Lateran Treaty remained in effect after the Second World War.

Latgale (lät'gälĕ) or **Latgallia** (lätgă'lēu), region, E Latvia, N of the Western Dvina Daugavpils is the chief city It was settled in the early Middle Ages by the Latgalians, a people closely akin to the Letts, speaking a Lettish dialect Latgale shared the history of LIVONIA (of which it formed the southern part) until 1561, when it passed to Poland Unlike the rest of Latvia, it retained Roman Catholicism By the first partition of Poland (1772) it passed to Russia, and in 1918 it was proclaimed part of newly independent LATVIA

lathe (lādh), machine tool for holding and turning wood, metal, or other hard material while it is cut into forms such as balusters, gate or porch posts, legs, rungs, or posts for chairs and other furniture, and candlesticks The term also applies to the movable frame of a loom which carries the reed used to part the warp and beat up the weft and to a kind of potter's wheel

Lathrop, Francis (lă'thrup), 1849–1909, American painter and designer, b at sea He designed the chancel of Trinity Church, Boston, and assisted John La Farge with its decoration His best-known mural paintings are *Apollo* (Metropolitan Opera House, New York), *The Light of the World* (St Bartholomew's Church, New York), and *Moses with the Tablets of the Law* (Bowdoin College chapel, Brunswick, Maine) The best examples of his work in stained glass are the Marquand memorial window in the Princeton Univ chapel and the chancel window in Bethesda Church, Saratoga, N Y

Lathrop, George Parsons, 1851–98, American author and editor, b near Honolulu, studied in Germany (1867–70), husband of Rose Hawthorne LATHROP His works include verse and novels, *A Study of Hawthorne* (1876), the Riverside edition of Hawthorne's works, with notes and a biographical sketch, and an adaptation of Hawthorne's story for Walter Damrosch's opera *The Scarlet Letter* (1896) He helped organize the American Copyright League in 1883 and was its secretary

Lathrop, Julia Clifford, 1858–1932, American social worker and administrator, b Rockford, Ill, grad Vassar, 1880 Associated with Jane Addams at Hull House in Chicago, she was active in civic work, aiding in founding (1899) the country's first juvenile court From 1912 to 1921 she was head of the U S Children's Bureau, where she was responsible for notable achievements in child welfare. See biography by Jane Addams (1935)

Lathrop, Rose Hawthorne, 1851–1926, American nun, philanthropist, and writer, youngest daughter of Nathaniel Hawthorne In 1871 she married George Parsons LATHROP In 1891 she and her husband embraced Roman Catholicism She chose as a mission the work of helping relieve the pains and discomforts of penniless sufferers from incurable cancer She went to live in New York slums to be near them She founded St Rose's Free Home for Incurable Cancer in New York city, and in 1901 she established for the same purpose Rosary Hill Home at Hawthorne, N Y, a place named after her She entered into religion after her husband's death in 1898, and became Mother Mary Alphonsa Lathrop She founded a community of sisters to perpetuate her work, they are Dominican tertiaries Her literary works include *Along the Shore* (1888), verse; with her husband, *A Story of Courage* (1894), an account of the Visitation convent at Georgetown; and *Memories of Hawthorne* (1923) See Katherine Burton, *Sorrow Built a Bridge* (1937)

Lathrop, city (pop 1,049), NW Mo, NE of Kansas City, in a livestock area, laid out 1857

Latimer, Hugh (lă'tĭmur), c 1485–1555, English bishop and Protestant martyr Latimer was educated at Cambridge, entered the Church, and came under the influence of the Reformation He first became prominent by defending Henry VIII's divorce from Katharine of Aragon and in 1535 was made bishop of Worcester His strong Protestant convictions, however, prevented him from subscribing to Henry VIII's Six Articles (1539), and he resigned his see and was imprisoned for nearly a year after the accession of Edward IV (1547) He preached against the abuses of Church and clergy in eloquent and vivid sermons When the Catholic Mary I came to the throne he declined to evade trial, refused to recant his Protestantism, and with Nicholas RIDLEY was burned at the stake as a martyr See C M. Gray, *Hugh Latimer and the Sixteenth Century* (1950)

Latina (lätē'nä), formerly **Littoria** (lēt-tōr'yä), town (pop 2,577), capital of Latina prov, Latium, central Italy, the first population center founded (1932) by Mussolini in the reclaimed PONTINE MARSHES The entirely modernistic town has a town hall, schools, a church, and all public utilities Its name was changed after the fall of Mussolini

Latin America, the Spanish-speaking, Portuguese-speaking, and French-speaking countries of North America, South America, Central America, and the West Indies The 20 republics are Argentina, Bolivia, Brazil, Chile Colombia, Costa Rica, Cuba, Dominican Republic, Ecuador, El Salvador, Guatemala, Haiti, Honduras, Mexico, Nicaragua, Panama, Paraguay, Peru, Uruguay, and Venezuela. The term is also used to include Puerto Rico, the French West Indies and other islands of the West Indies where a Romance tongue is spoken, and sometimes French Guiana

Latin Empire of Constantinople: see CONSTANTINOPLE, LATIN EMPIRE OF

Latini, Brunetto (brōōnĕt'tō lätē'nē), d 1294?, Italian scholar and diplomat He was ambassador to Alfonso X of Spain and a friend of Dante Latini was one of the first to make translations into Italian. He also wrote, in *langue d'oïl*, the *Tesoretto* [the treasure], an encyclopedia

Latin Kingdom of Jerusalem: see JERUSALEM, LATIN KINGDOM OF.

Latin language, Italic language of ancient Rome. As the standard language of most of the Roman Empire it spread widely and continued in the Romance languages. Schoolbook Latin is the standard language of Cicero and Caesar The Latin of the Christian Fathers, the standard of some centuries later, continues to be the official language of the Holy See and of the Roman liturgy in the Roman Catholic Church.

Latin literature. Very little remains of the rude songs and the native poetry of the Romans and Latins before the rise of a literature The close of the First Punic War (c 240 B C) marks the beginning of literary work in Rome with the plays of LIVIUS ANDRONICUS, adapted from the Greek NAEVIUS also wrote dramas, but he was far surpassed by the greatest of Roman dramatists, PLAUTUS, a first-rate writer of comedy His plays were much nearer the people than subsequent Latin works, as, for instance, those of ENNIUS, who introduced the hexameter into Latin CATO THE ELDER opposed the Hellenizing group, to which Ennius belonged, and wrote his works on history and agriculture in as rude a Latin as possible His efforts had little effect, for before he died elegance had come into its own as desirable in literature The comedian TERENCE and the historian POLYBIUS exemplify the increasing interest in things Greek The 1st cent B C, the last era of the republic, produced some of the greatest figures in Latin literature—CICERO and Julius CAESAR, who excelled in prose, and LUCRETIUS and CATULLUS, masters of poetry. Lesser lights were the historian SALLUST and the encyclopedist VARRO The Augustan Age had a fundamentally different atmosphere from the epoch of Caesar VERGIL shows the temper of his circle, with his admiration of the new empire More worldly was HORACE, who brought the Latin lyric to perfection The elegy was cultivated by TIBULLUS, PROPERTIUS, and the very brilliant OVID This is also the period of the historian LIVY The 1st cent A D marked a decline from which Latin literature in its classical form never recovered SENECA, father and son and LUCAN with PERSIUS and STATIUS typify a period of tendencies to imitate the masters, both Latin and Greek The most original poets were MARTIAL and JUVENAL, masters of mordant satire PETRONIUS, FRONTINUS, PLINY THE ELDER, PLINY THE YOUNGER, and the greater TACITUS were the chief writers of prose, and Quintilian brought literary criticism to its apogee The 3d and 4th cent found the classical inspiration in Rome wearing thin New subjects were occasionally introduced, as by AUSONIUS and AVIENUS, but in general writing had ceased to be anything but a purely literary affair CLAUDIAN was the best of the late poets, and FRONTO and MARCUS AURELIUS the chief prose writers APULEIUS and AMMIANUS MARCELLINUS were exceptional, because both wrote as they spoke rather than according to arbitrary canons The philological scholars of the empire became numerous with time These included Aulus GELLIUS, Terentianus, MACROBIUS, Martianus CAPELLA, and PRISCIAN. As the classical inspiration died, an entirely new kind of Latin literature was growing up This was formed in the writings of Christians PRUDENTIUS attempted to build a Christian style on classical models, but failed Latin became the standard language of the West and by far the greater bulk of medieval literature as well as the records and even letters were in Latin (see PATRISTIC LITERATURE, MEDIEVAL LATIN LITERATURE, ROMAN LAW) The literature of the RENAISSANCE represents a conscious attempt to recapture the classical spirit Most distinguished men cultivated Latin, and many of them succeeded in writing a Latin style that stands comparison with classical Latin models. PETRARCH and BOCCACCIO regarded their works in Latin as highly as those in Italian Such humanists as POGGIO BRACCIOLINI, POLITIAN, PONTANO, and PIUS II were accomplished Latin writers. Of the prose writers in Latin at this period ERASMUS was the greatest He attacked violently the all-pervasive Ciceronianism of the time, which was making Latin writing again a matter of *tour de force* Good Latin poets have been fewer since the Renaissance, but two famous men are among them, George BUCHANAN and JOHN MILTON Latin literature, as such, by the 20th cent is nearly dead, for its cultivation is limited to the ever-narrowing circles of classicists and to the Roman Catholic Church, which adds new matter to the liturgy only rarely and confines use of extra-liturgical Latin to official, nonliterary documents See Tenney Frank, *Life and Literature in the Roman Republic* (1930), H J Rose, *Handbook of Latin Literature from the Earliest Times to the Death of St Augustine* (1937)

Latin Monetary Union. In 1865 France, Belgium, Italy, and Switzerland (joined in 1868 by Greece) agreed to regulate their national coinage on a uniform basis Their coins thus became freely interchangeable The First World War disrupted the system, which was abandoned in 1927

Latin Road: see ROMAN ROADS

Latins, in ancient times, inhabitants of Latium, particularly of the great plain of Latium. They succeeded an earlier people, whom they probably absorbed. The Latins established themselves in many small settlements, which gradually increased in size They were joined in religious leagues, which took on a political color. Rome early took a dominant place, but the Latins were united against the Etruscans and the Samnites. Roman hegemony was, after many changes of fortune, definitely established in 338 B C, when the smaller states were absorbed and the larger states made subject allies by Rome The Latins, however, continued to have a special status, and in theory the social and political equality of the Latins continued There was some rebellion, especially late in the 2d cent. B.C., but generally the Latins remained loyal to Rome They were admitted to Roman citizenship in 90 B C at the time of the Social War

Latin Way see ROMAN ROADS.

latitude, the angular distance of any point on the surface of the earth north or south of the equator, measured from the center of the globe Since this angle cannot be measured directly, latitude is determined by instrumental observation (by means of a sextant) of the angles between the horizon and the zenithal position of the sun at noon It may also be obtained by the instrumental observation of the North Star (Polaris) In the measurement of latitude, the meridian circle is divided into four quadrants, each being subdivided into 90 parts called degrees (°) of latitude The numbering of degrees proceeds from the equator (0°) to either pole (90° N or 90° S), any point on the earth being on an imaginary line parallel to the equator, called PARALLEL of latitude The length of one degree of latitude (c 69 mi) increases slightly from equator to pole as a result of the earth's polar flattening

Latium (lā'shēum), Ital *Lazio* (lä'tsyō), region (6,634 sq mi, pop 2,654,924), central Italy, between the Apennines and the Tyrrhenian Sea and between the Fiora and Garigliano rivers It is divided into the provinces of Rome, Frosinone, Latina, Rieti, and Viterbo. Rome is the capital Latium contains high mountains, hills, and crater lakes, a coastal plain (the CAMPAGNA DI ROMA and the former PONTINE MARSHES), and the lower Tiber valley Wine, olive oil, cereals, and vegetables are produced Agriculture has expanded since reclamation works were completed Industries are scarce, there are some hydroelectric plants and paper and chemical industries Anciently Latium included a limited area E and S of the Tiber to the Alban Hills, only after its annexation (1870) to Italy did it reach approximately the present limits In early Roman times Latium proper was inhabited by the LATINS, while the Etruscans lived N of the Tiber and several Italic tribes held other areas Rome subdued all cities of Latium After the 8th cent. A D the duchy of Rome, including most of modern Latium, belonged to the popes, although their authority was not always recognised in the towns, ruled at times as free communes or by local feudal lords Excluding the area S of Terracina, which belonged to the kingdom of Naples, Latium remained a part of the PAPAL STATES until 1870

Latona. see LETO

La Tour, Georges de (zhôrzh' du la tōōr'), 1593–1652, French painter Little is known about his life About 1620 he settled in Lunéville in Lorraine At the instigation of Charles IV, duke of Lorraine, he presented a painting of St Sebastian to Louis XIII By 1646 he bore the title of painter in ordinary to the king After his death his reputation declined and his works were attributed to other painters until critical interest in his art revived in the 20th cent Characteristic of his style is a bold use of nocturnal lighting effects and marked simplification of plastic form, suggestive of the influence of Caravaggesque naturalism, possibly through Gerard van Honthorst Of his few known works outstanding examples, outside of those in the French national museums, are the *Education of the Virgin* (Frick Coll., New York) and *St Sebastian* (Berlin Mus collection).

La Tour, Maurice Quentin de (mōrēs' kätē dù la tōōr'), 1704–88, French pastelist He early devoted himself to portraiture in pastel From 1737 to 1774 he exhibited at the Salon over 150 remarkable portraits His spirited and penetrating likenesses brought him an immense popularity which lasted throughout his life His work is still highly prized. Among his famous sitters were Marie Leszczynska, Mlle Diderot, Crébillon, Voltaire, Louis XV, Mme de Pompadour (a full-length, life-size portrait in pastel), Marshal de Saxe, and Mlle Fel. Most of his work is in the Louvre and in the museum of his native Saint-Quentin.

La Tour d'Auvergne, Théophile Malo Corret de (täôfēl' mälō' kôrā' dù lä tōōr' dōvĕr'nyù), 1743–1800, French soldier He entered the army and was a captain by 1779 In the wars of the American Revolution he fought with Spanish forces against the British at Minorca Although an aristocrat, he fought for the revolutionists in the French Revolutionary Wars He was in 1795 captured by British corsairs and imprisoned until he was exchanged in 1797 He fought in the Swiss campaign La Tour d'Auvergne was notable for his bravery and modesty, when he refused promotion he was officially dubbed the "first grenadier of France." He was killed in battle. For years afterward his name was called at roll call, and the answer was made by his comrades, "Dead on the field of honor!" La Tour d'Auvergne was also a scholar of Gallic antiquities and Celtic languages (especially Breton).

La Trappe: see TRAPPISTS.

Latreille, Pierre André (pyĕr' ändrā' lätrā'yù), 1762–1833, French naturalist. One of the founders of entomology, he erected several insect orders and arranged the insect collection of the Jardin des Plantes. He wrote extensively on insects and crustaceans and assisted Lamarck and Cuvier in some of their works.

La Trémoille or **La Trimouille, Georges de** (zhôrzh' du lä trămwä'yù or trĕmōō'yu), c 1385–1446, favorite of Charles VII of France, sometime chamberlain to John the Fearless of Burgundy He was captured by the English at Agincourt (1415), and he later served as a mediator between John and the dauphin, Charles VII Having become Charles's favorite after the murder of Pierre de Giac (1427), he opposed Joan of Arc and by his ruthless policies plunged France into anarchy Overthrown (1433) by a coalition under Constable de Richemont (ARTHUR III of Brittany), he joined the PRAGUERIE (1440) but was later pardoned

La Trémoille or **La Trimouille, Louis de** (lwē), 1460–1525, French general, grandson of Georges de la Trémoille He commanded the army which invaded Brittany in 1488 and subsequently fought in the ITALIAN WARS, notably at Fornovo (1495), Marignano (1515), and Pavia (1525)

Latrobe, Benjamin Henry (Benjamin Henry Boneval Latrobe) (lutrōb'), 1766–1820, American architect, b Yorkshire, England, of American parents He is considered the first professional architect in the United States Latrobe received his training both in architecture and in engineering in England and practiced successfully in London After the death of his first wife he came to the United States, arriving in Norfolk in 1796 He practiced his profession there and in Richmond until 1799, when he went to Philadelphia In 1803 President Jefferson appointed him surveyor of public buildings Besides building residences in Washington, Philadelphia, and other cities, Latrobe did much monumental work and introduced Greek forms, an important element of the classic revival His design (1799) for the Bank of Pennsylvania in Philadelphia was in the form of a Greek Ionic temple, and his Bank of the United States (completed by William Strickland, 1819–24), now the old Philadelphia Custom House, was patterned after the Parthenon These, together with his Roman Catholic cathedral in Baltimore (1805–18)—the first cathedral built in the United States—make a group expressive of the best monumental architecture of the time Other works are St. John's Church in Washington (1816) and the penitentiary in Richmond, Va (1797–1800) His design for Sedgeley (1800), a residence near Philadelphia, is supposed to be the first executed example of the Gothic revival in the country After the burning of the Capitol, he was engaged, from 1815 to 1817, in rebuilding Latrobe's son Henry Latrobe had been sent to New Orleans to construct the city's waterworks after his father's design, but died of yellow fever in 1817 In 1818 Latrobe sailed to New Orleans to complete the project, bringing his family overland in 1820 He too died of yellow fever. See Latrobe's diary of his trips to New Orleans and his stay there, *Impressions respecting New Orleans* (ed by Samuel Wilson, Jr, 1950) His other sons were John H B LATROBE and **Benjamin Henry Latrobe,** 1806–78, an engineer He served (1847–75) as chief engineer of the Baltimore & Ohio RR, laying out the line between Washington and Baltimore, between Harpers Ferry and Cumberland, and over the mountains between Cumberland and Wheeling, a major engineering feat.

Latrobe, John Hazlehurst Boneval, 1803–91, American philanthropist, son of Benjamin H Latrobe He studied law, and from 1828 until his death he was regularly retained as counsel for the Baltimore & Ohio RR, but he appeared in many independent cases. Throughout his life he was much interested in the progress and welfare of Baltimore and did much for Druid Hill Park He was a founder of the Maryland Institute for the Promotion of Mechanic Arts and of the Maryland Historical Society. He was a prominent supporter of the African colonization of Liberia and in 1853 succeeded Henry Clay as president of the American Colonization Society See John E Semmes, *John H. B. Latrobe and His Times* (1917).

Latrobe (lutrōb'), industrial borough (pop. 11,111), SW Pa., ESE of Pittsburgh; inc. 1854. It has coke and metal-products works. St. Vincent College (Catholic; for men, 1846) is here.

Latrocinium: see EUTYCHES

Latta, town (pop. 1,334), NE S.C., NE of Florence, in a cotton and tobacco area

Latter-Day Saints, Church of Jesus Christ of, name of the religious sect founded (1830) at Fayette, N.Y., by Joseph Smith The headquarters are in Salt Lake City. Its members, now numbering more than a million, are generally called Mormons

(for their history, see MORMONS). Their beliefs are based primarily on the Bible and the Book of Mormon, a translation of inscriptions on tablets of gold revealed to Joseph Smith (for the story of discovering them, see SMITH, JOSEPH), on revelations made to Smith and contained in the volume *Doctrines and Covenants*, on later revelations, and on *The Pearl of Great Price* (sayings attributed to Moses and Abraham). The Book of Mormon is primarily a record ascribed to the prophet Mormon and recounting the early history of peoples in America from the Diaspora to A D 600. In a further vision priesthood was conferred upon Smith and upon an associate, Oliver Cowdery. The Church was then founded on the basis of the priesthood of the two orders of Aaron and Melchizedek The Aaronic priesthood (deacons, teachers, and priests) is primarily concerned with the temporal affairs of the Church, that of Melchizedek (elders, seventies, and high priests) with the spiritual leadership Both are represented in the Council of Twelve (the Apostles) and in the first presidency (the president and two counselors—three high priests vested with supreme authority) The territorial divisions of the Mormon settlements are wards, each ward having a bishop and two counselors. Several striking characteristics have marked the Church One is the importance of revelation, for many practices and doctrines have been established by revelations in vision to the spiritual leaders Another is the interdependence of temporal and spiritual life, the tithing, and attention to community welfare A third is the vigorous proselytizing which has in the course of a century and a quarter raised the Church from a handful of followers to its present great size

Latter Day Saints, Reorganized Church of Jesus Christ of, formed among the faithful of the church founded by Joseph SMITH They reorganized the organization in 1852, and since that time it has been separate and distinct from the Church of Jesus Christ of Latter-Day Saints with its headquarters in Salt Lake City. The headquarters of the Reorganized Church were first at Plano, Ill , until 1881, then at Lamoni, Iowa, until 1904, and since 1904 in Independence, Mo The doctrines of the Church are derived from the Bible, the Book of Mormon, *The Pearl of Great Price* (sayings ascribed to Moses and Abraham), and the revelations made to Joseph Smith

Lattimore, Owen (ō'ĕn lă'tĭmôr), 1900–, American author and educator, b Washington, D C He was educated (1915-19) at St Bees School, Cumberland, England, and did graduate research (1928–29) at Harvard From 1920 to 1926 he was engaged in business and newspaper work in China Afterwards he traveled and did research for various organizations in China, Manchuria, Mongolia, and Chinese Turkistan, writing such books as *The Desert Road to Turkestan* (1928), *High Tartary* (1930), *Manchuria Cradle of Conflict* (1932), and *The Mongols of Manchuria* (1934) He edited (1934–41) the journal *Pacific Affairs* and in 1938 was made director of the Walter Hines Page School of International Relations at Johns Hopkins In the Second World War, Lattimore was adviser (1941–42) to Generalissimo Chiang Kai-shek in China, deputy director (1943–44) of Pacific operations in the Office of War Information, and economic adviser (1945–46) to the Japanese Reparations Commission In 1950 he was accused by Sen Joseph R McCarthy of being Russia's top espionage agent in the United States, but subsequent investigation cleared him of the charges Among his other books are *Inner Asian Frontiers of China* (1940), *America and Asia* (1943), *Solution in Asia* (1945), *Pivot of Asia* (1950), and *Ordeal by Slander* (1950)

La Tuque (la tük'), town (pop 7,919), S Que , on the St Maurice river and NW of Quebec. A hat-shaped rock on the river bank gave the town its name La Tuque, in a lumbering and farming country, was established as a trading post in the French period, it grew after the advent of the railroad in 1908 It is a pulp-milling center with a hydroelectric power station

Latvia (lăt'vēu), Latvian *Latvija*, republic (24,900 sq mi , 1935 pop 1,950,502), NE Europe, since 1940 a constituent republic of the USSR, but at the beginning of 1950 still unrecognized as such by the United States. It borders on Estonia in the north, Lithuania in the south, the Baltic Sea with the Gulf of Riga in the west, the RSFSR in the east, and Belorussia in the southeast RIGA (the capital), Liepaja, Daugavpils, Cesis, and Jelgava are the chief cities Latvia falls into four regions N of the Western Dvina river are Vidzeme and Latgale, which were parts of historic LIVONIA, S of the Dvina are Kurzeme and Zemgale, which belonged to the former duchy of COURLAND Dairying and stock raising are intensively carried on. Primarily a hilly, agricultural plain, Latvia also has valuable timber resources. Lumber and fine and heavy machinery are the chief industrial products. Besides a Russian minority, the inhabitants consist of Letts and of the closely related Latgallians, both members of the Baltic language subfamily. Lutheranism is the predominant religion, except in Latgale, where Roman Catholicism prevails. The Letts (after whom the country is also called Lettland) were conquered and Christianized after hard struggles by the LIVONIAN KNIGHTS early in the 13th cent. Their country formed the southern part of Livonia until 1561, when Courland became a vassal duchy under Polish suzerainty and Livonia passed to Poland. In 1629 Sweden conquered Livonia (save Latgale), which it lost in turn to Russia in 1721. With the first and third partitions of Poland, Latgale and Courland also passed to Russia (1772, 1795) The entire region had been dominated since the times of the Livonian Knights by German merchants, settled there by the Hanseatic League, and by a German landowning aristocracy, the Letts were reduced to servitude Under the Russian regime these German "Baltic barons" retained their power, and German remained the official language until 1885, when it was replaced by Russian In 1817-19 the serfs were emancipated, and in the middle of the 19th cent a Lettish national revival began By the end of the 19th cent Latvia had attained great agricultural and industrial prosperity In the revolution of 1905 the Letts played a prominent role, and bloody reprisals were meted out Latvia was devastated in the First World War Lettish regiments supported the Bolshevik Revolution of 1917, and in 1918 the independence of Latvia was proclaimed However, early in 1919, Soviet troops briefly occupied Latvia They were expelled by the Latvians, as were German volunteer bands under the adventurers Bermondt von der Goltz and Rudiger von der Goltz Peace with Russia followed in 1920 Agrarian reforms expropriated the largest land holdings Latvia had a parliamentary regime until 1934, when Karlis Ulmanis established a reactionary dictatorship In Oct , 1939, Russian pressure forced Latvia to grant the USSR several naval and military bases, a subsequent Latvian-German agreement provided for the transfer of the German minority to Germany In June, 1940, Soviet troops occupied Latvia, elections held under Russian auspices in July, 1940, resulted in the absorption of Latvia into the USSR as a constituent republic Occupied (1941–44) by German troops, it was reconquered by Russia Many Latvians fled to Germany on the approach of the Russians In the post-war years, the remaining estates were at first distributed to landless peasants, but soon collectivization of the farms set in Industrial expansion was speeded up by the Communist government

Laube, Heinrich Rudolf (hīn'rĭkh rōō'dôlf lou'bu), 1806–84, German novelist and dramatist Prominent in the Young Germany movement, he wrote two series of historical novels, *Das junge Europa* [young Europe] (1837) and the nine-volume *Der deutsche Krieg* [the German war] (1863–66), travel sketches and stories, and several plays, among them *Die Karlsschüle* (1847) and *Graf Essex* (1856).

Laud, William (lôd), 1573–1645, English churchman, archbishop of Canterbury He studied at St John's College, Oxford, and was ordained a priest in 1601 From the beginning Laud showed his hostility to Puritanism He became president of St. John's College in 1611, dean of Gloucester in 1616, and bishop of London in 1628 Laud thought of the English Church as a branch of the universal Church, claimed apostolic succession for the bishops, and believed that the Anglican ritual should be prescribed in all churches To accomplish his ends Laud, working closely with Charles I, tried to eliminate all Puritans from important positions in the Church As chancellor of Oxford (from 1629) he carried out many reforms, strengthened the intellectual and moral discipline, and increased the number of students In 1633 Laud became archbishop of Canterbury and continued on a larger scale his efforts to enforce High Church forms of worship in the Church Through the court of high commission and the Star Chamber he persecuted and imprisoned many nonconformists, such as William Prynne The tyranny of his courts and his identification of the episcopal form of church government with the absolutism of Charles brought about violent opposition not only from the Puritans but also from those who were jealous of the rights of Parliament In 1637 he decreed the Anglican prayer book compulsory in Scotland and thus precipitated the Bishops' Wars between Charles and Scotland Supporting Charles and the earl of Strafford to the end, Laud was impeached (1642) by the Long Parliament Found not guilty of treason by the House of Lords (1643), he was condemned to death by the Commons through a bill of attainder The courage he displayed at the scaffold impressed even his enemies See biographies by Arthur Duncan-Jones (1927), Robert Coffin (1930), and Hugh Trevor-Roper (1940)

laudanum · see OPIUM

Lauder, Sir Harry (lô'dûr), 1870–1950, Scottish baritone, popular for his singing of ballads and comic songs, many of them his own composition His original name was MacLennan In the Second World War he emerged from retirement to entertain the Allied soldiers He was knighted in 1919 See his autobiography, *Roamin' in the Gloamin'* (1928), and his reminiscences, *Wee Drappies* (1932).

Lauderdale, James Maitland, 8th earl of (māt'lŭnd, lô'dûrdāl), 1759–1839, Scottish statesman and author. As a member of the House of Commons (1780–89) he was strongly Whig and opposed the American and French wars He was one of the leaders of the impeachment of Warren Hastings and attacked (1794) the granting of a pension to Edmund Burke In the House of Lords, Lauderdale was long an active member of the opposition, but finally became a Tory He wrote many political and economic tracts, the most important of which was the *Inquiry into the Nature and Origin of Public Wealth* (1804; enl ed , 1819).

Lauderdale, John Maitland, duke of (lô'dûrdāl), 1616–82, Scottish politician. He entered public life as a Covenanter and was one of the parliamentary commissioners to treat with Charles I at Uxbridge (1645) In the complicated dealings which followed he attached himself to the royalists and gained the confidence of Charles II, with whom he went to Scotland (1650) Captured at Worcester (1651), he was kept prisoner by the Puritans until 1660 Charles II made him secretary of state (1660) After 1667 he was all-powerful in Scotland, where he attempted to establish the supremacy of the crown in both state and Church. Although a member of the CABAL ministry, he took little part in English affairs Made earl of March and duke of Lauderdale (Scottish) in 1672, he was raised to the English peerage as earl of Guilford and made a privy councilor in 1674 In 1677 his use of Highland troops to suppress conventicles brought attacks upon him He kept his influence by intrigues until 1680, when his health broke and Parliament undertook to force his resignation In 1682 he gave up all his offices Debauched, arrogant, unscrupulous, but able, he was one of the most unpopular statesmen of the court. See biography by W C Mackenzie (1923)

Laudon or **Loudon, Gideon Ernst, Baron von** (both gē'dēōn ĕrnst' barōn' fŭn lou'dŏn), 1717–90, Austrian field marshal In the Seven Years War he defeated Frederick II of Prussia at Kunersdorf, and in 1789 he captured Belgrade from the Turks.

Laudonnière, René Goulaine de (runā' gōōlĕn' du lôdônyĕr'), fl 1562–82, French colonizer in Florida After accompanying Jean RIBAUT on the first French expedition to Florida (1562), he led a second colonization attempt in 1564, establishing Fort Caroline (named for Charles IX) on the south bank of the St Johns river near its mouth The colonists soon incurred the enmity of the Indians, many refused to work, others took to piracy, and finally most of them mutinied Fort Caroline was in desperate straits when Sir John Hawkins appeared in Aug , 1565, and sold Laudonnière food and one of his ships He was prepared to sail for France when Ribaut arrived with supplies, reinforcements, and an order for Laudonnière to return to answer charges which had been brought against him His departure was delayed by the appearance of the Spanish Ribaut sailed to attack them at St Augustine, but Pedro MENÉNDEZ DE AVILÉS attacked Fort Caroline by land and massacred most of those left there by Ribaut Laudonnière, one of the few who escaped, finally reached France in Jan , 1566 His *L'Histoire notable de la Floride* (1586) was translated by Richard Hakluyt as *A Notable Historie Containing Foure Voyages Made by Certayne French Captaynes into Florida* (1587)

Laue, Max von (mäks' fŭn lou'u), 1879–, German physicist, studied under Max Planck From 1919 he was professor of theoretic physics at the Univ. of Berlin He worked out a method for measuring X-ray wave lengths, in which a crystal (rock salt) is used, producing diffraction of the rays. For this work (which also made possible a closer study of crystal structure), he received the 1914 Nobel Prize in Physics

Lauenburg (lou'unbôrk), former duchy, now in Schleswig-Holstein, N Germany, on the right bank of the lower Elbe Lauenburg or Lauenburg an der Elbe (pop 10,613) is the chief city Conquered (12th cent) by Henry the Lion, the duchy of Saxe-Lauenburg was (1181–1689) the fief of a branch of the Ascanian house of Saxony, when that dynasty was extinguished, it passed to the house of Hanover The Congress of Vienna awarded (1815) the duchy to Prussia and made it a member state of the German Confederation, but Prussia ceded it to the Danish crown in exchange for W Pomerania, this exchange, however, did not affect the membership of Lauenburg in the confederation In the Danish war of 1864 the duchy was seized by Prussia and Austria, and Austria soon afterward ceded its rights to Prussia, which incorporated it into Schleswig-Holstein In 1890 Bismarck received the title duke of Lauenburg, which, however, he never used

laughing gas, colorless gas with a sweetish taste and odor It is a compound of nitrogen and oxygen known as nitrous oxide, is soluble in water, boils at −89 5°C , and solidifies at −102.4°C. It is liquefied without difficulty, its critical temperature being 36 5°C It supports combustion but does not provide oxygen for respiration It is prepared by heating ammonium nitrate (care must be taken to avoid an explosion), which breaks up into the

oxide and water. Nitrous oxide was discovered by Joseph Priestley in 1772 when he removed oxygen from nitric oxide by the action of moistened iron filings, and its properties were later investigated by Sir Humphry Davy. It is widely used to produce anesthesia in dental extractions and minor operations, the name laughing gas being given because a common aftereffect is a laughing hysteria

Laughlin, James Laurence (lô'flĭn), 1850–1933, American economist, b Deerfield, Ohio, Ph D Harvard, 1876 He was a distinguished teacher, and as head of the department of political economy at the Univ of Chicago (1892–1916) he gathered a group of brilliant men A classicist and follower of Mill in economic theory, he nevertheless encouraged such unorthodox thinkers as Thorstein Veblen and Wesley C Mitchell He edited (1892–1933) the *Journal of Political Economy* Laughlin's chief interests were in currency and monetary problems, and he served as adviser to various state and national governments In 1894–95 he reorganized the monetary system of Santo Domingo He later urged reform of the U S Federal Reserve Act Important among his prolific writings is *A New Exposition of Money, Credit, and Prices* (1931)

Launay, vicomte de see GIRARDIN, DELPHINE GAYDE

Launcelot of the Lake, Sir see ARTHURIAN LEGEND

Launceston (lôn'sĕstun, lŏn'–), city (pop 37,724), on N Tasmania, Australia, at the confluence of the North Esk and South Esk, founded 1805 Second city of the state in size, it is a port and the center of a rich agricultural area There are woolen mills and brassworks, the principal exports are dairy products, flour, and lumber

launch, small motor-propelled BOAT, usually open, but sometimes with a small cabin Launches are used for short pleasure cruises on rivers and along coasts and also for carrying officials and sometimes passengers to and from ocean liners The largest of a ship's boats is also called a launch and may be propelled by steam, motor, or sail, it is much used for carrying men and stores to and from shore

laundry, a commercial plant for washing clothing and household linens, the room in a house reserved for washing, and the operation of washing Laundering has always been one of the major duties of the housewife, whether the work was done by treading or beating on stones or by boiling in a caldron over an open fire in the open air, the labor has required both strength and skill The making of soap and compounding of bleaches were household duties up to the later years of the 19th cent, when commercial soaps and various cleansing and disinfecting agents began to be extensively manufactured In a modern domestic laundry the equipment often includes, besides the electric washing machine, a small mangle, electric irons, racks for drying, soaps, bleaches, bluing, and starch For successful laundering an abundant supply of water, both hot and cold, is necessary, careful rinsing and a different treatment of white and colored fabrics are needed for satisfactory results In a commercial laundry all the processes of soaking, washing, sterilizing, bleaching, rinsing, bluing, and drying are highly mechanized Most ironing is done by means of heated, revolving rolls or specially designed pressers, like those used for shirts Some of the work is hand finished Most laundries do "wet wash" and "rough-dry" work to be finished in the home Conditions of modern living, such as the employment of married women, concentration of population in cities, and small apartments, have contributed to the enormous increase of commercial laundries Improved methods of sterilization have also been a factor in the growth of public laundries A more recent development is the shop which rents the use of washing machines, driers, and sometimes ironers for the family wash

Laura, subject of the love poems of PETRARCH She is thought to be Laura de Noves (1308?–1348), wife of Hugo de Sade, but this has not been proved

Laurance, John (lô'runs), 1750–1810, American Revolutionary officer, b near Falmouth, Cornwall, England, son-in-law of Alexander MacDougall A lawyer, he was judge advocate general of the army and presided at the trial of Major John André Later he succeeded Rufus King as a Senator from New York (1796–1800)

Laurel. **1** Town (pop 2,884), SW Del, on Broad Creek, laid out 1802, inc 1883 Truck products from the area are packed and canned here Near by is Christ Church (1771) **2** Town (pop, 2,823), W central Md, NE of Washington, D C, patented late in the 17th cent. It has a large race track **3** City (pop 20,598), a co seat of Jones co, SE Miss, SE of Jackson and on Tallahala Creek, founded 1881 It is a processing center for lumber and farm products There is a museum of art in Lauren Rogers Library Near by is a U S. school and reservation for Indians. **4** City (pop. 2,754), S Mont, on the Yellowstone and SW of Billings, inc 1908 It is primarily a railroad city

laurel. The true laurel—that of history and classical literature—is *Laurus nobilis*, called also bay and sweet bay It is an evergreen tree native to the Mediterranean region, where to the ancients it symbolized victory and merit, it was a plant sacred to Apollo. In America laurel is usually cultivated as a tub plant and pruned to a formal shape The leaves—commonly sold as bay leaves—are used as a flavoring, particularly in certain meat dishes and soups, they were formerly used in medicine Other plants with dark, glossy leaves similar to those of the laurel are often called laurel, these include MOUNTAIN LAUREL, CALIFORNIA LAUREL, and great laurel or RHODODENDRON The cherry laurel, known also as laurel (*Laurocerasus officinalis* or *Prunus laurocerasus*), is an Old World evergreen shrub or tree cultivated in the United States in the milder regions The leaves of this plant, though they contain HYDROCYANIC ACID, are sometimes used as a flavoring and in making cherry laurel water A similar and related species native to the South (*Laurocerasus*, or *Prunus, caroliniana*) is also called cherry laurel

Laureldale, industrial borough (pop 3,397), SE Pa, near Reading, settled 1902, inc 1930 It has knitting mills

Laurel Run, borough (pop 1,057), Luzerne co, NE Pa, near Wilkes-Barre, inc 1881

Laurel Springs, borough (pop 1,344), SW N J, SE of Camden, inc 1913

Laurencin, Marie (marē' lôrāsĕ'), 1885–, French painter and print maker She studied under Carrière and was influenced by the fauvist and cubist movements By 1918 she had achieved her highly personal style, which became extremely popular and which altered very little subsequently It is characterized by extreme simplification of form, flat and highly decorative surface, and delicate pastel colors Young girls are a favorite subject Laurencin is represented in galleries of contemporary art everywhere

Laurens, Henry (lô'runz), 1724–92, American Revolutionary statesman, b Charleston, S C A wealthy merchant and planter, he was a member (1757–64, 1765–74) of the South Carolina assembly He disapproved the Stamp Act, yet felt it should be enforced, but the Townshend Acts aroused him to real ire, particularly after two of his ships were seized He wrote (1769) a pamphlet denouncing the acts, he has low opinion of British officials, reinforced by residence (1771–74) in England, drove him to promote colonial opposition to Britain, in which he was heartily active He helped to organize the state of South Carolina and later was a member of the Second Continental Congress and its president (1777–78) Sent in 1780 as U S commissioner to the Netherlands, he threw overboard the unauthorized draft of a U S.–Dutch treaty prepared by William Lee, but it was recovered He was imprisoned in the Tower of London until exchanged (1781) for Cornwallis, and the treaty was used as a reason for war between Great Britain and Holland Laurens was a commissioner to negotiate the Treaty of Paris (1783) but arrived too late to take much part in the negotiations See biography by D D Wallace (1915)

Laurens, John, 1754–82, patriot officer in the American Revolution, b Charleston, S C, son of Henry Laurens In 1777 he joined Washington's staff and fought at Brandywine and in subsequent battles, earning a reputation for bravery and ability After serving in Rhode Island he was offered a lieutenant colonelcy, but refused it because he did not wish to be promoted over his seniors The intemperate criticism of Washington by Charles LEE caused Laurens to challenge Lee and fight an inconclusive duel Going to the South, Laurens was captured (1780) when the British took Charleston, but was soon exchanged In 1781 he was sent on a special and successful mission to procure money, arms, and supplies He showed conspicuous gallantry in the Yorktown campaign and drew up the terms for the surrender of Cornwallis He accompanied Nathanael Greene on a mopping-up campaign in the Carolinas and was killed in a minor skirmish

Laurens (lô'runz) **1** Town (pop 1,304), NW Iowa, NW of Fort Dodge, inc 1890 Rush Lake State Park is near **2** City (pop 6,894), co seat of Laurens co, NW S C, NW of Columbia, in a farm area Textiles and glass are manufactured here

Laurent, Robert (lô'rŭt), 1890–, American sculptor, b Brittany He came to the United States in 1902 as the protégé of Hamilton Easter Field, American painter In 1908 he went to Rome, where he was employed by a frame maker and acquired experience in wood carving His earliest works in sculpture were decorative wood panels for the Field house in Brooklyn Later he worked in many materials, his *Goose Girl* (Radio City Music Hall, New York) is aluminum, his *Awakening* (Whitney Mus, New York) is bronze Laurent taught at the Art Students League after 1927 He is best known for his sensitive interpretations of the figure, which have a slightly archaic quality and charm

Laurentian Mountains (lôrĕn'shun), S Que, N of the St Lawrence and Ottawa rivers, rising to 3,150 ft in Mont Tremblant. The Gatineau, L'Assomption, Lièvre, Montmorency, and St Maurice rivers rise in lakes in this region, which is a popular summer and winter resort

Laurentian Plateau (lôrĕn'shŭn, lu–) or **Canadian Shield,** roughly shield-shaped region of rock, the nucleus of North America. The first part of the continent to be permanently elevated above sea level, it has remained during geologic time almost wholly untouched by successive encroachments of the sea upon the continent. It stretches SW over Labrador to the St Lawrence, includes a part of Wisconsin and Minnesota, and extends NW from Lake of the Woods to the Beaufort Sea E of the Mackenzie basin. Many geologists include the barren lands of Canada, parts of islands in the Arctic Ocean, and Greenland It is the earth's greatest area of exposed Archaean rocks, the granite, gneiss, and schist of which it is largely composed were probably formed during the ARCHEOZOIC ERA Repeatedly uplifted and eroded, it is today an area of low relief with a few monadnocks and low mountain ranges (including the Torngat and the Laurentian Mts) probably eroded from the plateau during the Cenozoic era During the Pleistocene epoch, ice sheets scooped out numerous lake basins and carried away much of the soil of the region The area today is a source of minerals, timber, and fur-bearing animals, the numerous lakes, streams, and waterfalls are capable of producing vast water power

Laurentides (lô'runtĭdz, Fr lôrätĕd'), town (pop 1,342), S Que, on L'Achigan river and SW of Joliette Originally known as the village of St Lin, it received its present name when incorporated as a town in 1883 St Lin was the native parish of Sir Wilfred Laurier

Lauria, Roger of see ROGER OF LORIA

Laurier, Sir Wilfrid (lô'rēā, Fr lôryā'), 1841–1919, Canadian statesman, b St Lin (now Laurentides) Que, studied law at McGill Univ His premiership of Canada, the first to be held by a French Canadian, covered 15 years—the longest continuous term in the history of the dominion Called to the bar in 1864, he practiced for a short time in Montreal, then in Arthabaska From his first speech in the Quebec legislature, to which he was elected in 1871, his notable oratory was recognized He served (1874–78) in the Canadian House of Commons, where he worked for moderate protection and for cooperation between the French and British in Canada, an objective which was Laurier's lifelong concern He was briefly (1877–78) a minister in the cabinet of Alexander Mackenzie Then, while the Conservative party was in power, he was prominent in the Liberal opposition in Parliament, in 1887 he succeeded Edward Blake as Liberal leader As prime minister of Canada from 1896 to 1911, Laurier visited England in 1897 and was knighted by the queen, he represented Canada at the coronation of King Edward VII, at the colonial trade conference (1902) in London, at the imperial conferences of 1907 and 1911, and at the coronation of George V When in 1911 his party met defeat on the question of trade reciprocity with the United States, he resigned The years of his premiership witnessed Canada's steady growth and progress Ambitious for the development of the dominion, but within the framework of the empire, Laurier was committed to such policies as the development of Western territories, building of railroads, tariff arrangements with the United States as well as Great Britain, and Canadian control of its own defences As leader of the Liberal opposition during the First World War he supported Great Britain, but opposed conscription and refused to form a coalition with the Conservative government of Canada in 1917 See biographies by O D Skelton (2 vols, 1921), J W Dafoe (1922), and John Willison (rev ed, 1926)

Laurinburg, town (pop 5,685), co seat of Scotland co, S N C, near the S C line SSW of Fayetteville, in a cotton, fruit, and grain area Laurinburg Industrial Institute (Negro) is here

Lavrion (lăv'rēŏn) or **Lavrion** (lăv'rēŏn), Latin *Laurium*, city (pop 6,680), E central Greece, in Attica, a port on the Aegean Sea There are lead-zinc, iron, and silver mines Silver has been mined here since ancient times and contributed to the prosperity of Athens Lavrion was also formerly known as Ergasteria

Lauriston, Jacques Alexandre Bernard Law, marquis de (zhäk' älĕksä'dru bĕrnar' lô' märkē' du lôrēstô'), 1768–1828, marshal of France, grandnephew of John Law He fought in the French Revolutionary and Napoleonic Wars and won particular distinction at Wagram (1809) Louis XVIII accepted him and made him a marquis (1817) and a marshal (1823). In 1823 he took part in the invasion of Spain

Laurium, Greece see LAVRION

Laurium (lô'rēum), residential village (pop 3,929), Keweenaw peninsula, extreme N Mich, near Calumet, in a copper-mining region, inc 1889 Its inhabitants work mainly in Calumet

Lausanne (lōzăn', Fr. lōzän'), city (pop. 92,541, including OUCHY), capital of Vaud canton, SW Switzerland, on the slopes of Mt. Jorat near the Lake of Geneva There are watchmaking and printing industries. The city has been a meeting place of many international conferences and is a well-known resort city. Lausanne has a 13th-century cathedral (Notre Dame) It is the seat of the Swiss federal tribunal An episcopal see since the late 6th cent, it was ruled by prince-bishops in the

Middle Ages till 1536, when it was conquered by Bern and accepted the Reformation. Bernese rule ended in 1798, and Lausanne became the capital of the newly formed canton of VAUD Here Edward Gibbon in his youth courted the future Suzanne Necker, and here he later wrote part of the *Decline and Fall* Voltaire and Dickens, among many other celebrities, also lived here for a time The Univ of Lausanne was founded as a Protestant school of theology in 1537 and became famous as a center of Calvinism It was made a university in 1890

Lausanne, Conference of, 1922-23 The peace treaty (see SÈVRES, TREATY OF) imposed by the Allies on Turkey after the First World War had virtually destroyed Turkey as a national state It was not recognized by the nationalist government under Kemal Pasha (later known as ATATURK) After the nationalist victory over the Greeks and the overthrow of the sultan, Kemal's government was in a position to request a new peace treaty Accordingly, the signatories of the Treaty of Sèvres and delegates of the USSR (excluded from the previous treaty) met at Lausanne, Switzerland After lengthy negotiations a peace treaty was signed in 1923 Turkey recovered E Thrace, several Aegean islands, a strip along the Syrian border, the Smyrna district, and the internationalized Zone of the Straits, which, however, was to remain demilitarized and remain subject to an international convention (see DARDANELLES) Turkey recovered full sovereign rights over all its territory, and foreign zones of influence and capitulations (see OTTOMAN EMPIRE) were abolished Outside the Zone of the Straits, no limitation was imposed on the Turkish military establishment No reparations were exacted In return, Turkey renounced all claims on former Turkish territories outside its new boundaries and undertook to guarantee the rights of its minorities A separate agreement between Greece and Turkey provided for the compulsory exchange of minorities

Lausanne Pact, 1932 see REPARATIONS.

Lausitz see LUSATIA

Lausitzer Neisse see NEISSE

Lautaro (loutä'rō), c 1534–1557, leader of the ARAUCANIAN Indians who almost succeeded in reconquering S central Chile from the Spanish Captured while a youth by Pedro de VALDIVIA, he returned to his people in 1553 to begin the struggle for freedom In a memorable fight in Dec , 1553, near Tucapel, Lautaro sent one Indian band after another against a force under Valdivia Not one Spaniard escaped death Aiming at nothing less than the reconquest of Chile, he won several more battles, destroyed cities such as Concepción, and finally advanced on Santiago, the capital Francesco de Villagra through an Indian traitor surprised Lautaro in his strong encampment, and in the desperate conflict Lautaro fell Resistance continued under CAUPOLICÁN Lautaro, who figures in Ercilla y Zúñiga's epic, *La araucana*, later became the symbol of Chilean independence

Lauterbrunnen (lou'tərbrŏonun), village (pop 2,819), Bernese Alps, Switzerland It is noted for its many springs and waterfalls, such as the Staubbach, which leaps from a rock 980 ft high, and the Trümmelbach, which descends in five cascades

Lautrec, Henri de Toulouse- see TOULOUSE-LAUTREC MONFA, HENRI DE

Lautrec, Odet de Foix, vicomte de (ôdā' du fwa' vĕkôt' du lōträk'), 1485–1528, marshal of France in the ITALIAN WARS He fought at Marignano (1515) and was subsequently governor of Milan Defeated at La Bicocca (1522), he was forced to evacuate Italy, he returned at the head of the French expedition of 1527 and reconquered Milan but died besieging Naples

Lauzon (lōzŏ'), town (pop 7,877), S Que , on the St Lawrence just NE of Lévis and opposite Île d'Orléans Settled in 1647, the town was named in 1867 for Jean de Lauzon, governor of New France, to whom the seigniory of Lauzon was granted in 1636 It is a shipbuilding and lumbering town with a large dry dock There are a commercial college and a convent

Lauzun, Antonin Nompar de Caumont, duc de (ätônĕ' nôpär' du kômô' dük' dŭ lōzŭ'), 1633–1723, French courtier and soldier He was sought in marriage by Mlle de MONTPENSIER, the king consented to the match, but forbade it three days later (1670) Suddenly imprisoned (1671), Lauzun was not freed till 1681 There were rumors of a secret marriage with Mlle de Montpensier, to which the intimacy of their relations from 1681 to 1684 and his mourning at her death (1693) lend support. They quarreled and separated in 1684 Lauzun brought the family of James II of England to safety in France after the Revolution of 1688, and in 1689–90 he commanded the Irish expedition which ended in failure at the battle of the Boyne.

lava (lä'vu), igneous ROCK erupted on the earth's surface or on the floor of the sea by a VOLCANO or through a fissure in the earth's surface The term is applied both to the liquid which issues from the earth and to the hardened rock In its state before being exposed to the air, liquid rock, mixed with gases, is known as magma. Lavas are composed chiefly of silica and the oxides of aluminum, iron, magnesium, calcium, sodium, and potassium Silica, with soda and potash, predominates in the light-colored, acid felsites, iron oxides, lime, and magnesia, in the dark-colored, basic basalts. Rock froth forms on the upper part of a lava flow if bubbles solidify before the gas can escape. Light-colored, glassy froth is pumice, dark, cindery or slaggy froth, of a coarser texture than pumice, makes scoriae Lava flows which solidify as a mass of blocks and fragments with a rough surface are called block lava, those which solidify with a smooth, ropy, billowy surface are known as corded lava or pahoehoe Lava is sometimes poured out over wide regions through great fissures in the earth's surface, as in the Columbia river plateau of the NW United States, in the Deccan plateau of India, and in Iceland The reasons for the heat and liquidity of magma, its exact source, and the causes of its rise in the earth are not clearly known, and there are conflicting interpretations dependent on conflicting hypotheses of the earth's origin Those who believe the earth was molten either at the beginning or very early in its history regard the heat and liquidity of magma as survivals of such a state Those who hold the earth to have been solid at the beginning generally explain hot, molten matter as the result of subsequent compression or of radioactivity Suggested causes of the rise of magma are the pressure exerted by overlying rock or in the formation of faults and folds, the enclosed gases undoubtedly play an important role

Lava Beds National Monument see NATIONAL PARKS AND MONUMENTS (table)

Lavaca Bay see MATAGORDA BAY

Laval, François Xavier de (frāswa' zavyā' du laval'), 1623?–1708, French prelate in Canada, first bishop of Quebec Of very noble family (his family name in full was Laval-Montmorency), he gave up his large patrimony to enter the Church The clergy of New France was under the archbishop of Rouen, and it was the desire of the Jesuits to be directly under the pope that caused Laval to be sent (1659) as vicar apostolic in New France Its such and later (1674–88) as first bishop of Quebec, he was the strongest figure of the Canadian church and one of the most powerful in the colony His vigor—which continued undiminished into his old age—and his stubborn fight for what he considered the welfare of his people made the Quebec church the vital force of colonial life He transformed education and founded a seminary which later was the nucleus of Laval Univ With the governors he fought bitterly, partly because they attempted to subordinate missionary effort to the state but more because the bishop was determined to prevent the debauching of the Indians by the alcohol of the traders Laval went back (1679) to France to protest against the actions of Frontenac and the "brandy parliament," and though he did not get government support, Frontenac was, nevertheless, recalled in 1682 Laval was succeeded as bishop by his former vicar general, Saint-Vallier Laval testily disapproved some of the new bishop's ways, but the Church continued strong and Laval's influence continued, he administered the see (1694–97, 1700–1708) in Saint-Vallier's absence Thus to the end of his life he had a hand in the building of New France He appears as a principal character in Willa Cather's novel *Shadows on the Rock* See biography by H A Scott (1926)

Laval, Pierre (pyĕr' läval'), 1883–1945, French politician Elected (1914) to the chamber of deputies as a Socialist, he fought in the First World War and in 1924 returned to the chamber as a Republican (conservative) He held various cabinet posts under Painlevé, Briand, Tardieu, Doumergue, and Flandin, and was premier in 1931–32 and in 1935–36 In 1931 Laval conferred with President Hoover on the problem of WAR DEBTS His fall in 1936 followed the publication of the Hoare-Laval plan, he and Sir Samuel Hoare had proposed to appease Mussolini by giving Italy a large part of Ethiopia Increasingly conservative, Laval championed Franco-German cooperation and reached new prominence on the fall of France in 1940 In the VICHY GOVERNMENT under Marshal Pétain he became foreign minister and successor-designate to Pétain but in Dec , 1940, he was abruptly dismissed and replaced by DARLAN, apparently on the suspicion that he was planning to overthrow the Pétain regime Passing into the German-occupied part of France, Laval became an outspoken advocate of collaboration with Germany Pétain reinstated Laval in April, 1942, and gave him dictatorial powers (Nov , 1942) Laval agreed to draft labor for Germany, authorized a French fascist militia, and instituted a rule of terror After the Allied invasion of France he moved (1944) his government to S Germany, fled (May, 1945) to Spain, was expelled, and flew to Austria. There he surrendered to American forces, who extradited him to France He was tried for treason and sentenced to death After an unsuccessful attempt at suicide he was executed Laval's trial, even if the justice of the verdict is not questioned, was conducted in an irregular manner which was denounced by many as a failure of justice. Laval defended himself brilliantly and tried to ascribe patriotic motives to his opportunist policies His notes for his defense, written in prison, were edited by his daughter, Josée Laval, comtesse de Chambrun, and appeared in English as *The Diaries of Pierre Laval* (1948).

Laval (laval'), town (pop 28,171), capital of Mayenne dept , NW France, in Maine The Mayenne river divides the old and modern sections of the town, which was founded in the 9th cent Laval has been noted for its linen manufactures since the 14th cent It was a center of the Chouans in the French Revolution

Laval des Rapides (läval' dā răpēd'), town (pop 3,242), on Île Jésus, S Que , on the north bank of the Rivière des Prairies and W of Montreal

Lavalle, Juan (hwän' lava'yā), 1797–1841, Argentine general, governor of Buenos Aires province (1828–29) He served (1816–24) in the War of Independence and (1826–28) in the war with Brazil Returning to Buenos Aires, he led his troops in revolt (Dec 1, 1828) against the governor, Manuel DORREGO, who fled Lavalle was proclaimed governor He pursued Dorrego, defeated him, and ordered his summary execution (Dec. 13, 1828) The Argentine provinces protested, a national convention pronounced the execution high treason Forces commanded by Estanislao Lopez, governor of Santa Fe, and Juan Manuel de ROSAS defeated Lavalle (April, 1829), who took refuge in Montevideo Aided by Argentine exiles there and, for a time, by French officials, Lavalle organized an army in 1839 and, invading Argentina, campaigned against Rosas The campaign was generally unsuccessful, Lavalle was decisively defeated by Manuel ORIBE, an ally of Rosas, in 1841 He was killed when attempting to reach Bolivia

Lavalleja, Juan Antonio (hwän' antô'nyō laväyä'ha), c 1786–1853, Uruguayan revolutionist After serving under ARTIGAS, Lavalleja was imprisoned for a short time by Brazil, then in control of Uruguay Subsequently he led a small group—the Thirty-three Immortals—in a declaration of independence from Brazil in 1825 To secure support from Buenos Aires this declaration accepted the sovereignty of the United Provs of La Plata After the victory of ITUZAINGÓ (1827), Uruguay became (1828) an independent buffer state Two bitter rivals sought the presidency in 1830—Lavalleja and Fructuoso RIVERA Rivera ultimately won power, and the disgruntled Lavalleja twice (1832, 1834) revolted unsuccessfully From exile in Buenos Aires he joined Manuel ORIBE against Rivera After the long civil war (1843–51), Lavalleja was one of a triumvirate chosen (1853) to govern Uruguay, but he died before serving

La Vallière, Louise Françoise de la Baume Le Blanc de (lwēz' frāswaz' du la bōm' lu blă' du la valyĕr'), 1644–1710, French beauty, favorite of Louis XIV Maid of honor to Louis's sister-in-law, Henrietta of England, she became the king's mistress in 1661 She bore him four children, of whom two died in infancy In 1667, by the same government act which legitimized her daughter, she was created a duchess She was replaced in the king's affections by Mme de Montespan In 1674 she retired to a Carmelite convent and became celebrated for her piety See Jules Lair, *Louise de la Vallière and the Youth of Louis XIV* (1908)

Laval-Montmorency, François Xavier de. see LAVAL, FRANÇOIS XAVIER DE

Laval University, at Quebec, Que , Catholic, partly coeducational, French language, chartered 1852, an outgrowth of a seminary established 1663 by Bishop Laval In 1876 a branch was established in Montreal, which in 1920 became independent as the Univ of Montreal Laval has faculties of arts, law, medicine, theology, philosophy, and commerce Plans for expansion and modernization were made in 1948 Affiliated institutions include numerous "classical colleges" in Quebec prov , St Dunstan's Univ in Prince Edward Island, and the Jesuit College in Alberta

Lavater, Johann Kaspar (yo'han kas'par lă'vätur, lava'tur), 1741–1801, Swiss preacher and theological writer He is remembered for his work on physiognomy, the art of judging character from facial characteristics

Lavedan, Henri Léon Émile (ärē' läd' ämēl' lavudă'), 1859–1940, French dramatist His comedies, some of which were produced by Otis Skinner in the United States, include *Le Prince d'Aurec* (1892), *Les Deux Noblesses* (1897), *Le Marquis de Priola* (1902, Eng tr , 1919), *Le Duel* (1905, Eng tr , 1906), *Le Goût du vice* (1911), and *Servir* (1913, Eng tr , *Service*, 1918) He was also known for his risqué novelettes Lavedan was elected to the French Academy in 1898

lavender, any plant of the genus *Lavandula*, herbs or shrubby plants of the mint family, most of which are native to the Mediterranean region but naturalized elsewhere The true lavender has grayish foliage and small blue flowers (white in one variety) It is popular for herb gardens and is cultivated commercially (chiefly in France and England) for the fragrant flowers, valued for scenting linens and clothes and as the source of oil of lavender The oil is distilled for use in perfumery, in toilet preparations (e g , lavender water, a mixture composed chiefly of lavender oil and alcohol with perhaps

musk or civet as a fixative), and in medicine. Lavender is sometimes used as a flavoring Spike lavender, a broader-leaved, less fragrant species, yields spike-lavender oil, which is also used in perfumery and in varnishes and porcelain painting

Laveran, Charles Louis Alphonse (shärl' lwē' älfôs' lävürä'), 1845–1922, French physician While an army surgeon in Algiers he discovered (1880) the parasite which causes MALARIA and wrote many treatises on this subject He received the 1907 Nobel Prize in Physiology and Medicine for his work on protozoa in the causation of disease.

La Vérendrye, Pierre Gaultier de Varennes, sieur de see VÉRENDRYE

La Verne (lä vûrn'), city (pop 3,092), S Calif , E of Los Angeles, inc 1906 La Verne College is a Dunkard foundation

Lavery, Sir John (lā'vürē), 1856–1941, British painter, leader of the Glasgow school of painting, b Belfast, studied in Glasgow, London, and Paris He enjoyed international honors and is represented in many European and British galleries He was knighted in 1918 Well-known paintings are *The Bridge at Grés* (Carnegie Inst , Pittsburgh) and *The Royal Family in Buckingham Palace* (National Portrait Gall , London) A portrait of Cardinal Hayes is at Fordham Univ See his autobiography, *The Life of a Painter* (1940)

Lavigerie, Charles Martial Allemand (shärl'märsäl' älmä' lavēzhürē'), 1825–92, French churchman, cardinal of the Roman Church, b near Bayonne He was ordained in 1849 and became prominent in the new Écoles d'Orient He was an authority on Islam He was bishop of Nancy (1863–67), archbishop of Algiers (1867–92), and archbishop of the reestablished see of Carthage (1884–1902) His jurisdiction included all French Africa His most successful efforts were directed toward African missions to Moslems, and he founded the White Fathers (the Society of Missionaries of Africa) for this work He was a leader in the abolition of slavery in Africa Cardinal Lavigerie made a sensation when (1890) he repudiated royalism and called on Catholics to support the republic wholeheartedly

Lavisse, Ernest (ĕrnĕst' lavēs'), 1842–1922, French historian, professor at the Sorbonne His earlier works deal chiefly with the history of Prussia Among them are *Études sur l'histoire de la Prusse* (1879), *La Jeunesse du grand Frédéric* (1891, Eng tr , *The Youth of Frederick the Great*, 1891), and *Le Grand Frédéric avant son avènement* [Frederick the Great before his accession] (1893) His chief fame rests, however, on his brilliantly successful editorship of several large collectively written works With Alfred Rambaud he edited *Histoire générale du IV ème siècle à nos jours* (12 vols , 1893–1901) Alone, he edited *Histoire de France depuis les origines jusqu'à la révolution* (9 vols in 18, 1900–1911) and *Histoire de France contemporaine* (10 vols., 1920–22) Some of the best volumes in all three collections are by Lavisse himself; among his distinguished collaborators were Aulard, Luchaire, Pirenne, and Seignobos Their volumes are a synthesis of political, cultural, economic, and social history and remain a model for similar undertakings Lavisse also wrote *Souvenirs* (1912).

Lavoisier, Antoine Laurent (ätwän' lôrä' lävwäzyā'), 1743–94, French chemist and physicist, a founder of modern chemistry He studied under eminent men of his day, won early recognition, and was admitted to the Academy of Sciences in 1768. Much of his work was the result of extending and coordinating the research of others, his concepts were largely evolved through his superior ability in organizing and interpreting and were substantiated by his own experiments He was one of the first to introduce effective quantitative methods in the study of chemical reactions He found the explanation of combustion, thereby discrediting the phlogiston theory, and explained the role of oxygen in the respiration of both animals and plants His classification of substances is the basis of the modern distinction between chemical elements and compounds and of the system of chemical nomenclature He also conducted experiments to establish the composition of water and of many organic compounds Lavoisier was appointed director of the gunpowder commission (1775), member of the committee on agriculture (1785), director of the Academy of Sciences (1785), member of the commission on weights and measures (1790), and commissioner of the treasury (1791). He worked to improve economic and social conditions in France. As one of the farmers general, charged with the collection of taxes, he was guillotined during the Reign of Terror His works include *Traité élémentaire de chimie* (1789) and the posthumously published *Mémoires de chimie* (2 vols., 1805). See biographies by Douglas McKie (1935) and S. J. French (1941)

La Voisin: see POISON AFFAIR

Lavongai (lävông'ī), volcanic island (c 460 sq. mi.; pop c 5,000), SW Pacific, in the BISMARCK ARCHIPELAGO and part of the Territory of New Guinea. The island is mountainous and densely forested. It was formerly called Neu Hannover, later New Hanover.

Lavonia, city (pop. 1,667), NE Ga., near the S.C. line NE of Athens, in a farm area.

Lavrion, Greece see LAURION

Law, Andrew, 1748–1821, American composer, b. Milford, Conn. He wrote rather simple hymn tunes, being opposed to the florid style of William Billings In his *Select Harmony* (1778), *Collection of Best Tunes and Anthems* (1779), and other compilations, he collected and arranged many tunes of other composers. He was one of the first Americans to arrange hymns with the melody in the soprano instead of the tenor part, and he devised a system of notation using notes of various shapes and dispensing with the staff. The latter innovation was virtually ignored in New England, where he worked, but something like it was later used in the South in the notation of gospel songs Law was one of the first Americans to write about music, his *Essays on Music* appearing in 1814

Law, Andrew Bonar (bō'nûr), 1858–1923, British statesman, b Canada He went to Scotland as a boy and in 1900, after a business career, was elected as a Conservative member of Parliament In 1911 he succeeded Balfour as leader of the Conservative opposition In the first coalition cabinet under Herbert Asquith (1915) he became colonial secretary and in 1916, under Lloyd George, became chancellor of the exchequer and leader in the House of Commons He resigned party leadership in 1921 and in 1922 led the revolt from the wartime coalition He became prime minister that year, but had to resign the next May because of ill-health

Law, Edward see ELLENBOROUGH, EDWARD LAW, 1ST BARON, and ELLENBOROUGH, EDWARD LAW, 1ST EARL OF

Law, John, 1671–1729, Scottish financier in France After killing a man in a duel he fled to Amsterdam, where he studied banking Returning to Scotland (1700), he proposed to Parliament plans for trade and revenue reforms and published *Money and Trade Considered* (1705) His ideas and a proposal for a national bank were rejected, and Law went to France The finances of France were in critical condition at the death of Louis XIV, and Law succeeded in winning the support of the regent, Philippe II, duc d'ORLÉANS, for a scheme which promised quick and easy gains for the treasury, for French trade and industry, and for speculators (among whom the regent was not the least greedy). In 1716 the regent chartered Law's Banque générale and authorized it to issue paper currency, in 1717 Law acquired the monopoly of commercial privileges in Louisiana and organized the Compagnie d'Occident, which was consolidated (1719) with the French East India Company and other organizations as the Compagnie des Indes, in 1719 the Banque générale was made the royal bank, and its issues of notes were guaranteed by the state Finally (1720) Law, made controller general of finances, merged the huge stock company with the royal bank and took over most of the public debt and the administration of revenue A frenzy of speculation swept France from 1717, all but the destitute bought stock, which soared to heights far beyond what could be expected in returns, within a reasonable future, from the exploitation of the colonies (see MISSISSIPPI SCHEME). The bubble burst suddenly An attempt to devaluate the paper currency destroyed public confidence Well-informed speculators sold their stock at huge profits, but then the whole system collapsed, ruining thousands of investors, and Law left France in disgrace He died in Venice, where he had supported himself by gambling The three years of dizzy speculation caused by Law's "system" left a profound impression on France and greatly helped to discredit the *ancien régime* Law's monetary theories have found defenders among later economists, but their application was certainly reckless and clumsy

Law, William, 1686–1761, English clergyman, noted for his controversial, devotional, and mystical writings. As a nonjuror, refusing to take the required oaths upon the accession of George I, Law was deprived of his fellowship in Emmanuel College, Cambridge, and gave up all chances for advancement in the Church. Unexcelled among the controversialists of his day, he was also a leading writer on practical divinity In the former role he wrote *Three Letters to the Bishop of Bangor* (1717–19) in the BANGORIAN CONTROVERSY, *Remarks on the Fable of the Bees* (1724), an attack on Mandeville's satire, and *The Case of Reason* (1731), in reply to Matthew Tindal, the deist. In the field of practical religion, few books have been given so high a place as his *Serious Call to a Devout and Holy Life* (1728). Its influence was acknowledged by Dr Samuel Johnson, Edward Gibbon, and John Wesley and reached deeply into early Methodism In *The Spirit of Prayer* (1750) and *The Spirit of Love* (1754) is discernible the influence of Law's study of Jakob Boehme, the mystic Law's collected works (9 vols , 1753–76) were edited by G. B Morgan in 1892–93 See biography by J. H. Overton (1881); W. R Inge, *Studies of English Mystics* (1906); Stephen Hobhouse, *William Law and Eighteenth Century Quakerism* (1927), J. B. Green, *John Wesley and William Law* (1945).

Law, the, in Judaism: see TORAH.

law. Any organized society, however simple or small, of necessity has rules of conduct which are enforced by threat of punishment if they are violated. In essence, such rules may be denoted as law. Law does not, however, develop systematically until a state with a centralized police authority has appeared For this development a written language is not required, but necessarily the first records known are from literate societies. Examples of early law systems are to be found in the code of HAMMURABI (Babylonia), the Laws of MANU (India), and the Mosaic code (Palestine) These codes show what would seem to be the universal tendency of the religious and ethical system of a society to produce a legal order to enforce its ethical and social mandates. In classical antiquity the first codes of law are those attributed to SOLON and to LYCURGUS The first in Roman history was the Law of the Twelve Tables, the prelude to the development of ROMAN LAW, a highly elaborate system which has been of immeasurable influence on the growth of Western law It was summarized in the CORPUS JURIS CIVILIS in the time of Justinian Roman law developed the distinction between public law (in which the state is concerned directly, e g , treason and taxation) and private law (concerned with disputes between persons, e g , over contracts). The breakup of the Roman Empire under the pressure of the Germanic invasions brought the disruption of the Roman legal administration. Temporarily the codes of GERMANIC LAWS eclipsed Roman law in Western Europe In the simpler Germanic codes the main distinctive element was the use of composition for crimes, but most of the Germanic codes showed at least some Roman influence, and Roman law, together with the Bible, was the basis of CANON LAW, the legal system of the Roman Catholic Church, while Moslem law was derived from the Koran and the traditional sayings of Mohammed and later Hebrew law was based on the Talmud Feudal law also showed the effects of Roman law, though in theory it was based not upon any concept of the state but on personal relations (see FEUDALISM) The revival of trade in the commercial revolution and the Renaissance brought new developments in the law of the sea (see MARITIME LAW) The study of Roman law itself was also revived, notably at the Univ of Bologna It became the basis of most Continental law, as exemplified in the French Code Napoléon, the archetype of codes that govern the jurisdiction of CIVIL LAW In England after the Norman Conquest the feudal law was ultimately replaced by the law of the royal courts, such as the king's bench. The royal courts developed COMMON LAW, i e , judicial legislation as opposed to the law of the formally enacted STATUTE Common law adhered excessively to precedent, and EQUITY, exercised by the king's chancery, appeared, with its reliance upon the dictates of conscience rather than upon precedent The two systems became bitter rivals In the early 17th cent Francis BACON championed equity, while such eminent jurists as Edward Coke upheld the common law. In the 18th cent. English jurisprudence stressed natural law (the theory that law must incorporate the NATURAL RIGHTS of man), and the highly influential work of Sir William BLACKSTONE exemplifies the theory The work of Blackstone was the most important influence in U S. law (except for Louisiana, Puerto Rico, and the Virgin Islands, where Continental civil law prevailed) Among those who helped to develop the American concept of law James KENT and Joseph STORY may be mentioned, in constitutional law the most important figure was John MARSHALL. In the United States the distinctive feature is the coexistence of Federal and state law, for the U.S. Constitution limits the sphere in which Federal law is supreme Modern law has a wide sweep and regulates many branches of conduct An instance of the continual evolution of law to meet the ever-changing conditions of society is the development of corporation law in recent days.

Lawes, Sir John Bennet (lôz), 1814–1900, English agriculturist. He founded the famous experimental farm at Rothamsted, where, with Sir J H. Gilbert, he experimented with plants and animals. He developed the fertilizing material called superphosphate, which marked the beginning of the chemical fertilizer business. His experiments are recorded in the journals of various scientific organizations. See also ROTHAMSTED EXPERIMENTAL STATION.

Lawes, Lewis Edward, 1883–1947, American penologist, b. Elmira, N Y. As warden (1920–41) at Sing Sing Prison, Ossining, N.Y., he carried out many reforms. He was active in promoting general prison reform, advocating education of convicts and abolition of capital punishment. *Twenty Thousand Years in Sing Sing* (1932) is the best known of his books Others include *Man's Judgment of Death* (1924) and *Stone and Steel* (1941).

Lawless, Emily (lô'lĭs), 1845–1913, Irish novelist, b. Co. Kildare. She led a secluded life on her estate, writing novels of the Irish peasantry. Her work includes *Hurrish* (1886), *Grania* (1892), and poems, *With the Wild Geese* (1902).

law merchant: see COMMERCIAL LAW.

lawn, grass turf or greensward in private yard or public park A good lawn or green has both beauty and usefulness, its maintenance for golf, tennis, and other sports is a costly and specialized procedure It requires good soil, frequent watering and mowing, and occasional rolling and fertilising The grass planted should be suited to the climate, soil, and ultimate uses of the lawn Grasses most often selected for northern climates are bent types (which include redtop), bluegrass (the most widely used is Kentucky bluegrass), fescue grass (Chewings' variety is shade tolerant), and white clover. In southern areas, lawns are usually planted with Bermuda grass, St Augustine grass, carpet grass, or Korean lawn grass To start a lawn, seed is generally sown, but runners or stolons may be planted if the grasses are creeping bents, Bermuda grass, or carpet grass, or the area may be sodded, in which case blocks of turf are cut Weed pests, such as dandelions and crab grass, must be kept from gaining a foothold Chemical preparations are available which when sprayed on the lawn will kill many weeds present but will not injure the grass See *Planting and Care of Lawns* (U S Dept of Agriculture, Farmers' Bul 1677), H B Sprague, *Better Lawns* (1940).

Lawrence, Saint, d 258, Roman deacon and martyr He is supposed to have been roasted to death on a gridiron because of his faithful administration of church funds He is honored in the Roman Church by a mention in the canon of the Mass and by a vigil and octave to his feast, Aug 10 His attribute is a gridiron The Escorial was dedicated in his honor.

Lawrence, Abbott, 1792–1855, American manufacturer and statesman, b Groton, Mass In 1808 he was apprenticed to his brother, Amos Lawrence, a merchant in Boston, and in 1814 he became a member of the firm known as A & A Lawrence Later he was active in the cotton mills at Lowell and was a founder of the textile city of Lawrence, Mass , which was named for him A reluctant convert to the protective tariff, along with other New England merchants turned manufacturers, he later supported it in the U S Congress (1835–37, 1839–40) He served on the Northeast Boundary Commission (1842) and was minister to Great Britain (1849–52) While in England he was able to relieve somewhat the strained relations between the two countries over the proposed Isthmian canal and the status of the Mosquito Coast Lawrence supported the work of Louis Agassiz and other scientists, giving $50,000 to Harvard to establish the Lawrence Scientific School. See biography by H A. Hill (1883)

Lawrence, Amos Adams, 1814 86, American colonizer and philanthropist, b. Boston, grad Harvard, 1835, nephew of Abbott Lawrence After working in the textile mills of Lowell, he set up a bank in Boston and later established (1860) a huge knitgoods factory at New Ipswich Lawrence contributed liberally for the colonization of Liberia and the EMIGRANT AID COMPANY which sent settlers into Kansas. His interest in education aided the founding of the Univ of Kansas at Lawrence, Kansas (the city was named for him) and Lawrence College at Appleton, Wis Lawrence was also a generous benefactor of the Episcopal Theological School and Harvard Univ See biography by his son, Bishop William Lawrence (1888)

Lawrence, Charles, 1709–60, governor of Nova Scotia, b. England He came to Nova Scotia in 1747 in command of a regiment He was appointed (1749) to the council of Nova Scotia and was made lieutenant governor (1754) and governor (1756). It was mainly by his orders as governor that the Acadians were deported (see ACADIA) It was in his regime, but not with his approval, that the first elected assembly of Nova Scotia met (1758), it is the oldest representative body in Canada He attained the rank of brigadier general and commanded a brigade at the siege of Louisburg.

Lawrence, David Herbert, 1885–1930, English author The son of a Nottingham coal miner, Lawrence was encouraged by his mother to go to school and college and to become a teacher Dissatisfied and unhappy, he attempted in his fiction to show the deep natural and instinctive forces in men and women which might bring them happiness These he expressed by writing symbolically or explicitly of primitive peoples and of primitive passions in more sophisticated individuals. Psychoanalysis, theosophy, history, archaeology, and observation furnished him materials and interpretations, all transmuted by his unusual personality His novels include *Sons and Lovers* (1913), probably his most widely known work, *The Rainbow* (1915), *Women in Love* (1920), *The Plumed Serpent* (1926), *Lady Chatterley's Lover* (1928), and *The Virgin and the Gypsy* (1930) Of his poems, the series "Birds, Beasts, and Flowers" is both typical and important. He wrote a play, many short stories, some of which are collected in *Love among the Haystacks* (1930), and essays such as *Reflections on the Death of a Porcupine* (1925) Other writings include *Psychoanalysis and the Unconscious* (1921), *Studies in Classic American Literature* (1923), and *Mornings in Mexico* (1927) Lawrence exhibited his paintings in London in 1929 He used much of his restless life seeking healthful climates, especially in Italy, New Mexico, and Mexico, with his German wife, Frieda von Richthofen Lawrence He died in S France of tuberculosis See his wife's book, "*Not I, but the Wind* " (1934), his letters (ed by Aldous Huxley, 1932), letters to Bertrand Russell (ed by H T Moore, 1948), and Earl Brewster and Achsah Brewster, *D H Lawrence Reminiscences and Correspondence* (1934), his *Apocalypse* (introduction by Richard Aldington, 1932) and *Phoenix* (posthumous papers, ed, by E D McDonald, 1936), selections of his work, *The Portable D H Lawrence* (ed by Diana Trilling, 1947) and *Selected Poems* (ed by Kenneth Rexroth, 1948), studies by J Middleton Murry (1931), Catharine Carswell (1932), Dorothy Brett (1933), Hugh Kingsmill (1938), W Y Tindall (1939), Knud Merrill (1939), and Richard Aldington (1950)

Lawrence, Ernest Orlando, 1901–, American physicist, b Canton, S Dak , grad Univ of South Dakota (B A , 1922), Ph D Yale, 1925 Affiliated with the Univ of California from 1928, he became professor in 1930 and director of the radiation laboratory in 1936 For his invention and development of the atom-smashing CYCLOTRON and his researches in atomic structure and transmutation he received the 1939 Nobel Prize in Physics With the cyclotron he has produced artificially radioactive elements and neutrons useful in nuclear, chemical, and biological research

Lawrence, Sir Henry Montgomery, 1806–57, British general and administrator in India He fought in expeditions against Burma (1824–27), in the first Afghan War (1839), and in the Sikh Wars (1845–49) In charge with his brother John Laird Mair Lawrence of the reorganization of the Punjab, he resigned (1850) because of a difference on policy He was killed in the heroic defense of Lucknow during the SEPOY REBELLION See biography by McLeod Innes (1898) and biography of his wife, *Honoria Lawrence,* by Maud Diver (1936)

Lawrence, James, 1781–1813, American naval hero, b Burlington, N J He entered the navy in 1798 and saw his first important service in the Tripolitan War He commanded the *Enterprise* under Decatur He participated in both David Porter's gallant attack on Tripoli and the burning of the frigate *Philadelphia* He commanded the *Hornet* at the outbreak of the War of 1812 and in a cruise along the South American coast met and defeated the British brig of war *Peacock* Promoted captain in 1813 and given command of the *Chesapeake* at Boston, he was ordered to proceed northward to intercept British supply ships coming to Canada On his way out he met and engaged the British frigate *Shannon* which had been blockading Boston His words "Don't give up the ship!" shouted as he was carried from the deck, mortally wounded, became a popular naval battle cry See biography by Albert Gleaves (1904)

Lawrence, John Laird Mair Lawrence, 1st **Baron,** 1811–79, viceroy of India, brother of Sir Henry Montgomery Lawrence. He served with energy and intelligence in many administrative posts and took an important part in the Sikh Wars (1845–49) The Punjab, acquired at this time and reduced to order by John and Henry Lawrence, was also reclaimed from the SEPOY REBELLION (1857) by John As viceroy (1864–69) of India he accomplished much in public works and sanitation and opposed, both in office and after his retirement, the policies of expansion which led to the Afghan Wars See Charles Aitchison, *Lord Lawrence and the Reconstruction of India under the Crown* (1897)

Lawrence, Sir Thomas, 1769–1830, English portrait painter. He began to draw when very young and at the age of 12 was making excellent portraits in crayon In his 17th year he commenced to paint in oil and in 1787 entered the Royal Academy schools, exhibiting a number of portraits and imaginative works in the same year His portrait of Miss Farren, the actress, exhibited in 1789, established his reputation He soon won royal patronage and, after the death of Reynolds and Hoppner, became the fashionable portrait painter of his day He succeeded (1792) Reynolds as painter in ordinary to the king, became (1794) Academician, and was knighted in 1815 After the fall of Napoleon, he was sent by George IV to the conference at Aix-la-Chapelle to paint the dignitaries assembled there (portraits in Waterloo Gall., Windsor Castle, England). He then visited Vienna and painted portraits of the emperor and others and subsequently went to Rome, where he painted Pope Pius IV and Cardinal Gonsalvi (both in Windsor Castle) Upon his return, in 1820, he succeeded Benjamin West as president of the Royal Academy of Arts. Lawrence's portraits of children, though somewhat artificial in pose and expression, are decorative and charming The best of these are the group *The Calmady Children,* also called *Nature* (Metropolitan Mus); the children of the marquess of Londonderry, and *Penize* (Huntington Gall), one of his masterpieces Among the best known of his numerous works are portraits of Mrs Siddons, Benjamin West, and Princess Lieven (National Gall , London), George IV, Princess Caroline, and Wilberforce (National Portrait Gall , London), Lady Ellenborough, Lady Wyndham, John Julius Angerstein (Metropolitan Mus), Julia, Lady Peel (Frick Coll., New York), Lord and Lady Lyndhurst (Mus of Fine Arts, Boston). See study by Sir Walter Armstrong (1913)

Lawrence, Thomas Edward, 1888–1935, British adventurer, soldier, and scholar, educated at Oxford Lawrence in 1910 set out alone on a walking tour of Syria The following year he joined a British Museum archaeological expedition in Mesopotamia He remained in the Arabian regions until 1914, learning colloquial Arabic and making exploratory trips into the surrounding area After the outbreak of the First World War, Lawrence was attached to the intelligence section of the British army in Egypt In 1916, feeling the need for closer liaison with the Arabs, Lawrence joined the Arab forces under Feisal al Husain (FEISAL I) and fostered their revolt against Turkish domination Lawrence threatened Turkish communications by attacks on the Hejaz railroad and later led in the occupation of the important port of Aqaba In cooperation with General ALLENBY, Lawrence induced the Arab forces under Feisal to move northward, attacking trains and rail lines with great success Turkish forces were defeated and Turkish power permanently broken In 1918 Lawrence entered Damascus with the Arabs before Allenby He was a delegate to the Paris Conference, but there failed to achieve Arab independence Pursued by a feeling that he had betrayed his friends and by an almost pathological aversion to publicity, Lawrence, under the name of Ross, enlisted as a mechanic in the Royal Air Force When his identity had been discovered he went into the tank corps, he later again served with the Royal Air Force He legally adopted the name T E Shaw, meanwhile "Lawrence of Arabia" was a semilegendary figure in his own lifetime In 1919 he lost the greater part of the manuscript of the narrative of his Arabian adventures which he had written after his failure at Paris and rewrote the whole without his notes, which he had destroyed as he worked on the first draft In 1927 an abridged version appeared as *Revolt in the Desert,* and the complete work came out as *The Seven Pillars of Wisdom* (privately printed, 1926, pub 1935) *The Mint,* an account of his life in the Royal Air Force, written under the pseudonym J H Ross, was by his will forbidden publication before 1950 Other works are a translation of the *Odyssey* (1932), *Oriental Assembly* (fugitive papers, ed by his brother, A W Lawrence, 1940), and his letters (ed by David Garnett, 1939) See biographies by Robert Graves (1928) and B H Liddell Hart (1934), *T E Lawrence* (ed by A W Lawrence, 1937), *T E Lawrence to His Biographers* (ed by Robert Graves and Liddell Hart, 1938)

Lawrence, William, 1850–1941, American Episcopal bishop, b Boston, grad Harvard, 1871, and Episcopal Theological School, Cambridge, Mass , 1875, son of Amos A Lawrence He was rector (1876–84) of Grace Church, Lawrence, Mass , and taught homiletics and pastoral theology at the Episcopal Theological School from 1884 to 1893, when he succeeded Phillips Brooks as bishop of Massachusetts A supporter of liberal theological views in his denomination and a man of marked business ability, he founded the Episcopal church pension system, for which he raised an initial fund of over $8,000,000 He wrote biographies of his father (1889), of Roger Wolcott (1902), of Henry Cabot Lodge (1925), and of Phillips Brooks (1930) See his autobiography, *Memories of a Happy Life* (1926), biography by H K Sherrill (1943) His son, **William Appleton Lawrence,** 1888–, b Cambridge, Mass , grad Harvard, 1911, and Episcopal Theological School, 1914, became bishop of Western Massachusetts in 1937

Lawrence, William Beach, 1800–1881, American political leader and jurist, b New York city, grad Columbia, 1818 He was appointed secretary of legation in Great Britain in 1827 and in 1828 was made chargé d'affaires He returned to New York city in 1829, there he practiced law and wrote several legal studies Lawrence moved to Rhode Island in 1850, was elected lieutenant governor in 1851, and was acting governor in 1852 Soon afterward he retired from politics to devote himself to international law His annotated edition of Henry Wheaton's *Elements of International Law* (1855) was long standard From his service on a commission to codify international law came his *Commentaire sur les éléments du droit international* [commentary on the elements of international law] (4 vols , 1868–80)

Lawrence. 1 Town (pop. 1,087), central Ind., near Indianapolis. 2 City (pop. 14,390), co. seat of

Douglas co , NE Kansas, on the Kansas river and WSW of Kansas City, inc 1858 It was founded in 1854 by the New England Emigrant Aid Company with Charles ROBINSON as agent and named for Amos A Lawrence The Plymouth Congregational Church (1854) here was the first church of white settlers in Kansas During the next few years the town was the political center of the Free Staters and was actually, though not legally, capital for a while after 1857 A proslavery raid on the town (1856) led to the retaliatory Pottawatamie killings by John BROWN In 1863 the town was again sacked and burned, this time by William QUANTRILL The city is the industrial, commercial, and shipping center for an agricultural area and has processing plants The Univ of Kansas (see KANSAS, UNIVERSITY OF) and Haskell Institute (1884), largest Indian school in the United States, are here **3** City (pop 84,323), a co seat of Essex co , NE Mass , on the Merrimack and NE of Lowell, settled 1655, set off from Andover and Methuen 1847, made a city 1853 It is a port of entry Boston capitalists laid out an industrial town here in 1845 and built in the Merrimack a granite dam that has stood through all the floods, including that of 1936 They built mills and workers' dwellings, which were soon crowded with laborers, mainly from Europe Lawrence became one of the world's greatest centers for woolen textiles Shoes, paper products, and radio equipment are also made Several disastrous events occurred the collapse and fire of the Pemberton Mill in 1860, when over 500 trapped workers were killed or injured, the tornado of 1890, and the labor strife of 1912, when the strikers (I W W members) finally won some of their demands See M B Dorgan, *History of Lawrence, Massachusetts* (1924) **4** Residential village (pop *3,649*), on the south shore of Long Island, SE N Y , near Lynbrook, inc 1897 Toys are made here

Lawrenceburg. **1** City (pop 4,413), co seat of Dearborn co , SE Ind , on the Ohio and W of Cincinnati, laid out 1802 It is a port of entry Whisky is distilled here Prehistoric fortifications were found near by A flood inundated the city in 1937 **2** City (pop 2,046), co seat of Anderson co , N Ky , just S of Frankfort, in the bluegrass region, settled 1776 as Coffman's Station, inc 1820 It is a farm trade center, with a distillery and several small factories **3** City (pop 3,807), co seat of Lawrence co , S Tenn., SSW of Nashville, in a dairy, livestock, and cotton area, founded c 1815 It has a cheese factory and other industries

Lawrence College of Wisconsin, at Appleton, always nonsectarian, one of the coeducation pioneers, chartered 1847, opened 1849 by Methodists with a gift from Amos A Lawrence It was called a university until 1908 It has a music conservatory, the affiliated Institute of Paper Chemistry (graduate, first of its kind), and an American history museum Student guidance and individualized education are stressed

Lawrenceville. **1** City (pop 2,223), co seat of Gwinnett co , N central Ga , NE of Atlanta, inc 1821 Shoes are made here **2** Industrial city (pop 6,213), co seat of Lawrence co , SE Ill , on the Embarras near the Wabash, in an oil, natural-gas, and farm region, founded 1821, inc 1835 The city has oil refineries and manufactures oil-well and telephone equipment, asphalt products, chemicals, and gasoline **3** Village, W N J , between Trenton and Princeton, settled 1692 It is the site of a transoceanic radiotelephone transmitting station Lawrenceville School for boys (preparatory, nonsectarian, est 1810) is here **4** Town (pop 1,703), S Va , SSW of Richmond and near the N C line, in a tobacco area, founded 1814, inc 1874 St Paul's Polytechnic Institute (for Negroes) and the courthouse of Brunswick co are here

Lawrie, Lee (lô'rē), 1877–, American sculptor, b Germany Brought to America as an infant, he studied with Augustus Saint-Gaudens and Philip Martiny He has specialized in architectural sculpture Among his works are decorations for the U S Military Academy at West Point, the state capitol at Lincoln, Nebr , and the Harkness Memorial Tower and Arch at Yale, the *Prometheus* in Rockefeller Center, New York, and sculptures in the Church of St Vincent Ferrer, St Thomas Church, and the Chapel of the Intercession, New York

Lawson, Ernest, 1873–1939, American landscape painter, b San Francisco He studied art in Kansas City, in New York under J Alden Weir and Twachtman, and in Paris On returning to New York he joined the independent artists' group called The EIGHT and was one of the organizers of the Armory Show of 1913 His fine, impressionistic landscapes won him many awards and he is represented in most leading American galleries. *High Bridge* (Whitney Mus , New York) is a characteristic example of his work

Lawson, John, d 1711, English explorer of North Carolina He came to the Carolinas in 1700 and within the next few years traveled approximately 1,000 mi through previously unexplored parts. His detailed, lively description of the flora, the fauna, and the Indians, *A New Voyage to Carolina* (1709), was several times reissued as the *History of Carolina* Lawson was one of the incorporators (1705) of Bath, N C , was made surveyor general of North Carolina in 1708, and was one of the founders of New Bern, N C He was captured and put to death in the Tuscarora uprising of 1711 See F L Harriss, ed , *Lawson's History of North Carolina* (1937)

lawsuit. see PROCEDURE.

Lawton. **1** Village (pop 1,134), SW Mich , SW of Kalamazoo, in a grape area, inc 1858 Grape juice and roller bearings are made **2** City (pop 18,055), co seat of Comanche co , SW Okla , near the Wichita Mts ,, founded 1901 It is the commercial and industrial center for a farm area in which cotton is the chief crop Asphalt and granite deposits are in the vicinity A state junior college is here, and near by are U S Fort Sill, Fort Sill Indian school, a wildlife refuge, and Medicine Park resort.

laxative, drug or other substance used to stimulate the action of the intestines in eliminating wastes from the body The use of laxatives (or cathartics) is harmful unless they are resorted to only occasionally Cases of chronic CONSTIPATION require the attention of a physician Normally the intestinal wastes are eliminated at fairly regular intervals by the muscular action of the walls of the intestines, muscular contractions move the undigested residue or roughage of food materials along within the tubular intestine until it reaches the anus and is eliminated If the diet is adequate and the water intake is sufficient and if a fairly regular time for elimination is established, this process should not require the artificial stimulation of a laxative Laxatives delay the reestablishment of the normal action of the intestines, and by hastening the progress of food through the digestive system they may prevent the absorption by the body of vitamins and other essential food elements Many deaths have resulted from the rupturing of an infected appendix as a result of the use of a laxative (see APPENDICITIS) Habitual use of laxatives is a contributing cause to the formation of hemorrhoids Laxatives fall into three general groups according to their mode of action Usually known as irritants are those substances that by irritating the intestinal tract increase the muscular action of the intestines, among these are cascara sagrada, castor oil, croton oil, phenolphthalein, and rhubarb A second group act by increasing the amount of bulk in the intestines, these include the saline substances (chiefly salts of magnesium and sodium), which increase the fluid content of the intestines by withdrawing water from the circulating blood and thus produce a mechanical stimulation of the intestines Materials which themselves add bulk to the intestinal content include agar-agar and bran The third group, often called emollients, include liquid petrolatum (or mineral oil) and various vegetable oils, their action is to lubricate and prevent excessive dehydration of the contents of the large intestine After the use of a laxative, which empties the lower part of the intestine, a period longer than the usual time will pass before another natural elimination occurs The effects of a laxative vary with the dosage and with the individual Their use in cases of abdominal pain should be avoided

Laxness, Halldor Kiljan, Icelandic *Halldór Kiljan Laxness* (häl'dōr kil'yän läkhs'nĕs), 1902–, Icelandic novelist During the 1920s Laxness traveled widely, he lived in a monastery in Luxembourg and was, briefly, a Roman Catholic Further travel turned his sympathies toward Socialism and Communism, whose philosophies are reflected in his later novels In *Salka Valka* (1931–32, Eng tr , 1936) and *Independent People* (1934–35, Eng tr , 1946), both of which are units in a large cycle of novels, Laxness has created a new, modern style in Icelandic literature

Layamon (lä'umun, -mŏn, lī'-, lä'mūn), fl c 1200, first prominent Middle English poet His *Brut* survives in manuscripts of the 13th cent The longer version is a chronicle of 32,341 short lines on the history of Britain, from the fall of Troy and the arrival of Brutus in Britain through the death of Cadwaladr Layamon relied upon, but adapted freely from, the *Brut* of WACE and added material from other sources His Anglo-Saxon narrative meter foreshadows the Middle English metrical system. This chronicle is the first treatment in English of the ARTHURIAN LEGEND and is interesting because it adds a large amount of fairy lore

Layard, Sir Austen Henry (lā'ûrd), 1817–94, English archaeologist, diplomat, and traveler Between 1842 and 1851 he explored and excavated in Mesopotamia and Babylon, especially on the site of Nineveh In the period 1852–69 he held several government positions, at one time being undersecretary of foreign affairs and chief commissioner of works He was minister to Spain (1869–77) and ambassador to Constantinople (1877–80). His fine collections are in the Assyrian section of the British Museum He wrote, among other books, *Discoveries in the Ruins of Nineveh and Babylon* (1853), *Early Adventures in Persia, Susiana and Babylonia* (1887), and his autobiography (1903).

layering, horticultural practice of propagating a plant by rooting a branch before severing it from the mother plant Typically the branch is bent and a section, which has usually been slit or broken on the underside, is covered with soil and held in place by means of stakes or pins For mound layering, earth is heaped around the lower part of the branches. In pot layering, used for branches too stiff to bend to the ground, a pot of earth is attached to the branch where the new shoot is wanted Layering is used largely for multiplying plants not easily propagated from cuttings See publications of the U S Dept of Agriculture

Laynez, Diego see LAINEZ, DIEGO

Laysan (lāsän'), small island, central Pacific, NW of the Hawaiian Islands Annexed (1857) by the Hawaiian kingdom, it now belongs to the United States Its bird life has been studied by naturalists, and quantities of guano were shipped from Laysan

Lazarillo de Tormes (lathärē'lyō dā tôr'mās), Spanish picaresque novel, anonymously issued before 1554 and formerly ascribed to Hurtado de Mendoza It is considered one of the masterpieces of Spanish prose and was the prototype for similar romances

Lazarus (lă'zurus) [Gr ,=Heb , ELEAZAR] **1** Brother of Mary and Martha of Bethany who, after four days in the tomb, was brought back to life by Jesus John 11 1–44, 12 1–5 **2** Beggar in the parable who lay suffering and neglected at the rich man's gate After death the rich man, parching in hell, pleads in vain that Lazarus, now happy in heaven, be allowed to give him a cooling drink Luke 16 19–25

Lazarus, Emma, 1849–87, American poet and essayist, b New York city, educated privately Her *Poems and Translations* (1867) was followed by *Admetus and Other Poems* (1871), dedicated to Emerson She wrote a prose romance, *Alide* (1874), about Goethe, and a poetic drama, *The Spagnoletto* (1876), which was praised but never produced, and translated Heine's poems and ballads (1881) In the '80s she devoted herself to helping Russian Jewish refugees in America and wrote in defense of Judaism in many periodicals and in her *Songs of a Semite* (1882) Her sonnet to the Statue of Liberty, written in 1886, was placed inside the statue's pedestal See memoir in her *Poems* (1889), H E Jacob, *The World of Emma Lazarus* (1949)

Lazear, Jesse William (luzēr'), 1866–1900, American physician, b Baltimore, grad Johns Hopkins (B A , 1889), M D Columbia, 1892 He served on the staff of Johns Hopkins and carried on researches in bacteriology In 1900 he was appointed a member of the Yellow Fever Commission in Cuba under Walter Reed While working in a hospital, Lazear was bitten by a carrier mosquito, he contracted yellow fever and died See H A Kelly, *Walter Reed and Yellow Fever* (3d ed, 1923)

Le. For names beginning thus and not listed here, see second element, e g , for Le Havre, see HAVRE, LE

Lea, Henry Charles (lē), 1825–1909, American historian, b Philadelphia He was long associated with the family publishing business, but his real interest was in historical work, and he undertook very careful work on primary sources The result was a series of works on the Roman Catholic Church, which he examined as a source of evil in society Perhaps best known among his works are his first, *Superstition and Force* (1866, reprints and additions, 1878–92), and *A History of the Inquisition of the Middle Ages* (3 vols , 1888), *A History of Auricular Confession and Indulgences in the Latin Church* (3 vols , 1896), *The Moriscos of Spain* (1901), and *The Inquisition of Spain* (4 vols , 1906–7) The great importance of Lea's work is its originality and the profound influence it had in impressing on American historians the importance of direct study of the sources See biography by E S Bradley (1931)

Lea, Homer, 1876–1912, American soldier and writer, b Denver, educated at Stanford. A hunchback, he had a passion for soldiering, which was assuaged in China when in 1904 he was made lieutenant general in the new Chinese army He was exiled in Japan with his friend Sun Yat-sen, and his works *The Valor of Ignorance* (1909) and *The Day of the Saxon* (1912) contain bitter warnings against Japanese militarism Originally considered sensational, they were reissued in 1942 as accurate predictions of Japanese aims and plan of attack

Lea, Isaac, 1792–1886, American naturalist, b Wilmington, Del , father of Henry C Lea and Mathew Carey Lea He was a member (1821–51) of the publishing house of his father-in-law, Mathew Carey, but was primarily interested in the study of natural history and of conchology in particular, he became recognized as a leading authority on freshwater mollusks. He wrote *Observations on the Genus Unio* (13 vols , 1827–74) and *Synopsis of the Family of Naiades* (1836)

Lea, Mathew Carey, 1823–97, American chemist, b. Philadelphia, son of Isaac Lea He made important contributions to the chemistry of photography, particularly in connection with the action of light and color, and was the author of the *Manual of Photography* (1868). See biography by E. F Smith (1923).

Leachville, town (pop. 1,076), NE Ark., near the Mo boundary.

Leacock, Stephen Butler (lē'kŏk), 1869–1944, Canadian economist and humorist, b England, grad. Univ of Toronto (B A , 1891), Ph D Univ of Chicago, 1903. Head of the department of political science and economics at McGill Univ , Montreal (1908–36), he wrote standard works in his own field, in Canadian history, and in biography He is best remembered, however, for his many volumes of humorous essays and stories, many of them genial satires, including *Literary Lapses* (1910), *Nonsense Novels* (1911), *Behind the Beyond* (1913), *Frenzied Fiction* (1918), *Winnowed Wisdom* (1926), *My Discovery of the West* (1937), and *How to Write* (1942) *Last Leaves* (1945) are posthumously published essays See his autobiographical fragment, *The Boy I Left behind Me* (1946)

Lead (lĕd), city (pop 7,520, alt 5,320 ft), W S. Dak , in the Black Hills near the Wyo line, laid out 1876 after the discovery of gold here, inc 1890 It is the site of the Homestake Mine, largest gold mine in the United States A company-owned city, it houses Homestake's miners and the health and recreation facilities provided for them

lead, heavy metallic element (symbol=Pb [Latin *plumbum*], for physical constants, see ELEMENT, table) It is light silver when freshly cut, but darkens upon exposure to moist air because of the rapid formation of a protective film Lead is relatively soft, malleable, of low tensile strength, and a poor conductor of electricity and heat It resists the action of some substances, e g , concentrated (but cold) sulphuric acid, reacts slowly with others, e g , hydrochloric acid, and reacts readily with nitric acid It forms various compounds with oxygen, among others, a monoxide (LITHARGE), a dioxide used in storage batteries, and a tetroxide (RED LEAD), with oxygen and hydrogen, a hydroxide, which, mixed with the carbonate, forms WHITE LEAD, with chlorine, the chloride and tetrachloride, with iodine, an iodide, with carbon, hydrogen, and oxygen, lead acetate (SUGAR OF LEAD), with sulphur and oxygen, the sulphate ("sublimed white lead"), with arsenic, hydrogen, and oxygen, the arsenate, with chromium and oxygen, the chromate used as a pigment (chrome yellow), and with nitrogen and oxygen, a nitrate Lead is a component in many alloys, such as the low-melting alloys Rose's metal and Wood's metal and shot (lead and arsenic), lead foil (lead, tin, and copper), white metal (lead, tin, and copper, see ANTIFRICTION METAL), SOLDER, and TYPE METAL Lead is used also for covering cables, as a lining for laboratory sinks and tanks, in electrolytic cells, and in the "chambers" in the manufacture of sulphuric acid (lead-chamber process) It is utilized commonly for storage battery plates (see BATTERY, ELECTRIC), and its compounds are used in paints as a pigment and drier (lead borate), in glass, in gasoline, in thickening certain oils (when it is used as lead soap), and in building construction Lead pipes for conducting water for drinking purposes are dangerous since water may react with the metal to form poisonous compounds All lead compounds are poisonous (see LEAD POISONING) The "lead" of lead pencils does not contain lead, it is a mixture of graphite and clay Lead is one of the oldest metals used by man It was known to the Egyptians and ancient Babylonians The Romans used it for pipes and also in an alloy (lead and tin) for soldering In North America it was one of the first metals mined, it was sought after especially for making shot Although widely distributed throughout the world in its compounds, e g , in GALENA and to a less extent in CERUSSITE and ANGLESITE, the metal is seldom found "free" or uncombined The method used to separate lead from its ores depends upon the composition and lead-content of the ore Ores rich in the metal are treated in the open-hearth furnace or in the reverberatory furnace, and the lead oxide formed is subjected to still higher temperatures until the metal is set free Low-grade ores are concentrated After roasting they are treated in a BLAST FURNACE, the charge being a mixture of the lead-ore concentrate, coke, and a flux (a substance to remove impurities) Since the lead from the furnaces is impure, it has to be refined The Betts process is an electrolytic refining method Impure lead forms the anodes and pure lead the cathodes, the electric current causes the lead to pass from the anodes and be deposited upon the pure lead sheets of the cathodes The Parkes process is used to separate silver and gold from lead Zinc is added to the impure molten lead to form an alloy with the silver and gold, this alloy, being lighter than the lead, floats on the surface and is skimmed off

lead glance: see GALENA.

lead poisoning, plumbism, or **painter's colic,** industrial disease caused by the absorption of lead through either the respiratory tract or the digestive tract. It may also be caused by drinking water or other beverages from pipes or receptacles containing lead The progress of the disease is slow The symptoms are gradual weakness, constipation, abdominal colic, anemia, and often a typical paralysis of the wrists and ankles Properly supervised working conditions and regular examinations of individuals employed in such industries as the manufacture of white and red lead and storage batteries and of those engaged in pottery making, painting, printing, and acetylene-torch welding have reduced the relative frequency of the disease The elimination of lead from the body by the use of drugs, cathartics, and enemas is important in treatment The reduction of lead storage in the body is accomplished by the intake or injection of calcium An individual suffering from symptoms of lead poisoning should avoid further exposure to lead

Leadville (lĕd'vĭl), mining city (pop 4,774, alt c 10,200 ft), co seat of Lake co , central Colo , near the headwaters of the Arkansas river SW of Denver, inc 1878 In California Gulch rich placer gold deposits were discovered c 1860 Oro City, the principal camp, flourished for about two years until the diggings were exhausted The camps were virtually deserted until 1877, when carbonates of lead with a high silver content again transformed Oro City into a boom town By 1880, two years after its incorporation, Leadville had become one of the greatest silver camps in the world, with a lusty, heterogeneous population, estimated at nearly 40,000 In 1893, with the repeal of the Sherman Silver Act, silver mining collapsed, but in the late 1890s, with the discovery of gold near by, Leadville revived In the district, one of the world's most highly mineralized, great fortunes were quickly made and often quickly lost The spectacular history of H A W TABOR symbolizes Leadville's amazing story Some mining and smelting are still carried on (at near-by Climax is a large percentage of the world supply of molybdenum), and agriculture, ranching, and the growth of the tourist trade keep Leadville out of the "ghost town" category See G F Willison, *Here They Dug the Gold* (1946)

Leaf, Walter, 1852–1927, English banker and classical scholar, grad Trinity College, Cambridge Leaf was chairman of the Westminster Bank (after 1918) and an officer of bankers' associations, his *Banking* (1926) is a standard work His literary fame rests chiefly on a translation of the *Iliad* (with Andrew Lang and E J Myers, 1882)

Leaf, river of N Quebec, c 300 mi long, issuing from Lake Minto and flowing NE through Leaf Lake to Ungava Bay, NNW of Fort Chimo

leaf, one of the chief vegetative organs of a plant—a lateral appendage or extension of the STEM Green leaves, because of their capacity for PHOTOSYNTHESIS by which carbohydrates are formed and oxygen is released, are the source of practically all carbohydrate foodstuff and thus are the ultimate basis of most animal life A complete and typical leaf consists of the blade, the petiole or leaf stalk, and a pair of stipules on the stem at the base of the petiole The leaf blade has veins for support and conduction of materials, one or more layers of green cells, and usually many air spaces which are continuous with one another and with the external air by means of epidermal pores, the stomata (see TRANSPIRATION) This aerating allows for the gaseous interchange essential in photosynthesis The green color of leaves is caused by the pigment chlorophyll, which is necessary for photosynthesis Two other pigments, carotin and xanthophyll, which are associated with the chlorophyll, are visible as the orange-red or yellow color of leaves in autumn in north temperate regions They appear following the destruction of chlorophyll by a combination of low temperature, fairly strong sunlight, and other factors Under the same conditions other leaf pigments may be exposed or produced in autumn, e g , brown tannins and red, purple, or blue anthocyanins These same pigments in different combinations are responsible for color in variegated leaves White results from the absence of pigments (often produced by BLANCHING) Leaves may be simple (undivided) or compound (divided into leaflets, as in the walnut) and may be modified in form and in function into organs for storage (cotyledon), climbing (TENDRIL), protection (spine, see THORN), and trapping insects (see PITCHER PLANT) In temperate regions deciduous plants drop their leaves in the autumn and remain leafless through the winter, while evergreens produce new leaves as soon as the old ones fall

leafhopper, any of numerous species of small leaping insects of the family Cicadellidae of the order Homoptera Leafhoppers are found throughout the world, and almost all cultivated and wild plants are damaged by some species Most species are small (from 1/20 to ¼ in) and yellowish or greenish Some species of the Pacific region are brightly colored and several reach ½ in. in length

leaf insect, member of a group of leaf-eating, generally arboreal insects of the order Phasmatida, formerly included in the order Orthoptera. Tropical winged species are often called walking leaves since they so closely resemble leaves in shape and color The WALKING STICK and some other phasmids look like twigs.

leaf mold: see HUMUS

League or **Holy League,** 1576–98, organization of French Catholics, aimed at the suppression of Protestantism and Protestant political influence in France. It was foreshadowed as early as 1561 by the formation of the triumvirate of Anne de MONTMORENCY, François de GUISE, and Marshal Saint-André After the outbreak of the Wars of RELIGION, local and provincial leagues were formed; finally, when the HUGUENOTS won unprecedented concessions at the Peace of Monsieur (1576), a declaration calling for a national League of Catholics was issued by Henri, 3d duc de GUISE King HENRY III fearing the ambition of Guise, proclaimed himself its head A Huguenot uprising soon followed After a successful campaign which enabled him to withdraw some of his previous concessions to the Huguenots, Henry III dissolved the League (1577) It was revived in 1585, soon after Henry of Navarre (later King HENRY IV) had become the heir presumptive Having taken up arms, Guise forced the king (July, 1585) to issue an edict for the conversion or exile of Protestants and the exclusion of Navarre from the succession In the war which followed (the War of the Three Henrys), the League and the king were technically allied, but the League assumed the right to dictate, forcing the king to leave Paris (1588) and to renew his previous concessions This dictation led to Henry's ordering the assassination of Henri de Guise, who was succeeded at the head of the League by his brother MAYENNE. After the accession (1589) of Henry IV, the League controlled all the large cities, including Paris, and had the active support of Philip II of Spain, who sent Alessandro FARNESE to Mayenne's aid It split into two factions, however, over the question of Spanish interference, and it was weakened by Henry's military successes Henry's victory at Ivry (1590), his abjuration of Protestantism (1593), and his entry into Paris (1594) brought the League's organized resistance to an end, and by 1598 the last important League member had submitted to Henry.

League of Nations, former international organization, predecessor of the UNITED NATIONS, having as its purpose the maintenance of peace, arbitration of international disputes, and the promotion of international cooperation It may be called a product of the First World War, which made acceptable to national minds any plan to avert another such cataclysm However, the idea of a European league existed in germ in the "grand design" of SULLY and in the writings of Immanuel Kant and other philosophers of the Enlightenment The HOLY ALLIANCE of the early 19th cent and the Concert of Europe in the late 19th cent provided for concerted action to avert wars and revolutions; the RED CROSS, the HAGUE CONFERENCES, and the Permanent Court of Arbitration (HAGUE TRIBUNAL) were important steppingstones toward international cooperation At the close of the First World War such prominent figures as General SMUTS, Lord Robert Cecil, and Léon BOURGEOIS advocated a society of nations President Woodrow WILSON incorporated the proposal into the FOURTEEN POINTS and was the chief figure in its establishment at the Paris Peace Conference in 1919 The basis of the League was the Covenant, which was included in the Treaty of Versailles (see VERSAILLES, TREATY OF) Geneva, Switzerland, was chosen as League headquarters The League of Nations consisted of an assembly, composed of all member nations, of a council, composed of the Great Powers (originally England, France, Italy, and Japan, later also Germany and the USSR) and of several other nonpermanent members, a secretariat, and several allied bodies, e g , the Permanent Court of International Justice (see WORLD COURT) and the INTERNATIONAL LABOR ORGANIZATION The organization was thus in many ways similar to that of the United Nations The Assembly, like the General Assembly of the United Nations, was entitled merely to make recommendations, while actual decisions rested with the Council In the Council, however, unanimous decisions were required, while in the Council of the United Nations the "veto" power is restricted to the permanent members The Covenant of the League of Nations consisted of 26 articles Articles 1–7 concerned organization Articles 8–9 recognized the need for disarmament and set up military commissions Article 10 was an attempt to guarantee the territorial status quo against aggression Articles 11–17 provided for arbitration and conciliation and for sanctions against aggressors The rest of the articles dealt with treaties, the MANDATE system of colonial administration, international cooperation in labor and in humanitarian enterprises, and amendments to the Covenant The League of Nations suffered a severe handicap through the refusal of the United States to become a member and through the persistence of all members in regarding national sovereignty and interests as superior to mutual concession The absence of the United States, however, may have been overemphasized as a cause of the League's failure, the United States and Russia, though neither was then a member did take a valuable part in the DISARMAMENT CONFERENCE the failure of which was certainly not their responsibility As a rule, the League of Nations settled successfully such disputes as involved the smaller nations, but it foundered because the powerful nations could not be coerced into mutual compromise or into acceptance of its decisions At the start, the League included only the victors of the First World War and most of the neutral na-

tions Among later admissions to membership were those of Bulgaria (1920), Austria (1920), Hungary (1922), Germany (1926), Turkey (1932), and the USSR (1934) Among the problems settled by the League of Nations were the Swedish-Finnish dispute regarding the ALAND ISLANDS (1920), the status of N SCHLESWIG and Upper SILESIA, settled by plebiscites (1920, 1921), the population exchanges among GREECE, Turkey, and Bulgaria, after the Treaty of Lausanne of 1923, and the Yugoslav-Hungarian dispute caused by the assassination (1934) of King ALEXANDER of Yugoslavia The League furthermore extended considerable aid to refugees, particularly Armenians, it helped to suppress white slave and opium traffic, it did pioneering work in surveys of health, it extended financial aid to needy states, particularly to Austria, and it furthered international cooperation in many fields An early failure was the Polish refusal to abide by the League decision in the VILNA dispute More ominous was the shelving of the Geneva Protocol (see PROTOCOL) because of British opposition The split between France and its allies, the LITTLE ENTENTE, on the one hand, and Great Britain on the other, was caused by French insistence on forming a European system of collective security, i e , a network of defensive alliances intended to maintain the *status quo*, and by British refusal to support the plan The League's decay began with the Second CHINO-JAPANESE WAR in 1931 and the withdrawal (1933, effective 1935) of Japan from the League Another serious failure was the inability of the League to stop the war (1932-35) of Bolivia and Paraguay over the CHACO The Disarmament Conference, opened in 1932, foundered while Germany under Adolf Hitler began to rearm, withdrew from the League (1933), remilitarized the Rhineland (1934), denounced the Treaty of Versailles (1936), and seized Austria (1938) Encouraged by the League's inaction, Italy under Mussolini attacked (1935) ETHIOPIA (disregarding the ineffective and half-hearted economic sanctions imposed by the League), interfered in the civil war (1936–39) in SPAIN, and left the League in 1937 Japan resumed its war against China in 1937, and in 1938 the appeasement policy of the dominant League members —Great Britain and France—reached its apex in the MUNICH PACT, which virtually discarded the League as an international instrument German claims on DANZIG, where the League commissioner had become powerless, led to the outbreak (1939) of the Second World War In Dec , 1939, the League briefly rose from the dead to expel Russia because of its aggression against Finland The only effective political action of the League in the last years of its existence was its orderly supervision, carried out by an international police force, of the plebiscite in the SAAR TERRITORY (1935) In 1940 the League secretariat in Geneva was reduced to a skeleton staff, some of the technical services were removed to the United States and to Canada The International Labor Office continued its activities and eventually became affiliated with the United Nations In April, 1946, The League dissolved itself, and its services and real estate (notably its huge palace in Geneva) were transferred to the United Nations. See P J Noel Baker, *The League of Nations at Work* (1926), J S Bassett, *The League of Nations* (1928), T P Conwell-Evans, *The League Council in Action* (1929), Felix Morley, *The Society of Nations* (1932), J I Knudson, *A History of the League of Nations* (1938), H E Davis, ed., *Pioneers in World Order* (1944), J T. Shotwell and Marina Salvin, *Lessons on Security and Disarmament* (1949) See also A C Breycha-Vautier, *Sources of Information a Handbook on the Publications of the League of Nations* (1939)

League of Women Voters, organized in Chicago in Feb , 1920 An outgrowth of the National American Woman Suffrage Association, it had as its nucleus the leaders of this successful movement The league was organized to educate American women in the intelligent use of their newly won suffrage While championing advancement in the status and rights of women, the league seeks this advancement through the improvement of the entire political, economic, and social structure and has directed its educational and research campaigns to these ends on local, state, and national levels. Originally called the National League of Women Voters, in 1948 its name was changed to League of Women Voters of the United States.

Leah (lē'ə), Laban's elder, uglier daughter and Jacob's first wife Gen. 29–30.

Leahy, Frank William (lā'hē), 1908–, American football coach, b. O'Neill, Nebr., grad. Notre Dame, 1931. He was an assistant coach at Georgetown (1931), Michigan State College (1932) and Fordham (1933–38), and after his success as head coach (1939–41) at Boston College, he was made (1941) athletic director and head coach at Notre Dame Following service (1944–45) in the U.S. navy in the Second World War, he returned to coaching football at his alma mater. Under Leahy, one of the leading exponents of the T-formation in college football, Notre Dame regained the dominant position it had enjoyed in the days of his old coach, Knute Rockne. In four complete seasons through 1949, Notre Dame played 38 straight games without a defeat (but with two ties). He wrote *Notre Dame Football* (1949). See Archie Ward, *Frank Leahy and the Fighting Irish* (1944).

Leahy, William Daniel (lā'hē), 1875–, American admiral and diplomat, b Hampton, Iowa, grad. Annapolis, 1897 He served in the Spanish-American War, in the Philippines, in Nicaragua (1912), in Haiti (1916), in the Mexican punitive expedition (1916), and in the First World War. He later became chief of naval operations (1937) and governor of Puerto Rico (1939) and served (1940–42) as ambassador to Vichy France While he was (1942–48) chief of staff to the President, he was made (1944) an admiral of the fleet ("five-star admiral"). He is the author of *I Was There* (1950)

Leake, William Martin (lēk), 1777–1860, English topographer and numismatist. He served in the army in the West Indies, was artillery instructor to the Turks (1799–1800), and spent the next 15 years combining the work of observation of the country and collection of coins with diplomatic missions and military surveys

Leaksville, textile-mill town (pop 1,886), N N C , near the Va line, on the Dan and N of Greensboro, laid out 1797, inc 1874.

Leamington (lē'mĭngtŭn, lĕ'-), town (pop 5,858), S Ont , on Lake Erie and SE of Windsor In a fruit and tobacco district, it has canneries, basket factories, and cement works

Leamington (lē'mĭngtun), municipal borough (1931 pop 29,669, 1947 estimated pop 35,740), Warwickshire, England, on the Leam, a tributary of the Avon, and NE of Warwick It has ironworks and brick factories, but is primarily a health resort, largely of 19th-century growth, with mineral springs Among its features are Jephson Gardens, the Royal Pump Room and Gardens, and Victoria Park Victoria as a princess paid a visit to the borough, which officially became Royal Leamington Spa in 1838

Leander: see HERO

leap year see CALENDAR

Lear (lēr), English legendary king, supposed descendant, through Locrine and Brut, of Aeneas of Troy The story of Lear and his three daughters probably originated in early Celtic mythology GEOFFREY OF MONMOUTH claimed to have translated the story from old British records, and succeeding historians and authors perpetuated the legend It is best known as the subject of one of Shakspere's greatest tragedies, *King Lear* (produced 1606, pub 1608).

Lear, Edward, 1812–88, English artist and humorist Once drawing master to Queen Victoria, he was a painter of birds and landscapes, some of his sketches, in pen line and washes of water color, have been exhibited His illustrated limericks and poems in *A Book of Nonsense* (1846), *Nonsense Songs and Stories* (1871), and other works have given him fame Lear jests at sense and pathos in lyrics which attain, at times, a fantastic gaiety A traveler, he wrote several illustrated journals of his journeys See biography by Angus Davidson (1939)

Learchus (lēär'kŭs), in Greek mythology, son of INO and ATHAMAS His father, driven mad by HERA, killed him

learned and literary societies: see SOCIETIES, LEARNED AND LITERARY

Lease, Mary Elizabeth, 1853–1933, American agrarian reformer and temperance agitator, b Ridgway, Pa Going to Kansas as a young woman, she was admitted to the bar there She was active in politics with the Populists in the campaign of 1890, urging the popular election of Senators, postal savings banks, government control of railroads, Federal supervision of corporations, woman suffrage, free silver, prohibition, and other reforms, and her effectiveness as a speaker was credited with securing support for these measures She was called the Kansas Pythoness In 1908 she became a lecturer for the New York department of education and in 1912 joined the Bull Moose party After 1918 she was politically inactive

Leaside (lē'sĭd), town (pop. 6,183), S Ont , industrial and residential suburb NE of Toronto

leather, skin or hide of animals, reptiles, or birds cured by tanning to prevent decay and to impart flexibility and toughness Prehistoric and primitive peoples have preserved pelts with grease and smoke and have used them chiefly for shoes, garments, coverings, tents, and containers Today pelts are perpared for tanning by dehairing, usually with lime, followed by fleshing and cleaning After TANNING, leather is generally treated with fats to assure pliability. The wasteful practice of shaving leather to the required thickness was replaced early in the 18th cent. after the invention of a machine which split the pelt or the tanned leather into flesh and grain (hair-side) layers; skivers are thin grain splits used for linings and for covering firm surfaces. Characteristic grains may be brought out by boarding, as in morocco leather, or may be imitated by embossing. Finishes include glazing, a high glaze being achieved by rolling with glass cylinders; coloring with stains or dyes, enameling or lacquering as for patent leather; and sueding, buffing with emery or carborundum wheels to raise a nap, usually on the flesh side. Russia leather, originally vegetable-tanned calfskin dressed with birch oil which imparted a characteristic odor and often dyed red with brasilwood, is a trade name covering a number of variants. Rawhide is similar to parchment and is untanned. Cordovan, or Spanish, leather, a soft, colored leather made at Córdoba during the Middle Ages and often richly modeled and gilded, is imitated for wall coverings, panels, and screens Leather is much used in BOOKBINDING. Artificial leather, made since c 1850, is usually a strong fabric coated with a rubber composition or with a synthetic substance such as pyroxylin and embossed to imitate leather grains See Tanners' Council of America, *The Romance of Leather* (1937), J W. Waterer, *Leather in Life, Art, and Industry* (1946)

Leatherstocking Tales: see COOPER, JAMES FENIMORE

leaven (lĕ'vŭn), agent used to raise bread or other flour foods Physical leavens include water vapor, which is released as steam at high temperatures (as in popovers), and air, which is incorporated by beating, held by the gluten and protein in the mixture, and expanded by heat. Chemical leaven (BAKING POWDER and baking SODA) and biological leavens (yeasts and certain bacteria) raise the mixture by the formation of carbon dioxide gas, which is expanded by heat Earliest leavens were barm, a yeast of fermenting liquor, and sour dough, a portion saved from a mass of yeast-fermenting dough as a starter for the next batch The seemingly mysterious action of leaven gave rise, in early times, to various customs and superstitions For instance, in Palestine it was a burial custom to throw out of the house of mourning and from the three nearest houses all leaven and water, because into these the angel of death had thrust his sword

Leavenworth (lĕ'vənwŭrth, -wurth) **1** City (pop 19,220), co seat of Leavenworth co , NE Kansas, on the Missouri and NW of Kansas City The oldest city in Kansas, it was settled (1854) near Fort Leavenworth (see LEAVENWORTH, FORT) by proslavery Missourians, it was the first Kansas city to be incorporated (1855) The first newspaper in Kansas was printed here in 1854. The town flourished as a supply point on the westward travel routes and later became the commercial center of a farming and livestock region Coal is in the vicinity, and furniture, automobile batteries, and machinery are made here A state penitentiary and a national soldiers' home are near **2** City (pop 1,608), central Wash , on the Wenatchee river and NW of Wenatchee, in a farming, lumbering, and mining region, inc 1906 A large U S salmon hatchery is here

Leavenworth, Fort, U S military post, on the Missouri river and c 2½ mi northwest of the center of LEAVENWORTH, Kansas It was built in 1827 by Col Henry Leavenworth to protect the traffic of the old Santa Fe Trail From the fort many military expeditions set out for the West At present it includes a military post, a command and general staff school, and a Federal penitentiary

Lebanon (lĕ'bənən), republic (c 3,400 sq mi , pop more than 1,500,000), SW Asia The capital is Beyreuth The country faces on the Mediterranean in the east and is bordered on the north and east by Syria and on the south by Palestine The seacoast has the historic ports of Tripoli, Tyre (Arabic *Sur* or *El Sur*), and Sidon (now Saida) Much of the area is given over to the Lebanon mts , which run parallel to the coast On the eastern border is the range of Anti-Lebanon, and between the two mountain ranges lies the fertile valley of El BIKA (ancient Coele-Syria), the heart of Lebanon The country is largely agricultural, growing grains and fine fruits There are many olive groves, and mulberry trees are still grown for silk culture, though silk has declined from the high position it once had in the area Cotton is grown, and there is a cotton textile industry Tobacco is another important product The iron mines of Lebanon have been worked since ancient times and are no longer productive, but lignite is still mined The famed cedars of the Lebanon mts are greatly thinned but some remain Historically the region has been connected with Syria In very ancient times the Hittites and Aramaeans had sway here, and the great Phoenician cities later established a virtual commercial empire (see PHOENICIAN CIVILIZATION). The cities were the object of conquest for the Assyrians and the Persians and occupied a favored position in the Persian Empire Alexander the Great took them, and they were disputed by his successors. The region, with Syria, came under Roman dominion and was included in the Byzantine Empire until part of it fell to the Arabs in the 7th cent Long before that time the MARONITES had established themselves—a cardinal fact in the history of Lebanon, which remained predominantly Christian while Syria was becoming Moslem The DRUSES also settled in part of Lebanon and in adjacent regions of Syria, and trouble between them became a constant strain in regional history. The Crusaders were active in Lebanon, and the Lebanese Christians lent them some aid. After that time Lebanon was under Ottoman control until the First World War.

Massacres of the Maronites by the Druses in 1841 and 1860 led to pressure from the European governments and forced the sultans to grant some autonomy to Great, or Greater, Lebanon, as the region was then called. After the First World War, Lebanon passed under the French mandate over the Levant States (Syria and Lebanon) There was much discontent and widespread desire for independence. In 1926 Lebanon became a republic under the mandate, but difficulties continued. A treaty with France in 1936 provided for independence after a three-year transition period, but it was not ratified by France In the Second World War the French Vichy government retained control until a British and Free French force conquered (June–July, 1941) the Lebanese coast The Free French proclaimed Lebanon a republic, but this did not become an accomplished fact until Jan 1, 1944.

Lebanon. 1 Town (pop 1,467), E Conn., NW of Norwich, inc 1700. Its buildings include the Revolutionary War Office (1727) and the Governor Trumbull House (1740) It was the birthplace of Jonathan Trumbull (father and son), of John Trumbull, and of William Beaumont **2** City (pop. 1,867), SW Ill , E of St Louis, in a farm area, settled in the early 19th cent , inc 1857 McKendree College (coeducational, 1828) is here **3** City (pop 6,529), co seat of Boone co , central Ind , NW of Indianapolis, laid out 1832 In a dairying region, it manufactures oil-refining equipment **4** City (pop. 3,786), co seat of Marion co , central Ky , SE of Louisville, in the bluegrass region It has distilleries In the vicinity are a national cemetery and St Mary's College (for men, 1821) **5** Lumber town (pop 1,452), SW Maine, near the Salmon Falls River above Berwick, settled 1738, inc 1767 **6** City (pop 5,025), co seat of Laclede co , S central Mo , NE of Springfield, founded c 1849 It is in a timber and farm area of the Ozarks and has a garment factory and food-processing plants Richard Parks Bland lived here **7** Town (pop 7,590), W N H , on the Mascoma near its confluence with the Connecticut, granted and inc 1761 Lumber products and woolen fabrics are made here, and hunting is done W D Ticknor was born here **8** Village (pop 3,890), co seat of Warren co , SW Ohio, NE of Cincinnati, laid out 1802. Canning and shoe manufacturing are its chief industries Near by is Fort Ancient State Park, an earthwork fortification constructed by the mound builders **9** City (pop 2,729), NW Oregon, in the Willamette valley SSE of Salem and on the South Santiam, platted 1851, inc 1878 It is in a fruit- and nut-raising area and has paper mills **10** City (pop 27,206), co seat of Lebanon co., E Pa , between Reading and Harrisburg, settled c 1720, laid out 1750, inc as a borough 1821, as a city 1868 It lies in a farming area, and its manufactures include steel, iron, textiles, and tobacco products Early-18th-century German religious groups are represented here, and Lebanon was a flourishing town before 1790 **11** Town (pop 5,950), co seat of Wilson co , central Tenn , E of Nashville, in a timber and farm area, founded c 1802 It is the seat of Cumberland Univ (Presbyterian, coeducational, 1842) and Castle Heights Military Academy Fine ante-bellum houses are here and in the vicinity, near by is the HERMITAGE A marker indicates the site of Sam Houston's law office

Lebanon, anc *Libanus*, mountain range, Lebanon, paralleling the Mediterranean coast from the border of Palestine N into Syria It rises to more than 10,000 ft It was famed in ancient times for its huge and old cedars Of these only a few now remain Clusters of villages nestle about its terraced slopes, and between it and the Anti-Lebanon range lies the valley of El Bika (ancient Coele-Syria), the heart of Lebanon

Lebanon Independent, borough (pop. 2,425), SE Pa , E of Harrisburg, inc 1912

Lebanon Junction, town (pop 1,141), N Ky., S of Louisville, in a farm area

Lebaoth, the same as BETH-LEBAOTH

Lebbaeus (lĭbē'ŭs), apostle see JUDE, SAINT

Leblanc, Maurice (mōrēs' lŭblă'), 1864–1941, French author. His popular detective stories, featuring Arsène Lupin, gentleman thief turned detective, have been translated into many languages

Leblanc, Nicolas (nēkōlă'), 1742–1806, French chemist. He was appointed (1780) physician to Louis Philippe Joseph d'Orléans, who later aided him in setting up a factory for the production of soda ash from salt. Leblanc developed his process after a prize had been offered by the government for a method of obtaining a commercial supply of the soda Leblanc's patents were confiscated in the Revolution, and Leblanc, impoverished, finally committed suicide.

Leblanc process [for Nicolas Leblanc], commercial process for the preparation of soda from common salt. It involves the treatment of salt with sulphuric acid to yield finally sodium sulphate, the reduction of this product by carbon to produce sodium sulphide, and the formation of sodium carbonate (soda) by reaction between the sodium sulphide and limestone (calcium carbonate). The process was commercially successful upon its inception because of the by-products (sulphur and hydrogen chloride) produced. However, when cheaper means for the production of sulphur and hydrogen chloride were discovered, the Solvay process proved more economical, and it has almost entirely displaced the Leblanc process.

Le Bon, Gustave (güstäv' lu bôⁿ), 1841–1931, French psychologist and sociologist. He was the author of a number of works on social psychology Antidemocratic and a racialist, he is known for his *Psychologie des foules* (1895, Eng tr of the 2d ed , *The Crowd a Study of the Popular Mind*, 1897)

Lebonah (lĭbō'nŭ) [Heb ,=frankincense], place, central Palestine, near Shiloh Judges 21 19

Lebrun, Albert (ălbĕr' lubrŭ'), 1871–1950, French statesman, last president of the Third Republic A moderate, he served in many cabinets, was elected (1932) to the presidency to succeed Paul Doumer and was reelected in 1939 In July, 1940, the establishment of the Vichy government under Marshal Pétain deprived Lebrun of all authority In 1944 he recognized Charles de Gaulle as provisional president of France

Le Brun, Charles (shärl' lu brŭ'), 1619–90, French painter, decorator, and architect He studied with Vouet and in Rome In 1648 he founded the Académie royale de Peinture et de Sculpture, which was designed to replace the old guild system of apprenticeship A favorite of Colbert, he became painter to Louis XIV in 1662, and from that date until the death of Colbert in 1683 he acted as artistic arbiter to the king, inspiring or directing all of the many and grandiose decorative works of that time Notable among his achievements are the decorations at Versailles and those of the Château de Vaux and the Galerie d'Apollon (Louvre) His best-known paintings, the *History of Alexander* series, are in the Louvre Less gifted as a painter than some of his contemporaries, Le Brun had energy, draughtsmanship, and administrative capacity that made him a dominant figure in all fields of art In 1663 he was appointed director of the Gobelin works.

Lebrun, Charles François (shärl' frāswä' lŭbrŭ'), 1739–1824, French statesman A moderate member of the Constituent Assembly, he was imprisoned in the Terror Napoleon made him third consul (1799), later created him duke of Piacenza, and in 1810 appointed him governor of Holland Made a peer by Louis XVIII (1814), he supported Napoleon during the Hundred Days and was excluded from the house of peers from 1815 to 1819

Lebrun, Élisabeth Vigée- see VIGÉE-LEBRUN

Lecah (lē'kŭ), descendant of Judah 1 Chron 4 21

Le Cap, Haiti see CAP-HAÏTIEN

Lecce (lĕt'chā), city (pop 42,622), capital of Lecce prov , S Apulia, S Italy It is an agricultural center with ceramics, glass, and toy industries A Greek and later a Roman town, it was from 1053 to 1463 a semi-independent county under various lords In the 16th and 17th cent culture and commerce flourished There are many fine churches and palaces built or restored in a characteristic baroque style

Le Center, village (pop 1,232), co seat of Le Sueur co , S Minn , SSW of Minneapolis, settled 1864, inc 1876, called Le Sueur Center until 1931 It is a farm trade center The county fairgrounds has a log house containing pioneer relics

Lech (lĕkh), river, c 175 mi long, Austria and Bavaria It rises in Vorarlberg, Austria, and flows NE past Landsberg and Augsburg into the Danube In 1632 Gustavus II of Sweden defeated Tilly on the Lech near its confluence with the Danube, Tilly was fatally wounded The battle of the Lechfeld (955) took place near Augsburg

Lechfeld (lĕkh'fĕlt), plain near Augsburg, Bavaria Here in 955 King (later Emperor) Otto I defeated the Magyars and stopped their expansion, which had threatened central Europe

Lecky, William Edward Hartpole, 1838–1903, British historian, born and educated in Ireland His *History of the Rise and Influence of the Spirit of Rationalism in Europe* (2 vols , 1865) and his *History of European Morals from Augustus to Charlemagne* (2 vols , 1869) first won him a large public His masterpiece is his *History of England in the Eighteenth Century* (8 vols , 1878–90), which ranks him as a literary historian not far below Gibbon The combination of social and political history made the work a lasting contribution to history, but his moderate liberal views, his rationalism, and his dislike of democratic reforms color the history considerably. Especially distinguished are those parts dealing with Ireland, with the American and French Revolutions, and with the Wesleyan movement. Others of his works are *The Leaders of Public Opinion in Ireland* (1861), *The Map of Life* (1899), *The Political Value of History* (1892), *Democracy and Liberty* (2 vols , 1896), and *Poems* (1891). See memoir by his wife (1909).

Leclerc, Charles Victor Emmanuel (shärl' vēktôr' ĕmänüĕl' lŭklĕr'), 1772–1802, French general He served under Napoleon Bonaparte in the Italian campaign, married (1797) Pauline BONAPARTE, and took part in the coup d'état of 18 Brumaire (1799) In 1801 he commanded the French expedition to Portugal, then headed the force sent to subdue HAITI, where TOUSSAINT L'OUVERTURE had established a virtually autonomous state The French, after severe fighting, won several victories, and an agreement was reached This was broken by Leclerc, who, acting on Napoleon's secret instructions, had Toussaint seized by trickery and deported to France The natives, led by DESSALINES and CHRISTOPHE, rose in revolt and expelled the French, who were weakened by an epidemic of yellow fever Leclerc retired to Tortuga, where he died of fever. His failure doomed French colonial ambitions in America and led to the LOUISIANA PURCHASE

Leclerc, Jacques Philippe (zhäk' fēlēp' lŭklĕr'), 1902–47, French general His real name was Philippe, comte de Hauteclocque, but he adopted the name Leclerc in the Second World War, when he took command of the Free French forces in French Equatorial Africa He won for himself a place in military history when he led (Dec , 1942–Jan , 1943) the march of the Free French from Lake Chad to Tripoli, over c 1,500 mi. of deserts and mountains, including Fezzan and the Libyan Desert, and through enemy-held territory His forces entered Tripoli at the same time as the British 8th Army, their feat was unparalled Leclerc and his troops then took part in the Tunisian campaign under Gen B L Montgomery, and in 1944 he commanded the French 2d Armored Division, which had as its nucleus the veterans of his African campaign Gen Omar N Bradley, under whose command he then was, paid tribute to Leclerc by letting his division enter Paris first (Aug , 1944) and thus complete the liberation of the city Later in the year he took Strasbourg Leclerc was made (1945) French commander in the Far East He accepted the Japanese surrender at Tokyo for France and subsequently commanded in the campaign against the insurgents in Indo-China Made inspector general of the French forces in North Africa in 1946, he died a year later in an airplane crash

Le Clerc, Jean (zhäⁿ), Latin *Johannes Clericus*, 1657–1736, Swiss Protestant theologian and writer He preached in France and in London, then, drawn to the teachings of the Dutch Remonstrants, settled in Amsterdam, where he became professor in the Remonstrant Seminary His biblical commentaries pointed the way to scientific criticism Among his important works are *Bibliothèque universelle et historique* (1686–93), *Bibliothèque choisie* (1703–13), and *Bibliothèque ancienne et moderne* (1714–27)

Lecompte (lŭkŏmpt'), cotton town (pop 1,311), central La , S of Alexandria, settled c 1855

Lecompton (lŭkŏmp'tun), city (pop 250), NE Kansas, on the Kansas river between Lawrence and Topeka At Lecompton, made territorial capital in 1855, was formulated the proslavery **Lecompton Constitution.** Its slavery clause was approved in Dec , 1857, as Free State men declined to vote President James Buchanan urged Congress to admit Kansas under the Lecompton Constitution, but with Stephen A Douglas and his followers breaking with the proslavery Democrats, the bill could not pass the House A compromise was effected by which the constitution as a whole was to be submitted to popular vote, and if it were approved, Kansas would receive a Federal land grant Despite this inducement, the Lecompton Constitution was decisively rejected in Aug , 1858, and Kansas was admitted (1861) as a free state

Le Conte, Joseph (lukŏnt'), 1823–1901, American geologist, b Liberty co , Ga , grad. Univ. of Georgia, 1841 He studied under Louis Agassiz at Harvard and taught at the Univ of South Carolina (1857–69) and at the Univ of California from 1869 He made major contributions in his study of mountain making and in his concept of critical periods in the history of the earth His writings include *Sight* (1881), *Evolution* (1888), and *Elements of Geology* (1878), long a standard text See his autobiography (1903) and *Journal of Rambles through the High Sierra* (1875, 1930)

Leconte de Lisle, Charles Marie (shärl' marē' lukôt' dŭ lēl'), 1818–94, French poet His first two books of poetry, *Poèmes antiques* (1852) and *Poèmes et poésies* (1855), were immediately successful It was, however, *Poèmes barbares* (1862, later enlarged as *Poèmes barbares*, 1872) which established him as the leading figure of the group later to be known as the Parnassians Anti-Christian and a pessimist, Leconte de Lisle saw death as the only existing reality and drew his inspiration from antiquity Later works include *Les Erinnyes* (1872), a verse drama, and *Poèmes tragiques* (1884) He was elected to the French Academy in 1886 See I. H Brown, *Leconte de Lisle a Study on the Man and His Poetry* (new ed , 1929)

Le Coq, Robert (rôbĕr' lukôk'), d. 1368, French statesman, bishop of Laon Rising rapidly in the service of John II, he was John's ambassador (1354) to CHARLES II of Navarre, whose partisan he became He sided with the popular party of Étienne MARCEL in the States-General of 1356, but after Marcel's assassination (1358) he was compelled to flee to Spain, where he became bishop of Calahorra

Lecoq de Boisbaudran, Paul Émile: see BOISBAUDRAN, PAUL ÉMILE LECOQ DE

Le Corbusier (lu kôrbüsyā'), pseud, of **Charles Édouard Jeanneret** (shärl' ādwär' zhanürā'), 1887–, Swiss architect, a leader of international importance in the development of modern architecture At the age of 21 he entered the office of Auguste Perret, where he received his training in modern construction, and later he worked for brief periods under the German architect Peter Behrens and the Viennese, Josef Hoffmann In 1915 appeared his first experimental studies incorporating a new and radical attitude towards the technical and aesthetic problems of building, and in the following years he produced schemes for houses and apartments and for a city built on pillars For inspiration he drew largely upon the forms characteristic of steamship construction In 1921, in his widely known "Citrohan" model for dwelling houses, he definitely arrived at an architectural form expressive of new construction methods and in 1923, in a villa at Vaucresson, near Paris, produced the first building embodying his principles Between 1920 and 1925 he not only crystallized the modern style in his studies and buildings, but produced propaganda for it in articles contributed to the review *Esprit nouveau*, which he had founded in 1920 with Amédée Ozenfant These articles were collected and published as *Vers une architecture* (Eng tr from the 13th French ed , *Towards a New Architecture*, 1927), which attained international circulation and has been one of the most influential publications concerning modern architecture Among Le Corbusier's better-known works are studio houses at Boulogne-sur-Seine, a housing development at Pessac near Bordeaux, and the Swiss Building at Cité Universitaire, Paris In the competition (1927) for the palace of the League of Nations in Geneva he was one of the prize winners In 1946 he was selected as one of the international group of architects to design the headquarters of the United Nations in New York See *Le Corbusier, Artist, Painter, Writer* (ed by Stamo Papadaki, 1948)

Lecouvreur, Adrienne (adrēĕn' lukōōvrŭr'), 1692–1730, French actress She made her debut in the title role of Crébillon's *Electre* in 1717 at the Comédie Française and for 13 years was the idol of the French public in both comedy and tragedy Her diction and manner were natural, and she was unrivaled in the plays of Racine and Voltaire Her devotion to Maurice de SAXE made her life tragic, and her mysterious death was ascribed to poisoning by a rival, the duchesse de Bouillon The play *Adrienne Lecouvreur* by Scribe and Legouvé describes her romantic life

Lecuona, Ernesto (ĕrnā'stō lākwō'na), 1895?–, Cuban composer and pianist, grad National Conservatory of Music of Havana, 1913 He appeared as a pianist in Spain, France, and the United States His dance orchestra, Lecuona's Cuban Boys, became popular both in South America and the United States In addition to his *Rapsodia negra* (New York, 1943) he is famous for his piano pieces, particularly *Malagueña*, his rhumba *Siboney*, and numerous popular songs

Leda (lē'du), in Greek mythology, wife of Tyndareus (tĭndā'rūus), king of Sparta She was the mother of Helen, Castor and Pollux, and Clytemnestra According to one legend Zeus visited Leda as a swan From this union Leda brought forth two eggs, from one issued Helen and from the other Castor and Pollux Other legends say that Tyndareus was the father of Castor as well as Clytemnestra

Le Daim or **Le Dain, Olivier** (both ôlēvyā' lù dĕ'), d 1484, favorite of Louis XI of France Originally the king's barber and surgeon, he gained great influence over Louis and became one of the most powerful and feared men in the country Shortly after Louis's death, Le Daim's enemies had him tried and hanged

Ledebour, Karl Friedrich von (kärl' frē'drĭkh fŭn lā'dubōōr), 1785–1851, German botanist and traveler His *Flora rossica* (1842–53), on the plants of Russia, is his most important work

Ledochowski, Count Mieczislaw, Pol *Mieczisław Ledóchowski* (myĕchĭs'wäf lĕdōōkhôf'skē), 1822–1902, cardinal of the Roman Church, b Russian Poland He became (1865) archbishop of Gniezno and Poznan (then in Prussian Poland) When the Prussian government, opening the KULTURKAMPF, forbade the use of Polish in instruction in Poznan, Ledochowski ordered the religious instruction in the lower grades to continue in Polish. The teachers obeying the archbishop were dismissed and Bismarck's government demanded his resignation The archbishop ignored the government and was jailed in 1874 In March the pope created him a cardinal, and in April the government declared him deposed. In 1875 Ledochowski was released and banished and thereafter ruled his see from Rome He resigned in 1885

Ledo Road: see BURMA ROAD

Ledoux, Claude Nicolas (klōd' nēkôlä' ludōō'), 1736–1806, French architect He built palaces and various public buildings, among them the toll-houses (*barrières*) around Paris (1784) His main work was the planning of an ideal city, "Chaux," for the salt mines of the Franche-Comté, which was never built Ledoux's bold, purely geometrical designs anticipated many ideas of the 20th cent

Ledru-Rollin, Alexandre Auguste (älĕksä'drŭ rôlăN' ôgüst' ludrü'-rôlă'), 1807–74, French politician A lawyer, he first became known as a radical member of the opposition to the July Monarchy and the defender of the journalists He was elected to the chamber of deputies in 1841 and was very active in the FEBRUARY REVOLUTION of 1848, becoming minister of the interior in the provisional government formed by LAMARTINE It was largely due to his pressure that universal suffrage was adopted in the elections to the Constituent Assembly Ledru-Rollin, supported by Lamartine, was included (May, 1848) in the executive commission that replaced the provisional government, but passed to the opposition during the JUNE DAYS He formed the Social Democratic party and denounced the government of Louis Napoleon (later NAPOLEON III) His "campaign of banquets" led to his election in five departments by 2,000,000 votes (May, 1849), but the countermeasures of the government forced him to flee to England in the same year During his long exile, he wrote numerous revolutionary pamphlets At the fall of the Second Empire, he returned to France and was elected (1874) to the chamber of deputies, where he sat with the extreme left Ledru-Rollin was a powerful speaker His speeches and pamphlets were collected in his *Discours politiques et écrits divers* (2 vols , 1879) See A R Calman, *Ledru-Rollin and the Second French Republic* (1922)

Ledwidge, Francis (lĕd'wĭj), 1891-1917, Irish poet, killed in the First World War His poems, which are mainly concerned with celebrating nature, were collected in *Complete Poems* (1919)

Ledyard, John (lĕd'yŭrd), 1751–89, American adventurer, b Groton, Conn He studied briefly at Dartmouth but left college to ship as a sailor In 1776 he joined Capt James Cook's last expedition Having seen the Pacific Northwest, he was fired with a desire to establish a post there Though Cook had not found the fabled Northwest Passage, Ledyard was convinced that a practicable route to the Northwest coast could be found Failing to obtain support in America for his scheme of an exploratory expedition, he went to France There he was encouraged by Thomas Jefferson and John Paul Jones, but still got no funds He then undertook to walk across Europe and through Siberia The Russian government at first refused permission, but in 1787 he reached St Petersburg and was permitted to start the long, dangerous journey that took him to Yakutsk There he was arrested and sent back He was engaged in a plan for exploring the interior of Africa when he died in Cairo See the fictionized biography by Kenneth Mumford (1939) Helen Augur, *Passage to Glory* (1946)

Ledyard, William, 1738–81, American Revolutionary officer, b Groton, Conn In 1781, as commander of Fort Griswold (near Groton), he refused to surrender, despite threats of massacre if he resisted the overwhelming British force After heroic defense, the fort fell and Ledyard and most of his men were butchered

Ledyard, town (pop 1,426), SE Conn , bordered on the west by the Thames, settled c 1653, inc 1836 The site of Fort Decatur is marked

Lee, Ann, 1736–84, religious visionary, founder of the SHAKERS in America Born in Manchester, England, she worked there in the cotton factories, then became a cook In 1762 she was married to Abraham Stanley, a blacksmith, her four children died in infancy In 1758 she had joined the "Shaking Quakers" Claiming revelation in a vision (c 1770) that the second coming of Christ was fulfilled in her, she became their accepted leader, known as Ann the Word or Mother Ann Though illiterate, she claimed the gift of tongues and the ability to discern spirits and work miracles She was also convinced of the holiness of celibacy In 1774 Mother Ann led a band of eight to America, where, two years later, at Watervliet, N Y , the first Shaker settlement in America was founded

Lee, Arthur, 1740–92, American Revolutionary diplomat, b "Stratford," Westmoreland co , Va , brother of Francis L , Richard H , and William Lee He was educated at Eton and the Univ of Edinburgh (M D , 1764) and returned to practice medicine in Virginia, but decided to study law and went to London There, like William Lee, he became a partisan of John Wilkes and a political pamphleteer After the American Revolution broke out, he was an agent for the Continental Congress and helped to persuade BEAUMARCHAIS to aid the rebellious colonials In Paris, however, he quarreled with Benjamin FRANKLIN and Silas DEANE, and his unfavorable reports to Congress resulted in the recall of Deane and stoppage of payment to Beaumarchais His hopes of arriving at a treaty with Spain were disappointed, though Spain later entered the war on the American side, and he could not secure recognition at the Prussian court in Berlin In 1779 he was recalled. See B. J. Hendrick, *The Lees of Virginia* (1935)

Lee, Charles, 1731–82, American Revolutionary general, b Dernhall, Cheshire, England. He first came to America to serve in the French and Indian War and took part in Braddock's disastrous campaign (1755), in the unsuccessful campaign against Ticonderoga (1758), and in Amherst's taking of Montreal (1760) His duties as a British officer later took him to Portugal under Gen. John Burgoyne (1762) and to Poland (1763) In 1773 he came to Virginia to live At the start of the American Revolution his military experience won him a commission as major general, but his ambition drove him to demand credit and to desire the high command. After directing the fortification of New York city early in 1776, he went to Charleston and got the credit for the successful defense of that city though he had advised William MOULTRIE to abandon the fort, which in Moultrie's defense saved the city Back in New York he repeatedly disregarded Washington's command to cross the Hudson in the retreat after the battle of White Plains, in the hope that he could win a personal success and replace Washington as commander in chief When he did cross he was captured (Dec 13, 1776) by the British at Basking Ridge, N J As a captive he tried to work out peace proposals, which Congress rejected, then traitorously assisted Gen William Howe in plans for taking Philadelphia Lee was exchanged and joined Washington at Valley Forge (1778) At the battle of Monmouth (1778) he ordered a retreat and thus prevented an American victory The rout was stemmed only by Washington, Baron von Steuben, and Nathanael Greene, and Washington angrily ordered Lee to the rear Lee brazenly criticized Washington so violently that John Laurens challenged him to a duel A court-martial ended in a year's suspension from command for Lee, who continued to criticize Washington abusively In 1780 he was finally dismissed See W S Stryker, *The Battle of Monmouth* (1927)

Lee, Fitzhugh, 1835–1905, Confederate cavalry general, b "Clermont," Fairfax co , Va , grad West Point, 1856, nephew of Robert E Lee He campaigned against the Comanche Indians in Texas and in May, 1861, was an instructor at West Point when he resigned to serve his state In the Civil War, Lee was made a brigadier general for his part in the raid led by J E B STUART around G B McClellan's army, and he brilliantly covered the Confederate retreat from South Mt in the Antietam campaign (1862) In a cavalry engagement at KELLY'S FORD in March, 1863, his brigade opposed the superior Federal force under Gen W W Averell His discovery of the weakness of Joseph Hooker's right led to Stonewall Jackson's successful flanking movement in the battle of CHANCELLORSVILLE (May, 1863) Lee was with Stuart in the Gettysburg and Wilderness campaigns (1863, 1864) He was promoted major general in Sept , 1863 Sent to support J A EARLY in the Shenandoah Valley in Aug , 1864, Fitz Lee was wounded at Winchester and did not return to active service till Jan , 1865 He was chief of the cavalry corps of the Army of Northern Virginia in the last days of the war and covered the retreat to Appomattox He was (1886–90) governor of Virginia, and in 1896 President Cleveland appointed him consul general at Havana Lee won national approval by his conduct in the difficult period preceding the Spanish-American War, and in that conflict he was a major general of volunteers He was military governor of Havana after the war and later commanded the Dept of the Missouri He wrote a biography of his uncle (1894) See D S Freeman, *Lee's Lieutenants* (3 vols , 1942–44)

Lee, Francis Lightfoot, 1734–97, American Revolutionary patriot, signer of the Declaration of Independence, b "Stratford," Westmoreland co , Va , brother of Arthur, Richard H , and William Lee While a member of the house of burgesses (1758–75), he urged resistance to Great Britain in the disturbances leading to the Revolution He served in the Continental Congress (1775–80), and later he supported the Federal Constitution See B J Hendrick, *The Lees of Virginia* (1935).

Lee, George Washington Custis, 1832–1913, Confederate general, b Fort Monroe, Va , grad West Point, 1854, eldest son of Robert E Lee He served in the Corps of Engineers until May, 1861, when he resigned to fight for the Confederacy Aide-de-camp to President Davis through most of the Civil War, he was promoted major general in 1864 In the last days of the war Lee commanded a brigade attached to R S Ewell's corps and was captured in the fighting at Sailor's Creek (April, 1865) He was professor of civil and military engineering at the Virginia Military Institute (1865–71) and, succeeding his father, president of Washington and Lee Univ (1871–97) In 1883 the United States paid him $150,000 for Arlington House (see LEE MANSION NATIONAL MEMORIAL)

Lee, Henry, 1756–1818, American Revolutionary cavalry general, usually known as Light-Horse Harry Lee, b "Leesylvania," Prince William co , Va , grad College of New Jersey (now Princeton), 1773 He was a cousin of Arthur, Francis L , Richard H , and William Lee and was the father of Robert E Lee. As a commander of light dragoons he established an enviable record in the Revolution. He first gained wide notice for his capture of

the fort at Paulus Hook (now in Jersey City), N.J , on Aug 19, 1779 His service under Nathanael Greene after 1780 in the CAROLINA CAMPAIGN was notable for daring and brilliance After the war he was elected (1785) to the Continental Congress, favored a stronger Federal government, and in 1788 was a leader in the struggle to ratify the Constitution He was elected governor of Virginia in 1792, and two years later he commanded the troops who suppressed the Whisky Rebellion He returned to Congress in 1799 He was author of the description of Washington as "first in war, first in peace, and first in the hearts of his countrymen" in the resolutions on the first President's death Henry Lee was a poor business manager and in 1808 was imprisoned for debt, though the circumstances of life at STRATFORD were not straitened. He wrote *Memoirs of the War in the Southern Department* (1812, reprinted 1869 with a biographical sketch by Robert E Lee) See biography by Thomas Boyd (1931)

Lee, Jason, 1803–45, American pioneer in Oregon, a Methodist missionary, b Stanstead, then considered to be in Vermont, now in Quebec After conversion (1826), he became a minister and in 1833 was chosen to go to Oregon in response to the plea (1831) of the Indians He went out with the expedition of Nathaniel J WYETH in 1834 and was persuaded by Dr John MCLOUGHLIN to found his mission in the Willamette valley The missions founded by him and his associates were centers of American settlement Lee on a trip (1838–40) to the East got missionary reinforcements, promoted American emigration to the Columbia region, and asked Congress to extend protection to settlers there He died when on a second journey in the East Like Marcus Whitman, he was influential in making Oregon American territory See biography by C J Brosnan (1932), Theressa Gay, *Life and Letters of Mrs Jason Lee* (1936)

Lee, Jesse, 1758–1816, American Methodist clergyman, b Virginia He is known as the apostle of Methodism in New England where, from 1789 to 1798, his labors as an itinerant preacher over a wide area met with signal success After serving for three years as assistant to Bishop Asbury, Lee was appointed presiding elder of the South District of Virginia in 1801 He served three terms as chaplain in the House of Representatives and one in the Senate His *Short History of Methodism in America* (1810) is the first of its kind

Lee, John Doyle, 1812–77, American Mormon leader He joined (c 1837) the Mormon Church and became a bodyguard for Joseph Smith and later for Brigham Young He was one of the first Mormon migration to Utah and was active in helping to plant settlements there, one of them Provo It seems that he was especially stirred to anger when the U S government sent Albert S JOHNSTON and his troops on the Mormon campaign or "Mormon War" in 1857 At any rate he was the leader of the massacre at MOUNTAIN MEADOWS in 1857 He was finally brought to justice in 1875 The jury disagreed at his first trial, but he was at a second trial found guilty and sentenced to be shot at the scene of the massacre While the case was being vainly appealed, he wrote *Mormonism Unveiled* (later republished as *The Mormon Menace*), a book blaming the Mormon Church for his crime He was executed

Lee, Light-Horse Harry see LEE, HENRY

Lee, Nathaniel, 1653?–1692, English dramatist He specialized in tragedies with a classical background His earlier plays are written in rhyme, but his most successful play, *The Rival Queens, or, The Death of Alexander the Great* (1677), is in blank verse He collaborated with Dryden on *Oedipus, King of Thebes* (1679) and *The Duke of Guise* (1682)

Lee, Richard, d 1664, American colonist, founder of the Lee family of Virginia A member of the Coton branch of the Lees of Shropshire, England, he came (c 1642) to York co , Va , and later settled in Northumberland co A tobacco planter, Lee became wealthy for his time and was an important figure in Virginia, being at various times justice, burgess, member of the council, attorney general, and secretary of state See E J Lee, *Lee of Virginia, 1642–1892* (1895)

Lee, Richard Henry, 1732–94, American Revolutionary statesman, b "Stratford," Westmoreland co , Va , brother of Arthur, Francis L , and William Lee He served in the house of burgesses (1758–75), where he favored halting the slave trade He voiced his protest against the Stamp Act (1765) and was the leader in forming a nonimportation organization To help unite colonial resistance further, he advocated, and helped to form, the intercolonial committees of correspondence As a member of the Continental Congress (1774–80), he was most active in promoting a nonimportation agreement Lee was a member (with John Adams and Edward Rutledge) of the committee that placed George Washington in command of the Continental army He was also vigorous in arguing for independence and introduced the motion that led to the Declaration Lee served again in the Continental Congress (1784–87) He opposed the Federal Constitution because he feared that it would destroy states' rights As U S Senator (1789–92) Lee was largely responsible for adoption of the first 10 amendments to the Constitution See J C Ballagh, ed , *The Letters of Richard Henry Lee* (2 vols , 1911–14), B J Hendrick, *The Lees of Virginia* (1935)

Lee, Robert Edward, 1807–70, general in chief of the Confederate armies in the Civil War, b Jan 19, 1807, at STRATFORD, Westmoreland co , Va.; son of Henry ("Light-Horse Harry") LEE On his graduation from West Point in 1829, he was commissioned in the Corps of Engineers He married (1831) a great-granddaughter of Martha Washington, and Arlington House (see LEE MANSION NATIONAL MEMORIAL), her father's residence near Alexandria, Va , was their home until the Civil War In the Mexican War, Lee made a brilliant record as captain of engineers with Scott's army, winning three brevets, his reconnaissances on the advance to Mexico city were important to the American success Lee was superintendent at West Point from 1852 to 1855, when he was made lieutenant colonel of the 2d Cavalry and sent to W Texas He commanded the regiment from 1857 to 1861 While at Arlington House on an extended leave, he was called to lead the U S marines which captured John BROWN at Harpers Ferry in Oct , 1859 In Feb , 1861 (after the secession of the lower South), General Scott, with whom Lee was a great favorite, recalled him from Texas Lee had no sympathy with either secession or slavery and, loving the Union and the army, deprecated the thought of sectional conflict But in his tradition, loyalty to Virginia came first, and upon Virginia's secession he resigned from the army on April 20, 1861 His resolve not to fight against the South had already led him to decline the field command of the U S forces (April 18) On April 23 he assumed command of the military and naval forces of Virginia, which he organized thoroughly before they were absorbed by the Confederacy Lee then became military adviser to President Jefferson DAVIS and was made a Confederate general After his efforts to coordinate the activity of Confederate forces in the western part of Virginia failed (July–Oct , 1861), Lee organized the South Atlantic coast defenses In March, 1862, Davis recalled him to Richmond His plan to divert reinforcements from Gen G B MCCLELLAN, whose army was threatening Richmond, was brilliantly executed by T J (Stonewall) JACKSON in the Shenandoah Valley When J E JOHNSTON was wounded at Fair Oaks in the PENINSULAR CAMPAIGN, Lee assumed command of the Army of Northern Virginia (June 1, 1862) His leadership of that army through the next three years has placed him among the world's great commanders Lee immediately took the offensive, and after ending McClellan's threat to Richmond in the SEVEN DAYS BATTLES (June 26–July 2), he thoroughly defeated John POPE at the second battle of BULL RUN (Aug 29–30) McClellan, however, checked him in his first Northern invasion, the ANTIETAM CAMPAIGN (Sept) Successive advances by A E BURNSIDE and Joseph HOOKER were handsomely repulsed in the battles of Fredericksburg (Dec 13, 1862, see FREDERICKSBURG, BATTLE OF) and CHANCELLORSVILLE (May 2–4, 1863), though in the last victory Lee lost his ablest lieutenant, Stonewall Jackson For his failure against G G MEADE in the GETTYSBURG CAMPAIGN (June–July, 1863), Lee assumed full blame, although the defeat was more probably due to the action of his subordinates, particularly James LONGSTREET Davis refused to entertain Lee's offer of resignation After Gettysburg, he was not engaged in any major campaign until May, 1864, when U S GRANT moved against him He repulsed Grant's direct assaults in the WILDERNESS CAMPAIGN (May–June), but was not strong enough to turn him back, and in July, 1864, Grant began the long siege of PETERSBURG Lee's appointment as general in chief of all Confederate armies came (Feb , 1865) when the Confederacy had virtually collapsed On April 2, 1865, the Army of the Potomac broke through the Petersburg defenses, and one week later Lee surrendered to Grant at APPOMATTOX COURTHOUSE After the war Lee became president of Washington College (now WASHINGTON AND LEE UNIVERSITY) and made it one of the outstanding educational institutions of the South Although the cause he championed was lost, Robert E Lee was the greatest general of the war His military genius, hampered though it was by lack of men and material, was a principal factor in keeping the Confederacy alive Of an exalted character, Lee was idolized by his soldiers and the people of the South and soon won the admiration of the North He has remained a Southern ideal and an American hero The definitive biography, *R E Lee* (4 vols , 1934–35), is by Douglas Southall FREEMAN See also biographies by H. A White (1897), T N Page (1911), Gamaliel Bradford (1912), Sir Frederick Maurice (1925), J C Young (1929), W E Brooks (1932), and R W. Winston (1934), Capt R E Lee, *Recollections and Letters of General Robert E Lee* (2d ed., 1924), A. H. Burne, *Lee, Grant, and Sherman* (1939), Roy Meredith, *The Face of Robert E. Lee* (1947), S F Horn, ed , *The Robert E. Lee Reader* (1949)

Lee, Rooney. see LEE, WILLIAM HENRY FITZHUGH

Lee or Legh, Rowland (both lē), d 1543, English bishop. Educated at Cambridge, he received preferments under the patronage of Cardinal Wolsey and was employed by him in the suppression of the monasteries (1528–29). He was greatly esteemed by Henry VIII and supposedly celebrated Henry's marriage to Anne Boleyn (1533) Made bishop of Chester (1534), he was one of the first to take the oath of supremacy recognizing Henry as head of the Church

Lee, Sir Sidney, 1859–1926, English editor and author He succeeded Sir Leslie Stephen as editor of the *Dictionary of National Biography* in 1891 His *Life of William Shakespeare* (1898) is a standard work which has passed through many editions. Both this and *Queen Victoria* (1902) are enlargements of his work for the *Dictionary* Lee also wrote *Shakespeare and the Modern Stage* (1906) He was knighted in 1911

Lee, William, 1739–95, American Revolutionary diplomat, b "Stratford," Westmoreland co , Va , brother of Arthur, Francis L , and Richard H Lee He opened a business house in London in 1768 and later was a political supporter of John Wilkes and became (1775) an alderman of London He accepted appointment by the Continental Congress as a diplomatic agent for the newborn United States, but was unable to obtain support from either Austria or Prussia He and an unauthorized Dutchman made a draft of a possible U S –Dutch treaty This, which had no official sanction at all, Lee sent back to America A copy of it, seized by the British when they captured Henry Laurens, was used as a cause for warfare between Great Britain and the Netherlands See W C Ford, ed , *Letters of William Lee* (3 vols , 1891), B J Hendrick, *The Lees of Virginia* (1935)

Lee, William Henry Fitzhugh, known as **Rooney Lee,** 1837–91, Confederate cavalry general, b Arlington, near Alexandria, Va , son of Robert E Lee He entered Harvard in 1854 but left in 1857 when Gen W S Scott secured him a commission in the infantry After serving under A S Johnston in the "Mormon War," he resigned (1859) and lived at "White House," his Virginia plantation, until the Civil War Like his cousin Fitzhugh LEE, Rooney saw most of his service in J E B Stuart's cavalry Wounded at Brandy Station in June, 1863, he was subsequently captured by the Federals Upon his exchange in March, 1864, he was promoted major general and served creditably till the end of the war From 1887 Lee was a Democratic Representative in Congress See D S Freeman, *Lee's Lieutenants* (3 vols , 1942–44)

Lee, town (pop 4,222), W Mass , in the Berkshires, on the Housatonic and S of Pittsfield, settled 1760, set off from Great Barrington and Washington 1777 It has paper mills and marble quarries

Leech, John, 1817–64, English caricaturist and illustrator, educated at Charterhouse with his friend Thackeray He studied medicine but soon abandoned it for art His first work appeared under the title *Etchings and Sketchings of A Pen, Esq* (1835) and was followed by drawings for Robert Bell's *Life in London* (1822) From 1841 until his death, Leech was associated with *Punch* His many brilliant social and political cartoons for this magazine were published separately as *Pictures of Life and Character* and *Pencilings from Punch* He also contributed to *Once a Week* and the *Illustrated London News*, and he illustrated Dickens's *Christmas Stories*, Gilbert A Beckett's *Comic History of England* and *Comic History of Rome*, the sporting novels of R S Surtees, and S R Hole's *Little Tour in Ireland* See biographies by F G Kitton (1883) and W P Frith (2 vols , 1891)

leech, annelid worm with a cylindrical or slightly flattened body, the segments of which are divided externally by secondary rings There is a suction disk at each end of the body The anterior one surrounds the mouth Leeches are found in temperate and tropical regions, chiefly in fresh water Some are land and a few are marine forms Most leeches are bloodsuckers Various species are temporary or permanent external or internal parasites of man, horses, cattle, fish, and mollusks The medicinal leech of the genus *Hirudo* is widely distributed in fresh water Its triple jaws inflict a three-parted bite It releases a glandular secretion containing hirudin which delays the clotting of the victim's blood It has internal pouches for storing enough blood to last for a number of months For many years physicians used leeches to bleed patients suffering from almost any ailment Occasionally one is used now to remove a small amount of blood from an injured region In countries of the E Mediterranean region, humans and animals sometimes become infested with small leeches which enter the body in drinking water and become parasites in the mouth or respiratory passages

Leechburg, industrial borough (pop. 4,275), W Pa , NE of Pittsburgh, laid out 1828, inc. 1850 Strip steel is manufactured, and coal is mined here.

leechee: see LITCHI.

Leech Lake, large lake, N central Minn , SE of Bemidji, with an irregular shore line and lying mainly within the Leech Lake Indian Reservation.

Leeds, county borough (1931 pop. 482,809; 1947 estimated pop 498,650) and city, West Riding of Yorkshire, England, in the Aire valley To the west and south lies one of the leading manufacturing regions of England, centered at Bradford, Halifax, and Wakefield, and an agricultural region is north and east of the city Leeds is "capital" of the industrial district and an important junction of transportation routes, both rail and water—canal and river connect the city with both east and west coasts Manufactures include woolen goods (produced since the 14th cent), clothing, metal goods—locomotives, machinery, farm implements, and airplane parts—leather goods, chemicals, and glass Color printing and art work are important Yorkshire College founded here in 1874, became in 1887 a constituent college of Victoria Univ and in 1904 the independent Univ of Leeds Leeds has a Corinthian town hall (1858) wherein are held triennial musical festivals, of interest also are St. Peter's Church, the Cathedral of St Anne, St John's Church, the Coliseum, and museums Kirkstall Abbey, founded in 1152, is near the city Joseph Priestley was pastor at Mill Hill Chapel, a library is dedicated to him Extensive slum-clearance and rehousing schemes have been successfully carried out since 1920 See J S Fletcher, *Leeds* (1919)

Leeds, city (pop 2,910), N central Ala , just E of Birmingham, in a mine and quarry area, founded 1881 It has a large cement plant

Leek, urban district (1931 pop 18,567; 1943 estimated pop 19,500), Staffordshire, England, near the Churnet, in an agricultural region It has silk textile manufactures The parish church has four Saxon crosses Ruins of Dieulacresse or De la Croix, a Cistercian abbey founded in 1214, are near by

leek, hardy biennial garden plant (*Allium porrum*), related to the chive and onion In cultivation it is treated as an annual, and the leafstalk and basal leaves are blanched, like celery Though not much grown in America, the leek is a popular vegetable in the British Isles and elsewhere in Europe The whole plant is edible and of a milder flavor than the onion It is used in soups and stews—a favorite Scottish dish is cocka-leekie—and is also served like asparagus It was cultivated in Egypt in the time of the Pharaohs and probably came to England by way of the Romans It is a national emblem of the Welsh, who adorn their hats with its leaves on St David's Day. Leeks, shallots, and onions are sometimes called scallions The wild leek (*Allium tricoccum*) is a broad-leaved North American species found in woodlands from Minnesota eastward

Lee Mansion National Memorial, N Va , across the Potomac from Washington, D C , in Arlington National Cemetery Formerly named Arlington House, it was the home of Robert E Lee, inherited by his wife, the daughter of George Washington Parke Custis It was abandoned by the Lees early in the Civil War and after the first battle of Bull Run was used as a field hospital The Federal government seized the estate (1,100 acres) in 1864, but in 1883 paid Lee's son, G W. C Lee, the rightful heir, $150,000 for it The house and the land immediately around it were made a national memorial in 1925

Lee of Fareham, Arthur Hamilton Lee, 1st Viscount (fā'rŭm), 1868–1947, English soldier and statesman He was from 1900 to 1918 a Conservative member of the House of Commons In the First World War, Lee was made military secretary to Lloyd George (1916) and director general of food production (1917–18) He was later minister of agriculture, first lord of the admiralty, a member of the imperial cabinet, and a delegate to the Washington Conference (1921–22) In 1921 he presented his estate, "Chequers," to the nation as country residence for the prime minister

Leerdam (lārdăm'), municipality (pop 9,781), South Holland prov., W Netherlands, S of Utrecht. It is famous for its glass and ceramics manufactures.

Leesburg. 1 City (pop. 4,687), N central Fla , between Harris and Griffin lakes in the beautiful hill and lake region; settled 1856, inc 1875. It is a processing and shipping center in a productive fruit and truck area. There is an annual freshwater-bass tournament here. 2 Town (pop 1,698), N Va., NW of Washington, D C ; settled 1749, inc 1758. It is in an area noted for purebred cattle and horses The courthouse of Loudoun co. is here Near by was fought the Civil War battle of Balls Bluff.

Lees Summit, city (pop 2,263), W Mo., near Kansas City; laid out 1865. It is the center of a farming and dairying region.

Leesville (lēz'vĭl). 1 Town (pop. 2,329), parish seat of Vernon parish, W La , E of the Sabine river, in a lumber and stock-raising area; inc. 1899. Near by are a state park and a national forest. 2 Town (pop. 1,217), W central S.C., WSW of Columbia, in a farm area.

Leetonia, village (pop. 2,259), NE Ohio, S of Youngstown; laid out 1866 There are coal mines here.

Leetsdale, residential borough (pop 2,332), SW Pa , on the Ohio and c 15 mi. NW of Pittsburgh; settled 1796, inc 1904. Steel products are made here.

Leeuwarden (lā'vär"dŭn), Frisian *Leeuwert* (lā'-vĕrt"), municipality (pop 75,864), capital of Friesland prov , N Netherlands. The center of an agricultural and dairying district, it has an important cattle market and manufactures clothing and artificial silk Chartered in 1435, Leeuwarden was (16th–18th cent) a center of gold working and silver working. There are many buildings dating from the 16th and 17th cent , notably the chancellery An 18th-century mansion houses the Frisian museum

Leeuwenhoek, Antony van (ān'tōnē vän lā'vŭn-hōōk"), 1632–1723, Dutch student of natural history and maker of microscopes, b Delft He was apprenticed to a draper at Amsterdam, where his use of lenses in examining cloth probably led to his interest in lens making He assembled over 247 microscopes, some of which magnified objects 270 times He gave the first complete description of red blood cells and was the first to see protozoa and bacteria His work gained recognition in his lifetime, and he was made a member of the Royal Society of England See his *Collected Letters* (Part I, 1939), study by Clifford Dobell (1932)

Leeuwin, Cape (lōō'ĭn), southwestern extremity of Australia, in the Indian Ocean, notable for the treacherous waters around it

Leeward Islands (lōō'ŭrd, lū'-, lē'-), northern group of the Lesser Antilles in the West Indies, extending SE from Puerto Rico to the Windward Islands The principal islands are the Virgin Islands of the United States, the French island of Guadeloupe and its dependencies, the Dutch islands of Saint Eustatius and Saba, the jointly owned Saint Martin, and the British Leeward Islands colony (c 422 sq mi , pop 108,812), grouped into the presidencies of Antigua, Saint Kitts-Nevis, Montserrat, and the British Virgin Islands In the British colony, the central government of the presidencies is headed by a governor, a federal executive council, and general legislative council Volcanic in origin and mountainous, nearly all the Leeward Islands have lush, subtropical vegetation, rich soil, and abundant rainfall The warm, delightful climate is tempered by the surrounding water so that there is little variation in temperature Products for the most part are agricultural—fruits and vegetables (limes and lime juice, oranges, mangoes, coconuts, tomatoes, and onions), sugar, cotton, coffee, and tobacco Although the population varies from island to island, in general the Negro predominates, the white is of French or English descent After Columbus discovered the Leeward Islands in 1493, settlement did not begin until the British arrived in the 17th cent Sir Thomas Warner, sent to St Kitts in 1623, was made governor general of the yet uncolonized neighboring islands (Nevis, Antigua, Montserrat, and Barbuda), and in the same year the Frenchman, Esnambuc, also established a colony on St Kitts By 1632, when the English had settled the neighboring islands, the sharp, three-cornered colonial conflict of England, France, and Spain had begun The Spanish were forced from the struggle But for nearly two centuries afterwards the islands were pawns in the Anglo-French world-wide wars, they changed hands with each fresh attack by British or French forces and were reshuffled in ownership whenever a new treaty was signed Their final disposition did not come until the end of the Napoleonic Wars in 1815 See the current *West Indies Yearbook*, T R St Johnston, *From a Colonial Governor's Notebook* (1936)

Le Fanu, Joseph Sheridan (lĕ'fănū'), 1814–73, Irish novelist and journalist, educated at Trinity College, Dublin. In 1839 he began issuing his own paper, the *Evening Mail*, which voiced his own Conservative views He became editor of the *Dublin University Magazine* in 1869 He wrote several ballads and other verse, but it was for his stories of mystery and terror that he was best known Of these, *Uncle Silas* (1864) is generally considered the best. Others are *The House by the Churchyard* (1863), *In a Glass Darkly* (1872), containing his famous short story "The Watcher", and *The Purcell Papers* (pub. posthumously, 1880)

Lefebvre, Jules Joseph (shül'zhōzĕf'lufĕ'vrŭ) 1836–1912, French figure painter, long a popular instructor at Julien's academy in Paris He won many official honors in his day His work is to be seen in the Luxembourg Museum and the École des Beaux-Arts, Paris, and in the Metropolitan Museum and the St Louis Museum

Lefebvre, Pierre François Joseph (pyĕr'frāswä'), 1755–1820, marshal of France. He rose from the ranks in the French Revolutionary Wars and distinguished himself under Napoleon, who created him duke of Dansig His wife, who had been a washerwoman, caused some sensation through her unconventional manners and is the heroine of Sardou's play, *Madame Sans-Gêne.*

Lefèvre d'Étaples, Jacques: see Faber Stapulensis, Jacobus.

Lefkosha, Cyprus: see Nicosia.

Lefort, François (frāswä' lŭfôr'), 1656–99, Swiss soldier of fortune in Russian service, b. Geneva. He was one of the early boon companions of Peter I (Peter the Great) and remained Peter's favorite until his death A drunkard and a debauchee, Lefort nevertheless implanted serious ambitions into Peter's mind. He advised Peter's attack on Asov, helping in its capture (1696) and counseled Peter's apprenticeship abroad. Made a general and an admiral, Lefort was instrumental in the reorganization of the Russian army and the creation of the Russian navy

Lefroy, Harold Maxwell (lŭfroi'), 1877–1925, English entomologist, educated at Cambridge He is noted for his work on the economic importance and control of insects, especially those affecting the rice, silk, cotton, and tobacco industries His writings include *Indian Insect Pests* (1906), *Indian Insect Life* (with F M. Howlett, 1909), and *Manual of Entomology* (1923)

Lefroy, Mount (lŭfroi'), 11,230 ft high, on the British Columbia–Alberta border, in the Rocky Mts and on the west edge of Banff National Park.

left, in politics, the more radical wing in any legislative body or party The designation apparently came from the supposedly accidental grouping of the radicals in the National Assembly in France in 1789 to the left of the presiding officer, but there is some question as to whether this is the true origin of the word In the British Parliament the more radical members have sat to the left of the speaker since the 18th cent.

leg, that portion of a limb between the knee and the foot More loosely the term is applied to any appendage useful to an animal for support and locomotion In man and other bipeds, the leg is limited to the segment of the lower limb between the knee and ankle joints, the segment above the knee is described as the thigh, and the femur or thigh bone articulates at its upper end with the hip, forming the hip joint The bones of the leg are the tibia and the fibula. At its lower end the femur articulates with the upper end of the tibia, forming the knee joint, which is protected by the patella (kneecap), the tibia and the fibula both articulate with a bone of the foot (talus), thus forming the ankle joint In quadrupeds both fore and hind limbs are referred to as legs.

legacy (lĕ'gusē), bequest by WILL of personal property, similar in many respects to a GIFT *causa mortis* A legacy ordinarily is distinguished from a devise, which transfers real property by will The person who receives a legacy is called a legatee Legacies are of various types. A specific legacy bequeaths a designated object, e g , a named painting A general legacy is a sum of money to be paid out of any assets of the estate. The residuary legacy is all of the testator's personal property otherwise undistributed The debts of the estate take precedence over all legacies. Deficiencies are met first from the residuary legacy, then from general legacies, and last from the specific legacies

Le Gallienne, Eva (lu găl'yŭn), 1899–, American actress, producer, and manager, b. London, daughter of Richard Le Gallienne She made her debut at the Prince of Wales Theatre, London, in 1915 and the next year in New York. She first achieved distinction in Molnar's *Liliom* in 1921–22 and added to her stature in Gerhart Hauptmann's *Hannele* and in the dramas of Ibsen In 1926 she founded in New York the Civic Repertory Theatre, of which she was manager and director, producing among other plays *Cradle Song, Romeo and Juliet, The Cherry Orchard,* and *Alice in Wonderland* The work of this company ended in 1933 In 1946 she was a cofounder, with Margaret Webster, of the American Repertory Theatre, which presented the plays of Ibsen, Shaw, and others and dissolved in 1947 See her autobiography, *At 33* (1934)

Le Gallienne, Richard, 1866–1947, English journalist and man of letters Literary critic of the London *Star* (1891) and a contributor to the *Yellow Book*, he became a resident of the United States, where his daughter Eva Le Gallienne was born His works include *My Ladies' Sonnets* (1887), *The Quest of the Golden Girl* (1896), reminiscences, *Attitudes and Avowals* (1910), essays; *Vanishing Roads and Other Essays* (1915), *The Junk-Man and Other Poems* (1921), and later books of reminiscences, *The Romantic '90's* (1925), *From a Paris Garret* (1936), and *From a Paris Scrapbook* (1938)

Legal Tender cases, lawsuits brought to the U S Supreme Court involving the constitutionality of the Legal Tender Act of 1862, which was passed to meet wartime currency needs. It authorised the issue of $150,000,000 in "United States notes" (see GREENBACK) without any reserve or specie basis. The notes ($432,000,000 had been issued by the end of the war) depreciated in terms of gold and became the subject of argument, particularly because debts contracted earlier could be paid in this cheaper currency. Many cases concerning the greenbacks were entered in the courts. The Supreme Court decided certain of them in 1868 without passing on the question of constitutionality In *Hepburn* vs. *Griswold* (1870), Chief Justice S. P. Chase declared the act unconstitutional; but with

changes in its membership, the court reversed its decision and the act was held valid in *Knox* vs. *Lee* and *Parker* vs *Davis* (1871). Its constitutionality was more widely sustained in *Juillard* vs. *Greenman* (1884). See GREENBACK PARTY

Legaré, Hugh Swinton (lŭgrē'), 1797–1843, American lawyer and statesman, b. Charleston, S C, grad South Carolina College (now the Univ. of South Carolina), 1814 He was admitted to the bar in 1822, served in the South Carolina legislature (1820–22, 1824–30), and was state attorney general (1830–32) He was a founder, editor (1828–32), and a chief contributor to the *Southern Review* From 1832 to 1836 he was chargé d'affaires at Brussels, where he furthered his studies in civil law In 1837 Legaré, who had been a strong opponent of nullification, was elected to Congress as a Union Democrat, but was not reelected because of his opposition to the sub-treasury project. He supported William Henry Harrison for President in 1840 and when, on Harrison's death, John Tyler succeeded to the office, Legaré became Attorney General (1841) He also became Secretary of State ad interim (1843) after Webster's resignation, but died two months later

Legaspi, Miguel López de. see LÓPEZ DE LEGASPI, MIGUEL.

Legaspi (lŭgä'spē, lāgä'–), town (pop 15,780), on SE Luzon, capital of Albay prov, Philippine Islands, on Albay Gulf It has an extensive trade in hemp and rice It was formerly known as Albay

legate (lĕ'gŭt), in Roman history, one sent to the provinces as a personal envoy of the emperor Many legates served as governors About the 12th cent the word came into use again to designate a papal ambassador extraordinary In time they became differentiated into *ablegati*, those sent on formal religious errands, e g, to bear the cardinal's hat to a newly elected member of the sacred college, and *legati a latere*, cardinals sent on political missions Later agents of lower rank than cardinal came to be known as *legati missi* These, when in permanent residence, were called nuncios or internuncios In modern times nuncios and internuncios have performed all the functions of legates

legation see DIPLOMATIC SERVICE and EXTERRITORIALITY

Legendre, Adrien Marie (ädrēĕ' märē' luzhä'drŭ), 1752–1833, French mathematician He is noted for his work on the theory of numbers, on which he wrote an essay (1798) and several supplements, all later incorporated in a definitive work *Théorie des nombres* (1830) The results of his long study of elliptic integrals appeared in *Traité des fonctions elliptiques* (3 vols, 1825–32) He invented independently of Gauss, and was the first to state in print (1806), the method of least squares, and he collaborated in drawing up centesimal trigonometric tables He taught at the École militaire, Paris, and at the École normale and was associated with the bureau of longitudes from 1812 His *Éléments de géométrie* (1794, Eng tr, 1867) was an influential textbook

Léger, Alexis Saint-Léger (älĕksēs' sĕ-lāzhä' lāzhā'), pseud **St-J Perse**, 1887, French poet and statesman, b West Indies Educated in France, he entered the foreign service in 1914 He spent the years 1917–21 in Peking and acted as expert on Far Eastern affairs at the Washington Conference (1921–22) on naval armaments He was Briand's aid in negotiations leading to the Locarno Pact and the Kellogg-Briand Pact and in 1933 became general secretary of the ministry of foreign affairs He had violently opposed appeasement, and when France fell in 1940 he came to America. The poetry published under his pseudonym is slight in volume, but many critics consider him the greatest French poet of his age Sometimes obscure, it is rich in imagery, virile, and superbly skillful in the use of words Most of his work has been translated—*Éloges* (1910, Eng tr, 1944), *Anabase* (1924, Eng. tr by T S Eliot, *Anabasis*, 1930), and *Exil* (1942, Eng tr, *Exile*, 1949).

Léger, Fernand (fĕrnä' lāzhä'), 1881–, French painter, studied under Gérôme at the École des Beaux-Arts He was first widely known for his cubist paintings in 1910, and a modified cubism is apparent in most of his subsequent work. A highly individual painter, Léger celebrates the machine in a dynamic style characterized by the use of flat tones of pure color, black, white, and gray He has been a popular teacher of painting both in Paris and in New York, where he spent the years 1941–46. His compositions are in leading galleries of contemporary painting everywhere

Leggett, William (lĕ'gĭt), 1801–39, American editor and author, b New York city He wrote the poems *Leisure Hours at Sea* (1825) while serving in the navy and in 1828 established a weekly, the *Critic*, which he wrote almost singlehanded He became part owner and associate editor (1829–36) of the New York *Evening Post*, under William Cullen Bryant, and his thorough-going Jacksonian principles made him spokesman of the radical Democrats. He was appointed diplomatic agent to Guatemala, but died before sailing. A collection of his political writings appeared in 1840.

Legh, Rowland: see LEE, ROWLAND.

Leghorn (lĕg'hôrn), Ital. *Livorno* (lēvôr'nō), city (pop. 109,188), capital of Livorno prov, Tuscany, central Italy. It is, after Genoa and Naples, the most important port on the west coast of Italy and a busy commercial center Wine, olive oil, textiles, borax, and marble are exported. Leghorn is the seat of the Italian naval academy and has an arsenal, shipyards, foundries, and other industries It was a mere fortified castle in the Middle Ages The Medici developed it into a flourishing town, and in 1590 Ferdinand I, grand duke of Tuscany, made it a free port and opened it to all religious and political refugees In the Second World War it suffered very severely; the cathedral was damaged beyond repair, as was the synagogue (1591) Shelley wrote *The Cenci* at Leghorn.

legion, large unit of the Roman army The legions varied greatly in size at different times, but in Caesar's day each legion generally had from 3,000 to 6,000 men The average legion in later times had about 3,000 heavy infantrymen, about 1,200 light infantrymen, and 300 cavalrymen The legion was divided into 10 cohorts, and the cohorts were divided into centuries (theoretically 100 men each) In Caesar's time each legion had six tribunes, a legate (an office set up by Caesar), a prefect, and some 60 centurions Originally the Roman army was a militia, later it was made up of Roman citizens, and finally it was composed of professional soldiers, largely recruited from the provinces After their years of service were done, the soldiers were retired with grants of land Training was hard, with much difficult drilling to prepare the men especially for shock tactics and for rapid marches They carried not only armor and weapons but also provisions and some equipment for setting up field camps The standard weapons were the spear (*pilum*) and (after Scipio Africanus Major conquered Spain) the sword Their characteristic emblems were the eagles inscribed SPQR [*Senatus Populusque Romanus*, the Senate and the people of Rome], and they carried the eagles in triumph over the far reaches of the empire for hundreds of years The glory of Rome to a large extent rested upon them The legions were primarily heavy infantry, and they were vulnerable chiefly to quickly moving cavalry and archers (e g, the defeat of M Lucinius Crassus at Carrhae) and to guerrilla fighters (e g, the famous defeat of Varus by the Germans) After the Germanic invasions had begun, the Roman army was more and more staffed with Germans The legions proved unable to match the barbarian horsemen and disappeared

Legion of Honor see DECORATIONS, CIVIL AND MILITARY

legislature (lĕ'jĭslā"chŭr), representative assembly empowered to enact STATUTE law The term is equally applicable to national, state, and local bodies although usages vary, e g, a municipal legislature may be called a board of aldermen or a city council Legislatures are a modern development The popular assemblies of the Greek city-states or of early Rome were not legislatures in that the citizens, instead of being represented by a small percentage of their number, sat (or could sit) in person Local popular assemblies (*Landsgemeinden*) are still found in Switzerland, and the New England town meeting has this democratic character In lay terminology the word *legislature* is often extended to such popular assemblies The first modern legislature to become prominent, the British PARLIAMENT, originally was not elective but consisted of selected representatives of the clergy, the nobility, and the bourgeoisie Somewhat similar in the type of representation was the French STATES-GENERAL, which adopted the practice of having a separate body for each estate (see ESTATE, in constitutional law) The legislature of the Holy Roman Empire is usually called in English the DIET (the usual name for several modern legislatures, e g, the Finnish and the Japanese) Out of the estates arose the typical BICAMERAL SYSTEM, with the upper house representing the nobility and clergy and the lower house the bourgeoisie The CONGRESS OF THE UNITED STATES and the American state legislatures (except Nebraska since 1937) are bicameral However, in the United States, as in most modern countries, the two houses do not reflect differences of social status, and the members of both houses are elected by all the citizens Some of the modern national legislatures are the ALTHING (Iceland), the *Bundes-Versammlung* (Switzerland), the CORTES (Spain), the Knesset (Israel), the Legislative Yuan (China), the Majlis (Iran), the Oireachtas (Ireland, see DÁIL ÉIREANN), the REICHSTAG (Germany), the RIGSDAG (Denmark), the RIKSDAG (Sweden), the States-General (Netherlands), the STORTING (Norway), and the Supreme Soviet (USSR; the national legislatures of some other Communist nations have similar names) The legislative bodies of the members of the British Commonwealth of Nations are called Parliaments, and the legislatures of the Latin American countries are usually called congresses or national congress in English The term *parliament* is often applied in English to national legislatures without regard to the official designation. See Robert Luce, *Legislative Assemblies* (1924), F G Crawford, *State Government* (1931), Council of State Governments, *Our State Legislatures* (1948)

legitimation, the act of giving to a child whose parents were not married at the time the child was born the status of legitimacy This is accomplished by the subsequent marriage of the parents Under the common law, legitimation by this process was not allowed, although this rule came under the displeasure of the church It was not until 1926 that a statute was passed in England allowing legitimation by subsequent marriage In the United States legitimation by subsequent marriage is the general rule In some states there are, moreover, special judicial proceedings for the legitimation of a child In other states one or both of the parents may adopt the child. See BASTARD and ILLEGITIMACY

Legnano (lānyä'nō), city (pop 31,959), N Italy, NW of Milan It is an important industrial center Near here in 1176 the Lombard League decisively defeated Emperor FREDERICK I

Legnica, Lower Silesia see LIEGNITZ

Legros, Alphonse (älfôs' lŭgrō'), 1837–1911, French etcher, painter, and sculptor In 1857 he exhibited in the Salon a portrait of his father (Toulouse) He moved to England in 1863, and as professor of fine arts at the Slade School of Art, London, he exercised a healthy and stimulating influence He painted portraits, religious subjects, and peasant scenes Legros is represented in the Luxembourg Museum, Paris, the Tate Gallery, London, and the Metropolitan Museum

Leguía, Augusto Bernardino (ougōs'tō bĕrnärdē'nō lāgē'ä), 1863–1932, president of Peru (1908–12, 1919–30) In his second administration (1920), expanded and developed Lima, and considerably modernized his country, but increased the national debt and suppressed all opposition harshly In 1929 the long-drawn-out TACNA-ARICA CONTROVERSY with Chile was terminated, and Leguía was bitterly criticized for accepting the compromise Coupled with the economic depression, his financial dealings, and his harsh rule, the reaction brought about his overthrow He was charged with misappropriating government funds and imprisoned

legume (lĕ'gūm, lĭgūm'), common name for the large pulse family (Leguminosae) of flowering plants, which is next in importance to the grasses The fruit, also called a legume, is a POD Among the common legumes are peas, beans, typical clovers, the honey locusts and acacias, the wisteria, and the laburnum In agriculture, various legumes are used as green manures—they are the only class of plants which increase the nitrogen of the soil The group also contains poisonous weeds, such as the loco weeds and wild lupines, dye plants, such as genista, and ornamental garden plants such as the sweet pea and the lupine The word is often used in the plural for vegetables in general

Leh (lā), town (pop 3,372), E Kashmir state, India It is at an altitude of c 11,500 ft Buildings include the palace of the former rulers of W Tibet and a Lamaist monastery Much of the trade between India and Tibet passes through Leh

Lehabim (lēhā'bĭm), African people, perhaps the same as the LUBIM Gen 10 13 (=1 Chron 1 11)

Lehar, Franz (frants' lā'här), Hung *Lehár Ferenc* (lĕ'här fĕ'rĕnts), 1870–1948, composer of operettas He was born in Komarno (then in Hungary), studied (1882–88) at the Prague Conservatory, and later became a citizen of Czechoslovakia, although after 1889 he lived in Vienna His first operetta, *Wiener Frauen* (Vienna, 1902), was successful enough that he could thereafter devote himself entirely to composition He wrote one opera and some orchestral music, but his operettas overshadowed his other works *Die lustige Witwe* (*The Merry Widow*, Vienna, 1905), his outstanding work, had international success

Lehi (lē'hī) [Heb, =jawbone], place, SW Palestine, where Samson slew the Philistines with the jawbone of an ass Judges 15 9–20

Lehi (lē'hī), city (pop 2,733), N central Utah, in the valley of Utah Lake S of Salt Lake City, settled 1850 by Mormons inc 1852 Fields watered from Utah Lake and now also by the Provo river project yield alfalfa and beets (for a sugar refinery opened in 1890) Clay products are made

Lehigh (lē'hī), town (pop 1,004), central Iowa, just SE of Fort Dodge and on the Des Moines river, in a clay and farm area, settled in the early 1850s

Lehigh, river rising in NE Pennsylvania and flowing south, with a wide bend west, 103 mi past Mauch Chunk, Allentown, Bethlehem, and many smaller places to the Delaware river at Easton Its valley, of great natural beauty, has rich coal mines and industrial towns

Lehighton (lē'hī'tun), industrial borough (pop. 6,615), E Pa, on the Lehigh river and NNW of Allentown, laid out c 1805, inc 1866. It has textile mills Molding sand, used for pipe and machinery castings, is dug on the river flat

Lehigh University, at Bethlehem, Pa.; nonsectarian, mainly for men, chartered and opened 1866 by Asa Packer. It stresses engineering (with a fine li-

brary), but also has colleges of arts and science and business administration

Lehman, Herbert Henry (lē'mŭn), 1878–, American statesman, b New York city, grad Williams, 1899 At first an executive of a textile firm, he became (1908) a partner in the banking house of Lehman Brothers—originally a cotton-brokerage firm but later the bank for some of the largest businesses in the country. In the First World War he was special adviser to the Secretary of War and was assistant director of purchase, storage, and traffic of the U S army. He was finance chairman of the Democratic National Committee in 1928, the year he was elected lieutenant governor of New York state In 1932 Lehman was elected governor of the state, succeeding Franklin D Roosevelt He was later reelected In the course of Lehman's gubernatorial administrations, state income taxes were cut, a budgetary surplus of $92,000,000 was accumulated, and much liberal legislation was enacted He refused to run again in 1942, and Thomas E Dewey was elected to succeed him Lehman was appointed (1943) director of the United Nations Relief and Rehabilitation Administration, but resigned (1946) because of ill-health In a special senatorial election in 1949, he defeated John Foster Dulles to fill the unexpired term of Robert F Wagner.

Lehman Caves National Monument see National parks and monuments (table)

Lehmann, Lilli (lĭ'mən), 1848–1929, German operatic soprano She made her debut in 1865 in Prague and in 1870 joined the Royal Opera, Berlin In 1876 she sang in the first Bayreuth Festival, having been coached in several roles by Wagner She was a member of the Metropolitan Opera Company, New York, from 1885 until 1890, there her true stature as one of the greatest singers of her time was realized While most famous as a Wagnerian singer, she knew 170 roles and actually began her career as a coloratura She was also a lieder singer and a great teacher, Olive Fremstad and Geraldine Farrar being among her pupils Her *Meine Gesangskunst* was translated by Richard Aldrich as *How to Sing* (1902) See her autobiography (Eng tr, 1914)

Lehmann, Lotte (lä'mən, Ger lā'mən), 1888–, German-American soprano, studied at the Berlin State Conservatory She made her debut in 1910 in Hamburg and was a member (1914–38) of the Vienna State Opera In 1922 she sang in South America Her North American debut was in Chicago as Sieglinde in *Die Walkure* in 1930 She sang from 1934 to 1946 with the Metropolitan Opera Company In 1945 she became a U S citizen She wrote *Eternal Flight* (Eng tr, 1938), a novel, her autobiography, *Midway in My Song* (Eng tr, 1938), *More than Singing* (Eng tr, 1945), discussing her song repertoire, and *My Many Lives* (Eng tr, 1948), discussing her operatic roles

Lehmbruck, Wilhelm (vĭl'hĕlm lām'brōōk), 1881–1919, German sculptor, studied at Düsseldorf His early work was neoclassic, later he was influenced by Aristide Maillol Most of his figures, often with a Gothic elongation, are female nudes His *Kneeling Woman* (Mus of Modern Art, New York) is generally considered his best work Although Lehmbruck died at 38, by suicide, his influence on later sculptors was marked

Leibl, Wilhelm (vĭl'hĕlm lī'bul), 1844–1900, German genre and portrait painter, studied in Munich During most of his life he lived as a Bavarian peasant and painted the familiar scenes and types about him His earlier works reflect the influence of the Dutch and French realists, but he gradually developed an original, intensely realistic style, characterized by robustness, superb color, and a brilliant and facile technique Despite his secluded life, Leibl's influence upon modern realistic painting was wide His works were in many German galleries, *Peasant Girl with a White Head-Cloth* is in the Metropolitan Museum

Leibniz or **Leibnitz, Gottfried Wilhelm, Baron von** (both gŏt'frēt vĭl'hĕlm bärōn'lĭp'nĭts), 1646–1716, German philosopher and mathematician He was active in the physical sciences, history, law, diplomacy, and other fields After studying at Leipzig, his native city, and at Jena, he became a doctor of law (1666) at Altdorf He declined a professorship in law to enter the diplomatic service of the archbishop of Mainz and was in Paris from 1672 until 1676 to promote German interests at the court of Louis XIV While there he met among other intellectuals Christiaan Huygens and Malebranche He developed (1675–76) the infinitesimal calculus without knowledge of Newton's earlier unpublished work Leibniz's calculus was published in 1684, nine years before Newton's, using the notation later adopted universally In 1676 he visited Spinoza in Holland and then went to Hanover as privy councilor, librarian, and historian to the duke of Brunswick Through the house of Brunswick he came into contact with the king of Prussia, to whom he suggested the establishment of an academy of science in Berlin Leibniz became the first president (1700) of the academy At the request of the queen of Prussia he wrote a systematic discussion of his philosophy, *Essais de Théodicée sur le bonté de Dieu, la liberté de l'homme, et l'origine du mal* (1710), which he followed with the *Monadology* (1714; Eng. tr, 1890) and the *Principles of Nature and Grace* (1714, Eng tr, 1890) A large part of the philosophy of Leibniz is contained in letters and essays, many of which were overlooked by commentaries for years because Leibniz himself gave them no publicity Some of the letters disclosed in 1903 present aspects of his philosophy which contradict the published portions Leibniz's philosophy differed from that of Descartes and Spinoza initially in that Leibniz held that extension cannot be an attribute of substance, since extension implies plurality It follows that the attribute of substance is thought or force He conceived of an infinite group of souls, which he called monads These monads cannot interact, since substance cannot interact They are, therefore, windowless. To account for perception Leibniz held that each monad reflected the universe in itself Through the principle of preestablished harmony of sensation and development, interaction among monads seems to occur The relative positions of monads also makes perception possible and forms the basis for scientific objectivity There was, for Leibniz, a hierarchy of monads in ascending order according to the clearness with which each reflected the universe Thus, in the human body there was one dominant monad called the soul and many lower monads Leibniz maintained that man is free in that the compulsion of the preestablished plan makes him tend in a certain direction without forcing him This permission of free will is the source of evil and punishment God is the supreme monad who allows free will and still shapes the world as the best of all possible worlds, a view satirized by Voltaire Leibniz presented four closely reasoned arguments for the existence of God In the works he did not make public Leibniz proposed a theory of mathematical logic based on the proposition that every predicate is forever and always has been comprised in the subject This doctrine imposes on the world strict determinism in total contradiction of his notion of freedom of the will He further argued that logic determines only a basis of compatibility what does and what does not come into the realm of being Leibniz attempted to argue from logic to metaphysics, an exercise which was severely criticized by the empiricists See Bertrand Russell, *Critical Exposition of the Philosophy of Leibnitz* (1900) and *A History of Western Philosophy* (1945), G M Duncan, *The Philosophical Works of Leibnitz* (1908), J M Child, *The Early Mathematical Manuscripts of Leibniz* (1920), biography by H W Carr (1929)

Leicester, Robert Dudley, earl of (lĕ'stûr), 1532?–1588, English courtier and favorite of Queen Elizabeth Son of the duke of Northumberland, he was early brought into the society of Edward VI and Princess (later Queen) Elizabeth Knighted at an early age, Dudley married Amy Robsart in 1550 and received preferment from the crown Upon Edward's death (1553), he aided his father in the plot to place Lady Jane Grey upon the throne, was sent to the Tower, and condemned to death He was later released, pardoned, and, for military service in France, restored to his rights (perhaps through the intervention of Philip II) On the accession of Elizabeth (1558), Dudley was made master of the horse and later a privy councilor Within a year he was acknowledged as her favorite His wife's mysterious death in 1560 darkened his reputation, and Dudley undertook (1561) to gain power by proposing to Philip II of Spain to restore Catholicism in England By 1563 Elizabeth seems to have realized the impracticality of a possible marriage with Dudley, but her personal feeling toward him did not change She offered his hand to Mary Queen of Scots and, to facilitate this scheme, created him earl of Leicester (1564), but the plan was halted by Mary's marriage to Lord Darnley Leicester married secretly in 1573 and in 1578 (bigamously) wed the countess of Essex, an act that led to a temporary estrangement from Elizabeth From c 1564 Leicester was leader at court of the Puritan party, which desired war with Spain In 1585 he was named commander of an unsuccessful expedition to the Low Countries, where he accepted the title of governor, enraging Elizabeth at his presumption He returned to England, was sent again to the Low Countries, and finally recalled in 1587 Upon the approach of the Spanish Armada (1588), Leicester was appointed captain general of the armies Leicester was a patron of letters and the drama The first royal patent for actors was granted to his company

Leicester, Robert Sidney, earl of, 1563–1626, English soldier and man of affairs. He was a younger brother of Sir Philip Sidney and nephew and heir of Robert Dudley, under whose command he fought in the Low Countries. Long a member of Parliament, he carried Elizabeth's thanks to James VI of Scotland for his help in defeating the Spanish Armada Sidney became (1618) earl of Leicester after James's accession to the English throne as James I His later years were spent as a sponsor of colonial exploration in North America and India and as a patron of music and literature

Leicester, county, England: see Leicestershire.

Leicester (lĕs'tûr), county borough (1931 pop. 239,169; 1947 estimated pop, 280,170) and city, co seat of Leicestershire, England. It is the Ratae Coritanorum, or Ratae, of the Romans, whose Fosse Way passed the town It was also a town of the ancient Britons and was one of the Five Boroughs of the Danes. Its antiquities include an artificial mound (site of an ancient castle), the Jewry Wall, a Roman structure 20 ft high and 75 ft long (near which extensive Roman remains have been found, including a forum with basilica and courtyard); remains of the ancient Norman castle in whose banquet hall county assizes are now held, ruins of an abbey founded in 1143, in which Cardinal Wolsey died in 1530, and two city gates Several of the churches (St Nicholas, St Mary de Castro, and All Saints) show Roman or Norman work, and Trinity Hospital is a 14th-century foundation Richard III stayed in Leicester the night before he was killed in the battle of Bosworth Field, his body was brought back to Leicester for burial In the civil war the town was twice besieged It was of industrial importance as early as the 14th cent, the making of hosiery and shoes are old-established industries, it also makes chemicals, aniline dyes, textiles and textile machinery, and light-metal products The University College was founded in 1921

Leicester, town (pop 4,851), central Mass, W of Worcester, settled 1713, inc 1722

Leicester of Holkham, Thomas William Coke, earl of (kōōk, hōl'kum), 1752–1842, English politician and agriculturist For over 50 years he represented Norfolk in Parliament By developing his country estate and improving breeds of cattle, sheep, and hogs, he led many to try more scientific farming See A M D Stirling, *Coke of Norfolk and His Friends* (1907)

Leicester sheep, breed of sheep originated in Leicestershire, England, by Robert Bakewell One of the first to employ scientific breeding principles, Bakewell developed the English Leicester sheep, from native stock, as mutton producers Both sexes are polled and the face and legs are white-haired The wool hangs in curls and is medium long and fine The sheep were important for cross-breeding in the development of long-wool and many medium-wool breeds The other Leicester strain is the Border Leicester originated in the border country of England and Scotland partially from English Leicester stock English Leicesters were brought to the United States in colonial times, these and crosses between the two strains are bred in small numbers in parts of the N United States In Canada the Border Leicesters are more numerous than the English

Leicestershire (lĕ'stûrshĭr) or **Leicester,** inland county (832 sq mi, 1931 pop 541,861, 1948 estimated pop 618,100), central England The county town is Leicester The terrain is undulating, and the principal rivers are the Soar and the Wreak Leicestershire is primarily an agricultural and pastoral county (sheep grazing and cattle breeding) Stilton cheese is a well-known dairy product of the region Leicester is one of the great industrial cities of England and the center of the boot and shoe industry Melton Mowbray and Market Harborough are famous fox-hunting centers A part of the Anglo-Saxon kingdom of Mercia, Leicestershire was organized as a shire by the 10th cent At Bosworth, in 1485, Richard III was slain by the forces of Henry Tudor, earl of Richmond, who ascended the throne as Henry VII See Arthur Mee, *Leicestershire and Rutland* (1937).

Leichhardt, Friedrich Wilhelm Ludwig (frē'drĭkh vĭl'hĕlm lōōd'vĭkh lĭkh'härt), 1813–1848?, Prussian explorer in Australia He led an expedition from Moreton Bay to Port Essington (1844–45) and in 1848 set out from Moreton Bay to cross the central part of the continent east to west After sending a message from Macpherson's Station, on the Cogoon river, he disappeared No trace of him has ever been discovered He wrote *Journal of an Overland Expedition in Australia from Moreton Bay to Port Essington* (1847)

Leiden or **Leyden** (both lī'dŭn), municipality (pop 86,451), South Holland prov, W Netherlands, on the Old Rhine river, NE of The Hague Though it has important textile, machinery, and other manufactures, it is famed chiefly for its university, founded in 1575, which is the oldest in the Netherlands and one of the most famous in the world In the 17th and 18th cent the Univ of Leiden was celebrated both as a center of Protestant theological learning and of science and medicine The Leyden jar was invented here, and Boerhaave taught here Leiden was equally famous as a printing center after the Elzevir family established its press here in 1580 Dating from Roman times, when its name was Lugdunum Batavorum, Leiden was important for its textile industry in the late Middle Ages and took a prominent part in the revolt of the Netherlands against Spanish rule. Besieged and reduced to famine in 1574, it was saved from surrender when William the Silent ordered the flooding of the surrounding land by cutting the dikes, thus enabling the fleet of the Beggars of the Sea (see Gueux) to sail to its relief across the

countryside. Leiden was for years the home of many of the Pilgrims before they embarked for America. It was the birthplace of John of Leiden and of the painters Jan van Goyen, Rembrandt, and Jan Steen. Leiden has two ancient churches, the Hoglandsche Kerk (15th cent.) and the Pieterskerk (14th cent.), an observatory, several museums, and many 17th-century houses.

Leidy, Joseph (lī'dĭ), 1823–91, American scientist, b. Philadelphia, grad. Univ. of Pennsylvania medical school. From 1853 he taught anatomy at his alma mater. He was also professor of natural history at Swarthmore College (1870–85) and served as chairman of the board of curators (1847–91) and president (1881–91) of the Academy of Natural Sciences of Philadelphia. He ranked among the foremost anatomists of the day, and his *Elementary Treatise on Human Anatomy* (1861) was long the best American textbook in the field. He studied the fossil beds in Nebraska and South Dakota and, later, in Wyoming and Oregon and classified the fossils collected by the F. V. Hayden survey. Three important monographs followed, *Ancient Fauna of Nebraska* (1853), *Extinct Mammalian Fauna of Dakota and Nebraska* (1869), and *Contributions to the Extinct Vertebrate Fauna of the Western Territories* (1873), all of them landmarks in American paleontology. He was the first to identify in the United States extinct species of the horse, camel, sloth, tiger, rhinoceros, and many other genera and species. His *Flora and Fauna within Living Animals* (1853) was epoch-making in the field of parasitology, and his *Fresh Water Rhizopods of North America* (1879), with his own notable drawings, is still one of the finest works in its field.

Leif Ericsson (lēf' ĕr'ĭksun), Old Norse *Leifr Eiriksson*, fl. 999–1000, Norse discoverer of America, b. probably in Iceland, son of ERIC THE RED. He spent his youth in Greenland and in 999 visited Norway, where he was converted to Christianity and was commissioned by King Olaf Tryggvason to carry the religion to Greenland. According to the "Saga of Eric the Red" in the collection of sagas known as *Hauksbok*, it was on the return voyage from Norway to Greenland in A.D. 1000 that Leif Ericsson, blown off his course, discovered hitherto unknown lands in which he found grapes, self-sown wheat, and a species of tree called "mausur." He landed, secured specimens of these things, and continued on to Greenland, where he was successful in introducing Christianity. In another version of the story, interpolated in the "Saga of Olaf Tryggvason" in the *Flateyjarbok*, Leif completed his mission to Greenland and from there set out, c. 1002, on a voyage to western lands, discovered several places, and settled for a winter in VINLAND. This account is much more detailed, but the first is more widely accepted. Many scholars believe that Leif Ericsson landed on some part of the North American coast, but there has been no agreement on the modern identity of Vinland. Various sites have been nominated, from Newfoundland to Virginia, with Nova Scotia and New England as favorites. For the sources, see A. M. Reeves, *The Finding of Wineland* (1890). See also Matthias Thordarson, *The Vinland Voyages* (1930), Edward Reman, *The Norse Discoveries and Explorations in America* (1949). For Norse colonization of North America, see THORFINN KARLSEFNI.

Leigh (lē), municipal borough (1931 pop. 45,317, 1947 estimated pop. 47,750), Lancashire, England, NE of Liverpool. It has coal mines, cotton and rayon mills, metalworks, and other manufactures.

Leigh-Mallory, George Herbert. see MALLORY, GEORGE HERBERT LEIGH.

Leighton, Clare (lā'tun), 1899–, English print maker, writer, and illustrator, studied at the Slade School of Art, London. She is probably best known for her fine woodcuts and engravings, but she has worked in many printing processes and is represented in leading print collections in England and America. She illustrated works by Hardy and the Brontës and wrote and illustrated *Wood-engraving and Woodcuts* (1932), *The Farmer's Year* (1933), *Southern Harvest* (1942), and other popular works.

Leighton, Frederick Leighton, Baron, 1830–96, English painter and sculptor. As a young man he lived abroad. His first exhibited picture, which showed Cimabue's *Madonna* being carried through the streets of Florence, was purchased by Queen Victoria in 1855. In 1860 he settled in England, where he enjoyed all official honors and was president of the Royal Academy from 1878 until his death. His popular pictures largely dealt with subjects taken from antiquity. Leighton was also known as a sculptor, muralist, and draughtsman. His work is characterized by erudition and polish. He is represented in many British galleries and in the Metropolitan Museum. See biographies by Ernest Rhys (3d ed., 1900), Mrs. Russell Barrington (1906), and J. E. Staley (1906), M. H. Shackford, *The Brownings and Leighton* (1942).

Leighton, Robert, 1611–84, Scottish prelate, M.A. Univ. of Edinburgh, 1631. After several years in France, where he seems to have developed an admiration for the Jansenists, he became (1641) a Presbyterian minister in Midlothian and signed the Covenant in 1643. A noted preacher, he was made principal of the Univ. of Edinburgh in 1653 and professor of divinity. With the Restoration came the attempt of Charles II to force episcopacy on the Church of Scotland, the king persuaded Leighton to accept (1661) the bishopric of Dunblane. Leighton's attempts to find a basis for union between Presbyterianism and episcopacy led to accusations of treason by the Covenanters and of lukewarmness by the Episcopal party. Temperamentally unfitted for his work, and grieved by the government's persecution of the Covenanters, he tried to resign, only to be appointed (1670) archbishop of Glasgow. In 1674 he retired to private life. Leighton's collected writings, including many of his sermons, appeared posthumously in several editions. See study by E. A. Knox (1930).

Leinster (lĕn'stur, lĭn'-), province (7,580 sq. mi.; pop. 1,281,117), Ireland, comprising the counties of CARLOW, DUBLIN, KILDARE, KILKENNY, LAOIGHIS, LONGFORD, LOUTH, MEATH, OFFALY, WESTMEATH, WEXFORD, and WICKLOW. Most populous and fertile of the Irish provinces, it makes up the bulk of the great central Irish plain and contains the capital and greatest city of Ireland, Dublin. Its wealth and accessibility made the ancient province subject to Danish and Anglo-Norman invasions. See George Fletcher, *Leinster* (1922).

Leipsic (līp'sĭk), village (pop. 1,525), NW Ohio, N of Lima.

Leipzig (Lip'sĭg, Ger. līp'tsĭkh), city (1939 pop. 707,305, 1946 pop. 607,655), Saxony, E Germany, on the Pleisse river at its confluence with the White Elster and the Parthe. It is the largest city of Saxony and its chief commercial, industrial, and cultural center. Until the Second World War it was the center of German book and music publishing and of the European fur trade, its two great yearly industrial fairs were resumed after the Second World War. Among its chief industrial products are textiles, steel, machinery, and chemicals. The University of Leipzig was founded in 1409. Leipzig takes its name from the Slavic settlement of Lipsk, it was chartered in 1174 and, thanks to its position at the intersection of two important trade routes, soon developed its commerce. Its fairs date from the Middle Ages, and its printing industry from c. 1480, when the first press was established here. In 1539 Leipzig accepted the Reformation. The city became one of the leading cultural centers of Europe in the age of Leibniz, who was born here, and of J. S. Bach, who was cantor at the Church of St. Thomas from 1723 to his death. In the 18th cent. Gottsched, Gellert, Schiller, and many others made Leipzig a literary center, and young Goethe studied here. Its musical reputation reached its peak in the 19th and early 20th cent. Mendelssohn, who died here, made the Gewandhaus concerts (begun in 1743 in a former guildhouse) internationally famous. Robert Schumann worked here. Richard Wagner was born at Leipzig, and the Leipzig conservatory became one of the world's best-known musical academies. The city was heavily bombed in the Second World War. It was taken (April, 1945) by American forces, but was later assigned to the Russian zone of occupation. The division of Germany after the war greatly harmed the Leipzig book trade, for Leipzig had been the clearing point for nearly the entire German publishing business. Among the damaged buildings are the old Church of St. Thomas, the modern buildings of the German National Library and of the former German supreme court and the huge railroad station. Other buildings are the Gewandhaus, built in 1884 to replace the earlier structure, the 13th-century Pauline church, Auerbach's Keller, an inn in which a scene of Goethe's *Faust* is laid, the old city hall (1558), the old stock exchange (1682); and the 17th-century Church of St. John, where Bach is buried. The Brühl, one of the main streets of the city, has the house in which Richard Wagner was born. Leipzig is sometimes spelled Leipsic in English and French. The **battle of Leipzig,** Oct. 16–19, 1813, also called the Battle of the Nations, was a decisive victory of the Austrian, Russian, and Prussian forces over Napoleon I. On Oct. 16 the Prussians under Blücher defeated the French under Marmont at Mockern. A peace offer by the vastly outnumbered French was rejected on the following day while the Allies closed in. On Oct. 18 the French were driven to the gates of Leipzig, and most of their Saxon and Württemberg auxiliaries (but not the king of Saxony himself) passed over to the enemy camp. Leipzig was stormed on Oct. 19, and Napoleon's forces began their flight across Germany beyond the Rhine. It is estimated that 120,000 men (of both sides) were killed or wounded in the battle. Allied losses were even heavier than those of the French. The battle is commemorated by a large monument.

Leiria (lārē'ə), city (pop. 7,208), capital of Leiria district, SW Portugal, in Estremadura. Here Alfonso I erected (beginning 1135) a castle on a cliff above the present city; it was taken and retaken in the wars with the Moors. Leiria continued prominent, and here in 1254 Alfonso III summoned the first Cortes to have representatives of the towns. The first duke of Braganza, son of a natural son of John I and a daughter of Nun' Alvares Pereira and ancestor of the Braganza royal line, was reared here. At Marinha Grande, near Leiria, is the national glass factory. The first printing press in Portugal was opened here in 1466.

Leisler, Jacob (līs'lur), 1640–91, leader of an insurrection (1689–91) in colonial New York, b. Frankfurt, Germany. He came to America in 1660 and became a trader in New York. The accession of the Protestant monarchs William III and Mary II caused uprisings in the colonies, where many royal officials were suspected of being Roman Catholics, and the fear of a Catholic French invasion prevailed. Leisler, a Protestant champion, in 1689 gained control of S New York with the aid of militia, proclaimed the new sovereigns, and was appointed commander in chief by his followers. The English lieutenant governor, Francis Nicholson, fled the country, Leisler assumed his office upon seizure of letters from King William which he interpreted as authorization. The council at Albany eventually recognized his authority, although he was bitterly opposed by the wealthy and aristocratic faction. He maintained power through military force and the suppression of opposition. Meanwhile, William commissioned Col. Henry Sloughter as governor, and troops were dispatched to New York under Major Richard Ingoldesby, who, arriving early in 1691, sided with the faction opposed to Leisler and demanded the surrender of the fort on Manhattan island. After holding out for several months, Leisler surrendered to the new governor, was tried as a traitor, and was hanged in May, 1691. Parliament, in 1695, on petition of the Leisler family, passed an act reversing the attainder and later voted an indemnity to his heirs. For several decades after the execution, the politics of New York were marked by the struggles of Leislerians and anti-Leislerians. Despite Leisler's dictatorship, the Leislerians generally set up certain ideals of popular rights as part of their goal, and the rebellion represented an early stage in the revolt against autocratic government in the colonies. See H. L. Osgood, *The American Colonies in the Seventeenth Century*, Vol. III (1907).

Leitchfield (lĭch'fēld), town (pop. 1,146), co. seat of Grayson co., W Ky., SSW of Louisville. It is in an agricultural area, in which there are also asphalt mines.

Leith (lēth), former burgh, Midlothian, Scotland, incorporated in Edinburgh in 1920. Located on the south shore of the Firth of Forth, it is the second seaport in importance in Scotland and has regular steamship connection with London, Aberdeen, continental European ports, and America. It is also an important headquarters for fishing boats, and fish curing is a leading industry. Its manufactured products are varied, including whisky, shoes, chemicals, flour, biscuits, and paper. Its strategic situation caused Leith to be the object of contention in several struggles; it was taken by the English in 1544 and 1547, was besieged by English and Scots in 1559–60, when it was a French and Catholic stronghold, and was partly burned by the Jacobites in 1715. Leith Fort (1779) is now a military headquarters. Trinity House is an organization of shipmasters.

Leitha (līt'ə), Hung. *Lajta* (loi'tŏ), river, 112 mi. long, formed in E Austria by the Schwarza and Pitten rivers. It flows northeast and east to an arm of the Danube near Magyarovar, Hungary. The historic boundary between Austria and Hungary, it divided Cisleithania on the west from Transleithania on the east.

Leithbhearr, Co. Donegal, Ireland. see LIFFORD.

Leith Hill (lēth), 965 ft. high, Surrey, England, on the North Downs SW of Dorking. On the summit is a tower, with a view on clear days of London and the English Channel.

Leitmeritz, Czechoslovakia. see LITOMERICE.

Leitrim (lē'trĭm), county (589 sq. mi., pop. 44,591), N central Ireland, in Connaught and in the republic of Ireland. The county town is Carrick-on-Shannon. The region, which extends SE from Donegal Bay, is mountainous in the northern part but level S of Lough Allen, which extends almost across the county. The river Shannon drains through Lough Allen and forms much of the southwestern border. Grazing and agriculture are the chief occupations, but the soil is generally unproductive and the climate excessively moist. Leitrim was created a county in 1583.

Leix, county, Ireland. see LAOIGHIS.

Leixões (lāthō'ĕsh), artificial seaport of OPORTO. It was built because Oporto had only a river port.

Lek (lĕk), river, 40 mi. long, central Netherlands, a northern arm of the Rhine. Flowing west, it connects the Lower RHINE with the New Maas (see MEUSE) and is crossed by the Merwede Canal. It is navigable in its entire length.

Lekain (lukĕ'), 1728–78, French actor, whose real name was Henri Louis Cain. A protégé of Voltaire, he was one of the great tragic actors of his time. Lekain employed natural diction and costuming in such plays as Voltaire's *Zaïre* and *L'Orphelin de la Chine* and had a salutary effect on the stage of his day. His memoirs were published in 1825.

L. E. L. see LANDON, LETITIA ELIZABETH.

Leland, Charles Godfrey (lĕ'lŭnd), pseud **Hans Breitmann** (hans' brītmăn), 1824–1903, American author and philologist, b Philadelphia, grad. College of New Jersey (now Princeton), 1845, studied at Heidelberg, Munich, and Paris While editor of *Graham's Magazine* in 1857, he printed in it a German dialect poem, "Hans Breitmann's Party," which was so popular he wrote others and published *Hans Breitmann's Ballads* in 1869 He founded and edited the *Continental Monthly* in Boston in 1862 to further the Union cause and served briefly in the Civil War After other journalistic ventures he devoted himself to traveling and studying languages and folklore He published more than 50 books, including *The English Gypsies* (1873), *Algonquin Legends* (1884), and *Legends of Florence* (1895–96) In the '50s he also successfully introduced industrial and craft arts into American schools See his memoirs (1893), E R Pennell, *Charles Godfrey Leland* (2 vols , 1906)

Leland or **Leyland, John,** c 1506–1552, English scholar, librarian, and chaplain to Henry VIII, later (1533) appointed king's antiquarian The mass of historical and geographical data he collected on his famous tour through England (1536–42) was never used for his proposed *History and Antiquities* because he became insane, but his notes were invaluable to later scholars His Latin poetry was graceful and imaginative See his *Itinerary* (ed by Thomas Hearne, 9 vols , 1710 12) and *Collectanea* (ed by Hearne, 6 vols , 1715), biography by Edward Burton (1896)

Leland, city (pop 3,700), W Miss , just E of Greenville and on Deer Creek, in a rich cotton and truck area, settled 1847, laid out 1884 Near by is an agricultural experiment station

Leleges (lĕ'lŭjēz), primitive people of ancient Greece, inhabiting the Aegean Islands and the sea coast of Asia Minor from the Maeander to the Lycian border. They were said to be kin to the Carians It is possible that they were a race of mixed blood which had come under Phoenician and Carian influence

Lely, Sir Peter (lē'lē), 1618–80, Dutch portrait painter in England His real name was Pieter van der Faes, and he studied in Haarlem In 1641 he went to England, where he promptly inherited the position of first court painter, just left vacant by the death of Van Dyck For 30 years he maintained the supremacy merited by his fine craftsmanship, he painted in turn the great figures of the court of Charles I, the Protectorate, and the Restoration Fine examples of his work are to be seen in the National Portrait Gallery, London, and at Hampton Court. The Metropolitan Museum contains four of his portraits, including those of Sir William Temple and Nell Gwynne See C H. C Baker, *Lely and Kneller* (1923)

Lemaître, Frédérick (frādārĕk' lumĕ'tru), 1800–1876, French actor, whose real name was Antoine Louis Prosper Lemaître First known in pantomimes and melodramas, he gained fame (1823) for his creation of the part of Robert Macaire in *L'Auberge des Adrets* and added to his stature in the plays of Victor Hugo and other romantic dramatists. He wrote the play *Robert Macaire* (1834)

Lemaître, Georges Édouard, Abbé (zhôrsh' ādwär' ābā'), 1894–, Belgian astrophysicist and mathematician He postulated the theory that the universe originated as a condensed primeval atom that exploded, producing the force by which the universe is still expanding

Lemaître, Jules (shul'), 1853–1914, French literary critic, a leader in the skeptical revolt against the "scientific" criticism of the 1870s His works consist of sparkling plays, novels and stories in the manner of Anatole France, series of critical essays, *Les Contemporains* (1885–89, Eng tr of excerpts, *Literary Impressions*, 1921) and *Impressions de théâtre* (1888–; Eng. tr. of excerpts, *Theatrical Impressions*, 1924), and literary biographies, notably *Jean Racine* (1908) and *Jean-Jacques Rousseau* (1907; Eng tr., 1907).

Leman, Lake: see GENEVA, Switzerland.

Le Mars (lē mārs'), city (pop 5,353), co seat of Plymouth co., NW Iowa, on the Floyd river and NE of Sioux City, founded in the 1870s, inc 1881 It is a trade center for a farming and dairying area. A colony of English people lived here in the early years. Westmar College (coeducational, 1890) is here

Lemberg, Ukraine, see LVOV

Lemercier, Jacques (shāk' lùmĕrsyā'), c 1585–1654, French architect of the Renaissance, one of the group which evolved a classical mode of expression for French architecture. With Cardinal Richelieu as patron, he received his chief opportunities as designer of churches for the Jesuits His chief remaining work is the church of the Sorbonne, Paris (1635), inspired by Vignola's designs and containing a dome which furnished a model for that of the church of the Invalides It was built at Richelieu's order, as were also Richelieu's Paris residence, later transformed into the Palais-Royal, and the entire town of Richelieu, an ambitious piece of 17th-century town planning At the palace of the Louvre, Lemercier designed the Pavillon de l'Horloge, and c 1646 he superseded François Mansart in supervising the construction of the Church of Val-de-Grâce, Paris.

Lémery, Nicolas (nēkôlà' lāmürē'), 1645–1715, French chemist. He was a pharmacist and lecturer in Paris and was the author of a standard textbook in chemistry (1675) and also of a treatise on antimony (1707)

Lemieux, Rodolphe (rôdôlf' lùmyö), 1866–1937, Canadian lawyer and politician, b. Montreal, educated at Nicolet Seminary and at Laval Univ Called to the bar in 1891, he was professor of law (1896–1926) at Laval Univ. Entering Parliament in 1896 with the noted group of Liberals led by Laurier, he served for nearly 35 years, first in the House of Commons and later (1930–37) in the Senate Close friend and adviser of Laurier, Lemieux was solicitor general (1904–6), postmaster general (1906–11), and briefly (1911) minister of marine and fisheries during Laurier's administration

Lemire, Jules Auguste (shül' ōgüst' lumĕr'), 1853–1928, French social reformer, a Catholic priest called Abbé Lemire He served as a member of the chamber of deputies In 1896 and 1900 Lemire held congresses attempting to arouse French priests to active work in social causes He founded the Ligue du Coin de Terre et du Foyer for the purpose of giving to every family ownership in a bit of property Lemire wrote *Le Cardinal Manning et son action sociale* (1893), and *Le Coin de terre et le foyer* [the bit of land and the fireside] (1897)

lemming, rodent related to the mouse The common or brown lemming (genus *Lemmus*) inhabits arctic regions of both hemispheres The long fur is brownish, grayish, or black throughout the year In Scandinavia particularly, the lemming undertakes mass migrations at intervals During periods of overpopulation and scarcity of food lemmings swarm over land and through water, deterred by no obstacle, eating vegetation on the way If they reach the sea before the migratory urge subsides, they plunge in and swim until they drown In America migrations are less extensive and less frequent The collared lemming (*Dicrostonyx*), which turns white in winter, also has a circumpolar range The lemming mouse (*Synaptomys*) of North America is not a true lemming but a related form, of which a species known as the bog lemming is found as far south as the NE United States

Lemmon, city (pop 1,781), NW S Dak , at the N Dak line It is the trade center for a grain and livestock region extending into North Dakota, with coal mines near by

Lemnos (lĕm'nŏs, Gr lēm'nôs), island (186 sq mi , pop 23,842), between Greece and Turkey, in the NE Aegean Sea, belonging to Greece It is largely mountainous. Fishing, sheep and goat raising, and agriculture are the main occupations Olive oil, wine, vegetables, fruit, silk, and wheat are produced Kastron is the chief town and port. In ancient Greece, Lemnos, which is of volcanic origin, was sacred to HEPHAESTUS It became an Athenian colony c 500 B C After the fall (1204) of the Byzantine Empire to the host of the Fourth Crusade, Lemnos was ruled by various Latin princes and (1464–79) by Venice It then was seized by the Turks, who held it until 1912. The port of Moudros was used (1915) by the Allies in the Gallipoli campaign

Le Moine, François see LE MOYNE, FRANÇOIS.

Lemon, Mark, 1809–70, English editor and humorist. Lemon was a founder and one of the first editors of *Punch* (1841) A contributor to periodicals, he wrote farces, melodramas, and songs

lemon, citrus fruit (*Citrus limonia*), probably native to India It seems to have been unknown to the Greeks and Romans, but in the 12th or 13th cent was introduced by the Arabs into Spain, from there its culture was extended to the Mediterranean basin and eventually to most tropical and subtropical regions The tree grows 10 to 15 ft. high, with a straggling growth requiring careful pruning, it is propagated by budding, and the final planting distance in the orchard is about 20 ft apart It requires a mild, equable climate The trees are prolific, ripening fruit practically all the year In Sicily the main harvest is between October and the last of December. In the United States the fruit is cut from the tree while green, at a standard size, and the good lemons are placed in cool, dark rooms to ripen slowly The skin grows yellow, thin, and pliable, and the quality is considered better than when ripened on the tree The imperfect fruit is manufactured into lemon oil, lemon juice, CITRIC ACID, pectin, and other useful products Lemon culture in California began c 1850 but did not become important till late in the 19th cent. Production there is on a large scale. Lemons have better keeping and transportation qualities than other citrus fruits. The fruit is valuable for its high vitamin content (especially of vitamin C) and acid, refreshing flavor, it is in great demand for summer drinks, such as lemonade and punch, and is preferred by many to vinegar as an ingredient for sauces and salad dressings It has long been known as a preventive of scurvy. Lemon juice is the main source of citric acid, which is used by calico printers to keep the fabric clear of rusty stains from the machinery; it is also a domestic remedy for rust, ink, and mildew stains Lemon oil, or the essential oil extracted from the skin, usually while green, is manufactured mostly in Italy and France It is used in the making of flavoring extract (essential oil combined with alcohol), perfumes and cosmetics, and furniture polish.

lemon balm, perennial herb, European, but becoming naturalized in the United States, cultivated for its lemonlike flavor and odor It has long found favor for use in wine and tea and as a seasoning and was once considered a curative for many ailments The plant is a typical MINT with square stems, opposite leaves, and with small white flowers in the axils of the leaves. Bees are very fond of the flowers, but the lemon balm (*Melissa officinalis*), occasionally called bee balm, should not be confused with the other bee balm or OSWEGO TEA.

lemon lily see DAY LILY

Lemonnier, Pierre Charles (pyĕr' shärl' lùmônyā'), 1715–99, French astronomer For many years he was professor of physics at the Collège de France Over a period of more than 50 years he made observations of the moon; he investigated the influence of Saturn upon the motion of Jupiter, determined the positions of many fixed stars, and made extensive researches in terrestrial magnetism and atmospheric electricity. He many times saw and recorded in his charts the distant Uranus before it was recognized as a planet by Sir William HERSCHEL Among his works are *Observations de la lune, du soleil, et des étoiles* (1751–76) and *Astronomie nautique lunaire* (1771)

Lemont (lùmŏnt'), village (pop 2,557), NE Ill , SW of Chicago and on the Des Plaines river, inc 1873 Aluminum products are made here, and oil is refined

Lemoore, city (pop 1,711), S central Calif , S of Fresno, inc 1900 It processes the dairy products of a diversified farming region in the San Joaquin Valley

Le Moyne (lu mwän'), Canadian family It was founded by Charles le Moyne, sieur de LONGUEUIL, whose 11 sons were noted soldiers, explorers, and colonizers. The two most famous were the sieur d'IBERVILLE and the sieur de BIENVILLE.

Le Moyne, Le Moine, or **Lemoine, François** (all frāswä' lùmwan'), 1688–1737, French painter Among his works are the decorations in the Salon of Hercules at Versailles, *Louis XV Giving Peace to Europe* (Versailles), *Apotheosis of Hercules* (Toulouse), and the *Marriage at Cana* (Montpellier)

Lemoyne, Jean Baptiste (shä' bäptēst lumwan'), 1704–78, French sculptor, an important figure in his day Much of his work, including three statues of Louis XV, was destroyed in the French Revolution His picturesque portrait busts of Voltaire, Fontenelle, and Mme de Pompadour are perhaps his best work He was the master of Pigalle, Falconet, and Pajou, all famous sculptors

Lemoyne (lumoin'), residential borough (pop 4,358), S Pa , on the Susquehanna river opposite Harrisburg The site of Fort Washington marks the northernmost point of Confederate invasion

Lempa (lām'pä) river, c 200 mi long, the longest of the Central American rivers flowing into the Pacific The fertile Lempa valley, largely within Salvador, supports a dense agricultural population.

Lemuel (lĕm'ŭul), unknown king Prov 31 1

lemur (lē'mur), primitive Old World primate. Lemurs have foxlike muzzles and huge eyes, tails, when present, are nonprehensile and frequently long and bushy They are arboreal and usually gregarious, and many are chiefly nocturnal. The thumb is opposable Insects, fruits, small birds, eggs, and lizards form their diet The true lemurs are confined to Madagascar and the neighboring islands. The ring-tailed lemur is the one most often seen in captivity. Closely related to the true lemurs are the galagos or "bush baby" of South Africa, the potto of Africa, the slow loris and the slender loris of the Orient, the indri or endrina, the sifaka, and the mouse lemur of Madagascar, and the aye-aye of E Madagascar, named for its strange cry Like some other lemurs it is regarded with superstitious awe by the natives. The tarsier, of which about nine species range from the Philippines to the East Indies, is usually considered intermediate between the lemur and the New World monkeys. The colugo, miscalled the flying lemur, is not a primate but a member of the single living genus of the order Dermoptera

lemures: see LARVAE

Lena, town (pop 1,169), N Ill , near the Wis line NW of Freeport, inc 1869 Cheese is made here

Lena (lĕ'nu, Rus lyĕ'nŭ), river, 2,850 mi long, RSFSR, the easternmost and longest of the great rivers of Siberia. It rises near Lake Baikal at an altitude of c.4,700 ft and flows first northeast, then northwest, through the central Siberian uplands and parallels the Verkhoyansk range, reaching a width of 8½ mi. It empties through a delta 150 mi wide into the Laptev Sea, a branch of the Arctic Ocean It is navigable for 2,135 mi At Yakutsk (915 mi from the mouth) it is icefree from June to October, at the delta, from July to September Coal, oil, and—chiefly—gold are found along the Lena and its tributaries (the Vitim and the Aldan).

Le Nain (lə nĕ'), family of French painters consisting of three brothers: **Antoine Le Nain** (ätwän'), 1588?–1648, **Louis Le Nain** (lwē'), 1593?–1648, and **Mathieu Le Nain** (mätyö'), 1607–77. They came to Paris from Laon c 1629 and were admitted to the Académie royale de Peinture et de Sculpture on its foundation in 1648. Little is known of their lives, and despite recent efforts to distinguish between the work of the brothers it would seem that much of it was done in collaboration. The painting of the Le Nains is strikingly different from that of their French contemporaries. At a time when allegorical compositions were the rule, they chose to paint humble people in everyday settings, with a sober palette and a realistic execution reminiscent of the Spanish school. Among their many and admirable paintings may be cited *The Forge* and *Peasants' Repast* (Louvre), *Portrait Group* (National Gall., London), *Mendicants* (Metropolitan Mus.). See studies (in French) by Champfleury (1850) and Antony Valabrègue (1904).

Lenape: see DELAWARE INDIANS.

Lenard, Philipp Eduard Anton (fē'lĭp ā'dōārt an'tōn lā'närt), 1862–1947, German physicist, b. Bratislava. He received the 1905 Nobel Prize in Physics for his research on the properties of cathode rays. He is noted also for his work on the structure of the atom and for the discovery (1902), in connection with the photoelectric effect, that the velocity of electrons is independent of the intensity of the light which emits them. He was professor at the universities of Kiel (1898–1907) and Heidelberg (1896–98, 1907–31).

Lenau, Nikolaus (nē'kōlous lā'nou), pseud of **Nikolaus Niembsch von Strehlenau** (nēmpsh' fŏn shtrā' lunou), 1802–50, Austrian poet, b. Csatad, Hungary (now Lenauheim, Rumania). In 1833 he visited America, but despite its tributes returned disillusioned. In 1844 his mind failed and he was confined. One of the great lyricists of his day, he gave poignant expression to a profound pessimism. His works include three volumes of *Gedichte* [poems] (1832, 1838, 1840), the epics *Savonarola* (1837) and *Die Albigenser* (1842), the long poem *Faust* (1836), and the unfinished *Don Juan* (1851).

Lenbach, Franz von (frants' fŏn lān'bakh), 1836–1904, German portrait painter. He studied in Munich and Rome and from 1862 to 1868 worked as a copyist of old masters in Italy and Spain. His early work was in genre, but from 1868 he devoted himself to portraiture, becoming the foremost German painter of his time in this field. While his style is derived rather than personal, it has great vigor. His pictures evoke the personality of his famous sitters with compelling realism and great psychological penetration. Among them are portraits of Bismarck, Emperor William I, Field Marshal von Moltke, Pope Leo XIII, Gladstone, Mommsen, Wagner, Liszt, and Johann Strauss. The Metropolitan Museum has *A Young Woman* and a portrait of Edwin Emerson.

Lenclos, Ninon de (nēnō' du lāklō'), b. 1620?, d. 1705 or 1706, celebrated French beauty and wit. She numbered among her many lovers and friends such eminent men as the Great Condé, La Rochefoucauld, and Saint-Évremond. She gathered in her Paris salon a circle of wits and literary figures.

lend-lease. The Lend-Lease Act, passed (1941) by the U.S. Congress, gave the President power to sell, transfer, lend, or lease necessary war supplies (including food, machinery, and services) to nations whose defense was vital to the defense of the United States in the Second World War. The act provided that a country should receive aid on such terms as "the President deems satisfactory" and that repayment to the United States was to be "in kind or property, or any other direct or indirect benefit which the President deems satisfactory." Harry L. Hopkins was appointed (March, 1941) executive to administer the act. He was replaced (July, 1941) by Edward R. Stettinius, Jr. Stettinius headed the Office of Lend-Lease Administration, set up in Oct., 1941, until Sept., 1943, when it was incorporated in the Foreign Economic Administration under Leo T. Crowley. In Sept., 1945, it was transferred to the Dept. of State. Lend-lease was originally intended for the British Empire and China. In Oct., 1941, the USSR was included, and by the end of the war practically all the United Nations had been declared eligible for lend-lease aid, though not all demanded or received it. A lend-lease agreement was concluded with Turkey in Dec., 1941, but shipments were halted in March, 1944, and a new agreement was reached only in Feb., 1945. A "master agreement" was signed with Great Britain on Feb. 24, 1942, and identical texts were subsequently signed by China, the USSR, Belgium, Poland, Greece, Norway, Czechoslovakia, Yugoslavia, Ethiopia, Liberia, and the Netherlands. Australia and New Zealand accepted the terms of the agreement, and Canada agreed to its principles. Lend-lease aid was extended to the USSR and other nations by Great Britain and Canada also. On Sept. 3, 1942, a reciprocal aid agreement of the United States with Great Britain, Australia, New Zealand, and the Free French was announced. Under its terms "reverse lend-lease" in the forms of goods, services, shipping, and real estate was given to American forces overseas. The agreement was subsequently joined by other countries in which U.S. forces were stationed. Belgian reverse lend-lease exceeded the aid received by Belgium from the United States. The Lend-Lease Act, one of the main factors in shaping Allied victory, was extended by Congress until June 30, 1946. On Aug. 21, 1945, President Harry S. Truman announced the end of lend-lease aid. Arrangements were made on a cash or credit basis—notably with Great Britain and China—to continue shipments of goods earmarked for them under lend-lease appropriations. Total lend-lease aid given exceeded $50,600,000,000, of which Great Britain had received some $31,000,000,000 and the USSR received over $11,000,000,000. The British lend-lease account was settled (July, 1948) with the agreement that Britain would pay the balance in 50 annual installments beginning in 1951. Although the USSR agreed (April, 1947), to resume negotiations, by April, 1950, the lend-lease account of the USSR was still unsettled.

L'Enfant, Pierre Charles (pyĕr' shärl' läfä'), 1754–1825, American soldier, engineer, and architect. Born in France, he volunteered as a private in the American Revolution, emerging from the war with the rank of major. He won Washington's attention with his design for the insignia of the Society of the Cincinnati. He had remodeled the New York city hall to serve as a temporary seat of Federal government when he was asked (1789) by Washington to submit plans for the capital city at Washington. His plans were presented in 1791, but he antagonized Congress and was opposed by Thomas Jefferson. In 1792 he was forced to resign. He was offered in payment of his services 500 guineas and a lot in Washington, which he refused. In 1889 L'Enfant's plans were exhumed from the archives, and in 1901 the design of the capital was developed along the lines which he had laid down. L'Enfant's body was moved to the Arlington National Cemetery in 1909.

L'Enfant Jésus, Que see VALLÉE JONCTION.

Lenglen, Suzanne (suzan' läglĕn'), 1899–1938, French tennis player. She won her first tennis title at the age of 14 and the world hard-court singles and doubles titles in 1914. She was champion of French women's singles (1920–23, 1925–26) and one of the winners of women's doubles (1925–26), from 1919 to 1923 and again in 1925. She won the British women's singles crowns and was also a doubles champion. In 1920 she took the tennis honors of the Olympic games at Antwerp. One of the most skillful of women tennis players, Lenglen also attracted wide notice because of her volatile temperament. She turned professional in 1926 and played in the United States in 1927. She wrote *Lawn Tennis* (1925), *Lawn Tennis for Girls* (1930), and *Tennis by Simple Exercises* (1937).

Lenin, Vladimir Ilyich (lĕ'nĭn, Rus. vlädyē'mĭr ĭl'yĭch lyĕ'nĭn), 1870–1924, Russian revolutionist and statesman, founder of Bolshevism and of Soviet Russia. His real name was V. I. Ulyanov, though listed as Nikolai Lenin in many reference works, he did not use Nikolai as a first name. Born at Simbirsk (now called Ulyanovsk in his honor), the son of a school official belonging to the minor gentry, he was early drawn to the revolutionary cause, especially after the execution (1887) of his brother, Aleksandr I. Ulyanov, who had participated in a plot on the life of Alexander III. Lenin's law studies at the universities of Kazan and St. Petersburg were interrupted for some time by his banishment because of revolutionary activities. He soon renounced his legal practice, turning entirely to the study of the teachings of Karl Marx and to revolutionary propaganda among the workers, particularly at St. Petersburg. After a second exile in Siberia he left (1900) Russia to continue his propaganda abroad. In 1903, at a meeting of the Russian Social Democratic party held at London, Lenin brought about the split of the party into the Bolsheviks, whom he headed, and the Mensheviks (see BOLSHEVISM and MENSHEVISM). Lenin continued to be the chief exponent of Bolshevik thought in the long struggles for supremacy among the Marxists, against PLEKHANOV, KAUTSKY, and other less radical leaders. With the outbreak of the revolution in 1905, Lenin returned to Russia. His view that the Bolsheviks should take part in the imperial DUMA prevailed in 1907 against that of other Bolshevik leaders, but he left Russia again in the same year. Lenin was in Switzerland during the First World War. In his view of Marxism, set forth in his writings and speeches, the war was an imperialist struggle, imperialism being "the final stage of capitalism," it was an historical necessity that the war would bring opportunities for a revolution of the proletariat. Consequently, Lenin urged the proletariat to oppose the war by a civil war on an international scale against the capitalist class. After the outbreak of the RUSSIAN REVOLUTION of Feb., 1917, the German government helped Lenin to return to Russia by allowing him to cross Germany from Switzerland to Sweden in a sealed railway car, the Germans thus hoped (rightly) to disrupt the Russian war effort. An abortive Bolshevik uprising (July, 1917) against the KERENSKY government forced Lenin to flee to Finland. Bolshevism, however, though represented by a minority in the first all-Russian Soviet congress, soon gained the decisive power due to the weakness and disorganization of the government. In Nov., 1917, (October according to the Old Style), the Bolsheviks overthrew Kerensky and set about establishing a dictatorship of the proletariat by the organization of the Council of People's Commissars. Lenin became chairman of the council and virtual dictator, TROTSKY, STALIN, and RYKOV were the other chief members. Their first acts were a decree proposing an armistice among the warring nations and another decree abolishing private ownership of the land. Nationalization of industries, begun under Kerensky, was speeded up. Opposition was ruthlessly suppressed by the Cheka under DZERZHINSKY. Lenin fulfilled his promise of peace by accepting the humiliating Treaty of BREST-LITOVSK (1918), but civil war in Russia and wars against the western neighbors of Russia ended only late in 1920 (see UNION OF SOVIET SOCIALIST REPUBLICS). The victory of the Bolsheviks (who had become the Russian Communist party) was won at a staggering price. The war had forced Lenin to resort to temporary expedients designed to appease the opposition among the peasants. Thus land was distributed to the peasants. After the civil war, Lenin introduced (1921) the NEW ECONOMIC POLICY (NEP), a compromise with capitalism, as an expedient to increase the production of war-torn and impoverished Russia. Toward religion Lenin was uncompromising. The Christian churches were severely persecuted and atheism became official state doctrine. To further world revolution, the Third International or COMINTERN was established in 1919. In the political reorganization of the Russian Empire, Lenin retained the post of chairman of the Council of People's Commissars until his death. He furthermore was chairman of the Communist party, which exerted the actual power over the state. The strain of his labors broke down his health. He suffered his first stroke in 1922, a later stroke (1924) deprived him of speech. His death in 1924 opened a contest for his succession among the other Bolshevik leaders, a struggle from which Stalin emerged victorious. After his death Lenin came to be venerated like a prophet by the Communists. His mausoleum in the Red Square of Moscow is a Communist shrine. His writings, though distinguished by clarity, began to be interpreted variously by the different Communist groups, notably the Trotskyists and the Stalinists, each group maintains that its interpretation is the sole pure Leninist doctrine. Lenin elaborated on the teachings of Marx through his analysis of imperialism and by his belief that the revolution of the proletariat, though historically inevitable, must be prepared and guided by a strongly organized and well trained Communist party. One of the greatest and most practical revolutionists of all times, he favored opportunistic compromises if they were certain to further the ultimate establishment of socialism, but his doctrine always remained purely revolutionary and opposed to all gradualism and revisionism. An impartial and comprehensive biography of Lenin remains an impossibility at a time when his thought and accomplishment still remain the center of political and ideological controversy. His writings and speeches have appeared in English collected and selected editions and in single volumes and pamphlets. See N. K. Krupskaya (Lenin's wife), *Memories of Lenin* (1930), biographies by Leon Trotsky (1925), Valeriu Marcu (1928), G. V. Vernadsky (1931), James Maxton (1932), R. W. Fox (1934), W. C. White (1936), P. M. Kershentsev (1938), and David Shub (1948), Joseph Stalin, *Leninism* (Eng. tr., 1928–33) and *Problems of Leninism* (Eng. tr., 1934), S. J. Liberman, *Building Lenin's Russia* (1945), B. D. Wolfe, *Three Who Made a Revolution* (1948).

Leninabad (lyĕ"nyĭnäbät'), city (1939 estimated pop. 45,900), capital of Leninabad oblast, Tadzhik SSR, on the Syr Darya river at its exit from the Fergana Valley. A center of the cotton and silk industry, it is on the site of an ancient city, captured (c. 329 B.C.) by Alexander the Great. Before 1936 it was named Khodzhent.

Leninakan (lyĕ"nyĭnŭkän'), city (pop. 67,707), NW Armenian SSR, near the Turkish border. Now a textile center, it was founded (1837) as Aleksandropol, a Russian fortress, on the site of the old village of Gumri.

Leningrad (lĕ'nĭngrăd, Rus. lyĭ'nyĭngrät'), city (pop. 3,191,304), capital of Leningrad oblast, RSFSR, at the southern end of the Karelian Isthmus. It is the second largest city and formerly was the capital of Russia. It was named St. Petersburg until 1914, and Petrograd from 1914 to 1924. Its founder, Peter I (Peter the Great), ordered (1703) his new capital built in newly conquered Ingermanland, on the delta through which the NEVA joins the Gulf of Finland, an arm of the Baltic Sea. To defend the new city the fortress of KRONSTADT was built according to Peter's plan. St. Petersburg was to be a modern capital, a "window looking on Europe." Western European in character, built entirely of stone and on a grand scale. The work was

carried out at tremendous human and material cost, and in 1713 Peter abandoned Moscow for his new capital Excellent Italian and French architects planned the city for Peter and his successors, giving it the spacious, classical beauty which it has retained St Petersburg became one of the world's most brilliant capitals and cultural centers Its life has been made familiar to the international public in the great novels of Pushkin, Turgenev, Dostoyevsky, and Tolstoy Its apex as an international center of literature, music, theater, and ballet, and as the scene of lavish and reckless social life, was reached in the late 19th and early 20th cent Under that brilliant but brittle surface, however, the seeds of social upheaval had grown to ripeness St Petersburg had also become the chief industrial center of Russia, seat of the large Putilov (now Kirov) armaments plant There was a large and dissatisfied proletariat, and the city was the center of secret revolutionary societies of all shades An attempted petition of the St Petersburg workers to the tsar precipitated the revolution of 1905 Again, it was the workers, soldiers, and sailors of Petrograd who carried out the world-shaking revolutions of February and October, 1917 Though it lost much of its former glamor, Leningrad remained the economic and cultural rival of Moscow, which in 1918 replaced it as capital In the Second World War, Leningrad was cut off from the rest of Russia by the fall of SCHLÜSSELBURG to the Germans (Aug , 1941) For nearly two years the citizens of Leningrad withstood siege by three German armies and almost daily shelling and air raids, while work in the vital armaments plants continued When the siege was raised (Jan , 1943), thousands had died of famine and disease, but the spirit of the city was unbroken Most of the war damage was quickly repaired The principal thoroughfare of Leningrad is the celebrated Nevsky Prospekt, leading to the city center On it are the high-spired admiralty building, the Winter Palace built by RASTRELLI, the HERMITAGE museum, the huge domed cathedral of St Isaac, Mariinsky Palace, and the equestrian statue of Peter the Great, Falconet's masterpiece, which served as subject for Pushkin's well-known poem, "The Bronze Horseman " Other important buildings include the university (founded 1819), the fortress of SS Peter and Paul, the oldest building in the city, which in imperial days served as political prison, the opera, and numerous theaters, churches, palaces, museums, and scientific and medical institutes Outside Leningrad are PUSHKIN (formerly Tsarskoe Selo), with the Summer Palace, and the former imperial residences of PETERHOF and GATCHINA Leningrad is the principal seaport of Russia and is connected with the chief inland waterways Its large industrial suburbs produce armaments, heavy and fine machinery, cotton textiles, and rubber There also are large navy yards Leningrad is connected with Moscow by the oldest Russian railroad, built in 1848–51 in a perfectly straight line It is also linked with natural gas fields in Estonia by a pipeline built after the Second World War

Leninogorsk (lyĭ"nyĭnŭgôrsk'), city (1926 pop 9,469, 1939 estimated pop 50,000), E Kazakh SSR, in the Altai Mts It is the industrial center of a zinc-mining area, exploited since 1784 Until 1940 it was named Ridder

Lenin Peak, 23,377 ft high Tadzhik SSR, USSR, in central Asia, second only to Stalin Peak in the Pamir and highest point of the Trans-Alai range Its former name was Kaufmann Peak

Leninsk-Kuznetski (lyĕ'nĭnsk-kōōznyĕt'skĭ), city (pop 81,080), RSFSR, in S Siberia, SE of Novosibirsk On a branch of the Trans-Siberian RR and a center of the KUZNETSK BASIN, it has more than quadrupled its population since 1926

Lenkoran (lyĕnkŭran'), city (1936 estimated pop 24,000), SE Azerbaijan SSR, a port on the Caspian Sea near the Iranian border The **Lenkoran Lowland**, a coastal strip 40 mi long, has a humid, subtropical climate Citrus fruit, tea, and rice are grown here, and there are fisheries

Lennep, Jacob van (yä'kŏp vän lĕ'nĕp), 1802–68, Dutch novelist, poet, and dramatist, best known for his historical novels influenced by Walter Scott Two of the most successful of these are *De Plegzoon* (1833, Eng tr , *The Adopted Son*) and *De Roos van Dekama* (1836, Eng tr , *The Rose of Dekama*)

Lenni-Lenape : see DELAWARE INDIANS

Lennox, Charlotte (Ramsay), 1720–1804, American novelist, b New York city Little is known of her origins, but she moved to London in 1735 and became a friend of Dr Johnson and Samuel Richardson Her work includes her well-known *Female Quixote* (1752) and *The History of Henrietta* (1758) See G H Maynadier, *The First American Novelist?* (1940)

Lennox, Matthew Stuart or **Stewart,** 4th **earl of,** 1516–71, Scottish nobleman Related to the royal family, being heir presumptive after James HAMILTON, 2d earl of Arran, Lennox returned to Scotland in 1542, after service in France, to contest the claims of Arran In 1544 he joined the English party, later led invasions of Scotland, and lived for 20 years in England He married Lady Margaret Douglas, the niece of Henry VIII and daughter of the 6th earl of Angus, a woman of great ambition and ability Until the death of Mary I, Lennox and his wife were in great favor in England, but Elizabeth did not trust them They became the leaders of the Catholic nobles and succeeded in marrying their son, Lord DARNLEY, to MARY QUEEN OF SCOTS After his son's death, Lennox accused Bothwell of murdering him When Mary was imprisoned at Lochleven, Lennox again became prominent and, through Elizabeth's intervention, was chosen regent to succeed (1570) the earl of Murray The queen's party, led by the Hamiltons and MAITLAND OF LETHINGTON, at once declared war against him Lennox was stabbed to death in a raid during this war His surviving son, Charles (d 1576), was created earl of Lennox and was the father of Arabella Stuart

Lennox, Lady Sarah, 1745–1826, English noblewoman, daughter of the 2d duke of Richmond and great-granddaughter of Charles II and the duchess of Portsmouth She was wooed by George III until his mother dissuaded him from marrying less than a princess In 1762 Lady Sarah was married to Sir Charles Bunbury and was divorced by him in 1776 The children of her marriage (1781) to George Napier included three English generals, Sir Charles James Napier, Sir George Napier, and Sir William Napier (also a historian) See biography by E R Curtis (1946)

Lennox, city (pop 1,164), SE S Dak , SW of Sioux Falls, settled 1879, inc 1906 It is a farm trade center

Lennox, Fort see ÎLE-AUX-NOIX, FORT

Lennoxville, town (pop 2,150), SE Que , on the St. Francis and Massawippi rivers and E of Sherbrooke It is chiefly a residential town and an educational center, the seat of Univ of Bishop's College (Anglican, coeducational, 1843) and Bishop's College School for boys

Leno, Dan (dē'nō), 1861–1904, English music-hall comedian, whose real name was George Galvan He won the clog-dancing championship of the world in 1880 and from 1883 appeared with great success in Drury Lane pantomimes and music-hall shows His patter and songs and infinite antics endeared him to several generations See essay by Max Beerbohm, *Dan Leno* (1904)

Lenoir (lŭnôr'), town (pop 7,598), co seat of Caldwell co , W N C , WSW of Winston-Salem near the Blue Ridge It has furniture factories

Lenoir City (lunôr'), industrial city (pop 4,373), E Tenn , SW of Knoxville and on the Tennessee, in a timber and farm area, founded 1840 Fort Loudoun Dam is at the edge of the city

Lenoir Rhyne College see HICKORY, N C

Lenormand, Henri René (ānrē' runā' lunôrmä'), 1882–, French dramatist He wrote plays admittedly Freudian in tone and theme, in some of them he relied heavily on a symbolic representation of the thesis Among his well-known and successfully produced plays are *Le Temps est un songe* (1919, Eng tr , *Time Is a Dream*, in *Failures*, 1923) and *L'Homme et ses fantômes* (1924, Eng tr , *Man and His Phantoms*, in *Three Plays*, 1928)

Lenôtre or **Le Nôtre, André** (ädrā' lunō'tru), 1613–1700, French landscape architect At the death of his father, he succeeded him as superintendent of the Tuileries palace gardens André's first important design, the park of Vaux-le-Vicomte, attracted the attention of Louis XIV, who then entrusted to him the direction of nearly all the royal parks and gardens He brought to full development that type of spacious formal garden, characterized by extensive unbroken vistas, which was his own special creation and which so accurately expressed the grandeur of his period The gardens of the palace of Versailles are his most celebrated work He designed also the gardens and parks for Saint-Cloud, Marly-le-Roi, Chantilly, Fontainebleau, and Saint-Germain-en-Laye He visited Italy in 1678, the gardens of the Vatican and those of several Roman villas have been ascribed to him He was active in his art for 50 years His principles in garden design dominated throughout Europe until the rise of the English school of informal and naturalistic gardens

Lenox, James, 1800–1880, American bibliophile and philanthropist, b New York city He was founder of the Presbyterian Hospital, New York His fine collection of paintings and books was housed on Fifth Ave after 1870 The Lenox Library in 1895 became part of the New York Public Library The building was torn down in 1913 after the collection had been moved to the central library On its site is now the Frick Museum.

Lenox 1 Town (pop 1,220), SW Iowa, SW of Creston, inc 1875 **2** Resort town (pop. 2,884), W Mass , in the Berkshires S of Pittsfield, settled c 1750, set off from Richmond 1767 "Tanglewood," a former estate, mainly in the adjoining town of Stockbridge, is the scene of the annual BERKSHIRE SYMPHONIC FESTIVAL Hawthorne's red cottage, on the estate, burned in 1890 and was rebuilt and dedicated as a shrine in 1948. Fanny Kemble, Henry Ward Beecher, and Edith Wharton lived in Lenox It is noted for its many beautiful estates

Lenroot, Katharine Fredrica, 1891–, American social worker, an authority on child welfare, b Superior, Wis , grad Univ. of Wisconsin, 1912 After serving (1913–15) as deputy industrial commissioner for Wisconsin, she was appointed (1915) special agent for the Children's Bureau, U S Dept of Labor, she became assistant chief (1922), and chief (1934) on the retirement of her predecessor. For her work in the reform of child labor laws she was awarded (1943) the Rosenberger medal

Lens (lăs), town (pop 34,134), Pas-de-Calais dept , N France, between Arras and Lille It is an industrial center in a coal district. The victory here (1648) of the French led by Louis II de Condé over the imperial troops was the last important battle of the Thirty Years War Lens suffered very heavy damage in both world wars

lens, piece of transparent substance, commonly glass, circular in form and with its two surfaces curved or with one surface plane and the other curved All rays of light passing through a lens are bent (see REFRACTION) except those which pass directly through a point called the optical center Lenses are classified according to the way in which they bend the rays of light entering them Those which refract light so that the rays leaving the lens are bent inward and toward one another are known as converging lenses, these lenses are thicker at the center than at the edges Examples of this type are the double convex lens which has both its surfaces curved outward, the plano-convex lens which has one surface flat and one surface convex, and the concavo-convex lens which has one surface convex and one concave Lenses of the other general type cause the rays to be bent outward and away from one another and are called diverging lenses, these are thicker at the edges than at the center Examples are the double concave lens which has both surfaces concave, the plano-concave lens which has one surface flat and the other concave, and the convexo-concave lens which has one surface concave and one convex Each curved surface of a lens is considered as part of the surface of a sphere, the center of this sphere is called the center of curvature of the lens, and every point on the surface of the lens is equidistant from it Since most lenses have two curved surfaces, there are usually two centers of curvature A line connecting these two points and passing through the optical center of the lens itself is called the principal axis Any other line passing through the optical center but not through a center of curvature is called a secondary axis In converging lenses all those rays which enter parallel to the principal axis are bent toward one another and are brought together at a point on the principal axis called the principal focus The distance from the principal focus to the optical center of the lens is the focal length of the lens It varies with different lenses, according to the curvature of the surfaces Conjugate foci are two points on opposite sides of a lens in such positions that rays from one, after passing through the lens, will converge at the other Light rays are not always brought to a focus at one point, this condition of exact focus is known as aberration Spherical aberration results from the spherical nature of lenses, the rays striking the thinner and the thicker portions are refracted differently and, coming to focus at different distances from the lens, produce an indistinct image Some correction can be achieved by variations in grinding the lens and by using combinations of lenses instead of a single lens Chromatic aberration is caused by differences in the degree to which light rays of different color, and hence of different wave length, are bent in passing through the lens Achromatic lenses, those in which chromatic aberration is corrected, are compound lenses made from glasses differing in their index of refraction The IMAGE formed by a lens is real or virtual, erect (upright) or inverted, the same size as the object or larger or smaller, and is at a distance nearer to or farther from the lens than the object, depending upon the type of lens used, its focal length, and the position of the object with respect to the principal focus Lenses are used singly or in groups in such instruments as cameras, magic lanterns, microscopes, moving-picture projectors, spectacles, stereopticons, telescopes, and common field, opera, and reading glasses The lens present in the EYE is known as a crystalline lens Lenses have long been made of glass, a piece approximating roughly the desired size and shape of the lens is cut from a glass block and then ground and polished to the correct curvature Great skill and accuracy are required in the process A number of transparent plastics which permit the lenses to be cast in a mold are offered as substitutes for glass For the history of the use and manufacture of lenses, see SPECTACLES, TELESCOPE, MICROSCOPE, STEREOSCOPE, SEARCHLIGHT

Lent [Old Eng , =spring], Latin *Quadragesima*, Christian period of FASTING and penitence preparatory to EASTER Observance of Lent is as old as the 4th cent In Eastern churches it is reckoned as the six weeks before Palm Sunday In the West the penitential season begins liturgically with Septuagesima, the ninth Sunday before Easter; the next Sundays are Sexagesima and Quinquagesima Lent begins on ASH WEDNESDAY, the 40th weekday be-

fore Easter. Of the Sundays in Lent the fourth is Laetare Sunday, the fifth is Passion Sunday, and the last is Palm Sunday. Lent ends at noon on the next Saturday (Holy Saturday) The last week of Lent is Holy Week Roman Catholics are bound in Lent to fast and perform other works of mortification There are various observances, particularly those connected with the Crucifixion MARDI GRAS precedes Lent (see also SHROVE TUESDAY)

Lentelli, Leo (lĕntĕ'lē), 1879–, American sculptor b Italy He came to America in 1904 and was instructor in the California School of Fine Arts and later in the Art Students League of New York He furnished figures or decorations for the Panama-Pacific Exposition, San Francisco, 1915, and the Sesquicentennial Exposition, Philadelphia, 1926, and for many public buildings, libraries, and churches In New York he made figures for the reredos in the Cathedral of St John the Divine, a doorway of the Straus Bank, and the lunette of the Steinway Building, in San Francisco, groups and figures on the library buildings, and in St Louis, decorations for the Orpheum Theater

lentil, leguminous Old World annual plant (*Lens esculenta*), with whitish or pale blue flowers and pods with two seeds, also called lentils, which when fully ripe are ground into meal or used in soups and stews Probably among the first plants cultivated in Europe, it is known to have been used as early as the Bronze Age Esau sold his heritage for a mess of lentils—though the name of the Scriptures may have been applied to several plants Lentils are much used in Europe, especially by the poor, and increasingly in America The common varieties are the grayish French or dark green German—considered the most palatable—and the reddish Egyptian kinds Yellow and brown varieties are grown too The plant is also cultivated for forage Revalenta Arabica, a lentil meal used in invalids' diet, is an article of commerce The GUIFWEED is sometimes called sea lentil

Lentulus (lĕn'tŭlus), ancient Roman patrician family of the Cornelian gens **Publius Cornelius Lentulus Sura** (sū'rŭ), d 63 B C, was notorious for his private life and was ejected from the senate because of it He was quaestor (81 B C) and praetor (75 and 63 B C) He joined the conspiracy of CATILINE, who put him in charge of the operations in the city It was he who, by opening negotiations with the Allobrogian ambassadors, spoiled the plot He was arrested and strangled **Publius Cornelius Lentulus Spinther** (spĭn'thur), d after 49 B C, was curule aedile (63 B C), praetor (60 B C), and consul (57 B C) He was a consistent partisan of Cicero, who gave him charge of P C Lentulus Sura on the revelation of the conspiracy As consul he was instrumental in procuring Cicero's recall, and he received Cilicia for his proconsulship In 49 B C, Lentulus Spinther took sides with Pompey against Caesar

Lenz, Jakob Michael Reinhold (yä'kôp mĭkh'ā-ĕl rĭn'hôlt lĕnts'), 1751–92, German poet, critic, and dramatist He was a friend of Goethe whom he imitated in his life and writings, but later lampooned A gifted poet, he wrote lyric poems (some to Goethe's old love, Friederike BRION), plays, including the comedies *Der Hofmeister* (1774) and *Die Soldaten* [the soldiers] (1776), and critical works, notably *Anmerkungen übers Theater* [remarks on the theater] (1774) His poems were collected in 1891

Leo I, Saint (Saint Leo the Great), c 400–461, pope (440–61), an Italian, successor of St Sixtus III and predecessor of St Hilary A Doctor of the Church, he was one of the greatest pontiffs of early times He waged a firm campaign against schism and heresy With the aid of Emperor Valentinian III, he campaigned to eliminate Manicheism from Italy Later, asserting his authority over St HILARY OF ARLES, he obtained an imperial rescript which effectively confirmed the authority of the pope over all his bishops In the Nestorian-Monophysite controversy Leo was the leader in defending Catholic teaching He wrote the celebrated *Tome of Leo*, a doctrinal letter defining the two natures and one person of Christ which was later adopted as ecumenical at Chalcedon (see CHALCEDON, COUNCIL OF), when the heresiarch EUTYCHES was condemned He was also effective as a statesman and met (452) ATTILA to persuade him not to invade Rome In 455 he similarly urged Gaiseric the Vandal to spare the lives of the Romans St Leo's letters and sermons reflect the many aspects of his career and personality, including his great personal influence for good, and are invaluable historical sources Feast April 11

Leo III, Saint, d 816, pope (795–816), a Roman, successor of ADRIAN I and predecessor of Stephen V (called Stephen IV, see ZACHARIAS) The pope was attacked about the face and eyes by some of Adrian's family, who hoped to render him unfit for the papacy. Leo recovered and fled (799) to Charlemagne's protection at Paderborn In 800 CHARLEMAGNE came to Rome and conducted a trial during which the pope publicly defended himself against charges of misconduct made by his enemies, Charlemagne declared Leo's enemies guilty and afterwards guaranteed papal liberty. It was Leo who crowned Charlemagne Leo worked to unite East and West, declaring that the *filioque* clause might be said in the CREED, but that its omission was desirable out of respect for the Eastern Church This policy failed Leo did much to beautify Christian Rome Feast June 12

Leo IV, Saint, d 855, pope (847–55), a Roman, successor of Sergius II and predecessor of Benedict III He had seen the Saracen attack on Rome (846), and to prevent its recurrence he fortified the city and its suburbs He built a wall around the Vatican, established and fortified the part of Rome still called the Leonine City, and rebuilt churches He crowned Louis II emperor Feast July 17

Leo IX, Saint, 1002–54, pope (1049–54), a German (b Alsace) named Bruno, successor of Damasus II and predecessor of Victor II A relative of Emperor Conrad II, he was educated at Toul and was made bishop there in 1027 As pope he traveled widely, vigorously combating clerical incontinency and simony The chief figure in this reform program was Hildebrand (later GREGORY VII) The heresy of Berengar of Tours on the Real Presence and his quarrel with Lanfranc also occupied the attention of the pope and Hildebrand St Leo mediated questions presented by England, France, and Hungary He added to the papal lands in Italy through an exchange with Emperor Henry III He fought the Normans of S Italy but was defeated at Civitella (1053) The bitter feeling between East and West brought an attack (1042) on the pope by Michael Cerularius, patriarch of Constantinople This culminated in excommunication of Michael and those in his communion by the papal legates (1054), an action which began the formal schism between East and West The schism became definite in 1439 Feast April 19

Leo X, 1475–1521, pope (1513–21), a Florentine named Giovanni de' Medici, successor of JULIUS II and predecessor of ADRIAN VI He was the son of Lorenzo de' Medici, was made a cardinal in his boyhood, and was head of his family before he was 30 (see MEDICI) Leo was not a competent ruler, he was a good, pious man, a dilettante of letters and art but not greatly interested in the advancement of the Church His chief fame rests on his patronage of RAPHAEL, on the continuation of St Peter's by Bramante, and on his literary circle, including Cardinals Bembo and Bibbiena and many others The Fifth LATERAN COUNCIL called with the hope that it would effect reforms failed to meet the crisis, and the Protestant REFORMATION began when Martin LUTHER posted (1517) his theses Leo condemned the heresies and excommunicated the reformers, notably with the bull *Exsurge Domine* (1520), but he was too much involved in other affairs to pay much attention He spent huge sums and extorted money for cardinals' creations without scruple In politics he brought the papacy temporary hegemony in Italy by dexterity in playing off his opponents one against another Leo granted Henry VIII the title Defender of the Faith (*Defensor Fidei*)

Leo XII, 1760–1829, pope (1823–29), an Italian (b Genga, near Fabriano) named Annibale della Genga, successor of PIUS VII and predecessor of PIUS VIII He was ordained in 1783 He was nuncio in Switzerland, at Cologne, at the Diet of Ratisbon (1805), and at Paris (1808) After the difficulties of Pius VII with the French he went into retirement He was created cardinal in 1816 Cardinal della Genga was elected as a compromise candidate He followed a reactionary course in the Papal States and repressed agitation severely He was better advised in the Church at large, and he gave all support to the movement for Catholic Emancipation in England

Leo XIII, 1810–1903, pope (1878–1903), an Italian (b Carpineto, E of Rome) named Gioacchino Pecci, successor of PIUS IX and predecessor of PIUS X He was ordained in 1837 He earned an excellent reputation as archbishop of Perugia (1846–77), he was created cardinal in 1853 Leo's election brought a turn in the course of the PAPACY, he was abreast of the times and tried, especially by preaching to the whole Church in encyclical letters, to form Catholic attitudes appropriate to living in the modern world His influence was increased by the length of his reign, thus he was able to furnish the college of cardinals with an unusual number of excellent men (including J H Newman in 1879 and James Gibbons in 1886) By a combination of vigor and tact he ended the KULTURKAMPF (1887) He tried repeatedly to bring French Catholics to support the republic In 1885 his encyclical *Immortale Dei* charted the course of Catholics as responsible citizens in modern secular, democratic states, he thus refuted both the claims of French royalists to be especially good Catholics and the contention of French anti-Catholics that the Church was committed to political reaction The letter was a great vindication of Catholic democrats With the anti-Catholic government of Italy there was no conciliation Leo's program for society appeared in *Rerum novarum* (1891), an arraignment of capitalism, showing also the insufficiencies of Marxian socialism; it set up Catholic aims and ideals. This was supplemented in *Quadragesimo anno* of PIUS XI The intellectual attack on Christianity Leo met by advancing Thomism, with its insistence that there can be no conflict between science and faith, to this end he wrote *Aeterni Patris* (1879), declaring the philosophy of St Thomas Aquinas official and requiring its study, he also founded the institute of Thomistic philosophy at the Univ of Louvain. He was profoundly interested in the advancement of learning Thus he opened (1810) the Vatican secret archives to all scholars, and he reminded Catholic historians that nothing but the whole truth must be found in their work He encouraged Bible study and set up (1902) the permanent Biblical Commission He sponsored a number of faculties and universities, including the Catholic Univ at Washington, D C For sheer productivity Leo surpassed all his predecessors in modern times See René Fülop-Miller, *Leo XIII and Our Times* (Eng tr, 1937), Joseph Husslein, ed, *Social Wellsprings Fourteen Epochal Documents by Leo XIII* (1940)

Leo I (Leo the Great or Leo the Thracian), d 474, Byzantine or East Roman emperor (457–74) Chosen by the senate to succeed Marcian, he sought to counteract the preponderance of Germans in the Roman army by enlisting Isaurians A naval expedition (468) against the Vandals of Africa failed through the stupidity or treachery of BASILISCUS, who delayed his attack until Gaiseric was able to fall on him with fire ships Leo I was succeeded by his grandson, Leo II, a child of seven, who died in the year of his accession, Leo I's son-in-law, Zeno then became emperor

Leo III (Leo the Isaurian), c 680–740, Byzantine emperor (717–40), b Isauria, in Asia Minor He held high diplomatic and military posts before he deposed Theodosius III and was crowned in his stead His accession ended the anarchy into which the empire had fallen in the reign of JUSTINIAN II Leo defended Constantinople against an Arab siege (717–18), checking the Arab threat for nearly two centuries, and reorganized the empire in every phase—military, fiscal, judiciary, and administrative His civil code, the *Ecloga*, written in the popular language, was characterized by its Christian approach to marriage and family Leo's attack (726) on devotion to holy images began the long struggle over ICONOCLASM Riots and rebellions broke out in Greece while Byzantine rule in Italy (the exarchate of Ravenna and the Pentapolis) began to crumble The popes Gregory II and Gregory III opposed Leo's iconoclasm and successfully defied his armed expeditions, thus virtually ending Byzantine suzerainty over Rome However, despite these losses, Leo left to his son, Constantine V, a revitalized empire The Isaurian dynasty, which he founded, ruled the Byzantine Empire until 802

Leo IV (Leo the Khazar), d 780, Byzantine emperor (775–80), son and successor of Constantine V He owed his nickname to his mother, a Khazar princess He defeated (778) the Arabs Near the end of his reign he resumed the iconoclastic policy of his father On Leo's death his wife, Irene, became regent for their young son, Constantine VI

Leo V (Leo the Armenian), d 820, Byzantine emperor (813–20) A general, he was crowned after the dethronement of Michael I Leo successfully defended (813) Constantinople against the Bulgars (whose earlier success had caused consternation at the capital and caused Michael's deposition) and concluded a 30-year truce with them Reviving ICONOCLASM, he deposed the patriarch NICEPHORUS in 815 and persecuted the orthodox party among the monks, led by THEODORE OF STUDIUM Leo was murdered, while worshiping in the sanctuary, by conspirators who proclaimed MICHAEL II emperor

Leo VI (Leo the Wise or Leo the Philosopher), 862?–912, Byzantine emperor (886–912) He succeeded BASIL I, who was—at least under the law—his father His chief accomplishment was the publication (887–93) of the *Basilica*, a modernization of the law of Justinian I, intended to supersede the *Ecloga* of LEO III He sought (900) to end the schism provoked by the patriarch PHOTIUS, but the quarrel was renewed (906), partly over the issue of Leo's fourth marriage During Leo's reign the Arabs completed the conquest of Sicily with the capture (902) of Taormina, sacked Salonica (906), and advanced in Asia Minor Among Leo's edicts are the *Tactica*, for the army and navy, and the *Book of the Prefect*, applicable to the guilds of Constantinople Leo was succeeded by his son, Constantine VII

Leo (lē'ō) [Latin, =the lion], fifth sign of the zodiac It is also the zodiacal constellation named from the Nemean lion, which, according to the story in Greek mythology, was given a place in the heavens in honor of Hercules, after he had killed it The two brightest stars in the constellation are Alpha Leonis, or Regulus, and Beta Leonis, or Denebola. The **Leonids** (lē'ŭnĭdz) are swarms of meteors, radiating from the constellation Leo, through the path of which the earth moves in November and which are visible in greatest numbers in showers occurring at intervals of about 33 years There were remarkably splendid showers of the meteors in 1833 and 1866,

Leo Africanus (äfrĭkā'nŭs), early 16th cent., Moorish traveler in Africa and the Near East. His Arabic name was Al-Hassan ibn Mohammed. Captured by pirates, he was sent as a slave to Pope Leo X. He became a Christian, adopting the name Johannes Leo, and taught Arabic in Rome. Here he wrote in Arabic a description of his journeys in Africa which he issued in Italian in 1526. This was long the only known source on the Sudan. An English translation (1600) was reissued by the Hakluyt Society as *The History and Description of Africa* (3 vols., 1896)

Leoben (lā'bŭn), city (pop 35,785), Styria, S central Austria, on the Mur river and NNW of Graz. It is an industrial center in a coal-mining area. An armistice between France and Austria, preliminary to the Treaty of CAMPO FORMIO, was signed here (1797) to conclude Napoleon Bonaparte's victorious Italian campaign.

Leochares (lēō'kurēz), 4th cent. B.C., Greek sculptor, probably an Athenian. He was associated in the decoration of the Mausoleum at Halicarnassus. He is known to have made portraits, including a gold and ivory group of Philip, Alexander, and others, for Olympia. His *Lyon Hunt of Alexander* was made with Lysippus after 321 B.C. A copy of his *Ganymede and the Eagle of Zeus* is in the Vatican. The *Apollo Belvedere* (Vatican) is sometimes attributed to him.

Leominster (lĕm'stur, lēm'ĭnstur), municipal borough (1931 pop. 5,707; 1943 estimated pop. 6,500), Herefordshire, England. The 11th-century minster was restored in 1866. Farm machinery is made.

Leominster (lĕm'ĭnstur), city (pop. 22,226), N Mass., N of Worcester, set off from Lancaster 1740, inc. as a city 1915. Plastics are made here.

Leôn, Juan Ponce de: see PONCE DE LEÓN, JUAN.

Leôn, Luis Ponce de (lwĕs' pōn'thā dā lāōn'), 1527?–1591, Spanish mystic and poet, an Augustinian monk called Fray Luis de León. He was a professor at Salamanca after 1561. He translated the Song of Songs and the book of Job. In 1572 he was arrested by the Inquisition and spent four years in prison. He is generally considered Spain's greatest lyric poet, and his chief poems are odes, e.g., "Noche serena," "Profecia del Tajo," and "Vida retirada." A love of nature and simplicity of style mark his poetic works. In prose Fray Luis wrote *Los nombres de Cristo* (1583, Eng. tr., *The Names of Christ*, 1926) and *La perfecta casada* [the perfect wife] (1583). See biographies by James Fitzmaurice-Kelly (1921) and A. F. G. Bell (1925).

León (lāōn'), city (pop. 74,155), Guanajuato, central Mexico. Founded in 1576 in a fertile river valley, some 5,600 ft. high but having a mild, temperate climate, León once was the second largest city in Mexico. Frequent floods, especially that of 1888, which almost washed the city away, destroyed its preeminence. A dam has been built to protect it. On the main rail line between El Paso, Texas, and Mexico city, León is a commercial, agricultural, and mining center, with some manufacturing. Wheat is the principal product, but corn, barley, and other staples are also raised, from the mines come gold, copper, silver, lead, and tin. Manufactures include saddles and other leather goods, woolen and cotton fabrics, goldwork and silverwork, and hats.

León (lāōn'), city (1946 estimated pop. 36,475), NW Nicaragua, second largest city of the republic. Founded in 1524 on Lake Managua by Francisco FERNÁNDEZ DE CÓRDOBA, it was moved westward to its present site in 1610 after a severe earthquake. In colonial times León was the political hub of Nicaragua. Center of the intellectuals and artisans, León became the stronghold of the liberal forces after independence from Spain (1821) and engaged in bitter rivalry with the conservative GRANADA. Costly revolutions, in one of which León accepted aid from William WALKER, led to the founding of MANAGUA (1855). León is the commercial rail center between CORINTO and Managua for agricultural products (coffee, cotton, sugar, tobacco) and the industrial output of the region. Some of its Spanish colonial atmosphere survives. In the cathedral Rubén Darío is buried.

Leon (lē'ŏn), Span. *León* (lāōn'), region and former kingdom (20,594 sq. mi., pop. 1,732,082), NW Spain, E of Portugal and Galicia. It includes the provinces of Leon, Palencia, Salamanca, Valladolid, and Zamora, named after their chief cities. Except in the north, where it is crossed by the Cantabrian Mts., Leon is mostly a dry plateau crossed by the Duero and its tributaries. The north has coal mines, forests, and mountain pastures, the rest is agricultural. Leon has long been noted for its linen industry. Early in the Christian reconquest the kings of ASTURIAS gained control over Leon (8th-9th cent.); their territory, of which the city of Leon was made the capital in the 10th cent., became the kingdom of Asturias and Leon. The power of the kings extended also over Galicia and parts of Castile, Navarre, and the Basque Prov., but it was too weak to prevent the rise of the independent kingdoms of NAVARRE and CASTILE. Leon was conquered (1037) by FERDINAND I of Castile, on whose death (1065) the kingdoms again became separate under his sons, ALFONSO VI of Leon and SANCHO II of Castile. In 1072 Alfonso VI reunited the kingdoms, but from 1157 to 1230 Leon again was independent under FERDINAND II and ALFONSO IX. Alfonso married a daughter of Alfonso VIII of Castile, his son, FERDINAND III, permanently united Leon and Castile in 1230. The kings of Leon took a gallant part in the reconquest from the Moors.

Leon (lē'ŏn), Span. *León* (lāōn'), city (pop. 43,260), capital of Leon prov., NW Spain, an agricultural and commercial center. Dating from Roman times, it was reconquered from the Moors in 882 by Alfonso III of Asturias. Early in the 10th cent. Leon replaced Oviedo as the capital of the kingdom of Asturias, which became the kingdom of Leon. The city flourished in the 12th and 13th cent. but declined after the kings of Leon and Castile made Valladolid their favorite residence. One of the many ancient buildings of the city is the cathedral, a fine example of Spanish Gothic (13th–14th cent.).

Leon (lē'ŏn), city (pop. 2,307), co. seat of Decatur co., S Iowa, S of Des Moines and near the Mo. line, settled 1840 as South Independence, named Leon 1855, inc. 1867.

Leonard, William Ellery, 1876–1944, American poet, b. Plainfield, N.J., grad. Boston Univ., 1899, and studied at Harvard, Gottingen, and Columbia universities. He taught English at the Univ. of Wisconsin, becoming professor after 1926. His Miltonic sonnets, *Two Lives* (1925), tell the tragic story of his first marriage, while *The Locomotive-God* (1927), a psychological autobiography, probes the phobia which kept him confined to the environs of his home a large part of his life. He is known also for his verse translations *Empedocles* (1908), *Lucretius* (1916), and *Beowulf* (1923).

Leonard, town (pop. 1,331), E Texas, NE of Dallas, in a farming area, settled c. 1880.

Leonardo da Pisa: see FIBONACCI, LEONARDO.

Leonardo da Vinci (dä vĭn'chē, Ital. lāōnär'dō dä vēn'chē), 1452–1519, Italian painter, sculptor, architect, musician, engineer, and scientist, b. Vinci, a hill village near Empoli. He was the natural son of a Florentine notary and a peasant girl. Little is known about his early life. It is presumed that he passed his childhood with his father's family in Vinci, where he developed his enduring interest in nature. Early sources describe his beauty, charm of manner, and precocious display of artistic talent. In 1466 he moved to Florence, where he entered the workshop of Verrocchio and came into contact with such artists as Botticelli, Ghirlandaio, and Lorenzo di Credi. Early in his apprenticeship, he won admiration with his painting of an angel, and perhaps portions of the landscape, in Verrocchio's *Baptism of Christ* (Uffizi). In 1472 he was registered in the painters' guild. The culmination of Leonardo's art during his first period in Florence is marked by the magnificent unfinished *Adoration of the Magi* (Uffizi) commissioned in 1481 by the monks of San Donato at Scopeto. In this work there is fully revealed the integration of dramatic movement and chiaroscuro that characterizes the master's mature style. He went to Milan c. 1482, he remained at the court of Lodovico Sforza 16 years. In this time he composed the greater part of his *Trattato della pittura* and the extensive notebooks which attest the marvelous versatility and penetration of his genius. As court artist he also organized elaborate festivals. Severe plagues in 1484 and 1485 drew his attention to problems of town planning, an interest which was revived during his last years in France. Many drawings of plans and elevations for domed churches reflect a concern with architectural problems that must have been stimulated by contact with Bramante during these years. He worked c. 1488 on a model for the tambour and dome of the cathedral at Milan. In 1490, he was employed with Francesco di Giorgio as consulting engineer on the restoration of the cathedral at Pavia and later on the cathedral at Piacenza. In 1483 Leonardo, with his pupil Ambrogio de Predis, was commissioned to execute the famous *Madonna of the Rocks*. Two versions of the painting exist. It is generally agreed that the Louvre version was executed first, largely by Leonardo himself, and that the example in the National Gallery, London, was executed later, largely by Ambrogio de Predis after Leonardo's design. Leonardo's fresco of the *Last Supper* (Milan) was begun c. 1485 and completed by 1498. This work is now in badly damaged condition. Leonardo's own experiments with the fresco medium account in part for its disintegration, which was already noticed by 1517. Ravages of time and repeated restorations have obliterated the master's hand in the details and individual figures. Despite this, the composition and general disposition of the figures reveal a power of invention and a sublimity of spiritual content that mark the painting among the world's masterpieces. While at Lodovico's court Leonardo also worked on an equestrian monument to the duke's father, Francesco Sforza. The work was never cast, and the model, admired by his contemporaries, perished during the French invasion of 1499. In 1511 he undertook a similar work with the commission of an equestrian monument for Gian Giacomo Trivulzio. This work was also never completed and known only through drawings related to the project. After the fall (1499) of Lodovico Sforza, Leonardo left Milan and, following brief sojourns in Mantua and Venice, returned to Florence in 1500. Here he engaged in much theoretical work in mathematics and pursued his anatomical studies at the hospital of Santa Maria Nuova. In 1502 he entered the service of Cesare Borgia as a military engineer. His engagement took him to central Italy to study swamp reclamation projects in Piombino and to tour the cities of Romagna. At Urbino he met Niccolò Machiavelli, who later became a close friend. By 1503 he was back in Florence, where he was commissioned to execute the fresco of the battle of Anghiari. This work, like its companion piece assigned to Michelangelo, was never completed, and the cartoons were subsequently destroyed. The work exerted enormous influence on later artists, however, and some impression of the original may be had from anonymous copies in the Uffizi and Casa Horne (Florence), from an engraving of 1558 of Lorenzo Zacchia, and from a drawing by Rubens (Louvre). From about this time dates the celebrated *Mona Lisa* (Louvre). In 1506 Leonardo returned to Milan, engaged by Charles d'Amboise in the name of the French king, Louis XII. Here he again served as architect and engineer. He continued his scientific investigations, concerning himself with problems of geology, botany, hydraulics, and mechanics. In 1510–11 his interest in anatomy quickened considerably. At the same time he was active as painter and sculptor, had many pupils, and profoundly influenced the Milanese painters. A painting generally ascribed to this period is the *St. Anne, Mary, and the Child* (Louvre), a work which exemplifies the characteristics of Leonardo's late style. In 1513 he went to Rome, attracted by the patronage of the newly elected Medici pope, Leo X, and his brother Giuliano. Here he found the field dominated by Michelangelo and Raphael. The aging master was assigned various architectural and engineering projects at the Vatican and received commissions for several paintings. It was perhaps in this period that he executed the enigmatic painting of the young *St. John the Baptist* (Louvre). Giuliano Medici left Rome in 1515 and died at Fiesole in the following year. It is conjectured that Leonardo left with him, attached to his household, and that soon afterwards he accepted an invitation of Francis I of France to settle at the castle of Cloux, near Amboise. Here the old master was left entirely free to pursue his own researches until his death. Although there is no certain record of his last years, he seems to have been active with festival decoration and to have been interested in a canal project. Notes and drawings ascribed to this late period show his continued interest in natural philosophy and experimental science. The versatility and creative power of Leonardo mark him as a supreme example of Renaissance genius. The richness and originality of intellect expressed in his notebooks reveals one of the great minds of all time. As an artist he both epitomized the achievements of the *quattrocento* and realized a new kind of dramatic and formal unity that paved the way for the art of the *cinquecento*. See Edward McCurdy, *The Mind of Leonardo da Vinci* (1928) and *The Notebooks of Leonardo da Vinci* (definitive ed., 1939); Sir Kenneth Clark, *A Catalogue of the Drawings of Leonardo da Vinci in the Collection of His Majesty the King at Windsor Castle* (1935) and *Leonardo da Vinci* (1939).

Leoncavallo, Ruggiero (rōōd-jā'rō lā"ōn-käväl'lō), 1858–1919, Italian composer. His *Pagliacci* (Milan, 1892), his one outstanding success, and Mascagni's *Cavalleria rusticana* are the classic examples of Italian *verismo*. Of his numerous other operas, only *Zaza* (1900) was even a moderate success.

Leoni, Leone (lāō'nē lāō'nē), 1509–90, Italian sculptor and medalist, called Leone Aretino. Entering the service of the emperor, Charles V, he devoted himself to making statues, busts, and reliefs for the imperial family. His *Charles V Repressing Violence* and other works are in the Prado. His son, **Pompeo Leoni** (pōmpā'ō), c. 1533–1608, who worked with him, continued in the imperial service. His most important works were kneeling bronze figures of Charles V and Philip II, with their families, for the sanctuary in the Escorial.

Leonia (lēō'nēu), residential borough (pop. 5,763), NE N.J., near the western approach to the George Washington Bridge, inc. 1894.

Leonidas (lēō'nĭdus), d. 480 B.C., king of Sparta. He succeeded (c. 491 B.C.) his half brother, Cleomenes I. When the Persians invaded Greece under Xerxes (480 B.C.), Leonidas with 300 Spartans and 5,000 auxiliaries was given the pass at Thermopylae to hold. There was treachery. Most of the Greeks got away, but the Spartans and 700 Thespians disdained to flee and were killed. Herodotus immortalized the incident. See PERSIAN WARS.

Leonids: see LEO, sign of the zodiac.

Leonov, Leonid (lyĭunyĕt' lyĭō'nŭf), 1899–, Russian novelist. A major figure in the revival of the novel of psychological and social realism, he is concerned primarily with the problem of adjustment to a society in flux. In *The Badgers* (1924;

Eng. tr., 1947) this appears as a clash between country and city types, in *Skutarevsky* (1932; Eng. tr., 1936) as the struggle for adjustment of a great scientist. Of his major works, *The Thief* (1927; Eng. tr., 1931), *Sot* (1930, Eng tr., 1931; American ed., *Soviet River*, 1932), *The Road to the Ocean* (1935, Eng tr., 1944), and *Chariot of Wrath* (1944, Eng. tr., 1946) are known abroad. *Chariot of Wrath* is an important novel of the Second World War. His drama *Invasion, 42* (Eng tr., 1943) was one of the three plays most often staged during the war.

Leontini (lēŏntī'nĪ), ancient city, E Sicily, c 20 mi S of Catania. It was a colony of Chalcidians from Naxos (729 B.C.) and passed under the rule of Syracuse (5th cent. B.C.). It was sacked (A.D. 848) by Saracens and destroyed (1693) by earthquake. The town on the site is Lentini (lĕntē'nē).

leopard, mammal of the cat family, widely distributed through Africa and Asia. It is also called panther and pard. In various races the ground color of the thick fur is yellow buff, rusty, or gray, patterned with black rosettes. Black leopards are not of a separate species. They frequently occur in a litter of those of the normal color. The male Indian leopard sometimes reaches a total length of nearly 7½ ft. Hunting both in trees and on the ground, leopards prey on monkeys, dogs, and other mammals as well as on birds and reptiles. At high altitudes in Tibet and the Himalayas is found the snow leopard or ounce.

Leopardi or **Leopardo, Alessandro** (älĕsän'drō lāōpär'dē, lāōpär'dō), d. c 1522, Venetian architect and decorative sculptor. He cast (c 1490) the statue of Colleoni left unfinished by VERROCCHIO and also designed the bronze frieze for its pedestal. He later made the bronze sockets for the flagstaffs in the Piazza San Marco. He is said to have worked on the tombs of the doge Andrea Vendramin and of Cardinal Zeno.

Leopardi, Giacomo, Conte (jä'kōmō kōn'tā lāōpär'dē), 1798–1837, Italian poet. An invalid from infancy, he lived a life of suffering and frustration, much of the time practically a prisoner in the home of his parents, who kept him without funds partly through mistrust of his ideas. He was a liberal and an agnostic at a time when independence of thought was dangerous in Italy. His poetry, so deeply patriotic as to be filled with contempt for Italy's present governors, is lofty in feeling, lyrical, but profoundly pessimistic. His early poems, "Appressamento alla morte" [approach to death] (1816) and the odes "All' Italia," "Sopra il monumento di Dante," and "Ad Angelo Mai" (all pub. 1820) were written before he was 20. Toward the end of his short life he turned to political and social satire, his prose works of this period include *Patinodia* and *Paralipomeni* (both 1837). A complete edition of his works was brought out by his friend Antonio Ranieri in 1845. Leopardi's poems have been translated by F. H. Cliffe (1893), G. L. Bickersteth (1923, with the Italian version), and R. C. Trevelyan (1941). His chief prose work, *Operette morali* (1826–27), was translated as *Essays, Dialogues, and Thoughts* in 1893 and 1905. See biography by the Marchesa Iris Origo (1935).

Leopold I, 1640–1705, emperor (1658–1705), king of Bohemia and Hungary, second son and successor of Ferdinand III. Upon his older brother's death (1654), Leopold, who had been educated for the Church, became Ferdinand's heir. Throughout his reign the empire was menaced by Turkey in the east and by Louis XIV of France in the west. The Turkish invasions of Hungary were checked by MONTECUCCULI, but by the Treaty of Vasvar (1664) the Turks kept their conquests and suzerainty over Transylvania. Leopold headed the anti-French coalition in the third (1672–78) of the DUTCH WARS. The Hungarian revolt led by THOKOLY (1678) made Leopold decide upon a policy of conciliation, but Thokoly rejected his concessions and appealed to the Turks. They besieged Vienna (1683), which was saved by JOHN III of Poland and CHARLES V of Lorraine. Leopold's attempts to stop French aggression by the formation of the League of Augsburg divided his energies, and the struggle with the Turks was prolonged, but after the conclusion of the War of the GRAND ALLIANCE and the triumph of EUGENE OF SAVOY at Zenta (1697), victorious peace with the Turks was made by the Treaty of KARLOWITZ (1699). In 1701 Leopold entered the War of the SPANISH SUCCESSION. He died before its end and was succeeded by his son, JOSEPH I.

Leopold II, 1747–92, emperor (1790–92), king of Bohemia and Hungary (1790–92), as Leopold I grand duke of Tuscany (1765–90), third son of Maria Theresa. Succeeding his father, Emperor Francis I, as grand duke of Tuscany, Leopold reorganised the Tuscan government, abolished torture and the death penalty, equalised taxation, and sought to gain control over the Church by reviving Gallican doctrines. When Leopold succeeded (1790) his brother JOSEPH II as emperor and as ruler of the Hapsburg lands he took over a nearly disrupted state. To pacify his subjects in the Austrian Netherlands (see NETHERLANDS, AUSTRIAN AND SPANISH), in Hungary, and in Bohemia, he repealed most of Joseph's radical reforms. Unlike Joseph, he had himself crowned king at Pozsony (now Bratislava) and at Prague, he was the last crowned king of Bohemia. Having reached an agreement (1790) with Frederick William II of Prussia (who was about to side with Turkey in its war against Russia and Austria), Leopold abandoned his alliance with Catherine II and concluded a separate peace treaty at Sistova (1791) with Turkey, the pre-war borders were substantially restored. Leopold's troops marched into the Austrian Netherlands and suppressed the Belgian republic in 1790. In order to prevent the fall of the French monarchy and to come to the aid of his sister and brother-in-law, Marie Antoinette and Louis XVI of France, Leopold instigated (1791) the Declaration of Pillnitz, by which the emperor and the king of Prussia promised to mobilize their forces against the French revolutionists and invited the other powers to join them. This declaration was a basic cause of the outbreak of the French Revolutionary Wars a few weeks after Leopold's death. Leopold was succeeded by his son, Francis II. Leopold II is generally considered a ruler of outstanding diplomatic and administrative abilities. An Italian by upbringing and taste, he brought a fresh approach to the problems inherited from his German predecessors.

Leopold I, 1790–1865, king of the Belgians (1831–65), third son of Francis Frederick, duke of Saxe-Coburg-Saalfeld. He married (1816) Princess Charlotte, only child of the English prince regent (later King GEORGE IV) and heiress presumptive to the English throne, after her death (1817) he remained in England. He refused the throne of Greece (1830), but in 1831 accepted election as king of newly formed Belgium. Leopold I's wide family connections as well as his talent for negotiation and secret diplomacy gave him a considerably greater importance in European affairs than the size of his kingdom justified and earned him the nickname "Uncle of Europe." He brought about the marriage of his niece, Queen VICTORIA of England, to his nephew, Prince ALBERT, and attempted to influence English policy through them, but was balked in his efforts by the obstinacy of his pupils and of their ministers. His son, Leopold II, succeeded him.

Leopold II, 1835–1909, king of the Belgians (1865–1909), son and successor of Leopold I. His reign was one of industrial and colonial expansion. He organized, with the help of H. M. STANLEY, the International Association for the Exploration and Civilization of the Congo (1876). At a European conference on African affairs (Berlin, 1884–85), the Congo Free State was established under Leopold's personal rule (see BELGIAN CONGO). Leopold used his power to build up a huge personal fortune through its direct exploitation and the letting of concessions. Forced labor was extorted from the natives, frequently by methods of barbarous cruelty, till the steadily rising scandal compelled Leopold to turn over the Congo to the Belgian government (1908). In Belgium itself the Conservative Catholic party replaced (1880) the Liberals in power. Increasing social unrest and the rise of the Labor party forced (1893) the introduction of universal male suffrage, but labor unrest continued because of the appalling condition of industrial workers amid the growing prosperity of Belgian economy. Leopold's private life was scandalous and dissolute. He was succeeded by his nephew, Albert I.

Leopold III, 1901–, king of the Belgians (1934–), son and successor of Albert I. A year after his father's tragic death, Leopold's queen, Astrid, a Swedish princess, was killed near Lucerne, Switzerland, in an automobile accident while Leopold was at the wheel. In 1936 Leopold announced a fundamental change in Belgian foreign policy. Belgium abandoned its military alliance with France in favor of returning to neutrality. Leopold and Queen Wilhelmina of the Netherlands vainly sought to mediate at the outbreak of the Second World War (1939). In May, 1940, Germany—which in 1937 had guaranteed the neutrality of Belgium—invaded the Low Countries. Leopold led the Belgian army in resisting the invaders, but when the defense of Belgium became hopeless, Leopold decided, over the opposition of his cabinet, to make a separate armistice. On May 28 he surrendered unconditionally, thus provoking accusations of treason. Leopold, a prisoner of war at his castle at Laken, refused to exercise active rule under German tutelage. In 1941 he married a commoner, whom he later created princess of Réthy. In 1944 Leopold was removed to Germany, where he was freed by Allied troops in 1945. His return to Belgium, a burning question in Belgian politics, still hung in the balance at the end of 1949. Accused of cooperation with National Socialist Germany and of fascist sympathies by the Liberal and leftist parties and supported by the Catholic Conservatives, Leopold was barred (1945) from returning without permission of the parliament. Leopold refused to abdicate, asking for a popular referendum. He spent his exile mostly in Switzerland while his brother, Prince Charles, acted as regent. A referendum held in March, 1950, favored the king's return by a narrow margin (57.68 percent of the votes). Leopold's strongest support came from the Flemish-speaking provinces, while French-speaking Belgium voted heavily against him. The heir to the Belgian throne is Leopold's son by Queen Astrid, Baudouin (Baldwin), duke of Brabant.

Leopold I, 1676–1747, prince of Anhalt-Dessau (1693–1747). He served as field marshal in the Prussian army and was nicknamed the old Dessauer. Under Frederick William I of Prussia, he organized the Prussian infantry. Leopold, a stern disciplinarian, was an able commander and was considered one of the chief military men of Europe. He distinguished himself in the War of the Austrian Succession.

Leopold I, grand duke of Tuscany: see LEOPOLD II, emperor.

Leopold II, 1797–1870, grand duke of Tuscany (1824–59). Liberally inclined at first, he granted many reforms and undertook useful public works. In 1848 he approved a constitution and joined Sardinia in its war against Austria (see RISORGIMENTO). Refusing the demands of the extremists, however, Leopold left Tuscany in Feb., 1849, and returned six months later in the wake of Austrian troops. He turned to reaction and repealed (1852) the constitution. In 1859 he was forced to abdicate in favor of his son, Ferdinand IV, who was deposed in 1860.

Leopold III (Leopold the Pious), c 1073–1136, margrave of Austria (1096–1136). By his marriage (1106) with Agnes, widow of Duke Frederick I of Swabia (see HOHENSTAUFEN), he became the stepfather of King Conrad III and the father of Otto of Freising and of Duke Henry II of Austria (see BABENBERG). In 1125 he refused an offer of the imperial crown. The founder of numerous monasteries (of which Heiligenkreuz, Klosterneuburg, and Mariazell still exist), he was canonized in 1485 and is the patron saint of Austria.

Leopold II, Lake, 70 mi. long and 30 mi. wide, SW Belgian Congo. It ultimately drains to the Congo.

Leopoldville, city (pop. c 157,000), capital of Belgian Congo (since 1926), on Stanley Pool of the Congo. It was founded by Henry Stanley and named in honor of the Belgian king, Leopold II. It is the terminus of navigation on the Congo from Stanleyville, and it is connected by rail with the coast. There are light industries. The European population is c 7,000.

Leovigild (lēō'vĭgĭld", lā'ō-), d. 586, Visigothic king of Spain (568–86), brother and successor of Athanagild. He was joint ruler to 573 with his brother Liuva. He planned the conquest of the whole Iberian Peninsula, reorganized the administration, and assumed a royal pomp imitated after that of the Byzantine court. He suppressed a revolt of the Basques in 581 and in 584–85 annexed the kingdom of the Suevi. His son Hermenegild, having been converted from Arianism to Catholicism, rebelled against his father with the support of the Catholic party, in 585 he was put to death. At the end of Leovigild's reign the only non-Visigothic parts of Spain were two small territories of the Byzantine Empire. Leovigild made important additions to the Visigothic laws (see GERMANIC LAWS). His son Recared succeeded him.

Lepage, Jules Bastien-: see BASTIEN-LEPAGE, JULES.

Lepanto (lĭpăn'tō), town (pop. 1,198), NE Ark., near the Mississippi, inc. 1909.

Lepanto, battle of (lĭpăn'tō), Oct. 7, 1571, naval battle fought off Lepanto (see NAUPAKTOS), Greece, between the fleet of the Holy League, commanded by JOHN OF AUSTRIA, and the Turkish fleet, commanded by Ochiali Pasha. The allied fleet (about 200 galleys, not counting smaller ships) consisted mainly of Spanish, Venetian, and papal ships and of vessels sent by a number of Italian states. It carried c 30,000 fighting men and was about evenly matched with the Turkish fleet. The battle ended, after a bitter struggle, with the virtual destruction of the Turkish navy (except 40 galleys, with which Ochiali escaped). Some 15,000 Turks were slain or captured, some 10,000 Christian galley slaves were liberated, and much booty was taken. Among the allied wounded was Cervantes, who lost his left arm in the fighting. Lepanto was the first major Turkish defeat by the Christian powers. It did not, however, affect Turkish supremacy on the land, and a new Turkish fleet was speedily built by Mohammed Sokolli, the grand vizier of Selim II. The battle was decisive in the sense that a Turkish victory probably would have made the Ottoman Empire supreme in the Mediterranean. The well-known poem, *Lepanto*, by G. K. Chesterton glorifies the Christian victory.

lepidodendron (lĕp"ĭdōdĕn'drun) [as if Gr., =scaly-leaf], plant of the genus *Lepidodendron*, extinct trees of which many species flourished in the CARBONIFEROUS PERIOD of geologic time. They are related to the club mosses of the present time. Lepidodendrons grew to heights of from 50 to 100 ft. and reached a diameter of from 4 to 6 ft., the trunk dividing into two main branches which divided repeatedly to form a spreading top of stumpy branches. The long, stiff, needlelike leaves grew chiefly on the smaller branches, dropping early from the trunk and large branches and leaving the

spirally arranged, diamond-shaped scars which give the trees their name The rhizomes of the lepidodendron, like those of the allied SIGILLARIA, are known as STIGMARIA

Lepidus (lĕp'ĭdŭs), family of the ancient Roman patrician gens Aemilia **Marcus Aemilius Lepidus** (ēmĭl'ĭŭs), d 77 B C , was praetor of Sicily (81 B C) He was consul in 78 B C He was bitterly opposed to the senatorial leader CATULUS, his colleague, and after his term, when he was ostensibly on his way to his proconsulship in Transalpine Gaul, he raised an army in N Italy Pompey and Catulus defeated him, and he fled from Italy **Marcus Aemilius Lepidus,** d 13 B C , his son, was praetor (49 B C) and consul (46 B C) with Caesar He was appointed to Narbonese Gaul and Nearer Spain He supported ANTONY, who joined him in Gaul after the defeat at Mutina (modern Modena) in 43 B C They formed the Second Triumvirate with Octavian (AUGUSTUS) After the battle of Philippi (42 B C) Lepidus received the governorship of Africa, whence he returned ('36 B C) to conquer Sicily Octavian suspected him of trying to keep Sicily for himself and deprived him of his offices, excepting that of pontifex maximus

L'Épiphanie (lāpē"fänē'), village (pop 1,941), S Que , NE of Montreal Furniture is made here

Le Play, Pierre Guillaume Frédéric (pyĕr' gēyōm' frādārĭk lu plā'), 1806–82, French sociologist and economist As an engineer, he traversed Europe, at the same time gathering data on the economic status of workers and making detailed studies to determine relationships of the family and worker to environment He upheld Christian morality and existing institutional forms, but urged social reform His influence, as one of the first to use the social-survey method, has been widespread Among his books are *Les Ouvriers européens* [the European workers] (1855), condensed and republished as *Reforme sociale en France* (1864), and *La Constitution de l'Angleterre* [the constitution of England] (1875)

leprechaun (lĕ'prŭkôn), Irish FAIRY, said to be about 2 *ft* tall, looking like an old man Leprechauns are thought to own great treasures, which they will not yield unless frightened into it by human beings

leprosy, infectious disease caused by a bacterium (*Mycobacterium leprae* or *Bacillus leprae*) There are two forms of the disease, and although both commonly appear in the same patient, the symptoms characteristic of one of the two usually predominate The lepromatous or cutaneous form is the more acute of the two types and is marked by the formation of hard nodular swellings (teeming with the bacteria) in the skin, in the mucous membranes of the nose, throat, and eyes, and sometimes in the internal organs In the neural type, the more benign form, the germs accumulate in the nerves and cause loss of sensation especially in the extremities The patient usually lives for many years after the onset of the neural type of the disease, but frequently various forms of paralysis and atrophy of tissues with loss of fingers and toes and sometimes of limbs result Leprosy is not a highly communicable disease It is believed to be transmitted through close contact, over a period ranging from a few months to years, with a leprous person, possibly by the entrance of the germs through lesions of the skin Determination of the exact mode of transmission is difficult partly because of the great variation in the incubation period Sometimes the disease occurs within a few months or a year after contact with a leprous person, but more often it develops from 5 to 20 years after exposure Young children are more susceptible than are adults Many persons seem to possess immunity to the disease, but as in the case of many other diseases, the degree of immunity varies with the individual and with the peoples of different countries A tropical or subtropical climate and crowded unsanitary living conditions contribute greatly to the spread of leprosy Most of the cases diagnosed in the United States have been contracted in tropical or Oriental countries, although it is endemic in parts of Florida, Louisiana, and Texas In the United States all patients known to be capable of transmitting the disease are cared for in the National Leprosarium, Carville, La Leprosy is a disease of antiquity, its origin is not definitely known, although records indicate that it was endemic in Egypt possibly c 4000 B C and in India and Japan probably earlier than 1000 B C The Bible describes the disease and advocates segregation and disinfection as methods of control (Lev 13, 14) Because leprosy was sometimes confused with other diseases, its history is difficult to trace in Europe, some think that it was introduced from Egypt in the 1st cent. It gradually spread over most of the continent and to the British Isles The Crusades were a factor in disseminating the disease, and in the 13th cent. leprosy reached the height of its epidemic proportions. Laws concerning the segregation of lepers date from about the 7th cent Leprosariums or retreats to which lepers were sent were established in most countries, these were a factor in stamping out the epidemics, and by the end of the 16th cent. it was no longer a scourge

Lepsius, Carl Richard (rĭkh'ärt lĕp'syōŏs), 1810–84, German Egyptologist He made an expedition (1842–45) to the Nile valley and the Sudan and as a result of his excavations and studies wrote *Denkmäler aus Ägypten und Äthiopien* [monuments from Egypt and Ethiopia] (12 vols , 1849–59), which remains an important archaeological work

Leptis (lĕp'tĭs), ancient city of Libya, E of Tripoli It was founded (c 600 B C) by Phoenicians from Sidon It flourished as an important port under the Romans The most extensive ruins of Roman Africa are here The site is now Lebda It is sometimes called Leptis Magna to distinguish it from another Leptis, in Tunisia, S of Hadrumetum

Lerdo (lĕr'dhō) or **Ciudad Lerdo** (syōōdhädh'), city (pop 9,349), Durango, N Mexico, 4 mi W of Torreón A rail and processing center in an irrigated agricultural district, it is a pleasantly prosperous small city

Lerdo de Tejada, Miguel (mēgĕl' lĕr'dhō dā tähä'dha), d 1861, Mexican liberal statesman, a leader of the Revolution of AYUTLA, cabinet member under Juan ÁLVAREZ As minister under COMONFORT, he initiated the Ley Lerdo (1856), a law providing for the forced sale of all real property of the Catholic Church He helped to draft the constitution of 1857 and later drew up a law nationalizing church property His laws were essential parts of the reforms of Benito JUÁREZ His younger brother, **Sebastián Lerdo de Tejada** (sāvēstyan'), 1820?–1889, also an important liberal in the Revolution of AYUTLA, was for years a close associate of Juárez He succeeded as provisional president after the death of Juárez (1872) A revolt under Porfirio Díaz, begun in 1871, was put down The reform laws were incorporated in the constitution (1874) Order was restored for a time, but when in 1876 Lerdo procured the consent of congress to his continuance in office, a new revolt began, again led by Porfirio Díaz Lerdo's forces were defeated, and he fled to New York, where he died

Lérida (lā'rĕdhä), city (pop 35,061), capital of Lérida prov , NE Spain, in Catalonia, on the Segre river It is the center of a fertile region producing sugar beets, cereals, wine, and olive oil The ancient Ilerda, it was taken (49 B C) by Julius Caesar, who here defeated Pompey's generals Lérida fell to the Moors in A D 714 and was liberated (1149) by Raymond Berengar IV of Barcelona The university founded here (c 1300) by James II of Aragon was discontinued in 1717 In the Spanish civil war of 1936-39 Lérida was a key defense point for Barcelona, it fell to the Insurgents in April, 1938 The old section of the city is dominated by the castle, the ramparts of which also enclose the Romanesque cathedral

Lérins (lārĕs'), small group of islands, Alpes-Maritimes dept , SE France, in the Mediterranean opposite Cannes On the isle of Saint-Honorat is a monastery, the oldest in Western Europe, founded c 400 by St Honoratus Part of the buildings are early Romanesque. St Patrick spent several years here

Lerma, Francisco Gómez de Sandoval y Rojas, duque de (fränthĕ'skō gō'mĕth dā sändōvāl' ē rō'häs dōō'kā dā lĕr'mä), 1552?–1625, Spanish statesman, favorite of King Philip III He became premier upon Philip's accession (1598) and controlled the government for 20 years The expulsion of the Moriscos (1609) enabled him to enrich himself tremendously by confiscating their property His venality and corrupt administration finally led to his downfall (1618), although he had shortly before become a cardinal After an inquiry ordered by Philip IV (1621) Lerma was compelled to restore to the state part of his wealth

Lerma (lĕr'mä), river rising in Mexico state, central Mexico, near Toluca, and flowing NW and W through Guanajuato and between Jalisco and Michoacán to Lake CHAPALA The river draining the lake and flowing NW through Jalisco and Nayarit to the Pacific is generally called the Santiago, but it is considered a continuation of the Lerma It is widely used for irrigation and hydroelectric power.

Lermite, Tristan: see TRISTAN L'HERMITE

Lermontov, Mikhail Yurevich (mĭkhīŏōĕl' yōōr'yĭvĭch lyĕr'muntōf), 1814–41, Russian poet and novelist He began to write in 1829 but was catalyzed into genuine poetic activity in 1837 by the death of Pushkin, against which he protested in a violent poem, "On the Death of the Poet " A prevailing element in his poetry is the Caucasus, to which he was temporarily banished as a result of this poem and to which he often returned Although strongly influenced by Byron, he displays in such works as the ballads "Borodino" (1837) and "The Song of Tsar Vasilievich" (1837, Eng tr in *A Treasury of Russian Life and Humor,* 1943) and the novel *A Hero of Our Time* (1840, Eng tr , 1928) foreshadowings of realism, so that he is a transition figure between Pushkin and Gogol His masterpiece is *The Demon* (1829–41, Eng tr , 1930), an autobiographical poem of the Caucasus used by Anton Rubinstein as the basis of an opera Also to be noted is *Mtsyri* (1840), a poem of rebellion, translated as *The Circassian Boy* (1875). Lermontov as a lyricist ranks almost on a par with Pushkin Like Pushkin, he was killed in a duel See Vladimir Nabokov, *Three Russian Poets* (1944).

Leros (lĕ'rŏs, lē'rŏs), island (21 sq mi ; pop. 6,131), off W Turkey, one of the DODECANESE islands, belonging to Greece.

Le Roy, 1 City (pop 1,783), central Ill , SE of Bloomington, inc 1857 It is a trade and processing center in a farm area 2 Village (pop 4,413), W N Y., E of Batavia, in a fertile farm region; settled 1793, inc 1834 Gelatine products are made An egg-laying test farm, sponsored by Cornell Univ , is near by

Leroy-Beaulieu, Anatole (anätôl' lurwä'-bōlyû'), 1842–1912, French writer on political science After long residence in Russia, he wrote *L'Empire des tsars et les Russes* (1881, Eng tr , *The Empire of the Tsars and the Russians,* 1893–96), a study of Slavic political and economic organization Other of his publications are *Un homme d'etat russe, Nicolas Milutine* (1885) and *Le Papauté, le socialisme et la démocratie* (1892) His brother **Pierre Paul Leroy-Beaulieu** (pyĕr' pôl'), 1843 -1916, economist, edited the *Journal des débats* and founded the *Économiste français* in 1873, editing it until his death His most important works are *Traité de la science des finances* (1877) and *Essai sur la répartition des richesses* [essay on the division of wealth] (1881), in which he refuted the Ricardian theory of rent

Lerroux, Alejandro (älähän'drō lĕrōō'), 1864–1949, Spanish statesman A republican member of the Cortes after 1901, he played an important role in the overthrow of the monarchy in 1931. He was several times premier and held other cabinet posts between 1933 and 1935 As leader of the Radical Center party he represented middle-of-the-road republicanism Late in 1935 he resigned after bribery charges were leveled at members of his party The 1936 elections brought the Popular Front into power Lerroux fled to Portugal after the outbreak (1936) of civil war, but was allowed to return to Spain in 1947

Lerwick (lûr'wĭk, lĕr'rĭk), burgh (pop 4,221), county town of the Shetland Islands, Scotland, on the east coast of the island of Mainland It is the most northerly town in the British Isles Fort Charlotte, a naval reserve station, was built by Oliver Cromwell and rebuilt by Charles II Lerwick is the chief market town for the Shetlands and the center of the northern herring fisheries An annual festival (uphelya) is held here in January to celebrate the new year

Les. For names beginning thus and not listed here, see second element, e g , for Les Andelys, see ANDELYS, LES

Le Sage, Alain René (alĕ' rünä' lusazh'), 1668–1747, French novelist and dramatist, author of *Gil Blas* Le Sage made his living by writing light pieces for the theaters of Paris, his dramatic masterpiece is *Turcaret* (1709), a comedy of character, bitterly satirizing the farmers of the revenue and money-seekers in general The great *Gil Blas de Santillane* (1715–35, Eng tr by Tobias Smollett, *The Adventures of Gil Blas of Santillane,* 1749) is a long rambling story in the manner of the Spanish picaresque romances, but not like them in tone or treatment It is instead strongly realistic, especially in its incidents, it is the first great novel of material realism Smollett's translation of *Gil Blas* is the most popular one in English, a different, less exact translation by B H Malkin (1st ed , 1809) has also been published under Smollett's name Smollett drew heavily on *Gil Blas,* especially in *Roderick Random* Of Le Sage's lesser novels, *Le Diable boiteux* (1707, Eng tr , *Asmodeus, or, The Devil upon Two Sticks*) is an adaptation of a Spanish novel, and *Estevanille Gonzalès* (1734) and *Le Bachelier de Salamanque* (1736, Eng tr , *The Bachelor of Salamanca*) are imitations of *Gil Blas*

Lesbos (lĕz'bŏs), island (632 sq mi , pop 134,054), off W Turkey, in the Aegean Sea, but belonging to Greece MYTILENE is the name of the chief city and an alternate name of the island Wheat, olives, vegetables, and citrus fruit are grown here, and stock raising and fishing are important occupations Lesbos was settled by Aeolians in the Aegean expansion of the Greeks (c 1000 B C) and became a brilliant center of civilization in the 7th cent B.C Then flourished the poets Alcaeus and Sappho and the statesman Pittacus Lesbos joined the Delian League and revolted unsuccessfully against Athens in 428 B C Aristotle and Epicurus lived here, and Theophrastus was born on Lesbos See Winifred Lamb, *Excavations at Thermi in Lesbos* (1936)

Lescarbot, Marc (märk' lĕskarbō'), fl 1599–1619, lawyer, poet, and historian of New France, b near Laon, France In 1599 he was called to the bar in Paris While briefly (1606–7) in Port Royal, Acadia, Lescarbot wrote and produced *Le Théâtre de Neptune* (Eng tr , 1927), the first existing play written and produced in North America His *Histoire de la Nouvelle-France* (1609, Eng tr , 3 vols., 1907–14) recounts in lively vein some of the early annals of New France He also published a volume of verse, *Les Muses de la Nouvelle-France* (1609)

Les Cayes, Haiti. see AUX CAYES.

Lescaze, William (lĕskäz'), 1896–, American architect, born and trained in Switzerland. Coming to the United States in 1920, he became a citizen in 1929. He was known soon as a master of the inter-

national style. His works include the Philadelphia Saving Fund Society building (with George Howe, 1932) and the CBS studios in Hollywood (1938). Lescaze wrote *On Being an Architect* (1942).

Les Cheneaux Islands (lā shĕn'ō) [Fr., = the channels], group of 35 small wooded islands, S of the E Upper Peninsula, N Mich., in Lake Huron NE of the Straits of Mackinac. The name is sometimes locally altered to "the Snows." An annual regatta is held here.

Leschetizky, Theodor (tā'ōdōr lĕshutĭts'kē), 1830–1915, Polish pianist and teacher, pupil of Czerny. He taught (1852–78) at the St. Petersburg Conservatory, afterward teaching privately in Vienna, where among his many pupils were Paderewski and Gabrilowitsch. He composed an opera and some piano pieces, but it was as a teacher that he distinguished himself.

Lescot, Pierre (pyĕr' lĕskō'), c 1510–1578, French architect of the early Renaissance. Appointed by Francis I to design a new royal palace in Paris, he built the earliest portions of what was later to become the vast palace of the Louvre and worked on it from 1546 until his death. In this, as in all his other known works, the fine sculptural decorations were executed by Jean Goujon, and the two names are generally associated. To Lescot is attributed the original design of the Hôtel Carnavalet in Paris, later altered by François Mansart. Lescot's works showed the influences of the Italian Renaissance.

Lesdiguières, François de Bonne, duc de (frāswä' du bŏn' dük' du lādēgyĕr'), 1543–1626, marshal and constable of France. He fought on the Huguenot side in the Wars of Religion and in 1575 became chief of the Huguenots of the Dauphiné. He supported Henry IV and in 1590 took Grenoble from the League, but subsequently fought a series of campaigns, ending in 1601, against Charles Emmanuel I of Savoy. He fought with Savoy against Spain (1616–17) and became constable after his abjuration of Protestantism (1622).

lese majesty or **leze majesty** (both lēz' mă'jĭstē) [Fr. *lèse majesté*, Latin *laesae maiestatis (crimen)* = (crime of) violating majesty], offense against the dignity of the sovereign of a state or of a state itself. The offense as such first appeared in Rome but bore a decided resemblance to the crime against the people of Greek law. Lese majesty seems to have been originally considered as a violation of the fundamental laws of the Roman state, a crime against the Roman people. Apparently it was not defined with great exactness. When the Roman Empire replaced the republic, the crime became an offense against the person of the emperor, but it still included the cases which were more generally denominated treason, all attempts to upset the state, as well as actions or words derogatory to, or dangerous to, the state were interpreted as offenses against the sovereign's person. This personality of conception became the main element in the term lese majesty, which in time was applied especially to physical or verbal attack on the sovereign. The legislation against the crime passed into Germanic law, and feudal law heightened the personality of the conception because of the fundamental constitutional importance of the feudal bond. In most modern states the specific crime of lese majesty was confounded with, and included in, the crime of treason. With the decline of absolute monarchies the disappearance of the crime was hastened, though it continued in German law until the fall of the German monarchy in 1918. In some modern countries, however, verbal attacks on the form of government, the head of the state, or public officials are made crimes analogous to lese majesty. In the United States such attack is protected by the right of free speech if not attended by threat of violence. See P. M. Schuss, *Offences against the State in Roman Law* (1926).

Leshem (lĕ'shəm), original name of Dan **2**.

Lesina, Yugoslavia: see Hvar.

Leskov, Nikolai Semyonovich (nyĭkulĭ' sĭmyô'nuvĭch lyĭskôf'), 1831–95, Russian novelist and short-story writer. An early story, *Lady Macbeth of Mzensk* (1866), was used by Shostakovich as the basis of an opera. Leskov won popularity in 1872 with *Cathedral Folk* (Eng. tr., 1924), a pleasant chronicle of a cathedral town. He is best known for his short stories, full of action and written in colorful popular language. Some of these appear in English in *The Sentry* (1923), *The Enchanted Wanderer* (1924), *The Steel Flea* (1943), and *The Tales of N. S. Leskov* (Vol. I, 1944). Under the influence of Tolstoy, Leskov wrote several stories of the early Christians (e.g., *The Mountain*, *The Robber of Ascalon*). *The Hare Chase* (1917) is a brilliant satire written in a mixture of Russian and Ukrainian; it was not published until after his death. See Janko Lavrin, *From Pushkin to Mayakovsky* (1948).

Lesley, John: see Leslie, John.

Lesley, J. Peter, 1819–1903, American geologist, b. Philadelphia, grad. Univ. of Pennsylvania, 1838. Later he studied theology, was licensed (1844) as a minister, and served (1848–51) as pastor of the Congregational Church at Milton, Mass. He returned to geological work in 1852 and became (1859) professor of mining at the Univ. of Pennsylvania and then dean of the scientific faculty (1872). Appointed state geologist in 1874, he directed a survey of Pennsylvania. His writings include *A Manual of Coal and Its Topography* (1856) and *The Iron Manufacturer's Guide* (1859). See biography by his daughter, Mary Lesley Ames (1909).

Leslie, Alexander, 1st **earl of Leven** (lē'vun), 1580?–1661, Scottish general. He served in the Swedish army some 30 years, being knighted by Gustavus II (Gustavus Adolphus) and fighting in the Thirty Years War. Returning to Scotland in 1638, he led the army of the Covenanters in the Bishops' Wars, at the end of which Charles I made him earl, hoping to gain his aid. Nevertheless, in the early wars of the Puritan Revolution, Leven commanded Scottish parliamentary troops in support of Oliver Cromwell against Charles in the royalist defeat at Marston Moor. When Charles fled to the Scottish army in 1647, Leven had charge of the king until the royal prisoner was handed over to the English in 1648. Leven resigned actual command of the army to David Leslie before the Scottish Covenanters, now royalists, were defeated at Dunbar in 1650, but he was twice imprisoned briefly in the Tower of London.

Leslie, Charles Robert, 1794–1859, English painter, b. London, of American parents. He was brought up in Philadelphia but returned to London as a youth and remained there save for a brief period in 1833, when he was drawing professor at West Point. He is best known for paintings illustrating humorous incidents from great books, such as *Uncle Toby and the Widow Wadman* and *Falstaff Impersonating the King* (Tate Gall., London). He painted portraits of Washington Irving, Sir Walter Scott, and other celebrities. The Metropolitan Museum has his portrait of Dr. John Wakefield Francis. Leslie wrote *A Handbook for Young Painters* (1855) and *Memoirs of the Life of John Constable* (1843). See his *Autobiographical Recollections* (1860).

Leslie, David, d. 1682, Scottish commander. After serving in the Swedish army, he was a major general under his uncle, Alexander Leslie, earl of Leven, in the Scottish army that joined the forces of Oliver Cromwell in defeating the royalists at Marston Moor (1644). He also defeated the Scottish royalist, James Graham, earl of Montrose, in 1645. By 1650 he himself was supporting Charles II and as commander of the Scottish royalists was defeated by Oliver Cromwell at Dunbar (1650). After Charles's defeat at Worcester, Leslie was imprisoned (1651–60), and after the Restoration he was made Lord Newark.

Leslie, Frank, 1821–80, American engraver and publisher, b. England. He learned his trade on the *Illustrated London News*, but in 1848 emigrated to New York city, where in 1855 he began publishing *Frank Leslie's Illustrated Newspaper*. His real name, Henry Carter, was discarded when the pseudonym Frank Leslie became widely known. Later he added other family periodicals, all of them bearing his name. He inaugurated a method for more speedily illustrating current events by dividing his drawings into blocks which could be distributed among a number of engravers and afterwards reassembled. His profits and fame were greatest when, in the Civil War, his artists on the battlefields sent back illustrations. They now have much historical value. He became bankrupt in 1877. His second wife was **Miriam Florence** (**Follne**) **Leslie,** c. 1836–1914, b. New Orleans. She had become editor of *Frank Leslie's Lady's Journal* in 1871 and married Leslie in 1873. After his death Mrs. Leslie ably managed the business, bringing it out of debt. She leased it to a syndicate in 1895, but in 1898 was again obliged to take charge to save it. She wrote several books, including *Rents in Our Robes* (1888) and *Are Men Gay Deceivers* (1893), and was an ardent feminist, to which cause she gave much of her fortune.

Leslie or **Lesley, John,** 1527–96, Scottish bishop, historian, and statesman. After the death of Francis II, husband of Mary Queen of Scots, he became her ecclesiastical adviser. He was made bishop of Ross in 1566 and was a member of the privy council which ordered the trial of Lord Bothwell for the murder of Lord Darnley. In 1569 he was made Mary's representative at Queen Elizabeth's court, but was himself arrested (1571) for complicity in the plot to marry the Scottish queen to Thomas Howard, duke of Norfolk. He was released after his full confession and fled to France and thence to Rome. An able historian, he left valuable accounts of the Catholic view of the events of his time. His 10-volume Latin history of Scotland (1578) was translated by James Dalrymple (ed. by E. G. Cody, 1888–95).

Leslie, Sir John, 1766–1832, Scottish physicist and mathematician, studied at the universities of St. Andrews and Edinburgh. He was professor of mathematics (1805–18) and thereafter professor of natural philosophy at the Univ. of Edinburgh. His inventions include a differential thermometer, a photometer, and a hygrometer, as well as a process of artificial refrigeration (freezing water by the use of sulphuric acid and an air pump). His researches in heat radiation won him the Rumford medal, and he was knighted in 1832. His publications include *An Experimental Inquiry into the Nature, and Properties of Heat* (1804), books on mathematics, and *Elements of Natural Philosophy* (1823).

Leslie, Miriam Florence (**Follne**). see Leslie, Frank.

Leslie (lĕs'lē), village (pop. 1,281), S Mich., N of Jackson, in a farm area, inc. 1869.

lespedeza, name used to refer to plants of the genus *Lespedeza*, also called bush clovers, and especially to the Japanese clover (*Lespedeza striata*). The Japanese clover is an annual leguminous plant native to Japan and China and naturalized in North America. It grows to a height of about 18 in.; the stems are much branched, the leaves are divided into three leaflets, and the small flowers are pink or purplish. It is an important forage crop in the S United States, it is also valuable as a means of enriching sandy soils and of checking erosion.

Lespinasse, Julie Jeanne Éléonore de (zhülē' zhan' ālāônôr' du lĕspēnas'), 1732–76, French woman of letters. She aided (1754–64) Mme du Deffand in her salon and organized (1764) one of her own, which superseded that of her patroness after a break came between the women. Mlle de Lespinasse's salon was a center for the writers of the Encyclopédie. Her letters (Eng. tr., 1901, 1929) to the comte de Guibert (written 1773–76) are celebrated as a chronicle of unhappy love. See Camilla Jebb, *A Star of the Salons* (1908).

Lesquereux, Leo (lākurû'), 1806–89, Swiss-American paleobotanist. He attracted the attention of Louis Agassiz when he won a Swiss government prize for a treatise on the peat bogs of his locality, and in 1845 he was commissioned by the government of Prussia to explore the peat bogs of Europe. On his arrival in America (c. 1848), he assisted Agassiz at Cambridge and later went to Columbus, Ohio, where he worked with the eminent bryologist, W. S. Sullivant. He made reports on the flora of the coal formations of Pennsylvania, Ohio, Illinois, Arkansas, and Kentucky, which appear in the geological surveys of those states. His work on the second geological survey of Pennsylvania, published with the title *Description of the Coal Flora of the Carboniferous Formation in Pennsylvania and throughout the United States* (3 vols. in 2, 1880–84, with 1879 atlas), gave him his chief distinction.

Lesse (lĕs'u), river, 50 mi. long, SE Belgium, a tributary of the Meuse, which it joins near Dinant. Traversing the Ardennes, it passes underground through limestone caves.

Lesseps, Ferdinand Marie, vicomte de (fĕrdēnā' marē' vēkôt' du lĕsĕps'), 1805–94, French diplomat and engineer. He entered the consular service in 1825 and was minister to Spain (1848–49). He formulated plans for the Suez Canal while serving in Egypt and in 1854 received the concession for opening a canal through the Isthmus of Suez. He was the chief figure in organizing the canal company and in raising by popular subscription in France over half the capital needed, and he supervised the actual work. Spurred by his success at Suez, he accepted the presidency of a French company that started work on the Panama Canal in 1881, but unforeseen difficulties and lack of funds brought failure (see Panama Canal). The popular indignation helped to bring about the trial of Lesseps for misappropriation of funds, and despite Waldeck-Rousseau's efforts as defense attorney, he was convicted. The prison sentence imposed was not carried out, and most objective observers then and since believed him to have been guilty only of negligence. See his autobiography (1887, Eng. tr., 1887).

Lesser Antilles see West Indies.

Lesser Slave Lake, 60 mi. long and 3 to 10 mi. wide, central Alta., NNW of Edmonton. It drains E into the Athabaska river by the Lesser Slave river, c. 50 mi. long.

Lessing, Gotthold Ephraim (gôt'hôlt ā'fraĭm), 1729–81, German dramatist and critic, one of the most influential literary figures of the 18th cent. He was connected with the theater in Berlin, where he produced some of his most famous works, and in Hamburg, where a plan to establish a national theater failed. In this period he published a collection of fables (1759), adding an essay on the fable. His series of critical essays, *Hamburgische Dramaturgie* (1767–69), which stressed Aristotelian unity of action in dramatic construction, was written in Hamburg. From 1770 he was librarian at Wolfenbüttel, writing there *Zur Geschichte und Literatur* [on history and literature] (1773–77). Other significant critical works are *Literaturbriefe* [literary letters] (1759–65) and *Laokoon* (1766). His dramatic works include *Miss Sara Sampson* (1755), *Minna von Barnhelm* (1767), *Emilia Galotti* (1779), and *Nathan der Weise* (1779, Eng. tr., *Nathan the Wise*), which was partly the result of the numerous theological controversies into which he was drawn by his insistence on freedom of thought. Lessing's introduction into Germany of English literature, especially Shakspere, was an important contribution. See biography by T. W. Rolleston (1889), H. B. Garland, *Lessing, the Founder of Modern German Literature* (1937).

Le Sueur, Eustache (ûstāsh' lü sûr'), 1617–55, French painter, disciple of Vouet and founding

member of the Académie royale de Peinture et de Sculpture (1648) In his short life he painted many decorative works for the palaces of the Louvre and for many churches and convents Much of his work has been badly preserved The best of it is now in the Louvre, which contains, among others, his *St Paul Preaching at Ephesus* and episodes from the *Life of St Bruno*, as well as a collection of chalk drawings in black and white Essentially a religious painter, Le Sueur is notable for fine composition and drawing and sincerity of expression

Lesueur or **Le Sueur, Jean François** (zhäⁿ' frāswä'), 1760–1837, French composer He was director of music (1786–88) at Notre Dame de Paris During the Revolution his operas *La Caverne* (1793) and *Paul et Virginie* (1794), with their violence and sensationalism, so caught the spirit of the time that they were enormously successful and often emulated On the founding (1795) of the Paris Conservatoire he became an inspector and was the teacher of Ambroise Thomas, Gounod, and Berlioz He was composer to the court chapel under both Napoleon and Louis XVIII

Le Sueur, Pierre Charles (pyĕr' shärl' lu sûr'), c 1657–c 1705, French trader and explorer in North America He came to Canada c 1679, traded with the Sioux and the Ojibwa and helped to keep peace between them, and built a number of posts in the Old Northwest, notably one (1693) at La Pointe in the Apostle Islands He went to France for permission to exploit copper deposits When he returned (1700) via the Mississippi and Minnesota rivers, he built a post at the Blue Earth river The ore proved worthless, and he again went to France to secure new concessions but died on the return voyage

Le Sueur (lu sōr'), city (pop 2,302), S Minn , on the Minnesota and N of Mankato, settled 1852 It is a trade center and processes farm products

Leszno (lĕsh'nô), Ger *Lissa* (lĭ'sə), town (pop 20,820), Poland, S of Poznan It passed to Prussia in 1793 and again in 1815 Chiefly a trade center, Leszno also has several industries, there are lignite deposits in the vicinity

Letcher, John, 1813–84, governor of Virginia (1860–64), b Lexington, Va , grad Washington (now Washington and Jefferson) College, 1833 He studied law and practiced at Lexington, where he also edited the Jacksonian Democrat *Valley Star* In Congress (1851–59), he was known as "Honest John" because of his opposition to government extravagance. Letcher opposed secession until, asked to supply its quota of troops for action against the South, Virginia seceded He thereupon turned the state's military forces and supplies over to the Confederacy, which he supported vigorously throughout his Civil War governorship

Letchworth, urban district (1931 pop 14,454, 1943 estimated pop 17,750), Hertfordshire, England, N of London It is a planned industrial town or GARDEN CITY, founded by Sir Ebenezer HOWARD in 1903

Le Tellier, Michel (mĕshĕl' lu tĕlyā'), 1603–85, French statesman He was one of Mazarin's ministers and held several posts under Louis XIV At the time of his death he was chancellor of France He was the father of LOUVOIS

Lethaby, William Richard (lĕ'thubē), 1857–1931, English architect. He was a founder and first principal (1893–1911) of the London County Council Central School of Arts and Crafts, and professor of design at the Royal College of Art He was also an influential writer on architectural subjects Besides his important books *Greek Buildings* (1908), *Mediaeval Art* (1912), and *Architecture* (1912), he contributed to many periodicals

Lethbridge (lĕth'brĭj), city (pop 16,522), S Alta , on Oldman river near the Mont border and SE of Calgary It is the center of one of the largest coalmining districts of Canada, of a ranching country in the foothills of the Rockies, and of an irrigated farming district It is a distributing point for mining and lumbering camps to the west and has grain elevators, cereal mills, and knitting mills It is headquarters for the Royal Canadian Mounted Police in Alberta, and a dominion experimental station and a technical school are here The reservation of the Blood Indians is southwest of the city Founded by Sir A T Galt, it was called Coalbank until 1885 In the Second World War the Canadian government established a large artillery and bombing practice field northeast of the city

Lethe (lē'thē), [Gr , =oblivion], in Greek mythology, river of forgetfulness in Hades The dead drank from Lethe upon their arrival in the underworld, and souls who were being reincarnated drank of its waters upon their departure for the world of the living

Lethington, William Maitland of: see MAITLAND, WILLIAM

Leticia (lātā'sēä), town, SE Colombia, on the upper Amazon The Letecia region, a narrow strip of land extending S of the PUTUMAYO river to the Amazon, had been confirmed as Colombian territory by a treaty in 1922 between Colombia and Peru On Sept 1, 1932, Peruvian irregulars seized it. Hostilities ensued, and diplomatic relations were broken off After Brasil's conciliatory efforts failed, Colombia invoked Article 15 of the League of Nations Covenant; the League appointed (June, 1933) a commission to govern the territory during arbitration On June 19, 1934, it restored the territory to Colombia Active U S. participation by Secretary Stimson with the League established a precedent, permitting interference by an international body in an area covered by the Monroe Doctrine.

Leto (lē'tō), in Greek religion, daughter of the Titans Coeus and Phoebe She was loved by Zeus, and when she was with child, Hera, jealous of her, forbade men or gods to give her aid Leto wandered from place to place until she arrived at Delos, which was then a floating island Zeus chained the island to the bottom of the sea so that it would be a secure resting place Here Leto gave birth to Apollo and Artemis Her children were devoted to her and protected her They killed Niobe for boasting that she was superior to Leto Leto was worshiped only in connection with her children. The Romans called her Latona (lŭtō'nŭ)

Letrinoi, Greece see PYRGOS

letter · see ALPHABET

lettering, specialty in the graphic arts An artist reproduces hand-drawn words, phrases, or sentences for reproduction by one of the printing processes Lettering is used by advertising agencies and publishers for display typography because the artist can produce better-spaced and better-balanced letters than is possible with type set by hand or machine Lettering also permits the advertiser to get the exact degree of blackness needed to suit the layout A good lettering artist is sufficiently familiar with the basic design of letters to produce a wide variety of letter designs, yet within each design keep all the letters in harmony Many lettering artists have designed alphabets for type founders

Letteris, Meir ha-Levi (mīr' hä-lā'vē lĕtā'rĭs), 1800–1871, Austrian-Jewish poet He wrote about 30 volumes of prose and poetry The poem called *Yonah Homiyah* [the plaintive dove] became very widely known and is still popular He is also famous for his Hebrew version of *Faust* called *Ben Abuya*

Letterman, Jonathan, 1824–72, Union army surgeon in the Civil War, b Canonsburg, Pa , grad Jefferson (now Washington and Jefferson) College, 1845, and Jefferson Medical College, 1849 Made medical director of the Army of the Potomac in June, 1862, he ably organized its field medical service, creating effective mobile hospital and ambulance organizations Letterman's system was adopted throughout the Union army and is now used by armies throughout the world See his *Medical Recollections of the Army of the Potomac* (1866)

letter of credit · see CREDIT, LETTER OF

Lettish, Baltic language of Latvia It belongs to the Indo-European family See LANGUAGE (table)

Lettland, see LATVIA

Lettow-Vorbeck Paul von (poul' fŭn lĕ'tō-fôr'bĕk), 1870–, German general He defended German East Africa during the First World War

lettre de cachet (lĕ'trə du käshā'), formerly, in French law, private, sealed document, issued as a communication from the king to an individual or particular group of subjects Theoretically, the king signed, and a secretary of state countersigned, the document, but in later practice the signature of the king was affixed by a clerk The *lettre de cachet*, although of very early origin, came into common use as an instrument of royal justice in the 16th and 17th cent An individual, imprisoned or exiled by a *lettre de cachet*, had no recourse The institution was subjected to some abuse, particularly in the 18th cent , when many leaders of revolutionary thought, including Voltaire and Mirabeau, were punished for crimes of opinion The place of imprisonment sometimes was the BASTILLE *Lettres de cachet* were used by the revolutionaries as a symbol of royal tyranny and were a point of argument at the outbreak of the French Revolution They were abolished by the Constituent Assembly

lettuce, annual garden plant (*Lactuca sativa* and varieties), probably native to the East Indies It is not known anywhere in a wild state, having been in cultivation as a salad plant from antiquity Three varieties of lettuce are planted—head or cabbage lettuce, the leaf or loose type, and Cos lettuce or romaine The first forms a tight, crisp white head, the second has many more leaves and a less compact head which is white toward its center only Cos lettuce or romaine forms long, upright leaves, which, according to variety, may or may not have to be tied up to blanch and form a head It is not as commonly planted but is useful where summers are too hot for the other two varieties. Since lettuce has come into increased favor as a source of vitamins, its culture has been greatly stimulated in the United States, and forcing it for winter use is becoming an extensive industry, especially near large cities Much of the winter crop comes from Florida and California Market gardeners sow the seed in greenhouses, setting out the young plants in the spring, 8 to 12 in apart in a rich, loose soil The plant is generally eaten as a salad but may be cooked, as it often is in France.

Letushim (lĕtū'shĭm) [Heb., =sharpened], eponymous ancestor of an Asiatic tribe. Gen. 25.3.

Leucas, Leukas (both: lū'kəs), or **Levkas** (lĕfkäs'), **island** (114 sq. mi.; pop. 11,000), off W Greece, in the Ionian Sea, one of the IONIAN ISLANDS. It is also known as Santa Maura. The chief town, Leukas (pop. 5,826), is at the northern end of the island. Leucas was colonized (7th cent. B.C.) by Corinth, with which it sided in the Peloponnesian War It later was the capital of the Acarnanian League (3d cent B C). Leucas was captured (1697) from the Turks by the Venetians, who kept it until 1797

Leucippus (lūsĭ'pŭs), 5th cent B.C , Greek philosopher Aristotle believed that Leucippus inspired the atomistic theory with which Democritus is identified Little is known about Leucippus

Leuckart, Karl Georg Friedrich Rudolf (kärl' gä'ôrk frā'drĭkh rōō'dôlf loi'kärt), 1823–98, German zoologist, a founder of the science of parasitology. He made important discoveries in animal physiology and in comparative morphology and classification of invertebrates. His studies and writings on parasitic forms, including worms and insects, were valuable

leucocyte: see WHITE CORPUSCLE

Leucothea (lūkōth'ēə), in Greek mythology, sea deity, with whom the Romans identified MATUTA. She had been a mortal, INO

Leuctra (lōōk'trə), village of ancient Greece, in Boeotia, 7 mi SW of Thebes Here the Spartan king Cleombrotus was defeated by the Thebans under EPAMINONDAS (371 B.C) Leuctra, a brilliant tactical success, was also decisive politically in that it ended Spartan hegemony.

Leukas · see LEUCAS

leukemia (lōōkē'mēə), disease of the bone marrow in which there is an abnormal proliferation of white blood cells (leucocytes) or their precursors It is generally thought to be a malignant neoplastic disease which spreads by means of the blood stream to other organs It occurs in either sex at any age and it may be either chronic or acute The blood picture is that of an excessive number of leucocytes (the type of leucocyte or of immature white blood cell present in the largest percentage denotes the type of leukemia), and a severe anemia is a fairly constant finding The lymph nodes become enlarged, the spleen is greatly enlarged, and the liver is always involved X-ray therapy and transfusions of whole blood relieve the symptoms temporarily

Leummim (lĕūm'ĭm) [Heb , =peoples], unidentified tribal name Gen 25 3

Leuna (loi'nə), town (pop 9,918), in the former Saxony prov of Prussia, E Germany, near Merseburg Here in 1916 the first synthetic nitrogen plant began to operate after the invention of the Haber process. The town grew as the center of the German synthetic chemical industry The installations, heavily bombed in the Second World War, were subsequently repaired

Leuthen (loi'tun), village, Lower Silesia, 10 mi W of Breslau Here Frederick II won (1757) a brilliant victory over the Austrians in the Seven Years War

Leutze, Emanuel (loit'su), 1816–68, American historical painter, b Germany In 1859 he settled in the United States, working in Washington and New York. His pictures are chiefly English and American historical episodes, good in composition and characterization but famous more for their patriotic than aesthetic value He also painted portraits of Washington, Lincoln, Grant, and the landscape painter Worthington Whittredge (Metropolitan Mus) His works include the mural painting on the staircase of the Capitol at Washington, D C , *Landing of the Norsemen in America* and *The Poet's Dream* (Pa. Acad. of the Fine Arts), *Cromwell's Visit to Milton* (Corcoran Gall), *Princess Elizabeth in the Tower* (N. Y. Public Library), and *Washington Crossing the Delaware* (Metropolitan Mus)

Levant (luvänt') [Ital , =east], collective name for the countries of the eastern shore of the Mediterranean from Egypt to, and including, Turkey The divisions of the French mandate over Syria and Lebanon were called the Levant States, and the term is still sometimes applied to those two nations

Levasseur, Émile (Pierre Émile Levasseur) (āmēl' lŭväsûr'; pyĕr'), 1828–1911, French economist. He was noted especially for his historical approach to the study of economics He studied at the École normale supérieure, Paris, and taught (1868–72) economic history at the Collège de France before becoming (1872) professor of geography, history, and economic statistics. His most famous works are the histories of the French working class, *Histoire des classes ouvrières en France depuis la conquête de Jules César jusqu'à la révolution* (1859) and *Histoire des classes ouvrières en France depuis la révolution jusqu'à nos jours* (1867). He also wrote *La Question de l'or* [the question of gold] (1858), *La Population française* (3 vols , 1889–92), and *Histoire du commerce de la France* (1911–12)

Le Vau, Louis (lwĕ' lŭ vō'), 1612–70, French architect. He succeeded (1654) Jacques Lemercier as architect for the Louvre and the Tuileries. He designed for Louis XIV the palace of Versailles, creating a nucleus later completed by J. H. Mansart. Among his other designs are the château of Vaux-le-Vicomte; the Collège des Quatre Nations, Paris, now the Palais de l'Institut; and the Church of

St. Sulpice (1650), Paris, the façade of which was later built by Servandoni.

levee (lĕ'vē) [Fr.=raised], embankment along a river to prevent inundation of the flood plain by high water. Levees are constructed by piling earth on a surface that has been cleared of vegetation and leveled. They narrow from a broad base to a level crown on which temporary embankments or sacks of soil can be placed to prevent overtopping by unusually high waters. Levee surfaces are usually protected by vegetation, notably Bermuda grass. A low terrace of earth (banquette) is commonly added on the land side of high levees to prevent loss of material from the slope caused by seepage. Sections of levee exposed to strong wave or current action or to long periods of high water may be protected on the river side by plantings of willows, by weighted brush mattresses, or by concrete revetments. Ditches or drainage tiles on the water side prevent saturation of the foundation. Levees are the oldest and the most extensively used method of preventing inundation. Piecemeal building of levee sections by individual landowners and by local groups caused inundation of unprotected areas. Since the intensity of flood discharge is increased in a channel leveed on both banks and since silt deposits raise the level of river beds, levees must be built to ever greater heights, and flood control must be accomplished by additional measures (see FLOODS) and by levee-system planning. Under such planning, sections of levees are commonly set back from the river to form a wider channel and flood valley basins are often divided by cross levees to prevent inundation of large areas by a single break. The most extensive levee systems in the United States are along the Mississippi and the Sacramento rivers and their tributaries. The dikes of Holland are a form of levee, and embankments are used along the Danube, Vistula, Po, and other European rivers.

level: see SPIRIT LEVEL.

Levelers, extremist English Puritan sect active at the time of the Puritan Revolution. The name was apparently applied to them in 1647, in derision of their beliefs in equality. The leader of the movement and its most indefatigable propagandist was John LILBURNE. The Levelers demanded fundamental constitutional reform—a written constitution, a single, supreme representative body elected by universal manhood suffrage, and the abolition of monarchy and noble privilege. Their ideals, far in advance of their time, were those of complete religious and social equality and a state communistic in its nature. Their methods were those of violent agitation and extensive pamphleteering. Lilburne conducted much of his campaigning from within prison walls, where he was protected from execution by the strength of his following. The movement was closely associated with Cromwell's New Model Army and drew much of its support from the military. In 1647 the army presented to its leader the 3d Baron FAIRFAX, the pamphlet *The Case of the Army Truly Stated*, advocating the proposed reforms. Lilburne's *Foundations of Freedom, or, An Agreement of the People* (1648) became the Bible of the cause. Cromwell constantly opposed and finally (1649) crushed the movement in the army. Lilburne and his associates were tried for treason (1649) and acquitted, but the movement had run its course and been vitiated by sectarianism. In 1650 a few Levelers led a riot of the tenants of Epsworth Manor to protest the inclosure of lands. Many similar radical politico-religious groups flourished in the same period—the Agitators, the DIGGERS, and, in the following decade, the FIFTH MONARCHY MEN. Parallel movements of Quakers and Baptists have come down to modern times. See T. C. Pease, *The Leveller Movement* (1916), R. M. Jones, *Mysticism and Democracy in the English Commonwealth* (1932), *The Leveller Tracts, 1647-1653* (ed. by William Haller and Godfrey Davies, 1944), D. M. Wolfe, ed., *Leveller Manifestoes of the Puritan Revolution* (1944).

leveling: see SURVEYING.

Levelland (lĕ'vulănd"), town (1940 pop. 3,091, 1947 estimated pop. 5,000), co. seat of Hockley co., NW Texas, W of Lubbock on the Llano Estacado, founded 1921, inc. 1926. The area produces cotton, grains, truck, and recently much oil.

Leven, Alexander Leslie, 1st earl of: see LESLIE, ALEXANDER.

Leven (lē'vŭn), burgh (1931 pop. 7,411, 1948 estimated pop. 8,578), Fifeshire, Scotland, at the mouth of the Leven river on the Firth of Forth. It is a seaport and summer resort with metallurgical and chemical engineering works.

Leven, Loch (lŏkh). **1** Lake, 11½ mi. long, between Inverness-shire and Argyllshire, Scotland, extending from the mouth of the Leven river to Loch Linnhe. **2** Lake, c.3½ mi. long, Kinross-shire, Scotland. Its several islands include Castle Island, with the ruins of the castle in which Mary Queen of Scots was imprisoned in 1567–68, and St. Serf's, with ruins of an ancient priory. The Leven river, outlet of the lake, flows E through Fifeshire to the Firth of Forth.

Lever, Charles James (lē'vûr), 1806–72, Irish novelist. After a haphazard education, he started practicing medicine in Ireland (1831). His writing began with *Harry Lorrequer* (1837); its popularity guaranteed the success of the *Dublin University Magazine*, which he later edited (1842–45). His best novels appeared early—*Charles O'Malley* (1841), *Arthur O'Leary* (1844), *Tom Burke of "Ours"* (1844), and *The O'Donoghue* (1845). Lever wrote chiefly of army life, in an episodic, loose-jointed style. With *Roland Cashel* (1850) he turned to more careful plotting and characterization but lost in popularity. See biography by Edmund Downey (1906), Lionel Stevenson, *Dr. Quicksilver* (1939).

lever, simple MACHINE consisting essentially of a bar or rod, in diameter either uniform throughout or nonuniform, which is either attached or supported at some point (the fulcrum) along its length. A FORCE applied to a lever at a point along its length tends to rotate it about the fulcrum in a clockwise or a counterclockwise direction. It has been found by experiment that two equal forces acting in opposite directions and applied to a uniform lever at equal distances from the fulcrum counteract each other and establish a state of equilibrium or balance in the lever. Experiment has also shown that two unequal forces when acting in opposite directions will bring about equilibrium when the product of the magnitude of one and its effort arm or lever arm (the perpendicular distance of its point of application from the fulcrum) is equal to the product of the magnitude of the other and its effort arm. In physics the product of a force by its effort arm is called a moment of the force, the general conclusion known as the principle of moments states that equilibrium is established when the sum of the moments of the forces acting in one direction (clockwise) is equal to the sum of the moments of the forces acting in the other direction (counterclockwise). It is possible, as a result, to overcome a very large force at a short distance from the fulcrum with a very small force at a great distance from the fulcrum. Archimedes is supposed to have boasted, with the lever in mind, that given a place to stand upon he could move the world. In the use of a small force to overcome a large one the lever finds its many common applications. For example, the crowbar is a practical application of the lever. The fulcrum is the point upon which the crowbar rests when being used in prying loose some object, the effort is applied at the end farthest from the fulcrum and is relatively small, the distance from the operator's hands to the fulcrum is the lever arm or effort arm, the object being pried loose is the resisting force, or resistance, and its distance from the fulcrum is the resistance arm. Spades, nutcrackers, pliers, scissors, fire tongs, forceps, the beam balance, the wheelbarrow, and many other common tools, instruments and appliances are applications of the principle of the lever. The human forearm is an application of the lever, the elbow acting as the fulcrum, the weight held in the hand and being lifted as the resistance, and the pull of the muscles between the elbow and the hand as the effort. In general, levers are classed according to the position of the fulcrum in relation to the effort and the resistance. A first-class lever is one in which the effort and the resistance are on opposite sides of the fulcrum (e.g., beam BALANCE), a second-class lever is one in which the fulcrum is at one end, the effort at the other, and the resistance between (e.g., wheelbarrow), and a third-class lever is one in which the fulcrum is at one end, the resistance at the other, and the effort between (e.g., forceps).

Leverett, John (lĕ'vurĭt), 1616–79, American colonial governor, b. Boston, England. He went to Boston, Mass., with his father in 1633, but returned to England to serve in the parliamentarian army in 1644 and became a close friend of Oliver Cromwell. He returned to Boston (1651), served a term in the General Court, was appointed one of the commissioners sent to Maine to bring it under the jurisdiction of Massachusetts, and represented (1653–62) Massachusetts in England. On his return to Massachusetts he served in the General Court or the governor's council until 1671, when he was appointed deputy governor. On the death of Bellingham (1673), he became governor, he was reelected until his own death. In his administration he successfully directed the colonial forces in King Philip's War. His knighthood, c.1676, has not been definitely established.

Leverrier, Urbain Jean Joseph (ürbĕ' zhă' shôzĕf' luvĕryā'), 1811–77, French astronomer, discoverer of the planet Neptune. In considering the perturbations of Uranus, Leverrier made calculations indicating the presence of an unknown planet in an orbit outside that of Uranus. The same conclusion had been reached by the Englishman J. C. ADAMS a little earlier, but had not been published. Both were honored as responsible for the discovery of the new planet, Neptune. In 1854 Leverrier became director of the Paris Observatory. His revision of the planetary theories was completed in 1875. He wrote a number of valuable memoirs.

Leveson-Gower, Sir Francis: see ELLESMERE, FRANCIS EGERTON, 1ST EARL OF.

Leveson-Gower, Granville George: see GRANVILLE, GRANVILLE GEORGE LEVESON-GOWER, 2D EARL.

Levi (lē'vī). **1** Son of Jacob and Leah and eponymous ancestor of the Levites. His name appears infrequently—at his birth, when he and Simeon massacred the Shechemites out of revenge, when Jacob migrated to Egypt, finally when he is named in the prophecy of his father. Gen. 29:34, 34, 46:11; 49:5–7. **2** See MATTHEW, 3, 4. Names in the Gospel genealogy, Luke 3:24, 29.

Levi, Carlo (kär'lō lā'vē), 1902–, Italian writer, painter, and physician, noted as an anti-Fascist leader. After taking a medical degree, Levi devoted himself to painting. He became active in politics in the 1920s, and his unpopular ideas caused his exile (1935–36) to the remote province of Lucania. His experiences there he described in *Cristo non è fermato a Eboli* (1945, Eng. tr., *Christ Stopped at Eboli*, 1947). While living (1939–41) in France he wrote the essay *Paura della libertà* (1946, Eng. tr., *Fear and Freedom*, 1950). He organized and edited various anti-Fascist periodicals.

leviathan (lĭvī'uthŭn) [Hebrew], huge animal, presumably the crocodile, mentioned in the Bible. Job 41, Pss. 74:14, 104:26, Isa. 27:1. *The Leviathan* is the work of Thomas HOBBES.

Levi ben Gershon see GERSONIDES.

Levi-Civita, Tullio (tōō'lyō lā'vē-chē'vētä), 1873–1942, Italian mathematician. He taught at the universities of Padua (1898–1919) and Rome (1919–38) and was noted for his researches in pure geometry, hydrodynamics, and absolute differential calculus (on which Einstein's work depended in part). He wrote *A Simplified Presentation of Einstein's Unified Field Equations* (authorized Eng. tr., 1929).

levirate marriage: see MARRIAGE.

Lévis, François Gaston, duc de (frăswä' gästō' duk' du lāvē'), 1720–87, French soldier. Entering the army in 1735, he distinguished himself in the War of the Austrian Succession. As second in command to Montcalm, he was sent (1756) to Canada, where again his record was noteworthy. After Montcalm's death, he was commander (1759–60) of the French troops in Canada. Lévis defeated James Murray at Ste. Foy, near Quebec, but abandoned his siege of Quebec on the arrival of the English fleet. Later that year (1760) he was forced to surrender Montreal to the British. After his return to France, he became lieutenant general (1761), marshal (1783), and duke (1784). H. R. Casgrain edited Lévis's papers (12 vols., 1889–96) and wrote *Montcalm et Lévis* (1891).

Lévis (lĕ'vĭs, Fr. lāvē'), city (pop. 11,991), S Que., on the St. Lawrence opposite Quebec. Settled in 1647 by Guillaume Couture, interpreter between Jesuit missionaries and the Iroquois, it was named for the duc de Lévis. It was the base (1759) for Wolfe's siege of Quebec. Lévis is a port with shipbuilding, woodworking, and varied manufactures. It is the site of an arsenal and of fortifications built in 1865–71 and in 1914.

levitation (lĕvĭtā'shun), the raising of a human or other body in the air without mechanical aid. The idea is ancient, holy men both pagan and Christian were reputed to have had the power of becoming light at will and of moving through the air. It is a favorite manifestation in spiritistic séances. It is also a popular conjuring trick, the illusion being produced by clever mechanical or lighting arrangements or other means.

Levites (lē'vīts), among the ancient Hebrews, a religious caste, descendants of Levi, son of Jacob. Alone of the 12 tribes they had no allotment of land, instead they received revenues from certain cities, and each city had its quota of Levites to support. The priests were of the family of AARON within the tribe. With the unification of worship at Jerusalem the Levites became temple servants with hereditary assignments. Later they became teachers of the Law. There were three divisions of Levites—Kohathites, Merarites, and Gershonites. They are mentioned constantly in the Old Testament, and Leviticus is named after them. Ex. 6:16, 32:26–28, 38:21, Num. 1; 3–8, Deut. 18, Joshua 21, I Chron. 6, 9, 15, 23, 2 Chron. 17:8,9, 19:8–11, 20:19–21, 23, Ezra 7:24, 8:20. Anthropology presents many other cases of hereditary religious castes and consecrated families. In this light many of the biblical statements about the Levites are reinterpreted by critics.

Leviticus (lĕvĭ'tĭkus) [Latin,=levitical], book of the Old Testament, third of the five books of the Law (the Pentateuch or Torah) ascribed by tradition to Moses. It is in essence a collection of liturgical legislation, introduced in the scriptural sequence immediately after the institution of public worship at the end of Exodus. There are laws of general application, e.g., on marriage, morality, charity, and so forth (18–20) on blasphemy (24), on the jubilee year (25), and on vows (27). The only narrative incident of the book is the destruction of Aaron's sons Nadab and Abihu for violation of laws after their consecration as priests. For critical views on Leviticus and books concerning it, see OLD TESTAMENT.

Levkosia, Cyprus: see NICOSIA.

levulose: see FRUCTOSE.

Levy, Ark.: see NORTH LITTLE ROCK.

Lévy-Bruhl, Lucien (lüsyĕ'lävü-brül'), 1857–1939, French philosopher, sociologist, and ethnologist He was professor at the Sorbonne from 1899 and editor of the *Revue philosophique de la France et de l'étranger* His research on the mentality of remote peoples is outstanding His numerous writings include *Ethics and Moral Science* (1903, Eng tr, 1905), *How Natives Think* (1910, Eng tr., 1926), *Primitive Mentality* (1922, Eng tr, 1923), and *Primitives and the Supernatural* (1931, Eng tr, 1935)

Lewes, George Henry (lōō'ĭs), 1817–78, English critic and author He abandoned business, medicine, and acting before devoting himself to literature and scientific philosophy As editor of the *Leader* (1850–54) and of the *Fortnightly Review* (1865–66), Lewes distinguished himself as a critic Influenced by Comte, he wrote *Biographical History of Philosophy* (1845–46), *Comte's Philosophy of the Sciences* (1853), *The Physiology of Common Life* (1859–60), and *Problems of Life and Mind* (1874–79) Lewes's plays and novels are forgotten but his most noted work, the *Life of Goethe* (1855), had a tremendous success Having been separated from his wife some years earlier, in 1854 he began a marriage in all but law with George Eliot, whose work he encouraged and influenced profoundly. See A T Kitchel, *George Lewes and George Eliot* (1933)

Lewes (lōō'ĭs, -ĭz, lū'-), municipal borough (1931 pop 10,784, 1943 estimated pop 11,960), county town of Sussex East, England, S of London and on the Ouse near Newhaven, its port Lewes is a farm center There are ruins of an ancient castle, the Sussex Archaeological Society museum, several old churches, libraries, and science and art schools. Archaeological remains have been found in the vicinity A priory was founded here in 1078 by William de Warenne and Gundrada, his wife In 1264 Lewes was the scene of a victory by Simon de Montfort over Henry III

Lewes (lōō'ĭs, lū'-), resort and deep-sea-fishing town (pop 2,246), SE Del, at the mouth of Delaware Bay NW of Rehoboth Beach, inc 1857 It is a port of entry The first white settlement along the Delaware, named Swanendael or Zwaanendael, was made here by the Dutch in 1631 and eventually passed to the English There are several 18th-century houses The Delaware Breakwater protects the harbor

Lewes (lōō'ĭs, lū'-), river, c 300 mi long, a main source of the YUKON It is formed by streams rising in N British Columbia and in Yukon territory and flows NW to the Pelly at Fort Selkirk The Lewes was discovered (1843) by Robert Campbell, of the Hudson's Bay Company

Lewis. For rulers thus named, see LOUIS

Lewis, Alfred Henry, 1858–1914, American editor and author, whose pseudonym was Dan Quin, b Cleveland He was Washington correspondent of the Chicago *Times* and later was head (1890–94) of the Washington bureau of the Hearst papers Afterwards he was a staff contributor to the Hearst magazines The "Wolfville" stories, supposedly told by an old cattleman, are his best fiction—*Wolfville* (1897), *Sandburrs* (1900), *Wolfville Days* (1902), and *Wolfville Nights* (1902)

Lewis, Andrew, 1720?–1781, American frontiersman and Indian fighter, b Ireland When a boy he came with his family to settle near Staunton, Va He grew up to be one of the leading frontier Indian fighters In 1754 he was with George Washington at Fort Necessity He led an unsuccessful expedition (the Sandy Creek expedition) against the Indians in the Ohio country in 1756 and was captured when on the expedition of Gen John Forbes against Fort Duquesne He is best remembered for his victory (1774) in Lord Dunmore's War over the Indians led by Cornplanter at Point Pleasant (now in West Virginia) In the American Revolution he was a patriot leader and opposed Lord Dunmore

Lewis, Cecil Day see DAY LEWIS, CECIL

Lewis, Clive Staples, 1898–, British writer, noted for his eloquent advocacy of Christianity, b Belfast, Ireland. He has been fellow and tutor of English at Magdalen College, Oxford, since 1925 Of his books discussing religion, the best known is *The Screwtape Letters* (1942), others include *Pilgrim's Regress* (1933), *Out of the Silent Planet* (1938), *Christian Behaviour* (1943), *The Great Divorce* (1945), and *Miracles* (1947) He presents his arguments in an intellectual, witty, and modern manner See Chad Walsh, *C S. Lewis, Apostle to the Skeptics* (1949)

Lewis, Francis, 1713–1802?, American Revolutionary patriot, signer of the Declaration of Independence, b. Llandaff, Wales, educated at Westminster School, London He served in the French and Indian War, was captured (1756) at Oswego, and was sent to France Lewis returned to America and later became a member of the Stamp Act Congress (1765) and the Continental Congress (1774–79) He died either on Dec 31, 1802, or on Jan 1, 1803

Lewis, Sir George Cornewall, 1806–63, English statesman and man of letters He was admitted to the bar in 1831 and began his political career in the government home office As a Liberal member of Parliament (1847–52) he held various posts in the government. He served as chancellor of exchequer (1855–58), home secretary (1859–61), and secretary of war (1861–63). While editor (1852–55) of the *Edinburgh Review*, he contributed many articles to the publication, he was also the author of *An Essay on the Origin and Formation of the Romance Languages* (1835), *Enquiry into the Credibility of the Early Roman History* (1855), and *An Historical Survey of the Astronomy of the Ancients* (1862)

Lewis, Gilbert Newton, 1875–1946, American chemist, b Weymouth, Mass, grad Harvard (B A, 1896, Ph D, 1899) He taught at Harvard and at the Massachusetts Institute of Technology (1907–12) and from 1912 was professor of physical chemistry and dean of the college of chemistry, Univ of California He made special studies in thermodynamics and atomic structure and wrote *Valence and the Structure of Atoms and Molecules* (1923) and Anatomy of Science (1926)

Lewis, Isaac Newton, 1858–1931, American artillery officer and inventor, b New Salem, Fayette co, Pa, grad West Point, 1884 An artillery officer until his retirement in 1913, he invented (1888) an artillery range finder, devised electrical systems for artillery-fire control, and designed a new quick-firing field gun and mount He is best remembered for invention (1911) of the first efficient, portable, air-cooled machine gun, the Lewis gun The U S army rejected it, but after retirement Lewis went to Europe and succeeded in getting Great Britain, France, and Belgium to use it In the First World War he superintended factories producing the gun In 1916 the U S army finally adopted it

Lewis, John Llewellyn, 1880–, American labor leader, b Lucas co, Iowa, son of a Welsh immigrant coal miner He became a miner and after 1906 rose through the union ranks to become president (1920) of the UNITED MINE WORKERS OF AMERICA Forceful and determined, Lewis fought vigorously to build up the union, won the loyalty of the miners, and thus consolidated his own power He was one of the most important figures in the AMERICAN FEDERATION OF LABOR until, moved partly by the desire to unionize the mass-production industries, he split with the A F of L and its leader, William Green Taking several of the largest unions with him, Lewis headed (1935) the new organization (see CONGRESS OF INDUSTRIAL ORGANIZATIONS) He had supported F D Roosevelt for President in 1932 and had welcomed the New Deal, but coolness developed between Lewis and the President, and in 1940 the labor leader supported Wendell Willkie for the presidency and staked his C I O presidency on Willkie's victory Roosevelt won, and Lewis resigned Increasing antagonism between him and PHILIP MURRAY, the new head of the C I O, led to a break, and in 1942 the United Mine Workers withdrew from the C I O Lewis kept his own power In the Second World War, Lewis was faced with the hostility of the War Labor Board and with unfavorable public sentiment because of the many strikes of the coal miners in the "no-strike" period Though these strikes perhaps helped to pave the way for antistrike legislation, they did win the demands of the miners The United Mine Workers was again joined (1946) to the A F of L, but split off (1947) once more in dispute over means of combating the restrictive Taft-Hartley Act Though failure to obey a Federal court order to end a protracted coal strike led (1948) to a heavy fine for criminal contempt of court, Lewis continued in 1950 his aggressive and successful strike tactics See J A Wechsler, *Labor Baron* (1944), Saul Alinsky, *John L Lewis: an Unauthorized Biography* (1949)

Lewis, Matthew Gregory, 1775–1818, English author One of the early horror writers, he was often called "Monk" Lewis from the title of his extravagant thriller *The Monk* (1796) In writing this novel, Lewis was influenced by the Gothic tales of Ann Radcliffe. He abandoned, however, any pretense of a happy ending and so far overstepped the bounds of taste and decency that the original version was never republished A less offensive second edition was popularly revived Of his horror dramas, his best known is *The Castle Spectre* (1797), and he is also remembered for his gruesome ballad, *Alonzo the Brave and the Fair Imogene* With Southey and Sir Walter Scott he compiled *Tales of Terror* (1801)

Lewis, Meriwether, 1774–1809, American explorer, b near Charlottesville, Va He was a captain in the army and served in a number of Indian campaigns before becoming (1801) secretary to his friend President Thomas Jefferson He was selected to head the continent-spanning LEWIS AND CLARK EXPEDITION and chose William CLARK as helper Upon that successful venture Lewis's fame rests In 1807 he was made governor of Louisiana Territory, with headquarters at St Louis In 1809 when traveling to Washington to prepare the journals of the expedition for publication, he died suddenly—possibly by murder—in a lonely inn on the Natchez Trace. See biography by C. M. Wilson, bibliography under LEWIS AND CLARK EXPEDITION.

Lewis, Morgan, 1754–1844, American general and governor of New York (1804–7), b New York city, grad. College of New Jersey (now Princeton Univ.), 1773, son of Francis LEWIS. In the American Revolution he served as an aide to Gen. Horatio Gates at Ticonderoga and Saratoga. After being admitted (1783) to the bar, he served in the state assembly (1789–90, 1792), as state attorney general (1791–92), and on the state supreme court (1792–1804), being the chief justice (1801–4) Lewis was aided in his career by his marriage to a daughter of Robert R Livingston. His term as governor was marred by factional rivalry, but he did much to encourage the growth of the public school system In 1812 he was appointed quartermaster general and, later, major general, serving on the Niagara frontier in the War of 1812 There he captured Fort George and commanded at the battles of Sackets Harbor and French Creek He advanced the funds necessary for the release of American prisoners held in Canada after the war and remitted rents for his tenants who had served in the war He was president of the New York Historical Society (1832–36) and was also a founder of New York Univ. See biography by Julia Delafield (1877)

Lewis, Sinclair, 1885–, American novelist, b Sauk Centre, Minn, grad Yale, 1907 He was a journalist and a hack writer whose early novels were little known *Main Street* (1920), a satire on small-town life in the American Middle West, was sensationally popular here and abroad In his next novel, *Babbitt* (1922), he named the typical American businessman, *Arrowsmith* (1925) concerned a medical scientist and *Elmer Gantry* (1927) a religious revivalist, *Dodsworth* (1929) caricatured a provincial American in Europe These broad-stroke satirical novels presented a devastating picture of the middle class In 1930 Lewis was the first American to be awarded the Nobel Prize in Literature Among his other works are *It Can't Happen Here* (1935), an anti-fascist novel, *Cass Timberlane* (1947), *Kingsblood Royal* (1947), an angry and uneven treatment of race prejudice, and several plays From 1928 to 1942 he was married to Dorothy Thompson See biography by C C Van Doren (1933)

Lewis, Wyndham (Percy Wyndham Lewis), 1886–, English writer and painter, b Maine, of English parents As leader of the artistic movement known as vorticism, he was associated with Roger Fry and with Ezra Pound, with whom he edited the vorticist magazine *Blast* (1914 15) His more conventional but still dynamic paintings of scenes suggested by the First World War gained him wide recognition His works are in the Tate Gallery and the Victoria and Albert Museum, London, in the Museum of Modern Art, New York, and in museums of Detroit, Ottawa, and Toronto His novels and political or quasi-philosophical essays, satirical and often angry, include *Tarr* (1918), *Time and Western Man* (1918), *The Art of Being Ruled* (1926), *Paleface* (1929), *The Apes of God* (1930), *Hitler* (1931), and *America and Cosmic Man* (1949)

Lewis, Hebrides, Scotland see LEWIS WITH HARRIS

Lewis. 1 Early name of the SNAKE river **2** River rising in the Cascade Range, SW Wash, and flowing generally southwest c 95 mi to the Columbia NW of Vancouver Ariel Dam (c 300 ft high, completed in 1931) forms Lake Merwin (12 mi long) There is also a fish hatchery

Lewis and Clark Cavern National Monument see MORRISON CAVE STATE PARK

Lewis and Clark expedition, 1803–6, military exploring expedition across the North American continent Thomas Jefferson had long considered the project of a Western expedition, and after he became President he contemplated the matter in earnest and discussed it with his private secretary, Capt Meriwether Lewis When Congress approved the plan in 1803 and appropriated money for it, Jefferson named Lewis to head it, and Lewis selected William Clark as his associate in command The purpose was to search out a land route to the Pacific and to gather information about the Indians and the country of the Far West Before the long march was begun, the LOUISIANA PURCHASE was made, and the value of a survey of the newly acquired lands was enhanced The men were gathered and in the winter of 1803 4 were trained in Illinois across the Mississippi from St Louis, the starting point In 1804 they set out up the Missouri, and the next winter was spent at the Mandan villages (near present Bismarck, N.Dak) In 1805 the hardest part of the journey was made After reaching the Three Forks of the Missouri (and naming the three branches after Jefferson, Madison, and Gallatin in loyalty to the administration), they followed the Jefferson as far as they could Then their Indian woman guide, the remarkable SACAJAWEA (the Bird Woman), who was of great value to the expedition, helped to obtain horses for them to continue across the high Rockies They crossed the Continental Divide at Lemhi Pass and went over the Bitterroot Mts. through Lolo Pass. They had reached the land of westward-flowing rivers, and for part of their way they followed the Clearwater down to the Snake (long called the Lewis). The Snake took them to the Columbia, and they spent a miserable, rainy winter season in a crude post, Fort Clatsop, that they

built on the coast. No ship arrived with provisions, and in the spring the men started back across the continent. The party split for a time, Lewis taking a group down the Marias river while Clark and most of the men went down the Yellowstone; they were reunited on the Missouri at the mouth of the Yellowstone. The party arrived in St Louis on Sept. 23, 1806, and were greeted with much acclaim. The importance of the well-planned, well-executed expedition was recognized at the time and has never been underrated since. Though it was not the first transcontinental crossing in the north (Alexander Mackenzie had long anticipated them by his remarkable voyage), it opened vast new territories to American knowledge. Its influence on the history of the West is incalculable. Its results matched the efficiency and capability of its leaders. Since the journey was under official auspices many records were kept. The first report of it to be published appeared in a message of President Jefferson in 1806. In 1807 appeared the journal of Patrick Gass, which was several times reissued before the official journal appeared as *The History of the Expedition under the Command of Captains Lewis and Clark* (ed. by Nicholas Biddle and revised by Paul Allen, 2 vols., 1814). This appeared in later editions by Elliott Coues (4 vols., 1893) and J. B. McMaster (1904). R. G. Thwaites edited a full issue of *Original Journals of the Lewis and Clark Expedition* (8 vols., 1904–5). There have been many studies and monographs on the expedition. One of the more recent general accounts is John Bakeless, *Lewis and Clark, Partners in Discovery* (1947).

Lewisburg **1** Village (pop. 1,126), SW Ohio, WNW of Dayton, in a limestone quarry area. **2** Borough (pop. 3,571), co. seat of Union co., central Pa., on the West Branch of the Susquehanna and NW of Sunbury; laid out 1785, inc. 1813. Its manufactures include furniture and textiles. It is the seat of Bucknell Univ. (Baptist, coeducational, 1846). There is a Federal penitentiary here. **3** Town (pop. 3,582), co. seat of Marshall co., central Tenn., S of Nashville, inc. 1837. It is a livestock and dairy center. James K. Polk practiced law here. Near by is a U. S. dairy experiment station. **4** Trading town (pop. 1,466), co. seat of Greenbrier co., S. W. Va., NE of Bluefield, in a farm and stock-raising section, inc. 1782. Greenbrier College (junior) for women, Greenbrier Military School, an old church (1796), and the site of Fort Savannah (later Fort Union) are here.

Lewis Institute see ILLINOIS INSTITUTE OF TECHNOLOGY

lewisite see POISON GAS

Lewisohn, Ludwig (lōō'ĭzōn), 1882–, American novelist, b. Berlin. He was converted to Christianity in his youth but later became interested in Zionism and reverted to Judaism. After teaching German at the Univ. of Wisconsin and at Ohio State Univ., he was (1920–24) on the editorial staff of the *Nation*. His novels include *Don Juan* (1923), *The Island Within* (1928), *Stephen Escott* (1930), and *The Case of Mr. Crump* (1921, 1st American ed., 1947). *Up Stream* (1922), *Mid-Channel* (1929), and *Haven* (1940) are autobiographical. He has also written books of criticism and studies of the Jews and made translations of German works.

Lewiston. **1** City (pop. 10,548), co. seat of Nez Perce co., NW Idaho, at the junction of the Snake and the Clearwater and at the Wash. border. Lewis and Clark encamped (1805) here, and near by, at Lapwai, Henry H. Spalding established (1836) a mission (see WHITMAN, MARCUS) and operated the first printing press in the Pacific Northwest. The town was founded (1861) after gold was discovered on the Clearwater and grew as a supply and shipping center in the gold rush. It was the first capital (1863–64) of Idaho Territory and had the first newspaper, the *Golden Age* (1862), in Idaho. It is the commercial and industrial center for a lumbering, fruitgrowing, and livestock region, and an irrigation project, Lewiston Orchards, is being developed near by. The Northern Idaho College of Education is here. **2** Industrial city (pop. 38,598), SW Maine, on the Androscoggin (here crossed by several bridges) opposite Auburn, settled 1770, inc. as a town 1795, as a city 1861. The power of a 50-foot fall has supplied mills and textile factories here from the early 19th cent., brick, shoes, metal, and lumber are also produced, and printing is done. Bates College (coeducational, 1863) is here. The city has a large state armory which is the site of the state fairgrounds. **3** Village (pop. 1,280), W. N. Y., on the Niagara and near Niagara Falls, settled c. 1796, inc. 1822. Silica deposits are in the area. **4** City (pop. 1,804), extreme N Utah, at the Idaho line; settled 1870 by Mormons, inc. 1904. The center of a reclaimed dairy and farm region of Cache Valley, it has a beet-sugar refinery. The Bear river battle monument near by commemorates an Indian battle (1863) won by Gen. P. E. CONNOR.

Lewistown. **1** City (pop. 2,355), co. seat of Fulton co., central Ill., SW of Peoria, in a farm and coal area; settled 1821, inc. 1857. It was the home of Edgar Lee Masters, and the territory, its people, and the local legends are sources of his *Spoon River Anthology*. Lincoln and Douglas delivered speeches here. Indian mounds near by have yielded several hundred skeletons and a number of artifacts. **2** City (pop. 5,874), co. seat of Fergus co., central Mont., SE of Great Falls, laid out 1882, inc. 1899. It is the trading center of the Judith Basin, which had a gold rush after 1880, later became a prosperous cattle-ranching region, and after 1910 was peopled by wheat-farming pioneers. Lewistown also has a petroleum refinery. **3** Industrial borough (pop. 13,017), co. seat of Mifflin co., central Pa., on the Juniata river and NW of Harrisburg, settled as a trading post 1754, laid out 1790, inc. 1811. It has great metal-products works and produces rayon, glass sand, and tools. In the surrounding area are farms and dairies. Fort Granville, near here, was destroyed in the French and Indian Wars.

Lewisville, town (pop. 1,314), co. seat of Lafayette co., SW Ark., near the Red River.

Lewis with Harris, island (825.2 sq. mi., pop. 28,042), off NW Scotland, most northerly of the Outer Hebrides. The northern part, Lewis, is in Ross and Cromarty co., and the southern part, Harris, much the smaller, is in Inverness-shire. The island is separated from the mainland of Scotland by the Minch, c. 25 mi. wide. There are abrupt cliffs and deep indentations along the coast. The surface is hilly, especially in Harris, fresh-water lakes, peat bogs, marshes, and treeless wasteland are characteristic, and little of the land is cultivable. Fishing and stock raising are pursued, and hand-woven tweeds are made. Sportsmen frequent the island. The only town of any size is Stornoway, which, with Callernish, Port of Ness, and Carloway acts as distributing center. The Standing Stones of Callernish, prehistoric monument of 39 stones, are in the form of a cross, with a circle in the center. The island is also called Lewis or the Lews.

Lexington **1** City (pop. 1,284), central Ill., E of Peoria, in a farm area, settled 1828, inc. 1867. **2** City (pop. 49,304), co. seat of Fayette co., N central Ky., SE of Frankfort, in the heart of the bluegrass region, founded 1779, chartered 1782, inc. 1832. The city is the outstanding center in the country for the raising of thoroughbred horses and is an important market for tobacco and bluegrass seed. It is a railroad shipping point for the products of E Kentucky and has railroad shops, meat-packing plants, distilleries, and other industries. The city was named in 1775 by a group of hunters (including Simon Kenton) encamped on the site when they heard the news of the battle of Lexington. The Univ. of Kentucky (see KENTUCKY, UNIVERSITY OF), TRANSYLVANIA COLLEGE, and College of the Bible are among the city's educational institutions. Other places of interest are "Ashland," the home of Henry Clay (designed by Latrobe in 1806 and rebuilt of the original materials in the 1850s), "Hopemont," the home of John Hunt Morgan (1811), the Thomas Hart house (1794), the home of Mary Todd Lincoln, and the library, which has a file of the *Kentucky Gazette*, founded by John BRADFORD in 1787. Lexington cemetery contains the graves of Henry Clay, J. H. Morgan, J. C. Breckinridge, and James Lane Allen. A U. S. hospital and farm for the treatment of drug addicts, a U. S. veterans' hospital, and a state hospital for the insane (1824) are here. A national cemetery is near by. See Federal Writers' Project, *Lexington and the Bluegrass Country* (1938). **3** Residential town (pop. 13,187), E. Mass., NW of Boston, settled c. 1640, inc. 1713. On April 19, 1775, the first battle of the Revolution (see LEXINGTON AND CONCORD, BATTLES OF) was fought here. The site is marked by a monument on the triangular green, around which are several 17th-century houses and an old burying ground. The first state normal school in the country was established here in 1839. See F. S. Piper, *Lexington, the Birthplace of American Liberty* (rev. ed., 1934). **4** City (pop. 2,930), co. seat of Holmes co., central Miss., N of Jackson, and on Black Creek; inc. 1836. It has sawmills and sand quarries and ships cotton and dairy products. **5** City (pop. 5,341), co. seat of Lafayette co., W. Mo., on the Missouri and E of Kansas City, in a coal and farm area, laid out 1822, inc. 1845. In the Civil War the city, with its Union garrison, was besieged and captured (Sept., 1861) by Missouri militia under Gen. Sterling Price. The courthouse, dating from 1847, and other ante-bellum buildings are among the points of interest. Wentworth Military Academy is here. **6** City (pop. 3,688), co. seat of Dawson co., S Nebr., on the Platte river and SE of North Platte. Laid out in 1872 and named Plum Creek to commemorate a camping spot on the old Oregon Trail, it was renamed in 1889. In an alfalfa region, it is the center of an irrigation and power project. **7** City (pop. 10,550), co. seat of Davidson co., central N. C., S of Winston-Salem in the Yadkin valley, settled 1775, inc. 1828. It has flour, lumber, and cotton mills. **8** Farm trade town (pop. 1,084), S central Okla., on the Canadian river and SE of Oklahoma City, settled 1889 on the site of an old military and trading post. **9** Textile town (pop. 1,033), co. seat of Lexington co., W central S. C., W of Columbia, in a farm area. The Saluda is dammed near by to supply hydroelectric power, the dam forms Lake Murray. **10** Town (pop. 2,526), co. seat of Henderson co., W Tenn., E of Jackson, in a fertile area. **11** Town (pop. 3,914), western Va., in the Shenandoah Valley NNE of Roanoke, in a beautiful farm area not far from Natural Bridge, laid out 1777, inc. 1841, reinc. 1874. In 1864 it was bombarded and partially burned by Gen. David Hunter. The courthouse of Rockbridge co. is here. On the campus of WASHINGTON AND LEE UNIVERSITY is the tomb of Robert E. Lee. Stonewall Jackson, who taught at VIRGINIA MILITARY INSTITUTE here, is buried in Lexington cemetery. See Henry Boley, *Lexington in Old Virginia* (1936).

Lexington and Concord, battles of, the opening engagements of the AMERICAN REVOLUTION, April 19, 1775. Gen. Thomas GAGE, in the midst of unrest caused by the INTOLERABLE ACTS, sought to avoid armed rebellion by sending a column of royal infantry under Major John PITCAIRN from Boston to capture colonial military stores at Concord. News of his plan was dispatched to the countryside by Paul Revere, William Dawes, and Samuel Prescott. The column reaching Lexington, came upon a group of militia (the minutemen). After a brief exchange of shots in which several Americans were killed, the colonials withdrew and the British continued to Concord. Here they destroyed some military supplies, fought another engagement, and began a harried withdrawal to Boston, which cost them over 200 casualties.

Leyden, Lucas van see LUCAS VAN LEYDEN

Leyden, Netherlands: see LEIDEN.

Leyden jar, one of the earliest forms of electrical CONDENSER, originated at the Univ. of Leiden in the middle of the 18th cent. It consists today of a glass jar partially coated inside and out with tin foil and closed by a stopper which is made of some nonconducting material such as wood and which is punctured by a brass rod knobbed at one end and at the other connected to the inner layer of foil by a small brass chain. Today other forms of condensers are much more commonly employed commercially, the Leyden jar remaining in use chiefly in the laboratory for experimental use.

Leyland, John see LELAND, JOHN

Leys, Hendrik, Baron (hĕn'drĭk, līs'), 1815–69, Belgian historical and genre painter. He studied with Wappers (in Antwerp) and in Paris and early achieved a high reputation. He is remembered chiefly for his historical paintings, such as *Charles V Entering Antwerp* (Brussels) and *Lucas Cranach Painting Luther* (Vanderbilt Coll., New York), and for his frescoes decorating the town hall in Antwerp. He was a member of the Brussels Academy.

Leysin (lĭ'zĭn), resort village (resident pop. 3,240), Vaud canton, Switzerland, with sanatoriums for tubercular diseases.

Leyte (lā'tē, lā'tā), island (2,785 sq. mi., pop. 835,532), one of the Visayan Islands, in the Philippine Islands. It is just SW of Samar across Leyte Gulf and the Samar Sea. The fertile island produces sugar cane, rice, hemp, and corn and has deposits of manganese, oil, and sulphur. The principal towns are Tacloban and Ormoc. During the Second World War, Leyte was occupied by the Japanese in early 1942, in the decisive battle of Leyte Gulf (Oct., 1944), U. S. forces defeated the Japanese and a few months later regained control of the entire island. Leyte prov. (3,084 sq. mi., 1948 pop. 1,006,891) comprises Leyte and offshore islands, with the capital at Tacloban.

Leyton (lā'tun), municipal borough (1931 pop. 128,313, 1947 estimated pop. 106,830), Essex, England. It is a northeastern residential suburb of London.

leze majesty see LESE MAJESTY

Lhasa (lā'sə, lä'sə), city (pop. c. 50,000), capital of Tibet. It is near the Tsangpo (Brahmaputra) river at an altitude of c. 11,800 ft. A large percentage of the inhabitants are Lamaist monks, and the city is the center of LAMAISM. The diverse population is drawn from India, Mongolia, and China, as well as from Tibet. Most of Lhasa is ill-built, but there are impressive religious edifices. On a near-by hill, backed by lofty mountains in the distance, stands the Potala, the palace of the Dalai Lama, a gigantic block of buildings nine stories high, white-washed save for the central portion, which is red, and surmounted by gilded roofs and towers. It has reception rooms, chapels, and quarters for thousands of monks. A smaller palace of the Dalai Lama is set in the beautifully wooded grounds of the Jewel Park. Near the city is the Drepung monastery, one of the largest in the world. The holiest temple in Lhasa, unimpressive from the outside, is the Jokang, which contains a jeweled image of the young Buddha. The 14th Dalai Lama, a six-year-old peasant boy, was installed in Lhasa in Feb., 1940. Several Western travelers have recorded their impressions of the city, jealously guarded from foreigners and called the Forbidden City. The name also appears as Lassa. See F. S. Chapman, *Lhasa* (1939), Theos Bernard, *Penthouse of the Gods* (1939).

Lhasa terrier: see TERRIER.

Lhermitte, Léon Augustin (lĕs' ōgüstē' lĕrmēt'), 1844–1925, French genre painter and etcher. He

is best known for his paintings of rustic life and his representations of Christ with peasants in modern dress Characteristic are *The Friend of the Lowly* (Mus of Fine Arts, Boston), *Among the Lowly* and *The Vintage* (Metropolitan Mus), and *Harvesters' Wages* (Luxembourg Mus, Paris).

L'Hôpital or **L'Hospital**, Michel de (both mēshĕl' dŭ lōpētäl'), c 1505-1573, chancellor of France under CATHERINE DE' MEDICI He was Catherine's chief collaborator in the policy of religious toleration which she followed during most of her early administration He favored, although he did not originate, the Edict of Romorantin (1560), which deprived the secular courts of jurisdiction in cases involving religion, and he was responsible for the edicts granting liberty of conscience (1561) and restricted liberty of worship (1562) He withdrew from court during the first War of Religion (1562–63), but subsequently returned to power and in 1566 was the author of important judicial reforms After the outbreak of the second War of Religion (1567), he was forced out of office by Charles and Henri de GUISE In his retirement he composed much Latin poetry

Li, chemical symbol of the element LITHIUM

Liao (lyou), river, c 800 mi long, rising in W Jehol prov, China, and flowing E through Jehol and Liaopei provs and S through Liaoning prov to empty into the Pohai at Yingkow The Liao is navigable in the final 400 mi of its course

Liaoning or **Liao-ning** (lyou'nĭng'), province (26,372 sq mi, pop 9,943,315), NE China, on the Pohai and Korea Bay The capital is Mukden Liaoning, a portion of Manchuria, was created in 1945 out of the southwestern section of a former province also called Liaoning The Liaotung peninsula occupies one third of the province Rainfall is adequate in Liaoning, but the long, severe winters permit only one harvest annually Soybeans are the major crop, and millet, kaoliang, corn, barley, wheat, and flax are also grown Coal and iron are abundant in the mountainous areas which make up most of the province, copper and asbestos are found in lesser quantity The Liao river, which crosses Liaoning, is navigable, and a fairly extensive rail net, including sections of the South Manchurian RR, connects the interior with the ports along the coast (c 500 mi long), including Port Arthur, Talien (Dairen), and Hulutao Liaoning's fine harbors were long coveted by Russia and Japan for their strategic position In 1898 Russia acquired a 25-year lease of Kwantung, the southern portion of the Liaotung peninsula After the Russo-Japanese War (1904–5), Japan took this territory and held it until the end of the Second World War, when approximately the same area was made the Port Arthur Naval Base District, under joint Soviet and Chinese operation

Liaopei or **Liao-pei** (lyou'bā'), province (46,949 sq mi, pop. 4,904,399), NE China The capital is Liaoyüan. Liaopei is a portion of Manchuria It was created in 1945, largely out of the northwest section of the former province of Liaoning. Liaopei consists almost entirely of a level plain The people farm and raise livestock Soybeans are the chief crop, wheat, corn, millet, and kaoliang, are also grown. Fairly good communications are provided by a railroad network, which connects with the major Manchurian ports, and by the navigable Liao river, which crosses the southwest corner of the province.

Liaotung, peninsula, China see LIAONING

Liaoyang or **Liao-yang** (lyou'yang'), city (pop. 100,165), NE Liaoning prov, China It contains several Buddhist temples built in the 11th cent The city is a commercial center on the South Manchurian RR

Liaoyüan or **Liao-yüan** (lyou'yüän'), city and county (pop. 191,910), Liaopei prov, China The city is the capital of the province. It is a railroad junction.

Liaquat Ali Khan (lēä'kut a'lē kän'), 1895–, political leader of Pakistan, educated at Aligarh Moslem Univ. and at Oxford In 1922 he was admitted to the bar. He served (1926–40) in the United Provs legislative council and for a time was its deputy president. A member of the Moslem League after 1923, he represented that organization in the Central Legislative Assembly of India from 1940 to 1946. In 1946 he was appointed leader of the Moslem League in the interim Indian government organized by the British to prepare the way for India's independence. With the creation of Pakistan (Aug., 1947) he became prime minister and minister of defense of the new dominion.

Liard (lē'ärd"), river, c.600 mi long, a tributary of the Mackenzie It rises in SE Yukon, not far from the headwaters of the Yukon river, and flows south and east in a curve through N British Columbia, passing through the main range of the Rocky Mts, thence northeast through densely wooded country to the Mackenzie, which it enters at Fort Simpson. It is navigable to Fort Liard, an old Hudson's Bay Company post, c 165 mi from its mouth.

Libanus: see LEBANON

Libau, Latvia, see LIEPAJA.

Libby, city (pop 1,837), co. seat of Lincoln co., extreme NW Mont., on the Kootenai river near the Cabinet Mts; inc. 1910. Founded as a gold-mining town in the 1880s, it still has mining but is primarily a lumbering center, with a large sawmill

Libby Prison, for captured Union officers in the Civil War, at Richmond, Va., formerly a tobacco warehouse Living conditions were extremely bad, the food, sometimes lacking altogether, was poor and sanitation practically nonexistent. Thousands died here Except for ANDERSONVILLE PRISON, Ga, it was the most notorious in the Confederacy

libel and **slander**, in law, types of defamation. Libel is a defamatory statement in some permanent form, e g, a writing or a derogatory picture Slander is defamation by word of mouth, by gesture, or the like The offenses are alike in several respects The defamation—essentially exposure to hatred, contempt, ridicule, or pecuniary loss—must directly affect a living person It must be published, i e, revealed to some one besides the subject of the attack It is no defense that the defendant merely repeated but did not originate the defamation The plaintiff is required to prove the colloquium (circumstances of utterance showing that the statement was directed against him specifically) and, when necessary, the innuendo (the factors making an apparently innocent statement defamatory) The requirement of colloquium makes unactionable defamation of a large group, e g, Jews or lawyers Generally truth is an absolute defense in a suit for defamation Even if a false defamatory statement is made, a defendant who is innocent of malicious intent may claim a privilege in some circumstances, e g, a credit-rating agency making an erroneous report Libel and slander are quite different in their procedural consequences Any libel is deemed injurious and gives immediate ground for suit However, only certain types of statements are slanderous per se so as not to require proof of damages, these are imputation of crime, of loathsome disease, of professional or occupational incapacity, or of unchastity in a woman If the alleged slander falls into some other category, there may not be any recovery unless the loss caused by the injury is proved The award to the successful plaintiff in a suit for defamation will usually include punitive, as well as compensatory, DAMAGES if the defendant willfully lied or published the defamation repeatedly In recent years the distinction between libel and slander and the immunity from suit of those who commit group defamation have been much criticized There is also judicial disagreement as to whether oral defamation widely diffused by radio or television is libel or slander. For criminal, or seditious, libel, see PRESS, FREEDOM OF THE. See Philip Wittenberg, *Dangerous Words: a Guide to the Law of Libel* (1947).

Liber (lī'bur) [Latin,=free], in Roman religion, god of fertility and wine. He was usually identified with Bacchus, the Greek Dionysus His consort **Libera** (lī'burŭ) was identified with Persephone or Ariadne Although Liber and Libera were rustic deities, they had a famous cult on the Aventine Hill in Rome in connection with Ceres The festival LIBERALIA was celebrated in their honor

Liberal, city (pop 4,410), co seat of Seward co, SW Kansas, near the Okla line, inc 1888 It is the trade center of a grazing and agricultural area, and dairy products are made. Gas fields are in the region.

liberal arts, term originally used to designate the arts or studies suited to freemen It was applied in the Middle Ages to seven branches of learning, the trivium of grammar, logic, and rhetoric and the quadrivium of arithmetic, geometry, astronomy, and music The study of the trivium led to the Bachelor of Arts degree, and the quadrivium to the Master of Arts The broad Renaissance interpretation of the liberal arts as those studies which impart a liberal, as opposed to a vocational or specialized, education corresponds more nearly to that of the modern undergraduate college of liberal arts, which has an extensive and flexible curriculum. See Abraham Flexner, *Universities American, English, German* (1930), Patricia Beesley, *Revival of the Humanities in American Education* (1940), Mark Van Doren, *Liberal Education* (1943), Jaoques Barzun, *The Teacher in America* (1945), Harvard Committee, *General Education in a Free Society* (1945); writings of Robert Maynard HUTCHINS

Liberale da Verona (lēbärä'lā dä värō'nä), b c.1445, d.1526 or 1529, Italian painter of the Veronese school, whose name was Liberale di Jacopo della Biava He was employed at Monte Oliveto near Siena as a miniature painter and illustrator of liturgical books (some of which are now preserved at Chiusi) and in the cathedral of Siena. Returning (c 1488) to Verona, he took up fresco and oil painting His earlier paintings are executed in a meticulous and minute style, but his later works are more broadly treated, apparently under the influence of Mantegna. Notable examples are *Madonna with Saints*, his earliest known painting; *Adoration of the Magi* (cathedral, Verona), a predella, with a *Nativity*, *Epiphany*, and *Death of the Virgin* (Episcopal Palace, Verona), *Glory of St. Anthony* (San Fermo, Verona); *St. Sebastian* (Brera, Milan); and *Entombment of Christ* (Santa Anastasia, Verona).

Liberalia (lĭburā'lēŭ), in Roman religion, festival of Liber and Libera. It was held on March 17 and was a festival of great rejoicing and freedom, like the BACCHANALIA and DIONYSIA. Roman youths generally first assumed the **toga virilis** (see TOGA) at this time.

liberalism, word used to describe the principles and methods of those who favor greater freedom in political and religious matters. In practical terms it connotes social reform and political democracy, and the liberal method is that of gradual change and improvement At various times liberals have advocated the abolition of slavery, freedom from ecclesiastical authority, universal suffrage, government responsibility to the people, and maintenance of civil liberties In these different fields liberals have occupied middle ground between conservatives, who wish to maintain the status quo, and radicals, who desire to make revolutionary changes in the existing order. The classic development of political liberalism took place in England after the Industrial Revolution. The Whigs and, after 1830, the Liberal party undertook to repeal the mercantilist laws (see MERCANTILISM) that hampered the growth of manufacturing and trade Its watchwords were free trade and free enterprise in general as against the vested interests of the landed gentry The new laws generally embodied the principles of LAISSEZ FAIRE or economic liberalism held by the so-called MANCHESTER SCHOOL Inspired by the writings of Adam Smith, Jeremy Bentham, and John Stuart Mill, industrialists and merchants were prominent in the liberal movement Under such statesmen as Gladstone liberal ideas dominated British politics for more than half a century After 1880 liberal political parties in Europe began to lose ground to socialist and labor parties. Liberal thinkers such as T H Green and L T Hobhouse began to favor the restoration of state control to cope with the huge combinations of capital which had resulted from the operation of free enterprise Early in the 20th cent political liberals such as Lloyd George followed a program of radical reform that many regarded as socialistic In France, Spain, and Italy liberalism connotes primarily anticlericalism Modern liberals have come to favor as their cardinal tenet the free development of all forces in the community and such a balance of these forces as will prevent any group or class from dominating the community In the United States the word *progressive* has been used more or less as a synonym of liberal Many, especially in the United States, who in other respects are extremely conservative, call themselves liberals because they advocate the 19th-century principles of competition and free enterprise. See Guido de Ruggiero, *History of European Liberalism* (Eng tr, 1927), John Dewey, *Liberalism and Social Action* (1935), H J Laski, *The Rise of Liberalism* (1936), J. J Saunders, *The Age of Revolution* (1949)

Liberal party, in British history, organization that grew out of the Whig party The membership of the Liberal party was largely drawn from nonconformists and from those adversely affected by the conservative economic policies of the government In the election of 1832, the Whig party spoke as an agent of reform in the interests of business and gained the support of the great industrialists A new party arose This, after its victory, became the active champion of the liberal economic doctrine of the day, and Lord John RUSSELL is credited with giving it the name Liberal party, which he used in correspondence with Queen Victoria The party's distinguishing policies were free trade, religious liberty, abolition of slavery, extension of the franchise, and other reform measures The first years of its existence—until the death of PALMERSTON in 1865—were a period of relatively cautious change, but Whig and Tory (Liberal and Conservative) realignments were taking place W. E GLADSTONE first became prime minister in 1868 For thirty years thereafter he was to dominate the Liberal party and to sponsor many of the great reforms of the second half of the 19th cent. (e g, REFORM BILLS) It was Gladstone's first Home Rule Bill for Ireland (1886) that gave a new character to the two-party system in England Previously party members had been drawn to each party from all enfranchised classes, but as time went on the split was more and more on a class basis The great Whig landowners and nobles seceded from Liberal to Conservative ranks, Joseph CHAMBERLAIN, John BRIGHT, and other Liberal radicals seceded from the industrialist party to form the Liberal Unionist party, later absorbed into the Conservative ranks The Liberals were forced to depend increasingly on the "Celtic fringe," their Irish supporters in Parliament In the 1890s an imperialist group, headed by Lord Rosebery and Sir William Harcourt dominated the party. By this time, however, the Liberals were being threatened from without by the growth of the labor movement and the formation of the LABOUR PARTY. The socialistic tendencies of the labor movement suggested a fundamental division in political allegiance rather than the comparatively superficial one between Conservatives and Liberals. Reorganized by Sir Henry CAMPBELL-

BANNERMAN, the Liberals won a great victory at the polls in 1906. The ties of the empire were strengthened, extensive military preparations were undertaken, and a comprehensive program of social legislation was inaugurated. The veto power of the House of Lords was ended after the unsuccessful resistance of the Lords to the budget of 1909, which taxed land values. Britain entered the First World War under the Liberal leadership of Herbert Asquith (see OXFORD AND ASQUITH, 1st EARL OF), but the stress of the war demanded a coalition government, which was formed (Dec., 1916) with the Liberal leader, LLOYD GEORGE, at its head. The ministry lasted until 1922, when the Conservatives withdrew. The Liberal party was discredited by the feeling of many that one great Liberal leader, Asquith, had come near to losing the war, and that another, Lloyd George, had "lost the peace." In the 1930s the party split into several fragments. One group, led by Sir John Simon, held office in the coalition called the National government, while Sir Archibald Sinclair continued in opposition with the Liberal party proper. During the Second World War the party was dormant. In 1945 it attempted a return to influence on the socialistic platform enunciated by Sir William Beveridge in his *Full Employment in a Free Society*, but this new program was unsuccessful, and the party received only 10 percent of the popular vote in the Labour landslide. See Hamilton Fyfe, *The British Liberal Party* (1928), Sir Henry Slesser, *A History of the Liberal Party* (1944).

Liberal party, in U S history, organized in 1944 in New York city by dissident members of the AMERICAN LABOR PARTY who favored a closer alignment with New Deal policies and who staunchly opposed the spread of totalitarianism. The Liberal party platform called for a strong United Nations organization, a greater national development program, encouragement to the American trade-union movement, sounder economic safeguards in postwar America, and a thoroughgoing extension of civil liberties. Although it operated almost entirely in New York state, the Liberal party played an important role by endorsing national candidates of the major parties—generally those of the Democratic party—and by putting up strong opposition to the American Labor party. In 1949 the Liberal party, which was headed by John L. Childs (1944–47) and Adolf A. Berle (1947–), seemed to have gained a clear-cut victory by bringing about the election (1949) of Franklin D. Roosevelt, Jr., to the U S. House of Representatives.

Liberal Republican party, in U S history, the organization formed in 1872 by Republicans discontented at the political corruption and the policies of Grant's first administration. Other disaffected elements were drawn into the party. Among its leaders were Carl Schurz and B. Gratz Brown, both of Missouri, who had defeated the regular Republicans in the election of 1870. Horace GREELEY, Charles Sumner, Samuel Bowles, Horace White, and Lyman Trumbull. The party convention held at Cincinnati in May passed over Charles Francis Adams, David Davis, and others to nominate Greeley for President, Brown was named for Vice President. In their convention at Baltimore, the Democrats also accepted these candidates. The party program called for civil service reform and an end to the vindictive Reconstruction program of the radical Republicans and, so as not to offend its divergent segments, contained some weasel words on the tariff question. Greeley's nomination was not popular with many of the party leaders, who supported him without enthusiasm, and Grant was easily reelected. See E. D. Ross, *The Liberal Republican Movement* (1919).

Liberec (lĭ'bĕrĕts), Ger. *Reichenberg* (rī'khənbĕrk), city (pop. 29,690), N Bohemia, Czechoslovakia, on the Lausitzer Neisse. It is the largest industrial and trade center in the W Sudeten Mts. It produces textiles (wool, cotton, linen, silk) and textile machinery.

Liberia (lībēr'ēə) (New Latin, = place of freedom), republic (c 43,000 sq. mi., pop. between 1,000,000 and 2,000,000), W Africa. The capital is Monrovia. It fronts on the Atlantic for some 350 mi. between the British Sierra Leone and the French Ivory Coast and stretches inland over a low and broken plateau. The rainfall is very heavy (more than 160 in. annually), and most of the country is covered by dense jungle. Climate and terrain make the region very difficult to develop, and until recently little extensive use could be undertaken. It is the only Negro republic in Africa and was founded by the American Colonization Society with colonization of freed slaves from the United States; the governing group has been made up of descendants of those settlers, numbering in 1950 possibly between 15,000 and 20,000. Universal manhood suffrage was established in 1947 and was extended in 1949 to women, but the working of this democracy is as yet largely theoretical. The huge bulk of the population is made up of Negro tribes still occupying the vast interior with their tribal organization and immemorial African mode of village life. Recently (1932–36) the large group of Kru tribes were subdued by the government after heavy fighting. Christian missionaries have in the past extended some education to part of the population, but many of the inhabitants are still pagan, and one large group, the Mandingos, are Moslems. Recently with the plans for economic development of the country, wide-scale plans for education have also gone forward, and the projects were showing some activity in 1950. At the present time the largest export is rubber, grown mostly on the huge rubber plantations of the Firestone company and shipped from the port of Marshall. From the forests products have also been gathered to some extent; piassava fiber and palm kernels (for palm oil) have been shipped out. Agriculture has not been much extended because, although the soil is said to be fertile, holding back the jungle growth is difficult and transportation has been completely lacking. Lack of transport has also prevented exploitation of the mineral wealth of Liberia or even a proper survey of it. The railroad being built in 1950 will, however, tap the iron deposits of the Bomi Hills region, where the ore is said to be remarkably pure. These developments are being undertaken with the help of American capital, and relations between Liberia and the United States are close. They have been close ever since the agents of the American Colonization Society purchased an area on the coast and managed to get the little colony of Monrovia started by 1822. It was beset by fever and attacks of hostile natives, and its survival through the early years of extreme hardship was due primarily to the company's agent, Jehudi ASHMUN, and his successor, Ralph Gurley. The immigration of freed slaves from the United States soon dwindled, particularly as the abolitionist movement grew strong. The small state, once established, was hard pushed to maintain its very existence. The British and French both eyed its potential wealth in rubber, but throughout the 19th and early 20th cent. the aegis of the United States protected Liberia from encroachments of other powers. The financial struggles of the government were enormous and came to no very successful issue. American financial counsel was offered, especially in 1909. A loan was floated in 1925–26, and in 1926 the Firestone company was granted a long lease to about a million acres for development of its rubber plantations. In 1930 a great scandal broke over the exportation of forced labor from Liberia, and a League of Nations investigation in 1931 upheld the charges that slave trade had gone on with the connivance of the government. The president and the vice president resigned, and it looked for a time as if the republic might be put under international control. Instead, under the leadership of Presidents Edwin Barclay and William V. S. Tubman, Liberia in the 1930s and 1940s began to climb out of the depression and disgrace and look toward development of natural resources. The Second World War made Africa of strategic importance, and by agreement with the Liberian government, the United States undertook to create defense bases in Liberia. The harbor at Monrovia was deepened and modernized (the deep-water harbor was opened in 1948), and a large air field (Roberts Field) was opened. A U S. public health mission was also sent to guide improvements of health conditions. After the war a group of American businessmen, headed by Edward R. Stettinius, undertook an ambitious program for the development of Liberia, and by agreement with the Liberian government in 1947 two companies were set up, the Liberia Company, intended with various subsidiary companies to forward economic development, and the Liberian Educational Foundation, intended to forward educational and social development. The Liberia Company, interested at the beginning in developing the opening of iron mines, the establishment of cacao growing, and the use of lumber resources, has been responsible for recent economic expansion, including the building of the railroad. See the works of G. W. ELLIS, E. D. Furbay, *High Hats and Tom-Toms* (1943), Henry Huberich, *The Political and Legislative History of Liberia* (1947); Charles Morrow Wilson, *Liberia* (1947).

Liberius, (lĭbēr'ēəs), pope (352–66), a Roman, successor of St. Julius I and predecessor of St. Damasus I. The status of ATHANASIUS was still disputed, and Liberius requested Emperor Constantius to call the Council of Arles (353). Subdued by imperial favor toward ARIANISM, the papal legates signed against Athanasius, but Liberius refused to be coerced or bribed. He was banished to Thrace by Constantius, who set up an antipope, Felix. In 358 Liberius was permitted to return to Rome after signing a vaguely worded creed and repudiating communion with Athanasius. Felix was forced to retire. After Constantius died, Liberius openly avowed his orthodox position and reasserted the primacy of Rome as arbiter in matters of faith.

Libertad, La (lä lĕbĕrtädh'), Pacific port (1946 estimated pop. 2,109), S Salvador. An open roadstead, La Libertad is an important passenger and import point for San Salvador, to which it is connected by paved highway.

Liberty. 1 Residential town (pop. 1,496), co. seat of Union co., E Ind., E of Connersville; settled 1822. It has many fine old houses. 2 City (pop. 3,598), co. seat of Clay co., W Mo., NE of Kansas City, laid out 1822. In a grain, bluegrass, and tobacco area, it has railroad yards. William Jewell College (Baptist; coeducational, 1849) is here. 3 Resort village (pop. 3,788), SE N Y., in the Catskills and NW of Middletown, settled 1793, inc. 1870. There is a tuberculosis sanatorium here. 4 Borough (pop. 1,084), Allegheny co., SW Pa., near Pittsburgh, inc. c 1912. 5 Town (pop. 2,240), NW S C., WSW of Greenville, in a farm area. 6 City (pop. 3,087), co. seat of Liberty co., E Texas, on the Trinity and NE of Houston, founded c 1830 as Atascosita. A river port at the head of navigation on the Trinity, it flourished before the Civil War but later lost much of its traffic. Liberty is the center of an area producing oil, hogs, rice, and lumber.

liberty, word used to describe various types of individual freedom, such as religious liberty, political liberty, freedom of speech, right of self-defense, and the like. It is also used as a general term for the sum of specific liberties. Fundamental perhaps is personal liberty, the physical freedom of the person to come and go as he pleases without unwarranted restraint. Like other freedoms, this one has a history which shows that liberty varies with time and place. In England prior to the Habeas Corpus Act (1679) a person could be seized and kept in prison indefinitely without trial or hearing. The common-law prohibition of combinations as dangerous to domestic peace and order was invoked far into the 19th cent. to limit the right of association in labor unions. Specifically political liberties, such as the right to vote and hold public office, were practically unknown much before the 19th cent., when they were achieved by the liberal movement in England. The same is true of such civil liberties as freedom of speech and of the press (writing and publishing). Freedom of conscience, the right of private judgment in religious matters, and the right to worship with groups of one's own choosing were nonexistent before the Protestant Reformation. Liberty has found philosophical expression in individualism and ANARCHISM, an extreme form of individualism, as well as in NATIONALISM. Such philosophers as John Locke and Jean Jacques Rousseau popularized the conception of the individual as having certain natural rights which could not be denied or taken away by society or by any external authority, rights which Thomas Jefferson spoke of in the Declaration of Independence as "unalienable" and which were embodied in the Bill of Rights of the Constitution. Rousseau especially thought of them as the rights possessed by men living in a "state of nature" and never surrendered, but only modified, in the "social contract" by which they agreed to live together in society. Political scientists point out that even in a state of nature men are subject to the law of nature and that the rights enjoyed by them in society are historically acquired and not "natural" except in a strictly social sense. The process of acquiring liberties is through the joining of like-minded individuals to gain special privileges for themselves. Thus through the Magna Carta the barons in 1215 wrested from King John a certain freedom from royal authority which in time they had to share with the rest of the people. The history of liberty in the later Middle Ages is that of numerous corporate groups, such as guilds of artisans and merchants, winning immunity from external control. By agreements with their feudal overlords these groups obtained release from certain feudal dues and bonds, gaining a limited freedom to carry on trade and manufacture, which forms the nucleus of the liberties extended to the so-called middle class in the 19th cent. So-called "racial" or ethnic minorities, as in the old Austro-Hungarian Monarchy, have been able by a show of strength to gain legal status for their language and cherished folkways as well as assured political rights. Freedom to follow the trade or profession of one's inclination, as of women to practice medicine, denied in certain societies, has been gained only in recent times. The feminist movement in the 19th and 20th cent. is a good example of the peaceful acquisition of rights, in this case abetted by the partisans of other democratic liberties. The acquired nature of rights—their dependence on conditions of time and place—also makes them peculiarly subject to danger of loss. Liberties need to be defended against encroachment, and sometimes populations have to submit to their temporary curtailment. In times of national danger rights are sometimes suspended, as was the right of habeas corpus by President Lincoln in the Civil War, and the struggle for rights not yet acquired may have to be discontinued. Philosophers have made a distinction between the negative aspect of liberty, freedom from external restraint, and the positive aspect, freedom for self-expression. Since medieval times much of the increase of liberty has been through the removal of restraints once imposed by Church and state, by custom and law, in the 20th cent. attention was turned to the creation of certain conditions regarded as necessary if individuals are to develop their best talents. The idea of equality, emphasized by the philosophers of the French Rev-

olution, came to be closely associated with the idea of liberty in democratic societies, not equality based on a supposed equality of ability but equality of opportunity. Inequality, especially economic inequality, was held to be as great an obstacle to individual development as any form of external restraint. Therefore it was proposed that the state should seek to equalize as far as possible the conditions of education, health, housing, and the like for all, establishing economic and social security, freedom from want and fear, so that every individual might have equal opportunity for self-realization See George Soule, *The Future of Liberty* (1936), R N Anshen, ed, *Freedom* (1940), C. L. Becker, *New Liberties for Old* (1941)

Liberty, Statue of, colossal statue, a national monument, on Bedloe's Island in New York harbor. The statue, originally known as *Liberty Enlightening the World*, was proposed by Edouard Laboulaye to commemorate the French and American Revolutions Funds were raised by the Franco-American Union (organized 1875), and the statue was designed by F A Bartholdi in the form of a woman with uplifted arm holding a torch. The statue, 152 ft high, was constructed of copper sheets from Bartholdi's 9-foot model It was presented to the United States in 1884 and was dedicated in 1886 The base of the statue is an 11-pointed star, part of old Fort Wood, and the pedestal, almost 150 ft high, is built of concrete faced with granite An elevator runs to the top of the pedestal In 1924 the Statue of Liberty became a national monument. The statue commands the entrance to New York city and can be seen for a long distance

Liberty Bell, historic relic in INDEPENDENCE HALL, Philadelphia First hung in 1753, it bore the inscription, "Proclaim Liberty throughout all the Land unto all the Inhabitants Thereof" (Lev 25 10), thus it was fitting that the bell was rung in July, 1776, to proclaim the Declaration of Independence Taken to Allentown and hidden (1777–78) during the British occupation of Philadelphia, it was later brought back In 1781 it was moved from the steeple to the brick tower It was cracked in 1835, and it rests on its original timbers as an exhibit See Victor Rosewater, *The Liberty Bell* (1926).

Liberty party, in U S history, an antislavery political organization founded in 1840 It was formed by those ABOLITIONISTS, under the leadership of James G BIRNEY, who repudiated William Lloyd Garrison's nonpolitical stand Birney, their presidential candidate in 1840, received a little more than 7,000 votes Because of better local organization and the Texas issue, Birney polled over 60,000 votes in 1844, drawing enough support from Henry Clay in New York state to throw the presidency to James K Polk The party continued strong in local elections in 1846, but in 1848 withdrew its nominee, John P Hale, and united with antislavery Whigs and Democrats to form the stronger FREE-SOIL PARTY See T C Smith, *The Liberty and Free Soil Parties in the Northwest* (1897)

Libertyville, village (pop 3,930), NE Ill, NNW of Chicago, named 1837, inc 1882 It is a shipping and processing center in a farm region

libido (lĭbĭ'dō, -bē'-) [Latin, =lust], psychoanalytic term used by Freud to represent the energy, striving activity, or force through which the sex instinct is expressed It was used by C G Jung to include the energy having its source in any or all instincts See PSYCHOANALYSIS

Libnah (lĭb'nə) [Heb, =whiteness] **1** Unidentified place in the desert wanderings Num 33 20 **2** Prominent city, SW Palestine, of undetermined location Joshua 10 29, 12,15, 15 42, 21 13, 2 Kings 8 22; 19 8, 23 31, 24 18, 1 Chron 6 57, 2 Chron 21 10, Jer 52 1

Libni (lĭb'nī) [Heb, =white] **1** Founder of a Gershonite family Ex 6 17, Num 3 18,21, 26 58, 1 Chron 6 17,20 Laadan 1 Chron 23 6, 26 21 **2** Head of a Merarite family 1 Chron 6 29

Libon (lī'bŏn), 5th cent B C, Greek architect Within the sacred precincts of Altis at Olympia where the Greeks celebrated their Olympic games, Libon built the Doric temple to Zeus (completed 456 B C)

Libourne (lēbōōrn'), town (pop 14,563), Gironde dept, SW France, on the Dordogne and near Bordeaux It has a large river port for its wine trade

Libra (lī'brə) [Latin, =the balance], seventh sign of the zodiac It is also a southern zodiacal constellation, known by this name among the Romans, but called by the Greeks, as a rule, Chelae, the "Claws" of the Scorpion The idea of the balance, or pair of scales, may have reference to the fact that the sun passes into the part of the ecliptic corresponding to this sign at the time of the autumnal equinox, when days and nights are of equal length In the constellation the most prominent stars are Alpha Librae and Beta Librae It also includes the globular cluster, Messier 5

library. The earliest known library was a collection of clay tablets in Babylonia in the 21st cent B C Ancient Egyptian temple libraries are known through the Greek writers Diodorus Siculus describes the library of Ramses III, c 1200 B.C The library of Assur-bani-pal (d. 626? B C.) in Nineveh was the most noted before that at Alexandria The temple at Jerusalem contained a sacred library In Greece the earliest private book collections (dating from the 6th cent B C) were those of Pisistratus, Polycrates of Samos, Plato, Euripides, and Aristotle. The first public library in Greece was established in 330 B C, in order to preserve accurate examples of the work of the great dramatists The most famous libraries of antiquity were those of ALEXANDRIA, founded by Ptolemy I The library at PERGAMUM, founded or expanded by Eumenes II, rivaled those at Alexandria The first Roman libraries were brought from Greece, Asia Minor, and Syria as a result of conquests in the 1st and 2d cent B C Sulla brought back from Athens (84 B C) the library of Aristotle The great public libraries of the Roman Empire were the Octavian (destroyed A D 80) and the Palatine (destroyed A D c 190) and the more important Ulpian library, founded in the reign of Trajan In the early Middle Ages, Roman libraries, being filled with pagan learning, were destroyed or neglected The early Christian libraries were in monasteries, the Benedictines amassed a fine collection at Monte Cassino The Romans had brought book collections to the British Isles, but early monastic libraries were founded by St Columba and other missionaries in the 6th cent In the 14th and 15th cent Charles V of France, Lorenzo de' Medici, and Frederick, duke of Urbino, all formed fine libraries, part of the Urbino library is now in the Vatican The Arabs in the 9th to 15th cent collected and preserved many libraries In the 15th cent the Vatican Library, the oldest public library in Europe, was formed In 1475 Platina, as its first librarian, made a catalogue which included 2,527 volumes In 1257 the Sorbonne library at Paris was founded, and in 1525 the erection of the Laurentian Library at Florence was begun Many of the great university libraries (e g, Bologna, Prague, Oxford, and Heidelberg) were opened in the 14th cent Among the chief modern libraries are the BIBLIOTHÈQUE NATIONALE and the Mazarine, Paris, the BRITISH MUSEUM, London, the Bodleian Library, Oxford, the VATICAN LIBRARY, Rome, the AMBROSIAN LIBRARY, Milan, the Laurentian, Florence, the Lenin Library, Moscow, the LIBRARY OF CONGRESS, Washington, D C, the NEW YORK PUBLIC LIBRARY, the libraries of Columbia, Harvard, Yale, Princeton, Chicago, and other great American universities, and the Newberry and John Crerar libraries, Chicago In the United States a circulating library, the Library Company of Philadelphia, was chartered in 1732 on the initiative (1731) of Benjamin Franklin, this celebrated its bicentennial in 1931 A public library had, however, been opened in Boston as early as 1653 In 1833 the first tax-supported library in the country opened at Peterborough, N H The American Library Association was formed in 1876, and this organization spurred improvements in library methods and in the training of librarians Among the innovations of the late 19th cent were free access to books by the public (involving elaborate classification schemes) and branch libraries or deposit stations for books in many parts of cities, in the early 20th cent "traveling libraries," or "bookmobiles," began to take books to the readers Three widely used systems of book classification were the Dewey decimal system of Melvil DEWEY, the system of Charles Ammi CUTTER, and the Library of Congress system The classic work on the history of libraries is Edward Edward's *Memoirs of Libraries* (1859) See also E A Savage, *The Story of Libraries and Book Collecting* (1909), A E Bostwick, *The American Public Library* (4th ed., 1929), J W Thompson, *The Medieval Library* (1939) and *Ancient Libraries* (1940), L R Wilson and M F Tauber, *The University Library* (1945)

Library of Congress, national library of the United States, Washington, D C, est 1800 Copies of all books copyrighted in the United States must go to the Library of Congress Intended primarily to serve the legislative branch of the government, it is now open to the public as a reference library and sends out many books by an interlibrary loan system An act of 1870 made the library responsible for handling copyrights, a copyright department within the library was established in 1897. Mainly supported by congressional appropriations, the library also has the income from gifts by foundations and individuals, administered by the Library of Congress Trust Fund Board The library has divisions of manuscripts, maps, rare books, prints and photographs, music, aeronautics, and Orientalia and a Hispanic Foundation The library building, near the Capitol, was erected in 1897, an annex five stories high was opened in 1939

library school. Since Melvil Dewey established (1887) at Columbia Univ. a school for training library workers, more than 30 such schools have come into operation in the United States and Canada Some of these are schools of universities (as at Columbia and the Univ. of Illinois), others are at independent undergraduate institutions (e g, Pratt Institute), some are parts of great public libraries (e g, Los Angeles Public Library). Elementary training is also given in summer schools and training-class courses. The first graduate school to confer the doctoral degree in library science was the Univ. of Chicago. In 1915 the Association of American Library Schools was formed, and in 1924 the American Library Association Board of Education for Librarianship was established to determine and maintain standards. There are library schools in London, Paris, and other European cities, and one is at Lima, Peru

libretto (lĭbrĕ'tō) [Ital, =little book], the text of an opera or an oratorio The problem of securing a suitable libretto is ever present with the opera composer. The first important librettist was OTTAVIO RINUCCINI, librettist for Peri, Caccini, and other 16th-century opera composers. The outstanding librettist of the 18th cent was Pietro METASTASIO, and in the 19th cent Eugène SCRIBE stood in somewhat comparable position Other important librettists are Philippe QUINAULT, Raniero Calzabigi (Gluck's librettist), Lorenzo DA PONTE, Henri MEILHAC and Ludovic HALÉVY (librettists of Bizet's *Carmen*), W S GILBERT, Arrigo BOITO, and Hugo von HOFMANNSTHAL. Wagner wrote his own librettos, achieving thereby the fusion of text and music that he sought See D J. Grout, *A Short History of Opera* (1947)

Libreville (lēbrūvēl'), town (pop. 17,868), NW French Equatorial Africa, a port on the Gulf of Guinea Hardwoods are exported

Libya (lĭb'bēə), former Italian possession (679,358 sq mi, 1938 pop 888,401), on the north shore of Africa, fronting on the Mediterranean Sea Tripoli is the chief administrative center Libya is bordered on the west by Tunisia and Algeria, on the south by French West Africa and French Equatorial Africa, and on the east by the Anglo-Egyptian Sudan and Egypt The country is divided into three main regions of indeterminate extent. TRIPOLITANIA occupies approximately the western two thirds of the northern section, CYRENAICA the eastern third, and FEZZAN the western section of central and S Libya The coast of Libya, c 1,000 mi long and deeply indented by the wide Gulf of Sidra, has only two good ports, Tripoli and Bengasi There are many coastal oases where large crops of dates, olives, and oranges are grown A short distance inland are stretches of plateau land brought under cultivation in the late 1930s and producing grapes and grain The greater part of the country is desert belonging to the Sahara and in places extending to the coast (the Libyan Desert) Here all is barren except around the water holes and along the banks of intermittent streams in the mountainous areas The habitable portions of Libya are linked chiefly by road, railroads are confined to sections of the coast Libya has endured the domination of many foreign powers In ancient times it was successively under Carthage, Rome, and the Vandals In the Middle Ages, Moslem states - Arabia, Morocco, and Egypt—contended for control Spain and the Knights of Malta held dominion for a time in the early 16th cent The Ottoman Empire took Libya in 1551, but the pashas ruling the area generally enjoyed great independence The Ottoman hold was strengthened in the 19th cent After the Turco-Italian War (1911–12) Italy annexed substantially the present territory, although the boundaries with Tunisia and Egypt were not established until after the First World War Italy made comparatively little effort to develop its colony of Libya until the '30s, when roads, civic buildings, schools, and hospitals were built Some 20,000 colonists were sent from the home country to the plateau region in 1938 and 1939 In 1939 the four administrative divisions of Libya were formally constituted provinces of Italy, and the Moslem population was given a limited form of citizenship Libya became one of the chief battlegrounds of North Africa after Italy entered the Second World War in June, 1940 (for military details, see NORTH AFRICA, CAMPAIGNS IN) After the United Nations completely defeated the Axis in Africa (1943), Fezzan was assigned to France for occupation, and the remainder of the country was assigned to Great Britain. The native population, overwhelmingly composed of Arabic-speaking Moslems, strongly demanded independence The Big Four (Great Britain, France, the United States, and the USSR) having failed to reach agreement on the future of Libya, the problem was turned over to the General Assembly of the United Nations In Nov, 1949, the Assembly decided that Libya should become an independent country not later than Jan 1, 1952 See Dugald Campbell, *Camels through Libya* (1935), Knud Holmboe, *Desert Encounter* (1936), Martin Moore, *Fourth Shore: Italy's Mass Colonization of Libya* (1940), W. C Askew, *Europe and Italy's Acquisition of Libya, 1911–1912* (1943).

Licata (lēkä'tä), city (pop 30,641), S Sicily, Italy It is a seaport and an industrial and commercial center exporting sulphur, asphalt, and cheese Founded in the 3rd cent. B C. and called Phintias after the tyrant of Acragas, it was the refuge of the people of GELA after their city's destruction Off near-by Cape Ecnomus (now Poggio Sant' Angelo), the Roman consul Regulus won (256 B C) a decisive battle in the PUNIC WARS. Licata was one of the initial landing points in the Allied invasion of Sicily, July 9–10, 1943.

license, in public law, permission by legal authority to engage in certain acts and also the document showing such permission Some licenses are required for the protection of the public and assure professional competence (e g., physicians) or moral fitness (e.g., tavern keepers). Others are designed primarily to raise revenue or to keep a registry (e g , automobile licenses) It is a crime to engage in a licensed activity without having first procured a license In property law, a license is a right which the owner grants some other party to make use of his land Such licenses are revocable at will if they are not part of a contract They are personal and hence may not be sold, they expire on the death of the grantee A license to cross another's land is an EASEMENT in gross

lichen (lī'kŭn), slow-growing plant form of simple structural appearance, composed of algae and fungi living together The relationship is interpreted by some scientists as symbiosis, but usually the fungus is considered to be parasitic on the alga Lichens are flowerless and show no distinction between stem and leaf Reproduction is by dispersal of small portions of the plant body Lichens grow from arctic to tropical regions and are common on rocks, stumps, and tree trunks When they grow on rock their acid content acts upon its surface, thus beginning the long, slow process of weathering by which the rock becomes soil Though mostly gray in color, lichens are also of beautiful reds, rusts, violets, blues, and browns The lichens called REINDEER MOSS and Iceland moss provide food for mammals and other animals in northern regions. Iceland moss is probably the only lichen of medicinal value today Before the discovery of aniline dyes, lichens were much used for silk and wool dyes Litmus and archil are obtained from species of lichens Others have been used in perfume manufacturing and brewing The "manna" of the Bible is thought by some to have been a lichen found in Old World deserts and easily carried along by winds See A L Smith, *Lichens* (1927, reissue, 1936), G G Nearing, *The Lichen Book* (1947)

Lichfield, municipal borough (1931 pop 8,507, 1943 estimated pop 11,000), Staffordshire, England It is a peaceful market town famous for its three-spired cathedral and its close associations with Dr Johnson The cathedral, dating from the 13th and 14th cent , replaced the original church built by St Chad, who founded the see in the 7th cent It suffered considerable damage at the hands of the parliamentary forces during the civil war and was not completely restored until the 19th cent The Lady chapel, one of the oldest parts, is of special interest The house where Dr Johnson was born and where he lived is now a museum containing many relics of his life and works, and there is also a statue of him in the market square At the old grammar school (founded 1495) Johnson, Addison, and Garrick studied In the 18th cent a literary circle which included Erasmus Darwin, Thomas Day, and Anna Seward was known as the Lichfield group

Lichnowsky, Karl Max, Fürst von (kärl' mäks' fürst' fŭn lĭkhnôf'skē), 1860–1928, German diplomat, ambassador to London (1912–14) In a privately printed pamphlet (1916) he asserted that his efforts to prevent the outbreak of the First World War were not supported by his own government This pamphlet, published in the United States in 1917 as *My London Mission*, caused his expulsion from the Prussian upper house He later wrote *Heading for the Abyss* (Eng tr , 1928)

Lichtenberg, Georg Christoph (gā'ôrk krĭs'tôf lĭkh'tunbĕrk), 1742–99, German physicist and satirist He taught at the Univ of Gottingen from 1769 His special field was electricity Lichtenberg made several visits to England and was influenced by the satire of Swift and by the English theater He satirized the pseudo science of Lavater and attacked the *Sturm und Drang* writers His work on Hogarth's engravings is noted

Licinio, Giovanni Antonio see PORDENONE

Licinius (lĭsĭn'ĭŭs), d 325, Roman emperor He became coemperor with Galerius, being given the rule of Illyricum (308), after the death of Galerius he added Greece and Thrace to his territories He allied himself with Constantine I and defeated Maximin in 313, thus becoming sole ruler in the East He subsequently fell out with Constantine who defeated him (314) and forced him to cede all his European territories but Thrace War was resumed in 324, and Constantine defeated Licinius at Adrianople and Chrysopolis Licinius was imprisoned and finally put to death

Licinius, Roman plebeian gens, of which several men were noteworthy **Caius Licinius Calvus Stolo** (kā'yŭs, kăl'vŭs stō'lō), fl 375 B.C , was tribune of the people with Lucius Sextius Roman historians attributed to him a number of laws of different periods These laws, the Licinian Rogations, provided a strict limitation on the amount of public land one person might hold and on the number of cattle, sheep, and goats that he could graze on the public land They included also a strict regulation of the collection of debts; and, most significant politically, they abolished the office of military tribune with consular power and ordained that one consul must be plebeian. It is said that Licinius Stolo was later fined for violating his own law on the possession of public land **Caius Licinius Macer** (mā'sur), d 66 B.C , orator and historian, committed suicide after his conviction by Cicero under the law against bribery and extortion His son, **Caius Licinius Macer Calvus,** 82 B C–c 47 B C , poet and orator, was considered anciently the peer of Catullus, his works are lost

Licking, river, c 320 mi long, rising in E Kentucky SE of Salyersville and flowing NW to the Ohio opposite Cincinnati Its principal tributaries are the North and South forks It was an important means of travel for Indians and pioneers and later a busy trade route The river has been the setting for more than one historical happening, at its mouth in 1780 gathered George Rogers Clark's frontiersmen for their march up the Little Miami, and the battle of Blue Licks (1782) occurred in the Licking valley Covington and Newport are at the mouth of the Licking, Cynthiana and Paris are on the South Fork

Lick Observatory. see HAMILTON, MOUNT.

licorice (lĭk'ŭrĭs, -rĭsh), name for a European plant (*Glycyrrhiza glabra*) and for the sweet substance obtained from the root Since early times the root has been used medicinally (for coughs and as a laxative), it is used also in brewing, for confectionery, and for flavoring (e g , in some tobacco) The licorice plant, a perennial, with blue pealike blossoms, is cultivated chiefly in parts of the Old World Another species, the wild licorice, is native to North America, other plants of similar flavor may be called licorice

lictor, in ancient Rome, guard who bore the FASCES before a magistrate

Liddell, Henry George (lĭ'dul), 1811–98, English clergyman and classical scholar He was dean (1855–91) of Christ Church, Oxford, and is celebrated for his collaboration with Robert Scott in the compilation of the *Greek-English Lexicon* (1843, new ed , 1925) It was his daughter, Alice Liddell (d 1934), for whom Lewis Carroll wrote *Alice in Wonderland*

Liddell Hart, Basil Henry (lĭ'dul hart'), 1895–, English author and military strategist, b London His education at Cambridge was interrupted by the First World War, in which he served (1914–18) and was twice wounded Retiring from the army as a captain in 1927, he was military correspondent for the London *Daily Telegraph* (1925–35) and the London *Times* (1935–39) An early advocate of mechanized warfare he evolved a number of tactical developments, especially in infantry training, which were officially adopted From 1937 to 1938 he was personal adviser to the British war minister, Leslie Hore-Belisha, and suggested a program of reorganization and reform which was partly instituted Among his numerous books are *A Greater than Napoleon Scipio Africanus* (1926), *Reputations, Ten Years After* (1928), *Sherman, Soldier, Realist, American* (1929), *The Decisive Wars of History* (1929), *Foch, the Man of Orleans* (1931), *The Future of Infantry* (1933), *A History of the World War, 1914–1918* (1934), *Colonel Lawrence, the Man behind the Legend* (1934), *The Defence of Britain* (1939), *Thoughts on War* (1944), and *The German Generals Talk* (1948)

Liddesdale, William Douglas, Knight of (lĭdz'dāl), 1300'–1353, Scottish nobleman Called the Flower of Chivalry, he was a relative of the earls of Douglas Under DAVID II he was warden of the Western Marches and was given the lordship of Liddesdale in 1342 He served as ambassador to the French court and fought against the English in the Lowlands until Edward III took him prisoner near Durham (1346) and made him do homage He had murdered his rival, Sir Alexander Ramsay of Dalhousie, and was in turn murdered by William Douglas, 1st earl of Douglas, who inherited some of Liddesdale's lands

Liddon, Henry Parry, 1829–90, English clergyman and noted preacher and lecturer His Bampton Lectures of 1866, *The Divinity of Our Lord and Saviour Jesus Christ*, have passed through many editions As canon of St Paul's Cathedral (from 1870) he won wide attention with his sermons He was identified with the OXFORD MOVEMENT His life of his friend Pusey, left unfinished, was completed and published (1893–97) See biographies by J O Johnston (1904) and G W E Russell (1909)

Lidgerwood, city (pop 1,042), extreme SE N Dak , near the S Dak. line, in a farm area, inc 1901

Lidice (lĭ'dĭsĕ, Czech lĭ'dyĭtsĕ), village (former pop 446), central Bohemia, Czechoslovakia, near Kladno In reprisal for the assassination of Reinhard HEYDRICH the Germans "liquidated" (1942) Lidice by killing all the men, deporting all women and children, and razing the village to the ground Post-war plans called for the establishment of a national park on the site and for a new village near by

Lidköping, Swed *Lidköping* (lēd'chö"pĭng), town (pop 13,031), Skaraborg co , SW Sweden, on Vanern Lake It has sugar refineries, match factories, and porcelain works

Lido di Venezia (lē'dō dē vānā'tsyä), long, thin, sandy island separating the lagoon of Venice from the Adriatic Only 20 minutes by boat from Venice, it has a beautiful beach and is one of the most fashionable bathing resorts in Europe

Lie, Jonas (lē), 1880–1940, American landscape and marine painter, b Norway, nephew of the Norwegian novelist Jonas Lie He came to the United States in 1893 and began earning his living at 17, studying art in the evening After 1903 his pictures became increasingly known and were acquired by museums throughout the country His series of pictures on the construction of the Panama Canal were bought for the U S Military Academy A member of the National Academy of Design and its president from 1934 to 1939, he worked to liberalize the attitude of the academy toward young artists

Lie, Jonas Lauritz Idemil (yō'näs lou'rĭts ē'dumēl lē'), 1833–1908, Norwegian novelist As a writer of novels dealing with the family life of ordinary people, their problems and pleasures, Lie is considered the creator of the modern Norwegian novel His first book was *The Visionary* (1870, Eng tr , 1894), this was followed in 1874 by his masterpiece, *The Pilot and His Wife* (Eng tr , 1876) Two later books, *The Family at Gilje* (1883, Eng tr , 1920) and *The Commodore's Daughter* (1886, Eng tr , 1892), are studies of women's social and intellectual restrictions in upper middle-class life See Alrik Gustafson, *Six Scandinavian Novelists* (1940)

Lie, Marius Sophus (ma'rēōs sō'fōos lē), 1842–99, Norwegian mathematician He is noted for his contributions to the theories of differential equations and continuous transformation groups He was professor at the Univ of Christiania and at Leipzig

Lie, Trygve Halvdan (trug'vu hälv'dhan lē'), 1896–, Norwegian statesman, first secretary general of the United Nations A lawyer and Labor party leader, he was Norwegian minister of justice (1935-39) and minister of trade and supply (1939–41) Active in the government in exile, he became foreign minister (1941) and retained his post after the government's return (1945) to Oslo Howard (1948) secretary general of the United Nations, Lie set a precedent by taking an active part in negotiations rather than contenting himself with the role of a figurehead

Lieber, Francis (lē'bur), 1798–1872, German-American political philosopher, b Berlin Ardently patriotic, he enlisted in the Prussian army and fought and was wounded at the battle of Waterloo On his return to Germany he joined Jahn's *Turnverein* movement In the suppression of student organizations in 1819 Lieber became suspect for his liberal ideas and was harried by the police for the remainder of his life in Germany, he was twice imprisoned Not permitted to attend a Prussian university, he obtained a degree at Jena In 1826 he fled to England He went to Boston in 1827 to teach Jahn's system of gymnastics From his idea of translating the Brockhaus encyclopedia into English sprang the first edition of *The Encyclopaedia Americana* (13 vols , 1829–33), which he edited Lieber was professor of history and political economy (1835–56) at South Carolina College While there he wrote the books which established his reputation as a political philosopher—*A Manual of Political Ethics* (1838), *Essays on Property and Labor* (1841), and *On Civil Liberty and Self-Government* (1853) He taught at Columbia from 1856 until his death. For the Union government he prepared *Instructions for the Government of Armies of the United States in the Field*, known in its final form as *General Order No 100* It was the basis for subsequent efforts to codify the international law of war Lieber after the Civil War aligned himself with the radical Republicans See biography by Frank Freidel (1947)

Lieber, Thomas see ERASTUS, THOMAS

Liebermann, Karl (kärl' lē'burman), 1842–1914, German chemist He was professor of organic chemistry at Charlottenburg (1873–1913) and at the Kaiser Wilhelm Institute, Berlin (from 1913). In 1868, with Carl Graebe, he synthetized ALIZARIN, which gave rise to the alizarin dye industry in Germany

Liebermann, Max (mäks'), 1847–1935, German genre painter and etcher He was leader of the Secessionists and was president of the Berlin Academy He was strongly influenced by the Barbizon painters, and his best work depicts the life of the working classes and peasants in Germany and Holland His early work was somber, but he later achieved a brighter palette and a fine luminosity His frank and realistic style aroused some opposition, but he later acquired a high reputation In addition to genre he painted numerous portraits and was an accomplished etcher Among his works in the United States is *The Rope-Walk* (Metropolitan Mus) In his last year he was forbidden by the Nazi authorities to carry on artistic activities.

Liebig, Justus, Baron von (yŏos'tŏos bärŏn' fŭn lē'bĭkh), 1803–73, German chemist As professor at Giessen (1824–52), he was among the first to establish a chemical teaching laboratory, there some of the leading chemists of the 19th cent were trained He was professor at Munich from 1852 to 1873. He improved methods of organic analysis and investigated organic compounds such as uric acid. He

made valuable contributions to agricultural chemistry Liebig refuted the prevalent theory that plants derive their nourishment from humus and emphasized the importance to plants of the nitrogen and carbon dioxide of the air and of the mineral constituents of the soil; subsequently he did important work in the development of artificial fertilizers. His works include *Organic Chemistry in Its Applications to Agriculture and Physiology* (1840, Eng tr, 1840), See F R Moulton, ed., *Liebig and after Liebig* (1942)

Liebknecht, Karl (karl' lēp'kŭnĕkht), 1871–1919, German socialist leader, son of Wilhelm Liebknecht His antimilitaristic writings caused his conviction (1907) of high treason Released from prison, Liebknecht entered the Prussian lower house in 1908 and the Reichstag in 1912 As member of the extreme left wing of the Social Democratic party, he refused to follow his party in its support of the government during the First World War Over the signature Spartacus he published pamphlets which gave to his followers the name Spartacists The SPARTACUS PARTY was the nucleus of the German Communist party Imprisoned again, Liebknecht was released just before the armistice of Nov, 1918 With Rosa LUXEMBURG he opposed the moderate Socialists and advocated a dictatorship of the proletariat. With the failure of the Spartacist revolt (Jan, 1919), Liebknecht and Rosa Luxemburg were arrested and killed while being carried to prison

Liebknecht, Wilhelm (vĭl'hĕlm), 1826–1900, German Socialist leader and journalist His participation in the Revolution of 1848 forced him into exile. While in England, he associated for 12 years with Karl MARX Although greatly influenced by Marx, he disagreed with him on many fundamental principles of socialism Returning to Germany in 1862, he and his disciple August BEBEL were founders of the Social Democratic party (1869) A confirmed pacifist and ceaseless fighter for human freedom and social justice, he incurred the enmity of Bismarck, was convicted of treason, and with Bebel spent two years in prison Elected to the Reichstag in 1874, he remained a member until his death Liebknecht wrote many books on historical and social topics and edited several Socialist newspapers (*Demokratisches Wochenblatt*, *Volksstaat*, and *Vorwärts*).

Liebler, Thomas: see ERASTUS, THOMAS

Liechtenstein (lĭkh'tunshtīn″), principality (62 sq mi, pop 11,218), W central Europe, between Austria in the east and Switzerland in the west, where it is bounded by the Rhine Vaduz is the capital. Liechtenstein is a pastoral and agricultural district, beautifully situated amid the Alps It has no army and (as of 1947) had a police force of nine Much revenue is derived from the issue of postage stamps and from the minimal taxes imposed on international holding companies which, for obvious reasons, chose Vaduz as headquarters The ruling prince, Francis Joseph II, acceded in 1938 The constitution of 1921 provides for an elected diet of 15 members Liechtenstein adopted Swiss currency in 1921, entered a customs union with Switzerland in 1924, and is represented abroad through the Swiss government Catholicism is the predominant religion, and German is the national language The principality was created in 1718 as an immediate fief of the Holy Roman Empire by uniting the county of Vaduz and the barony of Schellenberg, acquired by the ancient Austrian family of Liechtenstein. The princes, who own huge estates (many times larger than their principality) in Austria and—until recently—in Czechoslovakia, rarely visited their country, but played an important role in the service of the Hapsburg monarchy. Thanks to its smallness, Liechtenstein was overlooked in the upheavals of the past century and a half It was a member of the German Confederation from 1815 to 1866 and, being technically allied to Austria in the Austro-Prussian War of 1866, was overlooked in the peace treaty and thus remained theoretically at war with Prussia After the First World War the principality became increasingly oriented toward Switzerland In recent years the prince has made his castle at Vaduz his residence.

lied and **lieder:** see SONG.

lie detector, general name given to any scientific instrument designed to record bodily changes resulting from the telling of lies. Cesare Lombroso, in 1895, was the first to utilize such an instrument, but it was not until 1914 and 1915 that Vittorio Benussi, H. E Burtt, and, most importantly, W M Marston produced scientific devices enabling correlation of blood pressure and respiratory changes with lying. In 1921 an instrument capable of continuously recording blood pressure, respiration, and pulse rate was devised by John A. Larson. This was followed by the polygraph (1926) of Leonarde Keeler, a refinement of earlier detecting devices, and by the psychogalvanometer (1936) of W. G. Summers, a machine which measures electrical changes occurring on the skin. Although the lie detector is used in police work, the similarity of physical changes caused by emotional factors such as feelings of guilt to those caused by lies has made its evidence for the most part legally inacceptable.

Liége (lēāzh', Fr. lyāzh), Flemish *Luik* (loik), province (1,526 sq. mi., pop 932,227), E Belgium. It is part of the industrial valley of the Meuse and of the agricultural Ardennes plateau. Liége is the capital, other centers are Verviers, Huy, Spa, and Seraing The province is French-speaking (see WALLOONS) except in the eastern districts of EUPEN and MALMÉDY, along the German border, where German prevails. Coal mining, metallurgy, armament manufactures, and wool textile manufactures are the chief industries. The province shared the history of the prince-bishopric of Liége, of which it was a part

Liége, Flemish *Luik*, city (with suburbs pop c 430,000), capital of Liége prov., E Belgium, on the Meuse and Ourthe rivers The core of the city is the commune of Liége (pop 150,103), among its other communes are Herstal, Grivegnée, and Ougrée The commercial center of the industrial Meuse valley and itself a major industrial center, it also is a vital communications point at the head of the ALBERT CANAL and the Liége-Maastricht Canal and at the center of a road and railroad net connecting Belgium and Germany. Liége is furthermore the cultural center of French-speaking Belgium, an episcopal see, and the seat of a university (founded 1817) Its industries include metallurgy (processing of aluminum and zinc), the making of machinery, armaments manufactures (at Herstal), brewing, and flour milling. A growing trading point by the 10th cent., Liége became the capital of the extensive prince-bishopric of Liége, which comprised most of modern Liége prov and parts of Limburg and Namur prov This ecclesiastic state lasted until 1792 Its cloth and metal industries soon found an international market, at the same time the burgher class grew to great prominence In the late Middle Ages, Liége was torn by bitter social strife In the 14th cent the "lesser folk" (the guilds) won far-reaching concessions from the nobles and wealthy merchants and began to take part in the city government The episcopal functionaries were placed (1373) under the supervision of a tribunal of 22 persons, 14 of whom were burgesses This Peace of the Twenty-Two remained, with interruptions, the basic guarantee of the constitutional liberty of Liége until 1792 In 1467 Charles the Bold, duke of Burgundy, who had imposed his protectorate on Liége, punished the rebellious citizens by abolishing their communal liberties The citizens, encouraged by LOUIS XI of France, rose in rebellion, but Charles forced Louis to assist him in repressing the revolution and sacked Liége (1468) As an episcopal principality, Liége remained technically a sovereign member of the Holy Roman Empire after the Netherlands passed under Hapsburg rule (see NETHERLANDS, AUSTRIAN AND SPANISH), actually, however, the prince-bishops were dependent on the Spanish kings and (after 1714) the emperors The strategic position of Liége as a key to the Meuse valley made the strongly fortified city the scene of numerous sieges throughout its history. In 1792 the French under Dumouriez entered Liége, which from then on fully shared the history of Belgium. In the 19th cent it was a center of Walloon particularism (see WALLOONS), of rapid industrial expansion, and of socialism Its greatly strengthened fortifications fell before the German onslaughts in Aug. 1914, and May, 1940 A major supply center after its liberation (1944) by American troops, it suffered intense and destructive bombardment by rocket weapons during the BATTLE OF THE BULGE. However, because of the inaccuracy of the rocket bombs, the principal buildings and thoroughfares of the handsome city suffered no mass destruction Among the ancient monuments of Liége—which has a generally modern aspect—are the cathedral (partly dating from the 13th cent.), the Church of St Denis (10th cent.), and the palace of justice, former residence of the prince-bishops (16th cent.).

Liegnitz (lēg'nĭts) or **Legnica** (lĕgnē'tsä), city (pop 24,357), Lower Silesia, W of Breslau and on the Katzbach river It was transferred to Polish administration in 1945 A commercial center since the 12th cent., it was the seat (1248–1675) of a principality ruled by a branch of the PIAST dynasty, on the extinction of which it passed to the house of Austria In the War of the Austrian Succession it was acquired (1742) by Prussia. Liegnitz was heavily damaged in the Second World War, but it has retained its 11th-century castle, parts of its medieval walls and towers, and two churches (13th–14th cent.), one of which contains the tombs of the Piasts It is a rail center and has a textile industry Near Liegnitz is the village of Wahlstatt, where the Mongols defeated (1241) the Germans and Poles and where the Prussians under Blücher defeated (1813) the French.

Liepaja (lēĕ'pāya), Ger. *Libau* (lē'bou), city (pop. 57,098), SW Latvia, an ice-free port on the Baltic Sea. In size it is second in Latvia only to Riga, and it is an industrial center with steel mills, shipyards, paper mills, and various manufactures First mentioned in 1263, it was a city of Livonia and later of the duchy of Courland, with which it passed (1795) to Russia. In the late 19th and early 20th cent. Liepaja acquired great commercial importance and was one of the main Russian emigration ports with a direct shipping line to the United States Liepaja had c.100,000 inhabitants at the beginning of the First World War It was (1915–18) under German occupation, and in 1919 it was briefly controlled by a German free corps under Rüdiger von der Goltz. In the Second World War it was again occupied (1941–45) by the Germans Liepaja was called Libava by the Russians until 1917, the spelling Lepaya is a transliteration from the Russian.

Liestal (lēs'täl), town (pop 7,211), capital of the half-canton of Basel-Land, Switzerland There is a 16th-century town hall and a cantonal museum The town produces woolen and silk textiles and clothes

Lieurance, Thurlow (lū'runs), 1878–, American composer, b Oskaloosa, Iowa. He spent 20 years collecting Indian songs, of which he has compiled several anthologies He is the composer of an opera, *Drama of the Yellowstone*, and many songs, the best known of which is *By the Waters of Minnetonka*, based on an Indian melody

Lieven, Dorothea, Princess (lē'vun), 1785–1857, Russian noblewoman, wife of the Russian ambassador to London (1812–34). On her husband's recall, she settled in Paris A brilliant personality, she was on intimate terms with the great world of London and Paris, and her Paris salon acquired some celebrity She was a friend of Metternich, Wellington, and Guizot Her witty and lively correspondence has been published in English as *The Private Letters of Princess Lieven* (ed by Peter Quennell, 1938) See biography by H Montgomery Hyde (1938)

Lièvre (lēā'vrŭ), river, 205 mi long, rising in S Quebec in the Laurentians and falling into the Ottawa near Buckingham Parts of it are navigable

life. Although there is no general agreement as to a definition of life, the biological manifestations of life are generally considered to be the ability of an organic unit to carry on the functions necessary for self-preservation and the function of reproduction Protozoa perform, by means of a single cell, life functions corresponding to those carried on by the complex tissues and organs of man and other highly developed organisms The attributes of life are inherent in such minute structures as viruses, bacteria, and genes just as they are in the largest animals and plants The living substance common to both plant and animal tissues is called PROTOPLASM, in both large and small forms of life it exists in units known as cells (see CELL, in biology) The chemical composition of protoplasm is known, but what gives it the qualities of life is not known In seeking an understanding of life scientists have, to a great extent, broken down the barriers that once separated the physical sciences from the biological sciences, a result of the growth of biochemistry and biophysics is a better understanding of the functioning of living tissues, of the composition of living matter and its secretions, and of various other biological phenomena Considerable research in recent years has been concerned with problems believed fundamental to an understanding of life These include studies of hormones and enzymes, of the nature of catalysis, and of the mode of operation of the genes in heredity. A solution has long been sought to the problem of how green plants bring about the chemical changes involved in PHOTOSYNTHESIS, the process on which all life ultimately depends for food Much of the history of biology and of philosophy as related to biology has been marked by a division of thought between vitalistic and mechanistic concepts. In the most antithetic interpretations of these concepts the vitalistic school maintains that there is a fundamental distinction between the living and the nonliving, the mechanistic school holds that there is no essential difference between the animate and the inanimate and that all life can be explained by physical and chemical laws. Such diametrically opposed views actually have seldom been held by investigators of either school, elements of both are usually involved Many phenomena of life can be explained materialistically; discoveries of the processes of heredity through genetic studies have presented an adequate materialistic explanation which generally outweighs the vitalistic. Mechanistic theories have not, however, explained the origin of life Fundamental religious concepts of the origin of life center around special creation and belief in the infusion of life into inanimate substance by God or another divine being On the other hand, many believe that life originated in the sea in pre-Cambrian times from a simple minute mass of protoplasmic material formed by a chance combination of chemical elements. See A. M. Low, *Life and Its Story* (1937); A I. Oparin, *The Origin of Life* (Eng. tr, 1938); Reinhard Beutner, *Life's Beginning on the Earth* (1939); David Forsyth, *How Life Began* (1939); V. L. Burns, *Life—Mechanistic or Teleological* (1940); Erwin Schrödinger, *What Is Life? the Physical Aspect of the Living Cell* (1945), J. B. S. Haldane, *What Is Life?* (1947); Jerome Alexander, *Life: Its Nature and Origin* (1948).

lifeboat, boat especially designed for saving persons in case of shipwreck. Its main features are

buoyancy, stability, and the power to right itself when capsized, it must be designed to make headway in rough seas. The first lifeboats appeared in England in the late 18th cent, when the interest in LIFESAVING was growing, and its invention is often attributed to Lionel Luken in 1786. Lifeboats may be operated from shore stations, and seagoing vessels are required to carry them. Motor lifeboats have been in use since 1904. Those operated from shore stations are equipped with line-throwing guns and electric searchlights. In 1945 the U.S. coast guard approved for use hand-propelled aluminum lifeboats. There are in use self-righting rafts of aluminum alloy, very buoyant and capable of carrying 20 men and more than 1,000 lb. of equipment. Airborne lifeboats came into much use in the Second World War. They are compact motorboats carried usually under the aircraft's fuselage. They are built so that they cannot capsize, no matter how hard they hit the water, they right themselves.

life insurance: see INSURANCE

life preserver, contrivance, usually adjustable to the body, for buoying up persons in water, particularly in case of shipwreck. The most common type, generally considered the most reliable in spite of its clumsiness, is made of cork blocks sewed in canvas, with belts and shoulder straps; it is constructed so that cork beneath the shoulders and around the body of the person keeps him afloat. It should contain at least 6 lb. of cork. Another common type has a lining of rubber and may be inflated. Some life preservers have the form of pillows, vests, or mattresses—either inflatable or filled with buoyant material such as cork. A familiar type is the life buoy, a ring of canvas-covered cork, which is fitted with a rope so that several persons may cling to it. Warships have large life buoys, often consisting of a frame supported by metal air chambers and able to support six men. The law of most countries requires that ships carry life preservers and that crew and passengers should be drilled in using them.

lifesaving, term usually applied to rescue of persons after shipwreck. The first organized effort to provide such lifesaving service was made in England in the late 18th cent. by private societies. It was hastened by the much-publicized wreck of the ship *Adventure* in 1789. The first practical LIFEBOAT had been launched a little earlier. In the United States the first institution to work in the field was the Humane Society of Massachusetts, which built huts on the Cohasset shore for protecting victims of shipwreck. Lifeboats were also supplied, manned by volunteers. In 1848 the government began to organize lifesaving on the New Jersey coast and later extended operations to Long Island. In 1871 the service was reorganized by Sumner I. Kimball, who headed the Life Saving Service until it was merged (1915) into the U.S. coast guard. Modern lifesaving stations have a good deal of equipment—lifeboats, surfboats, flag signals, pyrotechnic signals, life preservers, line-projecting guns (invented by Col. David A. Lyle and in use since 1877), and the like—as well as watchtowers and good telephone and radio systems. Ships also carry much lifesaving equipment. Most countries require them to carry life preservers and lifeboats and may require life rafts and floats. The life raft, easily stored and transported, is considered by many more convenient and useful than the lifeboat. The Second World War brought many refinements of lifesaving equipment for lifeboats and life rafts, including fishing kits, chemical apparatus to make salt water drinkable, portable radio transmitters, tiny searchlights with long-range beams, and easy-to-read astronomical charts.

Liffey (lĭf'fē), river of Ireland, rising in the mountains of Co. Wicklow and flowing 50 mi. W, then NE, and finally E through Dublin to Dublin Bay.

Lifford, Irish *Leithbhearr,* town (pop. 476), county town of Co. Donegal, Ireland, on the Foyle and SW of Londonderry.

lift: see ELEVATOR and LOCK, CANAL.

ligan: see TACKLE.

Liggett, Hunter (lĭg'gĭt), 1857–1935, American army officer, b. Reading, Pa., grad. West Point, 1879. He served in Cuba with the army of occupation after the Spanish-American War, then spent three years in the Philippines. In 1910 he was graduated from the Army War College, of which he was director (1910–12) and president (1913). He was sent from a command at Texas City, Texas, to the Philippines in 1915, remaining until 1917. In the First World War he commanded the 41st Division in 1917, took over the 1st Army Corps in Jan., 1918, and in Oct., 1918, as a brigadier general, assumed command of the 1st Army, which he commanded at Saint-Mihiel and in the Meuse-Argonne operations. He also commanded the 3d Army on the Rhine in 1919. After returning to the United States, as a major general, he was in command of the Western Dept. at San Francisco in 1919 and of the 9th Corps Area in 1920, retiring in 1921. He wrote two volumes of memoirs—*Commanding an American Army* (1925) and *A.E.F.* (1927).

light, a form of energy the nature of which is not yet satisfactorily established. No one theory has proved entirely adequate to explain all the phenomena connected with light, although a number of theories have been advanced at various times. According to the corpuscular or emission theory as supported by Sir Isaac Newton, light consists of minute particles or corpuscles which are emitted from luminous bodies and travel through space at a great velocity. This theory was, however, finally superseded by the wave theory of Christiaan Huygens, which obtained its original acceptance in the scientific world chiefly through the work of Thomas Young and later of A. J. Fresnel, whose experiments, especially those on the interference and diffraction of light, offered important and convincing proof. One objection to the theory, raised at the time and still advanced, questions the assumption of the existence of a special medium, the luminiferous ETHER, which is held to be necessary for the transmission of light waves. Nevertheless the wave theory is widely used today, though with reservations, most of the common phenomena associated with light can be very simply explained by it. In its terms, light consists of waves, or a kind of vibratory motion, traveling in the luminiferous ether at a high velocity, having a transverse VIBRATION (i.e., vibrating at right angles to the direction of the WAVE), and proceeding in straight lines through a uniform medium. The electromagnetic theory of James Clark MAXWELL, of wide importance today, definitely classifies visible light as of electromagnetic origin, as a form of electromagnetic RADIATION, and as occurring in waves of a definitely limited length, shorter than the invisible infrared and radio waves but longer than ultraviolet and X rays. The most recent theory of the nature of light is the QUANTUM THEORY, in which light as a form of radiant energy is held to be given off by a luminous body in tiny spurts or quantities called photons. Popularly, light is often described in terms of its effect upon the human EYE (see also VISION). As such, however, it is limited to radiation of wave lengths between those of infrared on the one hand and of ultraviolet on the other, neither infrared nor ultraviolet rays can be "seen" by the eye of man. Light is said to be the energy that makes visible those bodies producing it (luminous bodies), e.g., the sun, an electric-light filament, and the wick of a lighted lamp, and those reflecting it (illuminated bodies), such as the moon and most of the bodies of our environment. An important factor, therefore, in determining the visibility of an object is the degree of intensity of the light which it gives off or by which it is illuminated. A special branch of physics called PHOTOMETRY deals with the measurement of the relative intensity of light sources and with the intensity of illumination. Besides bodies that give off light and those that reflect it in a marked degree, there are others which are described by the way in which they affect light. Many substances such as air and window glass are said to be transparent because they permit light to pass through them, others such as ground glass and tissue paper are called translucent because, although they allow light to pass through them, they cause it to be scattered or diffused in the process, and still other substances are described as opaque because they do not permit passage of light at all. Through a uniform, transparent substance or medium, light is held to travel in straight lines under ordinary conditions. The velocity varies with different media. In air, for example, it is approximately 186,000 mi. per second, a figure determined by much careful experiment, first successfully by Olaus Romer, later by A. H. L. Fizeau, J. B. L. Foucault, A. A. MICHELSON, and E. W. Morley. In a vacuum, the velocity is greater than in air, but it is less in water, glass, and other substances denser than air. Upon the differences in velocity in different media is based, according to the wave theory, the explanation of the bending or REFRACTION of light rays as they pass obliquely from one medium into another. When rays of light coming from an object pass from the air into (for example) the more dense substance of the lens of the eye the rays are bent and then focused by the action of the lens, so that an image is formed upon the retina of the eye and the object from which they come is "seen." The same principle of refraction of light by a LENS to form an IMAGE is involved in optical instruments such as the camera, microscope, and telescope. Crystals of certain substances, such as calcite, refract light in two ways, i.e., cause double refraction, directing one part of the split ray off to one side (the extraordinary ray) and permitting the other part (the ordinary ray) to pass through after undergoing ordinary refraction, both rays upon emergence from the crystal are found to have been polarized (see POLARIZATION OF LIGHT). In the NICOL PRISM the ordinary ray is totally internally reflected and only the extraordinary ray, which is polarized, is transmitted. When rays of light strike the surface of bodies through which they cannot pass, some of them are absorbed and some are thrown back or undergo REFLECTION. Rough surfaces reflect light rays irregularly, in a scattered or diffused manner, while very smooth or highly polished surfaces, like that of a MIRROR, reflect them regularly, forming a clear image of the object. The color of an object depends upon the color of the light refracted, reflected, and absorbed by it. For example, an opaque object appears red when it absorbs the light of all other colors and reflects only red; a transparent object appears red when it absorbs the light of all other colors and transmits only the red. The color of the light itself depends upon the wave length, and it is believed that the human eye learns to distinguish between the longer wave lengths of the red end of the spectrum and the shorter wave lengths of the violet end. In COLOR BLINDNESS the eye cannot make this distinction. The shortest wave visible in the spectrum (violet) has a WAVE length of about 0.0004 mm., the longest (red), of about 0.0007 mm. White light consists of all the colors combined. Its composition is determined by its DISPERSION, i.e., by its being broken up into its components, as when it passes through a prism and its colors are separated to appear ranged in a continuous, rainbow-colored band called a SPECTRUM. Light passing through certain lenses is dispersed as well as refracted, the resulting condition being known as chromatic aberration. Although light travels in straight lines through a uniform medium under ordinary conditions, yet it is bent slightly when it passes the edges of an opaque object present in the medium, this DIFFRACTION results in some INTERFERENCE which may be apparent in the shadow cast by the object. Biologically, light is of the greatest importance for it is the energy involved in PHOTOSYNTHESIS, a process essential to the continuance of both plant and animal life on the earth. Light and the phenomena connected with it have long been a subject for investigation. The ancient Greeks acquired some knowledge of the phenomena of reflection and refraction and of the principles governing vision. It was believed then that light travels in straight lines. Cleomedes and Ptolemy, the astronomers, were acquainted with refraction. Not until after the 13th cent. and the work of Roger Bacon, however, was there sufficient knowledge to begin to construct instruments to assist human vision. Galileo is commonly credited with the invention of the astronomical telescope in the 17th cent. Shortly after this Snell discovered the law governing the refraction of light and the beginning was made in the scientific study of light. At about this time too came the work of Descartes, Grimaldi, and James Gregory. Huygens advanced his wave theory in opposition to the corpuscular theory of Newton. There followed the work of Romer, James BRADLEY, Thomas YOUNG, Fresnel, MALUS, Fizeau, Foucault, HELMHOLTZ, Maxwell, Michelson, and E. W. MORLEY. See R. A. Houstoun, *Light and Color* (1923) and *A Treatise on Light* (rev. ed., 1948), W. H. Bragg, *The Universe of Light* (1933), Matthew Luckiesh, *Light, Vision, and Seeing* (1944), W. G. Davies, *Light* (1945).

lighter, barge used in ports for loading and unloading ships, particularly when the harbor is such that the ships cannot come alongside a pier or dock. Lighters are usually open but sometimes have a deck and large hatches with light covers and are either towed or self-propelled, in earlier times and sometimes today they are rowed or operate under sail. Their speed is low, not usually more than 10 knots an hour. They are usually equipped with derricks.

Lightfoot, Joseph Barber, 1828–89, English prelate and scholar. Much of his life was spent at Cambridge Univ., where he was a fellow in Trinity College. In 1861 he became Hulsean professor of divinity, and in 1875 Lady Margaret professor. In 1871 he became a canon of St. Paul's, London, in 1879 he was consecrated bishop of Durham. He was learned in biblical and early Christian literature. He published commentaries (3 vols., 1865–75) on St. Paul's epistles to the Galatians, Philippians, Colossians, and Philemon. Lightfoot's editions of the Apostolic Fathers include *Clement of Rome* (1869) and *Ignatius and Polycarp* (1885). See biography by B. F. Westcott (1894).

lighthouse, structure put up to give guidance and warning to ships and airplanes by either optical or radio-electrical means. Lighthouses were first built in ancient Egypt, where the priests maintained the beacon fires. The lighthouse of PHAROS built in the 3d cent. B.C. was regarded as one of the Seven Wonders of the World. For about 1,500 years it guided ships into the Nile, it was lighted by wood fire, showing smoke by day and a glow by night. It was destroyed by an earthquake in the 13th cent. The Romans built famous lighthouses in Ostia, Ravenna, and Messina and on both sides of the Channel in France and England. None of them have survived. One of the oldest existing lighthouses is the light of Cordouan at the mouth of the Gironde, the present structure was begun in the late 16th cent., but it is believed that the first lighthouse on the site was erected c.805. Probably the first lighthouses in the United States were the Boston Light on Little Brewster Island (the original tower built in 1716), Brant Point Light, Nantucket (the first structure built in 1746), and Beavertail Light on Conanicut Island, Narragansett Bay (first erected in 1749). In 1789 Congress passed an act for maintenance of lighthouses by

which the government took over the care of lighthouses from their former private owners In 1852 the Lighthouse Board was appointed and in 1910 it was superseded by the Lighthouse Service, established to supervise lighthouses and lightships In 1939 the Service was transferred from the Dept of Commerce to the U S coast guard. Lighthouses were long built to conform in structure to their geographical position Where a good rock foundation existed, masonry tower lighthouses were preferred, circular in form, with a low center of gravity Later reinforced concrete was substituted for masonry An openwork steel construction was chosen where it was necessary to drive in wooden or steel piles in order to obtain a firm foundation Sometimes towers were erected on foundations of cylinders or of caissons For illuminating agents tallow candles, coal fires, and oil lamps were used until the beginning of the 19th cent A lighthouse near Trieste was probably the first to use coal gas for illumination Acetylene followed soon, and in 1858 electricity was used first in South Foreland Light, England Other improvements made during the 19th cent were the incandescent oil-vapor light, rapidly revolving lights, fog bells, whistles, sirens, diaphones (fog signals similar to sirens), and the Fresnel lens which focuses the beam. Lighting systems used in lighthouses are of three kinds—the catoptric system, in which rays of light are reflected from silvered mirrors to form a parallel beam visible at a distance, the dioptric or refractive system, in which the rays pass through optical glass and are refracted as they enter and emerge from it, and the catadioptric system, in which rays are both refracted and reflected The increasing knowledge of radio waves and especially the invention of radar are making the earlier forms of lighthouses obsolete In the newer lighthouses radio has taken the place of the light beam The first radio beacon for directing ships was erected in New York in 1921 From 1934 the so-called remote-control stations began to replace lighthouses They are equipped with radio apparatus to operate lamps, fog signals, and the radio beacon An electric eye starts a light signal when daylight fails A gear turns on the fog horns when moisture increases in the atmosphere See G R Putnam, *Lighthouses and Lightships of the United States* (rev ed , 1933), R T Sterling, *Lighthouses of the Maine Coast* (1935), G G Carter, *Looming Lights* (1945), E R Snow, *Famous New England Lighthouses* (1945)

lighting. The earliest means of artificial lighting were the open fire, firebrands, and torches The first LAMP was a dish of stone (later of clay, pottery, or metal) containing vegetable or animal oil and a wick This was succeeded by the CANDLE, first made of wax and later also of tallow, and by the LANTERN, which is of early origin The ARGAND BURNER was an improved oil lamp with a burner and a chimney, and this type of lamp was widely used after the discovery of kerosene by Abraham GESNER All these early illuminants have survived to the present —the use of torches appears in the United States in the torchlight parade and in the small pots of slow-burning fuel marking a road under repair, while primitive oil lamps are used by the Eskimo and in some Oriental countries, and candles are employed for decorative as well as for lighting purposes and in church ritual The lantern, enclosed in glass or equipped with a chimney, has many modern uses, although it is superseded to some extent by the electric flashlight Coal gas was first used as an illuminant in the late 18th cent by William Murdock in England and by Philippe Lebon in Paris, it was introduced in London early in the 19th cent , in Baltimore in 1817, and in New York state in 1823 Air gas, acetylene, water gas, and producer gas are also important illuminants The invention of the BUNSEN BURNER and of the WELSBACH MANTLE and burner greatly stimulated the use of gas for lighting purposes The first development in electric lighting was the arc lamp, which was evolved from the carbon arc demonstrated by Sir Humphry Davy in 1801 and in which an electric current, bridging a gap between two carbon rods, forms an arc Early lamps of this type were made with an open arc, later ones were enclosed in glass and thus made more practical Carbon-arc street lamps, first made by C F BRUSH and used in Cleveland in 1879, came into wide use The mercury-arc lamp was discovered by P C HEWITT in 1903 Among modern applications of the arc light are floodlights, searchlights, spotlights, and projectors The incandescent electric lamp, in which the current passes through a filament offering high resistance (e g , CARBON and WOLFRAM) and enclosed in a vacuum tube, was developed by M G. FARMER in 1858, but was not practical Sir J W Swan in England and Edison in the United States both developed lamps of this kind That patented by Edison in 1879 contained features not original with him, but combined in a new form, and was the first widely marketed incandescent lamp. NERNST c 1899 invented a glow lamp which was an improvement over the carbon lamp but which was supplanted by later developments. A gas-filled incandescent lamp was invented by LANGMUIR in 1913 The NEON lamp invented by Georges Claude in 1911 has been largely used in advertising signs. Various colors are obtained in similar lights by the use of different gases (e g , argon for blue, neon for orange red, helium for yellow, carbon dioxide for white). By making use of mixtures of gases and special glasses, all colors can be produced In recent times much attention has been given to the problem of lighting public buildings, homes, offices, and factories from the standpoint of maximum efficiency and minimum eyestrain Fluorescent lighting, approaching natural daylight, is used in many buildings and homes Fluorescent lamps consist of a tube containing a small amount of argon and a trace of mercury The inner walls of the tube are coated with a fluorescent powder A flow of electricity through the tube causes the mercury vapor to emit ultraviolet radiation which in turn causes the powder to fluoresce There has been considerable experimentation to secure proper street and highway lighting Sodium vapor lamps are used on some highways See Matthew Luckiesh, *Artificial Light* (1920) and *Torch of Civilization* (1940), Jeanette Eaton, *The Story of Light* (1928), F W Robins, *The Story of the Lamp* (1939)

lightning, electrical discharge accompanied by THUNDER, commonly occurring during a THUNDERSTORM The discharge may take place between one part of a cloud and another part, between one cloud and another, or between a cloud and the earth Lightning may appear as a jagged streak (forked lightning), as a vast flash in the sky (sheet lightning), or, rarely, as a brilliant ball (ball lightning) Illumination from lightning flashes occurring near the horizon, often with clear sky overhead and with the accompanying thunder too distant to be audible, is referred to as heat lightning Benjamin Franklin, in his kite experiment (1752), proved the identity of the electricity of lightning (atmospheric electricity) and ordinary electricity He invented the lightning rod, which, when correctly installed on a building, offers a certain degree of protection to the structure during electrical storms

lightship, moored vessel bearing a light to warn ships from dangers of shoal, reef, and rock and to guide them They are used at points where a lighthouse or beacon cannot be erected They vary from small decked boats with automatic lights tended only every few months to ships of several hundred tons and a crew of 15, with powerful light and fog-signal apparatus and good radio equipment for lifesaving The first lightship was built in England in 1732 The first lightship in the United States was posted in Chesapeake Bay in 1820 Shortly before the Second World War, all lightships were made part of the U S coast guard Probably the best-known American lightship is that off Nantucket The duties of lightship crews are so hard that they usually get one month's vacation for every two months of service and are privileged to retire at half pay after 20 years of service In 1935 the Nantucket lightship was sunk when the liner *Olympia* ran into it

light-year. Astronomical distances are so great that the figures, expressed in miles, would be too cumbersome The first astronomical unit used, the distance from earth to sun, is 92,900,000 mi As the telescope penetrated farther into space, this unit became too small, so one based on the speed of light, which is 186,000 mi per second, was used An object is one light-year distant when its light takes one year to reach the observer As all interstellar space is a vacuum, the speed of light does not vary, so one light-year is about 5 87 million million miles The stars nearest to our solar system are Alpha Centauri and Proxima Centauri, both about 4 3 light-years distant

lignaloes: see ALOES

Ligne, Charles Joseph, prince de (shärl' zhōzĕf' prĕs' dŭ lē'nyu), 1735–1814, Austrian field marshal, celebrated for his cosmopolitanism and wit He belonged to an ancient princely family of Hainaut, in the Austrian Netherlands (now Belgium) He held high military and diplomatic posts, was an adviser of Emperor Joseph II, and won the favor of Catherine II of Russia while on mission at her court Though deprived of most of his estates by the French and sunk to a relative obscurity, he continued to take part in European affairs in his last days It was then that he made the most famous of his witty remarks, saying of the Congress of Vienna, *Le congrès danse, mais ne marche pas* Of the 40 volumes of his collected works, his memoirs and his correspondence remain of interest His memoirs, in an easy and unself-conscious style, are the mirror of his personal charm, polished gaiety, and unpretentious wisdom They also paint the portrait of a good European, free from national prejudice A selection of his works appeared in English in 1927

lignite (lĭg'nīt) or **brown coal,** a carbonaceous fuel intermediate between COAL and PEAT, brown or yellowish in color and woody in texture It contains more moisture than coal and tends to dry and crumble when exposed to the air; the flame is long and smoky and the heating power low. It is found chiefly in geologically young formations in the United States, Canada, Germany, and elsewhere

lignum vitae (lĭg'nŭm vī'tē) [Latin, =wood of life], tropical American evergreen tree of the genus *Guaiacum* The hard, heavy, valuable wood, obtained chiefly from *Guaiacum officinale* and *G sanctum*, is used for bearings, blocks, mallets, bowling balls, and other articles The trees are cultivated to some extent in Florida and California for ornament They also yield guaiacum, a gum resin used in certain drugs Various other hardwood trees of Australasia, such as the acacia and the eucalyptus, are popularly called lignum vitae

Ligny (lēnyē'), village (pop 1,965), Namur prov , central Belgium, NE of Charleroi and near Fleurus Here on June 16, 1815, Napoleon I defeated the Prussians under Blücher early in the WATERLOO CAMPAIGN

Ligonier (lĭgŭnēr') **1** City (pop 2,178), NE Ind , NW of Fort Wayne It is a trading center for a rich dairying and poultry-raising area **2** Borough (pop 2,111), SW Pa , SE of Greensburg, laid out 1817, inc 1834 Its industries include coal mining, dairying, and farming.

Liguori, Alfonso Maria de': see ALPHONSUS LIGUORI, SAINT

Liguria (lĭgyō'rēŭ), region (2,089 sq mi , pop 1,466,810), NW Italy, extending along the Mediterranean (called here the Ligurian Sea) from the French border to La Spezia The coastal strip forms the Italian RIVIERA, famed for its scenery, climate, and resorts, further inland rise the Ligurian Alps in the west and the Ligurian Apennines in the east Fishing and the growing of fruit, vegetables, olives, grapes, and some cereals are the main resources along the coast Chestnuts are plentiful in the mountains, which also have extensive pastures GENOA, the capital of the region, is also its commercial, maritime, and industrial center The region is divided into four provinces, Genoa, Imperia, La Spezia, and Savona Liguria derives its name from the ancient Liguri, who occupied the Mediterranean coast from the Rhone to the Arno Celtic migrations drove them (4th cent B C) from the Alpine regions, while the coast was colonized by Phoenicians, Greeks, and Carthaginians The region was subdued (2nd cent B C) by the Romans The salient feature of Ligurian history in the Middle Ages was the long struggle between Genoa and the local feudal lords for control By the 16th cent Genoa virtually controlled all of present Liguria, from that time until its annexation (1815) to the kingdom of Sardinia, Liguria shared the history of its capital

Ligurian Sea, part of the Mediterranean, between the Ligurian coast (Italian Riviera) and the islands of Corsica and Elba It includes the Gulf of Genoa

Lihue (lēhōō'ā), town (pop 4,254), co seat of Kauai co , on the southeast coast of Kauai, T H , near Nawiliwili Harbor Kilohana crater rises just behind Lihue

Li Hung-chang (lē' hōōng'-jäng'), 1823–1901, Chinese statesman and general His first success was as a commander of forces fighting the Taiping Rebellion He controlled Chinese foreign affairs for the dowager empress Tz'u Hsi Li was the chief negotiator of the Treaty of Shimonoseki (1895) which ended the First Chino-Japanese War He protected foreigners when he was viceroy of Canton during the Boxer Rebellion (1900), and he was able to reduce the demands of the foreign powers for reparations His moderately progressive internal policy included modernization of the army and the building of railroads See biography by J O P Bland (1917)

Likhi (lĭk'hī), Manassite 1 Chron 7 19

lilac [ultimately from Persian, =bluish] Since colonial days, the common lilac has been in America one of the best loved of the flowering shrubs and has merited its position by its cone-shaped masses of lavender or white flowers, its fragrance, and its ease of cultivation A familiar shrub of American dooryards, it often marks the site of old farmhouses Some cities (e g , Rochester, N Y) have lilac festivals The purple flower clusters are the floral emblem of New Hampshire From this old-fashioned common lilac (*Syringa vulgaris*) and others, many hybrids have been developed with variations in form (such as double flowers) and in color (such as rosy-pink) These hybrids, which may lack the fragrance of the common lilac, are often called French lilacs, because much of the pioneer hybridizing was done in France The various species of lilac are native to different regions of Europe and Asia Lilacs will bloom profusely under proper care, which includes a sunny situation, occasional fertilizing, removal of fading flowers, and, for older plants, PRUNING Florists often force the shrubs for winter bloom, particularly in Europe Among the available species of *Syringa* which offer some variation from the more popular common lilac are *japonica* (tree form), *oblata* (red autumnal foliage), and *reflexa* (drooping flower clusters) The lilac, botanically *Syringa*, should not be confused with the MOCK ORANGE or syringa, botanically *Philadelphus;* both these plants are sometimes called pipe tree The most famous use of the lilac in poetry is Whitman's elegy on Lincoln, "When

Lilacs Last in the Dooryard Bloom'd." See J. C. Wister, *Lilac Culture* (1930); Alice Harding, *Lilacs in My Garden* (1933).

Lilbourn, city (pop 1,378), SE Mo., near the Mississippi SW of Cairo, Ill.; inc 1910. It is a processing center in a cotton, grain, and timber area.

Lilburne, John (lĭl'bûrn), 1614?–1657, English political leader and pamphleteer for the LEVELERS, an extremist sect in the PURITAN REVOLUTION. Lilburne was tried before the Star Chamber as early as 1638 for his pamphlets against the Anglican establishment and the House of Lords. Imprisoned from 1638 to 1640, he was released with the aid of Cromwell and rose to be a lieutenant colonel in the parliamentary army (1642–45). Resigning because of disagreement with the Presbyterians, he resumed his demands for parliamentary reform and was a tireless pamphleteer for the powerful army following that hoped for a fundamental, democratic revision of the constitution and the social system. From 1646, when he was again arrested, he spent much of his life in prison or exile, but continued his propaganda work even there. His pamphlet, *England's Birthright* (1645), contained the principles which became the basis for the Leveler program later stated in *The Foundations of Freedom, or, An Agreement of the People* (1648). But when Cromwell and his officers arbitrarily revised the agreement they halted the Leveler movement at the moment of Lilburne's greatest power. Lilburne protested the arbitrary rule of the Rump Parliament and, though no royalist, protested the illegal court which condemned Charles I to death. In 1649 Lilburne, with several of his associates, was tried for treason and acquitted. Lilburne hastened the advent of the Commonwealth, but under it he was banished (1652), returned to England, and was again tried and acquitted (1653). He was deemed dangerous and held in confinement. In his last years he became a Quaker. Though a contumacious man, Lilburne had a gift for attracting followers. His political idealism was premature and ineffective, but his personal integrity and sense of justice were of the highest. See biography by M. A. Gibb (1947), bibliography under LEVELERS.

Liliencron, Detlev Freiherr von (dĕt'lĕf frē'hĕr fŏn lē'lyənkrōn), 1844–1909, German lyric poet, b. Schleswig-Holstein. A Prussian army officer, he resigned because of debt, tried his fortunes in the United States for two years, returned to become a minor government official, and at 41 devoted himself to literature. His verse is musical, varied, and powerful. Brahms and Richard Strauss set some of it to music. Besides his lyrics (collected 1897) and ballads, he wrote the humorous epic *Poggfred* (1896, several times reissued, with new verses, before 1900), the stories *Kriegsnovellen* (1895), and novels and plays.

Lilienthal, David Eli (lĭl'yənthôl), 1899–, American public official, b. Morton, Ill., grad. DePauw Univ., 1920, and Harvard Law School, 1923. He was admitted (1923) to the bar, practiced law, and was appointed by Gov. Philip La Follette to the Wisconsin public-service commission. President F. D. Roosevelt made (1933) him one of three directors, together with Arthur E. Morgan and Harcourt Morgan, of the TENNESSEE VALLEY AUTHORITY. There were severe internal struggles as well as violent contests with opponents of the TVA. As chairman (1941–46) of the TVA, he fought bitter battles with various competing private interests, and he insisted on nonpolitical administration. He was appointed chairman of the U. S. Atomic Energy Commission by President Harry S. Truman, and in that office (1947–49) he was a pioneer in civilian control of the American atomic-energy program. He wrote *Democracy on the March* (1944) and *This I Do Believe* (1949). See biography by Willson Whitman (1948).

Lilienthal, Otto (ō'tō lē'lyəntäl), 1848–96, German aeronautical engineer, a pioneer in his experiments with heavier-than-air machines. He made major changes in the glider based on his observations of birds. He wrote *Birdflight as a Basis of Aviation* (1889, Eng. tr., 1911) and *The Flying Machine* (1894). His brother, **Gustav Lilienthal** (gōōs'täf), 1849–1933, was associated with Otto in his flying experiments, he continued them after Otto's death and also made several inventions, including a weatherproofing material.

Lilith (lĭ'lĭth), Jewish demon, originally probably Babylonian. In Talmudic tradition female form and evil attributes were given to this supposedly nocturnal creature, of the various legends connected with her, the one making her Adam's first wife is the strongest. Lilith is used by Goethe in the Walpurgis Night section of *Faust* and by D. G. Rossetti in various poems.

Liliuokalani (lēlēōō"ōkälä'nē), 1838–1917, last reigning queen of the Hawaiian Islands. She ascended the throne in 1891 upon the death of her brother, King Kalakaua. She was out of sympathy with the constitutional reforms inaugurated in 1887 and attempted to brush them aside, whereupon a revolt, fostered largely by American residents of Hawaii, led to her dethronement early in 1893 and the establishment of a provisional government. Failing in an attempt to regain the throne in 1895, she formally renounced her royal claims. Much of the remainder of her life was spent in the United States, where she entered against the Federal government claims totaling $450,000 for property and other losses, but the court decided against her. The territorial legislature of Hawaii finally voted her an annual pension of $4,000 and permitted her to receive the income from a sugar plantation of 6,000 acres. She wrote many songs, including the popular *Aloha Oe* or *Farewell to Thee*.

Lille (lēl), city (pop 179,778), capital of Nord dept., N France, near the Belgian border. It is a manufacturing city and a commercial and cultural center. It has long been known for its textile products, notably lisle (the name is derived from an older spelling of the city's name). It was the chief city of the county of FLANDERS, a brilliant residence of the 15th-century dukes of Burgundy, and (after 1668) the capital of French Flanders. Taken (1708) after a costly siege by Eugene of Savoy and the duke of Marlborough, it was restored to France in the Peace of Utrecht (1713). Lille was occupied by the Germans in 1914–18 and suffered considerable damage in the Second World War. Among the principal buildings of Lille are the huge citadel, one of the finest works of Vauban, the old stock exchange (17th cent.), several fine churches containing paintings of the Flemish school, and the unfinished cathedral (begun 1854). Lille has a large university (founded 1887) and one of the most important art museums in Europe. Its paintings, removed by the Germans in the Second World War but recovered since, include many of the best works of the Flemish, Dutch, French, and Spanish masters.

Lillehammer (lĭl'hŭhamur), town (pop 6,565), co. seat of Opland co., SE Norway, N of Oslo and on the northern end of Lake Mjosa. Founded in 1827, it is a commercial center for the fertile Gudbrandsdal and has a fine open-air museum exhibiting old peasant cottages of the region.

Lillie, Beatrice, 1898–, English comedienne, b. Toronto, Canada. She made her first stage appearance in London in 1914 and in New York in 1924. In *The Nine o'Clock Revue* (1922), *André Charlot's Revue* (1922, 1924), *This Year of Grace* (1928), *The Show Is On* (1937), *Seven Lively Arts* (1945), and *Inside U.S.A.* (1948) she won an international reputation for sophisticated wit and vivacity. She married Sir Robert Peel in 1920.

Lillie, Frank Rattray, 1870–1947, American zoologist and educator, b. Toronto, grad. Univ. of Toronto (B.A., 1891), Ph.D. Univ. of Chicago, 1894. Best known for his work with the Marine Biological Laboratory and the adjacent Woods Hole Oceanographic Institute in Massachusetts, he was an educator for four decades. He began teaching in 1894, was professor of zoology (1906–31) at the Univ. of Chicago, chairman of the department (from 1910), and dean of the division of biology (1931–35). The Marine Biological Laboratory was under his direction (1908–26), and he was its president (1926–39) and president (1930–39) of the Woods Hole Oceanographic Institute. Lillie was managing editor (1902–26) of the *Biological Bulletin*. In addition to many scientific papers he wrote *The Development of the Chick* (1908), a leading text in embryology for several decades, and *Woods Hole Marine Biological Laboratory* (1944).

Lillo, George, 1693–1739, English playwright. He was the author of *The London Merchant, or, The History of George Barnwell* (1731). Using middle-class characters in this play, he created the first modern melodrama, and his naturalistic tendency influenced both Diderot and Lessing.

Lilly, John. see LYLY, JOHN.

Lilly, William (c. 1468–1522) see LILY, WILLIAM.

Lilly, William, 1602–81, English astrologer. He enjoyed some popularity as a prophet and caster of horoscopes. He issued an annual almanac, foretold definite events, and was occasionally embroiled in the politics of the day. He was satirized in Butler's *Hudibras*. Of his many books and pamphlets the *Christian Astrology* (1647) is best known. His autobiography appeared in 1715.

Lilly, borough (pop 2,282), SW Pa., in the Allegheny Mts. SW of Altoona. Coal mining is done here.

Lily, William, c. 1468–1522, English scholar and teacher of grammar. He was the first headmaster of St. Paul's School (after 1512) and co-author of the old Eton Latin grammar. The name also appears as Lilly, Lilye or Lyly.

lily, ornamental herbs, either hardy or tender, of the genus *Lilium*. They are perennial, with scale bulbs, leafy stems, and flowers of great diversity in form and color. Of the 80 or more species native to the Northern Hemisphere, 21 are North American, including the meadow lily, Turk's-cap, and wood lily of the East and the leopard, Washington, and Humboldt lilies of the West. Widely cultivated are the Madonna and the martagon lilies of Europe, the Easter lily, the golden-rayed lily of Japan, and the regal and tiger lilies of China. Many good hybrids have resulted from extensive experiments in recent years. The genus *Lilium* is one of the more than 200 genera and over 2,000 species comprising the large group of Monocotyledons known as the lily family (Liliaceae). Some botanists divide the group into a number of smaller families. Most of the members are perennials, and they usually produce either bulbs or corms. Among the ornamental plants of the family (in addition to the true lilies of the genus *Lilium*) are the day lily, hyacinth, lily of the valley, and tulip. Some members of the family have edible parts (e.g., asparagus and onion) and others are medicinal (e.g., meadow saffron and squill). A number of plants not related to the lily family are called lilies, among these are the calla lily and the water lily. The blossoms of the amaryllis resemble lilies, but this plant belongs to the family Amaryllidaceae. In religion and art the lily symbolizes purity, and as the flower of the Resurrection and of the Virgin it is widely used at Easter. The lily of the Bible has sometimes been identified with the scarlet anemone (Cant. 2:1), the "lilies of the field" (Mat. 6:28) probably mean any wild flowers, perhaps the iris. See H. B. Woodcock and John Coutts, *Lilies. Their Culture and Management* (1935), G. L. Slate, *Lilies for American Gardens* (1939), Alan Macneil and E. L. Macneil, *Garden Lilies* (1946), Isabella Preston, *Lilies for Every Garden* (1947).

Lilybaeum (lĭlĭbē'um), ancient city, Sicily, the modern MARSALA. It is on the extreme W coast near Cape Lilybaeum (today Lilibeo). It was founded by Carthage (396 B.C.) and became a stronghold. In the First Punic War it resisted a long Roman siege (250–242 B.C.).

lily of the valley, hardy perennial spring-blooming herb (*Convallaria majalis*) native to Europe, Asia, and the mountains of the SE United States. It grows in shady places and is cultivated for its delicate, bell-shaped, fragrant white flowers growing on a stalk between two shiny leaves. The plant was long used medicinally in cardiac troubles and contains poisonous principles. It is a symbol of humility in religious painting.

Lima (lē'mə, Span. lē'mä), city (pop 533,645), W Peru, capital of Lima dept., capital and largest city of Peru. Its port is CALLAO. Founded Jan. 18, 1535, by Francisco PIZARRO, Lima is the second oldest capital city in South America. Its cultural supremacy on the continent was contested in colonial times only by Bogotá, Colombia, and its lavish magnificence and political prestige its only peer in Spanish America was Mexico City. Named the City of Kings by Pizarro, Lima derives its present name from the RÍMAC river, as do lima beans, which are native to the valley. The central square, the Plaza de Armas, focus of the capital's life and scene of its historical pageantry, is dominated by the huge national palace and the cathedral. The cathedral, begun by Pizarro's order and containing under glass what are claimed to be his shriveled remains, was almost totally destroyed by the earthquakes of 1687 and 1746, along with much of the city. Subject to frequent shocks, Lima shows the architectural styles prevalent at various periods, much of the city is characterized by the steel and concrete of modern buildings. While many streets are narrow and preserve some of the colonial atmosphere, there are spacious boulevards which traverse the entire metropolitan area. Smaller squares, statues of national heroes, parks, and botanical gardens are common. Besides the palace, the cathedral, and numerous churches, other public buildings of note are the National Library, founded in 1821 by SAN MARTÍN, and the Univ. of San Marcos, founded in 1551. The library, which once contained priceless documents of the Spanish Conquest and rare European books, was looted by Chilean soldiers during Chile's occupation of Lima (1881–83) in the War of the Pacific. The university retains its prominence as one of the finest in South America. With an annual mean temperature of about 66°F., Lima has a cool climate which varies only slightly according to season, but is subject to the fogs and heavy mists peculiar to Peru's southern desert coast during the winter months. It almost never rains. Not far from the city are the pre-Incan ruins, PACHACAMAC, where Pizarro encamped while his capital was being planned and begun.

Lima (lī'mə), city (pop 44,711), co. seat of Allen co., NW Ohio, N of Dayton, laid out 1831, inc. 1842. Locomotives, Diesel engines, steel castings, and cigars are among its varied products. There are limestone quarries here. Near by is a state hospital for the criminal insane.

Liman von Sanders, Otto (ō'tō lē'män fŭn zan'-durs), 1855–1929, German general. He headed the German military mission to Constantinople to reorganize the Turkish army (1913). In the First World War he commanded Turkish armies in the GALLIPOLI CAMPAIGN (1915–16) and was given supreme command in Palestine (1918). There he was defeated by Allenby and T. E. Lawrence.

Limassol (lēməsōl'), city (pop 22,799), S Cyprus, a Mediterranean port. It has a large wine trade. Here in 1191 Richard I of England married Berengaria.

Limburg (lĭm'bûrg, Flemish lĭm'bûrkh), Fr. *Limbourg* (lĕbōōr'), province (930 sq. mi.; pop. 447,351), NE Belgium, bordering on the Netherlands in the east and north. Hasselt (the capital), Tongres, and Saint-Trond are the chief towns. The province is traversed by the Meuse river and the Albert Canal. Largely agricultural, it has a coal-

mining industry in the CAMPINE region. Most of the region was included until 1792 in the prince-bishopric of LIÉGE. It became (1815) part of the Dutch province of Limburg (see separate article), which was divided between the Netherlands and Belgium in 1839. The province is largely Flemish-speaking.

Limburg (lĭm'bûrg, Dutch lĭm'bûrkh), province (846 sq mi, pop 677,623), SE Netherlands, bordering on Belgium in the west and south and on Germany in the east. MAASTRICHT, on the Meuse river, is the capital. In the hilly southern section of the province are the chief coal deposits of the Netherlands, centered around Heerlen. Other towns are Roermond and Venlo. Limburg is predominantly Roman Catholic. It takes its name from the former duchy of Limburg, which comprised the southern part of the modern province, including Maastricht, and an eastern portion of modern Liége prov., Belgium. The small town of Limbourg, E of Liége, was its capital. In the Peace of Westphalia (1648) the duchy was divided between the United Netherlands (which received Maastricht) and the Spanish Netherlands. It was united (1815) under the kingdom of the Netherlands. Limburg prov., as established in 1815, no longer corresponded to the borders of the old duchy. It was contested after the establishment (1831) of an independent Belgium. The Dutch-Belgian treaty of 1839 divided the territory, which was incorporated, respectively, with the Dutch and Belgian provinces of Limburg.

lime in botany, small shrublike tree (*Citrus aurantifolia*), one of the citrus fruit trees, similar to the lemon but more spreading and irregular in growth. It is native to SE Asia and has been introduced into S Europe, the West Indies, Mexico, and Florida. It is the most susceptible to frost injury of all citrus fruits, this confines its commercial culture in the United States to the southernmost parts of Florida. Here some of the varieties often do well in sandy or rocky soils—conditions usually unfavorable to most citrus fruits. It is propagated from seed, buds, or cuttings and in other respects its culture is similar to that of the lemon, though the trees may be planted closer. The fruit is smaller than the lemon, more globular, more acid, and with a thinner rind. It has the vitamin value and other properties of the citrus fruits. The juice has long been known as a preventive of scurvy and is one of the main sources of CITRIC ACID. The name lime is also applied to the linden, or BASSWOOD tree, and sometimes to a species of tupelo or sour gum—the Ogeechee lime.

lime or quicklime, calcium oxide, a compound of calcium and oxygen, a common, white, amorphous solid, fusible with great difficulty (melting point= 2570°C.). The Drummond light or limelight was produced by directing an oxyhydrogen flame against a cylinder of lime. Lime is prepared by heating LIMESTONE (calcium carbonate) in a kiln, when it is formed with the evolution of carbon dioxide. Lime is of great importance in industry, being used in making porcelain and glass, in the purification of sugar, and in preparing alkalies, chloride of lime (bleaching powder), calcium carbide used in generating acetylene, and calcium cyanamide used as a fertilizer. In agriculture it is used for treating soils and for certain insecticide sprays. Lime, a typical basic oxide (basic ANHYDRIDE), reacts with water with the evolution of much heat to form calcium hydroxide. The process is known as slaking and the hydroxide, consequently, as **slaked lime.** This substance is white and resembles lime but is a more bulky powder. It is the common form in which lime is sold and used. When mixed with sand, mortar is formed. Plaster, prepared in a similar way, usually contains hair. Slaked lime is slightly soluble in water, the clear solution is known as **LIMEWATER,** the suspension in water as milk of lime, and the emulsion with linseed oil as CARBON OIL. WHITEWASH contains lime slaked in a small quantity of water and mixed with other substances. In agriculture slaked lime is used (liming) to counteract acidity in soil caused by the presence of too much decaying organic matter or of undesirable organisms. It is employed also in the refining of beet sugar. In most industrial processes the lime to be used is generally slaked first. Because of its low cost, it is widely used when a strong base is necessary. It is employed in tanning to remove hair from hides. **Lime-sulphur,** formed by mixing slaked lime with sulphur, is a mixture of calcium sulphides, used as an insecticide.

Limehouse, parish of Stepney metropolitan borough, London, England, on the Thames. A district of docks, wharves, warehouses, factories, and workers' homes, it suffered widespread damage in air raids in 1940–41.

Limerick (lĭ'mərĭk), county (1,037 sq. mi; pop 142,559), S Ireland, in Munster. Limerick, a port formerly of greater importance, is the county seat and only town of any size. The region is an agricultural plain lying S of the Shannon estuary. The Golden Vale in the eastern part of the county and the Shannon bank are especially fertile. Dairy farming and salmon fishing are the chief occupations. On the Shannon above Limerick is an important hydroelectric plant. There is some manufacture of wool, paper, and flour. After the Anglo-Norman invasion and organization of Limerick as a shire (c 1200) the district was controlled for many centuries by the Desmond Fitzgeralds.

Limerick, county borough (pop 42,987), co. seat of Co. Limerick, Ireland, at the head of the Shannon estuary. The town is a seaport with quays and graving and floating docks. It was occupied by the Danes in the 9th cent., under Brian Boru became the capital of Munster, was taken by the English toward the end of the 12th cent., and in 1689 was James II's last stronghold in Ireland. There are three sections—English Town, the oldest, which originated in King John's time, on King's Island, Irish Town to the south, and Newtown Pery, S of Irish Town, founded in 1769. The Treaty Stone on which was signed (1691) the treaty granting the Irish and Catholics certain rights, chiefly the guarantee of political and religious liberty to Roman Catholics, is preserved. The repeated violations of this treaty in the reigns of William III and Queen Anne caused Limerick to be called City of the Violated Treaty. There are a Protestant cathedral (12th cent.), a Roman Catholic cathedral, and the Norman castle of King John. Industry includes salmon fishing, bacon curing, flour milling, and lacemaking.

Limerick, town (pop 1,080), SW Maine, W of Portland, settled c 1775, inc 1787.

limerick, type of humorous verse. It is always short, often nonsensical, and sometimes ribald. Of unknown origin, the limerick is popular rather than literary and has recently been used in advertising. The rhyme scheme of most limericks is usually *aabba*, as in the following example:

> There was an old dame of Nantucket
> Who kept all her cash in a bucket.
> Her daughter, named Nan,
> Ran away with a man,
> And as for the bucket, Nantucket.

The most famous collection of limericks is Edward Lear's *Book of Nonsense* (1846). See Carolyn Wells, *Book of American Limericks* (1925), Herbert Reed, *Complete Limerick Book* (1926), H. I. Brock, comp., *The Little Book of Limericks* (1947).

Limestone, town (pop 1,855), NE Maine, ENE of Caribou near the N.B. line, in potato-growing country, settled 1849, inc 1869. It is a port of entry.

limestone, sedimentary rock wholly or in large part composed of calcium carbonate. It is ordinarily white but may be colored by impurities, iron oxide making it brown, yellow, or red and carbon making it blue, black, or gray. The texture varies from coarse to fine. Most limestones are formed by the deposition and consolidation of the skeletons of marine invertebrates, some few originate from chemical precipitation from solution. Limestone deposits are frequently of great thickness. The action of organic acids on underground deposits causes such formations as the Luray Caverns, the Carlsbad Caverns, and Mammoth Cave. Limestone is used as a flux in the extraction of iron, as an ingredient in Portland cement, as a source of LIME, as a building stone, and for ornamental purposes. Among the important varieties of limestone are MARL, CHALK, OOLITE, TRAVERTINE, DOLOMITE, and MARBLE.

Limestone College. see GAFFNEY, S.C.

lime-sulphur. see LIME.

limewater, clear solution of calcium hydroxide, or slaked lime in water. It is commonly used in the laboratory in testing for carbon dioxide, since it becomes cloudy because of the formation of a white precipitate of calcium carbonate. It is used also in treating acid burns. The solution is not poisonous and is used in medicine as an antacid.

Lim Fjord (lēm' fyôrd'), strait cutting across N Jutland, Denmark, and connecting the North Sea with the Kattegat. It is c 110 mi. long and very irregular in shape, forming a lagoon 15 mi. wide in its middle section; its maximum depth is 50 ft. There are several islands, notably MORS. Before 1825, when the fjord cut through to the North Sea, its western part consisted of several freshwater lakes, drained into the Kattegat through the eastern part. Aalborg is the chief port on the waterway.

liming (lī'mĭng), application to the soil of the element calcium in various forms, e.g., marl, chalk, limestone, shells, or hydrated lime. Lime benefits soil by neutralizing acidity, improving texture, and increasing the activity of soil bacteria. It enables the bacteria on the roots of legumes, as alfalfa and the clovers, to secure nitrogen from the air in the soil, making the soil richer in nitrogen. Its good effect was recognized in ancient Rome, and it was extensively used in France and England during the Middle Ages. Some soils are naturally supplied with enough lime, and an oversupply may be injurious to plant growth. See publications of the U.S. Dept. of Agriculture.

Limoges (lĭmōsh', Fr. lēmôsh'), city (pop 63,225), capital of Haute-Vienne dept., S central France, on the Vienne. An ancient town, it became (10th cent.) the seat of the viscounty of Limoges and (1589) the capital of LIMOUSIN prov. It was often visited by war, pestilence, and famine. Richard Cœur de Lion (Richard I of England) was killed in battle near Limoges (1199). In 1371 EDWARD THE BLACK PRINCE burned the city and massacred its inhabitants, including women and children. The famous Limoges enamel industry was fully developed by the 13th cent. and culminated in the work of Léonard LIMOUSIN, but it declined when Limoges was once more devastated in the Wars of Religion. TURGOT, who was intendant of Limoges (1761–74), brought back its prosperity by introducing its celebrated china manufactures. Limoges has a cathedral (13th-16th cent.), a notable ceramics museum, and an art gallery which includes works by Renoir, who was born here.

Limón (lēmōn'), Caribbean port (1944 estimated pop 10,033), E Costa Rica. Hot, but clean and healthful, Limón has modern, efficient port facilities developed by the United Fruit Company. Founded by Minor Cooper KEITH when he began building (1874) the railroad to San José, the capital, it is the leading port of the country. Chief exports are coffee and bananas. Recently developed is the balsa industry. Columbus may have visited the site on his voyage in 1502.

Limon (lī'mən), town (pop 1,053, alt 5,280 ft.), E Colo., SE of Denver and on the Big Sandy River, founded 1888, inc 1909. It is a trade and shipping center for a farm area.

limonite (lī'mənīt), **brown hematite** (hĕ'mətīt, hē'–), or **bog iron ore,** a yellowish to dark brown, amorphous mineral, a hydrated oxide of iron, occurring commonly in deposits of secondary origin, i.e., those formed by the alteration of other minerals containing iron. It serves as a pigment (see OCHER) and as an ore of iron, it is found widely distributed throughout Europe and in the E United States.

Limosin, Léonard see LIMOUSIN, LÉONARD.

Limousin or **Limosin, Léonard** (lēônar' lēmōōzĕ', lēmōzĕ'), c 1505–c 1577, French painter in enamel, most celebrated member of a family of Limoges enamel artists. His earliest authenticated works (1532) show both German and Italian influence. He was court painter and *valet de chambre* to Francis I and Henry II, executing for them plates, vases, goblets, medals, and exquisite portraits in enamel which included numerous plaques of Diane de Poitiers. He is said to have executed over 2,000 enamels, distinguished for their individuality of style, graceful design, and splendid color. His art is best studied in the Louvre, which possesses many portraits and two celebrated votive tablets of 23 plaques each. There are also excellent examples in the Limoges and Chantilly museums and the Cluny Museum, Paris, and in the Metropolitan Museum, which has portraits of Francis I and Henry d'Albret, king of Navarre. See study by Louis Bourdery and Emile Lachenaud (1897).

Limousin (lēmōōzĕ'), region and former province, S central France, W of the Auvergne Mts., which continue in the arid Limousin hills. It is occupied by Corrèze dept. and most of Haute-Vienne dept. LIMOGES, the historical capital, is the center of ceramics industries, for which the abundant kaolin of the region is used, both Limoges and Tulle are important markets for the cattle raised in most of Limousin. Brive-la-Gaillarde is surrounded by fertile lowlands. In 1152 the region, divided into several viscounties enfeoffed to the duchy of AQUITAINE, passed under English domination. Philip II of France contested it with Richard I of England, who fell (1199) near Limoges. Philip annexed it in 1204, but in 1259 Louis IX ceded it to the English. Ravaged by EDWARD THE BLACK PRINCE in the Hundred Years War, it was reconquered for France by Bertrand du Guesclin. The viscounty of Limoges, held by the Bourbon-Vendôme family, was incorporated into the royal domain only in 1589 when Henry IV ascended the French throne. Colbert, when he created the intendancies as administrative units for France, united Limousin, Marche, and Angoulême in the intendancy of Limoges, which remained a depressed area until TURGOT became intendant (1761–74) and introduced his reforms.

limpet, marine gastropod mollusk allied to the snails and slugs. It has a low conical shell and a suckerlike foot with which it clings to rocks or creeps over rocky shores. It feeds on algae and seaweeds. Some species are useful as food and bait.

Limpopo (lĭmpō'pō), river, c 1,000 mi. long, rising in Transvaal prov., Union of South Africa. It flows in a great arc, north and then southeastward, through South Africa, along the border of South Africa and Southern Rhodesia, and through Mozambique into the Indian Ocean. It is navigable for c 100 mi. above its mouth. It was formerly sometimes called the Crocodile river.

Linacre or **Lynaker, Thomas** (both. lī'nukur), 1460?–1524, English humanist and physician. He took the degree of doctor of medicine at the Univ. of Padua, returned to England c 1492, and became tutor to Prince Arthur and later physician to Henry VIII. He was interested in the humanistic revival, wrote a Latin grammar (c.1523) for Princess Mary, and included among his pupils Desiderius Erasmus and Sir Thomas More. Linacre translated many of Aristotle's and Galen's works into Latin and found-

ed readerships in medicine at Oxford and Cambridge. He was the founder and first president of the Royal College of Physicians See biography by Sir William Osler (1908)

Linares (lēnä'rĕs), city (pop 31,720), Jaén prov, S Spain, in Andalusia. The rich silver and lead mines near by have brought prosperity to the city, which now has many metallurgical industries. Near here are ruins of the Roman town Castulo

Lincoln, Abraham, 1809–65, 16th President of the United States Born on Feb 12, 1809, in a log cabin in backwoods Hardin co, Ky (his birthplace is now in Larue co), he grew up on newly broken pioneer farms as the family moved forward, always on the edge of the frontier. His father, Thomas Lincoln, was a migratory carpenter and farmer, nearly always poverty-stricken His mother was Nancy Hanks, a shadowy figure of history, who died in 1818, not long after the family had settled in the wilds of what is now Spencer co, Ind Thomas Lincoln soon afterward married Sarah Bush Johnston, a widow, she was a kind and affectionate stepmother to the boy The young Lincoln grew up in Indiana, battling with all the hardships of pioneer life Of formal schooling he had almost none the scattered weeks of school attendance in Kentucky and Indiana amounted in all to less than a year Yet so avid was he for learning that he schooled himself, reading over and over the small stock of books that he could acquire By the light of the hearth fire he did his sums on boards that he shaved off for the purpose His first glimpse of the world came in his voyage down river to New Orleans on a flatboat, in 1828 Of that journey almost nothing is known In 1830 the Lincolns moved once more, into Macon co, Ill Young Abe had by then grown to be a tall (he was 6 ft 4 in), rawboned young man of great strength and a singularly homely face. He soon set out to make his own way in the world, and, after another trip down the river to New Orleans, he settled in the unthriving little village of New Salem, Ill, not far from Springfield There he remained from 1831 to 1837 He worked in a store, managed a mill, then was a partner in a grocery store that failed, leaving him a heavy burden of debt He split rails and did odd jobs for a living, was village postmaster, studied surveying and worked for a time as surveyor, and all the while studied law and sought to improve his education He won much popularity among the inhabitants of the frontier town by his great strength, his inimitable ability at telling stories, but most of all by sheer character His honesty has become almost proverbial in America His sincerity and his capability won respect that was secured by his ability to hold his own in the roughest society He was chosen captain of a volunteer company gathered for the Black Hawk War, but the company did not see service In 1834, Lincoln was elected to the state legislature, in which he served for four terms (until 1841) The story of his brief and tragic love affair with Ann Rutledge (who died in 1835), which supposedly occurred at this time, is now discredited He achieved prominence as a Whig in the legislature In 1836 he obtained his license as an attorney and the next year he moved to Springfield, where he and J T Stuart became law partners Lincoln's practice steadily increased in the years that followed The first partnership was succeeded by others, with Stephen T Logan and then with William H Herndon, who was later his biographer Lincoln displayed great ability in law, a ready grasp of argument and sincerity, color, and lucidity of speech He settled into a rut of small-town life In 1842 he married Mary Todd after a troubled courtship He continued his interest in politics and entered on the national scene by serving one term in Congress (1847–49). He remained obscure, and his attacks as a Whig on the motives behind the Mexican War (though he voted for war supplies) seemed unpatriotic to his constituents, and he lost popularity at home Lincoln, in disgust, retired from politics and settled down to the practice of law He grew, rather than diminished, in stature as a public figure The prairie lawyer emerged again into politics in 1854, when he was caught up into the rising quarrel of section against section in the United States He stoutly opposed the policy of Stephen A Douglas and particularly the Kansas-Nebraska Bill In a speech at Springfield, repeated at Peoria, he attacked the compromises concerning the question of slavery in the territories and appealed to the purely democratic phrases of the Declaration of Independence The next year he sought to become a Senator, but failed He had already realized that his sentiments were leading him away from the Whigs and toward the new Republican Party, and in 1856 he became a Republican and made a notable, though unrecorded, speech before the state convention of the party He quickly came to the fore as a moderate opponent of slavery, who could win both the abolitionists and the conservative Free Staters. In 1856 he was prominent as a possible vice presidential candidate, but it was not until two years later that he emerged from obscurity into national prominence, when he was nominated by the Republican Party to oppose Douglas in the senatorial race Lincoln's speech of acceptance, delivered at Springfield on June 16, contained a ringing declaration in support of the Union. This was the speech in which he declared that "A house divided against itself cannot stand" The campaign that followed was impressive Lincoln challenged his opponent to a series of debates, and the seven debates held were momentous in their suggestion In these Lincoln-Douglas debates, the backwoods lawyer delivered masterful addresses for the Union and for the pure democratic ideal He was not an abolitionist, but he regarded slavery as an "injustice" and an evil, and uncompromisingly opposed its extension In the debate at Freeport (Aug 27) he embarrassed Douglas, who, in an effort to reconcile the Dred Scott decision and the "squatter sovereignty" principle, enunciated the Freeport doctine, that doctrine was to cost Douglas many Southern votes Though his opponent won the election, Lincoln had made his mark by the debates He was a potential presidential candidate His first appearance in the East was in February, 1860, when he spoke at Cooper Union in New York city He gained a large following in all the antislavery states, but he still might not have been nominated for President by the Republican Convention in Chicago (May, 1860), but for the enemies of William H Seward, the leading contender Lincoln was nominated on the third ballot In the election the Democratic party split, and there were four candidates, including Douglas, for the presidency Lincoln was victorious at the polls, Nov 6 1860 The South regarded his election as the end of the South, and in the months that followed the two sections drifted closer and closer to war Lincoln killed the Crittenden Compromise by refusing to accede to it, no settlement of the sectional quarrel was effected Lincoln was determined to preserve the Union at all costs His course in the matter of provisioning Fort Sumter was complicated by the actions of Seward, who had been made Secretary of State Secession Lincoln condemned In April, 1861, Fort Sumter was fired on and the Civil War began Lincoln became the leader of the people of the North in the greatest crisis and the most tragic interlude through which the United States has passed Whatever criticism may be leveled against him for his vacillation and his putative responsibility for the outbreak of the war, it is generally agreed that he attacked the vast problems of the war with vigor and surpassing skill His war message to Congress, his sharp executive actions in suspending constitutional rights and in inaugurating the operations of the war, all paved the way for his wise control that amounted practically to dictatorship Yet even in prosecuting Southern sympathizers in the North (for which he has been much criticized) he sought to temper punishment with mercy He seems to have felt sorrow rather than anger toward the South He was beset not only by the difficulties of the war, but by opposition of men on his own side His cabinet was rent by internal jealousies and hatred, radical abolitionists condemned him as too mild, conservatives were gloomy over the outcome of the war In the midst of all this strife Lincoln continued his course, sometimes almost alone, yet persevering with wisdom and patience The course of battle went against the North at first and there was a hasty succession of Union commanders in chief, this was partially due to Lincoln's own lack of military knowledge, he was in constant trouble with the generals The somewhat dubious victory at Antietam (1862) gave the President his chance to make a great stroke of political and diplomatic policy in the Emancipation Proclamation, which gave a high moral tone to the Northern cause The restoration and preservation of the Union was still the main tenet of Lincoln's war aims He kept close to the heart of his people, and the sorrows of war and its rigorous necessity afflicted him, both he expressed in what is certainly one of the noblest public speeches ever made, the Gettysburg Address, made at the dedication of the soldiers' cemetery at Gettysburg in 1863 The forces of his enemies gathered against him, and for a time he was threatened by the desertion of the Republican leaders as well as by a strong opposition party, in the presidential election which loomed ahead in the dark days of 1864, but a turn for the better took place before the election, a turn brought about to some extent by the change of fortunes in arms after Ulysses S Grant became commander and particularly after William T Sherman took Atlanta Lincoln was reelected over George B McClellan by a great majority. His second inaugural address, delivered when the war was drawing to its victorious close, was a plea for the new country that would arise from the ashes of the South, and his large-souled view of the South and his purpose expressed in the memorable phrase, "With malice toward none; with charity for all," presaged a peace without conquest, a Reconstruction without destruction He lived to see the end of the war, but he was not to try his hand at reconstructing the Union. On the night of April 14, 1865, when attending a performance at Ford's Theater, he was shot by the half-mad actor, John Wilkes Booth. The next morning Lincoln died His death was the occasion of grief even among the men who had been his opponents, and as a martyred President he became a titanic figure As time passed he became more and more the object of adulation, men of both North and South, ignoring or arguing around palpable mistakes and faults and vacillations, heaped praise beyond reason upon him, and a full-blown "Lincoln legend" appeared Yet, no man in American history is dearer to the hearts of the people than this uncouth backwoods lad who came to be the savior of the Union and the symbol of the pioneer and of American democracy Paintings, sculptures, and architectural works memorialising Lincoln are legion, and he has perhaps been written about more than any other American figure Not only innumerable biographies but novels, poems (including some of the finest in American literature), plays, and many essays have been devoted to him. The Robert Todd Lincoln Collection of the Papers of Abraham Lincoln in the Library of Congress, opened in 1947, will doubtless add to the flow of books about Lincoln His own writings have been edited by J G Nicolay and John Hay (2 vols., 1894, new and enlarged ed, 12 vols, 1905–6), A B. Lapsley (8 vols, 1905–6), Philip Van Doren Stern (1940), and R P Basler (1946) G A Tracy compiled *Uncollected Letters of Abraham Lincoln* (1917) and R R Wilson assembled *Uncollected Works of Abraham Lincoln* (2 vols, 1947–49) The most complete bibliography is Jay Monaghan, *Lincoln Bibliography, 1839–1939* (2 vols, 1943–45) See also Paul M Angle, *A Shelf of Lincoln Books* (1946) One of the most important early biographies was W H Herndon and J W Weik, *Herndon's Lincoln* (3 vols, 1889, edited by Paul M Angle, 1930) J G Nicolay and John Hay wrote the monumental *Abraham Lincoln a History* (10 vols, 1890) Probably the most popular biography is Carl Sandburg, *Abraham Lincoln the Prairie Years* (2 vols, 1926), and *Abraham Lincoln the War Years* (4 vols, 1939) An outstanding work is Albert J Beveridge, *Abraham Lincoln, 1809–1858* (2 vols, 1928). See also biographies by Lord Charnwood (1916), N W. Stephenson (1922), and W E Barton (2 vols, 1925) Almost the only work portraying Lincoln in a completely unfavorable light is Edgar Lee Masters, *Lincoln the Man* (1931) Preeminent among the special studies on Lincoln are those of James G Randall See also T H Williams, *Lincoln and the Radicals* (1941), H J Carman and R H. Luthin, *Lincoln and the Patronage* (1943), F H Meserve and Carl Sandburg, *The Photographs of Abraham Lincoln* (1944), Jay Monaghan, *Diplomat in Carpet Slippers* (1945), B J Hendrick, *Lincoln's War Cabinet* (1946), B P Thomas, *Portrait for Posterity Lincoln and His Biographers* (1947), Paul M. Angle, ed, *The Lincoln Reader* (1947), W B Hesseltine, *Lincoln and the War Governors* (1948), D C. Mearns, ed, *The Lincoln Papers* (2 vols, 1948), A H Shaw, ed, *The Lincoln Encyclopedia* (1950)

Lincoln, Benjamin, 1733–1810, American Revolutionary general, b Hingham, Mass He served under Horatio Gates in the Saratoga campaign before becoming (1778) commander in the South In 1779 he failed, in conjunction with a French fleet under Admiral d'Estaing, to take Savannah and was beaten back to Charleston, where he surrendered (1780) to an overwhelming force commanded by Sir Henry Clinton Lincoln was exchanged in time for the Yorktown campaign and received Cornwallis's sword at the surrender In 1787 he commanded the Massachusetts state militia which helped suppress Shays's Rebellion

Lincoln, Joseph Crosby, 1870–1944, American novelist, b Brewster, Mass His numerous regional novels of Cape Cod include *Cap'n Eri* (1904), *Shavings* (1918), *Fair Harbor* (1922), and *The Bradshaws of Harniss* (1943) *Cape Cod Yesterdays* (1945) contains reminiscences

Lincoln, Levi, 1749–1820, American statesman, b. Hingham, Mass, grad Harvard, 1772 A lawyer, he held various local offices in the American Revolution and later became a Jeffersonian political leader Lincoln resigned from Congress (1801) and served (1801–4) as U S Attorney General He was later lieutenant governor and governor of Pennsylvania

Lincoln, Levi, 1782–1868, American statesman, b Worcester, Mass, grad Harvard, 1802, son of Levi Lincoln (1749–1820) He became a lawyer (1805) and held several public offices Lincoln became lieutenant governor (1823) and associate justice of the state supreme court (1824) As governor of Massachusetts (1825–34) he proved able and popular He was sent to Congress as a Whig (1835–41)

Lincoln, Mary Todd, 1818–82, wife of Abraham Lincoln, b Lexington, Ky Of a good Kentucky family, she was living with her sister, daughter-in-law of Gov Ninian Edwards of Illinois, in Springfield when she met and married (1842) Lincoln It has been generally said that their married life was not happy, and many unkind comments have been made concerning Mary Lincoln, especially by William H Herndon, Lincoln's friend and biographer Of the four sons she bore (Robert Todd, Edward Baker, William Wallace, and Thomas or "Tad"),

only Robert Todd lived to manhood. The death of Willie in 1862 was a great sorrow to both Abraham and Mary Lincoln, and Tad's death in 1871 seems to have unsettled her mind (already affected by seeing her husband murdered at her side) She later was, however, adjudged sane. See biographies by Katherine Helm (1928) and by Carol Sandburg and Paul M. Angle (1932), W A Evans, *Mrs Abraham Lincoln· a Study of Her Personality and Her Influence on Lincoln* (1932).

Lincoln, Robert Todd, 1843–1926, American lawyer and public official, b Springfield, Ill, grad Harvard, 1864, son of Abraham Lincoln He served on Grant's staff and after the Civil War studied and practiced law in Chicago. An able corporation lawyer, he served chiefly railroad interests and was president of the Pullman Company from 1897 to 1911 Lincoln was of retiring disposition and avoided public affairs He never ran for office, but was Secretary of War under Presidents Garfield and Arthur and minister to Great Britain under President Benjamin Harrison. Access to those papers of his father which he owned was denied by Lincoln to all except the authorized biographers, Nicolay and Hay. However, he left the papers to the Library of Congress on the condition that they be sealed until 21 years after his death, and on July 26, 1947, the Robert Todd Lincoln Collection of the Papers of Abraham Lincoln was opened to the public

Lincoln, county, England see LINCOLNSHIRE.

Lincoln, county borough (1931 pop 66,243, 1947 estimated pop 66,130) and city, co seat of Lincolnshire, England, in the Parts of Lindsey, on the Witham and N of London It was an ancient British fort, the Roman Lindum or Lindum Colonia, and was important under the Danes in the 9th cent The modern city is a center of water and rail transportation and manufactures radios, machinery, light-metal products, automobile parts, and food products The great Lincoln Cathedral, built from 1075 to 1501 and extensively repaired in 1922–32 (with some American contributions), has a central tower 271 ft high, containing the famous bell "Great Tom of Lincoln" The Lincoln Castle was begun by William I in 1068. It was several times the center of strife and siege (Empress Matilda recovered it from Stephen in 1141, and the parliamentarians besieged it in 1644) The town was burned in the 12th cent, and five parliaments were held in Lincoln in the 14th cent For centuries horse races and fairs have been held in the town

Lincoln. 1 City (pop 2,044), N central Calif, NNE of Sacramento, in a fruit and grain area of the Sacramento valley, inc 1890 Clay products are made here, and fruit is processed. **2** City (pop 12,752), co seat of Logan co, central Ill, NNE of Springfield, in a farm and coal area, settled in the 1830s, platted and promoted with the aid of Abraham Lincoln 1853, inc 1857 It is a shipping and industrial center with china and cigar factories and a creamery Lincoln practiced law here from 1847 to 1859 Lincoln College (junior, 1865), now part of James Millikin Univ, and a state school for the feeble-minded are here **3** City (pop 1,761), co seat of Lincoln co, N central Kansas, on the Saline and NW of Salina; laid out 1871, inc 1879 It is a shipping point for wheat and livestock and has limestone quarries. **4** Town (pop 3,653), central Maine, on the Penobscot above Bangor, settled c 1825, inc 1829. Its earliest name survives in the name of Mattanawcook Pond Textiles, paper, and lumber are produced **5** Town (pop 1,783), E Mass, SE of Concord; settled c 1650, set off from Concord, Lexington, and Weston 1754 **6** City (pop 81,984), state capital, and co seat of Lancaster co, SE Nebr, c.50 mi W of the Missouri, in a prairie area Founded in 1864 as Lancaster, it was chosen the site of the capital in 1867 and was replatted as Lincoln It was incorporated in 1869 and in 1887 made a city of the first class In 1913 Lincoln adopted the commission form of government It is the educational center of the state and the railroad, trade, and industrial center for a large grain and livestock area Farm machinery, woodwork, rubber goods, and brick are produced, and farm products are processed and shipped The state capitol, designed by B G Goodhue, with sculptures by Lee Lawrie, was completed in 1934, it is a fine example of modern architecture The city is the seat of the Univ of Nebraska (see NEBRASKA, UNIVERSITY OF), Union College (Seventh-Day Adventist, coeducational, 1891), and Nebraska Wesleyan Univ (coeducational, 1887) Many state institutions are here the historical society and its museum, the penitentiary, an insane asylum, the home for dependent children, the reformatory for men, the orthopedic hospital, and the fair. It has a veterans' hospital, a flying school, an airport, and a municipal park. W J Bryan lived here from 1887 to 1916 **7** Town (pop. 1,560), N central N.H., in the White Mts S of Franconia Notch, inc 1764 Lumbering and logging are done here. **8** Town (pop. 10,577), NE R I, set off from Smithfield and inc. 1871 Limestone has been quarried in the town since colonial times Many pre-Revolutionary houses and a state park are here.

Lincoln, Mount, peak, 14,284 ft high, central Colo, highest of the Park Range of the Rockies.

Lincoln City, settlement, SW Ind., NE of Evansville, laid out 1872 on the site of the farm of Thomas Lincoln Lincoln State Park, S of, and adjoining, the town, has a Nancy Hanks Lincoln Memorial (where she is buried) and is the site of the Lincoln cabin, built in 1816

Lincoln College· see OXFORD UNIVERSITY.

Lincoln Memorial, monument in Potomac Park, Washington, D C, designed by Henry Bacon Like a Greek temple, with a colonnade of 36 Doric columns, the building has a heroic statue of Lincoln by Daniel Chester French and murals by Jules Guérin. The memorial was dedicated in 1922

Lincoln Memorial University, at Harrogate, Tenn, near the Ky and Va lines, nonsectarian, coeducational, chartered 1897 for the mountain people It is a liberal arts college where arts and crafts are taught. Students operate the college industries

Lincoln Park. 1 City (pop 15,236), SE Mich, residential suburb of Detroit, inc as a village 1921, as a city 1925 **2** Borough (pop 2,186), N N J, W of Paterson, inc 1922

Lincolnshire (lĭng'kŭnshĭr) or **Lincoln,** maritime county (2,665 sq mi, 1931 pop 624,589, 1948 estimated pop 673,490), E central England, bordering on the Humber estuary, the North Sea, and the Wash It is divided into three administrative districts—known as the Parts of Holland, in the southeast, with the county town at Boston, the Parts of Kesteven (kĕstē'vun), in the southwest, with the county seat at Sleaford, and the Parts of Lindsey, with the county seat at LINCOLN (also the seat of the county) The region is generally low and flat, with extensive marshes along the coast It is crossed by many dikes and canals, some of which, notably the Foss Dyke, date back to the times of Roman occupation Primarily an agricultural county, Lincolnshire also has fishing as an important occupation, and there is some shipbuilding and manufacturing Lincoln, famous for its cathedral, and the port of Grimsby are the only two large towns In Anglo-Saxon times Lincolnshire was variously under the control of Mercia and Northumbria There are a large number of medieval churches and other ecclesiastical remains See Arthur Mee, *Lincolnshire* (1949).

Lincoln's Inn. see INNS OF COURT

Lincolnton, textile-mill town (pop 4,525), co seat of Lincoln co, W central N C, NW of Charlotte, inc 1785

Lincoln University· see JEFFERSON CITY, MO

Lincoln University, near Oxford, Pa, Negro, Presbyterian, for men, chartered 1854, opened 1857 as Ashmun Institute, renamed 1866 It has a college of liberal arts and a theological school

Lind, Jenny, 1820–87, Swedish soprano She made her debut in 1838 as Agathe in Weber's *Der Freischütz* In 1841 she studied with Manuel García in Paris, she sang (1844-45) in Germany, made her London debut in 1847, and in 1849 abandoned opera, singing in concert and oratorio until 1870 Under the management of P T Barnum she toured (1850–52) the United States with enormous success She married Otto Goldschmidt in 1852 They lived for a time in Dresden and in 1856 returned to London, where, in 1883, she began to teach at the Royal College of Music Called "the Swedish nightingale," she was the greatest coloratura soprano of her time, possessing a voice of remarkable range and quality. Her singing was highly praised by musicians and critics as well as an adoring public See biographies by H S Holland and W S Rockstro (1891), Grace Humphrey (1928), and E C Wagenknecht (1931)

Lind, John, 1854–1930, American statesman, b Sweden As a boy he came (1867) with his family to Minnesota His early career was varied, it included schoolteaching, attendance (1875–76) at the Univ of Minnesota, practice of law, and holding public office Elected to Congress in 1886, he served three terms (1887–93) as a Republican and was a spokesman of the West Breaking with his party on the free-silver issue, he was in 1896 unsuccessful as the Democratic and Populist candidate for governor, but after brief service in the Spanish-American War, he ran successfully as an independent and was governor (1899–1901) In 1913 Woodrow Wilson sent him on an unsuccessful mission to Mexico See biography by G M Stephenson (1935)

Lindau (lĭn'dou), town (pop 17,915), SW Germany, on an island in the Lake of Constance It is a resort center The Lindau dist (120 sq mi, pop 52,621) was detached from American-occupied Bavaria in 1945 and was incorporated with the French-occupied state of Württemberg-Hohenzollern

Lindbergh, Charles Augustus, 1859–1924, American Congressman (1907–17), b Stockholm, Sweden, grad Univ of Michigan, 1883 Brought (1860) to Minnesota when still an infant, Lindbergh was reared on a farm there and practiced law in Little Falls, Minn. As a Republican member of the U.S House of Representatives, he consistently attacked the methods of large industrial trusts, sponsored various reforms, and incurred vilification by his denunciation of war propaganda and war profiteering His outspoken book, *Why Is Your Country at War?* (1917; reprinted 1934), was suppressed and contributed to his defeat (1918) for the post of governor of Minnesota. *The Economic Pinch,* containing his economic and social doctrines, appeared in 1923 He was the father of Charles Augustus Lindbergh, the aviator. See Lynn Haines and Dora Haines, *The Lindberghs* (1931).

Lindbergh, Charles Augustus, 1902–, American aviator, b Detroit, son of Charles A Lindbergh (1859–1924) He left the Univ of Wisconsin (1922) to study flying, and after service as a flying cadet he was commissioned (1925) in the air force reserve On May 21, 1927, Lindbergh astounded the world by landing in Paris after a solo, nonstop, transatlantic flight in *The Spirit of St Louis* from New York Upon his return to America he received an unprecedented welcome, was promoted to colonel, and made a nation-wide tour to foster popular interest in aviation Lindbergh married (1929) Anne Morrow, daughter of Dwight W. MORROW, and with her made several long flights After the kidnaping and death of his son (see HAUPTMANN, BRUNO RICHARD) in 1932, Lindbergh moved (1935) his family to England In 1936 he invented with Alexis CARREL a perfusion pump called an artificial heart. After inspecting (1938) European air forces, Lindbergh became convinced of German superiority and favored appeasement of Germany. He returned (1939) to America, made a survey for the War Dept, and made anti-war speeches for the America First Committee When these speeches were branded pro-Nazi, he resigned his reserve commission and quit the National Advisory Committee for Aeronautics When the United States entered the war, Lindbergh offered his services to the air force and made several missions to the Pacific and Europe as a civilian consultant See his *We* (1927) and *Of Flight and Life* (1948) His wife, **Anne Spencer Morrow Lindbergh,** 1907–, b Englewood, N J, is the author of *North to the Orient* (1935), *Listen! the Wind* (1938), and *The Steep Ascent* (1944)

Linden. 1 Town (pop 1,203), co seat of Marengo co, W central Ala, W of Montgomery, in a farm area, founded 1823 **2** City (pop 24,115), NE N J, SSW of Elizabeth, inc 1924 The site was bought from the Lenni-Lenape in 1664 Linden has a large oil refinery, a motor assembly plant, and a pharmaceutical factory **3** Town (pop 1,168), co seat of Cass co, E Texas, near the point where Texas, Arkansas, and Louisiana meet, founded c 1850 The red sandy land supports lumbering and truck farming

linden· see BASSWOOD

Lindenhurst, village (pop 4,756), SE N Y, on the south shore of Long Island, close to Babylon, settled 1869, inc 1923 Airplane and navigation instruments are made here

Lindenthal, Gustav (lĭn'dunthôl"), 1850–1935, American mining engineer, b Austria He came to the United States in 1874 and rapidly rose to a foremost place as a consulting engineer, chiefly in the construction of bridges and tunnels Among his chief works were the Hell Gate Bridge over the East River, New York city, and the Pennsylvania RR tunnels under the Hudson and East rivers

Lindenwold, borough (pop 2,552), SW N J, SE of Camden, settled 1742, laid out 1885, inc 1929

Lindenwood College. see SAINT CHARLES, MO

Lindesnes (lĭn'dusnĕs) or **the Naze** (nāz), cape, extreme S Norway, on the North Sea at the entrance of the Skagerrak Its powerful beacon, placed in 1650, was the first in Norway

Lindisfarne (lĭn'dĭsfārn) or **Holy Island,** small island c 2 mi off the coast of Northumberland, England At low tide it is connected with the shore by a stretch of sand The island is partly cultivated A church and monastery, built in 635 by St Aidan, were the first establishment of Celtic Christianity in England St CUTHBERT was the most famous of the bishops of Bernicia at Lindisfarne The settlement was burned by the Danes in 793, but rebuilt The Danish invasion of 875 caused the bishop to flee and wander for seven years, settling finally at Chester-le-Street A Benedictine priory was set up in 1093 There are remains of a church and of an early-16th-century castle The Lindisfarne Gospels or Book of Durham is an illuminated Latin manuscript of the Gospels, now in the British Museum, written at Lindisfarne before 700, an Anglo-Saxon gloss was added at Durham in the 10th cent

Lindley, John, 1799–1865, English botanist and horticulturist He organized the first flower shows in England and was influential in preserving the Royal Gardens at Kew. In 1829 he was appointed the first professor of botany at the Univ of London (later University College), and in 1860 he became emeritus professor. Lindley wrote the botanical articles for the *Penny Cyclopaedia* and a major portion of those in Loudon's *Encyclopaedia of Plants.* He also wrote *The Fossil Flora of Great Britain* (with William Hutton, 1831–37), *The Theory of Horticulture* (1840), and *The Vegetable Kingdom* (1846)

Lindley, Nathaniel Lindley, Baron, 1828–1921, English jurist. He served as judge of the court of ap-

peal and privy councilor and wrote *An Introduction to the Study of Jurisprudence* (1855).

Lindsay or **Lyndsay, Sir David** (lĭn'sē), c 1490–c 1555, Scottish poet and one of the last of the so-called Chaucerians He is remembered for his satires against the Church, especially *The Testament and Complaynt of Our Soverane Lordis Papyngo* (1530), which attacks the abuses of the clergy He wrote *Ane Pleasant Satyre of the Three Estaitis* (1540), a long morality play with a political twist, as well as several other pieces, including *The Dreme* (1528), *The Historie and Testament of Squyer Meldrum* (c 1549), and *The Monarchy* (1552) His poems, full of reason, learning, and rich but often coarse verse, probably exerted an influence over the Reformation in Scotland He is known to have been knighted and made Lyon King-Of-Arms in 1529, to have held diplomatic posts in England, Spain, France, and Denmark, and to have served as M P for Cupar-Fife See edition of his works by David Laing (1879) and by Douglas Hamer for the Scottish Texts Society (1931–), William Murison, *Sir David Lyndsay* (1938)

Lindsay, Norman, 1879–, Australian artist He was the chief cartoonist of the Sydney, Australia, *Bulletin* from 1901, and his powerful, rugged, and markedly individualistic cartoons are widely known, as are his paintings in oil and water color, lithographs, etchings, and bookplates He has also illustrated with line and wash drawings editions of Theocritus, Casanova, Petronius, and Boccaccio and Hugh McCrae's *Satyrs and Sunlight*. His publications include *The Pen Drawings of Norman Lindsay* (1918), *Creative Effort* (1920), *Magic Pudding* (1930), *Curate in Bohemia* (1937), and *Age of Consent* (1938)

Lindsay, Vachel (Nicholas Vachel Lindsay) (văˊchĭl), 1879–1931, American poet, b Springfield, Ill , studied at Hiram College, the Art Institute of Chicago, and the New York School of Art He toured the South in troubadour style, living by the penny sales of his poems and drawings and his *Rhymes to be Traded for Bread* (1912), a leaflet which he distributed. His best volumes were products of this period and are characterized by a jazz-like rhythm and lyrical fervor—*General William Booth Enters into Heaven* (1913), *The Congo* (1914), and *The Chinese Nightingale* (1917) His later poetry included *Johnny Appleseed* (1928) and *Every Soul Is a Circus* (1929) *Selected Poems of Vachel Lindsay* appeared in 1938 He staved off want with spectacular readings and lecture tours which popularized his early work but drained his creative powers and eventually broke him completely and led to his suicide See his autobiographical *Adventures While Preaching the Gospel of Beauty* (1914) and *A Handy Guide for Beggars* (1916) and his letters (ed by A J Armstrong, 1940), biography by Edgar Lee Masters (1935)

Lindsay, town (pop 8,403), S Ont , NE of Toronto It is an industrial town, with woolen, flour, and lumber mills, in a scenic lake district It has steamboat connections with many small villages and with fishing and hunting areas

Lindsay. **1** City (pop 4,397), S central Calif , SE of Fresno, inc. 1910 It manufactures canning and spraying equipment, processes olive oil, and packs the fruits, vegetables, and olives of the surrounding San Joaquin Valley area **2** Town (pop 1,792), S central Okla , near the Washita river S of Oklahoma City

Lindsborg (lĭnzˈbôrg), city (pop 1,913), central Kansas, on the Smoky Hill River and S of Salina, laid out 1868 by Swedish settlers, inc 1879 It is a rail and trade center for an agricultural region The town has a famous chorus, which has been presenting Handel's *Messiah* at Easter since 1880 with the cooperation of Bethany College (Lutheran, coeducational, 1881).

Lindsey, Benjamin Barr (Ben Lindsey), 1869–1943, American judge and reformer, b Jackson, Tenn At Denver, Colo , he helped establish one of the pioneer juvenile courts in the United States and served as its judge from 1900 to 1927. During this time he aided in the reform of the state's methods in dealing with juvenile offenders and also secured legislation holding negligent parents and employers accountable The appearance of his book *The Companionate Marriage* (with Wainwright Evans, 1927), advocating trial marriages with unhindered separation for childless couples, raised a storm of protest from the clergy and the public Among his other books are *The Revolt of Youth* (with Wainwright Evans, 1925) and his autobiographical *The Dangerous Life* (with Rube Borough, 1931).

Lindsey, Parts of, administrative division· see LINCOLNSHIRE, England

Linea, La (lä lāˈnää), fortified city (pop. 35,101), Cádiz prov , S Spain, on the Strait of Gibraltar. Situated on the Spanish border, north of the neutral zone which separates it from the British colony, it is chiefly of strategic importance

Line Islands or Equatorial Islands, coral group, central and S Pacific, including JARVIS ISLAND, PALMYRA, CHRISTMAS ISLAND, FANNING ISLAND, WASHINGTON ISLAND, and Flint, Vostok, Caroline, Starbuck, and Malden islands. Great Britain owns Christmas, Fanning, and Washington islands; Palmyra and Jarvis Island belong to the United States Both countries have claims on the rest of the islands. Once worked for guano, the islands are now important as potential air bases.

linen, fabric or yarn made from the fiber of flax, probably the first vegetable fiber known to man Linens more than 3,500 years old have been recovered from Egyptian tombs The Hebrews carried the culture to Palestine Phoenician traders marketed linen in Mediterranean ports It was worn by Egyptian, Greek, and Jewish priests as a symbol of purity, and it typified luxury also, as in the phrase "purple and fine linen " Flax was cultivated by the Romans and introduced by them into N Europe The industry was revived by Charlemagne, and linen became the principal European textile of the Middle Ages Flanders has been renowned from the 11th cent for its creamy flax and fine thread French Huguenots excelled in working flax and carried the art abroad, notably to Ireland, where Louis Crommelin established (c 1699) a manufactory at Lisburn, near Belfast Ireland is today the largest producer of fine linen, having a third of the world's flax spindles The first flax-spinning mill was opened in England in 1787, but only in 1812 was linen successfully woven with power looms The industry suffered in relation to cotton because many textile inventions were not applicable to linen, the inelasticity of the fiber causing it to break readily under tension Although linen exceeds cotton in coolness, luster, strength, and length of fiber, the expense of production limits its use After scutching (see FLAX), the fiber is delivered to the mills, where it is hackled to separate and straighten the fibers, overlapped on a spreadboard to form a continuous ribbon, drawn out through rollers, then wound from the roving frame on bobbins in a loosely twisted thread For fine goods the thread is usually spun wet Linen may be bleached in the yarn or the piece It is woven into fabrics ranging from heavy sailcloth to the sheerest lawn. The greatest quantity of fiber is raised in Russia, the best in Belgium The amount of handwork required until recently in processing linen and the high cost of labor in the United States have inhibited the industry here, although early settlers made much homespun See M D Potter, *Fiber to Fabric* (1945), M S Woolman and E A B McGowan, *Textiles* (3d ed , 1943)

liner, ocean-going passenger ship which makes regular journeys over the same route on fixed schedule Express luxury liners, introduced in 1871 by the White Star Line on the Liverpool–New York run, are "floating hotels " They carry, besides the passengers, small quantities of cargo, generally valuable luxury goods Except for some on the Europe–U S route, luxury liners generally run at a loss and are maintained for the prestige of the shipping lines Cabin liners are lower-priced passenger vessels Very few vessels are built for this service, older ships are often used The Canadian Pacific Line, however, after 1914 built a number of vessels of 12,500 and 20,000 tons for this type of service, and they have been widely imitated Cargo liners are freight vessels faster than the ordinary freighters and usually equipped to carry a few passengers. This type has been used especially in transporting fruit from Latin America to the United States and Argentine meat to Europe

Linesville, borough (pop 1,150), Crawford co , NW Pa , near the Ohio border, on Pymatuning Reservoir W of Meadville, inc 1862

Lineville, town (pop 1,300), E central Ala , S of Anniston, in a farm area.

Linfield College: see MCMINNVILLE, Oregon.

Ling, Per Henrik (pârˈ hĕnˈrĭk lĭngˈ), 1776–1839, Swedish author, especially noted as the founder of the Swedish medical-gymnastic system. From 1805 he was fencing master at the Univ of Lund, there he developed his system of gymnastics described in *The Gymnastic Free Exercises of Per Henrik Ling* (1834–40, Eng tr , 1853). In 1813 he organized the Royal Gymnastic Central Institute in Stockholm.

Lingard, John (lĭngˈgärd), 1771–1851, English historian A Roman Catholic, Lingard was educated at the English College at Douai, was ordained priest in 1795, and for many years was professor of philosophy at the Douai college established at Crookhall, later at Ushaw. In 1811 he became pastor at Hornby, where he wrote *A History of England* (8 vols , 1819–30) It is a scholarly and temperate study. It was widely praised and, by Catholic enthusiasts on the one hand and Protestant enthusiasts on the other, vigorously attacked. His other very important work was *The History and Antiquities of the Anglo-Saxon Church* (1845). See Martin Haile and Edward Bonney, *Life and Letters of John Lingard* (1911).

Lingeh (lĭngˈgĕˈ), city (pop 9,607), S Iran, a port on the Persian Gulf, near Hormus It was held before 1711 by Portugal; in 1887 Persia took it from the Arabs The region produces dates.

Lingelbach, Johannes (yōhäˈnŭs lĭngˈülbäkhˈ), 1622–74, Dutch genre and landscape painter, b Frankfurt-am-Main. He first went to Amsterdam in 1637 and settled there 13 years later after some years of study in Rome. He painted Italian landscapes, seaports, military subjects, and genre somewhat in the style of Wouwerman, with cool colors, good draughtsmanship, and careful execution. He often inserted little figures in the landscapes of Wynants, Hobbema, and other masters His *View of the Dam* (town hall, Amsterdam), *Hay Harvest* (National Gall , London), and *Battle Scene* and *Dance of the Peasants* (both Metropolitan Mus) are well known

Lingga Archipelago· see RIOUW ARCHIPELAGO.

Linggajati, Indonesia see CHERIBON

lingua franca (lĭngˈgwu frängˈku), spoken language used for communication among groups of speakers of different and mutually unintelligible languages. A language with mixed French, Italian, Greek, Arabic, and other words seems to have come into use for commerce in the Mediterranean area after the time of the Crusades and was called lingua franca [language of the Franks] Other such polyglot combinations have developed in various areas for commercial purposes, notably pidgin English, Chinook jargon, Swahili, and a variety of Malay Occasionally the term "lingua franca" is applied to a fully established formal language, thus formerly it was said that French was the lingua franca of diplomacy Usually, however, it means only hybrid, partially developed languages used solely for limited purposes

linguistics, scientific study of LANGUAGE Its central aspect is the descriptive study of a given LANGUAGE, see GRAMMAR and PHONETICS Scientific methods had been successfully devised to handle some, but not all, parts of grammar by the mid-20th cent The first field of linguistics to be exploited was the study of the relation of languages to each other, this, called comparative, or historical, linguistics, was a field developed especially in 19th-century Germany, important names in this field of the science include Jakob Grimm, Karl Brugmann, R C Rask, William Dwight Whitney, and Antoine Meillet The descriptive field developed notably in the United States, partly under the impetus provided by American Indian language study Pioneers of the science were Franz Boas, Edward Sapir, and Leonard Bloomfield. Linguistics has contacts with other scientific fields, e g , with physics through phonetics Since every language is a part of the culture of its speakers, linguistics is an anthropological science Some parts of language study are not apparently amenable to attack by scientific methods and are not, therefore, fields of linguistics at all; e g , PHILOLOGY, rhetoric, literary criticism, and theoretical semantics

Liniers, Jacques de, Span *Santiago de Liniers y de Bremond* (säntēäˈgō dĕ lēnēärsˈ ē dĕ brämōndˈ), 1753–1810, French officer in Spanish service, viceroy of Río de la Plata After a military and naval career in Europe, he was transferred to the Río de la Plata (1788) as a Spanish naval officer In 1806 he recaptured Buenos Aires from British forces under William Carr BERESFORD The viceroy had fled, and Liniers was named commander in chief and lieutenant to the viceroy When a second British invasion occurred the following year, Liniers called a junta of war, which deposed the viceroy (Feb 10, 1807) Despite the rout of the creole army outside Buenos Aires, the hastily organized defenses of the city proved effective (July 5, 1807), the British general, John WHITELOCKE, surrendered. In May, 1808, the appointment of Liniers as viceroy became known, he served until Aug , 1809, though there were attempts by his political enemies to oust him After retirement, he became involved in a counterrevolutionary plot and was executed.

liniment (lĭˈnĭmĕnt), liquid or semiliquid preparation used in medicine to relieve pain by rubbing on the skin It is for external use only; most liniments are poisonous if swallowed Among the constituents of various liniments are camphor, chloroform, oil of turpentine, oil of wintergreen, and ethyl alcohol

linn, see CELL, in biology

Linköping, Swed *Linköpˈing* (lĭnˈchûˈpĭng), city (pop 47,419), co seat of Ostergotland co , SE Sweden, on the Gota Canal, It is an industrial city with railroad shops, ironworks, sugar refineries, and textile manufactures An episcopal see since 1120, the town flourished during the Middle Ages Its cathedral was begun in 1230 After 1700, when a fire devastated the city, Linköping declined; its modern industrial development began with the building of the Gota and Kinda canals

Linlithgow, Victor Alexander John Hope, 2d marquess of (lĭnlĭthˈgō), 1887–, British statesman, viceroy of India After an army career and service in the First World War, Linlithgow was civil lord of the admiralty (1922–24) and held numerous other public positions In 1933 he was made chairman of the committee on Indian constitutional reform He helped formulate and enact the Government of India Act of 1935 and was appointed viceroy of India (1936) At the outbreak of the Second World War, Linlithgow declared that the country was at war with Germany Indian nationalists objected to this arbitrary declaration and the Indian National Congress voted a policy of noncooperation. Thousands of Indian nationalists were jailed,

including Gandhi and Jawaharlal Nehru. In 1943 Linlithgow was replaced as viceroy by Field Marshal Wavell

Linlithgow (lĭnlĭth'gō), burgh (pop 3,666), county town of West Lothian (formerly Linlithgow), Scotland, near the south shore of Loch Linlithgow and W of Edinburgh The burgh was a residence of Scottish kings, Linlithgow Palace, on an elevated promontory above the loch, was the birthplace of James V and Mary Queen of Scots The parish church of St Michael was founded by David I Linlithgow was the scene of the murder of James Stuart, 1st earl of Murray

Linlithgowshire, county, Scotland· see WEST LOTHIAN

Linnaeus (lĭnē'ŭs), 1707–78, Swedish botanist, founder of modern systematic botany, originator of the binomial method of designating plants and animals His name was originally Karl von Linné His first use of specific names was made in the work *Genera plantarum* (1737) and was more fully developed in *Species plantarum* (2 vols , 1753) The 1758 edition of his *Systema naturae* (1735) is used by biologists as the basis of Linnaean nomenclature Among the more than 180 books published in his lifetime are several on the flora of Lapland and Sweden and *Philosophia botanica* (1751) See biography by T M Fries (1903, Eng tr , 1923)

Linnhe, Loch (lŏkh lĭ'nē), inlet, Argyllshire, Scotland, extending 20 mi NE from the Firth of Lorne Lismore island is at the mouth

linoleum (lĭnō'lēŭm), resilient floor or wall covering made of jute or burlap surfaced with a composition of powdered cork, oxidized linseed oil, gums or other ingredients, and coloring matter The linseed oil is exposed to the air in a succession of thin films until it is of a rubbery consistency, or it is thickened by heating until it becomes a spongy mass, after which it is ground, mixed with the pulverized cork and other ingredients, and then applied to the foundation and rolled smooth The final process is a thorough seasoning in drying rooms In inlaid linoleum the pattern is built up from the base in the colors of the design and is therefore permanent Linoleum is made in several thicknesses and in the form of tiles It is sometimes surfaced with a durable pyroxylin lacquer Its sanitary value, together with its improved designs and colors, has led to an increased use of linoleum in public buildings and in homes An English rubber manufacturer, Frederick Walton, patented linoleum in 1863 It replaced Kamptulicon, a costly rubber product

linoleum block printing, 20th-century development in the art of relief cuts The linoleum block consists of a thin layer of linoleum mounted on wood, in this the design to be printed is cut in the same manner as for WOOD ENGRAVING The advantage of linoleum cuts lies in the softness of the material and the consequent ease with which it can be cut, but linoleum is not so suitable for fine lines as wood, nor can as many prints be produced The process has been used widely in textile printing See E W Watson, *The Relief Print* (1945)

linotype (lī'nō, line of type), trade name of a machine for making slugs each of which does the work of a line of hand-set type in printing It was invented in Baltimore by Ottmar MERGENTHALER, was first patented in 1885, and was first put into operation at the New York *Tribune* in 1886 It is operated by a keyboard like that of a typewriter The machine assembles brass matrices into a line, casts the slug, and distributes the matrices See INTERTYPE and MONOTYPE.

Lins do Rego, José· see REGO, JOSÉ LINS DO

linseed, seed of the flax plant, from the cotyledons and inner coats of which is expressed the amber-colored fatty oil known as **linseed oil** Two methods are commonly used for the preparation of the oil—it is extracted from the seeds either by hydraulic pressure (raw oil), when it is pale in color and practically without taste or odor, or by the application of pressure and heat, when it is darker and has a bitter taste and an unpleasant odor. It has long been used as a DRYING OIL in paint and VARNISH, its activity resulting from the large absorption of oxygen Lead and other metallic soaps are used to speed up the activity Linseed oil is used also in making linoleum, oilcloth, and certain kinds of ink, and in medicine Flax to be used for preparing oil is extensively grown in the United States, South America, and Europe **Linseed cake** is prepared when flaxseed, from which most of the oil has been extracted, is pressed into cakes to be used as a concentrated feed for livestock The amount of oil varies and the husks of the seeds may or may not be removed Linseed cake has a high protein value and a tonic effect and assumes a greater importance in livestock diet as less legume hay is used

Lin Sen (lĭn' sŭn'), 1864–1943, president of China (1932–43) He was a supporter of Sun Yat-sen and of Chiang Kai-shek Politically Lin was unimportant, and his appointment to the essentially honorary office of president was a personal tribute Lin's successor was Chiang Kai-shek

lintel, in architecture, the horizontal member which spans an opening, such as a door or window, or which connects two columns. The post-and-lintel or trabeated system of construction, with spans limited to the length of available wood or stone beams, is the basis of the Egyptian and Greek styles of architecture, as contrasted with the later arched and vaulted, or arcuated, styles.

Linton, William James, 1812–97, Anglo-American wood engraver, author, and political reformer. In 1842 he set up as a wood engraver with John Orrin Smith and produced illustrations for the newly formed London *Illustrated News* An ardent radical, he edited the *Cause of the People*, contributed verses to the Dublin *Nation*, helped found the *Leader*, expounded the principles of Mazzini in the *Red Republican*, and started (1852) the *English Republic* Later, he returned to wood engraving and in 1867 moved to the United States and set up a printing press in New Haven, Conn , he continued the tradition of Thomas Bewick, advocating the use of the white as well as the black line The best wood engraver of his day in England, he contributed more than any other to the regeneration of the art in America His publications include *The Life of Thomas Paine* (1840), *Some Practical Hints on Wood-Engraving* (1879), *The History of Wood-Engraving in America* (1882), *The Masters of Wood-Engraving* (1889), and *Memories* (1895).

Linton. 1 City (pop 6,263), SW Ind , SSE of Terre Haute, laid out 1830, inc as a town 1886, as a city 1900 Coal is mined here 2 City (pop 1,602), co seat of Emmons co , S N Dak , on Beaver Creek and SSE of Bismarck, inc 1916 It is a farm center

Linus, Saint (lī'nŭs), pope (A.D 67?–A D 76?), martyr, an Italian, successor of St Peter and predecessor of St Cletus He is often identified with the biblical Linus Feast Sept 23

Linus, in Greek mythology 1 Bard who taught music to Hercules and Orpheus According to one legend he was killed by Apollo when he attempted to compete with the god Another legend says that Hercules killed him when he tried to punish the hero 2 Son of Apollo and Psamathe His mother exposed the child, and he was killed by dogs Psamathe's father, discovering what his daughter had done, had her killed Apollo, the lover of Psamathe, visited her village with a plague from which no release could be had until mother and son were propitiated with prayers and songs of lamentation The "Linus song," a lament derived from this legend, was sung at harvest time as a dirge for the dying vegetation, which was "killed" by the heat of the dog days

Linus, Roman Christian 2 Tim 4 21 He is often identified with St Linus

Linwood, city (pop 1,479), SE N J , SW of Atlantic City, inc as a borough 1889, as a city 1931

Linyü or **Lin-yü** (lĭn'yü'), city and county (pop 218,803), Hopeh prov , China The city, strategically situated on the narrow coastal route to Manchuria, has been the site of many battles It was formerly called Shanhaikwan

Lin Yutang (lĭn' yü'täng'), 1895–, Chinese-American writer, educated in mission schools in China and at Harvard, Ph D Leipzig, 1923 Dr Lin returned to China to teach philology and English at the Univ of Peking He edited several linguistic and literary magazines Living in America since c 1928, he has written chiefly in English His books, ironical, gentle, and highly civilized, include *My Country and My People* (1935), *The Importance of Living* (1937); *Moment in Peking* (1939), a novel, *With Love and Irony* (1940), *A Leaf in a Storm* (1941), a story of war-torn China, *Between Tears and Laughter* (1943), a criticism of Western diplomacy in China, and *Chinatown Family* (1948), a novel

Linz (lĭnts), city (pop 181,532), capital of Upper Austria, on the Danube and W of Vienna It is a rail, commercial, and manufacturing center and a river port, with large iron works and steelworks, machine manufactures, textile industry, and nitrogen plants It is an episcopal see with an old and a new cathedral and a museum Near by is an 8th-century Benedictine abbey Linz is on the site of the Roman Lentia

lion, mammal (*Felis leo* or genus *Panthera*) of the cat family, found in open country in Africa, SW Asia, and W India It is extinct in Europe and much of its former range in Asia and Asia Minor The lion's short-haired coat varies from yellow to brown, and in both sexes the tail ends in a dark tuft Most males have a black or tawny mane, either short or long Males sometimes measure 9 to 10 ft from nose to tip of tail and weigh up to 500 lb The lion hunts antelope, zebra, and other large animals as well as smaller ones It also eats carrion Lions sometimes travel in groups Usually only old or weak lions attack man In folklore the lion is the king of the beasts In Christian symbolism the lion anciently represented Jesus. It also represents St Mark, hence the LION OF ST MARK For the constellation and sign of the zodiac, see LEO.

Lion, Gulf of, Fr *Golfe du Lion* (gôlf" dü lyŏ'), bay of the Mediterranean, S France, extending from the Spanish border to Toulon.

Lions International, organization of business and professional men, founded in 1914 by Melvin Jones. The International Association of Lions Clubs (popularly known as Lions International) was founded in 1917 at Chicago. The purpose of the club is to recognise and meet community needs either through its own efforts or in cooperation with other agencies It has clubs in about 30 countries. Its activities are grouped under 10 headings, agriculture, boys and girls, citizenship and patriotism, civic improvements, community betterments, education, health and welfare, safety, sight conservation and blind, and United Nations The official organ is the *Lion*.

Liotard, Jean Étienne (shäⁿ' ātyĕn' lyôtär'), 1702–89, Swiss painter. He is best known for his portraits and drawings in pastel, but he also made portraits in oil, engravings, enamels, and paintings on glass and porcelain He painted the portraits of Pope Clement XII, some of the cardinals, Marie Antoinette, Francis I, and Maria Theresa. *Portrait of a Seated Turk* is in the Victoria and Albert Museum His work is best seen in Amsterdam and Geneva

Lipari Islands (lĭ'pŭrē) or **Aeolian Islands** (ēō'lēŭn), volcanic group (44 sq mi , pop. 17,697), N of Sicily, in the Tyrrhenian Sea. They belong to Italy The mythical residence of Aeolus, the wind god, after whom they were named, the islands were colonized by the Greeks (6th cent B C) All rich in natural beauties and geologically interesting, they include Lipari (14 5 sq mi , pop 10,342), with the capital by the same name, exporting pumice, Salina, producing malmsey wine and currants, Vulcano, the mythical site of the fire god's workshop, with a high volcano emitting hot sulphur vapors, Stromboli, with an active volcano, 3,040 ft high, having several craters, and the less important Panarea, Filicudi, and Alicudi The islands have long been a place of exile for political prisoners

lipase. see ENZYME

Lipchitz, Jacques (shäk' lĕpshĕts'), 1891–, French sculptor, b Lithuania He came to the United States in 1940 After going (1909) to Paris, where he studied, he became a member of the *Esprit Nouveau* group and was associated with the cubists His skeletal constructions, which he began as early as 1913, are unique among modern sculpture In 1925 he began creating transparents, using the melted-wax technique, and it is for this type of sculpture that he is best known He has also done portrait busts His work is in the Museum of Modern Art, New York, and the Barnes Foundation, Philadelphia, and in private collections

Lipetsk (lyĕ'pyĭtsk), city (pop 66,625), central European RSFSR, N of Voronezh It is the center of an iron-ore district Founded (1707) by Peter I as an iron-milling center, it now has foundries, blast furnaces, and machinery plants

Li Po (lē' pō', bō') or **Li Tai Po** (tī'), c 700–762, Chinese poet of the T'ang dynasty He was born in what is now Szechwan prov Most authorities believe that he was a Taoist, and his unconcern for worldly preferment and his love for retirement and wandering are expressive of both Taoism and the delicate romanticism typical of Chinese poets An early period of patronage by the court was followed by banishment The poet remained, as ever, a lighthearted winebibber The traditional account of his death is that while drunk he attempted to kiss his reflection in a moonlit river, fell into the water, and drowned Li Po was an extremely fecund and facile poet He made no attempt to preserve his work, and most has been lost; the nearly 2,000 poems collected in the official recension in 1080 are believed to comprise only about one tenth of his output His themes, largely traditional, are the grief of lovers separated by official duty or military service, the beauty of mountain and river scenery, and the surcease from melancholy and the apparent wisdom to be found in wine An exquisite choice of language and a groping sense of mystery in the universe raise him, in the opinion of many, to the highest poetical eminence His name is sometimes spelled Li Tai Peh For anthologies containing selections from his work, see the bibliography of CHINESE LITERATURE

Lippe (lĭ'pŭ), former state (469 sq. mi ; 1939 pop 187,220), NW Germany, between the Teutoburg Forest and the Weser river It was incorporated in 1946 with the newly formed state of North Rhine—Westphalia, in the English zone of occupation Detmold is the chief city and former capital The region is mainly agricultural. Originally comprised in the duchy of Saxony, Lippe became (12th cent.) a lordship under Bernhard I In the 16th cent. it was raised to a county. From the various divisions of the county after the death (1613) of Simon VI, two counties (after 1720, principalities) emerged—Lippe or Lippe-Detmold and SCHAUMBURG-LIPPE. Lippe joined (1815) the German Confederation, sided with Prussia in the Austro-Prussian War (1866), and joined the German Empire in 1871. In 1897 the contested succession to Lippe was awarded by a special imperial court to Count Ernest of Lippe-Biesterfeld, of a collateral branch. His son, Prince Leopold, abdicated in 1918, and Lippe joined the Weimar Republic. A local electoral victory (Jan., 1933) of the National Socialists in Lippe helped Hitler into power. A nephew of Prince Leopold, Bernhard zu Lippe-Biesterfeld (b. 1911), married Princess—later queen—Juliana of the Netherlands.

Lippe, river, c.150 mi. long, NW Germany It rises in the Teutoburg Forest and flows W into the Rhine.

Lippi (lĭp'pē), name of two celebrated Italian painters of the 15th cent **Fra Filippo Lippi** (frä' fēlĭp'pō), c.1406–1469, called Lippo Lippi, one of the foremost Florentine painters of the early Renaissance, was brought up in the convent of the Carmelites in Florence His earliest works show the influence of Fra Angelico and of Masaccio He left the convent c 1431 to pursue his art in a wider field, but without renouncing his order, for he later served as rector of San Quirico near Florence He is known to have enjoyed the patronage of the Medici throughout his career In the 1450s he was at Prato, decorating the choir of the cathedral These great frescoes, representing scenes from the lives of John the Baptist and St Stephen, are Lippi's most important work In 1467 he painted a series of frescoes from the life of the Virgin in the cathedral at Spoleto, where he is buried These were completed after his death by Fra Diamante Lippi is perhaps best known through his many easel pictures, among which are the famous *Coronation of the Virgin*, painted (1441) for the altar of the nuns of Sant' Ambrogio, and *Virgin Adoring the Christ Child* (Uffizi), *Madonna with Saints* (Louvre), *Annunciation* and *Vision of St Bernard* (National Gall , London), *Coronation with Saints and Donors* (Palazzo Venezia, Rome), *Four Saints* (damaged) and *Madonna and Child with Angels* (Metropolitan Mus) One of the best colorists and draughtsmen of his day, Fra Filippo excelled in a graceful, narrative style If his religious painting falls short of the sublime, it is always decorative and full of keen observation and human interest Among his pupils were Botticelli, Benozzo Gozzoli, and Il Pesellino **Filippino Lippi** (fēlēp-pē'nō), c 1457–1504, son of Fra Filippo and Lucrezia Buti, was placed after his father's death with Fra Diamante and later studied under Botticelli He soon became an accomplished painter, revealing the same mastery of color and line as his father and in 1480 was entrusted with the completion of Masaccio's frescoes in the Brancacci Chapel, Florence He completed Masaccio's *Raising of the Dead Youth* and painted *Peter and Paul before Nero*, *Paul's Interview with Peter in Prison*, *Liberation of St Peter*, and *Crucifixion of St Peter*, adapting his style to that of Masaccio His early works, which show the influence of his father and Botticelli, also include a charming altarpiece in tempera, *Vision of St Bernard* (Florence), the great altarpiece in the Nerli Chapel in Santo Spirito, Florence, and *Madonna Enthroned* (Uffizi), containing remarkable portraits of the donor and his wife Filippino painted a series of frescoes in the Church of Santa Maria sopra Minerva, Rome, and he executed the baroque but impressive frescoes in the Strozzi Chapel in Santa Maria Novella, Florence, representing episodes from the lives of St Philip and St John To the later period belong also *Adoration of the Magi* (Uffizi) and *Virgin and Child with St Joseph and a Child Angel* (Metropolitan Mus) See E C Strutt, *Fra Filippo Lippi* (1906), Henriette Mendelsohn, *Fra Filippo Lippi* (1909), K B Neilson, *Filippino Lippi* (1938)

Lippincott, Sara Jane Clarke see GREENWOOD, GRACE

Lippmann, Gabriel (gäbrēĕl' lēpmän'), 1845–1921, French physicist, b Luxembourg He was professor of experimental physics (from 1883) and later director of the research laboratory at the Sorbonne He is noted for his researches in electrocapillarity, thermodynamics, and optics For his discovery of a method for the photographic reproduction of colors through the use of an interference process he received the 1908 Nobel Prize in Physics

Lippmann, Walter (lĭp'mun), 1889–, American essayist and editor, b New York city, grad. Harvard, 1909 He was associate editor of the *New Republic* in its early days, but at the outbreak of the First World War, he left to become Assistant Secretary of War, later helping to prepare data for the peace conference From 1921 to 1931 he was on the editorial staff of the New York *World* and served as editor the last two years After 1931 he had a syndicated column in the New York *Herald Tribune* Lippmann's earlier books, written when he was a champion of liberalism, include *A Preface to Politics* (1913), *Public Opinion* (1922), and *A Preface to Morals* (1929) An early supporter of Roosevelt and the New Deal, Lippmann turned slowly to conservatism, condemning planned society and collectivism in *The Good Society* (1937) His *U S War Aims* (1944) and *The Cold War* (1947) show his powers of news analysis See biography by D E Weingast (1949)

lip reading, method by which the deaf are able to read the speech of others from the movements of the lips and mouth. Lip reading is the medium of education in many schools for deaf children, it came into wide use after the First World War in the rehabilitation of shell-shocked, or otherwise deafened, soldiers See publications of the American Hearing Society; Fred De Land, *The Story of Lip Reading* (1931); Cora Elsie and Rose Kinzie, *Lip-Reading for the Deafened Adult* (1931); I. R. Ewing, *Lip-Reading and Hearing Aids* (1944 ed.).

Lipscomb (lĭps'kŭm), town (pop 1,740), N central Ala , near Birmingham, settled c.1890, inc 1910

Lipsius, Justus (jŭ'stŭs lĭp'sēus), 1547–1606, Flemish scholar, whose original name was Joost Lips He was one of the most celebrated authorities of his day on Roman literature, history, and antiquities He edited many works of Latin literature, his edition of Tacitus being particularly famous

Lipton, Sir Thomas Johnstone, 1850–1931, British merchant and yachting enthusiast After 10 years in the United States as a young man he returned to his native Glasgow (1876) and opened a small grocery store As he prospered he extended a chain of stores throughout the United Kingdom, acquired tea, coffee, cocoa, and rubber plantations in Ceylon, and set up bakeries, fruit farms, jam factories and bacon-curing establishments in England He made benefactions to the London poor and was knighted (1898) and created a baronet (1902) He spent an enormous amount of money in five attempts to win the *America's* Cup yachting trophy Each of his yachts he named *Shamrock* His good sportsmanship endeared him to the American public which gave him a gold cup after his last defeat, in 1930 See his autobiography (1932), Alec Waugh, *The Lipton Story* (1950)

liquefaction, in physics, the changing of a substance from the solid or the gaseous state to the liquid Since a change in the state of MATTER is held to be a change in the kinetic energy of the molecules of a substance and since heat is defined as the kinetic energy of the molecules, a change from solid to liquid and from liquid to gas involves the application of heat, while a change from gas to liquid and from liquid to solid requires the taking away of heat In the liquefaction of gases, extreme cooling is not necessary, for if a GAS is held in a confined space and is subjected to high pressure, heat is given off as it undergoes COMPRESSION and it turns finally to a liquid Some cooling is, however, necessary, it was discovered by Thomas Andrews in 1869 that each gas has a definite temperature, called its critical TEMPERATURE, above which it cannot be liquefied, no matter what pressure is exerted upon it A gas must, therefore, be cooled below its critical temperature before it can be liquefied According to the kinetic molecular theory, when a gas is compressed its molecules are forced closer together and, their vibratory motion being reduced, heat is given off As the compression goes on, the speed of the molecules and the distances between them continue to decrease, until eventually the substance undergoes change of state and becomes liquid Although before the 19th cent a number of scientists had experimented in liquefying gases, Davy and Faraday are usually credited with being the first to achieve success The production of liquefied gases in large quantities (and consequently their use in refrigeration) was made possible by the work of Z F Wroblewski and K S Olszewski, two Polish scientists The work of Sir James Dewar is also of importance, especially in the liquefaction of air and its change to a solid Heike Kamerlingh Onnes first liquefied helium, of which the critical temperature is −267 9°C , within but a few points of absolute zero (−273°C) The processes for the liquefaction of gases as developed by Linde and others form the basis for those used in modern REFRIGERATION

liqueur (lĭkûr', lĭkyŏŏr'), strong alcoholic beverage made of nearly neutral spirits, flavored with herb mixtures, fruits, or other materials, and usually sweetened The processes and ingredients are strictly guarded trade secrets The alcoholic content ranges from about 27 percent to the 80 percent of absinthe Fine liqueurs are distilled after flavoring matters have been macerated in spirits In inferior liqueurs natural or artificial essential oils are added to strong spirits, filtered, and sweetened Cordials, often homemade, are prepared by steeping in sweetened alcohol fruit pulps or juices, as cherry, apricot, peach, and berry Many famous liqueurs were originated by monks, notably BENEDICTINE and CHARTREUSE Other liqueurs are ABSINTHE, ANISETTE, CRÈME DE MENTHE, CURAÇAO, KIRSCHWASSER, KÜMMEL, and MARASCHINO

liquid, one of the three states in which matter occurs, i e , that state, as distinguished from solid and gas, in which a substance has a definite volume but no definite shape Liquids differ from solids, but resemble gases, in that they flow into the shape of a containing vessel For this reason they are classed with gases as fluids According to the kinetic molecular theory of MATTER, the molecules of a substance in the liquid state are relatively closer together (the force of cohesion between the molecules is greater) and are moving more slowly than in the gaseous state, but they are farther apart and are moving more rapidly than in a solid (see MOLECULE) A liquid changes at its boiling point to a gas and at its freezing point or melting point to a solid The boiling point is especially important because, since every liquid changes its state at a different temperature, liquids in a mixture can be separated from one another by raising the temperature of the mixture gradually so that each component in turn undergoes vaporization at its boiling point. This process is known as fractional distillation. Although the molecules of a liquid have greater cohesion than those of a gas, it is not sufficient at ordinary temperatures to prevent those at the free surface of the liquid from bounding off (see EVAPORATION) On the other hand, the cohesive forces between the molecules at the surface of a mass of liquid and those within cause the free surface to act somewhat like a stretched elastic membrane, it tends to draw inward toward the center of the liquid mass, to draw the liquid into the shape of a sphere, thus exhibiting the phenomenon known as SURFACE TENSION A liquid is said to "wet" a solid substance when the attractive force between the molecules of the liquid and those of the solid is great enough to hold the liquid's molecules at the solid surface For example, water "wets" glass since its molecules cling to glass surfaces, whereas mercury does not since the adhesive force between its molecules and those of glass is not strong enough to hold them together CAPILLARITY is an example of surface tension and adhesion acting at the same time Liquids exhibit, though in less degree, many of the properties of gases DIFFUSION occurs when two liquids which can be mixed are placed in the same container, one above the other (in layers), the mixing of the two takes place whether the more dense liquid is placed above or below the less dense In general, liquids show expansion upon heating, contraction upon cooling, water, however, does not follow the rule exactly Liquids exert pressure upon the sides of a containing vessel and upon any body immersed in them, and pressure is transmitted through a liquid undiminished and in all directions Liquids exert a buoyant force upon an immersed body, equal to the weight of the liquid displaced by the body (see ARCHIMEDES' PRINCIPLE and SPECIFIC GRAVITY) Unlike gases, liquids are very nearly incompressible, and for that reason are useful in such devices as the hydraulic press Liquids are useful as solvents No one liquid can dissolve all substances, and each takes into solution only certain specific substances For example, although crystalline forms of sulphur are soluble in carbon disulphide, they are not soluble in water With few exceptions, all the chemical elements have been obtained in the liquid state Mercury is the only metal that is liquid at ordinary temperatures

liquid air, ordinary air which has been liquefied by compression and cooling to extremely low temperatures Its commercial preparation involves purification by washing to remove soluble impurities and by passing over calcium oxide (lime) to remove the carbon dioxide, compression, under a pressure of 200 atmospheres or about 3,000 lb per square inch, cooling, by passing it through pipes immersed in cold water, treatment with sodium hydroxide to remove excess water, rapid expansion, the gas expanding and being passed back over the pipe from which it has just escaped, when it absorbs so much heat from the air still remaining in the pipe that this air becomes liquid Since air is essentially a mixture of oxygen and nitrogen and, therefore, without fixed composition, its properties in the liquid state depend upon the relative quantities of oxygen and nitrogen present It is extremely cold and must be kept in a specially prepared container, the DEWAR FLASK, because at ordinary temperatures it absorbs heat rapidly and reverts to the gaseous state Liquid air is used commercially for freezing other substances and especially as a source of nitrogen, oxygen, and argon (and also the other inert gases) When allowed to evaporate, as the temperature rises the nitrogen comes off first at −195 8°C , the argon next at −185 7°C , and the oxygen last at −183°C

liquor see BEVERAGE

liquor laws, legislation designed to restrict, regulate, or control the manufacture and sale of alcoholic beverages The passage of liquor laws has been prompted chiefly by the desire to prevent immoderate use of intoxicants, but sometimes also in the interest of raising revenue Direct taxation and license requirements are among the oldest methods of regulation of the sale of liquor With the license system the state can exercise extensive regulatory power by revoking permits upon violation of rules and through restriction of licenses, although the system is vulnerable to political corruption Licensing has been practiced most extensively and successfully in Great Britain (especially since 1904), where regulation of the public house has resulted in the decrease of liquor consumption Licenses are also used in the United States, and there are general regulatory provisions as to hours of closing and the like National PROHIBITION of the manufacture and sale of liquor received its major test in the United States from 1919 to 1933. Local option to prohibit the use of liquor is retained by a number of states, counties, and municipalities Several states have monopolies of retail distribution, and a similar system prevails in most of Canada Sweden in 1855 passed a licensing law of which Goteborg took advantage to introduce (1865) a plan, known as the Goteborg licensing system, by which private profit was eliminated from the sale of spirits. A monopoly of such sales was placed in the hands of a private company which took over

existing retail licenses, subleased a number of hotels, clubs, and restaurants, and reduced the number of licenses in use Similar companies were organized in other cities, and eventually the government set up a semi-state monopoly, collecting all profits above a fixed dividend in the investment. The individual companies did not control the sale of imported heavy wines and spirits, and a need for greater control of home consumption and of wholesalers was apparent, these defects were remedied by the Bratt system, proposed by Dr. Ivan Bratt of Stockholm and legalized in 1919 A feature of the system is the personal passbook in which are entered age and quota restrictions on purchases This passbook may be revoked for excessive drinking Norway and Finland have variations of this plan A state monopoly of vodka manufacture was instituted (1894) in Russia for reasons of public finance and, after a period of prohibition during the First World War, was restored by the Soviet Union In France and other Latin countries where wine making is an important industry and where there is less heavy consumption of distilled liquors, few government restrictions have been imposed Notable is the prohibition in France of the manufacture and sale of absinthe Conditions before the Second World War were similar in Germany and other countries where malt liquors had wider use than spirits See G E G Catlin, *Liquor Control* (1931), J E Johnsen, ed, *The Problem of Liquor Control* (1934), M E Stone, *American Liquor Control* (1943)

Liri (lē'rē), river rising in S central Italy in the Apennines and flowing SE and S into the Tyrrhenian Sea E of Gaeta Below its junction with the Rapido river it is called GARIGLIANO; the combined length of the Liri and Garigliano is 98 mi There are hydroelectric stations along its course In the Second World War the Allies were long blocked (1943–44) from access into the Liri valley, through which they had to pass to reach Rome, and it was only after months of heavy fighting, particularly at CASSINO, that the Germans gave way.

Lisa, Manuel (lē'sù), 1772–1820, American fur trader, b New Orleans He went to St Louis c 1790, and by 1800, with a monopoly of the Osage trade, he had become well established In 1807, a few months after the return and favorable reports of Lewis and Clark, Lisa led the first commercial expedition to the upper Missouri region, building, at the junction of the Bighorn with the Yellowstone, Fort Manuel, the first trading post in the present state of Montana Upon his return to St Louis, Lisa with Pierre Choteau and others formed the Missouri Fur Company Lisa was the recognized leader of the company's expeditions Fort Lisa was built among the Mandan and Gros Ventres in the present state of North Dakota Lisa's influence with the Indians of the upper Missouri became very strong, and, as subagent for the region during the War of 1812, he was successful in counteracting British influence and in keeping the tribes friendly He distributed pumpkin, bean, turnip, and other vegetable seeds among the Indians He made, in all, 12 or 13 trips up the river

Lisbon (lĭz'bŭn), Port *Lisboa* (lēzhbō'u), city (pop 709,179), W Portugal, capital of Portugal, of Estremadura prov, and of Lisboa dist, on the Tagus river where it broadens to enter the Atlantic It has one of the best harbors of Europe and handles a large carrying trade In the Second World War it also became one of the most important centers of transoceanic air transport It has varied minor manufactures, including textile and paper mills The city is set on seven hills and is dominated by a fort, the Castel de São Jorge, which may occupy the site of the old Roman fortification of the town then called Olisipo It may also be on the spot where the early inhabitants had a citadel when they traded with Phoenician and Carthaginian navigators. The town's true importance dates, however, from the reconquest from the Moors in 1147 by King Alfonso I with the help of Crusaders It became the capital of the kingdom and was much beautified by several of the kings Though many of the old buildings were destroyed by earthquake, particularly by the famous earthquake of 1755, some of the medieval buildings remain The old section of the city about the cathedral, Alfama, has picturesque relics The new city built by the marquês de Pombal after the great earthquake centers about a large square, the Terreiro do Paço Some of the well-known buildings in and near Lisbon are the Renaissance Monastery of São Vicente de Fora, with the tombs of the Braganza kings, the Church of St Roque, with the fine Chapel of St John (built by John V in the 18th cent), and the magnificent monastery built at Belém, on the north shore of the river toward the sea, built by Manuel I to commemorate the discovery of the route to India by Vasco da Gama. Camões was born in Lisbon. The Univ. of Lisbon was founded in 1910

Lisbon. **1** Town (pop 1,131), SE Conn, NE of Norwich; inc. 1786 **2** Town (pop 4,123), SW Maine, on the Androscoggin and SE of Lewiston; inc. 1799 Lisbon Falls village manufactures textiles and gypsum products. **3** Town (pop 2,103), NW N H, on the Ammonoosuc and SW of Littleton, settled 1753, inc. 1768. Its industries derive from local mineral, stone, and lumber supplies. Solon I Bailey was born here. **4** City (pop. 1,997), co seat of Ransom co, SE N Dak., on the Sheyenne river and SW of Fargo, in a stock-raising region, settled 1878, platted 1880, inc 1883 It has a state soldiers' home **5** Industrial village (pop 3,379), co seat of Columbiana co, NE Ohio, SSW of Youngstown, founded 1802 as New Lisbon Limestone quarries are here Ceramics, electrical porcelain, and leather goods are manufactured. Marcus A Hanna and Clement L Vallandigham were born here

Lisburn (lĭz'bûrn, lĭs'–), urban district (pop 13,042), Co Antrim, Northern Ireland, on the Lagan and SW of Belfast Charles I granted (1627) the town to Viscount Conway, who built the castle, which burned in 1707 Its chief industry, linen manufacture, was introduced by the Huguenots in 1694 There is a monument to Jeremy Taylor, who died here This is the seat of the Roman Catholic bishop of Down and Connor and of the Protestant bishop serving the dioceses of Down, Connor, and Dromore In the vicinity are Castle Robin (16th cent) and a round tower Over 300 buildings were burned here during the religious riots of 1930

Lisieux (lēzyû'), town (pop 11,569), Calvados dept, N France It is one of the oldest towns in Normandy Its modern importance dates from the canonization (1925) of St THERESA (Theresa of the Child Jesus), whose shrine here is a major place of pilgrimage The town, including its two old churches (12th cent and 15th cent), was seriously damaged in the Second World War

Liskeard (lĭskärd'), municipal borough (pop 4,268), Cornwall, England, WNW of Plymouth Now a market town, it was formerly a mining center It has an ancient castle The well of St. Keyne, celebrated in a poem by Southey, is south of the town

Lismore (lĭs'môr), town (pop 15,211), New South Wales, Australia, a port on the Richmond river It exports dairy foods, sugar cane, and bananas There is a Roman Catholic cathedral

Lismore (lĭsmôr', lĭz–), market town (pop 1,174), Co. Waterford, Ireland, on the Blackwater and WNW of Dungarvan In the 7th cent it was the site of an abbey founded by St Carthach, and in the 12th cent King John built a castle here One of the greatest of the Irish 7th-century schools was at Lismore The medieval Irish manuscript the Book of Lismore is in Lismore Castle, a seat of the duke of Devonshire

Lismore (lĭs'môr, lĭzmôr'), island, c 10 mi long and 1½ mi wide, Argyllshire, Scotland, in Loch Linnhe There are several old castles, one of which was the residence of the bishops of Argyll Part of the 13th-century cathedral has been restored for use as the parish church The 16th-century Gaelic **Book of the Dean of Lismore,** compiled by Dean James Macgregor and his brother Duncan, is one of the most precious and, next to the Book of Deer, the oldest of Gaelic collections Its several thousand lines of miscellaneous poetry are written in a phonetic orthography, instead of the traditional Gaelic spelling

Lissa, town in Poland see LESZNO

Lissa, Yugoslavia see VIS

Lissoy, Co Westmeath, Ireland see AUBURN

List, Friedrich (frē'drĭkh lĭst'), 1789–1846, German economist The first professor of economics at the Univ of Tübingen, he was elected (1820) to the Wurttemberg legislature For his advocacy of administrative reforms, he was sentenced to imprisonment, but was released on condition that he emigrate to the United States Here he engaged successfully in various enterprises and in 1832 returned to Germany as U S consul at Leipzig. Insisting upon the necessity for a commercial association of German states and the full development of productive powers in those states, he became a ceaseless advocate of a customs union (ZOLLVEREIN), a merchant marine, railroads, and a policy of protection for young industries and nations His ideas were influential, and many of them were subsequently adopted by the government List's most important work is *The National System of Political Economy* (1840, Eng tr, 1904) See Margaret Hirst, *Life of Friedrich List and Selections from His Writings* (1909)

Lister, Joseph Lister, 1st **Baron** (lĭ'stûr), 1827–1912, English surgeon, educated at University College, London He brought to surgery the principle of antisepsis, an outgrowth of Pasteur's theory that bacteria cause infection In 1865 Lister proved the effectiveness of his methods, thus founding modern antiseptic surgery Using carbolic acid as the antiseptic agent, he devised techniques of applying it which, when used in conjunction with his heat sterilization of instruments, brought about dramatic decreases in postoperative fatality. He developed absorbable ligatures and the drainage tube, both of which have come into general use for wounds and incisions Lister is credited with first using sinus forceps and certain other instruments, as well as with numerous new operations. He was professor of clinical surgery at Edinburgh Univ. (1869–1876) and at King's College, London (1877–93). See studies by Cuthbert Dukes (1924), C. J. S. Thompson (1934), M. L. Andrews (1935), and Rhoda Truax (1944)

Listowel (lĭstō'ŭl), town (pop. 3,013), S Ont, on the Maitland river and W of Toronto It is in a dairy farming district with textile mills

Liszt, Franz (fränts' lĭst'), 1811–86, Hungarian pianist and composer. He made his debut at nine, going thereafter to Vienna to study with Czerny and Salieri. In Paris (1823–25) after his debut there, he knew all the principal artistic figures of the time and was influenced by Berlioz, Chopin, and Paganini He lived with Mme d'Agoult, 1833–44, and their daughter Cosima was the wife of Hans von Bülow and later of Wagner. He became known as the greatest pianist of his age and played all over Europe until 1848, when he became musical director to the duke of Weimar He resigned (1859) and two years later went to Rome, where he became an abbé (1865) During the years 1880–85, in Rome, Weimar, and Budapest, he taught most of the famous pianists of the succeeding generation Following a jubilee concert tour (1886), he died of pneumonia in Bayreuth His compositions are highly romantic and programmatic He is considered the inventor of the symphonic poem, of which he composed many, including *Les Préludes* (1856) For the piano he composed prolifically in addition to transcribing an enormous number of other composers' works *Années de pélérinage, Douze Études d'execution transcendante* (final form, 1854), Six Paganini Études, concertos in E flat (1857) and A (1863), his Sonata in B Minor (1854), and his Hungarian Rhapsodies are outstanding piano works His Dante (1856) and Faust (1853–61) symphonies are also important See biographies by James Huneker (1911), Ernest Newman (1934), and Sacheverell Sitwell (1934).

LI TAI PO see LI PO

litany (lĭ'tănē), [Gr., =prayer], solemn prayer characterized by varying petitions with set responses The term is mainly used for Christian forms They were developed in Christendom for use in processions In the West there are four days for these processional litanies, the ROGATION DAYS The Eastern liturgies make frequent use of litanies, recited by the deacon, the response is usually "Lord, have mercy." The KYRIE ELEISON is a relic of such a litany In the Roman Catholic Church the one liturgical litany, the Litany of the Saints, dates from the 5th cent substantially Modeled after it are a number of popular litanies, of which the following are authorized Litany of the Holy Name of Jesus (15th cent), of the Blessed Virgin Mary (or of Loreto, 16th cent), of the Sacred Heart, and of St Joseph The litany in the Anglican Book of Common Prayer is much like the Litany of the Saints Moravian and Lutheran liturgies also use litanies

Litchfield. **1** Town (pop 4,029), a co seat of Litchfield co, W Conn, inc 1719 It includes the boroughs of Litchfield (pop 1,234, inc 1879) and Bantam (pop 564, inc 1915) Bantam Lake lies partly in the town Metal goods are produced A beautiful town with a long green and elm-shaded streets, Litchfield preserves its early 19th-century appearance It has been the home of many famous people Oliver Wolcott lived here, Judge Tapping Reeve started the first law school in the country (1784–1833), Ethan Allen was born here, Lyman Beecher was minister of the Congregational church, 1810–26, and his two most famous children, Harriet Beecher Stowe and Henry Ward Beecher, were born in Litchfield **2** City (pop 7,048), S central Ill, S of Springfield and NE of St Louis, in a coal and farm area, inc 1859 Its manufactures include radiators, shoes, milk products, and soft drinks **3** Village (pop 3,920), co seat of Meeker co, central Minn, W of Minneapolis, settled 1856, platted 1869, inc 1872 It is an industrial and trade center in a farm area and is headquarters for a Federal farm resettlement project

Litchfield Hills, term used loosely for hills in Litchfield co, NW Conn They are part of the Taconic Mts

litchi, Chinese tree (*Litchi chinensis*) of the soapberry family, having a small, aromatic, nutlike fruit in a thin, rough shell It is the best-known Chinese fruit and a favorite with the Chinese, who use it fresh, dried, or preserved In commerce it is usually seen dried, in which form it appears as a nut with a raisinlike center The fresh fruit looks much like a strawberry and has a juicy pulp The pulp is also canned The tree is now grown in other warm countries and to some extent in the United States in S Florida and California Among variant spellings are leechee, lichee, and lychee See G. W. Groff, *The Lychee and the Longan* (1921).

literary frauds, manuscripts which are presented to the public as being works of famous authors but which are actually forgeries or imitations. Literary frauds occur for the purpose of selling the manuscripts or books for large sums, to win recognition for an original work which would not attract attention by itself, or sometimes simply for fun, as in a literary hoax. Literary frauds have probably flourished in all periods. To give his history of Phoenicia an air of authenticity, Philo Biblos (1st cent. A.D.) invented a Phoenician source whom he

called Sanchoniathon. In the Middle Ages stories of the Trojan War were ascribed to two imaginary eyewitnesses, Dictys Cretensis and Dares Phrygius Also popular were letters supposedly written by Alexander the Great to Aristotle and filled with fantastic adventures in India Another spurious account of the Far East was *The Voiage and Travaile of Sir John Mandeville* (c 1371), translated from the original French into many languages, including English. Actually the book was written by a man who had never traveled and had compiled his information from books In England the 18th cent was the period of the most famous literary frauds A man who pretended to be a native of Formosa in 1704 published a *Description of Formosa* with an autobiography Subsequently he confessed that he was George PSALMANAZAR and that he was born in France. In the 1760's James Macpherson wrote a group of poems which he claimed were translations of the 3d-century Celtic poet OSSIAN, the fraud was exposed by Samuel Johnson Not many years later Thomas CHATTERTON wrote poetry in an imitation of 15th-century English and claimed that the poems were transcribed from a manuscript of a poet-priest of that period, Thomas Rowley William IRELAND falsely claimed to have found two lost plays of Shakspere Less pretentious literary frauds of this period include the claim of Charles Bertram that his work was a copy of a manuscript written by Richard of Cirencester, a 14th-century monk, George Stevens's forgery of a letter by George Peele describing a meeting with Shakspere, and William Lauder's interpolation of lines from Milton into 17th-century Latin poems to prove that these poems were a source for *Paradise Lost* Robert Spring, who opened a bookshop in Philadelphia in 1858, was a skillful forger of autographs, especially of George Washington and Benjamin Franklin. The most famous 19th-century literary frauds were spurious first editions of such famous writers as Tennyson, Dickens, Matthew Arnold, Elizabeth Browning, and Kipling They were long considered genuine and were not definitely proved forgeries until 1934 In 1939 the author of these forgeries was shown to be Thomas James WISE, a noted book dealer and collector An innocent form of literary fraud was H L Mencken's "History of the American Bathtub," which was believed by many even after Mencken declared it a hoax In 1944 an Australian magazine discovered that poems which they had printed under the name of Ern Malley were actually nonsensical phrases put together as a hoax by two poets

literature For the literature of England, see ENGLISH LITERATURE, for that of the Netherlands, see DUTCH LITERATURE, etc For the forms of literary art, see BIOGRAPHY, ESSAY, NOVEL, THEATER, etc , for its methods and purposes, see CRITICISM, SATIRE, VERSIFICATION See also JOURNALISM

litharge (lĭt'härj, lĭthärj') [Gr ,=stone-silver], a yellow solid, either flaky or powdery, the monoxide of lead, prepared by heating lead in air It is the most stable of the oxides of lead and is formed also when other lead oxides are heated It is used in the manufacture of paints, enamels, varnishes, glass, pottery, and earthenware and in treating rubber Combined with glycerine it makes a firm, binding cement

Lithgow (lĭth'gō), municipality (pop 14,462), New South Wales, Australia, in the Blue Mts WNW of Sydney It is a coal-mining center, with steel and woolen mills

lithium (lĭ'thēŭm), silvery-white metallic element (symbol=Li, for physical constants, see ELEMENT, table) It is very soft, the lightest of the metals, and is classed, according to the periodic table, with sodium, potassium, rubidium, and cesium as an ALKALI METAL Like sodium it reacts with water. It combines directly with hydrogen to form a hydride, with nitrogen to form a nitride, and with oxygen to form an oxide With the hydroxyl group it forms the hydroxide, with carbon and oxygen, the carbonate, and with phosphorus and oxygen, the phosphate. It burns in air with a brilliant white flame, combining with the oxygen to form the oxide, lithia Its compounds color a flame bright red or crimson, and consequently these, as well as the metal, are used in pyrotechnics Lithium is alloyed with aluminum and lead (for hardness) and with beryllium (for lightness) Certain salts of lithium are used to increase the capacity of storage cells, and others (e g., the carbonate, which is practically insoluble in water) are used in medicine Lithium is widely distributed in nature, appearing in the soil (traces), in plants (being present in the ashes), and especially in the minerals lepidolite (a lithia mica), spodumene (lithium, aluminum, silicon, and oxygen), and amblygonite (lithium, aluminum, fluorine, phosphorus, and oxygen) It was discovered in 1817 by J A Arfvedson. The metal is prepared by electrolysis of the fused chloride. Its spectrum exhibits two red lines.

lithography (lĭthŏ'grŭfē), type of planographic or surface printing It is distinguished from letterpress (relief) printing and from intaglio printing (in which the design is cut or etched into the plate). It is used both as an art process and as a commercial printing process In commercial printing the term is used synonymously with offset PRINTING All planographic printing is based on chemical action, and lithography is based on the mutual antipathy of oil and water. As the name [from Gr.,=writing on stone] implies, a lithograph is printed from a stone except in commercial lithography, where grained metal plates are employed The process was invented c 1796 by Aloys Senefelder, and the Bavarian limestone which he employed is still considered the best material for lithography as an art process The slab of stone is ground to a level surface which may be of coarse or fine texture as desired The drawing is made in reverse directly on the stone with a lithographic crayon or ink that contains soap or grease The fatty acid of this material interacts with the lime of the stone to form an insoluble lime soap on the surface, which will accept the greasy printing ink and reject water Accordingly, those parts of the stone which have been drawn upon have an affinity for ink Sometimes the drawing is made on paper and transferred to a heated stone by pressure This is known as a transfer lithograph and does not require the artist to reverse his drawing Next, the surface of the stone untouched by grease is desensitized to it, and the portions drawn upon are fixed against spreading by treatment with a gum arabic and nitric acid solution The grease has now penetrated the stone, and the drawing is washed off with turpentine and water The stone is ready to be inked with a roller and printed, but it must be kept moist The printing requires a special, lithographic press with a sliding bed passing under a scraper As a printing process lithography is probably the most unrestricted It produces tones ranging from intense black to the most delicate gray and simulates with equal facility the effects of pencil, pen, crayon, or brush drawing White lines are readily produced by scratching through the drawing on the stone Several hundred fine proofs can be taken from a stone The medium was exploited by many artists in the 19th cent, including Goya, Delacroix, Daumier, Gavarni, Manet, Degas, and Toulouse-Lautrec In the United States, A B Davies, George Bellows, Joseph Pennell, and many others are noted for their lithographs For the commercial reproduction of art works, photolithography plays an increasingly important role A photographic negative is exposed to light over a gelatin-covered paper Wherever the light does not strike the gelatin, the latter remains soluble while the other parts are rendered insoluble When the soluble portions are washed away, the pattern to be printed can be inked and transferred to the stone or plate Color lithography and color photolithography require as many stones or plates as the number of colors employed

Lithonia (lĭthō'nēŭ), city (pop 1,554), NW Ga , just E of Atlanta It is the center of an important granite-quarrying area

lithopone (lĭ'thupōn), a white pigment, a mixture of barium sulphate and zinc sulphide, prepared by precipitation from solutions of barium sulphide and zinc sulphate It is widely used in paints and cheaper enamels Although, unlike WHITE LEAD, it discolors on exposure to sunlight, it costs less than white lead, has a greater covering power, is not poisonous, and is not discolored by hydrogen sulphide, a gas often present in the air of manufacturing cities It is used mostly in paints for interiors

Lithuania (lĭthōōā'nēŭ, lĭthū-), Lithuanian *Lietuva* (lyĕtōō'vä), republic (1946 estimated area 25,000 sq mi , 1946 estimated pop 3,000,000), NE Europe, since 1940 a constituent republic of the USSR, but still unrecognized as such by the United States in 1949 VILNA is the capital Lithuania borders on the Baltic Sea in the west, Latvia in the north, Belorussia in the east, Poland in the south, and former East Prussia in the southwest Lithuania is a flatland, drained by the Niemen river and its tributaries Dairy farming and stock raising are prominent in its primarily agricultural economy. Food processing and textile manufacturing are the chief industries KAUNAS and MEMEL (Lithuanian *Klaipeda*) are the only important cities besides Vilna The Liths or Lithuanians speak a Baltic LANGUAGE, Roman Catholicism is the prevailing faith The pagan Liths began to form a unified state in the 13th cent to protect themselves against the LIVONIAN KNIGHTS and the TEUTONIC KNIGHTS, who pressed on them from the north and the south respectively The grand dukes Gedimin (1316–41) and Olgerd (1345–77) expanded their territories at the expense of the neighboring Russian principalities, which were weakened by the Mongol invasion. Lithuania became one of the largest states of medieval Europe, including all Belorussia, a large part of the Ukraine, and sections of Great Russia White Russian became the chief language of the grand duchy. Olgerd's son, Jagiello, became king of Poland in 1386 as LADISLAUS II by his marriage with JADWIGA, daughter of Louis I of Poland and Hungary He accepted and introduced Christianity. The union between Lithuania and Poland had at first the character of an alliance between two independent nations. WITOWT, cousin of Ladislaus II, ruled Lithuania independently (1392–1430) and brought it to the height of its power and expansion In 1410 the Polish-Lithuanian forces severely defeated the Teutonic Knights at TANNENBERG. With Witowt's death decline set in The White Russians, who had retained their Greek Orthodox faith, tended toward the rising grand duchy of Moscow In 1569, hard pressed by the Russians under Ivan IV, Lithuania fully merged with Poland by the Union of Lublin The Lithuanian aristocracy and burghers became thoroughly Polonized, while the peasantry lingered in ignorance and servitude By the three successive partitions of Poland (1772, 1793, 1795) Lithuania passed to Russia Russian efforts after 1831 to obliterate Lithuanian national sentiment were futile in face of the movement of nationalist revival Proclaimed (Feb , 1918) an independent kingdom under German protection, Lithuania became (Nov , 1918), an independent republic It successfully resisted attacks by Bolshevik troops and by volunteer bands of German adventurers, but in 1920 its capital, Vilna, was seized by Poland, and Lithuania remained technically at war with Poland until 1927 In 1923 Lithuania seized the MEMEL TERRITORY Internal politics were unstable The virtual dictatorship of Augustine Voldemaras (1926–29) was succeeded by that of Antanas SMETONA (1929–39). An authoritarian constitution on corporative (fascist) lines became effective in 1938 Poland forced the official cession of Vilna (1938), which, however, passed to Lithuania after the partition of Poland in 1939 A German ultimatum forced (1939) the restitution of Memel In 1940 the USSR, which had obtained military bases in Lithuania, occupied the country and, after a new election, Lithuania became a constituent republic of the USSR During the German occupation (1941–44) of Lithuania in the Second World War the considerable Jewish minority (7 per cent) was largely exterminated In 1944 the Communist government returned Memel was again restored to Lithuania

Lithuanian, Baltic language of Lithuania It belongs to the Indo-European family See LANGUAGE (table)

Lititz (lĭ'tĭts), borough (pop 4,840), SE Pa , N of Lancaster, settled c 1740 by Moravians, laid out 1757, inc 1759 It manufactures shoes, textiles, and chocolate Pretzel bakeries here are famous. German customs and language are maintained in this locale Linden Hall Junior College is here

litmus, organic dye used commonly in the laboratory since alkalies turn it blue and acids red For this reason it is classed as an indicator Commonly, paper is treated with the coloring matter to form so-called litmus paper Litmus is prepared, in the Netherlands chiefly, from certain lichens (see ARCHIL) which are mashed, treated with potassium carbonate and ammonia, and allowed to ferment. The resulting product is mixed with various colorless substances, such as chalk and calcium sulphate (gypsum), and appears on the market as dark blue lumps, masses, or tablets Although the chemical nature of litmus is not completely understood, it is known to contain a brownish-red coloring matter (azolitmin—a compound of carbon, hydrogen, oxygen, and nitrogen) and a reddish substance, erythrolitmin, which is affected by alkalies and acids

Litomerice, Czech *Litoměřice* (lĭ'tōmyĕrzhĭtsĕ), Ger *Leitmeritz* (līt'mərĭts), city (pop 14,402), N Bohemia, Czechoslovakia, on the Elbe It is the center of a region of vineyards and orchards

Littell, Frank Bowers (lĭtĕl'), 1869–, American astronomer, b Scranton, Pa , grad Wesleyan Univ (Ph B , 1891), M A Columbian Univ (now George Washington Univ), 1894. He was with the U S Naval Observatory as a computer (1891–96, 1897–98) and as assistant astronomer (1898–1901) In addition to serving on several government missions, he was professor of mathematics (1901–33) in the U S navy He made vertical circle observations of the declinations of standard stars and photographic zenith tube observations for variation of latitude With W S Eichelberger he made a catalogue of 23,521 stars

Little, Arthur Dehon, 1863–1935, American chemical engineer, b Boston An authority on the chemistry of paper making and a pioneer in the industrial application of chemistry, he invented many processes, including one for chrome tanning and another for making artificial silk He was a founder of the school of chemical engineering practice at the Massachusetts Institute of Technology

Little, Clarence Cook, 1888–, American biologist and educator, b Brookline, Mass , grad Harvard (B A , 1910, D Sc , 1914) At Harvard he began his noted research in genetics and the inherited susceptibility to cancer He served as president of the Univ of Maine (1922–25) and of the Univ of Michigan (1925–29) He long held (1929–45) the post of managing director of the American Society for the Control of Cancer. His writings include *The Awakening College* (1930) and *Civilization against Cancer* (1939)

Little, Lou, 1893–, American football coach, b Leominster, Mass. He studied and played football at the Univ. of Pennsylvania (1915–19), with a two-year gap when he was an infantry captain in the

First World War Little coached at Villanova College (1921–22) and at Georgetown (1924–29) before coming to Columbia in 1930 His tenure at Columbia was notably successful, partly because of the outstanding upsets his teams scored—e g , the defeat (7–0) of Stanford in the 1934 Rose Bowl game and the 1947 victory (21–20) over Army, Army's first defeat in 33 games since Nov , 1943 Little became chairman of the Football Coaches Association in 1939 He has collaborated in writing several books and many articles on football

Little America, base for Antarctic exploring expeditions, Antarctica, on the Ross Shelf Ice and S of the Bay of Whales Richard E Byrd established (1929) and named Little America and used it as a base for subsequent expeditions It has also been used by other explorers.

Little Armenia: see Cilicia

Little Belt: see Belt, Great

Little Bighorn, river rising in N Wyoming in the Bighorn Mts and flowing north to enter S Montana and join the Bighorn river at Hardin On June 25, 1876, it was the scene of the defeat and death, at the hands of the Sioux, of G A Custer The battlefield (proclaimed a national reservation in 1886) is today a national monument (765 14 acres)

Little Chute (shōōt), village (pop 3,360), E Wis , on the Fox near Appleton, settled 1850, inc 1899

Little Colorado (kŏlurä'dō, -rä'dō), river rising in the mountains about the Ariz –N Mex boundary and flowing generally northwest more than 200 mi to the Colorado just above the Grand Canyon In Arizona, Holbrook is on the river, Winslow near it

Little Compton, town (pop 1,492), SE R I , between the Sakonnet river and the Mass line, inc as a Plymouth Colony town 1682, passed to Rhode Island 1746 It includes the villages Sakonnet (a resort), Little Compton, and Adamsville A monument proclaims the origin of the Rhode Island Red fowl Elizabeth, daughter of John and Priscilla Alden, lived and is buried here, Benjamin Church also lived here

Little Current, town (pop 1,088), on N Manitoulin island, S Ont , on North Channel of Lake Huron and SW of Sudbury It is a popular yachting resort and has rail connection with the mainland

Little Dipper: see Ursa Major and Ursa Minor

Little Entente (antant', ätät') After the First World War, Czechoslovakia, Rumania, and Yugoslavia drew together by three dual treaties of defensive and economic alliance (1920–21) and by later agreements This combination, closely bound to France by financial and treaty obligations, became known as the Little Entente Poland, though it sometimes cooperated with it, did not enter the alliance Yugoslavia and Rumania were also members of the Balkan Entente, formed in 1934 The main purposes of this system of alliances were the preservation of the territorial status quo established by the treaties of Versailles, Saint-Germain, Trianon, and Neuilly against the efforts of Germany, Hungary, Italy, and Bulgaria to have those treaties revised, the prevention of union (Ger *Anschluss*) between Germany and Austria, and the encouragement of closer economic ties among its members The Little Entente was successful in its aims until the rise of Hitler in Germany, when French prestige was gradually displaced by German economic penetration and political pressure It began to break apart in 1936 and was effectively ended when Czechoslovakia was dismembered by the Munich Pact (1938)

Little Falls. **1** City (pop 6,047), co seat of Morrison co , central Minn , on the Mississippi and NNW of St Cloud, in a rich farm area, settled 1855, inc as a village 1879, as a city 1889 The power of the falls was used by various mills Wood and paper products, flour, and clothing are made Charles A Lindbergh's childhood home (restored in 1935 by the WPA) is near by, in a state park which is a memorial to the aviator's father **2** Township (pop 5, 368), NE N J , SW of Paterson, settled 1711 It has a large laundry plant **3** City (pop 10,163), E central N Y , SE of Utica, at falls of the Mohawk and on the Barge Canal, in a dairy region, settled c 1725, inc 1895 Knit goods and slippers are among its manufactures

Little Ferry, borough (pop 4,545), NE N J , on the Hackensack and ESE of Paterson, settled 1636, inc 1894

Littlefield, George Washington, 1842–1920, American cattle man, b Panola co , Miss His family settled (1850) in Texas, where his father built up a large cotton plantation In the Civil War, Littlefield enlisted in a company of the 8th Texas Cavalry (which came to be known as the Texas Rangers) and was severely wounded in 1863 He returned to his family plantation, and after floods ruined (1871) his crops he retrieved the family's wealth by driving a herd of Texas cattle over the trail to Kansas He amassed a fortune at this business, and by 1883 he was also engaged in banking. He interested himself in the welfare of Texas and of the South, and to this end he liberally endowed the Univ. of Texas See biography by J. Evetts Haley (1943).

Littlefield, city (pop. 3,817), co. seat of Lamb co , NW Texas, NW of Lubbock on the Llano Estacado, settled 1911, inc. 1925. The region yields cotton, sorghum and other grains, and dairy and poultry products

Little Flower of Jesus: see Theresa, Saint (Theresa of the Child Jesus)

Littlehampton, urban district (1931 pop 10,178; 1943 estimated pop 12,597), Sussex West, England, at the mouth of the Arun river It is a seaside resort and the port for Arundel

Little Kanawha (kənô'wə), river rising in central West Virginia and flowing NW to the Ohio at Parkersburg

Little Masters, term applied to a group of German engravers of the 16th cent , most of whom were followers of Dürer. Their work, usually upon small plates, was marked by minute detail, delicate handling, and admirable design Those better known, who were also painters, include Albrecht Altdorfer, Heinrich Aldegrever, the Beham brothers, and Georg Pencz

Little Minch, Scotland see Minch

Little Missouri, river rising in NE Wyoming and flowing 560 mi NE and E to the Missouri in W North Dakota.

Little Rock, city (1940 pop 88,039, 1948 special census pop 98,302), state capital, and co seat of Pulaski co , central Ark., on the Arkansas river and near the Ouachita foothills, laid out 1820, chartered 1831 On several railroads and in a rich diversified-farming and bauxite-producing area, the city is the commercial center of the state It has a large cotton trade and, with North Little Rock across the river, many industries, notably cottonoil and lumber processing A number of state institutions are here, including the medical school of the Univ of Arkansas, also in the city are Philander Smith and Arkansas Baptist colleges for Negroes, a junior college, Catholic (1882) and Episcopal (1888) cathedrals, and the beautiful old capitol (1836), now a war memorial Gen Douglas MacArthur was born here Near by are a U S veterans' hospital, a state forest nursery, a fish hatchery, and corrective institutions.

Little Russia: see Ukraine

Little Silver, borough (pop 1,461), E N J , near Red Bank, inc 1923

Little Sioux (sōō), river rising in SW Minnesota near the Iowa line and flowing southwest 221 mi across NW Iowa to the Missouri S of Sioux City Its main tributaries are the Maple, the West Fork, and Elliott Creek In 1947 a government-sponsored program for flood control and soil conservation was started in the area (4,500 sq mi) of the Little Sioux watershed The Soil Conservation Service of the U S Dept of Agriculture is directing the building of some 800 gully control structures in the watershed and is advising on crop rotations, contour cultivation, and similar methods of controlling soil erosion The Nepper watershed project, near Mapleton, Iowa, consisting of four dams, was completed in July, 1948. The U S Corps of Engineers has charge of channel improvement, levees, and other flood control measures on the Little Sioux river and its tributaries It is estimated that the total project will be completed in about 15 years

Little Smoky, river rising in W Alberta in the Rockies N of Jasper National Park and flowing 185 mi ENE, then N and NW to the Smoky river, NE of Grande Prairie

Littlestown, borough (pop 2,463), S Pa , c 40 mi SW of Harrisburg, laid out 1765, inc 1864

Little Tennessee, river, c 135 mi long, rising in NE Georgia in the Blue Ridge and flowing across the northwest corner of North Carolina, around the Great Smoky Mts , and NW through Tennessee to empty into the Tennessee river It is much used for dams for flood control and power development Fontana Dam in North Carolina, built in 1942–45 at a site obtained from the Aluminum Company of America, is an important unit in the Tennessee Valley Authority Cheoah Dam is also in North Carolina, and Calderwood Dam is in Tennessee

Little Theater Movement: see Theater

Littleton, Sir Thomas, 1422–81, English jurist He became a sergeant-at-law, i e , a barrister in the Court of Common Pleas in 1453 and a judge of that court in 1466. He is best known for his *Tenures,* a short work in law French on the types of estates in land in England The work, one of the earliest printed books in England, was much admired for its concise and simple quality. In the much-expanded edition of Sir Edward Coke, the *Tenures* was the standard text on property law until the 19th cent The name also occurs as Lyttelton or Lyttleton.

Littleton, **1** Town (pop 2,244; alt. 5,362 ft), co seat of Arapahoe co., N central Colo , just S of Denver, inc. 1890. It is in an irrigated farm area. **2** Town (pop 1,049), E Maine, N of Houlton, in a potato area, inc. 1856 **3** Town (pop. 1,651), NE Mass., NW of Boston, inc 1715. It was settled on the site of the "praying Indian" village Nashoba, established c 1686 by John Eliot. Elastic products are made. **4** Town (pop 4,571), NW N.H., between the Connecticut river and White Mt. peaks and crossed by the Ammonoosuc; settled 1769, inc 1784. It is a resort and a commercial and industrial center, at falls of the Ammonoosuc. Shoes and gloves are made here. It has a Federal building (1936), a fine library with art collections, and a community house The 1936 flood caused much damage in the town. See history by James R. Jackson (3 vols , 1905) **5** Town (pop 1,200), N N C., near the Va line NE of Raleigh, founded before 1775 It is in a lumber and truck-farm area.

Little Turtle, c.1752–1812, chief of the Miami Indians, born in a Miami village near Fort Wayne, Ind. He was noted for his oratorical powers, military skill, and intelligence. He was a principal commander of the Indians in the defeat of Gen. Josiah Harmar on the Miami in 1790 and of Gen. Arthur St. Clair on the Wabash in 1791. After several attacks on the forces of Gen. Anthony Wayne, he counseled peace but was overruled Consequently he was not in command at Fallen Timbers. He reluctantly signed the Treaty of Greenville (Ohio) in 1795, ceding a great part of Ohio to the whites, and he also signed several subsequent treaties Later he refused to join Tecumseh's confederacy against the whites He persuaded many of the Miami to turn to agriculture and appealed to the government to halt the liquor trade among his people. In later life he became a popular Indian hero with the American people See biography by C. M Young (1917).

Little Valley, village (pop. 1,234), co seat of Cattaraugus co , W N Y., NW of Olean, in a dairy region; inc 1876 Cutlery and dairy products are made here.

Littoria: see Latina

Littré, Maximilien Paul Émile (mäksēmēlyē' pōl' āmēl' lētrā'), 1801–81, French lexicographer Known as a positivist philosopher and as professor of history and geography at the École polytechnique, he is better remembered for his dictionary of the French language (5 vols , 1863–72), for his translation of Hippocrates, and for his works in medical history.

liturgy (lĭ'tûrjĭ), in Christian practice, the service of the sacrament of the Eucharist Since very early times Christians celebrated the chief sacrament in a similar manner, bread and wine were brought to the leader of the congregation who thanked God for His blessings, said a prayer including the words of institution (from the Gospels —Mat 26 26–28 and elsewhere), prayed for his people, and distributed the communion A preparatory ceremony including lessons, a sermon, prayers, and the kiss of peace, preceded the communion service There is today a comparatively small number of liturgies They are in several languages They are all very similar in certain essentials initial lessons ending with the Gospel, recital of the Creed, a formal offering of bread and wine, then a solemn dialogue and thanksgiving (the preface), and a long prayer (the canon) containing recital of the words of institution (the consecration) and prayers for the living and the dead, and finally, the Lord's Prayer, communion, and a dismissal Scholars classify the liturgies according to the variations in the text of the canon (1) The Antiochene liturgies, an example of which appears in the *Apostolic Constitutions,* to this group belongs the Byzantine liturgy, used by the Orthodox and many Roman Catholics of E Europe (in Greek and Old Slavonic and Rumanian), the Armenian liturgy (in classical Armenian), and the liturgies of the Jacobites, Maronites, and St Thomas Christians (Arabic and Syriac) (2) The Alexandrine liturgies, including the liturgies of the Copts (in Coptic) and Ethiopians (in Ethiopic) (3) The Roman liturgy (in Latin), the shortest, simplest, and most widely used of ancient liturgies, now represented only by the Mass, there are a few variations, as used by the religious orders (4) The Gallican liturgies (in Latin), used anciently in western Europe, except in central and S Italy, the only surviving liturgies of this group are the Ambrosian liturgy used in the diocese of Milan, Italy, and the Mozarabic liturgy of Toledo, Spain The liturgies of Protestant churches differ fundamentally from the ancient liturgies in not implying transubstantiation, in being of very recent adoption, and in always using the vernacular, for them, see Lord's Supper The use of the ancient liturgies cuts across the lines of heresy and schism, and generally users of ancient liturgies recognise the validity of other ancient liturgies. See Virgil Michel, *The Liturgy of the Church according to the Roman Rite* (1937); Sévérien Salaville, *An Introduction to the Study of Eastern Liturgies* (Eng adaptation, 1938).

Litvinov, Maxim Maximovich (mŭksyēm' mŭksyē'-mŭvĭch lyĭtvē'nŭf), 1876–, Russian revolutionist and statesman. He changed his name from Wallach after joining the Social Democratic party An early Bolshevik, he took part in the Revolution of 1905 but subsequently spent years in exile in London and in Switzerland. After the October Revolution of 1917 he was sent as first Soviet representative to London, but was expelled by the British authorities in 1918. He became the chief assistant of the commissar for foreign affairs, Chicherin, and during Chicherin's last years

carried the burden of his superior's work. In 1928, representing the USSR at the preparatory committee for the Disarmament Conference at Geneva, Litvinov declared that the Soviet Union was ready to abolish all military forces as soon as the other powers declared themselves ready to do likewise. The other powers accused him of sabotaging disarmament, and his startling proposal to accomplish disarmament by disarming came to nothing. Litvinov succeeded Chicherin as foreign commissar in 1930. He obtained (1933) American recognition of the USSR, and in 1934 Russia entered the League of Nations, where Litvinov continued to promote a peace policy and called for joint action against the aggression of the Axis Powers. His policy was abandoned by Stalin after the Munich Pact of 1938. As a Jew and as a consistent foe of Nazi Germany, Litvinov was scarcely in a position to negotiate a nonaggression pact with Germany, in May, 1939, he was replaced by Molotov as foreign commissar. He emerged from virtual retirement late in 1941, when he was appointed ambassador to the United States, but he was recalled in 1943. In 1946 he was relieved of his post as deputy foreign minister (held since 1941), but he continued to hold office in the government. Litvinov was considered the chief exponent of Soviet cooperation with the Western powers.

Liu-ch'iu: see RYUKYU ISLANDS

Liukiu Islands. see RYUKYU ISLANDS.

Liutprand (lēōōt'prănd), d 744, king of the Lombards (712–44). Under his rule the Lombard kingdom of Italy reached its flower. Liutprand strongly favored Roman law and institutions. His legislation anticipated the reforms of Charlemagne by protecting his subjects from denial of justice through his *missi* (special envoys authorized to administer justice and redress grievances). He curbed the powers of the local dukes and bishops, thus creating a centralized state, and he obtained the submission of the duchies of Spoleto and Benevento. In the north, he expanded his dominions at the expense of Bavaria. Liutprand died while campaigning against the Byzantine exarchs of Ravenna. After an interregnum, he was succeeded (749) by his brother Aistulf, who captured Ravenna in 751.

Liutprand (lēōōt'prănd), c 922–972, Italian historian of Lombard origin. He served at the courts of Hugh of Italy and Berengar II, but attached himself to King (later Emperor) Otto I after Otto's invasion of Italy. In 961 he was made bishop of Cremona. He went on several diplomatic missions to Constantinople. His chief works, which are important sources of Italian, German, and Byzantine history, are the *Antapodosis* [tit-for-tat], dealing with the period 887 to 952, the *Liber de rebus gestis Ottonis* [chronicle of the reign of Otto], an account of events from 960 to 964, strongly biased in Otto's favor, and the *Relatio de legatione Constantinopolitana*, an account of his embassy to Constantinople in 968. His works have appeared in an English translation by F. A. Wright (1930).

Livadiya (lyĭvä'dyĕŭ), small town near Yalta, RSFSR, in S Crimea, a Black Sea resort. The Livadiya palace, built (1910–11) in Italian Renaissance style for Tsar Nicholas II, is now a sanatorium. It was (1945) the residence of F. D. Roosevelt during the Yalta Conference.

live-forever see SEDUM

Live Oak, city (pop. 3,427), co. seat of Suwannee co., N Fla., near the Suwannee W of Jacksonville. It is the principal bright-leaf-tobacco market of the state. The main period for marketing is August. Florida Memorial College (preparatory, Negro) is at Live Oak.

liver, largest gland in the body. It lies in the abdomen just below the diaphragm, the bulk of it on the right side. It is a soft, reddish-brown organ, weighing from about 2½ lb to about 3½ lb and divided into four lobes of unequal size and irregular shape. The secretion of BILE is one of its important functions. Glycogen (or animal starch) is stored in the liver, the liver cells extract glucose from the blood in the portal circulation (which carries blood from the small intestine to the liver) and convert it into the insoluble glycogen which can be converted back to glucose and transported in the blood stream to be used for energy production when the need arises. Other functions of the liver include the conversion of waste products of protein digestion into a form that the kidneys can eliminate and the completion of the destruction of worn-out red corpuscles. The liver stores a substance known as the antianemic principle. In cases of pernicious anemia as well as in some cases of secondary anemia, liver extract is injected intramuscularly.

liver fluke: see FLUKE.

Livermore, Mary Ashton Rice, 1820–1905, American reformer, b. Boston, an ardent advocate of woman suffrage, temperance, and the higher education of women. At the outbreak of the Civil War she served on the U.S. Sanitary Commission and later edited and contributed to a suffrage paper, the *Agitator*, which merged with the *Woman's Journal*. She was a popular lecturer and was the author of *My Story of the War* (1888) and *The Story of My Life* (1897).

Livermore. 1 City (pop. 2,885), W Calif., E of San Francisco, in the agricultural Livermore Valley; settled 1835, inc. 1876. Wines are made in the city. A U.S. veterans administration hospital is here. 2 Town (pop. 1,601), W. Ky., on the Green River and S of Owensboro. Wood products are made here. 3 Farming town (pop. 1,302), SW Maine, NW of Augusta, inc. 1795. It has small industries. "The Norlands" was the home of the Washburns.

Livermore Falls, town (pop. 3,190), SW Maine, NW of Augusta and on the Androscoggin, settled 1786, inc. 1843, called East Livermore until 1930. It has paper mills.

Liverpool, Charles Jenkinson, 1st **earl of,** 1727–1808, British statesman. Entering Parliament in 1761, he became George Grenville's secretary of state. As war secretary (1778–82) he was responsible for British military direction in the American Revolution. He wrote *On the Conduct of Government respecting Neutral Nations* (1758).

Liverpool, Robert Banks Jenkinson, 2d **earl of,** 1770–1828, English statesman. He served as foreign secretary and home secretary and secretary for war and the colonies. As prime minister (1812–27) he headed a Tory government whose policies were directed by its more dynamic members, Wellington, Castlereagh, Canning, Peel, and Huskisson. His administration saw the end of the Napoleonic Wars and the change from repressive post-war policy to the Tory reforms in the 1820s. See biography by C. D. Yonge (1868), W. R. Brock, *Lord Liverpool and Liberal Toryism, 1820 to 1827* (1941).

Liverpool, town (pop. 3,170), SW N.S., on the coast SW of Halifax. It has pulp and paper and shipbuilding industries.

Liverpool, seaport (1931 pop. 855,688, 1948 estimated pop. 791,800), Lancashire, England, on the Mersey near its mouth. It is a great industrial city. In 1207 King John granted Liverpool its first charter, and in 1229 Henry III confirmed it as a free borough. During the 16th and 17th cent. it suffered severely from the plague, and in 1644 it surrendered to Prince Rupert after several sieges. By 1709 it acquired the first wet dock in Great Britain and since then has become the greatest port in W Britain and one of the world's leading trade centers. Liverpool's vast docks are over 7 mi long. The city is connected by tunnel with Birkenhead. Liverpool was once famous for its pottery, and its milling industry was a source of great revenue, however, after the Second World War the great cotton market diminished considerably. Liverpool Cathedral, still uncompleted, will be the largest in England. A Roman Catholic cathedral is also in process of construction. St. George's Hall is an imposing building on high ground in a group which includes libraries and art galleries. The Univ. of Liverpool was independently chartered in 1903. Concentrated air raids in 1940–41 over the whole Merseyside area caused heavy damage and many casualties.

Liverpool, village (pop. 2,500), central N.Y., on Onondaga Lake and near Syracuse, in a farm area; inc. 1830.

liverwort (lĭ'vurwûrt), small flowerless plant of the class Hepaticae. The liverworts generally grow in moist places and are considered to be intermediate between the aquatic algae and terrestrial plants such as mosses, ferns, and the seed plants. Nearly all liverworts are flattened and grow prostrate, the plant body may be either a simple, flat, ribbonlike mass or it may be differentiated into stem and leaves, in which case it sometimes resembles some of the mosses. The ancients considered liverworts remedies for diseases of the liver. They are also called hepatics, and the flowering plant HEPATICA is frequently known as liverwort. For the common liverworts, see A. J. Grout, *Mosses with a Hand-Lens* (1924).

livery companies, name used for the English GUILDS in the city of London. They were chartered largely in the reign of Edward III in the 14th cent. and by each king thereafter. They assumed a distinctive livery or costume and a distinctive badge for ceremonial use, and thus attired they have formed a colorful part of municipal pageants and royal coronations down to the present time. Each livery company controlled the product of the members (if it was a craft guild) or the trade of the members (if it was a merchant guild). It regulated conditions of work, of apprenticeship, and of trade, and it limited membership, although all freemen of London were originally required to join a livery company. In organization each company was governed by its court, made up of the master and wardens. They and the middle class of members were the liverymen. The large body of freemen of the company were called yeomen. Edward III and his immediate successors gave to the livery companies the right not only to elect their own wardens but also to elect the common council of the city of London, which in turn elected the mayor and other officials and the members of Parliament for London. This latter provision held until the Reform Act of 1832. The companies were also incorporated and came to hold lands and to own other considerable wealth. They cared for indigent members and had numerous pensioners. The heyday of the companies lasted until the 17th cent., although they suffered from the royal exaction of forced loans under Henry VIII and his successors, and much of their property in trust was taken from them in the Reformation. Charles II in 1684 asserted royal control of the companies. Gradually, meanwhile, the character of the livery company changed from an association of artisans or traders to one in which the richer members controlled policies and knowledge of the craft or trade was no longer required for membership. The losing battle of exclusive guilds with competition and the impossibility of regulating industry by guilds under capitalism reduced them to little more than administrators of trusts. As such they had long played an important part in English development. For instance, the companies contributed funds for the plantation of Ulster under James I and invested funds in many colonization ventures in the 16th and 17th cent. Of the schools which have been for years administered by the companies, famous are St. Paul's and the Mercers' (both under the company of mercers), the Merchant Taylors', and the City and Guild of London Institute of the Imperial College (started by the cloth workers). There are some 75 livery companies today, of which 12 have long been known as the great companies—those of mercers, grocers, drapers, fishmongers, goldsmiths, skinners, merchant taylors, haberdashers, salters, ironmongers, vintners, and clothworkers. See William Herbert, *The History of the Twelve Great Livery Companies of London* (2 vols., 1837), W. C. Hazlitt, *The Livery Companies of the City of London* (1892).

Livia Drusilla (lĭv'ēŭ drōōsĭl'ŭ), c 55 B.C.–A.D. 29, mother of the Roman emperor TIBERIUS. She was a daughter of Livius Drusus Claudianus and married first Tiberius Claudius Nero. Tiberius was his son. In 38 B.C., AUGUSTUS forced her husband to divorce her that he might marry her himself. Her son Drusus Senior (see DRUSUS), born soon after her remarriage, was not Augustus' son, but the son of her first husband. On Tiberius' accession Livia Drusilla attempted unsuccessfully to control the government.

Livingston, family of American statesmen, diplomats, and jurists. **Robert Livingston,** 1654–1728, b. Roxburghshire, Scotland, lived in Holland from the age of nine and emigrated to America in 1673 after his father died. He made Albany, N.Y., his home, married (1679) Alida Van Rensselaer, and, mainly through trade with the Indians, rose quickly to a position of wealth and influence in New York. Through the influence of Thomas DONGAN, he secured (1686) a patent (later confirmed by a charter of King George I) to shape his extensive land holdings, amounting to 160,000 acres, into Livingston Manor—in the present Dutchess and Columbia counties. Livingston and his brother-in-law, Peter Schuyler, were the leaders of the Albany opposition to the rebellion of Jacob LEISLER, and afterwards Livingston found his estates and privileges so endangered by the Leislerian faction, that he twice had to go to England to defend them. He served as secretary of Indian affairs from 1695 until his death and had considerable influence on the Indian policy of the colony, the governors of New York in this period relied heavily on Livingston's advice and were careful to retain his favor. A representative (1709–11, 1716–25) in the New York provincial assembly, he was elected (1718) speaker and supported the legislative body in opposition to the royal control of the governor. He had two sons, Robert and Philip. The younger Robert was the father of **Robert R. Livingston,** 1718–75, who became noted in New York as a Whig political leader, as a judge of the admiralty court (1759–63) and of the supreme court of the colony (1763–75), and as chairman of the New York Committee of Correspondence. Four of his five daughters made notable marriages, bringing into the family Gen. Richard Montgomery, Freeborn Garrettson, Morgan LEWIS, and John Armstrong (1758–1843). His son, the younger **Robert R. Livingston,** 1746–1813, b. New York city, grad. King's College (now Columbia), 1765, was admitted to the bar and became a partner of John JAY. He was a member of the Continental Congress and a member of the committee to draft the Declaration of Independence, but he did not sign that document because he had returned to New York to meet with the provincial congress. He was the first secretary of the department of foreign affairs, a post created in 1781, and he wrote the instructions for the commissioners to negotiate peace in France. He was (1777–1801) the first chancellor of the state of New York and an ardent New York supporter of the new Constitution of the United States. As chancellor, he administered the presidential oath to George Washington. Livingston earned a name as one of the best legal minds of his time. Thomas Jefferson appointed (1801) him minister to France, and he conducted the negotiations which resulted in the LOUISIANA PURCHASE. He held a monopoly on steamboating in New York waters and his financing of the experiments of Robert FULTON resulted in the launching of the *Clermont*, the first American steamboat to be com-

mercially successful. A brother of the younger Robert R. Livingston, **Edward Livingston,** 1764–1836, b Livingston Manor, grad College of New Jersey (now Princeton), 1781, also established a reputation as a jurist and statesman. As a member (1795–1801) of the U S Congress he opposed Jay's Treaty and the Alien and Sedition Acts. President Jefferson appointed him U S district attorney of New York in 1801, the same year that he became mayor of New York city. Because one of his clerks lost or misappropriated public funds, Livingston sold his property to pay off the debt. He then went to New Orleans, La. In the War of 1812 he became chairman of the committee on public defense and acted as confidential military secretary to Gen. Andrew Jackson. He was elected (1820) to the Louisiana legislature, and in 1821 was appointed to prepare a new code of laws and criminal procedure. Though the code was not adopted, its completeness and reasoned unity brought him international fame. He served again (1822) in the U S House of Representatives and later (1831) resigned from the U S Senate to become Secretary of State under Andrew Jackson—for whom he wrote many important state papers. As minister (1833–35) to France, Livingston was unable to secure payment on American claims for spoliations incident to the Napoleonic Wars. See biography by W. B. Hatcher (1940). Another line of Livingstons descended from Philip Livingston, son of Robert Livingston (1654–1729). Philip had three sons. The eldest of these three brothers, **Peter Van Brugh Livingston,** 1710–92, b. Albany, N.Y., grad. Yale, 1731, was on the Whig side in the bitter political contests preceding the American Revolution and was a strong opponent of the Stamp Act and other British taxation measures. He was a leader in the Committee of One Hundred and was president (1775) of the first provincial congress. He became (1748) an original trustee of the College of New Jersey (now Princeton). The second brother, **Philip Livingston,** 1716–78, b. Albany, N.Y., grad. Yale, 1737, also was a leader in the protest against the Stamp Act and other British trade restrictions. Though he looked with disfavor upon radicalism and was not originally an advocate of independence, he nevertheless signed the Declaration of Independence and after that time remained an active member of the Continental Congress. He was generous with the large fortune he accumulated as a merchant in New York city and was a supporter of many philanthropies. He was one of the original promoters of King's College, established a professorship of divinity at Yale, and helped to found the New York Society Library. A third brother, **William Livingston,** 1723-90, b. Albany, N.Y., grad. Yale, 1741, fought actively in the American Revolution. He was admitted (1748) to the bar and became one of the leading lawyers of New York city. He moved (1772) to New Jersey and was sent to the First and Second Continental Congresses, resigning in 1776 to become commander of the New Jersey militia. Under the state constitution of 1777 he became New Jersey's first governor and remained in this office for the remainder of his life. His daughter married John Jay. His son, **Henry Brockholst Livingston,** 1757–1823, b. New York city, grad. College of New Jersey, 1774, served in the American Revolution and went (1779) to Spain as private secretary to John Jay. On the return journey Livingston was captured (1782) by the British but was soon released. After he was admitted (1783) to the New York bar, he became an ardent Jeffersonian and wrote a number of newspaper articles opposing Jay's Treaty. In 1802 he was appointed a judge of the New York supreme court, and in 1806 Jefferson appointed him Associate Justice of the U S Supreme Court. He remained on the Supreme Court bench for 17 years. See E. B. Livingston, *The Livingstons of Livingston Manor* (1910).

Livingston, Burton Edward, 1875–1948, American plant physiologist, b. Grand Rapids, Mich., grad. Univ. of Michigan, 1898. He invented the atmometer (a device useful in physiological and ecological studies for measuring evaporation in plants) and other instruments for studying and controlling relationships between plants and moisture. He was connected with the U S Bureau of Soils (1905–6), with Carnegie Institution (1906–9), and with Johns Hopkins (1909–40), as professor from 1909 and director of the laboratory of plant physiology from 1913. He wrote *Rôle of Diffusion and Osmotic Pressure in Plants* (1903) and *Distribution of Vegetation in the United States* (with Forrest Shreve, 1921) and edited V. I. Palladin's *Plant Physiology* (3d American ed., 1926).

Livingston, small Caribbean port (pop. 5,151), E Guatemala, at the mouth of the Río Dulce. The growth of PUERTO BARRIOS in the 20th cent. has to a large extent destroyed the commerce of Livingston, but coffee, woods, and bananas are exported, and it is still the port of supply for the Lake IZABAL region.

Livingston 1 Town (pop. 1,170), co. seat of Sumter co., W. Ala., between the Tombigbee river and the Miss. line, founded c. 1833. A state teachers college is here. 2 Village (pop. 1,115), SW Ill., NE of St. Louis, in a farm and coal area, inc. 1905. 3 City (pop. 6,642), co. seat of Park co., S. Mont., on the Yellowstone and N of Yellowstone National Park, inc. 1889. Founded (1882) by the Northern Pacific RR, it became a cattle-shipping point and is still a center of ranching as well as of farming and of tourist trade. 4 Township (pop. 5,972), NE N.J., near the Passaic river SW of Caldwell. Many species of birds are observed near here. 5 Town (pop. 1,527), co. seat of Overton co., N. Tenn., ENE of Nashville, in a farm and timber area. Standing Stone State Park is near by. 6 Town (pop. 1,851), co. seat of Polk co., E. Texas, NE of Houston. Development of oil fields in the 1930s brought new resources to this sawmill town in the pine lands. Near by is the Alabama and Coushatta Indian Reservation.

Livingstone, David (lĭ'vĭngstŭn), 1813–73, Scottish missionary and explorer in Africa. While a medical missionary for the London Missionary Society in Bechuanaland (1841–52) he crossed the Kalahari desert and reached Lake Ngami in 1849 and discovered the Zambezi river in 1851. Inspired with the hope of abolishing the slave trade by opening Africa to Christian commerce and missionary stations, he traveled to Loanda (1853) on the west coast, then, following the Zambezi river, he discovered Victoria Falls (1855) and reached the east coast at Quelimane, Portuguese East Africa, in 1856. His *Missionary Travels* (1857) in South Africa is an account of this journey. He was appointed British consul at Quelimane and given command of an expedition (1857–63) to explore the Zambezi region. He returned to England (1864) and wrote with his brother Charles *The Zambezi and Its Tributaries* (1865). In 1866 he returned to Africa to learn the source of the Nile. He discovered Lakes Mweru and Bangweolo and in 1871 reached the Lualaba tributary of the Congo. Sickness compelled his return to Ujiji on Lake Tanganyika, where H. M. STANLEY found him in 1871 and joined him on a journey (1871–72) to the north end of Tanganyika. In 1873 Livingstone died in the village of Chief Chitambo. Native followers carried his body to the coast, whence it was sent to England and buried in Westminster Abbey. Livingstone's last journals were edited by Horace Waller (1874), his letters by David Chamberlin (1940). See H. M. Stanley, *How I Found Livingstone* (1872), biographies by R. J. Campbell (1930) and J. I. Macnair (1940).

Livingstone, town (pop. 10,730), S. Northern Rhodesia, near the Victoria Nyanza. It was founded in 1905 and was named after David Livingstone, the African explorer. It was the capital of Northern Rhodesia from 1911 to 1935. It is now a tourist center and the site of the Rhodes-Livingstone Museum, which has a collection of native crafts.

Livingstone, Fort, post of the Northwest Mounted Police, W. Man., near Swan River. It was from 1875 to 1877 the headquarters for the mounted police and the capital of the Northwest Territories.

Livingstone College, see SALISBURY, N.C.

Livius Andronicus (lĭ'vēŭs ăndrunī'kŭs), fl. 3d cent. B.C., Roman poet, a Greek, b. Tarentum (Taranto). He was taken slave at the fall of Tarentum and was freed by a noble of the Livian gens, hence his name. He then became a teacher and an actor. He introduced Greek literature into Rome, translating the *Odyssey* and adapting Greek plays which he first produced in 240 B.C. Although his few extant fragments show no signs of genius, he deserves all credit as the founder of the Roman comedy.

Livonia (lĭvō'nēu), region and former Russian province, comprising present ESTONIA and parts of LATVIA (Vidzeme and LATGALE). It borders on the Baltic Sea and its arms, the Gulf of Riga and the Gulf of Finland, in the west and the north and extends E to Lake Peipus and the Narva. Livonia, also known as Livland, was named after the Livs, a Finnic tribe which inhabited the coast when in the 13th cent. the German Livonian Knights (see separate article) conquered the entire region now composing Estonia and Latvia. The knights, in union with the Teutonic Knights, formed a strong state which threatened Lithuania and Novgorod in the 13th and 14th cent. They reduced the native population to servile status. The chief cities—among them RIGA, TARTU, and TALLINN—were German in culture and were dominated by the Hanseatic League. After the dissolution (1561) of the Livonian Order, Livonia was contested by Poland, Russia, and Sweden. COURLAND, in the southwest, became a duchy under Polish suzerainty, and Latgale, in the southeast, became part of Poland. Vidzeme, in the center, passed first to Poland, then (1629) to Sweden, which also held the northern part (Estonia). The Swedish share was conquered (1710) in the NORTHERN WAR by Peter I of Russia, who kept it at the Peace of Nystad (1721). Latgale passed to Russia in 1772. In 1783 Livonia was constituted a Russian province (government), and in 1918 it was divided between Estonia and Latvia.

Livonian Knights (lĭvō'nēŭn), German military religious order, founded c. 1202 by the bishop of RIGA to Christianize the Baltic countries. The knights, also called Brothers of the Sword and Knights Swordbearers, were organized on lines similar to those of the TEUTONIC KNIGHTS. Their habit was a white robe with a red cross and sword. They conquered the Livs, Ests, and Letts, whose territories, subsequently known as LIVONIA (see separate article) and COURLAND, became the domain of the order. In 1236 the knights were severely defeated by the Lithuanians at Siauliai, as a result, they merged with the Teutonic Order, but they continued to form a separate state. After the secularization (1525) of the Teutonic Order, they resumed their independence. In 1557 Ivan IV of Russia invaded their territories, and in 1561 the knights, whose power was weakened by the Reformation, disbanded. However, they retained their vast estates. The "Baltic barons"—the German landed aristocracy which dominated the Baltic provinces until the First World War—were largely descended from the knights. Although they kept the native rural population in servitude and misery, the Livonian Knights, cooperating with the merchants of the Hanseatic League, founded numerous prosperous cities, notably Riga.

Livorno, Italy: see LEGHORN.

Livy (Titus Livius) (lĭ'vē), 59 B.C.–A.D. 17, Roman historian, b. Patavium (Padua), probably of noble family. He lived most of his life in Rome. The breadth of his education is apparent in his evident familiarity with the ancient authors, both Greek and Latin, to whose authority he is in frequent debt. His life work was the *History of Rome* from its founding in 753 B.C. The narrative comes to an end with Drusus (9 B.C.). Of the original 142 books of the work (published in sections) 35 are extant (Books I–X, XXI–XLV). There are fragments of some others, and all but two are known through epitomes. Livy gathered his material from the best sources at his command, chose what seemed to him most authentic and credible, and presented it with the enthusiasm of a patriot in the form of annals. While Livy's accuracy is very questionable, he has achieved and deserved a long popularity because of his imaginative and vivid depictions, his freedom of expression, his intense interest in his work, and his masterly style (developed from Cicero and with a poetic strain).

Lizard, the, promontory, Cornwall, England. The whole peninsula S of the Helford is sometimes called the Lizard, and its southern extremity (the southernmost point of Great Britain) Lizard Point or Lizard Head. The coast has colored serpentine rocks, small coves and bays, wave-hollowed caves, islets (e.g., Asparagus Island), and dangerous reefs. There are two lighthouses.

lizard, reptile of the suborder Lacertilia of the order Squamata, most abundant in warm or tropical regions but with some species in all temperate areas. The body is scaly, there are four limbs in most species, eyelids and ear openings are usually present, and the tail in many forms is easily broken off and regenerated. Many can undergo color changes. The tongue may be short and wide, long and forked, or highly extensible. Most species are insectivorous, but a few are herbivorous or omnivorous. Some lay eggs, others bear live young. Lizards range in size from a length of a few inches to the 8 to 12-foot komodo or dragon lizard. Flying lizards which glide from tree to tree are found in the Malay Archipelago. The bizarre frilled lizard inhabits N Australia. See also CHAMELEON, GILA MONSTER, GLASS SNAKE, HORNED TOAD, IGUANA. See H. M. Smith, *Handbook of Lizards of the United States and Canada* (1946).

Ljubljana (lyōō'blyänä), Ger. *Laibach* (lī'bäkh), city (pop. 120,944), capital of Slovenia, NW Yugoslavia, on the Sava river. It is a trade center with varied industries and is a Roman Catholic archiepiscopal see. Dating from Roman times, Laibach was until 1918 the capital of CARNIOLA, a part of Austria. Its university was founded in 1919. For the international congress held here in 1821, see LAIBACH, CONGRESS OF.

llama (lä'mä), South American domesticated hoofed mammal of the CAMEL family, believed to be a descendant of the guanaco. Smaller than the camel and lacking a hump, it somewhat resembles a large sheep. In color it may be brown, white, black, or piebald. It lives in herds up to the snow line in the Andes. Used as a beast of burden since the days of the Incas, it is also valued for its flesh, wool, and milk. If it is too heavily loaded it refuses to move.

Llandaff (lăn'dăf'), suburb, Glamorganshire, Wales, NW of Cardiff and on the Taff. St. Dubricius founded a church here in the late 6th or early 7th cent. The present cathedral, the oldest parts of which date from 1120, was restored in the 19th

cent. Parts of a palace built by Bishop Urban remain. There is a Protestant theological college

Llandudno (lăndĭd'nō, -dlĕ'nō), urban district (1931 pop. 13,679; 1943 estimated pop 16,000), Caernarvonshire, Wales, on a point of land jutting into the Irish Sea It is connected by bridge with Conway. Llandudno is a popular seaside resort with a mild climate. Great Ormes Head, at the west, is a promontory 679 ft high; Little Ormes Head is east of the town.

Llanelly (lănĕ'lĭ, -ĕ'thlĕ), municipal borough (1931 pop 38,416, 1947 estimated pop 34,810), Caermarthenshire, Wales, on the estuary of the Burry Great quantities of coal are exported, and there are important tin-plate works, steelworks, and copperworks

Llangollen (lăn-gŏ'lĭn, -gō'thlĭn), urban district (pop. 2,937), Denbighshire, Wales, in the Vale of Llangollen on the Dee It is a resort of fishermen and a headquarters for tourists to the antiquities in the vicinity, which include Dinas Bran or Crow Castle, Eliseg's Pillar (a stone monument dating probably from the 9th cent), and Valle Crucis Abbey (1200) The partly Norman Church of St Collen and a 14th-century bridge are noteworthy Plas Newydd, near the town, was the residence of Lady Eleanor Butler and Sarah Ponsonby, the "Ladies of the Vale" or "Ladies of Llangollen," eccentric recluses

Llano (lă'nō), town (pop 2,658), co seat of Llano co , S central Texas, on the Llano river and NW of Austin, inc 1901 The rough country has goat and sheep ranches and some farms, and Llano has processing plants and a notable granite-quarrying industry

Llano Estacado (lă'nō ĕstŭkă'dō), southerly part of the Great Plains plateau, E N Mex and W Texas It ends in the south with the Cap Rock escarpment, which runs from near the northeast corner of the Texas Panhandle almost to the southeast corner of New Mexico The high northern plains of the Panhandle, with their center at Amarillo, Texas, are usually distinguished from the somewhat lower South Plains, of which Lubbock, Texas, is the center, but all are wind-swept grasslands, formerly used for cattle ranching, now dotted with dry-land and irrigated farms and oil and gas fields. The plains are called in English translation the Staked Plain or Staked Plains

llanos (yä'nōs), Spanish American term for prairies, specifically those of the Orinoco basin in Venezuela and part of E Colombia Shunned by man before the Spanish came, the llanos support little wild life except egrets, whose plumes once were a valuable export The region is a vast, hot, sparsely populated savanna broken by low-lying mesas, scrub forest, and scattered palms Elevation above sea level never reaches more than a few hundred feet Plagues of insects, often deadly, make human and animal life almost intolerable During the dry season (Nov to April) the land is sear, the grass brown, brittle, and inedible, during the rains much of the area is inundated Still, until the recurrent revolutions of the 19th cent , the llanos supported several million head of cattle, herded by the hard-riding tough *llanero*, an expert horseman comparable to the GAUCHO of the Argentine pampas The LLANERO has played an important role in Venezuelan history as an ardent henchman of successive revolutionary *caudillos* Today the cattle industry is being revived and agriculture encouraged

Llewellyn, Richard (lōō'ĕlĭn), 1907–, Anglo-Welsh novelist and film writer, whose full name is Richard David Vivian Llewellyn Lloyd He is the author of *How Green Was My Valley* (1939), a story of life in the S Wales mining areas, and *None but the Lonely Heart* (1943). Both novels have been successfully filmed in the United States *A Few Flowers for Sinner* appeared in 1950

Llewelyn ap Gruffydd (lōō-ĕ'lĭn ăp grŭf'fĭdh, thlōō'-lĭn, grĭ'fĭdh), d 1282, Welsh prince, grandson of Llewelyn ap Iorwerth He early gained the allegiance of minor Welsh princes and shortly acquired in North Wales authority as wide as that of his grandfather In the BARONS' WAR he was allied with Simon de MONTFORT against Henry III and increased his power Even the enmity of the English border lords and Simon's downfall (1265) did not check Llewelyn's progress, by the Treaty of Montgomery (1267) he was recognized as prince of Wales—the first official use of the title On the accession of EDWARD I in 1272, Llewelyn, at the height of his prestige, refused homage to the English king In the English invasion of 1276 he lost all but a portion of North Wales, a second rebellion in 1282 brought total disaster The elegies of Welsh bards express the nation's grief at the passing of this last fighter for Welsh liberties (scion of one of the oldest ruling families of Western Europe) The name also appears as Llewelyn ap Griffith

Llewelyn ap Iorwerth (ĕôr'wĕrth) (Llewelyn the Great), 1173-1240, Welsh prince He first proved his capacity by wresting North Wales from his rivals and by taking (1199) the border fortress Mold from the English His friendship with JOHN of England (whose illegitimate daughter Joan was married to Llewelyn in 1206) was strained after 1208, and the Welsh prince sided with Pope Innocent III against John and was a powerful ally of the English barons in their revolt His rights and those of the Welsh were recognized in the MAGNA CARTA (1215) Thereafter as overlord of the descendants of the Lord Rhys (RHYS AP GRUFFYDD), he set about establishing his power and destroying Norman castles in South Wales Under HENRY III of England he was a magnate of the realm until 1238, when he became a Cistercian monk and left his principality to his son Dafydd Llewelyn's munificent patronage of the bards brought a renaissance of Welsh letters He was an able soldier, a generous supporter of the Church, and, above all, a zealous fighter for national unity

Lloyd, David, c 1656–1731, political leader in colonial Pennsylvania, b Wales Having been commissioned attorney general of Pennsylvania by William Penn, Lloyd arrived in Philadelphia in 1686 He later became a member of the provincial assembly, acting as its speaker and serving in the provincial council on several occasions After 1703 Lloyd assumed the leadership of the antiproprietary party there, championing the rights of the people over the proprietaries and governors and coming into constant sharp conflict with James LOGAN He served as chief justice of Pennsylvania from 1717 until his death

Lloyd, Henry Demarest, 1847–1903, American reformer, b New York city, grad Columbia, 1867 He was on the editorial staff of the Chicago *Tribune* from 1872 to 1885, but resigned to study social problems His *Wealth and Commonwealth* (1894) is an attack on monopolies, based especially upon the methods of the Standard Oil Company He traveled widely, writing on conditions in various countries and always giving support to the causes of the underprivileged See biography by C A Lloyd (1912).

Lloyd George, David, 1st **Earl Lloyd-George of Dwyfor** (dōō'ĕd'vôr), 1863–1945, British statesman In 1890 Lloyd George was elected as a Liberal to Parliament by the Welsh constituency that he was to represent for 54 years He was raised to the peerage only a few months before his death and never sat in the House of Lords After his election to the House of Commons as a young man Lloyd George became known as a radical and an anti-imperialist He bitterly opposed the South African WAR In 1906 he entered Campbell-Bannerman's ministry as president of the Board of Trade, and in 1908 he was raised to be chancellor of the exchequer by Herbert Asquith His budget of 1909–10, providing a system of social insurance partly financed by land and income taxes, was blocked by the House of Lords The Lords were forced to capitulate, however, when Lloyd George and the Asquith ministry took the issue to the people in a general election (1910) It was the virtual end of the veto power of the Lords During the First World War, Lloyd George became minister of munitions (1915), then minister of war (on the death of Lord Kitchener, June, 1916), and finally (Dec , 1916), prime minister in the new coalition cabinet His war policy was bold and aggressive, and he was largely responsible for the unification of military command under Marshal Foch, although Lloyd George was often at odds with other Allied military leaders He was one of the "Big Four" statesmen (with Georges Clemenceau, Vittorio Orlando and Woodrow Wilson) at the Paris Peace Conference (1919) There was much dissatisfaction with his handling of the Irish question (see IRELAND) and the Greco-Turkish conflict The Conservatives withdrew from the coalition, and his ministry fell (1922) Lloyd George continued active in Parliament and strongly opposed the appeasement policy that preceded the outbreak of the Second World War See his *War Memoirs* (6 vols , 1933–36, 2 vols , 1943), and *Memoirs of the Peace Conference* (2 vols , 1939), biographies by John Edwards (2 vols , 1929), and Malcolm Thomson (1948)

Lloydminster (loid'mĭn'stur), town (pop in Sask , 1,135, in Alta , 698) on the Alta.-Sask boundary WNW of Battleford, Sask , founded 1903 Farming and ranching are the chief activities of the region, which has oil and natural gas In 1930 the separate municipalities were merged

Lloyd's, London insurance underwriting corporation of some 300 individual syndicates. Founded in the late 17th cent by a group of merchants, shipowners, and insurance brokers at the coffeehouse of Edward Lloyd, the association is now international in its scope It is primarily concerned with the underwriting of marine insurance, but issues insurance against many other types of risk, except life insurance *Lloyd's List* is published daily and contains world-wide shipping reports and mercantile information *Lloyd's Register of Shipping*, also affiliated with Lloyd's, is an annual publication containing detailed information, such as age, tonnage, class, construction, of the vessels of all nations, together with supplementary data about docks, harbors, and port facilities See Charles Wright and C. E Fayle, *History of Lloyd's* (1928), Ralph Straus, *Lloyd's: a Historical Sketch* (1937)

Llullaillaco (lyōōlyīyă'kō), extinct volcano, 22,014 ft high, on the border of Chile and Argentina One of the highest peaks in the Andes, perpetually snowcapped, it overlooks the only pass N of USPALLATA PASS for rail and highway traffic between Chile and Argentina

Llywarch Hen (thlĭ'ôôărkh hĕn'), fl late 6th cent , Welsh poet The poetry attributed to him conforms more to the popular idea of Celtic poetry than does that of other bards of the period, being elegiac rather than epic It is characterized by an exquisite simplicity and a plaintive melancholy reminiscent of the Irish keen

Loa (lō'ä), river, c 270 mi long, N Chile, flowing S from the Andes, west and north through the desert of ATACAMA, then W to the Pacific Longest of the Chilean rivers, it is not navigable, but affords some water supply for mining communities

loadstone see MAGNETITE

loam, soil composed of clay, sand, and silt The particles are of many sizes and are rather evenly mixed Loam has a gritty texture but is plastic when moist Loams are valuable for many general purposes, since they are more retentive of moisture and contain more nutriment than sandy soil According to the preponderance of their ingredients loams are designated as sandy, clay, or silt loams

Loammi (lōăm'ī) [Heb ,=not my people], figurative name of Israel before reconciliation with God Hosea 1 9,10 Cf AMMI

loan, anything given on condition of its return or repayment of its equivalent A loan may be acknowledged by a bond, a promissory note, or an IOU Personal loans were interest free in ancient civilizations, and the early Christian Church forbade the taking of interest In feudal European society, loans were little needed by the great mass of relatively self-sufficient and noncommercial peasants and serfs, but kings, nobles, and ecclesiastics were heavy borrowers for personal expenditures Merchants and other townsmen, especially the Jews, were the moneylenders, and various devices were found for circumventing the prohibition of usury With the rise of a commercial society, restrictions on the taking of interest were gradually relaxed Today, banks and finance companies make most loans, usually on COLLATERAL such as stocks, personal effects, and mortgages on land and other property, or on assignments of wages CREDIT UNIONS have attained some importance in making personal loans at low interest rates Pawnbrokers lend money on the security of articles left in their shops

Loanda, Angola see LUANDA

Lobachevsky, Nikolai Ivanovich (nyĭkŭl' ēvä'nuvĭch lōbŭchĕf'skē), 1793–1856, Russian mathematician A pioneer in non-Euclidean geometry, he originated a system of geometry which challenged Euclid's fifth postulate that only one line parallel to a given line can be drawn through a fixed point Lobachevsky first announced his system in 1826, he subsequently wrote several expositions of it, including *Geometrical Researches on the Theory of Parallels* (originally pub 1840 in German, Eng trs , 1891, 1914), and a statement of his completed work, *Pangeométrie* (issued 1855 in Russian and French) A graduate of the Univ of Kazan, he remained there as teacher (1812), professor (1816), and rector (1827) Despite his efficient and devoted service, he was relieved (1846) by the government of his posts of professor and rector

lobbying, practice of influencing legislation or government officials by agents who serve special interests The pressure may be exerted through data, publicity, threat of political reprisals, or pledges of support In the United States lobbying has become an accepted part of the political system, supplementing geographical representation by functional representation It is defended as a necessary method by which voters make known their approval or dislike of proposed legislation and is attacked for its real or potential abuses Large sums of money have been spent by such organized groups as corporations, railroads, trade associations, labor unions, public utilities, and farm groups seeking to secure passage of legislation favorable to their interests, and these and many other organizations representing business, racial, educational, and public welfare interests maintain permanent lobbies in Washington and in state capitals There have been many attempts to control lobbying through legislative acts, among them the Regulation of Lobbying Act of 1946, requiring registration of lobbyists, with a statement of their purposes and periodical reports of their expenditures See K G Crawford, *The Pressure Boys* (1939), V. O Key, *Politics, Parties, and Pressure Groups* (1942), Stuart Chase, *Democracy Under Pressure* (1945)

Lobel or **l'Obel, Matthias de** (du lōbĕl'), 1538–1616, Flemish botanist and physician. He lived mainly in England and was botanist and physician to James I He attempted a classification of plants based on leaf form and wrote *Stirpium adversaria nova* (with Pierre Pena, 1570) and *Plantarum seu stirpium historia* (1576) The genus *Lobelia* is named for him

lobelia (lōbē'lyŭ), any plant of the genus *Lobelia*, chiefly annual or perennial herbs with tubular flowers split on the upper side. North American

species include the beautiful scarlet cardinal flower (*Lobelia cardinalis*), nearly exterminated as a wild flower but still in cultivation and adapted to shady places, the great or blue lobelia (*Lobelia syphilitica*), also in cultivation, said to have been used by Indians to treat syphilis and introduced into the Old World for that purpose but later abandoned, and the Indian tobacco (*Lobelia inflata*) with a tobacco-like odor, once a popular home remedy, now a standard medicament considered poisonous in quantity. Introduced lobelias are mostly cultivated as annual garden and house plants. These have flowers varying in color but predominantly blue, sometimes double, the plants are compact, trailing, or erect in form.

Lobengula: see MATABELE

Lobito (lōbē'tō, lōvē'tō), town (pop. c 17,000), Angola, on Lobito Bay, an arm of the Atlantic. It is the chief port of the colony and the terminus of a railroad to the rich copper-producing area of Katanga in Belgian Congo.

Lob Nor or **Lop Nor** (both lōp'nôr'), Mandarin *T'ai-t'e-ma*, lake, SE Sinkiang prov., China, in the Tarim river basin. The lake is in a level area, and it has shifted position several times.

Lobos Islands (lō'bōs) or **Seal Islands,** off the coast of NW Peru. They are valuable for their deposits of guano.

lobster, marine crustacean with five pairs of jointed legs, the first pair bearing large pincerlike claws of unequal size. The exoskeleton, which covers the body and appendages, is usually greenish brown. When cooked it turns bright red. Large numbers are taken for food on the Atlantic coasts of North America and Europe. Lobsters crawl briskly over the ocean bottom and swim backwards with great speed by movements of the tail and abdomen, but locomotion on land is difficult. They eat living and dead animal food. The eggs are fastened to the swimmerets of the female for 10 months or more until they hatch. While carrying the eggs the female is called a "berried" lobster. In America the common lobster is *Homarus americanus*. It is found along the coast from Labrador to North Carolina, but is rare in the southern part of its range. The chief fisheries in the United States are in Maine and Massachusetts. Laws regulating lobster fishing do not yet provide adequate protection. Hatcheries are established at Boothbay Harbor, Maine, and at a few other places on the coast. Lobsters are caught in traps or "pots" made of wooden slats, with an entrance through a mesh cone which prevents the animal's escape. The European lobster of the genus *Homarus* is similar to the American species. The spiny or rock lobsters are sea crayfish of the genus *Palinurus*, found chiefly in the warmer seas of both hemispheres. The flesh is much like that of the true lobsters.

local government, political administration of the concerns of the smallest groups of citizens. In Western European culture and its variations (e.g., in Japan, in Communist states) an important distinction in methods is found between urban and rural government, natural because in cities there are many more matters to be regulated. Hence in the United States (apart from the unique New England TOWN) the territory is usually unincorporated if it is not thickly populated, urban areas have limits and governments established (incorporated, chartered, organized) by state action. The CITY is the norm of incorporated government, but some states differentiate smaller municipalities, e.g., as boroughs or villages (see CITY GOVERNMENT). Incorporated governments have freedom for wide purposes, as borrowing money, taxing, maintaining order, controlling utilities, and keeping up schools. Rural areas in most of the United States are dependent on COUNTY government for law and order, but a group of citizens will often have an incorporation for one specific function, as operating schools, this is a school district, and there may be other applications of the system, as in power or water districts. The English-speaking nations have similar political forms, and they share with some others (e.g., Switzerland, Iceland, and nations of Scandinavia) the concept of local government as handled best when left in local hands and the belief that local freedom and self-government are a popular right. Hence, whenever a function of government is taken out of local hands, it is explained in these countries on the grounds of efficiency. In England a series of reforms (especially in 1835, 1882, 1888, and 1926) has regularized local government. The normal incorporated municipality (borough) has a mayor and a council of aldermen. London has special features. A borough may be exempted from county jurisdiction; it is then a county borough. A parliamentary borough is simply a district represented in Parliament. In the United Kingdom the term *city* is a historic title of honor conveying nothing about the government. In other than the English-speaking countries and those following their system the rule is centralization. The classic and typical case is France as reorganized in the French Revolution and by Napoleon. Until that period local government had remained, as in England, in the hands of the local gentry and freeholders. The Revolutionary authorities, to hasten the propagation of the standards set up in Paris, replaced the power of the local authorities not by giving it to the people but by removing it from local levels altogether, the provinces were abolished, and all local rights were wiped out. The nation was reorganized from the top down with the most extensive uniformity, even in infinitesimal matters (e.g., painting the city hall) decisions are taken above the local level. The divisions in descending order are departments, *arrondissements*, cantons, and communes, the system is headed by the minister of the interior, who thus has a control of national life unparalleled in English-speaking countries. The schools and courts are under other ministries. The system was imitated all over Europe, including the Communist states. In the French system there are locally elected councils (called soviets in Communist states), but they have no power. In France there was opposition from the start (naturally crushed as being counterrevolutionary), in the 20th cent., bureaucratic control of local government has been increasingly attacked as inefficient. The occupation authorities in Western Germany and in Japan after the Second World War prescribed increased local self-government as a requisite step to develop in the people a sense of democracy. See William Anderson, ed., *Local Government in Europe* (1939), R. H. Wells, *American Local Government* (1939).

local option see LIQUOR LAWS and PROHIBITION.

Locarno (lōkär'nō), town (pop. 6,760), Ticino canton, Switzerland, on Lago Maggiore. Taken from Milan by the Swiss cantons (1512), it was included (1803) in Ticino canton. In 1925 the Locarno Pact was signed in the palace of justice. There is a small jewelry industry. The beauty of the region attracts tourists, who far outnumber the permanent population.

Locarno Pact, 1925, series of treaties concluded at a conference held at Locarno, Switzerland, by representatives of England, France, Germany, Italy, Belgium, Czechoslovakia, and Poland. It was for the first time since the First World War that Germany met the other powers on an equal footing. Under the leadership of Aristide BRIAND, Gustav STRESEMANN, and Austen CHAMBERLAIN, a series of treaties of mutual guarantee and arbitration were signed. In the major treaty the powers individually and collectively guaranteed the common boundaries of Belgium, France, and Germany as fixed by the Treaty of Versailles of 1919. Germany, Belgium, and France agreed not to resort to aggressive war against each other, and Germany, agreeing to demilitarize a strip of the RHINELAND, was guaranteed entry into the League of Nations. The treaties, which promised to become the foundation of European security, were hailed as ushering in an era of peace. A serious flaw in the pact was the absence of a guarantee of the eastern frontiers of Germany, the result of this weakness was the conclusion of mutual defense pacts between France and Poland and France and Czechoslovakia against possible German aggression, and the refusal of France to disarm.

locative (lōk'-) [Latin,=for placing], in the grammar of certain languages (e.g., Sanskrit), CASE referring to location. Nouns in this case are often translatable into English phrases beginning with *at*, *in*, or *on*.

Loch (lōkh, lōk). For names of Scottish lakes and inlets beginning thus, see second part of name, e.g., for Loch Awe, see AWE, LOCH. See also LAKE.

Lochaber (lōkhä'bur, -ä'bûr), mountainous district, Inverness-shire, Scotland, E of Lochs Leven and Linnhe. Glen, moor, mountain, and water are celebrated in Allan Ramsay's "Lochaber No More" (as a song sometimes titled *Farewell to Lochaber*).

Loches (lōsh), town (pop. 4,102), Indre-et-Loire dept., NW central France, in Touraine, on the Indre. In its castle (15th–16th cent.) is the tomb of Agnès Sorel. The dungeon was first used as a state prison by Louis XI. Loches was the birthplace of Alfred de Vigny.

Lochgilphead (lōkhgilf'hĕd), burgh (pop. 974), Argyllshire, Scotland, at the head of Loch Gilp, a small arm of Loch Fyne. The Crinan Canal (9 mi. long) was cut from here to the Sound of Jura in 1801, to avoid the 75-mile voyage around the Mull of Kintyre.

Lochiel, Sir Ewen Cameron of: see CAMERON, SIR EWEN.

Lochiel, the Gentle: see CAMERON, DONALD.

Lochner, Stephan (shtĕ'fän lōkh'nûr), d. 1451, German religious painter, chief representative of the school of Cologne, known also as Meister Stephan. His earliest known work is a *Last Judgment*. His masterpiece is the altarpiece called the *Dombild* in the Cologne cathedral. The central panel represents an *Adoration of the Kings*; the wings, *St. Ursula* and *St. Gereon*. Other works include *Virgin with the Violets*, *Presentation at the Temple*, and *Madonna of the Rose Bush*. Lochner's fine, brilliant color and tender sentiment have made him one of the best-loved German primitives.

Lochy, Loch (lōkh lō'khē), lake, Inverness-shire, Scotland. It is part of the CALEDONIAN CANAL.

lock, air: see AIR LOCK.

lock, canal, enclosed stretch of water with a gate at each end, used for raising or lowering a vessel from one water level to another. Locks are used in rivers and canals where the water course is not level and at the entrance to docks. The procedure of passing to a higher level starts with the lowering of the water in the lock until it is on a level with the floating vessel. Then the gate is opened, the ship moves within the lock, and the gate is closed. Water is then allowed to enter the lock from the higher level until the water in the two is at the same level. The gate at the higher end is then opened and the ship passes to the higher level. The procedure is reversed when the vessel is proceeding from a higher to a lower level. Floating or rolling caissons are used to close the lock entrance. Most modern locks are equipped with an intermediate pair of gates, which makes it possible to use only part of the lock for small ships. The water pours into the locks from culverts in the masonry structure of the lock wall. The influx of water is controlled by sluice gates. Locks were for many years made of wood, but more recently steel has been used. The gates swing on heelposts at the sides of the locks and meet at the center of the entrance. They are constructed in such a way that when closed they form an arch with the convex side towards the pressure of the water. The gates are opened and closed by either hydraulic or electrical power. Modern canal locks are able to lift ships up to 40 ft. Among the well-known canal locks are those of the PANAMA CANAL and those in the canal at Ijmuiden, Netherlands.

lock and key. A lock usually consists of a sliding, pivoted, or rotary bolt guarded by an obstacle either fixed (warded) or movable (tumbler) and controlled by a key having a shank which is flat or in the form of a pipe or a pin. The lock and key were known to the Egyptians and other ancient peoples. They are mentioned in the Bible, a celebrated passage is Mat. 16:19, the bestowal of the keys of the kingdom of heaven upon Peter. Until the 19th cent. locks and keys were usually massive and ornate, modern ones tend to be utilitarian. Warded locks were known to the Etruscans, and the combination lock, opened by dialing a sequence of letters or numbers, was used in the 17th cent., but most early locks were of the pin-tumbler type. The modern door lock is a compact pin-tumbler cylinder lock of the type developed by Linus Yale. The warded lock, the simplest and least secure, is used for most padlocks. The lever tumbler, probably originated in China, is often used for safe-deposit boxes. The time lock, suggested in 1831 but first successfully used c. 1875, has a clock mechanism set to prevent opening until a time previously fixed. The key symbolizes authority in religion and art, the coat of arms of the Holy See bears two keys crossed.

Locke, David Ross see NASBY, PETROLEUM V.

Locke, John (lŏk), 1632–1704, English philosopher, founder of British empiricism. Educated at Christ Church College, Oxford, he became a lecturer there (1660) in Greek, rhetoric, and philosophy. Throughout his life he was interested in the new science and in medicine, which he briefly practiced. In 1667 he left Oxford for employment by the 1st earl of Shaftesbury, with whom he was associated for many years. He was conversant with public affairs and was in frequent contact with congenial thinkers, as a result of whose stimulation he came to set down his own ideas. In 1675 when Shaftesbury fell from power, Locke left England for France, where he met leaders in science and philosophy. Returning to England in 1679, he retired soon to Oxford, where he stayed quietly until, suspected of radicalism by the government, he went to Holland and remained there several years (1683–89). In Holland he completed the famous *Essay concerning Human Understanding* (1690), which was published in complete form after his return to England at the accession of William of Orange (William III) to the English throne. In later life he held various minor offices and acted as an occasional state adviser. His fame increased, and he became known in England and on the Continent as the leading philosopher of freedom. His main works included, in addition to the famous *Essay*, his *Letters on Toleration*, which appeared from time to time; *Some Thoughts concerning Education* (1693), and *The Reasonableness of Christianity* (1695). Locke made important contributions to philosophy in almost every field, but his greatness is chiefly a function of his method. He invariably stressed the necessity of tolerating opposite opinion and maintained that each man can, with honesty and reason, see truth in differing aspect. His system was practical and was anchored in human experience. He thought in concrete details and seemed distrustful of metaphysical speculation. This resulted in an occasional inconsistency and a lack of coherence which did not appear to bother Locke. In psychology he held that matter harbored primary and secondary qualities, the primary giving the stuff of science, the secondary being the source of men's perceptions. A nominalist, he denied any independent existence to abstractions. The mind of each person at birth is a blank slate, a *tabula rasa*,

on which his personal experiences inscribe themselves. With these experiences, and only with these, he may reason. Locke's theory of the process of reasoning forecast associationist doctrines In ethics Locke maintained that happiness and pleasure are the pursuit of all people In the long run the private happiness and the general good coincide, and therefore prudence and attention to the long run are virtuous Locke held that eventual reward and punishment in the afterlife are balancing factors rendering inadequate any pleasure or happiness calculus of the moment. Passions must be controlled through piety He urged in his *Letters on Toleration* that there should be an established church with the broadest possible toleration Only atheism and Catholicism should be legislated against as inimical to religion and the state Locke is most renowned for his political theory Contradicting Thomas Hobbes, Locke believed the original state of nature was happy and characterised by reason and tolerance In that state all men were equal and independent, and none had a right to harm another in his "life, health, liberty, or possessions" The state was formed by social contract because in the state of nature each was his own judge, and there was no protection against those who lived outside the law of nature The state should be guided by natural law Rights of property are very important, for each man has a right to the product of his labor. Locke forecast the labor theory of value The policy of checks and balances as followed in the Constitution of the United States was set down by Locke, as was the doctrine that revolution in some circumstances is not only a right but an obligation. He wrote a model constitution, never put into effect, for the colony that later became North and South Carolina His influence on philosophy and political theory is incalculable Berkeley, Hume, and the other empiricists were directly influenced Voltaire and Rousseau show the impact of his ideas, and the theorists of the American Revolution drew heavily upon his politics See S P Lamprecht, *The Moral and Political Philosophy of John Locke* (1918), H J Laski, *Political Thought in England from Locke to Bentham* (1920)

Lockeport (lŏk'pôrt), town (pop 1,084), SW N S, SW of Liverpool and on the coast It is a herring fishing center

Locker-Lampson, Frederick, 1821–95, English author He is remembered for his light verse in *London Lyrics* (1857) and other volumes *My Confidences* (1896), memoirs, was edited by his son-in-law, Augustine Birrell, who also wrote his biography (1920)

Lockhart, John Gibson, 1794–1854, Scottish lawyer and literary critic, son-in-law and biographer of Scott Educated at the Univ of Glasgow and at Oxford, he was a classical scholar and a student of Spanish and other modern languages He contributed to *Blackwood's Magazine* and was editor of and contributor to the *Quarterly Review* (1825–53) Among his works are a volume of ballads from the Spanish, several novels, a biography of Burns (1828), and a history of Napoleon (1829), but his fame rests on his *Memoirs of the Life of Sir Walter Scott* (7 vols, 1837–38), generally ranked among English biographies as second only to Boswell's *Johnson* See biographies of Lockhart by Andrew Lang (1897) and Gilbert Macbeth (1935)

Lockhart, city (pop 5,018), co. seat of Caldwell co, S central Texas, SSE of Austin, founded 1848, inc 1870. In a region of cotton and dairy farms, the city has a mattress factory and other small industries There are oil fields near by Lockhart State Park, to the northeast, encloses the battlefield of Plum Creek, where Texans defeated the Comanche in 1840

Lock Haven, industrial city (pop, 10,810), co seat of Clinton co, N Pa., at the junction of Bald Eagle Creek and the West Branch of the Susquehanna SW of Williamsport, settled 1769, inc as a borough 1840, as a city 1870 Its manufactures include airplanes, brick, chemicals, furniture, and metal products It has a state teachers college

lockjaw: see TETANUS

Lockland, city (pop 5,601), SW Ohio, near Cincinnati Aircraft, chemicals, and rock-wool insulation are among its products

Lockney, town (pop 1,231), NW Texas, NNE of Lubbock, in a grain area on the Llano Estacado, settled 1894, inc 1907

lockout, dismissal and prevention of reemployment, adopted by employers to resist labor demands or to break a strike by importing new workers. Employers sometimes accomplish the same purpose without stopping production by discharging individual labor leaders. Lockouts have generally been regarded as legal by the courts, although in some cases they have been held unlawful if in violation of the terms of a joint agreement See E. S. Oakes, *Organised Labor and Industrial Conflict* (1927), Florence Peterson, *Strikes in the United States, 1880–1936* (1938).

Lockport, 1 City (pop. 3,475), NE Ill., SW of Chicago and near Joliet; laid out 1837, inc. 1853. Here are the locks of the old Illinois and Michigan Canal and of the modern Chicago Sanitary and Ship Canal, which connects at Lockport with the Des Plaines river and is a link on the Great Lakes to Gulf waterway 2 Industrial city (pop 24,379), co seat of Niagara co, W N.Y, on the Barge Canal and NE of Buffalo; settled 1816, inc as a village 1829, as a city 1865 It was built around a series of locks on the old Erie canal Steel and paper products are made

Lockwood, Belva Ann Bennett, 1830–1917, American lawyer and reformer, born on a farm near Lockport, N Y. She was the first woman admitted to practice before the U S Supreme Court Early widowed, she taught school to support herself and her child until she went to Washington, D C, where she married (1868) Dr Ezekiel Lockwood, studied law, and was admitted to the bar in 1873 Finding that women could not practice before the Supreme Court, she worked to secure passage (1879) of the law to permit this She wrote and lectured for peace, temperance, disarmament, and woman suffrage and was influential in securing equal pay for women in Federal employment In 1884 and again in 1888 she was the Equal Rights party's candidate for President She represented the United States at the Geneva Congress of Charities and Corrections (1896)

Lockwood, James Booth, 1852–84, American arctic explorer, b Annapolis, Md In 1873 he was commissioned second lieutenant in the U S army In 1881 Lockwood joined the arctic expedition of Adolphus W Greely, in the course of which he performed two noteworthy feats—he led a sledging party to Mary Murray Island, off N Greenland, thus achieving a record for the most northerly point reached up to that time (lat 83°24′ N, according to his calculations), and later (1883) he crossed Grant Land on Ellesmere Island to the west shore He died at Cape Sabine, as did other members of the ill-fated Greely expedition

Lockyer, Sir Joseph Norman (lŏk'yûr), 1836–1920, English astronomer, educated on the continent of Europe One of the first to make spectroscopic examination of the sun and stars, he devised (1868), independently of P J C Janssen, a method of observing solar prominences with the spectroscope in daylight In the same year he identified the element helium in the sun and applied the name chromosphere to the layer or envelope of gas around the sun He was elected to fellowship in the Royal Society (1869) and served as professor of astronomical physics of the newly founded Royal College of Science and director of the Solar Physics Observatory (1890–1913) Between 1870 and 1905 he headed eight government expeditions to observe total eclipses of the sun In 1897 he was knighted His works include *Studies in Spectrum Analysis* (1872), *Contributions to Solar Physics* (1874), *The Chemistry of the Sun* (1887), and *Recent and Coming Eclipses* (1897) His son **William James Stewart Lockyer,** 1858–1936, also an astronomer, studied at Cambridge and at the Univ of Göttingen He was director (1920–36) of the Norman Lockyer Observatory in Sidmouth, Devonshire

Locle, Le (lû lô'klû), town (pop 11,336), Neuchâtel canton, Switzerland It has a very old watchmaking industry

Locofocos (lō"kōfō'kōz), name given in derision to the members of a faction that split off from the Democratic party in New York There were in 1835 many radical Democrats who were anxious for reforms and were bitterly hostile to the privileged classes that had the control of Tammany in New York city The chief grievance was against the bankers and banking The working classes were discontented with the failure of the New York politicians to give them aid and to reform the government At a Tammany Hall meeting held in the Wigwam on Oct. 29, 1835, to ratify the Tammany nominations, the revolt got under way The anti-bank men voted down the chairman selected by the organization and were gaining a victory over their opponents, before the meeting could be reorganized, the gas was turned off and the hall plunged in darkness The reformers, however, continued their work by the light of candles and of matches It was from the name of the "locofoco" matches that the party name came. The new group drifted into calling itself a new party, the Friends of Equal Rights or the Equal Rights party Theirs was a leveling program, vague in details but fervid in feeling They opposed monopolies and corporations and stood for pure democracy. A Workingman's party united with them in this opposition to privilege, and for several years the group had a very disturbing and vitalizing influence on the regular parties. They nominated a candidate for mayor of New York city in 1836 and in September of that year held a state convention But with the adoption of the more or less radical ideas by the Van Buren Democrats in 1837, the Equal Rights men were left without a platform and were reabsorbed into the Democratic party For years afterward the name Locofoco survived as an epithet hurled by the Whigs at the Democrats.

locomotive, a RAILROAD engine. Richard TREVITHICK built and operated (1803–4) a steam engine for hauling cars on a track in Wales. George STEPHENSON built his first locomotive, the *Blucher*, in 1814, and in 1829 he demonstrated with his famous *Rocket* the practicability of the steam engine for locomotion His engine had four wheels (one pair being drivers) and a boiler 6 ft long, working at a pressure of 50 lb The locomotive, when running light, attained 29 mi per hour. The first locomotive in the United States was designed and tested on a private track by John Stevens in 1826 The English-built *Stourbridge Lion*, imported c 1829, was not a commercial success, the engine being too heavy for the American track The *Tom Thumb* (1830), built by Peter Cooper for the BALTIMORE & OHIO RAILROAD, was the first practical American-built locomotive Matthias Baldwin's first engine, *Old Ironsides*, built in 1832, long remained in operation In 1832 J. B. Jervis built the first locomotive with a swivel truck at the forward end, giving freedom of action which permits a locomotive to pass more safely around corners. The modern reciprocating steam locomotive is a self-contained power unit consisting essentially of a STEAM ENGINE and a BOILER (of the horizontal fire-tube type) with fuel and water supply Superheated steam, controlled by a throttle, is admitted to the cylinders by a suitable valve arrangement, the pressure on the pistons being transmitted through the main rod to the driving wheels The driving wheels, which vary in number, are connected by side rods The exhaust steam from the cylinders is allowed to pass up through the smokestack, inducing a draft through the firebox which hastens the combustion of the fuel Early locomotives used wood for fuel, modern engines generally use coal or fuel oil An important factor in locomotive design is the size of the driving wheels and the distribution of weight on them, since it is from them that tractive force is obtained This factor governs the difference in wheel arrangement between freight and passenger locomotives, freight locomotives having small driving wheels carrying a large proportion of weight, while the passenger locomotives have larger and fewer wheels, with leading and trailing trucks to carry the large boiler. Locomotives are usually classified under the Whyte system by the number and arrangement of the wheels—an engine classified as 2–6–0 would have one pair of wheels under the front truck, three pairs of coupled or driving wheels, and no wheels under the trailing truck In some cases the truck wheels of the tender (fuel carrier) are added The largest and most powerful locomotives used in the United States are usually of the articulating or Mallet, 2 8–8–4 or 2–10–10–2, type (introduced in 1904), having two complete sets of frames and cylinders flexibly connected to enable them to pass around sharp curves Electric locomotives, introduced c 1895, range from the small type used in plants and coal mines for local hauling to the great engines used on railroads Electric locomotives are generally provided with two or three motors. Power is collected from a trolley or pantagraph running on an overhead wire or from a third rail at the side Battery locomotives, used only for local haulage, carry electric storage batteries of about 90 kilowatt hours' capacity, giving a speed of approximately 3 mi per hour Electric railroad locomotives are used chiefly on steep grades and on runs of high traffic density, and although highly efficient they are not more widely used because of the cost of electric substations and overhead wires or third rails. Diesel-electric locomotives, introduced in the United States c 1924, have been widely adopted as switching engines and are rivaling the steam engine for freight and passenger runs Electric power is generated by a Diesel engine, and the energy is applied through electric motors to the driving axles. The relative importance of the reciprocating steam locomotive and the Diesel-electric locomotive will depend in part on the availability of fuel and on the progress of new types of engines, e g, the steam turbine and the gas turbine See R S Henry and Otto Kuhler, *Portraits of the Iron Horse* (1937), P W Kiefer, *A Practical Evaluation of Railroad Motive Power* (1947)

locomotor ataxia (lōkūmō'tur utăk'sēu) or **tabes dorsalis** (tā'bēz dôrsā'lĭs), chronic progressive disease of the nervous system Symptoms include sharp, shooting pains (either paroxysmal or lasting from a few seconds to a few hours) and visceral pains known as crises, especially gastric crises accompanied by retching and vomiting. Because of the impairment of the senses determining position and vibrations, failure of muscular coordination results and uncertainty in walking occurs (a condition called ataxia) The pupils of the eyes are pinpoint in size, fail to react to light, and may be unequal in size (Argyll-Robertson pupil). Optic degeneration may occur, impairing vision and finally resulting in blindness There may be a lowering of the lid of the eye (ptosis). The joints are sometimes involved, the characteristic tabetic joint (Charcot's joint) is swollen and painless Locomotor ataxia occurs in syphilitic individuals, the spinal Wassermann test is usually positive

locoweed or **crazyweed** [Span, loco=crazy], any of several species of the genera *Astragalus* and *Oxytropus*, leguminous plants that, when eaten by horses, cattle, or sheep, cause a nervous disorder

called loco disease. The locoweeds are perennials native to the West and Southwest and have pea-like flowers and pinnately compound leaves The more common kinds include the purple-flowered woolly locoweed (*Astragalus mollissimus*) and the purple- or white-flowered stemless locoweed or crazyweed (*Oxytropus lambertii*). Not all species of these genera have been found poisonous

Locris (lō'krĭs), region of ancient Greece The Locrians were probably in the country before the arrival of the Phocians There were in historical times three parts Epicnemidian Locris [Gr ,=at Mt. Cnemis], a strip of the south shore of the Malian Gulf, was bounded on the west by Malis, on the south and east by Phocis Its chief place was Thronium Eastern, or Opuntian, Locris [Gr ,=of Opus] was separated from Epicnemidian Locris by a strip of Phocis 5 mi wide It was part of the shore of the Euboic Gulf and was bounded on the south by Boeotia. Opus was its main port Western, or Ozolaean, Locris, was on the north coast of the Gulf of Corinth and had for its principal towns Amphissa and Naupactus One of the earliest Greek colonies in Italy was founded by Locrians and called Epizephyrian Locris [Gr ,=western, or near the promontory of Zephyrium], it was in the east of the peninsula, 30 mi E of Scylla The earliest known legal code in Europe was used here, it was attributed to Zaleucus (7th cent B C).

locust, name applied sometimes to any GRASSHOPPER with antennae shorter than the body and sometimes only to the short-horned forms which migrate in swarms The 17-year locust is a CICADA

locust, any species of the genus *Robinia*, leguminous deciduous trees or shrubs native to the United States and Mexico The locusts have clusters of flowers similar to the sweet pea, these are very fragrant in the yellow, or black, locust (*Robinia pseudoacacia*), which is the common locust, sometimes also called acacia or false acacia This species has been widely planted in the past for ornamental purposes, for erosion control, and for its useful wood, but the locust borer has now killed it in many areas Its heavy, hard, durable wood is used extensively for treenails in shipbuilding, for fence posts, for turning, and for fuel The shoots and bark of the black locust are poisonous The honey locust belongs to a different genus, as does the CAROB, which is thought to have been the biblical locust.

Lod, Palestine see LYDDA.

lode see ORE

Lo-debar (lō-dē'bär), unidentified town of Gilead, E of the Jordan. 2 Sam 9 4, 17 27.

lodestone see MAGNETITE

Lodge, Henry Cabot, 1850–1924, U S Senator from Massachusetts (1893–1924), b Boston, grad Harvard (B A , 1871, LL B , 1875, Ph.D , 1876) He was admitted to the bar in 1876 Before beginning his long career in the U S Senate he edited (1873–76) the *North American Review*, was lecturer (1876–79) on American history at Harvard, edited (1880–81) the *International Review* with J T Morse, was a member of the Massachusetts house of representatives in 1880 and 1881, and was a member of Congress (1887–93) He also wrote some historical works as well as biographies of his great-grandfather George Cabot (1877), of Alexander Hamilton (1882), of Daniel Webster (1883), and of George Washington (1889) and edited the complete works of Hamilton (9 vols , 1885) As a Senator he was a close friend of Theodore Roosevelt, welcomed war with Spain in 1898, and favored the acquisition of the Philippines and the development of a strong army and navy A conservative, party-line Republican, he supported the gold standard and a high protective tariff, was a bitter opponent of Woodrow Wilson's peace policy, and led the Senate isolationists in the attack on the Treaty of Versailles and the League of Nations. He was permanent chairman of the Republican national conventions in 1900, 1908, and 1920 In 1920 he was one of the group of Senators who brought about Harding's nomination As chairman of the Senate Committee on Foreign Affairs he opposed President Coolidge's efforts to bring the United States into the World Court and to end the exclusion of Japan See his *Early Memories* (1913); biographies by William Lawrence (1925) and Karl Schriftgiesser (1944).

Lodge, Sir Oliver Joseph, 1851–1940, English physicist, grad University College, London (B S , 1875; D Sc., 1877) He made valuable contributions to the development of wireless telegraphy and conducted research on electrons, the ether, and lightning. From 1881 to 1900 he was professor of physics at University College, Liverpool, and from 1900 to 1919 principal of the Univ. of Birmingham In 1902 he was knighted He was greatly interested in reconciling science and religion and was an ardent believer in survival after death. His writings on both physical and psychical research are listed in *Bibliography of Sir Oliver Lodge* (1935), compiled by Theodore Besterman. See his autobiography (1932)

Lodge, Thomas, 1558?–1625, English writer, grad. Oxford Univ., 1577. He studied law, made a name for himself in literature probably between 1580 and 1595, during which time he also served as a soldier, and went with an expedition to South America (1591–93) He took an M.D. degree at Avignon (1598) and at Oxford (1602) and practiced medicine for some 25 years. His first work, *Honest Excuses* (1579), was his reply to an attack on the arts by Stephen Gosson, and the quarrel continued through Lodge's *Alarum against Usurers* (1584). Known to be by Lodge are the plays *The Wounds of Civil War* (1586) and *A Looking Glass for London and England* (with Robert Greene, 1594), and he has been assigned parts of many others on meager evidence. More important are his euphuistic tales in the style of John Lyly, prose interspersed with poems—*Scillaes Metamorphoses* (1589), a source of Shakspere's *Venus and Adonis*, and *Rosalynde* (1590), Shakspere's source for *As You Like It Phillis* (1593) is a tuneful sonnet-cycle plus songs and odes, and *A Fig for Momus* (1595) contains satires. *A Margarite of America* (1596) grew out of his voyage to South America *A Treatise of the Plague* (1603) is important among his medical works See biographies by N B Paradise (1931) and E. A Tenney (1935)

Lodi (lō'dē), city (pop 23,305), Milan prov , Lombardy, N Italy, on the Adda It is an important center for dairy products. Ancient Lodi was destroyed by Milan in 1155 and rebuilt by Frederick Barbarossa in 1158 Here on May 10, 1796, Napoleon Bonaparte defeated the Austrians after personally leading his troops across the bitterly contested bridge over the Adda Besides some medieval buildings, there is the beautiful Renaissance Church of the Incoronata

Lodi (lō'dī). **1** City (pop 11,079), central Calif , N of Stockton, inc 1906 It packs, ships, and processes fruits and vegetables and produces wine and olive oil **2** Industrial borough (pop 11,552), NE N J , NE of Passaic It has dye works **3** Village (pop 1,304), N Ohio, W of Akron Dairy products are made **4** City (pop 1,116), central Wis , NW of Madison and on Spring Creek, inc. as a village 1872, as a city 1941

Lodomeria, Latinized name of the duchy of Vladimir See VLADIMIR-VOLYNSKIY

Lodore (lōdōr'), waterfalls, Cumberland, England, near the head of Derwentwater, between steep, wooded hills They are celebrated in Southey's poem "The Cataract of Lodore"

Lodz (lōdz, lŏdz, lōō), Pol *Łódź* (wōōj), industrial city (pop 496,929), Poland, SW of Warsaw Incorporated early in the 15th cent , Lodz passed to Prussia in the second partition of Poland (1793), and to the Russian Empire in 1815, it reverted to Poland in 1919 Its industrial development began about 1820, by 1900 it was the capital of Polish industry Textiles and clothes are its main products During the Second World War, Lodz, with a German population of less than nine percent, was incorporated in Germany, renamed Litzmannstadt, and subjected to ruthless Germanization However, it suffered relatively little physical war damage The city, which constitutes the district province of the municipality of Lodz, is also the administrative seat of Lodz province (7,800 sq mi , pop 1,772,420), a largely agricultural region with some mineral deposits Its cities include Piotrkow Trybunalski, Pabianice, and Tomaszow Mazowiecki

Loeb, Jacques (lōb), 1859–1924, American physiologist, b Germany, M D Univ of Strasbourg, 1884 He came to the United States in 1891 and taught at Bryn Mawr, the Univ of Chicago (1892–1902), and the Univ of California (1902–1910) From 1910 he was a member of the Rockefeller Institute for Medical Research Best known for his tropism theory and for his experimental work on inducing parthenogenesis and regeneration by chemical stimulus, he also propounded a mechanistic philosophy which held that all ethics were the outgrowth of man's inherited tropisms He was a founder and editor of the *Journal of General Physiology* His works include *The Mechanistic Conception of Life* (1912), *Artificial Parthenogenesis and Fertilization* (1913), *Forced Movements, Tropisms, and Animal Conduct* (1918), and *Regeneration* (1924)

Loeb, James (lōb), 1867–1933, American banker and philanthropist, b New York city, grad Harvard, 1888, son of Solomon Loeb He entered (1888) Kuhn, Loeb & Company and retired from business at 34 years of age Most of the rest of his life was spent abroad He founded and endowed the Loeb Classical Library, a series of inexpensive, yet attractive books containing on facing pages the original Greek and Latin texts and the English translations He also founded (1905) in New York city the Institute of Musical Art, now part of the JUILLIARD SCHOOL OF MUSIC, and in Munich, a clinic for psychiatric study

Loeb, Solomon (lōb), 1828–1903, American banker, b Germany. After he came (1849) to the United States, he settled in Cincinnati and became wealthy as a dry-goods merchant He removed (1865) to New York city and with Abraham Kuhn started the banking house of Kuhn, Loeb and Company. After his retirement, most of his financial interests were taken over by his son, James LOEB. He gave large amounts to Jewish charities.

Loeffler, Charles Martin (lĕf'lûr), 1861–1935, American composer and violinist, b. Alsace, studied in Kiev, Berlin, and Paris In 1881 he came to the United States, and from 1882 until 1903 he shared with Franz Kneisel the position of first violinist and soloist of the Boston Symphony Orchestra. His *Pagan Poem* (1909) for orchestra shows the influence of French impressionism, as does his *Evocations* (Cleveland, 1931) for women's chorus and orchestra, which, like his *Canticle of the Sun* (1925) for solo voice and orchestra, evidences his knowledge of Gregorian chant. He also composed chamber music and choral works. Highly personal in style, he is considered by many the outstanding American composer of his generation.

loess (lō'ĭs), unstratified soil deposit of varying thickness, usually yellowish and composed of fine-grained angular mineral particles mixed with clay It is found in many regions of the world and is probably related to the BLACK EARTH of Russia; extensive deposits occur along the Mississippi river and its tributaries, on the Columbia Plateau in Oregon, Washington, and Idaho, and in China Although some authorities believe loess was deposited by running water, a more commonly accepted theory is that it originated as dust carried by the wind from adjacent deserts, from frost-pulverized outwash of glaciers (during the Pleistocene epoch), or from the flood plains of glacier-fed streams Studies of particles transported by wind from plains recently denuded by tillage show that the material is sorted to about the same degree as loess. Much of the loess in the United States is of glacial origin, in China, of desert origin Loess is usually deep, fertile soil, rich in organic remains (especially the shells of snails) and characterized by slender, vertical tubes that are said to represent stems and roots of plants buried by sediment When cut by streams or other agencies, loess remains standing in cliffs exhibiting a vertical, columnar structure, this is attributed to the vertical tubes and to the angularity and consequent tendency of the grains to interlock The uncompacted character of loess makes it subject to rapid erosion.

Loewi, Otto (lō'ē), 1873–, German scientist He was professor of pharmacology (1909–38) at the Univ of Graz, Austria He was forced into exile after the Nazi purge of professors and in 1940 became research professor of pharmacology at the college of medicine of New York Univ For his discovery of the chemical transmission of nerve impulses he shared the 1936 Nobel Prize in Physiology and Medicine with Sir Henry Dale Loewi has investigated the physiology and pharmacology of metabolism, the kidneys, heart, and nervous system

Loewy, Raymond Fernand (lō'ē), 1895–, American industrial designer, b France, studied engineering abroad He came to the United States in 1919 and was naturalized in 1938 At first a fashion illustrator, he entered (1920) the field of industrial designing In 1928 he started his own office, which, in 1943, he reorganized as Raymond Loewy Associates, a firm of consultant engineers He is noted for his designs in the transportation field. He wrote *The Locomotive (Its Esthetics)* (1937)

Löffler, Friedrich (frē'drĭkh lûf'lur), 1852–1915, German bacteriologist He was from 1888 professor of hygiene at the Univ of Greifswald His many contributions to bacteriology include the relating of diphtheria to the particular organism known as the Klebs-Löffler bacillus He also showed the cause of foot and mouth disease to be a virus

Lofoten (lōfō'tŭn), Nor *Lofoten* (lōō'fōōtun), and **Vesteralen,** Nor *Vesterålen* (vĕ'stŭrō'lŭn), two contiguous island groups (c 2,000 sq mi , pop c 80,000), off NW Norway, in the Norwegian Sea. 1 to 50 mi off the mainland. They are part of Nordland and Troms counties. Entirely situated within the Arctic Circle, they extend c 150 mi from northeast to southwest Owing to the North Atlantic Drift, they have a tempered climate at a northern latitude The chief islands of the Lofoten group are Vaeroy, Moskenes, Vestvagoy, and Austvagoy The celebrated MAELSTROM is S of Moskenes The Vesteralen group, which is separated from the Lofoten by the narrow Raftsund, includes the islands of Hinnoy (the largest island of Norway), Langoy, and Andoy. Svolvaer, on Austvagoy, and Harstad, on Hinnoy, are the chief trading centers. The chief economic importance of the Lofoten and Vesteralen islands lies in their herring and cod fisheries, which are among the largest in the world The codfish shoal on the eastern coast from February to April, the herrings on the west coast from August to November. During these seasons thousands of fishing craft come to the fish banks Operations are extremely difficult and dangerous because of the treacherous tidal currents. The local population also engages in cattle and sheep raising. Magnetite and coal deposits are mined on Langoy and Andoy. An alternate spelling of Vesteralen is Vesteraalen.

Lofting, Hugh, 1886–1947, American writer of juvenile stories, b. Maidenhead, England. He settled in the United States in 1912. His famous "Dr. Dolittle" stories, begun as letters to his children during the First World War, include *The Story of Dr.*

Dolittle (1920); *The Voyages of Dr. Dolittle* (1922), awarded the Newbery medal; and *Dr. Dolittle and the Secret Lake* (1948) All were illustrated by the author.

log, speedometer of a ship About the 16th cent the common log was introduced to measure the ship's speed. This contrivance consisted of a log chip, a log reel, and a log glass The log chip, a triangular piece of wood with a rounded base weighted to make it stand upright, was cast off the stern of the vessel on a line The log line, attached to the log chip, had a certain amount (10 or 20 fathoms) of stray line to allow the log chip to clear the vessel before the speed was marked The rest (c 100 fathoms) was wound on the log reel and was marked off by knots 47 ft , 3 in. apart At the beginning of the marked portion of the line a piece of colored bunting was fastened When the log line had been paid out to the point where this appeared from the reel, the time was counted This was done by the log glass, which was a simple sand glass As the knots passed they were counted until the log glass had run out Thus the speed of the ship was computed, and therefore the nautical mile was counted by divisions called knots About 1835 an improved patent log was introduced It consisted of a tapered tube with inclined vanes that caused the speed of the ship to be registered on a dial About 1875 the cherub log was introduced It has a small screw propeller and is towed astern on a long line attached to a dial, the rotation of the propeller causes the distance run to be recorded on the dial It is still much used The Forbes log is a more recent development A tube projects through the bottom of the ship and is open on the forward side so that the water passes up the tube and turns a small propeller, which in turn actuates a distance-recording mechanism On most modern ships the speed can be computed from the revolutions of the propeller Ships since the 18th cent have kept records in which the log findings are recorded These are log books or logs They also record all important events of the voyage and are thus official diaries of the ships Generally the entries are made by the navigating officer and approved by the ship's master

Logan, Benjamin, c 1743–1802, American frontiersman, b Augusta co , Va He was active in the settlement by Richard Henderson's TRANSYLVANIA COMPANY and built (1775) Fort Logan (now Stanford, Ky) He won a reputation as an Indian fighter and was a leading figure in Kentucky history throughout the American Revolution and the following period, serving in the Virginia assembly (1781–82, 1785–87), in Kentucky's first constitutional convention (1792), and in the Kentucky legislature (1793–95)

Logan, George, 1753–1821, American statesman and agriculturist, b near Germantown, Pa , studied medicine at the Univ of Edinburgh and in Paris, grandson of James Logan During the American Revolution he turned, by necessity, from medicine to farming and at the same time served several terms in the Pennsylvania legislature On his own authority he went (1798) to France to secure its accord with the United States His mission, in part successful, was resented by Federalists, who secured the passage of the so-called Logan Act, prohibiting civilian participation in diplomatic negotiations except by official authority He served as U S Senator (1801-7,1810) and, despite the Logan Act, went to England to reconcile differences between that country and the United States Logan was long active in the furtherance of agricultural advancement

Logan, James, 1674–1751, American colonial statesman and scholar, b. Ireland, of Scottish parents While engaged in the shipping trade, Logan met William Penn and became (1699) his secretary He came to Philadelphia with Penn, and remained his confidential adviser for many years He served as provincial secretary and clerk of the provincial council, where he was a member from 1702 to 1747 A staunch supporter of the aristocratic Proprietary party, Logan often came into bitter opposition to David LLOYD He became mayor of Philadelphia (1722), justice of the court of common pleas (1727), and chief justice of the supreme court (1731) He was acting governor of the province from 1736 to 1738 Having large landholdings and a lucrative Indian trade, he had a vast estate, where his hospitality to the Indians established their long-lasting friendship with the colony Logan's wide scholarly interests included botanical research that received recognition from Linnaeus, who named the genus *Logania* after him He was also the author of numerous scientific works, and at his death he left his large library of classical and scientific books to Philadelphia.

Logan, James, 1725?–1780, American Indian, b Pennsylvania. He took his name presumably from James Logan (1674 -1751) and is frequently called just Logan He was a leader of the Indians on the Ohio and Scioto rivers Logan was long the friend of the whites When his family was massacred by white settlers (1774), his attacks against them helped bring on Dunmore's War Logan refused to participate in the treaty making, and his eloquent speech became famous. He served with the British during the American Revolution.

Logan, John Alexander, 1826–86, American politician, Union general in the Civil War, b Murphysboro, Ill. He fought in the Mexican War, was graduated from the Univ of Louisville law school (1851), and practiced law in Illinois A Douglas Democrat, he served several terms in the state legislature and was elected to Congress in 1858 and reelected in 1860 At the first battle of Bull Run (July, 1861), Logan fought in the ranks Afterwards, he organized the 31st Illinois Infantry, of which he was made colonel The Union victory at Fort Donelson (1862) brought him a brigadier generalcy of volunteers, and he was promoted major general of volunteers for his service in the Vicksburg campaign (1862–63) Logan led a corps of the Army of the Tennessee in Sherman's Atlanta campaign (1864) and commanded that army for a short time after the death of J B MCPHERSON However, O O HOWARD was given the permanent command, and Logan returned to his corps He went to Illinois in the fall of 1864 to campaign for Lincoln, but rejoined Sherman's army for the march through the Carolinas A radical Republican Congressman (1867–71), he was one of the House managers of the impeachment trial of Andrew Johnson From 1871 to 1877 and from 1880 until his death he was a U S Senator from Illinois He was a leader of the third-term movement for Grant in 1880 Logan himself was a candidate for the Republican presidential nomination in 1884 but lost to BLAINE and was then nominated for Vice President He was a founder, and three times president, of the Grand Army of the Republic and was an outstanding supporter of legislation for veterans Logan inaugurated MEMORIAL DAY in 1868 He wrote *The Volunteer Soldier of America* (1887), which contains his reminiscences of the Civil War See also Mrs John A Logan, *Reminiscences of a Soldier's Wife* (1913)

Logan, Stephen Trigg, 1800–1880, American lawyer, b Franklin co , Ky He moved to Illinois in 1832 and practiced law at Springfield until his death Regarded in his day as the leader of the Illinois bar, he is chiefly remembered as the senior law partner of Abraham Lincoln from 1841 to 1844 Logan served several terms in the state legislature and was a delegate to the Republican convention at Chicago which nominated Lincoln in 1860

Logan, Sir William Edmond, 1798–1875, Canadian geologist, b Montreal He was educated in England, where he entered his uncle's business As manager of a copper smeltery and coal mines in Wales (1831–38), he made extensive geological maps and sections, which were utilized by De la Beche in the Geological Survey, and made studies of the underclays of coal seams As head of the Geological Survey of Canada (1843–69), he did thorough work in constructing maps and sections, often of areas for which no topographical map was available His results were summarized in *The Geology of Canada* (1863), in which he had the collaboration of T S Hunt His studies and classification of the Pre-Cambrian of Canada were the basis of later work See biography by B J Harrington (1883)

Logan 1 Town (pop 1,700), co seat of Harrison co , SW Iowa, on the Boyer river and N of Council Bluffs, in a farm area, settled as Boyer Falls, named Logan 1864, inc 1876 2 City (pop 6,177), co seat of Hocking co , S central Ohio, on the Hocking river and SE of Columbus, founded 1816, inc 1839 Shoes, furniture, pottery, and oil-well tools are made here 3 City (pop 11,868), co seat of Cache co , N Utah, N of Ogden and on the Logan river, founded 1859 by Mormons, inc 1866 On the edge of Cache Valley, Logan is a busy center of an irrigated dairy and farm area with dairy-products plants, flour mills and other processing plants The city is the seat of a Latter-Day Saints tabernacle, Logan Temple (also Mormon), and Utah State Agricultural College Logan Canyon is near, and Logan Peak (9,713 ft) is visible from the city 4 Trading city (pop 5,166), co seat of Logan co , S W Va , on the Guyandot river and SSW of Charleston, in a mining and lumbering area

Logan, Mount [for Sir William Logan], 19,850 ft high, extreme SW Yukon, just E of Alaska, highest mountain in Canada and second highest in North America It caps an immense tableland and is the center of the greatest glacial expanse in North America The only ascent was made in 1925 by a party which was headed by A H McCarthy and H F Lambert

loganberry, tender blackberryhike plant of the genus *Rubus* (often called *Rubus loganobaccus*), cultivated chiefly along the Pacific coast for its acid, purplish-red fruits used fresh, dried, or canned The original plant appeared in the orchard of Judge J H Logan, of Santa Cruz, Calif , in 1881 It is thought to be either a variety of the Pacific dewberry or a hybrid between that species and the red raspberry

Logansport. 1 City (pop 20,177), co seat of Cass co , N Ind , at the confluence of the Wabash and Eel rivers midway between South Bend and Indianapolis, settled c 1826 It is a shipping center for farm produce, and its manufactures include farm equipment and beer. A state mental hospital is near by The city was named for the Indian, Logan 2 Town (pop 1,222), NW La , on the Sabine river and SW of Shreveport, in a cotton district, founded in the 1830s

logarithm (lôg'ərĭdhĭm) [Gr , =relation-number]. With each positive number is associated another number called its logarithm, which is actually the power to which a third number called the base, must be raised in order to obtain the given positive number For example, the logarithm of 100 to the base 10 is 2, it is written $\log_{10} 100 = 2$ Logarithms of positive numbers using the number 10 as the base are called common logarithms, those using e (approximately 2 718) as the base are called natural logarithms Since logarithms are exponents, they satisfy all the usual rules of exponents Consequently tedious calculations such as multiplications and divisions can be replaced by the simpler processes of adding or subtracting the corresponding logarithms Logarithmic tables are generally used See also NAPIER, JOHN See K C Bruhns, *New Manual of Logarithms* (rev ed , 1947), J. B. Dale, *Logarithmic and Trigonometric Tables* (2d ed., 1947)

Logau, Friedrich, Baron von (frē'drĭkh bärōn' fŭn lō'gou), 1604–55, great German epigrammatist, b Silesia He served the duke of Liegnitz, belonged to the literary society Fruchtbringende Gesellschaft, and published two collections of epigrams which were written in verse, *Erstes Hundert deutsch Reimen-Sprüche* (1638) and *Deutscher Sinngetichte drey Tausend* (1654)

log cabin or **log house.** The typical home of the American pioneer on the Western frontier of the United States in the great westward expansion after 1765 was the log house It was constructed with few tools, usually an axe or an adz and an auger All the fastenings were of wood The log walls were chinked with mud to make them reasonably proof against the wind There was no glass, and across window openings greased paper might be used to let some light through The shutters and doors were fastened on with wooden pegs There was usually only one door When the ridgepole of the roof was put in place, roughly hewn flat slabs were laid for a roof Frequently there was no floor, if there was it was usually of puncheons, logs split in half, placed with the flat sides up The furniture was very often roughly made with the same tools that were used in making the house All were of crude but efficient work In settlements where Indian attacks were feared the log houses were sometimes placed to form a protected rectangle The BLOCKHOUSE on the Western frontier was often made of logs Log cabins were frequently built by community enterprise, a "house-raising" being an occasion for entertainment as well as work Log houses were unknown to the American Indian, and the first English settlers did not build them They are known in some countries of Europe, especially Scandinavia, Germany, and Switzerland, and it is a generally accepted hypothesis that they were introduced in America by Swedish settlers on the Delaware in 1638 The log cabin was later adopted by the other settlers in America, and by the end of the 18th cent at the latest the log house was the typical backwoods dwelling It became a characteristic of the frontier and was universally used by settlers in the West until the Great Plains were reached, when the SOD HOUSE was the customary dwelling, the log cabin reappeared in the Rockies The significance of the log house as a symbol of the frontier was shown by its use in the Harrison election of 1840 Many famous Americans were born in log cabins, notably Abraham Lincoln See H R Shurtleff, *The Log Cabin Myth* (1939)

Log College · see TENNENT, WILLIAM

logic, systematic study and discipline dealing with the principles of valid inference Its distinction from psychology is in its subject matter, i e , logic concerns itself solely with the validity of thought, psychology with the nature of thought and its relation with other vital processes Aristotle was the founder of systematic logic He posited three basic presuppositions as the laws of thought—the law of identity (A is A), the law of contradiction (A cannot be both B and not-B), and the law of the excluded middle (A is either B or not-B) Deductive thinking is largely reducible to such a form as: All men are mortal, Socrates is a man, therefore Socrates is mortal Such a form is known as a SYLLOGISM The investigation of deduction and the elaboration of the syllogism are the work of Aristotle, and his logic has been the formal logic of the schools and of men in general, appearing especially in the scholastic philosophies and in Euclidean geometry The method of INDUCTION involves moving from particular instances to general principles It does not lend itself readily to analysis Since all the particular instances of an order can never be observed, induction works on a theory of probability John Stuart Mill sought to formulate the principles of inductive experimentation The theory of probability and the statistics of inference are basic tools of induction In the post-Renaissance period many philosophers criticized the Aris-

totelian logic for certain inadequacies of formulation and for dealing only with fixed forms. For example, Hegel developed the dialectical logic as the fundamental principle of his philosophy Forecast by Leibniz, it was not until the 19th cent that logistic, or symbolic, logic was developed, chiefly through the work of George Boole and Augustus de Morgan It seeks to apply mathematical symbols to logic, and its substance is the analysis of relation Symbolic logic removes the possibility of verbal ambiguities and so simplifies the manipulation of relationships of logical elements that it makes possible analyses far wider than those of traditional logic Alfred North Whitehead and Bertrand Russell have developed symbolic logic to cover much the same extension as higher mathematics The use of symbols in logical analysis leads even to the use of modern calculating machines in the solution of problems A relatively recent development in logic has been called dynamic logic This method is based primarily on inductive techniques and stresses that universal law cannot be discovered, that the elements of an investigation are relative to the observer, and that the process of development is a process of evolution demanding a principle of novelty and uncertainty See Aristotle, *Selections* (comp by Sir Alexander Grant, (1927), J G Hibben, *Logic, Deductive and Inductive* (1910), A N Whitehead and Bertrand Russell, *Principia Mathematica* (1910–13), P W Bridgman, *The Logic of Modern Physics* (1927), John Dewey, *Logic, the Theory of Inquiry* (1938)

Logos (lō'gŏs) [Gr ,=Word] concept of Greek and Hebrew metaphysics The central idea of the Logos is that it links God and man, hence any system in which the Logos plays a part is monistic The Greek Heraclitus held that the orderly world is animated and kept in order by fire—this fire is the Logos, it is the power of order in the world and the order itself It thus became the unifying feature of the Heraclitan system The Stoics were influenced in part by Platonism and Aristotelianism in their conception of the Logos To them God was all pervading in the world, its vitalizing force, and God as the law guiding the universe they called Logos, with the additional idea that all things develop from this force, it is called the "spermatic" Logos The Logos reappears in Greek philosophy in a much-restricted form in the system of emanations of Neoplatonism Certain books of the Old Testament present a principle called the Wisdom of God active in the world At the same time there was a very ancient Hebrew idea of the Word of God, also active in the world Thus the Wisdom and the Word of God, sometimes quasi-distinct from Him, coalesced Philo, in his harmony of Judaism and Greek thought, naturally hit upon the Logos as a union between the systems, hence his Logos retains qualities both of the Stoic Logos and the Hebrew Word of God Philo's God is remote, unaffected by the world, without attributes, unmoving, hence He must have mediation to connect Him with the world At times Philo's Logos is independent of God (because of God's remoteness), at other times the Logos is simply the Reason of God (because Philo's monism obliges God to act in the world through His mediating forces). St John in his Gospel adapted the term to his purpose In the prologue of 14 verses the idea of the Gospel is stated clearly and simply The Logos, which is the eternal God, took flesh and became man, in time The Logos is Jesus The impersonal, remote God of Philo is not there, the intermediate Logos, neither God nor man, has been replaced by a Logos which is both God and man. This clear explanation of the relation of God and man became an abiding feature of Christian thought, the term itself lost out to the term *Son*, which is universally used in statements concerning the Trinity.

Logroño (lōgrō'nyō), city (pop 43,709), capital of Logroño prov , NE Spain, in Old Castile, on the Ebro river An agricultural center, it is noted for the Rioja wine of the region. The kings of Navarre and Castile fought over it from the 10th cent. until its final annexation (1173) to Castile The charter granted by Alfonso VI served as a model for those of other cities.

Logue, Michael (lōg), 1840–1924, Irish prelate, cardinal of the Roman Church In 1879 he was made bishop of Raphoe and in 1887 archbishop of Armagh. In 1893 he was created cardinal Cardinal Logue was one of the moderate, conciliatory voices in the Anglo-Irish struggle He was particularly successful in his relations with the Protestants of Northern Ireland, in which his see was included.

logwood, leguminous tree (*Haematoxylon campechianum*) and its wood, native to Central America and introduced in parts of N South America and the West Indies. The brown-red heartwood is the source of the dye haematoxylin, which is used as a stain in histological work, as a textile dye, and in making some inks. Logwood was exported to Europe probably as early as the mid-16th cent. Local names for the wood include campeachy wood and blackwood. The name logwood is sometimes applied to other similar woods.

Lohengrin (lō'ŭn-grĭn), in medieval German story, a knight of the Grail, son of Parsifal, sent to rescue Princess Elsa of Brabant, who is being forcibly wooed by an unwanted suitor Lohengrin, led to Antwerp by a swan, saves Elsa and marries her He must not be asked his name, but his wife's curiosity overcomes her and she asks it Lohengrin must now return to the castle of the Grail, the swan reappears and turns out to be Elsa's brother. In its fullest form the story is the subject of a German epic poem composed c 1285–1290 and ascribed to Wolfram von Eschenbach by its unknown author The story was used by Wagner for his fourth opera, *Lohengrin* The swan's metamorphosis is a theme found also in classical, Celtic, and other mythologies See Sabine Baring-Gould, *Curious Myths of the Middle Ages* (1906)

Loir (lwär), river, 193 mi long, N central France, rising S of Chartres and flowing generally SW past Châteaudun and Vendôme to join the Sarthe N of Angers

Loire (lwär), department (1,853 sq. mi , pop 631,591), E central France, in Lyonnais, traversed by the upper Loire Saint-Étienne (the capital) and Roanne are the main cities

Loire, river, 625 mi long, the longest of France It rises SE of Le Puy in the Cévennes mts and, describing a wide arc, flows NW to Orléans, then swings SW to the Atlantic at Saint-Nazaire Other cities on or near its course are Nevers, Blois, Tours, Angers, and Nantes Its chief tributaries are the Allier, the Cher, the Vienne, and the Maine The Loire is the heart and cradle of Gallic France In its basin lie the rich fields, gardens, and vineyards of Orléanais, Touraine, and Anjou Lovely rather than majestic, the Loire valley has fostered traditions of civilized living which have become the heritage of all France Ronsard, Rabelais, Descartes, and Balzac had their roots here The châteaux of the Loire—Blois, Amboise, Chambord, Chenonceaux, Chinon, Loches, Azay-le-Rideau, and many others—are synonymous with French history and civilization.

Loire-Inférieure (lwär'-ănfārēūr'), department (2,693 sq mi , pop 665,964), NW France, in S Brittany, on the Atlantic coast Here the Loire, after passing Nantes, the departmental capital, enters the ocean at Saint-Nazaire

Loiret (lwärā'), department (2,630 sq mi , pop 346,918), N central France, traversed by the Loire and its small tributary, the Loiret It occupies part of the Orléanais region, and Orléans is the departmental capital

Loir-et-Cher (lwär-ā-shĕr'), department (2,479 sq mi , pop 242,419), N central France, forming W Orléanais It is drained by the Loire, Loir, and Cher rivers Blois is the capital

Lois (lō'ĭs), grandmother of Timothy 2 Tim 1 5

Loisy, Alfred Firmin (älfrĕd' fĕrmĕ' lwazē'), 1857–1940, French biblical critic He was ordained (1879) a Roman Catholic priest and was (1881–93) professor at the Catholic Institute in Paris He lost his position because of an article he wrote, considered suspicious of heresy by the authorities He taught (1900–1904) at the École des Hautes Études and (1909–26) at the Collège de France At the beginning of the 20th cent he became the principal leader of the movement called Catholic modernism, which accepted the theories of the higher criticism and developed a kind of liberal humanitarianism His books were condemned severally and collectively by the Holy See, and in 1908 he was excommunicated Thereafter he became increasingly opposed to the teachings of the Church Among his works are *L'Évangile et l'église* [the Gospel and the Church] (1902), *Le IVe Évangile* [the Fourth Gospel] (1903), and *Les Évangiles synoptiques* [the Synoptic Gospels](1908). His autobiography appeared in 1924

Loja (lō'hä), city (1944 estimated pop 20,776), S Ecuador One of the republic's few cities not sending its exports exclusively to Guayaquil, Loja is a commercial center for its region Subsistence crops and cattle are raised, and some cattle shipped to the desert coastal cities of NW Peru

Loki (lō'kē), in Norse myth, personification of the evil principle He caused trouble for the other Aesir His worst exploit was the murder of Balder, for which he was punished by Thor He is to lead the enemies of heaven at Ragnarok.

Lokoja (lŭkō'yŭ), town (pop 8,085), N Nigeria, at the junction of the Niger and Benue rivers The site was visited (1859) by the Scottish explorer William Baikie There are iron deposits near by.

Lolland, Denmark see Laaland

Lollardry (lŏ'lŭrdrē) or **Lollardy,** medieval English movement for ecclesiastical reform, led by John Wyclif, whose "poor priests" spread his ideas about the countryside in the late 14th cent. The Church in England was ridden with abuses, especially in the ownership and management of great ecclesiastical properties. Many common people lived in miserable circumstances aggravated by the plague and by expensive wars. Wyclif's doctrines, underscored by the shocking fact of the Great Schism (1378), gave form to widespread discontent with the state of the Church and the state of society. The chief goal of Lollardry was the establishment of evangelical poverty in the Church, and from this idea developed the other tenets of the movement The clergy, it was claimed, had become rich and worldly, the Church had forsaken her mission to preach God's word, the sacraments had become ineffectual through the false teachings surrounding them, and the only reliable rule of holy life was to be found in the Bible, which a man could interpret for himself The most complete statement of the Lollard creed is in a memorial presented to Parliament in 1395 It denied transubstantiation; it condemned the use of sacramentals, images, prayers for the dead, and auricular confession; it declared against all war, and it attacked clerical celibacy and the vows of nuns as unnatural At its peak just before the turn of the century, Lollardry appealed to members of the middle and upper classes as well as to those of the lower, but severe repressive measures began with the accession of Henry IV The statute *De haeretico comburendo* [on the burning of the heretic] was passed by Parliament in 1401, but burnings at the stake were actually rare Under persecution the Lollards tended to fanaticism, and a petty rebellion broke out among followers of Sir John Oldcastle, a prominent Lollard who had escaped from imprisonment in the Tower The rebellion was easily put down (1414), and Oldcastle, after several other minor conspiracies, was captured and executed (1417) Stricter suppression then drove the movement underground, where it survived until the 16th cent The alarm of the clergy in England over the Lutheran doctrines was partly caused by a fear that Lollardry would be revived It is difficult to state how much Lollardry actually encouraged the English Reformation Undoubtedly it weakened the hold of the Church on the people, and the popular use of the Bible helped to stimulate the later movement Finally, although Lollardry knew nothing of Luther's doctrine of justification by faith, it did in effect proclaim the direct responsibility of the individual soul to God —the essential idea of the Reformation See James Gairdner, *Lollardy and the Reformation in England* (1908–13), G G Coulton, *Medieval Panorama* (1938)

L'Olonnois, François see Nau, Jacques Jean David

Lomax, John Avery (lō'măks), 1867–1948, American folklorist, b Goodman, Miss , grad Univ of Texas (B A , 1897, M A , 1906), M A Harvard, 1907 At Harvard he was encouraged in the collection of folk songs by Barrett Wendell and G L Kittredge His first book, *Cowboy Songs* (1910, rev ed , 1938), contained, for the first time in print, such songs as *The Old Chisholm Trail, Git along Little Dogies,* and *Home on the Range* In addition he collected ballads, Negro songs, mountain songs, and folk songs of every sort from all over the country Many of his Negro songs were collected in the Southern penitentiaries, where he discovered Huddie Ledbetter, known as Lead Belly, who provided the material for his *Negro Folk Songs as Sung by Lead Belly* (with his son, 1936) See his autobiographical *Adventures of a Ballad Hunter* (1947) In 1933 he was joined in his work by his son **Alan Lomax,** 1915– Father and son collaborated in compiling *American Ballads and Folk Songs* (1934), the Lead Belly collection, *Our Singing Country* (1941), and, with Mr and Mrs Charles Seeger, *The One Hundred and One Best American Ballads* (1947) Alan Lomax became curator of the American folk song archives of the Library of Congress in 1934

Lombard, Peter: see Peter Lombard

Lombard, residential village (pop 7,075), NE Ill , just W of Chicago, settled 1834, inc 1869

Lombard League. In the early 12th cent the communes of Lombardy were, in general, grouped in two rival leagues, of which one, led by Pavia, tended to be in favor of the emperor, and the other, led by Milan, in favor of the pope When Emperor Frederick I at the Diet of Roncaglia (1158) asserted the imperial authority over all Lombard communes, even the imperialist cities turned against him and joined (1167) the League of Verona, which had been formed in 1164 This widened coalition, known as the Lombard League, received the support of Pope Alexander III, after whom its fortified city of Alessandria was named The League defeated (1176) Frederick at Legnano, but after the Peace of Constance (1183), which confirmed the freedom of the cities, it tended again to break into two rival leagues (see Guelphs and Ghibellines) The League was revived in 1226 against Emperor Frederick II. After its defeat (1237) at Cortenuova it split again into Guelph and Ghibelline cities

Lombardo (lōmbär'dō) Italian family of sculptors and architects Emigrants from Lombardy c 1450, they were leaders in the architectural Renaissance in Venice **Pietro Lombardo** (pyā'trō), c 1435–1515, architect of numerous churches and palaces, worked on the court façades of the doge's palace from 1498. As sculptor, he is noted for the mausoleum of Doge Pietro Mocenigo in Santi Giovannie Paolo and for other tombs, including that of Dante at Ravenna. In most of his undertakings he had as associates his sons, **Antonio Lombardo** (äntō'nyō), c.1458–1516?, and **Tullio Lombardo** (tōōl'lyō),

c 1455–1532. One of their greatest joint productions was the Church of Santa Maria dei Miracoli. These three were the most distinguished of the Lombardo family.

Lombards (lŏm'bŭrdz,–bärdz), ancient Germanic people Mentioned by Tacitus, the Lombards (Latin *Langobardi*) were settled along the lower Elbe in the 1st cent A.D. After obscure migrations they were allowed (547) by Emperor Justinian I to settle in Pannonia and Noricum (modern Hungary and E Austria). In 568, under the leadership of ALBOIN, they invaded N Italy and established a kingdom with Pavia as capital They soon penetrated deep into central and S Italy, but the exarchate of RAVENNA, the PENTAPOLIS, and much of the coast remained under Byzantine rule while Rome and the Patrimony of St Peter were kept by the papacy. After Alboin's death (572?) no king was elected and Lombard Italy fell under the disunited rule of some thirty "dukes" The Lombard duchies of SPOLETO and BENEVENTO in central and S Italy were set up independently In 584 the Lombard nobles united to elect a new king, AUTHARI, in order to strengthen themselves against the enmity of the Franks, the Byzantines, and the popes. The Lombard kingdom reached its height in the 7th and 8th cent Arianism, at first the prevalent faith of the Lombards, gradually lost out to Catholicism, Roman culture and Latin speech were accepted, and the bishops emerged as the chief magistrates in the cities King LIUTPRAND (712–44) consolidated the kingdom through his legislation and reduced Spoleto and Benevento to vassalage His successor, Aistulf, took Ravenna (751) and threatened Rome Pope Stephen II's appeal to PEPIN THE SHORT brought the Frankish invasion of Italy, the Lombards lost the territories comprised in the Donation of Pepin to the papacy (see PAPAL STATES) After Aistulf's death DESIDERIUS renewed (772) the attack on Rome This time CHARLEMAGNE intervened, defeated the Lombards, and was crowned (774) with the Lombard crown at PAVIA Only the duchy of Benevento survived until conquered (11th cent) by the Normans The iron crown of the Lombard kings (now kept at MONZA, Italy) was also used for the coronation (951) of Otto I as king of Italy and for the crowning of several succeeding emperors Thus the Lombard kingdom prepared the creation of the Holy Roman Empire The Lombards left their name to the Italian region of Lombardy The chief historian of the Lombards was PAUL THE DEACON See Thomas Hodgkin, *Italy and Her Invaders*, Vols V and VI (1895), Pasquale Villari, *Barbarian Invasions of Italy* (Eng tr, 2 vols, 1902), H B Cotterill, *Medieval Italy* (1915)

Lombard Street, in London It is a street of banks and financial houses which takes its name from the Lombard merchants and moneylenders who settled here in the 12th cent See Walter Bagehot, *Lombard Street* (1873)

Lombardy (lŏm'bŭrdē), region (9,189 sq mi, pop 5,836,479), N Italy, extending from the Swiss border to the Po and from the Ticino to the Mincio river It comprises the provinces of Bergamo Brescia, Como, Cremona, Mantua, Milan, Pavia, Sondrio and Varese, named after their chief cities Milan is the capital Within the borders of Lombardy lie Alpine peaks and glaciers, some of the Italian lakes, and upland pastures sloping to the rich Po valley, where agriculture has been intensified by artificial irrigation since Roman times Cereals are the main crops, and the mulberry is extensively cultivated for silk production Lombardy is the richest industrial region of Italy, manufacturing textiles, iron and steel products, machinery, chemicals, and a great variety of other products Milan is the chief industrial and commercial city of Italy Lombardy has been through the centuries a possession much coveted and frequently invaded and a battlefield in many wars. First inhabited by a Gallic people, it became (3rd cent B C) part of the Roman province of Cisalpine Gaul It suffered heavily in the barbaric invasions and became (569) the center of the kingdom of the LOMBARDS, for whom it was named The region was united (774) with the empire of CHARLEMAGNE In the 11th cent power gradually passed from the feudal lords to autonomous communes, and a general economic revival took place Commercial exchange between northern Europe and the Orient was largely effected through the Po valley Lombard merchants and bankers extended their business throughout Europe Several cities united in the LOMBARD LEAGUE to defy Emperor Frederick I, who wanted to reaffirm his authority over the communes The emperor was defeated at Legnano (1176) The 13th cent also was marked by wars among cities and rivalries between families within cities Except for the district of MANTUA under the GONZAGA family, Lombardy fell in the 14th and 15th cent under the sway of the VISCONTI and the SFORZA dukes of Milan; however, Bergamo and Brescia (1428) and Crema (1529) were lost to Venice and the VALTELLINA to the Grisons (1512). After the ITALIAN WARS, Lombardy followed the fortunes of MILAN. Spanish rule (1535–1713) was succeeded by that of Austria (1713–96) and France (1796–1814). The Lombardo-Venetian kingdom, set up under Austrian rule in 1815, was dissolved when Lombardy was liberated in 1859 In the 11th and 12th cent. there was a characteristic Lombard Romanesque architecture and in the Renaissance a flourishing school of painting, of which Bernardino Luini and Gaudenzio Ferrari were leading figures

Lombardy poplar, see POPLAR

Lombok (lŏmbŏk'), island (1,825 sq mi.; pop 701,290), East Indonesia, one of the Lesser Sundas It is E of Bali, from which it is separated by Lombok Strait The volcanic and mountainous terrain rises to 12,224 ft at Mt Rindjani or Rindjani In the southern area is a level plain producing rice, coffee, corn, sugar, cotton, tobacco, and indigo Mataram is the chief town, with the port of Ampenan near by The inhabitants, known as Sassaks, are Mohammedan The Dutch came here in 1674 The English naturalist A R Wallace noted that Lombok is a part of the dividing line which separates the fauna of Asia from that of Australia

Lombroso, Cesare (chā'zärā lōmbrō'zō), 1835–1909 Italian criminologist and physician In 1876 he published a pamphlet setting forth his theory of the origin of criminal traits In the study, later enlarged into the famous *L'uomo delinquente* (5th ed, 3 vols, 1896–97, partial Eng tr as *Criminal Man*, 1911), he compared anthropological measurements and concluded that the average criminal was an atavistic type marked by distinct physical and psychological traits. The theory has been outmoded, but at the time it gave impetus to further scientific study of crime and was important in focusing attention on the nature of the criminal and the situation Lombroso advocated humane treatment of criminals and opposed frequent use of the death penalty He wrote several books on crime and medicine Three have been translated as *The Female Offender* (partial Eng tr, 1895), *The Man of Genius* (1891), and *Crime Its Causes and Remedies* (1911) See biography by H G Kurella (Eng tr., 1911)

Lomé (lōmā'), town (pop c 15,000), capital of French Togoland, a port on the Gulf of Guinea It is a railroad junction

Loménie de Brienne, Étienne Charles (ātyĕn' shärl' lōmānē' du brēĕn'), 1727–94, French statesman, archbishop of Toulouse (1763–88) and of Sens (1788–91), cardinal of the Roman Church (1788–91) In the Assembly of Notables (1787) he worked against CALONNE and, though Louis XVI looked with disfavor on his notorious immorality, he succeeded (1787) Calonne in control of finances Thereupon he adopted Calonne's plans for abolition of excessive internal customs duties, for calling of provincial assemblies, and for other reforms The opposition of the Parlement of Paris led him to exile that body to Troyes for a time and finally resulted in the calling of the fateful States-General Having done nothing to relieve the financial ills of France, he left office (Aug, 1788) in great popular disfavor He was made a cardinal in 1788, but after he took the civil oath of the clergy (1791), the pope deprived him of his cardinalate He was arrested by the revolutionary government in 1793 and died in prison His incompetence had helped to precipitate the French Revolution

Lomond, Loch (lŏkh lō'mŭnd,–mun), lake, between Dumbartonshire and Stirlingshire, Scotland, drained by the Leven to the Clyde The lake is 23 mi long and 5 mi to less than 1 mi wide, being broadest at the southern end, near its outlet, where there are numerous wooded islands Its inlets include the Endrick and the Luss The northern end is overlooked by Ben Lomond (3,192 ft high), in Stirlingshire Lomond is the largest and one of the most beautiful of Scottish lakes There are numerous associations with Rob Roy, including a cave refuge on the shore At Inversnaid is an 18th-century fort, and there are several castles in the vicinity or on the islands

Lomond Hills, mountains, Fifeshire, Scotland East Lomond is 1,471 ft high, and West Lomond is 1,713 ft high

Lomonosov, Mikhail Vasilyevich (mēkhŭyēl' vŭsē'lyuvĭch lŭmŭnô'sŭf), 1711–65, Russian scientist and writer; son of a prosperous fisherman of the Archangel district In his early years self-taught, he later went to Moscow and then to St Petersburg to study He was one of 12 chosen by the St Petersburg Academy to study chemistry and metallurgy in Germany In 1741 he returned to Russia and received an appointment to the Academy of Sciences which he held for life He was a dominant figure in Russian culture and especially notable in science, in which by his experiments he anticipated such modern principles as the mechanical nature of heat and the kinetic theory of gases He wrote a history of Russia (1766) and a Russian grammar (1755) In his odes and other verses he adopted the new principle of tonic rather than syllabic versification, thus altering the character of Russian prosody His greatest service lay in his reform of the Russian literary language For this he chose an idiom midway between the Old Church Slavonic and spoken Russian

Lomonosov (lŭmŭnô'sŭf), formerly **Oranienbaum** (ôrē'nyŭnboum), city (1939 pop over 10,000), RSFSR, on the Gulf of Finland, SW of Leningrad and opposite Kronstadt A summer resort, it is the site of a palace built (1714) by Peter I and of the "Chinese Palace," built (1768) by Catherine the Great. In the Second World War, during the German siege (1941–44) of Leningrad, Oranienbaum was part of the Russian bridgehead on the Gulf of Finland It was renamed in 1948

Lompoc (lŏm'pōk), city (1940 pop 3,379, 1944 special census pop 5,844), S Calif, NW of Santa Barbara, founded 1874, inc. 1888 It is in a fertile valley noted for its flowers, and seeds are extensively produced and shipped Kieselguhr is quarried here, and there are oil wells in the vicinity La Purisima Concepcion Mission, a state historic monument, is near by.

Lomza (lŏm'zha, –shu), Pol *Łomża* (wôm'zhä), city (pop 13,772), Poland, on the Narew and W of Bialystok Probably founded in the earliest times of the Polish kingdom, Lomza passed to Prussia in 1795 and to the Russian empire in 1815 Chiefly a trade center, it also has an electrical industry There are peat deposits in the vicinity

Lonaconing (lōnukō'nĭng), coal-mining town (pop 2,429), NW Md, in the Allegheny Mts SW of Cumberland, settled c 1835 It also has silk manufacturing

London, Jack (John Griffith London), 1876–1916, American author, b San Francisco At 17 he shipped as an able seaman to Japan and the Bering Sea He was an oyster pirate, a gold-seeker in the first Klondike rush, a newspaper correspondent during the Russo-Japanese War, and in 1914 a war correspondent in Mexico His stories, romantic adventures with realistic setting and character, began to appear first in the *Overland Monthly*, and in 1900 *The Son of the Wolf Tales of the Far North* was published His Klondike tales are among his most vigorous, and *The Call of the Wild* (1903) has remained one of the best dog stories ever written Other works are *The Sea-Wolf* (1904), *White Fang* (1905), and *Smoke Bellew* (1912) *Martin Eden* (1909) and *Burning Daylight* (1910) are semi-autobiographical Though he was a highly paid writer of extremely popular fiction, London considered his social tracts as his most important work—*The People of the Abyss* (1903) and *The Iron Heel* (1907) *The Cruise of the Snark* (1911) is a vivid account of his interrupted voyage around the world in a 50-foot keteh-rigged yacht, and *John Barleycorn, or, Alcoholic Memoirs* (1913) is autobiographical Plagued by mental depression, an excess of alcohol, and financial disasters, London committed suicide See Charmian London (his second wife), *The Log of the Snark* (1915), *Our Hawaii* (1917), and *The Book of Jack London* (2 vols, 1921), Irving Stone, *Sailor on Horseback* (1938), Joan London (his daughter), *Jack London and His Times* (1939)

London, city, (pop 78,264), S Ont, on the Thames and SW of Toronto, inc 1848 The site was visited in 1793 and selected as the place for the capital of Upper Canada, but the city was not founded until 1826 Its streets and bridges are named after those of old London in England In a rich agricultural district, it has become a notable industrial, commercial, and financial center The Univ of Western Ontario (coeducational, 1878) and the affiliated Ursuline and Huron colleges are here, as are a provincial normal school and the provincial mental hospital

London, capital of the United Kingdom and chief city of the British Empire, on both sides of the Thames at the head of tidewater. Greater London (c 693 sq mi, 1931 pop 8,203,942, 1948 estimated pop 8,282,217) includes sections of the home counties, Essex, Kent, Hertfordshire, Middlesex, and Surrey The administrative county of London (117 sq mi, 1931 pop 4,397,003, 1948 estimated pop 3,339,100) includes the 28 metropolitan boroughs, Battersea, Bermondsey, Bethnal Green, Camberwell, Chelsea, Deptford, Finsbury, Fulham, Greenwich, Hackney, Hammersmith, Hampstead, Holborn, Islington, Kensington, Lambeth, Lewisham, Marylebone, Paddington, Poplar, St Pancras, Shoreditch, Southwark, Stepney, Stoke Newington, Wandsworth, Westminster, and Woolwich, each of which has its own mayor and council, responsible to the London County Council The core of London historically and commercially is the City (1 sq mi, 1931 pop 11,000, 1948 estimated pop 4,810), on the north bank of the Thames Little is known of London prior to A D 61, when, according to Tacitus, the followers of Queen Boadicea revolted and slaughtered the inhabitants of the fort Londinium after the departure of the Roman governor Paulinus Roman authority was soon restored, and the first city walls were built, remnants of which still exist After the final withdrawal of the Roman legions in the early part of the 5th cent, London became lost in obscurity Celt, Saxon, and Dane contested the general area, and it was not until 886 that London again emerged as an important town under the firm control of Alfred the Great, who rebuilt the defenses against the Danes and gave the city a form of government It is a measure of London's independence that William the Conqueror treated with it separately

In his reign was built just east of the city's wall the White Tower, the nucleus of the TOWER OF LONDON Under the Normans and Plantagenets the city grew commercially and politically and in the reign of Richard I (1189–99) obtained that form of municipal government by a lord mayor and corporation which exists to the present The GUILDS, which became important in the 13th and 14th cent, gained control of civic affairs and grew sufficiently strong to restrict trade to freemen of the city Medieval London saw the foundation of the INNS OF COURT and the original structures of SAINT PAUL'S CATHEDRAL and WESTMINSTER ABBEY The wealth of the religious orders provoked personal outcry in *Piers Plowman*, and the rich panorama of medieval life is reflected in Chaucer's *Canterbury Tales* With the questionings of church dogma by Wyclif in the 14th cent and the uprisings of Wat TYLER (1381) and Jack CADE (1450), the normal peace of the city was broken At the Reformation period many great ecclesiastical buildings were destroyed or converted to other uses by Henry VIII, who founded several grammar schools for the poor The reign of Elizabeth brought London to its greatest height of wealth, power, and influence—the undisputed center of England's Renaissance culture Spenser, Byrd, Nashe, Greene, Peele, Kyd, Marlowe, and Shakspere found the diverse and vigorous elements of London life inspiring to their creative efforts With the advent (1603) of the Stuarts to the throne, the city became involved in struggles with the crown on behalf of its democratic privileges, culminating in the civil war In 1665 the great plague (see PLAGUE) took c 75,000 lives On Sept 2, 1666, began the great fire, which lasted five days and virtually destroyed the city, including St Paul's From its ashes rose the London of Sir Christopher WREN, the City whose face was not greatly altered until the Second World War In the Restoration period there was a revival of the theaters (closed under the Commonwealth), Dryden, Congreve, and Wycherley were leading dramatists Much of the business of the late 17th and early 18th cent was transacted in COFFEEHOUSES, the forerunners of the later exchange Until 1750, when Westminster Bridge was opened, LONDON BRIDGE was the only one to span the Thames at London, and ferries did a profitable business, other bridges include Blackfriars (1770), Southwark (1819), the Tower Bridge (1894), and Waterloo (completed 1944, replacing the bridge built 1811–17) The City itself stretches from the TEMPLE on the west to the Tower of London on the east The financial center of London, it includes the BANK OF ENGLAND and other banks and business houses In the Second World War many of its historic buildings (including the Guildhall, scene of the lord mayor's banquets and other public functions) were destroyed or greatly damaged The Mansion House, residence of the lord mayor, was only slightly damaged. The best-known streets of London are FLEET STREET, the STRAND, PICCADILLY, WHITEHALL, PALL MALL, DOWNING STREET, LOMBARD STREET, and Bond and Regent streets (noted for their shops) Besides the BRITISH MUSEUM, the art galleries and museums of London include the VICTORIA AND ALBERT MUSEUM, the NATIONAL GALLERY, the Tate Gallery, and the Wallace Collection The Univ of London (see LONDON, UNIVERSITY OF) is in Bloomsbury See P. H Boynton, *London in English Literature* (1915), Sir Laurence Gomme, *London* (1914), Dorothy Nicholson, *The Londoner* (1944), Parry Marshall, *City of London* (1947), William Kent, *Mine Host London a Chronicle of Distinguished Visitors* (1948)

London. 1 City (pop 2,263), co seat of Laurel co, S Ky, NNW of Middlesboro It is the trade center for a coal, corn, and tobacco area Sue Bennett College (junior, coeducational) is here Near by are the Sublimity Farms (a U S land-use project), Levi Jackson Wilderness Road State Park, and Cumberland National Forest 2 Village (pop 4,697), co seat of Madison co, SW central Ohio, WSW of Columbus, founded 1811, inc 1831 Metal products are made Near by is the London State Prison Farm

London, Declaration of, international code of maritime law, especially as related to war, proposed in 1909 The declaration largely grew out of the attempt at the second of the HAGUE CONFERENCES to set up an international prize court with compulsory jurisdiction Great Britain, then the chief naval power, felt that such a court should be governed by defined principles At British invitation the leading European naval powers and the United States and Japan assembled at London in 1908 The Declaration of London which they issued comprised 71 articles dealing with many controverted points, including BLOCKADE, CONTRABAND, and PRIZE. In general it was a restatement of the existing law, but in its high regard for the rights of neutrals it represented a distinct advance. Although the U S Senate ratified the declaration, unanimous ratification by the signatories did not follow, and the code never went into effect officially In the First World War a proposal of the United States that the belligerents voluntarily abide by the code was rejected. Its provisions were not widely observed in the Second World War. See J. A. Hall, *The Law of Naval Warfare* (1921).

London, University of, founded in London, England, in 1836 as an examining and degree-giving body. Teaching functions were not added until 1898 It comprised at first University College (which had been founded in 1826 as the Univ. of London, a nonsectarian school) and King's College (founded 1829 by adherents of the Church of England). It is now a large aggregation of affiliated schools, colleges, institutes, and hospitals Besides University and King's, its schools and colleges include Bedford (1849, for women), Birkbeck (1823), Imperial College of Science and Technology (1907), King's College of Household and Social Science (1928), London School of Economics and Political Science (1895), Queen Mary College (1887), Royal Holloway College (1883, for women), School of Oriental and African Studies (1916), Westfield College (1882, for women), and Wye College (1894), it has also several theological and medical schools Many of the university buildings, in various parts of London, suffered severe damage in the Second World War

London Bridge, granite, five-arched bridge over the Thames, in central London It is 928 ft. long and was designed by John Rennie and built in 1824–31. The early wooden bridge (963–75) was replaced (1176–1209) by a stone bridge with houses and a chapel The buildings were removed in 1756–62. It was many times damaged by fire It was the only bridge over the Thames in London until the construction (1739–50) of Westminster Bridge

London Company, a corporation composed of persons residing in and about London which, together with the Plymouth Company, was granted (1606) a charter by James I to locate colonies in America between lat 34° and 45° N, territory claimed by England The London Company, under the chief patronage of Sir Robert Cecil, was granted a tract of land fronting 100 mi on the sea and extending 100 mi inland somewhere between lat 34° and 41° N, while the Plymouth Company's grant (see GORGES, SIR FERDINANDO) lay somewhere between lat 38° and 45° N The government of the colonies was conferred upon a royal council which was to appoint a local council for each colony, both councils to govern according to the king's instructions The London Company expedition, under the command of Capt Christopher NEWPORT, founded (1607) JAMESTOWN, first permanent English settlement in America (see VIRGINIA) In May, 1609, the company received a new charter, making it independent of the Plymouth Company, extending its territory, and enabling it to replace the local council with an absolute governor Thomas West, Baron DE LA WARR, was the first to hold that office, with Sir Thomas GATES as his deputy A third charter, granted in March, 1612, made the London Company, now more commonly known as the Virginia Company, a self-governing body There was, however, dissension within the company over governing policies, and the corporation was soon divided into two parties. The court party, headed by Sir Robert Rich, favored prolongation of martial law in the colony The country or patriot party, led by Sir Edwin SANDYS, Sir John Danvers, and John and Nicholas Ferrar, favored discontinuance of the system of servitude The country party was in the majority, but a liberal form of government was not established in Virginia until after the arrival of Sir George YEARDLEY as governor in 1619, when representative government was inaugurated in America with the convening of the first legislative assembly at Jamestown Although affairs in Virginia gradually improved, a petition was presented (1623) to the king calling for an investigation of conditions in the colony. Shortly afterwards there appeared a paper, *The Unmasked Face of Our Colony in Virginia* Already offended by the company, the king now took extreme measures A report was made by an investigating commission, the case was tried before the King's Bench, and the unfavorable decision rendered in May, 1624, resulted in the dissolution of the company About £200,000 had been spent by the company and more than 14,000 emigrants sent to Virginia See S M Kingsbury, ed., *The Records of the Virginia Company of London* (4 vols, 1906–35), H. L Osgood, *The American Colonies in the Seventeenth Century*, Vol I (1904), W R Scott, *The Constitution and Finance of English, Scottish, and Irish Joint-Stock Companies to 1720* (3 vols, 1910–12), W F. Craven, *Dissolution of the Virginia Company the Failure of a Colonial Experiment* (1932), C. M Andrews, *The Colonial Period of American History*, Vol I (1934), C. W. Sams, *The Conquest of Virginia The Third Attempt, 1610–1624* (1939).

London Conference, name of several international conferences held at London, England, in the 19th and 20th cent The following list includes only the most important of these meetings. At the **London Conference of 1830–31** the chief powers of Europe met to discuss the status of Greece. It was decided that Greece should be a fully independent principality, instead of an autonomous state as had been provided in the London Protocol of 1829. The territorial limits of Greece were, however, considerably reduced from those provided in the London Protocol, and the decision was rejected by the Greeks. A new protocol (1831) was drawn up, restoring the 1829 border but retaining the sovereign status of Greece This was accepted. While the Greek problem was under discussion, the Belgians revolted against the Dutch king. The matter was taken up at the conference, which ordered (Nov., 1830) an armistice between the Dutch and the Belgians. The first draft for a treaty of separation of Belgium and the Netherlands was rejected by the Belgians A new draft (June, 1831) was rejected by William I of the Netherlands, who resumed hostilities Franco-British intervention compelled the Dutch to evacuate their forces from Belgium late in 1831, and in 1833 an armistice of indefinite duration was concluded William's designs to recover Luxembourg and Limburg led to renewed tension, and the **London Conference of 1838–39** followed This prepared the final Dutch-Belgian separation treaty of 1839 and divided Luxembourg and Limburg between the Dutch and Belgian crowns The neutrality of Belgium was guaranteed For the **London Conference of 1852,** see SCHLESWIG-HOLSTEIN, for the **London Conference of 1867,** see LUXEMBOURG, for the **London Conference of 1908,** see LONDON, DECLARATION OF The **London Conference of 1933** was the World Monetary and Economic Conference, which had as its object the checking of the world depression by means of currency stabilization and economic agreements Unbridgeable disagreements among the participants and the attitude of the United States made the meeting a total failure; customs and currency restrictions instead became increasingly stringent throughout the world After the Second World War several meetings of the Council of FOREIGN MINISTERS took place at London

Londonderry, Robert Stewart, 2d marquess of see CASTLEREAGH, ROBERT STEWART, 2D VISCOUNT

Londonderry (lŭn"dŭndĕ'rĭ, lŭn'dŭndĕr"rĭ) or **Derry,** maritime county (804 sq mi, 1937 pop 142,736, 1948 estimated pop 150,830), Northern Ireland, in Ulster The capital is Londonderry, a major Irish port and trading center The county is largely mountainous, with a low cultivated plain along Lough Foyle and the Bann river The damp, cold climate is unfavorable to agriculture The making of linen and distilling are the chief industries of the region, and fishing is an important occupation The district was dominated for many centuries by the O'Neill family, whose confiscated estates were granted, in 1609, to the city companies of London, whence the name of the county The *Londonderry Air*, a traditional Irish melody, was probably originally indigenous to the region

Londonderry or **Derry,** county borough (pop 47,813), co seat of Co Londonderry, Northern Ireland, on the Foyle near the head of Lough Foyle It is a seaport with extensive quays, dry docks, and shipyards The chief export is cattle The city's industries include linen weaving, flour milling, tanning, iron founding, distilling, and fishing An abbey was founded here in 545 by St Columba, and the town grew up around this, it was burned by the Danes in 812 In 1311 the town was granted to Richard de Burgh When in 1608 it was turned over to the corporations of the City of London, the name was changed from Derry to Londonderry The siege of Londonderry by the forces of James II began in April, 1689, it held out for 105 days under the leadership of the Rev George Walker A triumphal arch, one of the towngates, and a column commemorate the siege The town is the seat of a Protestant cathedral (built 1628–34, restored 1886–87) and of a Roman Catholic cathedral and a monastery church (founded 1164) It was a U.S naval base in the Second World War

Londonderry, rural town (pop 1,429), S N H, SE of Manchester, settled 1719 by Scotch-Irish, chartered 1722 Settlers introduced the growing of potatoes and flax and the manufacture of linen in this region Windham, Derryfield (now Manchester), and Derry were set off from the original town, and Londonderry, Vt, was founded from here In 1934 a successful cooperative egg market was opened

Lone Wolf, d 1879, Kiowa Indian chief He led some Kiowa braves on the warpath in 1874, but he was quickly defeated and with a number of followers was deported to Florida, where he remained in military confinement for three years

Long, Crawford Williamson, 1815–78, American physician, b Danielsville, Ga., M.D. Univ. of Pennsylvania, 1839 He practiced in Georgia at Jefferson In 1842 he excised a tumor of the neck using ether anesthesia, but this was not made public until after the demonstration by W. T. G Morton in Boston in 1846 See study by F. L. Taylor (1928).

Long, Huey Pierce, 1893–1935, American political leader in Louisiana, b. Winnfield, La. A farm boy, he became a traveling salesman, winning many friends among the "red necks" of back-country Louisiana He completed the law course at Tulane Univ in seven months and, admitted to the bar in 1915, practiced at Winnfield and Shreveport Long served on the state railroad commission (1918–21) and the public service commission

(1921–28) and was attorney for the state in a great deal of public-utility litigation He was narrowly defeated for governor in 1924, but was swept into office four years later. Long was responsible for the building of badly needed roads and hospitals and for educational benefits, featured by free textbooks A clever demagogue with an insatiable lust for power, he brought these improvements with new and increased taxes and the virtual suspension of democracy. A supine legislature was bludgeoned or bought into passing his laws "The Kingfish," as he was called, resigned (1931) as governor to enter the U S Senate and directed his fascistic Louisiana dictatorship from Washington At first a supporter of the New Deal, he became one of Franklin D Roosevelt's most vociferous critics In the Senate (where he was a master of the filibuster technique), on speaking tours, and in his *Every Man a King* (1933), Long advocated his "Share-the-Wealth" program, and self-styled reformers such as Gerald L K Smith attached themselves to the crusade He had set the presidency as his next goal (*My First Years in the White House* was published in 1935) and organized a steadily increasing national following when he was assassinated in Sept , 1935, at the new state capitol he had built in Baton Rouge The assassin, Dr Carl A Weiss, son-in-law of a political opponent about to be liquidated after Long's usual ruthless fashion, was immediately slain by the dictator's bodyguards. His political machine flourished for several years after his death (see LOUISIANA), and Long's name is still important in the state See biographies by Forrest Davis (1935) and Carleton Beals (1935), H T Kane, *Louisiana Hayride* (1941)

Long, John Davis, 1838–1915, U S Secretary of the Navy (1897–1902), b Buckfield, Maine, grad Harvard, 1857 In 1861 he was admitted to the bar, and he moved his legal practice to Boston in 1863 He entered the Massachusetts legislature in 1875, becoming speaker in 1876 In 1879 he was elected lieutenant governor, and in 1880, 1881, and 1882 he was elected governor of Massachusetts He became a member of Congress in 1883, returning to the practice of law in 1889 As Secretary of the Navy appointed by President McKinley he was in charge of the highly successful naval operations in the Spanish-American War He wrote *The New American Navy* (1903) See his papers for the years 1897–1904 (1939), *America of Yesterday, as Reflected in the Journal of John Davis Long* (ed by L S Mayo, 1923)

Long, John Luther, 1861–1927, American playwright, b Hanover, Pa His short story, "Madame Butterfly" (1898), was dramatized by Belasco (1900) and used by Puccini (1906) for an opera Belasco and Long also collaborated successfully on *The Darling of the Gods* (1902) and *Adrea* (1905).

Long, Perrin Hamilton, 1899–, American physician, b Bryan, Ohio, M D Univ of Michigan, 1924 He taught medicine at Johns Hopkins from 1929 and in 1940 became head of the new department of preventive medicine there He made a special study of sulfanilamide and its derivatives and wrote *Clinical and Experimental Use of Sulfanilamide, Sulfapyridine, and Allied Compounds* (with E A Bliss, 1939) and *A-B-C's of Sulfonamide and Antibiotic Therapy* (1948)

Long, Stephen Harriman, 1784–1864, American explorer, b Hopkinton, N H , grad Dartmouth, 1809 He had taught school before he entered the army and became an army engineer Long was sent on several exploring and surveying expeditions The first in 1817 was to the region of the upper Mississippi and the Fox-Wisconsin portage, it is recorded in his *Voyage in a Six-oared Skiff to the Falls of St Anthony* (1860) A voyage to the Rocky Mts in 1819–20 brought much new knowledge of the mountains. He climbed several peaks, including Longs Peak, and explored the regions of the Platte and Arkansas Edwin James's *Account of an Expedition from Pittsburgh to the Rocky Mountains* (2 vols and an atlas, 1822–23) tells of this journey In 1823 he led an expedition to determine the source of the Minnesota river and to study the United States–Canadian boundary W of the Great Lakes Some of his notes were used in W H Keating's *Narrative of an Expedition to the Source of the St Peter's River* (2 vols , 1824) Chosen to select a route for the Baltimore and Ohio RR, he made a survey that resulted in an authoritative railroad manual, with tables of grades and curves.

Long, William Joseph, 1866–, American nature-writer, b Attleboro, Mass , grad Harvard, 1892. His works include *Wilderness Ways* (1900), *Brier Patch Philosophy* (1906), and *Mother Nature* (1923). Long was called a "nature faker" by Theodore Roosevelt in a famous controversy

Long, Loch (lŏkh), inlet, c 20 mi long, between Argyllshire and Dumbartonshire, Scotland, extending NE from the Firth of Clyde There is a narrow isthmus between Arrochar on Loch Long and Tarbet on Loch Lomond. Loch Goil is a western branch of Loch Long, overhung by Ben Arthur (the Cobbler), 2,891 ft. high.

Long Beach. 1 City (1940 pop. 164,271; 1946 special census pop. 241,109), S Calif , S of Los Angeles and on San Pedro Bay; laid out 1882, inc 1888 With a fine harbor and beach, it is a year-round resort. It is a residential and manufacturing city, with a large oil industry, aircraft factories, fish and fruit canneries, soap and vegetable-oil plants, lumber mills, shipyards, and extensive shipping The oil wells at SIGNAL HILL are highly productive. 2 Resort town (pop 1,495), SE Miss , on Mississippi Sound just W of Gulfport, in a truck area 3 Resort city (pop 9,036), on the south shore of Long Island, SE N Y , S of Rockville Centre, inc as a city 1922

Long Branch, residential town (pop 5,172), S Ont , on Lake Ontario SW of Toronto

Long Branch, city (pop 17,408), E N J , on the Atlantic between Sandy Hook and Asbury Park, settled 1740, inc 1904 It became a popular resort early in the 19th cent Presidents Grant and Garfield had homes here, and President Wilson a summer home at West Long Branch See Federal Writers' Project, *Entertaining a Nation* (1940)

Longchamp, William of (lôngˈshămp, lôshäˈ), d 1197, chancellor of England (1190–91), bishop of Ely, of Norman extraction After service with Geoffrey, son of Henry II, he joined Richard (later RICHARD I) and his brothers in the uprising (1189) against Henry Upon Richard's accession (1189), William was made chancellor, bishop, and joint justiciar Rising to be chief justiciar and papal legate within a year, he became the acting head in England of both state and church His autocratic administration led to a rebellion by JOHN and the barons, who in 1191 drove him from England In 1193 he joined the captive Richard in Germany, tried unsuccessfully to arrange for raising the king's ransom in England, and performed other royal missions to France and Rome

Longchamp (lôshäˈ), famous racecourse of Paris, France, in the Bois de Boulogne It was the site of an abbey, founded in 1260 and suppressed in the French Revolution

Long Eaton, urban district (1931 pop 22,345, 1943 estimated pop 26,120), Derbyshire, England It has cotton mills

longevity (lônjĕˈvĭtē), long life The length of an individual's life depends upon a number of factors which include heredity, disease, accident, and general mode of living The average life expectancy for the world's population is about 62 years There are numerous records of individuals who attained ages from 120 to 150 years, these, however, are questionable The famous Thomas Parr of Shropshire, England, is reputed to have lived 152 years The scientific study of old age, its phenomena and diseases, is known as gerontology Among plants, the giant sequoias (*Sequoia gigantea*) of California are said to be from 2,000 to 4,000 years old See also VITAL STATISTICS

Longfellow, Henry Wadsworth, 1807–82, American poet, b Portland, Maine, grad Bowdoin, 1825, in the class with Nathaniel Hawthorne In Europe in 1826–29 he prepared himself to teach modern languages at Bowdoin and was so successful there that Harvard invited him to become Smith professor of modern languages and belles lettres He wrote his own textbooks and also Irvingesque sketches of Europe, *Outre-Mer* (first issued in two parts, 1833–34) Studying in Europe once more, he was saddened by the death in Rotterdam of his first wife In the period 1836–54 he was distinguished not only as a professor at Harvard with a command of some 10 languages and a contagious enthusiasm for their literatures but also as a poet, producing some of his best-known work *Voices of the Night* (1839) contains "A Psalm of Life," and *Ballads and Other Poems* (1841) includes "The Skeleton in Armor," "The Wreck of the Hesperus," "Excelsior," and "The Village Blacksmith" His *Hyperion* (1839), a sentimental prose romance, had as its heroine Frances Appleton, whom he married in 1843 *Poems on Slavery* (1842) and *The Belfry of Bruges* (1846) followed An accomplished metrist, he next wrote *Evangeline* (1847), a tale in hexameters of the expulsion of the French from Acadia, *The Song of Hiawatha* (1855), an "edda" based on Indian legend and written in the trochaic meter of the Finnish epic *Kalevala*, and *The Courtship of Miles Standish* (1858), an incident in the lives of Priscilla and John Alden His *Tales of a Wayside Inn* (1863) includes the popular "Paul Revere's Ride" Among later volumes of short poems is *The Hanging of the Crane* (1874) His ambitious trilogy *Christus* (1872) is remembered for its first section, the medieval *Golden Legend* After the tragic death from burns of his second wife in 1861, Longfellow started translating Dante, his poetic version (1867) of the *Divine Comedy* was for years highly regarded Longfellow was a national figure, and his home, Craigie House, was a place of literary pilgrimage His work was read all over the world, and he was the first American whose bust was placed in the Poets' Corner of Westminster Abbey, but 20th-century critical preferences have veered away from his romantic, moralising tone. Some of his poems are in schoolbooks, many are quoted, and his serene and gracious figure must be reckoned with in any study of 19th-century American culture See biographies by his brother, Samuel Longfellow (1886), and by T. W. Higginson (1902); J. T. Hatfield, *New Light on Longfellow* (1933), Lawrance Thompson, *Young Longfellow, 1807–1843* (1938)

Longfellow, Samuel, 1819–92, American clergyman and hymn writer, b Portland, Maine, brother and biographer of H W Longfellow He was pastor (1853–69) of the First Unitarian Church, Brooklyn, N Y. He compiled two hymnals—*Vespers* (1859), containing his own *Now on Land and Sea Descending*, and *Hymns of the Spirit* (1864)

Longford (lôngˈfurd), inland county (403 sq mi , pop 36,218), near Northern Ireland, in Leinster The county town is Longford A part of the central plain of Ireland, it has level land with numerous small lakes, bogs, and marshes The River Shannon and Lough Ree make up its western border Dairy farming is the principal occupation, oats and potatoes are the chief crops There are a number of monastic remains, notably on the islands of Lough Ree Longford was organized as a county in 1569

Longford, urban district (pop 4,019), co seat of Co Longford, Ireland, on the Camlin river It is an agricultural market and has the Roman Catholic Cathedral of St Mel, the seat of the bishop of Ardagh

Longhi, Pietro (pyäˈtrō lôngˈgē), 1702–85, Venetian genre painter He is best known for his small pictures depicting with good-natured satire the life of the Venetians of his day Most of these are in Venetian collections His works include a series of frescoes of carnival life (staircase of the Grassi-Stucky Palace, Venice), *Domestic Group* and *Exhibition of a Rhinoceros* (National Gall , London), two genre paintings (Hampton Court Palace), portrait of Senator Pisani (Liechtenstein Gall , Vienna), four genre paintings (Metropolitan Mus), and two in the National Gallery of Art, Washington, D C His son, **Alessandro Longhi** (älēsˈsänˈdrō), 1733–1813, was a portrait painter and engraver of note and the author of a work on the lives of painters A portrait of Count Carlo Aurelis Widmann, attributed to him, is in the Metropolitan Museum

Longinus (Dionysius Cassius Longinus) (lŏnjīˈnŭs), c 213–273, eminent Greek rhetorician and philosopher of the Platonic school In early life he had the advantages of travel and of knowing prominent scholars He was a student of Greek literature at Alexandria Later, he became highly regarded for his learning and his critical skill in Athens, where he was a teacher of rhetoric His last years were spent in Palmyra, where he had supervision of the education of the children of Queen Zenobia She made him her principal counselor after her husband's death When he encouraged her to resist the authority of Rome, Palmyra was overthrown by Emperor Aurelian, who had Longinus beheaded as a traitor in 273 Of the numerous works of a rhetorical, philosophical, and critical nature which he is known to have produced, only slight fragments are left His chief fame rests on a treatise incorrectly attributed to him, *On the Sublime*, usually called *Longinus on the Sublime* It is one of the monuments of literary criticism and treats what would be called now "loftiness of style " The test of loftiness the author would apply is the amount of transport it causes in the reader The treatise is the sole source for Sappho's second ode See *Longinus on the Sublime* (tr by W Rhys Roberts from the Paris MS, 1899), George Saintsbury, *History of Criticism* (1904)

Long Island see BAHAMA ISLANDS

Long Island, name applied locally to the Outer Hebrides, Scotland see HEBRIDES

Long Island, 118 mi long and 12 to 20 mi wide (pop 4,600,022), SE N Y , extending east-northeast from the mouth of the Hudson It is separated from Staten Island by the Narrows between Upper and Lower New York bays, from Manhattan and the Bronx by the East River, and from Connecticut by Long Island Sound On the south is the Atlantic Ocean The eastern part has two flukelike peninsulas, the southern fluke, 40 mi long, terminating in Montauk Point Long Island comprises four counties, Kings, Queens, Nassau, and Suffolk Kings (coextensive with Brooklyn) and Queens are part of New York city, residents of Nassau and Suffolk include commuters to New York, truck gardeners, potato farmers, poultry raisers, and fishermen Summer resorts are numerous both on the irregular wooded north shore and on the south shore, which has long beaches Beautiful estates are scattered over the island Of the state parks, Jones Beach is most popular Indians lived on the island before the advent of white men in 1636 Both Dutch and English established colonies here, the English gaining complete control in 1664 Farming, whaling, and fishing were pursued, but the population increased rapidly only after New York city, with its huge market, developed and after railroads and highways were built Important among its airfields are LaGuardia Field and New York International Airport See Birdsall Jackson, *Stories of Old Long Island* (1935), William O Stevens, *Discovering Long Island* (1939).

Long Island, battle of, in the American Revolution, Aug 27–30, 1776. To protect New York city and the lower Hudson valley from the British forces

massed on Staten Island, George Washington sent part of his small army to defend Brooklyn Heights on Long Island After several unsuccessful peace overtures, Sir William Howe landed near Coney Island while his British fleet under his brother, Richard Howe, Viscount Howe, shelled New York Sir William's troops defeated the American outguard under John Sullivan and William Alexander (Lord Stirling) Israel Putnam, the corps commander, prepared for the main attack Sir William, not wanting another Bunker Hill, decided to lay siege instead of storming Brooklyn Heights Washington saw the position was hopeless and evacuated (night of Aug 29–30) his army back to Manhattan Shortly afterwards, the Americans began the retreat northward in which delaying actions were fought at Harlem Heights, White Plains, and Fort Washington Washington had managed to extricate most of his troops, and he regrouped them before striking at TRENTON

Long Island City, part (since 1898) of W Queens borough of New York city, SE N Y. Formerly it was a city of Queens co , Long Island It is largely industrial, has a long water front on the East River, and is connected with Manhattan by bridge and tunnel

Long Island Sound, arm of the Atlantic, c 90 mi long and 3 to 20 mi wide, separating Long Island from Westchester co (N Y) and Connecticut The East River connects it with New York Bay. The sound is popular for pleasure boating, it is important as a shipping route and for its fish

Long Island University, at Brooklyn, N Y ; nonsectarian, coeducational, chartered 1926, opened 1927 It has a college of pharmacy and an institute of podiatry

longitude, distance of a place east or west of a prime meridian In the United States, England and her dominions, the Netherlands, and many other states the meridian (a line connecting all places of the same longitude) which passes through the observatory of Greenwich in London is used as a prime meridian It was accepted for nautical and international calculations by the Washington Meridian Conference in 1884 The conventional dividing line between the Eastern and Western hemispheres is the meridian of Ferro, Canary Islands, which is situated 17° 40′ W of Greenwich The meridian of Ferro is sometimes to be found on older German maps, while French cartographers used the meridian of Paris in earlier times Geographical longitude is computed east and west from 0° to 180° In astronomy, celestial longitude (or right ascension) is measured in degrees eastward along the ecliptic from the vernal equinox A difference of one hour in time is represented by 15° of longitude The meridians focus at the two poles and cross the equator and the parallels of latitude at right angles

Longman, Evelyn Beatrice, 1874–, American sculptor, b Winchester, Ohio, studied with Lorado Taft at the Art Institute of Chicago She married (1920) N H Batchelder She became known (1904) with *Victory* for the St Louis Exposition and in 1906 won a competition for the bronze doors of the U S Naval Academy chapel Other works include bronze doors for the library, Wellesley College; the colossal *Electricity* for the American Telephone and Telegraph Company, New York, and many memorials Several works are in the Metropolitan Museum

Longmeadow, suburban town (pop 5,790), SW Mass , on the Connecticut, settled 1644, set off from Springfield 1783

Longmont, city (pop 7,406), N Colo , N of Denver; founded c 1870, inc as a town 1873, as a city 1885 It is the trade and processing center for a rich farm area Coal mines are in the region

Longomontanus (lŏng"gōmŏntā'nŭs), 1562–1647, Danish astronomer, whose real name was Christian Severin The name by which he is best known is a Latinized version of Longberg, Jutland, his birthplace From 1589 to 1600 he was assistant to Tycho BRAHE and later was professor of mathematics (1607–47) at the Univ of Copenhagen, where he founded an observatory His most noted work was *Astronomia Danica* (1622) Other works were *Systematis mathematici* (1611), *Disputatio de eclypsibus* (1616), and *Coronis problematica ex mysteriis trium numerorum* (1637).

Long Parliament: see PARLIAMENT

Long Prairie, village (pop 2,311), co seat of Todd co , central Minn , between Little Falls and Alexandria; platted 1867, inc 1883 It is a farm trade center The Winnebago Indian agency was here from 1848 till 1855

Long Sault Rapids (sō, sōō), in the Ottawa river, Canada, midway between Ottawa and Montreal Here in 1660 the Iroquois defeated a party of 18 Frenchmen, who were all killed, some being tortured to death.

Longs Peak [for Stephen H LONG], 14,255 ft high, N central Colo., in the Front Range It is included in Rocky Mountain National Park

Longstreet, Augustus Baldwin, 1790–1870, American humorist, b. Augusta, Ga , grad. Yale, 1813. He became judge, editor, and Methodist minister and later was president successively of four Southern colleges As a writer he is remembered for *Georgia Scenes* (1835), boisterous and realistic sketches ranking high in frontier humor.

Longstreet, James, 1821–1904, Confederate general, b. Edgefield District, S C , spent his early life in Georgia and Alabama After graduation from West Point (1842), he served in the Indian campaigns and in the Mexican War, reaching the rank of major At the outbreak of the Civil War he resigned from the U S army and became a Confederate brigadier general He took part in the first battle of BULL RUN and in the defense against McClellan's PENINSULAR CAMPAIGN He fought at the second battle of Bull Run (1862) and at Antietam, his corps was the backbone of the defense in the battle of FREDERICKSBURG In 1862–63 he held a semi-independent command south of the James river, returning too late to aid Lee at Chancellorsville He commanded the right wing at Gettysburg (1863), where his delay in taking the offensive is generally said to have cost Lee the battle (see GETTYSBURG CAMPAIGN) He fought under Braxton BRAGG at Chickamauga in the Chattanooga campaign and unsuccessfully besieged Knoxville (1863) Returning to Virginia in 1864, he distinguished himself in the battle of the Wilderness (see WILDERNESS CAMPAIGN), where he was wounded. Longstreet participated in the last defense of Richmond, surrendering to Grant with Lee After the war he established himself in New Orleans. A personal friend of Grant he became a Republican He criticized Lee's conduct at Gettysburg harshly and was long unpopular in the South Grant appointed him minister to Turkey (1880), and he later served as Federal commissioner of Pacific railroads under McKinley and Roosevelt (1897–1904) As a general, he is considered a poor strategist but an excellent tactician There is still considerable dispute about his career, and he has been defended by apologists His opinions on the war are expressed in his *From Manassas to Appomattox* (1876) See Helen D Longstreet, *Lee and Longstreet at High Tide* (1904), H J Eckenrode and Bryan Conrad, *General James Longstreet, Lee's War Horse* (1936); D S Freeman, *Lee's Lieutenants* (3 vols , 1942–44)

Longton, part (since 1910) of STOKE-ON-TRENT, Staffordshire, England, in the Potteries district

Longueuil, Charles le Moyne, sieur de (shärl' lu mwän' syûr' dù lôgû'yu), 1626–85, French colonial leader in Canada, founder of a famous Canadian family, b Dieppe, France Coming to Canada c 1641, he worked for the Jesuits among the Hurons, was a trader, soldier, and interpreter at Trois Rivières (Three Rivers), and finally settled at Ville Marie (Montreal) For his services to France, especially in his dealings, both warlike and peaceful, with the Iroquois, Le Moyne was ennobled and granted the seigniory he named Longueuil Of his 11 sons, all of whom distinguished themselves in the French service, the sieur d'IBERVILLE and the sieur de BIENVILLE were most famous

Longueuil, city (pop 7,087), S Que It is a residential suburb of Montreal with a cathedral church and several old French houses The site was granted to the sieur de Longueuil in 1657

Longueville, Anne Geneviève de Bourbon-Condé, duchesse de (ân' shunuvyĕv' du bōōrbŏ-kōdā' dûshĕs' du lôgvēl'), 1619–79, daughter of Henri II de Condé and sister of the Great Condé A noted beauty, she was one of the leaders of the FRONDE She made her peace with the court in 1653 Much of her remaining life was spent in convents, notably that of Port-Royal, which through her influence was saved from persecution in her lifetime. See biography by Alfred Cook (1899).

Longus: see DAPHNIS AND CHLOË.

Longview. **1** Town (pop 1,489), W N C , WSW of Winston-Salem near Hickory, in a cotton region **2** City (pop 13,758), co seat of Gregg co , E Texas, W of Shreveport, La , and near the Sabine, settled 1865, inc 1872 Decline, which set in as the pine lumbering sank, was arrested, and the city boomed after the stupendously rich East Texas oil field was discovered in 1930 **3** City (pop 12,385), SW Wash , a port of entry at the junction of the Cowlitz with the Columbia A bridge (1930) crosses the Columbia to Oregon Longview was founded in 1923 as a lumber-manufacturing city on the site of Monticello, historic pioneer settlement It also processes food and produces aluminum A junior college is here.

Long Walls: see PIRAEUS, Greece.

Longworth, Nicholas, 1782–1863, American horticulturist, b. Newark, N J Although he experimented with many crops, he was most noted for the establishment of grape culture in the Ohio valley. Large tracts of his land were devoted to the raising of Catawba and Isabella grapes, which he found to be best suited to that locality The wine that he manufactured from his grapes and his wine house were internationally famous In addition to many horticultural articles he wrote *A Letter . . on the Cultivation of the Grape and Manufacture of Wine* (1846).

Longworth, Nicholas, 1869–1931, American legislator, b. Cincinnati, grad. Harvard, 1891, and Cincinnati Law School, 1894. After he was admitted (1894) to the bar, he practiced in Cincinnati, where his family had been prominent since the days of his great-grandfather, Nicholas Longworth (1782–1863). He served (1889–1903) in the Ohio legislature and was elected (1903), with the support of George B. Cox, to the U.S. House of Representatives In 1906 he married Alice Lee Roosevelt, the daughter of President Theodore Roosevelt, the wedding taking place at the White House. As a U.S. Congressman (1903–13, 1915–31) Longworth was (1925–31) Speaker of the House and became recognised as a master of congressional procedure See biography by Clara Chambrun (1933); Alice Roosevelt Longworth, *Crowded Hours* (1943).

Longwy (lôvwē'), town (pop. 12,064), Meurthe-et-Moselle dept , NE France It is in an iron-mining district, near the Belgian and Luxembourg borders It consists of two separate sections Longwy-Bas, the lower town, is a center of the Lorraine iron and steel industry; Longwy-Haut has kept the fortifications built (17th cent) by Vauban

Longyear City, Nor *Longyearbyen*, settlement (pop c 1,000), West Spitsbergen, on Advent Bay. It is a coal-mining center founded by the American miner Longyear

Lönnrot, Elias (ĕlē'ăs lûn'rōt), 1802–84, Finnish philologist, compiler of the KALEVALA Trained as a physician, he became more interested in folklore and philology than in medicine From 1828 he traveled through Finland, Lapland, and NW Russia, collecting from the rune singers fragments of the *Kalevala*, of which he published (1835) about 12,000 lines A second edition of nearly 23,000 lines appeared in 1849 To Lönnrot must go the credit of creating a national epic from the[scattered fragments sung or recited. He also collected other folk songs and proverbs.

Lonoke (lō'nōk), trading city (pop. 1,715), co. seat of Lonoke co , central Ark , E of Little Rock, in an area producing rice, strawberries, and cotton A large state fish hatchery is here.

Lons-le-Saunier (lôⁿ"-lu-sônyā'), town (pop 14,247), capital of Jura dept , E France. Known since Roman times for its saline springs, it is also the center of an agricultural region Rouget de Lisle was born here

Loo-Choo Islands see RYUKYU ISLANDS

Loogootee (lōgŏ'tē), residential city (pop 2,325), SW Ind , between the forks of the White River E of Washington

Lookout, Cape, point of a sandy reef (Core Banks), off E North Carolina, SW of Cape Hatteras The reef guards the port entrance to Beaufort and Morehead City. A lighthouse on the point was erected in 1859

Lookout Mountain, residential town (pop. 1,545), E Tenn , near Chattanooga It is on Lookout Mt , which rises to 2,126 ft and extends into Georgia and Alabama The part near Chattanooga was the scene of a Civil War battle (see CHATTANOOGA CAMPAIGN) Parts of the area are included in Chickamauga and Chattanooga National Military Park A cable railway ascends the mountain, a visiting point for tourists There are lighted limestone caves and interesting rock formations An observatory and museum, a memorial to Adolph S Ochs, was dedicated in 1940

loom, frame or machine used for WEAVING The fundamental parts are the warp beam, a cylinder on which the warp threads are wound, heddles (rods or cords), each with an eye through which is drawn a warp thread, the harness, a rectangular frame set with a series of heddles operated to form a shed between the warp threads for the insertion of the weft threads, the reed, a combike frame which pushes the filling yarn firmly against the finished cloth after each pick or row, the shuttle, a boat-shaped bobbin holder which carries the weft yarn through the shed, and the cloth beam, on which the cloth is rolled as it is constructed Vertical looms, such as the Navaho and some tapestry looms, developed from the practice of hanging the warp beam from a tree and holding the yarns taut with stones, pegs, or a weighted pole The horizontal form, at first two poles holding the warp extended on the ground, was widely used for the Western European hand loom and for the foot loom, the forerunner of the[modern] power loom In the foot loom the harnesses were operated by treadles, leaving the hands free to pass and catch the shuttle John Kay in 1733 invented the automatic fly shuttle, and in 1760 his son Robert devised a drop box by which multiple trays automatically brought bobbins of colored threads in line as desired. These aids to weaving necessitated inventions to speed up SPINNING, which in turn made faster weaving essential. Edmund Cartwright patented in 1785 the first practical power loom, the basis of the modern loom with its multiplicity of automatic devices Elaborate patterns had been woven on the draw loom probably in use in Egypt by 1 B C. and introduced into Europe from Damascus by Crusaders. Strings attached to the heddles were pulled by an assistant to form the desired shed. By 1804 JACQUARD had perfected an attachment applicable to the power loom whereby any design might be woven on it. In the modern Jacquard, one repeat of the design is laid out on squared paper, then punched on cards which are

laced into a continuous chain rotated on an overhead device. The cards are brought in contact with needles each controlling a cord or wire that lifts a heddle when the needle passes through a hole in the card. In the Lefier robot, a design made on copper with insulating paint is transmitted by electricity to needles which lift the heddles

looming see MIRAGE

Loomis, Elias, 1811–89, American physicist and mathematician, b Willington, Conn, grad Yale, 1830. He taught at Western Reserve (1837–44), at New York Univ (1844–47, 1849–60), and at Yale (from 1860). He established an observatory at Western Reserve and evolved there the type of weather map later used by the U S Weather Bureau; he also made astronomical and magnetic observations for the government. He wrote several mathematical texts

Loomis, Mahlon, 1826–86, American inventor, b Oppenheim, N Y. He was a dentist by profession but spent much of his time pioneering in wireless communication. Using aerials borne by kites, he successfully transmitted signals (1866) between two mountains in Virginia. He was granted a patent on July 30, 1872. In 1873, by an act of Congress, the Loomis Aerial Telegraph Company was incorporated, but no appropriation was provided. Absence of financial support caused the project to fail.

loon, migratory aquatic bird of the colder parts of the Northern Hemisphere, found in fresh and salt water. Its weird call can be heard for great distances. Like the related grebes, loons are strong swimmers and adept divers. On land they use bill and wings to aid their awkward progress. Although they have difficulty in getting into the air, they are swift fliers. Then long, sharp, strong beaks are well adapted for catching the fish which form the bulk of their diet. The common North American loon, or great northern diver, is a black and white bird about 32 in. long.

Loos, Adolf (ä'dôlf lōs'), 1870–1933, Austrian architect. He built mainly residences in and around Vienna. His best-known work is the office building on Michaelerplatz (1910). Loos's emphasis on pure form and proper material and his polemics against ornament and decoration had a strong influence upon the development of the functional style. Two volumes of his essays were published as *Ins Leere gesprochen* [spoken into a void] (1921) and *Trotzdem* [nevertheless] (1931)

Loos (lōs), town (pop 3,170), Pas-de-Calais dept, N France, NW of Lens, in a coal-mining district. In the First World War, British forces recaptured (Oct, 1915) Loos from the Germans at the price of tremendous losses. Since 1937 the official name has been Loos-en-Gohelle

Lope de Rueda (lō'pā dā rwā'dhä), 1510?–1565, Spanish dramatist. In technique and management he was the most important precursor of the Golden Age. He was actor and manager as well as playwright and traveled with his troupe in a stagecoach, which he used as a stage. Rueda's outstanding value is his use of the language and manners of the rustic people. He created the dramatic genre known as *pasos*. Among these the one called *Paso de las Aceitunas* [the olives] is widely known. His witty comedies and farces include *Eufemia*, *Armelina*, *Medora*, and *Los engañados* [the cheaters]

Lope de Vega Carpio, Félix (fā'lēks lō'pā dā vä'gä kär'pyō), 1562–1635, Spanish dramatic poet, one of the great figures of Spanish literature. Orphaned young, he was not highly educated. His early life was a series of escapades. In 1587 he was banished from Madrid for libel. After eloping with Isabel de Urbina (who appears as Belisa in many of his poems), he joined (1588) the Spanish Armada. His epic *La hermosura de Angélica* [the beauty of Angelica] (1602), modeled on Ariosto, was completed in the intervals of fighting the English. Two epics which deal with English history are *La dragontea* (1598), against Sir Francis Drake, and *La corona trágica* (1627), defending Mary Queen of Scots. His plays, mostly in verse, were turned out with incredible speed. They were distinguished by wit, by brilliant dramatic effects, and sometimes by fine portrayal of character. Lope's disregard of the neoclassical unities had an important effect on European drama. Among his best-known plays, which range from farce to tragedy, are *El mejor alcalde el rey* [the greatest alcalde, the king], *La estrella de Sevilla* [the star of Seville], *El rey don Pedro en Madrid* [King Peter in Madrid], *La tragedia del rey don Sebastián y bautismo del príncipe de Marruecos* [the tragedy of King Sebastian and the baptism of the prince of Morocco] (written 1593), and *El vellocino de oro* [the golden fleece] (written 1622). Lope was successful as a lyric poet and as a writer of tales. He took holy orders late in life but continued to write for the stage. See Rudolph Schevill, *The Dramatic Art of Lope de Vega* (1918).

López, Carlos Antonio (kär'lōs änt'nyō lō'pās), 1790?–1862, president of Paraguay (1844–62). Emerging into prominence immediately after the death of J. G. Rodrigues FRANCIA, he soon became president. With arbitrary rule, he improved the army and navy and attempted to better economic conditions by creating government monopolies. He tried to establish contact with the outside world and so do away with Francia's isolationism, but his foreign policy caused friction with other nations.

López, Francisco Solano (frän'sēs'kō sō'lä'nō), 1826?–1870, president of Paraguay (1862–70). He was considered to be the son of Carlos Antonio López, who made him a brigadier general at 18. Appointed head of a diplomatic mission, he went to Europe in 1853, where he placed orders for munitions and arranged for the building of the first railroad in Paraguay. Upon his return he was made minister of war, and in 1862, on the death of his father, he assumed power as a dictator. Following in the steps of his father and Francia, he ruled with an iron hand. Ambitious and desirous of increasing the prestige of Paraguay, López got into difficulties with Brazil concerning Uraguayan affairs. In 1865 he found himself at war with Brazil, Argentina, and Uruguay (See TRIPLE ALLIANCE, WAR OF THE). He was finally defeated and killed (1870) at Aquidabán, after heroic resistance. He demanded blind allegiance from his officers, and, obsessed with a persecution complex, even had members of his own family killed on suspicion of conspiracy. An incident with the United States arose over his imprisonment of Porter Cornelius Bliss. Many of the cruelties which marked his rule were attributed to Madame Eliza Lynch, his Irish mistress, whom he had met in Paris. Solano López is, however, regarded by some in Hispanic America today as the champion of the rights of small nations against the aggression of more powerful neighbors

López, Narciso (närsē'sō), 1798?–1851, Spanish American soldier, b Venezuela. After serving in the Spanish army in the Venezuelan revolution against Spain, he left his native country for Cuba (1823). He went to Spain, fought against the Carlists, and became a field marshal and a senator in the Cortes. He obtained an appointment as governor of Trinidad in Cuba, but lost it when the supreme command in Cuba was changed in 1843. A liberal, he began to plan a revolution against Spain, and in 1848 he was forced to flee to the United States when his scheme was discovered. He obtained American aid and planned a filibustering expedition to Cuba (1848). This did not get well under way and, two years later, a new expedition against Cárdenas was scarcely more successful. In 1851, a third expedition did gain a foothold on the island, but ended in complete defeat—López himself was captured and executed. See R G Caldwell, *The Lopez Expeditions to Cuba, 1848–51* (1915)

López, Vicente Fidel (vē-sän'tā fēdhäl'), 1815?–1903, Argentine historian, journalist, novelist, and politician, son of Vicente López y Planes. A member of the liberal May conspiracy against the dictator Juan Manuel de ROSAS, he had to seek refuge in Chile (1840–52), where he founded a critical review and aided the educational schemes of Sarmiento. He returned to Argentina to aid Urquiza and was again an expatriate after Urquiza's fall from power. Later he became rector of the Univ of Buenos Aires. With Juan María Gutiérrez he edited (1871–77) the *Revista del Río de la Plata*. Of his historical works the most important is *Historia de la República argentina* (10 vols, 1883–93). He also wrote novels, essays, and political tracts

López de Ayala, Pedro (pā'dhrō lō'pāth dā ä'yä'lä), 1332–1407, Spanish statesman and writer. He sided with Henry II of Castile (Henry of Trastamara) against Peter I (Peter the Cruel) and held high offices under Henry II, John I, and Henry III. He is best known for his chronicle covering the reigns of these four Castilian kings, which is considered very reliable. He also wrote poetry

López de Legaspi, Miguel (mēgĕl' lō'pāth dā lāgä'spē), d 1572, Spanish navigator, conqueror of the Philippines. In 1545 he went to Mexico and was later chosen by the viceroy, the elder Luis de Velasco, to head an expedition for the conquest of the Philippines. He sailed in 1564, occupied the Ladrone Islands (which he named Marianas), and in 1564 reached the Philippines. With tact and ability he took possession of the islands (Cebu in 1565, Luzon in 1570) almost without fighting. He was helped by the Austin friars who accompanied him in organizing the government. He preferred pacific methods to those of conquest, and his short rule was beneficial. In 1571 he founded modern Manila

López de Mendoza, Iñigo, marqués de Santillana: see SANTILLANA

López de Santa Anna, Antonio: see SANTA ANNA, ANTONIO LÓPEZ DE

López y Fuentes, Gregorio (grĭgō'rēō lō'pās ē fwān'tās), 1895–, Mexican novelist, poet, and journalist. A native of Veracruz, he became interested in the condition of the Indians there and spent time in teaching them. Some of his verses and stories were published when he was 20 and he attained some note as editor of the newspaper *Universal gráfico*, but his fame rests upon his novels, which began with *Campamento* (1931) and reached a peak with *El indio* (1935; Eng. tr., 1937). All of them deal in a photographically realistic style with the Mexican revolution that began in 1910 and with the heritage of centuries of wrong done to the Indians.

López y Planes, Vicente (vēsän'tā lō'pās ē plä'nās), 1784–1856, Argentine statesman and poet. He served (1806–7) under Jacques de Liniers against the British invaders. After the resignation of Rivadavia, he became (1827) provisional president of the United Provs of La Plata. He was a minister under Dorrego and a prominent jurist under Juan Manuel de Rosas. After the fall of Rosas, López y Planes was made (1852) governor of Buenos Aires prov. Outstanding among his poems are two—*Triunfo argentino*, a ballad celebrating the successful Argentine defense against the British, and a war song commemorating the triumph of the revolution, which was adopted as the national hymn in 1813. He was the father of Vicente Fidel López

Lop Nor see LOB NOR

loquat (lō'kwŏt), small ornamental evergreen tree (*Eriobotrya japonica*) and its fruit. It belongs to the rose family and is probably indigenous to China. It has been grown from antiquity in Japan and N India and is cultivated also in Indo-China, the Mediterranean region, and from the S United States through N South America. A subtropical climate seems to be most favorable to its growth. Usually the tree reaches a height of 20 or 25 ft (occasionally 30 ft), its trunk branches 2 or 3 ft from the ground. The thick, shiny, dark green leaves are from 6 to 10 in. long and have slightly toothed margins. Its small, fragrant, white flowers are borne in panicles ranging in length from 4 to 8 in., and the fruits ripen in loose clusters. Varying from 1 to 3 in. long, the fruit is oval or pear-shaped, the skin is thin but tough, and the slightly tart fruit varies from pale yellow to orange. It is commonly eaten fresh but is used also for making jam, jelly, pie, and sauces. The usual methods of propagation are by budding and grafting, although some trees are grown from seed. Sometimes the loquat is called the Japanese medlar, probably because it somewhat resembles the medlar of Europe and Asia

Lorain (lôrān') **1** City (pop 44,125), N Ohio, on Lake Erie at the mouth of the Black River and W of Cleveland, settled 1807 as a trading post, inc 1836 as Charleston, rechartered 1876 as Lorain. It is an important ore-shipping port, and its numerous industries include shipbuilding, blast furnaces, and the making of machinery, heating equipment, and chemicals. There are commercial fisheries, sandstone quarries, and railroad shops. Lake View Park and a U S coast guard station are here. **2** Borough (pop 1,373), SW Pa., at the southeastern edge of Johnstown. Steel is made here

Loran. see RADAR

Loras College (lō'rus), at Dubuque, Iowa, Catholic, mainly for men, opened as a pioneer theological seminary 1839, chartered as a college 1894. Before 1939 it had various names, including St Joseph College and Columbia College. A music school is attached

Lorca, Federico García see GARCÍA LORCA

Lorca (lôr'ka) city (pop 24,491), Murcia prov, SE Spain, in Murcia. In the midst of a fertile, irrigated region, the city has a Moorish castle, a 17th-century collegiate church, and several fine private homes

Lord Howe Island, volcanic island (5 sq mi, 1941 pop 150), S Pacific, 435 mi NE of Sydney. A dependency of New South Wales, Australia, it is a resort for continental Australians. It was discovered in 1788 by the British

Lord of Misrule, mock official appointed to preside over the festivities of Yuletide (particularly Twelfth Night) in England during the Middle Ages. A similar mock ruler in Scotland was the Abbot of Unreason

Lords, House of see PARLIAMENT

Lordsburg, village (pop 3,101), co seat of Hidalgo co, SW N Mex, SW of Silver City near the Ariz. line. It is the trade center of a region yielding copper, gold, silver, and lead. Cattle and sheep raising and truck farming are carried on in the area.

Lord's Prayer or **Our Father,** the principal Christian prayer, beginning, "Our Father, which art in heaven." Mat 6:9–13, Luke 11:2–4. Several English versions are current, thus, many say "Forgive us our debts as we forgive our debtors" (as in the Wyclif and Douay versions) rather than "Forgive us our trespasses," etc. Roman Catholics have never added the doxology ("For thine is the kingdom," etc.), which was adopted by most Protestants from a version of Matthew. The prayer is called, in Latin, Pater or Pater Noster

Lord's Supper, Protestant sacrament of the EUCHARIST. In the REFORMATION the leaders generally rejected the traditional belief in the sacrament as a sacrifice and as an invisible miracle (transubstantiation) but retained the belief in it as mystically uniting the believers with Christ and with one another. The Lutherans held that there is a change by which the body and blood of Christ join with the bread and wine, this principle (consubstantiation) entered into the controversy over the sacrament with ZWINGLI, who held that communion was only symbolic. Calvinists imputed a spiritual meaning only to the words of institution, and this view has practically prevailed among Protestants. The Church of England affirmed the Real Presence but

denied transubstantiation, since the Oxford Movement, Anglicans tend to accept either transubstantiation or the Calvinist interpretation The Lutheran and Anglican communion services follow the Roman MASS in outline, but the service books have eliminated references to a sacrifice and have cut down the service Other forms for communion are recast and resemble other services with the addition of a recital of the institution and distribution of communion Anglicans hold to the Western tradition in using unleavened bread Most Protestant churches use raised bread, many use unfermented grape juice instead of wine Communion in one kind is unknown among Protestants, this was a crucial point with the Hussites Lutherans and Anglicans (especially since the Oxford Movement) celebrate communion much more frequently than most other Protestant churches, which often restrict it to a few times a year The Quakers are one of the few Protestant groups to reject this sacrament entirely

Lorelei (lō'rulī, Ger lō'rulī), cliff, 433 ft high, on the right bank of the Rhine, W Germany, about midway between Coblenz and Bingen The Rhine here forms a dangerous narrows, and in German legend a fairy similar to the Greek Sirens lived on the rock and by her singing lured the sailors to their death Heinrich Heine's poem, *Die Lorelei*, is world famous The rock has sometimes been identified as the place where the hoard of the Nibelungs is hidden under the Rhine

Lorentz, Hendrik Antoon (hĕn'druk än'tōn lō'rĕnts), 1853–1928, Dutch physicist, a pioneer in formulating the relations between electricity, magnetism, and light He was one of the first to postulate the concept of electrons On this he based his explanation of the Zeeman effect (a change in spectrum lines in a magnetic field), for which he shared with Pieter Zeeman the 1902 Nobel Prize in Physics He extended a hypothesis of G F Fitzgerald, an Irish physicist, that the length of a body contracts as its speed increases, and he formulated the Lorentz transformation by which space and time coordinates of one moving system can be correlated with the known space and time coordinates of any other system This work influenced, and was confirmed by, Einstein's special theory of relativity Lorentz also discovered (1880), simultaneously with L V Lorenz of the Univ of Copenhagen, the relations (known as Lorentz-Lorenz relations) between the refraction of light and the density of a translucent body He was professor (1878–1912) at the Univ of Leiden and director from 1912 of the Teyler laboratory, Haarlem His works in English include *The Theory of Electrons* (1909) and *Problems of Modern Physics* (1927)

Lorentz, Pare (pâr' lōrĕnts'), 1905–, American author and moving-picture director, b Clarksburg, W Va In 1924 he became a moving-picture critic in New York As consultant to the government on moving pictures after 1935 and director (1938–40) of the U S Film Service he produced such notable documentary films as *The Plow That Broke the Plains* (1936), *The River* (1937), which appeared in book form in 1938, and *The Fight for Life* (1940) He wrote *The Roosevelt Year* (1934) and, with Morris Ernst, *Censored the Private Life of the Movies* (1930)

Lorenz, Adolf (ä'dôlf lō'rĕnts), 1854–1946, Austrian orthopedic surgeon He introduced manipulative methods of treatment (bloodless surgery) and was noted especially for his treatment of clubfoot and of congenital dislocation of the hip joint See his autobiography (1936)

Lorenzetti (lōrĕntsĕt'tē), two Sienese painters, brothers, the first to introduce into Sienese painting the naturalism of Giotto **Pietro Lorenzetti** (pyā'trō), c 1280–1348, called Pietro Laurati by Vasari, was probably a pupil of Duccio di Buoninsegna and was influenced by Simone Martini and Giovanni Pisano His earliest known work (1320), and one of the most beautiful, is an altarpiece in the Pieve di Santa Maria at Arezzo He painted a *Madonna* (destroyed) for the cathedral at Siena and, with his brother, a fresco, *Marriage of the Virgin* (also destroyed), for the façade of the hospital of Santa Maria della Scala, Siena Other works are the *Birth of the Virgin* (Opera del Duomo, Siena) and a *Madonna*, painted for San Francesco at Pistoia (Uffizi). Attributed to Pietro are the frescoes *Virgin and Child with Saints Francis and John* and the *Passion* (both Lower Church, Assisi) and the *Crucifixion* (San Francesco, Siena) *St Catherine*, part of an altarpiece, is in the Metropolitan Museum. The National Gallery of Art, Washington, D.C, has four works **Ambrogio Lorenzetti** (ämbrō'jō), d 1348?; was also influenced by Pisano His authenticated paintings, though few, rank him as one of the most important figures of the Sienese school Of the earliest, *St Louis and the Franciscan Martyrs*, painted for San Francesco, Siena, only fragments survive His decoration of the Sala della Pace in the Palazzo Pubblico of Siena consisted of six allegories illustrating good government and tyranny. Other known works by Ambrogio are parts of an altarpiece, *Life of St Nicholas*, painted for San Procolo, Florence (Florence Acad), *Presentation in the Temple* (Uffizi), and *Annunciation* (Siena Academy) *St. Agnes* (Fogg Mus. of Art, Cambridge) is attributed to this artist A *Madonna and Child* is in the Museum of Fine Arts, Boston No records of the brothers appear after 1348, and they are believed to have perished in the plague.

Lorenzini, Carlo. see COLLODI, CARLO

Lorenzo, Fiorenzo di: see FIORENZO DI LORENZO.

Lorenzo de' Medici: see MEDICI, LORENZO DE'

Lorenzo di Credi (lōrän'tsō dē krā'dē), 1459–1537, Italian painter and sculptor of the Florentine school; pupil of his father, Andrea di Credi, a goldsmith He assisted Andrea del Verrocchio, Perugino, and Leonardo da Vinci, being greatly influenced by the last, whose works, as well as those of Verrocchio, he copied accurately His best works are the altarpiece in the cathedral at Pistoia, *The Madonna and Child with Saints*, considered his masterpiece, *The Nativity* (Florence Acad), the *Annunciation* (Uffizi), *Madonna and Child* (National Gall, London), *Madonna Adoring the Child* (Metropolitan Mus), and *Boy's Head* (Mus of Fine Arts, Boston)

Lorenzo di Pietro (lōrän'tsō dē pyā'trō), c 1412–1480, Sienese painter, sculptor, and goldsmith, called Il Vecchietta He painted a group of frescoes and a relic press in the Hospital at Siena, four ceilings in the baptistry of San Giovanni at Siena, an altarpiece, *The Assumption of the Virgin*, his masterpiece (cathedral, Pienza), a triptych, *Madonna with Saints* (Uffizi); *St Catherine* and the *Virgin of Mercy*, fragments of frescoes (Palazzo Pubblico, Siena), and a *Madonna* (Siena) Vecchietta was one of the most important painters of the later Sienese school He also executed many sculptures, the most important being *The Risen Christ*, for the high altar of the cathedral at Siena

Lorenzo Monaco (mô'näkō), c 1370–1425?, Italian painter, whose real name was Piero di Giovanni He was a Camaldolite monk, and most of his life was spent in the monastery of Santa Maria degli Angeli in Florence In painting he was a follower of Agnolo Gaddi and the Sienese school and combined stately, decorative composition and flowing line with deep religious feeling and the traditions of Giotto His only signed work, *Coronation of the Virgin*, a triptych (painted 1413), is in the Uffizi Other works are an altarpiece, *Annunciation*, and frescoes from the *Life of the Virgin* (Bartolini Chapel, Santa Trinità, Florence), a smaller *Coronation of the Virgin* (National Gall, London), *Adoration of the Magi* (Uffizi), a *Madonna and Child* (Metropolitan Mus), and a *Madonna and Child* (National Gall of Art, Washington, D C) See study by Osvald Sirén (1905)

Loreto (lurĕ'tō, Ital lōrā'tō), small town, central Italy, 13 mi SE of Ancona It has a celebrated shrine According to tradition, the Holy House of the Virgin in Nazareth was brought here through the air by angels at the end of the 13th cent Belief in this miracle is not required in the Roman Catholic Church Around the Holy House, a small brick building, a church was begun in 1468 by Pope Paul II, Bramante contributed to its construction There are fine bronze doors, and there are frescoes by Michelozzo da Forlì and Luca Signorelli The church was damaged by German air raids in 1944 Our Lady of Loreto is a patron of aviators

Loretteville (lōrĕt'vĭl), town (pop 2,564), S Que, WNW of Quebec and on the Nelson river

Loretto Heights College see DENVER, COLO.

Loria, Isaac ben Solomon see LURIA

Loria, Roger of see ROGER OF LORIA

Lorient (lōryä'), town (pop 10,704, 1936 pop 40,753), Morbihan dept, NW France, a port and naval station on the Atlantic Established (17th cent) as L'Orient to serve as a shipbuilding port of the French East India Company, it was later fortified, was developed as a naval base by Napoleon I, and became the chief naval yard of France In the Second World War the Germans made it their chief submarine base on the Atlantic, repeated Allied bombings, though they did not greatly damage the submarine pens, virtually destroyed the town The German garrison held out against its American besiegers until the end of the war in Europe

L'Orignal (lôrĭnyäl'), town (pop 1,118), SE Ont, on the Ottawa river and ENE of Ottawa, founded 1797. It is a lumbering and dairying center and a resort

Lorimer, George Horace (lô'rĭmûr), 1867–1937, American editor, b Louisville, Ky He became editor in chief of the *Saturday Evening Post* in 1899, and until 1936 his guidance was responsible for its growth and success He was president (1932–34) of the Curtis Publishing Company *Letters from a Self-made Man to His Son* (1902) was reprinted from the *Post* See John Tebbel, *George Horace Lorimer and the Saturday Evening Post* (1948)

Loring, William Wing, 1818–86, American soldier, b Wilmington, N C He served against the Seminole, in the Mexican War, and in various commands and campaigns on the frontier. A Confederate major general in the Civil War, Loring fought principally in the West (1863–65), he led a division in the Atlanta campaign and in Hood's Tennessee campaign From 1869 to 1879 Loring was in Egypt, where he held high rank in the army of the khedive. He wrote *A Confederate Soldier in Egypt* (1883).

Loris, town (pop 1,238), E S C, near the N C line E of Florence It is a farm trade center and market point for strawberries and tobacco

Loris-Melikov, Mikhail Tarielovich (mĕkhŭyĕl' tŭryĕl'ŭvĭch lô'rĭs-mĕ'lyĭkuf), 1825–88, Russian general and statesman, of Armenian descent. He was created a count for his services in the Russo-Turkish War of 1877–78 and in 1880 became minister of the interior under Alexander II He promoted liberal reforms and drafted a representative constitution which Alexander II signed the day he was assassinated (1884) The new tsar, Alexander III, voided the reform and dismissed its author Loris-Melikov in his youth is charmingly portrayed in Tolstoy's *Hadji Murad*

Lorme, Marion de. see DELORME, MARION

Lorne, Firth of (lôrn), bay, Argyllshire, Scotland

Lörrach (lûr'ăkh), town (pop 19,294), S Baden, SW Germany, at the foot of the Black Forest and near the Swiss border at Basel It is a rail junction and has textile, machinery, and chocolate manufactures

Lorrain, Claude see CLAUDE LORRAIN

Lorraine (lurān', lō–, Fr lôrĕn'), Ger. *Lothringen* (lō'trĭngun), region and former province, E France, bordering in the north on Belgium, Luxembourg, and the Saar Territory, in the east on Alsace, and in the west on Champagne It is now divided into four departments, Moselle, Meurthe-et-Moselle, Meuse, and Vosges In Moselle dept, of which METZ is the capital, German is widely spoken along with French The rest of Lorraine is French-speaking NANCY is its economic and intellectual center Except for the VOSGES mts in the southeast and the ridges paralleling the Moselle and Meuse rivers, Lorraine is a slightly rolling plateau, with pastures and some agricultural districts Hops are grown (Lorraine has large breweries) and there are numerous vineyards In the east salt is mined. The principal wealth of Lorraine lies in its iron fields, concentrated along the Belgian and Luxembourg borders in the BRIEY, Longwy, and Thionville basin and near Nancy Despite the low grade of the ore, these fields, as yet not fully exploited, constitute the richest deposit of iron in Europe outside Russia and Sweden The major obstacle to their full exploitation is the necessity of importing coal and coke from the RUHR basin in Germany or from Belgium and N France Combined, the Lorraine and Ruhr areas would form a formidable industrial concentration Lorraine, as its name indicates, was before the 10th cent part of the kingdom of LOTHARINGIA, it became a duchy under the Holy Roman Empire Several fiefs emerged in the 13th cent which escaped the control of the dukes Chief of these were the county, later duchy, of Bar (see BAR-LE-DUC) and the three bishoprics, Metz, TOUL, and VERDUN Lorraine and Bar were reunited when Lorraine passed, by marriage, to RENÉ of Anjou, duke of Bar, the three bishoprics were annexed to France in 1552 René II of Lorraine helped (1477) to defeat, at Nancy, CHARLES THE BOLD of Burgundy, who had seized most of the duchy In the 16th cent a cadet branch of the house of Lorraine, the GUISE family, gained tremendous influence in France, while Lorraine itself, under Duke Charles II (1559–1608), knew a period of relative order and prosperity amidst a Europe torn by religious and imperialistic strife Lorraine was occupied by France in the Thirty Years War. Duke CHARLES IV spent most of his life trying to recover his lands and his successor, CHARLES V, though he helped to recover Hungary from Turkey, never managed to recover Lorraine At last, in the Treaty of Ryswick (1697), Leopold I was recognized in possession of the duchy Under his rule Lorraine flourished once more His heir, Francis, married Maria Theresa of Austria, became emperor as FRANCIS I, and founded the house of Hapsburg-Lorraine By an arrangement (1735) with Louis XV, he exchanged the duchies of Lorraine and Bar for Tuscany, Lorraine and Bar were given to Louis XV's father-in-law, STANISLAUS I, ex-king of Poland, upon whose death they were to pass to France Stanislaus died in 1766 As a French province, Lorraine continued to enjoy certain exemptions and privileges In 1871, as a result of the Franco-Prussian War, the present department of Moselle was ceded to Germany and united with Alsace as the imperial land (*Reichsland*) of Alsace-Lorraine. It reverted to France in 1918 and was again annexed to Germany in 1940–44. (The peculiar problems of Alsace-Lorraine are discerned in the article ALSACE) During both world wars, Lorraine suffered heavily. In the first, some of the most destructive fighting occurred at Verdun, in the second, most French-speaking citizens were expelled by the Germans, and heavy fighting occurred in 1944 at Metz, in the area E of Nancy, and in the Vosges.

Lorraine, Lower and Upper: see LOTHARINGIA.

Lorris, Guillaume de: see GUILLAUME DE LORRIS

Lo-ruhamah (lō"rōōhä'mù) [Heb, =uncompassionated], daughter of Hosea. Hosea 1 6,8.

Los Alamos (lŏs ăl'ŭmōs), community (1947 pop c 7,000; alt 7,500 ft), N N Mex., on the west side of the Rio Grande valley and NW of Santa Fe. It is on a long mesa extending down from the Jemez Mts. An atomic-bomb laboratory was built near by, the first bomb, made here, was tested (July, 1945) on ALAMOGORDO air base

Los Angeles (lŏs ăng'gŭlŭs, ăn'jŭlŭs, -lēz), city (1940 pop. 1,504,277, 1946 special census pop. 1,805,687), co seat of Los Angeles co, S Calif, near the Pacific coast Beautifully situated, with numerous resorts near by and a fine harbor at San Pedro Bay, it is a tourist resort, an important port of entry, a railroad and aviation center, the moving-picture center of the United States, a radio center, and a trade and commercial center for an agricultural area producing citrus fruits, vegetables, grains, nuts, sugar beets, and dairy products It is also a manufacturing city with a wide variety of industries, which include iron, steel, airplanes, oil (large petroleum deposits are near by), and canned goods The site of the city was visited by Gaspar de Portolá in 1769, and in 1781 El Pueblo de Nuestra Señora la Reina de los Angeles de Porciuncula [the town of Our Lady Queen of Angels of Porziuncola (see ASSISI)] was founded From time to time it was the capital of Alta California and was a center of cattle ranching in Spanish and Mexican days In 1846 it was taken by U S military forces The city was incorporated in 1850 The arrival of the railroads (Southern Pacific in 1876, Santa Fe in 1885) and the discovery of oil in the early 1890's stimulated expansion, as did the development of the moving-picture industry early in the 20th cent Other industries, aircraft in particular, have contributed to growth From 1900 to 1940 the population of Los Angeles increased about 1,535 percent In 1940 it ranked first in area and fifth in population in the United States The metropolitan district covers an area of 451 sq mi and the population was estimated in 1947 as 3,917,000 Los Angeles has absorbed numerous suburbs and enclosed many independent communities HOLLYWOOD is part of the incorporated city, as are Encino, Tujunga, Universal City, Van Nuys, Venice, and many other communities Incorporated cities in the metropolitan area with populations above 20,000 are Alhambra, Beverly Hills, Burbank, Glendale, Huntington Park, Inglewood, Long Beach, Pasadena, Pomona, Santa Ana, Santa Monica, and South Gate Los Angeles has botanic gardens, art and history museums, many parks, a magnificent stadium, and a symphony orchestra The city was host to the Olympic Games in 1932 The Univ of Southern California (see SOUTHERN CALIFORNIA, UNIVERSITY OF), the Univ of California at Los Angeles (see CALIFORNIA, UNIVERSITY OF), Occidental College (coeducational, 1887), LOYOLA UNIVERSITY OF LOS ANGELES, Chapman College, George Pepperdine College (coeducational, 1937), and other colleges and professional and technical schools are in Los Angeles Water is supplied to the city from the Colorado and Owens rivers and the Mono Basin, at distances of from 238 to c 400 mi Power from Hoover Dam was made available to Los Angeles in 1936 See Harry Carr, *Los Angeles, City of Dreams* (1935), Federal Writers' Project, *Los Angeles* (1941),

Los Banos (lŏs ba'nōs), city (pop 2,214), central Calif, NW of Fresno, inc 1907 It processes the dairy products of the area

Los Gatos (lŏs gä'tōs, gă'tŭs), town (1940 pop 3,597, 1948 special census pop 4,895), W Calif, SE of San Francisco, inc 1887 It is a health resort, and the area has fruit and poultry farms, oil wells, and quicksilver mines

Loshan or **Lo-shan** (lō'shan'), city (pop 33,038), Szechwan prov, China, on the Min river Near by are decorated grottoes, a colossal stone Buddha, and the sacred peak Omei There are silk mills Loshan was formerly called Kiating

Lossiemouth (lŏsēmouth', lō'sēmouth), burgh (pop 3,915), Morayshire, Scotland, on Moray Firth and N of Elgin It is a seaport and a resort J Ramsay MacDonald was born and lived here

Lossing, Benson John (lō'sĭng), 1813–91, American historian and wood engraver, b Dutchess co, N Y His reputation was made by his *Pictorial Field-Book of the Revolution* (2 vols, 1850–52), an immensely popular work which still has its uses Besides a competent narrative, it contains engravings of scenes and localities which Lossing traveled thousands of miles to sketch It was followed by similar works such as *Pictorial History of the Civil War* (3 vols, 1866–68) and *Our Country* (2 vols, 1876–78) He wrote a two-volume biography of Philip Schuyler and a life of Garfield.

Lost Battalion, popular name given to those American units of the 77th Division—six companies of the 1st and 2d Battalion of the 308th Infantry, one company of the 307th Infantry, and the 306th Machine Gun Battalion—which were cut off by German forces in the First World War after the launching of an American attack in the Argonne Forest in early Oct, 1918 The Lost Battalion, numbering c.600 men and under the command of Major Charles W. Whittlesey, put up a heroic five-day defense in the Binarville Ravine without food, water, or reserve ammunition After withstanding several heavy barrages and attacks, the Lost Battalion, which defiantly refused the German demand of surrender, was rescued (Oct 8, 1918) by American relief troops—but not until after some 400 men of the Lost Battalion had perished See Thomas M Johnson and Fletcher Pratt, *The Lost Battalion* (1938)

Lost Dauphin (dō'fĭn) Because the circumstances of the death of LOUIS XVII of France (who had been the dauphin), the little son of Louis XVI and Marie Antoinette, were not made public, rumors began almost immediately that the boy had not died but had been spirited away and was living incognito There were various stories of his escape, in varying tones of romanticism Early in the 19th cent a series of impostors began to appear Some actually laid claim to being Louis, others dropped only mysterious hints, and a few made no claims but had unexplained origins that stimulated the imagination of their romantic-minded acquaintances Thus, there were even rumors that made John James Audubon into the Lost Dauphin There were a number of claimants in the United States and a few in Europe Of these the most important in the United States was Eleazer WILLIAMS, a missionary among the Indians of the Old Northwest The most important in Europe was a young watchmaker, Karl Wilhelm Naundorff, who emerged from Germany to advance his claims and gather a number of followers Historians for the most part have disregarded the Lost Dauphin theory altogether Meade Minnigerode's *Son of Marie Antoinette* (1934) discusses the claims of Williams, H R Madol's *Shadow King* (1930) pleads Naundorff's cause

lost property see FINDER

lost tribes, 10 Jewish tribes which, according to the Bible, were transported to Assyria by Tiglath-pileser or Shalmaneser after the conquest of Israel Numerous conjectures have been advanced as to the fate of these tribes they have been identified with the people of Arabia, India, Ethiopia, and America (North, Central, South) and with other groups, including the Nestorians of Mesopotamia, the Afghans, the high-caste Hindus, and the holy Shinda class of Japan The Anglo-Israelite theory, still maintained by some, identifies the English people with the lost tribes, it was, in the 17th cent, a factor in helping the Jews to reenter England

Lot [Heb, =wrapping], son of Abraham's brother Haran Lot settled in Sodom and received a special warning of its destruction As he fled with his family, his wife was turned into a pillar of salt for looking back Gen 11–14, 19

Lot (lôt'), department (2,018 sq mi, pop 154,897), SW France It is in QUERCY and is drained by the Lot river Cahors is the capital

Lot, river, 300 mi long, S France, rising in the CÉVENNES mts and flowing W past Mende and Cahors through QUERCY to join the Garonne NW of Agen The limestone plateaus through which it winds are intersected by fertile valleys and vineyards

lot. The casting of lots was an ancient method of making a choice, settling a dispute, or determining a course of action In biblical times lots were cast to determine the will of God (it is believed that the URIM AND THUMMIM, mysterious sacred objects placed on the breastplate of the high priest, were originally used for casting lots and determining a course of action), to discover the guilty (1 Sam 14 41), to select officials (1 Sam 10 20, Acts 1 24), and in numerous other instances The lot, probably a stone, die, or other object, was cast upon the ground, the manner of its fall determining the question in doubt, in other cases, lots were cast into a receptacle and drawn from it It is possible that dice originated, not as a game, but as a device for casting lots

Lota (lō'tä), port (pop 31,087), S central Chile, S of Concepción Established in the second half of the 19th cent as a coal-mining center, Lota also has copper mines and smelters and manufactures ceramics The botanical park on a hill above the city is famous for its landscaping and sea views

Lotan (lō'tăn) [Heb, =covering], duke of Edom Gen 36 20,22,29

Lot-et-Garonne (lôt"-ā-gârôn'), department (2,079 sq mi, pop 265,449), SW France The Lot and Garonne rivers join W of AGEN, the capital

Lothair I (lōthâr'), 795–855, emperor (840–55), son and successor of Emperor Louis I Designated (817) as his father's colleague and as heir to the imperial title, he was crowned at Rome by the pope (823) and issued (824) a constitution, proclaiming his right to confirm papal elections—a claim Louis I had abandoned in 817 He twice (829, 833) revolted against his father, who favored Lothair's half brother Charles (Charles the Bald, later CHARLES II) at his elder sons' expense (see LOUIS I), in 839 Lothair was allotted almost the whole eastern half of the empire, the west (France) going to Charles After Louis's death Charles and LOUIS THE GERMAN made war on their brother Lothair, who tried to reunite the whole empire under his sole rule The battle of FONTENOY (841), though indecisive, checked Lothair. Renewing their alliance in 842 (see STRASBOURG, OATH OF) Charles and Louis the German in 843 forced Lothair to sign the fateful Treaty of Verdun (see VERDUN, TREATY OF) What remained of Lothair's territories was divided at his death among his sons, the larger shares falling to Emperor LOUIS II and to LOTHAIR, king of Lotharingia

Lothair II or **Lothair the Saxon**, 1075–1137, emperor (1133–37) and German king (1125–37), successor of Emperor Henry V His predecessor invested him with the duchy of SAXONY in 1106, but after 1112 Lothair in several rebellions successfully championed local independence against the royal authority He was elected with the support of the higher clergy, defeating his rival candidate, Frederick of HOHENSTAUFEN, who claimed the succession as Henry V's nephew Frederick and his brother Conrad (later Emperor CONRAD III) made war on Lothair, and Conrad was elected antiking However, Lothair and his son-in-law, HENRY THE PROUD of Bavaria, forced Frederick to submit in 1134 and Conrad to submit in 1135 In 1131 Lothair promised his support to Pope INNOCENT II, whose election was disputed, and in 1132 he entered Italy, being crowned emperor at Rome (1133) He returned in 1136 and campaigned successfully against the Normans, but died on the journey home Lothair adhered loyally to the Concordat of WORMS, and actively supported the extension of missionary activity among the heathen. He forced various heathen princes to pay tribute, and received the homage of BOLESLAUS III of Poland for Pomerania and Rügen At his death his rival, Conrad III, was elected king

Lothair, 941–86, French king (954–86), son and successor of Louis IV In 978 he tried unsuccessfully to occupy Lorraine, and Emperor Otto II retaliated by invading France Although Lothair renounced all claims to Lorraine at a meeting with Otto (980), he tried to regain it after Otto's death (983) He died during the campaign and was succeeded by Louis V

Lothair, d 869, king of Lotharingia (855–69), second son of Emperor Lothair I He inherited the region bounded by the Alps, Rhine, Scheldt, and North Sea (including modern Lorraine) His attempts to secure a divorce were opposed by Bishop HINCMAR and by Pope NICHOLAS I, who forced him to reinstate his wife His lands were divided (870) between his uncles, Charles the Bald (later Emperor CHARLES II) and LOUIS THE GERMAN

Lotharingia (lŏthurĭn'jĭə), name given to the northern portion assigned (843) to Emperor LOTHAIR I in the first division of the Carolingian empire (see VERDUN, TREATY OF) It comprised, roughly, the present Netherlands, Belgium, Luxembourg, Lorraine, Alsace, and NW Germany, including Aachen and Cologne Lothair also received Italy and Burgundy (including Provence and W Switzerland) His son, King LOTHAIR (for whom the region is named), inherited Lotharingia as a kingdom, while Italy and Burgundy went their separate ways He died in 869, and in 870 his lands were fairly evenly divided between the East Frankish and West Frankish kingdoms (i e, Germany and France) in the Treaty of MERSEN After a period of confusion and warfare, Emperor Otto I, whose predecessor, Henry I, had gained control over all Lotharingia, gave it to his brother St Bruno, archbishop of Cologne Bruno's difficulties with the Lotharingian nobles caused him to divide (959) the country into the duchies of Lower Lorraine, in the north, and Upper Lorraine, in the south (the name Lorraine being merely the modern form of Lotharingia) The ducal titles in both duchies subsequently were awarded in confusing succession to various noble houses, but its significance became nil as the great feudal lords gained in power In Upper Lorraine, the ducal title continued until 1766 in what came to be known simply as the duchy of LORRAINE, this, however, was greatly restricted in extent and no longer included Alsace, Luxembourg, the bishoprics of Metz, Toul, and Verdun, and the archbishopric of Trier, all of which originally had been parts of Upper Lorraine In Lower Lorraine, the title soon lapsed completely, chief among the fiefs that emerged here were the duchies of Brabant, Bouillon, Limburg, Julich, Cleves, and Berg, the county of Hainaut, and the bishopric of Liége Cologne and Aachen became free imperial cities Both Upper Lorraine and Lower Lorraine thus ceased in the 11th cent to have a unified history From the Treaty of Verdun until the present time the territories comprised in Lotharingia, particularly Upper Lorraine, have been chronically contested between Germany and France and have been an almost continual battleground

Lothian, Philip Henry Kerr, 11th **marquess of** (kär', lō'dhēun), 1882–1940, British statesman As Philip Kerr he assisted Lord Milner in creating the Union of South Africa after the Boer War He returned to England and helped to found and edited (1910–16) the liberal scholarly journal, the *Round Table* As Lloyd George's chief secretary he was active at the Paris Peace Conference (1919) and became an admirer of Woodrow Wilson. He inherited his titles in 1930 and served during the 30s on the

India franchise committee. After conversations with Hitler in 1935, Lothian advocated appeasement of Germany and stood behind Neville Chamberlain and Lord Halifax, but in 1939 he came round to a vigorous advocacy of resistance to Hitler Secretary of the Rhodes Trust after 1925, he had traveled widely in the United States, he was, too, a proponent of closer Anglo-American cooperation, and his appointment as ambassador to Washington in April, 1939, was very popular.

Lothians, the (lŏ'dhēuns), division of Scotland, including East Lothian, Midlothian, and West Lothian The ancient district of Lothian extended from the Tweed to the Firth of Forth and was from 547 until 1018 a part of Northumbria

Lothrop, Amy, see WARNER, SUSAN BOGERT

Loti, Pierre (pyĕr' lōtē'), pseud of **Julien Viaud** (zhülyē' vyō'), 1850–1923, French novelist, an officer in the French navy His novels, which have been very popular, excel in accurate, exotic description and in the pessimistic tone of the romantics, Loti's style in its simple sobriety resembles that of the realists His many novels include *Pêcheur d'Islande* (1886, Eng tr, *An Iceland Fisherman*), a tale of Breton fishermen, and *Ramuntcho* (1897, Eng tr, 1897), a story of French Basque peasant life, of his many travel books, *Vers Ispahan* [toward Isfahan] (1904) is highly esteemed See A L Guérard, *Five Masters of French Romance* (1916)

Lotophagi: see LOTUS-EATERS.

Lötschberg Railway (lŭch'bĕrk), Swiss electrical railroad crossing the Bernese Alps from Thun to Brig It passes through the **Lötschberg Tunnel** (9 mi long, alt 4,078 ft) under Lötschen Pass and emerges in the Lötschen Valley

Lott, city (pop. 1,021), central Texas, S of Waco and near the Brazos, in a farm area, inc 1896

lottery, scheme for distributing prizes by lot or other method of chance selection to persons who have paid for the opportunity to win The term is not applicable when lots are drawn without payment by the interested parties to determine some matter, e g, the distribution of property among heirs. The lottery is distinguished as a form of gambling by absence of any element of skill or play Under common law in England and the United States lotteries were lawful They paid for many public buildings and founded and supported educational, charitable, and religious enterprises Private lotteries, with their grave likelihood of fraud, were first generally prohibited in the early 19th cent Most publicly sponsored lotteries were discontinued not long afterwards With the adoption in 1890 of a Federal statute prohibiting the transportation of lottery tickets or prizes by mail or in interstate commerce, the last American state lottery—that of Louisiana—came to an end Lotteries are still lawful in certain countries (e g, Ireland and Cuba), and tickets are avidly purchased abroad. It has been argued by some that the supposedly irresistible tendency to gamble ought to be exploited as a regular source of municipal and state revenue by reinstituting public lotteries.

Lotto, Lorenzo (lōrān'tsō lŏt'tō), c 1480–1556, Venetian painter. His work reflects the influence of several great contemporaries from Bellini to Titian, but preserves throughout a fine sensibility and intimacy quite his own Notable among his earlier works are *St. Jerome* (Louvre), the fresco *Annunciation* (Church of Santo Domenico, Recanati, Italy), and *Madonna and Saints* (cathedral, Asolo) Of a later period are *Bridal Couple* (Prado), *Christ and the Adulteress* (Louvre), and portraits in the galleries of London, Milan, Rome, and Vienna After 1552 Lotto lived with the monks of the sanctuary at Loreto, where his *Presentation in the Temple* remains The Metropolitan Museum and the National Gallery of Art, Washington, D C, have portraits by Lotto

lotus (lō'tus), name given several different plants, most commonly certain water plants The true Egyptian lotus (either *Nymphaea coerulea*, blue, or *lotus*, white) is a WATER LILY and the national emblem of Egypt—sacred from remote times, the flower, in both natural and conventionalized design, is traditional to Egyptian art and architecture, as in the lotus CAPITAL The Indian lotus or sacred bean (*Nelumbo nucifera*) is a tall, stately aquatic plant, usually emerged, with large pink flowers, round leaves, and seed pods resembling the nozzle of a sprinkling can. The blossom is used symbolically in the religion and art of India, often incorporated with figures of gods This and the Egyptian lotus are frequently confused horticulturally. The American lotus or water chinquapin (*Nelumbo lutea*) is similar to the Indian lotus but has yellow flowers, the nut-flavored seeds, roasted or boiled, and the large tuberous roots were used as food by the American Indians. The fruit of the LOTUS-EATERS of classical literature, fabled to make the eater forget his past and live a life of happy indolence, has been variously identified, but usually as that of a species of jujube or of a nettle tree Botanically, *Lotus* is the name for a genus that includes the bird's-foot TREFOIL.

lotus-eaters or **lotophagi** (lōtŏf'ŭjī). They were a fabulous people who occupied the north coast of Africa and lived on the lotus, which brought forgetfulness and happy indolence. They appear in the *Odyssey* When Odysseus landed among them, some of his men ate the food. They forgot their friends and home and had to be dragged back to the ships "The Lotos-Eaters" of Tennyson has become an English classic.

Lotze, Rudolf Hermann (rōō'dôlf hĕr'mān lō'tsŭ), 1817–81, German philosopher and psychologist After studying medicine and philosophy at Leipsig, he lectured in both departments and was made professor in 1842 He succeeded Herbart as professor at Göttingen (1844–81) and in 1881 served as professor at Berlin Among his works, which included medical and biological discussions, were *Allgemeine Physiologie* (1851), *Medizinische Psychologie oder Physiologie der Seele* (1852), and *Mikrokosmus* (1856–64, Eng tr, 1885) The first parts of his projected, though never completed *System der Philosophie* appeared as *Logik* (1874, Eng tr, 1884) and *Metaphysik* (1879, Eng tr, 1888) Lotze sought to reconcile the mechanistic views of science with the principles of romantic idealism He started from the idea that all phenomena are determined by the interaction of atoms. Since these exist in extension, there must also be some deeper mode of existence through which they interact and exhibit their quality of extension. He saw the atoms as centers of force operating in a matrix of a more basic substance By analogy from the immediate knowledge of spiritual existence in the self, he argued that the centers of force are stages of development within the underlying substance of the world mind Lotze's psychology reflects his metaphysics, though his scientific background brought him to an empirical and physiological position which helped insure the advance of scientific psychology. His theory of space perception, an important contribution to philosophy, was that we perceive various local signs whose movements can be related spatially by the mind which, in turn, tends to interpret its contents in terms of space See E. E Thomas, *Lotze's Theory of Reality* (1921)

Loubet, Émile François (āmēl' frāswā' lōobā'), 1838–1929, president of the French republic (1899–1906). He began his political life as a follower of Gambetta, and as a deputy he advocated secular education After service (1887–88) as minister of public works, he became premier in 1892 The PANAMA CANAL scandal forced his resignation, but he continued as minister of the interior till 1893 He was made president of the senate in 1896 and in 1899 was chosen to succeed Félix Faure as president of the republic During his presidency, agitation over the DREYFUS AFFAIR reached its peak, Loubet and WALDECK-ROUSSEAU repressed it by granting a pardon to Dreyfus (1899) Equally important events were the laws against church education and orders (1905), which put an end to the CONCORDAT OF 1801, and the visit (1903) of Edward VII of England, which Loubet reciprocated This inaugurated the Franco-British Entente Cordiale (see TRIPLE ALLIANCE AND TRIPLE ENTENTE). Loubet retired in 1906 and was succeeded by Fallières.

Loudon, Gideon Ernst, Baron von, see LAUDON.

Loudon, John Claudius (lou'dŭn), 1783-1843, Scottish botanist and landscape gardener He compiled the *Encyclopaedia of Gardening* (1822) and the *Encyclopaedia of Agriculture* (1825). His other writings include *Encyclopaedia of Cottage, Farm, and Villa Architecture* (1833), and *Arboretum et Frutcetum Britannicum* (1838).

Loudon (lou'dun), farm trade town (pop 3,017), co seat of Loudon co, E Tenn, SW of Knoxville and on the Tennessee, settled 1828, inc. 1927 Near by, on the Little Tennessee near its junction with the Tennessee, is the site of Fort Loudoun (1756), which fell to the Cherokee in 1760 after a long siege

Loudonville (lou'dŭnvĭl), village (pop 2,334), N central Ohio, SE of Mansfield and on the Black Fork of the Mohican river, laid out 1814 Busses and hearses are made here. Near by is Mohican State Forest, with a flood-control dam

Loudoun, John Campbell, earl of: see CAMPBELL, JOHN, EARL OF LOUDOUN

loudspeaker or **speaker,** device for translating audiofrequency electric currents into audible sound. Its actuating element consists of a small coil, called a voice coil, free to move slightly back and forth along its axis, and a strong magnet so placed that its lines of force cut the turns of the voice coil. In operation, current is caused to flow in the voice coil by the driving amplifier, developing around the voice coil a magnetic field of its own, changing in direction and intensity at the same frequencies as those of the driving current In the same degree and at the same rate the two fields attract and repel each other, causing corresponding excursions of the voice coil. A diaphragm is attached to the voice coil and moves with it, setting up a molecular disturbance in the air which constitutes, ideally, an exact replica of the sound originally broadcast or recorded. The most familiar form of diaphragm is a stiff paper cone, although some units employ a light metal disk. When the metal disk is used, since the vibrating surface is small and its radiation pattern narrow, a horn is used to provide efficient coupling to the air and to spread the sound through a broad angle. In public address systems and theater installations, horns are employed also with cone speakers to improve loading or coupling to the air; here the purpose is to enhance low-frequency reproduction In home radios of good quality the cabinet is designed to act as a baffle to improve the reproduction of sounds of low frequency A speaker using air-stream modulation, patented in 1930 by Lee DE FOREST, was afterward modified It is able to deliver economically very large amounts of audio power The system includes a compressor which supplies air to a horn through a valve fixed at the horn's throat The valve assembly contains a solenoid (analogous to the conventional voice coil) which, instead of agitating the conventional diaphragm, opens and closes the valve at audio speeds, thus regulating (modulating) the stream of air entering the horn The action corresponds almost perfectly to that of the human larynx and articulation mechanism

Lough (lŏkh, lŏk) For names of Irish lakes and inlets beginning thus, see second part of name; e g, for Lough Erne, see ERNE, LOUGH See also LAKE.

Loughborough (lŭf'-), municipal borough (1931 pop 26,945, 1947 estimated pop 34,570), Leicestershire, England, on the Soar river It has hosiery, shoe, and lace factories and makes pharmaceuticals, boilers, and pottery Bell foundries were built in 1840, the great bell of St Paul's in London was cast here in 1881 Loughborough's war memorial, with a carillon of 47 bells, was built in 1923

Louis I or **Louis the Pious,** Fr *Louis le Débonnaire,* 778–840, emperor (814–40), son and successor of Charlemagne He was crowned king of Aquitaine in 781 and coemperor with his father in 813 In 817 he took his eldest son, LOTHAIR I, as his associate and coemperor and gave Aquitaine and Bavaria to his sons PEPIN I and LOUIS THE GERMAN Wishing to create a kingdom for Charles (later Emperor CHARLES II), his son by a second marriage, Louis made a new partition (829), to the detriment of Lothair Supported by Pepin, Lothair forced his father to revoke the grant and in 830 became virtually sole ruler of the empire However, Pepin and Louis the German, fearing Lothair's supremacy, deserted him soon and restored their father to power A new attempt by Louis to create a kingdom for Charles—this time at the expense of all three elder sons—led to another revolt (833) Louis met the rebels near Colmar on a field known since then as the Field of Lies (Ger *Lügenfeld*) because of the general defection of the imperial troops Louis, compelled to surrender to his sons, was formally deposed and Lothair became sole emperor Yet in 834 Louis the German and Pepin once more joined against Lothair and restored Louis Later he partitioned his empire between Lothair and Charles and died while attempting to uphold the partition against the Aquitanians and Louis the German The weak rule of Louis I not only resulted in internal disorder but also exposed the empire to recurring Norse raids, which Louis was unable to stop.

Louis II, d 875, emperor (855–75), king of Italy (844–75), son of Emperor Lothair I His father assigned Italy to him and Lotharingia to Louis's brother, LOTHAIR Louis supported Lothair's divorce against the opposition of Pope Nicholas I, who refused to yield even after the emperor occupied Rome (864) At Lothair's death (870) Louis claimed Lotharingia, but the Treaty of Mersen divided it between his two uncles, Charles the Bald (who succeeded Louis as Emperor CHARLES II) and LOUIS THE GERMAN Throughout Louis's reign his power in Italy was curbed by the independent Lombard dukes and by the Arab invaders of S Italy

Louis IV or **Louis the Bavarian,** 1287?–1347, emperor (1328–46) and German king (1314–46), duke of Upper Bavaria. After the death of Emperor Henry VII the Luxemburg party among the electors set aside Henry's son, John of Luxemburg, because of his youth and chose Louis, FREDERICK THE FAIR was declared elected by the Hapsburg faction In 1322 Louis defeated and captured Frederick at Mühldorf Pope JOHN XXII questioned the legality of Louis's election and in 1324 excommunicated him. In 1327–30 Louis was in Italy, where he was crowned emperor by the "representatives of the Roman people," and set up Pietro RAINALDUCCI as Antipope Nicholas V The failure of protracted negotiations with the papacy led (1338) to the declaration at Rhense by six electors to the effect that election by all or the majority of the electors automatically conferred the royal title and rule over the empire, without papal confirmation. By the decree *Licet jure* (1338) Louis further claimed that even the imperial title was conferred by the electors. Throughout his reign Louis kept adding to the possessions of his family, the house of WITTELSBACH. He conferred Brandenburg on his son, added Lower Bavaria to Upper Bavaria, and in 1342 acquired Tyrol by voiding the first marriage of MARGARET MAULTASCH and marrying her to his own son. In 1346 he further alienated the lay princes by conferring Holland, Zeeland, and Friesland upon his wife.

In the same year, however, Pope CLEMENT VI declared the emperor deposed and secured the election of Charles of Luxemburg (later Emperor CHARLES IV) as German king. Louis was successfully resisting his rival when he was killed in a hunting accident. The controversy between Louis and the popes caused the publication of many books and pamphlets, notably the *Defensor Pacis*, by MARSILIUS OF PADUA. WILLIAM OF OCCAM was another of his supporters

Louis I, 1786–1868, king of Bavaria (1825–48), son and successor of Maximilian I. He was chiefly responsible for the transformation of MUNICH into one of the handsomest capitals of Europe and for making it a center of the arts. His reign, liberal at first, became increasingly reactionary, and his unpopularity was heightened by his extravagant liaison with Lola MONTEZ. The Revolution of 1848 forced him to abdicate in favor of his son, Maximilian II

Louis II, 1845–86, king of Bavaria (1864–86), son and successor of Maximilian II. Much was hoped from the handsome, talented, liberal, and romantic young prince at his accession, but his prodigality and eccentricity, which always were close to madness, soon alienated his subjects. Louis II was the patron and friend of Richard WAGNER, who for many years exerted a strong influence over him. He aided Austria in the Austro-Prussian War (1866) but sided with Prussia against France in 1870 and in 1871 reluctantly joined the newly created German Empire. In 1866 his insanity necessitated his confinement at his fantastic château on Lake Starnberg, Bavaria, where he committed suicide by drowning, forcing his physician to share his death. His brother, Otto I, succeeded him

Louis III, 1845–1921, last king of Bavaria (1913–18). He succeeded (1912) his father, LUITPOLD, as regent for OTTO I, proclaimed himself king in 1913, and was forced to abdicate in 1918

Louis I, French king. see LOUIS I, emperor

Louis II or **Louis the Stammerer**, 846–79, French king. He succeeded (877) his father, Emperor Charles II. At his death his succession was divided between his sons Carloman and Louis III

Louis III, c 863–882, French king, son of Louis II. He became joint ruler with his brother CARLOMAN in 879, despite the attempts of LOUIS THE YOUNGER to become French king. Louis III and Carloman fought against the secessionists of Burgundy and Provence and resisted an invasion of the Normans, whom Louis routed at Saucourt (881). His death left Carloman sole ruler

Louis IV or **Louis d'Outre-Mer** (lwē dōōtrəmĕr') [Fr., = Louis from overseas], 921–54, French king (936–54), son of Charles III (Charles the Simple). He spent his youth as an exile in England, but at the death of King RAOUL he was recalled by the nobles under the leadership of HUGH THE GREAT. However, Louis's energy and independence displeased Hugh, who fought against him with the German king, Otto I, until 942. Captured by the Normans (945), Louis was surrendered to Hugh, by whom he was released only on the cession of Laon (946). Now in alliance with Otto, Louis made war on Hugh and received his submission in 950. Louis was succeeded by his son Lothair

Louis V (Louis the Sluggard), c 967–987, last French king of the Carolingian dynasty. He succeeded his father Lothair in 986. His successor was Hugh Capet

Louis VI (Louis the Fat), 1081–1137, king of France. He succeeded his father Philip I in 1108, having previously been associated with him in the government. He firmly established his authority within the royal domain, seising vacant fiefs, demolishing the castles of robber barons, and executing swift vengeance upon wrongdoers. He continued his father's policy of opposing the English in Normandy and was almost continuously at war with King Henry I (1109–13, 1116–20, 1123–35); he often met with defeat, but his resistance checked a greater English advance. In 1124 he received the unexpected aid of a coalition of nobles in resisting the invasion of Emperor Henry V. As a part of his plan for strengthening royal authority, Louis favored the Church, liberally endowing its enterprises and selecting churchmen—notably the Abbé SUGER—as his ministers, he was vigorous, however, in enforcing his privilege of interference in ecclesiastical affairs. Toward the end of his life he obtained a foothold in Guienne by marrying his son Louis to the heiress of the duchy, ELEANOR OF AQUITAINE. His enforcement of order and justice made Louis extremely popular with the middle classes, the peasantry, and the clergy. See J. W. Thompson, *The Development of the French Monarchy under Louis VI le Gros* (1895)

Louis VII (Louis the Young), c 1120–1180, king of France. He succeeded his father, Louis VI, in 1137. Before his accession he married ELEANOR OF AQUITAINE. A controversy over ecclesiastic matters with Pope Innocent II (1141) led to a papal interdict on Louis and to warfare between the king and the count of Champagne. It was settled, after the intervention of St. BERNARD OF CLAIRVAUX, by Louis's capitulation to Pope Celestine II (1144). In the course of this war Geoffrey Plantagenet, count of Anjou, completed his conquest of Normandy; Louis, in return for a small concession, acquiesced in the conquest. In 1147 Louis left for the Holy Land (the Second Crusade, see CRUSADES), after appointing SUGER as regent. The crusade having failed, he returned in 1149. Louis divorced Eleanor of Aquitaine in 1152. Her subsequent marriage with Henry Plantagenet (later HENRY II of England) resulted in Henry's claims to AQUITAINE as Eleanor's inheritance and precipitated recurrent warfare between Louis and Henry. Louis supported THOMAS À BECKET during his exile from England and joined in the revolt of Henry's sons (1173–74), but lost his opportunity. He completed his father's work of subduing the barons on the royal domain and continued to increase his influence over his more distant vassals. His successor was Philip II

Louis VIII, 1187–1226, king of France (1223–26). For his father, PHILIP II, he fought against the ALBIGENSES (1215, 1219) and in 1216 invaded England, disregarding his excommunication by Pope Innocent III. The death of King JOHN of England and the accession of Henry III lost him most of his supporters among the English nobles, and after his defeat at Lincoln (1217) he made peace, accepting an indemnity. In 1224 he conquered Poitou but was unable to subdue Gascony. At the persuasion of Pope Honorius III he resumed (1226) the Albigensian Crusade and conquered Languedoc

Louis IX or **Saint Louis**, 1214–70, king of France (1226–70), son and successor of Louis VIII. His mother, BLANCHE OF CASTILE, was regent during his minority and his chief adviser till her death. The early years of his rule were disturbed by the revolts of the great feudatories, supported by Henry III of England, but in 1241–43 Louis secured the submission of Poitou, repulsed an English invasion, and inflicted lasting defeat on the Albigensian leader, RAYMOND VII of Toulouse. In 1248 Louis went on crusade to Egypt (the Seventh Crusade, see CRUSADES), leaving his mother and his brother Alphonse as regents. Defeated and captured at El Mansura (1250), he was ransomed but remained in the Holy Land till 1254. He increased and consolidated the royal domain by ceding Limoges, Cahors, and Périgueux to Henry III of England in exchange for Henry's renunciation of Normandy, Anjou, Maine, Touraine, and Poitou (Treaty of Paris, ratified in 1259) and by yielding the French claim to Roussillon and Barcelona in return for the abandonment by the king of Aragon of his claim to Provence and Languedoc (Treaty of Corbeil, 1258). Louis was arbitrator in succession disputes in Flanders and Hainaut and in Navarre, he attempted to settle the dispute between Henry III and the English barons by giving judgment in favor of the king. In 1270 Louis undertook a new crusade, against Tunis, but died of the plague soon after landing. He was succeeded by his son, Philip III. Under Louis IX, France enjoyed unprecedented prosperity, peace, and progress. Louis continued the reforms of his grandfather, Philip II. He stamped out private feudal warfare, simplified administration, improved the distribution of taxes, abolished the judicial duel, sought to introduce uniform Roman law, and extended the appellate jurisdiction of the crown to all cases. Louis also built the first French navy. His reign witnessed a flowering of Gothic architecture with the building of the cathedrals of Amiens, Beauvais, Bourges, and Chartres and, on Louis's personal order, the SAINTE-CHAPELLE in Paris. He also encouraged learning and helped to found the SORBONNE. In his person, St. Louis embodied the qualities of the ideal Christian monarch. He was pious and ascetic, yet manly and affable, his charity and justice endeared him to his people and won him the respect of the Christian and even of the Moslem world. He was canonized in 1297. Feast: Aug. 25. See memoirs of his contemporary, Jean de JOINVILLE

Louis X, Fr. *Louis le Hutin* [the quarrelsome], 1289–1316, king of France (1314–16), son and successor of Philip IV. He was dominated by his uncle, Charles of Valois. His reign was undistinguished. John I, his posthumous son and successor, died shortly after his birth, thus opening the succession to Philip V

Louis XI, 1423–83, king of France (1461–83), son and successor of Charles VII. As dauphin he was almost constantly in trouble with his father. He was pardoned after joining (1440) the PRAGUERIE revolt, however, after conspiring (1446) against Agnès SOREL, he was exiled to the Dauphiné. His continued intrigues with his father's foreign and domestic enemies forced him to flee to exile (1456–61) at the court of PHILIP THE GOOD of Burgundy. Louis began his reign by dismissing many of his father's best advisers, some of whom he later recalled, but he soon deserted his former allies and stubbornly set himself to the task of centralising all authority in the crown. His measures to curb the power of the great nobles brought forth (1465) the League of the Public Weal, headed by CHARLES THE BOLD, FRANCIS II of Brittany, DUNOIS, Antoine de CHABANNES, and the dukes of Alençon and Bourbon, under the nominal leadership of the king's brother Charles. The lesser nobility, the bourgeoisie, and the people supported the king, who also allied himself with the citizens of Liége against Charles the Bold. Louis fought an indecisive battle at Montlhéry and successfully defended Paris, but granted (1465) the demands of the rebels in the treaties of Conflans and Saint-Maur-des-Fossés. He soon violated the treaties, taking Normandy from Charles the Bold. In 1467 a new coalition was formed, for which Charles the Bold, now duke of Burgundy, obtained the support of Edward IV of England. The duke of Brittany having invaded Normandy and Charles the Bold having assembled an army to crush Liége, Louis arranged a truce with each, in 1468, at the expiration of the truce with Brittany, he subdued Normandy and forced Francis II to sign the Peace of Ancenis (1468). Having visited Péronne for a personal interview with Charles the Bold, Louis was suddenly made prisoner (1468) and forced to sign a treaty containing important concessions and compelling him to help suppress the revolt of Liége, which he had shared in inciting. After his release, he unsuccessfully interfered in the affairs of England, supporting the York party in the Wars of the Roses (see ROSES, WARS OF THE). He succeeded, however, in buying off Edward IV when he invaded France (1475) and in uniting the enemies of Charles the Bold. The Swiss victories over Charles and his death at Nancy (1477) gave Louis an opportunity to take Burgundy, Picardy, Boulogne, Artois, and Franche-Comté from Charles's daughter, MARY OF BURGUNDY. Although Mary's husband, Maximilian of Austria (later Emperor MAXIMILIAN I), defeated Louis at Guinegate (1479), he was ultimately forced (1483) to concede these territories to Louis in the Treaty of ARRAS. A mediocre warrior but a born diplomat, Louis skillfully checked his enemies abroad, broke the power of his vassals, and set up an efficient central administration, thus laying the basis for the absolute monarchy of Louis XIV. He exerted an autocratic rule, though he used commissions (and the one States-General he convoked) to give his acts the appearance of popular approval. He diminished the prestige of the courts. Despite his revocation of his father's PRAGMATIC SANCTION, he intervened freely in church affairs. He imposed heavy taxes, using much of the money thus obtained in purchasing support. On the other hand, he encouraged industry and expanded domestic and foreign trade. Louis favored the company of men of humble origin and constantly employed such corrupt and sinister advisers as LE DAIM, TRISTAN L'HERMITE, and Cardinal BALUE, whom he rewarded liberally, though he was niggardly in his own expenses. Haunted by a bad conscience and the fear of assassination, he spent his last years in virtual self-imprisonment at the château of Plessis-les-Tours, appeasing his conscience by squandering extravagant sums to promote the cult of his favorite saints. He was succeeded by his son, Charles VIII. See writings of his contemporary, COMINES; P. H. Champion, *Louis XI* (Eng. tr., 1929), and D. B. Wyndham Lewis, *King Spider* (1929)

Louis XII, 1462–1515, king of France (1498–1515), called the "father of the people," son of Charles d'ORLÉANS. Having rebelled, as duke of Orléans, against the regency of Anne de Beaujeu, he was imprisoned (1488) but was released (1491) by his cousin Charles VIII, whom he succeeded on the throne (1498). Immediately after his accession he insured the continuance of the personal union of Brittany and France by having his first marriage annulled and marrying his predecessor's widow, ANNE OF BRITTANY. Thereafter the king and his minister, Georges d'AMBOISE, turned their attention almost entirely to the ITALIAN WARS. Louis conquered Milan and Genoa, but failed to secure Naples. By the treaties of Blois (1504), Louis attempted a compromise with Spain and with Emperor Maximilian I, who had so far remained an inactive opponent, the treaties subsequently collapsed, and the king's daughter Claude, whose marriage to Charles of Austria, later Emperor Charles V, was to have been the keystone of the new entente, was betrothed to her cousin, Francis of Angoulême, later King FRANCIS I. In 1507 Louis suppressed the revolt of Genoa (1506–7), and in 1508 he joined the League of Cambrai (see CAMBRAI, LEAGUE OF), he advanced the projects of the league by his victory over the Venetians at Agnadello (1509). When his Italian territories were attacked by Pope Julius II's HOLY LEAGUE (1511), he committed their defense to Gaston de Foix, but after Gaston's death (1512), his troops were forced by the Swiss (then the pope's main allies) to evacuate Milan. In 1513 the Swiss routed his army at Novara while another army was defeated by Maximilian and Henry VIII of England at Guinegate. In 1514 he made a truce with all his enemies save Maximilian. See J. S. C. Bridge, *A History of France from the Death of Louis XI*, Vols. III–IV (1929), M. R. Bolton, *The Golden Porcupine* (1947), a historical novel

Louis XIII, 1601–43, king of France (1610–43). He succeeded his father, HENRY IV, under the regency of his mother, MARIE DE' MEDICI. He married

ANNE OF AUSTRIA in 1615 Excluded from affairs of state by his domineering mother, he caused the assassination of her minister CONCINI, with the aid of his own favorite, LUYNES, and his mother was forced into retirement (1617) He was reconciled to her in 1622 and entrusted the government to her protégé, Cardinal RICHELIEU (1624) In 1630, urged by his mother to discharge Richelieu, he refused and instead sent his mother into a new exile Melancholy and retiring by nature, Louis thenceforth left affairs to Richelieu and his successor, MAZARIN His reign was remarkable for the establishment of the French Academy, the work of St FRANCIS OF SALES and St VINCENT DE PAUL and of PORT-ROYAL in religion, DESCARTES in philosophy, CORNEILLE in literature, and VAUCELAS and the Hôtel de Rambouillet in language See K A Patmore, *The Court of Louis XIII* (1910)

Louis XIV, 1638–1715, king of France (1643–1715), son of Louis XIII His reign may be divided into three periods The first was the regency of his mother, ANNE OF AUSTRIA, which may be considered as prolonged past 1651, when Louis's majority was declared, until the death of MAZARIN (1661), when Louis took full control The second covered the first half of Louis's personal rule and saw France rise to the place of first power in Europe The last 30 years were marked by economic decline and military reverses In 1661, France was economically exhausted by the Thirty Years War, by the FRONDE, and by fiscal abuses But Richelieu's and Mazarin's centralizing policies had prepared the ground for Louis, who transformed the state into an absolute monarchy, based on the theory of divine right and characterized by the apocryphal remark attributed to him, *L'état, c'est moi* [the state is I] Louis forced the nobles into financial dependency on the crown, curtailed local authorities, and originated the cabinet in its modern form by creating specialized ministries, filled largely with professionals and responsible solely to him He replaced (1661) Nicolas FOUQUET, the superintendent of finance, with J B COLBERT, whose genius brought prosperity to France Industry and commerce were expanded on mercantilist principles, a navy was developed to further foreign trade, the colonial empire was increased, and some attempts were made at reforming fiscal abuses In foreign policy Louis vigorously strove for French supremacy His marriage (1660) with MARIE THÉRÈSE OF AUSTRIA served as pretext for the War of DEVOLUTION (1667–68), which netted him part of Flanders, although projects of further expansion were stopped by the Dutch, who negotiated the TRIPLE ALLIANCE Louis decided to crush Holland and precipitated the third (1672–78) of the DUTCH WARS This war netted Franche-Comté to France, but it depleted Louis's treasury For the next 10 years the king limited his aggressive policies to the field of diplomacy The "chambers of reunion" were set up to unearth legal grounds for claims on a number of cities, which Louis promptly annexed Strasbourg, notably, was seized in 1681 Fear of Louis's rapacity resulted in a European coalition (see AUGSBURG, LEAGUE OF, and GRAND ALLIANCE, WAR OF THE), which confronted him when he attacked the empire in 1688 This war ended with the Treaty of RYSWICK (1697), which, though Louis lost only minor territories, marked a decline in French foreign successes As an outcome of the War of the SPANISH SUCCESSION (1701–14), Louis's grandson retained the Spanish throne, but French military power was broken and France was thereafter stalked by hunger, disease, and bankruptcy With the passing of Colbert (1683) and of LOUVOIS (1691), who as minister of war had laid the foundations of French military greatness, Louis ceased to rely on his ministers' advice To impose unity on his subjects he resorted to tyrannical means His persecution of the HUGUENOTS culminated (1685) in the revocation of the Edict of Nantes (see NANTES, EDICT OF) This disastrous measure depopulated vast sections of the kingdom, intensified its economic decline, and alienated the Protestant powers Louis strongly favored GALLICANISM, and controversy with the popes nearly approached schism (1673–93), but then he abandoned this position As for JANSENISM, he suppressed it ruthlessly In the early period the reign was one of lavish display, marked by the building of the palace of VERSAILLES and by Louis's devotion to a series of mistresses, among them Mlle de LA VALLIÈRE and Mme de MONTESPAN, but Louis finally came under the influence of Mme de MAINTENON, whom he married morganatically (1684) after the queen's death and who had an important share in bringing him to the religious devotion of his later years Louis XIV's reign not only marked the apogee of the monarchical idea in politics, but also was a golden age for the arts Among the important painters and sculptors were PUGET, the brothers ANGUIER, COYSEVOX, CLAUDE LORRAIN, the brothers LE NAIN, Nicolas POUSSIN, and Philippe de CHAMPAIGNE Notable literary figures were Pierre CORNEILLE, MOLIÈRE, Jean RACINE, BOILEAU-DESPRÉAUX, Jean de LA FONTAINE, BOSSUET, FÉNELON, La BRUYÈRE and LA ROCHEFOUCAULD PASCAL and MALEBRANCHE made unique contributions to mathematics, physics, and philosophy. Jules MANSART set a new style in architecture, and LENÔTRE in landscaping; LULLY and François COUPERIN were among the foremost composers of their time Because of the brilliance of his court Louis was called "Le Roi Soleil" (the Sun King) and "Le Grand Monarque" He possessed infinite capacity for work, was cold and haughty in his bearing, and surrounded even the most trivial activities of his daily life with pomp and etiquette His death caused unconcealed rejoicing and unleashed the energies of the Age of Reason For contemporary sources, see the memoirs of Cardinal de RETZ, the extremely prejudiced but indispensable memoirs of the duc de SAINT-SIMON, the letters of Mme de SÉVIGNÉ, which brilliantly portray the social life of the time. See Voltaire, *Age of Louis XIV*, Louis Bertrand, *Louis XIV* (1924, Eng tr, 1928), Paul Hazard, *La Crise de la conscience européenne* (3 vols, 1935)

Louis XV, 1710–74, king of France He succeeded (1715) his great-grandfather, Louis XIV, with Philippe II d'ORLÉANS as regent After the regent died, Louis was guided chiefly by FLEURY, who was minister from 1726 to 1743 Shortly after the death of Fleury the influence of Mme de POMPADOUR became dominant Louis XV was married to MARIE LESZCZYNSKA (1725) but neglected her for mistresses, of whom the most celebrated were Mme de Châteauroux, Mme de Pompadour, and Mme DU BARRY In his foreign policy Louis was more concerned with dynastic than with national interests During his reign France was involved in the War of the POLISH SUCCESSION, in the War of the AUSTRIAN SUCCESSION, and in the SEVEN YEARS WAR, which resulted in the loss of France's colonial empire The abuses of Louis XIV's reign and the disastrous financial policy of the regency were partly liquidated by Fleury, but the extravagance of the court, the expense of warfare, and repeated failure to reform the governmental machinery again brought France to the point of ruin by the time of Louis XV's death Throughout the reign, the government had alienated important sections of the population and created the conditions which were later to result in the French Revolution The indifference of Louis's court to the predictable consequences of such mismanagement found expression in the saying, *Après moi le déluge* [after me, the flood], wrongly attributed to the king himself The age of Louis XV is often known as the Age of Reason, because of the galaxy of French philosophers, economists, and scientists who criticized his government and the established order MONTESQUIEU, FONTENELLE, DIDEROT, ALEMBERT, VOLTAIRE, HELVÉTIUS, J J ROUSSEAU, and QUESNAY were among the best known The age also witnessed the rise of the upper bourgeoisie to a decisive role Intellectually, the period was one of ferment, artistically and socially, one of refinement and luxury, exemplified by the ROCOCO style WATTEAU, CHARDIN, François BOUCHER, and FRAGONARD were representative painters of the time, RAMEAU was the foremost French composer Poetry was in eclipse, but drama and romance were well served by MARIVAUX, LE SAGE, and the Abbé PREVOST Intellectual and cosmopolitan life were greatly stimulated by the salons of Mme DU DEFFAND, Mlle de LESPINASSE, Mme d'ÉPINAY, and baron d'HOLBACH See J B Perkins, *France under Louis XV* (1899), F Funck-Brentano, *The Old Regime in France* (1929), Pierre Gaxotte, *Louis the Fifteenth and His Times* (1934)

Louis XVI, 1754–93, king of France, third son of the dauphin (Louis) and Marie Josèphe of SAXONY, grandson of Louis XV, whom he succeeded in 1774 Early in his reign his attempts to improve the condition of the people, to practice personal economy, and to appoint competent and upright ministers met with general approval, but his character was unsuited for the exercise of the strong crisis government which France needed Shy, of subnormal intelligence and abnormal physique, he preferred the hunting field and his locksmith's workshop to the council chamber, his indecision and phlegm made him subject to the ill-advised influence of his intimates The reforms begun by his able ministers TURGOT and MALESHERBES were opposed by the court faction, with Queen MARIE ANTOINETTE, whom Louis had married in 1770, among those who persisted in ignoring the threat of bankruptcy and the economic plight of the lower classes Another obstacle to Turgot's plans was the opposition of the parlements, which were revived after the dismissal of MAUPEOU Turgot was dismissed in May, 1776, but the impending financial debacle forced Louis to appoint Jacques NECKER director of the treasury (Oct, 1776) The king supported most of Necker's reforms and economies, but the costly French intervention in the American Revolution more than canceled the savings derived from Necker's stringent measures The jealousy of the prime minister, Maurepas, and the intrigues of the queen's party caused the reluctant king to dismiss Necker (May, 1781) Popular anger was aroused Necker's successors CALONNE (1783–87) and LOMÉNIE DE BRIENNE (1787–88) were unable to ward off bankruptcy. When the interest-bearing debt had risen to about $600,000,000, the king convoked the Assembly of Notables and asked their consent to tax the privileged classes The notables made a few minor reforms, but refused to share the tax burden Seething discontent finally frightened the monarch into convoking the STATES-GENERAL of 1789 Necker, restored in 1788, prevailed upon Louis to call the third estate in double numbers in order to offset the dominance of the privileged classes In 1789 the history of the king became that of the FRENCH REVOLUTION The king's unsuccessful attempt to prevent the formation of the National Assembly resulted in the Oath of the Tennis Court, which signalized the end of absolutism in France Louis then attempted to require the estates to meet separately and vote by order but again had to yield and allow the estates to sit together and vote by head An evident desire to intimidate the Assembly was indicated when the king ordered troops to advance from the frontier to Paris The Assembly protested, Louis refused to countermand his order and dismissed the popular Necker Only when the insurgent Parisians stormed the Bastille (July 14, 1789) did Louis realize the gravity of the situation, he then ordered the retirement of the royal troops, reinstated Necker, and recognized the commune The king, however, was still completely dominated by his court, and the Parisians feared another royal coup d'état An enraged and hungry mob marched on Versailles (Oct, 1789) and, after wild scenes of disorder, brought the royal family to Paris, where they were confined in the Tuileries palace Louis's position, further compromised by the plots of ÉMIGRÉ circles, was definitively ruined when the royal family, aided by Hans Axel FERSEN and BOUILLÉ, attempted to flee France in disguise (June, 1791) They were apprehended at Varennes, and their attempted flight was held, with considerable justification, to be further proof of their treasonable dealings with foreign powers Louis was forced to give his assent to the radical reforms of the Constituent Assembly and to sign the constitution of 1791, which reduced his authority to that of a figurehead In 1792 the early reverses of the French army in the war with Austria and Prussia and the duke of Brunswick's threat to destroy Paris if the royal family were harmed aroused the fury of the revolutionists, the monarchy was "suspended" and the royal family imprisoned (Aug, 1792) in the Temple When the invasion was repulsed at Valmy (Sept), royalty was abolished in France After Louis's deposition, further incriminating evidence was produced against him He was tried by the Convention in Dec, 1792, and condemned to death by a vote of 387 to 334 He was guillotined on Jan 21, 1793, facing death with steadfast courage The financial difficulties of Louis XVI's government, though they had hastened the outbreak of the Revolution, were not reflected in the economy of the nation as a whole While the government faced bankruptcy, French commerce and industry were prospering The bourgeoisie was replacing the nobility as the center of social and political life—a trend which the Revolution merely confirmed This prosperity, however, was not shared by the peasantry and by the proletariat, which began to grow in the industrial centers Intellectual France under Louis XVI saw the passing of the principal figures of the Age of Reason—Voltaire, Rousseau, and Diderot—and, to some extent, the fruition of their philosophies Rousseau's influence resulted in a somewhat artificial movement "back to nature," typified by the novels of BERNARDIN DE SAINT-PIERRE and innumerable pastoral plays and operas, but it also inspired the beginnings of genuine romanticism André CHÉNIER was the foremost poet of his time, BEAUMARCHAIS reinvigorated French drama Painting, represented by GREUZE, VIGÉE-LEBRUN, and J L DAVID, underwent a relative decline The foremost achievements of the period were in the fields of science (by LAVOISIER, BUFFON, and the brothers MONTGOLFIER) and of philosophy (by CONDILLAC and CONDORCET) See S H MacLehose, *The Last Days of the French Monarchy* (1901), Saul K Padover, *The Life and Death of Louis XVI* (1939)

Louis XVII (Louis Charles), 1785–1795?, titular king of France (1793–95) The second son of Louis XVI and MARIE ANTOINETTE, he became dauphin at the death (1789) of his elder brother In 1792 the revolutionists imprisoned him with the royal family in the Temple After the execution of Louis XVI (1793), the count of Provence (later Louis XVIII) proclaimed him king as Louis XVII, but he remained in prison until his death Cruel treatment by his jailer, Antoine SIMON, is said to have hastened his end His death has often been disputed, it was rumored that Barnave had taken the true dauphin from the prison and substituted another in his place. Though most evidence indicates that the dauphin really died in 1795, legends have gathered about the Lost DAUPHIN and several impostors appeared. See E R Buckley, *Monsieur Charles* (1927), Meade Minnigerode, *The Son of Marie Antoinette* (1934); J. B Morton, *The Dauphin* (1937)

Louis XVIII, 1755–1824, king of France (1814–24), brother of Louis XVI. As count of Provence, he

was of some prominence in the reign of Louis XVI, notably in the plot of FAVRAS (1789) He fled (1791) to Coblenz from the French Revolution and was recognized as king by the émigrés after the death (1795) of Louis XVII He was hunted through Europe by Napoleon I, but was restored (1814) to the French throne by the allies after their entry into Paris, with the assistance of TALLEYRAND. He adopted a conciliatory policy towards the former revolutionists and granted a liberal constitutional charter Forced to flee abroad once more on the news of the return of Napoleon I, he returned with the allies (1815) after the defeat at Waterloo had ended Napoleon's rule of a HUNDRED DAYS His influence was much reduced after this second restoration His chief ministers were at first moderates—Armand Emmanuel, duc de RICHELIEU, and DECAZES—but the ultraroyalists, led by Louis's brother (later CHARLES X), triumphed over the moderate Doctrinaires after the assassination (1820) of Charles's son, Charles Ferdinand, duc de Berry The new VILLÈLE ministry was thoroughly reactionary Electoral laws were revised to increase the influence of the wealthy classes, and civil liberties were curbed This trend continued and was intensified during the reign of his successor, Charles X Louis's reign saw the beginning of the romantic movement in France, of which Mme de Staël and Chateaubriand were the first great representatives

Louis I OF **Louis the Great,** 1326–82, king of Hungary (1342–82) and of Poland (1370–82) He succeeded his father, Charles I, in Hungary, and his uncle, Casimir III, in Poland He continued the internal policy of his father, favoring the Church and the commerce of the towns In 1351 he confirmed the Golden Bull of ANDREW II, but to assure the continuance of a strong and wealthy military class he applied the system of ENTAIL to the estates of the nobles and made it mandatory for serfs to pay one ninth of their farm produce to their overlord His finances were sound, and he was rarely forced to appeal to the diet for funds, as a result its meetings became less and less frequent Louis tried, without success, to keep the Venetians from taking Zara (1346) Two expeditions to avenge the murder of his brother Andrew at the court of JOANNA I of Naples ended in a truce (1352) between the two monarchs Louis fought two successful wars against Venice (1357–58, 1378–81), which ceded Dalmatia to him The rulers of Serbia, Wallachia, Moldavia, and Bulgaria became his vassals In Poland, where his campaign (1354) against the Tatars and the Lithuanians had made him popular, he was unable to prevent revolts and restlessness after his accession (1370) He had no male heir but provided for his succession by marrying his eldest daughter, Mary to SIGISMUND (later emperor), and a younger daughter, JADWIGA, to Jagiello (see LADISLAUS II) of Lithuania In 1377 Louis campaigned successfully against the Turks Louis not only brought Hungarian power to its greatest height, but also fostered art and learning, which were influenced both by his French background and by his campaigns, which brought Hungarians in contact with the Italian Renaissance

Louis II, 1506–26, king of Hungary and Bohemia (1516–26), son and successor of Ulaḍislaus II He was the last of the Jagiello dynasty in the two kingdoms In face of the intensified attacks by Sultan SULEIMAN I, Louis in 1526 hastily sought to unite Hungary and Christendom behind him, but only the pope sent help With a pitiful army Louis joined battle with the Turks at MOHACS The Hungarian army was destroyed Louis was killed Through the marriage treaty concluded by his father (see ULADISLAUS II) the crowns of Hungary and Bohemia passed to Louis's brother-in-law, Ferdinand of Hapsburg (later Emperor FERDINAND I), but Hungary fell under Turkish rule

Louis I, 1339–84, king of Naples (1382–84, rival claimant to Charles III), duke of Anjou, count of Provence, second son of John II of France He was the founder of the second ANGEVIN line in Naples As a regent for his nephew, CHARLES VI of France, he was noted for his rapacity In 1380 JOANNA I of Naples adopted Louis as heir to the throne and to Provence, repudiating her first choice, Charles of Durazzo Charles, however, conquered the kingdom (1381) and was crowned king of Naples as Charles III Supported by Charles's enemies, Louis invaded the kingdom but died at Bari before a decisive battle could be fought His claim passed to his son, Louis II

Louis II, 1377–1417, king of Naples (1384–1417, rival claimant to CHARLES III, LANCELOT, and Joanna II), duke of Anjou, count of Provence, son and successor of Louis I In 1389 the antipope Clement VII invested him with the kingdom, Lancelot, heir of Charles III, having been expelled in 1386 Louis took possession of Naples in 1390, but was thrown out in turn by Lancelot in 1399 In 1409 Louis liberated Rome from Lancelot's occupation, in 1410, as an ally of the antipope John XXIII (see COSSA, BALDASSARRE), he attacked Lancelot Though victorious at Roccasecca (1411), Louis eventually had to retire His claim to Naples passed to his son, Louis III

Louis III, 1403–34, king of Naples (1417–34, rival claimant to JOANNA II), duke of Anjou, count of Provence, son and successor of Louis II He invaded Naples in 1420 Queen Joanna called in the aid of ALFONSO V of Aragon and Sicily and adopted him as heir (1421), but Alfonso's domineering attitude caused her (1423) to adopt Louis instead Louis had gained control of most of the kingdom when he died Joanna made his brother RENÉ heir

Louis I, 1838–89, king of Portugal (1861–89), son of Maria of Portugal and Ferdinand of Saxe-Coburg-Gotha His reign was troubled by much political tumult, and a succession of ministries accomplished little Slavery was abolished in the Portuguese colonies There was much talk of Louis's claiming the Spanish throne, but it came to nothing His reign saw great progress in transportation, commerce, and industry He was succeeded by his son CHARLES I

Louis, 1682–1712, titular duke of Burgundy, grandson of Louis XIV of France He became heir to the throne on the death (1711) of his father, Louis, the Great Dauphin FÉNÉLON was his tutor and wrote *Télémaque* for his use Louis was the rallying point of the opposition to Louis XIV—reactionary nobles and liberals alike—and miracles were expected of him When he died suddenly during an epidemic (possibly of scarlet fever), rumors of poisoning circulated His death is described in a famous passage in the memoirs of Saint-Simon He was the father of Louis XV of France and the brother of Philip V of Spain

Louis, Joe (Joseph Louis Barrow) (lōō'ĭs), 1914–, American pugilist, world heavyweight champion, b Lafayette, Ala His father, a Negro sharecropper, died when Joe was four years old, and after his stepfather took (1926) the family to Detroit, Joe held odd jobs to bolster the family income When he was 16 he became a sparring partner at a makeshift gymnasium in Detroit, and at 18 he began an amateur career in the ring After winning (1934) the National Amateur Athletic Union light heavyweight title, Louis immediately turned professional In an unprecedented meteoric rise in professional boxing, Louis—with magnificent physique, lightning punches, and stolid calmness—fought his way from the ranks of beginners to become (1937) the world heavyweight champion by knocking out James J Braddock in the eighth round at Chicago In 1938 he knocked out Max Schmeling—the only man ever to defeat Louis (by a 12-round knockout in 1936) in professional boxing—in the first round in New York city He continued to meet and vanquish all challengers—including Tommy Farr, John Henry Lewis, Bob Pastor, Arturo Godoy, Billy Conn, Joe Walcott, and Lou Nova By the time he announced his retirement from the ring in 1949, Louis, often called the "Brown Bomber" by his admirers, had defended his title 24 times, scoring 21 knockouts While serving (1942–45) in the U S army in the Second World War, he fought in many exhibition bouts See his autobiography, *My Life Story* (1947)

Louis, Pierre Charles Alexandre (pyĕr' shärl' alĕksä'dru lwē'), 1787–1872, French physician He is noted for introducing the statistical method in the study of disease He studied phthisis (tuberculosis) and typhoid fever, which with W W GERHARD, he distinguished from typhus

Louisa (lōō-ē'zu), town (pop 2,023), co seat of Lawrence co, E Ky, at the W Va line where the junction of the Levisa and Tug forks forms the Big Sandy River, settled c 1790 It is the trade and shipping center for a mountain farm area having also oil and gas wells, coal mines, and fire-clay and sand pits Big Sandy Dam here was built in 1896

Louisburg (lōō'ĭsbûrg), town (pop 1,012), on E Cape Breton Island, N S, near the site of the great fortress of Louisbourg, built (1720–40) by France as its Gibraltar in America Plans were drawn by Vauban, but the work was poorly done, and the garrison was inadequately supplied, indifferent, and at odds with the civilian population French privateers, using the harbor as a base, preyed on New England fishermen on the Grand Banks, and in 1745 a small force of colonials under William PEPPERRELL, supported by a fleet of merchantmen commanded by Sir Peter Warren, attacked Louisbourg and forced its surrender Three years later it was returned to France by the Treaty of Aix-la-Chapelle, in exchange for Madras, India, but it fell (1758) to a British land and sea attack led by Gen Jeffrey AMHERST and Admiral BOSCAWEN which reduced it to ruins In 1928 the ruins, with 328 acres, were set aside as the Louisbourg National Historic Park The present town of Louisburg is a fishing and tourist center and a shipping point for coal and steel when ice closes the harbor at Sydney

Louisburg, town (pop 2,309), co seat of Franklin co, N N C, on the Tar and NE of Raleigh, in a lumber and farm area, settled 1758 It has a junior college

Louisburgh, Caithness, Scotland see WICK

Louis d'Outremer see LOUIS IV, French king.

Louise, 1776–1810, queen of Prussia, consort of FREDERICK WILLIAM III, a princess of Mecklenburg-Strelitz Her patriotic bearing in the Napoleonic Wars, contrasting with her husband's weakness, won her lasting popularity In 1807 she humiliated herself in vain at Tilsit before Napoleon, begging him to lighten the peace terms for Prussia See biography by Gertrude Aretz (Eng tr, 1929)

Louise, Lake, 1½ mi long, alt 5,680 ft, SW Alta, near the British Columbia border, in Banff National Park It is noted for its scenic beauty, being surrounded by high mountain peaks, glaciers, and snow fields, which are reflected in its waters The lake was discovered in 1882 and later was named for Princess Louise It has become a popular tourist and mountain-climbing center The lake drains to the east into the Bow river

Louise of Savoy, duchess of Angoulême (ăgōōlĕm'), 1476–1531, regent of France, daughter of Duke Philip II of Savoy and mother of FRANCIS I of France In Francis's absence in the Italian Wars, she acted as regent She had much influence over Francis, and during his captivity in Spain (1525–26) she made an alliance with Henry VIII of England She negotiated (1529) the Ladies' Peace (see CAMBRAI, TREATY OF) with Margaret of Austria See her journal (in French, ed by J F Michaud and J J F Poujoulat, 1854)

Louiseville, town (pop 3,542), S Que, on the Rivière du Loup and WSW of Trois Rivières It was founded in 1714

Louisiade Archipelago (lōōē"zēăd', -ad'), comprising c 10 volcanic islands and numerous coral reefs, SW Pacific, part of the Territory of Papua The chief islands are Tagula (the largest), Rossel Island, Misima, and Deboyne Islands Most of the mountainous, volcanic islands are gold-bearing In the Second World War the Deboyne Islands were the site of a Japanese seaplane base The battle of the Coral Sea (1942) was fought near Misima

Louisiana (luwē"zēă'nu, lōōē"-), state (50,820 sq mi, 1940 pop 2,363,880, 1949 estimated pop 2,630,000), S United States, admitted 1812 as the 18th state (slaveholding) BATON ROUGE is the capital, NEW ORLEANS is the metropolis, and other cities are SHREVEPORT, MONROE, ALEXANDRIA, and LAKE CHARLES The state is bounded on the north by Arkansas, on the east by Mississippi (in the north the Mississippi river is the line, in the extreme south the PEARL), on the south by the Gulf of Mexico, and on the west by Texas (the SABINE marks most of the line) A low country on the Gulf coastal plains and the Mississippi alluvial plain, it rises in uplands near Arkansas only to some 500 ft The wet coast country has marshes and delta lands, and inland are pine hills The Mississippi dominates the many waterways of the rainy land, but other rivers (the RED RIVER, the OUACHITA, the ATCHAFALAYA, and the CALCASIEU) and many slow bayous (e g, the TECHE, the MACON, and the LAFOURCHE) thread the coast There are lagoons such as Lake PONTCHARTRAIN, oxbow lakes made by Mississippi cutoffs, and other lakes where the slow streams are clogged The semitropical climate and alluvial soil make the state the leader in rice (grown on irrigated prairies of the southwest) and sugar cane (the region around Donaldsonville is the "Sugar Bowl"), but almost any crop of the Western hemisphere may be grown, and cotton, corn, sweet potatoes, Irish potatoes, and truck are grown in quantity Petroleum, natural gas, sulphur, and salt give the state mineral wealth, and lumbering, fur trapping (muskrats are chiefly responsible for the state's leading position as fur producer), the taking of shell fish (shrimp, oysters, and crabs), and livestock raising add to Louisiana plenty The industries depend on processing these products and include besides the usual refining, milling, and canning, such things as the making of paper and manufacture of wall boards The region was possibly visited by Cabeza de Vaca and his fellow survivors of the Spanish expedition of 1528 and was certainly seen by some of De Soto's men (1541–42) In 1682 LA SALLE reached the mouth of the Mississippi and claimed all its drainage basin for France, naming it Louisiana after Louis XIV His attempt to return to the great river failed, and it was not until 1699 that Pierre le Moyne, sieur d' IBERVILLE founded the first of two settlements called BILOXI His younger brother, the sieur de BIENVILLE, transferred (1702) the settlement to Fort Louis de la Mobile and founded (1710) MOBILE French missionaries and fur traders explored some of the vast territory, and NACHITOCHES, the oldest settlement in present Louisiana, grew from a fort built in 1714 to protect the Red River area from the Spanish Getting no easy riches from the colony, France gave it (1712) to a merchant, Antoine Crozat, for development CADILLAC was named governor Crozat did not prosper and gladly yielded (1717) his monopoly to the company organized by John LAW The illusory riches of Law's MISSISSIPPI SCHEME brought many settlers to Louisiana, and many remained after the scheme fell to dust Rhenish Germans settled above New Orleans (founded 1718 and made the capital 1723) on what is still the German Coast (*Côte des allemands*) Negroes were brought in great numbers as slaves, and the *Code Noir* (1724) was adopted to control their lives completely, it also established Catholicism as the state

religion and Jews were barred from Louisiana The settlers were menaced by Indians, as in the destruction (1729) of the garrison at Fort Rosalie (Natchez) by the Natchez Indians, who were then wiped out by the French and the once anti-French Choctaw Indians. Indigo plantations and fur trading (despite the rival British fur traders in South Carolina) brought some wealth, but the colony did not prosper As the French and Indian War was ending disastrously for the French, Louisiana W of the Mississippi and the "Isle of Orleans" were ceded to Spain by the secret Treaty of Fontainebleau (1762) The cession, made public with the Treaty of Paris in 1763, gave Great Britain all Louisiana E of the Mississippi except the "Isle of Orleans", it was announced in Louisiana in 1764 The first Spanish commissioner, Antonio de Ulloa, met with a revolt in New Orleans and departed (1768) for Cuba, but short-lived independence ended when Alejandro O'Reilly arrived (1769) with troops, executed or imprisoned the insurrectionist leaders, and instituted the Spanish rule and Spanish mercantilist monopoly of trade Louisiana was receiving then new French recruits deported from ACADIA, who arrived in numbers to about 5,000 by 1800 and settled the "Cajun" country, especially in the Attakapas region In the American Revolution, New Orleans gave supplies to the rebellious colonies, and after Spain entered the war in 1779, Louisiana's Bernardo de GÁLVEZ took Manchac, Baton Rouge, and Natchez and had by 1781 carried his conquests to take Mobile and Pensacola, thus gaining both East and West Florida After the war as the United States pushed west, trade down the Mississippi, though it was illegal, grew Both Great Britain and the United States claimed free access to the Mississippi under the Treaty of Paris of 1783, but Spain, no party to the agreement, denied the river to both Intrigues by Western frontiersmen menaced the Spanish control or, alternately, threatened to turn the West over to Spain The Pinckney treaty (1795) with Spain gave Americans free navigation of the river, and the reversal of this policy by a Spanish official in 1802 was ultimately meaningless, for Spain returned Louisiana to Napoleon's France (see SAN ILDEFONSO, TREATY OF) An aroused West and fear of Napoleon as a neighbor influenced President Thomas Jefferson to take advantage of Napoleon's willingness to relinquish the territory The LOUISIANA PURCHASE was made, and on Dec 20, 1803, W C C CLAIBORNE and Gen James WILKINSON in New Orleans took possession of Louisiana for the United States The territory was divided (1804) into two parts, that north of lat 33° N (the present boundary of Louisiana) being called the District (1804–5) and then the Territory (1805–12) of Louisiana and finally Missouri Territory, that of the south being the Territory of Orleans Settlement of the WEST FLORIDA CONTROVERSY extended the administration of the state, which was admitted into the Union as Louisiana French influence remained, not only in the Creole and "Cajun" societies but in the civil law (based on French and Spanish codes) and the division of the state into parishes rather than counties. In 1819, when Spain relinquished all claims E of the Sabine, Louisiana took on its present boundaries In the early years of the 19th cent the people of Louisiana—Frenchmen, Spaniards, Germans, Isleños brought by Gálves from the Canary Islands, and such frontier adventurers as Jean LAFFITE—resisted the American minority and American ways The victory of Andrew Jackson over the British (hated by all) in the battle of New Orleans (1815) served, however, to mold them all to the new pattern The invention (1793) of the cotton gin, the discovery (1795) of a method for refining sugar on a commercial scale, and the use of the steamboat (the first to dock at New Orleans came in 1812) all helped prepare for the development of great sugar and cotton plantations in the early 19th cent, as settlers poured in from other Southern states The plantation owners took control while New Orleans became the nation's second port and less fortunate settlers (ancestors of the "red necks") took over the unproductive uplands Donaldsonville was the capital (1825–31), then New Orleans again (1831–49) The plantation owners kept control, with their big estates and many slaves (more than half the population was Negro) The state left the Union on Jan 26, 1861, and after a brief period of independence joined the Confederacy P G T BEAUREGARD and Judah P BENJAMIN were among the Louisianans who served the Confederacy well The fall of New Orleans to David G. FARRAGUT in 1862 prefaced the detested military occupation under Gen B F BUTLER Grant's VICKSBURG CAMPAIGN and the fall of PORT HUDSON left to the Confederacy only W Louisiana, which was defended by Dick Taylor's Confederate victory at SABINE CROSSROADS (April 8, 1864) over the Red River expedition of Gen N P BANKS Louisiana suffered much in RECONSTRUCTION A proving ground for Lincoln's moderate program during the war, the state adopted (1864) a Republican constitution, which Congress rejected Former Confederates gained control in 1865 and passed laws discriminating against the freed slaves. The Republicans, largely dependent on Negro votes, tried to convoke another constituent convention Bloody race riots developed The radical Republicans, taking charge of Reconstruction policy, put Louisiana with Texas into a military district under Gen Philip H. SHERIDAN, who ruled very sternly The state was readmitted to the Union in 1868 under a constitution giving the freedmen power at the expense of the former governing classes, the result was not democracy but confusion, corruption, and great economic distress in the bitter years 1868–77 The KU KLUX KLAN was particularly active from 1866 to 1871 In the election of 1872 the radical Republican candidate for governor lost by vote but was installed anyway with the help of Federal troops The period was brought to a close with the disputed presidential election of 1876, when the Louisiana votes were "negotiated" for Rutherford B Hayes but Francis T R NICHOLLS, a Democrat, was allowed to take the governorship to which he was elected, and white control was reestablished Economic recovery was slow The broken plantation system was largely replaced by farm tenancy and share cropping. The decline of steamboat traffic was offset somewhat by new railroad building and the improvements of the New Orleans port by Capt J B Eads The Mississippi flood constituted a serious problem, and levee building increased after the flood of 1882, but it was only after the disastrous flood of 1927 that the Federal government undertook a vast control system (see MISSISSIPPI, river) Louisiana politics, colorful and individual from early French days, continued exciting In 1891 the murder of the New Orleans chief of police, David C Hennessy when investigating the secret Italian society, the Mafia, led to a trial of alleged members of the society, who were acquitted, a mob then lynched 11 of the accused men In 1891, too, the friends of the Louisiana state lottery (organized in 1866 for state revenues) were defeated, and the lottery was outlawed in 1895 The pattern of Louisiana economy was changed by the discovery of oil and natural gas in the early 1900s, and industries began to grow on the basis of cheap fuel and cheap labor The old curse of yellow fever epidemics was ended in 1905 The new influence and the continuing woes of the tenant farmers did not alter the control of the state by "Bourbon" Democrats, but in 1928 a virtual revolution occurred when Huey P LONG was elected governor His dictatorial rule, detested by all liberals across the nation, did bring material progress as well as widespread official corruption He withstood all outside pressures, including the opposition of F D Roosevelt's administration After his assassination in 1935 (he had been U S Senator since 1935), his political heirs made their peace with the New Deal, and Federal funds, withheld in Long's last years, were poured into the state, and Louisiana came out of the long national depression better than most states After the collapse (1939–40) of the Long machine, several prominent men, including ex-Governor Richard W Leche and James Monroe Smith (president of the state university), were convicted of crimes Huey's brother, Earl K Long, who as lieutenant governor had succeeded Leche, was defeated (1940) for the Democratic nomination by Sam H Jones, whose reform administration (1940–44) was continued by James H Davis (1944–48) In 1948, however, Earl Long, invoking the memory of his dead brother (still regarded by his followers as a savior and a martyr), captured the governorship and Huey's son Russell was elected to the U S Senate Traditionally Democratic, Louisiana in the presidential election of that year bolted to the States Rights party candidate, J Strom Thurmond, a strong upholder of "white supremacy" Since Reconstruction the issue of Negro rights has been a bitter one in the state, which has a large Negro population The Negroes live primarily in S Louisiana and in the east, where they are partially blended into the old Creole culture, which persists faintly in New Orleans even today The descendants of the Acadians also preserve some of their distinctive culture The French language and French patois have tended to disappear, but Roman Catholicism and French customs survive Completely different is the "American," Protestant, predominantly white culture of N Louisiana The diversity of rich local color has been reflected in the literary works of George W Cable, Grace King, Lafcadio Hearn, Roark Bradford, Lyle Saxon, and Robert Penn Warren Outstanding among institutions of higher learning are Tulane Univ and Louisiana State Univ See C E A Gayarré, *Histoire de la Louisiane* (2 vols, 1846–47, Eng tr., 1866), Alcée Fortier, *A History of Louisiana* (4 vols, 1904), Albert Phelps, *Louisiana* (1905), Lyle Saxon, *Old Louisiana* (1929), W O Scroggs, *The Story of Louisiana* (1924, rev ed, 1936); W. M Caskey, *Secession and Restoration of Louisiana* (1938), R W Shugg, *Origins of Class Struggle in Louisiana* (1939), J D Bragg, *Louisiana in the Confederacy* (1941); H. T. Kane, *Louisiana Hayride* (1941); Federal Writers' Project, *Louisiana, a Guide to the State* (1941).

Louisiana, city (pop 4,669), NE Mo, on the Mississippi below Hannibal, laid out 1818. There are varied small industries, and near by is the Stark nursery. A large government ammonia plant here has been converted into a laboratory for the study and production of synthetic fuels The Champ Clark Bridge crosses the river here

Louisiana Polytechnic Institute: see RUSTON.

Louisiana Purchase. The revelation of the secret agreement of 1800 (see SAN ILDEFONSO, TREATY OF), whereby Spain retroceded Louisiana to France, aroused uneasiness in the United States, and on April 18, 1802, President Jefferson wrote to Robert R Livingston, the American minister to France "The cession of Louisiana and the Floridas by Spain to France, works most sorely on the United States . From that moment [French occupation of New Orleans], we must marry ourselves to the British fleet and nation " Demands for the seisure of New Orleans were heightened late in 1802 when the right of deposit granted by the Pinckney treaty of 1795 was withdrawn by the Spanish intendant (Louisiana was still under Spanish control) Although Spain soon restored the right of deposit, the acquisition of New Orleans became of paramount national interest Jefferson instructed Livingston to attempt to purchase the "Isle of Orleans," i e, New Orleans and West Florida from France He then appointed James Monroe as minister extraordinary and plenipotentiary to serve with Livingston, and Congress granted the envoys $2,000,000 to secure their object The international situation favored the American diplomats Louisiana was of diminishing importance to France, for difficulties in Saint-Domingue (see HAITI) had forced Napoleon to give up his idea of making that island the keystone of his colonial empire Furthermore, impending war with Great Britain made him question the possibility of holding Louisiana against that great naval power He decided to sell Louisiana to the United States On April 11, 1803, Talleyrand, anticipating Napoleon's instructions to his minister of the public treasury, François Barbé-Marbois, opened negotiations by asking the surprised Livingston what the United States would give for all Louisiana Bargaining began in earnest the next day, on Monroe's arrival in Paris On April 29, the U S envoys accepted Barbé-Marbois's price—80,000,000 francs (about $15,000,000), including 20,000,000 francs for discharging claims of American citizens against France The treaty, dated April 30, 1803, was signed several days later Jefferson, a strict constructionist, believed that the Constitution granted no power to acquire foreign territory and proposed the adoption of a permissive amendment The overwhelming public approval of the Louisiana Purchase (though there was some objection from Federalists, especially in New England) and Livingston's intimation that Napoleon might change his mind caused Jefferson to reconsider his plan The treaty was ratified on Oct 21, 1803, and the U S flag was raised over New Orleans on Dec 20 Although the French had regarded the Iberville and Rio Grande rivers as the east and west boundaries of Louisiana, no such limits were set forth in the treaty, and the boundaries were not settled for several years (see WEST FLORIDA CONTROVERSY) From the Louisiana Purchase, which increased the national domain by about 140 percent, were carved all or part of 13 states Louisiana (admitted 1812), Missouri (1821), Arkansas (1836), Iowa (1846), Minnesota (1858), Kansas (1861), Nebraska (1867), Colorado (1876), North Dakota (1889), South Dakota (1889), Montana (1889), Wyoming (1890), and Oklahoma (1907) See Henry Adams, *History of the United States* (9 vols, 1889–91), J K Hosmer, *The History of the Louisiana Purchase* (1902), E S Brown, *The Constitutional History of the Louisiana Purchase* (1920), E W. Lyon, *Louisiana in French Diplomacy, 1759–1804* (1934), A P Whitaker, *The Mississippi Question, 1795–1803* (1934)

Louisiana State University and Agricultural and Mechanical College, mainly at University, near Baton Rouge, land-grant and state supported, coeducational, chartered 1853, opened as a state seminary 1860 near Alexandria (with W. T. Sherman as superintendent), moved 1869, became a university 1870, absorbed the Agricultural and Mechanical College 1877 It includes colleges of agriculture, arts and sciences (journalism, music, and other schools), chemistry and physics (Audubon Sugar School), commerce, and engineering, schools of education, law, and library science, and a medical center in New Orleans There are lower schools, a university press, an engineering and five agricultural experiment stations, the state geological survey, and historical museums. During the period of Huey Long's influence in the state, the university gained magnificent physical equipment

Louis Napoleon: see NAPOLEON III

Louis of Baden (bä'dŭn), 1655–1707, margrave of Baden (1677–1707), German general in the imperial service. In 1689 he was made chief commander of the imperial army in Hungary, where he inflicted a resounding victory on the Turks at Slankamen (1691) He later commanded in the War of the Spanish Succession, but his fame was overshadowed by that of his maternal cousin, Prince Eugene of Savoy.

Louis period styles, 1610–1793, a succession of modes of interior decoration and architecture which established France as a leading influence in the decorative arts During the reign of Louis XIII (1610–43) there was a transition from the earlier baroque style, strongly influenced by Italy, to the classical dignity of the period of Louis XIV (1643–1715). The Louis XIV [*Louis Quatorze* (lwē kätôrz')] style, established after the king took personal control of the government in 1661, was molded by the chief minister, Colbert, who established manufactories of tapestries, textiles, furniture, and bibelots, assembled leading artists and craftsmen in the royal service, and appointed Charles Le Brun director of the Gobelins (see Gobelin) and decorator of the palace of Versailles Interiors showed a unity of composition which subordinated the elaborate decoration to a simple architectural framework Neutral backgrounds emphasized the strong, rich colors of Gobelin, Aubusson, and Beauvais tapestries, Savonnerie and Oriental rugs, velvet or brocade upholstery hangings, and large paintings on walls and ceilings Such ornaments as scrolls, the acanthus, caryatids, busts, and full figures with festoons of flowers and fruit were employed Large mirrors decorated the walls Furniture scaled to the huge proportions of the rooms was made of ebony or covered with silver, gilt, or lacquer and decorated with carving, marquetry in the manner of A C Boulle, and metal mounts The Regence style, established during the regency of Philippe II, duc d'Orléans (1715–23), made a transition between the formality of the Louis XIV period and the intimate gaiety of the Louis XV style Finely sculptured bronze reliefs became the outstanding mode of furniture decoration under the leadership of the cabinetmaker Charles Cressent The Louis XV [*Louis Quinze* (lwē kēz')] (1723–74) style was characterized by free curves and the use of rococo ornament and chinoiserie Rooms were smaller, specialized, and arranged for convenient use Colors were delicate Tinted wood, veneer, lacquer panels, marquetry, mounts by Caffieri and Pierre Gouthière, and porcelain plaques of Sèvres ware distinguish the furniture The style in its later phase was more restrained and presaged the strong reaction of the Louis XVI [*Louis Seize* (lwē sēz')] (1774–93) period, during which simplicity replaced excess and the classic revival influenced decorative motifs and brought a return to straight lines and symmetry Slenderness of proportion is apparent in wall treatment and furniture Colors were grayed and light in tone, ornament delicate and in low relief, embossed, or painted Furniture details comprise slender fluted legs, convex moldings, and rosette, leaf, and flower motifs in the carved frames often painted white and touched with gilt Upholstery and hangings show a varied use of fabrics The Revolution abolished the guilds which had maintained high standards of craftsmanship and weakened the practice, instituted under Louis XIV, of cooperation between artists and masters of the various crafts in producing fine furniture and decorative accessories

Louis Philippe (lwē' fēlēp'), 1773–1850, king of the French (1830–48), known before his accession as Louis Philippe, duc d'Orléans The son of Philippe Egalité (see Orléans, Louis Philippe Joseph, duc d'), he joined the forces of the French Revolution, but deserted from the French army with Dumouriez (1793) He spent a large part of his long exile in straitened circumstances in England and in the United States After the Bourbon restoration he returned to France and was a quiet but prominent figure in the liberal opposition to Louis XVIII and Charles X He was favored by the discontented upper bourgeoisie led by the banker Laffitte and supported by journalists such as Thiers When Charles X was overthrown by the July Revolution of 1830, Louis Philippe was made lieutenant general of the realm and, finding the approval of the marquis de Lafayette, who commanded the national guard, was chosen "king of the French" (not "of France," a significant change) His reign, known as the July Monarchy, marked the triumph of the wealthy bourgeoisie and big business The constitutional charter of 1814 was revised (1830) in a liberal direction, but as the years progressed it became increasingly evident that the king totally lacked understanding of the economic and political rights of the working classes, whose numbers had been increased and whose living conditions had deteriorated as a result of the Industrial Revolution To the agitation for reduction of property qualifications in voting, the government replied with the classic slogan, "Get rich!" The king's increasingly reactionary outlook was encouraged by numerous radical outbreaks and by the attempt (1835) of Fieschi on his life, it was faithfully reflected by his successive ministries, headed by Laffitte (1830–31), Casimir Périer (1831–32), Soult (1832–34), C A L V de Broglie (1835–36), Molé (1836–39), Thiers (1840), Soult (1840–47), and Guizot (1847–48) Guizot was the chief political figure from 1840 onward. Louis Philippe favored colonial expansion, Algeria was conquered in his reign. He maintained friendly relations with England, based on French and English intervention in favor of Belgium, and on the Quadruple Alliance of 1834, but the Franco-British entente was ended in 1846 by the Spanish Marriages (see Isabella II) In France, Louis Philippe became increasingly unpopular On the right wing, he was opposed by the legitimists (who favored the restoration of the senior Bourbon line) and by the Bonapartists The leftist elements organised in numerous secret revolutionary societies Louis Blanc and Karl Marx were among the socialist and communist writers whose doctrines were about to open a new era The opposition to Guizot undertook (1847–48) the "campaign of banquets," organised all through France to propagate the demand for electoral reform This campaign culminated in the February Revolution of 1848 Louis Philippe abdicated in favor of his grandson (see Orléans, family), but a republic was set up The king fled to England, where he died He enjoyed the friendship of Queen Victoria Louis Philippe was known as the "citizen king" because of his ostentatiously bourgeois manner and dress (he was often seen walking on foot, equipped with an umbrella) He and his regime were mercilessly satirized by Daumier His reign was marked by tremendous industrial expansion and by material progress In the arts and literature romanticism, represented by Delacroix, Berlioz, Victor Hugo, Musset, and many others, reacted against the materialistic spirit of the time French society in the July Monarchy has been described in a large body of the work of Honoré de Balzac See J S C Abbot, *Louis Philippe* (1902), J Lucas-Dubreton, *The Restoration and the July Monarchy* (Vol VIII of National History of France)

Louis the Bavarian see Louis IV, emperor

Louis the Child, 893–911, German king (899–911), son and successor of Emperor Arnulf He was the last of the German line of the Carolingians The archbishop of Mainz was regent for him During his reign the Magyars began their devastating raids into Bavaria, Saxony, and Thuringia Louis was succeeded by Conrad I

Louis the German, c 804–876, king of the East Franks (817–40) His father, Emperor Louis I, partitioning his empire in 817, gave Louis Bavaria and adjacent territories In the conflict between his brother Lothair I, and their father, Louis the German repeatedly changed sides (see Louis I) In 839 his father deprived Louis of certain territories in favor of Lothair Louis again rebelled against his father, who died on the campaign against him Louis now joined with his half brother Charles (Charles the Bald, later Emperor Charles II) against Lothair, who sought to establish his supremacy in their kingdoms They checked Lothair at Fontenoy (841), renewed their alliance (842, see Strasbourg, Oath of), and forced Lothair to accept the fateful Treaty of Verdun (843, see Verdun, Treaty of) In 858–59 Louis turned against Charles and unsuccessfully invaded France, but both brothers soon directed their attention to the lands of Lothair's heirs, Emperor Louis II and King Lothair of Lotharingia Lotharingia was divided between them by the Treaty of Mersen (870) The death (875) of Emperor Louis II brought on war between Louis the German and Charles, who quickly conquered Italy and was crowned emperor Louis the German, in the course of his reign, defended his frontiers against the Slavs and the Danes and suppressed several revolts of his sons, Carloman of Bavaria, Louis the Younger, and Charles the Fat (later Emperor Charles III)

Louis the Great see Louis I, king of Hungary

Louis the Pious see Louis I, emperor

Louis the Stammerer see Louis II, French king

Louis the Younger, d 882, German king, ruler (876–82) over Saxony, Franconia, and Thuringia, son of Louis the German He shared the succession with his brothers Carloman (d 880) and Charles the Fat (later Emperor Charles III) In 876 Louis the Younger at Andernach defeated his uncle Emperor Charles II (Charles the Bald), who had claimed a portion of Louis's share of Lotharingia Louis attempted twice to win France from Louis III and Carloman, but gave up this plan in return for the cession of the remainder of Lotharingia At his death Germany was reunited under Emperor Charles III

Louisville. 1 (lōō'ĭsvĭl) Coal-mining town (pop 2,023, alt c.5,350 ft), N Colo , NNW of Denver, in a grain and sugar-beet area, inc 1892 **2** (lōō'ĭsvĭl) City (pop 1,803), co seat of Jefferson co , E Ga , SW of Augusta and on the Ogeechee river, in a farm area, laid out 1786 as the prospective capital of Georgia The state buildings were completed in 1795, and Louisville was the seat of government until 1804, when Milledgeville became capital In the city are an old slave market (built before 1800) and several late-18th-century houses **3** (lōō'ĭvĭl) City (pop 319,077), co seat of Jefferson co , N Ky , SW of Cincinnati and at the Falls of the Ohio, inc 1828 The falls are used for power, and the river is here bridged to Indiana Louisville is the largest city in Kentucky, a port of entry, and one of the important industrial, financial, market, and shipping centers in the South Laid out in 1773, it was settled after George Rogers Clark built a fort here in 1778 and was in 1780 named by the Virginia legislature Louisville for Louis XVI In 1782 Fort Nelson was built here The city—a portage place around the falls until a canal was built in 1830—grew as a river port; after the arrival of the railroads in the mid-19th cent. its shipping was even more significant During the Civil War the city was a military and supply base for Union forces It is a railroad center, with repair shops, and has distilleries, tobacco factories, meatpacking plants, oil refineries, and hundreds of other industries The Univ of Louisville (see Louisville, University of), Nazareth College (Catholic, for women, 1920), Louisville Presbyterian Theological Seminary, Southern Baptist Theological Seminary, the Univ of Kentucky college of pharmacy, Jefferson School of Law, Ursuline College, the state school for the blind, and the American Printing House for the Blind are here Churchill Downs, noted race track and scene of the famous annual Kentucky Derby (first held in 1875), is in Louisville The city has a fine park system and is the site of the state fairgrounds The Louisville *Courier-Journal* is one of the nation's distinguished newspapers Among the points of interest in the city are the Filson Club (with its historical library and museum), the public library, the Memorial Auditorium, and old Cave Hill Cemetery with the grave of George Rogers Clark Near by are the home and the tomb of Zachary Taylor See I M McMeekin, *Louisville the Gateway City* (1946) **4** (lōō'ĭsvĭl) City (pop 3,451), co seat of Winston co , E central Miss , SW of Columbus, in a timber, dairy, and farm area, inc 1836 A state park is near by **5** (lōō'ĭsvĭl) Village (pop 3,379), NE Ohio, near Canton It manufactures steel and women's clothing

Louisville, University of, at Louisville, Ky ; city supported, coeducational, opened as a noted medical institute 1837, chartered as a university 1846 It has a liberal arts college, schools of dentistry, law, music, medicine, and social work, Speed Scientific School, an adult education division, and Louisville Municipal College for Negroes (opened 1931 on the site of Simmons Univ) Speed Memorial Museum of art is at the university See Federal Writers' Project, *A Centennial History of the University of Louisville* (1939)

Lounsbury, Thomas Raynesford, 1838–1915, American author and educator, b Ovid, N Y , grad Yale, 1859 From 1871 to 1906 he was professor of literature at Yale and during that time became an outstanding authority on Chaucer, Shakspere, and the English language His works include *A History of the English Language* (1879–94) and *Life of James Fenimore Cooper* (1882)

Loup (lōōp), river formed in E central Nebraska by the junction of the North Loup, 212 mi long, and the Middle Loup, 221 mi long (the South Loup flows into the Middle Loup) It flows 68 mi E to the Platte at Columbus and is used for a power project

Loup City, city (pop 1,675), co seat of Sherman co , central Nebr , NW of Grand Island and on the Middle Loup river; settled 1873 Dairy products are made here

Lourdes (lōōrd, lōōrdz, Fr lōōrd), town (permanent pop 12,421), Hautes-Pyrénées dept , SW France, at the foot of the Pyrenees It is the greatest place of pilgrimage established in recent times Near by is the grotto where Our Lady of Lourdes (Feast Feb 11) appeared to St Bernadette in 1858 The miraculous cures worked here since then have attracted up to a million pilgrims a year All reported cures are strictly investigated by an ecclesiastic and a medical commission, and the number of cures actually declared authentic by the Church is relatively small

Lourenço Marques (lōrĕn'sō mar'kĕs, Port lōrān'tsō mär'kĭsh) city (pop 69,861), capital of Mozambique, a port on Delagoa Bay It is named for Lourenço Marques, a Portuguese trader who explored the area in 1544 The city was laid out on a modern plan in the 19th cent It exports the gold and diamonds of the Transvaal, the iron and chrome of Southern Rhodesia, and the cattle products of Swaziland Textiles are manufactured

louse, name used to refer to both a bloodsucking and a chewing or biting insect Both groups are small wingless insects The bloodsucking lice have piercing, sucking mouth parts They are external parasites of man and of many other mammals both wild and domestic The biting or chewing lice attack birds, including poultry, and some mammals They feed on epidermal scales, hairs, feathers, or dried blood of wounds Lice are usually found where there is lack of cleanliness Effective treatment is necessary to prevent serious injury or even death of the animal See bulletins of the U S. Dept. of Agriculture

Louth (louth, loudh), maritime county (317 sq. mi.; pop 66,194), Ireland, on the border of Northern Ireland, in Leinster The county town is Dundalk Smallest of the Irish counties, it borders on the Irish Sea from the mouth of the Boyne to Carlingford Bay. The terrain is an undulating plain except for a hilly district in the north Dairy farming and

fishing are the chief occupations There are some linen manufactures at Dundalk, Drogheda, and Ardee The region, which was incorporated as a shire c.1200, is associated with the exploits of the legendary Irish hero, Cuchulain

Louth (louth), municipal borough (pop 9,682), in the Parts of Lindsey, Lincolnshire, England, on the Lud river and NE of Lincoln Late in the 18th cent a canal was built to the Humber river The town's industries include trade in farm produce and the manufacture of agricultural implements and chemicals At the grammar school, founded in the reign of Edward VI, Tennyson was a pupil There are ruins of a Cistercian abbey founded in 1139, for centuries Louth was an important religious center The parish church dates in part from late in the 12th or early in the 13th cent In 1536 it was the meeting place of followers of the PILGRIMAGE OF GRACE

Louvain (lōōvăn', Fr lōōvĕ'), Flemish *Leuven* (lē'vu), city (pop 36,417), Brabant prov, central Belgium, on the Dyle river and E of Brussels It was the capital of the duchy of Brabant until Brussels replaced it (15th cent) The fame of Louvain is largely due to its university, founded in 1426 by Duke John IV of Brabant It is one of the world's leading centers of Catholic learning In the First World War the city was set on fire (1914) Losses included the university library, with irreplaceable incunabula and manuscripts A new library, a gift of the American people, was designed by the American architect Whitney Warren and was opened in 1928 Through gifts from many nations the library again acquired a rich collection, but in 1940 it was once more destroyed by the invading Germans Among buildings which escaped destruction in the First World War, but which suffered damage (both from Germans and Allies) in the Second World War, is the magnificent Gothic city hall (built 1447-63) Other buildings include the 14th-century cloth hall and several medieval churches Louvain is an episcopal see Its chief industry is brewing

L'Ouverture, Toussaint see TOUSSAINT L'OUVERTURE, FRANÇOIS DOMINIQUE

Louvois, François Michel Le Tellier, marquis de (frăswa' mēshĕl' lə tĕlyā' markē' du lōōvwa'), 1639-91, French statesman, war minister of Louis XIV He was associated in office with his father, Michel Le Tellier, who had an important share in the reforms which are commonly credited to Louvois alone Among these reforms were the creation of an efficient provisioning system, the introduction of the bayonet and the flintlock rifle, the close coordination of the artillery and the corps of engineers with the infantry, the creation of grades to which officers might be promoted without purchasing their commissions, and the establishment of a fixed rate of pay By these measures the French army became the most powerful military force in Europe After the death of COLBERT (1683) Louvois became the most influential of Louis's ministers He supported the revocation of the Edict of Nantes (see NANTES, EDICT OF) and was largely responsible for the brutal enforcement of that measure Louvois also was instrumental in the shaping of Louis's aggressive policies The devastation of the Palatinate (1689) by the French army under his orders earned him the condemnation of all Europe

Louvre (lōō'vur), art museum, Paris It has the most notable collection of old masters in the world The building was a royal fortress and palace built (1204) by Philip II, reconstructed after 1541, and converted by Napoleon I into a national museum Napoleon by his conquests added vastly to the collections, but many famous works were returned after his downfall The museum is particularly rich in works of Rembrandt, Rubens, Titian, and Leonardo, as well as in French masterpieces Its *Mona Lisa* by Leonardo da Vinci was once stolen but later restored Its most famous sculptures are the *Nike* or *Victory of Samothrace* and the *Venus of Milo* All the treasures which could be removed were stored away during the Second World War, the Louvre's long gallery was reopened in 1947 See M K Potter, *The Art of the Louvre* (1904).

Louys, Pierre (pyĕr' lwē'), 1870-1925, French novelist and poet of the Parnassian school, whose real name was Pierre Louis. His early poems, collected under the title *Astarte* (1891), were first published in the *Conque*, a review which he had founded His novel *Aphrodite* (1896) made him famous, it was made into an opera in 1906 The poems *Chansons de Bilitis* [songs of Bilitis] (1894) are remarkable imitations of Sappho

Lovat, Simon Fraser, 12th **Baron** (lŭ'vŭt), c 1667-1747, Scottish chief and Jacobite conspirator He fled to France (1702) when Queen Anne's accession brought his enemy, the duke of Atholl, to power and in 1703 returned to plot against him with the duke of QUEENSBERRY (James Douglas) When the plot failed, Fraser fled again, but after imprisonment abroad by the JACOBITES returned in 1714 Instead of leading his clan in the rebellion of 1715, as expected, he joined the government forces and received back his estates In the rebellion of 1745, having posed as loyal to the crown, he sent his clan to fight for the Pretender. He was captured in hiding, impeached, convicted, and beheaded See biography by W C Mackenzie (1908)

Love, Alfred Henry, 1830-1913, American pacifist, b Philadelphia Love, a Quaker, remained firm in his principles at the outbreak of the Civil War, refusing even to hire a substitute when he was drafted, he set forth his position in *An Appeal in Vindication of Peace Principles* (1862) With others he formed the Universal Peace Union and until his death remained the leader of this body and editor of its publications and periodical He urged the outlawry of war, the negotiation of treaties of arbitration, the establishment of an international court, and arbitration in industrial disputes He was burned in effigy for his vigorous criticism of the Spanish-American War

love bird see PARAKEET

love-in-a-mist, hardy annual garden plant (*Nigella damascena*), having finely cut foliage and blue or white flowers surrounded by a cluster of thready bracts It is also called fennelflower—as are other plants of the genus—and devil-in-the-bush The seeds have been used medicinally Seeds of another species (*Nigella sativa*) are called black cumin and have been used in the Old World for seasoning, they are thought to be the fitch of the Bible (Isa 28 25, 27)

Lovejoy, Elijah Parish, 1802-37, American abolitionist, b Albion, Kennebec co, Maine, grad Waterville (now Colby) College, 1826, and later studied theology at Princeton In 1833 he became editor of the *Observer*, a Presbyterian weekly in St Louis His antislavery views (he advocated gradual emancipation) became extremely unpopular and in 1836 he moved to Alton, Ill There he advocated immediate abolition in his Alton *Observer* Mobs destroyed three of his presses, and on Nov 7, 1837, while guarding another new press, he was killed Lovejoy's martyrdom helped advance in the North the cause of the ABOLITIONISTS

Lovejoy, Owen, 1811-64, American abolitionist, b Albion, Kennebec co, Maine, educated at Bowdoin He witnessed the killing of his brother Elijah P LOVEJOY, under whom he studied for the ministry Vowing to take up Elijah's cause, he became the recognized leader of Illinois abolitionists, he persuaded them to accept the more conservative leadership of Lincoln and become a part of the Republican strength For many years Lovejoy was pastor of the Congregational church at Princeton, Ill, and served in Congress from 1857 until his death

Lovejoy, Ill see BROOKLYN

Lovelace, Richard, 1618–57, English poet The son of a Kentish knight, he was educated at Oxford In 1642 he was briefly imprisoned when he presented a Kentish petition to the Commons He served with Louis XIV in 1646, in 1648 he was imprisoned by the Commonwealth, and his fortune, then lost, was never regained His first volume of poems revealed him as one of the CAVALIER POETS This book, *Lucasta Epodes, Odes, Sonnets, Songs, &c* (1649), included his two most famous poems, "To Althea, from Prison" ("Stone walls do not a prison make") and "To Lucasta, Going to the Wars" ("I could not love thee, dear, so much loved I not honor more") The rest of his poems, together with several elegies, appeared in *Lucasta Posthume Poems* (1660) See edition of his poems by C H Wilkinson (1930), C H Hartmann, *The Cavalier Spirit and Its Influence on the Life and Work of Richard Lovelace* (1925)

Loveland 1 City (pop 6,145), N Colo, N of Denver, founded 1877, inc 1881 It is a food-processing center in a fertile farm area 2 Village (pop 1,904), SW Ohio, on the Little Miami river and NE of Cincinnati, settled c 1825 as Paxton, inc 1876 as Loveland

Lovell (lŭ'vul), town (pop 2,175), N Wyo, on the Shoshone river and near the Mont line, laid out 1900 by Mormons It is a rail and processing center in an irrigated sugar-beet area and has oil refineries

Lovelock, city (pop 1,294), co seat of Pershing co, W Nev, on the Humboldt, settled c 1860, inc 1917 A station on the old trail along the Humboldt, it is now the center of a ranch and mine area and of the Humboldt reclamation project, created in 1935–36 Alfalfa and grains are raised

Lover, Samuel, 1797–1868, Irish novelist, song writer, and painter, especially of miniatures His ballad *Rory O'More* (1836) appeared in 1837 both as a novel and as a play His other works include *Legends and Stories of Ireland* (1831), which he illustrated, *Songs and Ballads* (1839); and *Handy Andy* (1842), a novel His song "The Low-backed Car" is still sung See biographies by W B Barnard (1874) and A J Symington (1880)

Lovington 1 Village (pop 1,215), central Ill, just SE of Decatur, in a farm area, inc 1873 2 Town (pop 1,916), co seat of Lea co, SE N Mex, near the Texas line, founded 1908 It is a rail and trade center for a truck-farm, oil, and cattle area.

Low, David (lō), 1891–, British cartoonist, b Dunedin, New Zealand In 1919 he went to England, where he worked (1919–27) on the London *Star*. In 1927 he joined the staff of the *Evening Standard*, in which appeared his sharp and perceptive caricatures and cartoons on national and international affairs He created "Colonel Blimp," caricature of the British ultraconservative His cartoons have been collected in *A Cartoon History of Our Times* (1939), *Low on the War* (1941), and *Years of Wrath* (1946), which covers the period 1931–45.

Low, Seth (lō), 1850-1916, American political reformer and college president, b Brooklyn, N Y., grad Columbia, 1870 He entered his father's tea and silk importing firm, but became interested in politics and was reform mayor of Brooklyn for two terms (1882–86) His support of Grover Cleveland in 1884 angered regular Republicans and cost Low a third term As president of Columbia (1889-1901) he reorganized the existing schools, added to their number, increased affiliations with other institutions, supervised the removal of the university to Morningside Heights (1897), and gave it a library building in memory of his father In 1901 he was elected mayor of New York city as Fusion candidate against Tammany, then under Richard CROKER He reformed the police and education departments, reorganized the city finances, compelled the electrification of the New York Central RR within the city, and attacked the unsanitary tenements He was not reelected Low was a delegate to the First Hague Conference See biography by B R C Low (1925)

Low, Will Hicok, 1853-1932, American painter, illustrator, and designer, b Albany, N Y After work as an illustrator in New York city, he studied in Paris from 1873 to 1877, chiefly in the atelier of Carolus-Duran Low was an early exponent of the plein-air school, and his paintings are notable for delicate drawing and color and decorative effect Among his works are murals in the courthouses in Newark, N J, and Wilkes-Barre, Pa, and in the Federal Building, Cleveland, stained glass windows in Rock Creek Church, Washington, D C, and St Paul's Methodist Episcopal Church, Newark, N J, and a frieze in the state legislative library and murals in the rotunda, state capitol, Albany, N Y Other paintings include *Aurora* (Metropolitan Mus), *The Orange Vendor* (Art Inst, Chicago), *Victory* (Columbia Univ), and *May Blossoms* (Smith College) Examples of his illustrations are the designs for Keats's *Lamia* and *Odes and Sonnets* His *Chronicle of Friendships* (1908) records his friendship with R L Stevenson and others He became a member of the National Academy of Design in 1890

Low Church see ENGLAND, CHURCH OF

Low Countries, region of NW Europe comprising the NETHERLANDS, BELGIUM, and the grand duchy of LUXEMBOURG The northern parts of the Netherlands and Belgium form a low plain bordering on the North Sea, but S Belgium and Luxembourg are part of the Ardennes plateau The name Low Countries thus is a political and historic rather than a strictly geographic concept One of the wealthiest areas of medieval and modern Europe, it also has been chronically a theater of war For the history of the Low Countries, see articles on the individual countries and on their provinces (e g, FLANDERS, BRABANT, DUCHY OF, HOLLAND) See also NETHERLANDS, AUSTRIAN AND SPANISH

Lowden, Frank Orren (lou'dun), 1861–1943, American political leader, b Chisago co, Minn, grad State Univ of Iowa, 1885, LL B Union College of Law (now Northwestern Univ law school), 1887 He practiced law in Chicago after 1887, and he gained extensive agricultural holdings in Illinois A leading member of the Republican party after 1900, Lowden served in the U S House of Representatives (1906–11) and as governor (1917–21) of Illinois Lowden gained wide notice as governor by his reorganization of the state government and by his effective handling of the Chicago race riots in 1919 In the Republican presidential nomination of 1920, he was deadlocked with Leonard Wood at 311½ votes on the eighth ballot, which enabled Harding to gain the nomination In 1924 he refused—much as he had rejected cabinet posts previously—to run as Vice President on the Republican ticket, but he remained an influential party leader and a spokesman of the farmer

Lowe, Sir Hudson (lō), 1769–1844, British general He fought with credit throughout the French Revolutionary and Napoleonic Wars, mainly in the Mediterranean region, and served (1815–21) as governor of St Helena and custodian of NAPOLEON He was criticized severely for his alleged mistreatment of the French exiles on St Helena His latter years were largely spent in controversy on this score, and he wrote a self-vindication See William Forsyth, *History of the Captivity of Napoleon* (1853), R C Seaton, *Napoleon's Captivity in Relation to Sir Hudson Lowe* (1903)

Lowe, Robert, Viscount Sherbrooke. see SHERBROOKE, ROBERT LOWE, VISCOUNT

Lowe, Thaddeus Sobieski Coulincourt, 1832–1913, American aeronaut and inventor, b Coos co, N H He flew (1861) a distance of 900 mi in a balloon constructed by him Later the same year President Lincoln appointed him chief of the corps of

aeronautics of the U S army During the course of the Civil War he built up a fleet of observation balloons that served in many engagements Lowe invented (1865) a machine for making ice, equipped (1868) a steamer with refrigeration for haulage of perishable food, and built regenerative metallic furnaces for gas and petroleum and a coke-oven system for simultaneously producing gas and metallic coke Among his other accomplishments were the building (1891–94) of the railway up Mt Lowe and the establishment of the Lowe Observatory in the Sierra Madre

Lowell, Abbott Lawrence (lō'ul), 1856–1943, American educator, president of Harvard Univ (1909–33), b Boston, grad Harvard (B A , 1877, LL B , 1880), brother of Percival Lowell and Amy Lowell He practiced law in Boston for 17 years and joined the Harvard faculty in 1897 as a lecturer in political science, becoming a professor in 1900 In 1909 he succeeded Charles W Eliot as president As Eliot had developed the graduate schools of Harvard, Lowell turned his attention to the undergraduate college To combat specialization, he introduced (1914) a modification of the elective system, established (1917) the requirement of a general examination in their major subject for candidates for the bachelor's degree, instituted (1917) the tutorial system for upper classmen, and, finally (1931), put into operation, in seven new residence halls along the Charles river, his "house plan," whereby, through residential units like those in English universities, he hoped to secure the advantages of intellectual and social cohesion Lowell is remembered for his spirited defense of academic freedom and for his advocacy of American participation in the League of Nations His presidency saw a period of tremendous physical growth at Harvard and the reorganization of the finances of the university His writings include *Essays on Government* (1889), *Public Opinion and Popular Government* (1913), *Conflicts of Principle* (1932), *Biography of Percival Lowell* (1935), and *What a University President Has Learned* (1938) See biography by H A Yeomans (1948).

Lowell, Amy, 1874–1925, American poet and critic, b Brookline, Mass , privately educated, sister of Percival Lowell and Abbott Lawrence Lowell Although her sensuous perception was sharpened by many years of travel, this gift was not apparent in her first book, a conventional collection of verse entitled *A Dome of Many-coloured Glass* (1912) A year later her curiosity and energy led to a meeting with the imagists, and the result was her first imagist collection, *Sword Blades and Poppy Seed* (1914), experiments in free verse (for which her term was "unrhymed cadence"), *Can Grande's Castle* (1918) is in "polyphonic prose " Her poetic importance increased with *Men, Women, and Ghosts* (1916) and *Fir-Flower Tablets* (with Florence Ayscough, 1921) *What's o'Clock* (1925), *East Wind* (1926), and *Ballads for Sale* (1927) appeared posthumously Among the best known of her poems are "Patterns" and Lilacs " She wrote several volumes of criticism, including *Six French Poets* (1915) Her finest work is perhaps her two-volume biography of Keats (1925), both perceptive and scholarly, which takes high rank among the great English biographies See *Florence Ayscough and Amy Lowell Correspondence of a Friendship* (ed by H F MacNair, 1945), biography with selected correspondence by S F Damon (1935)

Lowell, Francis Cabot, 1775-1817, pioneer American cotton manufacturer, b Newburyport, Mass , grad Harvard, 1793, son of John Lowell (1743–1802) A merchant in Boston, he traveled (1810) to England, where he studied closely the new machinery used in the textile industry of Lancashire Upon his return, and with the aid of Paul Moody, he designed and constructed from memory and imperfect drawings the first power loom in America, which had important improvements over its English prototypes With his brother-in-law Patrick T Jackson, and with Nathan Appleton among others, he formed the Boston Manufacturing Company and at Waltham, Mass , built the first factory in America to perform all the operations involved in converting raw cotton into cloth He succeeded in having a duty on cotton incorporated into the tariff law of 1816 Lowell, Mass , founded after his death, was named for him John Lowell (1799–1836) was his son See C F Ware, *The Early New England Cotton Manufacture* (1931)

Lowell, James Russell, 1819–91, American poet, essayist, editor, and diplomat, b Cambridge, Mass He was poet of his class at Harvard, 1838 He abandoned the law in 1841, after taking a degree in it, and in that year his first volume of poems, *A Year's Life*, was published With his own short-lived journal, the *Pioneer*, he began a long career as editor of or contributor to various periodicals In 1844 he married Maria White (1821–53), whose poems and letters, edited in 1936 by H J Vernon with a biography, show her strong abolitionist sentiments Lowell's *Poems* (1844) reflect the social sympathy she inspired in him After her death, he married (1857) Frances Dunlap Publication (1846) in the Boston *Courier* of the first of the *Biglow Papers*, criticizing in Yankee vernacular the war with Mexico, established his reputation as a social satirist and a wit, the papers were published as a book in 1848 A second series, on issues of the Civil War, appeared (1862–66) and were published as a book in 1867 *Conversations on Some of the Old Poets* (1845) and *A Fable for Critics*, in verse (1848), showed him to be an able critic In 1856, after a year's study abroad, he succeeded Longfellow as Smith professor of French and Spanish at Harvard A distinguished teacher, he was active until 1876 and held the title until 1886, when he became an emeritus professor In the meantime he was also the first editor (1857–61) of the *Atlantic Monthly* and later (1864–72) was an editor of the *North American Review* His most important essays and studies of English authors in these magazines were collected in *Fireside Travels* (1864), *Among My Books* (1870, Ser 2, 1876), and *My Study Windows* (1871) Critics have preferred among his poems *The Vision of Sir Launfal* (1848), *Commemoration Ode*, delivered at Harvard in 1865, and *Three Memorial Poems* (1877), tributes to Washington, to Lincoln, and to America He was appointed minister to Madrid in 1877, and three years later minister to London, where he remained until 1885 While abroad Lowell did much to increase the respect of foreigners not only for American letters but for American institutions, and his speeches in England, published as *Democracy and Other Addresses* (1887), contain some of his most enduring work His letters, edited by Charles Eliot Norton (1893) together with *New Letters*, edited by M A De Wolfe Howe (1932), remain valuable for their keen and lively comments on public affairs and the literary activities of his generation See E E Hale, *James Russell Lowell and His Friends* (1899), W D Howells, *Literary Friends and Acquaintance* (1900), J J Reilly, *James Russell Lowell as a Critic* (1915), Norman Foerster, *American Criticism* (1928), biographies by H E Scudder (1901), Ferris Greenslet (1905), and R C Beatty (1942)

Lowell, John, 1743–1802, American jurist, b Newburyport, Mass , grad Harvard, 1760 He became (1762) a lawyer and later served in the provincial assembly (1776, 1778), in the state constitutional convention (1779–80), and in the Continental Congress (1782–83) Lowell was a member (1784) of the commission that settled the New York–Massachusetts boundary dispute, and after 1789 he held several major judicial posts He was a founder of the American Academy of Arts and Sciences He was the father of Francis Cabot Lowell and John Lowell (1769–1840)

Lowell, John, 1769–1840, American political writer, b Newburyport, Mass , grad Harvard, 1786, son of John Lowell (1743–1802) He practiced law, but devoted most of his time supporting his Federalist views in newspapers and pamphlets *Mr Madison's War* (1812) was probably his most effective bit of writing

Lowell, John, 1799–1836, American philanthropist, b Boston, Mass , son of Francis Cabot Lowell Sickness forced him to leave Harvard (1816), and he traveled to India Lowell, a patron of learning, endowed the Lowell Institute in Boston as a center of adult education

Lowell, Josephine Shaw, 1843–1905, American social worker, one of the 19th-century pioneers of modern charity organization, b West Roxbury, Mass Her brother, Robert Gould Shaw, and her husband were killed in the Civil War She introduced a number of notable reforms in hospitals, asylums, and prisons and helped found the influential Charity Organization Society of New York city Her writings include *Public Relief and Private Charity* (1884) and *Industrial Arbitration and Conciliation* (1893) See W R Stewart, *The Philanthropic Work of Josephine Shaw Lowell* (1911)

Lowell, Percival, 1855–1916, American astronomer, b Boston, grad Harvard, 1876, brother of Abbott Lawrence Lowell and Amy Lowell He visited Korea and Japan and acted as counselor and foreign secretary to the Korean Special Mission to the United States and wrote about the Orient in *Chôson* (1885), *The Soul of the Far East* (1888), and *Occult Japan* (1895) Becoming interested in astronomy, he established (1894) the Lowell Observatory at Flagstaff, Ariz , and devoted himself to making personal observations It was his belief that Mars was inhabited and that there was a planet beyond Neptune (later confirmed by the discovery of Pluto) From 1902 he was nonresident professor of astronomy at the Massachusetts Institute of Technology Among his many writings on astronomy are *Mars and Its Canals* (1906), *The Evolution of Worlds* (1909), and *The Genesis of Planets* (1916). See biography by A L Lowell (1935)

Lowell. 1 Town (pop 1,448), Lake co , NW Ind , SE of Chicago, settled 1849 2 City (pop 101,389), a co seat of Middlesex co , NE Mass , on the Merrimack at the confluence of the Concord and NNW of Boston, settled 1653, set off from Chelmsford 1826, inc as a city 1836 It developed after textile mills were built here in 1822 and became one of the great textile centers of the country Electrical and other products are also made. Lowell Textile Institute (coeducational, 1895) and a state teachers college are here There are several fine parks Whistler's birthplace is preserved Dickens visited Lowell in 1842 and described it in *American Notes* See also J P Coolidge, *Mill and Mansion* (1942)

3 Village (pop 1,944), S Mich , E of Grand Rapids at the confluence of the Grand with the Flat River, in a farm area, inc 1859 A milling plant and hatcheries are here 4 Textile-mill town (pop 1,826), W central N C , E of Gastonia

Lowellville, village (pop 2,359), NE Ohio, on the Mahoning at the Pa line and SE of Youngstown, settled c 1800, inc 1836 It has steel mills and limestone quarries

Lower Austria, Ger *Niederösterreich*, autonomous province or *Bundesland* (7,097 sq mi , pop 1,268,-234), NE Austria Vienna, though outside its boundaries, is the seat of the local government Lower Austria borders in the north and northeast on Czechoslovakia More than half of Austrian industry centers in the Vienna and Wiener Neustadt basins, there are oil fields near Zistersdorf Most of the area is hilly and agricultural The Semmering region, in the south, is a tourist and health center The history of Lower Austria coincides with that of Austria

Lower Avon see Avon 1 river, England

Lower California peninsula, c 760 mi long and 30–150 mi wide, NW Mexico, separating the Gulf of California from the Pacific The land area (55,634 sq mi , 1946 estimated pop 167,367) is almost equally divided into northern and southern territories Mexicali is the northern capital, La Paz the southern Except for two large coastal plains on the Pacific side, the peninsula is a rugged mountain range averaging 5,000 ft in altitude, with one peak, San Pedro Martir more than 10,000 ft high From the temperate northern zone to the tropical southern, the land is generally semiarid and undeveloped, isolated mountain valleys, peopled almost entirely by Indians, are the only natural cultivable areas Rainfall is light, but there is enough stream water to establish small reclamation projects The mineral yield from the mountains is considerable, especially copper, silver, and gold There is some pearl fishing In the north are the resorts Agua Caliente and Tijuana Mexicali has an irrigated area The coasts were first explored by Francisco de Ulloa in 1539, but attempts at colonization of the forbidding interior, even those made by the intrepid mission fathers, were largely unsuccessful United States forces occupied (1847–48) Lower California in the Mexican War, and William Walker attempted (1853–54) to wrest it from Mexico in his first disastrous filibustering expedition See Max Miller, *The Land Where Time Stands Still* (1943)

Lower Canada see Quebec, province

Lower Saxony, Ger *Niedersachsen* (nē'dûrsäk"sun), German state (18,231 sq mi , pop 6,432,793), formed in Jan , 1946, in the British zone of occupation in NW Germany It includes the former Prussian province of Hanover and the former states of Brunswick, Oldenburg, and Schaumburg-Lippe Hanover is the capital The area has had no historic unity since 1180, when Emperor Frederick I broke up the duchy of Henry the Lion of Saxony, of which it was a part The term "Lower Saxony" continued, however, as a geographic expression It also designated (16th cent until 1806) one of the imperial circles of the Holy Roman Empire, the circle included (besides present Lower Saxony) Mecklenburg, Holstein, and Bremen The state of Lower Saxony joined (1949) the West German federal republic

Lowestoft (lō'stŏft, -stuf), municipal borough (1931 pop 41,769, 1947 estimated pop 41,880), Suffolk East, England, near Oulton Broad S of Yarmouth It is a fishing port, yachting center, and resort The Denes are an open stretch, with an esplanade and golf course, above which is the North, or Old, Town, with a lighthouse marking the most easterly point of England New Town is on the other side of Lake Lothing and the harbor Cromwell took the town in 1643, and in 1665 (June 3) it was the scene of the victory of the English under the duke of York (later James II) over the Dutch St Margaret's Church has a very old tower, but dates mostly from the 14th cent Lowestoft ware, made from 1757 to 1802, was a fine bone china, often decorated with Chinese designs

Lowie, Robert Harry, or **Robert Heinrich Lowie** (lō'ē), 1883–, American anthropologist, b Vienna, grad College of the City of New York (B A , 1901), PhD Columbia, 1908 He was (1908–21) on the staff of the American Museum of Natural History In 1917 he became associate professor, and in 1925 professor, at the Univ of California He served (1912–33) as associate editor and editor of the *American Anthropologist* He is an authority on the North American Indian, especially of the northern Plains tribes, and is an outstanding contributor to anthropological theory His works include *Primitive Society* (1920), *Primitive Religion* (1924), and *The History of Ethnological Theory* (1937)

Lowndes, Rawlins (lounds), 1721–1800, president of South Carolina (1778–79), b St Kitts, British West Indies In 1730 his family moved to Charles-

ton, S C , where Lowndes became a noted lawyer In the colonial assembly (he was speaker several times) and as associate judge of the court of common pleas, he took a leading part in opposing British measures before the American Revolution, but opposed armed rebellion and independence Nevertheless he helped draft the state constitution and was chosen President in 1778, he declined reelection After the war he was the leading opponent in South Carolina of ratification of the Federal Constitution

Lowndes, William, 1782–1822, U S. Representative from South Carolina (1811–22), b Colleton co , S C , son of Rawlins Lowndes Admitted to the bar in 1804, he served in the state legislature (1806–10) before entering Congress Fair-minded and dispassionate, he was formidable in debate and even won the admiration of his opponents He was one of the "war hawks," the group led by Henry Clay which urged the War of 1812 Lowndes favored the tariff of 1816, advocated internal improvements, urged the establishment of the Second United States Bank, and took a leading part in working out the Missouri Compromise By 1820 he had turned against the tariff and took the lead in opposing it in Congress He died at sea early in 1822 while en route to England See biography by Mrs St Julien Ravenel (1901)

Lowth, Robert (louth), 1710–87,'English prelate and scholar He was noted for his lectures on Hebrew poetry, delivered while he was professor of poetry at Oxford, 1741–50 (published in Latin as *De sacra poesi Hebraeorum praelectiones academicae*, 1753, Eng tr by G. Gregory, 1787) Lowth was bishop of London from 1777, declining the primacy when it was offered to him in 1783 His published works include *Life of William of Wykeham* (1758), *Short Introduction to English Grammar* (1762), and *Sermons and Other Remains* (1834), with a memoir

Lowville (lou'vĭl), village (pop 3,578), co seat of Lewis co , N N Y , SE of Watertown, in a farm area, inc 1871 Cheese products are made here

Loyal, town (pop. 1,600), E Ky , in the Cumberlands near Harlan, in a coal area, inc 1928

Loyalists, in the American Revolution, colonials who adhered to the British cause Since the conservatives in England and the colonies were called Tories in the 18th cent , the Loyalists are also called Tories Though there were Loyalists in all walks of life—merchants, professional men, and mechanics —they were more numerous among the propertied men and large landholders, the clergy (especially the Anglicans), and, of course, the officeholders under the crown In 1774-75, when most colonials hoped for reconciliation with the British government, the line between Loyalist and patriot was not very sharp, but later, especially after the Declaration of Independence (1776), it grew sharper, though all shades of opinion from rabid anti-British feeling to fanatic loyalty to the crown could be seen in the American population Figures on public opinion in the Revolution are obviously mere guesswork, but John Adams estimated that one third of the colonials were Loyalists, and it may be fairly supposed that another third were neutral, apathetic, or opportunistic, taking whichever side seemed better at the moment or trying to avoid taking either side The Loyalists were strongest in the far southern colonies, Georgia and the Carolinas, and in the Middle Atlantic colonies, especially New York and Pennsylvania In those places particularly the fighting became bitter civil war with raids and reprisals The patriots deeply hated the leaders of Loyalist armed bands, such as Thomas Browne, Edmund Fanning, and John and Walter Butler. Even before warfare began many Loyalists were seeking refuge in British-held lands Feeling against them, plus natural cupidity, led the patriots to confiscate many Loyalist estates The matter of restoring these properties to their owners was discussed in negotiations for the Treaty of Paris (1783), and the treaty provided that Congress should urge the states to make restitution, but actually little was done, and there were stray lawsuits concerning particular properties for many years A great many of the dispossessed Loyalists settled permanently in the Maritime Provs of Canada, in the Bahamas, in other parts of the West Indies, and in England See Egerton Ryerson, *Loyalists of America, 1820–1816* (1880), T B Myers, *The Tories or Loyalists in America* (1882), C. H Van Tyne, *The Loyalists in the American Revolution* (1929); studies of Loyalism in individual provinces by A C Flick (1901, New York), I S Harrell (1926, Virginia), E. A. Jones (1927, New Jersey, 1930, Massachusetts), and R O. DeMond (1940, North Carolina)

Loyalty Islands, coral group (800 sq. mi , pop 11,854), S Pacific, 60 mi E of New Caledonia, of which they are a dependency They comprise three large islands (Lifu, Maré, and Uvéa) and many islets. The chief export is copra

Loyang or **Lo-yang** (lō'yäng'), city and county (pop 480,254), W Honan prov , China The city is the hub of several highways and is located on the Lung-Hai RR, the principal east-west line of China It was the capital of the Eastern Chou kingdom (770–256 B C) and of the T'ang dynasty (A D. 618–906). In 1932 the national government was temporarily moved here from Nanking, then under threat of Japanese attack. Loyang was formerly called Honanfu

Loyola College: see Baltimore, Md

Loyola University (loiō'lu), mainly at Chicago, Catholic (Jesuit), partly coeducational, chartered and opened 1870 as St Ignatius College, renamed 1909 It includes colleges of arts and sciences (one at West Baden Springs, Ind), schools of commerce, dentistry (Chicago College of Dental Surgery), law, medicine, nursing, and social work, a division of public health nursing, and an institute of social administration Of interest is a large collection of writings on the Jesuits

Loyola University, at New Orleans, Catholic (Jesuit), partly coeducational, opened 1911, chartered 1912, successor to Loyola College (opened 1904) and the College of the Immaculate Conception (opened 1849) It has colleges of arts and sciences, business administration, music, and pharmacy, schools of dentistry and law, and an institute of industrial relations It owns a seismograph

Loyola University of Los Angeles, Catholic, mainly for men, opened 1865, chartered 1869 as St Vincent's College, taken over 1911 by Jesuits, renamed 1918 It has a law school and colleges of liberal arts, business administration, and science

Loyson, Charles (sharl' lwasō'), 1827–1912, French preacher, called Père Hyacinthe He was successively a Sulpician, a Dominican, and a Carmelite In 1869, when he was perhaps the best-known preacher in France, he opposed the calling of the Vatican Council He opposed enunciation of the doctrine of the infallibility of the pope, and in 1871 he left the Church and married soon after In 1878 he founded a "Gallican" church at Paris, this joined later (1893) with the Jansenists of Utrecht

Lozère (lōzĕr'), department (2,000 sq mi , pop 90,523), S France, named for a branch of the Cévennes mts Mende is the capital

Lozier, Clemence Sophia (lō'zhur), 1813–88, American homeopathic physician, b Plainfield, N J , M D Syracuse Univ , 1853 She assisted in founding (1863) the New York Medical College and Hospital for Women, of which she became clinical professor and later dean The woman-suffrage movement received her active support

Lu, chemical symbol of the element lutecium

Lualaba. see Congo

Luanda (lōōän'du, -an'du), city (pop 66,932), capital of Angola (since 1627) It was founded in 1575 and until the 19th cent it was the center of the slave trade to Brazil It is a seaport and is on a railroad to the rich interior The European population is 9,487 It was formerly São Paulo de Loanda

Luang Prabang (lwang' prŭbang'), city (pop c 20,000),N Laos, Indo-China, on a spit of land at the confluence of the Mekong and Khan rivers It is the economic center of N Laos and was for several centuries the center of a Thai-Lao kingdom The site has been occupied by man since Neolithic times

Luapula. see Congo

Lubbock, Sir John (lŭ'buk), 1834–1913, English banker, statesman, and naturalist As a member of Parliament from 1870, he introduced many reform bills, especially in banking—to him England owes her bank holidays His scientific contributions were in entomology and anthropology and include his *Prehistoric Times* (1865), long used as a textbook in several languages, popular works include *Ants, Bees, and Wasps* (1882) and *The Pleasures of Life* (1887) He was created Baron Avebury in 1900 See biography by H G Hutchinson (1914) His father was **Sir John William Lubbock,** 1803–65, an astronomer and mathematician He made a special study of tides and of the lunar theory and developed a method for calculating the orbits of comets and planets In mathematics he applied the theory of probability to life-insurance problems He wrote *An Elementary Treatise on the Computation of Eclipses and Occultations* (1835), *On the Theory of the Moon and on the Perturbations of the Planets* (1833–61), and *An Elementary Treatise on the Tides* (1839)

Lubbock, city (1940 pop 31,853, 1947 estimated pop 45,000), co seat of Lubbock co , NW Texas, S of Amarillo on the Llano Estacado, founded 1891, inc 1909 On the broken upper reaches of the Double Mountain Fork of the Brazos, Lubbock was a cow town until a land rush in the 1920s converted it into the metropolis of the South Plains Cooperative effort has forwarded its rapid growth and has made it a clean, trim city The cotton, grain, dairy products, poultry, eggs, cattle, and oil from the surrounding treeless plains are handled by Lubbock Texas Technological College (coeducational, 1923) has been here since 1925, and there is an agricultural experiment station

Lubec (lōō'bĕk), town (pop 3,108), SE Maine, S of Eastport; settled c.1780, inc. 1811. It is a resort and fishing place Sardines are canned. At West Quoddy Head, easternmost point of the United States, SE of Lubec village, is a lighthouse Treat's Island is the terminus of a dam for the Passamaquoddy Bay project

Lübeck (lēb'ĕk, Ger. lü'bĕk), city (1939 pop. 154,811; 1946 pop. 223,059), Schleswig-Holstein, N Germany, on the Baltic Sea at the mouth of the Trave river. It is a major Baltic port and has a metallurgical industry and machinery and textile manufactures Dating from the 11th cent., Lübeck received (1158) its third charter from Henry the Lion of Saxony, this charter, which granted far-going communal rights, was copied by more than 100 other German cities In 1226 Frederick II made Lübeck a free imperial city. Ruled by a merchant aristocracy, it soon rose to great commercial prosperity, acquired hegemony over the Baltic trade, and headed the Hanseatic League. The rise of the maritime powers of Denmark and Sweden and the commercial revolution wrought by the discovery of America caused the decline of the league and, with it, of Lübeck After 1630 no more Hanseatic diets (until then held at Lübeck) took place Lübeck, however, escaped the ravages of the Thirty Years War, though it had lost its power, its patrician merchant families continued to prosper In the Napoleonic Wars the Prussian army under Blücher capitulated (1806) to the French at near-by Ratekau, and Lübeck was occupied by the French It joined the German Confederation as a free Hanseatic city, governed by a senate, it retained that status until 1937, when the National Socialist regime in Germany incorporated Lübeck into Schleswig-Holstein The construction (1900) of the Elbe-Trave Canal helped in the revival of the Lübeck trade The city of Lubeck must not be confused with the former bishopric of Lübeck, whose rulers resided from c.1300 at near-by Eutin The bishops were territorial princes of the Holy Roman Empire and accepted the Reformation in the 16th cent The prince-bishopric passed into a branch of the Danish house of Holstein-Gottorp, which in 1773 also acquired the duchy of Oldenburg Secularized in 1803, the former bishopric of Lübeck (which did not include the city of Lübeck in its territory) became a district of Oldenburg, but was transferred to Schleswig-Holstein in 1937 Despite its partial destruction (1942) by bombing in the Second World War, the inner city of Lübeck remains one of the finest relics of medieval architecture in N Europe Among the chief buildings that escaped major damage are the magnificent city hall (13th–16th cent), the churches of St Jacob (13th–14th cent) and of St Catherine (14th cent), the Hospital and Church of the Holy Ghost (13th cent), and the Holstentor (15th cent), an imposing city gate flanked by two round towers, now used as a museum Heavily damaged were the cathedral and the large Church of St Mary (both 13th–14th cent) and many of the old patrician residences In 1950 reconstruction was in progress Lubeck has an old musical tradition since the days when Buxtehude was organist here The life and decline of a Lübeck patrician family is the subject of the novel *Buddenbrooks*, by Thomas Mann, who was born here

Lubim (lū'bĭm), in the Bible, the Libyans 2 Chron 3, 16 8, Nahum 3 9 For other possible occurrences, see Chub, Lehabim, Lud

Lubin, David (lōō'bĭn), 1849–1919, American philanthropist, b Poland After accumulating some wealth as a merchant in California, he devoted himself to helping the farming population, whose problems he had come to know His efforts brought into existence a cooperative marketing group, the California Fruit Growers' Association He envisaged a solution on a world scale and tried to interest the American government in an international institute of agriculture but succeeded in getting only the Italian government to help found it The organization failed to accomplish what Lubin had hoped See biography by O R Agresti (1922)

Lubitsch, Ernst (ĕrnst' lōō'bĭch), 1892–1947, German moving-picture director He had been an actor on the German stage and an outstanding director of such German films as *Puenon, Deception*, and *One Arabian Night* before he came to the United States in 1922 as director for Mary Pickford He was best known for suave and witty comedies and musicals, such as *Forbidden Paradise, The Love Parade, The Smiling Lieutenant, Design for Living*, and *Ninotchka*.

Lübke, Wilhelm (vĭl'hĕlm lüp'kŭ), 1826–93, German writer on art He was professor of architecture at Berlin Building Academy (1857–61) and of the history of art and archaeology at Zurich (1861–66), Stuttgart (1866–85), and Karlsruhe (1885–93). Chief among his writings are *Geschichte der Architektur* [history of architecture] (1855), *Grundriss der Kunstgeschichte* (1860, Eng tr by Alexander Cook, *Outlines of the History of Art*, 1880; reedited by Russell Sturgis, 1904), and *Geschichte der Plastik* (1863, Eng. tr , *History of Sculpture*, 1878).

Lublin (lōō'blēn), city (pop. 99,400), E Poland One of the oldest Polish towns, it was the meeting place of several diets (16th–18th cent), one of which united (1569) Poland with Lithuania. Lublin passed to Austria in the third partition of Poland (1795) and to the Russian Empire in 1815. It was (1918) the seat of a temporary Polish Socialist government; in 1944 it was one of the first Polish cities to be liberated by the Soviet army and was the seat of a provisional Polish government rivaling

the government in exile in London At the YALTA CONFERENCE (Feb , 1945) it was agreed that the Lublin government should be broadened by including members of the London cabinet, after its reorganization the Lublin government was recognized as the sole Polish authority at the POTSDAM CONFERENCE (Aug , 1945) The Catholic university at Lublin (founded 1918) was reopened in 1944 and renamed Maria Curie-Sklodowska Univ Chiefly a trading center, Lublin also has metal, glass, food, and electrical industries Lublin province (c 1,000 sq mi , pop 1,889,650) is a generally flat and arable region with some mineral deposits In the Second World War the Germans established here a reservation for the Jews of Central Europe, containing the extermination camps of Sobibor, Belzec, and MAJDANEK, where millions were killed Important cities besides Lublin are Chelm, Siedlce, and Zamosc.

lubrication, the introduction of a substance (called a lubricant) between the contact surfaces of moving parts to reduce friction Dry or solid friction between unlubricated moving parts results in injury by abrasion and in the generation of heat which may cause one part to "seize" the other because of unequal expansion or, in metals, to develop "hot points" when temperatures above the melting point of the metals may cause welding The aim of lubrication is to replace dry friction by thin-film, or preferably by fluid-film, friction In thin-film friction the boundary layers of the lubricant tend to be adsorbed by the contact surfaces, thereby increasing their slipperiness and keeping them far enough apart to prevent intermolecular attraction of the surfaces Since heavy loads tend to squeeze out lubricants and speed is required to permit formation and maintenance of thick films, thin-film lubrication usually occurs with heavy loads, slow speeds, or intermittent action In fluid, or thick-film, friction a pressure film is formed between moving surfaces and carries the load, keeping the surfaces completely apart The most desirable lubrication is a fluid film sufficiently thick and viscous to bear the load, excess thickness or viscosity, however, increases internal friction in the fluid and results in loss of power Any substance inserted between moving parts to decrease friction is a lubricant Although air, water, milk, or other substances are sometimes employed, a lubricant is usually a fat or oil, a grease, or a slippery solid From ancient times until the late 19th cent , lubricants were obtained from vegetable or animal fats and oils Today over 90 percent are derived from petroleum or shale oil Lubricants may be classed as liquid, semisolid, and solid Liquid lubricants, generally mineral oils or mixtures of these with fixed oils, are the most extensively used Mineral oils may be distilled and condensed without decomposing They differ widely in specific gravity, viscosity, vapor pressure, boiling point, and other properties and therefore offer a wide range of selection for the increasingly varied needs of modern industry Although many nondrying vegetable and animal oils have a greater degree of oiliness than most mineral oils and are therefore useful for thin-film lubrication, they are not widely employed because they tend to form acids and sludges Semisolid lubricants are usually GREASE or solidified fats Since they resist being squeezed out, they are useful under heavy load conditions and in inaccessible parts where the supply of lubricant cannot readily be renewed As they ooze from the point of lubrication, they tend to form a crust that prevents the entry of dirt or grit between contact surfaces Solid lubricants tend to be held by the surface of lubricated parts, filling in crevices and increasing slipperiness They are especially useful where heavy loads would squeeze out other lubricants Most extensively used are graphite, talc, soapstone, mica, flowers of sulphur, and white lead Some, especially amorphous graphite, are finely divided and used in colloidal form in liquid carriers Efficient operation of machinery depends not only on the lubricant selected but also on the method of application Lubricants were formerly applied by hand, but the lubrication of modern machinery requires exact methods that can be controlled Mechanical contrivances to supply lubricants are called lubricators. A simple form consists of a drop-feed container mounted over a bearing or other part and having a hole or an adjustable valve of a size suitable to the viscosity of the lubricant and the rate of flow desired Wick-feed oilers placed under parts to be oiled operate by capillarity Horizontal bearings are often oiled by ring or collar devices which comprise a housing, of which the bottom forms an oil reservoir, and a ring that rotates with the bearing journal and carries oil from the reservoir to the top of the bearing where it is distributed along the bearing through grooves or channels Bath oiling is useful where the construction of oil-tight reservoirs is practicable, the large amount of oil helps to carry away heat from contact surfaces. Splash-oiling devices, also used where gears, bearings, or other parts are contained in housings, have moving parts that dip into the oil and splash it on the bearings or into distribution channels. Centralized oiling systems usually consist of a reservoir, pump, and tubes through which oil is circulated; heaters or coolers may be introduced to adapt the viscosity of the oil for various parts of the system Many oiling devices are automatically controlled so as to start and stop the flow of oil with the machinery Grease may be applied by packing enclosed parts with the lubricant, by placing grease in an adjacent well whence it is pressed onto moving parts, through grease cups mounted over bearings and fitted with a screw or spring device for forcing out the grease, and by pressure guns or pumps, often mounted on the machinery For most machinery different methods of lubrication must be employed for the various parts For example, in the modern passenger automobile the chassis is periodically lubricated at several points with grease, certain wheel bearings are grease-packed, the transmission and rear axle housings must be kept filled with heavy oil to the desired level, and the engine is generally lubricated by forced-feed circulation in which oil is pumped from the crankcase to the bearings and to the cylinders where it lubricates the piston rings and also forms a seal to prevent leakage of combustion gases See T C Thomsen, *The Practice of Lubrication* (3d ed , 1937), J I Clower, *Lubricants and Lubrication* (1939), A E Norton, *Lubrication* (ed by J R Muenger, 1942)

Luca Giordano see GIORDANO, LUCA

Lucan (Marcus Annaeus Lucanus) (lo͞o'kŭn), A D 39–A D 65, Latin poet, b Corduba (Córdoba), Spain, nephew of the philosopher Seneca At first in Nero's favor, he was later forced to kill himself when his part in a plot against the emperor was discovered Ten books of his epic commonly called *Pharsalia* (on the civil war between Caesar and Pompey) survive Though the poem, written in a severe style, is often digressive and extravagant, it has a kind of vigorous beauty and grandeur which gave Lucan a high place in the esteem of later writers

Lucania (lo͞okā'nēu), ancient region of S Italy bounded on the east by the Gulf of Tarentum (Taranto) and by Apulia, on the north by Samnium and Campania, on the west by the Tyrrhenian Sea, and on the south by Bruttium Italic tribes and Greek colonists along the coast of MAGNA GRAECIA lived here before the Roman conquest (3d cent B C), their chief cities were Heraclea and Metapontum on the Gulf of Tarentum and Paestum and Buxentum on the Tyrrhenian coast The non-Greek Lucanians were Samnites, speaking Oscan The western portion of ancient Lucania is now in Campania, the larger eastern part is in BASILICATA

Lucaris, Cyril (lo͞ka'rĭs),1572–1637, Greek churchman, b Crete (then Venetian) He studied at Venice and Padua and was elected patriarch of Alexandria (1602–20) and of Constantinople (1620–37) In Western Europe he had become imbued with Calvinistic ideas, and he attempted to synthetize them with Orthodoxy He published a *Confession of Faith* (1629) to this end and sent many young priests to study in the West He corresponded with leading Anglicans and Lutherans and sent the Codex Alexandrinus of the Bible to Charles I His Protestant tendencies had no lasting effect in the East, and after his death a synod condemned his teachings In Constantinople he was deposed several times The sultan, Murad IV, had him murdered on charges that he was involved in an anti-Turkish plot He is also called Cyril Lucar

Lucas (lo͞o'kus), variant of LUKE

Lucas, Edward Verrall, 1868–1938, English essayist and critic His many volumes of gently satirical essays and travel books include *A Wanderer in London* (1906), *Old Lamps for New* (1911), *Traveller's Luck* (1930), *Reading, Writing, and Remembering* (1932), *Saunterer's Rewards* (1933), *Only the Other Day* (1937), and *All of a Piece* (1937) *Over Bremerton's* (1908) is his best-known novel An authority on the Lambs, he wrote a biography of Lamb (1905), and collected the letters of Charles and Mary Lamb (1903–5)

Lucas van Leyden (lo͞o'kăs vän lī'dun), 1494–1533, Dutch historical and genre painter and engraver, whose real name was Lucas Jacobsz He studied with his father, Hugh Jacobsz, a Leiden engraver, and with Cornelis Engelbrechtsz and soon established himself as an engraver of extraordinary ability, as well as a painter of originality and power When Dürer visited Antwerp, Lucas met his great rival Over 170 copperplate engravings, some 30 designs for woodcuts, and about 20 paintings are attributed to him, and with him Dutch genre painting may be said to begin His art is notable for its realistic and rugged treatment, dramatic power, and careful execution, even his religious subjects are never idealized His later works reflect the influence of the Italian school Lucas's paintings include *The Chess Players* and *Virgin Enthroned* (Berlin Mus. collection), *Lot and His Daughters* (Louvre); *Death of John the Baptist* (Philadelphia Mus of Art), *The Last Judgment* (town hall, Leiden), *Last Judgment* (N Y Historical Society), and an unfinished painting in tempera, *Joseph's Coat* (Metropolitan Mus) Among his plates are *Conversion of St Paul*, *Ecce Homo*, *Return of the Prodigal Son*, and *Adam and Eve Expelled from Paradise*

Lucca (lo͞ok'kä), city (pop 32,896), capital of Lucca prov , Tuscany, central Italy, near the Tyrrhenian Sea It is an agricultural trade center (olive oil and wine) with tobacco manufactures A Ligurian settlement, later a Roman town, it became (6th cent) the capital of a Lombard duchy and (12th cent) a free commune, which soon developed into a republic In spite of ruthless internal strife between Guelphs and Ghibellines and frequent wars (especially with Pisa and Florence) the city prospered Its bankers and merchants were noted throughout Europe, as were its velvets and damasks The arts also flourished after the 12th cent Lucchese sculpture reached its zenith in the 15th cent with Matteo CIVITALI, whose fine works adorn the cathedral Numerous churches, showing Pisan influence, were built from the 12th to the 14th cent Save for short periods of rule by tyrants, foremost among them Castruccio CASTRACANI, and by foreign powers, Lucca remained an independent republic until Napoleon I made it a principality (1805) for his brother-in-law, Felice BACIOCCHI, and his sister Elisa Lucca became a part in 1817 of the duchy of PARMA and in 1847 of the grand duchy of Tuscany, in 1860 it was annexed to the kingdom of Sardinia Of the city's many churches, the cathedral, San Frediano, and San Michele, with their fine marble façades, deserve special mention, its medieval palaces, towers, and ramparts are also notable

Luce, Stephen Bleecker, 1827–1917, American naval officer, b Albany, N Y He entered the navy as a midshipman in 1841 In the Civil War he was head of the department of seamanship at the Naval Academy (then at Newport, R I) and served on blockade duty off the South Carolina coast After the war he was commandant of midshipmen at Annapolis and saw varied service afloat and ashore It was largely owing to his efforts that the naval war college was established at Newport in 1884, and he was its first superintendent (1884–86). Promoted rear admiral in 1886, he was retired in 1888 Luce was generally considered the foremost seaman of his time, and his *Seamanship* (1863), which went through many editions, was long an authoritative text See biography by Albert Gleaves (1925)

Lucedale, town (pop 1,204), co seat of George co , SE Miss , near the Ala line SE of Hattiesburg, in a diversified farming area

Lucera (lo͞och'rä), rural city (pop 17,472), Apulia, S Italy Its huge castle, built by Emperor Frederick II, was once the most important fortress of Apulia

lucern see ALFALFA

Lucerne (lo͞osĕrn', lū-), Ger *Luzern* (lo͞otsĕrn'), canton (576 sq mi , pop 206,608), Switzerland It is agricultural and pastoral, with large forested areas, its population is mainly German-speaking and Roman Catholic One of the FOUR FOREST CANTONS, its history is that of its capital, **Lucerne** (pop 54,716), which grew up around the monastery of St Leodegar, founded in the 8th cent An important trade center on the St Gotthard route, it became a Hapsburg possession (1291), but joined the Swiss Confederation in 1332 and gained full freedom after the battle of Sempach (1386) Lucerne was the chief town of the SONDERBUND (1845–47) The noted monument, Thorvaldsen's Lion of Lucerne, carved in rock, was erected (1820–21) in memory of the Swiss GUARDS Other points of interest are the covered bridges from the 14th and 15th cent , a church (Hofkirche) from the 8th cent , the Glacier Garden, the town hall (16th cent), the cantonal buildings, and several museums There are machine and printing industries A summer resort, Lucerne is on the Reuss river and on the **Lake of Lucerne,** Ger *Vierwaldstättersee* (fēr'vält''shtĕtursä') [lake of the Four Forest Cantons] (area 43½ sq mi), which is noted for its scenery Irregular in shape, the lake borders the cantons of Lucerne, Uri, Schwyz, and Unterwalden The Reuss river flows through it

Luchaire, Achille (äshēl' lüshĕr'), 1846–1908, French historian, an authority on the history of medieval France He edited, in collaboration with Berthold Zeller, *L'Histoire de France racontée par les contemporains* (65 vols , 1880–90), a collection of excerpts from original sources His *Histoire des institutions monarchiques de la France sous les premiers Capétiens* (2d ed , 2 vols , 1891), *Manuel des institutions françaises période des Capétiens directs* (1892), *Les Communes françaises à l'époque des Capétiens directs* (rev ed , 1890), and *Social France at the Time of Philip Augustus* (1909; Eng. tr , 1912) are not only authoritative and indispensable studies of medieval France under the Capetians, but are also models of lucid exposition and style The last-named work is of equal interest to the student and the general reader Luchaire also wrote a biography of Innocent III (6 vols., 1906–8).

Luchon or Bagnères-de-Luchon (bänyĕr"-dŭ-lüshō'), town (pop 4,065), Haute-Garonne dept., S France It is the most important resort in the Pyrenees, at the foot of the MALADETTA MOUNTAINS Its warm

sulphur springs have been known since Roman times Luchon is now also a winter sports center

Lu-chu Islands see RYUKYU ISLANDS.

Lucia, Santa. see LUCY, SAINT

Lucian, Saint (lū'shŭ), d 312, Syrian Christian scholar, b Samosata A pupil of PAUL OF SAMOSATA, he was the teacher of Arius at Antioch He prepared a version of the Scriptures, but none of his writings survive He was martyred Feast Jan 7

Lucian, fl 2d cent, Greek prose writer, called also Lucianus, b Samosata, Syria He traveled widely, lecturing in Italy, ASIA Minor, and Gaul In later life he held a government position in Egypt Lucian wrote an easy, masterly Attic prose, which he turned to satirical use His wit, his characterizations, his distrust of vagaries, and his hatred of fraud give his satires a vigor and an interest which have made him highly admired and often imitated He wrote nearly 80 works The most important and characteristic are his dialogues (e g , *Dialogues of the Gods, Dialogues of the Dead, The Sale of Lives*) which treat primarily of ancient mythology (the Olympian fables, which he satirizes) and of contemporary philosophers (whose ineptitude he exposes) *The True History*, a fantastic tale parodying incredible adventure stories, influenced such later writers as Rabelais and Swift, *Lucius, or, The Ass*, doubtfully Lucian's, seems to have been the model for APULEIUS Lucian also wrote poems and rhetorical, critical, and biographical works

Luciani, Sebastiano see SEBASTIANO DEL PIOMBO

Lucifer (lū'sĭfur), [Latin,=light-bearing], the planet Venus as the morning star In Isaiah 14 12 the celebrated reference to Lucifer is figurative for the king of Babylon, but it was misunderstood to mean the fallen angel Hence the name passed into tradition as a name for the devil The name in Greek was Phosphorus See SATAN

Lucifer of Cagliari (kalya'rē), d 370, bishop of Cagliari, Sardinia (353–70), violent opponent of Arianism As legate of Pope Liberius he went to the council at Milan (355) that Constantius disbanded by exiling the Catholic delegates Lucifer was bitter against those who seemed to submit to Arianism, and on his return to Sardinia (362) he formed a sect of his own, barring all who had strayed into Arianism at all His peremptory consecration of a bishop for Antioch (outside his jurisdiction) perpetuated the schism of MELETIUS

Lucilius, Caius (kā'us lĭsĭl'ēus, kĭ'us), c 180–102? B C, Latin satiric poet, considered the founder of Latin satire, b Campania, Italy. His verse, energetic and trenchant but careless in style, survives in fragments He influenced Horace, Persius, and Juvenal

Lucioni, Luigi (lwē'jē lōōchō'nē), 1900–, American painter, b Malnate, Italy, where his earliest studies began After his family moved to New York city in 1915, he studied in Cooper Union night classes for four years and thereafter at the National Academy of Design for a similar period He won a scholarship to the L C Tiffany Foundation at Oyster Bay, L I , and worked there for several summers Lucioni exhibited widely and is known as a painter of still life, landscapes, and portraits All are characterized by polished style, accurate drawing, fine design, and clear color Lucioni is represented in many private and public collections His *Pears and Pewter* (Metropolitan Mus) is characteristic

Lucius III, d 1185, pope (1181–85), a native of Lucca named Ubaldo Allucingoli, successor of ALEXANDER III and predecessor of URBAN III He was a Cistercian with St Bernard and received (1141) the red hat from Innocent II He was a successful diplomat under Alexander, notably in the peace negotiations (1177) with Emperor Frederick I. In his reign his relations with Frederick were cool, Lucius refused to crown Henry VI, Frederick's son, and there was the perennial question of the lands of the Countess Matilda Pope and emperor had a long conference at Verona in 1184 that resembled a council from the attendance, here they issued a joint decree (*Ad abolendam*) on the extirpation of heresies This had a new stringency and detail, but death was not yet invoked as a penalty The Waldensians were condemned at this meeting

Lucius. 1 Christian teacher at Antioch, a Cyrenian Acts 13 1 **2** Christian at Rome Rome 16 21

Luck, Ukraine see LUTSK

Luckner, Felix, Graf von (fā'lĭks graf fŭn lōōk'nur), 1886–, German naval hero After spending several adventurous years as a common sailor, Luckner returned to Germany and joined the merchant marine In 1916 he was placed in command of the commerce raider, *Seeadler*, shipped through the British blockade, and before his capture near the Fiji Islands (1918) destroyed Allied shipping worth over $25,000,000 His bold operations in the Atlantic and the Pacific earned him the nickname "The Sea Devil" See Lowell Thomas, *Count Luckner, the Sea Devil* (1927)

Lucknow or **Lakhnau** (both. lŭk'nou), city (pop 387,177), SW United Provs., India In 1949 it became, the capital of United Provs It was the capital of the kingdom of Oudh (1775–1856) and then of Oudh prov until that province was merged (1901) with Agra prov to make the present-day United Provs Except for the Imambara [mausoleum] of Asuf-ad-daula, its greatest king, the architectural remains of the royal period are inferior In the Sepoy Rebellion (1857–58) the British garrison under Sir Henry M Lawrence and the colony suffered heavy losses in the eight-month siege of the residency Sir Colin Campbell relieved the city in 1858 Today Lucknow is an educational center with a university and several colleges Cotton cloth, silver, copper, and brass implements and pottery are manufactured

Lucrece (lūkrēs') or **Lucretia** (lūkrē'shŭ), in Roman legend, Roman matron, illustrious for her virtue She was the victim of rape by Sextus, son of Tarquinius Superbus Having enjoined her husband, L Tarquinius Collatinus, and his friends to avenge her, she stabbed herself to death The ensuing revolt drove the Tarquins from Rome See Shakspere's *Rape of Lucrece*

Lucretius (Titus Lucretius Carus) (lūkrē'shus), c 99 B C –c 55 B C , Roman poet Of his life little can be stated A chronicle of St Jerome speaks of his birth and of the loss of his reason through taking a love potion It states that in sane intervals he had written some books which were later emended by Cicero The poetry of Lucretius is comprised in one great didactic work, *De rerum natura* [on the nature of things] In dignified and beautiful hexameter verse the poet sets forth arguments founded upon the philosophical ideas of Democritus and Epicurus, dividing his exposition into six books With intense feeling he seeks to persuade man that there need be no fear of the gods or of death, since "man is lord of himself" The proof that he builds up is based upon the atomic theory (not the same as the modern atomic theory) Everything, even the soul, is made up of atoms, and the laws of nature control all The soul is itself material and so closely associated with the body that whatever affects one affects the other If they were separated neither could survive Consciousness ends with death There is no immortality of the soul The gods exist, but the affairs of men do not concern them The universe came into being through the working of natural laws in the combining of atoms, instead of by the creative power of deity Many of the principles he gives in his scientific discussions have been upheld by modern investigations Seeing clearly and thinking seriously, he calls upon man to face life with fortitude, believing in his own independence See J Masson, *Lucretius, Epicurean and Poet* (1907–9), E E Sikes, *Lucretius* (1936)

Lucullus (Lucius Licinius Lucullus Ponticus) (lūkŭ'lus), c 110 B C –56 B C , Roman general He served in the Social War under Sulla, who made him his favorite. He fought in the East (87–85 B C), always loyal to his patron, who made him curule aedile (79 B C) and praetor (78 B C), Sulla also made Lucullus his literary executor and the guardian of his son The enmity Pompey felt for Lucullus is traceable partly to Sulla's preference Lucullus was consul (74 B C) and obtained for his proconsulship the province of Cilicia, since his colleague, Cotta, received Bithynia, the proconsuls went to the East to attack MITHRIDATES VI, who was advancing steadily through Asia Minor Mithridates defeated Cotta, but Lucullus camped behind the Pontic king, drew him out, and annihilated his army Mithridates withdrew into Pontus Next year (72 B C) Lucullus pushed Mithridates into Armenia, where Mithridates took refuge with King Tigranes Lucullus applied himself to the establishment of order in Asia, exciting great unpopularity in Rome by reforming the provincial finances The capitalists now combined with Pompey's party and began an agitation for Lucullus' recall, they sent out emissaries also to sow discontent in the army, which had never been devoted to him In 69 B C , Lucullus invaded Armenia and took the capital, Tigranocerta This was the climax of his career, for mutiny began to become a daily occurrence in his army, and Pompey's party was growing stronger In 66 B C he was recalled and Pompey, a greater general, replaced him Lucullus retired to Rome He kept out of state affairs and spent huge sums on public shows and on his estates

Lucy, Saint, d 304?, Sicilian virgin martyr, commemorated daily in the canon of the Mass She is very popular in Sicily and in S Italy Her attributes a lamp, an awl, a sword, or a wound in her throat In Italian her name is Lucia Feast Dec 13

Lud, eponym of an Asiatic people, probably the Lydians Gen 10 22, 1 Chron 1 17 There is probably textual confusion at some points with the LUBIM Isa 66 19, Jer 46 9, Ezek 27 10, 30 5

Ludd, Palestine see LYDDA

Luddites, workmen of the industrial centers of England who rioted in 1811–16 They systematically wrecked machinery, to which they attributed the prevailing unemployment They were named for Ned Ludd, who, 30 years earlier, had destroyed stocking frames

Ludendorff, Erich (ā'rĭkh lōō'dundôrf), 1865–1937, German general A disciple of SCHLIEFFEN, he served through the First WORLD WAR as chief of staff of Field Marshal HINDENBURG. It is generally believed that Ludendorff was the brain behind Hindenburg's decisions When Prince Max von Baden became chancellor (Oct., 1918), Ludendorff demanded that Germany should ask for an armistice He was dismissed and fled to Sweden Returning in 1919, he took part in the ultranationalist Kapp putsch (1920) and in the "beer-hall putsch" (1923) of Adolf HITLER He was acquitted in the subsequent trial, was a National Socialist member of the Reichstag (1924–28), and sharply criticized President Hindenburg Meanwhile he had come under the influence of his second wife, Dr. Mathilde Ludendorff, who founded a new "Aryan" religion Mentally unbalanced, Ludendorff and his wife (a specialist in mental diseases) wrote pamphlets accusing the pope, the Jesuits, the Jews, and the Free Masons of a common plot against Aryan man and for some time alienated even Hitler's friendship His saner writings include *Ludendorff's Own Story* (Eng tr , 1919) and *The General Staff and Its Problems* (Eng tr , 1920)

Lüdenscheid (lu'dunshīt), city (pop 49,926), Westphalia, NW Germany, ESE of Wuppertal It is a metalworking center manufacturing household goods Lüdenscheid was chartered in 1278 and was a member of the Hanseatic League

Lüderitz (lü'durĭts), town (pop 4,547), Southwest Africa, on the Atlantic Ocean Built after 1882, it was the chief port and settlement of the former German colony It is on a railroad to the interior and is a fishing and diamond-mining center

Ludhiana (lōōdēa'nu), city (pop 111,639), Punjab state, India Though it was founded c 1490, the present city is largely modern Ludhiana is a railroad junction and a commercial center It manufactures flour, hosiery, and rolled steel

Ludim (lū'dĭm), African people, unknown unless Ludim be a textual error for LUBIM Gen 10 13, 1 Chron 1 11 See also LUD

Ludington (lŭd'), city (pop 8,701), co seat of Mason co , N Mich , on Lake Michigan at the mouth of the Pere Marquette river, inc 1873 It is a shipping point and a resort in a region of many lakes and rivers plentiful with trout It has varied manufactures A monument in Ludington marks Father Marquette's first burial place (1675) A state park is near by

Ludlow, Edmund (lŭd'lō), c 1617–1692, English soldier and regicide judge He fought as a captain of cavalry in the first civil war and assisted (1651–52) in the plantation of Ireland He sympathized with the republican Puritans and opposed the Protectorate of Oliver Cromwell and his son Richard and likewise the Restoration of Charles II At the Restoration he was in a precarious position, and he fled (1660) to Dieppe and later to Switzerland, where he died See his memoirs (ed by C H Firth, 1894)

Ludlow, Roger, fl 1590–1664, one of the founders of Connecticut, b Wiltshire, England Educated at Oxford and admitted to the Inner Temple to study law, he was elected (1630) an assistant of the Massachusetts Bay Company and in the same year sailed to America He was one of the founders of Dorchester, Mass , and served (1634) as deputy governor of Massachusetts Moving to the new settlements along the Connecticut river, he presided (1636) over the first court held in Connecticut and is credited with the final drafting of the FUNDAMENTAL ORDERS, adopted by the colony in 1639 He also completed the first codification of Connecticut laws, known as Ludlow's Code or the Code of 1650 In 1639 he founded the settlement of Fairfield, Conn , and for many years served as a magistrate and deputy governor of Connecticut He represented (1651–53) the colony in the New England Confederation Disagreement over his proposed expedition against the Dutch settlers of New York caused him to return to England, after which he settled in Ireland See biography by J H Taylor (1900)

Ludlow (lŭd'lō), municipal borough (pop 5,642), Shropshire, England, at the confluence of the Teme and Corve rivers The town is very old, there are half-timbered houses (Castle Lodge, Feathers' Hotel) and ruins of an 11th-century castle One of the seven towngates remains Milton's *Comus* was first performed in Ludlow (1634), and here Butler wrote *Hudibras* Prince Arthur, the elder brother of Henry VIII, lived in the castle

Ludlow. 1 City (pop 6,185), N Ky , on the Ohio, settled c 1790, inc as a village 1864, as a city c 1925 It is a suburb of Covington and of Cincinnati, Ohio Ludlow has railroad shops, and among its products are furniture and machinery **2** Town (pop 8,181), S Mass , NE of Springfield and on the Chicopee, settled c 1750, set off from Springfield and inc 1774 Jute, floss, and hemp products are made here **3** Town (pop 2,458), S Vt , in the Green Mts , NW of Springfield and on the Black River. It includes Ludlow village (pop 1,780) Calvin Coolidge attended Black River Academy

Ludwig. For German rulers thus named, see LOUIS.

Ludwig, Emil (ā'mēl lōōt'vĭkh), 1881–1948, German biographer and dramatist A leader of the modern

school of humanized biography, he began his career with plays in verse and served as war correspondent His popular lives of great men gained him world fame They include *Goethe* (1920, Eng tr, 1928), *Napoleon* (1924, Eng tr, 1926), *Bismarck* (1926, Eng tr, 1927), *The Son of Man* (1928, Eng tr, 1928), a life of Jesus, *Schliemann of Troy* (1931, Eng tr, 1931), *Roosevelt* (1938, Eng tr, 1938), *Bolívar* (Eng tr, 1942), and *Doctor Freud* (Eng tr, 1947) Among his many other books are *The Mediterranean* (1927, Eng tr, 1942) and *The Nile* (1935, Eng tr, 1936) Ludwig left Germany for Switzerland in 1907 In later years the Nazis burned his works

Ludwig, Karl Friedrich Wilhelm (kärl' frē'drĭkh vĭl'hĕlm), 1816–95, German physiologist He became world famous as professor (from 1865) and head of the physiological institute at the Univ of Leipzig He pioneered in the study of physiology as related to the physical sciences and improved laboratory methods and apparatus, notably the kymograph He wrote a standard text, *Lehrbuch der Physiologie* (1852–56)

Ludwig, Otto (ō'tō), 1813–65, German dramatist and novelist He wrote the tragedies *Der Erbförster* (1853, Eng tr, *The Forest Warden*, 1912) and *Die Makkabäer* [the Maccabees] (1854) His fame now rests upon two tales, *Die Heiterethei* (1853) and *Zwischen Himmel und Erde* (1856, Eng tr, *Between Heaven and Earth*, 1911)

Ludwigsburg (lōōt'vĭkhsbōōrk"), city (pop 49,635), Württemberg, SW Germany, near the Neckar and N of Stuttgart In 1945 it was made part of Württemberg-Baden Ludwigsburg is a rail junction and an industrial center, manufacturing machine tools, metal goods, organs, and textiles There are hot mineral springs in the suburb of Hoheneck The city grew around the château built (early 18th cent) by the duke of Wurttemberg in imitation of Versailles Young Schiller attended a military school near Ludwigsburg Kerner, Mörike, D F Strauss, and F T Vischer were born here

Ludwigshafen (lōōt'vĭkhs-ha'fun), city (1939 pop 144,425, 1946 pop 106,556), Rhenish Palatinate, W Germany, a port on the left bank of the Rhine It is connected by bridge with Mannheim, on the opposite shore An important transshipment point, it is also a center of the German chemical industry and manufactures machinery and automobiles Originally a fortress built in the 17th cent, Ludwigshafen grew to industrial importance in the late 19th cent It suffered much destruction in the Second World War and was the scene (1948) of a disastrous explosion of several chemical plants

Lueger, Karl (kärl' lū'gur), 1844–1910, Austrian politician The leader of the Christian Social party, he appealed to the lower middle classes of Vienna through his anti-Semitism, which appears to have been very flexible (He was quoted as stating, "I am the one to determine who is a Jew and who isn't," when reproached for his personal friendship with prominent Jews) He was elected mayor of Vienna in 1897, despite the initial opposition of Emperor Francis Joseph, and he held that post till his death During his administration the public utilities and municipal parks of Vienna were much improved Lueger was primarily a clericalist politician and a vote getter His anti-Semitism was partly religious, but mostly opportunist However, his public took it seriously, and among the public was young Adolf Hitler, on whom Lueger's demagogic tactics were not wasted

Lufkin, city (1940 pop 9,567, 1947 estimated pop 13,000), co seat of Angelina co, E Texas, NNE of Houston, founded 1882, inc 1890 In the deep pine woods, Lufkin is the core of a region of forest industries with many sawmills and the first plant to make newsprint from native pine Lufkin also has foundries and minor industries The county grows peanuts, truck, and other crops and has mineral resources, but it is primarily given over to livestock, dairying, and forest

Lugano (lōōgä'nō), town (pop 17,030), Ticino canton, Switzerland Taken from Milan by the Swiss cantons (1512), it was ruled by them until 1798 Lugano is Italian in character and has the 13th-century Church of San Lorenzo and the 15th-century Church of Santa Maria degli Angioli There are wood, leather, and printing industries Lugano is noted for its scenery, and its yearly visitors far outnumber the inhabitants It is situated on the **Lake of Lugano,** Ital *Lago di Lugano* (lä'gō dē) or *Ceresio* (chārā'zyō), which is irregular in shape (area c 19 sq mi) and lies both in Switzerland and in Italy

Lugansk, Ukraine see VOROSHILOVGRAD

Lugard, Frederick John Dealtry Lugard, 1st Baron (lōōgärd'), 1858–1945, British colonial administrator He saw military service (1879–80) against Afghanistan and in the Sudan and Burma and led (1888) a force against the slave traders of Lake Nyassa He entered the service of the British East Africa Company, explored for the company, and campaigned against the native rulers. He was administrator of Uganda, governor general of Hong Kong (1907–12), and governor general of Nigeria (1907–19) He was (1922–36) a member of the Permanent Mandates Commission of the League of Nations

Lugdunum: see LYONS, France

Lugdunum Batavorum: see LEIDEN, Netherlands

Lugo (lōō'gō), city (pop 21,115), capital of Lugo prov, NW Spain, in Galicia, on the Miño river It is the trading center of a fertile agricultural region Lugo has well-preserved Roman walls (3d cent B C) and a 12th-century cathedral (several times restored)

Lugoj (lōō'gôzh), Hung *Lugos* (lōō'gôsh), city (pop 26,707), W Rumania It is the commercial center of an agricultural and vineyard region

Lugones, Leopoldo (lāōpōl'dō lōōgō'nĕs), 1874–1938, Argentine poet He was a friend of Rubén Darío and was the outstanding *modernista* poet of Argentina Lugones made several trips to Europe and on one occasion represented his country on the Committee on Intellectual Cooperation of the League of Nations He inaugurated his artistic career with *Las montañas de oro* [the golden mountains] (1897), followed by *Los crepúsculos del jardín* [twilights in the garden] (1905) and *El lunario sentimental* [sentimental almanac] (1909) In later years he turned to realism and satire as in *Odas seculares* [centennial odes] (1910) and emphasized native scenes in collections like *Poemas solariegos* [poems of the manor house] (1928) He also wrote successful historical works in *El imperio jesuítico* (1904) and *Historia de Sarmiento* (1911)

Lugos, Rumania see LUGOJ

Luhith (lū'hĭth), unidentified path in Moab, leading to a sanctuary on a hill Isa 15 5, Jer 48 5

Luini, Bernardino (bārnärdē'nō lōōē'nē), c 1480–1532, Italian painter, son of Giovanni Lutero of Luino Among the extant works of his early years (before 1510) are a *Pietà* (choir of Santa Maria della Passione, Milan) and *Madonna and Child with St John* (National Gall, London), in the manner of the Lombard school By 1520 he had developed a highly individual style, based upon the principles of Leonardo and characterized by admirable composition and graceful drawing and particularly by the charm of his female figures, some of which were formerly attributed to Leonardo Luini's paintings include the beautiful altarpiece for the church at Legnano, *St Catherine Borne by Angels* (Milan), *The Marriage of the Virgin, Adoration of the Magi,* and other frescoes (Madonna dei Miracoli, Saronno), *Crucifixion* (Santa Maria degli Angeli, Lugano), and the altarpieces *Adoration of the Shepherds* and *Adoration of the Magi* (cathedral, Como) He also executed the series of frescoes which include the *Martyrdom of St Catherine,* his last work (Monastero Maggiore, Milan), *Holy Family* and *Christ Crowned with Thorns* (Milan), *Madonna* (Louvre), *Virgin and Child* and *Virgin Enthroned with Saints* (Milan), *Christ among the Doctors* (National Gall, London), *Beheading of John the Baptist* (Uffizi), *Portrait of a Lady* (National Gall of Art, Washington, D C) See biographies by G C Williamson (1907) and James Mason (1908)

Luitpold (lōō'ĭtpōlt), 1821–1912, regent of Bavaria (1886–1912), third son of Louis I of Bavaria He ruled for his insane nephews LOUIS II and OTTO I His son succeeded him as regent and became king (1913) as Louis III

Luke, Saint [Gr Lucas, cf Philemon 24], early Christian Since the 2d cent he has been regarded as author of the third Gospel (see LUKE, GOSPEL ACCORDING TO SAINT) and of its sequel, the Acts of the Apostles He was a Gentile physician and the friend and companion of St Paul and of St Mark Acts 20, 21, Col 4 14, 2 Tim 4 11. According to tradition he was a painter and died a martyr As an evangelist his symbol is an ox Feast Oct 18

Luke, Gospel according to Saint, third book of the New Testament It has been ascribed since the 2d cent to St Luke and was composed in the latter part of the 1st cent. A prologue addressed to one Theophilus (1 1–4) precedes the biography The whole is a literary composition, showing thoughtful working over of matter from different sources, which included St Mark's Gospel among others (see SYNOPTIC GOSPELS). It has long been supposed that the Virgin Mary was the source of the data of the unique account of the birth and boyhood of Jesus (1–2) The center of the book (9 51–18 14) is mainly unparalleled in other Gospels, this contains some favorite passages A fourfold division of St Luke would be the coming of the Savior (1 5–4 13), his first two years of preaching (4 14–9 17), his third year (9 18–21 38), the passion and the resurrection (22–24) Acts is the sequel to St. Luke See GOSPEL, MIRACLE, NEW TESTAMENT, PARABLE.

Lukeman, Augustus (Henry Augustus Lukeman), 1871–1935, American sculptor, b Richmond, Va, studied at the National Academy of Design, New York, and the École des Beaux-Arts, Paris Among his works are *Manu, the Law Giver of India* (Appellate Court) and the fountain in memory of Isidore and Ida Straus (both New York), equestrian statues of Francis Asbury (Washington, D C) and Kit Carson (Trinidad, Colo.), a William McKinley monument (Dayton, Ohio) and *Women of the Confederacy* (Raleigh, N C), U. S. Grant Memorial (San Diego, Calif), and bas-relief of Daniel Boone (Paris, Ky) In 1925 he took over the completion of the colossal sculptures on Stone Mt, Ga, started by Gutzon Borglum.

Lukmanier (lōōkman'yur), Alpine pass, 6,296 ft high, Switzerland, linking the Grisons and Ticino cantons

Luks, George Benjamin (lōōks), 1867–1933, American portrait and genre painter, b Williamsport, Pa, studied at the Pennsylvania Academy of the Fine Arts and in Dusseldorf He worked as a newspaper illustrator and caricaturist until 1902, when he became a painter and art teacher A member of THE EIGHT, Luks is best known for his spirited portraits, painted with dash and verve and bordering on caricature *The Spielers* (Addison Gall, Andover, Mass) is characteristic Luks is represented in many leading American galleries See study by E L Cary (1931)

Lule, Swed *Lule älv* (lu'lu ĕlv'), river 273 mi long, rising in N Sweden and flowing from the Lapland mts to the Baltic at Luleå It has falls at Stora Sjofallet and Harspranget Its potential power, partly utilized at PORJUS, exceeds 2,000,000 hp

Luleå, Swed *Luleå* (lu'lŏō"), city (pop 17,134), co seat of Norrbotten co, N Sweden, on the Gulf of Bothnia and at the mouth of the Lule river The harbor, which is icebound for several months, exports iron ore from the Lapland mines, timber floated down the Lule river, and reindeer hides There is a large smelting plant, a wood pulp plant and an agricultural station which encourages farming in the surrounding region

Luling (lōō'lĭng), city (pop 4,437), S central Texas, ENE of San Antonio and SSE of Austin, near the San Marcos river, founded 1874 Oil, discovered here in 1922, enriched the former cow town The experimental Luling Foundation Farm here was donated by an oil millionaire, Edgar B Davis

Lull, Ramon (ramōn' lōōl'), or **Raymond Lully,** c 1236–1315, Catalan philosopher, b Palma, Majorca His family was wealthy, and he lived a life of ease, distinguishing himself only by writing lyrics in Catalan until 1266, when he had a vision which turned him to religion He became a Franciscan and was fired with ambition to convert Islam He devoted himself to studying Arabic language and literature and Moslem culture and became outstanding for his knowledge and his teaching at Paris, Montpellier, and at the College of the Holy Trinity, which he founded (1276) in Majorca He went to Tunis in 1291 and, after returning to Europe in 1293, went on a mission to the East His plan for converting the infidels was given some official sanction by the council held (1311) at Vienne He went again to Africa, and is there said to have been stoned to death His chief writings—notably the *Ars major* [the great art]—were composed in defense of Christianity against the Moslems and particularly against the teachings of Averroës He set forth a method of expressing all knowledge by the manipulation of symbols Lull maintained that philosophy (including science) was not divorced from theology and that every article of faith could be demonstrated by absolute logic Many of his works were strongly mystical and were in an exalted, figurative style that made them popular at the time but also gave them a vagueness that made his orthodoxy somewhat suspect Later generations attributed to him many works on alchemy and magic that were not his William Caxton's translation of one of his works *The Booke of the Ordre of Chyualry* was reissued by the Early English Text Society in 1926, and E Allison Peers translated some of his writings (notably in *Thoughts of Blessed Ramon Lull for Everyday,* 1925, and *The Tree of Love,* 1926) and wrote a biography (1929)

Lull, Richard Swann, 1867–, American paleontologist, b Annapolis, Md, grad Rutgers Univ (B S, 1893) He taught at Massachusetts State College (1894–1906) and was thereafter at Yale, as professor of paleontology (1911–36) and as curator of vertebrate paleontology (1920–26) and director (1922–36) of the Peabody Museum From 1933 to 1949 he edited the *American Journal of Science* His works include *Organic Evolution* (1917, rev ed, 1948), *Fossils* (1931), and *Revision of the Ceratopsia or Horned Dinosaurs* (1933)

Lully, Jean Baptiste (zhäⁿ' baptēst' lülē'), 1632–87, French operatic composer, b Florence, Italy His name originally was Giovanni Battista Lulli A dancer and a self-taught violinist, he went to France in 1646 and in 1652 entered the service of Louis XIV In 1653 he became chamber composer and conductor of the king's orchestra He composed numerous ballets, many to plays by Molière, until in 1672 he obtained a patent for the production of opera and took over the Académie royale de Musique, where he held a virtual monopoly on the French operatic stage Shrewd and unscrupulous, he amassed a fortune producing his own operas He composed, on an average, about one a year Outstanding are *Alceste* (1674), *Cadmus et Hermione* (1673), *Amadis* (1684), and *Armide* (1686) His librettist, Philippe Quinault, was a dramatist in his own right, and Lully called his

works *tragédies lyriques*. He established the form of the French overture, wrote recitatives which were adapted to the French language, and created a style which held the French operatic stage until the advent of Gluck See M F Bukofzer, *Music in the Baroque Era* (1947); D J Grout, *A Short History of Opera* (1947).

Lully, Raymond: see LULL, RAMON.

lumbago (lŭmbā'gō), pain in the lumbar region of the back, attributed to disorders of the muscle sheaths surrounding the muscle bundles Treatment includes rest, heat, anodynes, counterirritants (e g , a mustard plaster), and removal of foci of infection Lumbago is a term formerly used to designate many different kinds of low-back pain

lumber, name used in the United States and Canada for timber which has been cut into boards Canada and the United States are chief producers of lumber In the United States, Maine early took the lead in production, but as the industry spread the forests of the West acquired increasing importance and Oregon, Washington, and California became leading producers Lumbering was one of the first industries in the country—its first exports were ship timbers Logging (the felling and preparation of timber for shipment to sawmills) was a frontier industry, the work rough, dangerous, and difficult Romantic, exaggerated stories and legends of the feats of the lumberjack are a colorful chapter in American folklore See S H Holbrook, *Holy Old Mackinaw* (1938), S F Horn, *This Fascinating Lumber Business* (1943), A E Wackerman, *Harvesting Timber Crops* (1949)

Lumber City, town (pop 1,044), SE Ga , on the Ocmulgee river and SE of Macon, inc 1889 It is a lumber-shipping center near sand quarries.

Lumberport, trading town (pop 1,285), N W Va , on a branch of the Monongahela and N of Clarksburg, in a mine, lumber, oil, and agricultural region, inc. 1901

Lumberton. 1 City (pop 1,485), S Miss , SSW of Hattiesburg, settled in the 1880s It is in a farm area yielding pecans especially 2 Town (pop 5,803), co. seat of Robeson co , S N C , on the Lumber river and S of Fayetteville, inc 1787 It is an industrial center, with textile mills, tobacco markets, and food-processing and fertilizer plants

Lumière, Louis Jean (lwē' zhäⁿ' lumyĕr'), 1864–1948, and **Auguste Marie Louis Nicolas Lumière** (ōgüst' marē', nēkôlä'), 1862–, French inventors, brothers. They invented the cinematograph which was patented and demonstrated in 1895 This mechanism was the first to project moving pictures on a screen where they could be viewed by an audience The cinematograph was an important advance on the Edison kinetoscope

luminescence: see FLUORESCENCE and PHOSPHORESCENCE

Lumpkin, Joseph Henry, 1799–1867, American jurist, b Oglethorpe co , Ga , grad Princeton, 1819, brother of Wilson Lumpkin From 1845 until his death he was the chief justice of the Georgia supreme court, the first to occupy that position since previously that state had no court of review He organized (1859) the Lumpkin Law School, which in 1867 became the law department of the Univ of Georgia See L L Cody, *The Lumpkin Family of Georgia* (1928)

Lumpkin, Wilson, 1783–1870, governor of Georgia (1831–35), b Pittsylvania co , Va , educated at the Univ of Georgia He served in the House of Representatives (1815–17, 1827–31) and in the Senate (1837–41) The chief problem of his governorship was the removal of the Cherokee Indians from the state, which was finally effected in 1838

Lumpkin, city (pop 1,210), co seat of Stewart co , SW Ga , near the Chattahoochee SSE of Columbus, inc 1831 Much of the farm land of the county has been badly eroded Near by are the Providence Caverns, wide, eroded gullies cut through layers of sedimentary soil

lumpy jaw, infectious disease of cattle and swine, sometimes contracted by man It is caused by fungi of the genus *Actinomyces* and is named technically actinomycosis It is not uncommon in the SW United States Treatment may be either surgical or medical Infected cattle often must be destroyed

Luna, Alvaro de (älva'rō dā lōō'nä), 1388?–1453, constable of Castile, grand master of the Order of Santiago The favorite of John II of Castile, he virtually ruled the kingdom He won victories over the Moors and the rebellious nobles and became so powerful that he aroused the enmity of the nobility and of John's second wife, Isabel of Portugal, whose schemes led to Luna's trial and execution

Luna, Pedro de (pā'dhrō), 1328–1423, Aragonese churchman, antipope (1394–1417, see SCHISM, GREAT) with the name Benedict XIII. He was created cardinal (1375) and became an outstanding and courageous member of the *curia*. He was a supporter of URBAN VI at his election, and joined in the election of ROBERT OF GENEVA (Antipope Clement VII), which began the schism As Robert's legate in Spain, Cardinal de Luna secured the adherence of his country to the Avignon obedience On Robert's death the cardinals at Avignon elected Cardinal de Luna (1394). The new antipope was the ablest of all the popes and antipopes of the period The French, led by the Univ of Paris, were developing, to resolve the schism, the conciliar theory of the supremacy of a council over the pope in an emergency Discussions of the suggestions for negotiation were met with evasions, rather than argument, by Benedict Boniface IX continued in office Finally, in 1398 the French government withdrew France from the Avignon obedience (making strong antipapal claims of Gallican rights) After a reaction, France recognized Benedict from 1403 to 1408 When France's support was again withdrawn from Benedict, he left Avignon permanently to live at Perpignan He held (1408–9) a council there, but this, like the Council of Pisa (see PISA, COUNCIL OF), has not since been considered canonical The Council of Pisa, with its depositions and election only made the schism worse, and Benedict lost all his obedience but Scotland, Sicily, Castile, and Aragon When the Council of Constance (see CONSTANCE, COUNCIL OF) took place, Benedict grew even more intransigent. After a long wait the council deposed him (1417), and MARTIN V was elected to end the schism Benedict, forsaken by all but his household, lived on in his fortress at Peñiscola (near Valencia), refusing to admit his deposition

Lunacharsky, Anatoli Vasilyevich (ănätô'lyĭ vŭsē'lyuvĭch lōōnŭchär'skē), 1875–1933, Russian revolutionary, dramatist, and poet He began his revolutionary career in 1892 and joined the Bolshevik party when it appeared, forming with Gorki and the Social Democrat Bogdanov the left wing of the group, which was in opposition to Lenin Later he was Lenin's ally in overthrowing the Kerensky government His most important work was done as Soviet commissioner of education (1917–29), in which position he encouraged the theater He wrote many plays himself, of which three, *Faust and the City*, *Vasilisa the Wise*, and *The Magi*, are available in English in his *Three Plays* (1923).

lunacy: see INSANITY

lunar caustic see SILVER

Lund (lŭnd), city (pop 30,915), Malmohus co , S Sweden, NE of Malmo Principally a university town, it is also a publishing center and has some manufactures Mentioned (c 920) in the sagas as Lunda, it became an archbishop's see in the 11th cent and flourished as an ecclesiastic and commercial center After 1536, when it became a Lutheran bishopric, the city declined As part of SKANE prov , it passed definitively from Danish to Swedish rule in 1658, in the same year Charles XI founded the Univ of Lund, where Tegner later held a chair Lund has a 10th-century cathedral and several museums

Lundy, Benjamin, 1789–1839, American abolitionist, b Sussex co , N J , of Quaker parentage He established (1821) at Mt Pleasant, Ohio, the *Genius of Universal Emancipation* and, giving up his prosperous saddler's trade, devoted his whole life to the antislavery cause The *Genius*, a "weekly" which appeared irregularly, was subsequently published at Greenville, Tenn , Baltimore, and Washington For several months in 1829–30 William Lloyd GARRISON assisted in bringing out the paper, but his views were too extreme for Lundy Lundy traveled widely, visiting Haiti, Texas, and Canada in efforts to find suitable places for colonizing freed Negroes The *Genius* ceased publication in 1835, and in 1836 he founded at Philadelphia the *National Enquirer*, edited after 1838 by John Greenleaf Whittier as the *Pennsylvania Freeman*

Lundy Isle, 3 mi. long, off Devonshire, England, at the entrance to the Bristol Channel It has rocky shores and is inaccessible by boat except at the south Occupied in prehistoric times, it was in the Middle Ages and later a stronghold of pirates and smugglers Many ships were wrecked on the isle, which is now provided with lighthouses It is privately owned

Lundy's Lane, locality just W of Niagara Falls, scene of a stubborn engagement of the War of 1812, fought July 25, 1814 The American forces, commanded by Gen Winfield Scott and led by Gen Jacob J Brown, pushing into Canada, encountered British troops posted along Lundy's Lane After a night-long fight against superior numbers, the Americans withdrew to Fort Erie. There were heavy casualties on both sides

Lüneburg (lü'nuböörk), city (pop 49,169), Hanover, NW Germany, on the Ilmenau river and SE of Hamburg It is a rail junction and has large saltworks, a chemical industry, and various manufactures Dating from the 10th cent , Lüneburg was long the capital of the dukes of Brunswick-Lüneburg (see HANOVER) It was an important member of the Hanseatic League Predominantly late Gothic in character, it has several fine churches, a huge city hall (begun 12th cent , with additions as late as the 18th cent.), and many gabled houses in the characteristic North German style. There are salt springs and mud baths frequented since early times. **The Lüneburger Heide** (lü'nuböörgûr hī'dü), a vast heath, lies between the Elbe and Aller rivers. It is a sandy region, devoted largely to sheep raising, and has a wild game preserve. Its peculiar beauty has been described in the writings of Hermann Löns.

Lünen (lü'nün), city (pop. 51,989), Westphalia, NW Germany. It is an industrial center of the Ruhr district, adjoining Dortmund in the south

Lunenburg (lōō'nünbûrg), town (pop 2,856), SW N S , on Lunenburg Bay and SW of Halifax It has a large fleet of fishing vessels The district was chiefly settled c 1753 by Germans from Hanover

Lunenburg. 1 Town (pop 2,196), N Mass , E of Fitchburg; settled 1721, inc 1728 2 Town (pop 1,374), NE Vt , E of St Johnsbury and bordered by the Connecticut, chartered 1763 It is an agricultural and lumbering region

Lunéville (lünāvēl'), town (pop 19,065), Meurthe-et-Moselle dept , NE France, on the Meurthe in Lorraine The 18th-century palace was the residence of STANISLAUS I, duke of Lorraine and exking of Poland. It was damaged in the Second World War. Lunéville has a considerable faience industry The treaty signed here in 1801 between France and Austria confirmed and supplemented the terms of the treaty that had been signed at CAMPO FORMIO

lungs, respiratory organs, in the pleural cavities of the chest The lungs are separated from each other by the heart and other structures of the mediastinum In humans the right lung consists of three lobes, and the left of two Each lung is invested with a membrane known as the pleura Air enters the lungs through two large bronchi (main branches of the trachea, or windpipe), which divide into smaller branches, these open into air cells, the walls of which contain fine blood vessels An interchange of oxygen and carbon dioxide takes place in the air cells. Diseases of the lungs include pneumonia, tuberculosis, abscess, and cancer Lungs function as respiratory organs in the adult forms of most amphibians and in reptiles, birds, and mammals Only in mammals is a DIAPHRAGM present

Lunt, Alfred (lŭnt), 1893–, American actor, b Milwaukee, studied at Harvard He made his first stage appearance at the Castle Square Theatre, Boston, in 1913 He toured in vaudeville with Lilie Langtry and played with Margaret Anglin before he made a popular success in 1919–20 in Booth Tarkington's *Clarence* In 1922 he married Lynn FONTANNE, and since 1924 they have played together in Theatre Guild productions These include *The Guardsman* (1925–29), *Reunion in Vienna* (1931–32), *Design for Living* (1933), *The Taming of the Shrew* (1935), *Idiot's Delight* (1936), *There Shall Be No Night* (1939), *O Mistress Mine* (1945), and *I Know My Love* (1949–50)

Lupercalia (lü'purkā'lyu), ancient Roman feast held annually Feb 15 in honor of a pastoral deity sometimes identified with FAUNUS The occasion was marked for FERTILITY RITES

Lupescu, Magda (mäg'dä lōōpĕ'skōō), 1904?–, wife of CAROL II of Rumania Carol renounced (1925) his succession to the throne for her sake, after becoming king (1930) he installed her as his official mistress Her enemies accused her of exerting a sinister and corrupting influence on Rumanian politics Much of her unpopularity, however, was due to her Jewish origin Mme Lupescu shared Carol's exile from 1940 and finally was married (1947) to him in Brazil

lupine or **lupin** (both, lū'pĭn), any species of the genus *Lupinus*, annual or perennial herbs or shrubs, many of which are native to W North America Though it was long believed that lupines destroy soil fertility, the plants are LEGUMES that have been cultivated in the Mediterranean region since ancient times for enriching the soil The seeds of some species (e g , *Lupinus albus*, the white lupine) have been boiled and used as food to some extent in that locality, and the leafy parts are used as forage both there and in America Most species of lupines, however, and particularly their seeds, are considered poisonous as forage, causing the disease lupinosis to which sheep are especially susceptible Poisonous species and their effects have not been fully determined As a garden flower, the lupine is a favorite because of the various colors and the tall spikes of bonnet-shaped blossoms The leaves are usually composed of leaflets radiating to form a rounded handlike leaf Certain movements, as from the horizontal to a vertical position, are characteristic of the leaves of some of these plants, e g , the common wild lupine (*Lupinus perennis*), also called sundial and quaker bonnet Names for other species of lupines include deer cabbage (*Lupinus duffusus*), tree lupine (*Lupinus arboreus*, a shrub), and BLUEBONNET. The false lupine belongs to the genus *Thermopsis*.

Luray (lōōrā'), tourist town (pop 1,511), N Va., in the Shenandoah Valley SW of Front Royal, in a farm area, inc. 1812 The courthouse of Page co is here, and the town is headquarters of Shenandoah National Park The **Luray Caverns** here, a series of extensive limestone caves discovered in 1878, are remarkable for the beauty of their large stalagmite and stalactite formations.

Lurgan (lûr'gün), urban district (pop 13,766), Co Armagh, Northern Ireland, near Lough Neagh and SW of Belfast. Lurgan Castle is modern. There are linen mills and tobacco factories.

Luria or **Loria, Isaac ben Solomon** (lōō'rēū, lō'rēū), 1534–72, Jewish cabalist, called Ari, surnamed Ashkenasi, b Jerusalem At about 22 he became a hermit and a visionary; he was the teacher and leader of a large circle of mystics His philosophy has come down to us through the numerous works of his chief disciple, Hayim Vital

Luria, Roger of see ROGER OF LORIA

Luristan (lōōrĭstän'), region and former province, W Iran, bordered on the west by Iraq The chief city is Burujird It consists largely of mountain ranges rising to 12,800 ft and is inhabited mainly by the Bakhtiaris From Luristan came the Kassite conquerors of Babylonia The name also appears as Lorestan See Freya Stark, *The Valley of the Assassins* (1934)

Lurton, Horace Harmon, 1844–1914, American jurist, b Newport, Ky , grad Cumberland Univ , 1867, in law He had served in the Confederate army in the Civil War He became chief justice of Tennessee in 1893 and shortly afterwards was appointed a Federal judge He also taught law at Vanderbilt Univ , serving as dean of the law school (1905–10) In 1909 President Taft appointed him Associate Justice of the U S Supreme Court

Lusaka (lōōsä'ku), city (pop 10,336), capital of Northern Rhodesia (since 1935) In the early 20th cent it was developed from wilderness into a thriving trade center It is on a railroad to Salisbury, the capital of Southern Rhodesia, and to Elisabethville, in Katanga, Belgian Congo It has an airport Lusaka succeeded Livingstone as capital

Lusatia (lōōsā'shŭ), Ger *Lausitz* (lou'zĭts), Pol *Łużyce* (wōōzhl'tsĕ), region of E Germany, in NE Saxony, S Brandenburg, and Lower Silesia It extends N from the Lusatian Mts , at the Czechoslovak border, and W from the Oder The southern part is known as Upper Lusatia, the northern part as Lower Lusatia The Lusatian Neisse river separates the Russian-occupied and the Polish-administered parts of E Germany The region is largely forested and agricultural and has textile manufactures and lignite mines Bautzen, Cottbus, Görlitz, Sagan, and Zittau are the most important towns The Lusatians are descended from the Slavic WENDS, and part of the population, particularly in the SPREE FOREST, still speak Wendish and have preserved their traditional dress and customs The region was colonized by the Germans in the 10th cent and was constituted into the margraviates of Upper and Lower Lusatia Both margraviates changed hands frequently among Saxony, Bohemia, and Brandenburg Under the Treaty of Prague (1635) all of Lusatia passed to Saxony The Congress of Vienna awarded (1815) Lower Lusatia and a large part of Upper Lusatia to Prussia After the Second World War the Lusatian Wends (or Sorbs, as they are also called) sought unsuccessfully to obtain national recognition The population of Lusatia has been estimated at 1,000,000, less than half of whom speak Wendish.

Lusiads, The see CAMÕES, LUÍS DE

Lusignan (lūzēnyä'), French noble family, deriving its name from the castle of Lusignan in Poitou, built, according to legend, by the fair MELUSINE The family was powerful in the Middle Ages and ruled (13th–14th cent) the county of MARCHE One branch played a prominent role in the history of the Crusades GUY OF LUSIGNAN succeeded (1186) Baldwin V as king of Jerusalem; compelled (1192) to resign his title, he was invested by Richard I of England with the island of Cyprus His brother, AMALRIC II, succeeded him (1194) as king of Cyprus and was also king of Jerusalem His descendants continued to list the kingship of Jerusalem among their titles, and in 1342 they placed a branch of their line on the throne of Lesser Armenia (Cilicia), in 1375 the last Lusignan king of Armenia was overthrown by the Mamelukes, and the Lusignans of Cyprus added the empty title of king of Armenia to the equally empty one of king of Jerusalem Cyprus flourished under Lusignan rule until c 1370, but then began to decline and eventually became dependent on Venice and was obliged to pay tribute to Egypt The royal capital, Nicosia, was long a center of French medieval culture Famagusta, however, was ceded (1374) to Genoa as security for an indemnity to be paid in return for the release of King Peter II, whom the Genoese had captured It was later administered by the Bank of St George In 1460 Queen Charlotte was expelled by the half-Greek natural son of her late husband, John II The usurper became king as James II, recovered Famagusta (1464), and married the Venetian heiress Caterina CORNARO Their son, James III, died in 1474, and in 1489 Venice took over complete control of Cyprus

Lusin (lōō'sĭn'), 1881–1936, Chinese author, whose real name was Chou Shu-jen He left medical school in Japan to devote himself to literature, wishing to arouse the Chinese people from their cultural lethargy and isolation and to teach them the values of Western science and philosophy His character Ah Q satirizes petty tyranny and easy rationalizations to explain personal failure. Some of the tales appear in *Ah Q and Others* (Eng. tr. by Chi-Chen Wang, 1941).

Lusitania (lūsĭtā'nēū), Roman province in the Iberian Peninsula As constituted (c.5 A D) by Augustus it included all of modern central Portugal as well as much of W Spain It took its name from the Lusitani, a group of warlike tribes who, despite defeats, resisted Roman domination until their great leader, Viriatus, was killed (139 B C) by treachery In the 1st cent B C they joined in supporting Sertorius, who set up an independent state in Spain The old identification of Portugal with Lusitania and the ancestors of the Portuguese with the Lusitanians (hence Camões's great epic is called *Os Lusíadas*) is now largely ignored, but the creation of Lusitania may have had some faint echoing effect in the setting up of the separate kingdom of Portugal many centuries later

Lusitania, liner under British registration sunk without warning off the Irish coast by a German submarine on May 7, 1915 In the sinking 1,153 persons lost their lives, of whom 114 were American citizens A warning to Americans against taking passage on British vessels, signed Imperial German Embassy, appeared in morning papers on the day the vessel was scheduled to sail, but too late to accomplish its purpose The vessel was unarmed, though the Germans made a point of the fact that it carried guns and ammunition for the Allies The considerable sympathy for Germany which had previously existed in the United States in large part disappeared, and there was demand from many for an immediate declaration of war President Woodrow Wilson chose the course of diplomacy and sent to Germany a strong note asking for "reparation so far as reparation is possible " Germany refused to accept responsibility for the act in an argumentative reply, and subsequent notes became something of a debate Germany finally agreed to sink no more passenger liners without warning, and gradually the submarine campaign was relaxed The incident, however, had much to do with preparing the way for the United States to enter the First World War

Lusk, Graham (lŭsk), 1866–1932, American physiologist, b Bridgeport, Conn , grad Columbia (Ph B , 1887), Ph D Univ of Munich, 1891 He was professor of physiology at Yale (1895–98), at Bellevue Hospital Medical College (1898–1909), and at Cornell Univ Medical College (1909–32) A recognized authority on nutrition, he worked on amino acids, metabolism of fat, and animal calorimetry and wrote *The Elements of the Science of Nutrition* (1906) and *Nutrition* (1933)

Lusk, town (pop 1,814), co seat of Niobrara co , E Wyo , on the Niobrara river near the Nebr line and E of Casper, settled in the late 1880s, inc 1898 It is the trade center of a farm and livestock area

lusterware, a kind of pottery with an overglaze finish containing copper and silver in a metallic salt and exhibiting both luster and iridescence The process was known to Egyptians and Persians and in Europe from the 9th cent , the secret being lost in the 16th cent , but found c 1860 The ruby, gold, copper, and silver lusters range through varying shades of red, brown, and green and show depth and the glowing quality of metal The film producing this effect is applied over the glaze, and the ware receives a third firing in a special kiln at low temperature The process was used to enhance Italian majolica having a common lead glaze and has been employed for various kinds of chinaware, all prized by collectors in Europe and America

Lutcher (lŭ'chŭr), town (pop 2,167), SE La , near the Mississippi S of Baton Rouge, founded c 1890 by a lumber company The area produces sugarcane, perique tobacco, vegetables, and timber

lute, musical instrument, having a pear-shaped body, a fretted neck, and a variable number of strings, which are plucked with the fingers The long lute seems to have been the older instrument, existing very early in Egypt and the Near East The short lute was known in Spain as early as the 10th cent , having been brought there by the Saracens Its greatest development came in the 15th cent , and it was the chief European instrument of the late Middle Ages and the Renaissance In its larger forms, made in the 17th cent , it was called archlute, THEORBO, and *chitarrone* In the 18th cent the more easily tuned guitar supplanted it Its music was notated in TABLATURE

Luteri, Giovanni de see Dosso Dossi

Lutetia, see PARIS, France

lutetium (lōōtē'shēŭm), a rare element (symbol = Lu, for physical constants, see ELEMENT, table), a metal of the RARE EARTHS, very similar to YTTERBIUM It was discovered by Georges Urbain (1907) and independently by K A von Welsbach (1908)

Luther, Hans (hänz' lōō'tur), 1879–, German statesman As finance minister (1923–24) under Stresemann he aided Hjalmar SCHACHT in stabilizing the German currency He succeeded Wilhelm Marx as chancellor, heading two successive conservative coalition cabinets (1925–26) Stresemann, his foreign minister, negotiated the LOCARNO PACT in 1925. The election (1925) of Hindenburg as president was an important event Luther was succeeded as chancellor by Marx He was (1930–33) president of the Reichsbank and (1933–37) German ambassador to the United States

Luther, Martin, 1483–1546, German leader of the Protestant Reformation, b Eisleben, Saxony, of a family of small, but free, landholders There exists no detailed account of his early life, and much of the material available is drawn from Luther's own recollections His studies began at the age of five, and by 1505 he completed the master's examination at the Univ of Erfurt and began the study of law Several months later, in what seems to have been a sudden conversion, he entered a monastery of the Augustinian friars at Erfurt There, devoutly attentive to the services and the sacraments, he proceeded with an intensive study of the Scriptures and was ordained a priest in 1507 Assigned to the Univ of Wittenberg in 1508, he continued his studies and began to preach and lecture This period was the beginning of the intimacy between Luther and John von Staupitz, whose influence led Luther to say in 1531, "I have received everything from Staupitz " For Luther these years were times of grave doubt and spiritual agonizing, and they saw the beginning of the nervous insomnia and dyspepsia which weakened his physical condition throughout life His search for peace of mind, pursued through the Scriptures and the guidance of Staupitz, convinced him that the sinner's hope lay entirely in the grace of God and the redeeming work of Christ, accepted through faith In 1510 Luther was sent to Rome on business for his order, and there he was shocked by the spiritual laxity apparent in high ecclesiastical places Upon his return he completed the work for the theological doctorate and returned to Wittenberg as a professor In this way Wittenberg became the cradle of the Reformation, for here in the next few years his ideas were crystallized and were developed into action for the reconstruction of doctrine and the purification of church practices He devoted himself with increasing vigor to the work of the church, in 1515 becoming district vicar His indignation concerning the abuses of Church practices became public when, in 1517, he felt compelled to protest the dispensation of indulgences (see INDULGENCES) then being granted in Saxony by Johann TETZEL In the usual academic manner he posted (and challenged others to debate) his historic 95 theses on the door of the castle church, assuring himself of a wide hearing by selecting the Eve of All Saints The abuse of indulgences had been condemned by many Catholic theologians, but it had had great financial success, and ecclesiastical authorities had not halted it Luther's theses were widely distributed and read, finding sympathy among the exploited peasantry and among the civil authorities, who deplored the drainage of funds to Rome The theses had an immediate effect on the popularity of indulgences The propositions were brought to the attention of the pope, who ordered the head of the Augustinians to keep peace in his order Meanwhile Tetzel was committed to the struggle against Luther, and he found an able colleague in the controversialist Johann ECK Although Luther still considered his activities as directed toward reforms within the church, his opponents found his ideas heretical In the following years several attempts were made to reconcile Luther to the church, but the basis of compromise was lacking on both sides At a meeting with the papal legate at Augsburg in 1518 Luther refused to recant, and later in 1519 in a public disputation with Eck in Leipzig, he was forced to declare his stand as one at variance with some of the doctrines of the church As the break with Rome grew inevitable, Luther broadened his position to include a widespread program of reform In his *Address to the Nobility of the German Nation* he supported the new nationalism by advocating German control of German ecclesiastical matters and urged recognition of the authority of civil rulers He attacked usury and commercialism and recommended a return to a primitive agrarian society The ire of Catholic theologians was further aroused with the publication of *The Babylonian Captivity of the Church*, in which Luther, in an uncompromising attack on the papacy, denied the authority of the priesthood to mediate between the individual man and his God and rejected the sacraments except as aids to faith He followed this work with a tract entitled *The Freedom of a Christian Man* in which he presented a new ideal of piety—that of the Christian man, free in conscience by virtue of faith and charged with the duty of conducting himself properly in a Christian brotherhood Emphasis was laid on justification by faith alone By the time the papal bull *Exsurge Domine*, condemning his views and threatening excommunication, reached Germany, Luther's position was well understood and widely supported In a dramatic renunciation of papal authority Luther held a public burning of the bull and of the canon law In 1521 formal excommunication was pronounced In the same year Luther was given a safe-conduct and was summoned before the Diet of Worms The opinions at the diet were divided, but when an edict of the diet called for the seizure of Luther, his friends placed him for safekeeping in the Wartburg, the castle of Elector Frederick III of Saxony There he translated the New Testament into Ger-

man and began the translation of the entire Bible, a work not completed until 10 years later At Wittenberg during this time the iconoclasts under CARLSTADT had instituted radical changes, greatly deplored by Luther and the elector. Fearing that his movement was endangered, Luther disregarded his personal safety and returned to Wittenberg, where he spent most of the remainder of his life organizing and spreading the new gospel Luther suffered a loss of popular appeal when he violently opposed the PEASANTS' WAR of 1524–25, which had been fostered in part by the spirit of liberation and revolt that Luther himself had displayed His stand was further weakened by a break with the humanists brought about by Erasmus' work, *Freedom of the Will* Nevertheless, through his forceful writings and preaching his doctrines spread to many towns and free cities, strengthened by the support of many German nobles The Augsburg Confession (see CREED), a basic doctrine of the Lutheran Church, was written and presented by Philipp MELANCHTHON at the Diet of Augsburg in 1530 with the sanction of Luther, who was not permitted to attend At about this time the control of the Lutheran Church more or less passed into the hands of the Protestant princes, and Luther devoted himself to matters of faith and worship In 1525 he had married a former nun, Katharina von Bora, and his family grew to include six children His closest friends and associates, Melanchthon and Justus JONAS, shared his work and companionship and, after the death of Elector Frederick, he enjoyed the active championship of JOHN FREDERICK I, who succeeded to the electorate Luther worked actively to build a competent educational system and wrote widely on church matters, including the composition of hymns (both words and music), a liturgy, and two catechisms which are basic statements of the Lutheran faith His uncompromising attitude in regard to doctrinal matters helped to break up the unity of the Evangelical church, which he was anxious to preserve, the controversy with ZWINGLI and later with Calvin over the LORD'S SUPPER (and over predestination) divided Protestants into the Lutheran Church and the Reformed Churches The cause of the Reformation was somewhat further shaken when Luther was persuaded to condone the second marriage of PHILIP OF HESSE During the last years of Luther's life he was troubled with increasing ill-health and the plagues of political and religious disunion within the nation He died in Eisleben and was buried at Wittenberg, leaving behind an evangelical doctrine that has spread throughout the Western world and marked the first break in the unity of the Catholic Church In Germany his socio-religious concepts laid a new basis for German society His writings, in forceful idiomatic language, helped to fix the standards of modern German Luther's works have been published frequently and in many languages, the first attempt at an edition of them was in 1539–58 See biographies by Preserved Smith (1911), A C McGiffert (1911), and A Ehrhardt (1946), L H Waring, *The Political Theories of Martin Luther* (1910), Heinrich Boehmer, *Luther and the Reformation in the Light of Modern Research* (Eng tr, 1930), Joseph Clayton, *Luther and His Works* (1937), Heinrich Boehmer, *The Road to Reformation* (Eng tr, 1946), E M Carlson, *Reinterpretation of Luther* (1948), E M Plass, *This Is Luther* (1948), H H Kramm, *The Theology of Martin Luther* (1949)

Lutheranism. Since the 16th cent the name Lutherans has been used to designate those Protestants whose religious faith is based on the principles of Martin LUTHER, although he opposed such a designation When it became apparent to Luther that the reforms he desired could not be carried out in the Roman Catholic Church, he devoted himself to questions of faith rather than form in the new "Evangelical" churches that developed His was the conservative attitude, as distinguished from the views of the Reformed (Calvinistic) communions His major departures from Roman Catholic doctrine rest on these beliefs the Scriptures contain the one necessary guide to truth, and it is the right of the individual to reach God through them with responsibility of his individual conscience to God alone, salvation comes through divine grace alone, available to man through the redeeming work of Christ, and the sacraments are valid only as aids to faith In addition to the Apostles', Nicene, and Athanasian creeds, the principal statements of faith are found in Luther's two catechisms, the Augsburg Confession, the Apology of the Augsburg Confession, the Schmalkald Articles, and the Formula of Concord These are all included in the Book of Concord (1580), in them the fundamental doctrine is justification by faith. Baptism was counted necessary for regeneration, but no form was specified As to manner of worship, Luther chose to retain altars and vestments, he prepared an order of service liturgical in form, but with the understanding that no church is bound to follow any set order, there is no uniform liturgy belonging to all branches of the Lutheran body Characteristically however, an important place is given to preaching and to congregational singing Luther's own hymns, *Ein' feste Burg* and many others, gave impetus to this custom. Matters of administration and organization were worked out by others. To achieve order, superintendents over districts were appointed to work in cooperation with the secular rulers In general, a synodical form of organization was developed, but the relations of individual churches to the synods and conferences rest with their own decisions The unity of the Church is a unity of doctrine rather than of organization In Germany, Lutheranism was in close association with the political life In its early years there were many struggles to decide controversies within its own membership and to reach agreement with the Reformed churches Temporal authorities took part in these matters With doctrinal orthodoxy secured, a period of quiet followed, interrupted toward the end of the 17th cent by the influence of Pietism When in 1817, under Frederick William III of Prussia, a union between Lutheran and Reformed churches was accomplished and the new ecclesiastical body was adopted as the national Church, a large group remained outside the union These came to be known as the "Old Lutherans" In the unification of German culture under the Nazi regime, the Church did not escape In 1933 a national organization, the German Evangelical Church, including some 28 separate state churches was formed This attempt to consolidate the Protestant bodies of Germany, both Lutheran and Reformed (except for the small, scattered "Free" churches) was placed under the direction of a pro-Nazi church official He and the Nazi church group, the "German Christians," proceeded to try to develop a national, racial church, in which Aryan blood in one's veins was a qualification for membership and position Although the claim was made that reorganization alone was intended, it became apparent that the issues also deeply concerned doctrines and the confession A revolt, led by several thousand Protestant pastors, among whom was Martin Niemoeller, resulted in the formation of the Confessional Synod, which issued (1934) at Barmen its principles of rejection of the Reich interference with the Church In 1935 a law was promulgated which created the post of Reich Minister for Church Affairs, with absolute authority over the German Evangelical Church Another element in the controversy was added when the "German Faith" movement, allied with the neo-pagan philosophy of Alfred Rosenberg, began its rapid spread in 1936 After the end of the Second World War, the German Evangelical Church abandoned its Nazi-inspired constitution of 1933 and undertook reorganization The Lutheran Church is the established state church of Denmark, Iceland, Norway, Sweden, and Finland In North America, Lutherans from the Netherlands were among the settlers on Manhattan island in 1625 A congregation was formed there in 1648, but it was antedated by one established (1638) by Swedish settlers at Fort Christina (Wilmington) on the Delaware river On near-by Tinicum Island the first Lutheran church building in the country was dedicated in 1646 Early in the 18th cent exiles from the Palatinate established German Lutheran churches in New York, Pennsylvania, Delaware, and Maryland The Salzburger migration to Georgia (1734) introduced Lutheranism in the South In the 18th cent organization of the churches was begun by Heinrich Melchior MÜHLENBERG, who brought about the formation (1748) in Pennsylvania of the first synod in the country The Synod of New York and adjoining states followed (1786), that of North Carolina was created in 1803 With the settlement of the West and the Northwest, many small synods were formed by Norwegians, Danes, Finns, and other racial groups At the present time, many of the Lutheran churches of the United States are included in several conferences and synods In almost all cases, the congregation is regarded as the unit of organization and the seat of authority The Lutheran World Federation (1947), a continuation of the Lutheran World Convention (1923), publishes *The Lutheran World Review* in English and German editions See L Fuerbringer, T Engelder, and P E Kretzmann, eds, *The Concordia Cyclopedia* (1927), A R Wentz, *The Lutheran Church in American History* (2d ed, rev, 1933), L P Qualben, *The Lutheran Church in Colonial America* (1940), Edmond Vermeil, K J Hahn, and Gabriel Le Bras, *The Churches in Germany* (1949)

Luther College, at Decorah, Iowa, Evangelical Lutheran, coeducational since 1936, opened 1861, chartered 1865 (see LARSEN, PETER LAURENTIUS) Its concert band is noted The college is a center of Norwegian-American culture

Luton (lo͞o'tun), municipal borough (1931 pop 68,523, 1947 estimated pop 109,530), Bedfordshire, England, on the Lea river and NNW of London, at the southern base of the Chilterns It is the center of the straw-plaiting industry in England, established here in the time of James I, there is a great straw-plait market hall The city has engineering works and other industries

Lutsk (lo͞otsk), Pol. *Łuck* (wo͞otsk), city (1931 pop 35,700), capital of Volyn oblast (see VOLHYNIA), W Ukraine, on the Styr river. Today an agricultural market center, it was allegedly founded before the 11th cent and was the seat of the princes of Volhynia in the Middle Ages It passed to Russia in 1795, was restored to Poland in 1921, and was again ceded to Russia in 1945 In the Second World War the overwhelmingly Jewish population suffered much under German occupation

Lutter am Barenberge (lo͞o'tûr ăm bä'runbĕrgû), market town (pop 2,547), central Germany, near Brunswick Here in 1626 Tilly defeated Christian IV of Denmark in the Thirty Years War

Lutyens, Sir Edwin Landseer (lŭ'chənz, lŭ'tyənz), 1869–1944, English architect He began his career designing small houses in Surrey and later executed a long series of large country establishments, many of them complete with their furniture and gardens In these works he developed a style of domestic architecture based upon traditional English design and craftsmanship yet highly individual The noteworthy public achievement of his career was the planning of New Delhi, India, which included the design of the palace for the viceroy Among his principal works are the Cenotaph in London and other war memorials, including those at Manchester and Johannesburg, South Africa, domestic and public buildings at Hampstead garden suburb, Hampton Court bridge, and the British embassy at Washington, D C He was knighted in 1918

Lützelburger, Hans (hänz' lü'tsulbo͞orgûr), d 1526, German wood engraver, also called Hans Franck Although he is regarded as one of the greatest wood engravers of all time, very little is known of his life Lützelburger is best known as the engraver of the designs of Holbein, the younger, notably the *Dance of Death* and illustrations for the Bible His name is also printed under a large and curious woodcut, *Peasants Fighting with Nude Men in a Wood* His work is remarkable for its accuracy, clarity, and delicacy

Lützen (lüt'sun), town (pop 5,739), in the former Saxony prov of Prussia, E Germany, SW of Leipzig Here in the Thirty Years War Gustavus II of Sweden defeated (1632) Wallenstein, but fell in the battle, Pappenheim, on the imperial side, was also mortally wounded In 1813 Napoleon I defeated the Russian and Prussian forces at near-by Grossgörschen (also written Gross Gorschen)

Lützow, Adolf, Freiherr von (ä'dôlf frī'hĕr fŭn lü'tsō), 1782–1834, Prussian officer He commanded a volunteer corps, the Black Troops or Black Rifles, against Napoleon I in 1813–14 The corps was distinguished for its daring exploits, which were glorified by the poet Körner, one of its members

Luverne (lo͞ovûrn') **1** Town (pop 2,243), co seat of Crenshaw co, S Ala, on a branch of the Conecuh, in a farm area, inc 1891 **2** City (pop 3,114), co seat of Rock co, extreme SW Minn, on the Rock River, settled 1867, platted 1870, inc as a village 1877, as a city 1904 It is in a farm area, and there are granite quarries near by

Luxembourg, François Henri de Montmorency-Bouteville, duc de (frāswä' äNrē' du mômôräNsē'-bo͞otvēl' duk du lüksäbo͞or'), 1628–95, marshal of France Under his cousin, the Great Condé, he served in the FRONDE and in the conquest of Franche-Comté (1668) and distinguished himself in the Dutch War Though at first unsuccessful as the successor of Turenne on the Rhine (1676), he shared in the victory of Cassel (1677) Commanding the army in Flanders in the War of the GRAND ALLIANCE, he won three battles on which his reputation chiefly rests, Fleurus (1690), Steenkerke (1692), and Neerwinden (1693)

Luxemburg (lŭk'sumbûrg, Fr lüksäbo͞or', or **Luxemburg** (lo͞ok'sumbo͞orgûrg, Ger lo͞ok'sumbo͞ork), grand duchy (999 sq mi, pop 290,992), W Europe Roughly triangular, it borders on Belgium in the west, Germany in the east, and France in the south The city of Luxembourg is the capital In the prevailing Low German dialect the name of Luxembourg is Letzeburg French is the official, German the literary, language Luxembourg is drained by the Sauer and Alzette rivers, both tributaries of the Moselle, which forms part of its eastern border The Ardennes mts extend into N Luxembourg The southwestern section is part of the Luxembourg-Lorraine iron-mining basin and is of international importance, Esch is its main center Despite its smallness, Luxembourg ranks sixth among the steel-producing countries of Europe outside the USSR (after England, Germany, France, Belgium, and Czechoslovakia) Agriculture and cattle raising are, next to iron and steel, the main resources Luxembourg is linked by rail with its neighbors and has excellent highways It has been united since 1922 with Belgium in a customs union, the Luxembourg franc is on par with the Belgian currency The grand duchy is a constitutional monarchy, with a bicameral legislature, the upper chamber being appointed by the sovereign and the lower chamber elected by direct universal suffrage Roman Catholicism is the prevailing religion. The county of Luxembourg (originally named Lützelburg) emerged in the 10th cent. Extending between the Meuse and Moselle and including the present Belgian Luxembourg prov., it was one of the largest fiefs in the Holy Roman Empire and rose into

prominence when its ruler was elected emperor as HENRY VII in 1308 His son was JOHN OF LUXEMBURG, king of Bohemia, the father of Emperor CHARLES IV, who made (1354) Luxembourg a duchy The elder line of the house continued in Bohemia and the empire with Emperors Wenceslaus and Sigismund, while the younger line, issued from Charles's brother, Duke Wenceslaus, continued in Luxembourg (The French noble family of Luxembourg, descended in collateral line from an early count of Luxembourg, was only remotely related to either ruling line) In 1443 Philip the Good of Burgundy seized the duchy, and in 1451 he was confirmed in possession by the estates of Luxembourg With the other Burgundian holdings in the Low Countries, Luxembourg passed (1482) to the house of Hapsburg on the death of Mary of Burgundy For the following three centuries it shared the history of the S Netherlands (see NETHERLANDS, AUSTRIAN AND SPANISH), passing from Spanish to Austrian rule in 1714. Several western border areas, including Montmédy, Thionville, and Longwy, were ceded to France in the Peace of the Pyrenees (1659), in 1684 Louis XIV seized Luxembourg, but he was obliged to restore it in the Treaty of Ryswick (1697) Occupied by the French in the French Revolutionary Wars, the duchy was formally ceded to France in the Treaty of Campo Formio (1797) The Congress of Vienna (1814–15) made Luxembourg a grand duchy, in personal union with the Netherlands, at the same time, Luxembourg became a member of the German Confederation, and its capital was made a federal fortress garrisoned by Prussian troops When in 1830 the Belgians rebelled against William I of the Netherlands, Luxembourg shared in the revolt and thus became the cause of international complications Belgium, on gaining its independence, claimed the entire grand duchy, it finally obtained (1839) the major part, i e , the present Belgian Luxembourg prov , where French is the predominating language The remainder continued in personal union with the Netherlands and as a member of the German Confederation Its status was again doubtful when the German Confederation was dissolved in 1866 William III of the Netherlands agreed to sell the grand duchy to France, a project which nearly led to war between France and Prussia At the London Conference of 1867 the European powers declared the grand duchy a neutral territory, its fortress was dismantled and the Prussian garrison withdrawn William III died (1890) without male heir, while his daughter Wilhelmina succeeded him in the Netherlands, Duke Adolf of NASSAU, of a collateral line, became grand duke of Luxembourg He was succeeded (1912) by his daughter, Marie Adelaide In 1914 Germany violated the neutrality of Luxembourg and occupied the grand duchy for the duration of the First World War Grand Duchess Marie Adelaide abdicated in 1919 in favor of her sister, Charlotte, who married Prince Felix of Bourbon-Parma Germany once again invaded (May, 1940) neutral Luxembourg in the Second World War The grand duchess and her cabinet fled abroad, and a government in exile was established at London Allied troops liberated Luxembourg in Sept , 1944 One of the United Nations, Luxembourg joined (1947) with Belgium and the Netherlands in a close economic and political alliance, the Benelux bloc A constitutional revision (1948) abolished the perpetual neutrality of the grand duchy, a status which in fact had ended in Nov , 1944, when compulsory military service was introduced Luxembourg joined in the Five-Power Pact (1948) with England, France, Belgium, and the Netherlands and took part in the European Recovery Program and the North Atlantic Pact In internal policy, the Christian Socialist party was predominant in the post-war years

Luxembourg, Flemish and Ger *Luxemburg*, province (1,706 sq mi , pop 213,252), SE Belgium, in the ARDENNES, bordering the grand duchy of Luxembourg in the east and France in the south Arlon is the capital Heavily forested, it is important chiefly for its cattle and for its steel industry in the southern section, which is part of the Luxembourg-Lorraine industrial district The population is mostly French-speaking, but there is a large German minority The province was detached from the grand duchy of Luxembourg (see separate article) in 1839

Luxembourg or **Luxemburg,** city (pop 61,996), capital of the grand duchy of Luxembourg It is a picturesque old place on a rocky height above the Alzette river It grew around the 10th-century castle which gave it its name and was a strong fortress until 1867 Luxembourg's city hall dates from the 16th cent

Luxembourg Palace, large Renaissance palace, Paris, France, on the left bank of the Seine near the Sorbonne It was built (1615–20) for Marie de' Medici by Salomon de Brosse on the site of a former palace belonging to the duke of Piney-Luxembourg (hence its name), and it was enlarged in the 19th cent. The palace houses the council of the republic (formerly the senate) of France It was used for the Paris Peace Conference of 1946 It contains valuable paintings, but the collection of contemporary art, long exhibited at the Luxembourg, has been moved to another building. The panels painted by Rubens for the Luxembourg Palace are now at the Louvre The beautiful Luxembourg Gardens are a favorite playground for children and, by long tradition, a favorite walk for the students and professors of the Sorbonne

Luxemburg, Rosa (rō'zə lōōk'sumbōōrk), 1870?–1919, German revolutionist, b Russian Poland As a result of her political activities, she fled to Switzerland, where she was converted to Marxism She acquired German citizenship through marriage and was soon a leader in the German Social Democratic party Although small and crippled, she distinguished herself as an active revolutionist and as a brilliant writer and orator She participated in the revolution of 1905 in Russia, and with Karl LIEBKNECHT she founded the SPARTACUS PARTY in Germany in the First World War Rosa Luxemburg advocated the general strike as a revolutionary weapon and regarded military dictatorship as the necessary preliminary to dictatorship of the proletariat She was in protective custody during the greater part of the First World War Released upon the outbreak of the revolution (1918), she aided in the transformation of the Spartacists into the German Communist party and with Liebknecht edited its organ, *Die rote Fahne* For their part in the Spartacist uprising in Berlin she and Liebknecht were arrested (Jan , 1919) While being taken to prison, they were killed by soldiers See Paul Frolich, *Rosa Luxemburg* (1940)

Luxemburg, grand duchy and city see LUXEMBOURG

Luxeuil (lüsœ'yu), former abbey, E France It was founded in 590 by St COLUMBAN on the site of a Roman town destroyed (451) by Attila, later in Franche-Comté and now in the Haute-Saône dept The rule of Columban was soon replaced by that of St Benedict Though constantly troubled by the interference of the Merovingian kings, the monks of Luxeuil were important in upholding Christianity The abbey, devastated (c 732) by the Saracens, was rebuilt by Charlemagne and soon became one of the early centers of medieval learning, its abbots came to rank as princes of the Holy Roman Empire The French Revolution secularized the abbey, around which the town of **Luxeuil-les-Bains** (-lābē') (pop 5,264) had grown It has been a watering place since Roman times

Luxor (lŭk'sôr, lōōk'sôr), town (pop 18,664), central Egypt, on the Nile It is a mile W of KARNAK and occupies part of the site of THEBES The temple of Luxor, the greatest monument of antiquity in the town, was built in the reign of AMENHOTEP III as a temple to Amon The temple was 623 ft long It was much altered by succeeding Pharaohs, especially by Ramses II, who had many colossal statues of himself erected on the grounds In early Christian times the temple was made into a church, and later a shrine to a Moslem saint was built in the great hall See A M Blackman, *Luxor and Its Temples* (1923)

Luxora (lōōksô'rə), cotton town (pop 1,258), NE Ark , just W of the Mississippi river, founded 1882

luxury tax, tax on articles considered luxuries Such taxes may be intended to discourage consumption of certain articles, as the tax on French lawns and laces in the 18th cent in England, or they may be imposed for revenue purposes on articles deemed least necessary In modern times such "conventional necessities" as alcohol, tobacco, jewelry, furs, amusements, private automobiles, and candy have been included In the United States, luxury taxes have been levied frequently, especially in wartime

Luynes, Charles d'Albert, duc de (shärl' dalbĕr' dük' du lüēn'), 1578–1621, constable of France, minister and favorite of Louis XIII With the king's collaboration, he caused the assassination of CONCINI (1617), took over the government, and forced MARIE DE' MEDICI into exile His power was twice threatened (1619, 1620) by the activities of Marie and her partisans among the nobles He died in the course of a campaign against the rebellious Protestants of Béarn

Luz. 1 Place in Palestine, apparently to be identified with BETHEL Gen 28 19, 35 6, 48 3, Joshua 16 2, 18 13, Judges 1 23 **2** City, N Palestine Judges 1 26

Luzán, Ignacio de (ēgnä'thyô dā lōōthän'), 1702–54, Spanish scholar and critic, studied Greek, Latin, and the humanities in Italy From 1747 to 1749 he lived in Paris as secretary in the Spanish embassy Luzán owes his fame to *La poética* (1737), in which he sets down the neoclassical rules and principles which should govern the art of poetry. About one third of the book is a critical study of the Spanish drama Luzán influenced greatly the taste and the literary expression of his contemporaries

Luzern, Switzerland see LUCERNE

Luzerne (lōōzûrn'), anthracite-mining borough (pop 7,082), NE Pa , near Wilkes-Barre, inc 1882

Luzon (lōōzŏn'), island (40,420 sq mi , pop 7,374,798), largest and most important of the Philippine Islands The irregular coast line provides several fine bays, notably Manila Bay, with Manila, the capital of the republic, on its shores The Sierra Madre, a great mountain range, parallels part of the east coast, the best known of the active volcanoes are Mt Mayon and Mt Taal, both in the south Laguna de Bay and Taal are the only large lakes Watered by the Cagayan, Pampanga, Agno, and other rivers, Luzon has rich agricultural areas producing sugar cane, rice, cotton, hemp, tobacco, and coffee There are deposits of gold, iron, copper, manganese, and chromite, but the mining industries are relatively undeveloped Predominantly Christian, the native inhabitants are principally Ilocanos and Tagalogs The Hukbalahaps, a dissident group in central Luzon caused civil unrest in 1946–48 In the Second World War, Luzon was invaded by the Japanese on Dec 10, 1941, and in early 1942 the Allied forces made their last stand on BATAAN peninsula and CORREGIDOR Luzon was regained in early 1945 after a successful landing on the west coast at Lingayen Gulf and Subic Bay

Luzzatti, Luigi (lwē'jē lōōt-tsät'tē), 1841-1927, Italian statesman and economist As minister of finance in several cabinets and as premier (1910–11) he promoted liberal legislation and was noted especially for his advocacy of peoples' banks and minority rights He also secured 24 commercial treaties, one of which (1898) ended the Franco-Italian tariff struggle One of his books (pub 1909) was translated as *God in Freedom* (1930)

Luzzatto, Moses Hayyim (hä'yĕm lōōt-tsät'tō), 1707–47, Hebrew playwright, poet, and mystic, a leader of the renaissance of Hebrew literature, b Padua At the age of 17 he wrote *Samson and Delilah*, a drama in verse His finest work is the allegorical *Glory to the Righteous* (1743)

Lvov, Prince Georgi Yevgenyevich (gĕôr'gē yĭvgā'nyuvĭch lyuvôf'), 1861–1925, Russian statesman A liberal, he played a prominent part in the development of the ZEMSTVO system of local self-government He was a deputy of the Constitutional Democratic party in the Duma and chairman of the all-Russian union of zemstvos when the RUSSIAN REVOLUTION of Feb , 1917, placed him at the head of the provisional Russian government after the abdication of Nicholas II Lvov's idealism and fear of violence made him particularly unfit for coping with the turbulent situation While he sought to organize a constitutional and democratic government on the basis of the zemstvo system, the Social Democrats gained the actual power by organizing and dominating the workers' and peasants' councils (soviets) Agitation for peace with the Central Powers forced (May, 1917) the resignation of the foreign minister, MILYUKOV, and Lvov formed a second government After a Bolshevik uprising was suppressed (July, 1917), Lvov resigned and a moderate Socialist government under KERENSKY was organized Lvov subsequently escaped from the Bolsheviks and settled in Paris, where he died

Lvov (lyuvôf'), Ger *Lemberg* (lĕm'bĕrk), Pol *Lwów* (lvôōf), city (1931 pop 316,177), capital of Lvov oblast, W Ukraine, in the northern foothills of the Carpathians It is a major transportation center and has numerous industries (machinery, textiles, electrical apparatus, chemicals, food processing, and oil refining) Lvov is the seat of a university (founded 1658) and of several technical institutes Founded c 1250 by a prince of GALICIA, the city became a great medieval commercial center on the trade route from Vienna to Kiev It was a Polish stronghold against invasions from the east and underwent numerous sieges by the Tatars, Turks, Cossacks, Russians, and Swedes After the first partition of Poland (1772) Lemberg was the capital of Austrian Galicia It was lost and retaken (1914, 1915) by the Austrians in the First World War In 1918 it became the capital of the short-lived Ukrainian republic, but in 1919 it was taken by Poland, and in 1921 it was confirmed in Polish possession by the Treaty of Riga between Poland and the USSR Lvov, in a largely Ukrainian area, was claimed and annexed to the Ukraine by the USSR after the invasion of Poland (1939) From 1941 to 1944 it was occupied by German troops, most of its pre-war Jewish population (c 100,000) was exterminated In 1945 Poland formally ceded Lvov to Russia Among the ancient buildings of Lvov are its 16th-century palace and three cathedrals (two dating from the 14th cent)

Lwow, Ukraine see LVOV

Lyakhov Islands (lyä'khuf), area 2,660 sq mi , southern group of the NEW SIBERIAN ISLANDS, between the Laptev Sea and the East Siberian Sea, Yakut ASSR, RSFSR They include Bolshoi Lyakhov, Maly Lyakhov, and Stolbovoi islands and are separated from the Anjou group of the New Siberian Islands by Sannikov Strait and from the mainland by Dmitri Laptev Strait They were discovered (1770) by Lyakhov, a Russian merchant

Lyall, Sir Charles James (līəl), 1845–1920, British Orientalist and civil servant in India. He held various offices in India and became chief commissioner of the United Provs (1895-98), later he held an important post in the India Office in London (1898–1910) He received (1897) the Star of India Sir Charles was a successful student and

translator of Arabian poetry. His works include *Translations of Ancient Arabian Poetry* (1885, 1930), *The Diwan of Abid ibn al-Abras* (1913), *The Poems of Amr Son of Qamiah* (1919), *The Mufaddaliyat* (1921)

Lyautey, Louis Hubert Gonzalve (lwē' ūbĕr' gōzälv' lyōtā'), 1854–1934, marshal of France He served in Indo-China, Madagascar, and Algeria before being sent (1912) to Morocco as French resident general. With a brief interruption in 1916–17, when he was French war minister, Lyautey devoted the next 13 years to building up the French administration in the protectorate, developing its economy and resources, extending its borders, and pacifying native resistance During the First World War he maintained French rule over Morocco though much of his force was withdrawn to fight elsewhere A skillful diplomat as well as a soldier, he may be said to have created modern Morocco and to have been one of the most successful colonial administrators of all time See André Maurois, *Lyautey* (Eng tr , 1931)

lycanthropy (līkăn'thrupē) [from Gr ,=wolf-man] The belief that a man can by WITCHCRAFT or MAGIC take on the appearance and characteristics of an animal has been widespread in space and time Certain African tribes have their "leopard-men" and the like, totems are related to the idea, and folklore from literatures all over the world have tales of men changing to animals and vice versa One of the widest of these beliefs is the belief in the werewolf (called also turnskins and, in French, the *loup-garou*), a werewolf being a man or woman who either willingly or unwillingly changes to a wolf and eats human flesh or drinks human blood, then returns to his human form One of the most celebrated historic cases of the werewolf is said to have been Elizabeth Bathory The belief in the VAMPIRE is related The morbid desire for eating human flesh that appears in certain extreme psychoses is also called lycanthropy

Lycaonia (lĭk'kā'nēu), ancient country of S Asia Minor, between Galatia and Cilicia on the north and south and Phrygia and Cappadocia on the west and east Passing successively to the Persians, Syrians, and Romans, it was divided by the Romans between Galatia and Cappadocia It was visited by Paul and Barnabas (Acts 14), as were the near-by Lystra and Derbe

Lyceum (līsē'um), gymnasium of ancient Athens Here Aristotle was accustomed to teach, hence the extension of the term *lyceum* to Aristotle's school of philosophers, the Peripatetics

lyceum (līsē'um, lī'sēŭm) The National American Lyceum for the dissemination of information on the arts, sciences, history, and public affairs developed from the lectures given by Josiah Holbrook in 1826 when he founded the first lyceum group in Millbury, Mass The movement spread through groups formed in other states, and for 40 years the lyceum was a powerful force in adult education, social reform, and political discussion Many of the ablest leaders of the time lectured to lyceum audiences, and public interest in general education was greatly stimulated The movement waned after the Civil War, but its function was later performed by the CHAUTAUQUA MOVEMENT See J. F Noffsinger, *Correspondence Schools, Lyceums, Chautauquas* (1926), C B Hayes, *The American Lyceum* (1932)

Lycia (lī'shŭ), ancient country, SW Asia Minor It is a mountainous promontory, never politically important In historic times it was held by the Persians, the Seleucids, and the Romans (from 189 B C) Its chief towns, Patara and Myra, were visited by St. Paul (Acts 27 5) Ruins include rock-cut tombs and Grecian sculptures

Lycomedes (lĭk'ŭmē'dēz), in Greek legend, king of Skyros He killed Theseus, who had been banished to Skyros Achilles in disguise hid among the women at Lycomedes' court and became the father of Neopotolemus by Lycomedes' daughter, Deidamia

Lycophron (lī'kufrŏn), fl 3d cent B C , Alexandrian Greek poet and grammarian, one of the Pleiad. His extant poem, *Cassandra* or *Alexandra*, is an occult and difficult work Anciently his tragedies were highly esteemed

Lycopolis (lĭkŏ'pulĭs), ancient city of Upper Egypt, replaced by the modern Asyut

Lycurgus (lĭkŭr'gŭs), traditional name of the reformer of the Spartan constitution According to a standard hypothesis he lived in the 7th cent B C. at the time when a revolt of the Messenian subjects nearly ruined Sparta Lycurgus led a reform in the government and in the city's social system to establish a machine of war which would preclude further trouble from the helots and other subjects Some features of the unique Spartan system were certainly more recent than 600 B C , and Lycurgus may be mythical.

Lycurgus, c 396–c 325 B C , one of the 10 Attic orators of the Alexandrian canon, pupil of Isocrates. An able and honored public official, he administered the state finances from 338 to 326 B C and led (with Demosthenes) the anti-Macedonian party One of his official acts ordered the editing and preserving of the works of Aeschylus, Sophocles, and Euripides. A single oration (*Against Leocrates*) is extant. See R. C. Jebb, *The Attic Orators* (1893)

Lydd (lĭd), municipal borough (pop 2,778), Kent, England It is 3 mi inland from Romney, one of the Cinque Ports, of which Lydd is a "member." There is a military camp near, and the name lyddite has been given to an explosive (see PICRIC ACID)

Lydda (lĭ'du), Arabic *Ludd*, city (pop over 10,000), central Israel, 9 mi SE of Jaffa and with connections by road to Jerusalem The city was probably of Hebrew foundation, its name in the Old Testament is Lod. 1 Chron 8 12, Ezra 2 33, Neh 7 37, 11 35 In A D 66 it was burned by Cestius Gallus and two years later was again destroyed by Vespasian Hadrian rebuilt the city and named it Diospolis In the 5th cent it was the seat of a bishop Birthplace of St George, it contained a church in his honor It was occupied by the Crusaders in 1099, destroyed by Saladin in 1191, and rebuilt by Richard Cœur de Lion Lydda was the scene of Peter's healing of the paralytic Acts 9 32 The city today has a major airport used by planes flying between Europe and the Far East There was heavy fighting here between Israelis and Arabs in 1948

lyddite · see PICRIC ACID.

Lydekker, Richard (lĭdĕ'kŭr), 1849–1915, English naturalist, educated at Cambridge He was an authority on fossil mammals, which he first studied while with the Geological Survey of India (1874–82) He compiled for the British Museum catalogues of its fossil mammals, birds, and reptiles. He wrote many books and edited the *Royal Natural History* (6 vols , 1893–96)

Lydgate, John (lĭd'gāt), c 1370–c 1450, English poet A monk of Bury St Edmunds, he was one of the most voluminous English writers of the Middle Ages Little is known of his life His principal works are *The Fall of Princes* (c 1430), perhaps the best of his longer works, *The Siege of Thebes* (1420–22), designed as a story supplementary to Chaucer's *Canterbury Tales*, the *Troy Book* (1412–20), and *The Temple of Glass*, an allegory of love He also wrote much minor verse in varying keys—satirical poems such as *London Lackpenny*, fables, saints' lives, and religious, moral, and occasional poems A professed disciple of Chaucer, Lydgate was one of the most influential poets of his time and was perhaps even more highly esteemed than Chaucer See his *Minor Poems* (ed by H N McCracken, 1911–34)

Lydia (lĭ'dēŭ), Christian convert at whose house in Philippi Paul stayed She was from Thyatira Acts 16 14–40

Lydia, ancient country, W Asia Minor, extending W from the Aegean and occupying the valleys of the Hermus and Cayster rivers Traditionally the dynasties of rulers were three the Atyadae, ending before 1220 B C , the Heraclidae, lasting about 500 years, and the Mermnadae, who took the throne when Gyges seized power in 687 B C Only in the last dynasty was Lydia important The little kingdom grew to an empire in the chaos that had been left after the fall of the Hittites Lydia was proverbially golden with wealth, and the capital, SARDIS, was magnificent To Lydian rulers is ascribed the first use of coined money Their civilization was high, and there were close connections with the Greek cities of Asia, which were for a time within the Lydian empire. The last ruler was CROESUS, who was defeated (before 540 B C) by Cyrus of Persia Lydia was then absorbed into the Persian Empire

Lydia, Mount, Turkey see MYCALE

lye, name used for several substances which are strongly alkaline in solution Today in the United States it commonly indicates the caustic alkali sodium hydroxide (caustic SODA) This substance is very similar to potassium hydroxide (caustic potash) Lye (sodium hydroxide) is used in the manufacture of hard soaps, reacting with a fat to form soap and glycerine, in textile manufacture, in the canning industry, in tanning leather, and in the refining of petroleum Sodium hydroxide is prepared commercially by the electrolysis of common salt It is soluble in water, is a good conductor of electricity, and causes the destruction of animal tissue Lye can seriously harm the human skin, vinegar is a handy first-aid remedy Lye attacks aluminum containers rapidly It dissolves wool, but not cotton, and is used consequently in testing for wool Originally the term *lye* was used, as it still is to some extent, for the aqueous solution of potassium carbonate obtained by treating wood ashes with water ("leaching") This solution is less strongly alkaline than sodium hydroxide Like potassium hydroxide, it is used in making soft soap

Lyell, Sir Charles (lī'ul), 1797–1875, English geologist He studied law and practiced for a time, but spent most of his life in travel (he twice visited the United States) and in the popularization of his geological ideas Chief of these was his theory of UNIFORMISM, contained in his *Principles of Geology* (3 vols., 1830–33), which went into 12 editions in his lifetime. Besides *Elements of Geology* (1838) and *The Geological Evidences of the Antiquity of Man* (1863), he wrote two books on his travels in North America Lyell was one of the most influential men of the 19th cent. in shaping popular ideas about science. One of his chief original contributions was the division of the Tertiary into Eocene, Miocene, and Pliocene. See his *Life, Letters, and Journals* (ed. by his sister-in-law, Mrs. Lyell, 1881); study by T. G. Bonney (1901).

Lykens (lī'kŭnz), borough (pop 3,048), SE Pa , NNE of Harrisburg, settled c 1740, laid out 1848, inc 1872 Anthracite mining is done here.

Lyly or **Lilly, John** (lĭl'ē), 1554?–1606, English dramatist and prose writer, remembered chiefly for one work, *Euphues*, published in two parts, *Euphues, or, The Anatomy of Wit* (1578) and *Euphues and His England* (1580) This early and immature example of the novel set a new style in English literature known as EUPHUISM, a fashion attempted by writers for about 30 years thereafter and traces of which may be found in Shakspere Lyly's plays, which include *Sappho and Phao* (1584), *Endymion* (1591), *Midas* (1592), and *The Woman in the Moone* (1597), were presented at court and were among the earliest English comedies in prose He represents, both in *Euphues* and in his plays, a link between the Italian Renaissance and the literary awakening of Elizabethan England See studies by Albert Feuillerat (1910) and V M Jeffery (1929)

Lyman, Chester Smith (lī'mŭn), 1814–90, American scientist, b Manchester, Conn , studied at Yale and at Union Theological Seminary. For two years he was a Congregational minister After resigning because of ill-health, he went (1846), to Hawaii, where he investigated volcanic phenomena and was instructor in the Royal School in Honolulu Returning to the United States in 1847, he practiced surveying in California In 1859 he became professor of industrial mechanics and physics in the Sheffield Scientific School, Yale, and in 1871 of astronomy and physics Among the scientific instruments of his invention are a combined zenith telescope and transit for latitude, longitude, and time and an apparatus for use in illustrating the dynamics of ocean waves He wrote *Around the Horn to the Sandwich Islands and California, 1844–60* (ed by F J Teggart, 1924)

Lyman, Phineas, c 1716–1774, American colonial soldier, b Durham, Conn , grad Yale, 1738 As leader of the Connecticut militia, he saw much action in the French and Indian War—at Lake George (1755), in the unsuccessful attack on Ticonderoga in 1758 and the capture of Ticonderoga and Crown Point in 1759, and in the attack on Havana (1762) He went to England (1763) to secure the prize money due his troops for taking Havana In 1772 he returned with the title to a large tract of land between the Mississippi and Yazoo rivers for his company of "military adventurers "

Lyman, Theodore, 1833–97, American naturalist, b Waltham, Mass , grad Harvard, 1855, and Lawrence Scientific School, Harvard, 1858 He was in the Union army as an aide (1863–65) on the staff of Gen George Meade As Massachusetts commissioner of inland fisheries (1866–83) he was a leader in the movement for the conservation of food fish For the Harvard Museum of Comparative Zoology (with which he was associated, 1859–87), he published many scientific papers on marine forms He served in Congress (1883–85) as an independent in favor of civil service reform

Lyme (līm), town (pop 717), SE Conn , set off from Saybrook 1655 It once included the present EAST LYME and OLD LYME

Lyme Regis (līm' rē'jĭs), municipal borough (1931 pop 2,620, 1943 estimated pop 3,000), Dorsetshire, England, on the southern coast SE of Axminster It is a health resort and port and was the landing place of Monmouth in 1685, before the battle of Sedgemoor Archaeological discoveries have been made in the blue Lias rocks which are quarried near Lyme Regis

Lymington (līm'–), municipal borough (pop 5,177), Hampshire, England, on the Solent at the mouth of the Lymington river It is a market town and port, coast trading and yacht building are pursued A Roman camp was in the vicinity Henry II landed here in 1154 on the way to his coronation

lymphatic system (limfăt'ĭk), system which conveys lymph through vessels and nodes distributed throughout the body Lymph, a colorless or yellowish fluid derived chiefly from blood plasma which filters through capillary walls into intercellular spaces, acts as a medium of exchange between the blood and the body cells A network of delicate vessels (lymph capillaries) drains the tissue spaces of the body The lymph vessels in the villi of the small intestine are called lacteals The small vessels unite to form larger ones, gradually increasing in size to form two main channels, the thoracic duct from which the lymph enters the blood stream at the junction of the left internal jugular and the left subclavian veins and the right lymphatic duct which empties into the corresponding region on the right side. Small nodes (lymph glands) occur along the course of the lymph channels in such locations as the axilla, neck, groin, abdomen, and thorax. Bacteria are filtered out in the lymph nodes, which thus form a barrier

against the passage of harmful agents into the blood stream. In disease, the lymph nodes become inflamed and swollen, and therefore palpable, and of diagnostic importance

Lympne (lĭm), village, Kent, England, near HYTHE It is important now as an airport.

Lynaker, Thomas see LINACRE, THOMAS

Lynbrook, residential village (pop 14,557), on SW Long Island, SE N Y , near New York city, settled before the Revolution, inc 1911 Lamps and sportswear are made

Lynch, Charles, 1736–96, American Revolutionary soldier, b near the site of Lynchburg, Va The term "lynch law" is thought by some to have derived from his name A member of the Virginia house of burgesses, he took a prominent part in the preparations for war When a Tory conspiracy was discovered (1780) in Bedford co , where he had been a justice of the peace since 1766, Lynch, a zealous patriot, presided over an extralegal court which meted out summary punishment to the Loyalists In this he clearly exceeded his authority, but he was later exonerated by the state legislature He led a volunteer regiment at the battle of Guilford Courthouse in 1781

Lynch, John Joseph, 1894–, American seismologist, b England In 1913 he came to the United States (naturalized, 1935) and was graduated from Woodstock (Md) College in 1920 He became a Jesuit in 1914 and was ordained a priest in 1926 In 1928 he became associate professor of physics and director of the seismic observatory at Fordham He is the author of *General Physics* (1933) and *Our Trembling Earth* (1940)

Lynch, Thomas, 1749–79, American Revolutionary patriot, signer of the Declaration of Independence, b Berkeley co , S C , educated at Eton and at Cambridge Univ He was the son of a Carolina statesman, Thomas Lynch, and is known as Thomas Lynch, Jr He was elected (1776) to the Continental Congress but soon resigned Trying to regain his health, Lynch sailed for France and was lost at sea His rare autographs are valuable

Lynch. 1 Unincorporated town (pop c 10,000), Harlan co , E Ky , in the Cumberlands near the Va line It is a coal-mining community, owned by the U S Coal and Coke Company, which founded the town in 1917 Big Black Mt , highest peak in Kentucky, is near **2** Village (pop 487), N Nebr , between the Missouri and Niobrara rivers On nearby Ponca Creek, excavation of prehistoric settlements was begun in 1936

Lynchburg, city (pop 44,541), S Va , on the James and in the Blue Ridge foothills, settled 1757, founded 1786, inc as a town 1805, as a city 1852 It is a trade center and tobacco market, among its products are shoes, textiles, fertilizer, flour, and paper It was a Confederate supply base in the Civil War, in June, 1864, a Union attempt to take the city failed It is the seat of RANDOLPH-MACON WOMAN'S COLLEGE, Virginia Theological Seminary and College (Negro), Lynchburg College (Disciples of Christ, coeducational, 1903) and Virginia Episcopal School (preparatory; for boys) Near by are SWEET BRIAR COLLEGE, an old church (1792-98, restored 1901), "Poplar Forest" (1806–9, built by Jefferson, restored), and Appomattox. Carter Glass lived here

lynching, extralegal inflicting of capital punishment by a self-constituted group The origin of the word is unknown, there are various explanations, one of the most popular being that it is derived from the name of Col Charles LYNCH American pioneers whose settlements had not yet established legal institutions frequently took the law in their own hands Pioneers so situated sometimes punished lesser crimes by exile, compelling the persons believed guilty to leave their community Crimes that seemed to them capital, such as rape, were punished by lynching Horse stealing was such a crime, since often pioneers (notably cowboys) who lost their horses could not continue their work Pioneers formed vigilance committees to repress crime (see VIGILANTES) When legal institutions had been duly established, such vigilance committees normally tended to disappear Their measures were at worst extralegal, though they had the intrinsic danger of resort to violence, hasty injustice might easily be done Lynching in a community adequately supplied with officers of the law is generally regarded as a threat to the basis of the law. In the chaotic social conditions of the South in Reconstruction days, there was considerable resort to lynching, particularly by the Ku Klux Klan The tradition of using violence against Negroes accused of serious crime (especially rape of a white woman or murder of a white man) was maintained in the period after Reconstruction to support "white supremacy " It should be noted, however, that the practice has been exceptional rather than common and that a large body of Southern opinion has steadfastly opposed the practice It should also be noted that many lynchings have occurred in other sections of the nation. Nevertheless, much national attention has been riveted on the situation in the South, and a mass trial of 28 white men for the lynching of a Negro drew much notice in 1947 when it was held in Greenville, N.C. Though the defendants were acquitted and though Southern legislators have been able to block antilynching bills, there is evidence that sentiment against lynching is growing stronger in the South, as it is elsewhere in the United States

Lynd, Robert Staughton, 1892–, American sociologist, b New Albany, Ind He has taught at Columbia Univ since 1931. With his wife, Helen Merrell Lynd, he made a noted sociological study of Muncie, Ind., published in 1929 as *Middletown: a Study in Contemporary American Culture* He has also written *Middletown in Transition* (1937) and *Knowledge for What?* (1939)

Lynden (lĭn'dun), town (pop 1,696), NW Wash , N of Bellingham, in a dairy, poultry, and farm area; settled 1860, inc 1891 Bulb growing has been introduced by Dutch farmers of the region Lynden is a port of entry

Lyndhurst, John Singleton Copley, Baron (kŏp'lē, lĭnd'hûrst), 1772–1863, British jurist, b Boston, Mass , son of John Singleton Copley, the American painter A successful lawyer in England, he attained notice by his successful defense of a Luddite (1812) and of Arthur THISTLEWOOD and James Watson (1817) He became solicitor general (1819), attorney general (1824), and master of the rolls (1826) Between 1827 and 1846 he was three times lord chancellor Although his sympathies as a young man were extremely liberal, in his political life he was a Tory and a leader of his party in the House of Lords See biography by Sir Theodore Martin (1883)

Lyndhurst. 1 Township (pop 17,454), NE N J , near Rutherford, inc 1852 **2** Village (pop 2,391), NE Ohio, near Cleveland, inc 1917

Lyndon, rural town (pop 3,144), NE Vt , on the Passumpsic and N of St Johnsbury, settled 1788 It includes the villages Lyndon Center, seat of a state teachers college, and Lyndonville (pop 1,444)

Lyndsay, Sir David see LINDSAY, SIR DAVID

Lynn, Norfolk, England see KING'S LYNN

Lynn. 1 Town (pop 1,014), Randolph co , E Ind , SSE of Winchester **2** City (pop 98,123), E Mass , NE of Boston, settled 1629, inc as a town 1631, as a city 1850 From 1636 shoes have been made here In 1860 a strike in the shoe industry at Lynn spread to other cities and was broken by the importation of strikebreakers The city has other industries, notably the production of electrical appliances Mary Baker Eddy lived here

Lynn Canal, natural inlet, c 80 mi long, SE Alaska It connects in the south with Chatham Strait and Stephens Passage and thrusts north between mountains to break finally into the inlets of the Chilkoot and Chilkat rivers Navigable to its head, Lynn Canal connects Skagway with Juneau and was an important artery of the gold rush

Lynnfield, town (pop 2,287), NE Mass , W of Salem, settled c 1640, set off from Lynn 1782. The Scotch Boardman House was built in 1651

Lynn Haven, city (pop 1,246), NW Fla , on St Andrews Bay WSW of Tallahassee, in a timber area, settled 1912, inc 1915

Lynn Regis, Norfolk, England see KING'S LYNN

Lynwood, city (1940 pop 10,982, 1947 special census pop 20,650), in Compton township, S Calif , adjacent to Los Angeles, inc 1921 It manufactures metal products

lynx (lĭngks), short-tailed member of the cat family with soft, thick black-marked beige to gray fur and tufted ears The common or northern lynx of Europe now exists in small numbers in the Alps, Scandinavia, and N Russia Its head and body are about 3 ft long, the tail about 5 in Races of the European lynx are found in Asia American species are the BOBCAT and the Canada lynx

Lyon, James (lī'un), 1735–94, American Presbyterian clergyman and amateur musician, b Newark, N J His *Urania* (c 1761), a collection of psalm tunes containing some of his own compositions, established him as the second American composer (Francis Hopkinson was the first)

Lyon, Mary, 1797–1849, American educator, founder of MOUNT HOLYOKE COLLEGE, b Buckland, Mass She attended three academies in Massachusetts, later she taught at Ashfield, Mass , Londonderry, N H , and Ipswich, Mass. Interested in promoting higher education of women, she won the aid of several influential men and succeeded (1837) in establishing Mt Holyoke Female Seminary (later Mt Holyoke College) at South Hadley, Mass She served as principal for 12 years, directing the development of a well-rounded college program and emphasizing the principle of service to others. See Beth B Gilchrist, *The Life of Mary Lyon* (1910), M. F Lansing, ed , *Mary Lyon through Her Letters* (1937)

Lyon, Matthew, 1750–1822, American politician and pioneer, b Co Wicklow, Ireland. He emigrated to America in 1765, settling eventually in Vermont. During the American Revolution he served with Ethan Allen and later was in the fighting around Saratoga. He resigned from the army in 1778 He founded (1783) the town of Fair Haven, Vt , where he became a leading businessman. From 1797 to 1801 he was an Anti-Federalist member of the U S House of Representatives, where he became notorious as the result of a personal encounter with Roger Griswold. In the same year, 1798, he was indicted under the Sedition Act for the publication of a letter criticizing President John Adams While in jail he was reelected to Congress Moving to Eddyville, Ky., in 1801, he also represented that state in Congress (1803–11) Lyon was appointed (1820) U S factor to the Cherokee Indians in Arkansas, where he was elected the second delegate of that territory to Congress, but died before taking his seat He was a hero of three successive frontiers, an able exponent of frontier views in Congress, and a man of shrewd business ability See biography by J F McLaughlin (1900)

Lyon, Nathaniel, 1818–61, Union general in the Civil War, b Eastford, Conn , grad West Point, 1841 After serving against the Seminoles and in the Mexican War, he was stationed in California and Kansas until the outbreak of the Civil War, when he was put in command of the St Louis arsenal He immediately broke up Camp Jackson, where the secessionist governor, Claiborne F JACKSON, had quartered the state militia By the spring of 1861, Lyon had subdued all the hostile sections of the state On the advance of a Confederate force from Arkansas into Missouri, Lyon attacked at WILSON CREEK, Aug 10 He was killed in the battle

Lyonnais (lēunā', Fr lyônā'), region and former province, E central France, now divided into Rhône and Loire depts It included Lyonnais proper (the country around LYONS, its capital), which Philip IV acquired in 1307, and the former counties of FOREZ and BEAUJOLAIS, added in 1531 The Lyonnais has great industrial centers at Lyons, SAINT-ÉTIENNE, and ROANNE

Lyonnesse (lĭ'unĕs"), region W of Cornwall, now sunk beneath the sea more than 40 fathoms deep The Lyonnesse of Celtic legend, the home of Tristram and of the Lady of Lyones, has been identified with Lothian in Scotland

Lyons, Joseph Aloysius, 1879–1939, Australian prime minister, b Tasmania He left schoolteaching in 1909 to enter political life, was a Labour member of the Tasmanian House of Assembly until 1929, and was premier of Tasmania He became a member of the commonwealth Parliament in 1929 and held cabinet posts, but in 1931 he repudiated the Labour government's proposals of inflation to solve the depression and helped form a coalition United Australia party As prime minister of Australia for three terms (1932–39), he reduced debts and restored the country to solvency

Lyons (lī'unz), Fr *Lyon* (lyō), city (pop 439,861), capital of Rhône dept , E central France, at the confluence of the Rhone and Saône rivers Lyons leads Europe in silk and rayon production, it has important machine, clothing, and chemical industries, a river port, a stock exchange (founded 1506, the oldest in France), a university (founded 1808), and several fine museums It is, moreover, a gastronomic capital Founded in 43 B C as a Roman colony, ancient Lugdunum soon became the principal city of GAUL Here Christianity was first introduced into Gaul, and the importance of Lyons until c 1300 was chiefly religious One of the earliest archiepiscopal sees in France, Lyons (which after the breakup of the Carolingian empire passed to the kingdom of Arles) was ruled by its archbishops until c 1307, when Philip IV incorporated the city and LYONNAIS proper into the French crown land In 1320 the citizens obtained self-rule through elected consuls Of great importance were the emergence (12th cent) of the WALDENSES and the councils held here in 1245 and in 1274 The importance of Lyons as a silk center dates from the 15th cent , at first the silkworms raised in SE France sufficed the needs of the industry, but in recent times Lyons has become increasingly dependent on Far Eastern imports of raw material—a fact which caused a sharp decline of production during and after the Second World War In 1793 Lyons was devastated by French Revolutionary troops after a counterrevolutionary insurrection, but it recovered quickly thanks to the invention here of the Jacquard loom Annual international trade fairs are held at Lyons Though damaged in the Second World War, Lyons remains a handsome modern city It has preserved interesting old sections, notably around the primatial Cathedral of St John (12th–14th cent), which has lost its stained glass windows Among the many great men born at Lyons were the emperors Claudius and Caracalla, St Ambrose, and Ampère Édouard HERRIOT (b Troyes) served as mayor of Lyons after 1905.

Lyons. 1 City (pop 1,900), co seat of Toombs co , SE Ga , W of Savannah, in a farm and timber area, inc 1897 **2** Residential village (pop. 4,960), NE Ill , near Chicago, inc 1888 It was settled at the edge of an early travel route, the portage between the Chicago and Des Plaines rivers. **3** City (pop 4,497), co seat of Rice co , central Kansas, NW of Hutchinson, on the old Santa Fe Trail, laid out 1876, inc 1880 The county produces oil, and the city has large salt mines Wheat is grown in the area **4** Village (pop 1,033), NE Nebr , near the Missouri NNW of Omaha, inc 1869 **5** Village (pop. 3,863), co seat of Wayne co , W central N Y , on the Barge Canal and SE of Rochester,

settled 1800, inc 1831. Canning and furniture making are carried on

Lyons, First Council of, 1245, the 13th ecumenical council of the Roman Catholic Church, convened by INNOCENT IV to deal with his struggle with Emperor FREDERICK II In spite of the defense of Frederick by his ambassador, he was declared deposed by the council—but ineffectually

Lyons, Second Council of, 1274, the 14th ecumenical council of the Roman Catholic Church It was summoned by GREGORY X to discuss the Holy Land, to remove the schism of East and West, and to reform the Church The reunion of Constantinople and Rome had been proposed by the Byzantine emperor, Michael VIII, who hoped to avert the imperial designs of Charles of Anjou and other Latin leaders There were long preliminaries at Constantinople, and at the council the Greek delegates made all the necessary concessions, and reunion was proclaimed The reunion, however, was unpopular in the East and ignored in the West and was officially denounced by Andronicus II in Constantinople after Michael's death (1282) The legislation of the council for church reform was well prepared, supported by statements the pope had had the bishops submit Emphasis was laid on abuses of diocesan level (e g , plural benefices, absentee clerics, and faulty elections) Perhaps the most important decrees were that establishing the conclave (see PAPAL ELECTION) and that regulating religious orders and granting special protection to the Dominicans and the Franciscans St Bonaventure died at the council, and St Thomas Aquinas died on his way there

lyre, generic term for stringed musical instruments having a sound box from which project curved arms, joined by a crossbar The strings are stretched between the crossbar and the sound box and are plucked with the fingers or with a plectrum In ancient times Sumer, Babylonia, Israel, and Egypt had various sorts of lyres It was a lyre upon which the biblical King David played Ancient Greece had two lyres—the kithara, which was the larger instrument, used by the professional musician, and the lyra, the smaller instrument of the amateur Each had from 3 to 12 strings, made of hemp After the 10th cent the lyres of northern European countries were bowed instead of being plucked The bowed lyre which persisted longest was the Welsh crwth, known as early as the 11th cent and still in use in the early 19th cent At some time in its history a finger board was added, making it an early member of the violin family

lyre bird, Australian bird with tail plumage in the male which when spread out in display resembles a lyre The lyre reaches its full development in the fourth year Both sexes have brown plumage When in danger the bird runs, it is a poor flier Its dome-shaped nest is built on the ground or in a tree fork, and one egg is laid In the breeding season the males scrape up mounds of earth on which they "dance" They have a pleasant song and are good mimics

lyric (lĭ'rĭk), in ancient Greece, a short poem accompanied by a musical instrument, usually a lyre The word is still often used to refer to the songlike quality in poetry But it is more generally used to refer to any short poem which expresses a personal emotion, and in form it may be a sonnet, ode, song, or elegy It is distinguished from narrative and dramatic poetry In early Greek poetry a distinction was made between the choral song and the monody sung by an individual The monody was developed into the lyric by Sappho and Alcaeus in the 6th cent B C and by Pindar later Latin lyrics were written by Catullus and Horace in the 1st cent B C , and in the Middle Ages the lyric form can be found in the Christian hymns, in folk songs, and in the songs of troubadours In the Renaissance and later, lyric poetry achieved its most finished form in the sonnets of Petrarch, Shakspere, Spenser, and Sidney and in the short poems of Pierre de Ronsard, Ben Jonson, John Donne, Robert Herrick, and Milton The romantic poets, emphasizing the expression of personal emotion, wrote innumerable lyrics The most famous are probably those of Robert Burns, William Blake, Wordsworth, Shelley, Keats, Lamartine, Hugo, Goethe, Heine, and Giacomo Leopardi Among modern lyric poets are W B Yeats, A E Housman, Robert Frost, Elinor Wylie, and Dylan Thomas See E B Reed, *English Lyrical Poetry* (1912), H J C Grierson, *Lyrical Poetry of the Nineteenth Century* (1929), *Immortal Lyrics* (ed by Hudson Strode, 1938), *Oxford Book of Greek Verse in Translation* (ed by T F Higham and C M Bowra, 1938)

Lys (lēs), Flemish *Leie* (lī'ŭ), river, 135 mi long, rising in the hills of Artois, NE France It flows northeast, forming the Franco-Belgian border between Armentières and Menin, and continues into Belgium past Courtrai to empty into the Scheldt (Escaut) at Ghent The Lys was the scene of severe fighting in the First World War

Lysander (lĭsăn'dur), d 395 B C , Spartan naval commander and diplomat Late in the PELOPONNESIAN WAR, while in command of the Spartan fleet, he won a victory over the Athenians off Notium (407 B C) To Lysander was due the capture of the Athenian fleet at the mouth of the Aegospotamos (405 B C) and the final submission of Athens to Sparta (404 B C) It was he who planned the government of each of the allied states by 10 oligarchs and of Athens by the Thirty Tyrants Ambitious that Sparta should control all Greece and that his should be the leading power in Sparta, he supported the succession of Agesilaus II as king, but the latter proved more able and independent than had been anticipated When in 395 B C the Boeotians, with Thebes and Corinth at their head, made war upon Sparta, Lysander led an army against them, but he fell in battle at Haliartus

Lysanias (lĭsā'nēus), fl A D c 30, tetrarch of Abilene, otherwise unknown Luke 3 1

Lysenko, Trofim Denisovich (lĭsĕng'kō, Rus trŭfēm' dyĭnyē'sŭvĭch lĭsyĕn'kō), 1898— , Russian agronomist As president of the Lenin All-Union Academy of Agricultural Sciences he became the scientific and administrative leader of Soviet agriculture In 1937 he was made a member of the Supreme Soviet and head of the genetics institute at Odessa He first became known for his process (vernalization) of moistening and refrigerating the seed of spring wheat, thereby reputedly imparting to it characteristics of winter wheat He is the leader of the Soviet school of genetics which opposes the theories of heredity accepted by most geneticists and he supports the doctrine that characteristics acquired through environmental influences are inherited Lysenko rejects neo-Mendelism and is a disciple of I V Michurin Lysenko's theories are in line with Marxian ideology, they won the official support (1948) of the Soviet Central Committee, and the teaching of biology in the USSR has been oriented to them Lysenko stated his theories in *Heredity and Its Variability* (1943, Eng tr , 1946) and in *The Science of Biology Today* (1948, Eng tr , 1948) See P S Hudson and R H Richens, *The New Genetics in the Soviet Union* (1946), Julian Huxley, *Heredity East and West* (1949)

Lysias (lĭ'sĭŭs), c 459–c 380 B C , Attic orator, son of Cephalus, a Syracusan After the capture of Athens by the Spartans (404 B C), the Thirty Tyrants caused the arrest of Lysias and his brother Polemarchus, who was put to death Lysias escaped to Megara, from which he returned when the Thirty Tyrants were expelled (403 B C) He prosecuted Eratosthenes for his brother's death His oration against Eratosthenes is a model of Greek oratory The Tyrants had deprived him of his wealth, and he adopted the profession of writing speeches for litigants Only 34 of his orations are extant Lysias is preeminent in Greek oratory for his vigorous elegance and for his clear style He is one of the four or five best Greek prose writers

Lysias, Claudius: see CLAUDIUS LYSIAS.

Lysimachus (lĭsĭ'mŭkŭs), c 355 B.C –281 B C , Thessalian general of Alexander the Great He was a commander in Alexander's fleet on the Hydaspes On Alexander's death (323 B C) Lysimachus took control of Thrace He joined the other Diadochi—CASSANDER, PTOLEMY I, and SELEUCUS I in league against ANTIGONUS I (314 B C), and after the defeat of Antigonus at Ipsus, Lysimachus took W Asia Minor as his share (301 B C) In 286 B C he added Macedonia to his kingdom by defeating Pyrrhus Five years later in a war with Seleucus, Lysimachus was defeated and killed in battle near Magnesia ad Sipylum A circumstantial story is told that Lysimachus' wife, Arsinoë (Ptolemy's daughter), had persuaded him to kill his son, the son's widow took refuge with Seleucus and provoked the final war

Lysippus (lĭsĭ'pus), 4th cent B C , Greek sculptor, head of the Sicyon school Hellenistic sculpture was based largely on the style introduced by him In treating the human figure, he modified the proportions set by the canon of POLYCLETUS, making the head smaller, the form slender, the muscles close-lying Of the many bronze statues and groups mentioned by Pliny and other ancient writers as his work, no certain original exists, and the marble statues accepted as copies of his bronzes probably do not follow his modeling exactly The APOXYOMENUS in the Vatican and the *Agias* at Delphi are the most famous of these copies or adaptations He made numerous statues of Alexander the Great after 340 B C According to tradition, he produced 1,500 works The subjects were gods, heroes, and athletes The sizes ranged from small bronze figures to a gigantic statue of Zeus 60 ft high

Lystra (lĭs'trŭ), ancient city of Lycaonia, S Asia Minor, visited by Paul and Barnabas Acts 14 6

Lyte, Henry Francis (līt), 1793–1847, British clergyman and hymn writer, b Scotland He held a charge at Lower Brixham, Devonshire, from 1823 to 1844 His *Poems, Chiefly Religious* (1833) and *The Spirit of the Psalms* (1834) contain many familiar hymns Among the most widely known are *Abide with Me, Jesus, I My Cross Have Taken,* and *Praise, My Soul, the King of Heaven* A memoir is in *Remains* (ed by his daughter, 1850)

Lytham Saint Anne's (lĭdh'ŭm), municipal borough (1931 pop 25,764, 1947 estimated pop 30,960), Lancashire, England, on the north shore of the Ribble estuary, SE of Blackpool and W of Preston. It is a port and a seaside resort

Lytle, William Haines (lī't), 1826–63, American soldier and poet, b Cincinnati His best-known lyric was the once admired "Anthony and Cleopatra" He served in the Mexican War and the Civil War, being a brigadier general when he was fatally wounded at the battle of Chickamauga See his *Poems* (ed with a memoir by W H Venable, 1894, 2d ed , 1912)

Lyttelton, Sir Thomas see LITTLETON, SIR THOMAS

Lyttelton (lĭ'tultun), borough (pop 3,407), on E South Island, New Zealand The port for Christchurch, it exports frozen meat and fertilizer

Lytton, Edward George Earle Lytton Bulwer-Lytton, 1st **Baron** see BULWER-LYTTON

Lytton, Edward Robert Bulwer-Lytton, earl of, pseud Owen Meredith see BULWER-LYTTON

Lytton, Victor Alexander George Robert Lytton, 2d **earl of,** 1871–1947, English diplomat and author, b India, son of the 1st earl of Lytton and grandson of Edward Bulwer-Lytton He was undersecretary of state for India (1920–22) and, like his father, was viceroy of India (1925) He achieved prominence as chairman of the League of Nations mission to Manchuria (1942) His report recommended in effect economic sanctions against Japan Lytton's writings include a biography of his father (1913), *Antony Viscount Knebworth a Record of Youth* (letters to and from his son, 1935), and *The Web of Life* (1938)

M

M, 13th letter of the ALPHABET, usually representing, as in English, a voiced bilabial nasal It corresponds with the Greek mu (mū) In Roman numerals it stands for 1,000

M', Names beginning thus are entered as if spelled Mac- See the article MAC

Ma, the chemical symbol of the element MASURIUM

Maacah (mā'ŭkŭ), in names of persons and places in the Bible, variant of MAACHAH

Maachah (mā'ŭkŭ) **1** Absalom's mother. 1 Chron 3 2 Maacah 2 Sam 3 3 **2** See MAOCH **3** Idolatrous wife of Rehoboam She was Absalom's daughter and mother of Abijah 1 Kings 15.2, 2 Chron 11 20 Michaiah 2 Chron 13 2 **4** Caleb's concubine 1 Chron 2 48 **5** Wife of Machir the Manassite 1 Chron 7 15 **6** Child of Nahor Gen. 22 24 **7** Wife of Jehiel 1 Chron 8 29, 9 35 **8, 9** Fathers of two of David's men 1 Chron 11 43; 27 16

Maachah, ancient city-state of Syria, S of Damascus It was held by Arameans in biblical times The inhabitants are Maachathi or Maachathites Deut 3 14, Joshua 12 5, 13 11, 2 Sam 23 34, 1 Chron 19 Maacah 2 Sam 10 The town of ABEL-BETH-MAACHAH may have been in Maachah

Maadai (mā'dī, māudā'ī) [Heb , =ornament], one who had a foreign wife Ezra 10 34

Maadiah (mā'udī'u), family returned from exile. Neh 12 5 Moadiah Neh 12 17

Maai (mā-ā'ī), one who took part in the dedication of the wall Neh 12 36

Maaleh-acrabbim (māāl'u-, mā'ulu-) [Heb , =the ascent of Akrabbim], pass, S of the Dead Sea, called also "the ascent of Akrabbim" Num 34 4, Joshua 15 3

Maan (mūān'), town, S Jordan It is the terminus of a railroad (the only line in Jordan) which extends to Beyrouth, Syria.

Maarath (mā'urăth), unidentified town, in the mountains S of Jerusalem Joshua 15 59

Maas, Nicolaas see MAES, NICOLAAS

Maas, river see MEUSE

Maasiai (mā'sĭā") [Heb ,=God's work], priest. 1 Chron 9.12 See AMASHAI

Maastricht (mās'trĭkht"), municipality (pop 73,831), capital of Limburg prov , SE Netherlands, on the Meuse (Maas) and on the Albert Canal system, NNE of Liége, Belgium It is an important rail and river transportation point and an industrial center manufacturing textiles, ceramics, glass, and chemicals There are sandstone quarries near by The Meuse was forded here in Roman times, and the city derives its name from the Latin *Trajectum ad Mosam* [Meuse ford] An episcopal see from 382 to 721, Maastricht has the oldest church in the Netherlands, the Cathedral of St Servatius, founded in the 6th cent Maastricht belonged to the domain of the early Frankish kings It later came under the rule of the dukes of LIMBURG and was awarded (1648) to the United Provs of the Netherlands in the Peace of Westphalia Once a strategic fortress, Maastricht suffered many sieges The Spanish under Farnese, capturing it (1579) from the Dutch rebels, massacred a large part of the population In 1632 the Dutch under Prince Frederick Henry recovered the city, which, however, fell several times into French hands in the wars of the 17th and 18th cent (notably in 1673 and in 1794) Besides the cathedral, Maastricht has retained the Romanesque Church of Our Lady (11th cent) and a 13th-century bridge across the Meuse Until the Flemish spelling reform its Flemish name was Maestricht

Maath (mā'ăth), ancestor of Joseph Luke 3 26.

Maaz (mā'ăz) [Heb ,=anger], descendant of Judah 1 Chron 2 27

Maaziah (mā'ăzī'ə), family of chief priests 1 Chron 24 18, Neh 10 8

Mabery, Charles Frederic (mā'burē), 1850-1927, American chemist, b New Gloucester, Maine, grad Harvard (B S , 1876) After teaching at Harvard (until 1883), he was professor of chemistry at the Case School of Applied Science, Cleveland (1883–1911) An authority on petroleum, he was also known for his work on the electric furnace and the electric production of aluminum

Mabie, Hamilton Wright, 1845-1916, American critic and essayist, b Cold Spring, N Y , grad Williams, 1867 He was associated with the *Christian Union*, which after 1893 became the *Outlook* His works include *Norse Stories, Retold from the Eddas* (1882), *Short Studies in Literature* (1891), and *Essays on Books and Culture* (1896) See E W Morse, *The Life and Letters of Hamilton W Mabie* (1920)

Mabillon, Jean (zhäⁿ' mäbēyôⁿ'), 1632-1707, French scholar, a Benedictine monk His *De re diplomatica* (1681, with a supplementary volume, 1704) was the first work attempting a critical method of determining the authenticity of documents With it, Mabillon created the science of diplomatic, without which scientific history writing would be impossible The result of truly Benedictine erudition, *De re diplomatica* remains a classic in its field

Mabinogion (măbĭnō'gĕun) [Welsh plural of *Mabinogi*=youthful career], collection of medieval Welsh stories found in two manuscripts, the *White Book of Rhydderch* (c 1300-1325) and the *Red Book of Hergest* (c 1375–1425) The title is an extension of the title of the first four tales, *The Four Branches of the Mabinogi*, which are divided into *Pwyll, Branwen, Manawydan*, and *Math*, their connecting link, now obscured by many accretions, is the life story of Prince Gwri or, as he is later called, Pryderi In the first he is born and fostered, inherits the kingdom, and marries, in the second he is barely mentioned, in the third he is imprisoned by enchantment and released, and in the fourth he falls in battle The story of *Kulhwch and Olwen*, which was composed before the Conquest, shows an Arthurian tale before it passed into continental tradition Another Arthurian story is *The Dream of Rhonabwy*, which was written before 1175 and which also contains native Welsh traditions about King Arthur A story apparently based on the legend of Emperor Maximus is *The Dream of Maxim Wledig* *Lludd and Llevelys* is a short folk tale full of fairy elements The last group in the *Mabinogion* consists of three Arthurian romances, *Geraint, The Lady of the Fountain*, and *Peredur*, formerly thought to be adaptations from similar romances of Chrestien de Troyes. It now seems probable that the first two shared with Chrestien's works common sources written in French and that the last drew on the vast body of Grail tradition *The Four Branches, Kulhwch*, and the romances are invaluable in the study of the ARTHURIAN LEGEND, which owes much to Welsh mythology The *Mabinogion* was published (1838-49), with English translation by Lady Charlotte Guest See *The Mabinogion* (tr by Gwyn Jones and Thomas Jones, 1949, Everyman's Library)

Mabscott, coal town (pop 1,473), S W Va , near Beckley, inc 1906

Mabuse, Jan de (yän' dŭ mäbūz'), c 1478–c 1533, Flemish painter, b Maubeuge in Hainaut His real name was Jan Gossaert or Gossart His early work shows the influence of Gerard David, but in 1508 he went to Italy with Philip of Burgundy, natural son of Philip the Good, there he was much influenced by the work of the Italian masters. Mabuse was one of the first Flemish painters to try to incorporate in his work the lessons of the Italian Renaissance and one of the most successful in the transition period between the early masters and Rubens He is better, perhaps, in his fine portraits than in his more ambitious compositions Among the latter his early *Adoration of the Kings* (National Gall , London) and his *St Luke Painting the Virgin* (cathedral, Prague), *Neptune and Amphitrite*, and *Madonna and Child* (Metropolitan Mus) are splendid examples Beautiful specimens of his portraiture are in the Louvre, Hampton Court Palace, and the Gardner Museum, Boston

Mac, Mc, or **M'** [Irish, =son], element in names derived from Irish and Scottish Gaelic patronymics In most of these names the second element was a forename (e g , *Macdonald*, in various spellings) Other names included titles or epithets (e g , *McIntosh* [son of the chief]) Notions that some forms of the prefix are more typically Scottish or Irish are fallacious Some of the names, however, have typical local distribution, thus, McLeod is Hebridean, McSweeney is especially Irish See O and NAME

McAdam, John Loudon (mŭkă'dŭm), 1756–1836, Scottish inventor His method of road building (see MACADAM ROAD) was widely adopted He began his experiments in road making in Ayrshire, continued them at Falmouth, and finally, in 1815, won an appointment as surveyor general of Bristol roads and official recognition of his work See biography by Roy Devereux (1936)

macadam road, constructed of compacted layers of small stones It was introduced in England c 1815 by J L McAdam and soon superseded the dirt road in Europe and in the United States, revolutionizing road transportation McAdam built roads of stones placed directly on the earth roadbed, the stones were consolidated by the traffic passing over them At about the same period Thomas Telford constructed roads on a foundation of large stones topped with a macadam surface, the Telford base is still employed on poor subsoil or for roads designed to bear very heavy loads Macadam roads are constructed today of stones ranging in size from about ¾ in to 3½ in , these are spread in layers not over 6 in deep, compacted by power rollers, then spread with stone dust and screenings and sprinkled with water (puddled) and rerolled The durability of the road depends on the interlocking action of the stones and on the cementing qualities of the stone dust and water Since the surface of water-bound macadam tends to break down (ravel) under heavy traffic, bituminous macadam roads are replacing water-bound macadam The bituminous surface is applied over a macadam base which is compacted but often not puddled The surface may be applied by spreading small stones over a coating of bituminous material, then rolling (penetration method), by mixing the stones and bituminous material, or by rolling a shallow coating of bituminous mastic over a layer of small stones

McAdoo, William Gibbs (mă'kudōō), 1863-1941, American political leader, U S Secretary of the Treasury (1913–18), b near Marietta, Ga , educated at the Univ of Tennessee The son of a prominent Georgia jurist of the same name, McAdoo became a lawyer in Chattanooga and after 1892 in New York For several years he had a partner also named William McAdoo (no relation), who had been Assistant Secretary of the Navy under Cleveland William Gibbs McAdoo was a promoter of the railroad tunnels known as the Hudson tubes He actively promoted Woodrow Wilson for the presidency in 1912, was given a cabinet post, and took one of Wilson's daughters as his second wife (the marriage ended many years later in divorce) His administration of the Dept of the Treasury was notable for the beginning of the Federal Reserve System, and McAdoo was first chairman of the Federal Reserve Board He also had the heavy duties of managing the finance of American participation in the First World War and served as director general of railroads in the period of government operation He returned to law practice in New York, then moved to Los Angeles He was prominent as a contender for the Democratic presidential nomination in 1920, and in 1924 the supporters of McAdoo and the adherents of Alfred E Smith offset each other and forced the choice of a compromise candidate In 1928 he was unable to halt Smith's nomination In 1932 his California delegation at the convention was joined with the Texas delegation in support of John N Garner When this bloc of votes was shifted to Franklin D Roosevelt, Roosevelt was nominated. McAdoo later (1933–39) served as Senator from California His autobiography, *Crowded Years* (1931), ends with his resignation from the cabinet

McAdoo, borough (pop 5,127), E Pa , SW of Hazleton, inc 1896 It produces anthracite, textiles, and paper boxes

McAfee, Mildred Helen (mă'kŭfē), 1900–, American educator, b Parkville, Mo , grad Vassar, 1920, M A Univ of Chicago, 1928. She taught economics and sociology at Tusculum College and from 1927 to 1932 was dean of women and professor of sociology at Centre College of Kentucky. Miss McAfee was dean of women at Oberlin for two years before becoming president of Wellesley in 1936 She was director of the women's naval reserve (the Waves) from 1942 until 1946, receiving the rank of captain in 1943 She married the Rev. Dr Douglas Horton in 1945, she resigned the presidency of Wellesley in 1948

McAlester (mukăl'ĭstur), city (pop 12,401), co seat of Pittsburg co , SE Okla , ESE of Oklahoma City, settled c 1870 It is a trading center for a farm and coal area, with cotton- and food-processing plants The state penitentiary is near.

Macalester College: see SAINT PAUL, Minn

McAllen, city (1940 pop 11,877, 1947 estimated pop 15,800), extreme S Texas, WNW of Brownsville, settled 1904, inc as a town 1910, as a city 1927 A packing and processing center for the citrus fruit, truck, and other produce of the irrigated region of the lower Rio Grande valley, it also has chemical plants and other factories, is a winter resort and a port of entry, and refines oil from near-by fields

McAllister, Ward (Samuel Ward McAllister), 1827–95, American social leader, b Savannah, Ga Admitted to the bar, McAllister practiced law (1850–52) in San Francisco and became wealthy Ward McAllister removed to New York city in 1852, married Sarah T Gibbons -a millionaire's daughter—and then mingled widely with figures of European society Upon his return to the United States he established a second residence at Newport, R I , and soon became the arbiter of the New York and Newport social set It was McAllister who chose (1872) the "patriarchs" of New York families with long traditions and sifted out (1892) the Four Hundred—people whom he deemed the members of "true" New York society Mrs. William Astor was his friend and aid. He wrote *Society as I Have Found It* (1890)

McAlpine, William Jarvis (mukăl'pĭn), 1812–90, American engineer, b New York city He learned his trade as an apprentice to John B Jervis, served under Jervis on the Erie Canal, and succeeded him in 1836 as chief engineer of the eastern division He made his reputation as the engineer of the dry dock at the Brooklyn Navy Yard, an outstanding piece of construction in its day He later served as state engineer and railway commissioner of New York, as chief engineer of the Erie and other railroads, as consulting engineer for many railroads, as consultant in the planning of water-supply systems for many cities, as consultant in the building of the Eads Bridge at St Louis and in other bridge construction projects, as superintendent of construction of the capitol building at Albany, as engineer of parks for New York city, and as consultant for the Manchester Ship Canal and other European works Besides many technical papers of value, he wrote *Modern Engineering* (1874)

Macao (mukou'), Port *Macau*, Mandarin *Hsiangshan*, Portuguese colony (6 sq mi , pop 374,734), next Kwangtung prov , SE China, on the estuary of the Canton river It comprises Macao peninsula and two islands Portuguese settlement was begun in 1557, and the present holdings were confirmed by a treaty with China in 1887 **Macao,** city (pop 312,717), is on Macao island Until the rise of Hong Kong in the 19th cent , it was the leading port for foreign trade with China Today it is a center of fisheries and light industries Much revenue is obtained from its licensed gambling establishments

macaque see MONKEY

macaroni, generic name for shaped and dried doughs prepared from selected wheat flour and water Similar flour and rice pastes have been known in Asia for several thousand years and are believed to have been introduced into Germany during the Mongol invasions in the 13th cent and to have spread to Italy, where they became staples both for home consumption and for export Semolina, a durum wheat flour, coarsely ground and free from bran, makes the best product, although farina, similarly prepared from other varieties of hard wheat, is also used The sifted flour is moistened with hot water, kneaded to a stiff dough, forced through holes of the desired size and shape, then slowly dried in a current of warm air In modern factories open-air drying has been superseded by the use of air-conditioned rooms Long-cut macaroni is hung to dry on racks or sticks and, to support its own weight, must be made of high-grade semolina Short-cut pastes are dried on trays The dough is made in fancy shapes, ribbons, tubes, and solid rounds and may be twisted or ribbed, the commonest forms are macaroni (coarse tubes), spaghetti (cords of medium diameter), and vermicelli (fine strands) Noodles are made from dough mixed with eggs or egg solids, rolled thin, and sliced The increased use of alimentary pastes in the United States in the 20th cent has led to widespread cultivation of durum wheat and to the establishment of factories producing quantities sufficient for export as well as for domestic use Good macaroni products double in bulk when boiled, without growing sticky, and may be kept indefinitely in dry storage.

MacArthur, Arthur, 1845–1912, American general, b Springfield, Mass ; father of Douglas MacArthur In the Civil War, MacArthur, commissioned (1862) a first lieutenant of the 24th Wisconsin Volunteers, fought in many Western campaigns and in the Chattanooga campaign in 1863 After the war he joined the regular army and had risen (1906) to the rank of lieutenant general when he retired in 1909 He served in both Cuba and the Philippines in the Spanish-American War and was (1900–1901) military governor of the Philippines

MacArthur, Douglas, 1880–, American general, b Little Rock, Ark , grad West Point, 1903, son of Arthur MacArthur He was reared at frontier posts, and while his father was stationed in Texas, Douglas MacArthur attended military school At West Point he achieved an outstanding scholastic record, and after graduation he served in the Philippines and in Japan After becoming (1906) aide to President Theodore Roosevelt, he was attached (1913-17) to the army general staff In the First World War he fought in France, first as chief of staff of the 42d (Rainbow) Division and then as commander of the 84th Infantry Brigade, he participated in the Champagne-Marne and Aisne-Marne defensives and in the Saint-Mihiel and Meuse-Argonne offensives He was promoted brigadier general in 1918, and as superintendent of West Point (1919–22) he helped modernize the academy's military training program After commanding (1922–25) in the Philippines, he returned to the United States and served (1930–35) as chief of the general staff In the tense and threatening days of Japanese expansion President F D Roosevelt appointed (1935) MacArthur head of the American military mission to the Philippines, where he led in the establishment of a vast training and defense plan He retired (1939) from the U S army but later returned to duty (July, 1941) to command U S armed forces in the Far East After the Japanese attack on Dec 7, 1941, he led in the defense of the Philippines until March, 1942, when, under the orders of President Roosevelt, he left for Australia to take command of Allied forces in the Southwest Pacific From Australia he launched the New Guinea campaign, and later (Oct , 1944–July, 1945) he led in the liberation of the Philippines He was promoted (Dec., 1944) general of the army ("five-star general"). After the surrender of JAPAN, he was named supreme commander for Allied powers in Japan and directed the Allied occupation of Japan His name was entered in the 1949 Republican presidential primaries See biography by F T Miller (1945)

McArthur, Duncan, 1772–1839, American soldier and politician, b Dutchess co , N Y He moved with his family to W Pennsylvania and served under Gen Josiah Harmar in the Ohio Indian campaign of 1790 He settled near Chillicothe, Ohio, and was a member (1805–13) of the state legislature He reorganized the Ohio militia, was appointed (1808) major general, and led under Gen William Hull an Ohio regiment in the Detroit campaign of the War of 1812 As brigadier general in the regular U S army, he commanded (1813) in the defense of Fort Meigs, near Detroit, and at other frontier garrisons, in 1814 he succeeded William Henry Harrison in the chief command in the Northwest. After negotiating treaties with the Indians, he served (1823–25) in Congress and then (1830–32) was governor of Ohio

Macarthur, Mary Reid, 1880–1921, British labor organizer, b Glasgow Working in her father's draper's shop, she became prominent in the shop assistants' union As the representative of the women chainmakers of Cradley Heath, she secured a minimum wage for them in 1909 and led a strike to compel employers to pay the increase without delay She visited the United States in 1920 as a British representative in the first labor conference convened under the League of Nations In 1911 she married William Crawford Anderson, chairman of the Independent Labour party See Mary A Hamilton, *Mary Macarthur* (1925)

McArthur, village (pop 1,288), co seat of Vinton co , S central Ohio, E of Chillicothe, platted 1815, inc 1851. In an area of coal mines, oil and gas wells, and limestone quarries, the village makes chemicals and clay products

Macassar or **Makassar** (both mŭkă'sŭr), town (pop 84,855), capital of East Indonesia, on the southwest coast of Celebes In 1660 the Dutch supplanted the Portuguese, who had settled here in 1625 A free port since 1848, it exports coffee, teak, spices, and copra In the Second World War, Macassar Strait (between Borneo and Celebes) was the scene of a Japanese defeat

Macau· see MACAO

Macaulay, Catherine Sawbridge (mŭkô'lē), 1731–91, English historian She wrote effective pamphlets upholding the cause of the colonies and, after 1776, defending the American Revolution. Mrs Macaulay met Benjamin Franklin, corresponded with George Washington, and in 1785 visited the United States Her second marriage to a very young man, William Graham, in 1778, as well as her liberal views, made her notorious in London society. Her most important work was *The History of England from the Accession of James I* (8 vols., 1763–83), a publication which aroused much interest at the time

Macaulay, Rose, English writer, b Cambridge, brought up in Italy Her satirical novels include *Potterism* (1920), *Told by an Idiot* (1923), *Orphan Island* (1924), and *Crewe Train* (1926) She has also written two volumes of verse, several books of familiar essays and studies, among them *Some Religious Elements in English Literature* (1931), and studies of John Milton (1931) and E M Forster (1938)

Macaulay, Thomas Babington, 1800–1859, English historian and author, b Leicestershire, educated at Cambridge After the success of his essay on Milton in the *Edinburgh Review* (Aug , 1825), he contributed regularly to that journal He was called to the bar in 1826 and, elected to Parliament in 1830, distinguished himself as a Whig orator In India (1834–38) as a member of the supreme council he reformed the Indian educational system and composed a legal code for the colony On his return to England, Macaulay devoted himself to writing history, but returned to public office as secretary of war (1839–41), paymaster of the forces (1846–47), and member of Parliament (1839–47, 1852–56). In 1857 he was raised to the peerage as Baron Macaulay of Rothley Macaulay's greatest literary work was *The History of England from the Accession of James the Second* (5 vols , 1849–61) Because of its colorful style and theatrical presentation of historical events, it was an unprecedented success The work fails to achieve objectivity, however, because of Macaulay's Whig bias and his prejudiced use of evidence Macaulay's shorter historical and biographical essays—on Milton, Bacon, Johnson, Warren Hastings, and others—are brilliant, graphic dissertations, but not always accurate Although the *Lays of Ancient Rome* (1842) made Macaulay a popular poet, he never attained major rank See Sir G O Trevelyan, *The Life and Letters of Lord Macaulay* (1876), R C Beatty, *Lord Macaulay, Victorian Liberal* (1938)

macaw (mŭkô'), name of a number of species of the parrot family, native to the forests of Central and South America They are the largest and most vividly colored of the family and have long tails and large hooked beaks The red and blue macaws, which travel in flocks in the Brazilian jungle, and the blue and yellow macaw are often seen in captivity

McBain, Howard Lee, 1880–1936, American political scientist, b Toronto, Ont , grad Richmond (Va) College, 1900, Ph D Columbia, 1907 After teaching at George Washington and Wisconsin universities, he became, in 1913, associate professor of municipal science and administration and, in 1917, professor of constitutional law at Columbia Univ In 1929 he was made dean of the graduate faculties An authority on constitutional law, he revised (1933) the Cuban electoral code His books include *The Law and the Practice of Municipal Home Rule* (1916), *American City Progress and the Law* (1917), *The New Constitutions of Europe* (with Lindsay Rogers, 1922), and *The Living Constitution* (1927)

Macbeth (măkbĕth'), d 1057, king of Scotland (1040–57) He was a commander for Duncan I of Scotland, whom he defeated and slew and whose kingdom he took (1040) He seems to have been an able king, but was defeated by Duncan's son Malcolm with the help of Siward of Northumberland in 1054 and in 1057 was killed by Malcolm, who succeeded as MALCOLM III The versions of the story in Holinshed and Boece are the basis of Shakspere's tragedy

McBride, Sir Richard, 1870–1917, Canadian statesman, b New Westminster, British Columbia, grad Dalhousie Univ (LL B , 1890) In 1898 he was elected as a Liberal-Conservative to the legislature of British Columbia and he served there until 1915 He was prime minister of British Columbia from 1903 to 1915, when he resigned to accept the position of agent general of the province in London

McBurney, Charles, 1845–1913, American surgeon, b Roxbury, Mass He was graduated from the College of Physicians and Surgeons (M D. Columbia, 1870), later he taught there (1872–82, 1889–1907) and was a consulting surgeon at several New York hospitals He is noted for his contributions on appendicitis the site of local tenderness, in diagnosis, is called McBurney's point, and McBurney's incision was devised by him

McBurney, Robert Ross, 1837–98, leading figure in the history of the Young Men's Christian Association, b Ulster, Ireland He came to New York city in 1854 In 1862 he became the first paid secretary of the Y M C A. He was largely responsible for the traditional program and activities of the Y M C A., and his work in New York was copied in other cities in America and in foreign countries See biography by L L Doggett (1902)

McCabe, William Gordon, 1841–1920, American educator and author, b Richmond, Va., grad. Univ of Virginia, 1861. He served with the Confederate army throughout the Civil War. From 1865 until his retirement in 1901 he directed the University School, which he founded at Petersburg, Va., and moved to Richmond in 1895. A noted teacher and Latin scholar, long president of the Virginia Historical Association, McCabe was also an essayist and the author of *Ballads of Battle and Bravery* (1879), a collection of Civil War poems See biography by A C. Gordon (1925)

Maccabees (măk'ŭbēz) or **Machabees** (măk'-), Jewish family of the 2d and 1st cent B C which led in the restoration of Jewish political and religious life They are also called Hasmoneans or Asmoneans They appear in history as the family of a priest, Mattathias, dwelling in Modin, who opposed the Hellenising tendencies of the Syrian ruler Antiochus IV (175–164 B C) Antiochus had taken advantage of factionalism among the Jews and had stripped and desecrated the Temple and begun a religious persecution. Mattathias refused to take part in a pagan sacrifice and killed a Jew who did, then he killed the royal enforcing officer and fled with his five sons to the mountains Thus began a guerrilla warfare On Mattathias' death (166 B.C) the leadership passed to his son Judas Maccabeus, from whose surname the family name is derived Judas, an excellent military leader, defeated an expedition sent from Syria to destroy him Having occupied Jerusalem, he rededicated the Temple, the feast of HANUKKAH celebrates this event (165 B C). At this time there was civil strife in Syria Demetrius I, then in control, sent Nicanor with an army against Judas, this was defeated, but another, led by Bacchides, conquered, and Judas was killed (161 B C) His brother Jonathan, the new leader, was successful for a time, he supported Demetrius' rival, Alexander Balas, and made treaties of friendship with Sparta and Rome Jonathan was killed by treachery in 143 B C , and the last brother, Simon, succeeded, he was recognized by the other powers as civil ruler as well as high priest, and Palestine enjoyed some years of peace Eventually Antiochus VII sent an expedition against the Jews, Simon defeated it, but in the disorder afterwards he was murdered by an ambitious son-in-law (135 B C) John Hyrcanus, Simon's son, managed to gain the ascendancy in the subsequent strife He fought against Antiochus and remained in power until his death (105? B C) His son, Aristobulus I, succeeded him, ruled one year, and died Another son, Alexander Jannaeus, then took the throne, governed with great severity, and headed the Sadducees in their strife with the Pharisees His widow, Alexandra (more properly Salome Alexandra), who had also been the widow of his brother, Aristobulus, became queen (78? B C) She favored the Pharisees and governed well After her death, her son John Hyrcanus II, who had been high priest, acquired the temporal rule as well, but his more energetic brother, Aristobulus II, revolted A civil war followed and resulted in Roman intervention and the taking of Jerusalem by Pompey (63 B C) The house of the Maccabees had declined One of its members, Alexander, led an abortive rebellion in Syria against Rome, and in 40 B C Antigonus, the son of Aristobulus II, invaded Judea with Parthian aid Some of the Jews rallied to his standard, but he was defeated and put to death (37 B C) Hyrcanus II, who had been reinstated as high priest by the Romans, was captured by the Parthians and deprived of his ears in order to render him unfit for priestly service He returned to Judea (33 B C), but was put to death on a charge of treason (30 B C) The name Maccabees has been extended to include the Jewish martyrs of the persecution, notably those of 2 Mac 6, 7 The chief sources for the Maccabees are the biblical books and the *Antiquities* of Josephus For bibliography, see OLD TESTAMENT and JEWS See also Elias Bickerman, *The Maccabees* (1947)

Maccabees, two books of the Old Testament, placed in the Apocrypha in AV, they are the last two books in the Western canon 1 Maccabees is a straight narrative, originally written in Hebrew, concerning the Maccabean struggles against Antiochus IV, beginning with the rebellion of Mattathias (c 167 B C.) and ending with the murder of Simon (135 B C) Its order is chronological, as follows introduction (1), Mattathias as leader (2), Judas' leadership (3-9 22), including the restoration of the Temple as the high point (4 36–59), Jonathan's career (9 23-12 53), and Simon's career (13-16) The book is the best source on the history it treats, it is careful in citing and dating There is an interesting account of the reputation of republican Rome (8 1–16) and of Maccabean relations with that power (8 17–32, 12 1–18, 14 16–24, 15.15–24). 1 Maccabees is usually dated c.100 B C. 2 Maccabees is a work of another sort. It is the epitome of five books by one Jason of Cyrene about the Maccabees; it was probably composed in Greek late in the 1st cent B.C. It is a devout history of the persecutions of Antiochus and the career of Judas Maccabeus. The contents are as follows. a seemingly extraneous letter of 124 B.C. from Palestinian Jews to Jews in E Egypt referring to the feast of the restoration of the Temple (1–2.18), literary preface (2.19–32), the intrigues and troubles leading to the persecution (3–6.17), two accounts of martyrdom (6.18–31; 7); Judas' glorious career (8–15), including the horrible death of Antiochus

(9) and a vision of Judas (15.12–16) 2 Maccabees is composed in a self-deprecatory, witty style; cf 2.23–32; 4.40, 5.21, 7.42; 15.37–39 It has interesting light on Jewish belief of the period, as on creation (7 22–23) and on the resurrection and prayers for the dead (12 43–45). There are other books of Maccabees among the PSEUDEPIGRAPHA For bibliography, see OLD TESTAMENT

Maccabees, Feast of the: see HANUKKAH
