Wales, Welsh *Cymru* (kŏm'rē), region (7,466 sq mi , 1948 estimated pop 2,131,710), W Great Britain, a peninsula W of England Often called a principality, it has been politically united with England since 1536 With the border county of MONMOUTH —commonly included for administrative purposes in Wales—the area is 8,006 sq mi and the estimated population 2,552,510 The 12 counties of Wales proper are ANGLESEY, CAERNARVONSHIRE, DENBIGHSHIRE, FLINTSHIRE, MERIONETHSHIRE, and MONTGOMERYSHIRE in the north, and CARDIGANSHIRE, RADNORSHIRE, BRECKNOCKSHIRE, PEMBROKESHIRE, CAERMARTHENSHIRE, and GLAMORGANSHIRE in the south The peninsula, 136 mi long from north to south and varying in breadth from 37 to 92 mi , is deeply indented by Cardigan Bay, which opens to St George's Channel in the west, to the north is the Irish Sea, to the south is the British Channel The northern arm of the peninsula stretches from the Dee estuary (which divides Flintshire from Cheshire, England) westward to Holyhead Island (off Anglesey), only 61 mi from Dublin, Ireland, in the south, Fishguard (in Pembrokeshire, not far from St David's Head, the westernmost point of Wales) is but 54 mi from Rosslare, Ireland Wales is almost entirely occupied by the central mountain mass, the Cambrian Range, which rises to 3,560 ft. in Mt. SNOWDON (the highest point of Great Britain S of Scotland) The rough Welsh hills have been through the centuries a mountain fortress, while the narrow, bordering coastal plain and the plains of the south have been used as invasion routes since prehistoric days The area of lowlands is greatly increased in the north by the island of Anglesey and the Lleyn Peninsula The little rivers come down from the mountain fastness, the Clwyd and the Conway in the north and the Teifi, the Dyfi (Dovey), and the Mawddoch in the west The eastern rivers, the Dee, the Severn, and the Wye, drain into England The eastern boundary was drawn by the Act of Union in 1536 on a purely political basis and disregarded cultural and linguistic distribution Welsh-speaking areas were added to Hereford, Shropshire, and Gloucester (in England), and the language survived in Hereford until the 18th cent and survives to a small extent in Shropshire today Wales itself despite the long consolidation with England has maintained its distinctive and unified culture Nearly 100,000 inhabitants speak the Celtic Welsh language only, and half the population speaks Welsh in addition to English The cultural unity persists in economic diversity, for the central highlands and the northern counties are pastoral—a land of sheep and meat and milk—and agricultural, and are thinly populated There is an industrial and mining area in Flintshire and Denbighshire in the north, but the modern wealth of Wales is in the great coal fields and industries of the south There more than half the population lives There are the great ports and cities—CARDIFF, SWANSEA, RHONDDA, MERTHYR TYDFIL, and others In these lands of smoke and steel and problems of labor and poverty the Welsh tradition survives as it does in the simple life of the hills, now attracting travelers by their beauty It is an old tradition, stretching back into prehistory (see CELT and BRITAIN), and the Celtic-speaking shepherds and farmers and forest dwellers were ready to defend their homes against the Roman invaders, who penetrated the north to found Segontium (near Caernarvon) and the south to found Maridunum (now Caermarthen) The Roman impress upon Wales was light, and the Welsh continued to dominate a large area of Great Britain, stretching N to the Clyde and the Firth of Forth and S past the Bristol Channel into present Somerset, Devon, and Cornwall They were converted to Christianity by Celtic monks, notably St DAVID, later the patron saint of Wales, and they were not seriously affected by the Anglo-Saxon Conquest of Britain. The invaders did, however, thrust between the main body of the Welsh and those S of the Bristol Channel (who, as the West Welsh, maintained their national identity for centuries), and as the kingdoms of the heptarchy grew, there were border wars The fiercely warlike Welsh sturdily opposed the encroachment of the kings of Mercia, and King Offa is said to have constructed Offa's Dyke to mark the boundary between Mercia and Wales Later Welsh fighting men withstood the kings of Wessex while both Wessex and Wales were harried by the Norsemen In this travail, Welsh civilization nevertheless came to early flower, as the disparate local groups of pastoral people coalesced Generally a distinction between North Wales and South Wales persisted and there were many petty principalings, but the great Hywel Dda (Howel the Good) was king over all the Welsh in the late 10th cent His law code marked the advance in unity At the same time the tradition of the bards was being solidified to yield later a wealth of poetry, music, and learning The defense of the beleaguered hills went on, and Gruffydd ap Llewelyn, ruler of all Wales, maintained the tradition of independence until he was killed (1063) in the invasion of Harold of England Harold's own conqueror, William I of England, recognized the power of the Welsh by setting up earldoms to protect his newly won kingdom The power of the Norman border lords (see WELSH MARCHES) grew slowly and unsteadily, but it grew, and Wales was more and more threatened with English conquest, though Welsh foot soldiers, moving swiftly and secretly over the mountain paths, were able to resist through 200 years of guerrilla warfare The Cymry, as the Welsh call themselves, were not united politically, and the division between North Wales and South Wales continued Thus when William I's men made inroads in the north, Rhys ap Tewdr held sway in the south, and only after his death (1093) did the Anglo-Norman barons take full possession of the Vale of Glamorgan Dissension within England itself gave the Welsh princes a chance to profit from the relaxation of pressure and from benefits to be had by taking one side or the other Medieval Welsh culture reached full blossom, the MABINOGION reduced to written form some of the richest of old legends, and the EISTEDDFOD was regularized to give a solid base to the choral music, still so much a part of Wales Cultural decline was slow as the invasion went on Though Henry II of England was repulsed (1165) by Owen Gwynedd of North Wales and Rhys ap Gruffydd of South Wales and though LLEWELYN AP IOWERTH united the sections and gained power by skillfully taking part in the troubled English affairs of King John, the end was certain Llewelyn's grandson, LLEWELYN AP GRUFFYD was overthrown and the conquest of Wales was completed by Edward I in 1282 The Statute of Rhuddlan (1284) set up English rule To placate the Welsh, Edward had his son (later Edward II), who had been born at

Caernarvon Castle, made prince of Wales in 1301; from that time comes the English custom of giving the eldest son of the king the title prince of Wales Changes in the general aspect of Welsh life were few, though trade with England caused market towns to grow and wool became a staple source of revenue The Welsh were subjected to some tyrannies, and the Welsh leaders continued to seek advantage from British internal affairs Early in the 15th cent OWEN GLENDOWER led a revolt that had a brief but amazing success, and Owen TUDOR later in the 15th cent was involved in the Wars of the Roses It was his grandson who ascended (1485) the English throne as Henry VII, the first of the Tudor monarchs Tudor policy in Wales was assimilation. The Welsh lands were converted into regular shires Primogeniture replaced the Welsh system of GAVELKIND Heads of Welsh families became freeholders, the other Welsh became leaseholders after the English pattern A new aristocracy arose, and English manners were adopted by the nobility, thus a deep breach was opened between landlord and tenant, not to be healed for centuries The Act of Union under Henry VIII in 1536 completed the process by abolishing all Welsh customary law at variance with the British and by establishing English as the legal language From that date onward the separate history of Wales was mainly religious and educational, while more and more Welshmen rose in British (and later in imperial) service The Welsh translation (1588) of the Bible by Bishop William Morgan had a literary effect in standardising the language as well as great religious influence The Reformation came slowly to Wales Catholic sentiment remained strong under Elizabeth and James I, and the Welsh supported Charles I in the Puritan Revolution Under the Commonwealth oppressive measures were used to force the Welsh to abandon Catholic and prelatarian sympathies In the following years the religion of Wales turned largely from the Established Church to dissent with strong Calvinist leanings The ministers became prominent among leaders of the people One was Griffith Jones (1683–1761), rector of Llandowor, who pioneered in popular education, a movement so successful that by the 20th cent the standard of education in Wales was high Important in education as well as religion was the Methodist evangelical movement It was linked with the English movement led by George Whitefield and John and Charles Wesley, but was actually a native development which had been fostered by Hywel Harris (1714–73) before Whitefield began to preach The CALVINISTIC METHODIST CHURCH gathered in most of the Welsh who had still adhered to the Church of England and bolstered Welsh nationalism, one of the most successful nonpolitical nationalist movements of the world The strong hold of evangelical Protestantism on Wales was to make the establishment of the Church of England there the dominant question in Welsh politics in the later 19th cent , and the last of the few acts of Parliament that applied to Wales alone was the disestablishment of the Church in 1914. Long before that time the tenor and tempo of Welsh life had been changed by the Industrial Revolution. The mineral wealth of Wales had been opened to exploitation, at first in the north, then in the rich coal fields of S Wales Coal, iron, and tin were used for the creation of vast industries, and the accent shifted from the sheep walks and the farms to the coal pits and the factories The change to the new predominant mode was not accomplished without difficulties. The shifting of population helped to promote the emigration of many Welshmen, especially to the United States, but also to other places (e g , Patagonia) The region of S Wales in the late 19th cent became the chief coal-exporting region of the world With the wealth of industrialization came the evils of industrial life—overcrowding and destitution in times of depression. The "depressed areas" of S Wales suffered particularly in the years of economic decline after the First World War and especially in the late 1920s and the '30s Conditions in the collieries were such that even with economic revival many of the workers sought escape from the coal mines to easier employment The industrial boom of the Second World War and even more the activities of strong labor unions made the situation more hopeful. The British government took an interest in controlling the mines and eradicating poverty. The revival of Welsh nationalism, which had suffered slightly from industrialization of the country, also aided reform measures somewhat Yet, as in earlier days, the Welsh tradition turned leaders more to education and the arts One of the most important institutions is the University of Wales, which was created in 1893 by royal charter, it is the collective name of four constituent colleges, three of them created before the incorporation—at Aberystwyth (1872), Cardiff (1883), Bangor (1884), and Swansea (1920), the national school of medicine is also in the system The national institution of Eisteddfod helps to perpetuate interest in the Welsh language and choral music. As late as 1946 Welsh members of Parliament proposed the creation of a special secretary of state for Wales. See WELSH LITERATURE. See Sir John Rhys and D. B Jones, *The Welsh People* (1923), Sir Owen Edwards, *Wales* (1925), David Williams, *History of Wales, 1485–1931* (1934), J E Lloyd, *History of Wales* (to 1282, 2 vols., 1939); E. G Bowen, *Wales a Study in History and Geography* (1941), J. F Rees, *Studies in Welsh History* (1947)

Walewska, Countess Maria (märē'ä välĕf'ska), 1789-1817, Polish noblewoman. She met Napoleon I in 1807 and became his mistress Deeply in love with the emperor, she did not seek to derive any material advantage from her position, and she was among the few who visited him in his exile at Elba Her son by Napoleon was Alexandre Walewski See biography by A P R d'Ornano (1941).

Walewski, Alexandre Florian Joseph Colonna, Comte (älĕksäf'drù flôryäN' zhôzĕf' kôlônä' kôt' välĕfskē'), 1810–68, French diplomat, b Poland, son of Maria Walewska by Napoleon I He went to France after the Restoration, returned to Poland in 1830 and took part in the Polish uprising, and shortly afterward went to England to plead the cause of the Polish provisional government When the insurrection was suppressed, Walewski returned to France, was naturalized, and entered the army He resigned his commission in 1837 and entered journalism When his cousin, Louis Napoleon (later Napoleon III), came to power in 1848, he employed Walewski on diplomatic missions in Italy, England, and Spain He was foreign minister (1855–60) and minister of state (1860–63) In 1865 he was president of the legislative assembly, from which he resigned (1867) to enter the senate He was an important figure in the reforms of the "Liberal Empire"

Walfish Bay see WALVIS BAY

Walhalla, in Germanic mythology see VALHALLA

Walhalla. 1 (wŏlhā'lu) City (pop 1,148), NE N Dak., near the Canadian boundary and on the Pembina river Founded as St Joseph's Mission (1848), it became a fur-trading post, was platted in 1877, and incorporated in 1885 The city is a port of entry, a shipping point for farm products, and a resort center for the Pembina Mts 2 (wŏlha'-lu, wŏl-) Cotton-milling town (pop 2,820), co. seat of Oconee co , NW S C , near the Blue Ridge W of Greenville, in a resort area, founded c 1850 Near by are a state park and a trout hatchery

Walke, Henry (wŏk), 1808–96, American naval officer, b Princess Anne co , Va As a small child he moved with his family to Chillicothe, Ohio Walke was appointed a midshipman in 1827, served in the Mexican War, and was made a commander in 1855 In wisely removing the garrison at Pensacola, Fla , to New York early in 1861, he technically violated orders, but a court-martial sentence of admonishment was lightly carried out Walke's subsequent service on the Mississippi was outstanding His gunboats supported U S Grant in that general's first Civil War battle, at Belmont, Mo (Nov , 1861), and as commander of the *Carondelet* he had an important part in the victories at Forts Henry and Donelson, ISLAND No 10, Fort Pillow, and Memphis Promoted captain in July, 1862, he commanded the *Lafayette*, an ironclad ram, in the Vicksburg campaign. From Sept , 1863, to the end of the war, Walke commanded the *Sacramento* in a search for Confederate cruisers in the Atlantic He was promoted commodore in 1866 and rear admiral in 1871, when he was retired See his *Naval Scenes and Reminiscences of the Civil War* (1877), illustrated with his own drawings

Walker, Amasa, 1799–1875, American economist, b. Woodstock, Conn He became a merchant in Boston, but retired from business in 1840 He lectured (1842–48) on political economy at Oberlin College, which he was influential in founding He was a delegate to the peace congresses at London (1843) and Paris (1849) An abolitionist, he was elected (1851–53) by the Free-Soil party secretary of state for Massachusetts, he filled out a term (1862–63) as Congressman Walker was examiner (1853–60) in economics at Harvard and lecturer (1859–69) at Amherst. His *Science of Wealth* (1860) was long a popular textbook on economics

Walker, Sir Emery, 1851–1933, English master printer, typographic designer, and engraver. He became one of the moving spirits in the KELMSCOTT PRESS and later was the partner of Cobden-Sanderson in the DOVES PRESS He was responsible for much of the successful work of the Doves Press, though he and Cobden-Sanderson quarreled, and most of the public credit went to Cobden-Sanderson Walker also interested himself in the improvement of ordinary books (as opposed to "fine" books) and had tremendous influence in improving book design. He was knighted in 1930.

Walker, Francis Amasa, 1840–97, American economist, statistician, and educator, b Boston, grad. Amherst, son of Amasa Walker. In the Civil War he was brevetted brigadier general. Walker's activities in the U S government included service as director of the 10th Census (1880) and as U.S commissioner of Indian Affairs (1871–72). From 1872 to 1880 he was professor of political economy in the Sheffield Scientific School, Yale, and from 1881 to his death was president of the Massachusetts Institute of Technology. As an economist Walker is especially known for his theories on wages and profits (promulgated in *The Wages Question*, 1876) and for his advocacy of international bimetallism Other works by him include *Money* (1878), *Political Economy* (1883), *Land and Its Rent* (1883), and *International Bimetallism* (1896). See biography by J P. Munroe (1923).

Walker, Frank Comerford, 1886–, U.S. Postmaster General (1940–45), b. Plymouth, Pa., grad Notre Dame (LL B , 1909) He was a lawyer, businessman, and politician in Montana before he moved to New York in 1925 In 1932 he was treasurer of the Democratic National Committee. After 1933 Walker held several Federal offices. In 1940 he succeeded James A Farley as Postmaster General and in 1945 was succeeded by Robert E Hannegan

Walker, Frederick, 1840–75, English landscape and genre painter and draughtsman He is best known for his illustrations in *Once a Week* and *Cornhill Magazine*. In the *Cornhill Magazine* appeared his admirable illustrations for works of Thackeray The Victoria and Albert Museum has some of his fine water colors, including the beautiful *Spring* His *Vagrants* and several other oils are in the Tate Gallery, London

Walker, George, 1618–90, Irish clergyman and commander He studied at the Univ of Glasgow, entered the Anglican Church, and served in several parishes around Londonderry, Ireland When, after the Glorious Revolution, Londonderry was besieged by the army of James II (1689), Walker led a regiment into the town and, after the departure of the governor, Robert Lundy, was made one of the two governors of the town with the rank of colonel. By his courage and inspiring sermons Walker roused the people, and the town was held until relieved He went to London, where he received the thanks of Parliament, was given £5,000 by William III for the citizens of Londonderry , and was made bishop of Derry He published *A True Account of the Siege of Londonderry* (1689) and, in answer to charges of self-seeking, a *Vindication* (1690) Walker was killed at the battle of the Boyne

Walker, Henry Oliver, 1843–1929, American figure and mural painter, b Boston, studied with Léon Bonnat in Paris His works include a series of lunettes representing *Lyric Poetry* (Library of Congress), murals in the Minnesota state capitol (St Paul), the Massachusetts statehouse (Boston), and the Essex co courthouse (Newark, N J), and the panel, *Wisdom Attended by Learning* (Appellate Courthouse, New York) Other works are *A Morning Vision* (Metropolitan Mus) and *Musa Regna* and *Mrs Evans and Son* (both National Gall of Art, Washington, D C). He became a member of the National Academy in 1902

Walker, Horatio, 1858–1938, Canadian painter, b Listowel, Ont , largely self-taught Though he lived in Rochester and New York, he painted chiefly scenes from the simple life of the inhabitants of the Île d'Orléans in the St Lawrence His work has been compared to that of the Barbizon painter J F Millet Walker was a member of the National Academy of Design and of the Royal Institute of Painters in Water Colour of England Examples of his art are *Oxen Drinking* (National Art Gall , Ottawa), *The Woodcutter* and *Milking* (City Art Mus of St Louis), *Sheepshearing* (Albright Art Gall , Buffalo, N Y), *Ave Maria* (Corcoran Gall), and *The Sheepfold* and two pictures of harrowing (Metropolitan Mus)

Walker, James John, 1881–1946, American political leader, mayor of New York city (1925–32), b New York city Dapper and debonair, Jimmy Walker, who had tried his hand at song writing, early engaged in politics and in 1909 became a member of the city assembly After law study at St Francis Xavier College and at New York Univ law school, he was admitted (1912) to the bar He attracted the notice of several TAMMANY leaders, and under the tutelage of Alfred E Smith, Walker was elected (1914) to the state senate In 1921 he became minority leader of the senate and effectively pushed through liberal legislation With Tammany backing, he defeated John F Hylan, the incumbent, and F D. Waterman to become mayor of New York city In office Walker backed the adoption of an extensive transit system, unified the public hospitals, and created the department of sanitation. Immensely popular with the electorate, Walker was returned to office, defeating Fiorello H LaGuardia in 1928. As a result of several frauds exposed in the municipal government in Walker's second administration, the state legislature ordered an investigation headed by Samuel SEABURY. Extensive corruption was revealed, and 15 charges were leveled at the mayor Walker hastily resigned (Sept. 1932) before the hearings were closed and lived in Europe for a number of years He returned to the United States and in 1940 was appointed by Mayor LaGuardia as a municipal arbiter for the garment industry. He was president of a phonograph-record company until his death. See Gene Fowler, *Beau James* (1949).

Walker, Mary Edwards, 1832–1919, American surgeon and feminist, b Oswego, N.Y., grad Syracuse Medical College, 1855. At the beginning of the

Civil War she offered her services to the Union army. For the first three years she served as a nurse, but in 1864 she was commissioned assistant surgeon, the first woman to have such a commission, and was awarded a medal for her service She adopted male attire, which she wore to the end of her life. Dr. Walker was active in the struggle for woman suffrage and other reforms

Walker, Nellie Verne, 1874–, American sculptor, b Red Oak, Iowa, studied with Lorado Taft, specialising in portrait busts and memorial groups *Her Son* (Art Inst , Chicago), Chief Keokuk (Keokuk, Iowa), Senator Harlan (Capitol, Washington, D C), and the Polish-American war memorial (Chicago) are well known

Walker, Robert, d. 1658?, English painter, a follower of Van Dyck and favorite portraitist of Oliver Cromwell His portraits of Cromwell and his family and followers are justly famous Examples are in the National Portrait Gallery, London, Hampton Court, and the Metropolitan Museum

Walker, Robert John, 1801–69, American statesman, b. Northumberland, Pa His name is sometimes given as Robert James and most often as Robert J Walker After graduating from the Univ of Pennsylvania (1819), he studied law, was admitted (1821) to the bar, and practiced in Pittsburgh In 1826 he moved to Natchez, Miss , where he soon had a lucrative practice Much of his wealth, however, was spent in unsuccessful speculation in plantations and wild lands In politics Walker, learned, shrewd, and aggressive, became a nominal Jacksonian Democrat, although Andrew Jackson distrusted him From 1835 to 1845 he represented Mississippi in the U S Senate, where he was an ardent advocate of American expansion He favored recognition of Texas independence and later became a leader in support of the annexation of Texas, making it his chief interest in the choosing of a Democratic candidate for President in 1844 At the Baltimore convention, he played up, with great political astuteness, Martin Van Buren's opposition to annexation, and by sponsoring the revival of the two-thirds rule he killed Van Buren's chances of securing the nomination, which went to the "dark horse," James K. POLK Walker then persuaded John TYLER to withdraw from the presidential race The victorious Polk made him Secretary of the Treasury (1845–49), and he had an influential voice in government policies He helped bring about settlement of the difficulties with Great Britain over Oregon by the Walker Tariff of 1846, which was a "revenue" tariff that abandoned "protective" measures and thus helped to build up Anglo-American commerce His financial administration (he was a firm hard-money man) is generally considered as one of the most able in the history of the Treasury After Polk's administration, he went to England (1851–52) as an agent of the Illinois Central RR In March, 1857, he reluctantly accepted President James Buchanan's appointment as governor of KANSAS Walker, a supporter of Stephen A Douglas's SQUATTER SOVEREIGNTY theory, called a constitutional convention in Kansas, but the antislavery men distrusted him and refused to vote, though Walker had become a known enemy of slavery (he had freed his own slaves) As a result the proslavery LECOMPTON CONSTITUTION was adopted Walker favored submitting the constitution to popular vote, but when Buchanan refused to support him, he resigned (Dec , 1857) He supported the Union in the Civil War and served as a financial agent in Europe An expansionist to the end, he had a part in the purchase of Alaska See H D Jordan, "A Politician of Expansion Robert J Walker," *Mississippi Valley Historical Review*, XIX (1932), 362–81

Walker, Sears Cook, 1805–53, American mathematician and astronomer, b Wilmington, Mass , grad Harvard, 1825 He served with the U S Coast Survey from 1847 He is noted for his discovery of the orbit of Neptune

Walker, William, 1824–60, American FILIBUSTER in Nicaragua, b Nashville, Tenn Walker was a qualified doctor, a lawyer, and a journalist by the time he was 24, but could not settle down In 1850 he went to San Francisco This phenomenon of "manifest destiny," weighing about a hundred pounds, gray eyed and tight lipped, was restless and egocentric, puritanical and ascetic, believing in his destiny and having an exaggerated sense of justice and impartiality which led alternately to brilliant strategy and stupid blunder His military campaigns began with an invasion of Lower California (1853–54) intended to wrest it and Sonora from Mexico It failed miserably He was tried for violating neutrality laws, but was acquitted by a sympathetic jury It was a wiser Walker who in June, 1855, "colonised" Nicaragua with 58 followers at the request of the hard-pressed Liberal government at LEÓN Capturing GRANADA, Walker outwitted liberals and conservatives alike and was "elected" president of Nicaragua in July, 1856. An alliance of the Central American states against him and the enmity of Cornelius VANDERBILT, whose Accessory Transit Company controlled his supply lines, led to his defeat and surrender to the U S navy at RIVAS, May, 1857. Supported by a large segment of U S. opinion, Walker had caused the administration of President PIERCE to vacillate between recognition of Walker's Nicaraguan government (and its possible admission to the Union as a slave state) and the probability of antagonising Great Britain He returned as a hero, was again acquitted of violating neutrality, but then alienated public opinion by blaming his defeat on the U S navy From the BAY ISLANDS of Honduras, Walker made a final abortive attempt (1860) to conquer Central America, but was forced to surrender to the British navy Declaring himself "president of Nicaragua," he was turned over to Honduras and was shot by a firing squad at Trujillo, Sept 12, 1860 See his own book, *War in Nicaragua* (1860); W O Scroggs, *Filibusters and Financiers* (1916), Lawrence Greene, *The Filibuster* (1937)

Walker Lake, 24 mi long, W Nev It is a remnant of prehistoric Lake Lahontan and is fed by the Walker river It has no outlet

Walkerton, town (pop 2,679), S Ont , on the South Saugeen and SSW of Owen Sound It has lumber and flour mills and makes dies and castings

Walkerton, town (pop 1,178), N Ind , SW of South Bend It is a shipping point for an area which grows onions and peppermint

Walkerville, part (since 1935) of Windsor, Ont , opposite Detroit, Mich

Walkerville, city (pop 1,880), SW Mont , adjacent to Butte, settled c 1877, inc 1891

walking leaf, in zoology see LEAF INSECT For the walking leaf or walking fern in botany, see FERN

walking stick or **stick insect,** name of certain species of leaf insect with long, slender bodies which resemble twigs Those found in the temperate parts of the United States are wingless One species eats the leaves of locust, hickory, black oak, and some other trees In the tropics many are winged, and some are 8 to 10 in long

Walküre see VALKYRIES

Wall, Richard, 1694–1778, Spanish statesman, b Ireland Debarred from preferment in Ireland because of his Roman Catholicism, Wall entered the Spanish military service as a young man and rose to a position of great importance at the Spanish court He became secretary to the Spanish embassy in St Petersburg (1727), served in Italy and the West Indies, and helped negotiate the Treaty of Aix-la-Chapelle (1748) ending the War of the Austrian Succession He cemented friendly relations between Spain and England during his service as ambassador in London (1748–52) Recalled to Madrid, he replaced Ensenada as minister of foreign affairs (1754) to Ferdinand VI He continued to serve in this capacity after the accession of Charles III (1759), who unwillingly permitted Wall to resign in 1764 Richly pensioned, he retired to Granada, where he spent his remaining years

Wall, borough (pop 2,098), Allegheny co , SW Pa , near Pittsburgh, inc 1904

wall, in architecture, a protective, enclosing, or dividing vertical structure Its thickness is determined by the material, height, and stress It may be of studding and lath boarded or plastered, ADOBE, RAMMED EARTH, brick work or stonework, concrete or tile or of steel in combination with one or more of the preceding materials Raised upon a foundation and graduated in thickness, the outer, or bearing, walls of a building (except of a steel skeleton structure) support the floors and roof, the inner walls, or partitions, enclosing the rooms are much thinner A party wall is one common to two adjoining buildings, and a gable wall is one at right angles to the roof ridge A fire wall, or bulkhead, separates hazardous equipment from the rest of a structure to prevent the spreading of fire, in ships the bulkhead is also watertight The front wall or face of a building is termed the FAÇADE Exterior walls may be finished with STUCCO or GRAFFITO and enhanced by bas-relief, tile, MOSAIC, or painted decoration Arcade, rustication, and vermiculated work are means of ornamenting brick and stone masonry In engineering a retaining wall either of CYCLOPEAN or of wet masonry protects an embankment from washing, a sea wall, or BREAKWATER, is for harbor protection, and a DAM is an earth, masonry, or concrete wall to stop the natural flow of a stream to conserve a water supply or create power The defensive walls of a city or other political division (see CHINA, GREAT WALL OF) are frequently two or three concentric ramparts, often including FORTIFICATION and watchtowers Great portals form the gateways. Notable ones of antiquity were those of Thebes, Troy, Jericho, and Babylon, an example of a medieval wall is that at Carcassonne.

wallaby: see KANGAROO.

Wallace, Alfred Russel, 1823–1913, English naturalist From his study of comparative biology in Brazil and in the East Indies, he evolved a concept of EVOLUTION similar to Charles Darwin's theory, his works on this subject include *Contributions to the Theory of Natural Selection* (1870) and *Darwinism* (1889). A pioneer in the modern study of animal geography, he systematized the science and wrote *The Geographical Distribution of Animals* (1876) and a supplement, *Island Life* (1880). His research in this field is commemorated in the name WALLACE'S LINE He assisted H W BATES in evolving an early theory of MIMICRY. Among his other works are *The Malay Archipelago* (1869), *Social Environment and Moral Progress* (1913), and an autobiography (1905) See biography by L T Hogben (1918).

Wallace, Edgar, 1875–1932, English novelist and playwright, b Greenwich He was author of more than 150 detective thrillers, of which as many as 5,000,000 were sold in a year *The Terror* (1930) is typical of his work, which ranked high in its class He produced also plays and scenarios *On the Spot* (1931), a melodrama based on Al Capone, was finished in four days See biographies by his wife, E V Wallace (1932), and Margaret Lane (1939)

Wallace, Henry, 1836–1916, American agricultural leader, b West Newton, Pa , grad Jefferson (later Washington and Jefferson) College, 1859 He studied (1861–63) theology and went (1863) to Iowa as a home missionary of the United Presbyterian Church Several years later he became ill and turned to farming at Winterset, Iowa, though he remained interested in religious movements all his life He pioneered in several aspects of farming and began writing agricultural articles for the *Iowa Homestead* He was made its managing editor, but his efforts in the early 1890s to curb railroad powers led to his removal from the editorship In 1895 he joined with his son Henry Cantwell Wallace in founding the newspaper which later was called *Wallace's Farmer* This journal soon won recognition as a leading agricultural newspaper of the country "Uncle Henry," as he was affectionately known, was a popular speaker and a counselor of Republican statesmen He served (1908) as a member of President Theodore Roosevelt's Country Life Commission He wrote *Clover Farming* (1898), *Trusts and How to Deal with Them* (1899), *Uncle Henry's Letters to the Farm Boy* (1897), and *Letters to the Farm Folk* (1915) His autobiography, *Uncle Henry's Own Story of His Life* (1917), dealt chiefly with his boyhood

Wallace, Henry Agard, 1888–, American cabinet official and Vice President of the United States (1941–45), b Adair co , Iowa, grad Iowa State College, 1910. He was (1910–24) associate editor of *Wallace's Farmer*, an influential agricultural periodical run by his family, and when his father, Henry Cantwell Wallace, died in 1924, he became editor Henry A Wallace had developed several strains of hybrid corn which were to be extensively used by farmers of the American corn belt, and his writing on farm economics quickly won him recognition as an authority on the subject A Republican until 1928, Wallace helped swing Iowa to the Democratic party in the 1932 election In 1933 he was appointed Secretary of Agriculture by President Franklin D ROOSEVELT, and he soon led in the reorganization of the Dept of Agriculture and in the supervision of the AGRICULTURAL ADJUSTMENT ADMINISTRATION He became a highly regarded leader in the NEW DEAL, and in 1940 he was elected Vice President of the United States He helped coordinate American defenses and strengthened diplomatic bonds with several nations, notably in Latin America and the Far East In 1944 Wallace failed to receive the vice presidential nomination again In 1945 he was appointed Secretary of Commerce by President Harry S TRUMAN, but because he openly opposed the foreign policy of the administration, Wallace was forced to resign (1946) He then edited (1946–48) the *New Republic* In 1948 he helped launch a new PROGRESSIVE PARTY, which gained its principal backing from the extreme leftist groups As its presidential candidate, he polled slightly over 1,000,000 votes He wrote numerous books on agricultural problems and politics, including *Agricultural Prices* (1920), *New Frontiers* (1934), *The Century of the Common Man* (1943), and *Toward World Peace* (1948) With E N. Bressman he wrote *Corn and Corn Growing* (1923).

Wallace, Henry Cantwell, 1866–1924, American agricultural leader and cabinet officer, b Rock Island, Ill , grad Iowa State College of Agriculture, 1892, son of Henry WALLACE, (1836–1916) "Harry" Wallace, as he often was called, was associated with his father in founding *Wallace's Farmer* and served as assistant editor until 1916, then becoming editor He held government posts in the First World War, and later (1921) President Warren G Harding appointed him Secretary of Agriculture In spite of opposition from the packing interests, Wallace continued to serve under President Calvin Coolidge He reorganized the department and died in office His views were set forth in his book, *Our Debt and Duty to the Farmer* (1925)

Wallace, Lewis (Lew Wallace), 1827–1905, American soldier, novelist, and diplomat, b Brookville, Ind He served in the Mexican and Civil wars and attained the rank of major general In 1865 he returned to his law practice at Crawfordsville, Ind He was governor of the Territory of New Mexico (1878–81), minister to Turkey (1881–85), and thereafter a popular lecturer and author. His

famous book, *Ben-Hur: a Tale of the Christ* (1880), has been popular for many years and was highly successful also on the stage and screen Among his other books are the novels *The Fair God* (1873), a story of the conquest of Mexico, and *The Prince of India* (1893) See his autobiography (1906), biography by Irving McKee (1947)

Wallace, Sir Richard, 1818–90, English art collector The natural son of the marquess of Hertford, he acquired his father's collection of continental art, which in 1897 was bequeathed to the government by Lady Wallace Wallace, created baronet in 1871, was a member of Parliament (1873–85) The **Wallace Collection,** notable for 18th-century French art, was opened to the public in 1900 in Hertford House, London See H C Shelley, *The Art of the Wallace Collection* (1913)

Wallace, Sir William, c 1272–1306, Scottish hero in the struggle against Edward I Wallace's father was a small landholder near Paisley, Renfrewshire, and the child was probably born on the family estate, "Elderslie" The chief source for the life of Wallace is a long poem attributed to BLIND HARRY, and written about 200 years later and unreliable in some respects The early part recounts exploits of the young Wallace in hand-to-hand encounters with Englishmen, but the first historic record concerns the burning of Lanark by Wallace and 30 men in May, 1297, and the slaying of the sheriff. Edward in his attempt to make good his claim to overlordship of Scotland had, the year before, installed English sheriffs in the towns of S Scotland and had taken prisoner the king, John de BALIOL After the burning of Lanark many joined Wallace's forces, and under his leadership a disciplined army was evolved Wallace and William de DOUGLAS marched on Scone and met an English force of over 50,000 before Stirling Castle in Sept, 1297 The English tried to cross a narrow bridge over the Forth and were slain as they crossed, the English army was routed Wallace, sole leader of the Scots, crossed the border and laid waste several counties in the North of England. In December he returned to Scotland and for a short time acted as guardian of the realm for John de Baliol In July, 1298, Edward defeated Wallace and his men at Falkirk, and forced him to retreat to Stirling and to burn the castle Wallace sought the aid of Philip the Fair (Philip IV) in France in 1299 and went to Rome as well He is heard of again fighting in Scotland in 1304, but there was a price on his head, and in 1305 he was captured by Sir John de Monteith He was taken to London in Aug 1305, declared guilty of treason, and executed

Wallace, 1 City (pop 3,839), co seat of Shoshone co, N Idaho, near the Mont line, founded 1884, inc 1888 It is the distributing center for the Coeur d'Alene mining district The Sunshine silver mine is near by **2** Town (pop 1,050), SE N C, N of Wilmington It is a strawberry market center

Wallaceburg, town (pop 4,986), S Ont, on the Sydenham river near Lake St Clair and NNW of Chatham A port of entry, it has boatbuilding, sugar refining, flour milling, and glassmaking

Wallace Collection see WALLACE, SIR RICHARD

Wallace's line, imaginary line postulated by A R Wallace as the dividing line between Asiatic and Australian fauna in the Malay Archipelago It passes between Bali and Lombok islands and between Borneo and Celebes, then continues E of the Philippines

Wallach, Otto (ô'tō väl'äkh), 1847–1931, German chemist. He assisted Kekulé von Stradonitz at the Univ of Bonn and was professor there (1876–89) and at the Univ of Gottingen (1889–1915) For his pioneer work in the field of alicyclic compounds he received the 1910 Nobel Prize in Chemistry. He also worked on the transformation of chloral into dichloric acetic acid, synthesized chloralides, and investigated azotic and diazotic compounds. He wrote *Terpene und Campher* (1909)

Wallachia, Rumania see WALACHIA.

Wallack, James William (wô'lŭk), c 1795–1864, Anglo-American actor and manager Of a theatrical family, he was a leading actor (1812–32) in comedy and melodramas at Drury Lane After 1852 he lived in the United States In New York he managed Wallack's National (1837–39) at Leonard and Church streets, Wallack's Lyceum (1852) at Broome St and Broadway, and Wallack's (1861) at Broadway and 13th St, where he maintained the best theatrical company in New York His son, **Lester Wallack** (John Johnstone Wallack), 1820–88, was also an actor and a manager. He gained experience at Dublin and London and made his New York debut (1847) as Sir Charles Coldstream in Boucicault's *Used Up* He succeeded to the management of Wallack's in 1861, in 1882 he simultaneously operated another Wallack's at Broadway and 30th St. He wrote, produced, and played in a variety of dramas, but his best production was his own play *Rosedale* (1863); his best role was as Charles Surface in Sheridan's *School for Scandal.* See *Memoirs of Fifty Years* (1889)

Wallagrass (wŏ'lŭgrăs), plantation (pop. 1,123), N Maine, S of Fort Kent; settled 1820 by Acadians, inc. 1859.

Wallaroo (wŏlŭrōō'), town (pop 2,140), South Australia, on the east shore of Spencer Gulf and SSW of Port Pirie Formerly an important copper-mining center, it now exports wheat and wool.

Wallas, Graham (wŏ'lus), 1858–1932, English political scientist and sociologist, grad Corpus Christi College, Oxford He joined the Fabian Society, was the author of one of the *Fabian Essays,* and was an intimate friend of G B Shaw In 1914 Wallas became professor of political science at the Univ of London In his lectures and writings he studied the psychological factors in politics and advocated government by those specially trained for politics Wallas wrote a biography of Francis Place (1897), *Human Nature in Politics* (1908), *The Great Society* (1914), *Our Social Heritage* (1921), and *The Art of Thought* (1926)

Wallasey (wŏ'lusē), county borough (1931 pop 97,026, 1943 estimated pop 94,220), Cheshire, England, at the mouth of the Mersey, near Birkenhead and W of Liverpool It includes New Brighton (watering place), Liscard, Seacombe, Egremont, and other localities Great docks have been built here

Walla Walla (wŏ'lu wŏ'lŭ), city (pop 18,109), co. seat of Walla Walla co, SE Wash, at the junction of Walla Walla river and Mill Creek, near Oregon It was settled c 1859 not far from the site of the old fur-trading Fort Walla Walla and the site of the mission of Marcus WHITMAN and very close to the U S military Fort Walla Walla (est 1857, now a veterans' hospital) The city is a trade and distributing point for the rich farm and lumber regions of SE Washington and has fruit canneries and lumber mills WHITMAN COLLEGE, which also houses a museum, and Walla Walla College (Seventh-Day Adventist, coeducational, 1892) are here A state penitentiary is near by

Wallensee and **Wallenstadt,** Switzerland see WALENSEE

Wallenstein or **Waldstein, Albrecht Wenzel Eusebius von** (wä'lunstīn, Ger äl'brĕkht vĕn'tsul oiză'-byōōs fūn vä'lunshtīn, vält'shtīn), 1583–1634, imperialist general in the THIRTY YEARS WAR, b Bohemia He attended the Lutheran academy at Altdorf, then traveled with a companion who awakened in him a lifelong interest in astrology Later Wallenstein became a Roman Catholic He advanced his fortune by marriage to a wealthy widow, and for his support of Ferdinand of Styria (Emperor FERDINAND II) before, during, and after the Bohemian revolt which started the Thirty Years War, he was well rewarded, becoming count-palatine, prince, and (1625) duke of Friedland He built up a magnificent estate in Bohemia In 1625 Wallenstein raised a large army for the emperor and became chief imperialist general, cooperating with the general of the Catholic League, TILLY, in the Danish phase of the war Wallenstein in 1626 soundly defeated MANSFELD at the Dessau bridgehead, and some of his men helped Tilly to defeat CHRISTIAN IV at Lutter The next year Wallenstein destroyed the remnants of Mansfeld's army and later defeated Christian IV's forces Now at the height of his wealth and power, Wallenstein added to his tremendous holdings Sagan and the great duchy of Mecklenburg Dreaming of a united and strong Germany, he hoped for peace and religious toleration The extent of his personal ambition is conjectural He was given the title of admiral, but his hopes of founding a maritime empire were set back by failure in the siege of Stralsund (1628) on the Baltic His strong enemies —churchmen, Spaniards, and princes—at the Viennese court prevailed against him in 1630, when he was forced from command The failure of his successor, Tilly, against GUSTAVUS II (Gustavus Adolphus) of Sweden brought Wallenstein back to power (April, 1632) With a huge army he cleared Bohemia and began a contest with the Swedish king which ended at Lützen (1632), where Wallenstein was defeated and the Swedish king was killed Wallenstein's subsequent inactivity (except for a campaign against the Swedes in 1633) and his somewhat cloudy efforts to arrive at general peace with toleration brought down on his head accusations of treason and the emperor's distrust A number of Wallenstein's lieutenants, including Gallas and Piccolomini, were drawn into a sort of conspiracy against him and for the emperor Ferdinand secretly removed the general from command Jan. 24, 1634 Wallenstein did not submit but sought peace with the enemies of the empire At EGER (Cheb) in Feb, 1634, he was treacherously murdered His assassin later had the emperor's favor Wallenstein is the central figure in a dramatic trilogy by Schiller See Francis Watson, *Wallenstein Soldier under Saturn* (1938)

Waller, Edmund, 1606–87, English poet He studied at Eton and Cambridge and became a member of Parliament, where he was a prominent speaker. Marriage in 1631 brought him wealth, but his wife died in 1634 Waller leaned toward the support of Charles I against Parliament and conceived "Waller's plot" to secure the city of London for the king The plot was discovered and Waller, who saved his life by exposing his confederates, was fined and banished. He married again and went to France, where he remained until he was pardoned in 1651. After the Restoration he was again in Parliament and served until his death. After early circulation of his verses in manuscript, Waller published a poem for the first time when "To a King on His Return" appeared in *Rex Redux* (1633) His *Poems* appeared in 1645 and immediately went through three editions Four more editions were published in his lifetime, and a final one in 1693 Much of his early verse is addressed to "Sacharissa," Lady Dorothy Sidney, who refused his suit His poetry reflects development of the heroic couplet, to which he lent felicity and sweetness His best-known lyrics are "Go, Lovely Rose" and "On a Girdle" Other familiar poems include "Panegyric to My Lord Protector," "Instruction to a Painter," and "Of the Last Verses in the Book." See edition of his works by George Thorn-Drury (1893).

Waller, Sir William, 1597?–1668, English parliamentary general He fought in the Venetian army after leaving Oxford and was knighted in 1622 A zealous Puritan, he entered (1640) the Long Parliament, became a colonel in the parliamentary army, and achieved a series of victories which gained him the popular title of Wilham the Conqueror He was, however, defeated by General Wilmot at Roundway Down (1643) He went to London, received fresh troops, returned to the war, and held joint commands with the earl of Essex and Oliver Cromwell. The Self-denying Ordinance (1645) ended his military career, and he returned to Parliament as a leader of the Presbyterian party His opposition to the army petitions alienated Waller from the army, and he was several times imprisoned for supposed conspiracies He promoted the return of Charles II and was returned to Parliament (1660) by General Monck's influence, but after the Restoration he retired

wallflower, Old World plant (*Cheiranua,* or *Cheiranthus, cheiri*), particularly popular in Europe, where it flourishes on old walls An old-fashioned garden flower, cultivated in America as a biennial, it is similar in appearance to the related stock but is more frequently single than double, and yellow, red, or brown are the prevailing colors The wallflower is occasionally called gillyflower Related species are also called wallflower, e g, the orange-flowered Siberian wallflower (*Cheiranua aspera* or *Erysimum asperum*), which occurs both wild and in cultivation in North America

Wallin, Johan Olof (yō'hän ōō'lôv välēn'), 1779–1839, Swedish poet, archbishop of Sweden He wrote more than 100 hymns and translated many others He was a member of the Swedish academy

Wallingford (wŏ'lingfurd), municipal borough (1931 pop 2,840, 1943 estimated pop 3,671), Berkshire, England, on the Thames and SSE of Oxford There are vestiges of Roman occupation of the site, as well as earthworks and other traces of a Norman castle The church contains the tomb of Sir William Blackstone

Wallingford, 1 Borough (pop 11,425) in Wallingford town (pop 14 788), S Conn, NNE of New Haven, town inc 1673, borough 1853 Its silverware industry dates from 1835, electrical products and plastics are also made Several old houses remain The Choate School (1896) for boys is here A branch of the Oneida Community was founded in the town in 1851 **2** Town (pop 1,450), S Vt, S of Rutland, chartered 1761, settled 1773 The area is scenic, with hills and ponds, there are ice caves near Wallingford village A fork factory was established in 1836, the making of garden tools is still the chief industry

Wallington, borough (pop 8,981), NE N J, near Passaic, inc 1895 Steel tubing is made here

Wallis, John (wŏ'lĭs), 1616–1703, English mathematician He was Savilian professor of geometry at Oxford Univ from 1649 He systematized the use of formulas, introduced the symbol ∞ for infinity, and made a study of the quadrature of curves which he recorded in *Arithmetica infinitorum* (1655) His collected mathematical works appeared in three volumes (1693–99) He wrote also on grammar, logic, theology, and cryptography

Wallis, Samuel, 1728–95, English navigator He entered the navy in 1743 and rose to the rank of captain in 1757 In 1766 he was dispatched, with Philip Carteret, on a voyage of exploration Wallis sailed around Cape Horn and, separated from Carteret, sailed through the Polynesian islands, discovering Tahiti (1767) and the Wallis Islands, which were named for him He returned to England (1768) by way of the Cape of Good Hope Wallis retired from the navy in 1780 and served during his latter years as commissioner of the navy (1782–83, 1787–95)

Wallis, Switzerland see VALAIS.

Wallis and Futuna Islands (wŏ'lĭs, fōōtōō'nä), French protectorate (c 75 sq mi, pop 6,770), S Pacific, 250 mi. W of Samoa, est 1842. It comprises two small groups, Wallis Islands and Hoorn Islands. The main volcanic islands are Uvea, Futuna, and Alofi. The products are copra and timber

Wallon, Henri Alexandre (äNrē' älĕksä'drŭ välō'), 1812–1904, French historian and statesman. He was elected (1871) to the national assembly, and

it was his proposal (1875) which led to the adoption of the organic laws that formed the constitution of the Third Republic His conservative views did not permit him to hold very long the office of minister of public works (1876) In the field of historical scholarship, he won acclaim with his history of ancient slavery and his biographies of St Louis and of Joan of Arc His field, however, was that of the French Revolution His *Histoire du tribunal révolutionnaire* (6 vols., 1880–82) contained much new material and connected the work of the tribunal with the general revolutionary movement Other valuable works on the revolution are *La Terreur* (1873), *Révolution du 31 mai et le fédéralisme en 1793* (1886), and *Les Représentants du peuple en l'an II* (1888–90)

Walloons (wulōōnz′, wŏ–), general term applied to the French-speaking people of BELGIUM, in contrast to the Flemings of the northern provinces Walloon in its proper meaning is a French dialect spoken in the Liége region, the movement for reviving Walloon literature centered in Liége in the 19th cent The periodical *Wallonie* had considerable influence Since medieval times the economic and social background of the Walloons has differed radically from that of the Flemings The Walloon part of Belgium contains the major mining areas and heavy industries of the country, while the Flemings engage mainly in agriculture, manufacturing (particularly textiles), and shipping With the Industrial Revolution, the cleavage became more pronounced, with the Flemings generally representing the conservative, and the Walloons the radical elements in Belgium Rivalry between Walloons and Flemings remains a critical political issue The name Walloons was also applied to Huguenot refugees in America by the Dutch, who made no distinction between French and Walloon Protestants

Wallowa Lake (wulou′u), NE Oregon, at the foot of the Wallowa Mts Used as an irrigation reservoir, it is also a resort It is drained by the Wallowa river in the Snake river system

wallpaper was used in Europe in the 16th and 17th cent as an inexpensive substitute for costly hangings French domino makers developed marbled papers, introduced from the East via Italy and used at first for box coverings, into larger sheets for wall coverings, and also made other papers in small designs Outlines were block-printed, the color filled in with brush or stencil The flock technique of printing designs with an adhesive and sprinkling with fine bits of wool or silk was probably first adapted to wallpaper c 1620 in France, but by the 18th cent England had become the principal manufacturer Sets of painted Chinese paper were imported in the 17th cent and by the 18th had become highly popular and were widely imitated In France, Jean Papillon established in 1688 the first large wallpaper factory, where he made matching designs that would be continuous when pasted In the 18th cent paper was glued into continuous rolls before printing Wallpaper was manufactured in the American colonies from the mid-18th cent Colonial homes displayed various scenic and pictorial papers, often with tropical themes The mid-19th cent brought modern printing on roll paper, mass production, and decadence in design The English Pre-Raphaelite artists promoted a renaissance in wallpaper designs, and the 20th cent has seen its fulfillment in England, France, and the United States American designers have revived interest in landscape papers and have greatly developed frieze and panel papers through the medium of hand block printing See Phyllis Ackerman *Wallpaper* (1923)

Wallsend (wôlz′ĕnd″), municipal borough (1931 pop 44,587, 1947 estimated pop 47,610), Northumberland, England, on the Tyne and ENE of Newcastle, in a coal-mining region Shipbuilding and steel milling are important Wallsend is the eastern terminus of Hadrian's Wall, built in Roman times

Wall Street, narrow street in the lower part of Manhattan Island, New York city, extending E from Broadway to the East River It is the center of one of the greatest financial districts in the world, and by extension the term "Wall St" has come to designate the financial interests of the country In the district, which extends several blocks N and S of Wall St, are the exchanges (stock, cotton, coffee, produce, curb, metal, maritime, and others) and brokerage houses, as well as the main offices of a large number of banking houses, insurance companies, railroad and steamship companies, and large industrial corporations Facing Wall St, on the west side of Broadway, is Trinity Church The Subtreasury Building, one block east, was erected on the site of the old Federal Hall, where George Washington was inaugurated in 1789 and where the first Congress met The street received its name from a stockade, or wall, which was built in 1653 by Stuyvesant to protect the settled area south of it from assault by English and by Indians See Robert Warshow, *The Story of Wall Street* (1929), A. D Noyes, *The Market Place* (1938)

Walmer (wôl′mûr), former urban district (1931 pop 5,335), since 1935 part of Deal, Kent, England. It is a resort Walmer Castle, near the shore, was built by Henry VIII The official residence of the lord warden of the CINQUE PORTS, it contains memorials of William Pitt, the duke of Wellington, and other noted wardens

Walney Island, narrow island, 8 mi long, off the coast of Lancashire, England It is connected with BARROW-IN-FURNESS by a bridge

walnut, name for any of several species of *Juglans*, deciduous trees valued for their wood and nuts The English walnut or Persian walnut (*Juglans regia*) is native to S Europe and Asia, but it is cultivated in California and elsewhere for the commercially valuable nuts, which are among those most commonly eaten, both plain and in confectionery. This walnut has an easily extracted meat The black walnut (*J. nigra*) is native to the E United States and the Middle West The nut, though used commercially as a flavoring, is seldom used as a table nut because of the difficulty of freeing the meat from the shell The wood of this species is the most highly valued of any native wood for cabinetwork It is strong, durable, heavy, dark in color, easily polished, and much used for furniture, gunstocks, boats, and musical instruments Sizable trees of black walnut are now rare because of indiscriminate cutting and little replanting in the past The butternut or white walnut (*J. cinerea*) has a sweet edible nut that is very oily and not often used Sugar is sometimes obtained from the sap, and the husks of the fruit yield a dye The dye gave color to the homespun of pioneers and to the "butternut" uniforms of some of the Confederate soldiers

Walnut Canyon National Monument. see NATIONAL PARKS AND MONUMENTS (table)

Walnut Cove, town (pop 1,084), N N C , NNE of Winston-Salem Veneers are made here

Walnut Creek, town (pop 1,578, 1947 special census pop 2,235), W Calif , NE of Oakland, in a poultry, fruit, and walnut region, inc 1914

Walnutport, borough (pop 1,271), E Pa , on the Lehigh river between Mauch Chunk and Allentown, inc 1909

Walnut Ridge, city (pop 2,013), a co seat of Lawrence co , NE Ark , near the Black River, in a farm region

Walpi (wal′pē) [Hopi,=place of the gap], North American Indian pueblo, NE Ariz , on the first or east mesa c 80 mi NE of Winslow Its 150 inhabitants are Pueblo Indians who speak the Hopi language (Uto-Aztecan family) The pueblo was founded (c 1700) in fear of Spanish retribution for the part the Indians took in the Pueblo revolt of 1680 The pueblo is now being deserted for the new village of Polacca at the foot of the mesa One of the most picturesque pueblos of the Southwest, it is much visited by tourists The antelope ceremony is held here in August on even years, and the famous Hopi snake dance in August on odd years See Walter Hough, *The Hopi Indians* (1915)

Walpole, Horace or **Horatio,** 4th **earl of Orford** (wôl′pōl, wŏl′–), 1717–97, English author, third son of Robert Walpole He met Thomas Gray at Eton, and after studying at Cambridge the two left (1739) for a European tour, financed by Walpole The now famous quartet which separated them took place in Italy (1741) Walpole returned to England, lived at his father's house in London, and amused himself with collecting and writing In 1747 he purchased property at Twickenham, named the estate Strawberry Hill, and built there "a little Gothic castle" It became the show place of England and exerted a tremendous influence on subsequent architecture He patched his quarrel with Gray in 1745, and Gray's *Odes* were the first production of Walpole's private printing press at Strawberry Hill, the books from this press are now collector's items A member of Parliament from 1741 to 1768, he confined himself largely to the part of spectator and defender of his father's memory In 1765 Walpole visited Paris, where he gained the close friendship of Mme du Deffand, with whom he corresponded until her death (1780) In 1791 he succeeded to the earldom of Orford Walpole always professed to be an amateur in literary affairs, but his numerous letters are a monument to his writing skill as well as an invaluable picture of Georgian England His "terror" novel, *The Castle of Otranto* (1764), had an important influence on the Gothic revival in the arts It was the first of many subsequent works of that type and is an ancestor of the modern detective novel Of his various essays, perhaps the best known was *A Letter from Xo Ho* (1757), concerning the execution of Admiral John BYNG Other works of Walpole include *Anecdotes of Painting in England* (4 vols., 1762–71), *Historic Doubts on Richard III* (1768), and the posthumously published *Reminiscences* (1805) and memoirs of the reigns of George II (1822) and George III (1845) See *Reminiscences* (ed by Paget Toynbee, 1924), edition of his letters by Mrs Paget Toynbee (16 vols , 1903–5) and by Paget Toynbee (3 vols., 1918–25), Yale edition of the letters (ed by W S Lewis, 1937–), biography by R W Ketton-Cremer (1940)

Walpole, Sir Hugh Seymour, 1884–1941, British novelist, b New Zealand, educated at Cambridge His first two novels were failures, but commencing with *Fortitude* (1913) he achieved financial and literary success Producing almost a book a year, he was an uneven writer, among his best-known works are the historical Herries novels, *Rogue Herries* (1930), *Judith Paris* (1931), *The Fortress* (1932), and *Vanessa* (1933) *Portrait of a Man with Red Hair* (1925) is probably his best horror story There are autobiographical elements in *Jeremy* (1919), *Jeremy and Hamlet* (1923), *Jeremy at Crale* (1927), and *The Cathedral* (1922) He also wrote short stories, plays, biographies of Joseph Conrad (1916) and Anthony Trollope (1928), and the screen script of *David Copperfield* He made lecture tours in the United States Walpole was knighted in 1937 See studies by Clemence Dane (1929) and Marguerite Steen (1933)

Walpole, Robert, 1st **earl of Orford,** 1676–1745, English statesman He was the third son of a Whig family of Norfolk and was educated at Eton and at King's College, Cambridge In 1698, by the death of his two elder brothers, he fell heir to the family estates, to which he succeeded in 1700 In 1701 he was returned to Parliament from the family borough of Castle Rising, and in 1712 he took the seat for King's Lynn, also a family borough, from which he was regularly returned thereafter Walpole soon attracted the attention of the earl of Godolphin, and in 1708 he succeeded Henry ST JOHN (later Viscount Bolingbroke) as secretary of war and later became treasurer of the navy (1710) As party leader in the House of Commons, he acted as a prosecutor in the SACHEVERELL trial, which helped to bring about the fall of the Whigs (1710) Walpole became active in opposition to Robert HARLEY (earl of Oxford) and St John and as a consequence was convicted of corruption in the matter of some forage contracts and spent some months in the Tower (1712) The accession of GEORGE I (1714) returned the Whigs to power and Walpole became paymaster of the forces and, after acting as chairman of the committee which drew up articles of impeachment against the late Tory ministers, first lord of the treasury and chancellor of the exchequer (1715) under his brother-in-law, Viscount TOWNSHEND The intrigues of the king's German advisers with James Stanhope and the earl of Sunderland forced Walpole out of office (1717), but he became paymaster again in 1720 That same year he was called upon to salvage the financial wreckage resulting from the SOUTH SEA BUBBLE, against which Walpole had warned officials although he had made a large fortune from South Sea investments This was the turning point of his career His successful handling of this matter caused his appointment as first lord of the treasury and chancellor of the exchequer (1721), and he remained the chief figure in political life until 1742 Until 1730 he shared some control with Townshend, who was in charge of foreign affairs Walpole's dominance was strengthened upon the accession of GEORGE II (1727) by his influence with the new queen, CAROLINE OF ANSPACH, and he became in effect the first prime minister in English history In domestic affairs he pursued a double policy of encouraging trade, particularly that of the colonies, and mollifying the largely Tory gentry by reduction of the land tax In foreign affairs Walpole favored friendship with France and avoidance of war His general aim was to move cautiously and thus strengthen England and the Hanoverian dynasty Financial policy was his strongest point In 1717 he created the sinking fund to reduce the national debt Although a mercantilist in theory, he promoted export by bonuses and encouraged the production of raw materials by the colonies Walpole's plan to reduce smuggling and make London a free port by replacing tariffs on wine and tobacco with an excise tax was defeated in 1733 because of popular fear of an excise Politically, he strengthened the cabinet system by replacing disloyal ministers and by judicious dealings with the king As a party politician he enforced strict discipline, punishing insubordinate followers by removing them from their posts, even in the army, and rewarding loyal supporters with preferments and pensions out of government funds Because of this he has been accused by some writers as a symbol of corruption, but he is far less definitely convicted of direct bribery than many of his contemporaries and successors Walpole's long tenure of office enabled his opposition to make common cause In 1739 the war party forced him to involve England in the War of Jenkins's Ear (1739–41), which in turn involved the country in the War of the Austrian Succession Military reverses and rising opposition forced his resignation in 1742 He was created earl of Orford and remained politically powerful until his death Walpole's gifts as a politician and the circumstances of his time led to a decline in the personal power of the monarch and a corresponding rise in the influence of the king's ministers, a tendency which was never reversed See biographies by William Coxe (1798), Alexander Ewald (1878), John Morley (1889), J M. Robertson (1919), and G. R Stirling Taylor (1931)

Walpole, Sir Spencer, 1839–1907, English historian and civil servant He held a number of minor pub-

he offices and served as private secretary in the home office to his father, Sir Spencer Horatio Walpole, whose biography he wrote (1874). He contributed to the newly founded *Pall Mall Gazette*, but he is chiefly remembered for his *History of England from 1815* (5 vols , 1878–86) and its continuation, *History of Twenty-five Years* (4 vols , 1904–8), which covers the period from 1856 to 1880. Walpole's biography of Lord John Russell appeared in 1893 He was knighted in 1898

Walpole (wôl'pōl). **1** Town (pop. 7,443), E Mass., SW of Boston; settled 1659, set off from Dedham 1724. Cotton and paper products are made here **2** Town (pop. 2,400), SW N H , on the Connecticut and S of Charlestown, settled 1749, granted and inc. 1752 The village has many fine old houses

Walpurga, Saint : see WALBURGA, SAINT

walrus (wôl'rŭs, wôl'-), gregarious aquatic mammal related to the seal and found in arctic waters There are two similar species, the Atlantic and the Pacific walruses Adult males reach a length of 10 to 12 ft or more and a weight of over a ton The thick wrinkled skin is sparsely haired Bristly whiskers are found on the muzzle The tusks are usually from 14 to 26 in long in the male, smaller in the female. They are used to dig up its food (clams and other marine forms), as an aid in moving on land, and as weapons The walrus was more important formerly than now as a commercial source of walrus ivory (from the tusks), leather, and oil To the Eskimo it is a source of food

Walsall (wôl'sôl), county borough (1931 pop 103,059, 1947 estimated pop 111,010), Staffordshire, England, NNW of Birmingham, in the Black Country. Coal and iron mining, iron and brass founding, limestone quarrying, and the manufacturing of leather goods and aircraft parts are important

Walsenburg (wôl'sunbûrg), city (pop 5,855, alt c 6,200 ft), co seat of Huerfano co , S Colo., S of Pueblo, in a grain, livestock, and coal area, laid out 1873 at an earlier Spanish village

Walsh, Thomas James (wôlsh), 1859–1933, American statesman, b Two Rivers, Wis , grad Univ of Wisconsin (LL.B , 1884) He practiced law at Redfield, Spink co , S Dak (1884–1890), and at Helena, Mont. (1890–1912) After 1913 he represented Montana in the U S Senate Walsh became important in the Democratic party and supported the measures of President Woodrow Wilson. In Wilson's second term he became the President's chief adviser on the constitutionality of war measures He helped write the Eighteenth and Nineteenth amendments and worked for the abolition of child labor. Walsh, noted for his ability in debating, fought for the League of Nations and the World Court and advocated arms limitations He was (1922) the leader of the successful fight to remove Truman H. Newberry from the Senate An unrelenting foe of corruption, he became a popular figure when the Senate Investigating Committee, which he headed (1922–23) exposed the fraudulent practices of the Harding administration in the leasing of naval oil reserves at TEAPOT DOME In 1924 he refused the vice presidential nomination of the Democratic party Walsh supported F D Roosevelt in 1932 and was appointed U S Attorney General, but he died suddenly before he was able to take office.

Walsingham, Sir Francis (wôl'sĭng-ŭm), 1530?–1590, English statesman After studying at Cambridge and Gray's Inn, he went abroad during Queen Mary's reign because of his strong Protestant sympathies Walsingham entered Parliament (1559) after Elizabeth's accession, and soon was employed by William Cecil, Baron Burghley, in obtaining intelligence from abroad Joint secretary of state after 1573, he built up an elaborate and effective spy system, which later implicated the imprisoned Mary Queen of Scots in a conspiracy against Elizabeth (1586) and led to her execution. His system also in 1587 provided England with minute details of the impending attack of the Spanish Armada Walsingham was a staunch Protestant and favored an alliance of England, France, and the Netherlands against Spain. But, although he was employed on numerous missions and knighted in 1577, he was never able to affect Elizabeth's policy greatly. The responsibility for the debts he assumed (1586) at the death of his son-in-law, Sir Philip Sidney, brought financial distress, and he died in debt. See Conyers Read, *Mr. Secretary Walsingham and the Policy of Queen Elizabeth* (3 vols , 1925).

Walsingham, village, Norfolk, England. It is the site of Walsingham Abbey, one of the great shrines in medieval England Of the sacred shrine of Our Lady of Walsingham, built c.1061, nothing is left, but the chapel of the priory was restored in 1921 and the wayside Slipper Chapel in 1934.

Walston or Waldstein, Sir Charles, 1856–1927, English archaeologist, b. New York city. He was lecturer (1894–1927) at King's College and Slade professor of fine arts (1895–1901; 1904–11) at Cambridge Univ. While in Athens as director (1889–93) of the American School of Archaeology, he discovered the tomb of Aristotle, the Heraion of Argos, and the site of ancient Platsea. He was knighted in 1912. Among his writings are *Aristodemocracy* (1916) and *Alcamenes and the Establishment of the Classical Type of Greek Art* (1927).

Walter, Bruno, 1876–, German-American conductor, whose name was originally Bruno Walter Schlesinger, studied at the Stern Conservatory in Berlin Having conducted at the Cologne and Hamburg operas, he was appointed by Mahler as a conductor at the Vienna State Opera, where he remained until 1912. He was musical director of the Munich Opera (1912–22) and of the Municipal Opera, Berlin (1925–29) He was conductor of the Gewandhaus Concerts, Leipsig, from 1929 to 1933, when the Nazis forced him to leave Germany In 1935 he returned to the Vienna Opera, but left Austria in 1938 and was not allowed to return He became a French citizen in 1938 and in 1939 took permanent residence in New York In 1941 he became an annual guest conductor of the New York Philharmonic He has also been guest conductor of the Metropolitan Opera, the NBC Symphony, the Salsburg Festival, and the Covent Garden Opera, London He wrote *Gustav Mahler* (Eng trs , 1937, 1941) See his autobiography, *Theme and Variations* (1946)

Walter, Eugene, 1874–1941, American dramatist, b Cleveland His chief successful melodramas were *Paid in Full* and *The Easiest Way* (both produced 1908) He also dramatized *The Trail of the Lonesome Pine* (produced 1911) and *The Little Shepherd of Kingdom Come* (produced 1916), both by John Fox, Jr , and wrote film scenarios

Walter, Hubert, d 1205, English archbishop and statesman He served as a clerk to his uncle, Ranulf de Glanville, and in 1186 he was made dean of York In 1189 he was appointed bishop of Salisbury, and he accompanied Richard I to the Holy Land in 1190 He returned to England in 1193 to be made archbishop of Canterbury and justiciar of the realm at the instigation of the still-absent Richard and later forestalled a rebellion planned by John (later King John) After Richard again departed (1194), Hubert was virtual ruler of England Despite his manifest avarice, he was responsible for tax reforms and important administrative reforms tending toward the representative principle in town and county government In 1196 Walter caused the Church of St Mary-le-Bow to be set afire in order to drive out the leader of the revolting London craftsmen, William FitzOsbert, who had taken sanctuary there The action resulted in Walter's dismissal from secular office in 1198 Upon the accession of John (1199) he became chancellor and exerted a restraining influence upon the king

Walter, Lucy, 1630?–1658, English beauty, mistress (1648–50) of Charles II of England during his exile in Holland She was the mother of James Scott, duke of Monmouth, whom the Whigs supported as heir to the throne in their attempt to exclude James, duke of York (later James II), from the succession Charles owned the paternity of her son, but always denied the report that he had been legally married to her A courtesan of very low character before and after her connection with Charles, she was arrested in London (1656) as a spy, but was released and sent abroad. She died in Paris.

Walter, Thomas Ustick, 1804–87, American architect, b Philadelphia In 1819 he entered the office of William Strickland, in Philadelphia, as a student In 1830 he commenced practice, the county prison (1831) at Moyamensing, Philadelphia co , being his first important work The main building of Girard College in Philadelphia, which he designed in 1833 and completed in 1847, was one of the most ambitious works of the classic revival In 1851 Walter was appointed to design extensions for the CAPITOL at Washington, which had remained unchanged since the completion of Bulfinch's plans in 1830 Holding the post of government architect until 1865, Walter added the wings for the Senate and House of Representatives, as well as the central dome of cast iron, replacing Bulfinch's low dome, and rebuilt the west front At Washington, Walter also designed the interior of the Library of Congress and built extensions for the Post Office, the Patent Office, and the Treasury His works in Philadelphia included the Biddle and Cowperthwaite country homes For the Venezuelan government he designed a breakwater at La Guaira One of the original organizers of the American Institute of Architects in 1857, he held its presidency from 1867 until his death. Walter's designs possessed fine classic and monumental character, and he stood highest among American architects of his time

Walterboro, town (pop. 3,373), co seat of Colleton co., S S C , W of Charleston, in a fertile farm area also noted for its hunting and fishing

Walter of Henley or Walter de Henley, 13th cent., English writer on agriculture. His treatise *Husbandry*, written in Norman French in the mid-13th cent , was the great medieval authority in England for 200 years on problems of rural economy, from the sowing and manuring of land to the management of labor. See translation by Elizabeth Lamond, *Walter of Henley's Husbandry* (1890).

Walters, city (pop. 2,233), co. seat of Cotton co., SW Okla., near the Red River.

Walter the Penniless, d. 1096, French Crusader. He and his followers left for the Holy Land well in advance of the main army of the First Crusade They passed peacefully through Germany and Hungary, but plundered the Belgrade area and were set upon by the Bulgarians, who killed many of them Walter with the remnants of his army reached Constantinople, where they were joined by the forces of PETER THE HERMIT The Byzantine emperor Alexius I provided transport for Walter's and Peter's forces to Asia Minor, where they were utterly defeated (1096) by the Seljuk Turks

Waltham (wôl'thăm, -thəm), city (pop. 40,020), E Mass , on the Charles and W of Boston, settled 1634, set off from Watertown 1738, inc as a city 1884. Electrical apparatus is made here The Waltham Watch Company, in operation since 1854, closed in 1950 Waltham is the seat of Brandeis Univ (1948), the first Jewish-sponsored nonsectarian institution of higher learning in the United States, and of the Fernald school for the mentally handicapped

Waltham Holy Cross (wôl'tŭm, wôl'thum) or **Waltham Abbey,** urban district (pop 7,115), Essex, England, on the Lea and at the edge of Epping Forest The great abbey, the Norman nave of which is now used as a parish church, was built in 1030 to contain a miraculous cross found in Somerset, it was enlarged in 1060 by King Harold, who is thought to have been buried here The tower contains an old whipping post, pillory, and stocks The east window is by Burne-Jones Great factories for making gunpowder are south of the town **Waltham Cross,** a mile west, is the site of an Eleanor Cross (see ELEANOR OF CASTILE)

Walthamstow (-stō), municipal borough (1931 pop 132,972, 1947 estimated pop 124,380), Essex, England, industrial suburb of London William Morris was born here, and Disraeli attended a local school There are several 16th-century manor houses and almshouses and an ancient Church of St Mary

Walther von der Vogelweide (vâl'tur fŭn dĕr fō'gl-vī"du), c 1170–c 1230, German minnesinger, of noble birth He was the finest lyric poet of the Middle Ages He wandered from court to court singing in Bavarian dialect poems for which he also wrote the music He was also noted for his *Sprüche* or maxims, frequently on political subjects See translations by W A Phillips (1890) and I G Colvin (1896)

Walthill, village (pop 1,204), NE Nebr , near the Missouri NNW of Omaha, settled c 1906

Walton, George (wôl'tun), 1741?–1804, American Revolutionary patriot, signer of the Declaration of Independence, b Virginia He moved to Augusta, Ga , where he established a law practice Walton was a delegate to the Continental Congress (1776–78, 1780–81) He was captured by the British at the fall of Savannah (1778), but was exchanged in 1779 and later was governor of Georgia (1779–80, 1789–90) and briefly U S Senator (1795–96)

Walton, Izaak, 1593–1683, English writer An ironmonger and self-educated, he wrote one of the most famous books in the English language, *The Compleat Angler, or, The Contemplative Man's Recreation* The first edition appeared in 1653, and it was reissued frequently with additional material, the last edition in Walton's lifetime appeared in 1676 The book not only describes the technique of angling, but draws a picture of peace and simple virtue which was Walton's protest against the civil war taking place at this time Walton also wrote biographies of John Donne (1640), Sir Henry Wotton (1651), Richard Hooker (1665), George Herbert (1670), and Robert Sanderson (1678)—all except Hooker his close friends See Geoffrey Keynes, *The Compleat Walton* (1929)

Walton, William Turner, 1902–, English composer, studied at Oxford with E J Dent One of his earliest works, a piano quartet (1918–19), was published (1924) by the Carnegie Trust In the 1920s *Façade*, satirical poems by Edith Sitwell read to the accompaniment of Walton's music, gained considerable esteem in London His *Portsmouth Point* (1925), *Belshazzar's Feast* (1931), and the comedy overture *Scapino* (1940) show his facility in orchestration Well known also are a symphony (1935), a concerto for viola and orchestra (1929), and the violin concerto (1936–39) commissioned by Heifetz. He wrote the musical scores for the moving pictures *Major Barbara*, *Henry V* (1945), and *Hamlet* (1947)

Walton, village (pop. 3,697), S N Y., on the West Branch of the Delaware and NE of Binghamton, in a dairy region, inc 1851. It has several small industries.

Walton and Weybridge (wâ'brĭj), urban district (1931 pop. 25,317; 1947 estimated pop 37,330), Surrey, England, WSW of London Weybridge was the site of a palace of Henry VIII, destroyed by Cromwell. There is a motor racecourse near by. The Wey river was in the 17th cent made navigable to this point by a system of locks.

Walton-le-Dale, urban district (1931 pop. 12,720; 1943 estimated pop. 14,595), Lancashire, England, near Preston and on the Ribble. It has engineering

works. There are vestiges of a Roman station, and and 11th-century church The battle of Preston was fought near here in 1648, Cromwell's headquarters were in Walton-le-Dale.

waltz, dance in moderate triple time. It evolved from the German *Ländler* and became prominent in the 18th cent The waltz in Vicente Martin's opera *Una cosa rara,* produced in Vienna (1776), is regarded as the first Viennese waltz. This type of waltz was later made famous by Johann Strauss, father and son. In 1795 the waltz had a great vogue in Paris, and it was introduced in the United States via England in the early 19th cent Berlioz, Brahms, Richard Strauss, and Ravel have composed waltzes

Walvis Bay (wôl'vĭs), or **Walfish Bay** (wôl'fĭsh), enclave (374 sq mi ; pop. 2,421), W South-West Africa, on Walvis Bay, on arm of the Atlantic Ocean Annexed to Cape Colony in 1878, it was a British enclave in German Southwest Africa and is now part of Cape Prov , Union of South Africa, but it is administered with South-West Africa Walvis Bay, town (pop 2,325), is a port and the terminus of a railroad to the interior

Wamac (wa'măk), city (pop 1,432), S Ill , E of St Louis and adjoining Centralia, inc 1916

Wamego (wŏmē'gō), city (pop 1,767), NE Kansas, near the Kansas river, WNW of Topeka; platted 1866, inc 1869 It is an agricultural community with city-owned utilities

Wampanoag Indians (wŏm"punō'ăg), North American Indian tribe of Algonquian linguistic stock In the early 17th cent they occupied Narragansett Bay E through Massachusetts to Plymouth and about the base of Cape Cod as well as on Martha's Vineyard and Nantucket The principal village of the Wampanoag was Pokanoket; consequently they are sometimes called the Pokanoket Indians When the Pilgrims settled (1620) at Plymouth, the Wampanoag, although reduced by the pestilence of 1617, were a powerful tribe, living in some 30 villages Their chief, MASSASOIT, was very friendly to the settlers His son, PHILIP, however, was the central figure of the deadliest war against the colonists, King Philip's War (1675) The victory of the English brought ruin to the tribe The Wampanoag were harried almost out of existence the remnant consolidating with the Saconnet There are still a few Indians of Wampanoag descent, living mainly in Massachusetts The Wampanoag were of the Eastern Woodlands culture area

Wampum, borough (pop 1,061), W Pa , SSW of New Castle, settled 1796, inc 1876 Coal and cement are produced here

wampum (wŏm'pum) [New England Algonquian, = white string of beads], beads or disks made from the shells of mollusks found on the eastern coast or the larger rivers of North America In general, wampum beads were cylindrical They were highly prized by the Indians, particularly by those of the Eastern Woodlands and Plains cultural areas On the Pacific coast shell ornaments (especially gorgets) were also used, but wampum was principally important in trade in the East Most of it came from the East and passed by trade to inland tribes It was, in fact, used as a sort of currency—"shell money" There were two varieties—the white, which is the only sort properly called wampum, and the more valuable purple (usually made from the purple portion of a clam shell), to which different names were applied in the various tribes Wampum was used for ornamentation in such things as necklaces and collars Wampum belts were of particular ceremonial importance because they were exchanged when a treaty of peace was signed Frequently the belts had pictographs worked on them Wampum was also used by white fur traders as currency in their trade with the Indians

Wanamaker, John (wŏ'număkur), 1838–1922, American merchant, b Philadelphia He went into the men's clothing business in Philadelphia with Nathan Brown, his brother-in-law, in 1861 The firm was Wanamaker and Brown until the death of Brown in 1868, and from 1869 it was John Wanamaker and Company In 1875 Wanamaker bought the site of the old Pennsylvania RR freight station and opened a new dry goods and clothing store, which later became one of the first and best-known department stores He was Postmaster General (1889–93) in Benjamin Harrison's cabinet and greatly improved the efficiency of the service He extended his business into New York city in 1896, when he took over the store which had formerly been A. T Stewart and Company He was identified with religious work in Philadelphia, as a paid secretary (1857–61) and as the president (1870–83) of the Young Men's Christian Association and as superintendent of the Bethany Presbyterian Sunday School for many years See biographies by H. A. Gibbons (2 vols 1926) and J H. Appel (1930)

Wanaque (wä'nukē), borough (pop. 3,143), NE N.J , in the Ramapos NW of Paterson, inc 1918 It is near the Wanaque Reservoir, the largest in New Jersey.

Wanchuan, China see CHANGKIAKOW

Wandering Jew, in literary and popular legend of the last seven centuries, a Jew who mocked or mistreated Jesus while He was on His way to the cross and who was condemned therefore to a life of wandering on earth until Judgment Day. The story is common in Western Europe, but it presents marked national variations, e g., in Spanish and Portuguese the Wandering Jew is eternally repentant and goes about doing good for expiation. The subject has been treated many times, e g , by Goethe (fragment), Schlegel, and Müller, by Quinet and Eugène Sue, and by Shelley (in his *Queen Mab*).

Wanganui (wŏng"ŭnō'ē, wŏng"gu-), city (pop. 23,842, metropolitan pop. 26,462), on North Island, New Zealand, near the mouth of the Wanganui river on the southwest coast Among its buildings are the Alexander Museum and the Wanganui Collegiate School. There are soap and clothing factories and a textile mill Wanganui was founded in 1840

Wang Ching-wei (wäng' jĭng'-wā'), 1885–1944, Chinese statesman. A supporter of Sun Yat-sen, Wang was sentenced (1910) to life imprisonment for attempting to assassinate the regent of China After being freed (1912) by the republican revolution, he studied in France until 1920 He and Chiang Kai-shek were Sun's leading disciples, and after Sun's death (1925) Wang led the left-wing of the Kuomintang He several times revolted against Chiang's leadership of the party, but he was premier (1932–35) and president of the people's political council (1938) Wang advocated peace with Japan in 1938 and broke with Chiang From 1939 to his death he was premier of the Japanese puppet government at Nanking

Wang Chung-hui (wäng' chōong'hwā'), 1882–, Chinese jurist He was educated in China, Japan, Europe, and the United States Wang became (1912) the first minister of justice of the Chinese republic After 1916 he held numerous positions in the field of Chinese and international law He was chief justice of the Chinese supreme court (1920), minister of justice (1922, 1927–31), and a judge of the World Court (1930–35) Wang was also minister of education (1926) and of foreign affairs (1937–41)

Wang Wei (wäng' wā'), 699–759, Chinese poet He was a many-sided man, being a physician and painter as well as a poet He wrote quatrains almost exclusively, these delicately portray quiet scenes like those depicted in his few surviving paintings Under compulsion he served first a usurper and later the rightful emperor In old age, after his wife's death, he entered a Buddhist monastery

Wanks see SEGOVIA, river

Wanne-Eickel (vä'nu-ī'kul), city (pop 73,756), Westphalia, NW Germany It is a coal-mining center of the Ruhr district and has a chemical industry The city was formed (1926) by joining the twin cities of Wanne and Eickel

Wanstead (wŏn'stĕd), urban district (pop 19,183), Essex, England, NE of London Wanstead Park, now public grounds with a lake and heronry, formerly belonged to Wanstead House, a great mansion of the 18th and 19th cent

Wantage (wŏn'tĭj), urban district (1931 pop 3,426, 1943 estimated pop 4,260), Berkshire, England, in the Vale of the WHITE HORSE It is noted as the birthplace of Alfred the Great The church and the grammar school are old foundations

Wapakoneta (wŏpukunē'tu), city (pop 5,225), co seat of Auglaize co , W Ohio, S of Lima, in a farm area, founded 1833 It has varied manufactures

Wapato (wŏ'putō, wa'-), potato-shipping town (pop 1,483), S Wash , in the Yakima valley S of Yakima, inc 1908

Wapello (wa'pulō), city (pop 1,603), co seat of Louisa co , SE Iowa, on the Iowa river near the Mississippi and N of Burlington, in a farm area, settled 1837, inc 1850 Ancient Indian mounds are near by

wapiti (wŏ'pĭtē), member of the deer family, often called elk in America Belonging to the genus *Cervus,* it is closely related to the Old World red deer but not to the elk Once abundant, the wapiti was exterminated in the E United States and reduced in the rest of its range by slaughter of the animals for food, leather, and canine teeth used as charms and for sport Among the forms surviving under protection are the Rocky Mountain wapiti and the Roosevelt or Olympic elk or wapiti Several varieties of central and E Asia are threatened with extinction

Wappers, Gustave, Baron (güstäv' bärō' vapĕrs', vä'pûrs), 1803–74, Belgian historical and genre painter For many years director of the Antwerp Academy, he introduced the romantic school into Belgium and did much toward the development of modern art in that country The last 15 years of his life were spent in Paris His works include *Confidences,* portraits of his daughters (Metropolitan Mus), *Burgomaster van der Werff at the Siege of Leyden* (Utrecht), and *Episode of the Belgian Revolution of 1830* (Brussels).

Wapping (wŏp'ĭng), riverside district of Stepney metropolitan borough, London, England, near the Tower. It is a dock section, and the north terminus of the Thames Tunnel to Rotherhithe (constructed 1825–43 by Brunel) is here.

Wappinger Indians (wŏ'pĭnjûr), group of North American Indian tribes of Algonquian linguistic stock In the early 17th cent they occupied the east bank of the Hudson river from Poughkeepsie to Manhattan island and ranged E into Connecticut They were closely related to the Mahican to the north and the Delaware to the southwest, and there is much argument about assigning various bands to any one of the three tribes The Wappinger, however, were divided into nine tribes—the Wappinger proper, the Kitchawong, the Sint Sink, the Tankiteke, the Weckquaesgeek, the Manhattan, the Siwanoy, the Nochpeem, and the Sequin The power of the Wappinger confederacy was broken in a five-year war with the Dutch (1640–45), and gradually they sold their lands and retired to the protection of the neighboring tribes Some joined the Nanticoke, some the Delaware, and some the Mahican The Wappinger were of the Eastern Woodlands cultural area

Wappingers Falls (wŏ'pĭnjurz), village (pop 3,427), SE N Y , in the Hudson Highlands near Poughkeepsie, inc 1871 The Society of the Cincinnati (see CINCINNATI, SOCIETY OF THE) was founded here in 1783

War, trading town (pop 1,277), extreme S W Va , WNW of Bluefield, in a coal, lumber, and stock region, inc 1920

war, armed conflict between sovereign states (international war) or between factions within a state (civil war), prosecuted by a systematic destruction of combatants and property (and increasingly, in modern machine warfare, of noncombatants also) and having as its purpose the imposition of certain conditions upon the opposing power after securing its defeat Warring groups or nations may seek to exact recognition of independence, cession of territory, grant of privileges, consent to policies, imposition of religious or political ideology, or the protection of all these If waged for self-protection, war is defensive, if conducted on foreign soil as an act of aggression, it is offensive, in between is the "preventive" war, where a threatening enemy of steadily increasing power is attacked to prevent it from launching its own attack In recognition of the increased awareness and power of public opinion it is becoming customary for the leaders of all belligerents in modern war to identify their fighting as "defensive" War, which generally occurs only when ARBITRATION, MEDIATION, or negotiation have failed to remove its cause is a confession of the finality of force It thus appears as a manifestation of the human struggle for existence and satisfaction of desires, aggravated by the complexity of modern social organization Economic, racial, and religious factors all operate to cause war, IMPERIALISM, NATIONALISM, militarism, and secret diplomacy are often called dynamics of modern wars In ancient states war tended to be a community enterprise, with many fighters attracted by desire for booty, but as society divided on a functional basis, a warrior class (often supplemented by foreign mercenaries) developed, and the ARMY and NAVY became component parts of the state, and in many instances, recent and historic, the military ruled the state The use of fighting forces as instruments of war became a science when STRATEGY AND TACTICS were employed in military and naval operations War has been even more greatly influenced, however, by industrial development, scientific progress, and the spread of popular education, a new era of machine warfare, prosecuted by (though seldom instigated by) peoples rather than by rulers and the military class alone developed after the wars of Napoleon I Modern warfare calls for the regimentation and coordination of peoples and resources, the state demanding a surrender of private rights in order that unity of purpose may enable it to prosecute the war to a victorious conclusion, in modern times community of interest, goals, and beliefs, economic, political, and cultural, have caused the formation of opposing coalitions of nations, as in the First World War and the Second World War Furthermore, war requires not only the close cooperation of all divisions of the armed forces, but also coordination between the military and the diplomatic organs of government, in line with this, CLAUSEWITZ described war as "a continuation of political intercourse by other means" Confident, disciplined, properly equipped armies must be supported by public opinion, usually influenced by PROPAGANDA Though the laws of war are designed to mitigate some of its effects, with the improvement of armament modern warfare becomes increasingly destructive of life and resources Thus, in the First World War some 10,000,000 were killed In the Second World War there were 15,000,000 killed in battle, and an unknown number were killed as a result of air raids and disease The indirect costs of war defy computation. Even after the Second World War nations were appropriating billions of dollars for armaments Because war and its consequences are considered by many to imperil civilization, or at best to retard it, efforts have been made after every modern war to prevent the outbreak of another After the First World War, the LEAGUE OF NATIONS, international tribunals, and the KELLOGG-BRIAND PACT were employed to facil-

itate the peaceful settlement of disputes or to restrict and prevent war. After the Second World War the world's hope for peace was centered on the UNITED NATIONS The frequency and frightfulness of war and the hope of preventing it has brought it more and more under the study of scientists and scholars, its causes and consequences have been interpreted by biologists, anthropologists, historians, statisticians, and economists, with little agreement and less concrete result There is even widespread disagreement on the definition of war See L L Bernard, *War and Its Causes* (1944), Quincy Wright, *A Study of War* (2 vols , 1942).

war, laws of. The laws of war are usually observed as a duty imposed by INTERNATIONAL LAW in armed conflicts between states Insurrections and civil wars may be as devastating as international wars, and it is a frequent practice of an established government to recognize the BELLIGERENCY of its domestic opponents and to conduct conflicts with them according to the laws of war These laws are designed to minimize the destruction of life and property, to proscribe cruel treatment of noncombatants and prisoners of war, and to establish conditions under which belligerents may consult with one another In the Middle Ages the observances of knighthood restrained some cruelties in warfare, but it was not until the 17th cent that systematic legal codes appeared The great work of GROTIUS, *De jure belli ac pacis* [on the laws of war and peace] (2d ed , 1631) and the works of Vattel had much influence in introducing humane practices Detailed international treaties governing war are mostly a product of the 19th and the 20th cent The Declaration of Paris (1856, see PARIS, DECLARATION OF), the accords concluded at HAGUE CONFERENCES (1899,1907), and the Geneva Conventions (1906) are the main bodies of formulated law There is no convention to which all the major powers of the world have acceded, and many conventions provide that their terms shall be inoperative if any of the belligerents is not a signatory or if an enemy commits a violation Despite such provisions, many nations have adopted the laws of war and the conditions of warfare have undoubtedly been ameliorated, particularly in the treatment of prisoners and the consideration shown to the sick and wounded Prisoners of war must be fed and housed according to the standards enjoyed by the captor's forces Prisoners who are officers may not be required to work at all, and enlisted prisoners may only be compelled to work at tasks which do not injure their country's cause Prisoners are not to be punished for attempting to escape The care of the sick and the wounded is facilitated by making medical personnel noncombatants and by sparing clearly marked hospitals and similar installations from attack Conventions restricting the use of certain weapons probably have not materially mitigated the horrors of war For the most part only those weapons which are of limited military use, e g , poison gas, have been effectively banned, while efforts to prohibit militarily effective weapons, e g , submarine mines, have not succeeded In recent conflicts the laws of war have also failed in the aim of protecting the noncombatant population When aerial warfare makes the whole territory of the enemy into a theater of operations civilians will often be faced with the same hazards as the military forces Civilians in territory occupied by the enemy are, however, entitled to certain protections There may not be imprisonment without cause, and fines may not be levied upon a whole civilian population for individual offences Private property also receives limited protection, and it may not be confiscated for military use unless fair compensation is paid Special rules govern such actions against property as the taking of a PRIZE at sea or in port, the confiscation of CONTRABAND, and the use of the BLOCKADE Property destroyed in the course of action against the enemy, of course, is not compensable Places of religious, artistic, or historical importance should not be attacked unless there is military need No direct diplomatic relations exist between belligerents, but neutral diplomats are often given custody of property in enemy territory and are entrusted with negotiations In the field of combat, passports, safe-conducts, and flags of truce permit consultations between opposing commanders Hostilities may even be completely suspended by an armistice, which is often the prelude to surrender Violations of the laws of war have probably occurred in all major conflicts Against a nation confident of victory perhaps even reprisals will not have effect In the Second World War the United Nations attempted to force observance of the laws of war by threatening with prosecution the military and civilian leaders of the Axis powers who were responsible for violations, and during and after the war there were many trials for WAR CRIMES. See NEUTRALITY and SEAS, FREEDOM OF THE. See E W. Puttkammer, ed , *War and the Law* (1944)

Warbeck, Perkin, 1474?–1499, pretender to the English throne, b Tournai. He lived in Flanders and later in Portugal and arrived in Ireland in the employ of a silk merchant in 1491 There adherents of the Yorkist party persuaded him that he was Richard, duke of York, a son of Edward IV, and the rightful king of England His claim was supported by the Emperor Maximilian I, by James IV of Scotland, and by Margaret of Burgundy, sister of Edward IV and the chief supporter of the Yorkist exiles Warbeck's attempt to invade England in 1495 failed, and he went to Scotland where he married Catherine Gordon, a cousin of James IV In 1497 Warbeck landed in Cornwall, proclaimed himself Richard IV, and raised a rebel army His forces were opposed by those of Henry VII at Exeter, and the pretender fled He was captured, admitted the whole story of his adventure, and was imprisoned In 1499 he and the earl of Warwick were hanged for plotting against the king See Edwin Hemes and George Bruner, *A Historical Sketch of Perkin Warbeck* (1902), John Ford's play *Perkin Warbeck* (1639)

warble fly: see BOTFLY.

warbler, name in the New World for the wood warblers, a family of small, migratory, perching birds usually of bright plumage and of mediocre singing ability The Old World warblers are of another family and are generally fine songsters with dull plumage The American warblers spend about three quarters of the year in the tropical regions, chiefly in Central and South America, but during the summer they are found in most parts of North America They are of inestimable value in destroying insect enemies of forest trees Among the better singers of the family are the OVENBIRD, the water thrush, the pine warbler, and the yellow-throat, Kentucky, and mourning warblers The redstart and the Blackburnian warblers, both with vivid black and orange plumage, the yellow warbler or summer yellowbird which often nests in gardens, the CHAT, and the black-throated blue and green warblers are well known Because they crawl over branches in search of insects, the black-and-white, the yellow-throated, and the northern pine warblers are sometimes called creepers

Warburg, Otto Heinrich (ō'tō hĭn'rĭkh vär'bo͝ork), 1883–, German physiologist He was director of the Kaiser Wilhelm Institute for cell physiology at Berlin He investigated the exchange of energy in carbonic acid assimilation, the metabolism of tumors and the respiration of cells, particularly cancer cells For his discovery of the nature and the mode of action of the respiratory ferment known as Warburg's respiratory (or yellow) enzyme, he won the 1931 Nobel Prize in Physiology and Medicine He edited *The Metabolism of Tumours* (Eng tr , 1930)

Warburton, Bartholomew Elliott George (Eliot Warburton), 1810–52, Irish author He is best known for *The Crescent and the Cross* (1844), an account of his travels in the Near East

Warburton, William, 1698–1779, English bishop and author Ordained in 1727 and serving successively in several rectories, he became chaplain to the prince of Wales in 1738, preacher to Lincoln's Inn in 1746, and chaplain to the king in 1754 He was made prebendary of Durham in 1755, dean of Bristol in 1757, and bishop of Gloucester in 1760 His writing, most of which was ecclesiastical, is noted for its arrogance *The Alliance between Church and State* (1736) was followed by *The Divine Legation of Moses*, a learned anti-deist polemic, the first six books of which appeared in 1737–38 and 1741 and the ninth in 1788 Warburton and Pope became warm friends with the appearance of *A Vindication of the Essay on Man* (1739–40) Warburton edited Shakspere with Pope, and, as Pope's literary executor, edited his works (1751) *The Doctrine of Grace* (1763) was an assault upon Methodism which invoked replies from its leaders, John and Charles Wesley and George Whitefield Bishop Hurd prefaced his edition of Warburton's works (1788) with a life, separately published in 1860 See A W Evans, *Warburton and the Warburtonians* (1932)

war crimes. In the course of the Second World War the Allied powers determined upon punishing all Axis war criminals War crimes (see WAR, LAWS OF) were defined to include plotting aggressive warfare and committing atrocities against any civilian group (notably the deliberate attempt to exterminate a people or genocide) The first step was taken in the Moscow Declaration of Oct 30, 1943, which pledged the prosecution of German war criminals Shortly afterward the United Nations Commission for the Investigation of War Crimes was formed to compile lists of suspects The commission distinguished two classes of war criminals—those whose crimes were directed against the nationals of one state (they were to be tried by national courts or military tribunals) and those whose crimes were international in scope (they were to be tried by special international tribunals organized according to military law). In Aug , 1945, Great Britain, France, the USSR, and the United States adopted a statute for trying the principal Nazi leaders, both military and civilian A tribunal representing those four countries was established at Nuremberg, and the trial opened in Nov., 1945 Voluminous evidence was presented to prove the plotting of aggressive warfare, the extermination of civilian populations (especially the Jews), the widespread use of slave labor, the looting of occupied countries, and maltreatment and murder of prisoners of war Among others sentenced to death (1946) were GOERING, RIBBENTROP, and STREICHER Hjalmar SCHACHT and Franz von PAPEN were acquitted. The court did not convict Nazi organizations or the German general staff A trial of 28 alleged Japanese war criminals was conducted (1946–47) by an eleven-nation tribunal in Tokyo Evidence similar to that presented against the Nazis brought death sentences to TOJO and others. The U.S Supreme Court refused an appeal based on the grounds that the international court was unlawful There were many trials in national civil and military courts, including those of the Japanese generals YAMASHITA and HOMMA Although exact statistics are not available, it is estimated that by 1950 about 8,000 persons were tried and about 2,000 executed. A reduction in the number of trials became apparent several years after the war's end, and the protest was sometimes heard that many of the guilty were escaping retribution and that the hoped-for deterrence of aggressive warfare and systematic cruelty would not be realized See Sheldon Glueck, *The Nuremberg Trial and Aggressive War* (1946), Robert H Jackson, *The Case Against the Nazi War Criminals* (1946)

Ward, Artemas (ärt'tĭmus), 1727–1800, American general in the American Revolution, b Shrewsbury, Mass He was active in colonial politics and served in the last French and Indian War As head of Massachusetts troops, he was regarded as chief commander at the siege of Boston (1775) until the arrival of George WASHINGTON He directed the fortification of Dorchester Heights (see BUNKER HILL, BATTLE OF), but after the British evacuation he resigned from the service Later he served in the Continental Congress and the U S Congress See biography by Charles Martyn (1921)

Ward, Artemus (ärt'tĭmus), pseud of **Charles Farrar Browne,** 1834–67, American humorist, b Waterford, Maine As a reporter on the Cleveland *Plain Dealer*, he began in 1858 a series of "Artemus Ward's Savings," whose humor, dependent on the misspelled words and quaint turns of speech, made him famous on both sides of the Atlantic In 1859 he joined the staff of the New York humorous weekly *Vanity Fair* and when it failed turned with immediate success to lecturing See his *Selected Works* (ed by A J Nock, 1924), biography and bibliography by D C Seitz (1919)

Ward, Bernard Nicholas see WARD, WILLIAM GEORGE

Ward, Edgar Melville see WARD, JOHN QUINCY ADAMS

Ward, Edward Matthew, 1816–79, English historical and genre painter, author of eight murals in the House of Commons Other well-known paintings include *Dr Johnson in the Anteroom of Lord Chesterfield* and *South Sea Bubble* (both National Gall , London)

Ward, Frederick Townsend, 1831–62, American adventurer, b Salem, Mass , educated at Norwich Univ He served with William Walker in Nicaragua and with the French forces in the Crimean War Ward arrived in Shanghai in 1859, when the TAIPING REBELLION was at its height The Chinese government engaged him to raise troops and clear the Shanghai area His force, the "ever-victorious army," won many successes near Shanghai and Ningpo Ward was killed in an attack His tomb was erected in Sungkiang, which had been his headquarters. Charles George GORDON succeeded to Ward's command See Holger Cahill, *A Yankee Adventurer* (1930)

Ward, Dame Geneviève, 1837?–1922, English actress, b New York city She made her debut as a singer at La Scala, Milan (1856), but, having lost her singing voice, turned later with great success to the stage She played over 2,000 times in *Forget-me-not* by Herman Merivale and H C Grove She made many appearances in tragic roles with F R Benson's Shakspere company and with Sir Henry Irving She married (1855) comte de Guerbel and was made Dame of the British Empire in 1921 See her autobiography, *Both Sides of the Curtain* (1918)

Ward, Mrs. Humphry, 1851–1920, English novelist, whose maiden name was Mary Augusta Arnold, granddaughter of Thomas Arnold She was born in Tasmania, where her father was inspector of schools, but was early brought to England and grew up in Oxford, where she married, in 1872, Thomas Humphry Ward, fellow and tutor of Brasenose College and an editor of the Oxford *Spectator* Her first publications were translations of Spanish literature and a children's book, *Mllie and Olly* (1881) *Robert Elsmere* (1888), a story defending the higher criticism of the Bible, made her reputation. It was followed by *David Grieve* (1892), *Eleanor* (1900), *Lady Rose's Daughter* (1903), *The Marriage of William Ashe* (1905), *Fenwick's Career* (1906), *The Case of Richard Meynell* (1911), *The War and Elizabeth* (1918), and other novels. See her autobiography, *A Writer's Recollections* (1918); study by S L Gwynn (1917); biography by her daughter, J P Trevelyan (1923).

Ward, James, 1843–1925, English philosopher. He was professor of mental philosophy at Cambridge

Univ. from 1897 until 1925 Among his most important writings are *Heredity and Memory* (1913), *Psychological Principles* (1918), and *Essays in Philosophy* (with a memoir by Olwen Ward-Campbell, 1927) See study by A H Murray (1937).

Ward, John Quincy Adams, 1830–1910, American sculptor, b Urbana, Ohio Trained under H K Brown, whom he assisted in the execution of the equestrian statue of Washington in New York, Ward was always essentially American in his art He was one of the founders of the National Sculpture Society and long its president His were the first statues for Central Park—the *Indian Hunter*, the *Freedman*, the Civil War monument, *Private of the 7th Regiment, Shakespeare*, and the *Pilgrim* His later commissions were for portrait statues and monuments These include the equestrian statue of General Thomas, the Garfield monument, and General Sherman, Washington, D C , Lafayette, Burlington, Vt , George Washington, before the Subtreasury, and Horace Greeley, New York, Henry Ward Beecher monument, Brooklyn, N Y , and General Hancock, Fairmount Park, Philadelphia In 1899 he contributed to the Dewey triumphal arch, New York, the crowning group, *Naval Victory in her Sea Chariot* In 1903, with the collaboration of P W Bartlett, he made the pediment sculptures for the New York Stock Exchange His work is marked by vigor and virility He became a member of the National Academy of Design in 1863 His brother, **Edgar Melville Ward,** 1839 1915, was a genre painter and a member (1883) of the National Academy His painting *The Coppersmith* is in the Metropolitan Museum

Ward, Lester Frank, 1841-1913, American sociologist and paleontologist, b Joliet, Ill Largely self-educated, he eventually took degrees in medicine and law He worked as a government geologist and paleontologist from 1881 to 1906, when he became professor of sociology at Brown Univ One of the first and most important of American sociologists, Ward developed a theory of planned progress called telesis, whereby man, through education and development of intellect, could direct social evolution His theories and those of his contemporary, William Graham Sumner, represent two main trends in 19th-century American thinking Among his important works are *Dynamic Sociology* (1883), *Psychic Factors of Civilization* (1893), *Pure Sociology* (1903), and *Glimpses of the Cosmos* (6 vols , 1913-18) See Samuel Chugerman, *Lester F Ward, the American Aristotle* (1939)

Ward, Nathaniel, 1578–1652, British clergyman and author Educated at Cambridge, he turned from law to the Puritan ministry and came to Massachusetts in 1634 He was minister at Agawam (Ipswich) until 1636, when ill-health forced his resignation He was chief compiler of the Body of Liberties (1641) which incorporated into the laws of Massachusetts the safeguards of person and property In 1646 he returned to England There he published *The Simple Cobler of Aggawam* (1647), which he had written in America In some of the liveliest prose written in the colonies, this little book advocated a new theory of constitutional government for England and protested vehemently against toleration and women's fashions In 1648 Ward was granted the living of Shenfield in Essex, where he died See memoir by J W Dean (1868)

Ward, William George, 1812-82, English Roman Catholic apologist, educated at Oxford He became a fellow at Balliol (1834) and was ordained in the Church of England At first a Broad Churchman, he joined the OXFORD MOVEMENT in 1838 Thereafter he became the most extreme of his group, and as a result of his vigorous support of *Tract 90* he lost his teaching positions in the university His long work, *The Ideal of a Christian Church* (1844), which compared all churches in England unfavorably with the Roman Catholic Church, brought his official degradation from his university degrees (1845), he was soon afterwards received into the Roman Catholic Church, where he remained a layman Ward was lecturer in moral theology in St Edmund's College, Ware, from 1851 to 1858 He did not cease to be extreme in his religious views, especially with respect to ultramontanism He was an eager and hasty controversialist, and his metaphysical subtlety was feared by his opponents Ward's friends included men of every shade of opinion His son, **Wilfrid Philip Ward,** 1856–1916, was his father's biographer (1889, 1893) He also wrote a great biography of Cardinal Newman and accounts of Cardinal Wiseman and Aubrey de Vere Wilfrid Philip Ward was like his father in opposing liberalism and modernism in the Church, but unlike him in being a mediator, notably in the modernist controversy He edited the *Dublin Review* from 1906 See Maisie Ward, *The Wilfrid Wards and the Transition* (2 vols , 1934–37) William George Ward's third son, **Bernard Nicholas Ward,** 1857–1920, was a distinguished churchman, he was president of St Edmund's College, Ware, and first bishop of Brentwood. He wrote on the history of the Roman Catholic Church in England

Ward, William Hayes, 1835–1916, American Orientalist, clergyman, and editor, b Abington, Mass , grad. Amherst, 1856, and Andover Theological Seminary, 1859 He was a special student of Assyriology and conducted (1884-85) an expedition to Babylonia. He wrote *Report of the Wolfe Expedition to Babylonia* (1885) and *Seal Cylinders of Western Asia* (1910) From 1896 to 1913 he edited the *Independent*

ward see GUARDIAN AND WARD

war debts. This article discusses the obligations incurred by foreign governments for loans made to them by the United States during and shortly after the First World War For international obligations arising out of the Second World War, see LEND-LEASE When the United States entered the war in 1917 its European allies were almost drained of foreign exchange after nearly three years of conflict Government credits, therefore, were made available for the purchase of American goods After the war similar credits, though to a lesser amount, were extended both to allied and former enemy nations All the debtor nations, except Russia (where the USSR had replaced the Russian Empire), recognized their obligations, and in 1922 the World War Foreign Debt Commission of the United States, in agreement with 15 European countries, set the funded indebtedness at about $3,350,000,000, but by arranging for a 62-year period of repayment the interest charges would have amounted to more than the principal Payments were made until 1931, largely out of the REPARATIONS which the Allies received from Germany In 1931, to offset the impact of world economic depression, U S President Hoover's proposal of a moratorium for one year on all intergovernmental obligations was adopted The debtors attempted to better their position by the Lausanne Pact of 1932, which greatly reduced German reparations in the hope that the United States would entirely release its claims The United States, which had never demanded reparations, refused Six countries paid in 1932, but thereafter all the debtors defaulted on their payments except Finland (paid until 1943) and Hungary (paid interest until 1939)

War Department, United States, organized (1789) under the Constitution of the United States as an executive department of the Federal government to administer the military establishment It was reconstituted (1947) as the Dept of the Army within the U S Dept of Defense (see DEFENSE, UNITED STATES DEPARTMENT OF) During the American Revolution, military affairs were largely supervised by the Continental Congress, and under the Articles of Confederation a secretary of war was put in charge of defense matters In Aug , 1789, the U S War Dept , headed by the Secretary of War, was created to organize and maintain the U S army—under the command of the President in time of peace and war Subsequent legislation expanded the department's organization, and until 1903 the commanding general of the army and various staff departments aided the Secretary in guiding the military establishment Though its supervision of naval affairs was soon transferred (April, 1798) to the U S Dept of the Navy, the War Dept from time to time supervised several quasi-military matters- e g , the distribution of bounty lands, pensions (see INTERIOR, UNITED STATES DEPARTMENT OF THE), Indian affairs (see INDIAN AFFAIRS, BUREAU OF), and the RECONSTRUCTION of the South after the Civil War Many of these responsibilities were transferred or disappeared, and in the 20th cent only the construction of public works in connection with rivers and harbors and the maintenance and operation of the Panama Canal were under the supervision of the War Dept Meanwhile, the purely military functions of the department were vastly expanded in war periods, and after the Spanish-American War a thorough reorganization of the War Dept was effected (1903) The office of the commanding general of the army was abolished, and the general staff corps was established to coordinate the army under the direction of the chief of staff, who was charged with supervising the planning of national defense and with the mobilization of the military forces Thereafter the War Dept absorbed several new functions, it was given supervision over the newly created NATIONAL GUARD, and under the National Defense Act of 1916 the officers reserve corps was created within the department's organization This act also established the office of Assistant Secretary of War to coordinate the procurement of munitions After the First World War the organizational maze of the War Dept was thoroughly revamped (1922) Its scope of activities, however, remained wide, stretching from the supervision of the U S Military Academy (West Point) to the guidance of insular affairs and occupied territories and to the intricate organization of defense In the Second World War plans were laid to coordinate the activities of the armed services, and with the creation (1947) of the National Military Establishment—which later became (1949) the U S Dept. of Defense—the War Dept was reconstituted as the Dept of the Army, which became a division of the Dept of Defense The Secretary of War, holding a post with high cabinet rank, became the Secretary of the Army, an office without cabinet rank, and several of the department's functions, notably those connected with the air arm, were transferred

Ware, Henry, 1764–1845, American clergyman, instrumental in the founding of UNITARIANISM in the United States, b Sherborn, Mass , grad. Harvard, 1785 As pastor (1787–1805) of the First Church, Hingham, Mass , he became known for his "liberal" inclinations His appointment in 1805 as Hollis professor of divinity at Harvard aroused opposition in the orthodox division of the Congregational churches This choice and the questions it brought into prominence helped to hasten the separation of the Unitarians from the Congregationalists and their organization into an independent denomination Later, in an interchange of views with Dr Leonard Woods, Ware wrote his *Letters to Trinitarians and Calvinists* (1820) and other controversial works In 1816 he took up his work as professor of theology in the newly founded Harvard Divinity School His son, **Henry Ware,** 1794–1843, b Hingham, Mass , grad Harvard, 1812, was pastor (1817-30) of the second Unitarian Church, Boston, and was professor in the Harvard Divinity School until 1842 He was an editor (1819-22) of the first organ of Unitarianism, the *Christian Disciple*, and one of the leaders in developing the denomination

Ware, Isaac, d 1766, British architect of the Georgian period After travels in Italy he was employed in 1728 as clerk of the works of the Tower of London and also at Windsor Castle For Philip, earl of Chesterfield, he built Chesterfield House, Mayfair (1749) and his large published work *The Complete Body of Architecture* (1756) contains plates illustrative of it In 1738 Ware produced a translation of Palladio He and William Kent designed mantelpieces, ceilings, and other details for Robert Walpole's house "Houghton," which was built by Thomas Ripley, and made drawings for Ripley's book on this house

Ware, William, 1797–1852, American author and clergyman, b Hingham, Mass , grad Harvard, 1816 He was a pastor in the first Unitarian church in New York city from 1821 until 1836, when he left to devote himself to writing Best known is his trilogy of novels on the struggles of the early Christian churches against the dominant hierarchies of that time—*Zenobia* (1837), *Aurelian* (1838), and *Julian* (1841)

Ware, urban district (1931 pop 6,181, 1943 estimated pop 8,100), Hertfordshire, England, on the Lea It is a market town with manufactures of plastics, paint, and pharmaceuticals There is a priory, the remains of a 14th-century Franciscan monastery The Victoria and Albert Museum now has the Great Bed of Ware, which Shakspere mentioned in *Twelfth Night*

Ware, industrial town (pop 7,557), central Mass , W of Worcester, settled c 1717, inc 1761 Its chief products are textiles and shoes

Wareham (wâr'hăm, wâ'rum), town (pop. 6,364), SE Mass , on an inlet of Buzzards Bay, settled 1678, inc 1739 It is a resort and a shipping point for cranberries and shellfish Massachusetts State College has a cranberry field station here

Warfield, David, 1866 , American actor, b San Francisco His early acquaintance with David Belasco led to a permanent business relationship between the two men, commencing when Warfield appeared under the sponsorship and management of Belasco in *The Auctioneer* (1901) by Klein and Arthur A success in his first important role, Warfield was then featured in *The Music Master* (1904) by Charles Klein and, among other memorable plays, appeared in *The Return of Peter Grimm* (1911), one of Belasco's best efforts as a solo playwright Warfield's last stage venture was as Shylock in *The Merchant of Venice* (1924)

Wargla or **Ouargla** (both war'gla), town (pop 5,461), E Algeria, in the Wargla oasis It is an ancient commercial center for the desert trade The French took Wargla in 1853 but did not occupy it effectively until 1882 Here, in 1938, they opened a museum depicting Saharan life

Warham, William (wŏ'rum), c 1450–1532, English churchman, archbishop of Canterbury (1504–32) He studied at Oxford and became widely known in England for his legal ability, went often on diplomatic missions, and was made (1502) bishop of London He was a generous supporter of the new learning and a patron of Erasmus In 1504 he was made lord chancellor by the king and archbishop of Canterbury by the pope In the early years of Henry VIII's reign his influence was paramount, but before many years Thomas WOLSEY began to displace him In 1515 Wolsey was created cardinal and Warham resigned (willingly) the chancellorship to Wolsey Thereafter Warham was second in the Church in England In the matter of Henry VIII's divorce, in which Warham was involved from 1527, his policy was to conciliate all parties, and in 1530 he was a signer of the petition to the pope for the divorce Eventually, in 1532, after Warham had allowed a gradual encroachment by the king on ecclesiastical rights, he executed a *volte-face* and formally protested just before his death all acts derogatory to the papal authority

Waring, George Edwin (wā'ring), 1833–98, American sanitary engineer, b. Poundridge, Westchester co., N.Y. After serving the Union in the Civil War as colonel of cavalry, he managed farms in the East and worked on the drainage of Central Park, New York city. He instituted sanitary improvements in Memphis, served as street-cleaning commissioner in New York (1895–98), and was working as head of a sanitary commission in Havana when he contracted yellow fever and died. His works include *Sewerage and Land Drainage* (1888, 4th ed., 1896).

war matériel (mətēr"rēēl'), term for all units of military and naval armament, supply, and equipment and all the materials and equipment needed. The capacity of a nation to produce its own war matériel is called war potential. Basically, this potential is determined by the country's natural resources, its stage of industrialization, the size and quality of its skilled labor force, and its ability to defend these while actively fighting an enemy. Whenever a country's productive capacity is insufficient to supply its armed forces with all war matériel, the deficiency must be made up by imports. To cut off this flow of imports an enemy nation may resort to a blockade. During the Second World War it was the particular task of the strategic air forces to weaken or destroy the war potential of the enemy by bombing his industries and transportation networks, while naval forces attacked enemy transports and freighters. The superior success of the Allied powers in destroying enemy production and in keeping their own sea lanes relatively safe proved a major contribution to victory. In supplying the greatest part of the war matériel of the Allies, the United States, the most highly industrialized of nations, wealthy in natural resources, and never subjugated to enemy bombings, earned the title of arsenal of democracy, which had been applied before U.S. entrance into the conflict. The uneasy years after the war saw the nations of the world again worrying about their relative war potentials, with the result that huge armament budgets were appropriated, wartime equipment was stored rather than scrapped, special war production plants were maintained on a stand-by basis, and strategic materials and elements, especially uranium for atomic weapons, were stockpiled while new sources were sought.

Warmia: see ERMELAND.

Warming, Johannes Eugenius Bülow (yōhä'nus ōĕugē'nēŭs bu'lō vär'ming), 1841–1924, Danish botanist, a founder of the science of plant ecology. He was professor at the Univ. of Copenhagen (1885–1911) and wrote a pioneer work in his field, *Plantesamfund* (1895), which, rewritten and enlarged, appeared in English as *Oecology of Plants* (1909). He also wrote *A Handbook of Systematic Botany* (1878, Eng. tr., 3d ed., 1911).

Warm Springs, watering place, W. Ga., NW. of Columbus, famous in treating and studying the aftereffects of poliomyelitis. The salutary properties of the water springing from Pine Mt. were known to the Indians. White men learned of them in the late 18th cent. and by the 1830s had created a resort, which, destroyed by fire in 1865, was rebuilt and was fashionable at the end of the 19th cent. Franklin D. Roosevelt, having found the water beneficial after he suffered from poliomyelitis, in 1927 founded the Georgia Warm Springs Foundation to help other victims of the disease and gave it his 2,600-acre farm here. He retained the cottage known as the Little White House (now a national shrine), in which he died in 1945. The foundation grew heartily, especially after Roosevelt became president. Near by is the city incorporated in 1924 as Warm Springs (pop. 608), formerly named Bullochville.

Warner, Anna Bartlett see WARNER, SUSAN BOGERT.

Warner, Charles Dudley, 1829–1900, American editor and author, b. Plainfield, Mass., grad. Hamilton College, 1851, LL.B. Univ. of Pennsylvania, 1858. After practicing law in Chicago, he was associate editor and publisher of the Hartford, Conn., *Courant*. To that paper and to *Harper's Magazine* he contributed many travel articles later published in book form. He edited the "American Men of Letters" series, for which he wrote a life of Washington Irving, and the "Library of the World's Best Literature" (30 vols., 1896–97). He collaborated with Mark Twain in the novel *The Gilded Age* (1873), he wrote other novels and the polished, charming essays in *My Summer in a Garden* (1871) and other volumes.

Warner, Glenn Scobey, 1871–, American football coach commonly known as Pop Warner, b. Springville, N.Y., grad. Cornell (LL.B., 1894). He excelled as guard (1892–94) on the Cornell football team. As coach (1895–96) of the Univ. of Georgia eleven, he had an undefeated, untied team in 1896. He later coached at Cornell (1897–98, 1904–6) and at the Carlisle Indian School (1899–1903, 1907–14), where he developed several outstanding football stars, notably Jim Thorpe, and gained a nationwide reputation. At the Univ. of Pittsburgh (1915–23) Pop Warner again brought forth several powerful teams, three of which held (1915–17) undefeated records, and at Stanford (1924–32) he produced three Rose Bowl teams. Warner later became coach at Temple Univ. (1933) and at San Jose (Calif.) State College (1939). He wrote *A Course in Football for Players and Coaches* (1908).

Warner, Olin Levi, 1844–96, American sculptor, b. Suffield, Conn. He studied in Paris, working for a time as an assistant to J. B. Carpeaux. After service in the Franco-Prussian War (1870), he returned to the United States in 1872. Recognition came late, and his death in a bicycle accident cut short a career of great promise. Several fine portrait busts and *Diana*, an ideal figure, are in the Metropolitan Museum. In Boston are portrait statues of William Lloyd Garrison and General Devens, and in Hartford, Conn., Governor Buckingham. A fountain in Portland, Oregon, has caryatids made in 1888, and the Library of Congress, a pair of handsome bronze doors.

Warner, Seth, 1743–84, hero of the American Revolution, b. Roxbury, Conn. As a young man he moved to Bennington in the New Hampshire Grants, where he became, under Ethan ALLEN, one of the leaders of the GREEN MOUNTAIN BOYS and was active in resisting the claims of New York and settlers under New York grants. It is notable that he was not a land speculator, as Allen and other leaders of the Green Mountain Boys were. He was prominent in the moves for the independence of Vermont. Just after the American Revolution broke out, he accompanied Allen to Ticonderoga and was given charge of the detachment that took (May 11, 1775) Crown Point. In July, 1775, when the Green Mountain Boys were organized as a part of the Continental army, Warner, and not Allen, was elected to command. From that time forward there was some coolness between the Allens and Warner, and Warner was to devote his life to the colonies as a whole, not to Vermont alone. In the Quebec campaign he distinguished himself (1775) in an engagement at Longueuil in Canada before the Green Mountain Boys were dismissed (Nov., 1775), their term of enlistment completed. He was called back to Canada in Jan., 1776, when things were going badly before Quebec, and he proved himself able in the disastrous retreat of the patriot forces. When Burgoyne was advancing, Warner was in charge of the rear guard protecting Arthur St. Clair's retreat from Ticonderoga, and though he fought well when set upon near Hubbardton on July 7, 1777, he was defeated. He more than redeemed that failure and became a hero of the Saratoga campaign, when he shared the command of John STARK in gloriously defeating the Hessians of Burgoyne's command in the battle of Bennington (Aug. 14–16, 1777), he may have conceived the idea of the winning strategy. Warner continued in service until late in the war, when wounds and an infection contracted on the campaigns compelled him to retire. He died at his native town. Modest, brave, and able, Warner has not received so much attention as the more flamboyant Ethan Allen.

Warner, Susan Bogert, pseud **Elizabeth Wetherell,** 1819–85, American novelist, b. New York city. Of her many books the best known was *The Wide, Wide World* (1850), a pious and tearful story of an orphan, which was even translated into foreign languages. Others included *Queechy* (1852), *The Hills of the Shatemuc* (1856), and *Melbourne House* (1864). With her sister, **Anna Bartlett Warner,** pseud **Amy Lothrop,** 1820–1915, she collaborated in several children's books, notably *Mr. Rutherford's Children* (1853–55). Anna wrote alone novels which included *Dollars and Cents* (1852) and *Stories of Vinegar Hill* (1872) and a biography of Susan Warner (1909). The Warners lived much of the time after 1837 on Constitution Island, in the Hudson river opposite West Point, and long conducted Bible classes for the cadets. Both of the sisters are buried in the government cemetery at West Point.

Warner, Sylvia Townsend, 1893–, English novelist and poet. Her first published work was poetry, *The Espalier* (1925), but she became more generally known with two novels of gentle fantasy—*Lolly Willowes* (1926) and *Mr. Fortune's Maggot* (1927). Miss Warner worked for the cause of the Loyalists in the Spanish civil war. *After the Death of Don Juan* (1938) treats the Don Juan legend with satire. In *The Corner That Held Them* (1948) the story of a 13th-century convent is told with a scholar's knowledge of the period but with Miss Warner's inimitable wit and irony.

Warner, William, 1558?–1609, English poet. He is remembered for *Albion's England*, a history in prose and verse first published in 1586.

Warner, resort town (pop. 1,113), S.N.H., WNW. of Concord, settled c. 1740, inc. 1774.

Warnsdorf, Czechoslovakia see VARNSDORF.

War of 1812, name given to the war between the United States and Great Britain, 1812–15. It followed a period of great stress growing out of the struggle between England and France in the NAPOLEONIC WARS. During this period American shippers took advantage of the hostilities in Europe to absorb the carrying trade between the French and Spanish islands in the West Indies and Europe. By breaking the passage with a stop in an American port, they evaded the British rule of 1756, which forbade neutral trade in time of war that was not allowed in time of peace. The growth of American shipping displeased British merchants and also hurt the British navy by absorbing seamen who were anxious to escape the hardships of British naval service. Napoleon's Continental System, which was intended to exclude British goods or goods cleared through Britain from countries under French control, and the British ORDERS IN COUNCIL (1807), which forbade trade with France except after touching at English ports, threatened the American merchant fleet with confiscation on the one side or the other. Although the French subjected American ships to considerable arbitrary treatment, the difficulties with England were more apparent and nearer home. The practice of IMPRESSMENT of British sailors from American vessels was a further source of friction. A famous incident—the CHESAPEAKE affair—fanned hostility to a white heat in 1807. American rights had been clearly infringed. However, President Thomas JEFFERSON, who hoped for a peaceful settlement, had adopted a policy of passive resistance. The Nonimportation Act (1806) was followed by the EMBARGO ACT OF 1807. Difficulty of enforcement and economic conditions that rendered England and the Continent more or less independent of America made the embargo ineffective, and in 1809 it gave way to a Nonintercourse Act. This in turn was superseded by Macon's Bill No. 2, which repealed the trade restrictions against Britain and France with the proviso that if one country would withdraw its offensive decrees or orders, nonintercourse would be resumed with the other. By a dubious commitment Napoleon tricked James MADISON, who had succeeded Jefferson to the presidency, into reimposing nonintercourse on England. In the meantime diplomatic negotiations had resulted in the conclusion of a satisfactory agreement with the British minister in Washington, David Erskine, only to be nullified by Foreign Secretary George Canning, Erskine was replaced by F. J. Jackson, an obstinate man who soon proved himself *persona non grata* to the American government. The news of the defeat of the *Little Belt* by the American frigate *President*, under Capt. John RODGERS, was enthusiastically received in the United States. Yet commercial difficulties were in the process of solution, and, indeed, before the commencement of war, though too late to prevent its declaration, the Orders in Council were repealed. However, it was not so much the demand for neutral rights that occasioned the actual outbreak of hostilities as the desire of the frontiersmen for free land, which could only be obtained at the expense of the Indians and the British. Moreover, the West suspected the British, with some justification, of attempting to prevent American expansion and of encouraging and arming the Indians. Matters came to a head after the battle of Tippecanoe, and the radical Western group dreamed of conquering Canada and also West Florida. Their leaders in the 12th Congress were Henry CLAY, John C. CALHOUN, Langdon CHEVES, Felix Grundy, and other "war hawks," who managed to override the opposition of John RANDOLPH and the moderates. War was declared June 18, 1812. It was not until it was begun that Madison discovered how woefully inadequate American preparations for war were. The rash hopes of the "war hawks," who expected to take Canada at a blow, were soon dashed. The American force under Gen. William HULL, far from gaining glory, disgracefully surrendered (Aug. 1812) at Detroit to a smaller Canadian force under Isaac BROCK. On the Niagara an American expedition was repulsed after a successful attack on Queenston Heights, because the militia under Stephen VAN RENSSELAER failed to come to its support. On the sea, however, the tiny American navy gave a good account of itself. The victory of the *Constitution*, under Isaac Hull, over the *Guerrière* and the capture of the *Macedonian* by the *United States* (Stephen DECATUR commanding) were two outstanding achievements of 1812, but the smaller vessels also did well and American privateers carried the war to the very shores of England. In 1813 the British reasserted their supremacy on the sea; the *Chesapeake*, under Capt. James LAWRENCE ("Don't give up the ship!"), accepted a challenge from the *Shannon* and met with speedy defeat. Most of the American ships were either captured or bottled up in harbor for the duration of the war. However, it was on inland waters that the American navy achieved its most notable triumphs—victories which had an important bearing on the course of the war. In Jan., 1813, at the Raisin river S. of Detroit, American troops suffered another defeat. But with the victory of Capt. Oliver PERRY on Lake Erie in Sept., 1813, American forces, under Gen. William Henry HARRISON, were able to advance against the British, who burned Detroit and retreated into Canada. Harrison pursued and defeated them in a battle at the river Thames, in which Tecumseh, the Indian chief, was killed. Yet the feeble efforts of James WILKINSON along the St. Lawrence did nothing to improve the situation on the New York border. The first months of the year 1814 held out gloomy prospects for the Americans. The finances of the government

had been somewhat restored in 1813, but there was no guarantee of future supplies New England, never sympathetic with the war, now became openly hostile, and the question of secession was taken up by the HARTFORD CONVENTION. Moreover, with Napoleon checked in Europe, England could now devote more time and effort to the war in America In July, 1814, the American forces along the Niagara, now under Gen Jacob BROWN, maintained their own in engagements at Chippewa and Lundy's Lane Shortly afterwards Sir George PREVOST led a large army into New York down the west side of Lake Champlain and seriously threatened the Hudson valley But when his accompanying fleet was defeated near Plattsburg (Sept , 1814) by Capt. Thomas MACDONOUGH, he was forced to retreat to Canada In August a British expedition to Chesapeake Bay won an easy victory at Bladensburg and took Washington, burning the Capitol and the White House. The victorious British, however, were halted at Fort McHenry before Baltimore (see STAR-SPANGLED BANNER) This setback and the American victory at Plattsburg had much to do with persuading British statesmen to agree to the ending of the war, in which no decisive gains had been made by either side For some time negotiations for peace had been taking place, and as early as Sept , 1812, Alexander I of Russia proposed to mediate between the United States and Great Britain. Britain refused the tsar's offer but eventually entered into direct peace negotiations with the United States The American delegation to the meeting at Ghent was headed by John Quincy ADAMS, Henry Clay, and Albert GALLATIN After long and tortuous discussions the Treaty of Ghent (see GHENT TREATY OF) was signed (Dec 24, 1814), providing for the cessation of hostilities, the restoration of conquests, and the setting up of boundary commissions The final action of the war took place after the signing of the treaty, when Andrew JACKSON decisively defeated the British at New Orleans on Jan 8, 1815 This victory, although it came after the technical end of the war, was of great importance in restoring American confidence Although the peace treaty failed to deal with the matters (neutral rights and impressment) for which the United States had ostensibly gone to war, Americans soon came to believe that they had won a Second War for Independence Indeed, the war did quicken the growth of American nationalism With the union strengthened and the West opened for American expansion, the country embarked on a period of political isolation from Europe The war also laid the foundation of military and administrative reorganization See G W Cullum, *Campaigns of 1812-15* (1879), Theodore Roosevelt, *The Naval War of 1812* (1882), A T Mahan, *Sea Power in Its Relation to the War of 1812* (2 vols , 1905), William Wood, *The War with the United States* ("Chronicles of Canada" series, 1915), J W Pratt, *The Expansionists of 1812* (1925), Henry Adams, *The War of 1812* (ed by H A De Weerd, 1944), N H Swanson, *The Perilous Fight* (1945)

warp: see WEAVING

War Production Board (WPB), established (Jan , 1942) by executive order in the Second World War to direct war production and the procurement of materials The chairman (Donald M. Nelson, 1942-44, Julius A Krug, 1944-45) was granted sweeping powers over the nation's economic life The WPB converted and expanded the peacetime economy to maximum war production, controls included assignment of priorities to deliveries of scarce materials and prohibition of nonessential industrial activities Businessmen serving with the WPB were sharply criticized by a Senate committee headed by Harry S TRUMAN. WPB organization changed frequently, and disputes with the armed services occurred After the defeat of Japan, most restrictions were quickly lifted, and the WPB was abolished in 1945 The Civilian Production Administration was set up to take over the remaining WPB reconversion functions.

warrant, in law, written order by an official of a court directed to an officer The SEARCH WARRANT and the warrant of ARREST are the most frequently used types Warrants of attachment order the seizure of a defendant's goods pending trial or judicial determination of ownership and in certain other cases. Warrants are usually issued by a judge or court clerk They are directed to sheriffs, marshals, constables, and other officers of the peace The strictest compliance with legal forms and rules of service is ordinarily necessary if a warrant is to be effective.

War Relocation Authority: see RELOCATION CENTER

Warren, Charles, 1868–, American jurist, b Boston, grad. Harvard (B.A , 1889; M A , 1892). He was admitted to the Massachusetts bar in 1892 He was (1914-18) an assistant U S Attorney General and served as a special master in important cases decided by the U.S Supreme Court. He lectured at several universities, and in 1937 he became a member of the American Academy of Arts and Letters. Warren is noted for his scholarly studies of constitutional history, especially *The Supreme Court in United States History* (3 vols , 1922, rev ed., 2 vols., 1926). He also wrote *History of the American Bar, Colonial and Federal, to 1860* (1911), *Congress, the Constitution, and the Supreme Court* (1925, enl. ed., 1935), *The Making of the Constitution* (1928, 2d ed., 1931), *Congress as Santa Claus* (1932), and *Odd Byways in American History* (1942).

Warren, Earl, 1891–, American political leader, governor of California (1943–), b Los Angeles, grad Univ. of California law school, 1912. He was admitted (1914) to the bar, practiced in Oakland, Calif , and held several local offices He served (1939–43) as attorney general of California and was twice (1942, 1946) elected governor of the state In 1948 Warren was nominated for Vice President on the Republican ticket along with Thomas E. DEWEY, but was defeated See biography by Irving Stone (1945).

Warren, Gouverneur Kemble (gōvŭrnēr'), 1830–82, American army engineer, Union general in the Civil War, b Cold Spring, N Y , grad West Point, 1850 Assigned to the corps of topographical engineers, Warren assisted in the survey of the Mississippi delta and also engaged in surveying in the West In the Civil War he commanded a brigade of the Army of the Potomac in the campaigns of 1862, distinguishing himself particularly at Gaines's Mill in the Seven Days battles In the GETTYSBURG CAMPAIGN, Warren, who was then chief engineer, saved the Round Tops by promptly diverting troops to their defense, July 2, 1863 He was promoted major general of volunteers (Aug , 1863), temporarily commanded W S Hancock's 2nd Corps in the indecisive operations following Gettysburg, and was given (March, 1864) command of the 5th Corps He ably led that corps in the Wilderness campaign and in the fighting around Petersburg (1864–65), but at FIVE FORKS (April 1, 1865), Gen P H Sheridan, alleging dilatoriness on Warren's part, removed him from command A court of inquiry exonerated Warren in 1882 After the war he continued in the engineers corps *An Account of the 5th Army Corps* (1866) is his own vindication of his conduct See biography by E G Taylor (1932)

Warren, John, 1753–1815, American surgeon, b Roxbury, Mass , grad Harvard, 1771, brother of Joseph Warren A leading surgeon of his time in New England, he served in the Revolution and was a founder of the medical school at Harvard, where in 1782 he was appointed professor of anatomy and surgery His son, **John Collins Warren,** 1778–1856, b Boston, grad Harvard, 1797, taught at Harvard (1809–47), serving as dean of the medical school from 1816 to 1819 He was a founder and surgeon of the Massachusetts General Hospital, where he was the first in America to operate for strangulated hernia and where in 1846 he invited W T G Morton to demonstrate ether anesthesia He wrote *Surgical Observations on Tumours* (1837) The grandson of John Collins Warren was **John Collins Warren,** 1842–1927, b Boston, M D Harvard, 1866 He continued the family association at Harvard and Massachusetts General Hospital

Warren, Joseph, 1741–75, American Revolutionary patriot, b Roxbury, Mass , grad Harvard, 1759 He practiced medicine in Boston, and in the agitation over the Stamp Act (1765) he joined Samuel Adams in opposition to British policies He became a member of the Boston Committee of Safety and in 1774 presented to the convention at Milton the Suffolk Resolves, advocating forcible resistance to the British On the night of April 18, 1775, he dispatched William Dawes and Paul Revere to warn the patriots that the British were marching on Concord Warren was killed in the battle of Bunker Hill (1775) See biography by Richard Frothingham (1865).

Warren, Josiah, 1798–1874, American reformer and anarchist, b Boston An early follower of Robert Owen, he soon rejected the latter's political socialism, advocating instead anarchy based on "the sovereignty of the individual " He founded several "equity" stores, based on the idea of exchanging goods for an equivalent amount of labor and on the principle that cost should be the limit of price He also established three utopian colonies, the most successful (1851–c 1860) was Modern Times (now Brentwood), L I , N.Y The most important of his publications was *True Civilization* (1864, 5th ed., 1875) See biography by William Bailie (1906)

Warren, Mercy Otis, 1728–1814, American writer and patriot, b Barnstable, Mass , sister of James Otis and wife of James Warren She used her ready pen to write for the American cause—satirical plays, such as *The Adulateur* (1773) and *The Group* (1775), and propaganda poems Her *History of the Rise, Progress, and Termination of the American Revolution* (3 vols , 1805) was the first written by an American historian She was strongly anti-Federalist, and her comments on John Adams, who was an old friend, led to a rift which lasted five years. See biography by Alice Brown (1896)

Warren, Robert Penn, 1905–, American novelist and poet, b Guthrie, Ky., grad Vanderbilt Univ , 1925, M.A Univ of California, 1927. A Rhodes scholar, he received a degree from Oxford in 1930 At Vanderbilt, under the influence of John Crowe Ransom, he began writing poetry and became one of the group who made *Fugitive* an important literary organ Warren taught at Southwestern College, Memphis (1930–31), Vanderbilt Univ (1931–34) Louisiana State Univ (1934–42), and the Univ. of Minnesota (after 1942) He was an editor of the *Southern Review* until its demise in 1942 Collections of Warren's poetry appeared in 1935 and 1944. His novels are *Night Rider* (1939), a tragic and understanding story of the Kentucky tobacco war of 1905, *At Heaven's Gate* (1943), a skillfully written tale of violence, and *All the King's Men* (1946), whose hero is a prototype of Huey Long, characterized with humor and compassion *All the King's Men* won the 1947 Pulitzer Prize for fiction, it was made into a moving picture in 1949 A volume of short stories, *Circus in the Attic and Other Stories*, appeared in 1948

Warren, Samuel, 1807–77, English lawyer and author He wrote many legal texts, *Passages from the Diary of a Late Physician* (1832), and the extremely popular novel *Ten Thousand a Year* (1841)

Warren, Whitney, 1864–1943, American architect, b New York city, studied at the École des Beaux-Arts He began practice in New York in 1894 Later he joined with Charles D Wetmore in a firm which had one of the most extensive practices of its time and was known for the designing of large hotels. Warren and Wetmore's New York works include the Grand Central Terminal (1913), the New York Central office building, the Chelsea docks, and the Ritz-Carlton, Biltmore, Commodore, and Ambassador hotels After the First World War they were entrusted with the reconstruction of the historic library of the Univ of Louvain, Belgium, which had been thoroughly destroyed by the Germans

Warren. **1** City (pop 2,516), co. seat of Bradley co , S Ark , S of Pine Bluff, in a cotton area It has woodworking industries **2** Village (pop 1,119), NW Ill , near the Wis line, in a farm region, settled 1843, inc 1859 Apple River Canyon State Park is near by **3** Town (pop. 1,388), Huntington co , NE Ind , on the Salamonie river and SE of Huntington **4** Lumber town (pop 1,458), S Maine, W of Rockland, settled 1736, inc 1776 **5** Industrial town (pop 3,541), S central Mass , WSW of Worcester; settled 1664, inc 1742 as Western, named Warren 1834 **6** City (pop 1,639), co seat of Marshall co , NW Minn , on the Snake and NNW of Crookston, in a wheat-growing region, settled 1878, inc as a city 1891 **7** City (pop 42,387), co seat of Trumbull co , NE Ohio, in the fertile Mahoning valley NW of Youngstown, settled 1799, inc 1834 It is a steel center in a farm area Metal products, machinery, automobile parts, and commercial gases are made **8** Borough (pop 14,891), co seat of Warren co , NW Pa , S of Jamestown, N Y , laid out c 1795, inc 1832 It is in beautiful wooded country near gas and oil reserves Its manufactures include furniture, metal products, and oil products A Seneca village, Conewango, was situated here in 1749, it was burned by Colonel Brodhead in 1781 Growth was slow until lumbering began, and in 1860 there was an oil boom Warren was inundated by flood in 1947. **9** Town (pop 8,158), E R I , N of Bristol, transferred from Massachusetts to Rhode Island in 1746 Warren village, a port on an arm of Narragansett Bay, has commercial shellfishing Warren town has textile mills.

Warrensburg, city (pop. 5,868), co seat of Johnson co , W Mo., ESE of Kansas City, laid out 1835, inc as a town 1846, as a city 1855. It is in a farm area which has coal, sandstone, and clay deposits Central Missouri College is here

Warrensville Heights, village (pop 1,175), NE Ohio, near Cleveland, inc 1927

Warrenton. **1** City (pop 1,284), co seat (since 1797) of Warren co , E Ga , W of Augusta, inc as a town 1810, as a city 1908 There are several colonial-style houses Quarries are near by. **2** City (pop 1,254), co seat of Warren co , E Mo., WNW of St Louis Established early in the 19th cent , the city has been the county seat since 1835 The southeastern part of Warren co was settled by pioneers who followed Daniel Boone to Missouri, he lived, and was first buried, not far from Warrenton **3** Town (pop 1,147), co seat of Warren co , N N C , near the Va line NNE of Raleigh, inc. 1779 It is a manufacturing center in a cotton, corn, lumber, and tobacco region **4** City (pop 1,365), NW Oregon, W of Astoria and at the mouth of the Columbia, inc. 1899 It has fish canneries Point Adams coast guard station and Fort Stevens, U.S army station, are near. **5** Town (pop 1,651), N Va , NNW of Fredericksburg, in a rich farm area in the piedmont, settled in the 18th cent , inc 1810 The courthouse of Fauquier co is here Warrenton is a horse-breeding, racing, and fox-hunting center

Warrington, county borough (1931 pop 79,317, 1947 estimated pop 78,550), Lancashire, England, on the Mersey and on the Manchester Ship Canal E of Liverpool The site was occupied very early, the Church of St Elphin has a Saxon crypt, the grammar school dates from 1526, and there are several half-timbered houses A school of dissenters (1757–83) was taught for a time by Dr Priest-

ley. Manufactures include leather goods, cotton, soap, chemicals, steel, and glass

Warrior, coal-mining town (pop 1,008), N central Ala , N of Birmingham

Warrior Run, borough (pop 1,339), NE Pa , near Wilkes-Barre, inc 1895

Warroad (wŏ'rŏd), village (pop 1,309), NW Minn., on Lake of the Woods near the Canadian boundary, settled 1890, inc, 1901 It is a port of entry and a shipping center for fish and lumber

Warsaw (wôr'sô), Pol *Warszawa* (värshä'vä), city (1939 estimated pop 1,289,000, 1946 pop 478 755, 1948 estimated pop 566,000), capital of Poland, central Poland, on both banks of the Vistula The part of the city on the right bank is called Praga A commercial, industrial, and intellectual center, it was virtually destroyed in the Second World War, but by the spring of 1950 reconstruction had made remarkable progress Warsaw probably grew around a castle built (13th cent) by a duke of Masovia It became (15th cent) the capital of Masovia, after the fire (1595) of Cracow, until then the Polish capital, Warsaw took its place It temporarily fell to the Swedes under Charles X (1655 and again 1656) and to Charles XII (1702), was occupied by the Russians (1792 and 1794), and passed to Prussia in the third Polish partition (1795). Liberated (1806) by Napoleon I, who made it the capital of the grand duchy of Warsaw (see POLAND), the city was the scene of a diet (1812) which proclaimed the reestablishment of Poland, in 1813, however, it fell to the Russians, and in 1815 the Congress of Vienna awarded it to the Russian crown along with the theoretically autonomous kingdom of Poland Warsaw was then a city of many fine palaces, churches and public buildings It led the insurrection of 1830 against Russian domination but had to capitulate in 1831 In 1917 it became the seat of the German-sponsored regency council for Poland The successful Polish defense of Warsaw (1920), directed by the French general, MAXIME WEYGAND turned the tide of the Polish-Russian war In 1926 the city was the scene of the military coup which established Marshal Pilsudski's dictatorship During the Second World War 87 percent of Warsaw proper and 42 percent of Praga were destroyed Despite its stubborn resistance the city fell to the Germans on Sept 27, 1939 The Jewish ghetto, which the Germans completely isolated from the rest of the city, contained about 500,000 persons in 1942, in reprisal for Jewish armed resistance the Germans "liquidated" in a heavy battle (1943) the estimated 40,000 Jews who had survived, only about 200 Jews remained alive in Warsaw when it was liberated (Jan , 1945) by Russian troops The Russian entry had been preceded (Aug–Oct , 1944) by a 63-day battle between the Polish underground and the Germans, while the Russian army, across the Vistula, remained inactive This episode, said to have cost about 250,000 Polish lives, caused acrimonious recriminations between Russia and the Polish government in exile The decision to retain Warsaw as the national capital resulted in large-scale reconstruction work The UNIV OF WARSAW (founded in 1818) was reopened in 1945 The industries (mainly chemicals, automobiles, garments, and food) and commercial activities were revived The city of Warsaw constitutes a separate province (54 sq mi), it is also the capital of Warsaw prov (c 11,000 sq mi , pop 2,114,415), an agricultural lowland The chief cities are Plock, Pruszkow, and Zyrardow

Warsaw (wôr'sô) **1** City (pop 1,895), W Ill , on the Mississippi just below Keokuk, Iowa, in a farm area, laid out 1834, inc 1837 **2** City (pop 6 378), co seat of KOSCIUSKO CO , NE Ind , SE of South Bend, settled c 1836, inc 1854 Automotive and aircraft products are made here In a region of lakes, it is a resort center **3** Village (pop 3,554), co seat of Wyoming co , W N Y , S of Batavia, in a farm region, settled 1803, inc 1843 Elevators and various other products are made here **4** Town (pop 1,483), E N.C , S of Goldsboro, in a truck-farm area

warship, any ship used for war or national defense Warships are classified as battleships, aircraft carriers, cruisers (battle cruisers, armored cruisers, light cruisers), destroyers, submarines, gunboats, and various auxiliary craft such as mine layers and tenders The forerunner of the modern battleship was the line-of-battle ship (ship of the line) It was heavily armed, often with as many as 100 guns, and fought in the front line of battle Until c.1860 warships were built of wood. Then they were protected with wrought-iron plates (ironclads). The first battle between two ironclads was that between *Monitor and Merrimac* at Hampton Roads in March 1862 The type of ironclad known as the MONITOR became popular By 1872 the French were building iron and steel warships, and in 1876 the British started construction of two all-steel war vessels Continuing development saw an increase in armor and improvement in range, size, and accuracy of armament In 1905 the British *Dreadnought* was built, introducing the "all-big-gun" class of battleship (see DREADNOUGHT) She was armed with ten 12-inch guns and was powered by steam turbines Ships of this type were built by most of the great powers In 1922 the Washington Conference on limitation of naval armaments (see NAVAL CONFERENCES) forbade a higher tonnage than 35,000 tons and guns heavier than the 16-inch caliber This agreement was later disregarded, and heavier ships were built In 1944 the U S S *Missouri* (displacement 53,000 tons, main armament nine 16-inch guns), was launched. The battleship as a weapon of war has frequently been said to have been made obsolete upon the introduction of new weapons The self-propelled TORPEDO of the 1880s, the SUBMARINE of the First World War, and later aerial bombing and torpedoing were seen as unbeatable antibattleship weapons But smaller secondary guns and the DESTROYER met the challenge of the TORPEDO BOAT, depth bombs proved an answer to submarines, and increased armor and anti-aircraft guns defended the battleship from air attack The battleship is today still in use, and in combat it is protected by a screen of lesser ships guarding against air and submarine attack The aircraft carrier, with long range aircraft, has taken over much of the heavy assault work formerly done by battleships, but the carrier's advantage in offensive range may possibly be nullified if battleships are equipped with large-caliber, rocket-powered, guided missiles

Warszawa, Poland see WARSAW

wart, pigmented outgrowth of the epidermis of the skin, in which the papillae of the skin are enlarged Warts are believed to be caused by a virus, and they occur in various forms, they may be flat, raised, threadlike, or hornlike and either single or multiple They frequently form on the hands of children Under the direction of a doctor certain chemicals, e g , trichloroacetic acid, can be employed in the removal of some warts, and electrocauterv is a means of removing other kinds Sometimes they disappear without treatment

Warta (vär'tä), Ger *Warthe* (vär'tu), river of central Europe It rises 35 mi NW of Cracow (Poland) and flows 492 mi NW past Czestochowa, Poznan, and Landsberg into the Oder at Küstrin (Brandenburg) It is navigable for about half its length, its tributary, the Notec, indirectly connects it with the Vistula

Wartburg (vart'bŏŏrk), famed castle near Eisenach, Thuringia, central Germany Built c 1070, later enlarged, and renovated in the 19th cent , it was the seat of the medieval landgraves of Thuringia It was the scene in 1207 of the *Sangerkrieg*, a contest of minnesingers in which Heinrich von Ofterdingen, Wolfram von Eschenbach, and Walther von der Vogelweide took part and which forms part of the action of Wagner's *Tannhäuser* St Elizabeth of Hungary lived here until 1227 In 1521 Martin LUTHER was brought to the castle for his protection by the elector of Saxony, and here he completed his translation of the New Testament The spot on the wall of Luther's study where Luther threw an inkpot at a vision of the devil is still shown to visitors In 1817 German students met at the Wartburg to protest against the reactionary policies of the German Confederation, they founded the united German BURSCHENSCHAFT

Warton, Joseph, 1722–1800, English critic and poet, educated at Winchester and Oxford He took holy orders (1744) and served several cures *The Enthusiast,* an early example of romantic nature poetry, appeared in 1744 and was followed in 1746 by a volume of odes The notes and essays appended to his edition of Vergil (1753) won favor and led to his contributing several critical essays (1753–56) to Hawkesworth's *Adventurer* He became second master at Winchester in 1755 and advanced to the headmastership in 1766 In 1756 came the first volume of his chief work, *An Essay on the Genius and Writings of Pope,* which adversely criticized the classical tendencies of 18th-century poetry as opposed to the more romantic aspects of Elizabethan verse The second volume appeared in 1782, and a nine-volume edition of Pope in 1797 He achieved a reputation as a literary critic, posterity, however, remembers him as a leader of the romantic revival in literature See Eric Partridge, ed , *The Three Wartons: a Choice of Their Verse* (1927)

Warton, Thomas, 1728–90, English poet and literary historian, grad Oxford, 1747, brother of Joseph Warton He took holy orders and held several livings, meanwhile serving as a university tutor He early began to write verse. *The Pleasures of Melancholy* (1747) was followed by *The Triumphs of Isis* (1749), a poem in praise of Oxford, and *Newmarket a Satire* (1751) He contributed to college miscellanies and edited *The Oxford Sausage* (1764), an anthology of Oxford wit His reputation for learning was established by his *Observations on the Faerie Queene of Spenser* (1754). In 1757 he became professor of poetry at Oxford and began work on *The History of English Poetry* (1774–81) It was variously received, but modern scholars agree that it was a masterly job, which, though unfinished and superseded by later discoveries, is still extremely valuable. With Percy's *Reliques* it was one of the major influences in awakening interest in medieval poetry and history. In 1782 Warton entered the controversy over the "Rowley Poems" (see CHATTERTON and TYRWHITT), contending that they were modern forgeries In 1785 he was made professor of history at Oxford, succeeded William Whitehead as poet laureate, and brought out an excellent critical edition of Milton's shorter poems See biographies by W. P Ker (1911) and Clarissa Rinaker (1916), study by Edmund Gosse (1915), Eric Partridge, ed , *The Three Wartons a Choice of Their Verse* (1927).

Warwick, Guy de Beauchamp, earl of (bē'chŭm, wŏ'rĭk), d. 1315, English nobleman, of a distinguished family He was active in Edward I's campaigns in Scotland Foremost opponent of Piers GAVESTON, he was a leader of the barons who demanded (1310) of EDWARD II that the lord ordainers be appointed Warwick himself became one, procured Gaveston's banishment, and was largely responsible for his death in 1312, although Warwick took no part in the actual execution

Warwick, John Dudley, earl of: see NORTHUMBERLAND, JOHN DUDLEY, DUKE OF

Warwick, Richard de Beauchamp, earl of (bē'chum), 1382–1439, English nobleman The son of Thomas de Beauchamp, earl of Warwick, whom he succeeded in 1401, he fought against Owen Glendower in Wales and the Percys at Shrewsbury (1403) for Henry IV In 1408 he set out for the Holy Land, visiting monarchs and fighting in a tournament en route and making a similarly active return trip through Russia, Poland, and Germany After his return (1410), Beauchamp executed several missions for Henry V, including that as chief English envoy to the Council of Constance (1414), and he fought with notable success in France For capturing Aumale, Normandy, he was made duke of Aumale From 1429 he served as tutor and guardian to the young Henry VI until he was made (1437) lieutenant of France and Normandy, a position he held for the remaining two years of his life Richard de Beauchamp was a man of piety and courtesy and was famed throughout Europe as a chivalric knight His daughter Anne married, and brought the earldom to, Richard Neville, earl of WARWICK

Warwick, Richard Neville, earl of (nĕ'vĭl), 1428–71, English nobleman, called the Kingmaker The grandson of Ralph Neville, earl of WESTMORLAND, and thus connected with the house of Lancaster, he was also the nephew of Cecily Neville, wife of Richard, duke of YORK Through his wife, Anne de Beauchamp, he inherited the earldom of Warwick and the huge Beauchamp estates in Warwick Thus by virtue of his family and lands, Warwick was from youth the most powerful noble in England and the principal baronial figure in the Wars of the Roses With his father, the earl of Salisbury, Warwick supported Richard of York in his protectorship of HENRY VI (1453–54) and took up arms when Richard lost his office He was largely responsible for the Yorkist victory at the first battle of St Albans (1455) and was appointed to the strategic post of governor of Calais In 1459 fighting broke out anew, and York, Salisbury, and Warwick were forced to flee the country In 1460 they returned, the king was captured at the battle of Northampton, and York was made successor to the throne The queen, Margaret of Anjou, raised an army in the north, defeated and killed Richard and Salisbury at Wakefield (1460), and defeated Warwick and recaptured Henry at the second battle of St Albans (1461) But Richard's son, Edward won the battle of Mortimer's Cross (1461), entered London, and was proclaimed king as EDWARD IV Henry and Margaret were decisively defeated at Towton (1461) and Edward was crowned Warwick was now the principal man in England, and the Nevilles received all favors, but Edward resented the earl's domination In the midst of negotiations by Warwick to marry Edward to Bona of Savoy, the sister-in-law of Louis XI of France, the king announced that he had secretly married Elizabeth Woodville (1464) Edward now favored a Burgundian alliance against France, the Woodvilles received favor, and Warwick was in disgrace He formed an alliance with the king's brother George, duke of CLARENCE, to whom he married his daughter Isabel against Edward's orders They began to stir up insurrections In 1469 Warwick and Clarence captured Edward and regained power In 1470, however, Edward accused the two of treachery, and they fled to France Louis XI now persuaded Warwick and Queen Margaret to compose their differences, and Warwick invaded England as a Lancastrian (1470) Edward fled and Henry VI was restored. Within six months Edward secured Burgundian aid, relanded in England, and was joined by Clarence The king and Warwick met in battle at Barnet, and the earl was defeated and was slain in fight Although an able diplomat and a man of great energy, Warwick owed much of his greatness to his birth and marriage. He has been called "the last of the barons" because he represented the great noblemen in open opposition to the crown By the marriage of his daughter Isabel to Clarence and the marriage after his death of his daughter Anne to the duke of Gloucester, later Richard III,

all of Warwick's property went to the royal house. See Charles Oman, *Warwick the Kingmaker* (1893)

Warwick, Thomas de Beauchamp, earl of (bē'chum), d 1401, English nobleman, of an ancient and powerful family He was one of the lords appointed by the Good Parliament of 1376 to inquire into the government and was later one of the governors of the young RICHARD II As Richard assumed power, Warwick joined the barons who opposed the acts of Richard's favorite courtiers and was one of the lords appellant (1387) who accused them of treason and curbed Richard's power When Richard resumed control (1389), Warwick retired to his estates until his sudden arrest for treason in 1397 He was imprisoned in the Tower of London (in the Beauchamp Tower, named for him) until the accession of Henry IV, when he was released

Warwick, county, England see WARWICKSHIRE

Warwick (wŏr'ĭk, wŏr'wĭk), town (pop 7,130), Queensland, Australia, on the Condamine river and SW of Brisbane It is a rail center in a fruitgrowing region

Warwick (wŏr'wĭk, wŏ'rĭk), village (pop 1,504), SE Que, S of Victoriaville It has woolen and woodworking mills and makes plastics

Warwick (wŏ'rĭk), municipal borough (pop 13,459), co seat of Warwickshire, England, on the Upper Avon and SE of Birmingham Above the river, on a rocky hill, Æthelflæd, daughter of King Alfred, built a castle in 915 Of the present occupied structure, Caesar's Tower, 147 ft high, is the oldest part The parliamentarians successfully defended the castle in 1642 The Warwick Vase, found in Hadrian's villa at Tivoli, is in the castle, which has other famous antiquities and art works St Mary's Church dates partly from the 12th cent, partially burned in 1694, it was rebuilt by William Wilson, a pupil of Wren The Beauchamp Chapel (1443–64) is noteworthy In the church are monuments to Richard Beauchamp, earl of Warwick, to his countess, and to Robert Dudley, earl of Leicester (founder of Leycester Hospital, 1571, a half-timbered building), and a Norman crypt The east and west gates, each with a chapel, remain of the town walls Walter Savage Landor was born in Warwick A racing meet is held in the spring The borough has farm trade and manufactures of furniture, farm implements, and gelatin

Warwick (wŏr'wĭk, wŏ'rĭk) **1** Village (pop 2,534), SE N Y, near the N J line SW of Newburgh, settled c 1743, inc 1867 A state training school for boys is here **2** City (pop 28,757), central R I, S of Providence, inc as a city 1931 That area, the Shawomet of the Indians, was settled by Samuel Gorton in 1642 and incorporated as a town in 1644 Its villages include Apponaug (administrative center, on Greenwich Bay), Hillsgrove (site of the state airport), Warwick, and several resorts Warwick village was nearly destroyed (1676) in King Philip's War The town's textile industry dates from 1794 Gaspee Point S of Pawtuxet, was the scene of the burning of the *Gaspee* in 1772 Nathanael Greene was born in Warwick The Gov William Greene House in Warwick village dates from the 17th cent

Warwickshire (wŏ'rĭkshĭr) or **Warwick,** inland county (983 sq mi, 1931 pop 1,535,007, 1948 estimated pop 1,821,170), central England The terrain is gently rolling, with outcroppings of the Cotswold Hills in the south The Upper Avon, flowing southwesternly, is the chief river There are vestiges of the ancient Forest of Arden The region is a varied one, largely given to pastoral (sheep raising) and agricultural pursuits, but also containing the great industrial centers of Birmingham and Coventry (which suffered some of the heaviest air attacks on Britain in the Second World War) There are coal deposits in the northeast and deposits of iron ore, limestone, and fireclay. One of England's most famous public schools is at Rugby. There are numerous traces of Roman occupation, ecclesiastical remains, such as the abbeys of Merevale and Stoneleigh, and the ruins of Kenilworth Castle Warwick Castle is largely intact The manor at Compton Wynyates is one of the finest surviving pieces of Elizabethan architecture The county is rich in literary associations Shakspere's birthplace at Stratford-on-Avon, with the great Memorial Theater, is one of England's most popular literary shrines See *Victoria History of Warwick* (5 vols, 1904–49), Arthur Mee, *Warwickshire* (1936)

Wasatch Range (wŏ'săch), part of the Rocky Mts, extending from Idaho S to central Utah Most of the important cities of Utah lie just west of the range The highest point is Mt Timpanogos (12,008 ft), near Provo

Waseca (wŏsē'kŭ, wŏ'-), city (pop 4,270), co seat of Waseca co, SE Minn, N of Albert Lea, in a farm and dairy region on Clear Lake, settled before 1870 A state university experiment station and demonstration farm is here

Wash, the, estuarine inlet of the North Sea, 20 mi. long and 15 mi wide, between Lincolnshire and Norfolk, England It receives the Witham, Welland, Nene, and Ouse rivers It is mostly shallow with low, marshy shores, and navigation is impeded by sandbanks.

Wa-Sha-Quon-Asin: see GREY OWL.

Washburn, Cadwallader Colden. see WASHBURN, ISRAEL.

Washburn, Charles Ames: see WASHBURN, ISRAEL

Washburn, George, 1833–1915, American Congregational missionary and educator. In 1856 he was sent to Turkey, and he was later a professor, acting president (1871–77), and president (1877–1906) of Roberts College, Constantinople He became an authority on Turkish and Balkan affairs His memoirs were published in 1909.

Washburn, Israel, 1813–83, U S Representative (1851–61) and governor of Maine (1861–62) The oldest of the politically prominent Washburn brothers, all born in Livermore, Maine, Israel was admitted to the bar in 1834 and later served in the Maine legislature As a Congressman he had a large part in founding the Republican party after the passage of the Kansas-Nebraska Bill in 1854 and is one of those credited with having suggested its name He was an efficient chief executive of Maine in the first two years of the Civil War and later was collector of the port of Portland for some 15 years See Gaillard Hunt, *Israel, Elihu and Cadwallader Washburn* (1925) His brother, **Cadwallader Colden Washburn,** 1818–82, was a U S Representative (1855–61, 1867–71) and governor of Wisconsin (1872–74) In 1842 he began to practice law at Mineral Point, Wis In the Civil War, Washburn, a Republican, left Congress for the army, served in most of the Western campaigns, and at the war's end was a major general of volunteers commanding the Dept of Western Tennessee at Memphis After two post-war terms in Congress and one term as Wisconsin's chief executive, Washburn, who had made a fortune in land, devoted himself to his many industrial affairs He was one of the nation's leading flour manufacturers The Washburn Observatory at the Univ of Wisconsin was one of his philanthropic gifts A third brother, **Charles Ames Washburn,** 1822–89, was graduated from Bowdoin College in 1848 After being admitted to the bar in Mineral Point, Wis, he moved to California, where he became editor and then owner of the San Francisco *Alta Californa* and later editor and proprietor of the San Francisco *Daily Times* A founder of the Republican party in that state, he was appointed (1861) commissioner to Paraguay by President Lincoln and held ministerial rank there from 1863 to 1868 In the War of the Triple Alliance, Washburn undoubtedly conspired against President Francisco Solano LÓPEZ and was forced to escape on the U S gunboat *Wasp* His actions helped to make Latin Americans long distrustful of U S diplomats He wrote *The History of Paraguay* (1871) Elihu B WASHBURNE was another brother

Washburn. 1 Lumber town (pop 1,805), NE Maine, on the Aroostook and NW of Presque Isle, settled c 1829, inc 1861 **2** City (pop 2,363), co seat of Bayfield co, N Wis, on Chequamegon Bay of Lake Superior and N of Ashland, founded 1884, inc 1904 It is a trade center for a dairy, lumber, and fruit region There is a ranger station A state fish hatchery is near Washburn

Washburne, Elihu Benjamin, 1816–87, U S Representative (1853–69) and diplomat, b Livermore, Maine, brother of Israel WASHBURN and also of Cadwallader C and Charles A Washburn On leaving home in 1830 he added an "e" to his family name Admitted to the bar in Massachusetts, he opened (1840) his law practice in Galena, Ill In Congress he became a radical Republican noted for his efforts to limit expenses Washburne had promoted the fortunes of Ulysses S Grant early in the Civil War, and when Grant became President he made his benefactor Secretary of State, although Washburne was completely unqualified for that important post However, he resigned almost immediately to become minister to France (1869–77) In the Franco-Prussian War, he remained in Paris, the only diplomat there, and made the U S legation a refuge during the siege of the city and the subsequent period of the Commune of Paris Washburne later lived in Chicago See his *Recollections of a Minister to France, 1869–1877* (1887), Gaillard Hunt, *Israel, Elihu, and Cadwallader Washburn* (1925)

Washburn Municipal University: see TOPEKA, KANSAS

Washington, Booker Taliaferro, c 1858–1915, American Negro educator, b Franklin co, Va His mother was a mulatto slave on a plantation, his father a white man After the Civil War, he worked as soon as he was old enough in salt furnaces and coal mines in Malden, W Va, until he was able to make his way to Hampton Institute and by janitor service pay for three years of study (1872–75) He then taught at Malden before studying at Wayland Seminary, Washington, D C Appointed an instructor at Hampton Institute in 1879, he was given charge of the training of 75 Indians, under the guidance of Gen S C Armstrong, and he later developed the night school In 1881 he was chosen to organize a school for Negroes at TUSKEGEE, Ala As principal of Tuskegee Institute he became a notable factor in education, expanding and developing the institution with wisdom and foresight, emphasizing the importance of industrial training to produce real efficiency and independence for the Negro He traveled and lectured in the interests of his work, both in the United States and in Europe, being counted among the ablest public speakers of his time In 1892 the Tuskegee Conference was founded He was the organizer of the National Negro Business League in 1900 He received honorary degrees from Dartmouth and Harvard Among his many published works are his admirable autobiography, *Up from Slavery* (1901), *The Future of the American Negro* (1899), *Tuskegee and Its People* (1905), *Life of Frederick Douglass* (1907), *The Story of the Negro* (1909), and *My Larger Education* (1911) See E J Scott and L B Stowe, *Booker T Washington Builder of a Civilization* (1916), E D Washington, ed, *Selected Speeches of Booker T Washington* (1932), Basil Mathews, *Booker T Washington Educator and Interracial Interpreter* (1948)

Washington, Bushrod, 1762–1829, American jurist, b Westmoreland co, Va, nephew of George Washington He was an original member of Phi Beta Kappa at the College of William and Mary, where he was graduated in 1778 Having served (1780–82) in the American Revolution, he was a member of the Virginia house of delegates and of the Virginia convention that adopted (1788) the Constitution In 1798 he was appointed Associate Justice of the Supreme Court Bushrod Washington was executor of George Washington's estate and aided John Marshall in writing his biography of Washington He helped organize the American Colonization Society in 1816

Washington, George, 1732–99, first President of the United States (1789–97), commander in chief of the Continental army in the American Revolution, called the Father of His Country He was born on Feb 22, 1732 (Feb 11, 1731/32, O S), the first son of Augustine Washington and his second wife, Mary Ball Washington, on the family estate (later known as WAKEFIELD) on Pope's Creek, an affluent of the Potomac, in Westmoreland co, Va The Ancestral home of the Washingtons was SULGRAVE MANOR, Northamptonshire, England, but they had been in Virginia since 1656 or 1657, when John Washington, son of Lawrence Washington, an Oxford-educated Anglican clergyman, emigrated from England The Washingtons had played a modest role in the development of the Northern Neck, the vast proprietary between the Rappahannock and Potomac rivers, and George's father, Augustine, grandson of John, was a moderately well-to-do planter Augustine (Gus to his friends) had altogether 10 children, four by his first wife, Jane Butler, and six by his second wife, George's mother George was closest to (indeed he idolized) his half brother Lawrence, Augustine's eldest son Lawrence was educated in England, as Augustine himself had been, and George first met him on his return to Virginia c 1738 The fact that Lawrence served as a captain in the Virginia contingent that took part in Admiral Edward Vernon's unsuccessful expedition (1741) against Cartagena, New Granada (now Colombia), made him all the more a hero in George's eyes For his part, Lawrence became a wise and affectionate counselor to the boy and a second father to him after the death of their father in 1743 Of George's own meager education nothing is known, but it may be assumed that between his 7th and 11th years he received as good a schooling as could be had in the neighborhood of his home Augustine's will provided amply for his widow and his sons Lawrence, being the eldest, naturally received the largest share and added to his fortune by marrying (1743) Anne (or Nancy) Fairfax, daughter of Col William Fairfax, the cousin and agent of the mighty proprietor of the Northern Neck (see FAIRFAX, THOMAS FAIRFAX, 6TH BARON) This union was as advantageous for George as it was for Lawrence, for it allied him with one of the most powerful families of Virginia, a connection which largely shaped his career Next to Lawrence himself the kindly Colonel Fairfax was the most important influence in George's early life Lawrence urged that George pursue a maritime career, but Mary Washington, possessive of her first-born, vetoed this idea By 1747 George, now 15 and adept at simple mathematics, was earning small fees by surveying, and the next year he was invited to go with the party that was to survey Baron Fairfax's lands W of the Blue Ridge His mother, surprisingly, gave him permission This was an important milestone in his life, for it marked his first long journey from home and his first contact with the frontier In 1749 he was appointed to his first public office, surveyor of newly created Culpeper co, and through Lawrence he became interested in the OHIO COMPANY, which had as its object the exploitation of Western lands He accompanied (1751–52) his beloved half brother to Barbados in an attempt to restore Lawrence's failing health There George survived a siege of smallpox and was thus rendered immune to the disease that plagued his troops in the Revolution However, Lawrence, shortly after his return to his MOUNT VERNON home, succumbed (July, 1752) at the age of 34 or 35 to tuberculosis.

George was one of the executors of his estate, part of which he inherited He also inherited part of Lawrence's duties as adjutant of the colony, an office divided among four men after Lawrence's death. As district adjutant, which made (Dec , 1752) him Major Washington, he was charged with training the militia in the quarter assigned him. For a young man not yet 21 he had come forward rapidly, and he was intensely ambitious to go even farther Washington first gained public notice late in 1753 when he volunteered to carry a message from Gov Robert DINWIDDIE of Virginia to the French moving into the Ohio country, warning them to quit this territory claimed by the British king On this mission (Nov , 1753–Jan , 1754) to Fort Le Bœuf (on the site of present Waterford, Erie co , Pa), Washington had the valuable services of the experienced frontiersman Christopher GIST In delivering the message Washington learned that the French were planning a further advance, and so, hastening back to Virginia, he was commissioned lieutenant colonel by Dinwiddie and set out with c 400 men to reinforce the post at the junction of the Allegheny and Monongahela rivers (see DUQUESNE, FORT) which Dinwiddie had ordered built The French, however, captured the post before he could reach it, and on hearing that they were approaching in force Washington retired to the Great Meadows to build (July) an entrenched camp (see NECESSITY, FORT) Late in May he had won his first military victory (and his colonelcy), when he surprised (through the intelligence of his Indian allies) a small body of French troops The French soon avenged this defeat, overwhelming him with a superior force at Fort Necessity on July 3, 1754 "I went out, was soundly beaten," he dejectedly reported He surrendered on easy terms on July 4 and returned to Virginia with the survivors of his command These battles marked the beginning of the last of the French and Indian Wars in America, in which Washington was to figure further As an aide to Edward BRADDOCK he acquitted himself with honor in that general's disastrous expedition against Fort Duquesne in 1755 After that debacle he was appointed commander in chief of the Virginia militia to defend the frontier, and in 1758 he commanded one of the three brigades in the expedition headed by Gen John FORBES which took an abandoned Fort Duquesne With this episode his pre-Revolutionary military career ended He had learned much, but hardly everything that a good officer must know Now, late in 1758, a tall (6 ft.), well-built, strong young man of nearly 27 years, he returned his Virginia commission and began a new life. He was neither the prig, the paragon, nor the awesome figure that earlier biographers pictured Rather he was "an immensely vital and definitely emotional young man " Moral, just, patient, and amiable, he was also fiercely ambitious, lacking in humor, obstinate, acquisitive, and extremely sensitive—a complicated personality He was in love with Sally (Sarah Cary) Fairfax, the wife of George William Fairfax, his neighbor, friend, and son of his patron, the colonel This he told her after he had already become engaged to the young, rich widow, Martha Dandridge Custis There was nothing illicit in their relationship, though it might have caused some scandal had not the discreet Sally been a lady of character equal to his own This interesting episode, however, passed quickly, and the marriage of George and Martha Washington was a long and happy one He took his bride and her children to Mt Vernon and there settled down to the life of a Virginia gentleman He was a member (1759–74) of the house of burgesses, became a leader in Virginian opposition to the British colonial policy, and served (1774–75) as a delegate to the Continental Congress After the American Revolution broke out at Concord and Lexington, the Congress organized for defense, and largely through the efforts of John ADAMS, Washington was named (June 15, 1775) commander in chief of the Continental forces. He took command (July 3, 1775) at Cambridge, Mass , and found not an army but a force of unorganized, poorly disciplined, short-term enlisted militia, officered by men who were often insubordinate He was faced with the problem of holding the British at Boston with a force which had to be trained in the field, and he was constantly hampered by congressional interference Washington momentarily overcame these handicaps with the brilliant strategical move of occupying Dorchester Heights, forcing the British to evacuate Boston on March 17, 1776 Political expediency compelled him to attempt to defend New York city with a poorly equipped and untrained army against a large British land and sea force commanded by Sir William HOWE He was not yet experienced enough to conduct a large-scale action, and he committed a military blunder by sending part of his force to Brooklyn, where it was defeated (see LONG ISLAND, BATTLE OF) and surrounded With the British fleet ready to close the only escape route, Washington saved his army with a masterly amphibious retreat across the East River back to Manhattan Seeing that this new position was completely untenable, he began a retreat northward into Westchester co., which was marked by delaying actions at Harlem Heights and White Plains and by the treacherous insubordination of Charles LEE The retreat continued across the Hudson through New Jersey into Pennsylvania, as Washington learned military skill through errors. With colonial morale at its lowest ebb, he invaded New Jersey On Christmas night, 1776, he heroically crossed the Delaware, surrounded and defeated the British at Trenton, and pushed on to Princeton (Jan 3, 1777), where he defeated a second British force In 1777 he attempted to defend Philadelphia but was defeated at the battle of BRANDYWINE (Sept 11). His carefully planned counterattack at GERMANTOWN (Oct 4, 1777) went awry, and with this second successive defeat certain discontented army officers and members of Congress tried to have Washington removed from command. Horatio GATES was advanced as a likely candidate to succeed him, but Washington's prompt action frustrated the so-called CONWAY CABAL After Germantown, Washington went into winter quarters at VALLEY FORGE. Seldom in military history has any general faced such want and misery as Washington did in the winter of 1777–78 His essential greatness matched every problem, and in the spring he emerged with increased powers from Congress and a well-trained striking force, personally devoted to him, this Baron von STEUBEN and the marquis de LAFAYETTE had helped him to create The attack (June 28, 1778) on the British retreating from Philadelphia to New York was vitiated by the actions of Charles Lee, but Washington's arrival on the field prevented a general American rout (see MONMOUTH, BATTLE OF) However, the fortunes of war soon shifted in favor of the patriot cause with the arrival (1780) of French military and naval forces The masterly strategy of Nathanael GREENE, ably supported by Henry (Light-Horse Harry) LEE and Daniel MORGAN in the South, helped heighten colonial morale Their CAROLINA CAMPAIGN paved the way for the YORKTOWN CAMPAIGN and the final victory, as CORNWALLIS surrendered to Washington on Oct 19, 1781 Washington made the American Revolution successful not only by his personal military triumphs but also by his skill in directing other operations, such as the SARATOGA CAMPAIGN At the war's end he was the most important man in the country. He retired from the army (at Annapolis, Md , Dec 23, 1783), returned to Mt Vernon, and in 1784 journeyed to the West to inspect his lands there Dissatisfied with the weakness of the government (see CONFEDERATION, ARTICLES OF), he soon joined the movement intent on reorganizing it In 1785 commissioners from Virginia and Maryland met at Mt Vernon to settle a dispute concerning navigation on the Potomac This meeting led to the Annapolis Convention (1786) and ultimately to the FEDERAL CONSTITUTIONAL CONVENTION (1787). Washington presided over this last convention, and his influence in securing adoption of the CONSTITUTION OF THE UNITED STATES is incalculable After a new government was organized, Washington was unanimously chosen the first President and took office (April 30, 1789) in New York He was anxious to establish the new national executive above partisanship, and he chose men from all factions for the administrative departments Thomas JEFFERSON (a liberal) became Secretary of State, and Alexander HAMILTON (a conservative) Secretary of the Treasury Washington's poise, prestige, and dignity and the establishment of a formal republican court made the new government respected at home and abroad Washington demonstrated his belief in the nationalism of his office by traveling through the country, receiving local leaders in a manner befitting the head of a great nation Many precedents were set, thus in the matter of the Indian treaties, the contretemps between President and Senate resulted in the lasting interpretation of the "advice and consent" of the Senate as the right of that body to approve or disapprove the President's action, but never to give him formal advice before the fact His efforts to remain aloof from partisan struggles were not successful He approved of Hamilton's nationalistic financial measures, and though he was by no means a tool in the hands of the Secretary of the Treasury, he consistently supported conservative policies In the Anglo-French war (1793) he decided against Jefferson, who favored fulfilling the 1778 military alliance with France, and he took measures against GENÊT Jefferson left the cabinet, and despite Washington's efforts to preserve a political truce the Republican party (later the DEMOCRATIC PARTY) and the FEDERALIST PARTY were definitely organized. Washington was unanimously reelected (1793), but his second administration was Federalist, bitterly criticized by Jeffersonians, especially for JAY'S TREATY with England. Washington was denounced as an aristocrat and an enemy of true democratic ideals. The WHISKY REBELLION and trouble with the Indians, British, and Spanish in the West offered serious problems The crushing of the rebellion, the defeat of the Indians by Anthony WAYNE at Fallen Timbers, and the treaty Thomas PINCKNEY negotiated with Spain settled some of these troubles. Foreign affairs remained gloomy, however, and Washington, weary with political life, refused to run for a third term. This set another precedent, which was continued until Franklin D Roosevelt broke it in 1940. Washington's *Farewell Address* (Sept 17, 1796), a monument of American oratory, contained the famous passage warning the United States against "entangling alliances" with foreign powers. Washington returned to Mt Vernon, but when war with France seemed imminent (1798) he was offered command of the army War, however, was averted. He died (Dec 14, 1799), "first in war, first in peace, and first in the hearts of his countrymen," and was buried on his estate There are many portraits and statues of Washington, among them the familiar, idealized portraits by Gilbert Stuart, the statue by Jean Antoine Houdon, who also executed the famous portrait bust from a life mask; and paintings by Charles Wilson Peale, John Trumbull, and John Singleton Copley. The national capital is named for him, one state, several colleges and universities, and hundreds of counties, towns, and villages of the United States bear his name Wakefield and Mt. Vernon are national shrines The definitive edition of Washington's writings (39 vols , 1931–44) was edited by John C Fitzpatrick His journals—that of his Barbados journey (1892), that of his journey to the West (1905), the diaries (ed by John C Fitzpatrick, 4 vols , 1925)—all included in the definitive edition, were also edited separately An old standard edition of his writings is that by Worthington C Ford (14 vols , 1889–93), and Saxe Commins edited a one-volume selection, *Basic Writings* (1948) There have been innumerable editions of his *Farewell Address* and many separate editions of others of his works His figure has bulked large in drama, poetry, fiction, and essays in American literature There have been a great many studies of phases and incidents of his career and a continual stream of biographies, but it was only in 1948 with the publication of the first two (of six projected) volumes (carrying events down to 1758) of *George Washington a Biography*, by Douglas Southall Freeman, that a definitive biography began to appear The biography (2 vols , 1940) begun by Nathaniel W Stephenson and completed by Waldo H Dunn is full and eminently useful The early biography by "Parson" M. L Weems is chiefly important because it contained many of the now famous Washington legends, such as that of the cherry tree Biographies of Washington by eminent men of another day would include those by John Marshall, Jared Sparks, Washington Irving, and Woodrow Wilson Among the shorter biographies are those by P. L Ford (1896), W C Ford (1910), John Corbin (1930), L M Sears (1932), and J C Fitzpatrick (1933) See also T G Frothingham, *Washington, Commander in Chief* (1930), G A Eisen, *Portraits of Washington* (3 vols , 1932); C H Ambler, *George Washington and the West* (1936), E S Whitely, *Washington and His Aides-De-Camp* (1936), Bernard Knollenberg, *Washington and the Revolution* (1940)

Washington, Martha, 1731–1802, wife of George Washington, b New Kent co , Va The daughter of John and Frances Jones Dandridge, she first married (1749) Daniel Parke Custis On his plantation "White House" on the Pamunkey river they lived "a happy and opulent life " She bore him four children, but the first two died in childhood Custis himself died in July, 1757, leaving Martha one of the wealthiest ladies in Virginia Washington first met her as early as March, 1758, lost no time in proposing, and was just as quickly accepted They were married in Jan , 1759, and Washington took Martha and his ready-made family, John Parke Custis (d 1781) and Martha Parke Custis (d 1773), to his MOUNT VERNON estate They had no children of their own, but John Parke Custis had four, and after his death Washington adopted the youngest two, Eleanor Parke Custis and George Washington Parke Custis, whose daughter married Robert E Lee Martha Washington had much besides wealth to commend her, being noted for her great common sense, her charm, and her aristocratic graciousness As represented in the well-known portrait by Gilbert Stuart, she was also a woman of considerable beauty. See biographies by A. H Wharton (1897) and A C Desmond (1942), D S Freeman, *George Washington*, Vol. II (1948)

Washington, Mary (Ball), 1708?–1789, mother of George Washington, b "Epping Forest," Lancaster co , Va She became (1730) Augustine Washington's second wife George was the eldest of her four children

Washington, state (68,192 sq mi , 1940 pop. 1,736,191, 1949 estimated pop 2,582,000), extreme NW United States, in the Pacific Northwest, admitted (1889) as the 42d state. The capital, OLYMPIA, is at the southern tip of Puget Sound. Washington is bounded on the north by the Canadian province of British Columbia, on the east by Idaho, on the south by Oregon (with the Columbia river marking much of the boundary), and on the west by the Pacific with the deep-cut Puget Sound in the northwest and the gash of Gray's Harbor further south.

The topography is marked by bold features The lofty Cascades run north and south, rising to Mt. Rainier (14,408 ft.); they divide the state into a western and an eastern section Like the Coastal Ranges farther west, they cause the moisture of warm ocean-air from the Japan Current to precipitate rain to the west and block the rain from the semiarid eastern area One of the greatest rivers of the United States, the COLUMBIA, drains both of these sections It comes S from British Columbia in the east, makes a great bend westward just after receiving the Spokane and later turns in another large bend generally southward After being joined by its greatest tributary, the SNAKE, it goes west again as the Washington-Oregon boundary and cuts its way through the Cascades and the Coast Range in magnificent gorges to reach the Pacific The importance of the river to Washington can scarcely be overestimated In early days it was a means of transport and a salmon-fishing field for the many tribes of Indians Today with the development of BONNEVILLE DAM, GRAND COULEE DAM, and lesser projects on the main stream and its tributaries, the Columbia system is a great source of power for industry and of irrigation for farm development The western well-watered region of the state has a generally mild and humid climate Great forests of Douglas firs, hemlocks, and pines on the slopes of the Cascades, the Coast Range, and detached mountain groups and in the river valleys offer a wealth of lumber and give Washington its nickname "Evergreen State" This wealth, exploited since the days of settlement in the 1850s, still supplies a large income to the state Much less important, but still a factor is fishing, not only fishing for salmon on the Columbia and other rivers but also commercial fishing for tuna off the coast The western region, notably in the Puget Sound area, has seen industrial development, particularly during the Second World War, with its encouragement of airplane factories and other industries SEATTLE, the port for ships going to Alaska since before the gold strikes, mushroomed to become one of the large cities of the United States Other cities of importance in the region are TACOMA, BELLINGHAM, and EVERETT The Puget Sound area is cut by many little bays, and not only the great cities but many lesser towns are ports It has more than 400 islands, including the picturesque and historic San Juan Archipelago (see SAN JUAN BOUNDARY DISPUTE) and the large Whidbey Ships from the Puget Sound region sail north through the Inland Passage to Alaska, east along the "great circle" route to the Orient, and south for the long trip through the Panama Canal The great southern entrance to Puget Sound is Juan de Fuca Strait, and on the south side, across from the Canadian Vancouver Island, is the Olympic Peninsula, where jagged crests of the OLYMPIC MOUNTAINS look down on snowfields and luxuriant northern rain forests on the western slopes Olympic National Park has been created to preserve this wilderness area close to the crowded industrial cities The western section of Washington is thus a compound of contradictions The eastern section is scarcely less so with its vast acres of arid land on the Columbia Plateau, the atomic-energy plant at Hanford in the Second World War and the irrigated orchards and farms and dry-land wheat fields that have contributed to make the Inland Empire (with its capital of SPOKANE), one of the great producing areas of the nation The irrigated land in the YAKIMA and WENATCHEE valleys have more than proved the possibilities of irrigation in Washington, Wenatchee apples are shipped across the world More use may be made of the sparsely settled region of rolling hills (the Okanogan Highlands) and small fertile valleys lying east of the Okanogan river in the generally mountainous NE Washington Mountains also cut across the southeast, and there is to be found some of the mineral wealth that is widely distributed throughout the state WALLA WALLA was once a supply station for camps created by the gold fever The gold strikes in the Colville river country and eastward in the present Idaho helped to make Washington's history as a separate unit Its earlier history was absorbed in that of the rest of the Columbia river country It shared with OREGON in the coastal explorations of the Spanish under Bartolomé Ferrelo and others, the British from the time of Sir Francis Drake to that of Captain James Cook and the thorough George Vancouver, the French, and the Americans, capped by the discovery of the Columbia by Robert Gray The Lewis and Clark expedition and the posts established from John JACOB Astor's ASTORIA helped to establish the American claim to the land that is now Washington Later Fort Vancouver, the headquarters of Dr John McLOUGHLIN of the Hudson's Bay Company was on the site of present Vancouver, Wash. When American missionaries came in the 1840s, the most celebrated of them all, Marcus WHITMAN, established a mission near the present Walla Walla, after Roman Catholic missionaries (François Blanchet and Modeste Demers) had already established a mission on the Cowlitz river in the Puget Sound region in 1839. Whitman was a prominent figure in the British-American quarrel over the Columbia river country, which ultimately went to the United States The massacre of those at the Whitman mission in 1847 prefaced the Indian wars that slowed the settlement of Washington The Indian troubles did not, however, prevent adventurers from coming into the region Land seekers coming into the Puget Sound region since 1845 (when Tumwater became the end of the Oregon Trail) continued to appear, and gold seekers arrived even while the trouble with the Cayuse, the Yakima, the Nez Percé and other tribes, was going on, it was not settled until 1859, and even then later warfare occurred Lumbering and fishing were established as industries in Washington, which in 1853 became a territory with Isaac I STEVENS as the first governor It contained a part of Idaho, which was enlarged when Oregon became a state in 1859 The real rush of settlement was, however, delayed until the 1880s Railroad communications were finally opened in 1888, the first of three transcontinental railroads in Washington Expansion caused the population to rise 375 percent in the decade 1880–90, and Washington became a state in 1889 Lumbering had already begun its rise to a stupendous peak In E Washington, the rolling hills and wide sage-brush plains were given over to cattle and sheep, and agriculture began in the rare green valleys (e g , the little Methow) Irrigation also began to produce the blooming orchards and the wheat fields that supported the wealth of the Inland Empire (which includes much of Idaho) These developments and the booming prosperity of Seattle as the port for Alaska helped keep the state from suffering as much as the rest of the nation in the depression years of the '90s Lumbering, shipbuilding, and fish canning built a solid foundation for the state The boom of the First World War forwarded Washington, and military installations helped to increase prosperity At the same time came the greatest of the labor clashes that gave Washington (generally Democratic after 1900) the name of being a radical state The Industrial Workers of the World (the I W W) appealed to shipyard and dock workers and to workers in the logging camps, and in 1917 the War Dept intervened in lumbering disputes After the war a famous incident occurred at Centralia, when the I W W clashed in bloody fray with the American Legion Opposition to radical doctrines produced a reaction that hindered labor organization until the lean years of the 1930s Then the Washington Commonwealth Federation appeared, to decline later after Communist infiltration brought an unpleasant reaction In the depression New Deal measures led to plans for the development of the Columbia river valley that produced the Bonneville power project, wide activities of the Rural Electrification Administration, and big irrigation projects Opinion in Washington was sharply divided on the increase of Federal activity In the Second World War power development on the Columbia helped to push industrial and agricultural development to new heights Washington after the war seemed on the way to matching in productivity the varied physical beauty of the state Important among institutions of higher learning are the Univ of Washington and the State College of Washington See Ernest N Patty and Sheldon L Glover, *Mineral Resources of the State of Washington* (1921), Joseph Shafer, *A History of the Pacific Northwest* (1921), George W Fuller, *A History of the Pacific Northwest* (1931), Lancaster Pollard and Lloyd Spencer, *A History of the State of Washington* (4 vols , 1937), Federal Writers' Project, *Washington: a Guide to the Evergreen State* (1941), Archie Binns, *The Roaring Land* (1942), Nard Jones, *Evergreen Land* (1947) O O Winther, *The Great Northwest* (1947), Marian W Smith, ed , *The Indians of the Urban Northwest* (1949)

Washington, capital (1940 pop 663,091, 1948 estimated pop 863,000) of the United States, coextensive (since 1895, when GEORGETOWN became a part of Washington) with the DISTRICT OF COLUMBIA, on the Potomac river and SW of Baltimore The rivalry of Northern and Southern states for the capital in 1790 ended when Jefferson's followers supported Hamilton's program for Federal assumption of state debts and Hamilton's followers, in return, voted to locate the national capital on the Potomac George Washington selected the exact spot for the "Federal City" It was designed by Pierre L'ENFANT and laid out by Andrew ELLICOTT Construction began on the WHITE HOUSE in 1792 and on the CAPITOL the following year Congress held its first session in Washington in 1800, and Thomas Jefferson was the first President to be inaugurated here In 1814 the British captured and sacked the city, burning most of the public buildings including the Capitol and the White House Washington grew slowly, and not until the 20th cent did it cease to be an unkempt village and assume an urban aspect The city, though strongly manned during the Civil War, was several times threatened by Confederates, especially by Early in 1864. Developing from the L'Enfant plan (a gridiron arrangement of streets cut by diagonal avenues radiating from the Capitol and White House and an elaborate system of parks), the stately white-stone city spreads out over 70 sq mi with open spaces at frequent intervals and many fine houses as well as public buildings Its larger parks are the Potomac, which includes the Tidal Basin flanked by the famous Japanese cherry trees, Rock Creek, Anacostia, and the National Zoological Besides the Capitol and the White House, some other important buildings are the LIBRARY OF CONGRESS, the Folger Shakespeare Memorial Library, the National Archives Building, Constitution Hall, the Supreme Court Building, the NATIONAL GALLERY OF ART, the Pentagon, Corcoran Gallery of Art, Walter Reed Hospital, and the U S Naval Observatory Best known of the city's many statues and monuments are the WASHINGTON MONUMENT, the LINCOLN MEMORIAL, and the THOMAS JEFFERSON MEMORIAL The Arlington Memorial Bridge across the Potomac connects the city with ARLINGTON NATIONAL CEMETERY The Cathedral of St Peter and St. Paul (Protestant Episcopal), known as the National Cathedral or the Washington Cathedral, is on Mt St Alban MOUNT VERNON is near the city Among Washington's many institutions are the Army War College, CATHOLIC UNIVERSITY OF AMERICA, GEORGETOWN UNIVERSITY, GEORGE WASHINGTON UNIVERSITY, HOWARD UNIVERSITY, SMITHSONIAN INSTITUTION, BROOKINGS INSTITUTION, CARNEGIE INSTITUTION OF WASHINGTON, American Univ (coeducational, chartered 1893, opened 1914), Trinity College (Catholic, for women, 1897), Bolling Field, the U S navy yard, and the U S naval research laboratories Union Station and the National Airport are the capital's main transit points Three highway bridges and a railroad bridge cross the Potomac here See Federal Writers' Project, *Washington, City and Capital* (1937), Margaret Leech, *Reveille in Washington* (1941), Jonathan Daniels, *Frontier on the Potomac* (1946)

Washington. **1** Town (pop 432), SW Ark , near the Red River One of the oldest Arkansas towns, it was settled c 1824, from 1863 to 1865 it was the state capital, and until 1938, Hempstead county seat Many fine old buildings remain **2** Town (pop 2,089), W Conn , NE of New Milford, in the hills, settled 1734, inc 1779 It includes New Preston and Washington villages, the Washington Green is noted as a typical survival of the English 17th-century commons Gunnery School for boys was established in 1850 Lake Waramaug near by is a resort **3** City (pop 3,537), co seat of Wilkes co , NE Ga , NW of Augusta, settled 1773, laid out 1780 Among its numerous fine old homes in classic revival design is the Robert Toombs house (built 1794–1801, remodeled 1837 by Toombs) **4** City (pop 2,456), central Ill , just E of Peoria, in a farm area, inc 1857 Canning is done here **5** City (pop 9,312), co seat of Daviess co , SW Ind , near the White River E of Vincennes, settled 1805, laid out 1817 It is a trading center with large railroad shops **6** City (pop 5,227), co. seat of Washington co , SE Iowa, SSW of Iowa City, inc 1864 It is a trade center for a rich farm area Its manufactures include pearl buttons and art calendars **7** City (pop 1,598), co seat of Washington co , NE Kansas, near the Nebr line NW of Topeka, inc 1875 Trade center for an agricultural region, it manufactures dairy products The city has a courthouse (1933) of modern design **8** Town (pop 1,264), S central La , near Opelousas, settled before 1820 as a trade center, inc 1836 **9** City (pop 6,756), E Mo , on the Missouri and W of St Louis, settled before 1818, platted 1828, inc 1841 It is a farm trade center, with manufactures of shoes, corncob pipes, and dairy products Some of the architecture and customs of the early German settlers survive **10** Borough (pop 4,644), NW N J , NE of Phillipsburg, on the old Morris Canal, settled 1741, inc 1868 **11** City (pop 8,569), co seat of Beaufort co , E N C , at the head of the Pamlico estuary It is the trade and shipping center of a cotton, tobacco, corn, and truck area Founded shortly before 1776, it is said to be the first town named for George Washington **12** City (pop 26,166), co seat of Washington co , SW Pa , SW of Pittsburgh, settled 1769, laid out 1781, inc as a borough 1810, as a city 1924 The manufacture of glass and the mining of coal are important here Molybdenum is refined David Bradford House, erected in 1787, was a meeting place in the Whisky Rebellion Le Moyne House, built in 1812, was the home of Dr Francis Le Moyne, abolitionist leader Le Moyne Crematory, built in 1876, was the first in the United States WASHINGTON AND JEFFERSON COLLEGE and Washington Seminary are here **13** Village, R I see COVENTRY **14** Unincorporated town (pop c 300), S central Texas, on the Brazos and NW of Houston, settled 1821 An old town, it saw the declaration of Texas independence from Mexico on March 2, 1836 A state park commemorates the historical importance of the town, also called Washington-on-the-Brazos

Washington, Fort, military post in the American Revolution, on the highest point of the northwest

shore of Manhattan island overlooking the Hudson river, opposite FORT LEE in New Jersey It was a hastily built earthwork with no water supply within its walls and no fortifications able to withstand disciplined attack by a trained force It was, however, at a strategic location and its maintenance was a mark of American prestige When Washington was retreating before Howe in 1776, he left a garrison under Nathanael GREENE at Fort Washington In spite of Washington's advice to abandon the fort, Greene remained Howe attacked the fort and captured it Nov 6, 1776

Washington, Mount, peak, 6,288 ft high, N N H, in the Presidential Range, highest of the White Mts, and of the state From its bare summit, where there are a hotel and a meteorological station (est 1932), several states and Canada may be seen The first recorded ascent was by Darby Field in 1642, a bridle path to the summit was completed in 1840, an 8½-mile road in 1861, and a cog railroad in 1869

Washington, State College of, at Pullman, land-grant and state supported, coeducational, chartered 1890, opened 1892 It includes colleges of agriculture, home economics, mechanic arts and engineering, sciences and arts, and veterinary medicine and schools of education, mines and geology, music and fine arts, pharmacy, and social work It has a radio station and a natural science museum.

Washington, Treaty of, May, 1871, concluded between the United States and Great Britain in Washington, D C. Its principal articles provided for arbitration of the ALABAMA CLAIMS by an international commission The treaty also provided for arbitration of the SAN JUAN BOUNDARY DISPUTE and of the Canadian-American fisheries controversy Hamilton Fish, Grant's Secretary of State, who was chiefly responsible for bringing about the treaty, headed the five American commissioners in the negotiations The earl of Ripon led the British delegation

Washington, University of, at Seattle, state supported, coeducational, chartered and opened 1861 It has colleges of arts and sciences, economics and business, education, engineering, forestry, mines, and pharmacy It also has schools of architecture, art, dentistry, fisheries, home economics, journalism, law, librarianship, medicine, music, nursing, physical education, and social work There are a U S. Bureau of Mines experiment station, a large wind tunnel, forest-products and oceanographic laboratories, the Pacific Northwest historical and other large library collections, two theaters, an art gallery, and a state museum Forestry field work is important

Washington and Jefferson College, at Washington, Pa, for men Washington, chartered in 1787 as an academy and in 1806 as a college, was successor to three Presbyterian schools, pioneers W of the Alleghenies, the first opened c 1780 Jefferson, chartered in 1794 as an academy and in 1802 as a college, opened c 1791 at Canonsburg, Pa A medical department, organized in Philadelphia in 1825, became Jefferson Medical College Washington and Jefferson united in 1865, and in 1869 the Canonsburg section closed

Washington and Lee University, at Lexington, Va, nonsectarian, for men It was opened in 1749 by Presbyterians as Augusta Academy and had several sites before 1780 It was called Liberty Hall in 1776, Liberty Hall Academy (a college) in 1782, Washington Academy (following a gift from George Washington) in 1798, Washington College in 1813, and Washington and Lee Univ in 1871 Robert E. LEE was president from 1865 to 1870 There are commerce and administration and law schools, a journalism department, and a college The university has a large collection of Lee documents The chapel contains Lee's tomb

Washington College see CHESTERTOWN, Md

Washington Conference see NAVAL CONFERENCES

Washington Court House, city (pop 9,402), co seat of Fayette co, SW central Ohio, SW of Columbus and on Paint Creek, in a highly productive farming and livestock area, founded c 1810 Automobile and airplane parts and hydraulic pumps are made

Washington Island, atoll, area 6 sq mi, central Pacific, one of the Line Islands Edmund FANNING discovered it in 1798 Annexed (1889) by the British, it was included in the Gilbert and Ellice Islands colony in 1916. Its former name was Prospect Island

Washington Monument, hollow shaft, 555 ft 5⅛ in. high, in Washington, D C It is on the Mall, south of Constitution Ave and west of 14th St In 1783 Congress passed a resolution approving an equestrian statue to George Washington, and L'Enfant in his plans (1791) for the Federal city included a site for such a statue near the present location of the monument. However, Washington himself objected to the expense, and nothing more was done until after his death (1799) when John Marshall suggested a tomb, but no appropriation was made The matter was discussed at other times but no action was taken by Congress In 1832 the Washington National Monument Society was formed and a campaign for raising funds resulted in gifts not only of money but of blocks of stone from each state, some foreign governments, and private individuals These "tribute blocks" carry inscriptions on the interior of the monument. The design of Robert Mills was accepted in 1836, but Congress did not grant a site until 1848; on July 4 of that year the cornerstone was laid. The project was a political football for years The Civil War interrupted all agitation for it, and it was not until 1876 that Congress appropriated money The base (entirely different from Mill's Greek temple design) was completed in 1880, the aluminum tip was put in place in 1884, and the monument was dedicated in 1885 and opened to the public in 1888

Washington Park, village (pop 4,523), SW Ill., just E of East St Louis, inc. 1917

Washington University, at St. Louis; nonsectarian, coeducational; chartered 1853, opened 1856 It has a liberal arts college, schools of architecture, business and public administration, dentistry, engineering, fine arts, law, medicine, nursing, and social work, Henry Shaw School of Botany (affiliated with Missouri Botanical Garden), a preparatory school for girls, and an adult study center There is an art museum The institute of radiology has a cyclotron

Washita (wŏ'shĭtô), river rising in the Texas Panhandle at the Okla border and flowing SE across Oklahoma to join the Red River The name is Indian—another spelling of Ouachita The battle of the Washita (1868), in which General Custer defeated the Cheyenne Indians, took place on the river, near Cheyenne

Washoe Mountains. see VIRGINIA MOUNTAINS

Washo Indians (wä'shō), North American Indian tribe occupying in the mid-19th cent the region about Washo and Tahoe lakes in W Nevada They then numbered some 900. The Paiute were the inveterate enemies of the Washo, before the coming of the white man the Paiute defeated and drove back the Washo, and again in 1860-62 they conquered the Washo Today the Washo live on reservations in California and Nevada and total some 700 Their original material culture is of undetermined status, and their language constitutes an independent linguistic stock (see LANGUAGE, table, and HOKAN) See R H Lowie, *Ethnographic Notes on the Washo* (1939)

Washougal (wŏshō'gŭl), woolen-milling town (pop 1,267), SW Wash, on the Columbia E of Vancouver, settled 1860, inc 1908

wasp, insect of the order Hymenoptera, to which the ant and the bee also belong There are a number of families of wasps, one of which (the Vespidae) includes both social forms (e g, the yellow jackets, the hornets, and other paper wasps) and some solitary forms (e g, the potter wasp) Among the social forms there are usually three castes, queens, workers, and males or drones Only the queens survive the winter The white-faced hornet, a black insect with white markings on the body and face, is common Its nest of many layers of cells (in which the young are reared) is started by the queen and completed by the workers, the coarse paper material is prepared by masticating wood fiber The adults feed chiefly on insects and also on nectar A dark brown to black wasp (genus *Polistes*) of the same family makes an open paper nest consisting of a single layer of cells The solitary potter wasp or mason wasp uses clay in making its nest, some of these nests are said to have inspired early Indian potters Often seen under the eaves of buildings and under bridges are the mud nests of the mud-dauber wasp (of the family Sphecidae), which feeds on insects and spiders The sting of wasps, found only in females and workers, can be used repeatedly For the fig wasp, see FIG See J H Fabre, *Hunting Wasps* (1915) and *Mason Wasps* (1919)

wassail (wŏ'sĕl, wŏ'sāl), ancient salutation used in England in presenting a cup of wine to a guest or in drinking a health It signifies "be whole" or "have health," the answer being "drink hail" The words by association came to mean any liquor in which healths are drunk, especially the spiced drinks served as a feature of medieval Christmas celebrations By a natural transition, revelries, carousals, and drinking songs also came to be implied as the original meaning faded

Wassermann, August von (wō'surmun, Ger ou'gōōst fŭn vä'surman), 1866-1925, German physician and bacteriologist In Berlin he was director of the department of experimental therapy and serum research (1906-13) at Koch Institute for the study of infectious diseases and director of experimental therapy (from 1913) at the Kaiser Wilhelm Institute The **Wassermann test** which he devised (1906) is used in the diagnosis of syphilis A positive reaction when the blood or spinal fluid of the patient is tested indicates the presence of antibodies formed as a result of infection with syphilis (even though symptoms of the disease may not be observable at the time). A few other diseases, however (e g., leprosy), also sometimes produce a positive Wassermann reaction.

Wassermann, Jakob (yä'kôp), 1873-1934, Austrian novelist, b. Fürth, Bavaria, of Jewish parents He won international fame with his novel *Christian Wahnschaffe* (1918, Eng. tr, *The World's Illusion*, 1920) After years of extreme poverty, he found employment in Vienna and later in Munich, where his first novels, *Melusine* (1896) and *Die Juden von Zirndorf* (1897, Eng tr, *The Dark Pilgrimage*, 1933), were published. He settled in Vienna and there wrote novels of increasing reputation The teeming variety and the moral intensity of his works has suggested comparison with Dostoevsky His other important works include the novels *Caspar Hauser* (1908, Eng tr, 1928), *Das Gänsemännchen* (1915; Eng tr, *The Goose Man*, 1922), *Ulrike Woytich* (1923, Eng tr., *Gold*, 1924), *Der Fall Maurizius* (1928, Eng tr, *The Maurizius Case*, 1929), and *Dr Kerkhoven* (1934), an early novel on the last years of Alexander the Great was translated in 1949 as *Alexander in Babylon*. *Mein Weg als Deutscher und Jude* (1921, Eng. tr, *My Life as German and Jew*, 1933) was his autobiography He has also written plays, biographies, and essays See study by J C Blankenagel (1942)

Wastwater (wŏst'-), lake, 3 mi long and ½ mi wide, Cumberland, England, in the Lake District, SW of Keswick It is the deepest lake in England (258 ft maximum) Scafell overlooks Wastwater, Wasdale village and the ravine of Wasdale or Wastdale Head are not far

Watauga (wŏtô'gu), river rising in Watauga co, W N C, in the Blue Ridge near the Tenn line and flowing generally NW to the Holston NE of Jonesboro, Tenn Settlement along the river began in 1768, Sycamore Shoals Monument (see ELIZABETHTON, Tenn) marks the site of early historic events Watauga Dam is c 37 mi. from the river's mouth

Watauga Association, government (1772-75) formed by settlers along the Watauga river in present E Tennessee. Virginians made the first settlements in 1769 and after the collapse of the REGULATOR MOVEMENT in North Carolina, citizens from that colony under James ROBERTSON established homes farther west on the river For their mutual protection these settlements united in 1772 and drew up a written agreement, called the Watauga Association A five-man court, with legislative powers, constituted the government Other settlements along the Holston and Nolichucky rivers adhered to the Watauga Association In 1772 the Wataugans secured a 10-year lease from the Cherokee for the land along the river, in 1775 they organized as Washington Dist, but in 1776 at their own request came under the protection of North Carolina, which created (1777) Washington co for the area After the American Revolution the Wataugans belonged to another new, short-lived government (see FRANKLIN, STATE OF) before Tennessee became a state in 1796

watch, small portable timepiece, usually designed to be worn on the person The watch was made possible by the discovery that the motive power for timepieces could be produced by a coiled spring (the mainspring) The first watches are believed to have been made at Nuremberg c 1500, because of their shape they were known as Nuremberg live eggs Early watches were ornate, very heavy, and made in a variety of shapes, e g, pears, skulls, and crosses, the faces were protected by metal lattice-work. Intricate watches, such as the repeater that struck the hours or hours and quarters, have been superseded by simpler mechanisms, smaller and less likely to get out of order A notable improvement in the late 19th cent was the use of the stem for winding and setting, in place of a separate key Watch parts were made by hand until c 1850, when machine methods were introduced by American watch manufacturers The use of machine-made parts not only cuts manufacturing costs, but increases precision and facilitates repairs. In the modern watch a hairspring controls the swing of the balance wheel, which in turn regulates the rate of escapement of energy through a train of toothed wheels that derive their motor power from the mainspring Parts are held by pivots that rest on bearings. To insure the accuracy of a watch over a long period, it is desirable to use, at points subject to the most wear, bearings made of jewels (diamonds, sapphires, rubies, or the less expensive garnets and synthetic stones) A major cause of inaccuracy is the expansion or contraction of the balance wheel caused by changes of temperature, this is limited by making balance wheels of two or more materials or by using metals or alloys with low coefficients of expansion The United States and Switzerland are the major producers of watches

watch, part of a ship's crew working at one time and the period of time during which a watch of men is on duty. The deck force of a ship is divided into starboard and port watches, which alternate tours of duty. Each period of watch has its particular designation That from 8 P M. to midnight is the first watch; it is followed by the midwatch (midnight to 4 A M.), morning watch (4 A.M to 8 A M), forenoon watch (8 A M. to noon), afternoon watch (noon to 4 P.M.), first dogwatch (4 P M to 6 P.M), and second dogwatch (6 P.M to 8 P M). The dogwatches have the purpose of shifting the order of watches so that the same men will not have the same watch every day. The officer in charge of

a watch is known for the period as the officer of the deck. When a ship is in port, an anchor watch is detailed to guard the ship while the rest of the crew is ashore When a ship is leaving or entering port or in case of emergency both watches (all hands) are called for duty

Watch Hill, R I see WESTERLY

Watchung (wä"chŭng', wä'chŭng"), borough (pop. 1,158), N central N J, SW of Newark, in the Watchungs, inc. 1926

Watchung Mountains or **Orange Mountains,** two long low ridges of volcanic origin, N central N J., mainly in Essex and Somerset counties, curving to the southwest beginning SW of Paterson and ending N of Somerville

water, when pure, is an odorless, tasteless, transparent liquid at ordinary temperatures, colorless in small amounts but exhibiting a bluish tinge in large quantities At 4°C (its temperature of maximum density), one cubic centimeter of water weighs (has a mass of) one gram This constant is used as the unit of weight in the metric system and the basis of comparison for SPECIFIC GRAVITY When cooled to its freezing, or melting, temperature (0° on centigrade thermometers, 32° on Fahrenheit), water changes to a colorless, crystalline solid (ice) which is less dense than the liquid at 4°C Unlike other liquids, water expands in freezing When heated to its boiling point (100°C , 212°F , under standard pressure), it vaporizes to steam At ordinary temperatures it undergoes evaporation The unit of heat quantity, the CALORIE, is taken as the amount of heat required to raise the temperature of one gram of water one degree centigrade To change a gram of water at 100°C to steam at this temperature (the heat of vaporization), 540 calories are required, to melt one gram of ice, 80 calories (heat of fusion) Completely pure water is a poor conductor of electricity Chemically, water is a compound of hydrogen and oxygen, its molecule consisting of two atoms of hydrogen and one of oxygen Water's composition by weight is one part of hydrogen to eight of oxygen, i e , about 11 1 percent of hydrogen and about 88 9 percent of oxygen Water reacts with certain active metals, as sodium and potassium, and with many oxides of metals to form bases With a number of other oxides, e g , carbon dioxide, it forms acids Certain crystalline salts, e g , blue vitriol, have their molecules linked with a definite number of molecules of water (called water of crystallization) in such a salt is called a HYDRATE Efflorescence involves the loss of this water upon exposure to the air at ordinary temperatures Some substances absorb water from the air and in certain cases even dissolve in it They are said to be deliquescent Water is one of the best known solvents, its solutions are known as aqueous solutions In natural waters, various substances are found dissolved MINERAL WATER contains a great variety and quantity of minerals, usually some compound of calcium, magnesium, or iron Salt water, in addition to a large amount of sodium chloride (common salt), is rich in other soluble compounds Rain water is nearly pure, but sometimes, especially in cities, it contains substances (gases) which are dissolved from the air as the rain falls Certain water is called "hard" Temporary hardness occurs when the bicarbonates of calcium or magnesium are present, permanent hardness, when the sulphates or chlorides of these metals are dissolved Temporary hardness can be eliminated by boiling it by the addition of lime Permanent hardness, however, requires the addition of such substances as sodium carbonate (washing soda) or ammonium or sodium hydroxide, which react with the material causing the hardness and form a precipitate In the zeolite process the hard water is filtered through zeolite (a name used for certain porous silicates and also for some organic materials), and the calcium and magnesium compounds are removed Water covers about 70 percent of the earth's surface, in the oceans, lakes, rivers, and glaciers The GEYSER, SPRING, and WELL are supplied by ground water (water present in the earth, its level being called the water table), which is caused either by the downward seepage of rain water (vadose water) or the forcing upward of the magmatic water (juvenile water) originating in the molten rock of the earth's interior Water is an agent in metamorphism, and by its movement land is constantly being worn down, carried away, and redeposited (see EROSION) Rainfall and humidity are important factors in moderating extremes of climate Furthermore, the range of temperature along the seacoast and in regions having large bodies of water is less than in large waterless land areas The south polar region, which is largely land, has lower temperatures than the north polar region, where there is a greater expanse of ocean. Water is necessary for life. It constitutes the greater part of the fundamental substance (protoplasm) of which animal and plant bodies are composed. Sap of plants and blood of animals contain large quantities of water It is essential to the manufacture of starch by plants (see PHOTOSYNTHESIS). Many foods, e.g., milk and fruit, have a high water content. Because of the need for pure water for drinking purposes, methods of water purification are of paramount importance in man's maintenance of his WATER SUPPLY The most nearly pure water is obtained by distillation, but this method, while commonly used in laboratories, is not satisfactory for the water supply of cities and towns. The processes generally employed in making water safe for such water supply include coagulation, filtration, and disinfection Water from some sources must be treated also for the removal of color, taste, and odor Coagulation is commonly effected by adding to the water a salt of aluminum (usually aluminum sulphate) or ferric iron A precipitate forms and causes a clumping of the bacteria and other foreign particles which then settle out during the several hours of sedimentation, in this way 85 percent or more of the bacteria and suspended particles can be removed Activated carbon is sometimes added before sedimentation to remove tastes and odors In the process of filtration the water is allowed to pass through layers of fine sand to remove remaining germs and particles Chlorine is commonly used to destroy harmful bacteria persisting in a municipal water supply after the other treatments Chlorine dioxide has more recently been found effective as a destroyer of bacteria as well as a means of removing unwanted tastes and odors, its cost has limited its use Other means of destroying germs include the use of ozone and of ultraviolet light, but these methods are also in limited use Some water supplies are aerated, i e , exposed to the action of air and sunlight either through sprays or by running over coarse gravel, taste and odor are improved and some germs are destroyed WATER POWER is of major economic importance Heavy water or deuterium oxide is water in which each molecule consists of two atoms of heavy HYDROGEN (or deuterium) instead of ordinary hydrogen and one atom of oxygen It was discovered by H C Urey

water buffalo see BUFFALO

water bug. The term commonly refers to the giant water bug, the water strider, the water boatman, the back swimmer, and the water scorpion of the order Hemiptera, which are true bugs It is also applied to the CROTON BUG and to some aquatic beetles The giant water bug or electric-light bug is common in North America It has claws on the forelegs and a sharp beak and feeds on tadpoles, small fish and frogs, snails, and other fresh-water animals The larvae and adults are aquatic For a short period the adults, which are strongly attracted by electric lights, fly about at night.

Waterbury 1 City (pop 99, 314), a co seat of New Haven co , W Conn , on the Naugatuck and NW of Hartford, inc 1853, coextensive with Waterbury town, inc 1686 Its brass industry dates from the mid-18th cent Clocks and watches silverware, and hardware are also produced Its historical society has fine collections A political reform movement in 1938 succeeded in deposing members of the city administration **2** Town (pop 4,118), N central Vt , on the Winooski and NW of Montpelier, chartered 1763, settled 1783 The town was badly damaged in the 1927 flood subsequently the Little River Dam was built here Waterbury manufactures machinery and wood products The state hospital for the insane is in the town

water clock see CLEPSYDRA

water-color painting, in its wider sense, refers to all pigments mixed with water rather than with oil and also to the paintings produced by this process It includes fresco and tempera as well as aquarelle, the process now commonly meant by the generic term Gouache and distemper are also water colors, though they are prepared with a more gluey base than the other forms Long before oil was used in the preparation of pigment, water-color painting had achieved a high form of sophistication The oldest paintings now in existence, found in Egypt, are water colors The Persian artist Behzad (16th cent) established the Persian school of painting which produced extremely beautiful and elaborate miniatures Gouache was employed by Byzantine and Romanesque artists In the Middle Ages, illuminated manuscripts on vellum used water color in flat, brilliant effects In this same way water colors were used throughout the Renaissance and later by such artists as Durer, Rembrandt, and Rubens to tint and shade drawings and cuts Durer in particular colored landscape drawings in a manner not unlike the modern method In the 18th cent the modern aquarelle grew from a simple attempt merely to color a drawing into a technique of complete painting In England especially this technique became popular and found its highest exponent in J M W Turner toward the end of the century John Sell Cotman was also well known. The 19th cent used water color extensively, mostly for landscape, sometimes for portraits, but no longer for miniatures as in the 18th cent. The French artists Daumier, Delacroix, and Géricault, among others, employed aquarelle to a large extent, both for preliminary sketches and as finished works The Pre-Raphaelites in England used water color extensively, and there are works by D G Rossetti and Burne-Jones in this medium The American John Singer Sargent became well known for his aquarelles, and Whistler also worked in this technique Samuel Colman was responsible for founding the American Water Color Society, proving that aquarelle had become so widespread as to be a school. In the 20th cent water color became more and more the commercial medium for posters and advertising art, where water tempera is used in preference to oils The advantages of water color lie in the ease and quickness of its application, in the transparent effects achievable, in the brilliance of its colors, and in the relative cheapness of the materials used Aquarelles have a delicacy not easy to achieve in oil but are equally flexible and lend themselves to more informal expression of an immediate visual experience See E W. Haslehust, *Water-Colour Painting* (1938), E. W. Watson, *Watercolor Demonstrated* (1945)

water cress, hardy perennial European herb (*Rorippa nasturtium-aquaticum*), naturalized in North America, found in or around water Often cultivated commercially, it is used as a pungent salad plant or garnish It has small white flowers, easily rooting stems, and small leaflets Other plants of the genus are sometimes called water cress and are used similarly

Wateree (wôturē'), river, 295 mi. long, rising in the mountains of W North Carolina and flowing SE, past Camden, S C , to the Congaree, which it joins to form the Santee SE of Columbia For c 220 mi of its early course it is called the Catawba

waterfall, sudden drop in a stream when it passes over a layer of harder rock—often igneous —to an area of softer, and therefore more easily eroded, rock. Normally as a stream grows older the waterfall, by undercutting and by the erosion of the brink and of the stream bed above the falls, moves upstream and becomes lower until eventually it becomes a series of rapids and finally disappears The existence of a waterfall or rapids is a determinant of the location of cities, e g , there is a fall line of cities in the United States where the streams from the Appalachians descend suddenly to the coastal plain (see FALL LINE) The early textile cities of New England used power from waterfalls, and Minneapolis flour mills used the falls of St Anthony of the Mississippi Immense hydroelectric plants have been established at many falls, notably at Niagara Waterfalls famous for their beauty or their height are Niagara and those at Yosemite and Yellowstone parks, United States, Victoria Falls in the Zambezi, Rhodesia, Gersoppa, India, Sutherland, New Zealand, Staubbach, Switzerland, Gavarnie, France, those of the Hardanger Fjord region, Norway, Stora Sjofallet, Sweden, Iguassú, Brazil, and the Grand Falls, Labrador

Waterford (wô'turfurd), maritime county (710 sq mi , pop 76 108), S Ireland, in Munster The county seat is the port town of Waterford The terrain is largely hilly, but there are marshy lowlands in the east The principal rivers are the Blackwater and the Suir The coast line, on the south, is indented by Dungarvan Harbour and Waterford Harbour, and by Youghal Bay and Tramore Bay Waterford has much farming land, dairy farming and hog raising are prominent Fishing and quarrying (slate and marble) are among the occupations Waterford was organized as a county c 1200 It was under English domination rebellious, notably in the latter part of the 16th cent , when it suffered severely during the revolt of the Desmonds The chief ecclesiastical remains of the county are those at Ardmore, dating from the 7th cent

Waterford, village (pop 1,342), S Ont , on the Lynn river and N of Simcoe, in a farm area

Waterford, county borough (pop 28,332) and city, co seat of Co Waterford, Ireland, on the Suir at the head of Waterford Harbour, a tidal estuary 15 mi long formed by the Suir and Barrow (with the Nore) rivers The city is a point of outlet for the produce, especially dairy products and meat, of S Ireland The making of Waterford glass, famous in the 18th cent , had died out by the mid-19th cent Very early established as a walled Danish settlement, Waterford was taken in 1171 by Strongbow, who used Reginald's Tower (built 1003, still standing) as a fort It was besieged by Oliver Cromwell in 1649 and taken by Henry Ireton in 1650 There are towers and other remains of 13th-century Franciscan and Dominican ecclesiastical houses, suppressed in the 16th cent Protestant and Roman Catholic cathedrals are here Waterford is the seat of the united Protestant dioceses of Cashel, Emly, Waterford, and Lismore and of the Catholic diocese of Waterford and Lismore It had a charter under King John Ferrybank is a suburb across the Suir

Waterford. 1 Residential town (pop 6,594), SE Conn , settled c 1653, set off from New London 1801 It has a state tuberculosis sanatorium **2** Town (pop 836), SW Maine, settled 1775, inc 1797 It is the birth and burial place of Artemus Ward Lumber products and paper are manufactured **3** Village (pop 2,903), E N Y , on the Hudson above Cohoes, at the confluence of the Mohawk, and on the Barge Canal, inc. 1794. Electrical goods are made here

water gardening: see SOILLESS GARDENING.

water gas, colorless gas which burns with an intensely hot, bluish (nearly colorless) flame It is essentially a mixture of carbon monoxide and hydrogen with very small amounts of other gases (e g., carbon dioxide) and is almost entirely combustable as a result, Water gas is so named because of the use of water (steam) in its preparation This involves treating white-hot hard coal or coke with a blast of steam, carbon monoxide and hydrogen are formed. The gas is manufactured in enormous quantities for commercial use It is of much importance in the preparation of hydrogen and as a fuel in the making of steel and in other industrial processes Since its flame is normally almost colorless, its use as an illuminant is made possible only by an enriching process In this, carbon (which becomes heated to incandescence in the flame and glows brightly) is supplied by the addition of another gas, or the water gas is sprayed, during its preparation, with volatile petroleum oils rich in carbon, which are broken down ("cracked") in the process

water glass or soluble glass, colorless, transparent, glasslike substance when solid, commonly appearing on the market dissolved in water as a transparent, viscid liquid It usually consists of sodium silicate alone but sometimes is a mixture of sodium and potassium silicates, the sodium silicate is prepared commercially either by fusing sand with sodium carbonate or by heating sand with sodium hydroxide under pressure Its chief characteristics are its solubility in water, its adhesive property, and its resistance to fire It is consequently used as a cement for glass, pottery, and stoneware, for fireproofing and waterproofing cloth, wood, paper, and other substances, for fixing pigments in paintings and cloth printing, and as a preservative for eggs, since it fills up the pores of the eggshell and prevents the entrance of air.

water hemlock: see HEMLOCK

Waterhouse, Alfred, 1830–1905, English architect. He won competitions for the Manchester assize court (1859) and the Manchester city hall (1868) This work placed him in the forefront of the Victorian Gothic revival His most important work, the Natural History Museum, South Kensington, in a modified Romanesque style, was notable for its revival of the use of terra cotta, although a well-studied design, it illustrates the inherent incongruity between medieval forms and the needs of modern secular buildings Waterhouse also executed important buildings for Balliol College, Oxford; Pembroke College, Cambridge, Prudential Assurance Company, Holborn London, and the City and Guilds College, South Kensington (1881) He was a fellow and president (1888–91) of the Royal Institute of British Architects and a member of the Royal Academy

Waterhouse, Benjamin, 1754–1846, American physician, b Newport, R I., studied at the universities of Edinburgh and Leiden In 1783 he became professor on the first faculty of the Harvard medical school In 1800 he inoculated members of his household with vaccine obtained from England, thus introducing Jenner's method into America Inoculation had been used by Zabdiel Boylston and others, but Waterhouse was the first of the line of American physicians to establish it as a general practice

water hyacinth, perennial, aquatic plant (*Eichhornia crassipes*), probably native to Japan It was introduced in tropical South America in the late 19th cent and subsequently in the S United States Spongy, inflated leafstalks support the roundish leaves at the surface of the water, large bluish-violet flowers are borne on long, fleshy stalks The plant propagates very rapidly and has become a hindrance to navigation, especially in the Orinoco river and in waterways in Florida and California. Some success in exterminating it by spraying the leaves with 2,4-D (dichloro-phenoxyacetic acid) has been reported It is grown in tanks and ponds for its ornamental foliage and flowers

water lily, name often used for any showy-flowered aquatic plant, but strictly referring to plants of the genus *Nymphaea* (or *Castalia*), usually characterized by large many-petaled beautiful blossoms of various colors and rounded floating leaves The tender water lilies in cultivation are tropical species, but some of the hardy kinds are native, as *Nymphaea odorata* Both day- and night-blooming kinds blossom at fairly definite hours and mature their seeds under water Water lilies have served many peoples in various ways, the rootstock and seed as food, the rootstock as medicament, and the blossom (of the Egyptian LOTUS) as a sacred and national emblem and an artistic motif Water plants belonging to the same family as *Nymphaea* are also often called water lilies These include the POND LILY and the massive *Victoria*, which has leaves often 6 ft. in diameter and capable of floating the weight of a child See Alexander Nikitschek, *Water Lilies and Water Plants* (1943)

Waterloo (wô"tûrlōō', Flemish vä'tûrlō), town (pop. 7,362), Brabant prov., Belgium, 9 mi. S of Brussels. The battle of Waterloo (see WATERLOO CAMPAIGN) was fought just south of here on June 18, 1815. A large monument commemorates the event.

Waterloo (wôtûrlōō'). **1** Town (pop 9,025), S Ont., NW of Kitchener, of which it is a suburb Its industries include distilleries, flour mills, and plants making clothing, shoes, and agricultural machinery. The population is largely of German-American origin Waterloo College (Lutheran), affiliated with the Univ of Western Ontario, is here **2** Town (pop 3,173), S Que., ESE of Montreal, founded 1796 Wire, furniture, skis, and plastics are made here, and it is a market center for apples, potatoes, tomatoes, and dairy products from the surrounding area

Waterloo. **1** City (pop. 2,361), co seat of Monroe co., SW Ill., near the Mississippi S of East St Louis, in a farm area, platted 1818, inc 1849 **2** Town (pop 1,257), NE Ind., near Auburn **3** City (pop 51,743), co seat of Black Hawk co., NE Iowa, on the Cedar river, settled 1845, inc 1868 It is a trade and industrial center for a farm and livestock area The city's chief industries are meat packing and the manufacture of farm machinery, it has railroad shops The Dairy Cattle Congress and National Belgian Horse Show are held here annually **4** Village (pop 4,010), a co seat of Seneca co., W central N Y., in the Finger Lakes region, between Seneca and Cayuga lakes, inc 1824 Automobile bodies are made here, and there are canneries **5** Village (pop 1,474), S Wis., NE of Madison and on Waterloo Creek, inc 1859

Waterloo campaign, last action of the Napoleonic Wars, ending with the battle of WATERLOO In it the power of NAPOLEON I was wiped out Napoleon, who had escaped from Elba in Feb., 1815, and entered Paris on March 20, soon faced a European coalition His only hope lay in attacking before the enemy could attack him, although he could count on only about 125,000 men in the immediate future His plan was to destroy the British and Prussian forces under WELLINGTON and BLÜCHER before dealing with the Austrians and Russians under Prince Schwarzenberg, then gathering on the eastern frontier To effect this, he decided to concentrate his forces near Charleroi, between Blücher's force of about 120,000 and Wellington's of about 93,000, and thus prevent their concentration Setting out for the front on June 12, he seized Charleroi while the allies still believed him in Paris, and he defeated Blucher at Ligny (June 16). Assuming that the Prussians were retreating toward their base in Namur, he detached GROUCHY with 33,000 men to pursue them Meanwhile Marshal NEY was battling Wellington at QUATRE BRAS, Napoleon now turned to his assistance, and Wellington, though victorious at first, was compelled by the Prussian defeat to retreat toward Brussels He took up a strong position S of Waterloo, between Mont-Saint-Jean and Belle-Alliance, and awaited attack On June 18, about noon, Napoleon began a massed attack against the British center, but the British stemmed the tide until the arrival of the Prussian forces, who had eluded Grouchy by marching on Wavre instead of Namur and were thus able to come to Wellington's aid This event proved the turning point of the battle The French were routed, and Napoleon left the field and signed (June 22) his second abdication French casualties were about 32,000, the coalition's about 23,000 The battle figures prominently in literature, notably in Stendhal's *Charterhouse of Parma*, Thackeray's *Vanity Fair*, Byron's *Childe Harold*, and Victor Hugo's *Les Misérables* and *La Légende des siècles* See J C Ropes, *The Campaign of Waterloo* (1892), T E Watson, *Waterloo* (1910)

Waterloo with Seaforth, urban district (pop 31,187), Lancashire, England, at the mouth of the Mersey near Liverpool It is a seaside resort.

watermark: see PAPER

watermelon, tender, annual trailing vine (*Citrullus vulgaris*) and its very large, juicy, round or ovoid fruit, which has a green skin, sometimes marked with white, and a pink or red flesh containing numerous large, usually black or white seeds Native to Africa, where it has been cultivated since prehistoric times, the watermelon is now more extensively grown in the S United States (particularly Texas and Georgia) than anywhere else in the world It is also very popular in S Russia The fruit is eaten fresh, the inside of the rind is pickled, and in the Orient the seeds are eaten Many varieties are in cultivation, among them some short-season kinds which can be matured as far north as Ontario The citron melon is a variety with firm white flesh used like citron for preserving. A good commercial melon—the term is used for this as well as the muskmelon—weighs from 10 to 25 lb. The principal pests of the plant are the melon caterpillar, plant louse, squash-vine borer, and cucumber beetle, usually controlled by arsenical sprays

water moccasin or **cottonmouth,** highly venomous snake of the swamps and bayous of the S United States Like the copperhead, it is a pit viper The young are born alive Immature specimens are pale reddish brown with transverse dark brown bands edged with white. The distinctly blotched olive or brown of the half-grown snakes becomes dull, unmarked olive or blackish in old specimens. The maximum length is nearly 5 ft. A good climber, the water moccasin often relaxes on branches overhanging the water. If startled when coiled on the ground awaiting its prey, it usually erects its head and displays the white interior of its mouth. It eats both warm-blooded and cold-blooded animals. It is pugnacious in the wild state but becomes quite tame in captivity

water on the brain: see HYDROCEPHALUS.

water pewee: see PHOEBE.

water polo, swimming sport played in a pool measuring not more than 20 ft in width and not less than 19 ft in length Goals 3 ft high and 10 ft. wide, backed with netting, rest at water level at either long end of the pool. A water-polo team is composed of seven members (one of whom is goalkeeper), whose team identity is marked by the color of their caps When the large (27 in. circumference), inflated rubber ball is tossed into the center of the pool, players fight for possession. The ball is advanced by batting it with the body or balancing it in one hand The object of the game is to hit the ball with head, feet, or hands through the goal defended by the opposing team At least two players must touch the ball before a goal may be scored Each goal counts one point. The game is divided into four 5-minute periods. Fouls—e g., carrying the ball under water or with two hands, tackling, and avoidable bumping—are called by a referee from outside the pool and are penalized by awarding the opposing team free throws Under these conditions, the game is called hardball water polo, to distinguish it from a less popular type called softball water polo In the softball variety, the goal posts are smaller, the smaller ball is flexible enough to be grasped by the fingers, and all kinds of rough play—choking, butting, tackling, and holding under water—are permitted. Water polo became an event of the Olympic games in 1900 See W J Howcroft, *Swimming and Water Polo* (1936), J R Smith, *Playing and Coaching Water Polo* (1948)

water power, use of water as a source of energy through its movement or flow in rivers and streams The wooden WATER WHEEL has long been employed to utilize currents of water directly for turning machinery, as in flour mills and sawmills The water TURBINE is a modern type of water wheel, used in the generation of electricity, since it transmits the pressure of a stream of water into mechanical energy sufficient to drive electric generators The revivability of water power along the FALL LINE in the E United States was a reason for the location of many cities there Important hydroelectric plants are situated in the Soviet Union on the Dnieper at DNEPROGES and in the Ural region, on the DAL and other rivers in Sweden and Norway, on the Santiago near GUADALAJARA in Mexico, and on the Niagara at NIAGARA FALLS. See also COLUMBIA, river, TENNESSEE VALLEY AUTHORITY, MISSOURI RIVER BASIN PROJECT

waterproof and water-repellent fabrics. Permanent waterproofing is achieved by coating fabrics with rubber or plasticized synthetic resins, then vulcanizing or baking Fabrics so treated lose porosity and lightness and when rubberized are subject to cracking Water-repellent fabrics, sprayed with or immersed in synthetic resins, metallic compounds, oils, or waxes, tend to remain porous and to retain their natural characteristics Older treatments, such as tarring the surface as for tarpaulin or oiling as for oilskin, have been supplemented by highly technical and varied processes, such as the Zelan, Koroseal, and Cravanette, and by coating the fibers prior to cloth construction Some woolen fabrics, especially Navaho blankets and tweeds and other napped textiles, are naturally water repellent

water right. The use by landowners of water adjacent to or flowing through their property presents many problems in according equal treatment There is no private ownership of such water in most cases, and hence ordinarily it cannot be impounded and sold The owner, however, may use the water for his ordinary private purposes, such as stock watering or irrigation, and then return the unused residue Most uses of water affect its purity to some degree, but so long as pollution is not excessive other users may not make legal objection In certain parts of the United States, especially in the arid and semiarid regions of the Southwest, the law has been modified to give the first user of water the unrestrained right to it without regard to his neighbors' needs. This practice reflects the original use by solitary settlers of streams for mining and other purposes Throughout the United States the rights of private owners in water can be condemned to construct public works, such as dams and irrigation projects The ownership of a stream bed may depend upon whether the stream is or is not a NAVIGABLE WATER If it is navigable some states claim title to the bed, while in other states the rule is the same as in the case of nonnavigable streams, namely that an abutting owner's property extends to the middle of the bed and that those with property along both banks of a stretch own the enclosed portion of the bed and may exclude others who are not riparian owners from using the stream at all If the stream shifts course ownership of the former bed is not affected. Underground and percolating

waters have no easily determined course, and the usual American practice is not to restrict a landowner who taps and exploits these waters, however, in some states the rights of those who may be adversely affected must be considered

waters, territorial, all waters within the jurisdiction of a state Certain waters by their situation can be controlled only by one state. These waters include, besides wholly inclosed lakes and rivers, at least those bays which are shut off by headlands belonging to the same state and not more than 6 mi apart. The control of bounding rivers and lakes extends to the middle of the channel, but agreements to share the use of such waters and of waters which flow through more than one state are common (e.g., the Rhine, the Danube) When a body of water which is almost completely bordered by one state lies along an international route of navigation (e.g., the Panama Canal, the Bosporus) treaties often make it available to all ships By international law a state enjoys complete civil and criminal jurisdiction over the unenclosed coastal waters extending to three miles from the low-water mark This distance (the marine league) was set in the 18th cent., when it was the cannon range and hence the distance at which artillery might make the sea untenable The marine league may be used by all ships in time of peace, but during war the naval vessels of belligerents are excluded Many states claim control over a wider sea margin for certain purposes, such as the protection of fisheries and the effective maintenance of police, sanitation, and customs services Thus, in the prohibition period the United States asserted jurisdiction over ships smuggling liquor which were found within an hour's run from the shore See Philip C Jessup, *The Law of Territorial Waters* (1927), W E Masterson, *Jurisdiction in Marginal Seas* (1929)

watershed, elevation or divide separating the catchment area or drainage basin or one river system or group of river systems from another system or group of systems The Rocky Mts and the Andes form the watershed between westward-flowing and eastward-flowing streams The term is also often used as synonymous with drainage basin, the Mississippi watershed extends from the Rockies to the Appalachians Often the watershed is a distinct range of mountains the two sides of which have widely different climatic characteristics, as in the Americas and Australia, sometimes, as in glaciated or geologically very young or very old areas, it is vague The low Valdai Hills are an important watershed of the USSR

Waters of Merom (mē') see BAHR EL-HULEH

waterspout, a TORNADO occurring at sea or over inland waters. The characteristic funnel-shaped cloud is formed at the base of a cumulus-type cloud and extends downward to the water surface, where it picks up spray Waterspouts are most frequent in tropical regions, but are not uncommon in higher latitudes

water supply. The source of a water supply may be a SPRING, a WELL, a river or lake, or rain water collected in a RESERVOIR or cistern Whatever the source, the water contains some impurities If tests indicate that these impurities are dangerous or if the water has an unpleasant color, taste, or odor, the supply must be put through some process (see WATER) before it is distributed for consumption For irrigation, sewage disposal, fire extinguishing, and various other purposes, the water supply need not usually be processed See also WATERWORKS See F W Robins, *The Story of Water Supply* (1946), Arnold Alcott, *Modern Water Supply* (1949), M N Baker, *Quest for Pure Water* (1949)

Waterton Lakes National Park, 204 sq mi, SW Alta, SW of Lethbridge and at the Mont border where it adjoins Glacier National Park, est 1895 It is the Canadian section of Waterton-Glacier International Peace Park created (1932) by acts of the Canadian Parliament and the U S Congress The area is mountainous, rising to 9,600 ft at Mt Blakiston, and contains the Waterton Lakes, the largest of which straddles the international line

Watertown. **1** Town (pop 8,787), W Conn, set off from Waterbury 1780 Textile and metal goods are produced. Taft School for boys (founded 1890) is here, and there are fine residences **2** Town (pop 35,427), E Mass, on the Charles and W of Boston, settled and inc 1630 Its products include rubber and canvas footwear, textiles, and electrical supplies A Federal arsenal was built in 1816 and was greatly enlarged in the First and Second World Wars The Perkins Institution for the blind is here There are old buildings. **3** City (pop. 33,385), co seat of Jefferson co, N N Y, on both sides of the Black River and N of Syracuse, settled c 1800, inc as a village 1815, as a city 1869 It is in a rich dairy region and is the **gateway** to the Thousand Islands Falls in the river supplied power for early paper mills, the city's manufactures include air brakes as well as various paper products The collections of the Jefferson County Historical Society are in the city. **4** City (pop. 10,617), co. seat of Codington co, NE S.Dak., NNW of Sioux Falls and on the Big Sioux, near Lake Kampeska, laid out 1878 It is the distributing, shipping, and trading center for a resort and large agricultural region and has mills and meat-packing plants. **5** Industrial city (pop. 11,301), SE Wis., NE of Madison at falls of the Rock River, in a farm and dairy area; settled c 1836, inc 1853 It produces malt and shoes and is a goose market. Northwestern College is here, and near Watertown is the Octagon House (c 1849), now a museum The city was the home (1855–57) of Carl Schurz

Water Valley, city (pop 3,340), a co seat of Yalobusha co, N central Miss, SSE of Memphis, Tenn, in a farm area, inc 1858 It ships watermelons and has varied small industries

Waterville. **1** City (pop 16,688), S Maine, at the falls of the Kennebec above Augusta, settled 1754 as part of Winslow, inc as a town 1802, as a city 1883 At first a trading post, then the site of small mills, Waterville developed iron-founding, boat-building, and textile and pulp-milling industries and became a railroad center. It is the seat of Colby College (for men and women, 1813) and of Coburn Classical Institute The William Redington house (1814) is a museum **2** City (pop 1,600), SE Minn, SW of Faribault, inc as a village 1878, as a city 1898 It is a resort and farm trade center **3** Village (pop 1,489), central N Y, SW of Utica, in a dairy region, inc 1871 Knit goods and canned goods are produced George Eastman was born here

Watervliet (wô"turvlēt', -vūlēt', wô'turvlēt). **1** Resort city (pop 1,193), SW Mich, on the Paw Paw and NE of Benton Harbor, settled in the 1830s, inc as a village 1891, as a city 1925 Paper is made **2** Industrial city (pop 16,114), E N Y, on the Hudson opposite Troy, inc 1896 Steel castings and abrasive paper are among its manufactures The U S arsenal here was established during the War of 1812 At Watervliet, Ann Lee in 1776 headed the first American community of Shakers

waterway, avenue of water transportation, such as a navigable lake, river, canal, or any combination of these The possession of natural waterways, which are always used by the original inhabitants of a country, is a great factor in the development of an area, for the waterways serve first as paths of exploration and new settlement and then as avenues of commerce with the older sections of the region Thus the Nile has been a boon to Egypt, the Volga, Danube, Rhine, Rhone, and many other rivers have aided Europe's growth, the long St. Lawrence–Great Lakes and Mississippi systems helped open up interior North America; the Yukon was the means of access to inland Alaska and NE Canada, and the Amazon was the primary long transportation route of South America Australia and much of South Africa are handicapped by their lack of good navigable rivers Natural waterways were early supplemented and connected by canals, many of which still, in spite of the much greater speed of land and air transportation (upon the rates of which waterways act as a check), are the means for the transfer of great quantities of the world's goods Water shipping is generally thought to be cheaper than rail, road, or air, except in the time factor, but this is only true when expensive works (e.g., locks, bridges, levees, dikes, in addition to cutting and dredging) need not be constructed and maintained Often these expenses are not reflected in the waterway freight rates but are instead absorbed by governments, and the resultant low rates (generally regulated by governments) often attract such bulky cargo as coal, ores, grain, livestock, and lumber Waterways, partly natural and partly artificial, connect the Baltic with the Black, Caspian, and North seas, the Mediterranian with the Red Sea, the Atlantic with the Pacific and the Atlantic with the Great Lakes Waterways of international importance (either because they bound or run through more than one country or because outside nations wish to exploit them for trade) have been subjects of much discord and discussion among nations, control of and access to them being determined sometimes by war and sometimes by negotiation See M E Dimock, *Developing America's Waterways* (1935), Sir Osborne Mance, *International River and Canal Transport* (1945)

Waterways, village, N Alta, on the Clearwater just southeast of its confluence with the Athabaska at Fort McMurray It is the north terminal of a branch railroad from Edmonton River boat service from here provides summer access to Wood Buffalo National Park, to the northwest.

water wheel, wheel for utilizing the power of falling or flowing water Around the rim of the wheel are fixed blades, vanes, or cup-shaped buckets against which the water strikes The wheel rotates because of the force of the water or the effect of gravity on the filled buckets or a combination of both forces As the wheel rotates, the power can be employed to operate machines Early forms of water wheels include the overshot wheel, used where water falls from a height, striking the vanes from above, the breast wheel, employed where the height of the water is less than the height of the wheel, so that the water strikes the wheel about midway, and the undershot wheel, usable where the water flows more or less on a level but with a swift current and strikes the vanes on the underpart of the wheel. A more modern form is the Pelton wheel, which has double cup-shaped buckets against which one or more jets of water are directed Water wheels have been used from ancient times but have been largely replaced by the water TURBINE See also HYDRAULIC MACHINE

waterworks, system through which a water supply reaches the point of utilization If the source is high enough above the outlet to overcome intervening obstacles and provide sufficient pressure, the system may work by gravity alone, often pressure is augmented by pumping The essential parts of a waterworks system are the headworks, usually a reservoir formed by a dam, the conduit, a pipe, an open canal, or an aqueduct, usually constructed of wood, iron, or steel and made watertight; and the distributing system, which connects with the plumbing in buildings Water raised by a pumping plant passes through a pumping main either directly to the point of utilization, to a storage or distributing reservoir, or to a standpipe When the water is pumped to a storage reservoir, it is known as an indirect pumping system, when the demand exceeds the pumping capacity, the supply is supplemented by water from the reservoir, and when the reverse is the case, the surplus water is stored in the reservoir Pumps for such work may be plunger-and-piston, centrifugal, or air-lift pumps In modern plants the power for the pumps may be steam, electric motor, Diesel engine, gasoline engine, or compressed air For irrigation purposes water is distributed through canals, flumes, or pipes. A city water-distribution system provides water mainly for domestic and industrial purposes, sewage disposal, and fire protection, the system must provide for all buildings in the city and must be arranged so that fire hydrants can be installed where necessary The underground mains in the streets branch off to each of the adjoining buildings The mains are usually of cast-iron pipe, coated to prevent rust, and of a size that will allow sufficient rate of flow at all points Where the water pipe connects with the building's plumbing, a water meter is generally installed

Watford, village (pop 1,076), S Ont, E of Sarnia, in an agricultural region It has lumber and flour mills

Watford, municipal borough (1931 pop 56,805, 1947 estimated pop 73,880), Hertfordshire, England, NW of London and on the Colne It is a trade center "Cassiobury," the former seat of the earls of Essex, is a public park A very old church has noteworthy monuments The London Orphan School, founded in 1813, is in Watford

Watford City, village (pop 1,073), co seat of McKenzie co, W N Dak, SE of Williston, inc 1934 It is a trade center in a farm and coal-mine region

Watkins, Franklin Chenault, 1894–, American painter, b New York city, studied at the Pennsylvania Academy of the Fine Arts He is especially noted as a colorist, an adherent of postimpressionism He won fame with his *Suicide in Costume*, which was awarded first prize in 1931 at the Carnegie International Exhibition in Pittsburgh Other paintings are *The Fire-Eater*, *Resurrection*, and a portrait of Justice Owen J Roberts He is well known as a portrait painter

Watkins Glen (wŏt'kĭnz), resort village (pop 2,913), co seat of Schuyler co, W central N Y, in the Finger Lakes region, at the south end of Seneca Lake and N of Elmira, inc 1842 It is in a fruit area and has extensive saltworks Watkins Glen State Park adjoins the village Its setting of cliffs, waterfalls, and unusual rock formations made by an interwinding stream attracts scores of visitors The health resort hotel here is famed for its mineral spring water A severe flood in 1935 caused great damage to the glen

Watling Island or **Watlings Island** see SAN SALVADOR

Watling Street (wŏt'lĭng), important ancient road in England, built by the Romans It ran from London (on a route now marked by Oxford St and the Edgeware Road) generally Northwest to its intersection with the Fosse Way, c 13 mi SW of Leicester, and thence in a more westerly direction to Wroxeter (ancient Uriconium) in Shropshire, SE of Shrewsbury, a distance of more than 100 mi The principal place through which it passed was St Albans (ancient Verulamium), near London Its importance arose from its use as a thoroughfare throughout the Middle Ages and into modern times In places the ancient Roman road is in perfect condition and still in daily use, and in others it has been used as a base for modern thoroughfares Other Roman roads in England are sometimes called Watling Street, notably the extension which led from London to Dover See Thomas Codrington, *Roman Roads in Britain* (new ed., 1918)

Watonga (wŭtŏng'gu), city (pop 2,828), co seat of Blaine co, W central Okla, near the North Canadian river NW of Oklahoma City, settled 1892 With its cotton gins and grain elevators, it is the commercial center for an agricultural area A state park is near by

Watrous, Harry Willson (wŏ'trŭs), 1857–1940, American genre and still-life painter, b. San Fran-

cisco, studied in Paris with Léon Bonnat, Boulanger, and Lefebvre He is best known for his small, highly finished figures *Passing of Summer* is in the Metropolitan Museum, and his works are in many museums throughout the country. He became a member of the National Academy in 1895

Watrous, town (pop. 1,126), S central Sask., near Little Manitou Lake and SE of Saskatoon, in a mixed farming area It has grain elevators

Watseka (wŏtsē'kŭ), city (pop 3,744), co seat of Iroquois co, E Ill, near the Ind line SE of Kankakee, in a farm area, platted 1860 as South Middleport on the site of an early trading post, renamed 1865, inc 1867 Its manufactures include dairy products and soft drinks

Watson, James Craig, 1838-80, American astronomer, b Fingal, near London, Ont, grad Univ of Michigan, 1857 He was professor of astronomy and director of the observatory at the Univ of Michigan from 1863 to 1879, when he became director of the Washburn Observatory, Univ of Wisconsin The discoverer of a number of asteroids and some comets, he wrote *Theoretical Astronomy* (1868), an authoritative treatise on the theory of the motion of comets and planets In 1874 he headed an expedition to China to observe the transit of Venus. His works include *A Popular Treatise on Comets* (1861) and *Tables for the Calculation of Simple or Compound Interest* (1878)

Watson, John Broadus, 1878–, American psychologist, b Greenville, S C, M A Furman Univ, 1900, Ph D Univ of Chicago, 1903 He taught (1903–8) at the Univ of Chicago and was professor and director (1908–20) of the psychological laboratory at Johns Hopkins He later became an advertising executive Watson originated the school of psychology called BEHAVIORISM, in which behavior is described in terms of physiological response to stimuli, the concept of conscious or unconscious mental activity is rejected From his work with infants he concluded that there are three unconditioned (unlearned) responses in newborns—fear, love, and rage He wrote *Psychology from the Standpoint of a Behaviorist* (1919), *Behaviorism* (1925), and *Psychological Care of Infant and Child* (1928)

Watson, Thomas, 1557?–1592, English poet and scholar He translated into Latin the *Antigone* of Sophocles and the *Imunita* of Tasso and wrote *The Hecatompathia, or, Passionate Century of Love* (1582), one of the earliest collections of sonnets in English

Watson, Thomas Edward, 1856–1922, American legislator and author, b Columbia co, Ga He studied at Mercer Univ, Macon, Ga, was admitted to the bar (1875), and practiced in Thomson, Ga He served in the state legislature in 1882–83 and as a Farmers' Alliance Democrat in Congress (1891–93), where he worked for rural free delivery of mail The Populists nominated him for Vice President in 1896 and in 1904 named him for the presidency He was elected to the Senate as a Democrat in 1920 and served from 1921 to his death In the course of his career he published *Tom Watson's Magazine*, the *Weekly Jeffersonian*, the *Sentinel*, and numerous books, including biographies of Jefferson (1903) and Jackson (1912) and *The Roman Catholic Hierarchy* (1910) For the publication of the last book, a virulent attack on Catholicism, he was indicted three times but was never convicted See biography by C V Woodward (1938)

Watson, Sir William, 1858–1935, English poet, b Yorkshire, privately educated His first great success was *Wordsworth's Grave* (1890), followed by an elegy on Tennyson, *Lachrymae Musarum* (1892) His poetry is conservative, traditionally romantic, and he is remembered for his sonnets and shorter lyrics He was knighted in 1917, but missed the laureateship, apparently because of his sharp political criticisms in verse

Watson-Gordon, Sir John. see GORDON, SIR JOHN WATSON-

Watson Lake, village, SE Yukon, on small Watson Lake, near the Liard river and the British Columbia border A station on a branch of the Alaska Highway, it is also a Royal Canadian Mounted Police post, with an airfield and a radio station

Watsontown, borough (pop. 2,282), E Pa, on the West Branch of the Susquehanna and c 15 mi SE of Williamsport, laid out 1794, inc 1867 Fort Freeland was built near by in 1778 and was destroyed by Indians in 1779

Watsonville, city (1940 pop 8,937, 1947 special census pop 11,458), W Calif, near Monterey Bay and on the Pajaro river, founded 1851, inc 1868 It is a shipping and processing center for vegetables and fruits, especially lettuce and apples. Near by are beach and mountain resorts

Watt, James, 1736–1819, Scottish inventor. While working at the Univ of Glasgow as an instrument maker, Watt was asked to repair a model of Thomas Newcomen's steam engine. He devised improvements which resulted in a new type of engine (patented 1769) with a separate condensing chamber, an air pump to bring steam into the chamber, and parts of the engine insulated. He also perfected a rotary engine Matthew Boulton financed Watt's work and was his partner (1775–80) in manufacturing the engines at Soho near Birmingham The watt, a unit of power, was named for Watt. See biography by H W. Dickinson (1936), study by I B Hart (1949)

watt [for James Watt], unit of electrical power It is defined as the power necessary to maintain a current of one AMPERE under a pressure of one VOLT The number of watts, or electrical power, of a circuit is obtained by multiplying the number of volts by the number of amperes It is measured directly by an instrument called the wattmeter The kilowatt is equal to 1,000 watts "Electricity," i e, electrical power, is usually sold by the kilowatt hour This quantity is computed by multiplying the number of kilowatts by the number of hours In computing charges, kilowatt hours are multiplied by the unit cost

Watteau, Antoine (wätō', wŏ'tō, Fr ätwän' vätō'), 1684–1721, French painter of Flemish origin, b Valenciennes, of humble parents He first studied with an obscure local painter In 1702, almost penniless, he went to Paris, where he suffered great privations, working as a scene painter and later in a factory of cheap devotional pictures His work caught the attention of an able painter, Claude Gillot, in whose studio he went to work From then on he passed from the protection of one patron to another The comte de Caylus, his biographer, was a staunch friend In 1712 Watteau was accepted by the Académie royale de Peinture et de Sculpture Aside from this and a second place in a Prix de Rome contest, he won little official recognition He died at 37, but despite his short and troubled life, he holds a unique place in the history of French painting, he exercised a great influence on his contemporaries and successors His small canvases, for the most part representing idyllic scenes of festivities in the open or characters from Italian comedy, place him among the great colorists of all time A profound lyric quality pervades his gay and sensuous scenes and gives them a poignancy which none of his 18th-century imitators attained Out of the most fleeting aspects of life he created an enduring and individual art Among his famous works are *The Embarkation for Cythera*, *Autumn*, and *Gilles* (all Louvre) and *La Fête champêtre* (Edinburgh) His *Perspective* is in the Museum of Fine Arts, Boston, and his *Mezzetin* is in the Metropolitan Museum

Wattenscheid (vä'tunshīt), city (pop 59,575) Westphalia, NW Germany It is a coal-mining and manufacturing center of the Ruhr district

Watterson, Henry (wŏ'tursun), 1840–1921, American journalist, b Washington, D C His education was informal Early in life he became a Washington newspaper reporter He served with the Confederate army in the Civil War and for a time edited the Chattanooga (Tenn) *Rebel* After working on newspapers in Alabama, Ohio, and Tennessee, Watterson became an editor of the Louisville (Ky) *Journal* In 1868 he merged this paper with the competing Louisville *Courier* to form the *Courier-Journal* Under Watterson's editorship, this paper became one of the best known in the country and a leading influence in the South His editorials (compiled in 1923 in a volume by Arthur Krock) gained national attention Watterson served (1876–77) in Congress and vigorously supported S J Tilden for President in 1876 He sought reconciliation between the North and the South and opposed the Ku Klux Klan He was sharply critical of President Grover Cleveland, opposed William J Bryan and free silver, and gave support to Woodrow Wilson only after 1916 He resigned his editorship in 1919 See his autobiography, "*Marse Henry*" (1919)

wattle, name for several woody species of Australian ACACIA, commercially valuable for their high tannin content By common consent it is the national flower of Australia, where Wattle Day is observed at blooming time The pliable branches were woven into the structure of their early wattle houses and fences, whence the name for the plants Some wattles are grown for decorative purposes in the SW United States

Watts, George Frederic, 1817–1904, English painter and sculptor He studied at the Royal Academy and in Italy, where he developed an enthusiasm for Venetian painting and Greek sculpture which greatly influenced his work He early executed several decorative commissions, including his large fresco *Justice* (Lincoln's Inn, London) His later work consisted largely of allegorical paintings and portraits He enjoyed many honors, twice refusing a baronetcy, and spent most of his life at work in his London studio His popular painting is characterized by glowing color, soft contours, and tender idealism He is best known for his allegories such as *Sic Transit*, *Love and Life*, *Love and Death*, and *Love Triumphant* Many of these are in the Tate Gallery, London The National Portrait Gallery, London, contains a large collection of his portraits of eminent contemporaries. The Metropolitan Museum has his *Ariadne in Naxos*. His notable work in sculpture includes numerous monuments and a memorial to Cecil Rhodes, *Physical Energy*, at World's View, Southern Rhodesia He married Ellen TERRY in 1864, but they were separated in 1865 and were divorced in 1877; in 1886 Watts married Mary Fraser-Tytler, who wrote a biography of him (3 vols., 1912) See also studies by C T Bateman (1901) and G K. Chesterton (1904)

Watts, Isaac, 1674–1748, English dissenting clergyman and hymn writer He became assistant pastor, and in 1702 pastor, of the Independent Chapel in Mark Lane, London From 1712, however, because of poor health, he lived in semiretirement at Abney Park, with Sir Thomas Abney His several hundred hymns embodied the stern doctrines of Calvinism but reflected also his belief that Christian truth could be expressed in the imagery of true poetry The relatively few of his hymns which survive in present-day hymnals are among the finest examples of English metrical hymnody Those beginning, "Jesus shall reign where'er the sun," "When I survey the wondrous cross," "Joy to the world," and "Our God, our help in ages past," all appeared in his *Psalms of David Imitated in the Language of the New Testament* (1719) *Divine Songs for Children* (1715), containing the classic "How doth the little busy bee," was the first work of its kind Watts's later works, including *Logic* (1725), much used as a text, and theological and metaphysical works, were secondary in importance to his hymns There are several editions of his collected works See biography by A P Davis (1943), Thomas Wright, *Isaac Watts and Contemporary Hymn-Writers* (1914)

Watts, Mary Stanbery, 1868–, American novelist, b Delaware co, Ohio Her best-known works are the novel of the Mexican War, *Nathan Burke* (1910), and *The Rise of Jennie Cushing* (1914)

Watts-Dunton, Theodore (Walter Theodore Watts-Dunton), 1832 1914, English poet, novelist, and critic He was on the staff of the *Examiner* (1874–76) and was editor of the *Athenaeum* (1876–98) He was a friend of Rossetti and of Swinburne, whose life he organized and who lived with him from 1879 to 1909 Watts-Dunton edited many of the classics and contributed important articles to *The Encyclopaedia Britannica* Among his works are *The Coming of Love* (1897), *Aylwin* (1898), a novel of gypsies, *The Christmas Dream* (1901), *The Renascence of Wonder a Treatise on the Romantic Movement* (1903), and *Old Familiar Faces* (1916), a volume of recollections See biography by James Douglas (1904). Max Beerbohm, "No 2 The Pines," in *And Even Now* (1920)

Watt's Dyke, ancient entrenchment of England and Wales see OFFA'S DYKE

Waubeshiek (wô'bushĕk), c 1794–c 1841, American Indian prophet, called also White Cloud He was a friend and adviser of Black Hawk and was chiefly responsible for the BLACK HAWK WAR He was captured with Black Hawk, imprisoned, and taken to Washington He spent his last days peacefully in Iowa Prophetstown, Ill, is the site of Waubeshiek's early residence

Wauchula (wôchō'lŭ), city (pop 2,710), co seat of Hardee co, S central Fla It was settled around a fort built during the Seminole War Wauchula is a market center for vegetables and fruit, especially strawberries

Waugh, Evelyn (ēv'lĭn wô'), 1903–, English author The first of his witty, satiric novels, *Decline and Fall*, was published in 1928 It was followed by *Vile Bodies* (1930), *Black Mischief* (1932), *A Handful of Dust* (1934), *Scoop* (1938), *Put Out More Flags* (1942), *The Loved One* (1948, a satire on American attitudes toward death), and *Scott-King's Modern Europe* (1949) *Brideshead Revisited* (1945) is in a more straightforward vein Waugh has, in addition, written a number of travel books and biographies of D G Rossetti (1928) and Edmund Campion (1935), the Elizabethan Jesuit martyr. The latter work received the Hawthornden Prize in 1936 Waugh's Roman Catholicism (he was converted in 1930) and his social conservatism are apparent throughout most of his work He is the son of Arthur Waugh, editor and publisher, and brother of Alec Waugh, a novelist

Waugh, Frederick Judd (wô), 1861–1940, American marine painter, b Bordentown, N J, studied at the Pennsylvania Academy of the Fine Arts and in Paris He was a proficient and prolific painter of seascapes and is represented in many American, English, and South African museums

Waukegan (wôkē'gŭn), residential and industrial city (pop 34,241), co seat of Lake co, NE Ill, on Lake Michigan N of Chicago It was settled in 1835 as Little Fort near an old French stockade established on the site of an Indian village, in 1849 it was incorporated as the village of Waukegan With air and rail services and a good harbor, the city manufactures steel and steel products, chemicals, asbestos products, pharmaceuticals, and machines of various types

Waukesha (wô'kshô), city (pop 19,242), co. seat of Waukesha co, SE Wis, on the Fox and W of Milwaukee, settled 1834, inc 1895. It is an industrial center for a dairy area Waukesha became a health resort after the Civil War, and its bottled waters are shipped widely Carroll College and a state industrial school for boys are here. Near by are a

state sanatorium for the tubercular and Cushing Memorial Park. Alexander W. Randall lived in Waukesha.

Waukon (wô'kŏn″), city (pop. 2,972), co seat of Allamakee co., NE Iowa, near the Mississippi, settled 1849, inc. 1883. An annual corn festival is held

Waupaca (wŏpă'kŭ), industrial city (pop 3,458), co seat of Waupaca co., central Wis., between Appleton and Wisconsin Rapids and on the Waupaca, inc 1875 It is the center of a lake resort area

Waupun (wŏpŭn'), city (pop 6,798), central Wis., SW of Fond du Lac and on the Rock River, in a farm and dairy area, settled 1838, inc 1878 Vulcanising machinery and shoes are made The state prison and a state mental hospital are here.

Waurika (wôrē'kŭ), farm trading city (pop 2,458), co seat of Jefferson co., S Okla., near the Red River, settled c 1890, inc 1903

Wausau (wô'sô), industrial city (pop 27,268), co seat of Marathon co., central Wis., at rapids of the Wisconsin and NW of Green Bay, in a dairy area, settled 1839, inc 1872 Wausau grew as a lumber town It is now a trade center, and its manufactures include paper and wood and paper products. Winter sports are held at near-by Rib Mt

Wauseon (wô'sēŏn), village (pop 3,016), co seat of Fulton co., NW Ohio, SW of Toledo, in a farm and dairy area, settled 1835, inc. 1852 Automobile parts are made here

Wauters, Émile (āmēl' vōtĕr', vou'tûrs), 1846–1933, Belgian historical and portrait painter and pastelist Member of the British Royal Academy and winner of numerous prizes in the Paris Salon from 1870 on, he is best known for his decorations in the town hall, Brussels, and for such historical paintings as *Mary of Burgundy before the Magistrate of Ghent* (Liége) and *Madness of Hugo van der Goes* (Brussels)

Wautoma (wôtō'mu), city (pop 1,180), co seat of Waushara co., central Wis., W of Oshkosh, in a dairy area, inc 1901

Wauwatosa (wôwutō'su), industrial city (pop 27,769), SE Wis., near Milwaukee, settled 1835, inc as a village 1892, as a city 1897 It is the seat of several county institutions

wave, in common usage, a term taken to indicate a disturbance of the surface of some liquid medium, e.g., that arising when a stone is dropped into a body of water In physics it has further significance when used in the description of such phenomena as light, radio, sound, and electricity By a consideration of water waves, certain terms common in a discussion of waves of any kind are more clearly understood Wave length is taken as the distance from any point on one wave to a corresponding point on the next Frequency is defined as the number of crests which pass a given point in a second Velocity is the rate, or speed, at which a crest "travels," i.e., the distance it appears to cover in a second Waves are said to be longitudinal or transverse according to the direction in which the particles of the medium transmitting them move The medium transmitting the wave does not move along with the wave—it is merely set in vibration at successive points as the wave of energy moves along For example, the particles of water in the water waves set up when a stone is dropped in a quiet pool do not move in the direction of the wave but simply vibrate up and down, i.e., at right angles to the path the wave is following, water waves are thus transverse LIGHT waves are also transverse They are held to be transmitted by the ETHER, being able therefore to pass through a space in which there is no matter, i.e., through a vacuum The different colors of which white light is composed have different wave lengths, the shortest (violet) being 0 0004 mm and the longest (red) 0 0008 mm SOUND waves differ from light waves in that their vibration is longitudinal, i.e., the particles of the transmitting medium vibrate forward and back in line with the direction of the wave Sound waves are transmitted by matter and will not pass through a vacuum All the different forms of radiant energy (see RADIATION) are believed to be transmitted by waves RADIO waves are the longest of the so-called electromagnetic radiation, with the "short" electric waves just below them in the scale

Wavell, Archibald Percival Wavell, 1st Earl (wā'vŭl), 1883–, British field marshal and viceroy of India Educated at Winchester and Sandhurst, he joined the Black Watch in 1901, saw service in the South African War, and on the Western Front in the First World War, where he lost an eye Later, under the command of General Allenby in Palestine, he first learned the desert strategy which he was to employ so successfully later During the Arab-Jewish riots in 1937-38, he was sent to keep order in Palestine and Trans-Jordan as commander of the British forces In the Second World War he was commander in chief of the Middle East, in which capacity he put to rout the Italian forces in Cyrenaica with the shrewd use of bold tactics (see NORTH AFRICA, CAMPAIGNS IN), only to be forced back later in 1941 by the Axis drive He then exchanged commands with General Auchinleck, becoming commander in chief of India In 1942 he was for some months supreme commander of the Allies in the Far East. Resuming his command in India, he became viceroy and governor general in 1943 From that time until his resignation in 1947, his main concern was the preparation of India for self-rule; towards this end he worked continually with the numerous Indian factions He was created Viscount Wavell of Cyrenaica and Winchester in 1943 and earl in 1947 He wrote *The Palestine Campaigns* (1928), *Allenby* (1940) and *Allenby in Egypt* (1943), *Speaking Generally* (1946), and *The Good Soldier* (1947) He also edited an anthology of poetry, *Other Men's Flowers* (1944) See biography by R H Kiernan (1946).

wave mechanics. see QUANTUM THEORY

Waveney (wā'vunē), river of England It forms part of the Norfolk-Suffolk boundary, widens into the BROADS along its lower course, and joins the Yare to form the estuarine Breydon Water

Waverley, village, Surrey, England, SE of Farnham At "Moor Park," Sir William Temple's estate, Swift lived as secretary and here he met "Stella" There are remains of Waverley Abbey, the earliest Cistercian abbey in England, founded in 1128 The *Annales Waverlienses* are supposed to have suggested the title of Scott's novels

Waverly **1** City (pop 1,385), central Ill., SW of Springfield, in a farm area, inc. 1867 **2** City (pop 4,156), co seat of Bremer co., NE Iowa, on the Cedar river above Waterloo, inc 1859 It processes dairy and other farm produce Wartburg College (coeducational, 1868), here, has the Waverly Museum There is a Lutheran orphans' home **3** Village (pop 5,450), S N Y., at the Pa line, on the Chemung and SE of Elmira, inc 1853 **4** Resort village (pop 1,757), co seat of Pike co., S Ohio, on the Scioto river and S of Chillicothe, in a farm area, founded 1829 as Uniontown, renamed 1830 Lake White State Park is near by **5** Town (pop 1,318), co seat of Humphreys co., central Tenn., W of Nashville and near the Tennessee, in a farm and timber area, laid out 1836 **6** Town (pop 1,288), SE Va., SE of Petersburg, inc 1892 It is a trade center with lumber mills

Waves (Women Appointed for Voluntary Emergency Service), created (1942) in the Second World War to release male naval personnel for sea duty The organization was commanded until 1946 by Mildred H McAfee, president of Wellesley College on leave She was promoted captain in 1943. Waves served in communications, air-traffic control, naval air navigation, and clerical jobs in the United States, Hawaii, Alaska, and the Caribbean Recruiting ended in 1945, with a peak enrollment of 86,000, including (after 1944) Negro women Waves forces were reduced when the war ended, and after the passage (1948) of the Women's Armed Service Integration Act women were enlisted into the regular navy.

wax, name for a substance secreted by glands on the abdomen of the bee and known commonly as beeswax and also for various substances resembling beeswax Chemically waxes differ from fats in being usually mixtures containing esters of fatty acids and esters of certain alcohols (other than glycerol), as well as alcohols and sometimes hydrocarbons, fats, on the other hand, are esters of fatty acids and glycerol Waxes are generally harder and less greasy than fats, but like fats they are less dense than water and soluble in alcohol and ether but not in water Among the waxes derived from plants are carnauba wax, obtained from the leaves of a PALM grown in Brazil, and candelilla wax, produced by a Mexican plant (*Euphorbia antisyphilitica*) Those of animal origin include wool wax or lanolin obtained from the surface of wool fibers and used in making certain creams, ointments, and soaps, in the processes of finishing and softening leather, and as an ingredient of some paints and varnishes, SPERMACETI, obtained from the sperm whale, and Chinese WAX, which is deposited on certain trees in parts of Asia (especially China and India) by a species of scale insect Mineral waxes include OZOCERITE and PARAFFIN, both composed of hydrocarbons Japan WAX and bayberry (or myrtle) wax are composed chiefly of fats See N S Knaggs, *Adventures in Man's First Plastic* (1947)

Waxahachie (wŏk"sĭhā'chē, wŏk"-), city (pop 8,655), co seat of Ellis co., N Texas, S of Dallas, founded 1847, inc 1871 A market center in the rich blackland prairie, it is also an industrial city with garment factories and other plants The Southwestern Bible Institute (Assembly of God, coeducational, 1927) is here

wax figures, usually of beeswax, which is susceptible to modeling, casting, and coloring They were common among the ancients, the early Egyptians used them as sacred images for burial ceremonies and offerings, the Greeks employed them as small divinities in religious rites, as dolls, and as talismans Aristocratic Romans had wax masks and family portraits as a mark of prestige and exhibited them in funeral processions Pins were stuck through wax effigies of enemies, the superstition being that punishment was thus also visited upon the individual himself, this practice continued through the Middle Ages In the last days of the Roman Saturnalia, wax statuettes played a part in the celebration The Christian era brought forth images of saints and medallions of the Lamb of God, or Agnus Dei, in wax—examples in Spain show particularly fine modeling and color. In the 15th cent., full-size figures with glass eyes and real hair were built upon skeleton frames Two hundred years later anatomical figures were introduced in Florence for pathological studies In Renaissance Italy wax was used by medalists creating models for their bronzes, and wax portrait busts were common Polychrome wax portraits were popular in Europe throughout the 18th cent., and relief work in wax was employed by Flaxman for the exquisite cameos of Wedgwood ware In the 19th cent., wax dolls came into fashion, and exhibits of wax representations, accurate to the last detail, of notable, and even notorious, personages were in vogue Among such collections Mme Tussaud's, London, and that in the former Eden Musée, New York (closed 1915), were widely known The wax figures once familiar in shop windows have been replaced by the more lasting manikins of wood or papier mâché Present-day sculptors employ wax for modeling and casting, and metalwork designs are usually created in this medium See E S Bolton, *American Wax Portraits* (1929)

wax moth: see BEE MOTH.

wax myrtle: see BAYBERRY.

wax painting: see ENCAUSTIC.

waxwing, perching bird of the Northern Hemisphere of the Old and New Worlds The waxwings are crested and have sleek, brownish-gray plumage with dashes of red that look like sealing wax on the wing feathers In winter they flock They eat wild fruits supplemented by insects The cedar waxwing, called cherry bird and cedar bird, breeds throughout most of Canada and the United States The Bohemian waxwing is circumpolar in distribution In North America it is found chiefly in the north but wanders to parts of the United States The Japanese waxwing is confined to E Asia

Waycross, city (pop 16,763), co seat of Ware co., SE Ga., SW of Savannah and just N of Okefenokee Swamp, first settled 1818, inc 1874 It is a highway and rail focus (with railroad shops) as well as an industrial and shipping center in a productive farm area Its commercial development dates from the 1870s

Way Down East' see PARKER, LOTTIE BLAIR.

wayfaring tree see HOBBLEBUSH

Wayland, Francis, 1796–1865, American clergyman and educator, b New York city, grad Union College, 1813, and studied at Andover Theological Seminary As pastor (1821–26) of the First Baptist Church, Boston, he became known for his able preaching After a brief professorship at Union College, he was president (1827–55) of Brown Univ He was pastor of the First Baptist Church, Providence, for a short time following his retirement from the university and afterward gave his chief attention to benevolent works, particularly prison reform His works include three frequently reprinted textbooks, *Elements of Moral Science* (1835), *Elements of Political Economy* (1837), and *Elements of Intellectual Philosophy* (1854), as well as a memoir (1853) of the Rev Adoniram Judson See biographies by his sons, Francis and H L Wayland (1867), and J O Murray (1891)

Wayland. **1** Town (pop 1,950), E Ky., ENE of Hazard, in the Cumberland coal area **2** Town (pop 3,505), E Mass., W of Boston, settled c 1638, inc 1835 **3** Village (pop 1,005), S Mich., between Grand Rapids and Kalamazoo, settled 1836, inc 1858 **4** Village (pop 1,795), W central N Y., N of Hornell, inc 1877 Chairs and silk are made here

Wayland Smith, in English folklore, a skillful blacksmith, whose forge was near the White Horse (Berkshire) He appears in the Old English *Deor* and in Sir Walter Scott's *Kenilworth* The wonderful story of his Norse cognate, Völund, appears at length in the *Elder Edda*

Waymart, borough (pop 1,095), NE Pa., E of Carbondale, inc 1851 It has a mental hospital

Wayne, Anthony, 1745–96, patriot general in the American Revolution, b Chester co., Pa., educated at his uncle's school in Philadelphia Not inclined toward academic studies, he was enabled by aptitude in mathematics to become a surveyor in 1763 In 1765 he was engaged to survey the land for, and promote settlement of, a proposed colony in Nova Scotia, a venture from which he withdrew in 1766 He returned to the business of farming and tanning at Waynesborough on the farm which his grandfather had established and of which he became owner in 1775 He represented Chester co in the Pennsylvania assembly (1774–75), was an agitator against British indignities, and was active in preparations to defend the cause of the colonists When the Continental army was formed, he organized and commanded a regiment from Chester co., and in Jan., 1776, he was commissioned a colonel and given command of the 4th Pennsylvania Battalion As agent for the Pennsylvania Committee of Safety, he built defenses for the Delaware In the spring of 1776 he covered the retreat of the Americans at Trois Rivières after

the patriot failure in the Quebec campaign. The next winter he spent in command at Fort Ticonderoga In 1777 he was commissioned brigadier general and joined Washington's army at Morristown, N J. In the battle of Brandywine, Wayne commanded a division at Chadd's Ford. He was defeated by Howe's forces at Paoli, Pa ; he had to answer charges before a court-martial and was acquitted He fought at Germantown, made successful raids on British supplies for the troops encamped at Valley Forge, and served in the battle of Monmouth His most famous achievement, however, was his capture of Stony Point by a night attack in July, 1779 He aided Lafayette in Virginia and was active in the Yorktown campaign Later he fought successfully against the Indians in Georgia, and after Nathanael Greene's army had forced the British evacuation of Charleston, S C , Wayne occupied the city In 1783 he returned to Pennsylvania, where he served on the council of censors, and in 1784 he was again elected to represent Chester co. in the general assembly The following year he returned to Georgia and tried unsuccessfully to work the land which the Georgia assembly had given him in gratitude for his services In 1791 he was elected to Congress as a representative from Georgia, but was unseated because of irregularities in the election and in his residence qualification In 1792 he succeeded Arthur St Clair as commander in chief of the American armies and proceeded to the Northwest Territory After the failure of peace negotiations, which Wayne opposed, feeling that war was inevitable, he decisively defeated the Indians at Fallen Timbers In 1795, the Treaty of Greenville was signed with the chiefs of the Wyandotte, Delaware, Miami, Shawnee, Chippewa, Ottawa, Sac and Fox, and Potawatami Indians. All previous treaties ceding land to the United States were to be recognized This was the first treaty in which Indian title to lands within the boundaries of the new United States was overtly recognized Early in 1796 Wayne retired Impetuous and hot-headed, he was sometimes known as "mad Anthony," and he often quarreled with his fellow officers, but in times of action he was an able general, capable of making clear judgments under duress See H B Dawson, *The Assault on Stony Point* (1863), J W De Peyster, *Major General Anthony Wayne* (1886), C J Stillé, *Major General Anthony Wayne and the Pennsylvania Line in the Continental Army* (1893), biographies by Thomas Boyd (1929), J H Preston (1930), and H E Wildes (1941)

Wayne. **1** Village (pop 4,223), SE Mich , on the South Branch of the Rouge and SW of Dearborn, settled 1836, inc 1869 Aircraft parts, machinery, and oil and gasoline strainers are made **2** City (pop 2,719), co seat of Wayne co , NE Nebr , near the Missouri NW of Omaha, in a farm area, laid out 1881 A state teachers college is here

Waynesboro. **1** City (pop 3,793), co seat of Burke co , E Ga , S of Augusta, laid out 1783, inc 1812. It is a cotton center **2** Town (pop. 1,445), co seat of Wayne co , SE Miss , near the Chickasawhay S of Meridian, in a timber, livestock, and farm area **3** Borough (pop 10,231), S Pa , near the Md boundary SW of Harrisburg, settled 1798, inc 1818 It produces locks and refrigeration machinery The surrounding country is beautiful and yields peaches and apples A state forest is near by, which enhances the borough as a resort center It was named for Anthony Wayne **4** City (pop 7,373), central Va , SE of Staunton in the Shenandoah Valley, near the southern entrance to the Skyline Drive, settled 1700, inc 1797 It is a trade and industrial center In March, 1865, a detachment of Sheridan's army under Custer severely defeated Early here. A girls' preparatory school and junior college and a boys' military school are here

Waynesburg. **1** Village (pop. 1,223), NE Ohio, SE of Canton Structural clay products are made here **2** Borough (pop. 4,891), co seat of Greene co , SW Pa , 40 mi SSW of Pittsburgh, laid out 1796, inc 1816 Bituminous coal is mined here It has landscaped chains of parks, colonial buildings, and the county museum Named for Anthony Wayne, it is the seat of Waynesburg College (coeducational, opened 1849)

Waynesville, resort town (pop 2,940), co seat of Haywood co , W N.C., in the Blue Ridge WSW of Asheville, settled before 1800, inc. 1871 The area produces diversified crops, livestock, dairy products, kaolin, and mica Leather goods, furniture, and textiles are made here. Near-by Lake Junaluska is the seat of a Methodist assembly

Wayne University, at Detroit, city and county supported, coeducational, formed 1933 from five city colleges (opened 1868–1927) It has colleges of education, engineering, liberal arts, medicine, nursing, and pharmacy and schools of business administration, general studies, occupational health, public affairs and social work, and law Many local agencies cooperate

Waynflete, William (wān'flēt), 1395?–1486, English prelate, lord chancellor of England, educated at Oxford He was master of Winchester College before 1429, and in 1443 he became provost of Eton In 1448 he succeeded Cardinal Beaufort as bishop of Winchester. He soon after received patents to found a hall at Oxford for the study of theology and philosophy. In 1456 he obtained royal permission to establish a college, which would include the earlier Magdalen Hall, outside the town walls. The buildings were completed in 1480, largely through Waynflete's own generosity, and Magdalen College still bears his arms He was also industrious in the building of the nave of Winchester, in which he continued Cardinal Beaufort's work. The bishop's political career was largely a matter of personal aid to Henry VI, who was about to be precipitated into the Wars of the Roses. William treated (1452) with Jack CADE and with Richard of York for peace He was a privy councilor, in which capacity he tried to obtain Henry's consent to a regency by Richard of York (1454), in 1456 he was made lord chancellor. Although he had followed a moderate course, he presided at the parliament (1459) at Coventry which attainted the Yorkists After the defeat at Northampton, William, no longer chancellor, was well treated by the Yorkist conquerors, though he stood for Henry in the Lancastrian resurgence before Barnet (1470)

Waynoka (wānō'ku), railroad town (pop 1,584), NW Okla , near the Cimarron river, settled c 1893, inc 1910 It has railroad repair shops

Wayzata (wīzē'tŭ, wīzā'tŭ, wāzē'tŭ), city (pop 1,473), E Minn., western suburb of Minneapolis It is a trade center and a resort on Lake Minnetonka

Waziristan (wŭzēr'ĭstăn"), mountainous region, North-West Frontier Prov , Pakistan Until recent years military expeditions were frequently dispatched to suppress its warlike population of Moslem Waziris

Wazzan (wazăn'), Fr. *Quezzane* (wĕzăn'), town (pop 23,509), French Morocco, NW of Fez It is a sacred city, the seat of an important Moslem brotherhood

Weald, the (wēld), area between the North Downs and the South Downs, England, forming part of the counties Sussex, Surrey, and Kent Formerly forested and once noted for its iron industry, the Weald is now largely an agricultural district

Wealdstone (wēld'stun), former urban district (1931 pop 27,019), since 1934 part of Harrow, Middlesex, England, NW of London Its manufactures include glassware, paint brushes, and cameras

wealth, goods possessing economic VALUE Wealth may be measured by price It does not include such necessaries of life as air, sunlight, and water when these are free, and it does not include unmarketable human qualities National wealth may include the value of all things within a nation's boundaries or the value of all things within and outside the country that are owned by its citizens Surplus wealth is wealth not required for the satisfaction of wants See J A Hobson, *Work and Wealth* (1914), W A Robson, *The Relation of Wealth to Welfare* (1925), Frederick Soddy, *Wealth, Virtual Wealth, and Debt* (2d ed , 1933)

weapon, instrument of offense or defense used to kill or injure an enemy or to destroy his fortifications and means of resistance or attack In his development of weapons, man has sought to increase their destructiveness and effective range and to combine these improvements with increased mobility and better protection (armor) for the users of the weapons These goals of armament, however, are often contradictory, and the desired improvement in one aspect of a weapon can often be achieved only by abandoning one or more of the other ideals For early man a stone held in the hand increased the force of his blow, while the use of a heavy club, acting as an extension of his arm, increased the effective range, a hand-thrown stone (and later the sling shot) further increased range, but only at some sacrifice in accuracy During early military history weapons changed slowly, the Persian invaders of Greece (480 B C) were equipped with flint-tipped arrows, wooden javelins, and slings In the same period bronze spears, arrow tips, and swords were introduced Body armor of the same metal was developed to deflect these penetrating weapons The use of cavalry and chariots was well known, and these were used for increased mobility The famed phalanx of the Macedonians was composed of infantry armed with the *sarissa*, a pike 24 ft. long When grouped for battle, the phalanx presented a virtual wall of pike points to the enemy, for the length of the *sarissa* permitted the points of the weapons of the sixth rank of troops to strike out beyond the first row of the phalanx The early Greeks used ballistae and catapults in besieging cities They also introduced chemical warfare (Greek fire) The Roman legions introduced the iron sword to replace the softer, easily blunted bronze sword The Romans also used throwing spears and iron body armor and further developed siege artillery. The fall of the Roman Empire was accompanied by the downfall of Roman weapons. The victory of the Goths at Adrianople (A.D 378) marked the rise to dominance of light cavalry, fighting with such weapons as arrows, spears, and axes As the longbow, the crossbow, and the halberd (a combination of axe and pike) became effective against it, cavalry turned to heavier armor. In the Middle Ages, knights in complete suits of armor fought with lances and long swords having rounded ends that made them useful only for hacking at the enemy. The weapons of the SIEGE, such as the ram, bore, penthouse, and various hurling machines, were basically those of earlier times, with some improvements. The discovery of the propulsive force of gunpowder revolutionized armament. Field artillery was introduced by Dutch artisans in the early 14th cent. Early cannon were muzzle-loading and fuse-firing; they shot stone projectiles Cannon were steadily improved, and by the 17th cent Gustavus II (Gustavus Adolphus) made them a valuable weapon by increasing their mobility and standardizing their calibers. Later, shells charged with explosives were introduced. The first practical firearm was the harquebus of the 16th cent , which could fire some 200 or 300 yds This weapon in the hands of infantry was capable of penetrating the heaviest suit of armor and destroyed the advantage held by mounted knights, who considered the use of firearms a crime against the laws of civilized warfare, they often hanged prisoners found armed with harquebuses In the middle of the 16th cent. the musket, capable of firing 400 yd , was introduced by the Spanish. Until the invention of the rifle it remained the chief infantry arm The long and intricate reloading of a musket made necessary supporting pikemen to protect the musketeers from charging cavalry The bayonet was developed to provide the musketeer with his own weapon of defense The pistol provided cavalry with an effective weapon of short range against the pikemen In the late 18th cent the rifle was introduced and in the 19th cent. became the standard infantry firearm, later supplemented by automatic rifles and machine guns The pistol was replaced by revolvers and automatic pistols. Artillery developed manifold pieces—heavy howitzers, mortars, gigantic naval artillery, and, in the 20th cent , antiaircraft guns and antitank guns Naval armament and maneuverability progressed apace with the military In addition, the submarine was made practical, firing a self-propelling underwater torpedo, it had no counterpart in land warfare The tank, introduced in the First World War, became an important weapon in the Second World War, serving as highly mobile, well-armored artillery To penetrate the tank's armor, rocket projectiles were introduced as infantry weapons Of minor importance in the First World War, the airplane played a major role in the Second World War Fast, highly maneuverable fighter planes, equipped with machine guns, bombs, and rockets, supported infantry as highly mobile artillery, intercepted enemy bombing planes, and protected friendly bombers which were used to deliver devastating blows to the civilian population and war industries of the enemy Robot bombs (pilotless flying bombs propelled by jet or rocket engines) were used by the Germans toward the end of the war The development by the United States of the atomic bomb has, perhaps, introduced a new era of weapons and warfare Post-war research and developments by various nations have centered about more heavily armed and armored tanks, aircraft of increased speed, size, and range, robot missiles, guided from a home base by radio signals, and a more devastating atomic bomb, relying on the nuclear fission of hydrogen atoms for its explosive power See STRATEGY AND TACTICS and articles on particular weapons See J R Newman, *The Tools of War* (1942), Lynn Montross, *War through the Ages* (rev ed , 1946)

Wear (wēr), river rising in W Durham, England, and flowing 65 mi to the North Sea at Sunderland

Weare (wâr), town (pop 1,367), S N H , SW of Concord, granted 1735, regranted 1749, inc 1764 There is an 18th-century Friends' meetinghouse

weasel (wē'zŭl), small, lithe, carnivorous animal of the genus *Mustela*, which includes the European STOAT Weasels are found in Europe, Asia, and North America There are at least 36 species and subspecies In summer they are various shades of brown above and are white below By a process of molting those living in regions of snow usually become all white in winter except for the dark tail and are then called ERMINE. The weasel is a bold, savage hunter, preying chiefly on small mammals, sometimes on birds, frequently killing more than it needs for food It is less destructive to poultry than the rat, which it helps to exterminate It secretes a strong-smelling musk. It can be tamed and makes an interesting pet.

weather, state of the atmosphere, at a given time and place, with regard to temperature, barometric pressure (see BAROMETER), WIND, HUMIDITY, CLOUD formation, and precipitation. Earliest evidence of scientific activity in the field of METEOROLOGY dates back to the 5th cent. B.C., in the 4th cent. B.C Aristotle wrote what was probably the first treatise on the subject. The ALMANAC is a record of man's efforts to explain and predict the weather. The first attempt to chart weather from reports over a considerable area was made in Europe by H. W. Brandes (1820), but it was not until after the in-

vention of the telegraph that the rapid collection of weather data from remote stations became possible. In the United States, a government weather service was established (1870) under the Signal Corps. In 1891 (by act of Oct. 1, 1890) the weather service was transferred to the U S. Weather Bureau under the Dept of Agriculture and was subsequently transferred (1940) to the Dept of Commerce The central offices of the Weather Bureau are in Washington, D C , over 200 first-order stations are mainly in the larger cities; and numerous substations for special purposes (e g , observation of river stages, measuring depth of snow, maintaining records of CLIMATE) are well distributed throughout the country A daily weather map of the United States, which is drawn at the central offices and at many of the first-class stations, is based upon simultaneous weather observations made throughout the country On a typical map, the various weather elements (e g , temperature, pressure, clouds) at each station are shown by figures and symbols; ISOBARS are drawn revealing the location of areas of low pressure (cyclones) and areas of high pressure (anticyclones), fronts (lines showing the boundaries of separation between warm and cold air masses) are indicated, and areas of precipitation are shaded In addition to the regular weather map showing ground-level conditions, auxiliary charts are often prepared showing conditions in the upper air Since the forces that control weather are not fully understood, it is impossible to set down specific rules for weather forecasting Accurate weather prediction is born of experience—knowing what changes in existing weather to expect as a result of certain changes in the weather-map pattern Consideration is first given to the location of areas of high and low pressure, their magnitude, intensity (indicated by the spacing of the isobars), and speed and direction of travel Properties of the air masses involved, such as their temperature and moisture content, are taken into account Finally, the local influences of topography, proximity to large bodies of water, and other factors are evaluated Forecasts are distributed by radio, telegraph, and telephone as well as by mail and newspaper publication A signal-flag system is used along the coasts to announce storm warnings Specific forecasts can be made scientifically only for a short future period (usually 48 hr or less), long-range predictions are necessarily more general, being based upon the known normal, or average weather, of the area The long-range "prognostications" published in almanacs, based on the relative positions of the celestial bodies, are verified only by chance, there is no evidence or reasonable basis to justify the opinion that the moon or planets have any influence on the earth's weather Certain plants and animals are responsive to existing weather influences but furnish no indication of future weather The ground-hog legend is a widely known example of a scientifically baseless method of prediction There is a wealth of curious and interesting proverbs and signs relating to the weather in the lore of all peoples See W J Humphreys, *Weather Proverbs and Paradoxes* (1934) and *Ways of the Weather* (1942), I R Tannehill, *Weather around the World* (1943), B C Haynes, *Techniques of Observing the Weather* (1947), T A Blair, *Weather Elements* (3d ed , 1948), H H Neuberger and F B Stephens, *Weather and Man* (1948), S W C Pack, *Weather Forecasting* (1948)

Weatherford, William, c 1780–1824, Indian chief, b present Alabama He is also called Red Eagle In the War of 1812 he led the Creek war party, stirred by TECUMSEH, against the Americans On Aug 30, 1813, he attacked Fort Mims, a temporary stockade near the confluence of the Tombigbee and Alabama rivers, where his warriors, refusing to heed his plea for restraint, massacred over 500 whites In the battle of Horseshoe Bend on the Tallapoosa river (March 29, 1814), Gen Andrew Jackson completely broke the power of Weatherford and his nation Jackson, who admired his courage, pardoned him, and Weatherford lived peaceably in Alabama until his death

Weatherford 1 City (pop 2,504), W central Okla , W of Oklahoma City; founded 1893 It is a farm trade center and the seat of a state teachers college Near by is an Indian hospital 2 City (1940 pop 5,924, 1947 estimated pop 8,500), co seat of Parker co , N Texas, W of Fort Worth; founded 1856 The productive truck-growing region is noted for its watermelons, but peaches and other fruits, vegetables, peanuts, cotton, and grains are grown profitably The trim little city has processing plants and small industries There is a junior college, and the Knights of Pythias support a children's home here

weathering, collective term for the processes by which rock at or near the earth's surface is disintegrated and decomposed by the action of atmospheric agents. Some of these processes are mechanical, e.g., expansion and contraction caused by sudden changes in temperature, the expansive force of water freezing in cracks, splitting by trees, and impact of running water, others are chemical, e.g., oxidation, hydration, carbonisation, and loss of chemical elements by solution in water. Weathering is important because it aids in the formation of soil, prepares materials for EROSION, and causes discoloration and weakening of building stone.

Weatherly, borough (pop. 2,754), E Pa , E of Hazleton and S of Wilkes-Barre, inc 1863.

weather map: see WEATHER.

Weathersfield, town (pop 1,075), SE Vt , on the Connecticut and S of Windsor It includes Perkinsville village (pop 144, inc 1928) and the hamlets Ascutney (near Mt Ascutney) and Weathersfield It was settled c 1775–1780 and flourished with the development of farming and sheep raising

Weaver, James Baird, 1833–1912, American political leader, b. Dayton, Ohio, grad Cincinnati Law School, 1856. He was reared in frontier areas of Michigan and Iowa, and he practiced law in Iowa He served in the Union army in the Civil War and rose from the rank of private to that of brevet brigadier general. He held several offices in Iowa before he adopted the cause of reform and was elected (1878) to the U S House of Representatives on the Greenback party ticket In 1880 he was the presidential candidate of the Greenback party, but met with defeat Again (1885–89) in Congress with the backing of the Democratic and the Greenback-Labor parties, Weaver continued to advocate "soft-money" views He helped form the Farmers' Alliance—an agrarian reform movement—and when that organization became the POPULIST PARTY, Weaver ran (1892) as its presidential candidate He recorded his political views in *A Call to Action* (1892) Although defeated, he polled 1,000,000 popular and 22 electoral votes Weaver became one of the important leaders of the free-silver movement, backed W J Bryan in the 1896 presidential campaign, and after the decline of Populism retired from national politics See biography by F E Haynes (1919)

Weaver, John Ernst, 1884–, American botanist, b Villisca, Iowa, grad Univ of Nebraska (B S , 1909), Ph D Univ of Minnesota, 1916 He became professor of plant ecology at the Univ of Nebraska in 1917 and served also as research associate in ecology at the Carnegie Institution, Washington, D C , from 1925 to 1931 Among his many publications are *The Ecological Relations of Roots* (1919), *Root Development in the Grassland Formation* (1920), and *Root Development of Field Crops* (1926) Weaver is co-author of *Root Development of Vegetable Crops* (with W E Bruner, 1927) and *Plant Ecology* (with F E Clements, 1929, 2d ed , 1938)

weaver bird, Old World family of birds which build intricately woven nests The birds resemble the finch family and are sometimes called weaver finches The English sparrow and such cage birds as the Java sparrow and the strawberry finch belong to this family The sociable weavers of Africa build in a tree a large dome-shaped nesting place which colonies of the birds use

weaving, the art of forming a fabric by interlacing at right angles two or more sets of yarn or other material It is one of the most ancient fundamental arts In the tombs and ruins of Egypt and Peru, among cliff and lake dwellers' relics, and in the most ancient picture records are found the tools, materials, and story of textile craftsmanship from the remotest ages The earliest literatures make frequent mention of the products of the loom In primitive cultures the craft was practiced mainly by women Although weaving sprang up independently in different parts of the world and was early known in Europe, its high development there in the Middle Ages was brought about by Eastern influences operating through Moslem and Byzantine channels of culture Byzantium became a center of SILK weaving in the 6th cent In the 9th cent Greece, Italy, and Spain became proficient In Flanders a high degree of skill was attained by the 10th cent , especially in the weaving of wool Flemish weavers brought to England by William the Conqueror and by Queen Elizabeth gave a great impetus to the craft there, and Lancashire became an important center TAPESTRY weaving was brought to a high art in France In colonial America weaving was a household industry allied with agriculture The 18th-century weaving and spinning inventions marked the transition from the old era of domestic craftsmanship to the tremendous organized industry of today The factory system of machine weaving produces quantities of standardized material for mass consumption, the result is a loss of the distinctive elements of quality and design Some of the finest silks, velvets, table linens, and carpets are still woven on hand looms The first step in weaving is to stretch the warp, or longitudinal, yarns, which must be very strong The weft, woof, or filling crosses the warp, binding the warp threads at either side to form the selvage. The three essential steps after the warp is stretched are· shedding, or raising every alternate warp yarn or set of yarns to receive the weft, picking, or inserting the weft, battening, or pressing home the weft to make the fabric compact In most primitive weaving these operations were performed by the hands alone, as in making rush mats and baskets Gradually frames for holding the warp evenly stretched and devices for throwing the weft came into use (see LOOM) Woven fabrics are classified as to weave or structure according to the manner in which warp and weft cross each other The three fundamental weaves, of which others are variations, are the plain, twill, and satin. In plain weave, also known as calico, tabby, taffeta, or homespun weaves, the weft passes over alternate warp threads, requiring two harnesses only The relatively simple construction suits it to cheap fabrics, heavy yarns, and printed designs Variations are produced by the use of groups of yarns, as in basket weave and monk's cloth, or by alternating fine and coarse yarns to make ribbed and corded fabrics, as the warp-ribbed Bedford cord, piqué, and dimity and the weft-ribbed poplin, rep, and grosgrain The second primary weave, twill, shows a diagonal design made by causing weft threads to interlace two to four warp threads, moving a step to right or left on each pick and capable of variations, as herringbone and corkscrew designs Noted for their firm, close weave, twill fabrics include gabardine, serge, drill, and denim Satin weave has floating or overshot warp threads on the surface which reflect light, giving a characteristic luster When the uncrossed threads are in the weft, the weave is called sateen Pile fabrics have an additional set of yarns drawn over wires to form loops, and may be cut or uncut Warp-pile fabrics include terry and plush, weft-pile, velveteen and corduroy In double-cloth weave two cloths are woven at once, each with its warp and filling threads, and combined by interlacing some yarns or by adding a fifth set The cloth may be made for extra warmth or strength, to permit use of a cheaper back, or to produce a different pattern or weave on each surface, e g , steamer rugs, heavy overcoating, machine belting VELVET is commonly woven as a double cloth In swivel weaving, extra shuttles with a circular motion insert filling yarns to form simple decorations, as the dots on swiss muslin Figure weaves are made by causing warp and weft to intersect in varied groups Simple geometric designs may be woven on machine looms by using a cam or a dobby attachment to operate the harnesses For curves and large figures each heddle must be separately governed The Jacquard loom attachment permits machine weaving of the most complicated designs See M S Woolman and E E B McGowan, *Textiles* (3d ed , 1943), M D Potter, *Fiber to Fabric* (1945)

Webb, Sir Aston, 1849–1930, English architect His London works include a new façade for Buckingham Palace and the architectural ensemble for the Queen Victoria Memorial there, new buildings for the Victoria and Albert Museum as well as for other institutions at South Kensington, the Admiralty Arch, and the restoration of the Church of St Bartholomew the Great With Ingress Bell he designed the Univ of Birmingham and the Birmingham assize courts He was knighted in 1904 He served as president of the Architectural Association (1884), of the Royal Institute of British Architects (1902–4), and of the Royal Academy of Arts (1919–25)

Webb, Beatrice Potter, 1858–1943, English socialist economist, daughter of a wealthy industrialist She took an early interest in social problems and worked with Charles Booth on his survey of London Her *Cooperative Movement in Great Britain* was published in 1891 In 1892 she married **Sidney James Webb,** 1859–1947, a civil servant and a contributor to *Fabian Essays* (1890) Thereafter they worked together, complementing each other's qualities in an unusual partnership They were of first importance in the Fabian Society and in the building up of the British Labour party Most of the political and social reforms of their period owe much to their indefatigable research and political acumen Together they produced *The History of Trade Unionism* (1894), *Industrial Democracy* (1897), *English Local Government* (6 vols , 1906–22), *Consumers' Cooperative Movement* (1921), and *Soviet Communism a New Civilization?* (1935) In 1922 Webb was elected to Parliament and in 1929 was appointed secretary of state in MacDonald's cabinet, in the same year he was created Baron Passfield, a title his wife refused to share See Beatrice Webb's autobiographical *My Apprenticeship* (1926) and *Our Partnership* (1948), biographies of her by M A Hamilton (1933) and Margaret Cole (1945)

Webb, James Watson, 1802–84, American journalist and diplomat, b Columbia co , N Y After serving (1819–27) in the army, he returned to New York and edited the combined *Morning Courier and New York Enquirer*—an organ of the Whig party In the 1830s, to meet journalistic competition, Webb sent schooners far out to sea for incoming news and established express service by horse to hasten news from Washington. He achieved considerable prominence in politics, and he served (1861–69) as minister to Brazil Meanwhile his friendship with Napoleon III helped in securing the withdrawal (1867) of French troops from Mexico

Webb, Mary (Meredith), 1881–1927, English novelist. Her native Shropshire is the scene of all her novels, which are somber and passionate and infused with an intense feeling for the countryside Her work was little known in her lifetime, but her fame has grown Her first novel was *The Golden Arrow* (1916), the two best known are *Gone to Earth* (1917) and especially *Precious Bane* (1924) Her volume of *Poems*, published posthumously in 1928, contains the essay *The Spring of Joy* (1917) An anthology of her writings was published in 1940 See biographies by Hilda Addison (1931) and Thomas Moult (1932).

Webb, Philip Speakman, 1830–1915, English architect His influence, together with that of R N Shaw and W E Nesfield, established after the mid-19th cent a revival of residential architecture based upon the Queen Anne and Georgian styles and upon the use of materials for their own artistic values He became the assistant of G E Street, and he was an intimate friend and supporter of the aesthetic creeds of William Morris Webb's first commission was the historic Red House, Bexley Heath built (1859) for Morris in which the theories of both owner and architect received their practical crystallization Its planning and specially designed furnishings led to the establishment (1861) of Morris's celebrated decorating business the firm of Morris, Marshall, Faulkner, and Company, important in the development of the arts and crafts movement Webb was one of the six members of this firm, and for it he designed furniture, tiles, and stained glass Additional designs by Webb were Lord Carlisle's house, Kensington, "Clouds," near Salisbury, and offices at Lincoln's Inn Fields

Webb, Sidney James. see WEBB, BEATRICE POTTER,

Webb City, city (pop 7,033), SW Mo , near Joplin in a farm region, platted 1875 Dairy products, shoes, and garments are made

Webber, Herbert John, 1865–1946, American plant physiologist, b Lawton, Mich , grad Univ of Nebraska (B S , 1889), Ph D Washington Univ , 1901 After serving (1899–1907) with the U S Dept of Agriculture, he was from 1912 to 1936 affiliated with the Univ of California in various capacities, including professor of plant breeding and of subtropical horticulture and director of the citrus experiment station and the agricultural experiment station His work in plant breeding includes the improvement of oranges, cotton, corn, pineapples, timothy, and potatoes

Weber, Carl Maria Friedrich Ernst von (frē'drĭkh ĕrnst' fŭn vā'bur), 1786–1826, German composer and pianist, pupil of Abbé' Vogler and Michael Haydn He made his debut as a pianist at 13 and began to compose about the same time He was conductor of opera at Breslau (1804–6), Prague (1813–16), and Dresden (1816–26) At 20 his singing voice was ruined when, by mistake, he drank nitric acid Employing nationalistic elements and the supernatural, he laid the foundation of the German romantic opera Of his 10 operas, *Der Freischütz* (1821), *Die drei Pintos* (1821, completed by Mahler), and *Oberon* (1826) stand out *Euryanthe* (1823), a failure, is the only one of his operas without spoken dialogue, a landmark in the history of German opera His instrumental works, including *Invitation to the Dance* (1819), for piano, and the *Concertstück* for piano and orchestra (1821), are mostly in a virtuoso style He composed also three Masses, much incidental dramatic music, and many songs See biographies by William Saunders (1940) and L P Stebbins and; R P Stebbins (1940)

Weber, Ernst Heinrich (ĕrnst' hĭn'rĭkh vā'bur), 1795–1878, German physiologist He was a professor at the Univ of Leipzig (1821–71) and is known for his work on touch and for the formulation of Weber's law—that the increase in stimulus necessary to produce an increase in sensation is not fixed but depends on the strength of the preceding stimulus With his brother Eduard Friedrich Weber (1806–71) he discovered the inhibitory power of the vagus nerve (1845) With another brother, W E WEBER, he made studies of acoustics and wave motion

Weber, Joseph (wē'bur), 1867–1942, American comedian and theatrical manager, b New York city He began his career with Lew Fields in "Dutch" sketches in 1875 The team made appearances at the Chatham Square Museum, New York, in 1878 and in 1894 were a great success at Hammerstein's Olympia In chin whiskers, loud check clothes, and low crown derbies, they established themselves as beloved by generations with dialect jokes, slapstick antics, and burlesques of popular plays From 1895 to 1904, they managed the Broadway Music Hall. Here, in addition to their own performances, they presented such stars as Lillian Russell, DeWolf Hopper, Fay Templeton, and David Warfield A quarrel separated them in 1904, but they resumed their partnership in 1912 and made many appearances in vaudeville and revues

Weber, Max (mäks' vā'bur), 1864–1920, German sociologist. At various times he taught at Freiburg, Munich, and Heidelberg Although often ill and unable to write, he produced a very large body of work. One of Weber's chief interests was in developing a methodology for social science. He argued that social science, unlike physical science, was not limited to formulating laws of behavior but had also to determine the meanings which men attributed to their acts He opposed the Marxian view that economics is the sole factor in social causation and stressed the plurality and interdependence of causes Thus, in his *Protestant Ethic and the Spirit of Capitalism* (1920, Eng tr , 1930) he developed a thesis concerning the intimate connection between the ascetic character which Calvinism fostered and the rise of capitalist institutions Weber's political views underwent considerable change Early an admirer of Bismark and of authoritarianism, he later favored responsible government somewhat on the American model Among his books are *Wirtschaft und Gesellschaft* [economy and society] (2d ed , 1925) and *General Economic History* (1924, Eng tr , 1927) See *From Max Weber Essays in Sociology* (with a biography and appraisal by H. H Gerth and C. Wright Mills, 1946)

Weber, Max (wē'bur), 1881–, American painter, b Russia At 10 he accompanied his family to Brooklyn, N Y He studied art at Pratt Institute and served as instructor in various schools From 1903 to 1905 he taught drawing and manual training at the state normal school, Duluth, Minn In 1905 he went abroad and studied at Julien's academy in Paris under J P Laurens, later visiting Spain and Italy In Paris he first felt the influence of Cézanne and Matisse and won the friendship of Henri Rousseau In 1908 he returned to New York and for about 20 years alternated painting with teaching After 1927 he devoted himself wholly to painting Much of Weber's work shows a modern use of primitive art conventions For a time he was absorbed in abstractions, but his later work is naturalistic, albeit with free distortion, and always highly personal. His color is subtle and his composition complex and highly organized Weber is represented in leading galleries throughout the United States He is the author of several essays on art theory See study by Lloyd Goodrich (1949)

Weber, Wilhelm Eduard (vĭl'hĕlm ā'dōōart vā'bur), 1804–91, German physicist He was professor (1831–37, 1849–91) at the Univ. of Göttingen, where he worked with K F Gauss on terrestrial magnetism and devised an electromagnetic telegraph He also did valuable work on electrical measurements (the coulomb was once known as the weber) With a brother, E H WEBER, he wrote (1825) a book on wave motion, with another brother, E F Weber, he made a study of human locomotion.

Weber (wē'bur), river rising in N central Utah in the Uinta Mts and flowing north and northwest to join the Ogden at Ogden The combined stream flows to Great Salt Lake The Weber has long been used for irrigation, and Echo Dam, completed by the Bureau of Reclamation in 1931, controls flow for irrigation Water is also diverted to the Provo river project The river flows in part of its course through deep-cut canyons

Webern, Anton von (an'tōn fŭn vā'burn), 1883–1945, Austrian composer and conductor, Ph D Univ of Vienna, 1906, pupil of Arnold Schonberg He conducted theater orchestras in Prague and various German cities His first composition, a *passacaglia* for orchestra (1908), was followed by numerous works in which he showed himself to be the most thoroughgoing adherent to the 12-tone technique (see ATONALITY) of Schonberg In his very short *Five Pieces for Orchestra* (1911–13), the whole containing only 76 measures, the melodic line is divided among the several instruments, giving the counterpart in texture of the 12-tone melodic line In addition to his works for a small orchestra, in which his scoring is for unusual combinations of instruments, he wrote numerous songs, some of them settings of the poetry of Rilke and Stefan George, and some instrumental music His only symphony, for chamber orchestra, was performed in New York in 1929

Webster, Daniel, 1782–1852, American statesman, lawyer, and orator, b. near Franklin, Merrimack co , N H , grad Dartmouth, 1801 He studied law in Salisbury, N H , and later, after an interval as a schoolmaster, was admitted (1805) to the bar. Webster practiced law at Boscawen and Portsmouth, N H , and rapidly gravitated toward politics As a Federalist and a defender of the New England shipping interests, Webster sat (1813–17) in the U.S House of Representatives, where he opposed the Democratic administration, although he did not join forces with members of the HARTFORD CONVENTION In 1816 he transferred his residence to Boston. Before he was returned (1822) to the House, Webster won fame as a lawyer, defending (1819) his alma mater in the DARTMOUTH COLLEGE CASE and the Bank of the United States in MCCULLOCH VS. MARYLAND. Again a representative (1823–27), Webster began to gain repute as one of the greatest orators of his time, his brilliant speeches in Congress were matched by his eloquent public addresses—notably the Plymouth address (1820), the two Bunker Hill orations (1825, 1843), and the speech (1826) on the deaths of Thomas Jefferson and John Adams. As a U S Senator (1827–41), he became a leading political figure of the United States. He supported the Tariff of 1828, and his belief in the strength of the Federal government led him to back President Andrew Jackson in the issue of NULLIFICATION In 1830 he defended the supremacy of the Union in the famous debate with Robert Y HAYNE Nevertheless, Webster vehemently disagreed with Jackson on numerous issues, notably his fiscal policies, and he and Henry CLAY became leaders of the WHIG PARTY. In 1836 Webster was put forward as a presidential candidate by the Whig groups in New England and won only the electoral vote of Massachusetts, his prominence brought him into consideration in later elections, but he never attained his ambition After William H. HARRISON was elected (1840) President on the Whig ticket, Webster was appointed (1841) U S Secretary of State Though every other cabinet officer resigned (1841) after John Tyler had succeeded to the presidency and had broken with the Whig leaders, Webster remained at his post He completed the settlement of the WEBSTER-ASHBURTON TREATY and resigned in 1843 Again (1845–50) in the Senate, Webster opposed the annexation of Texas and war with Mexico and faced the rising tide of sectionalism with his customary stand slavery was an evil, but disunion was a greater one He steadily lost his following and was sorely disappointed when the Whig party nominated Zachary Taylor for President in 1848 Cherishing the preservation of the Union above his own popularity, Webster, in one of his most notable speeches, backed the COMPROMISE OF 1850 and was reviled by anti-slavery groups in the North and by members of his own party He served (1850-52) again as Secretary of State under President Millard Fillmore and championed the right of the U S government to recognize the new Hungarian republic and other popular governments His writings (18 vols , 1903) were edited by J W McIntyre See biographies by G T Curtis (1869), S G Fischer (1911), C M Fuess (1930), and J B McMaster (1939) The diary kept by his second wife, Caroline Le Roy Webster, was published as *Mr W & I* (1942)

Webster, John, 1580?–1625?, English playwright Of his life little is known save that he was one of the group of hack dramatists in the service of Philip Henslowe, the theatrical manager He collaborated with Munday, MARSTON, Drayton, Middleton, Henry Chettle, Rowley, Heywood, and especially Dekker, with whom he produced *Westward Ho!* (1604) and *Northward Ho!* (1605). Webster is remembered chiefly for two tragedies, *The White Devil* (1612) and *The Duchess of Malfi* (c 1614), both of which exemplify his high-sounding language and profound understanding of human nature Webster's other plays include *The Devil's Law Case* (1620), a tragicomedy, and two collaborations, *Appius and Virginia* (with Heywood, probably written c 1625) and *A Cure for a Cuckold* (with Rowley and Heywood, pub 1661) Lamb was the first critic to recognize Webster's genius, and modern opinion places him high in the ranks of Elizabethan dramatists See his works (ed by F L Lucas, 1937), E P Pierce, *The Collaboration of Webster and Dekker* (1909), Rupert Brooke, *John Webster and the Elizabethan Drama* (1916)

Webster, Noah, 1758–1843, American lexicographer, b West Hartford, Conn , grad Yale, 1778 He served in the American Revolution, was admitted to the bar in 1781, and practiced law in Hartford His *Grammatical Institute of the English Language*, in three parts (1783–85), was the first of a list of publications which made him for many years the chief American authority on English The first part, often revised, became his famous *Elementary Spelling Book*, or "Blue-backed Speller," with which he hoped to standardize American spelling and to inculcate both morals and patriotism Pioneer families on the frontiers taught their children to read from it, in the schools it was a basic textbook, and in settlements and villages its lists were read out for lively spelling matches By 1850, when the total population of the United States was less than 23,200,000, the annual sales of this spelling book were about 1,000,000 copies, and the figures increased yearly The difficulty of copyrighting his works in 13 states led him to agitate for national copyright laws in 1782 and to continue for more than 50 years thereafter. He became a pamphleteer for centralized government and regarded his *Sketches on American Policy* (1785) as the first proposal for a constitution. In 1793 he left Hartford to support Washington's administration by editing the *American Minerva* (later the *Commercial Advertiser*) in New York. He was also writing valuable studies of the weather, the plague, and American history. During most of his later life he lived in New Haven, Conn , or Amherst, Mass., and was a member of the first board of trustees of Amherst College. Deriving his income from his schoolbooks, he devoted himself to compiling a dic-

tionary. From the time his *Compendious Dictionary* was published in 1806, he worked on another which would be more satisfactory to him. This, his greatest work, was the *American Dictionary of the English Language* (1828), which included 12,000 words not in any other dictionary, many of them nonliterary words Its definitions were excellent, and its sales, reaching 300,000 annually, indicate that it may have helped standardize American pronunciation Webster completed the revision of 1840, and the dictionary has since been revised many times Abridged editions have also been published. See biography by H E Scudder (1881), studies by E C. Shoemaker (1936) and H. R. Warfel (1936)

Webster, Pelatiah, 1725–95, American writer, b Lebanon, Conn A businessman of Philadelphia, he is remembered for his advocacy of a revision of the Articles of Confederation by creating a new constitution in his *Dissertation of the Political Union and Constitution of the Thirteen United States of North America* (1783) He is, therefore, sometimes considered as the originator of the Constitution, though his plan was unlike the product of the Federal Convention He was a Federalist in the fight for ratification of the Constitution and his able arguments, based on constitutional and economic principles, were of great weight. He also wrote many books on economics

Webster. 1 Town (pop 1,236), SW Maine, E of Lewiston, settled 1774, set off from Lisbon and inc 1840 2 Town (pop 13,186), S Mass , near the Conn line, settled c 1713, set off from Dudley and Oxford 1832 It has woolen mills 3 Village (pop 1,680), W N Y , near Lake Ontario NE of Rochester, in a truck-farm area, inc 1905 Caskets and canned goods are produced 4 City (pop 2,173), co seat of Day co , NE S Dak , NNW of Watertown, platted 1880. It is a trade center in a farm and lake region

Webster-Ashburton Treaty, concluded in 1842 by the United States, represented by Secretary of State Daniel WEBSTER, and Great Britain, represented by Commissioner Alexander B ASHBURTON The treaty brought settlement to the disputed boundary of the NE United States The boundary question caused serious conflicts (e g , the AROOSTOOK WAR Over 7,000 sq mi of the disputed area including the Aroostook valley, was given to the United States, and the St Johns river was opened to free navigation by both countries The Webster-Ashburton Treaty also settled the disputed position of the U S –Canada border in the Great Lakes region Other clauses provided for cooperation in the suppression of the slave trade and for mutual extradition of criminals Some disputes between the United States and England, notably the one concerning the Oregon boundary, were ignored, but the treaty served as a precedent in peaceful settlements of disputes between the two countries

Webster City, city (pop 6,738), co seat of Hamilton co , central Iowa, on the Boone and E of Fort Dodge, settled 1850, inc 1874 It is an industrial city and trade center, grain machinery and dairy products are made One of its parks includes a pioneer museum

Webster Groves, city (pop 18,394), E Mo , near St Louis, settled 1854, inc 1896 Petroleum byproducts are made here It is the seat of Webster College (a corporate college of St Louis Univ ; for women) and of Eden Theological Seminary (Evangelical-Reformed, coeducational)

Webster Springs, town (pop 1,133), co seat of Webster co , E central W Va , SW of Elkins, in a farm, mining, and timber area, settled 1860 It was incorporated in 1892 as Addison, still its official name, but is better known as Webster Springs. It is a center for sportsmen

Weddell Sea (wĕ'dul), embayment of the S Atlantic, ANTARCTICA, SSE of South America It is bordered by Palmer Peninsula, Leopold Coast (formerly Luitpold Land), Caird Coast, and Coats Land The sea is named for James Weddell, British navigator, who claimed to have discovered it in 1823, it was investigated by William S. BRUCE on his expedition of 1902–4

Wedekind, Frank (frängk' vā'dukĭnt), 1864–1918, German dramatist. He was a journalist and publicist and was on the staff of *Simplicissimus* A forerunner of the expressionists, he wrote dramas and tragedies in which he advocated a new sex morality and criticized social convention. His works, characterized by satirical humor and grotesque episodes, include *Frühlings Erwachen* (1891, Eng tr , *The Awakening of Spring*, 1909), *Der Erdgeist* (1895, Eng tr., *Earth Spirit*, 1914), *Der Kammersänger* (1899, Eng tr., *Heart of a Tenor*, 1913), and *Der Büchse der Pandora* (1903; Eng. tr., *Pandora's Box*, 1918)

Wedemeyer, Albert Coady (wĕ'dĕmī'ur), 1897–, American general, b. Omaha, Nebr , grad West Point, 1918 After service in China, the Philippines, and Europe, he was graduated (1936) from the general staff school and was sent to the German general staff school. In the Second World War he was (1941–43) a member of the war-plans division of the general staff and in 1944 was named to succeed Stilwell as commander of the U S forces in China Promoted (1945) lieutenant general, Wedemeyer made (1947) a survey of China and Korea for President Harry S. Truman and was named (1949) commander of the U S. 6th Army

wedge, piece of wood or metal thick at one end and sloping to a thin edge at the other, an application of the INCLINED PLANE It is employed in separating two bodies from each other or in separating one part of a solid body from an adjoining part, as in splitting wood The thin edge is applied to the surface of the solid or to the crack between two solids, and force is applied to the opposite thick edge The ax, chisel, knife, nail, and carpenter's plane are forms of wedges The CAM is a rotating form of wedge

Wedgeport, town (pop 1,327), SW N S , on the Tusket river near its mouth on the Atlantic and SE of Yarmouth It is a sports center, especially for tuna fishing. Until 1909 it was known as Tusket Wedge

Wedgwood, Josiah, 1730–95, English potter, descendant of a family of Staffordshire potters and perhaps the greatest of all potters At nine he went to work in the plant of his brother Thomas in Burslem, and in 1751, with a partner, he started in business In 1753 he joined Thomas Whieldon of Fenton, then one of the foremost potters of Staffordshire In 1759 Wedgwood started his own business at the Ivy House Works, Burslem He obtained a site near Stoke-upon-Trent, where he built a village, Etruria, for his workmen and there opened a new works in 1769 In that year he took into partnership Thomas Bentley, who remained a valuable ally until his death in 1780 At Etruria, Wedgwood specialized in ornamental products to supplement the utilitarian wares of Burslem Wedgwood entered the field of pottery at a time when it was still a backward and minor industry and by his skill, taste, and organizing abilities transformed it into one of great importance He combined with his experiments in his art an interest in improved roads, canals, schools, and living conditions for the workmen He soon acquired a reputation for his cream-colored earthenware, known as queen's ware, and at the same time produced decorative objects, candlesticks, and vases of a black composition known as basalt or Egyptian ware He also produced a mottled and veined ware in imitation of granite and a translucent, smooth, unglazed semiporcelain, which gave way to his most notable product, jasper ware (best known in a delicate blue with Greek figures in white embossed upon it, see PORTLAND VASE) He invented and perfected this ware and in it gave expression to the interest of his day in the revival of classic art He employed the best talent available for his finer pieces, many of which were designed by John Flaxman. His terra cottas of various hues were made with one color in relief upon another Wedgwood made a dinner service for Catherine the Great His work is found in many museums and private collections, the Fogg Museum of Art, Cambridge, Mass , has a collection He published several pamphlets, and his *Address to the Young Inhabitants of the Pottery* appeared in 1783 For his invention of a pyrometer for measuring temperatures Wedgwood was made (1783) a fellow of the Royal Society The extensive potteries he established have been perpetuated by his descendants See William Burton, *Josiah Wedgwood and His Pottery* (1922)

Wednesbury (wĕnz'burĭ, wĕj'–), municipal borough (1951 pop 31,531, 1947 estimated pop 34,310), Staffordshire, England, NW of Birmingham, in the Black Country The Perpendicular Church of St. Bartholomew is supposed to be on the site of a temple of Woden, whence, probably, the name Wodensbury, which became Wednesbury Æthelflæd built a castle here in 916. The borough is a steel center

Weed, Thurlow (thûr'lō), 1797–1882, American journalist and political leader, b Cairo, Greene co , N.Y He learned printing, served briefly in the War of 1812, and then worked on various newspapers in W New York While working for the Rochester *Telegraph*, Weed, a staunch opponent of the ALBANY REGENCY, became influential as an ally of John Quincy Adams For a short time he published the *Anti-Masonic Enquirer* and as a leader of the ANTI-MASONIC PARTY opposed Martin Van Buren He wielded much political influence as editor of the Albany *Evening Journal* after 1830. Weed became a power in the WHIG PARTY and in 1840 helped secure the election of William H Harrison as President In 1844 he helped bring about the presidential nomination of Henry Clay and in 1848 backed Zachary Taylor Though giving up service to various reforms, notably the abolition of slavery, Weed was more at home with the problems of patronage, lobbying, and "wire-pulling" and came to be regarded as the silent boss of the Whig party After the Whig party disintegrated over the slavery issue, Weed joined (1854) the new Republican party and worked in close cooperation with William H. SEWARD and, for a time, with Horace GREELEY Seward was his close personal friend as well as political ally, and Weed carefully shepherded Seward's career, having made him a state legislator, governor of New York, and U S Senator His failure to secure for Seward the Republican presidential nomination in 1860 grieved him deeply. Both Weed and Seward, however, after failing to dominate Lincoln, came to be the President's staunch supporters On a special diplomatic mission to England in the Civil War, Weed put to good use his "rare tact, shrewd judgment, and quick insight into men" In 1864 he established himself in New York city and returned to newspaper editing One of the handsomest and most distinguished politicians of his day, Weed was a genial, lovable man, but utterly unscrupulous in his political aims and methods For him, providing office for the cogs in his well-oiled machine (the most formidable up to that time in New York state) was the main objective of his party, Whig or Republican His travels were turned to account in his *Letters from Europe and the West Indies* (1866) See *The Life of Thurlow Weed* (2 vols , 1883–84, including his autobiography and a memoir by his grandson), B J Hendrick, *Lincoln's War Cabinet* (1946), G G Van Deusen, *Thurlow Weed Wizard of the Lobby* (1947)

Weed, Walter Harvey, 1862–1944, American geologist, b St Louis, Mo , grad Columbia, 1883 As geologist of the U S Geological Survey from 1883 to 1906, he surveyed Yellowstone Park (1883–89) and mapped Montana (1889–98) Later he surveyed the mines of Central America and Mexico He studied chiefly the geology of ore deposits and advanced an important theory of the formation of these He also traced the color of hot springs to the algae living in them and found that geyser deposits too are the result of algae His works include *Copper Mines of the World* (1908)

weed, popular name for any wild plant and especially for an undesired plant in cultivated ground Weeds beautify many waste places, help build soil, loosen tight soils, and help prevent erosion, but when introduced into cultivated soil by impure seed or by natural means (e g , carried by wind, water, and animals), they may crowd out the desired crop by appropriating space, sunlight, moisture, and soil chemicals Weeds harbor insect pests and often make their dissemination easier from one piece of land or crop to another Along roadsides weeds often help spread fires They are annual, biennial, or perennial Their habits of growth and spread must be considered when attempting to eradicate them Methods of control include soil cultivation, crop rotation, and use of chemicals A chemical known as 2,4-D (dichlorophenoxyacetic acid) is lethal to most broad-leaved plants but harmless to narrow-leaved plants such as grasses It is therefore useful when applied to lawns and grainfields Among the common weeds are quack grass, burdock, Canada thistle, tumbleweed, pigweed, and ragweed See W C Muenscher, *Weeds* (1935), E R Spencer, *Just Weeds* (1940), J M Fogg, Jr , *Weeds of Lawn and Garden* (1945)

Weedsport, village (pop 1,341), W central N Y , on the Barge Canal and W of Syracuse, in a farm area, inc 1831 It has a typewriter factory

Weehawken (wē'hôkun, wēhô'kun), township (pop 14,363), NE N J , on the Hudson and N of Hoboken, at the terminus of the Lincoln Tunnel, inc 1859 "Highwood," the James Gore King estate, was the scene in 1804 of the duel between Aaron Burr and Alexander Hamilton, a bronze bust of Hamilton, who was fatally wounded, marks the site

week, period of time shorter than the month, commonly seven days The ancient Egyptians used a 10-day period, as did the French under the short-lived French Revolutionary calendar In many regions a four-day to eight-day market week is based on the recurrence of market days, the early Romans observed an eight-day market week The seven-day week is said to have originated in ancient times in W Asia, probably in Mesopotamia This is thought to have been a planetary week predicated on the astrological concept of the influence of the planets, which were long erroneously believed to be seven celestial bodies revolving around the earth, these were the sun and moon and five of the bodies recognized today as planets —Mars, Mercury, Jupiter, Venus, and Saturn The Hebrew week is based chiefly on the religious observance of the SABBATH, which comes every seventh day and is usually associated with the seventh day of creation, when the Lord rested from his labors The Christian week and the Moslem week were probably derived chiefly from the Hebrew week, although the weekly holy days are different (Hebrew, Sabbath, seventh day, Christian, Sunday, first day, Moslem, Friday, sixth day) The influence of the weeks of Chaldaeans, Christians, and Jews slowly made itself felt in the Roman Empire, and elements of the systems were probably merged The planetary week was at first preeminent, and the use of planetary names, based on names of dei-

ties, remained the accepted usage even after Constantine (c 321) made the Christian week, beginning on Sunday, official in the civil calendar. The Roman names for the days of the week pervaded Western Europe, in most languages the forms are translations from Latin or attempts to assign corresponding names of divinities The Latin names, their translations, the English equivalents, and their derivations follow *dies solis* [sun's day], Sunday, *dies lunae* [moon's day], Monday [moon-day], *dies Martis* [Mars' day], Tuesday [Tiw's day], *dies Mercurii* [Mercury's day], Wednesday [Woden's day]; *dies Jovis* [Jove's or Jupiter's day], Thursday [Thor's day]; *dies Veneris* [Venus's day], Friday [Frigg's day], and *dies Saturni*, Saturday [both Saturn's day]. See F H Colson, *The Week* (1926)

Weeks, John Wingate, 1860–1926, U S Secretary of War (1921–25), b near Lancaster, N H , grad Annapolis, 1881 After serving in the navy and engaging in civil engineering, he was (1888–1913) a partner in a Boston brokerage firm Important in the state Republican party, Weeks served in the U S House of Representatives (1905–13) and in the Senate (1913–19) In 1921 he was appointed to the cabinet by Warren G Harding and remained at his post under Calvin Coolidge See biography by C G. Washburn (1928)

Weeksbury, town (pop 1,578), E Ky , E of Hasard and near the Va line, in the Cumberland coal area.

Weems, Mason Locke, 1759–1825, American author and preacher, b Anne Arundel co , Md., studied theology in London He was ordained in 1784 and served various Episcopal parishes When he turned to selling books and tracts he felt he was still serving God, but in a larger field, for 30 years after 1794 he was traveling agent for Mathew Carey, bookseller and publisher Parson Weems is chiefly known for *The Life and Memorable Actions of George Washington* (c 1800), in the fifth edition of which appears the famous cherry-tree story He fictionized this and other biographies he wrote to increase their interest He also wrote improving tracts, such as *The Drunkard's Looking Glass* ((1812). See biographies by L C Wroth (1911), Harold Kellock (1928), and P L Ford and E E F Skeel (1928–29).

Weenix, Jan Baptist (vän' bäptēst' vā'nĭks), 1621–1660?, Dutch painter and engraver He early won a high reputation in Rome, where he worked for the pope and for Cardinal Pamfili About 1649 he settled in Utrecht, becoming the same year master of the painters' guild there Weenix excelled in painting pastoral scenes, with ruins and shepherds or shepherdesses and their flocks He also painted seaports, portraits, and genre Good examples of his work are in many European galleries The Metropolitan Museum has his *Italian Seaport* His son and pupil, **Jan Weenix,** c 1640–1719, began as a painter of seaports in the manner of his father, but later became known for his fine animal paintings, hunting scenes, and studies of dead game. These are found in various European museums. The Metropolitan Museum has a fruit piece

Weeping Water, city (pop 1,139), SE Nebr., E of Lincoln, in an apple-growing region, inc. 1857.

weeping willow: see WILLOW

weevil, name for certain snout beetles of the curculio family By their attacks on stored grains the granary and rice weevils cause enormous financial losses Much damage is also done by the sweet-potato, vegetable, alfalfa, clover-leaf, strawberry, pine, and cotton boll weevils The bean and pea weevils belong to another family of beetles They feed on the seeds of the legumes in the field and in storage

weft see WEAVING

Wegener, Alfred Lothar (äl'frät lōtär' vā'gunûr), 1880–1930, German geologist, meteorologist, and arctic explorer He was professor of meteorology at the Univ of Graz from 1924 He is known for his theory of continental drift (see CONTINENT), set forth in his *Die Entstehung der Kontinente und Ozeane* (1915, Eng tr , *The Origin of Continents and Oceans*, 1924) He is also known for his expeditions to Greenland (on the last of which he lost his life) to establish meteorological stations and to ascertain the thickness of the icecap and the rate of drift of Greenland See account of his last expedition, *Greenland Journey* (ed by Else Wegener and F P Loewe, Eng tr , 1939), Johannes Georgi, *Mid-Ice* (Eng tr , 1934)

Wei, dynasty of N China see TSIN

Wei (wā), river, W China, rising in S Kansu prov and flowing c 450 mi E through Kansu and Shensi provs to join the Yellow River. The Wei is navigable below Sian

Weidman, Charles (wīd'mun), 1901–, American dancer and choreographer, b Lincoln, Nebr He studied (1921) at the Denishawn School, where he made his debut in Ted Shawn's *Xochitl* and gained fame in Shawn's *Danse Américaine* (1923). With Doris Humphrey, who has danced and collaborated in many of his productions, he founded (1928) a school of the dance Weidman's satirical and humorous choreographical works include *American Saga, Quest, This Passion, Atavisms, Opus 51*, and *Daddy Was a Fireman*

Weierstrass, Karl Theodor (kärl' tä'ōdôr vī'ûrshträs), 1815–97, German mathematician From 1864 he was professor of mathematics at the Univ of Berlin His work, mainly on the theory of functions, was published largely from the lecture notes of his students

weigela (wīgē'lu) or **weigelia** (wīgēl'yu), any species of the genus *Weigela* (sometimes included in *Diervilla*), Asiatic shrubs cultivated elsewhere for their funnel-shaped blossoms borne on somewhat arching branches in spring or early summer Best known is *Weigela florida* with flowers usually rose pink

weighing machine. see BALANCE

weight, atomic see ATOMIC WEIGHT

weight, molecular: see MOLECULAR WEIGHT.

weight lifting. A popular sport in European countries for many centuries, weight lifting became (1896) an event in the modern Olympic games and later became popular in the United States. Weightlifting meets—in which contestants are classified into bantamweight, featherweight, lightweight, middleweight, light-heavyweight, and heavyweight groups—frequently comprise seven events the military press, the left-hand, right-hand, and two-hand snatch; and the left-hand, right-hand, and two-hand clean-and-jerk In the military press, a contestant is not permitted to step over a line while lifting the weight with both hands, first to the chest or shoulder level and then over the head to the limit. In the clean-and-jerk, the weight is lifted to rest against the chest and then as high as possible, while in the snatch the weight is lifted in one continuous movement. See R C. Hoffman, *Weight Lifting* (1939).

weights and measures. Crude measurements of length, capacity, and weight probably date from prehistoric times Early units were commonly based on body measurements and on plant seeds As civilization progressed, technological and commercial requirements led to increased standardization The lack of uniformity in body measurements, for instance, probably resulted in specifying the foot, arm, or other part of the body of some particular individual and finally in laying off the length on a surface and making a reproduction of the unit Units were usually fixed by edict of local or national rulers and were subdivided and multiplied or otherwise correlated into systems of measurement. Standards varied greatly in different localities, although conquest and trade stimulated some correspondence between systems, e.g., between the systems of Egypt, Babylon, and Phoenicia A high degree of standardization was achieved in the Roman Empire, but after its fall there was great diversity of measurement The foot, which was one of the earliest units, is believed to have had as many as 280 variants in Europe as late as the 18th cent Today the chief systems are the American and British system, evolved in England and carried to America by English colonists, and the METRIC SYSTEM (for the common units and conversion table, see WEIGHTS AND MEASURES, table) In the British and American system two sets of weights are employed avoirdupois weights are used in general commerce, and troy weights for precious metals Avoirdupois weight was first legalized in 1303 and is based on the 16-ounce pound Troy weight (named for Troyes, France, where it is said to have originated) became common in England during the 14th and 15th cent and has been the legal mint standard since 1527 The troy pound has 12 oz , the troy ounce is the basis of apothecary weight In the United States, Congress has the constitutional right to fix standards, but except for purposes of customs and internal revenue, weights

WEIGHTS AND MEASURES COMMONLY USED

AMERICAN AND BRITISH SYSTEM

Linear Measure
12 inches = 1 foot
3 feet = 1 yard
5½ yards = 1 rod
220 yards = 1 furlong
5,280 feet = 1 mile
6 feet = 1 fathom
6,080 feet = 1 nautical mile

Square Measure
144 square inches = 1 square foot
9 square feet = 1 square yard
30¼ square yards = 1 square rod
160 square rods = 1 acre
4,840 square yards = 1 acre
640 acres = 1 square mile

Cubic Measure
1,728 cubic inches = 1 cubic foot
27 cubic feet = 1 cubic yard

Liquid Measure
16 ounces = 1 (U S) pint
20 ounces = 1 imperial (British) pint
2 cups = 1 pint
2 pints = 1 quart
4 quarts = 1 gallon
1.2 U S gallons = 1 imperial (British) gallon

Weights Avoirdupois
16 drams = 1 ounce
16 ounces = 1 pound
112 pounds = 1 long hundredweight
2,000 pounds = 1 short ton
2,240 pounds = 1 long ton

Weights Troy and Apothecary
480 grains = 1 ounce
12 ounces = 1 pound

METRIC SYSTEM

Linear Measure
10 millimeters = 1 centimeter
10 centimeters = 1 decimeter
10 decimeters = 1 meter
10 meters = 1 dekameter
1,000 meters = 1 kilometer

Square Measure
100 square millimeters = 1 square centimeter
100 square centimeters = 1 square decimeter
10,000 square centimeters = 1 square meter
100 square meters = 1 are
100 ares = 1 hectare
10,000 ares = 1 square kilometer

Cubic Measure
1,000 cubic millimeters = 1 cubic centimeter
1,000 cubic centimeters = 1 cubic decimeter
1,000 cubic decimeters = 1 cubic meter

Liquid Measure
10 milliliters = 1 centiliter
100 centiliters = 1 liter
1,000 liters = 1 kiloliter

Weights
10 milligrams = 1 centigram
10 centigrams = 1 decigram
10 decigrams = 1 gram
100 centigrams = 1 gram
10 grams = 1 dekagram
10 dekagrams = 1 hectogram
10 hectograms = 1 kilogram
1,000 grams = 1 kilogram
1,000 kilograms = 1 ton

CONVERSION TABLE

Linear Measure
1 inch = 2 54 centimeters
0 393700 inches = 1 centimeter
1 mile = 1 609344 kilometers
0 62137 miles = 1 kilometer

Square Measure
1 square inch = 6 4516 square centimeters
0 15500 square inches = 1 square centimeter
1 hectare = 2 471 acres
1 square mile = 2.58999 square kilometers
0 3861 square miles = 1 square kilometer

Cubic Measure
1 cubic inch = 16 3871 cubic centimeters
0 061024 cubic inches = 1 cubic centimeter
1 cubic yard = 0 76455 cubic meters
1 30795 cubic yards = 1 cubic meter

Liquid Measure
1 ounce = 0.46871 centiliters
0 33815 ounces = 1 centiliter
1 (U S.) liquid quart = 0.9463 liters
1 0567 liters = 1 (U.S) liquid quart
1 (U S.) gallon = 0037853 kiloliters
264 17 (U S.) gallons = 1 kiloliter

Weights
1 ounce (avoirdupois) = 28 3495 grams
0.035274 ounces (avoirdupois) = 1 gram
1 pound (avoirdupois) = 0.453592 kilograms
2.20462 pounds (avoirdupois) = 1 kilogram
1 (short) ton = 0 90718 (metric) tons
1 10231 (short) tons = 1 (metric) ton
1 pound (avoirdupois) = 1.21528 pounds (troy)
0.82286 pounds (avoirdupois) = 1 pound (troy)

and measures legislation has been, for the most part, permissive. Sets of official weights and measures were sent to the states in 1856, but legislation and enforcement are largely state prerogatives The Federal government permitted the use of the metric system in 1866 and established a conversion table based on the yard and the pound, but since 1893 the yard has been derived in the United States from the international prototype meter and the pound from the prototype kilogram These are kept at the International Bureau of Weights and Measures (est 1875) near Paris, and copies of the prototypes are deposited with the governments of nations participating in the International Bureau In the United States the copies are kept by a government bureau established to correlate standards (see STANDARDS, NATIONAL BUREAU OF) Efforts to establish the metric system as the sole legal system in the United States have been opposed chiefly on the grounds that conversion would entail great confusion See William Hallock and H T Wade, *Outlines of the Evolution of Weights and Measures* (1906); Jeanne Bendick, *How Much and How Many* (1947)

Weihaiwei or **Wei-hai-wei** (both wā'hī'wā'), former British leasehold, area c 285 sq mi, Shantung prov, China, on the Yellow Sea It was leased by Great Britain from China in 1898 and was returned in 1930 It comprised the city of Weihaiwei, a strip of territory along the coast, and near-by islands Under the British the city of Weihaiwei (pop. 222,247) developed from a small village to a major port and coaling station. It is important in the trade with Manchuria

Weill, Kurt (kōōrt' vīl'), 1900–1950, German-American composer, b Dessau, studied with Humperdinck and Busoni in Berlin He first became well known with the productions of two short, satirical, surrealist operas, *Der Protagonist* (Dresden, 1926) and *Der Zar läßt sich photographieren* [the tsar has himself photographed] (Leipzig, 1928) More popular than these, however, was his melodious *Die Dreigroschenoper* (1928), with book by Bert BRECHT, who was also the librettist of the full-length opera *Aufstieg und Fall der Stadt Mahagonny* [rise and fall of the city of mahogany] (1927, revised 1930), a bitter satire on modern degeneracy All these works were condemned by the rising followers of Hitler, and in 1933 Weill left Germany for France In 1935 he came to the United States, here he began writing musical comedies, the most notable of which were *Lady in the Dark* (1941) and *One Touch of Venus* (1943, with lyrics by Ogden Nash) His last works, in a more serious vein, included *Street Scene* (1947), a musical version of Elmer Rice's play, *Down in the Valley* (1948), a folk opera, and *Lost in the Stars* (1949), a musical tragedy for which Maxwell Anderson wrote the libretto, based on Alan Paton's novel about race relations, *Cry, the Beloved Country* (1948) Weill also wrote some instrumental works and a cantata, *Lindbergh's Flight* (Berlin, 1929) He became a U S citizen in 1943

Weimar (vī'mär), city (pop 66,659), capital of Thuringia, central Germany, on the Ilm river, in a picturesque country of wooded hills Because of its past role, in the early 19th cent, as the cultural center of Germany, Weimar has become symbolic of German culture, just as Potsdam became the symbol of Prussian militarism Though it dates from the 10th cent, it was of little importance before the 16th cent, when it became the capital of the duchy (after 1815 grand duchy) of SAXE-WEIMAR Under Elector John Frederick I, Lucas Cranach the elder worked here (16th cent), and from 1708 to 1717 J S Bach was court organist and concert master at Weimar It was, however, under Dowager Duchess Amalia and her son, CHARLES AUGUSTUS, that Weimar reached the peak of its fame as a cultural center C M WIELAND at first dominated the scene in the late 18th cent, but after the arrival (1775) of GOETHE at the court, Weimar and Goethe became virtually synonymous Goethe not only made Weimar the literary mecca of Europe during his lifetime, but he also attracted such men as HERDER and SCHILLER, established and directed the Weimar theater, and as chief minister of Charles Augustus was active in the physical improvement of the city The Weimar state theater saw the first performances of most of Goethe's and many of Schiller's plays After Goethe's death (1832) Weimar lived mainly on its past reputation, but its active cultural life continued Franz Liszt was musical director here from 1848 to 1859, and Wagner's *Lohengrin* had its first performance here during Liszt's directorship The fact that Friedrich Nietzsche lived and died (1900) at Weimar after he had become insane did not exactly enhance Weimar's stature as a center of thought, but it resulted in the foundation of the important Nietzsche Archives by his sister In 1919 Weimar was the scene of the German national assembly which created the Weimar Republic Under the Hitler regime, which replaced the Weimar Republic in 1933, the Nazis erected, at a few miles SE of Weimar, a monument to the Germany which Weimar did not symbolize—the concentration camp of Buchenwald. American soldiers entered both Weimar and Buchenwald in April, 1945, but they were replaced by Soviet troops later in the year. Even during its greatest glory Weimar was a quiet small town, and it retains that character There are varied manufactures, notably of textiles, machinery, electrical equipment, musical instruments, and glass, and a printing industry Weimar has a state college of music and an academy of art and architecture, and it is the seat of the Goethe and Schiller Archives and of the Nietzsche Archives Among the landmarks of Weimar are the parish church, with the graves of Lucas Cranach and Herder and with an altarpiece by Cranach, the former grand ducal palace and the ducal crypt with the graves of Goethe and Schiller, the residences of Goethe, of Schiller, and of Liszt, Goethe's garden cottage, the state theater, the Goethe museum, and the near-by ducal castle of Tiefurt The center of Weimar suffered damage in the Second World War, but it has been restored

Weimar (wī'mur), city (pop 1,353), S Texas, W of Houston and near Columbus, laid out 1873 It has small processing plants in a diversified farm area settled by Germans and Czechs

Weimar Republic see GERMANY

Weinberger, Jaromir (yä'rômēr vīn'bĕrgĕr), 1896–, Czech composer, studied at the conservatories of Prague and Leipzig From 1922 to 1926 he was professor at the conservatory of music in Ithaca, N Y, in 1939, after extensive travels, he settled in New York city His most popular works are the polka and fugue from the opera *Schwanda, the Bagpipe Player* (1927) and his orchestral *Variations and Fugue on Under the Spreading Chestnut Tree* (1939) Other works are the operas *Outcasts of Poker Flat* (1932, based on the story by Bret Harte) and *Wallenstein* (1937), his Lincoln Symphony (Cincinnati, 1941), *Czech Rhapsody* (Washington, D C, 1941), and the ballet *Saratoga* (Ballet Russe de Monte Carlo, 1941)

Weingartner, Felix (fā'liks vīn'gartnur), 1863–1942, Austrian conductor and composer, b Zara, Dalmatia, studied at the Leipzig Conservatory and with Liszt Having held several appointments in Germany, including those of conductor (1891–98) of the Royal Opera, Berlin, and conductor (1898–1903) of the Kaim Orchestra, Munich, he conducted (1908–10) at the Vienna State Opera, where he was successor to Mahler He was music director (1912–14) at Hamburg and conductor from 1919 to 1924 of the Vienna Volksoper and from 1919 to 1927 of the Vienna Philharmonic, afterward directing the Basel Conservatory until 1934, when he returned to the Vienna State Opera for two seasons He composed, among other works, six symphonies, three symphonic poems, and the operas *Sakuntala* (1884), *Orestes* (1902), and *Kain und Abel* (1914) and edited (1899) the complete works of Berlioz

Weinman, Adolph Alexander (wīn'mun), 1870–, American sculptor and medalist, b Germany He came to the United States in 1880 and studied under Philip Martiny and Augustus Saint-Gaudens He designed a U S half dollar and dime, his statues *Rising Sun* (Carnegie Inst, Pittsburgh) and *Descending Night* (Kansas City, Mo, Art Inst) won praise at the Panama-Pacific Exposition, San Francisco, 1915 His other works include the Gen Alexander Macomb monument (Detroit), Lincoln memorials (Hodgenville, Ky, and Madison, Wis), statues of Col William F Vilas (National Military Park, Vicksburg, Miss), Lincoln (capitol, Frankfort, Ky), and Alexander J Cassatt (Pennsylvania RR station, New York), a pair of *Sphinxes* (Scottish Rite Temple, Washington, D C), sculptural decorations for the Pennsylvania RR station and the Municipal Building, New York, and for the Elks' National Memorial Building, Chicago, and bronze doors for the building of the American Academy of Art and Letters, New York

Weinsberg (vīn'bĕrk), town (pop 4,751), Württemberg, SW Germany, after 1945 in Württemberg-Baden, near Heilbronn Its ruined castle, called Weibertreu [women's faith], is famous for an episode which happened here in 1140, after Emperor Conrad III had captured it The emperor, it is said, decided to put the men in the castle to the sword, but allowed the women to leave and to take with them their most valued treasures The women promptly took their husbands pickaback and walked out Another capture (1525), in the Peasants' War, ended, less pleasantly, with the massacre of its inmates It is worth pointing out that this massacre was the worst single act of atrocity committed by the peasants in the whole war, while the peasants suffered far worse at the hands of their enemies Weinsberg is the birthplace of Oecolampadius and of the poet Kerner

Weir, Harrison William (wēr), 1824–1906, English illustrator and writer He was for many years draughtsman and engraver on the *Illustrated London News* His best work was done for J G Wood's *Illustrated Natural History* He wrote and illustrated *Animal Stories* (1885) and *Our Cats and All about Them* (1889)

Weir, Robert Walter, 1803–89, American painter, b. New Rochelle, N.Y, studied in Florence He taught (1834–76) drawing at West Point, where are his *Peace and War*, in the chapel, and some of his portraits Among his historical pictures are *The Embarkation of the Pilgrims from Delft-Haven* (Capitol, Washington, D C) and a portrait of Gen. Winfield Scott (Metropolitan Mus) In New York also are stained glass windows of his designing in Calvary Church and Trinity Chapel He became a member of the National Academy of Design in 1829 Weir is grouped with the Hudson River school of landscape painters, among his landscapes is *View of the Hudson from West Point* His son, **John Ferguson Weir,** 1841–1926, painter, sculptor, and author, b West Point, N Y, studied with his father and at the National Academy. He was director (1869–1913) of the School of Fine Arts, Yale, where are his statues of President Woolsey and Professor Silliman His paintings include *Forging the Shaft* (Metropolitan Mus), *The Gun Foundry*, and *Tapping the Furnace* He became a member of the National Academy in 1866 Among his writings is a biography of John Trumbull (1901) Another son, **Julian Alden Weir,** 1852-1919, b West Point, N Y, studied with his father, at the National Academy, and with Gérôme in Paris He was one of the earliest American impressionist painters Subtle gradations of light and tone characterize his work He was one of the founders (1877) of the Society of American Artists, a member of the National Academy (1886), and its president (1915–17) When the Ten American Artists formed (1898) a separate group, he was one of them. His works include *Portrait of a Young Girl* (Luxembourg Mus, Paris), *Idle Hours*, *The Green Bodice*, and *The Red Bridge* (Metropolitan Mus.), a portrait and *Autumn* (Corcoran Gall), and *Midday Rest in New England* (Pa Acad of the Fine Arts)

Weir, city (pop 1,038), SE Kansas, near Pittsburg, in a coal area, inc 1875

weir (wēr), barrier or dam built in a stream to control its level or course, usually for purposes of irrigation, navigation, or water power The weir may be constructed so that all or part of it can be opened or closed, raised or lowered, to allow the water to flow freely, or the water may be obstructed continuously, so that it must flow over the crest of the weir The overflow sections, e g, spillways, of other types of dams are also called weirs In early England simple mesh weirs for fishing purposes were made of twigs and branches Weirs are also used to measure the flow of water, e g, in streams and sewers

Weirton, steel-manufacturing "company town" (pop c 31,500), W Va, in the industrial Northern Panhandle, on the Ohio and W of Pittsburgh In 1947 it was incorporated as a city, including near-by Holidays Cove, Marland Heights and Weirton Heights

Weise, Christian (krīs'tyan vī'zu), 1642–1708, German comic dramatist and poet He was a schoolmaster at Zittau from 1678 He wrote lyric verse and some 50 comedies, as well as humorous romances and the first German political novels In contrast to his predecessors, he presents life naturally and simply His best work is, perhaps, the comedy *Der bäurischer Machiavellus* [the village Machiavelli] (1679), his chief novel is *Die drei ärgsten Erznarren in der ganzen Welt* [the three archest fools in the whole world] (1672)

Weiser, Conrad (wī'zur), 1696–1760, American pioneer, b Württemberg, Germany Arriving in America in 1710, his family settled in Livingston Manor, N Y, and later at Schoharie While still a youth, Weiser lived for some time among the Mohawks and learned their language and customs. Going (1729) to Tulpehocken, Pa, he became (1731) the official Pennsylvania Indian interpreter and soon gained fame as a wise and honorable mediator between the whites and Indians His broad knowledge of Indian relations enabled him to gain Iroquois support of the British against French aggression during the last of the French and Indian Wars Coming under the influence of Conrad BEISSEL, he moved (1739) to Euphrata and was made a Baptist minister Within two years, however, he withdrew, returned to Tulpehocken, and entered local politics He later aided in erecting Berks co and in developing Reading, became a Lutheran adherent, and continued as Indian mediator until his death See biography by P A W Wallace (1945)

Weiser (wē'zur), city (pop 3,663), co seat of Washington co, W Idaho, N of Payette, at the confluence of the Weiser and Snake rivers and at the Oregon line Laid out in 1877, it was moved (1890) a mile west after fire had destroyed the original city In an irrigated fruitgrowing and dairying region, it is a terminus of the North and South Panoramic Highway and headquarters of Weiser National Forest Intermountain Institute (coeducational) is here

Weismann, August (ou'gōōst vī'män), 1834–1914, German biologist He taught zoology at the Univ. of Freiburg from 1866 to 1912 He is known as the originator of the germ-plasm theory of HEREDITY. His doctrine, formerly called Weismannism, stresses the unbroken continuity of the germ plasm and the nonheritability of ACQUIRED CHARACTERS. His works include *The Germ-Plasm* (1892, Eng. tr, 1893) and a series of essays translated into English as *Essays upon Heredity and Kindred Biological*

Problems (2d ed, 2 vols, 1891–92). See G. J. Romanes, *Examination of Weismannism* (1903)

Weissenburg (vī'sunbŏrk″), town (pop 13,144), Middle Franconia, Bavaria. Founded in the 9th cent on a Roman site, it was chartered c 1247 and became a free imperial city in 1360. Still standing are portions of the Roman fortifications and many fine examples of Gothic architecture

Weissenfels (vī'sŭnfĕls), city (pop 50,995), in the former Saxony prov of Prussia, E Germany, S of Halle, after 1945 in Saxony-Anhalt. It is the center of a lignite-mining region and has varied manufactures.

Weisshorn (vīs'hôrn″), peak, 14,804 ft high, Valais canton, Switzerland, in the Pennine Alps

Weizmann, Chaim (khīm' vītsman), 1874–, scientist and Zionist leader, first president (1948–) of Israel, b Russia, grad Univ of Berlin, 1900. He lectured in chemistry at the Univ of Geneva until 1903 and later taught at the Univ of Manchester. He became a British citizen in 1910, and in the First World War he was (1916–19) a director of the British admiralty laboratories. He became famous when he developed a synthetic acetone to be used in the manufacture of explosives. In 1917 he helped procure the famous declaration of Arthur James BALFOUR. Weizmann had been active in ZIONISM from his youth, and in 1907 he visited Palestine. He sought a practical solution for a Jewish homeland, and after 1920 assumed leadership in the world Zionist movement. In the Second World War he was (1939–45) honorary adviser to the British ministry of supply and did research on synthetic rubber and high-octane gasoline. When the republic of Israel was founded (1948), Dr. Weizmann became the first president. After 1932 he was head of the Hebrew Univ. in Jerusalem. He wrote various papers for scientific journals. See his autobiography, *Trial and Error* (1949), Paul Goodman, ed, *Chaim Weizmann a Tribute* (1945)

Wekerle, Alexander (vĕ'kĕrlē), Hung *Wekerle Sándor* (shan'dôr), 1848–1921, Hungarian statesman. He became minister of finance in 1889 and retained that post during his first two terms as premier (1892–95, 1906–10). In his first term the budget was balanced for the first time since 1869, civil marriage was made obligatory, and the power of the Church was lessened as a result. His second cabinet was a coalition of parties, it carried out financial reforms and supported the annexation of Bosnia and Hercegovina. Wekerle headed four successive cabinets in 1917–18. On Oct. 16, 1918, he declared the dissolution of all bonds between Hungary and Austria except the personal union of the two countries under the same monarch. He resigned shortly afterward.

Welch, William Henry, 1850–1934, American pathologist, b Norfolk, Conn, grad Yale (B.A., 1870), M.D. College of Physicians and Surgeons (now part of Columbia Univ.), 1875. After studying abroad he taught (1879–84) at Bellevue Hospital Medical College, introducing laboratory methods of instruction. From 1884 he was associated with Johns Hopkins Univ., as professor of pathology (1884–1916), dean of the medical faculty (1893–98), director of the school of hygiene (1916–26), and professor of the history of medicine (1926–30). He was chairman of the board of the Rockefeller Institute for Medical Research from 1901. His researches include studies of the Welch bacillus of gas gangrene and of embolism, thrombosis, and diphtheria. See biography by Simon Flexner and J. T. Flexner (1941)

Welch, coal-mining city (pop 6,264), co seat of McDowell co, S W Va, at the confluence of Elkhorn Creek and the Tug Fork river NW of Bluefield, settled 1885. A state hospital is here

Weld, Theodore Dwight, 1803–95, American abolitionist, b Hampton, Conn. He moved to Utica, N.Y. in childhood. Charles Stuart, a retired British army officer, and Charles G. Finney, Presbyterian revivalist, enlisted him in the abolitionist cause, and after 1830 Weld devoted his entire time to the movement. He in turn converted others, notably Arthur TAPPAN and Lewis TAPPAN, New York philanthropists, James G. BIRNEY, and Gamaliel BAILEY. He chose Lane Seminary at Cincinnati, Ohio, for the ministerial training of other Finney converts and studied there until the famous antislavery debates he organized (1834) among the students led to his dismissal. Weld then trained a select group of agents for the American Anti-Slavery Society, and within a few years the "Seventy" had successfully spread the abolitionist gospel throughout the North. He also directed the national campaign for sending antislavery petitions to Congress and was the invaluable assistant to John Quincy ADAMS when Congress censured and tried Adams for persisting in reading the petitions. The antislavery Whigs in Congress, many of them his converts, chose him as their adviser when they decided to break with their party on the slavery issue, and when they became firmly established in the early 1840s Weld retired from public life. Most famous of his writings (none were published under his own name), was *American Slavery as It Is* (1839), on which Harriet Beecher Stowe partially based her *Uncle Tom's Cabin*. Weld was undoubtedly one of the greatest of the ABOLITIONISTS (certainly one of the most attractive figures in the movement), but his passion for anonymity long made him an unknown figure in American history. He married (1838) Angelina Emily GRIMKÉ, also a vigorous abolitionist. See G. H. Barnes, *The Antislavery Impulse, 1830–1844* (1933), G. H. Barnes and D. L. Dumond, ed, *Letters of Theodore Dwight Weld, Angelina Grimké Weld and Sarah Grimké, 1822–1844* (2 vols, 1934)

welding, in general, the joining together of separate pieces of the same kind of metal. It has been carried out in a number of ways, e.g., by heating the edges of the metal to be joined until they are soft (but not melted) and then pressing them tightly together until hardness sets in (as in welding iron), by the use of an electric current, as in the Thomson process, in which the surfaces to be joined soften because of the heat generated by their resistance to the passage of current. Today welding is done chiefly by use of the electric ARC, the THERMITE process, the OXYACETYLENE TORCH, the oxyhydrogen BLOWPIPE, and the atomic hydrogen flame (in which molecules of hydrogen gas passing through an electric arc are broken up into atoms of hydrogen by absorbing energy, when outside the arc, the atoms reunite into molecules, yielding in the process heat enough to weld the metal)

Weldon, town (pop 2,341), NE N.C., on the Roanoke near the Va. line, NNE of Rocky Mount. The area yields cotton, peanuts, tobacco, and timber, which are processed here

Weleetka (wulē'ku), city (pop 1,904), E central Okla., on the North Canadian river and S of Tulsa. It is the trade center of a farming area in which watermelons are the chief crop. The site of a clash between Indians and whites in 1901 is near.

Welfs. see GUELPHS

Welhaven, Johan Sebastian (yōhan' sābas'tyan vĕl'havun), 1807–73, Norwegian poet and critic. His poetry is intellectual, often classic in style, and draws much of its inspiration from the Norwegian landscape, legend, and history. As a critic he was bitterly opposed to the undisciplined and tempestuous WERGELAND

well, cylindrical hole in the ground through which water or oil is brought up from a natural reservoir. Well making for the purpose of obtaining water is an ancient trade. In the United States until some years after the Civil War the majority of wells were "open," i.e., they were holes dug in the ground and cased with brick, stone, or wood. The pioneers of the West commonly used tubular wells, which were 2 ft or less in diameter. Open wells are generally 3 ft or more in diameter. Dug wells are those made with picks or spades or with digging machinery. Bored wells are made by the use of hand-operated or power-operated augurs. The majority of wells, both water and oil, are made by percussion or rotary drills. The material excavated in the process is brought up by suction buckets, hydraulic pressure, or through hollow drill tools. Driven wells are made by driving into the earth a casing which has sharp edges at the lower end. Entrance of water or oil is made possible by holes near the casing end. Hydraulic rotary drilling is much used for oil wells. Drilling bits set in the bottom of a drilling pipe are rotated by machinery on the ground level. As the cut deepens, more sections of pipe are fastened to the sections already in use. Water which is sent down through the pipe washes away the drillings and serves also to cool the cutting bits. Casing is inserted when the desired depth has been reached. The cable method uses both cutting and lifting tools at the end of a heavy rope or wire cable. Some wells in the United States are over 13,000 ft in depth. See also ARTESIAN WELL

Welland (wĕ'lund), city (pop 12,500), S Ont., on the Welland Ship Canal and 20 mi W of Buffalo, N.Y. It is a canal port and an industrial city, with cotton, steel, and cordage mills, foundries, and rubber, shoe, and carbide works, and is a distributing center for a fruitgrowing area

Welland, river of England, rising in Northamptonshire and flowing 70 mi to the Wash

Welland Ship Canal, 25 mi long, S Ont., connecting Lake Ontario and Lake Erie and by-passing the falls of the Niagara river. It was built in 1914–32 by the dominion government to replace a canal opened in 1833 and can accommodate the largest lake ships, its eight locks overcoming a difference in level of 326 ft between the lakes. The Lake Ontario entrance is at Port Weller, near Port Dalhousie, and the Lake Erie entrance is at Port Colborne.

Welle see UELE, river

Welles, Gideon (wĕlz), 1802–78, U.S. Secretary of the Navy (1861–69), b Glastonbury, Conn. Educated at Cheshire Academy and at the institution which later became Norwich Univ., he was editor (1826–36) and part owner of the Hartford *Times*, one of the first New England papers to support Andrew Jackson. Welles was an organizer of the Jacksonian forces in Connecticut, served in the state legislature (1827–35), and was three times elected state comptroller of public accounts (1835, 1842, 1843). He was postmaster at Hartford (1836–41) and chief of the U.S. Navy Bureau of Provisions and Clothing (1846–49). Quitting the Democratic party on the slavery issue, he helped found (1856) the Hartford *Evening Press*, a Republican paper, and in 1861 became New England's representative in Lincoln's cabinet. Incorruptible, efficient, and something of a curmudgeon, Welles built the powerful Union navy of the Civil War. John Ericsson's *Monitor* and the other ironclads resulted largely from his support, and the victorious admirals David G. Farragut and David D. Porter were men of his choice. He was one of the first to recognize Lincoln's essential greatness, but thoroughly disliked some of his cabinet colleagues, notably William H. Seward and Edwin M. Stanton. A moderate, he favored Lincoln's Reconstruction plan and, retaining his post under Andrew Johnson, loyally stood by the President in his struggle with the radical Republicans of Congress. He returned to the Democratic party in 1868. Welles wrote *Lincoln and Seward* (1874), and his salty diary is of immense value to the historian, though its worth is impaired by the changes he made in the journal later in life. See J. T. Morse, Jr., ed, *Diary of Gideon Welles* (3 vols, 1911); R. S. West, Jr., *Gideon Welles Lincoln's Navy Department* (1943), B. J. Hendrick, *Lincoln's War Cabinet* (1946)

Welles, Orson, 1915–, American actor, director, and producer in the theater, in moving pictures, and on the radio, b Kenosha, Wis. He acted (1931) at the Gate Theatre, Dublin, and made his Broadway debut (1934) as Tybalt in *Romeo and Juliet*. Welles directed spectacular versions of *Macbeth* and *Doctor Faustus* for the Federal Theatre (1937) and in the same year founded the Mercury Theatre with John Houseman. Among the productions which he directed and acted in for this organization were *Julius Caesar* (in modern dress) Marc Blitzstein's *Cradle Will Rock*, G. B. Shaw's *Heartbreak House* and Georg Büchner's *Danton's Death*. Welles in 1938 alarmed a national radio audience with his "Martian broadcast," a realistic adaptation of H. G. Wells's *War of the Worlds*. He went (1939) to Hollywood to write, direct, produce, and act in *Citizen Kane*, noted for its handling of the close-up. Some of his other films are *The Magnificent Ambersons*, *Journey into Fear*, and *Macbeth*

Welles, Sumner, 1892–, American diplomat, b New York city, grad Harvard, 1914. He began his career in diplomatic service as secretary of the U.S. embassy at Tokyo (1915–17). Attached to the embassy at Buenos Aires (1917–19), Welles gained wide knowledge of Latin American affairs, then served as assistant chief (1920–21) and chief (1921–22) of the division of Latin American affairs of the Dept. of State. As commissioner to the Dominican Republic in 1922, he helped prepare for the evacuation of American troops from that country, later he was appointed the personal representative of President Calvin Coolidge to offer mediation in the Honduras revolution of 1924. He wrote a book on the Dominican Republic, *Naboth's Vineyard* (1928), and was an influential member of the Dawes Financial Mission to the Dominican Republic (1929). President F. D. Roosevelt appointed him Assistant Secretary of State in 1933. That same year he was made ambassador to Cuba. Welles was unable to bring about successful mediation between the opposing groups in the revolution against Gerardo MACHADO in 1933, and in the midst of political turmoil he was recalled and resumed his duties as Assistant Secretary of State. He later (1937–42) was Undersecretary of State and served as U.S. delegate to several Pan American conferences. In his book, *The Time for Decision* (1944), he recounted the results of a confidential mission to Europe in 1940. Some of his speeches were collected in *The World of the Four Freedoms* (1943), and he wrote *The Intelligent American's Guide to Peace* (1945) and *Where Are We Heading?* (1946)

Wellesley, Richard Colley Wellesley, Marquess (wĕlz'lē), 1760–1842, British governor general of India. Born in Ireland, he was educated at Eton and Oxford, became earl of Mornington on his father's death (1781), and took his seat in the Irish House of Peers. He entered the English House of Commons in 1784 and gave his support to the liberal measures of William Pitt and William Wilberforce. In 1793 Pitt appointed him to the board of control for India, and in 1797 he was created Baron Wellesley and sent as governor general to India. Under his rule British influence achieved a vast extension. He was an excellent administrator, wiped out the French hold in India, and crushed the power of Tippoo Sahib, sultan of Mysore. Aided by the military powers of his brother Arthur (later duke of WELLINGTON), he checked the power of the native rulers in the great struggle with the Mahratta powers. He was recalled to England in 1805, having been created marquess in 1799. Chagrined at charges unsuccessfully brought in Parliament against his administration in India, he refused a cabinet post, but went to Spain as ambassador in 1809. He served as foreign secretary (1810–12) under Spencer Perceval. Wellesley supported the cause of CATHOLIC EMANCIPATION and in 1821 became lord lieutenant of Ireland. He resigned (1828) when his brother, then an opponent of Catholic

Emancipation, became prime minister, but served again as lord lieutenant for a brief period (1833–34) after the issue of Catholic Emancipation had been settled. See biographies by C. B. Malleson (1889) and W H Hutton (1893).

Wellesley, suburban town (pop. 15,127), E Mass., WSW of Boston, settled 1660, set off from Needham 1881 The Italian Hunnewell gardens are near Lake Waban. Several preparatory schools and the Babson school of business are in the town **Wellesley College** (nonsectarian, for women), chartered in 1870 and 1873, was opened in 1875 by Henry F DURANT It was the first to have scientific laboratories in a woman's college It includes a noted department of hygiene and physical education (graduate) The buildings include a chapel, an art building and museum, Billings Hall (music), and a library with fine bronze doors The library has a large Browning collection Alice Freeman PALMER (1881–87) and Ellen F Pendleton (1911–36) were well-known presidents The faculty have been noted for constructive influence in social movements See Florence Converse, *Wellesley College* (1939)

Wellesley College: see WELLESLEY, Mass

Wellesley Islands, uninhabited island group in the Gulf of Carpentaria, Australia, just off the northwest coast of Queensland. Mornington Island is the largest.

Wellfleet, resort town (pop 890), SE Mass., on Cape Cod, between Truro and Eastham, settled c 1720, set off from Eastham 1763 It was long a center for whaling, oystering, and cod and mackerel fishing

Wellhausen, Julius (yo͞o'lyo͝os vĕl'hou"zun), 1844–1918, German Orientalist and biblical critic He wrote many valuable and original works on the text and composition of books of the Bible and on Jewish and Arabic history His *Geschichte Israels* (1878) was translated into English from the second edition (1882) as *Prolegomena to the History of Israel* (1895)

Wellingborough, urban district (1931 pop 21,223, 1947 estimated pop 28,430), Northamptonshire, England Formerly known for its chalybeate spring, it is now a market town and a leather-manufacturing center It has a public school which was founded in 1595

Wellington, Arthur Wellesley, 1st **duke of,** 1769–1852, British soldier and statesman Born in Dublin, he entered the army in 1787 and, aided by his brother, Richard WELLESLEY, rose rapidly in rank Until 1798 he signed his name Wesley In 1796 he followed his regiment to India, where his brother came (1797) as governor general Wellington aided Gen George Harris (1799) in the rout of TIPPOO SAHIB, sultan of Mysore, at Seringapatam, where Wellesley later ruled ably as governor In 1800 he defeated the robber chieftain, Dhundia Wagh, and in 1802 he was made major general In 1803 he moved against the Mahratta chiefs, Sindhia and Holkar, breaking their force of 40,000 with an army of 10,000 in a surprise attack A valuable civil and military adviser to his brother, he returned with him to England in 1805 and was knighted His election to Parliament (1806) and appointment as Irish secretary (1807) did not prevent him from leading an expedition against the Danes (1807) and another (1808) to assist Portugal in its revolt against Napoleon He defeated the French at Roliça and Vimeiro, but was superseded in command In 1809 he returned to the Iberian Peninsula, where he ultimately assumed command of the British, Portuguese, and Spanish forces in the Peninsular War Taking advantage of the irregular terrain, the national patriotism of the Spanish, and Napoleon's preoccupation with other campaigns and projects, he drove the French beyond the Pyrenees by 1813 (see PENINSULAR WAR) His campaigns were rendered difficult by poor support from the British government Late in 1813 Wellesley invaded S France shortly before Napoleon's abdication After his success at Vitoria, Spain, he had been made duke of Vitoria, and after his return to England he received many honors and was created duke of Wellington He served for a short time as ambassador to Paris, then succeeded Lord Castlereagh at the peace conference in Vienna, but took command of the allied armies when Napoleon returned from Elba There followed his most famous victory, that in the WATERLOO CAMPAIGN, won in conjunction with the Prussian general, Blucher. This ended the Napoleonic Wars Wellington, again lavishly honored, took charge of the army of occupation, exerting his influence to restrain harsh treatment of the defeated French Wellington, "the iron duke," with the soldier's taste for force and order and the aristocrat's distrust of democratic institutions, lent his great prestige to the Tory policy of repression at home and took a cabinet post as master general of ordnance (1819) He represented England at the Congress of Verona (1822), which considered the Spanish revolt, and at St Petersburg (1827), which concerned itself with the revolt in Greece, but he was not in sympathy with the liberal foreign policy of George Canning. Wellington became prime minister in 1828 and, by effecting the repeal of the Test Act and Corporation Act and the passage of the CATHOLIC EMANCIPATION Bill (reforms he had previously opposed), admitted Catholics to public office and Parliament, but lost the support of most of his party as a consequence When he declared against parliamentary reform, the ministry fell (1830), and his unpopularity subjected him to an assault by a mob He refused to form a government in 1834, but served under Robert Peel as foreign secretary (1834–35) and again (1841–46) without portfolio On the repeal of the corn laws he supported Peel, while not wholly approving his policy In 1842 he was made commander in chief for life and on his death was buried with great pomp in St Paul's See his dispatches (12 vols., 1834–39), biographies by Herbert Maxwell (1899), John Fortescue (1925), Oliver Brett (1928), Philip Guedalla (1931), and Richard Aldington (1943)

Wellington, village (pop 1,036), S Ont., on Wellington Bay of Lake Ontario and 8 of Belleville It is a summer resort in a farm area

Wellington. 1 Urban district (1931 pop 8,186, 1943 estimated pop 6,628), Shropshire, England The WREKIN is near by **2** Urban district (1931 pop. 7,132, 1943 estimated pop 6,628), Somerset, England, at the foot of the Blackdown Hills, in a farming region Its manufactures are woolen goods and asbestos The Duke of Wellington took his title from the town, a monument to him is on one of the hills

Wellington, city (pop 123,771, metropolitan pop 173,520), capital of New Zealand, at the southern extremity of North Island It is at the head of a harbor (formerly called Port Nicholson) on Cook Strait Wellington supplanted Auckland in 1865 as capital of the dominion Among the buildings are the governor general's residence, the Houses of Parliament, the head offices of the Univ of New Zealand, the Victoria University College (1897), the National Art Gallery (1936), and the Dominion Museum (1936) with its Maori art collection The chief products are fish and building stone. The city was founded in 1840

Wellington 1 City (pop 7,246,) co seat of Sumner co., S Kansas, S of Wichita, in an agricultural region, laid out 1871, inc 1872 Oil fields in the vicinity were developed in the 1930s It was on the old Chisholm Trail **2** Village (pop. 2,529), N Ohio, SW of Cleveland, in a dairy and grain area Iron castings and small steel products are made here **3** City (pop 3,308), co seat of Collingsworth co., extreme N Texas, SSE of Amarillo, settled 1888, inc 1909 Long a prairie cow town, Wellington now handles cotton, grain, and turkeys as well as cattle

Wellman, town (pop 1,129), SE Iowa, SW of Iowa City, settled 1879, inc 1880 Turkeys are raised and packed here

Wells, David Ames, 1828–98, American economist, b Springfield, Mass., grad Williams, 1847, and Lawrence Scientific School, Cambridge, Mass., 1851 Early in life he wrote several popular books on science In 1864 his pamphlet *Our Burden and Our Strength,* dealing with the financial problems of the Civil War, attracted considerable attention While serving as special commissioner of the U S Revenue Commission he wrote a series of reports (1866–69) concerned particularly with indirect taxes He favored free trade and opposed the Federal income tax He wrote many books and pamphlets, including *Robinson Crusoe's Money* (1876), *Our Merchant Marine* (1882), and *The Theory and Practice of Taxation* (1900) See F B Joyner, *David Ames Wells, Champion of Free Trade* (1939)

Wells, Henry, 1805–78, American pioneer expressman, b Thetford, Vt As a child he moved with his family to central New York In 1843 he established express service between New York city and Buffalo and competed with the U S Post Office by carrying mail at less than the government rate His association with William G Fargo began in 1844, when Wells & Company was organized In 1846 Wells temporarily abandoned most of his other commercial interests to concentrate on the trans-Atlantic trade (For the development of Wells's Western express business after 1852 see FARGO, WILLIAM GEORGE.) Wells made his home in Aurora, N Y, where he founded Wells Seminary (now Wells College) A stammerer, he established several schools for those similarly afflicted

Wells, Herbert George, 1866–1946, English journalist and novelist, b Bromley The son of a professional cricketer, Wells was apprenticed to a draper at 13 but was able through grants and scholarships to attend the Univ of London (grad 1888) Stimulated by the teaching of T H Huxley, Wells taught science for a few years, then wrote articles for magazines Soon he began his long series of books in which scientific speculation is entertainingly clothed in fiction and which fascinated many readers— *The Time Machine* and *The Wonderful Visit* (both 1895), *The Island of Dr Moreau* (1896), *The Invisible Man* (1897), *The War of the Worlds* (1898), and *The War in the Air* (1908) His realistic novels of contemporary life, often humorous and satirical, which include *Love and Mr. Lewisham* (1900), *Kipps* (1905), *Tono Bungay* (1909), *Ann Veronica* (1909), *The History of Mr Polly* (1910), *Mr. Britling Sees It Through* (1916), and *Joan and Peter* (1918), were usually vehicles for conveying Wells's social ideas. Wells was an original member of the Fabian Society, but, dissatisfied, launched his own propaganda for a reasonable world—*Anticipations* (1901), *A Modern Utopia* (1905), *The New Machiavelli* (1911), *The World of William Clissold* (1926), *The Open Conspiracy* (1928), and *The Shape of Things to Come* (1933) *First and Last Things* (1908) set forth his credo Wells's *Outline of History* (1920) was a materialistic interpretation of history, very popular but criticized as inaccurate Its companion work, *The Science of Life* (1929), was written with Julian Huxley and G P Wells, his older son. Prophecy and comment continued in *The Croquet Player* (1936), *World Brain* (1938), *Babes in the Darkling Wood* (1940), and the bitter and bewildering *Mind at the End of Its Tether* (1945) Much of Wells's extensive writing was ephemeral, but he was one of the most forward-looking and influential writers of his time See his *Experiment in Autobiography* (1934), Van Wyck Brooks, *The World of H G Wells* (1915), Geoffrey West, *H G. Wells* (with a bibliography, 1930).

Wells, Horace, 1815–48, American dentist, b Hartford, Vt After studying dentistry in Boston, he moved to Hartford, Conn., and began practicing c 1836 He was the first to use laughing gas as an anesthetic in dentistry (1844) His experiments were known to W T G Morton (his former partner) and C T Jackson, but a demonstration in 1845 before Boston medical authorities was unsuccessful After giving up his practice, Wells committed suicide while under arrest for disorderly conduct See his account of his discovery (1847), H W Erving, *The Discoverer of Anaesthesia* (1933).

Wells, William Charles, 1757–1817, British physician, b South Carolina, of Scottish parents He was a newspaper editor (1782–84) in St Augustine (at that time in East Florida), then practiced medicine in London He explained the nature of dew in *An Essay on Dew* (1814) and wrote a number of medical papers, including an essay on vision

Wells, municipal borough (1931 pop 4,831, 1943 estimated pop 7,000) and city, Somerset, England, at the foot of the Mendip Hills SW of Bath The name is derived from wells sacred to St Andrew. The town was of importance in Saxon times and is the site of a Roman settlement Near by is the famous Wookey Hole, consisting of subterranean caverns, where remains of prehistoric men and animals were found The Cathedral of Bath and Wells is considered one of the most magnificent in England Built mainly in the 12th and 13th cent it contains fine 15th-century woodwork and excellent examples of medieval sculpture The town has ruins of several structures from the Middle Ages, the moated palace of the bishops is near the cathedral

Wells 1 Town (pop 2,144), SW Maine, on the coast SW of Portland, settled c 1640, inc 1653. It suffered greatly in the Indian wars The town includes the resorts OGUNQUIT and Wells Beach. **2** Village (pop 2,217), S Minn., NW of Albert Lea, settled before 1870 It is a farm trade center and has a cannery

Wellsboro, industrial borough (pop 3,665), co seat of Tioga co., N Pa., SW of Elmira, N Y, settled c 1800, laid out 1806, inc 1830 Its products include coal, gas, and glass

Wellsburg, city (pop 6,255), co seat of Brooke co., W Va., in the industrial Northern Panhandle, on the Ohio and NNE of Wheeling, platted 1790, chartered 1797 Glass and paper manufacturing are important At near-by BETHANY is Bethany College

Wells College. see AURORA, N Y.

Wells River, Vt see NEWBURY

Wellston, industrial city (pop 5,537), S Ohio, NE of Portsmouth, platted 1874. It makes mine machinery and machine tools

Wellsville 1 City (pop 1,314), E central Mo., NW of St Louis, in a fire-clay and farm area, laid out 1856 **2** Village (pop 5,942), W N Y., on the Genesee and SE of Buffalo, settled c 1795, inc. 1871 It is an oil-refining center Pumps, machinery, and heating equipment are made The David A Howe Library (1937), with a museum and a theater, serves as a cultural center **3** City (pop 7,672), NE Ohio, on the Ohio river and N of Steubenville It is a clay-products center A concrete and clay wall (1938) guards against floods **4** City (pop 1,402), N Utah, SW of Logan, settled 1856 by Mormons, inc 1866 It is a processing and trade center in a dairy and farm area long irrigated and now served by the Hyrum project

well-tempered, in music see EQUAL TEMPERAMENT

Wels (vĕls), city (pop 36,528), Upper Austria, on the Traun river and SW of Linz It is an industrial center with varied manufactures A Roman town, Wels later became a stronghold against the Avars and the Magyars Emperor Maximilian I died here in 1519 There are natural-gas wells in the vicinity.

Welsbach, Carl Auer, Baron von (wĕlz'bŏk, -bäk, Ger karl' ou'ûr barōn' fŏn vĕls'bakh), 1858–1929, Austrian chemist He discovered the rare-earth elements neodymium and praseodymium (in 1885) and lutetium (c.1908, independently of

Georges Urbain). He is known also for the invention of the Welsbach mantle.

Welsbach mantle or **Welsbach burner** [for C. A. von Welsbach], consisting of a cylindrical framework of gauze impregnated with oxides of thorium and cerium. When heated in a gas flame, it produces a very bright light because of the incandescence of the oxides

Welser (vĕl'sûr), German family of wealthy merchants and bankers at Augsburg. It reached the height of its prosperity under **Bartholomäus Welser** (bär"tōlōmĕ'ōōs), 1488–1561, who had advanced large sums to Emperor Charles V. Unable to repay his debts, Charles granted (1528) the territory now constituting VENEZUELA to his creditor, who sent out agents and had the territory explored. The administration of the Welsers was grasping and oppressive, and their concession was revoked before the end of Charles V's reign. A niece of Bartholomäus Welser, **Philippine Welser** (fēlĭ'pēnu), 1527–80, was famous for beauty and learning. She secretly married Archduke Ferdinand, second son of Emperor Ferdinand I.

Welsh, town (pop. 1,822), SW La., E of Lake Charles, in a rice area, settled 1880, inc. 1889.

Welsh language, Brythonic language of the Celtic subfamily of Indo-European languages. See LANGUAGE (table).

Welsh literature. The earliest Welsh literature is preserved in about six manuscripts written with one exception after the 12th cent. The most important, the so-called "Four Ancient Books of Wales," are *The Book of Aneurin*, *The Book of Taliesin*, *The Black Book of Caermarthen*, and *The Red Book of Hergest*. Much of the poetry in these manuscripts is credited to four late 6th-century bards, Aneurin, Taliesin, Myrddin (the Merlin of Arthurian romance), and Llywarch Hen, and most of the anonymous poetry is marked by style and subject as belonging to their various schools. Two types predominate, songs in praise of heroes and elegiac poems of desolation and longing. All this verse displays the formal perfection and verbal felicity of a highly developed art. Included in these manuscripts is the prose classic the *Mabinogion* (written down c 1100), the cycle of tales and legends concerning the old Celtic gods and heroes. From 1150 to 1350 the bardic system (peculiar to the Celts), with its archaisms, its prescribed themes and meters, and its one aim—"exquisiteness"—flowered in North Wales. Its chief figure was Cynddelw. In South Wales the 14th cent. was a golden age, with DAFYDD AP GWILYM, the greatest of Welsh poets, breaking classic traditions and establishing new horizons. He influenced Welsh poetry for 200 years. The next fruitful period in poetry was the 18th cent. Writing in the classic tradition, but with new and wider content, was Goronwy Owen, deriving from the abundant folk poetry (*penillion*) and writing a more personal poetry in "free" meters were the hymnodists William Williams (Pantycelyn) and Ann Griffiths. They were a potent influence on the 19th-century lyric poets, Cernog and Islwyn. Welsh prose developed late. Its range until the 19th cent. was narrow, being largely concerned with theological controversy. Modern Welsh prose standards were set chiefly by Bishop William Morgan's translation (1588) of the Bible and *Visions of the Sleeping Bard* (1703) by Ellis WYNN. In the 19th cent. political writing assumed importance in Welsh literature, and Wales had her first national novelist, Daniel Owens, "the Welsh Dickens." The 20th cent. has brought a remarkable literary revival. T. Gwynn Jones and R. Williams-Parry are outstanding poets in the classic tradition, W. J. Gruffydd in the "free" meters. The short story has been developed to a high level by Kate Roberts. The novel and drama forms are being successfully exploited, and Saunders Lewis has enriched critical writing. The EISTEDDFOD remains a vigorous cultural force, and the Welsh language is being more fully employed than ever before in education. See Sir Idris Bell, *Development of Welsh Poetry* (1936).

Welsh Marches, lands in WALES along the English border. After the Norman conquest of England in the 11th cent., William I established the border earldoms of Chester, Shrewsbury, and Hereford to protect his English kingdom. Norman barons were encouraged by William I and his successors to conquer and hold other earldoms in the east of Wales. These nobles ruled as petty feudal princes, owing allegiance only to the king. Attempts to control the resulting lawlessness were made by Edward I and by Edward IV, who set up the Council of Wales and the Marches. Finally the Act of Union (1536) abolished the some 150 marcher lordships, providing for their incorporation into English counties, or their division into shires.

Welshpool, municipal borough (1931 pop. 5,639, 1943 estimated pop. 5,789), Montgomeryshire, Wales, on the Severn. The Red Castle of the earls of Powis or Powys, built in the 12th cent., with its galleries and large estate, is near by. Welshpool has a sheep fair and a corn exchange.

Welsh terrier: see TERRIER.

Welty, Eudora, 1909–, American author, b. Jackson, Miss., educated at the Mississippi College for Women and the Univ. of Wisconsin (B.A., 1929). Her stories of a Mississippi small town, with their delicately shaded characterization and suggested crosscurrents, appeared first in the "little" magazines—*Manuscript* and the *Southern Review*. They were collected in *Curtain of Green* (with an introduction by Katherine Anne Porter, 1941) and *Wide Net* (1943). *Robber Bridegroom* (1942) was a fantasy, and *Delta Wedding* (1946) a novel. The *Golden Apples* (1949) is a connected series of stories about a town which is called Morgana.

Welwyn Garden City (wĕl'ĭn), urban district (1931 pop. 8,586, 1943 estimated pop. 14,000), Hertfordshire, England, N of London. It is a GARDEN CITY, founded by Sir Ebenezer HOWARD in 1920, and now has industries which employ most of the local population.

Wembley, municipal borough (1931 pop. 48,561, 1947 estimated pop. 134,390), Middlesex, England. The British Empire Exhibition held here in 1924–25 gave a strong impetus to the growth of the town. Buildings to house exhibitions of the various dominions and colonies, palaces of branches of art and industry, and a stadium accommodating nearly 100,000 people were erected. Sports events are now held in the stadium. Industries include metal casting and the manufacture of electric equipment, chemicals, and metal products.

Wemyss (wēmz), parish (pop. 26,619), Fifeshire, Scotland. It is a fishing port and a coal-mining town. Its castle replaces an earlier one.

wen, sebaceous cyst, occurring in the skin, especially of the scalp, face, and back. This type of cyst grows slowly, is painless, and may be removed surgically.

Wenatchee (wĭnă'chē), city (pop. 11,620), co. seat of Chelan co., central Wash., near the confluence of the Columbia and Wenatchee rivers, founded 1888, inc. 1901. It is the commercial center of a fruitgrowing valley famous for its apples. A junior college and an agricultural experiment station are here, and Wenatchee has a collection of prehistoric Indian carvings.

Wenceslaus, Saint (wĕn'sĭslûs), d. 936?, duke of Bohemia. He was reared in the Christian faith by his grandmother, St. Ludmilla. He became duke at an early age, and during his minority his mother, Drahomira, acted as regent. She, like many other Czech nobles, opposed Christianity and persecuted the Christians. She also incurred the enmity of the German king, Henry I (Henry the Fowler), by aiding the Wends. Henry invaded Bohemia (929?), Wenceslaus, who had now begun to rule, recognized the futility of resistance and negotiated a peace. During his reign Wenceslaus was noted for his piety, he worked vigorously to strengthen Christianity in Bohemia. His religion and his treaty with Henry I caused much discontent among the nobles, and he was assassinated by his brother Boleslav, who succeeded him. By the beginning of the 11th cent., he was already recognized as the patron saint of Bohemia. Vaclav is the Czech form of his name. The English carol mentioning him is wholly modern. Feast: Sept. 28.

Wenceslaus, 1361–1419, emperor (never crowned) and German king (1378–1400), king of Bohemia (1378–1419) as Wenceslaus IV, elector of Brandenburg (1373–78), son and successor of Emperor Charles IV. Even more than his father, he was a Bohemian rather than a German king. This fact and the unusually difficult problems he had to face made his imperial reign most unsuccessful. He was, moreover, given to drunkenness and violent fits of temper, these deficiencies of character, however, though greatly stressed by most historians, he shared with many of his enemies. In 1387 general warfare broke out between the towns and the nobles. The Peace of Eger (or Peace of Cheb) in 1389 was a triumph for the nobles, but not for Wenceslaus. In the Great SCHISM, Wenceslaus at first supported, like his father, the Roman pope, Urban VI, but in 1398 he agreed with Charles VI of France that both rival popes should be deposed and a new pope elected. The two weak monarchs were unable to execute this plan. Wenceslaus's entente with France, his preference for Bohemia, his personal character, and, especially, his sale (1395) of Milan as a hereditary fief to Gian Galeazzo VISCONTI, were all among the causes of his deposition from the German kingship and the election of RUPERT of the Palatinate (1400). Wenceslaus refused to recognize the deposition, but retired to Bohemia, in 1411, after Rupert's death, he surrendered his claim to the empire to his brother SIGISMUND. In Bohemia, Wenceslaus was early embroiled with the nobles and higher clergy, especially with the archbishop of Prague, whose vicar general, St. JOHN OF NEPOMUK, he had killed in a fit of rage. His quarrels with the nobles twice led to his imprisonment (1394, 1402–3), Sigismund was both times involved in the plot, and in 1396 wrenched from his brother the vicariate of the empire. Wenceslaus was popular with the Bohemian commons. The Decree of Kutna Hora (1409), which gave the Czechs preponderance in voting for the rector of the Univ. of Prague (see PRAGUE, UNIVERSITY OF) led to the election of John Huss as rector. An enemy of the high clergy and an ardent nationalist, Wenceslaus staunchly supported Huss, who also had the queen among his most faithful followers. The king attempted to prevent the burning of the writings of WYCLIF and the termination of Huss's preaching and sought to persuade John XXIII (Baldassare Cossa) to suspend proceedings against Huss. When the interdict was laid on Prague (1412), he persuaded the reformer to leave the city, but continued to support him covertly. Wenceslaus avoided suppressing the national and religious outburst which followed the burning of Huss, but the rise of John ZIZKA cooled his feelings toward the Hussites. The reform took on a rebellious character, and when after serious riots several town councilors appointed by the king were thrown out of the window (the first Defenestration of Prague, July 30, 1419), Wenceslaus died of rage. So unpopular had he become that he was buried secretly by night. His brother Sigismund succeeded him as king of Bohemia.

Wenceslaus I, d. 1253, king of Bohemia (1230–53), son and successor of Ottocar I. During his reign many towns of Bohemia and Moravia, into which he called German settlers, were granted charters modeled on that of Magdeburg. Wenceslaus repulsed the Mongol invaders (1241). He received Emperor Frederick II's support against Austria, but later supported Pope Gregory IX in his struggle against the emperor. He was succeeded by his son, Ottocar II, whom he made margrave of Moravia during his lifetime.

Wenceslaus II, 1271–1305, king of Bohemia (1278–1305) son and successor of the ill-fated Ottocar II. From the death of his father in the battle of the Marchfeld (1278) until 1283 the regency was exercised by Otto of Brandenburg, appointed by the German king, Rudolf I of Hapsburg. Otto abused his powers, imprisoned the young king, and let his German soldiers pillage the countryside. Civil wars and famine resulted, and only Rudolf's intervention reestablished order. After Wenceslaus's entry into Prague (1283), his mother's lover and secret husband, Zavis of Falckenstein, rose to power. Zavis's intrigues and his hostility to Rudolf I, whose daughter Judith was the wife of Wenceslaus, led to his downfall in 1290, when Wenceslaus had him beheaded and began his personal rule. Wenceslaus soon adopted Zavis's anti-Hapsburg policy and greatly extended his power. At the invitation of some Polish lords he accepted (1291) the duchy of Cracow and in 1300 was crowned king of all Poland. In 1301 he accepted for his son (later Wenceslaus III) the crown of Hungary. The German king, Albert I of Hapsburg, and Pope Boniface VIII demanded that Wenceslaus give up Poland and Hungary and the rights to the rich silver mines of Kuna Hora, key to Bohemian strength. Wenceslaus repulsed Albert's invasion (1304) and was preparing to invade Austria when he died.

Wenceslaus III, c. 1289–1306, king of Bohemia (1305–6), son and successor of Wenceslaus II. On the death of Andrew III of Hungary, last of the Arpad dynasty, he was elected (1301) king of Hungary as Ladislaus V. Unable to assert his authority in Hungary, he relinquished (1305) his claim to Duke Otto of Bavaria, who in 1308 was succeeded by Charles I, founder of the Angevin dynasty in Hungary. Wenceslaus tried, however, to assert his hereditary claim to the Polish crown, but he was assassinated at Olmütz (Olomouc) while marching to Poland. He was the last of the native dynasty of the Premyslides. After an interregnum John of Luxemburg was elected (1310) king of Bohemia and married Wenceslaus's sister.

Wenceslaus IV, king of Bohemia: see WENCESLAUS, emperor.

Wendell, Barrett (wĕn'dŭl), 1855–1921, American teacher and scholar, b. Boston, grad. Harvard, 1877. He taught at Harvard (1880–1917, professor after 1898) and lectured at Cambridge Univ. and the Sorbonne. Among his works are a study of Cotton Mather (1891), *A Literary History of America* (1900), the outgrowth of the first course in the subject at Harvard, and *The Traditions of European Literature* (1920). See M. A. De W. Howe, *Barrett Wendell and His Letters* (1924).

Wendell, (wĕn'dŭl) **1** Village (pop. 1,001), S Idaho, NW of Twin Falls. **2** Town (pop. 1,132), E central N C., E of Raleigh, in a tobacco area, settled c.1890, inc. 1903.

Wenden, Latvia: see CESIS.

Wends (wĕndz) In the Middle Ages, the term Wends was applied to all the SLAVS then inhabiting Germany E of the Elbe. German conquest of their lands was begun in the 8th cent. under Charlemagne, but early in the 12th cent. the Wends rebelled, destroyed the German settlements, and burned Lübeck. A crusade was called against the pagan Wends and was launched in 1147 under the leadership of HENRY THE LION of Saxony and ALBERT THE BEAR of Brandenburg. The crusade was, on the whole, a failure, but in subsequent years Henry the Lion, aided by Waldemar I of Denmark, Albert the Bear, and other princes, carried out a systematic campaign of conquest. By the end of the 12th cent. nearly all Germany ex-

cept East Prussia had been subjected to German rule and Christianized. However, a small group of Slavic-speaking Wends has maintained itself to the present day in LUSATIA, a region situated on both sides of the Spree river and divided among Saxony, Silesia, and Brandenburg. The term Sorbs (cognate with Serbs) is sometimes used interchangeably with Wends, but properly the Sorbs were one of the Wendish nations, settled between the Elbe and Saale rivers.

Wengen (vĕng'un), summer and winter resort, Bern canton, Switzerland. The near-by **Wengern Alp** (vĕng'ûrn alp'), at 6,160 ft., has a beautiful view of the Jungfrau.

Wenham (wĕ'nûm), town (pop. 1,220), NE Mass., settled 1635, set off from Salem 1643. It still has houses dating from the 17th and 18th cent.

Wenlock, municipal borough (pop. 14,149), Shropshire, England. It includes Much Wenlock, Broseley, Coalport, Madeley, Ironbridge, and Coalbrookdale and has limestone quarries, coal mines, and ironworks. A convent, established here c. 680, was refounded in 1080 as a Cluniac priory; there are remains of the ancient buildings. The old guildhall now houses a museum.

Wenonah (wĭnō'nù), borough (pop. 1,311), SW N.J., S of Camden; inc. 1883.

Wentworth, Benning, 1696–1770, colonial governor of New Hampshire, b. Portsmouth, N.H., grad. Harvard, 1715. Of a prominent merchant family, he served in the New Hampshire colonial assembly and on the council, laboring, with his brother-in-law, Theodore Atkinson, to make New Hampshire completely independent of Massachusetts. When the separation was finally achieved, Wentworth was appointed (1741) governor, the first for the colony of New Hampshire alone. New Hampshire and Wentworth himself prospered during his governorship. With no legal justification he granted vast acres of land W of the Connecticut river in the region claimed by New York, taking care of himself, his relatives, and his friends in the process. The NEW HAMPSHIRE GRANTS, which later became the state of VERMONT, thus became a much-disputed area. A stout defender of the royal prerogative, Wentworth prorogued the assembly so that delegates could not be elected to the Stamp Act Congress of 1765. By that time there were loud complaints about the nepotism of his administration. He was also criticized in his capacity as surveyor of His Majesty's Woods in North America, and the British colonial office accused him of neglecting his correspondence. Permitted to resign (1765), he was succeeded both as governor of New Hampshire and surveyor of the king's woods by his nephew, Sir John Wentworth. Bennington, Vt., took its name from his first name.

Wentworth, Sir John, 1737–1820, colonial governor of New Hampshire, b. Portsmouth, N.H., grad. Harvard, 1755. He went to England on business for his wealthy merchant father and there became (1763) one of the agents for New Hampshire. On the forced resignation of his uncle, Benning Wentworth, he was commissioned (Aug., 1766) to succeed him both as governor of New Hampshire and as surveyor of His Majesty's Woods in North America. Assuming the governorship in June, 1767, Wentworth was at first popular because of his interest in the advancement of the colony and his opposition to the hated taxes imposed by Parliament. However, he was thoroughly loyal to the king and prorogued the assembly when it attempted to form (1774) a committee of correspondence. On the outbreak of the American Revolution, he was forced to flee to Boston, and after the British evacuated that city he went to Halifax, Nova Scotia, and then to England. In 1783 he was reappointed surveyor of what remained of the king's woods in North America, and from 1792 to 1808 he was governor (although he only had the title of lieutenant governor) of Nova Scotia. He was knighted in 1795. While governor of New Hampshire, Wentworth had granted (1769) Dartmouth College its charter and was a member of its original board of trustees. See L. S. Mayo, *John Wentworth, Governor of New Hampshire, 1767–1775* (1921); W. C. Abbott, *Conflicts with Oblivion* (1924).

Wentworth, Thomas: see STRAFFORD, THOMAS WENTWORTH, 1ST EARL OF.

Wentworth, William Charles, 1793–1872, Australian patriot. He explored the Blue Mts. in Australia before going to Cambridge Univ. He published (1819) *A Description of Australia*, was called to the English bar (1822), and returned to Australia. There he set up a lucrative law practice, championed the cause of the "emancipists" (liberated convicts), and founded (1824) a newspaper, the *Australian*, to promulgate his views on Australian self-government. Meanwhile his *Australasia, an Ode*, appeared in 1823. Wentworth took a prominent part in the legislative council of New South Wales, formed in 1842, and was the leading figure in the fight for the constitution of 1855. In 1849 he put through the bill for the founding of the Univ. of Sydney. After 1857 he resided mainly in England.

werewolf (wĕr'wŏōlf", wûr'–), human being transformed into a wolf. Such a creature is also called turnskins and, in France, the *loupgarou* (see LYCANTHROPY).

Werfel, Franz (frants' vĕr'ful), 1890–1945, Austrian novelist, dramatist, and poet, b. Prague. His philosophy of the brotherhood of man and his mysticism have been expressed in lyric verse, in expressionist and conventional plays, and in epic novels which have become internationally famous. He left Austria after the Nazi occupation, and following the fall of France escaped to the United States, where he died. Besides several volumes of lyrics, of which a translated selection was published in 1946, his work includes the dramas *Bockgesang* (1921, Eng. tr., *Goat Song*, 1926, produced in New York), *Juarez und Maximilian* (1924, Eng. tr., 1936, also produced in New York), *Paulus unter den Juden* [Paul among the Jews] (1926), and *Das Reich Gottes in Bohmen* [the kingdom of God in Bohemia] (1930), the comedy *Jacobowsky und the Colonel* (English adaptation by S. N. Behrman, 1944, produced in New York, original, *Jacobowsky und der Oberst*, published 1945), and the novels *Verdi* (1924, Eng. tr., 1925) and *Die Geschwister von Neapel* (1931, Eng. tr., *The Pascarella Family*, 1932). He is best known in the United States for *Vierzig Tage des Musa Dagh* (1933, Eng. tr., *The Forty Days of Musa Dagh*, 1934) and *Das Lied der Bernadette* (1941, Eng. tr., *The Song of Bernadette*, 1942), which was filmed in 1943 and dramatized in 1946.

Werff, Adrian van der (ä'drēən van dur vĕrf'), 1659–1722, Dutch figure and portrait painter and engraver. He was court painter and pensioner of the elector palatine, and his academic paintings were highly prized by contemporaries. A self-portrait (National Gall., London), *Adam and Eve* (Louvre), and *Leda* (Metropolitan Mus.) are characteristic works.

Wergeland, Henrik (hĕn'rĭk vĕr'gulän), 1808–45, Norwegian poet, novelist, and patriot. From his earliest youth he was a champion of liberty and international cooperation and worked zealously to arouse a national morality and sense of responsibility for social improvement. His *Creation, Man, and Messiah* (1830), a long verse drama, was a manifesto of his beliefs. In his poems *The Jew* (1842) and *The Jewess* (1844) he espoused the cause of the Jews who sought admittance to Norway. The dramatic epic *The English Pilot* (1844) was composed during his last illness. His final aim was the liberation of the human mind. See Halvdan Koht and Sigmund Skard, *The Voice of Norway* (1944).

wergild: see COMPOSITION.

Werner, Abraham Gottlob (ä'brahäm gôt'lōp vĕr'nur), 1750–1817, German geologist. In 1775 he became inspector and teacher in the mining academy at Freiberg which through his efforts became one of the leading schools in Germany. In the last part of the 18th cent. he was the most notable figure in the investigation of rocks and minerals; he called the new science geognosy and defined it as the study of the layers of mineral matter. He was the first to classify minerals systematically. According to his theory of neptunism, the earth was originally an ocean of water from which were precipitated the solid rocks now forming most of the dry land. Although much of his theory has been rejected, geology is indebted to him for the application of chronology to rock formations, as well as for his precise definitions.

Werner, Alfred (älˈfrāt vĕr'nur), 1866–1919, Swiss chemist, b. Mulhouse. He taught at the Univ. of Zurich from 1893. He is known especially for his research on the linking up of atoms in the molecule (important in the development of the study of isomerism), for which he received the 1913 Nobel Prize in Chemistry.

Werner, Anton Alexander von (än'tōn älĕk'sän'dur fûn vĕr'nur), 1843–1915, German historical painter, portraitist, and illustrator. He was director (1875–1915) of the Berlin Academy. In the Franco-Prussian War he accompanied the 3d Army Corps in an unofficial capacity as painter. Of this period are his portrait of Von Moltke, *In Quarters before Paris*, and *Episode of War*. His best-known illustrations are those for Scheffel's poems.

Werner, Zacharias (Friedrich Ludwig Zacharias Werner) (tsäkhärēˈäs), 1768–1823, German dramatist. After a life of dissipation bordering on insanity, he was converted to Roman Catholicism and became a priest of intense piety. His plays, which founded the "fate-tragedy" school, include *Die Söhne des Thals* (1803–4, Eng. tr., *The Sons of the Valley*, 1903); the very popular *Martin Luther, oder, Die Weihe der Kraft* [Martin Luther, or, the consecration of strength] (1807), which, after his conversion to Catholicism, he repudiated in the allegorical poem *Die Weihe der Unkraft* [the consecration of weakness] (1813), *Attila* (1808), and *Der Vierundzwanzigste Februar* (1815, Eng. tr., *The 24th of February*, 1844).

Wernersville (wûr'nurzvĭl), borough (pop. 1,160), Berks Co., SE Pa., W of Reading. It is a resort and farm trade center. Limestone is quarried here.

Wernher der Gartenaere (vĕr'nûr dĕr gär'tünärə), 13th-century German poet of knightly rank. He wrote in Middle High German the first peasant epic, *Meier Helmbrecht*, a realistic, slightly moralizing poem of a young farmer who became a highwayman and was hanged by the peasants. See C. H. Bell, *Peasant Life in Old German Epics* (1931).

Wernigerode (vĕrnēgurōˈdu), town (pop. 33,800), in the former Saxony prov. of Prussia, E Germany, at the northern foot of the Harz, after 1945 in Saxony-Anhalt. A picturesque old town founded in the 9th cent., it is a tourist center for the Harz region. It has metal- and woodworking industries, paper mills, and manufactures of chemicals, electric motors, leather goods, and chocolate. There are a medieval castle, a Romanesque church, and a 15th-century town hall.

Werrenrath, Reinald (waˈrunrăth"), 1883–, American baritone and voice teacher, b. Brooklyn, N.Y., grad. New York Univ., 1905. He made his concert debut in 1907 and appeared (1919–21) with the Metropolitan Opera Company. He has taught in numerous universities and conservatories, as well as privately in New York, and is also known as a choral conductor.

Werschetz, Yugoslavia: see VRSAC.

Wertenbaker, Thomas Jefferson (wûr'tunbākur), 1879–, American historian, b. Charlottesville, Va., grad. Univ. of Virginia (B.A. and M.A., 1902, Ph.D., 1910). He taught history at the Agricultural and Mechanical College of Texas (1907–9) and at the Univ. of Virginia (1909–10). After 1910 he taught at Princeton Univ. He is a specialist in the colonial history of Virginia, having written *Virginia under the Stuarts* (1914), *Patrician and Plebeian in Virginia* (1916), and *Planters of Colonial Virginia* (1922). His other books on the South include *Norfolk—Historic Southern Port* (1931) and *The Old South—the Founding of American Civilization* (1942). His general histories of the United States are *The American People* (1926) and *The United States of America* (with Donald E. Smith, 1931). He also wrote *The Puritan Oligarchy* (1947) and *Father Knickerbocker Rebels. New York City during the Revolution* (1948). In 1939–40 he occupied the chair in U.S. history established at Oxford Univ. for visiting American scholars.

Wertheimer, Max (maksˈ vĕrt'hĭmur), 1880–1943, German psychologist, b. Prague. He studied at the universities of Prague, Berlin, and Wurzburg (Ph.D., 1904). His original researches, while he was a professor at Frankfurt and Berlin, placed him in the forefront of contemporary psychology. With the advent of Hitler he came to the United States, where he immediately joined the graduate faculty of the New School for Social Research; he was also visiting lecturer (1934) at Columbia Univ. Wertheimer's discovery (1910–12) of the *phi phenomenon* (concerning the illusion of motion) gave rise to the influential school of Gestalt psychology. His early experiments, in collaboration with Wolfgang Kohler and Kurt Koffka, introduced a new approach (macroscopic as opposed to microscopic) to the study of psychological problems. In the latter part of his life he directed much of his attention to the problem of learning; this research resulted in a book posthumously published, called *Productive Thinking* (1945).

Wesel (väˈzul), town (1939 pop. 24,632; 1946 pop. 13,262), in the former Rhine Prov. of Prussia, NW Germany, in the Ruhr district. It is a port on the Rhine near the mouth of the Lippe river, and it has an iron foundry and machinery and locomotive plants. Chartered in the 13th cent., it was a member of the Hanseatic League. Wesel retained many interesting medieval structures until its virtual destruction (Feb., 1945) in the Second World War. In March, 1945, the Allies crossed the Rhine at Wesel in a major amphibious and air-borne operation.

Weser (väˈzur), river, c. 300 mi. long, formed at Munden, NW Germany, by the junction of the Fulda and Werra rivers. It flows generally N past Hameln and Minden, where it passes through the Porta Westphalica into the north German plain. It enters the North Sea through a long estuary below Bremen. Navigable in its entire length, the Weser is connected by the Mittelland canal system with the Rhine, the Ems, and the Elbe.

Wesermünde, Germany: see BREMERHAVEN.

Weslaco (wĕsˈläkō), city (1940 pop. 6,883, 1947 estimated pop. 9,100), extreme S Texas, WNW of Brownsville, in 1921. In the irrigated region of the lower Rio Grande valley, it packs and cans vegetables and citrus fruits; has a box factory, and is the seat of a Federal fruit and vegetable laboratory.

Wesley, Charles (wĕsˈlē), 1707–88, English Methodist preacher, one of the most famous of hymn writers. When, as a student at Oxford, he devoted himself to systematic study and to the regular practice of religious duties, he and the companions whom he persuaded to adopt the same orderly course were taunted as Methodists. They formed a society, sometimes referred to as the Holy Club, of which his older brother John WESLEY became the leader in 1729. Charles Wesley was ordained in the Church of England in 1735, and the same year both brothers sailed for Georgia, the younger to act as secretary to James Oglethorpe. The following year, however, he returned to England in

ill-health After experiencing evangelical conversion in May, 1738, he began writing hymns and preaching at the great revival meetings led by the two Wesleys and George Whitefield For 17 years Charles made continual evangelistic journeys, but after 1756 he worked mainly in Bristol and London He was firmly opposed to all suggestion of separation from the Church of England He produced about 6,500 hymns, many of which are still used in Protestant churches, among the best known are *Hark! the Herald Angels Sing* and *Jesu, Lover of My Soul* Two of Charles's sons were organists and composers. See his journal (ed by Thomas Jackson, 1849), biographies by John Telford (1887) and F L Wiseman (1932)

Wesley, John, 1703–91, English evangelical preacher, founder of METHODISM, b Epworth, Lincolnshire He was ordained a deacon in the Church of England in 1725, elected a fellow of Lincoln College, Oxford, in 1726, and ordained a priest in 1728 At Oxford he took the lead (1729) in a group of students gathered around his younger brother, Charles WESLEY, and derisively called Methodists for their methodical devotion to study and to religious duties In 1735 the Wesleys accompanied James Oglethorpe to Georgia, John to serve there as a missionary and Charles to act as secretary to Oglethorpe Although John Wesley stayed less than two years, he was deeply influenced by Moravian missionaries in the colony, upon his return to England he associated with Moravians there On May 24, 1738, at a meeting of a small religious society in Aldersgate St, London, Wesley experienced an assurance of salvation through faith in Christ alone This conviction formed the basis of his message to the world for the rest of his life He soon entered upon his lifelong evangelistic work, in the course of which he is said to have preached some 40,000 sermons and to have traveled some 250,000 mi, mostly on horseback His faithfully kept journal has been likened to a guidebook to the British Isles Persuaded by George WHITEFIELD, Wesley undertook open-air or field preaching, first in Bristol, then elsewhere In 1739 a group in London requested him to aid them in forming a society and to act as their leader An old foundry at Moorfields was purchased, which remained until 1778 the center of Methodist work in London Wesley repudiated (c 1740) the doctrines of Calvin, which led to a break with Whitefield, although the personal friendship of the two Methodist leaders remained firm In 1784 Wesley executed the deed of declaration by which the Methodist societies became legally constituted and which was in essence the charter of the Wesleyan Methodists That same year he became convinced that he must ordain a superintendent to administer sacraments and to serve the Methodist societies in America, although he had long hesitated to assume the authority of ordination Wesley ordained Dr Thomas COKE to this office, Francis ASBURY was to serve as associate superintendent It was not Wesley's intention to found a separate church, but toward the end of his life the Methodist Episcopal Church had come into existence in America, and it had become apparent that in England the Methodists could not work within the Anglican church Therefore, he made plans for his societies to go on independently after his death, although both Wesleys remained clergymen of the Church of England to the end of their lives During John Wesley's later years admiration and affection largely replaced the buffeting, ridicule, and rejection which he had endured in earlier days His gifted religious leadership and great ability as an organizer were widely acknowledged A memorial tablet to the Wesleys was placed in Westminster Abbey, but neither is buried there The brothers published over 20 collections of hymns See John Wesley's letters (ed by John Telford, 8 vols, 1831), the standard edition of his journal (ed by Nehemiah Curnock, 8 vols, 1909–16), biographies by J S Simon (1927), C E Vulliamy (1930), and Umphrey Lee (1936)

Wesleyan College see MACON, Ga

Wesleyan Methodist Church (wĕs'lēăn), the branch of METHODISM developed in England after the death of John WESLEY by his followers, who at the Conference of 1791 engaged "to follow strictly the plan" he had left to them Various secessions from this main body took place, but in 1932, by the merging of the Primitive Methodists and the United Methodists with the Wesleyan Methodists, the denominations in England were reunited

Wesleyan University, at Middletown, Conn, nonsectarian, for men (coeducational 1872–1912), chartered and opened 1831 by Methodists It is a liberal arts college noted for its alumni and faculty Judd Hall has a science museum. There is a print collection The first state agricultural experiment station was here in 1875–77. See FISK, WILBUR, and JUDD, ORANGE. See C F Price, *Wesleyan's First Century* (1932)

Wesleyville (wĕs'lēvĭl), borough (pop. 2,918), NW Pa, on Lake Erie NE of Erie, settled 1797, laid out 1828, inc 1912 It was named for John Wesley The industries of Wesleyville include flour milling and manufacture of electrical parts.

Wessel, Johann (yō'hän vĕ'sŭl), c 1420–1489, Dutch theologian and pre-Lutheran reformer, also known as Wessel Harmenss Gansfort or Goesevoyrd He was one of the Brethren of the Common Life, having had his early instruction among them at Zwolle, though he rejected their narrowness of view. From c 1470 he lived at Paris, where he was known for his teachings His latter years (from 1479) were spent in Holland, partly in Groningen, partly near Zwolle, in the midst of friends and pupils His writings now extant belong to that period and are made up chiefly of short treatises After his death his manuscripts were gathered together and sent to Luther and Zwingli Some were collected under the title *Ferrago uberrima* (1522–23) While he looked backward to Augustine and Bernard, he also had views that prefigured the great Reformation in Germany He regarded the Scriptures as the sole repository of truth and rejected the decrees of church councils, though accepting papal authority

Wessex (wĕ'sĭks), Anglo-Saxon kingdom in ENGLAND It may have been settled by Saxons under Cerdic on the Avon in S Wiltshire as early as 494 Cerdic's grandson, Ceawlin (560–592?), annexed scattered Saxon settlements in the Chilterns and drove out the Celts from the region between the upper Thames valley and the lower Severn But Ceawlin himself was finally expelled from Wessex, and until the end of the 8th cent the country was overshadowed successively by KENT, NORTHUMBRIA, and MERCIA In the period 685–88 King Caedwalla conducted several successful campaigns, and in the following reign, Ine consolidated the western expansion through Somerset and wrung tribute from Kent His law code and his alliance with the Church forecast the later great Wessex, but anarchy followed his death. Egbert (802–39) in a series of brilliant campaigns defeated Mercia, forced Northumbria to sue for peace, and annexed Devon, Sussex, Essex, and Kent Mercia regained its independence in 830, and Egbert's successors were constantly occupied in combating the increasing raids of the Danes With the reign of ALFRED (871–99?) and the halting of the Danes, the history of Wessex becomes that of England Edward the Elder (899?–924), Athelstan (924–39), Edmund (939–946), and Edred (946–955) gradually acquired firm control over all England, including the Danelaw This unity ended, however, after the quiet reign of Edgar the Peaceful (959–75), for Æthelred (978–1016) could offer no effective resistance to the invading vikings Canute established Danish rule in 1016 The end of his line caused the recall of Edward the Confessor (1042–66), last of the line of Alfred. In the novels of Thomas Hardy, Wessex is used to mean mainly Dorsetshire

Wessington Springs, city (pop 1,352), co seat of Jerauld co, SE S Dak, NW of Mitchell in the Wessington Hills, founded 1880 It is a trade and shipping center for a farm area

West, Benjamin, 1738–1820, American historical painter in England He was born in Springfield, Pa, in a house that is now a memorial museum at Swarthmore College His parents were Quakers After some instruction from a local artist named William Williams, he set up as a portrait painter in Philadelphia at 18, subsequently moving to New York In 1760 he went to Europe, where he remained for the rest of his life For three years he studied and practiced his art in Italy and then settled in London as a historical painter, meeting with almost immediate success Under the patronage of George III, commissions came to him in great numbers, and in 1772 he was appointed historical painter to the king He was one of the founders of the Royal Academy and in 1792 succeeded Sir Joshua Reynolds as its president West executed over 400 canvases, chiefly historical, mythological, and religious subjects painted on a heroic scale They show considerable skill in composition, but are monotonous in coloring and lack vigor His great popularity as a painter passed with his death He had many pupils and was a generous friend and adviser to younger artists, particularly American painters studying in England, among whom were Washington Allston, Samuel Morse, Charles Willson Peale, Gilbert Stuart, and John Singleton Copley His influence on American painting of the period was predominant Among West's best-known works are *Death of General Wolfe* (Grosvenor Gall, London), in which he clothed his figures in the costume of their period instead of in traditional classical garb, thereby creating a new departure in historical painting, *Penn's Treaty with the Indians* (Independence Hall, Philadelphia), and *Hagar and Ishmael* (Metropolitan Mus). He is well represented in the Pennsylvania Academy of the Fine Arts, the National Gallery of London, and Hampton Court Palace. His religious paintings are in various English churches and chapels See studies by John Galt (1816) and Henry E Jackson (1900).

West, Rebecca, 1892–, English novelist and critic, whose real name is Cicily Fairfield, b. Ireland She is a literary critic and political writer for American and British journals. Her novels are detailed studies of the psychology of the individual and include *The Return of the Soldier* (1918), *The Judge* (1922), and *The Thinking Reed* (1939) Her critical work includes essays in *The Strange Necessity* (1928) and studies of Henry James (1916) and St Augustine (1933) *Black Lamb and Grey Falcon* (1942) is an extraordinary travel book, political study, and commentary on Jugoslavia The *Meaning of Treason* (1947) is based on her reports of treason trials growing out of the Second World War. Since 1930 she has been married to Henry Maxwell Andrews.

West, Thomas see DE LA WARR, THOMAS WEST, BARON.

West, city (pop 1,979), E central Texas, N of Waco, in the blackland farm belt, settled 1878, inc 1894.

West Allis, city (pop. 36,364), SE Wis, industrial and residential suburb of Milwaukee, inc 1906. Machinery and industrial gases are made

West Baden Springs (bă'dĭn), village (pop 949), S Ind, on Lost River and near French Lick Its mineral springs made it a noted resort for many years. West Baden College, a branch of Loyola Univ, Chicago, is here

West Bend, industrial city (pop 5,452), co seat of Washington co, E Wis, NW of Milwaukee and on the Milwaukee river, settled 1844, inc 1885. Aluminum ware and leather products are made.

West Blocton, town (pop 1,317), central Ala, SW of Birmingham, in the industrial region

Westboro, town (pop 6,463), E central Mass, E of Worcester, settled c 1675, inc 1717. Abrasives and shoes are produced. Eli Whitney was born here

West Boylston, town (pop 1,822), central Mass, N of Worcester, settled 1642, inc 1808 In 1905 part of the town was used for Wachusett Reservoir

West Branch, city (pop 1,962), co seat of Ogemaw co, N Mich, on the West Branch of the Rifle river and E of Cadillac, inc as a village 1885, as a city 1905 Dairy products are made, and there are oil wells An annual festival marks the opening of the trout-fishing season here

West Bridgewater, town (pop 3,247), SE Mass, S of Boston, settled 1651, set off from Bridgewater 1822 Massasoit's deed to the settlers is in the historical museum

West Bromwich (brŭm'ĭj, -ĭch, brŏm'wĭch), county borough (1931 pop 81,303, 1947 estimated pop 85,480), Staffordshire, England, NW of Birmingham On the site of a 12th-century Benedictine priory, the town is of modern growth, with iron and coal mines, foundries, and electrical engineering and chemical works

Westbrook, 1 Town (pop 1,159), S Conn, on Long Island Sound, settled c 1664, inc 1840 2 City (pop 11,087), SW Maine, industrial suburb W of Portland, inc as a town 1814, city charter adopted 1891

West Brookfield, town (pop 1,387), S central Mass, W of Worcester, settled 1664, set off from Brookfield 1848

West Brownsville, borough (pop 1,844), SW Pa, on the Monongahela and SE of Pittsburgh, laid out 1831, inc c 1852 Coal mining is done here James G Blaine was born here

West Burlington, town (pop 1,323), SE Iowa, adjoining Burlington, founded 1883 It has railroad shops There is a fine Catholic grotto

Westbury, residential village (pop 4,524), on W Long Island, SE N Y, E of Mineola, settled 1650, inc 1932 Automobile races are held here

Westby, city (pop 1,438), W Wis, SE of La Crosse, in a tobacco and dairy region, inc 1920. It is in the Coon Creek soil conservation district

West Caldwell, borough (pop 3,458), NE N J, near the Passaic NW of Newark, inc 1904

West Carrollton, village (pop 2,176), SW Ohio, on the Great Miami and SW of Dayton.

West Carthage (kar'thĭj), village (pop 1,767), N N.Y, E of Watertown, inc 1888

Westchester, county, SE N Y, bounded by New York city, the Hudson, Putnam co, Connecticut, and Long Island Sound It includes residential suburbs of New York city, country estates, and much hilly woodland having lakes and streams and crossed by fine parkways The county seat is White Plains, and there are five other cities, Yonkers, Mt Vernon, New Rochelle, Peekskill, and Rye.

West Chester, industrial borough (pop 13,289), co. seat of Chester co, SE Pa, W of Philadelphia, laid out 1786, inc 1799. It is a trade center for a large farming and dairying region. Lumber, metal products, and canned goods are produced It is the seat of a teachers college. The battle of Brandywine was fought in the environs (1777).

West Chicago, city (pop. 3,355), NE Ill, N of Aurora; inc. 1906. The city has railroad shops and factories making rare earth chemicals and building materials

West City, village (pop 1,017), S Ill., N of Herrin, in a coal and farm area, inc 1911

West Columbia. 1 Town (pop 1,744), central S.C., a suburb of Columbia, named Brookland till 1938. 2 City (pop 1,573), S Texas, near the Brazos and SSW of Houston, founded 1826. With neighboring East Columbia, it was a center of plantations in Stephen F Austin's colony and was briefly (1836) capital of the Texas republic, later it declined until rich oil fields were developed in the 20th cent.

West Conshohocken (kŏn″shûhŏ′kŭn), borough (pop. 2,464), SE Pa., on the Schuylkill river and NW of Philadelphia, settled 1850, inc. 1874.

Westcott, Brooke Foss, 1825–1901, English prelate and scholar. From 1870 to 1890 he was regius professor of divinity at Cambridge and a member of the New Testament Revision Committee (1870–81). With F. J. A. Hort, he published *The New Testament in the Original Greek* (1881). He was a canon of Westminster and, from 1890 to 1891, bishop of Durham. Among his many published works are *Introduction to the Study of the Gospels* (1860), *History of the English Bible* (1869), *Social Aspects of Christianity* (1887), and *Some Lessons of the Revised Version of the New Testament* (1897).

Westcott, Edward Noyes, 1846–98, American novelist and banker, b. Syracuse, N.Y. His one novel was written as he was ill with tuberculosis and was published posthumously as *David Harum* (1898). This story of a homespun American banker who also traded horses was immediately popular and has since been made into a play and a moving picture.

West Covina (kōvē′nu), residential city (1940 pop. 1,072, 1947 special census pop. 2,475), in El Monte township, S Calif., E of Los Angeles, in a farm area, inc. 1923.

West Des Moines (dŭ moin′), city (pop. 4,252), S central Iowa, a suburb of Des Moines, inc. 1893 as Valley Junction, renamed 1938. Cement is made.

West Dundee (dŭndē′), village (pop. 1,831), NE Ill., on the Fox river and NW of Chicago, settled in the 1830s, inc. 1887.

West Easton, borough (pop. 1,159), E Pa., near Easton, inc. 1890.

West Elizabeth, borough (pop. 1,297), SW Pa., on the Monongahela and SSE of Pittsburgh, laid out 1833, inc. 1848.

Westerly, town (pop. 11,199), extreme SW R.I., between the Pawcatuck river and Block Island Sound, inc. 1669. It includes the villages of Westerly (on the Pawcatuck, with a bridge to Connecticut built in 1932), Avondale, and Watch Hill (a resort badly damaged by the 1938 hurricane, site of a lighthouse and a U.S. coast guard station). Furniture, printing machinery, twine, granite, and textiles are produced.

Westermann, William Linn (wĕ′stŭrmun), 1873–, American professor, b. Belleville, Ill., grad. Univ. of Nebraska (B.A., 1894, M.A., 1896) and Univ. of Berlin (Ph.D., 1902). He taught (1902–3) Latin and Greek at the Univ. of Missouri before teaching history at the Univ. of Minnesota (1906–8), the Univ. of Wisconsin (1908–20), and Cornell Univ. (1920–23). After 1923 he taught at Columbia, becoming in 1948 professor emeritus. He served on international peace commissions concerned with Near Eastern affairs, contributed to various historical and philological journals, and edited *Westermann's Classical and Historical Map Series* (1918). He collaborated in writing a series of four volumes on Greek papyri (1926–40) and wrote *The Story of the Ancient Nations* (1912) and *Upon Slavery in Ptolemaic Egypt* (1929).

Westermarck, Edward Alexander (vĕ′stŭrmark, wĕ′–), 1862–1939, Finnish anthropologist. He was professor of sociology at the Univ. of London (1907–30) and professor of philosophy at the Univ. of Turku (until 1945). Westermarck was an authority on the history of morals and of marriage customs, his best-known work being *The History of Human Marriage*, written in English (1891, 5th ed., 3 vols., 1921). On it he based *A Short History of Marriage* (1926). He wrote several books on Moroccan customs. Other books (all in English) include *The Origin and Development of the Moral Ideas* (2 vols., 1906–8, 2d ed., 1912–17), *Ethical Relativity* (1932), *The Future of Marriage in Western Civilization* (1936), and *Christianity and Morals* (1939). See his autobiography (Eng. tr., 1929).

Western Australia, state (975,920 sq. mi.; pop. 502,731), Australia, comprising the entire western part of the continent. Perth is the capital. Northern Territory and South Australia are on the east, the Indian Ocean is on the south, west, and north. Western Australia is the largest state of the commonwealth, but only the southwest corner is fertile and substantially settled, the rest being arid and scarcely habitable. State-owned gold fields cover more than half of the state, and there is a vast central desert. Kalgoorlie and Boulder is the principal gold-mining center in the interior. The King Leopold, Hamersley, and Stirling ranges are not real ranges, but merely high plateaus. The large lakes in the interior are usually dry, the northern rivers, such as the Fortescue, the Fitzroy, and the Ashburton, are intermittent, and the only important river is the Swan in the southwest. The climate is diversified, being tropical in the north and temperate in the southwest. Wool, wine, wheat, fruit, and hardwood are the principal products, and pearling is an important industry in the north, with its center at Broome. The chief port, Fremantle, exports gold, grain, lumber, and dairy products. Dirck Hartog, a Dutchman who came in 1616, was the first white man known to have visited the coast. A penal colony was established at Albany in 1826, the first free settlement was established in the Perth-Fremantle area in 1829, and until 1831 Western Australia was governed by New South Wales. In 1901 the colony became one of the states of the Commonwealth of Australia.

Western College: see OXFORD, Ohio.

Western Dvina, river: see DVINA.

Western Empire: see *Roman Empire* under ROME and see CHARLEMAGNE.

Western Ghats: see GHATS.

Western Islands: see HEBRIDES.

Western Ontario, University of: see LONDON, Ont.

Westernport, town (pop. 3,565), NW Md., on the North Branch of the Potomac and SW of Cumberland, in a coal-mining region, settled c. 1790. Many pre-Revolutionary expeditions into the Ohio country set out from here.

Western Reserve, tract of land in NE Ohio, on the south shore of Lake Erie, reserved by Connecticut when it ceded (1786) the rest of its claims to its western lands (see NORTHWEST TERRITORY). Connecticut gave (1792) one half million acres, called "fire lands," to its citizens whose lands were burned during the Revolution. The Connecticut Land Company bought (1795) the remainder, which had no permanent government until 1800, when it was incorporated in the Northwest Territory as Trumbull co. Later, this region was divided into 10 whole counties and fractions of 4 others. The chief cities here are Akron, Ashtabula, Cleveland, Lorain, Sandusky, and Youngstown. See Alfred Mathews, *Ohio and Her Western Reserve* (1902), H. H. Hatcher, *Western Reserve* (1949).

Western Reserve University, at Cleveland, nonsectarian, for men and women, chartered and opened 1826 as a college at Hudson, Ohio. It added a medical college at Cleveland in 1843, moved in 1882, and became a university in 1884. It includes coordinate colleges—Adelbert (for men, the old Western Reserve College) and Flora Stone Mather (for women, 1888). It also has schools of architecture, dentistry, law, library science, medicine, nursing (graduate), pharmacy, and applied social sciences, Cleveland College is the downtown center. There is a medical museum of anthropology and anatomy.

Western Samoa, Territory of see SAMOA.

Western Springs, residential village (pop. 4,856), NE Ill., just W of Chicago, inc. 1886.

Westerville, village (pop. 3,146), central Ohio, NE of Columbus, settled c. 1810, inc. 1858. It is the seat of Otterbein College (United Brethren, coeducational, 1847). The home of Benjamin R. Hanby, author of *Darling Nellie Gray*, was dedicated (1937) as a memorial and museum.

West Fairview, borough (pop. 1,820), SE Pa., on the Susquehanna and near Harrisburg, laid out 1815.

Westfalen, Germany: see WESTPHALIA.

Westfield. **1** City (pop. 18,793), SW Mass., on the Westfield river and W of Springfield, settled c. 1660, set off from Springfield 1669, inc. as a city 1920. Bicycles and metal and paper products are made here. The city has a state teachers college. **2** Residential town (pop. 18,458), NE N.J., SW of Newark, settled before 1700, inc. 1903. See R. V. Hoffman, *The Olde Towne, 1700–1894* (1937). **3** Village (pop. 3,434), W N.Y., near Lake Erie SW of Dunkirk, in a grape region, settled 1800, inc. 1833. It is noted for its grape-juice industry. **4** Borough (pop. 1,386), N Pa., near Wellsboro, inc. 1867.

West Flanders, Flemish *West-Vlaanderen*, Fr. *Flandre Occidentale* province (1,249 sq. mi.; pop. 990,873), NW Belgium, bordering on France. Bruges is the capital. It is a generally level region. Its fertile and well-cultivated soil, drained by the Lys and the Yser and many small canals, produces wheat, oats, and flax. Livestock raising and dairying are important occupations, as is fishing along the North Sea coast, notably at Ostend and Nieuport. Courtrai is the chief center of the textile industry. Other cities include Ypres, Zeebrugge, and Roulers. The population is mainly Flemish-speaking. For history, see FLANDERS.

West Florida Controversy. The Treaty of Paris in 1763 confirmed France's transfer in 1762 of Louisiana to Spain, except for that portion lying from the Mississippi E to the Perdido river, this eastern section (exclusive of the island of Orleans, which went to Spain) was ceded to Great Britain. Great Britain also received the Spanish colony of Florida. E Louisiana and Florida were combined and were augmented by a strip of territory to the north, the strip containing the Yazoo lands, long in dispute but generally recognized as British (see YAZOO LAND CLAIMS). This new unit was divided for administration into East Florida (the present state of Florida) and West Florida (the strip on the Gulf coast). When, after the American Revolution, Great Britain ceded Florida back to Spain, it was with a secret agreement between Americans and British that the Yazoo lands should go to the United States. The result was a quarrel between the United States and Spain, complicated further by an even more serious dispute over navigation of the Mississippi. After years of unsuccessful negotiation the treaty concluded (1795) by Thomas Pinckney fixed the northern boundary of West Florida at lat. 31° N. The question of West Florida was not settled. The Treaty of SAN ILDEFONSO transferred Louisiana back to France, but it did not set the limits of Louisiana in the east or in the west, defining them only as those that the colony had under Spain and formerly had under France—different boundaries. When, with the LOUISIANA PURCHASE (1803), that colony passed into the possession of the United States, the boundaries with Texas and with West Florida became vital diplomatic issues. There was dispute as to whether the Perdido, the East Pearl river (in present Louisiana), or the Mississippi was the proper boundary between Louisiana and Spanish territory. In Jefferson's administration the Spanish minister, the marqués de Casa Yrujo, carried on long negotiations with the American government, and Charles Pinckney attempted to arrive at some solution by negotiations in Spain, but to no avail. The possibility of armed strife was increased by the activities of American adventurers like Reuben KEMPER, but the Napoleonic conquest of Spain eclipsed all such colonial issues. In 1810 the United States by occupation made good its claim to the land between the Mississippi and the East Pearl and, in 1813, also to the land between the East Pearl and the Perdido. After this seizure the territories remained American. The theoretical issue remained unsettled until the purchase of Florida by the United States in 1819. See I. J. Cox, *The West Florida Controversy, 1798–1813* (1918).

Westford, textile town (pop. 3,830), NE Mass., SW of Lowell, settled 1653, set off from Chelmsford 1729. It has an apple-blossom festival, and there is an 18th-century tavern.

West Frankfort, city (pop. 12,383), S Ill., NNE of Cairo, inc. 1905. It is the trade and industrial center of a coal-mining area. Frankfort Heights was annexed in 1924.

West Goths see VISIGOTHS.

West Greenville, textile town (pop. 2,233), NW S.C., a suburb of Greenville.

West Greenwich (grē′nĭch, grĭ′nĭch), rural town (pop. 526), W R.I., set off from East Greenwich 1741.

West Grove, borough (pop. 1,357), SE Pa., WSW of Philadelphia.

West Ham, county borough (1931 pop. 294,278, 1947 estimated pop. 174,740), Essex, England, industrial suburb of London. It has railway works and various manufactures. Lord Luster was born here, and it was the home of Elizabeth Fry.

Westhampton Beach, village (pop. 969), on E Long Island, SE N.Y., on Moriches Bay, inc. 1928. It is a fashionable beach resort.

West Hartford, town (pop. 33,776), central Conn., settled 1679, inc. 1854. A residential suburb of HARTFORD, it is the seat of the American School for the Deaf (1817) and of St. Joseph College and Academy for girls. Noah Webster was born here.

West Hartlepool (hart′lĭpōōl, hartlē′–), county borough (1931 pop. 68,135, 1947 estimated pop. 71,380) Durham, England, near Hartlepool. It is a seaport. Founded in 1844, it developed into an important shipbuilding and coal-exporting center, there are ironworks and engineering works and timberyards.

West Haven, town (pop. 30,021), S Conn., a suburb of New Haven set off from Orange 1921. Rubber and metal products are made here.

West Haverstraw (hā′vurstrô), village (pop. 2,533), SE N.Y., N of Nyack, inc. 1883. It is the seat of a state reconstruction home for crippled children.

West Hazleton (hā′zultun), residential borough (pop. 7,523), Luzerne co., NE Pa., SSW of Wilkes-Barre, inc. 1889.

West Helena (hē′lunu), city (pop. 4,717), E Ark., near Helena, founded 1909, inc. 1917. Its industries include woodworking.

West Homestead, borough (pop. 3,526), Allegheny co., SW Pa., ESE of Pittsburgh, inc. 1900. Pig iron and machinery are made here.

West Indies, archipelago, between North and South America, curving c. 2,500 mi. from Florida to the coast of Venezuela and separating the Caribbean Sea from the Atlantic Ocean. The island group, sometimes called the Antilles (ăntĭl′lēz), is divided into three main sections, the BAHAMA ISLANDS, the Greater Antilles (CUBA, JAMAICA, HISPANIOLA, and PUERTO RICO), and the Lesser Antilles (the LEEWARD ISLANDS, WINDWARD ISLANDS, TRINIDAD, BARBADOS, and the Dutch and Venezuelan islands). But for Cuba and Hispaniola (HAITI and the DOMINICAN REPUBLIC), the islands are colonial possessions. The British West Indies comprise the Bahamas, Jamaica (with CAYMAN ISLANDS and TURKS AND CAICOS ISLANDS), the British Leeward Islands (ANTIGUA, SAINT KITTS, NEVIS, MONTSERRAT, and the BRITISH VIRGIN ISLANDS), the British Windward Islands (DOMINICA, SAINT LUCIA, SAINT VINCENT, and GRENADA), Trinidad and Tobago, and Barbados. The Dutch West Indies, now also called the Dutch Antilles, include CURAÇAO, Aruba, SAINT EUSTATIUS, and part of SAINT MARTIN. The French West Indies consist of GUADELOUPE (with dependencies) and MARTINIQUE. The American possessions are Puerto Rico (with VIEQUES) and the VIRGIN ISLANDS OF THE UNITED STATES (formerly the Danish West Indies). MARGARITA be-

longs to Venezuela Many of the islands were discovered (1492) by Columbus, and in 1496 the first permanent white settlement was made on Hispaniola. Large numbers of Negro slaves were brought over from Africa, and in the 18th cent sugar-cane planting developed rapidly. Some of the mountainous islands have partly active volcanoes, and hurricanes occur frequently (Aug–Oct) However, the warm climate, tempered by northeast trade winds, and the clear tropical seas have made the West Indies one of the most popular of winter resorts. In the Second World War, Great Britain leased several military bases to the United States in exchange for destroyers Recently the colonial powers have granted their possessions varying degrees of representative government, and projects have been launched to improve the poor economic and social conditions among the area's 15,000,000 inhabitants See Amy Oakley, *Behold the West Indies* (1941); R. R Platt and others, *The European Possessions in the Caribbean Area* (1941), Paul Blanchard, *Democracy and Empire in the Caribbean* (1947); W A. Roberts, *Lands of the Inner Sea* (1948), Alec Waugh, *The Sugar Islands* (1949); the current *West Indies Yearbook*

Westinghouse, George, 1846–1914, American inventor and manufacturer, b Central Bridge, N Y In the Civil War he served in the Union army and in the navy Among his inventions were a reversible railway frog, the air brake, and signaling devices He was influential in introducing the use of alternating current in the United States From the plant built at Pittsburgh for manufacturing air brakes and electrical equipment the business expanded to include a large number of plants and laboratories in America and Europe See biographies by H G Prout (1922) and H G Garbedian (1943).

West Jefferson, village (pop 1,386), central Ohio, W of Columbus There is a corn cannery here.

West Kittanning (kĭtă'nĭng), borough (pop 1,005), W Pa., on the Allegheny river and NE of Pittsburgh, laid out 1855, inc 1900

West Lafayette (lă"fēĕt') **1** City (pop 6,270), W Ind., on the Wabash and near Lafayette, inc 1924, It is a business and industrial center **2** Village (pop 1,152), E central Ohio, E of Coshocton

Westlake, village (pop 3,200), NE Ohio, near Cleveland, formerly named Dover Center

West Lawn, borough (pop 2,080), SE Pa., W of Reading, inc 1927

West Leechburg, borough (pop 1,123), Westmoreland co, SW Pa., near the Allegheny river NE of Pittsburgh, inc 1928 Steel products are made here

West Liberty. 1 Town (pop 1,802), E Iowa, between Iowa City and Muscatine, inc 1867 It is a railroad junction in a farm, livestock, and dairy area **2** Village (pop 1,228), W central Ohio, N of Springfield Condensed milk is manufactured Near by are the Ohio Caverns, noted for their coloring and diversity of formation

West Linn, city (pop 2,165), NW Oregon, on the Willamette opposite Oregon City, settled in the 1840s, inc 1913 It has paper mills.

West Long Branch, borough (pop 2,030), E N J, near Long Branch, settled 1711, inc 1908 "Shadow Lawn" was President Wilson's summer White House.

West Lothian (lō'dhēun), formerly **Linlithgow** (lĭnlĭth'gō), county (120 sq mi, 1931 pop 81,441; 1948 estimated pop 86,933), S Scotland, on the Firth of Forth. The county town is Linlithgow The land slopes from the Forth to the hills (alt, c.1,000 ft) about the southern border. Principal streams are the Avon and the Almond Dairy farming occupies a large proportion of the land, but the county is more important for its mineral wealth (coal, iron, and oil shale) Bo'ness is the chief port The famous Forth Bridge connects the county with Fifeshire.

Westmacott, Sir Richard (wĕst'mukŏt), 1775–1856, English sculptor. He worked in the studio of his father, also a sculptor, and in Italy under Canova His work includes statues in the neoclassic manner, the monuments of Pitt and Fox in Westminster Abbey, and the pediment sculptures of the British Museum He was knighted in 1837.

Westman Islands, Icelandic *Vestmannaeyjar* (vĕst'-mănsă"yar), group of 14 small islands, c 8 mi off SW Iceland. The largest is Heimaey (home island), (c 4½ mi long and 1½ mi wide). The people live by fishing and fowling, for the islands abound in waterfowl—fulmar, puffin, gannets, eider ducks, and guillemots When Iceland was first colonized, a group of Irish slaves killed their masters and fled to these isles—hence their name In 1627, Algerian pirates ravaged the islands and carried almost 400 people into slavery The chief town is Vestmannaeyjar (pop 3,588), on Heimaey.

Westmeath (wĕstmēth', wĕst'mēdh), inland county (681 sq. mi., pop 54,949), central Ireland, in Lonster The county town is Mullingar A part of the central plain of Ireland, the county is mostly level and fertile, with many lakes and bogs The principal river is the Shannon. Dairy farming and cattle raising are the chief occupations. There is some manufacture of textiles as well as flour milling. Athlone is the largest town. Westmeath was separated from Meath as an independent county in 1543.

West Memphis (mĕm'fĭs), cotton and lumber city (pop 3,369), NE Ark., across the Mississippi from Memphis, Tenn., with which it is connected by a bridge, founded c 1910, inc. 1927.

West Middlesex, borough (pop 1,126), NW Pa., NNW of Pittsburgh, settled 1821, laid out 1836, inc 1864 Potatoes are grown here.

West Milton, village (pop. 1,439), W Ohio, N of Dayton, settled 1807, inc. 1835.

West Milwaukee (mĭlwô'kē), village (pop. 5,010), SE Wis., near Milwaukee, inc. 1906 Steel castings are made here

Westminster (wĕst'mĭnstûr), city, metropolitan borough (1931 pop 129,579, 1948 estimated pop 100,900) of W London, England, N of the Thames and W of the City of London It is one of London's largest and most important districts, having WESTMINSTER ABBEY (around which the city of Westminster grew), the Houses of Parliament (WESTMINSTER PALACE), BUCKINGHAM PALACE, SAINT JAMES'S PALACE, and DOWNING STREET Westminster Cathedral, designed by John F. Bentley, is the senior archiepiscopal see of the Roman Catholic Church in England and Wales. Westminster Bridge (1739–50) was the second to be built over the Thames in London, it was rebuilt in 1862 Westminster School is a leading public school, founded in the 14th cent and reestablished by Elizabeth c 1559 Its history is closely associated with the Abbey Some of its most famous students are Wren, Ben Jonson, Cowper, Dryden, George Herbert, Cowley, Southey, Locke, Charles Wesley, Hakluyt, J A. Froude, and Gibbon

Westminster. 1 City (pop 4,692), co. seat of Carroll co., N Md, NW of Baltimore, in a farming area, founded c 1764. It was an important Union supply base during the Gettysburg campaign Western Maryland College and a theological seminary are here **2** Town (pop 2,126), N Mass, NNW of Worcester, settled 1737 inc 1759 **3** Textile town (pop 2,014), extreme NW S.C, WSW of Greenville **4** Town (pop 1,403), SE Vt, on the Connecticut and S of Bellows Falls, granted 1735 or 1736 by Massachusetts to Taunton men, regranted 1752, chartered 1772 The "Westminster Massacre" occurred March 13, 1775, when New York officials used force in an attempt to hold a Cumberland co (N Y) court session Two men were killed, and there were no further attempts to hold court In Westminster on Jan 15, 1777, Vermont was declared (under the name New Connecticut) an independent state At Vermont's first printing office, in the old courthouse, was issued in 1778 and in 1781 the *Vermont Gazette, or, Green Mountain Post Boy.*

Westminster, Provisions of: see PROVISIONS OF OXFORD

Westminster, Statute of, 1931, in imperial British history, an act of Parliament by which the British Commonwealth of Nations was declared to be a free association of autonomous dominions and the United Kingdom, bound only by common allegiance to the crown It implemented by law the work of various meetings of the IMPERIAL CONFERENCE, which had recognised the virtual independence of the dominions engendered by the First World War and the peace settlements thereafter By this statute it was declared that the British Parliament might not legislate for the dominions without their prior consent and that the dominion legislatures were on an equal footing with that of the United Kingdom In the case of Canada, for instance, it provided that the British Parliament would make changes in the North America Act only at the request of the Canadian government

Westminster, Statutes of, in medieval English history, legislative promulgations made by EDWARD I of England in Parliament at Westminster. Westminster I (1275) practically constitutes a code of law, it covers a wide range and incorporates much unwritten law into the written code and is a sweeping ordinance against administrative abuses Westminster II (1285) is similar in purpose and scope; it is especially remarkable for its judicial reforms and for the clause *De donis conditionalibus*, which fostered the entailing of estates and thus fundamentally altered English landholding Westminster III (1290), also called *Quia emptores*, provided that in the case of alienation of an estate or part of an estate the new holder should hold directly from the overlord rather than from the old holder Thus, the statute stopped the process of subinfeudation

Westminster Abbey, originally the abbey church of a Benedictine monastery in London, dissolved in 1539 It is one of England's most important Gothic monuments and is also a national shrine The first church on the site is said to have been built in 616 by King Sebert of Essex A church and a Benedictine community existed here when, c 1050, Edward the Confessor began to build a new church on the present site It was consecrated in 1065, but in 1245 Henry III began the demolition of the Norman edifice, built a new eastern portion, and initiated a long period of construction The fine octagonal chapter house was built in 1250, and in the 14th cent. the cloisters, abbot's house, and principal monastic buildings were added. The nave was completed in the 15th cent. Early in the 16th cent. Henry VIII finished the Lady Chapel, dedicated to Henry VII, in Perpendicular style, which is noted for its superb fan vaulting The two western towers were built (1722–40) by Sir Christopher Wren and Nicholas Hawksmoor. In the late 19th cent Sir George Gilbert Scott supervised extensive restoration The present church is cruciform in plan Both nave and transept have side aisles The choir is apsidal in plan, and its ring of chapels exhibits the only complete chevet in England, French influence is also seen in the height of the nave, the loftiest in England, and in the strongly emphasized flying buttresses All English kings since William I have been crowned in Westminster, which is also the burial place of 13 kings and five queens Noted statesmen and other distinguished citizens have been buried here since the 14th cent., and the Poets' Corner in the south transept contains the tombs of several great poets, including Chaucer, Browning, and Tennyson The abbey was damaged in the air raids over London in 1941 but was left structurally intact. See descriptive and historical works by A. E. Bullock (1920), H. F Westlake (1923), A E Henderson (1937), and Jocelyn Perkins (1946)

Westminster College see FULTON, Mo., and NEW WILMINGTON, Pa

Westminster Conference, 1866–67, held in London to settle the plan for confederation of the Canadian provinces Delegates from Canada, New Brunswick, and Nova Scotia attended The resolutions on confederation which had been framed at the Quebec Conference (1864) were the basis for those promulgated at the Westminster Conference and incorporated in the British North America Act (1867), under which the dominion of Canada was created

Westminster Confession: see CREED.

Westminster Palace or **House of Parliament,** in London The present enormous structure, of Perpendicular Gothic design, was built (1840–60) by Sir Charles Barry to replace an aggregation of ancient buildings almost completely destroyed by fire in 1834. Edward the Confessor constructed the original palace buildings, on a site where perhaps stood a still earlier royal residence They served as royal abode until in the 16th cent they were adopted as the assembly place for the House of Commons and the House of Lords The Great Hall was built by William II at the end of the 11th cent The superbly constructed hammer-beam roof spanning its width of 68 ft, part of a subsequent rebuilding of the hall by Richard II in 1399, was the finest example extant of medieval open-timber work when it was burned by incendiary bombs in May, 1941 Westminster Hall was the only portion of the palace to survive intact from the fire of 1834 and now serves as the entrance of the building In it the highest English court of law met for centuries Among the numerous events of historic renown here enacted were the deposition of Richard II, the sentencing to death of Charles I, and the trials of Sir Thomas More and of Warren Hastings The palace was damaged several times in air raids in 1940 The House of Commons chamber and the House of Lords were also seriously damaged

West Monroe, city (pop 8,560), N La, on the Ouachita river opposite Monroe, in a farm and livestock area, founded in the 1860s, inc 1926 It has lumber and cotton manufactures

Westmont. 1 Residential village (pop 3,044), NE Ill, just W of Chicago, in a farm area, inc 1921 **2** Borough (pop 3,741), Cambria co, SW Pa., in the Alleghenies near Johnstown

Westmorland, Charles Neville, 6th **earl of** (nĕ'vĭl, wĕst'murlŭnd), 1543-1601, English nobleman A Roman Catholic by birth and connected with the Catholic Howard family by marriage, he joined the rebellion (1569) led by Thomas Percy, earl of Northumberland, against Queen Elizabeth and her anti-Catholic policy The rebels captured Durham, but failed in their attempt to rescue Mary Queen of Scots from prison Westmorland fled, to live in exile on the Continent, he was attainted by Parliament in 1571

Westmorland, Ralph Neville, 1st **earl of,** 1364–1425, English nobleman His family was one of the most powerful in England and shared domination of the northern counties with the Percy family, with whom the Nevilles were closely allied. Neville succeeded his father as Baron Neville of Raby in 1388 and supported the court party of RICHARD II In 1397 he was created earl of Westmorland His second wife was Joan Beaufort, daughter of JOHN OF GAUNT and half sister of Henry of Lancaster (later HENRY IV). When, in 1399, Henry openly opposed Richard, Westmorland supported Lancaster, and he continued to support Henry as king. He helped to put down the Percy revolt in 1403 When a new Percy revolt broke out in 1405, Westmorland captured two of the leaders, Archbishop Scrope and Earl Marshal Thomas Mowbray, by treachery, but he had nothing to do with their quick execution. He remained thereafter supreme in the north. Westmorland ap-

pears in Shakspere's *Henry IV* and *Henry V*, but his role in the latter play is fictitious. He was the father of a large family, many of whom made advantageous marriages. His daughter Cicely Neville married Richard, duke of York, and became the mother of Edward IV and Richard III; one of his grandsons was Richard Neville, earl of WARWICK, called the Kingmaker.

Westmorland (wĕst'mûrlŭnd), county (789 sq. mi.; 1931 pop. 65,408; 1948 estimated pop. 66,700), N England. The county town is Appleby. Much of Westmorland lies in the picturesque region known as the LAKE DISTRICT. The county is largely mountainous, and it is the most sparsely populated of England. Helvellyn, on the Cumberland border, rises to a height of 3,118 ft. Chief among the numerous streams are the Eden, the Lowther, and the Kent. The lakes of Hawes Water, Grasmere, Rydal Water, and Ullswater are shared with Cumberland, and Lake Windermere, the largest lake in England, lies between Westmorland and Lancashire. It is primarily a pastoral land (dairy farming and cattle grazing). There is some quarrying (limestone, granite, and slate), and minor manufacturing is carried on. The beauty of the scenery attracted Wordsworth, who lived most of his life here and is buried at Grasmere. Coleridge, De Quincey, and Ruskin are also associated with the Lake District. There are Celtic, Roman, and medieval remains. See Arthur Mee, *The Lake Counties* (1937).

Westmorland, city (pop 1,010), SE Calif., near Brawley in the IMPERIAL VALLEY; founded 1910.

Westmount (wĕst'mount), city (pop. 26,047), S Que., on Montreal island, inc. 1873. A west residential suburb of Montreal, it became a city in 1908.

West Newbury, town (pop 1,515), NE Mass., on the Merrimack, settled 1635, inc. 1820.

West Newton, borough (pop 2,765), SW Pa., on the Youghiogheny and SE of Pittsburgh; laid out 1796, inc. 1842. It manufactures radiators and boilers. An Indian attack (1763) resulted in the massacre of an entire family here.

West New York, industrial town (pop 39,439), NE N.J., on the Hudson and N of Weehawken, settled 1790, inc. 1898. Radio parts are made here.

Weston, Edward, 1850–1936, American electrical engineer, b. England. In 1870 he came to the United States. He improved nickel-plate processes and established companies at Newark, N.J., for the manufacture of dynamoelectric machines and precision instruments.

Weston, Edward Payson, 1839–1929, American pedestrian, b. Providence, R.I. In 1861 he walked from Boston to Washington, D.C., to attend Lincoln's inauguration. This was a distance of 443 mi., which he covered in 208 hr. In 1867 he walked from Portland, Maine, to Chicago in 26 days, in 1879 he walked 550 mi. in England in 141 hr. 41 min., and was awarded the Astley Belt as the world's champion walker. When he was 70, he walked (1909) from New York to San Francisco in 104 days 7 hr. In 1910 he made the return trip to New York, starting from Los Angeles, in 76 days, 23 hr. traveling at the rate of 45½ mi. a day. At 75 he covered 1,546 mi. in 51 days in a walk to Minneapolis. He was also known in the United States and England as a lecturer on temperance.

Weston, town (pop 5,740), S Ont., just NW of Toronto. It is an industrial town making motors, stoves, bicycles, and hardware.

Weston 1 Residential town (pop 1,053), SW Conn., NW of Bridgeport, settled c 1670, inc. 1787. 2 Residential town (pop 3,590), E Mass., W of Boston, settled c 1642, set off from Watertown 1713. It still has 18th-century buildings. Regis College is here. 3 City (pop 1,121), W Mo., on the Missouri and NW of Kansas City, founded 1837. It is important as a tobacco market. 4 Trading town (pop 8,268), co. seat of Lewis co., N W Va., on the West Fork of the Monongahela and SSW of Clarksburg, in a grazing and farm area, founded 1818. Glassmaking is the main industry. A state hospital for the insane is here.

Weston-super-Mare (–sōō'pur-mâr), municipal borough (1931 pop 28,554, 1947 estimated pop. 39,770), Somerset, England, on the Bristol Channel and SW of Bristol. It is a seaside resort whose attractions include Worle Hill or Worlebury Hill, with its ancient camp and a fine view of the opposite coast of Wales, the long esplanade; and Brean Down, a bird sanctuary. The Mendip Hills begin near by.

West Orange, residential town (pop 25,662), NE N.J., NW of Newark, set off from Orange 1862, inc. as a town 1900. Edison established his laboratories and home here in 1887, the Edison plant manufactures electrical equipment.

West Ossipee, N.H. see OSSIPEE.

Westover, residential town (pop. 1,752), N W Va., contiguous to Morgantown, in an oil and gas region, inc. 1911.

West Palm Beach, city (pop. 33,693), co. seat of Palm Beach co., SE Fla., on Lake Worth (a lagoon) opposite Palm Beach, with which it is connected by bridges. It is a port of entry, railroad and commercial center, and popular winter resort. The city was developed by Henry M. Flagler in 1893 and was incorporated in 1894. A canal extends from here to Lake Okeechobee. The Norton Gallery and School of Art was opened in 1941.

West Paterson (pă'tûrsun), borough (pop 3,306), NE N.J., near Paterson, inc. 1914.

Westphalia (wĕstfā'lyŭ), Ger. *Westfalen* (vĕstfā'lŭn), region and former Prussian province (7,806 sq. mi.; 1939 pop 5,209,401), NW Germany. Münster was the capital. After 1945 Westphalia was incorporated into the new state of NORTH RHINE–WESTPHALIA, in the British zone of occupation. Westphalia occupies a rough triangle, formed by a line drawn eastward from the Rhine at the Dutch border to the Weser at Minden, a line drawn from Minden southwestward to Siegen, near the Hessian border, and a line drawn to the northwest from Siegen and parallel to the Rhine. Drained by the Ems, Weser, Ruhr, and Lippe rivers, it is hilly in the east and south and forms a low plain in the northwest. The land consists partly of agricultural soil, partly of sandy tracts, moors, and heaths. The Ruhr valley, in the west, is part of the great Westphalian coal basin and of the RUHR district, one of the world's most important industrial regions. It is connected with the Ems by the Dortmund-Ems Canal and with the Elbe by the Mittelland Canal. Coal is mined, and iron, copper, and zinc as well. Outside the Ruhr district, there are important textile industries in N Westphalia, particularly at Bielefeld. Westphalia first appears as the name of the western third of the duchy of SAXONY in the 10th cent. Unlike Eastphalia, the eastern third of the duchy of Saxony, Westphalia survived the breakup (1180) of the Saxon duchy as a regional concept, although it lost political unity. The larger part of Westphalia passed under the rule of ecclesiastic princes—the bishops of MÜNSTER, of OSNABRÜCK, of MINDEN, and of PADERBORN and the archbishops of Cologne, who obtained the region around ARNSBERG, known as the duchy of Westphalia. Among the temporal fiefs that emerged from the breakup of Saxony were the counties of LIPPE, RAVENSBERG, and Mark. All these territories were later included in the Westphalian Circle of the Holy Roman Empire, formed c 1500; this, however, comprised a much larger area. In the 12th cent. the anarchy of the local feudal lords and "robber barons" led to the creation of the secret VEHMGERICHT, which had its center at Arnsberg. In the later Middle Ages most of the important Westphalian towns—e.g., Münster, Osnabrück, Paderborn, Bielefeld, and Soest—prospered as members of the Hanseatic League. As a result of the extinction of the house of Cleves, which held the counties of Ravensberg and Mark, and as a result of the Thirty Years War (terminated in 1648 by the Peace of Westphalia, signed at Münster and Osnabrück), the elector of Brandenburg obtained Ravensberg, Mark, and the bishopric of Minden, thus Prussia obtained its foothold in W Germany. The Reformation had made considerable gains in Westphalia in the 16th cent., but much of the population was regained by the Catholic Reform. The bishoprics of Münster, Paderborn, and Osnabrück and the duchy of Westphalia were secularized only in 1803 by the Diet of Regensburg as a result of the Napoleonic Wars, they were at first partitioned among Prussia, Hanover, Hesse-Darmstadt, Hesse-Kassel, and the grand duchy of Berg. However, in 1807, after the conclusion of the Treaty of Tilsit, Napoleon seized all Prussian possessions W of the Elbe as well as the electorates of Hesse-Kassel and Hanover and the duchy of Brunswick, the northern section of these territories, including Münster, were directly annexed to France, and the southern section was constituted as the kingdom of Westphalia, with Napoleon's brother Jérôme Bonaparte (see BONAPARTE, family) as king and with Kassel its capital. The choice of the name was misleading, for only a small part of Westphalia was included in that kingdom, which collapsed in 1813. At the Congress of Vienna the major part of Westphalia proper was awarded (1815) to Prussia, and Hanover, Hesse-Kassel, and Brunswick were restored. Westphalia continued as a Prussian province until 1945, when the German map was remade by the Allies after the Second World War.

Westphalia, Peace of, 1648, general settlement ending the THIRTY YEARS WAR. The chief participants in the negotiations were the allies, Sweden and France, their opponents, Spain and the Holy Roman Empire, and the various parts of the empire (which had been riven by the war) together with the newly independent Netherlands. Earlier endeavors to bring about a general peace had been unsuccessful. The compact known as the Peace of Prague (May, 1635) marked a step in the direction of peace and signalized the belief of the Protestant powers that the Swedish forces on which they depended would not be able to maintain a preponderant role in Germany, but the conditions of the compact were not in accord with Richelieu's design to break up the imperial power. The war continued despite offers of mediation from the pope and the king of Denmark. Congresses were proposed and discarded. It was not until Dec. 25, 1641, that a preliminary treaty provided for two concurrent conferences—at Münster and at Osnabrück. This treaty was ratified in 1642. The conferences, fixed for 1643, met in 1644 and began serious work in 1645. The treaties were signed Oct. 24, 1648. Through the French and Swedish "satisfactions" the power and influence of the HOLY ROMAN EMPIRE and of the house of Hapsburg were lessened. Henceforth the empire ceased to be an effective entity and was supplanted by modern German states. France emerged as the dominant European power. France's sovereignty over three bishoprics (Metz, Toul, and Verdun) was confirmed, as was French sovereignty over Pinerolo. Breisach was made over to France. ALSACE was ceded despite ambiguity of title, and France was allowed to fortify a garrison at Philippsburg. Sweden obtained W Pomerania, including the island of Rügen and Stettin, the archbishopric (but not the city) of Bremen and the adjoining bishopric of Verden; and Wismar and the island of Pöl. It was agreed that the Upper Palatinate and the old electoral vote should remain with Bavaria while the Rhenish Palatinate, with a new electoral vote, was assigned to Charles Louis, the son of Frederick the Winter King. The Swiss Confederation and the independent Netherlands were explicitly recognized. The elector of Brandenburg received compensation for Pomerania, the duke of Mecklenburg, for Pöl and part of Wismar. The outcome of the religious deliberations was significant. Extreme Catholic claims were disallowed, but the provision that any future ruler would, on changing his religion, be forced to give up his holdings checked the growth of Protestant power. The era of religious warfare was over, and the Peace of Westphalia was the first general attempt at toleration.

West Pittston, residential borough (pop 7,943), NE Pa., on the Susquehanna and near Wilkes-Barre, inc. 1857. Fort Jenkins was built near here in 1772.

West Plains, city (pop 4,026), co. seat of Howell co., S Mo., SE of Springfield and near the Ark. line; laid out c 1858. It is a livestock market, with some manufacturing.

West Point. 1 City (pop 3,591), W Ga., on the Chattahoochee and N of Columbus, inc. 1831 as Franklin, named West Point 1832. It is a shipping center for a farm area and has varied industries. 2 City (pop 5,627), co. seat of Clay co., NE Miss., NW of Columbus, inc. 1858. It is the trade, rail, and processing center for a cotton, dairy, livestock, and timber area. A Negro junior college is here. 3 City (pop 2,510), co. seat of Cuming co., NE Nebr., NW of Omaha and on the Elkhorn, inc. 1858. A farm trade center, it has a county museum and a park. 4 Industrial town (pop. 1,947), E Va., E of Richmond where the Mattaponi and Pamunkey rivers join, settled in the 17th cent., inc. 1870. It has a paper mill.

West Point, U.S. military reservation, since 1802 seat of the UNITED STATES MILITARY ACADEMY. West Point, on the high west bank of the Hudson c 50 mi. N of New York city, was the site of Revolutionary forts guarding the Hudson. Constitution Island, in the river, is in the reservation. The plan of Benedict ARNOLD to surrender (1780) West Point to the British was discovered with the capture of Major John André.

Westport 1 Residential town (pop 8,258), SW Conn., settled 1645–50, inc. 1835. It has varied manufactures. Many writers and artists live in the town, and there is a summer theater. 2 Resort and industrial town (pop 4,134), SE Mass., between Fall River and New Bedford, settled 1670, set off from Dartmouth 1787. 3 District in Kansas City, Mo. It was platted as a town in 1833, thereafter becoming an outfitting point for westward travel. Francis Parkman described it in *The Oregon Trail*. In the Civil War battle of Westport, Oct. 21–23, 1864, Sterling Price's Confederate army, caught between the Union forces of Alfred Pleasonton and S. R. Curtis, was decisively defeated, thus ending the last Confederate invasion of the Far West.

West Prussia, Ger. *Westpreussen* (vĕst'proisŭn), former province of PRUSSIA, extending S from the Baltic Sea between Pomerania on the west and East Prussia on the east. The larger part of the region belonged to Poland until the Polish partitions of 1772 and 1793 and was known historically as Pomerelia (Ger. *Pommerellen*, see POMERANIA), this part included Danzig, the provincial capital. The rest of the province, including Marienwerder, was taken from original Prussian territory, i.e., from East Prussia. The Treaty of Versailles (1919) gave most of West Prussia to Poland (see POLISH CORRIDOR) and made DANZIG and its environs a free city. The remainder of West Prussia was divided between the Prussian province of GRENZMARK POSEN WEST PRUSSIA and the district (1,130 sq. mi.; 1939 pop 277,430) of West Prussia, incorporated with the province of East Prussia. The whole territory again was annexed to Germany at the outbreak (1939) of the Second World War, but in 1945 the Potsdam Conference placed it under Polish administration.

West Quoddy Head, promontory in the Atlantic, SE Maine, SE of Lubec, the most easterly point in

the continental United States. It has a U.S coast guard station and a lighthouse.

Westray, island (11,551 acres, pop 1,269), off N Scotland, one of the Orkneys. It has a lighthouse and ruins of a castle (15th cent) and a church (12th cent) Pierowall is the population center

West Reading (rĕ'dĭng), industrial borough (pop. 4,907), SE Pa , on the Schuylkill and near Reading. It has a paper mill and textile plants

West Riding: see YORKSHIRE, England.

West River, China see SI

West Roman Empire: see *Roman Empire* under ROME

West Rutland, town (pop 2,922), W Vt , W of Proctor and Rutland, from which it was set off in 1886 It includes some of the state's foremost marble quarries

West Saint Paul, city (pop 5,733), SE Minn , a suburb of St Paul

West Salem (sā'lĭm) **1** City (pop 1,490), NW Oregon, on the Willamette opposite Salem, inc 1914 It is a lumbering and fruit-processing center **2** Village (pop 1,254), W Wis , near the La Crosse river NE of La Crosse, in a farm and dairy area, inc 1893 Hamlin Garland was born near here

West Spitsbergen see SPITSBERGEN

West Springfield, industrial town (pop 17,135), SW Mass , near the Connecticut opposite Springfield, settled c 1660, set off from Springfield 1774 It produces chiefly machinery and paper

West Stockbridge, resort town (pop 1,062), W Mass , near the N Y line, settled 1766, set off from Stockbridge 1774

West Terre Haute (tĕ'rē hōt', tĕ'rē hŭt'), suburban city (pop. 3,729), Vigo co , W Ind , near Terre Haute

West Union 1 City (pop 2,059), co seat of Fayette co , NE Iowa, NE of Waterloo, inc 1857 It is a trade and processing center in a farm and dairy area The county fair is held here Echo Valley State Park is near by **2** Village (pop 1,134), co seat of Adams co , SW Ohio, near the Ohio river W of Portsmouth, in a tobacco area, laid out 1804 **3** Town (pop 1,020), co seat of Doddridge co , N W Va , W of Clarksburg, in a farm region, inc 1850

West View, residential borough (pop. 7,215), Allegheny co , SW Pa , near Pittsburgh, inc 1905

Westville, town (pop 4,115), N N S , S of Pictou It is a coal mining center

Westville. 1 Village (pop 3,446), E Ill , S of Danville, in a coal, grain, and stock-farm area, platted 1873, inc 1896 **2** Borough (pop 3,585), SW N J , on the Delaware, southern suburb of Camden, inc 1924.

West Virginia, state (24,282 sq mi , 1940 pop 1,901,974, 1949 estimated pop 1,941,000), E central United States, admitted 1863 as the 35th state, CHARLESTON is the capital, HUNTINGTON the largest city Extremely irregular both in outline and topography, West Virginia has been called by a native "a good state for the shape it's in" Pennsylvania, Maryland, VIRGINIA, Kentucky, and Ohio bound it around the compass About one sixth of the state is in the valley and ridge province, which lies east of the escarpment known as the Allegheny Front extending northeast-southwest from Keyser, near Maryland, to Bluefield, near Virginia The Potomac river (which, with its North Branch, forms the line with Maryland) drains most of this area, which includes the Eastern Panhandle West Virginia slopes down to its lowest level (240 ft) here, near HARPERS FERRY, where the Shenandoah joins the Potomac, and also reaches its highest point (4,860 ft) in Spruce Knob, in Pendleton co The Allegheny plateau west of the escarpment, covers most of West Virginia, which has the highest mean altitude (1,500 ft) of any state east of the MISSISSIPPI The waters of this section eventually reach the OHIO (which forms the whole northwest boundary, 277 mi , with Ohio) through such tributaries as the Tug Fork and the Big Sandy (these two separate the state from Virginia and Kentucky in the south and west), the New River and the Kanawha (which combine to make the most important waterway entirely within the state), the Little Kanawha, and the Cheat and the Monongahela Rainfall and temperature vary considerably, though the climate is generally of the humid, continental type, with hot summers (except in the highest parts) and cool to cold winters Except in the river bottom-lands (2 mi at their broadest in the Ohio valley), a few small plateaus, and the northern end of the rolling, fertile Valley of Virginia in the Eastern Panhandle, farming is not extensive, corn, hay, apples, Irish potatoes, and wheat and other grains are the principal crops The population is nevertheless more than 70 percent rural. West Virginia leads the Union in production of bituminous coal, with more than half of its 55 counties engaged in mining Next to coal and coke, the most valuable industrial products are iron, steel, and metals, glass and glassware; chemical and allied products; construction materials, lumber and wood products (formerly even more important in this still heavily forested state); clothing and textiles; and petroleum and natural gas. WHEELING, third largest city and metropolis of the Northern Panhandle, the narrow sliver of land jutting northward between Ohio and Pennsylvania, is the principal industrial center. Remains of the MOUND BUILDERS are much in evidence, especially in the Ohio valley, but when white men first appeared in the region it was a common hunting ground (and therefore a battleground) for the Indians The first exploration was made in 1671 by Thomas Batts and Robert Fallam, who, under directions from the veteran frontiersman Abraham Wood, crossed the Alleghenies to the New River, probably reaching a point near the present line between West Virginia and Virginia In 1673 James Needham and Gabriel Arthur visited what is now Tennessee, and Arthur, who remained with the Cherokee, claimed to have accompanied them on the war path as far northward as the Ohio river, possibly passing through the western part of Virginia Bacon's Rebellion (1676) may have been a factor in the temporary lack of interest in expanding the fur trade, which had prompted these explorations, until the 18th cent In 1716 a party headed by Alexander Spotswood, governor of Virginia, crossed the Blue Ridge to the Valley of Virginia and claimed the territory for George I The fur trader John Van Meter explored (c 1725) the Potomac and South Branch valleys and, returning to New Jersey, urged his sons to settle in that part of Virginia However, tradition has it that Morgan Morgan made the first settlement in what is now West Virginia, on Mill Creek, near Bunker Hill, in present Berkeley co , probably in 1731 (rather than 1726, the date recorded on the monument which marks the site) About the same time Germans and Scotch-Irish from Pennsylvania began settling in the region In 1746 a stone was placed at the head of the North Branch of the Potomac to mark the limit of Baron Fairfax's grant, which George Washington helped to survey a few years later Hampshire, the state's oldest county, was formed in 1754, and in 1762 the house of burgesses authorized the platting of two towns for the region, Romney and Mecklenburg (now Shepherdstown) Settlements were even made beyond the mountains, and in 1749 the OHIO COMPANY was granted a large domain But during the last of the French and Indian Wars, expansion was not only halted but transmontane settlers and traders were driven back until the French abandoned Fort Duquesne in 1758 and the English went on to occupy the Ohio valley In defiance of the royal proclamation of 1763, which forbade settlements W of the Alleghenies, upwards of 25,000 people were living on the upper Ohio and its tributaries before the American Revolution Although the Indians had ceded their lands W of the Alleghenies and S of the Ohio, they nevertheless bitterly resented the white man's advance, and the cowardly murder of the family of the Indian chief James LOGAN brought on Lord Dunmore's War (see DUNMORE, JOHN MURRAY, 4TH EARL OF) Defeated at Point Pleasant (Oct 10, 1774), the Indians of this region not only lost their hold on the Ohio valley but, forced to accord a healthy respect to the colonial militiamen, were thus prevented from forming an early alliance with the British in the American Revolution, a prospect that could have proved disastrous to the patriot cause There were, however, during the war three major invasions by Indians, led by British officers The successful expedition of George Rogers Clark in the West subsequently cut the raids to a minimum After the war, the region overwhelmingly favored adoption of the Constitution of the United States, though local law enforcement among the 55,873 inhabitants of the area now comprising the state (1790 census) was rather scanty However, the opening of the Mississippi, the coming of the steamboat, and the completion (1818) of the NATIONAL ROAD from Cumberland, Md , to Wheeling brought growth and prosperity There was left among the inhabitants a long-smouldering resentment at the continued political domination of the tidewater Two of the principal grievances revolved around slavery Under Virginia law, slaves could be taxed at a lower rate than cattle, yet their numbers were considered in apportionment of representation in the state assembly Since there were very few slaves in the region, the transmontane people quite justifiably felt themselves discriminated against in the matters of taxation and representation They also claimed that funds for public works were unequally distributed The new Virginia constitution ratified in 1830 brought no relief, but another new charter, approved in 1851, effected a compromise by which representation in the lower house was based on white population and universal white manhood suffrage was granted The onerous tax burden and tidewater domination of the senate continued The Harpers Ferry raid (1859) staged by John Brown had the effect of uniting most Southerners, except those in the western part of Virginia, in the intensified sectional conflict over slavery The Virginia legislature, on its second try, after Fort Sumter, passed (April 17, 1861) an ordinance of secession, which was approved on May 21 over the overwhelming opposition of the northwestern counties In 1776 when the new colony of Vandalia had been considered and again in 1783 when the state of Westsylvania had been proposed, circumstances prevented the realization of the separatist sentiments of the western frontiersmen in Virginia. Now, at last, Virginia's secession and the Civil War furnished them an opportunity they were quick to grasp On June 11, 1861, at Wheeling, delegates representing most of Virginia's western counties nullified the Virginia ordinance of secession, declared the offices of the state government at Richmond to be vacated, and formed the "restored government" of Virginia, with Francis H. PIERPONT as governor. Creation of a new state was joyfully approved in the popular referendum of Oct. 24, and in Nov , 1861, another convention at Wheeling began to draft the state constitution which was approved in April, 1862 President Abraham Lincoln proclaimed (April 20, 1863) admission of the new state, quite sensibly called West Virginia, to be effective 60 days hence, and on June 20, 1863, Arthur I BOREMAN was inaugurated as its first governor Pierpont and his "restored government" of Virginia had, of course, consented to the formation of a new state, thereby technically fulfilling the provision in the Constitution that says "no new States shall be formed or erected within the Jurisdiction of any other State without the Consent of the Legislatures of the States concerned as well as of the Congress" The Pierpont government then withdrew to Alexandria, Va Meanwhile, the Confederates had failed dismally in their attempt to hold on to the region as Union forces from Ohio, under the over-all command of Gen George B McClellan and then, when he was called to higher things, under Gen William S Rosecrans, were victorious in battles at Philippi (June 3, 1861), Rich Mt (July 11), Corrick's Ford (July 13), and Carnifex Ferry (Sept 10) After Gen Robert E Lee's attempt to rally the Confederate forces failed, ending in defeat at Cheat Mt (Sept 12-13), the Confederates made no serious endeavor to recover the region, although guerrilla fighting continued throughout the war. Rosecrans's victory at Gauley Bridge in Nov , 1862, further extended Union control to the lower Kanawha valley Many West Virginians remained loyal to the old state, Virginia, notably Gen Thomas J (Stonewall) Jackson, next to Lee the South's greatest general. His only sister, Laura Jackson Arnold, was, however, a staunch supporter of the Union, and such a division in allegiance was common in many families Slavery was abolished in 1865, but it was not until 1872 that the state established the Negro's right to vote and to hold public office After the Civil War, while under Republican control, West Virginia disfranchised (1866) by constitutional amendment all who had aided the Confederacy, but after the Democrats came into power (which they held for some 20 years), this act was annulled (1871) by the Flick Amendment The new state constitution adopted in 1872 is, with numerous amendments, still in effect After shuttling back and forth between Wheeling and Charleston, the capital became fixed at Charleston in 1885, the result of an election held in 1877 Late in the 19th cent West Virginia, with its huge mineral resources, began its great industrial expansion, marked by a change from the self-sufficient economy of local communities to the dependence on industry's profits and labor's wages and by immigration from Northern states Two world wars brought boom periods to the mines and the mills, but hardly exhausted the state's subsoil wealth The discovery in 1943 of a large salt deposit (2,400 sq mi) excited the Northern Panhandle, because it will be of great importance to its rapidly developing chemical industry Labor has grown with industry, and most of West Virginia's miners, who generally live in rural communities, not industrial towns, belong to the United Mine Workers of America Their periodic strikes, by which they have steadily improved their standard of living, are often marked by violence Politically, the state, which was controlled for the most part by the Republicans from the mid-1890s to the early 1930s when the Democrats (who repealed in 1934 the state prohibition law in effect since 1914) regained ascendancy, is no longer definitely in the pocket of either party. Among the institutions of higher education in West Virginia are West Virginia Univ at Morgantown and Davis and Elkins College at Elkins See I C DAVIS, Emily Johnston, and others, ed , *A Bibliography of West Virginia* (1939), J P Hale, *Trans-Allegheny Pioneers* (1886, 2d ed , 1931), C H Ambler, *Sectionalism in Virginia from 1776 to 1861* (1910) and *West Virginia, the Mountain State* (1940), J M Callahan, *Semi-centennial History of West Virginia* (1913), J C. McGregor, *The Disruption of Virginia* (1922); M. Conley, ed , *The West Virginia Encyclopedia* (1929), T C Donelly, *The Government of West Virginia* (1945), Federal Writers' Project, *West Virginia a Guide to the Mountain State* (1941); *Debates and Proceedings of the First Constitutional Convention of West Virginia (1861-1863)* (ed. by C. H. Ambler and others, 1943)

West Virginia University, at Morgantown; land-grant and state supported, coeducational; opened

1807, chartered 1867 and 1868 It has colleges of agriculture, forestry, and home economics, arts and sciences; education, engineering and mechanic arts (with a school of mines), law; and pharmacy. It also has schools of journalism, medicine (two years), music, and physical education and athletics There is a state geological and economic survey

West Warwick (wôr'wĭk, wŏ'rĭk), textile town (pop. 18,188), central R I , set off from Warwick and inc 1913 It includes the villages Crompton, Centreville, and River Point (the administrative center).

Westwego (wĕstwē'gō), town (pop 4,992), SE La , near New Orleans It is a port with sea-food processing and chemical manufacture

Westwood. 1 Lumber "company town" (pop 5,064), N Calif , NW of Reno, Nev 2 Town (pop 3,376), E Mass , SW of Dedham, settled 1640, set off from Dedham 1897 Some old buildings are preserved 3 Residential borough (pop 5,388), NE N J , N of Hackensack, inc 1894

West Wyoming (wĕst'mĭng), borough (pop 2,992), NE Pa , on the Susquehanna and near Wilkes-Barre, inc 1898

West York, industrial borough (pop 5,590), SE Pa , near York; inc 1905 Its manufactures include machinery, pottery, and furniture

Wetaskiwin (wĕ"tă'skĭwĭn), city (pop 2,645), central Alta , S of Edmonton It is a railroad junction in a mixed farming area, with adjacent coal mines, oil wells, and natural gas

Wetherell, Elizabeth: see WARNER, SUSAN BOGERT.

Wethersfield (wĕ'dhurzfēld), town (pop 9,644), central Conn , on the Connecticut adjoining S Hartford, settled 1633–34 by John Oldham and others A massacre by Pequot Indians occurred in 1637 One of the oldest towns in the state, Wethersfield still has many 18th-century buildings, though the old section was damaged in the 1936 flood of the Connecticut

Wetmore, Alexander, 1886–, American biologist, b North Freedom, Sauk co , Wis , grad Univ of Kansas (B A , 1912), Ph D George Washington Univ , 1920 He worked (1910–24) with the Bureau of Biological Survey of the U S Dept of Agriculture—the bureau is now part of the Fish and Wildlife Service—and after 1925 was associated with the Smithsonian Institution (as secretary from 1945) An authority on birds, he wrote numerous papers and books on the classification and distribution of birds and on fossil birds

Wetterhorn (vĕ'tŭrhôrn"), peak 12,149 ft high, Switzerland, in the Bernese Alps

Wettin (vĕ'tēn), illustrious German dynasty, branches of which ruled in Saxony, Thuringia, Poland, Great Britain, Belgium, and Bulgaria It takes its name from the castle of Wettin, a small town on the Saale and near Halle The family came into prominence in the 10th cent as leaders in the German drive to the east, which made Saxony and Lusatia German It acquired (c 1100) the margraviate of Meissen and soon expanded its domains to include most of SAXONY and THURINGIA In 1425 FREDERICK I was made elector of Saxony The Wettin holdings were repeatedly subdivided The most important division was that of 1485, which established the Ernestine line and the Albertine line, named for Frederick I's two sons, Ernest and Albert The electoral title and most of Saxony passed (1547) from the Ernestine to the Albertine line as a result of the defeat and capture of Elector JOHN FREDERICK I at Mühlberg The Ernestine line retained its possessions in Thuringia but split into several collateral branches In 1918, when the house of Wettin was deposed in Thuringia and Saxony, its Thuringian holdings consisted of the grand duchy of SAXE-WEIMAR-EISENACH and of the duchies of SAXE-COBURG-GOTHA, SAXE-MEININGEN, and SAXE-ALTENBURG. From the branch of Saxe-Coburg-Gotha the Belgian, English, and Bulgarian dynasties were descended through, respectively, LEOPOLD I of the Belgians, Prince ALBERT (prince consort of Queen Victoria), and FERDINAND I of Bulgaria The English house changed its name to WINDSOR, the Bulgarian branch was deposed in 1946 FERDINAND II of Portugal, a cousin of Prince Albert, married Queen Maria II of Portugal, but the Portuguese dynasty retained the name of Braganza The Albertine line, which ruled in Saxony, obtained hereditary royal rank in 1806, it also ruled Poland from 1697 to 1764 (see AUGUSTUS II and AUGUSTUS III)

Wetumka (wĭtŭm'kŭ), city (pop 2,340), E central Okla , near the Canadian river SE of Oklahoma City, settled by the Creek Indians

Wetumpka (wĭtŭm'ku), city (pop 3,089), co seat of Elmore co , central Ala , NNE of Montgomery and below Jordan Dam on the Coosa, in a farm area It has a textile mill. Indian mounds and village sites are numerous. Near by is the site of 18th-century Fort Toulouse.

Wetzlar (vĕts'lar), city (pop. 22,530), Hesse, W Germany, on the Lahn and W of Giessen Situated in an iron-mining region, it has a metallurgical industry as well as an important optical industry (cameras, microscopes, and binoculars). Wetzlar was a free imperial city from 1180 until 1803 In 1693 the supreme court of the Holy Roman Empire (Ger. *Reichskammergericht*) was transferred here from Speyer Goethe was a young lawyer here when he met (1772) Charlotte Buff, the Lotte in his *Werther*. Wetzlar was awarded to Prussia by the Congress of Vienna and formed an enclave between Nassau and Upper Hesse It suffered considerable destruction in the Second World War, among the damaged buildings was the Church of St Mary (8th–15th cent , restored 1900–1910)

Wewahitchka (wē"wuhĭch'ku, wē"wŏ–), town (pop 1,022), co seat of Gulf co , NW Fla , on Dead Lake SW of Tallahassee, inc 1925 Tupelo honey is shipped from here

Wewak (wā'wăk, wē'wăk), town, on NE New Guinea, in the Territory of New Guinea, NW of Madang There are coconut plantations In the Second World War a Japanese air base established here in 1942 was taken in 1944 by Allied forces

Wewoka (wĕwō'ku), city (pop 10,315), co seat of Seminole co , central Okla , SE of Oklahoma City, in an oil section It was settled in 1902 on the site of an Indian village and incorporated as a town in 1907, as a city in 1925

Wexford (wĕks'furd), maritime county (910 sq mi , pop 91,855), SE Ireland, in Leinster The county seat is the port town of Wexford The land is low and fertile, but on the western border Mt Leinster rises to 2,610 ft The Slaney is the principal river Carnsore Point is the southeastern extremity of Ireland Agriculture is the chief occupation The county exports barley, butter, pigs, poultry, and eggs Fishing is of some importance There are many evidences of the Danish occupation of Wexford, the name of the county itself being Danish in origin It was organized as a shire c 1200

Wexford, urban district (pop 12,308), county town of Co Wexford, Ireland, on Wexford Harbour, which is formed by the Slaney river estuary Wexford had several castles, gates, and town walls, but there are few remains English invaders landed here and signed a treaty with the Irish in 1169, Oliver Cromwell attacked the town in 1649, and rebels made it their headquarters in 1798 Selsker, St Selsker, or St Sepulchre Abbey dates from the 12th cent Of interest are the Church of St Patrick and the old Bull Ring (scene of bull fights) The Roman Catholic bishop's palace of the diocese of Ferns is here, but the cathedral is at Enniscorthy Wexford was once noted for its fairs and tourneys

Wey (wā), rivers in England **1** Dorsetshire, entering the English Channel at Weymouth **2** Surrey, 35 mi long, rising in two branches, one W of Alton, Hampshire, the other W of Haslemere, Surrey, they join near Farnham and flow NE past Godalming, Guildford, and Woking to the Thames at Weybridge It is navigable below Godalming

Weyauwega (wīăwē'gu), city (pop 1,173), central Wis , NW of Appleton, settled c 1850, inc as a city 1939 It is a farm trade center

Weybridge, Surrey, England see WALTON AND WEYBRIDGE

Weyburn (wā'burn), city (pop 7,003), SE Sask , SE of Regina It is a trade center for an agricultural region, has grain elevators, flour mills, and dairies, and manufactures bricks and machinery

Weyden, Roger van der (văn' dur wī'dun, Flemish van dûr vī'dûn), c 1400–1464, early Flemish master, known also as Roger de la Pasture, successor to the Van Eycks as head of the Flemish school of painting He is thought to have been apprenticed to Robert Campin and was admitted to the painters' guild of Tournai in 1432 By 1435 he was settled in Brussels, where he became painter to the city and executed many famous works for churches, guilds, and private patrons In 1449 he made a journey to Italy, he was received there with acclaim and was given various commissions Returning to Brussels, he spent his last years in producing the painting *Last Judgment* for the hospital of Beaune and two triptychs, *Nativity* and *Adoration of the Magi*, all famous works Despite his Italian journey, Roger shows almost no Italian influence Nor can his work be confused with that of his predecessors and rivals, the Van Eycks Although it has the same absolute clarity and luminous glazed color, it is much more dramatic and severe in every respect While the religious painting of the Van Eycks is beatific, that of Van der Weyden is somber and often tragic A favorite theme is the *Descent from the Cross*, of which a splendid example is in the Escorial Works attributed to Van der Weyden are in many European galleries, notably those of Brussels and Antwerp In Antwerp are his celebrated altarpiece, *Seven Sacraments*, and his portrait of Philip the Good Several versions of *St Luke Painting the Virgin* (one in the Mus of Fine Arts, Boston) are of his school but are unauthenticated The Metropolitan Museum has *Christ Appearing to His Mother*, which is one wing of a triptych, the remainder being in the cathedral at Granada

Weyerhaeuser, Frederick (wī'ûrhou"zûr), 1834–1914, American capitalist, known as the "Lumber King," b Germany Coming to the United States in 1852, Weyerhaeuser worked at odd jobs, eventually becoming manager and then owner of a sawmill. By 1864, having bought a number of mills in Wisconsin, he began buying timber stands in the Chippewa region, and as early as 1870 he had formed the Mississippi River Boom and Logging Company, the largest lumber syndicate of the time His control spread from Wisconsin through Minnesota, and by the 1890s the one-man "Weyerhaeuser syndicate" was a powerful and far-flung lumber empire Around 1900 he purchased some 1,000,000 acres in Washington and Oregon from the Northern Pacific By the time of his death most of his property had been transferred to his heirs

Weygand, Maxime (măksēm' vāgā'), 1867–, French general, b Brussels, Belgium. There are persistent rumors that his parentage was royal He was (1914–23) chief of staff to Marshal Foch through the First World War and the peace conferences In 1920 he directed the defense of Warsaw against the Red Army and turned the tide of the Russo-Polish War in favor of Poland Weygand subsequently served as French high commissioner in Syria (1923–24) and as commander of the French forces in the Near East (1939–40) In May, 1940, as France was falling before the German attack, he replaced Gamelin as supreme commander of the Allied forces, but the military situation was beyond repair. After the Franco-German armistice of 1940, Weygand served in the Vichy government as war minister, delegate general to French Africa, and governor of Algeria Dismissed (1941) as delegate general and arrested (1942) as a hostage for Gen Henri Giraud (who had passed over to the Allies), Weygand was held a prisoner by the Germans until 1945 After his return to France he was accused of collaboration with Germany, but was exonerated in 1948

Weyler y Nicolau, Valeriano (vălārvē'nō wā'lĕr ē nĭkōlā'ōō), 1839–1930, Spanish general He was sent to Santo Domingo and later to Cuba, where he served from 1868 to 1872 in the TEN YEARS WAR. He returned to Spain in 1873 and fought against the Carlists (1875–76) As captain general of the Canary Islands (1878–83) he was created marquis of Tenerife He later was captain general of the Balearic Islands (1883–86), of the Philippines (1888–91), and of Catalonia (1892–96) In 1896 he replaced Martínez de Campos in Cuba to suppress the rebellion there, but his cruel methods led to a protest from the United States and he was recalled (1897) Weyler was war minister at various times between 1901 and 1907 While captain general of Catalonia he put down the riots following the execution of Francisco FERRER (1909)

Weymouth (wā'muth), town (pop 23,868), E Mass , on the coast SE of Boston, settled 1622, inc 1635. It includes several villages Shoes are produced.

Weymouth and Melcombe Regis (wā'muth, mĕl'kŭm rē'jĭs), municipal borough (1931 pop 22,188; 1947 estimated pop 35,550), Dorsetshire, England, on a bay at the mouth of the River Wey S of Dorchester It is a seaport and a watering place The Nothe is a long-fortified promontory There is an esplanade with a monument of George III, who frequented the borough Melcombe Regis is the northern and more modern part John Endecott sailed from Weymouth in 1628 The Isle of Portland is south of the town

Weyprecht, Karl (kärl' vī'prĕkht), 1838–81, German arctic explorer With Julius von Payer he made a voyage to Novaya Zemlya in 1871 Weyprecht and Payer were leaders of an Austrian expedition (1872–74) to the arctic in the course of which Franz Josef Land was discovered See Julius von Payer, *New Lands within the Arctic Circle* (1876)

whale, aquatic mammal of the order Cetacea Its skin is almost hairless, and a layer of fat or blubber lies beneath it The forelimbs are swimming flippers, hind limbs are absent The horizontal, fluked tail is the chief means of locomotion Whales inhale a number of times before diving under water, where most species can remain from 5 to 15 min Some of the larger ones may submerge for an hour. When they rise to the surface, the moist air exhaled through the one or two nostril openings on the head condenses, causing the familiar "spouting" which is sometimes visible for several miles Usually only one calf is produced at a birth and, like other mammals, it is suckled Whales of the present day fall into two major groups The whalebone or baleen whales include the sperm whale, the gray whale, the finbacks, the rorquals, and the humpbacks In these there are suspended from the upper jaw hundreds of fringed plates of horny whalebone or baleen which serve as strainers when feeding Plankton forms the bulk of their diet The throat is narrow Two nostrils are present The blue rorqual or sulphur-bottom whale, the largest known living or extinct animal, sometimes reaches about 100 ft in length Among the group of toothed whales are the sperm whale or cachalot, the source of sperm oil and AMBERGRIS, and the pygmy sperm whale, the beaked whale, the DOLPHIN, and the PORPOISE

Whalen, Grover Aloysius, 1886–, American businessman and public official, b New York city. He became the head of a New York city contracting firm, and after he backed John F. Hylan for mayor,

he was appointed (1917) secretary to the mayor Many appointments to important local offices followed, and he served (1928–30) as New York city police commissioner. After 1924 he headed several large corporations Faultless in dress and elegant in bearing, Grover Whalen gained wide notice as the city's official host, and he was (1939–40) president of the New York World's Fair

whale oil, oil extracted from the blubber and other parts of certain species of whales. It varies in composition, color, and the degree of fishy odor according to the method and extent of refining Formerly widely used as an illuminant, it was superseded by petroleum products It is used today in soapmaking, as a leather dressing, and as a lubricant Some is hydrogenated to form edible fats The term is also sometimes used to include SPERM OIL

Whales, Bay of: see Ross SEA and ANTARCTICA.

whaling, The hunting of whales is thought to have been first pursued by the Basques—from land as early as the 10th cent and in Newfoundland waters by the 14th cent It was not until the middle of the 16th cent , however, that their appearance in those waters is established by record. Whaling, on a large scale, was first organized at SPITSBERGEN at the beginning of the 17th cent , largely by the Dutch, who seem, with the Basques, to have developed the method of flensing and boiling still largely used At first given competition by the English Muscovy Company of London, which collapsed by 1625, the Dutch in 1620 had gained ascendancy and in 1623 established the port of Smeerenberg. The large profits continued only until c 1640, when the scarcity of whales forced the Dutch farther out into the northern waters in search of the game By the middle of the 17th cent whaling from the land was established in America Its centers, at first on Long Island and Cape Cod, shifted to Nantucket and then New Bedford, the greatest whaling port in the world until the decline (c.1850) of the industry With the capture (1712) of a sperm whale by a Nantucket fisherman, the superior qualities of SPERM OIL were immediately discovered, and American whalers began fishing farther south in search of the sperm whale, which superseded the right whale in value The American fisheries were set back by the American Revolution, but in 1791 the first Americans rounded Cape Horn to hunt in the S Pacific Another, but temporary, setback occurred in the War of 1812, but the outcome spelled the complete defeat of British whaling, and from 1820 until shortly before the Civil War, Americans sailed the Pacific from south to north, often gone as long as three or four years, in search of the whale Melville's *Moby Dick* gives an account of a voyage in this period With an increased supply of petroleum, the Civil War, and a decrease of whales, the industry declined. The invention (c 1856), by the Norwegian Sven Foyn, of a harpoon containing an explosive head may be said to have been the start of modern whaling Insuring the immediate death of the whale, as opposed to the perilous battle put up by the wounded whale against the old oar-propelled boats, this type of harpoon can now also shoot compressed air into the whale, so that it will not sink, the catch formerly often having been lost for this reason The development of the factory ship, equipped to take on board and completely process whales caught by the smaller chasers, means increased safety and the ability to catch the larger blue whale and allows for the use of all parts of the whale Formerly only the blubber and head could be managed, and the job of flensing from the side of the ship was a hazardous one The main whalers are now the Norwegians and the British, the Japanese fleet having been destroyed during the Second World War, when whale oil and other by-products became increasingly important in wartime England An international whaling commission, for purposes of preservation, now restricts the period of whaling to a few months of the year and determines the size of the whale (varying with the type), which it is legal to catch See WHALE and WHALE OIL. There are whaling museums at Sag Harbor, L I , and Nantucket, Mass , but the most famous one is the Jonathan Bourne at New Bedford, Mass See J T Travis, *A History of the Whale Fisheries* (1921), C B Hawes, *Whaling* (1924); Federal Writers' Project, *Whaling Masters* (1938).

Whalley, Edward (hwā'lē, hwô'lē), d 1675?, English regicide During the Puritan Revolution he served under his cousin Oliver Cromwell in the parliamentary army He was given custody of Charles I for a time in 1647, served on the high court of justice which tried him, and signed the death warrant. After 1655 Whalley was one of the administrative major generals until the Rump Parliament withdrew his commission and those of other prominent Cromwellians At the restoration of Charles II, Whalley with his son-in-law, William GOFFE, was forced to flee. He lived successively in Boston, New Haven, Milford (Conn), and Hadley (Mass.), hunted by English agents, but never betrayed

Whampoa (hwăm'pō'ä'), Mandarin *Huang-pu*, city, **Kwangtung** prov., China, a port on the Canton **river.** It is 12 mi. E of Canton, of which it is an outpost. The harbor accommodates large vessels.

Whangpoo (hwäng'pōō', hwäng'), river, c.60 mi long, Kiangsu prov , China, flowing past Shanghai into the Yangtse It is navigable to steamers as far as Shanghai It is also called the Hwangpoo.

wharf see DOCK

Wharton, Edith (Jones) (hwôr'tŭn), 1862–1937, American novelist, b New York city Of a family socially elect and financially secure, she was privately educated and lived much in Europe, both as a child and after her marriage in 1885 to Edward Wharton She made her home in France after 1907, in 1913 she terminated her marriage by divorce. Most of her 54 volumes were written after she was 35, and the influence of her friend Henry James is acknowledged and unmistakable Of her earlier work, *The Valley of Decision* (1902), a historical novel of 18th-century Italy, is the best known With *The House of Mirth* (1905) she became famous and found her vein as ironic analyst of 19th-century New York society, which she continued in novels of varying worth, including *The Custom of the Country* (1913), *The Age of Innocence* (1920, awarded the Pulitzer Prize, 1921), *Old New York* (4 vols , 1924), made up of novelettes of the decades 1840 to 1880, *Hudson River Bracketed* (1929), with its sequel *The Gods Arrive* (1932); and her unfinished *The Buccaneers* (1938) *Ethan Frome* (1911), a bitter novelette of New England, is considered her greatest tragic love story. Four of her stories were very successfully dramatized on Broadway— *The House of Mirth* in 1906, *The Age of Innocence* in 1929, *The Old Maid* in 1935, and *Ethan Frome* in 1936 Mrs. Wharton's short stories, though less well known, are as distinguished as her novels Many of them are collected in *Tales of Men and Ghosts* (1910), *Xingu and Other Stories* (1916), *Certain People* (1930), *The World Over* (1936), and *Ghosts* (1937) In the First World War she devoted herself to war relief and wrote such reports as *Fighting France* (1915) and the novels *The Marne* (1918) and *A Son at the Front* (1925) Her delightful travel books include *Italian Backgrounds* (1905) and *A Motor-Flight through France* (1908) She also wrote *The Writing of Fiction* (1925), literary criticism See her autobiography, *A Backward Glance* (1934), studies by R M Lovett (1925), E K Brown (1935, in French), and Percy Lubbock (1947)

Wharton, Francis, 1820–89, American clergyman and jurist, b Philadelphia, grad Yale, 1839, admitted to the Pennsylvania bar in 1843, he became an authority on criminal law and wrote *A Treatise on the Criminal Law of the United States* (1846) He was (1856–63) professor of history and literature at Kenyon College He was ordained (1862) an Episcopalian minister, and he was (1871–81) professor of canon law in the Episcopal Theological School in Cambridge, Mass In this period he wrote *A Treatise on the Conflict of Laws* (1872) As solicitor of the U S Dept of State (1885–88) he edited *A Digest of the International Law of the United States* (3 vols , 2d ed , 1887) and *The Revolutionary Diplomatic Correspondence of the United States* (6 vols , 1889) See biography by H E Wharton (1891)

Wharton, Thomas Wharton, 1st marquess of, 1648–1715, English politician Before his entry into Parliament (1673) he had acquired the reputation as a rake and gambler which he always retained After 1679 he became active in Whig politics and against James II He aided William of Orange in 1688, mostly by composing the words of the satirical ballad *Lillibullero*, with which, he boasted, he had sung James II out of his kingdom William III made Wharton a privy councilor and comptroller of the household (1689), but failed to reward him with a major office Queen Anne removed him because of her personal dislike and distrust of his religious soundness, but he remained one of the powerful Whig politicians Wharton opposed the bill against occasional conformity, designed to tighten political restrictions upon the dissenter. When his party came into power, he was made earl of Wharton (1706) and served as lord lieutenant of Ireland (1708–10) Under the Tory dispensation (1710–14) he actively opposed the government George I made him a marquess and lord privy seal (1715).

Wharton. 1 Residential borough (pop 3,854), N N J , on the old Morris Canal near Lake Hopatcong; inc 1895 Chemicals are made here **2** City (pop 4,386), co seat of Wharton co , S Texas, on the Colorado and SW of Houston on the Gulf Coast plain; founded 1847, inc. 1902. The town has small industries mostly related to the oil, cattle, rice, cotton, and sulphur produced in the area. There is a junior college.

What Cheer, town (pop 1,339), SE Iowa, ENE of Oskaloosa; founded 1865 as a trading point, inc 1880 The clay of the region is quarried, and tile and brick are made.

Whately, Richard (hwăt'lē), 1787–1863, English prelate and writer Fellow and tutor of Oriel College, Oxford, he published a witty work aimed at extreme skeptics, *Historic Doubts Relative to Napoleon Bonaparte* (1819). In 1822 he gave the Bampton Lectures entitled *The Use and Abuse of Party Feeling in Matters of Religion* From 1829 to 1831 he was professor of political economy at Oxford. As archbishop of Dublin (from 1831) he worked to free religious instruction from sectarianism and urged the state endowment of the Catholic clergy. He was an influential supporter of the Broad Church party of his denomination Noted among his many works are *Elements of Logic* (1826), *Elements of Rhetoric* (1828), and *Christian Evidences* (1837) See his *Life and Correspondence* (ed by his daughter, E. J Whately, 1866); memoirs by W. J. Fitzpatrick (1864)

wheat, plant of the genus *Triticum* of the grass family, a major food and an important commodity on the world grain market It was one of the first (if not the first) of the grains domesticated by man. Its cultivation began in the NEOLITHIC PERIOD The civilizations of W Asia and of the European peoples have been largely based on wheat, while rice has been more important in E Asia. Since agriculture began, wheat has been the white man's chief source of bread Wheat was introduced into America by settlers early in the 17th cent For its early growth, wheat thrives best in cool weather Fall planting is possible where winters are not severe, but in regions with very cold winters, wheat must be planted in spring. There are varieties specifically adapted to growing as winter wheat (fall planted) or as spring wheat Flour from hard-kernel wheat (varieties evolved for the most part from *Triticum aestivum*) is used to make bread and fine cakes. The hardest flour comes from durum wheat (*T durum*), which is used in the manufacture of macaroni and similar products Soft-wheat varieties make flour for piecrust and biscuits Wheat is used in the manufacture of whisky and beer, and both the grain and the vegetative plant parts make valuable livestock feed It is susceptible to many pests and diseases, the more destructive including rust, bunt, and the Hessian fly and chinch bug All wheat-producing countries carry on breeding experiments to improve existing varieties or to obtain new ones with such dominant characteristics as disease resistance, increased hardiness under specific environments, and greater yield Large-scale mechanized farming and continued planting of wheat without regard to crop rotation has exhausted the soil of large areas The great wheat-producing countries of the world are the United States, China, and the USSR Extensive wheat growing is also carried on in India, Canada, Argentina, and Australia In the United States, Kansas leads in production See T B Hutcheson and others, *The Production of Field Crops* (3d ed , 1948), H K Wilson, *Grain Crops* (1948), publications of the U S Dept of Agriculture

wheat fly, name for several insects harmful to wheat, e g , the HESSIAN FLY, the wheat gallfly, the wheat midge, and others

Wheatland. 1 Borough (pop 1,421), NW Pa , at the Ohio boundary NNW of Pittsburgh, settled 1812, inc 1872 **2** Town (pop 2,110), co seat of Platte co , SE Wyo , N of Cheyenne, in a livestock and irrigated farm area, settled c 1885 Near by is Eagle's Nest Gap, a pass on the Oregon Trail

Wheatley, Henry Benjamin (hwēt'lē), 1838–1917, English bibliographer and antiquarian, a founder of the Early English Text Society and of the Index Society His work on the indexing of books, *How to Make an Index* (1902), is a classic He edited Pepys's diary (10 vols , 1893–99) and wrote *Samuel Pepys and the World He Lived In* (1880)

Wheatley, Phillis, 1753?–1784, American Negro poet. She was brought from Africa in 1761 and sold as a slave to a Boston merchant, John Wheatley, who educated her and encouraged her talent Her graceful imitative verses, many of them modeled on Pope's *Homer*, were admired in England and America and were published in subscription volumes which went into several editions Her works include *An Elegiac Poem on the Death of George Whitefield* (1770), *Poems on Various Subjects* (1773), and separate poems printed in newspapers and magazines In 1778 she contracted an unfortunate marriage with John Peters See Vernon Loggins, *The Negro Author* (1931)

Wheaton, Henry, 1785–1848, American jurist and diplomat, b Providence, R I., grad Rhode Island College (now Brown Univ), 1802 After his admission (1805) to the bar he visited Europe There he studied civil law and translated the recently enacted Code Napoléon into English He practiced law in Providence (1807–12) and in New York city (1812–27), where for a time he edited the *National Advocate*, a publication espousing Jeffersonian views. He held various judicial offices and was (1816–27) reporter of the decisions of the U S Supreme Court While reporter he prepared *A Digest of the Decisions of the Supreme Court of the United States, 1789–1820* (1821). Wheaton's diplomatic career began with his service (1827–35) as chargé d'affaires in Denmark The author of *A Digest of the Law of Maritime Captures and Prizes* (1815), he had the requisite background for negotiating a satisfactory settlement of American claims for ships seized by Denmark. While in Denmark he wrote his *History of the Northmen* (1831), which maintained that America had been discovered by Scandinavians be-

fore the voyage of Columbus. **Wheaton** represented (1835–46) the United States at the Prussian court. The U.S. Senate ratified treaties which he negotiated with Prussia respecting the rights of immigrants, but it rejected the reciprocal-trade agreements which he considered his greatest achievement. Wheaton's crowning work as a jurist was his *Elements of International Law* (1836) and the companion work, *A History of the Law of Nations* (1845). See biographies by W. V. Kellen (1902) and E. F. Baker (1937).

Wheaton. 1 Residential city (pop. 7,389), co. seat of Du Page co., NE Ill., W of Chicago, in a farm area; settled in the 1830s, platted 1853, inc. 1859. It is the seat of Wheaton College (coeducational, c.1854). Elbert H. Gary was born in Wheaton. 2 Village (pop. 1,700), co. seat of Traverse co., W Minn., on the Mustinka near the S. Dak. line, in a farm area; settled 1884, inc. 1887.

Wheaton College, at Norton, Mass.; nonsectarian, for women, opened 1835, chartered as a pioneer female seminary 1837, organized by Mary Lyon, became a college 1912.

Wheatstone, Sir Charles (hwēt'stōn,–stŭn), 1802–75, English physicist and inventor. He was professor at King's College, London, from 1834. A pioneer in telegraphy, he was coinventor of an electric telegraph (patented 1837) and inventor of an automatic transmitter, an electric recording apparatus, and an automatic telegraph. He is credited with the invention of the CONCERTINA and with improving the STEREOSCOPE and the dynamo. He is known also for his research on light (color vision and spectra), sound, and electricity; he popularized a method for the measurement of electrical resistance (see WHEATSTONE BRIDGE). He was knighted in 1868.

Wheatstone bridge [for Sir Charles Wheatstone], essentially a specially devised electric circuit for very accurate measurement of electrical resistance in a conductor. The conductor of unknown resistance is included in the circuit with three known resistances, when this unknown resistance (e.g., R_x) is balanced with the three known resistances (e.g., R_1, R_2, R_3), it can be calculated mathematically, since it becomes one term in a proportion $\left(\text{e.g., } \frac{R_x}{R_1} = \frac{R_2}{R_3}\right)$. In the slide-wire type of Wheatstone bridge, two of the three known resistances are formed by a wire divided into two proportionate parts by a sliding connection.

wheel. Through the many millenniums of the Paleolithic period and the Neolithic period no use of the wheel was known to man. Its use was not known to the American Indians until the white man introduced it. In the Old World it came into use in the Bronze Age, when oxen and horses were first used as draft animals and wheeled vehicles were devised. Wheels for vehicles were at first solid wooden disks, spoked wheels were introduced c.1800 B.C. The potter's wheel was invented in the Bronze Age, earlier pottery being made, like that of the American Indians, without the use of the wheel. The **wheel and axle** is classed in physics as one of the simple or elementary machines. It consists of a wheel mounted rigidly upon an axle or drum of smaller diameter, the wheel and the axle having the same axis. It is fundamentally a form of LEVER, the center common to both the wheel and the axle corresponding to the fulcrum, the radii of the two parts to the arms. The effort (applied to the wheel) needed to overcome the resistance (acting upon the axle) is relatively small. The mechanical advantage gained by the use of the machine is indicated by the ratio of the radius of the wheel and the radius of the axle. The machine is not as efficient as the lever, since a part of the effort must be used to overcome the resistance of FRICTION. In common use, a crank or handle often takes the place of the wheel. Applications of the wheel and axle are numerous in everyday life, examples are the clothes wringer, the doorknob, the capstan, and the windlass. As with the lever, the effort is applied through a greater distance than is the resistance, but in the wheel and axle this effort is applied conveniently in a circle. In the treadmill, the windmill, and the water wheel, the wheel and axle led the way to the utilization of power in modern machinery. Clockmakers were pioneers in devising ways of transmitting and controlling power by the use of the wheel and axle.

Wheeler, Benjamin Ide, 1854–1927, American educator and classical scholar, b. Randolph, Mass., grad. Brown (B.A., 1875; M.A., 1878), Ph.D. Univ. of Heidelberg, 1885. He was a professor of Greek and comparative philology at Cornell Univ. before serving (1899–1919) as president of the Univ. of California in the years of its greatest development. He wrote works in classics and in linguistics, among them *Dionysos and Immortality* (1899), *Alexander the Great* (1900), and *The Whence and Whither of the Modern Science of Language* (1905).

Wheeler, Burton Kendall, 1882–, U.S. Senator (1923–47), b. Hudson, Mass., grad. Univ. of Michigan, 1905. He practiced law in Butte, Mont. **Wheeler was** (1911–13) a member of the state legislature and was appointed (1913) Federal district attorney by President Woodrow Wilson. He was elected (1922) to the Senate from Montana on the Democratic ticket, but in 1924 was the vice presidential candidate of the Progressive party on the ticket with Robert La Follette. He soon returned to the Democratic party and backed much of the New Deal legislation. He became a leading exponent of isolationism and by 1940 had broken with President F. D. Roosevelt. In 1946 Wheeler was defeated in the Democratic primaries.

Wheeler, Homer Jay, 1861–1945, American agricultural chemist and agronomist, b. Bolton, Mass., grad. Boston Univ. (B.S., 1883), Ph.D. Univ. of Göttingen, 1889. He was affiliated with Rhode Island State College from 1889 to 1912, serving as professor of geology (1893–1912) and as director of the agricultural experiment station (1901–12). His work includes research on crop rotation, soil acidity, grass manuring, fertilizers, and the plant disease called potato scab.

Wheeler, Joseph, 1836–1906, Confederate general, b. Augusta, Ga., grad. West Point, 1859. He resigned from the army in April, 1861, to fight for the Confederacy. He commanded a brigade at Shiloh (April, 1862) and became chief of cavalry in the Army of Tennessee (Oct.). Wheeler ably covered Braxton BRAGG in the Kentucky campaign and was made a brigadier general. After distinguishing himself around Murfreesboro, he was promoted major general (Jan., 1863). In the CHATTANOOGA CAMPAIGN, he destroyed Rosecrans's supplies in a brilliant raid through middle Tennessee (Oct.). He joined Longstreet in the expedition against Knoxville (Oct.–Nov., 1863), returning to Bragg's army in time to help cover the retreat from Missionary Ridge. Wheeler operated against W. T. SHERMAN in the Atlanta campaign, the march to the sea, and the advance through the Carolinas. He surrendered with Joseph E. Johnston's army in April. After the war Wheeler, a lawyer and planter in Alabama, served in the House of Representatives (1883, 1885–1900). He was a major general of volunteers in the Spanish-American War, commanding the cavalry in the Santiago campaign. He commanded a brigade in the Philippine insurrection (1899–1900) and was made a brigadier general in the regular army shortly before he retired in Sept., 1900. Wheeler wrote *The Santiago Campaign* (1899). See biography by J. P. Dyer (1941).

Wheeler, Wayne Bidwell, 1869–1927, American prohibitionist leader, b. Trumbull co., Ohio, grad. Oberlin College, 1894, and Western Reserve law school, 1898. He became increasingly important in the Ohio Anti-Saloon League. As its superintendent, he worked militantly for prohibition legislation and in 1906 helped defeat Myron T. HERRICK for governor. As attorney for the National Anti-Saloon League after 1916, Wheeler fought for the adoption of the Eighteenth Amendment and aided in the preparation of the Volstead Act. See biography by T. J. Steuart (1928).

Wheeler, William Almon, 1819–87, American legislator, Vice President of the United States (1877–81), b. Malone, N.Y. He attended (1838–40) the Univ. of Vermont and was admitted to the New York bar in 1845. In New York he was district attorney of Franklin co. (1846–49), Whig member of the state assembly (1850–51), and a Republican member and the president pro tempore of the state senate (1858–59). After 1851 he turned from law to banking and railroad finance. He presided over the New York constitutional convention of 1867–68, and he sat (1861–63, 1869–77) in the House of Representatives. His most notable service in Congress was devising the Wheeler adjustment, a formula, acceptable to all factions, for resolving a disputed election in Louisiana. He strenuously opposed the "salary grab" act of 1873, he bought Federal bonds with the additional salary given him and had them canceled so that they could not be redeemed. Wheeler was little known when, in 1875, the Republicans nominated him for Vice President along with Rutherford B. HAYES for President.

Wheeler, William Morton, 1865–1937, American zoologist, b. Milwaukee, grad. German-American Normal College, Milwaukee, 1884, Ph.D. Clark Univ., 1892. He studied abroad, taught at the Univ. of Chicago (1892–99) and the Univ. of Texas (1899–1903), and was curator of invertebrate zoology at the American Museum of Natural History (1903–8). From 1908 to 1934 he was professor of entomology at Harvard, he was also dean of Bussey Institution there from 1915 to 1929. Among his works are *Ants* (1910), *Social Life among the Insects* (1923), *Social Insects Their Origin and Evolution* (1928), and *Demons of the Dust* (1930).

Wheeler Field, air base of the U.S. army on Oahu, T.H., near the southern edge of Schofield Barracks, est. 1922. It was bombed by the Japanese on the day of the attack (Dec. 7, 1941) on Pearl Harbor.

Wheeler National Monument: see NATIONAL PARKS AND MONUMENTS (table).

Wheeling, city (pop. 61,009), co. seat of Ohio co., W.Va., in the Northern Panhandle, on the Ohio river at the entrance of Wheeling Creek and SW of Pittsburgh; settled 1769, chartered 1806, inc. 1836. Wheeling is an important manufacturing and commercial center in a rich coal and gas area, producing iron and steel, tin plate, stogies, nails, china, glass, paper, foods, and textiles. Fort Fincastle, renamed Fort Henry, was built to protect the settlement from frequent Indian raids. One of the last skirmishes of the Revolution was fought here in 1782 when a party of British and Indian attackers was driven off. It became the western terminus of the National Road in 1818, a port of entry in 1831, and a railhead in 1852. As a center of pro-Unionist activity during the Civil War, the town became the site of the Wheeling Conventions (1861–62), which provided a means of forming a new state out of the north and west counties of Virginia. Wheeling became the first capital of West Virginia in 1863 (see CHARLESTON). Points of interest include a military school, the site of Fort Henry, St. Joseph's Cathedral (Catholic), and Oglebay Park. Wheeling Island is a residential area.

Wheelock, Eleazar or **Eleazer** (ēlē'zŭr hwē'lŏk), 1711–79, American clergyman, founder of DARTMOUTH COLLEGE, b. Windham, Conn., grad. Yale, 1733. He became (1735) the pastor of a Congregational church in that part of Lebanon, Conn., which is now Columbia. Here he became interested in Indian education, and he founded and conducted (1754–67) an Indian charity school. One of his first students, Samson Occom, and Nathaniel Whitaker went to England to raise funds for the project, and when an endowment of some $50,000 had been collected, Wheelock moved to what is now Hanover, N.H., and established (1770) Dartmouth College. He became its first president and guided the college through the early days of the American Revolution. See I. D. McCallum, *Eleazer Wheelock* (1939), Frederick Chase and J. K. Lord, *A History of Dartmouth College and the Town of Hanover* (2 vols., 1891–1913).

Wheelock, John, 1754–1817, American educator, b. Lebanon, Conn., grad. Dartmouth, 1771, son of Eleazer Wheelock. He tutored at Dartmouth after graduation, fought in the American Revolution, and succeeded his father (1779) as president of Dartmouth. Controversy over religious questions among the trustees led to his removal from office (1815), but a new board, created by the state legislature, made him head of the short-lived rival Dartmouth Univ. He wrote *Sketches of the History of Dartmouth College* (1816).

Wheelock, Lucy, 1859–, American educator, b. Cambridge, Vt. She was a pioneer in the kindergarten movement, having worked under Elizabeth Peabody in her school at Boston. In 1889 Miss Wheelock founded the Wheelock School (now Wheelock College) in Boston and served as its principal. She wrote *Talks to Mothers* (1923) and was also editor of *Pioneers of the Kindergarten in America* (1923).

wheel window see ROSE WINDOW.

Wheelwright, John, c.1592–1679, American Puritan clergyman, founder of Exeter, N.H., b. Lincolnshire, England. He studied at Cambridge and was vicar (1623–33) of Bilsby. Suspended by Archbishop Laud on a charge of nonconformity, he emigrated to New England in 1636. While pastor of a Puritan church at Mt. Wollaston (now Quincy), Mass., he alienated himself from the church in Boston, of which it was a branch, by publicly defending the views of ANNE HUTCHINSON, his sister-in-law. The General Court in Boston banished him from the colony in 1638, whereupon he formed a settlement at Exeter, N.H. When the new town was claimed as within the limits of Massachusetts, the minister, with part of the church he had established, removed in 1643 to Wells, Maine. The next year, upon his acknowledging some error on his own part, the sentence of banishment was withdrawn. He held a pastorate in Hampton, N.H. After visiting England, he returned to America, his last pastorate, from 1662, was at Salisbury, N.H. See memoir by C. H. Bell in the 1876 edition of Wheelwright's works, biography by John Heard, Jr. (1930).

Wheelwright, William, 1798–1873, American pioneer in South American railroad building and steam navigation of the Pacific, b. Newburyport, Mass. He attended Phillips Academy, Andover, Mass., but left for the West Indies at the age of 16, making only occasional visits to the United States during the remainder of his life. He commanded boats in and out of South American ports for a number of years, and from 1824 to 1829 he was U.S. consul at Guayaquil. Believing that steam navigation of the Pacific was possible, he spent the years 1835–38 obtaining necessary concessions and then went to England to get financial backing. In 1840 the Pacific Steam Navigation Company, with a British charter and with Wheelwright as superintendent, began operations, the *Chile* and the *Peru* sailed through the Straits of Magellan to Valparaiso and Callao in that year. Wheelwright developed a Chilean coal supply to provide fuel for the line and then turned his attention to railroad building, advocating in 1844 a railroad across the Isthmus of Panama, to which the service of his steamship company was soon extended. In 1852 he completed in Chile the first South American railroad, from Caldera to Copiapó. In 1850 he had also given to Chile the first South American

telegraph line. But his great ambition was to build a railroad across the Andes between Chile and Argentina Since Chile did not believe in the possibility, he went to Argentina, obtained the government's permission in 1861, and began work on the line itself in 1863 He opened Argentina's first important railroad, from Rosario to Córdoba, in 1870 Capital was available, but the further extension of the line had to wait on various complications, including international jealousy, and the railroad was not completed across the Andes until 1910 Wheelwright, however, turned to another project, and at the end of 1872 he opened a railroad from La Ensenada, on the Atlantic, to Buenos Aires, making possible the development of the port of La Plata, of which La Ensenada is now a part He then went to England, where he died the following year His writings included books which were observations and reports upon his work

Wheelwright, town (pop 2,027), E Ky , E of Hazard and near the Va line, in the Cumberland coal area

Whetstone, George, 1551?–1587, English dramatist and poet He was a friend of Gascoigne, of whom he wrote a metrical *Remembrance* (1577) His play *Promos and Cassandra* (1578), never acted, was a source for Shakspere's *Measure for Measure* Characteristic of the literary interests of his time were his *Rock of Regard* (1576), a miscellany of his verse and prose, and *An Heptameron of Civil Discourses* (1582), a collection of stories which is also a book of etiquette and a discourse on marriage See study by T C Izard (1942)

whetstone, natural or manufactured stone used as an abrasive solid to sharpen edge tools It is used dry, with water, or with oil Such a stone used with oil and generally of the finer grade is usually called a HONE or an oilstone

whey: see CHEESE

Whig, English political party name It seems to have been a shortened form of *whiggamor* [cattle driver] and was used in the 17th cent for Scottish dissenters It was applied (c 1679) to the English opponents of the succession of the duke of York (later James II) As upholders of the power of Parliament against the crown, the Whigs were in a sense the heirs of the Puritan movement, since most Whigs were dissenters, the name, suggesting Scottish Presbyterianism and lawlessness, lent itself naturally to use by their enemies The party drew its power from the landed gentry and the commercial interests, as opposed to the aristocratic Tory group The GLORIOUS REVOLUTION of 1688 was a triumph of dissent over High Church opinion and began a long period of Whig dominance In the reign of Queen Anne the Whigs supported the War of the Spanish Succession and the Hanoverian succession as prescribed by the Act of Settlement (1701) The Jacobite sympathies of the Tories after the death of Anne discredited that party after its brief control (1710–14), and the accession of George I began a period of assured Whig control for 50 years The dominant figure in the party until his fall in 1742 was Sir Robert WALPOLE, whose skillful administration and political acumen welded the party into a powerful organization and gave shape to modern British cabinet government The party was mercantilist in its policy and looked to John Locke's theories of democratic government and religious toleration for its political philosophy The accession of George III (1760), who attempted to reassert royal authority, and factionalism within the Whig party enabled the Tories to regain control The Rockingham Whig faction, influenced by Edmund BURKE, advocated practical reform, but resisted the political reforms advocated by the earl of CHATHAM After the French Revolution the Whigs, kept out of office until 1830, took on a distinctively middle-class character and became identified with the movement for political and social reform which culminated in the Reform Bill of 1832 Thereafter the name Whig gave way and the party became the LIBERAL PARTY, although the old term was occasionally applied to the less progressive members of the new party See Basil Williams, *The Whig Supremacy* (1939)

Whig party, one of the dominant political parties of the United States in the second quarter of the 19th cent As a party it did not exist before 1836, but its origins are found much earlier, the groups that composed it arose in 1824 when the adherents of Andrew JACKSON violently opposed John Quincy ADAMS and Henry CLAY The NATIONAL REPUBLICAN party, created by Jackson's enemies, grew stronger after his triumph in 1828 But this was only one group that opposed Jackson, who was also persona non grata after 1832 with states' rights advocates in the South, proponents of internal improvements in the West, and businessmen and friends of the Bank of the United States in the East Small opposition parties had sprung up, the most notable being the ANTI-MASONIC PARTY This opposition was built up and correlated by Henry Clay in the election of 1832 Four years later all of the various groups were combined in a loose alliance, though they were not unified or strong enough to join behind a single presidential candidate; instead several Whig candidates ran for office. The most prominent were Daniel WEBSTER in New England, William Henry HARRISON in the Northwest, and Hugh Lawson WHITE in the Southwest The election went to Martin VAN BUREN, but in the opposition the Whigs grew steadily stronger The two great leaders of the party were Clay and Webster, but neither was able to lead the party to victory This failure was partially a result of the sectional variations in the party, which had only one common aim—opposition to the Democrats—and partially a result of the power held by the "bosses" of New York, Thurlow WEED and William H SEWARD. The party went on to victory in 1840 with the rousing "Log Cabin and Hard Cider" campaign "Tippecanoe and Tyler too" put William H Harrison in the White House His death and the inauguration of John Tyler led to a definite split in the party The trouble arose over the bank bill, and Tyler was soon alienated from all of the Whigs, even Webster retired from the cabinet after completing the Webster-Ashburton treaty Clay became the standard-bearer in 1844 but was defeated by James K POLK. In 1848 Weed and his associates swung the nomination from Webster to Zachary TAYLOR, who had gained wide popularity as a commander in the Mexican War This move temporarily prevented a division of the party, and although Taylor died while Clay was formulating the COMPROMISE OF 1850 in Congress, Millard FILLMORE, his Vice President and presidential successor, kept the faith of the Whig party However, the disintegration of the party was already manifest, in 1848 several Whig delegates bolted and joined the new FREE-SOIL PARTY along with the ABOLITIONISTS Within the Whig party a bitter struggle developed between the "Conscience Whigs," antislavery elements predominantly from the North and the "Cotton Whigs," proslavery members mostly from the South In the election of 1852, the party was torn wide open by sectional interests Both Clay and Webster died in the campaign, and Winfield SCOTT, the presidential candidate, won only 42 electoral votes This brought about a quick end to the Whig party, and its remnants gravitated toward other parties in a new alignment The newly formed (1856) REPUBLICAN PARTY and the sharply divided DEMOCRATIC PARTY absorbed the largest segments Other Whigs, led by Fillmore, drifted into the KNOW-NOTHING MOVEMENT See E M Carroll, *Origins of the Whig Party* (1925), G R Poage, *Henry Clay and the Whig Party* (1936), W E. Binkley, *American Political Parties* (1943)

whippet, breed of dog distinguished by its slim body and its great running speed It is believed to have been developed in England about the middle of the 19th cent Its ancestry probably includes the English greyhound, Italian greyhound, and some terriers Males stand 18 to 20 in high at the shoulder The head is long and narrow, the muzzle pointed, and the neck, body, and legs are slender The hair is very short and close, in color it may be red, black, white, brindle, fawn, blue, or mixed colors Whippet racing, long popular in England, has spread through parts of the United States Whippets have achieved speeds up to 35 mi. an hour

Whipple, Abraham, 1733 1819, American Revolutionary naval officer, b Providence, R I In 1759–60, as captain of the privateer *Game Cock* in the last of the French and Indian Wars, he captured many prizes Whipple commanded the band of Rhode Islanders who captured and burned the British revenue cutter GASPEE in Narragansett Bay in 1772, one of the most provocative instances of resistance to the British in the pre-Revolutionary period At the beginning of the American Revolution he was made commodore of Rhode Island's small fleet and then became fourth-ranking captain in the Continental navy With the *Columbus* in 1775 he fought the first sea fight of the war In 1778 Whipple, commanding the *Providence*, evaded the British blockade of Narragansett Bay and carried important government dispatches to France. His most daring exploit occurred in 1779 when he encountered the large British Jamaica fleet, protected by gunboats. Whipple, concealing the guns of the *Providence*, hoisted the British flag and fell in with the fleet for several days. Each night he cut out one of the merchant ships, manned it from his own crew, and sent it to an American port Eight of the 11 captured ships reached port, making this one of the richest hauls of the war In 1780 he was charged with the naval defense of Charleston, S C All but one of his vessels were dismantled to bolster the shore batteries, but the city fell and Whipple was captured and held prisoner for the rest of the war. In his later years he lived in Ohio

Whipple, Amiel Weeks, 1818–63, American soldier and topographical engineer, b. Greenwich, Hampshire co , Mass , grad. West Point, 1841. He became (1841) a topographical engineer in the U S. army and engaged in surveying the Canadian (1844–49) and the Mexican (1849–53) borders of the United States. Whipple then made (1853–54) a survey of the region from Fort Smith, Ark., to Los Angeles to determine the route for a projected transcontinental railroad. His diary of this expedition became a valuable anthropological record of the little-known Indians of the Southwest Later he took part in broadening the channels of the St. Clair flats and St. Marys river which opened the Great Lakes to navigation by larger boats He fought in the Civil War, reaching the grade of major general, but was killed at the battle of Chancellorsville See Grant Foreman, *A Pathfinder in the Southwest* (1941)

Whipple, George Hoyt, 1878–, American pathologist, b Ashland, N H , M D Johns Hopkins, 1905. He taught at Johns Hopkins (1909–14) and at the Univ of California (1914–21) and in 1921 became professor of pathology and dean of the school of medicine and dentistry at the Univ of Rochester. His work included studies of metabolism, blood regeneration, and anemia For his independent researches on the treatment of pernicious anemia by the use of liver, he shared the 1934 Nobel Prize in Physiology and Medicine with G. R. Minot and W P Murphy

Whipple, Henry Benjamin, 1822–1901, American Episcopal bishop, b Adams, N Y , studied at Oberlin Collegiate Institute He was ordained a priest in 1850 and in 1859 was consecrated the first bishop of Minnesota With James Lloyd Breck he founded (1858) in Faribault, Minn , the Seabury Mission, which developed into the Seabury Divinity School, and church schools for boys and girls Bishop Whipple's influence was great with the Indians, among whom he worked and by whom he was called "Straight Tongue", he was successful in obtaining some government reforms in the administration of Indian affairs

Whipple, William, 1730–85, American Revolutionary patriot, signer of the Declaration of Independence, b Kittery, Maine Whipple, who had been a sea captain, was a merchant of Portsmouth, N H , before he served as a delegate to the Continental Congress from New Hampshire (1776–79) and as a commander in the Saratoga campaign (1777)

whippoorwill (hwĭ"pərwĭl', hwĭ'pərwĭl"), North American bird of the goatsucker family, common in the E United States The plumage in both sexes is a mixture of browns, black, and gray, with the abdomen lighter and speckled In the male the broad ends of the outer tail feathers are white There are stiff bristles around the short bill Seldom seen, the whippoorwill sleeps during the day in the woods, where it is inconspicuous against its background, and during the night catches its insect food on the wing Its weird song, a monotonous repetition of its name, and its noiseless flight have made it an object of superstition

whirlpool, revolving current in an ocean, river, or lake It may be caused by the configuration of the shore, irregularities in the bottom of the body of water, the meeting of opposing currents or tides, or the action of the wind upon the water There are no true whirlpools really dangerous to shipping, the MAELSTROM near Norway and CHARYBDIS near Sicily are subjects of legend and myth, and CORRYVREKIN near Scotland was feared by the sailors of small boats The Whirlpool Rapids below NIAGARA FALLS are remarkable for their volume and violence, caused by the narrowing of the channel There is also a whirlpool below Victoria Falls in South Africa

whirlwind, any revolving mass of air resulting from local atmospheric instability, caused, for example, by intense heating of the ground by the sun on a hot summer day The term includes the HURRICANE and the TORNADO, but is commonly applied also to the small whirls of dust or leaves and to the sand whirls of the desert

whisky [Gaelic, = water of life], spirituous liquor distilled from a fermented mash of grains, usually rye, barley, oats, wheat, or corn Inferior whiskies are made from potatoes, beets, and other roots The three standard whiskies of the world are Scotch, Irish, and American (the United States and Canada) The Scotch Highland whisky (made in pot stills) and that of the Lowlands (patent stills) differ according to percentage of barley used, quality of the water, quantity of peat employed in curing the malt, manner of distilling, and kind of casks in which they are matured Practically all Scotch whiskies are blends, the "self" whisky, being rarely to modern taste No whisky can be released from bond in Great Britain until it has matured in wood at least three years, and in practice most whisky is stored seven or eight years before marketing Irish whisky resembles Scotch, but no peat is used in the curing, and instead of the dry, somewhat smoky flavor of Scotch, it has a full, sweet taste American whiskies are divided into two main varieties, rye and bourbon (bûr'bun), a corn whisky which derives its name from Bourbon co., Ky They have a higher flavor and a much deeper color than Scotch or Irish and require from two to three years longer to mature Newly made whisky is colorless, the rich brown of the matured liquor being derived from the cask in which it is stored Whisky was made in England in the 11th cent., chiefly in monasteries, but in the 16th cent. distilling was carried on commercially. The illicit manufacture of whisky

to avoid payment of excise taxes has been common. In the United States this is known as moonshining.

Whisky Rebellion, 1794, insurrection in the Pennsylvania counties W of the Alleghenies, caused by Alexander Hamilton's excise tax of 1791 The settlers, mainly Scotch-Irish, who made whisky extensively, resented the tax as discriminatory and detrimental to their liberty and economic welfare There were many public protests, and rioting broke out in 1794 under the leadership of David Bradford against the government's efforts to enforce the law Albert Gallatin urged moderation, but negotiation failed Troops called out by President Washington quelled the rioting Bradford escaped, but many were arrested Washington pardoned those who were convicted The Federal government's power to enforce its laws had been proved, but the frontiersmen's hatred of the controlling Federalists had long-lasting political consequences See L D Baldwin, *Whiskey Rebels the Story of a Frontier Uprising* (1939)

Whisky Ring, in U S history, a conspiracy which defrauded the Federal government of liquor taxes Soon after the Civil War these taxes were raised very high, in some cases to eight times the price of the liquor Large distillers, chiefly in St Louis, Milwaukee, and Chicago, bribed government officials high and low in order to retain the tax proceeds The Whisky Ring was a public scandal, but it was considered impregnable because of its strong political connections U S Secretary of the Treasury B H Bristow resolved to break the conspiracy To avoid warning the suspects, he assigned secret investigators from outside the Treasury Dept to collect evidence He struck suddenly in 1875 and arrested the persons and seized the distilleries involved Over $3,000,000 in taxes were recovered, and of 176 persons indicted 110 were convicted Although President Grant's secretary, O E Babcock, was acquitted, many persons believed that the Whisky Ring was part of a plot to finance the Republican party by fraud

whist, card game for four players, those on opposite sides of the table being partners The full pack of 52 cards is dealt one at a time, each player thus receiving 13 cards The dealer's last card is turned up to indicate which suit is trump, and after he draws this card in hand, the player on the left of the dealer leads Cards rank from ace down through 2 (in the cut for deal, however, the ace ranks lowest), and the highest card of the suit lead or the highest trump wins the trick Partners collect their tricks in one pile Six tricks make a book, and each trick over the book in one game counts one point The partners who first score seven points win Famous variations include duplicate whist, bid whist, solo whist, and Norwegian whist Whist originated in England, where it was a development of earlier games (e g , *triumph*) which were known in the 16th cent In 1742 Edmond Hoyle published *A Short Treatise on the Game of Whist,* but it was Henry Jones (see Cavendish, pseud) who first compiled (1862) a complete system of scientific play for the game The game spread to other European countries in the 19th cent , and whist tournaments were organized Whist gave rise in the late 19th cent to the game of Bridge, which quickly superseded the parent game in popularity See R L Frey, ed , *The New Complete Hoyle* (1947)

Whistler, James Abbott McNeill, 1834-1903, American painter and etcher, b Lowell, Mass He received his first drawing lessons in St Petersburg, Russia, where his father, a U S army engineer, was supervising the building of the railroad to Moscow In 1849 the family returned to America Whistler was dismissed successively from West Point and from his position as map engraver with the U S Coast and Geodetic Survey In 1855 he went to Paris He early became associated with the impressionist movement First known as an etcher, he scored a signal success at the Salon des Refusés in 1863 with his *Little White Girl* From this time he took up his headquarters in London, where his eccentricities and stinging wit made him famous long before his talents as an artist were recognized To advertise and defend his credo of art for art's sake, Whistler resorted to elaborate exhibits, lectures, polemics, and more than one lawsuit and by dint of perseverance, audacity, and virtuosity succeeded in foisting it upon a reluctant British public In 1888 he married Mrs Beatrix Godwin His last years saw a constant increase in his fame and prestige Although he indulged in some sheer exhibitionism, his influence as an artist, teacher, and gadfly was enormously stimulating and far-reaching His admirable draughtsmanship, exquisite color, and extreme technical proficiency both as etcher and painter would have won him recognition no matter what his doctrine, it was his attitude, not lack of skill, that caused him to be called the prince of amateurs As a painter, Whistler was profoundly influenced by the Japanese print and by the art of Velásquez If he failed to achieve the decorative distinction of the former or the profundity of the latter, he did create a highly personal style in which purely decorative elements and atmosphere are blended with great subtlety As an etcher, however, his reputation is perhaps even more secure Over 400 superb plates attest to his industry and inspiration The most important are classified as *Little French Series, Thames Series, First Venice Series,* and *Second Venice Series* Fine collections are in the British Museum, the Bibliothèque nationale, the Academy, Venice, the New York Public Library, and the Metropolitan Museum A wide range separates the early ones with their insistence on the factual and their abundance of detail from the sketchy and atmospheric evocations of his later years They are alike, however, in their fine luminosity, brilliant execution, and quivering life In lithograph, water color, and pastel Whistler also excelled Exquisite examples of his painting are in the galleries of London, Paris, Pittsburgh, Washington, D C , Chicago, Brooklyn, N Y , and New York The most representative collection is that in the Freer Gallery of Art, Washington, D C , which also contains an entire room which he decorated for the Leyland home in London—the so-called Peacock Room His famous portrait of his mother, bought for the Luxembourg Museum, Paris, has been promoted to the Louvre *Nocturne in Green and Gold, Cremorne Gardens at Night,* portraits of Sir Henry Irving, Connie Gilchrist, Théodore Duret, and others are all in the Metropolitan Museum He was the author of brilliant critical essays and aphorisms, e g , *Ten o'Clock* (1888) and *The Gentle Art of Making Enemies* (1890) See biography by E R Pennell and Joseph Pennell (2 vols , 1908), studies by T R Way and G R Dennis (1903) and Mortimer Menpes (1904), Howard Mansfield, *A Descriptive Catalogue of the Etchings and Dry-Points of Whistler* (1909) and *Whistler as a Critic of His Own Prints* (1935?)

Whiston, William (hwĭ'stun), 1667-1752, English clergyman and mathematician He won favor through his *New Theory of the Earth* (1696) and in 1701 was made deputy to Sir Isaac Newton, whom he succeeded (1703) as Lucasian professor of mathematics at Cambridge Well known as a preacher, Whiston aroused opposition by proclaiming his opinion that the faith of the early Christian centuries was Arian In 1710 he was expelled from the university He propounded his Arian views in *Primitive Christianity Revived* (5 vols , 1711-12), lectured on scientific and religious subjects in London and elsewhere, and continued his scientific experiments His translation (1737) of the writings of Josephus has been many times reprinted See his memoirs (2 vols , 1749-50).

Whitaker, Arthur Preston, 1895-, American historian, b Tuscaloosa, Ala , grad Univ of Tennessee, 1915, Ph D Harvard, 1924 A Rhodes scholar (1917), Whitaker taught at Florida State College (1926-27) and Western Reserve Univ (1928-30), was professor of American history at Cornell Univ (1930-36), and became professor of Latin American history at the Univ of Pennsylvania in 1936 After a visit (1941-42) to South America, he worked (1943-44) for the Dept of State and then acted as consultant (1944-45) His works include *The Spanish-American Frontier, 1783-1795* (1927), *The Mississippi Question 1795-1803* (1934), *The United States and the Independence of Latin America, 1800-1830* (1941) *Latin America and the Enlightenment* (with others, 1942), and *The United States and South America* (1948) He was also editor of a series of yearly volumes (1941-44) called *Inter-American Affairs*

Whitaker, Charles Harris (hwĭ'tukur), 1872-1938, American architect and author, b Rhode Island, studied art abroad Editor (1913-27) of the journal of the American Institute of Architects, he became widely known through his fight against "pork barrel" appropriations for public buildings He was a forceful advocate of government housing and community planning He wrote *Rameses to Rockefeller* (1934), a history of architecture

Whitaker, residential borough (pop 2,217), Allegheny co , SW Pa , near Pittsburgh, inc 1906

Whitby, town (pop 5,904), S Ont , ENE of Toronto and on Lake Ontario, with a good harbor, founded 1836 It has tanneries and grain elevators and manufactures leather goods, hardware, and lace

Whitby, urban district (pop 11,451), North Riding of Yorkshire, England, at the mouth of the Esk It is a seaport and a resort The Streoneshalh of Bede, it was the site of an abbey founded by St Hilda in 657 The Synod of Whitby was held here in 664 under King Oswy of Northumbria The Danes ravaged the abbey in 867, and in 1078 it was refounded for Benedictines The town has a cross commemorating the poet Cædmon, who lived in the abbey Captain Cook was a shipbuilder's apprentice in Whitby, his ship *Resolution* was built here Shipbuilding is still carried on to a limited extent Jet ornament making, of material quarried near, is a long-established industry The town has a museum with an archaeological collection

Whitby, Synod of, called by King Oswy of Northumbria in 664 at Whitby Its purpose was to choose between the usages of the Celtic and Roman churches, primarily in the matter of reckoning Easter (see calendar) Oswy decided for the Roman usages and in so doing determined that the English church would be associated with the Roman in the main stream of Western European Christianity. Only a few of the Celtic clergy returned to the monastery of Iona and to their old ways Bede's date of 664 has recently been interpreted as Sept or Oct , 663

White, Andrew Dickson, 1832-1918, American educator and diplomat, b Homer, N Y , briefly attended Geneva (now Hobart) College, grad Yale, 1853 He studied in France and Germany, served (1854-55) as attaché in St Petersburg, and toured Europe While teaching history (1857-63) at the Univ of Michigan, he developed the idea of a university detached from all sects and parties and free to pursue truth without deference to dogma After his father died in 1862 he returned to New York a comparatively rich man He sat (1864-67) in the New York state senate and was chairman of the education committee, which dealt with the founding of a land-grant college With the financial aid of a fellow senator, Ezra Cornell, the land grant was made available for the institution which became Cornell Univ White, as first president (1867-85), expanded the institution to teach not only agriculture and mechanic arts but also other fields of knowledge He was one of the first educators to use the system of free elective studies As Cornell Univ was nonsectarian, the charge of "godlessness" was made against it White, a practicing Episcopalian, maintained that freedom was beneficial to religion also and wrote his *History of the Warfare of Science with Theology in Christendom* (1896) and *Seven Great Statesmen in the Warfare of Humanity with Unreason* (1910) to develop his concept of free inquiry White was minister to Germany (1879-81) and to Russia (1892-94) He was ambassador to Germany (1897-99) and was chairman of the American delegation to the First Hague Conference (1899) He persuaded Andrew Carnegie to build the Palace of Justice to house the Hague Tribunal See his autobiography (1905), W P Rogers, *Andrew D White and the Modern University* (1942)

White, Bouck (bouk), 1874-, American clergyman and author, b Middleburg, N Y , grad Harvard, 1896, and Union Theological Seminary, 1902 In 1904 he was ordained a Congregational minister. After serving several pastorates, he became (1908) head resident of Trinity House, Brooklyn, N Y , but his *Call of the Carpenter* (1911), portraying Jesus as a social agitator, led to his dismissal in 1913 He then founded and was pastor of the Church of the Social Revolution and was several times imprisoned for actions connected with his socialistic views His other books include *Letters from Prison* (1915) and *The Free City* (1919)

White, Clarence Cameron, 1880-, American Negro composer and violinist, b Clarksville, Tenn , studied at the Oberlin Conservatory and with Coleridge-Taylor in London In addition to activities as violinist and teacher in Boston (1912-23) and New York, he was director of music at West Virginia State College, Institute, W Va. (1924-30), and at Hampton Institute (1932-35) His opera *Ouanga* (1932) won the David Bispham award, and many violinists have played his *Bandanna Sketches* and his arrangements of Negro spirituals He also wrote a *Negro Rhapsody* and a string quartet on Negro themes

White, Edward Douglass, 1845-1921, Chief Justice of the U S Supreme Court (1910-21), b Lafourche parish, La He attended the Jesuit College in New Orleans and Georgetown College (now Georgetown Univ), and after service in the Confederate army he practiced law White became (1879) judge of the state supreme court and served (1891-94) in the U S Senate until he was appointed Associate Justice of the Supreme Court by President Grover Cleveland in 1894 Made Chief Justice by President W H Taft in 1910, White—the first Southerner to head the Supreme Court since Roger Taney—was generally a conservative on the bench He wrote the "rule of reason" decisions, which differentiated between legal and illegal business combinations, in the antitrust cases against the American Tobacco Company and the Standard Oil Company in 1911 In 1916 he wrote the decision upholding the constitutionality of the Adamson Act, which established an eight-hour day for railroad workers See biography by Sister Marie Carolyn Klinkhamer (1945).

White, Edwin, 1817-77, American historical painter, b South Hadley, Mass , studied in Paris and Dusseldorf Among his works are *The Antiquary* (Metropolitan Mus), *Washington Resigning His Commission* (state capitol, Annapolis, Md), *Thoughts of Liberia and Emancipation* (N Y Public Library), *Leonardo da Vinci and His Pupils* (Amherst College), *Interior of the Barghello, Florence* (Mus of Fine Arts, Boston), and *Murillo Sketching the Beggar Boy* (N Y Historical Society) He became a member of the National Academy of Design in 1849

White, Elijah, 1806-79, American missionary in the Oregon country A physician, he left Boston in 1836 to join the Methodist mission established by Jason Lee After friction with his associates, he left in 1840 His fame rests on the fact that when in 1842 he returned overland to Oregon with an

appointment as an Indian agent he led the first large (more than 100) party of settlers to Oregon.

White, Ellen Gould (Harmon), 1827–1915, leader of the Seventh-Day Adventists, b. Gorham, Maine. Converted at the age of 15 to the beliefs of the ADVENTISTS, she began (1844) to receive "visions" in trances, accepted as prophetic by many members of that sect In 1846 she married James White, a minister of Adventist convictions. Under the direction of a vision to Mrs White, she and her husband founded (1866) the Western Health Reform Institute at Battle Creek, Mich After her husband's death in 1881, she traveled widely as a missionary See M E Olsen, *A History of the Origin and Progress of the Seventh-Day Adventists* (1925)

White, Elwyn Brooks, 1899–, American writer, b Mt Vernon, N Y , grad Cornell, 1921 A member of the early *New Yorker* magazine staff, he wrote "The Talk of the Town", some of these editorials were collected in *The Wild Flag* (1946) His collection of humorous essays *One Man's Meat* (1942) was reissued in 1944 with 10 new chapters He also wrote *Is Sex Necessary?* (with James Thurber, 1929), *Quo Vadimus?* (1939), and *Stuart Little* (1945), a story for children He also wrote much light, graceful, and satirical verse He edited *A Subtreasury of American Humor* (1941) with K S A White, his wife *Here Is New York* (1949) is not a guidebook, but a distillation of the city's essence by one who loves it

White, Sir George Stuart, 1835–1912, British field marshal He entered the army in 1853, but first achieved distinction in the Afghan War of 1878–80 He served in Egypt in 1884–85 In Burma (1885–87), where he was knighted in 1885, in Baluchistan (1889–93), and later as supreme military commander in India (1893–98), he followed the "forward" policy of combating Russian advance in the Middle East by aggressive campaigns, military and diplomatic, in the borderlands His greatest fame came for his defense of Ladysmith in the South African War against a 118-day siege by the Boers (1899–1900) He became governor of Gibraltar (1900–4) and was made field marshal when Edward VII visited that colony See biography by T F G Coates (1900)

White, Gilbert, 1720–93, English naturalist. He served as curate at SELBORNE and at parishes near by from 1751 He recorded his detailed observations of nature in letters to other naturalists and on these based *The Natural History and Antiquities of Selborne* (1789) This work, often reprinted, is valued for its pleasing, simple style and scientific accuracy See biographies by Walter Johnson (1928) and W S Scott (1946).

White, Henry, 1850–1927, American diplomat, b Baltimore He studied abroad and traveled widely White—often called the first career diplomat in the United States—entered the foreign service as secretary (1883–84) of the U S legation in Vienna He served (1884–93) with the U S embassy at London, and in 1896 President William McKinley appointed him secretary of the embassy He later was ambassador at Rome (1905–7) and at Paris (1907–9); as head of the U S delegation to the Algeciras Conference, White helped in the settlement of the Moroccan crisis between Germany and France He was sent (1910) as a special emissary to Chile and in 1919 was appointed by President Wilson a commissioner to the Paris Peace Conference See biography by Allan Nevins (1930)

White, Henry Kirke, 1785-1806, English poet He was articled to a Nottingham law firm in 1802, but soon began writing verse and essays His *Clifton Grove* (1803) was attacked as immature by the *Monthly Review*, but it brought him the praise and friendship of Southey White entered St John's College, Cambridge, in 1804 to prepare for holy orders, but died of tuberculosis in 1806 His *Remains*, with letters and a biography by Southey, came out posthumously (3 vols , 1807–22) Much of his popularity was due to pity aroused by his early death, and later criticism values his work as little better than mediocre

White, Horace, 1834–1916, American journalist and author, b Colebrook, N H , grad Beloit College, 1853 As a reporter for the Chicago *Tribune* he covered the famous Lincoln-Douglas debates in 1858 In his newspaper career he was a liberal and a free trader, both on the *Tribune*, where he was editor in chief from 1864 to 1874, and on the New York *Evening Post*, where he was staff member from 1881 to 1899 and editor in chief from 1899 to 1903. His *Money and Banking Illustrated by American History* (1895 and later revisions) was for years the standard text on finance.

White, Hugh Lawson, 1773–1840, American political leader, b Iredell co , N C He moved (1787) to what is now E Tennessee and served in the wars against the Creek and Cherokee Indians After he became (1793) secretary to Gov William BLOUNT, he studied law in Lancaster, Ohio, and began (1796) practice in Knoxville, Tenn He was judge (1801–7) of the Tennessee superior court and state senator (1809–15) before he served (1825–40) in the U.S. Senate, where his firm conscience and plain manners won him wide respect. White backed Andrew JACKSON until 1835, when he split with the President over the currency question. When in 1836 Jackson backed Martin Van Buren for President, White, in protest, ran for the presidency as a WHIG PARTY candidate and secured the electoral votes of Tennessee and Georgia. White resigned (1840) from the U.S. Senate after he fought, in opposition to the instructions of the Tennessee legislature, Van Buren's plan for the Independent Treasury System

White, John, 1575–1648,? English coloniser, b. England, grad Oxford, 1597. An Anglican priest of moderate Puritan belief, White desired to establish a colony for nonconformists. He helped form the Massachusetts Company (1629), but he never came to America

White, John, fl 1585–91, leader of the "lost colony" on ROANOKE ISLAND, N C See also CROATAN.

White, Pearl, 1889–1939, American moving-picture actress, b Green Ridge, Mo. She appeared in such serials as *The Exploits of Elaine* and *The Perils of Pauline*, adventures which were continued from week to week. Always in danger, she was always rescued See her autobiography, *Just Me* (1919).

White, Peregrine, 1620–1704, American pioneer. He was born on the *Mayflower* as she lay at anchor in Cape Cod bay, Nov 20, the first child born to English parents in New England He became a citizen of Marshfield, Mass , and held minor offices.

White, Richard Grant, 1821–85, American journalist and writer, b. New York city He was a newspaper critic in New York but is better known for his edition of Shakspere and for two dogmatic manuals of English usage that were reissued in many editions over the years—*Words and Their Uses* (1872) and *Every-Day English* (1880). He was the father of Stanford White

White, Stanford, 1853–1906, American architect, b New York city, son of Richard Grant White In 1872 he entered the office of Gambrill and Richardson in Boston, at the time when H H Richardson was at the peak of his fame Here White worked upon the design for Trinity Church, Boston After studying in Europe, he entered (1879) into partnership with C. F McKim and W. R Mead, a firm which was to affect the course of American architecture over a long period White had a passionate love of beauty, and his special talents were for the decorative elements of a building and for its interior design and furnishing, and he also possessed a wide knowledge of antiques Among the buildings executed by the firm, those which are commonly ascribed as his individual accomplishments include Madison Square Garden, Madison Square Presbyterian Church, the Herald Square Building, Washington Arch, and the Century Club, all in New York, only the last two still stand. They illustrated his characteristic concentration upon rich and graceful effects and especially upon beautifully sculptured Renaissance ornament White was shot and killed in Madison Square Roof Garden by Harry K Thaw, because of trouble over Thaw's wife, Evelyn Nesbit Thaw See biography by C. C. Baldwin (1931)

White, Stewart Edward, 1873–1946, American author, b Grand Rapids, Mich , grad Univ of Michigan, 1895 His adventure stories reflect his own experiences, he had been in the Black Hills gold rush when he wrote *The Claim Jumpers* (1901) and was working in a Michigan lumber camp when he completed *The Blazed Trail* (1902) His trilogy, *The Story of California* (1927), consists of three painstaking historical novels, *Gold a Tale of the Forty-Niners* (1913), *The Gray Dawn* (1915), and *The Rose Dawn* (1920) He also wrote *The Magic Forest* (1903) for children See his autobiographical *Dog Days* (1930)

White, Walter Francis, 1893–, American Negro leader, b Atlanta, Ga , grad Atlanta Univ , 1916 He was honored by a Guggenheim award for his novel *Flight* (1926) He became in 1931 secretary of the National Association for the Advancement of Colored People and tirelessly fought against racial discrimination and lynchings in the United States He meanwhile served on several government commissions His defense of Negro rights is vividly recorded in his autobiography, *A Man Called White* (1948) His works also include *Fire in the Flint* (1924), *Rope and Faggot* (1929), and *Rising Wind* (1945)

White, William, 1748–1836, American Episcopal bishop, b Philadelphia, grad College of Philadelphia (now the Univ of Pennsylvania), 1765. He was ordained in England in 1772, returning to become assistant rector, then rector, of Christ Church, Philadelphia He was instrumental in organizing the Protestant Episcopal Church in the United States He drafted its first constitution and aided in the American revision of the Book of Common Prayer Elected bishop of Pennsylvania in 1786, he went (1787) to England for consecration His works include *Memoirs of the Protestant Episcopal Church in the United States of America* (2d ed., 1836) See his *Life and Letters* (ed. by W. H. Stowe, 1937).

White, William Alanson, 1870–1937, American psychiatrist, b. Brooklyn, N.Y., studied (1885–89) at Cornell, M.D. Long Island Hospital Medical School, 1891. On the staff of the Binghampton State Hospital from 1892, he was appointed (1903) superintendent of St. Elizabeth's Hospital, Washington, D C., a position he retained the rest of his life White's chief contribution was his ability to seek out and experiment with new and promising psychiatric methods. He was one of Freud's earliest supporters in the United States, founding (1913) the *Psychoanalytic Review* with S. E. Jelliffe and writing one of the first American works on psychoanalysis, *The Mechanisms of Character Formation* (1916). He was especially active in bringing about the spread of psychiatric knowledge. In 1934 a group of his supporters established the William Alanson White Foundation to further his scientific objectives, it was responsible in 1936 for bringing into existence the influential Washington School of Psychiatry See his autobiography (1938).

White, William Allen, 1868–1944, American author and writer, b Emporia, Kansas, studied (1886–90) at Kansas State Univ. He bought the Emporia *Gazette* in 1895, edited it the rest of his life, and made it and himself famous throughout the nation as representatives of "grass-roots" political opinion. In 1896 his editorial "What's the Matter with Kansas?" attacked the Populists and aided the Republicans in electing McKinley His voice later was raised in favor of liberal movements in and outside the Republican party. His fiction presents the Middle West in short stories, such as those in *In Our Town* (1906), and in novels, among them *A Certain Rich Man* (1909) His other works include a biography of Woodrow Wilson (1924), two of Calvin Coolidge (1925, 1938), political sketches in *Masks in a Pageant* (1928), economic theory in *The Changing West* (1939), and two collections of his newspaper writings, *The Editor and His People* (selected by H O Mahin, 1924) and *Forty Years on Main Street* (comp by R H Fitzgibbon, 1937) See his autobiography (1946) and selected letters (ed by Walter Johnson, 1947), Walter Johnson, *William Allen White's America* (1947)

White, William Hale, pseud **Mark Rutherford**, 1831–1913, English novelist His best-known works are *The Autobiography of Mark Rutherford* (1881), its sequel, *Mark Rutherford's Deliverance* (1885), and *The Revolution in Tanner's Lane* (1887), pictures of nonconformist England by a man whose own theology fitted into no sect See memorial introduction by H M Massingham to 1936 ed of the *Autobiography*

white ant: see TERMITE

White Bear Lake, city (pop 2,858), E Minn , a resort and residential suburb NNE of St Paul on White Bear Lake, inc 1922

Whiteboys, members of the small illegal peasant bands first organized in Munster, Ireland, c 1761 to resist tax and tithe collectors and extortionate landlords They were so called because on their nocturnal raids, which were often marked by extreme violence, they wore white disguises The movement was at first nonpolitical and nonreligious and spread, under a variety of names—Oakboys, Rightboys, Hearts of Steel—to all parts of Ireland and hastened the establishment (1782) of the Irish Parliament, in which Henry Grattan and Henry Flood attempted to institute reforms The Whiteboys were suppressed within 10 years, but they set the pattern of agrarian unrest which continued until after the establishment of the Irish Free State

White Castle, town (pop 1,692), SE La , on the Mississippi and S of Baton Rouge Some of the finest plantations were here

white cedar. For the southern white cedar, see CEDAR; for the northern white cedar, see ARBORVITAE.

Whitechapel, London, England: see STEPNEY.

White Cloud: see WAUDESHIEK

white corpuscle, small protoplasmic body of which large numbers are found in the blood of vertebrate as well as invertebrate animals. In humans three main types of white corpuscles are recognized, lymphocytes, monocytes, and leucocytes The lymphocytes are believed to be formed in the lymph nodes found in various parts of the body. Their cytoplasm is clear, with few or no granules, and the nucleus is round or oval. The function of the lymphocytes is not definitely known, they are capable of amoeboid movement and large numbers are found to accumulate in the tissues in late stages of certain infections and lesions However, it is thought that they do not have the ability to ingest germs as do the leucocytes. Lymphocytes comprise between 20 and 30 percent of the white corpuscles Monocytes make up about 3 to 7 percent of the white corpuscles. They are believed to play a part in the repair of tissues, and they ingest and thus destroy many bacteria and other microorganisms not attacked by the leucocytes. The greatest proportion, from 55 to 75 percent of the white corpuscles, are leucocytes or polymorphonuclear leucocytes. Those that engulf and destroy germs are known also as phagocytes. There are three subdivisions of leucocytes. Most of the leucocytes are of the type known as neutrophiles; their nucleus is divided into several lobes, and the cytoplasm is granular. They are capable of amoeboid movement

and can ingest and destroy bacteria and other microorganisms. In the adult they are formed in the bone marrow. The eosinophiles or acidophiles form about 2 percent of the leucocytes. They are essentially similar to the neutrophiles, but the nucleus is commonly bilobed and the cytoplasmic granules are larger and they stain with acid stains, while those of the neutrophiles stain with neutral dyes. In certain pathological conditions they increase greatly in number. The third group of leucocytes, the basophiles, exist in very small numbers, and their function is obscure. Their cytoplasmic granules stain with basic dyes.

Whiteface, mountain, 4,872 ft. high, NE N.Y., in the Adirondacks near Lake Placid. A meteorological station (1937) is on the summit, and a highway runs within 700 ft. of the summit.

Whitefield, George (hwīt'fēld), 1714–70, English evangelistic preacher, leader of the CALVINISTIC METHODISTS. At Oxford, which he entered in 1732, he joined the Methodist group led by John and Charles WESLEY, his name is closely associated with theirs in the history of METHODISM. Ordained (1736) a deacon in the Church of England, Whitefield soon demonstrated his power as a preacher, due in part to his voice, appearance, and histrionic ability. The first of his seven trips to America was made in 1738, when he spent a short time in Georgia in the mission post recently vacated by John Wesley. He returned to England to seek funds for an orphanage in Georgia and to take orders as an Anglican priest, but his connection with the Wesleys and the evangelical character of his preaching led to his exclusion from most of the pulpits of the Church of England. Whitefield then began a series of open-air meetings in Bristol and elsewhere, to which huge audiences were attracted. He persuaded John Wesley to carry on the work, and he again visited (1739–41) America, here he was an influential figure in the GREAT AWAKENING, preaching to congregations in the large settlements from Georgia to New England. About 1741 he adopted Calvinistic views, especially in regard to predestination, and, breaking away from the Wesleys, he became the leader of the Calvinistic Methodists, whose greatest numbers were in Wales. However, Whitefield's personal friendship with John Wesley lasted through life. In London his work was centered in the Moorfields Tabernacle, near Wesley's church. Returning to England after another evangelistic tour (1744–48) in America, he was appointed a chaplain in the "Connexion" of the countess of HUNTINGDON. Whitefield's evangelistic tours in Great Britain and America continued to draw throngs; in 1756 the noted Tottenham Court Chapel, London, was opened for him. His last sermon was delivered in the open air at Exeter, Mass., the day before he died in Newburyport, where he is buried. See his works (ed. by John Gillies, 6 vols., 1771–72), biographies by Luke Tyerman (2 vols., 1876), E. S. Ninde (1924), and A. D. Belden (1930).

Whitefield (hwīt'fēld), resort town (pop. 1,834), NW N.H., in the White Mts., S of Lancaster, granted 1774, inc. 1804.

Whitefish, city (pop. 2,602), NW Mont., at the south end of Whitefish Lake, in Flathead valley N of Kalispell. In a lumbering region, it has sawmills.

whitefish, fresh-water food fish of the Northern Hemisphere, related to the trout and salmon. The largest species in the United States is the common or lake whitefish of the Great Lakes region and northward, which reaches a maximum length of about 2 ft. and a weight of about 20 lbs. It is an important fish commercially although not as abundant as formerly.

Whitefish Bay, village (pop. 9,651), SE Wis., northern suburb of Milwaukee, inc. 1892.

White Hall, city (pop. 3,025), W central Ill., N of Alton, in an area of potter's clay and coal, founded 1820, inc. 1837. Among its manufactures are pottery, tiles, and sewer pipes. A memorial to Annie Louise Keller, a teacher who died saving her pupils during a tornado in 1927, was designed by Lorado Taft.

Whitehall. **1** Village (pop. 1,407), S Mich., N of Muskegon, at the mouth of the White River on White Lake (an inlet of Lake Michigan), inc. 1867. Leather and woodenware are made. A Swedish midsummer festival is held. **2** Village (pop. 4,851), E N.Y., NE of Glens Falls, at the southern end of Lake Champlain and on the Barge Canal, settled 1759, inc. 1806. There are railroad shops and silk mills here. **3** City (pop. 1,035), co. seat of Trempealeau co., W. Wis., on the Trempealeau river and S of Eau Claire; settled 1855, inc. 1887.

Whitehall, street in London, running from Charing Cross to Parliament St. and separated from St. James's Park by the Horse Guards Parade. It has government offices and the Cenotaph (war memorial) by Sir E. L. Lutyens. It was the site of the palace of the archbishops of York, built in the time of Henry III and taken over by Henry VIII on the death of Wolsey. The palace was partly destroyed by fires in 1619 and 1697, the banqueting hall, rebuilt by Inigo Jones, is all that remains. Henry VIII and Cromwell died in the palace, and Charles I was executed just outside it.

Whitehaven (hwīt'hāvŭn), municipal borough (1931 pop. 21,159; 1943 estimated pop., 22,350), Cumberland, England, near the mouth of Solway Firth. There are iron and coal mines (some of the latter extend under the sea), iron foundries and other metalworks, tanneries and flour mills. John Paul Jones attacked Whitehaven in 1778, and a German submarine bombarded it in 1915.

White Haven, borough (pop. 1,528), NE Pa., on the Lehigh river and SSE of Wilkes-Barre, inc. c 1853.

Whitehead, Alfred North, 1861–1947, British mathematician and philosopher, b. Ramsgate, England. After graduation (1884) from Trinity College, Cambridge, he was a lecturer in mathematics there until 1911; at the Univ. of London he was a lecturer in applied mathematics (University College, 1911–14) and professor of mathematics (Imperial College of Science and Technology, 1914–24). He became professor of philosophy at Harvard in 1924, professor emeritus in 1937. Like Bertrand Russell, he viewed philosophy at the start from the standpoint of mathematics. With Russell he wrote *Principia Mathematica* (3 vols., 1910–13). Whitehead had already written *A Treatise on Universal Algebra* (1898) and other works on mathematics and the nature of the world. He criticized positivistic antireligious science and sought to mold a concept of a unified scientific religion. His philosophy—which he called the philosophy of organism—is idealistic rather than materialistic, universal concepts being considered as eternal objects. Nature is viewed as organic, and the world process may be seen as the adjustment of interrelated organisms to an environment, which they alter by their adjustments. God is regarded as the principle of union and the ground for all rationality. Religious experience and the concept and comprehension of a God that is the impersonal, ultimate good is fundamental in Whitehead's philosophy. The obscurity of his style and the introduction of many new technical terms make Whitehead's works difficult to comprehend. In 1945 he received the Order of Merit. Among his more important books are *The Organisation of Thought* (1916), *The Concept of Nature* (1920), *The Principle of Relativity* (1922), *Science and the Modern World* (1925), *Religion in the Making* (1926), *Symbolism Its Meaning and Effect* (1927), *The Aims of Education and Other Essays* (1929), *Process and Reality* (1929), *Adventures of Ideas* (1933), *Modes of Thought* (1938), and *Essays in Science and Philosophy* (1947). See D. M. Emmet, *Whitehead's Philosophy of Organism* (1932), *The Philosophy of Alfred North Whitehead* (ed. by P. A. Schilpp, 1941).

White Hill, battle of the: see WHITE MOUNTAIN.

White Horse, town (pop. 754), S Yukon, at the head of navigation on the Lewes (upper Yukon) river. White Horse is on the Alaska Highway and is the terminal of the White Pass and Yukon Railway from Skagway. During the navigation season, from June to October, there is steamship connection with Dawson. The town is the distribution and transportation center for a region of coal and copper mining, hunting, and fur trapping. It is headquarters of the Royal Canadian Mounted Police for S Yukon and has an airport, a radio station, and a meteorological station. It was an important supply and stage center during the Klondike gold rush (1897–98). In the Second World War it was the center of the Canol oil project, with a pipe-line terminal and oil refinery, until the project was closed in 1945.

White Horse, Vale of the, Berkshire, England, W of Abingdon. The region is rich in associations with Alfred the Great, who was born in Wantage, the central town of the vale. His victory at Ashdown in 871 is traditionally commemorated by the White Horse on White Horse Hill though it is probably of earlier date. The figure of the horse, over 350 ft. long, is at Uffington, near Wantage, and its crude outline is visible for miles. It is formed by cutting away the turf to expose the white chalk of the hillside beneath. The periodical "cleaning" of the sketch used to be made the occasion of a ceremony. There are other "white horses" of various age in Wiltshire, Berkshire, Yorkshire, and elsewhere, but that at Uffington is the most famous.

White House, official name of the executive mansion of the President of the United States. It is on the south side of Pennsylvania Ave., Washington, D.C., facing Lafayette Square. The building, constructed of Virginia freestone, is of simple and stately design. The porte-cochere on the north front, which forms the main entrance, is a portico of high Ionic columns reaching from the ground to the roof pediment, it is balanced by a semicircular colonnaded balcony on the south with a second-floor porch, completed in 1948. The main building (four stories high) is about 170 ft. long by 85 ft. wide. The east and west terraces, the executive office (1902), the east wing (1942), and an air-raid shelter (1942) have been added. The colonnade at the east end is the public entrance. The executive office is approached by an esplanade. Large receptions are usually held in the East Room (40 ft. by 82 ft.). The elliptical Blue Room is the scene of many social, diplomatic, and official receptions. The Red Room and the Green Room are used for private and quasi-official gatherings. The White House, designated "the Palace" in the original plans, was designed by James Hoban on a site chosen by George Washington. It is the oldest public building in Washington, its cornerstone having been laid in 1792. John Adams was the first President to live here (1800). The building was restored after being burned by British troops (1814), and the smoke-stained gray stone walls were painted white; this gave rise to the cognomen "White House." The name became official when President Theodore Roosevelt had it engraved upon his stationery. The grounds (about 18 acres) surrounding the house are attractive with broad lawns, fountains, trees, and gardens. They were planned by Andrew Jackson DOWNING. See Charles Hurd, *The White House* (1940).

White Huns, people of obscure affinities, possibly of Tibetan or Turkish stock. They were called Ephthalites by the Greeks and Hunas by the Indians. There is no indication that they are related to the HUNS. The White Huns were an agricultural people with a developed set of laws. They were first heard of when they displaced the Scythians and conquered Transoxiana and Khurasan before A.D. 425. They crossed (425) the Syr Darya (Oxus) river and invaded Persia. Held off at first by Bahram Gur, they later (483–85) succeeded in making Persia tributary. After a series of wars (503–13) they were driven out of Persia, permanently lost the offensive, and were finally (557) defeated by Khosru I. The White Huns also invaded India from the northwest and succeeded in extending their domain to include the Ganges valley. They temporarily overthrew the Gupta empire but were finally driven out of India in 528 by a Hindu coalition. Though in Persia they had little effect, in India the White Huns influenced society permanently by altering the caste system and disrupting the hierarchy of the ruling families. Some of the White Huns remained in India as a distinct group, but the rest of the Hunas and the Persian invaders disappeared from history.

white iron pyrites: see MARCASITE.

white lead, heavy, white, amorphous substance, insoluble in water, extensively used as a white pigment and base in paints. When it is to be used in paints, it is first ground into a fine powder and mixed with linseed oil. It is one of the oldest paint pigments used by man. Its covering power is greater than that of other white pigments, but its use has certain disadvantages. It is affected by hydrogen sulphide and some other sulphur compounds, the lead combining with the sulphur to form lead sulphide, a dark substance. In paints made with white lead a chalky substance is formed after some time. In addition, it is very poisonous, painters who apply it often being afflicted with painter's colic (see LEAD POISONING) because of the absorption of too great a quantity into the body. White lead is used also in making putty and in the manufacture of certain pottery. Chemically, it is basic lead carbonate, a mixture of lead carbonate and lead hydroxide. It is prepared in various ways. In the Dutch process or old Dutch process, lead in the form of perforated disks or gratings called buckles is placed in earthenware jars containing a small amount of acetic acid (vinegar) and is covered with tanbark or manure, which ferments and produces carbon dioxide. By a series of reactions the buckles, after about three months, have corroded to form white lead. Other processes have been inaugurated chiefly because of the great length of time required by the Dutch process. In the Carter process, which requires about one week, the lead is melted and atomized by treatment with steam, the resulting product being treated with carbon dioxide and acetic acid. The French process, requiring only one or two days, involves the treatment of a solution of the basic acetate of lead with carbon dioxide, and white lead is precipitated out. Sublimed white lead is the basic sulphate of lead mixed with lead oxide and zinc oxide, it is also used as a white pigment.

Whitelocke, Bulstrode (bo͝ol'strōd hwīt'lŏk), 1605–75, English statesman. A lawyer and member of the Long Parliament in 1640, he was head of the committee which prosecuted Thomas Wentworth, earl of Strafford. Always an advocate of moderation, he took part in attempts to make terms with King Charles I in 1643 and 1644 and refused to participate in the trial of the king. He was commissioner of the great seal (1649, 1654–55, 1659) and ambassador to Sweden (1653–54). He urged Oliver Cromwell to accept the crown, held office under Cromwell's son, Richard, and was elected (1659) president of the council of state that ruled after Richard's failure. At the Restoration he was pardoned, and thereafter he lived quietly. The most important of his voluminous writings is his *Memorials of the English Affairs* (1682), a source work for the period 1625–1660. The journal of his embassy to Sweden is also well known. See memoir by R. H. Whitelocke (1860).

Whitelocke, John, 1757–1833, British general. Given command of the expedition against Buenos Aires, he proceeded to Montevideo, where he superseded

Sir Samuel AUCHMUTY (May 10, 1807). The British attack on Buenos Aires failed (July 5, 1807); two days later Whitelocke surrendered to Jacques de LINIERS Returning to England, he was cashiered from the army by court-martial (1808).

Whiteman, Paul, 1891?–, American musician, b. Denver, Colo He played the viola in the Denver Symphony Orchestra and in 1915 joined the San Francisco Symphony During the First World War he was an army band leader In New York in 1924 he presented a concert which included the première of Gershwin's *Rhapsody in Blue*, written for the occasion Whiteman felt that jazz in the original New Orleans and Chicago styles was crude material which needed the refinement of arrangement and symphonic orchestration. This concert inaugurated the period of "symphonic jazz," a hybrid style which enjoyed great popularity and gained Whiteman the appellation "king of jazz"

white metal: see BABBITT METAL and ANTIFRICTION METAL

White Mountain or **White Hill,** Czech *Bílá Hora* (bēlä hô'rä), hill near Prague, Bohemia, Czechoslovakia Here in Nov , 1620, the Czech Protestants under FREDERICK THE WINTER KING were routed by the imperial army under Tilly. The battle ended the independence of Bohemia for three centuries and was the first major engagement of the Thirty Years War

White Mountains, part of the Appalachian system, N N H , rising to 6,288 ft at Mt WASHINGTON in the PRESIDENTIAL RANGE and to 5,249 ft at Mt Lafayette in the FRANCONIA MOUNTAINS CRAWFORD NOTCH separates these two main groups The mountains are composed chiefly of granite Much of the mountain area, some 1,200 sq mi in extent, is included in White Mountain National Forest Nationally noted for their varied and beautiful scenery, the White Mts have long been one of the most popular resort areas in the country. See guidebooks of the Appalachian Mountain Club and the Dartmouth Outing Club, Richard A Hunt, *White Mountain Holidays* (1941), Ernest Poole, *Great White Hills of New Hampshire* (1947).

White Nile or **Bahr-el-Abiad** (bär'-ĕl-ab'yad), river, Anglo-Egyptian Sudan, formed by the junction of the Bahr-el-Ghazal and the BAHR-EL-JEBEL It flows c 500 mi N to Khartoum, where it joins the Blue Nile to form the NILE

White Pass, 2,888 ft high, in the Coast Range, on the border between Alaska and British Columbia, NE of Skagway A hazardous trail through the pass was made (1897) by prospectors going to the Klondike, as an alternate route to the CHILKOOT PASS In 1898–1900 the White Pass and Yukon Railway was built from Skagway to White Horse, Yukon territory, to provide transportation from the Pacific tidewater to the Yukon valley

White Pigeon, village (pop 1,017), SW Mich , near the Ind line S of Kalamazoo, settled c 1827, inc. 1837

white-pine blister rust · see BLISTER RUST

White Plains, residential city (pop 40,327), co seat of Westchester co , SE N Y , NE of New York city, settled in the late 17th cent , inc as a village 1866, as a city 1916 Plumbing supplies and dairy products are made The provincial congress met (1776) in White Plains and ratified the Declaration of Independence. The battle of White Plains (1776), on Chatterton Hill here, followed Washington's retreat from Manhattan The Elijah Miller House (1738), where Washington stayed, and other historic buildings still stand. New York Hospital–Westchester Division, for mental diseases, is here; it was formerly called Bloomingdale Hospital The Westchester County Center, for concerts and other entertainments, is near by

White River. **1** Partially navigable river rising in NW Arkansas and flowing 690 mi first N into Missouri, then southeasterly through Arkansas to the Mississippi above Arkansas City, Ark The Norfork Dam (244 ft. high and 2,624 ft long) in the North Fork of the White just above their confluence in the Ozarks, built by U S army engineers for flood control and power, was completed in 1944 The Bull Shoals Dam in extreme N Arkansas (263 ft high and 2,256 ft long) is being constructed by U S. army engineers for flood and stream control and power The White River has several tributaries, including the Black and Cache rivers, and near its outlet is joined to the Arkansas river by a cutoff channel **2** River rising in two forks not far from Muncie, E central Ind , and flowing southwest to unite NE of Petersburg before entering the Wabash The west branch passes Indianapolis **3** River rising in NW Nebraska and flowing 507 mi. N and E through South Dakota to the Missouri below Chamberlain. It drains a large part of the Badlands.

White River Junction, industrial village in HARTFORD town, E Vt , on the Connecticut opposite West Lebanon, N H. A railroad center, it is the gateway to many Green Mt resorts.

White Russia: see BELORUSSIA

White Sands National Monument: see NATIONAL PARKS AND MONUMENTS (table).

Whitesboro. **1** Village (pop. 3,532), central N.Y., near Utica; settled 1784, inc. 1813. It has varied manufactures. **2** Town (pop. 1,560), N Texas, W of Sherman, in a cotton and grain area.

Whitesburg, town (pop 1,616), co. seat of Letcher co , E Ky , SE of Hazard and near the Va. line, in the Cumberland coal area, settled 1840, inc. 1872.

White Sea, Rus *Beloye More* (byĕ'lŭ mô'ryŭ), inlet of the Barents Sea, N European USSR. It is 305 *mi long* and has an area of 36,680 sq. mi. Its northern section, opening into the Barents Sea between the Kola and Kanin peninsulas, is connected with the main body of the sea by a strait c 100 mi. long and 30 to 35 mi. wide The Mezen, the Northern Dvina, and the Onega rivers empty into large bays of the White Sea Kandalaksha Bay, its westernmost arm, is also its deepest section (1,115 ft.). The Solovetski Islands lie at the entrance to Onega Bay, ARCHANGEL, the chief port, is near the mouth of the Northern Dvina The White Sea is connected by a canal system (including Lake Onega and the Svir and Neva rivers) with the Baltic at Leningrad, Belomorsk is the canal terminus on the White Sea Though frozen (except in its central section) from November to May, the White Sea is important for lumber exports, its fisheries (herring and cod), and its abundant seal herds.

white-slave traffic: see PROSTITUTION

white snakeroot, North American woods perennial (*Eupatorium urticaefolium*), having a flat-topped cluster of small composite heads of white flowers The herbage contains tremetol, a toxic principle causing "milk sickness" (see MILK FEVER)

White Sulphur Springs, town (pop 2,093), S W Va , E of Lewisburg near the Va. border, settled c 1750. It is a well-known resort with mineral springs. Representatives of the Axis nations were confined here in the early part of the Second World War.

whitethorn. see HAWTHORN

White Top festival. see MARION, Va.

Whiteville, town (pop 3,011), co seat of Columbus co , SE N C , W of Wilmington, founded 1810. It is a tobacco market and trade center, and also has lumber mills.

white vitriol (vĭt'rēŭl), transparent, crystalline substance soluble in water. Chemically it is hydrated zinc sulphate, a compound of zinc, sulphur, and oxygen with seven molecules of water of crystallisation It is used as a mordant in dyeing textiles, in the making of varnishes, as a preservative for hides, as a disinfectant, and in medicine It can be prepared by the action of sulphuric acid on zinc

whitewash, preparation used commonly for whitening the walls of cellars, stables, chicken coops, and various outside structures It varies in composition, being generally a mixture of lime (quicklime), flour, salt, glue, and whiting, with other ingredients such as molasses, water glass, or soap sometimes added It forms a rather impermanent finish, being somewhat soluble in water, although well-balanced mixtures serve for some time

Whitewater, city (pop 3,689), SE Wis , SE of Madison, in a dairy and farm area, inc 1885 It has various manufactures and is the seat of a state teachers college

whitewood · see BASSWOOD, POPLAR, TULIP TREE

Whitewright, town (pop 1,537), N Texas, SE of Sherman, in a farm area, settled 1877, inc 1888

Whitgift, John (hwit'gĭft), 1530?–1604, archbishop of Canterbury from 1583 A fellow of Peterhouse, Cambridge, he became successively Lady Margaret professor of divinity, master of Pembroke Hall, regius professor of divinity, master of Trinity College, and vice chancellor (1570, 1573) of the university He had a leading part in revising the university statutes Dean of Lincoln (1571) and bishop of Worcester (1577), he was elevated to the primacy in 1583 In his efforts to establish uniformity of discipline in ecclesiastical and religious matters, Whitgift had the full support and favor of Queen Elizabeth His policy was severe towards the Puritans, and he was attacked in some of the tracts published in the MARPRELATE CONTROVERSY See his works (ed by John Ayre, 3 vols., 1851-53), biography by H J Clayton (1911).

Whiting, William Henry Chase, 1825–65, Confederate general, b Biloxi, Miss , grad Georgetown College (now Georgetown Univ), 1840, and West Point, 1845 He served in the U S army until Feb , 1861, when he resigned and entered the Confederate service, in which he rose to a major generalcy As chief engineer to J E Johnston he distinguished himself at the first battle of Bull Run. In the Peninsular campaign (1862) he commanded a division at Fair Oaks and fought in Stonewall Jackson's command in the Seven Days battles. Whiting was made commander around Wilmington, N C , in Nov , 1862. He made Fort FISHER one of the strongest Confederate works In A H. Terry's attack on Fort Fisher in Jan., 1865, Whiting was badly wounded; he later died a prisoner in New York See D. S. Freeman, *Lee's Lieutenants*, Vol. I (1942).

Whiting, city (pop 10,307), NW Ind., on Lake Michigan SE of Chicago; settled 1885, inc. 1903. It has large oil refineries and chemical plants.

whiting, name applied to several genera of European, North American, and Australian marine fishes related to the cod and prized for food. The silvery European whiting (*Merlangus merlangus*) is found from Norway to the Mediterranean. The common American whiting (*Menticirrhus saxatilis*) varies in color from gray to black. Known also as northern kingfish, sea mink, king whiting, and sea mullet, it is found in Atlantic waters from Cape Ann, Mass. (sometimes as far north as Maine), to Florida but is commoner N of Chesapeake Bay. Closely related is the more southern species *Menticirrhus americanus*, a small, silvery fish marked with broad, oblique bars and known as kingfish and as Bermuda, Carolina, silver, surf, or sand whiting. The silver, or New England, hake (*Merluccius bilinearis*), a brownish-gray fish found from Nova Scotia to Maryland, is also called whiting. In Australia several fish of the genus *Odax* are known as rock whiting.

whiting, white, powdery substance, prepared by grinding up chalk, mixing it with water, and separating the fine particles. The final product, whiting, is therefore a very pure form of calcium carbonate. When mixed with linseed oil it forms PUTTY, and with water and several other substances it constitutes WHITEWASH. It is used as a pigment (when it is called Spanish white) and filler in paints, for polishing metalware, and for various other purposes

Whitley and Monkseaton, urban district (1931 pop. 24,210, 1943 estimated pop. 28,000), Northumberland, England, N of Tynemouth. It includes the summer resort Whitley Bay on the North Sea and the coal-mining town Monkseaton.

Whitley City (hwĭt'lē), unincorporated town (pop 1,180), co. seat of McCreary co , S Ky , WNW of Middlesboro and near the Tenn. line. It lies in the Cumberlands, in a coal and timber area.

Whitlock, Brand, 1869–1934, American author and diplomat, b Urbana, Ohio After being a reporter in Chicago, working under Governor Altgeld of Illinois, and practicing as a lawyer in Toledo, he was reform mayor of Toledo from 1905 to 1913. Meanwhile he wrote realistic novels chiefly concerned with politics, among them *The Thirteenth District* (1902), *The Turn of the Balance* (1907), and *The Gold Brick* (1910) His service as U S minister and ambassador to Belgium from 1913 to 1922 was distinguished for his efforts to defend the British nurse Edith Cavell and for his care of refugees. His later novels are surpassed by his nonfiction—*Belgium a Personal Record* (1919) and a fine biography of Lafayette (1929) See his autobiography, *Forty Years of It* (1914), and his letters and journals (ed. with biographical introduction by Allan Nevins, 2 vols , 1936)

whitlow see FELON

Whitman, Charles Otis, 1842–1910, American zoologist, b Woodstock, near Bethel, Maine, grad. Bowdoin, 1868, Ph D Univ of Leipzig, 1878 From 1892 he was professor of zoology at the Univ. of Chicago He founded (1887) and edited the *Journal of Morphology* and was a founder and director (1888–1908) of the Marine Biological Laboratory at Woods Hole, Mass He wrote on animal behavior, genetics, evolution, microscopical anatomy, and other subjects. His *Posthumous Works* appeared in 1919

Whitman, Marcus, 1802–47, American pioneer and missionary in the Oregon country, b Federal Hollow (later Rushville), N Y A graduate of the Fairfield (N Y) medical school in 1832, he left a country medical practice to go as a missionary for the joint Presbyterian-Congregationalist board. In 1835 he went west with the Rev Samuel Parker on a tour of investigation The next year he and his bride, Narcissa Prentiss Whitman (1808–47), the Rev Henry Harmon Spalding and his wife, and others crossed from Missouri to the Columbia river country, where Whitman founded a mission at Waiilatpu (now a national monument, 45 84 acres, est. 1940, near present Walla Walla, Wash) and Spalding settled at Lapwai (near present Lewiston, Idaho) Whitman helped American settlers in the region, which was still disputed by Great Britain and the United States The missionaries disagreed among themselves, and in 1842 the board ordered their work curtailed Whitman then rode horseback across the wilderness through the snows of winter (1842–43) to New York, Boston and Washington. He straightened out mission affairs, urged Americans to settle Oregon, and went back with the "great emigration" of 1843 over the OREGON TRAIL. The Cayuse Indians around Waiilatpu, never friendly, grew more hostile and on Nov 29, 1847, attacked the mission and murdered Whitman, his wife, and others News of the massacre helped in passing (1848) the bill that made Oregon a U S. territory Later, argument raged as to whether Whitman made his ride of 1842–43 in order to "save" Oregon from the British. Controversy died as this "Whitman legend" was generally discredited See documents in A. B. Hulbert and D. P. Hulbert, ed , *Marcus Whitman, Crusader* (3 vols , 1936–41), C. M Drury, *Marcus Whitman, M.D , Pioneer and Martyr* (1937).

Whitman, Sarah Helen (Power), 1803–78, American poet, b. Providence, R I. She married in 1828 a Boston lawyer, John W. Whitman; after his death (1833) she returned to Providence and devoted herself to writing. In 1848 she was engaged for a

time to Edgar Allan Poe, who wrote the second and less known of his poems entitled "To Helen" about her. Mrs Whitman wrote several poems about Poe and defended him in *Edgar Poe and His Critics* (1860) Her first book of verse was *Hours of Life* (1853), a complete collection appeared in 1879 See Caroline Ticknor, *Poe's Helen* (1916)

Whitman, Walt (Walter Whitman), 1819–92, American poet, b West Hills (now Huntington), L I, N Y. During his boyhood his family lived in Brooklyn, there he went to school and worked as a printer's devil and later as a compositor For a while he was a country schoolteacher and in 1838–39 edited the *Long Islander*, a newspaper From 1841 to 1848 he wrote prose and verse for New York and Brooklyn journals and edited successively several papers (For this period, see *The Uncollected Poetry and Prose of Walt Whitman*, ed by Emory Holloway, 2 vols, 1921) Interested in politics, he edited (1846–47) the Democratic Brooklyn *Daily Eagle* (See his writings, *The Gathering of the Forces*, ed by Cleveland Rodgers and John Black, 2 vols, 1920) In 1848 he and his brother Jeff went to New Orleans, where Whitman worked for the *Crescent* After three months they returned to Brooklyn This Southern interval was exaggerated by biographers and by Whitman himself, who later implied that he had been in Louisiana for a longer period and had had a mistress and illegitimate children Again he edited (1848–49) at least one paper, the Brooklyn *Freeman*, and worked as a carpenter, but little is known of him until 1855, when he published at his own expense a volume of 12 poems, *Leaves of Grass* It was ignored save by some intellectuals, notably Emerson, who wrote a famous congratulatory letter to him The larger second edition (1856) drew criticism for its daring subject matter and its free verse in long rhythmical lines Whitman revealed himself as a mystic, a pantheist, and a lover of all humanity, among his major themes were love, death, nationalism and democracy, and the beauty of the human body and of the sexual relationship His wide reading in American and European philosophy and Oriental mysticism found expression—often puzzling—in his poetry He enlarged, with revisions and new poems, successive editions of *Leaves of Grass* until the final one in 1892, the changes reflecting his growth as man and poet His last post as an editor (1857–59) was with the Brooklyn *Times* (His writings here are in *I Sit and Look Out*, ed by Emory Holloway and Vernolian Schwarz, 1932) Whitman cared for his wounded brother in Virginia in 1862 and remained as an unofficial nurse in the hospitals Most of his record of the Civil War is in the prose *Specimen Days and Collect* (1882 83) and *The Wound Dresser* (1898) and in the poems *Drum-Taps* (1865), reissued with *Sequel to Drum-Taps* (1866), which includes his two great Lincoln poems, "When Lilacs Last in the Dooryard Bloom'd" and "O Captain! My Captain!" He was made a clerk in the Indian Bureau of the Dept of the Interior (1865), but was discharged by a superior who regarded his poetry as immoral Nevertheless he was soon employed in the Attorney General's office, and two biographers defended him immediately—William O'Connor in *The Good Gray Poet* (1866) and John Burroughs (assisted by Whitman) in *Notes on Walt Whitman as Poet and Person* (1867) He became partially paralyzed in 1873 and thereafter lived from his writing and lectures and with the help of his brother and friends His prose *Democratic Vistas* had appeared earlier (1871), and his last long poem, *Passage to India*, was in the 1871 *Leaves of Grass* He lived after 1884 in Camden, N J, in a house now a Whitman museum *November Boughs*, poems, came out in 1888 Whitman's favorite claim was that he was one of the workers, the ordinary people whom his poetry was to reach Ironically, few of them knew his work But on other poets in most of the civilized world he has had an incalculable, releasing effect, inspiring them to experiment as he did in verse and in subject matter Whitman's complete writings were edited by R M Bucke, T B Harned, and H L Traubel (10 vols, 1902), his uncollected poetry and prose were gathered and edited by Emory Holloway (2 vols, 1921), who also edited a useful volume, *Complete Poetry & Selected Prose and Letters* (1938), and wrote a biography of Whitman (1926) See Whitman's *Autobiographia* (1892) and *Walt Whitman's Workshop* (ed by C J Furness, 1928), biography by H S Canby (1943) A guide to the critical and biographical writing on Whitman, is G W Allen, *Walt Whitman Handbook* (1946)

Whitman, town (pop 7,759), SE Mass, SSE of Boston, settled c 1670, set off from Abington 1875 Shoes are its main product The old Toll House (1709) is restored

Whitman College, at Walla Walla, Wash., nonsectarian, coeducational; chartered 1859, opened by Congregationalists as a seminary 1866, named for Marcus Whitman, became a college 1883 An affiliated music school has a music library which makes its books available throughout the Northwest. Whitman was the first college to adopt comprehensive senior examinations.

Whitman National Monument: see WHITMAN, MARCUS

Whitmire, town (pop 3,272), NW S C NW of Columbia and on the Enoree river, in a farm area It has cotton mills

Whitney, Asa (ă'sə), 1791–1874, American inventor and manufacturer, b Townsend, Mass A machinist (1830–33) with the Mohawk and Hudson RR, he became superintendent in 1833 In 1842 he and Matthias Baldwin became partners in the manufacture of locomotives in Philadelphia Whitney invented a process for annealing car wheels

Whitney, Asa, 1797–1872, American merchant and transcontinental railroad projector, b North Groton, Conn Before 1817 he entered the mercantile business in New York, acted as a foreign buyer for several years and then was (1842–44) a merchant in China Upon his return, he toured (1844–51) the United States, carrying on an extensive publicity campaign urging the construction of a railroad from Chicago to the Pacific, he also petitioned (1845) Congress in behalf of his plan Whitney's proposed route from Lake Michigan through South Pass to the Pacific was not accepted mainly because of the growing sectionalism before the Civil War He also presented in 1851 to the English an unsuccessful plan for a Canadian transcontinental railroad He retired in 1852, a decade before the U S Congress passed an act for the construction of a transcontinental railroad He wrote *National Railroad Connecting the Pacific* (1845) and *A Project for a Railroad to the Pacific* (1849) See M L Brown, *Asa Whitney and His Pacific Railroad Publicity Campaign* (1933)

Whitney, Eli, 1765–1825, American inventor of the COTTON GIN, b Westboro, Mass After graduating from Yale in 1792, he was a guest of Mrs Nathanael Greene at "Mulberry Grove," her plantation near Savannah, Ga There he was encouraged by Mrs Greene and visiting cotton planters to try to find some device by which the fiber of short-staple cotton could be rapidly separated from the seed Whitney, whose creative mechanical bent had been evident from boyhood, completed his model saw gin early in 1793, after about 10 days of work, and by April had built an improved gin With Phineas Miller, Mrs Greene's plantation manager (and later her husband), he formed a partnership to manufacture gins at New Haven He was unable to make enough gins to meet the demand, and although the partners received a patent in 1794, others copied his model and soon many gins were in use After much litigation the partners received (1807) a favorable decision to protect their patent, but Congress in 1812 denied Whitney's petition for its renewal His invention, which had immense economic and social effects, brought great wealth to many but little to himself In 1798 he built a firearms factory near New Haven The muskets his workmen made by methods comparable to those of modern mass industrial production were the first to have standardized, interchangeable parts See Roger Burlingame, *Whitney Boy the Story of Eli Whitney* (1941)

Whitney, Josiah Dwight, 1819–96, American geologist, b Northampton, Mass, grad Yale, 1839, studied abroad (1842–47), brother of W. D Whitney He took part in surveys of mineral lands in the Lake Superior region (1847–49) and later in Iowa, Illinois, and Wisconsin He was state geologist (1860–74) of California and was also professor of geology at Harvard from 1865 His field was economic geology, and his surveys made possible wiser exploitation of ore deposits Mt Whitney, the highest peak in the United States, is named in his honor He wrote *The Metallic Wealth of the United States* (1854), *The Climatic Changes of Later Geological Times* (1882), and several geological reports See biography by E T Brewster (1909)

Whitney, William Collins, 1841–1904, American financier and political leader, b Conway, Franklin Co, Mass, grad Yale, 1863, and Harvard Law School, 1865 He removed to New York city, became successful as a corporation lawyer, and was associated with various public-utility companies and traction interests He helped lead the fight which brought about the downfall of William Marcy TWEED and the election (1874) of Samuel J TILDEN as governor As city corporation counsel (1875–82) he helped save New York city much money Whitney, important in Democratic politics, served (1885–89) as Secretary of the Navy under President Grover Cleveland and secured legislation for the making of armor-plated war vessels In 1892 he supported Cleveland for the presidency, but in 1896 he refused to support William J Bryan He was a society leader and an outstanding sportsman See biography by M D Hirsch (1948)

Whitney, William Dwight, 1827–94, American Sanskrit scholar and lexicographer, b Northampton, Mass, grad Williams, 1845 After study in Germany, he was a professor of Sanskrit (after 1854) and of comparative philology (after 1870) at Yale Univ He was one of the most prominent of American Orientalists and philologists and wrote *A Sanskrit Grammar* (1879) and *Language and the Study of Language* (1867) He was also brilliantly successful as editor of *The Century Dictionary*

Whitney, Mount, peak, 14,495 ft high, E Calif, in the Sierra Nevada at the eastern border of Sequoia National Park The highest point in the United States proper, it is connected by scenic highway with Death Valley, the lowest point The peak is named for J D Whitney

Whitney Museum of American Art, in New York city, founded and incorporated in 1930 by Gertrude Vanderbilt Whitney for the furtherance of contemporary native art The museum building was opened to the public in 1931 The permanent collection contains over 700 oils, about 150 pieces of sculpture, and more than 500 water colors, as well as drawings and prints, the majority of these were purchased from living artists Regular loan shows are held, outstanding among them the annuals featuring the year's work in various media

Whitstable (hwĭt'stəbul), urban district (1931 pop 11,201, 1943 estimated pop 15,600), Kent, England, on the south shore of the Thames near the mouth of the Swale and NNW of Canterbury Whitstable oysters have long been famous

Whitsunday see PENTECOST

Whittier, John Greenleaf (hwĭt'ēər), 1807–92, American Quaker poet and reformer, b near Haverhill, Mass He received a scanty education but read widely A chance introduction to Burns's poetry inspired him to write verse, his first poems were published (1826) in the Newburyport *Free Press*, edited by William Lloyd Garrison, the abolitionist, who became his lifelong friend In the years 1828–32 Whittier edited and contributed to papers in Haverhill, Boston, and Hartford In his first two published books he was a pioneer in regional literature—*Legends of New-England* (1831) and *Moll Pitcher*, a poem (1832) He declared himself an abolitionist in 1833 in his pamphlet against slavery, *Justice and Expediency*, and went as a delegate to the unpopular national antislavery convention Although he served (1834–35) in the Massachusetts legislature, his considerable political power was thereafter used behind the scenes to further the abolitionist cause He was a crusading antislavery editor until 1840, when frail health forced him to retire to his Amesbury home, from there he sent out more of the poems and essays which made him a spokesman for the cause, and he was corresponding editor (1847–59) of the Washington abolitionist weekly, the *National Era* Whittier compiled and edited a number of works, the most entertaining being the semifictional *Leaves from Margaret Smith's Journal* (1849) The first authorized collection of his poems appeared in 1838, followed by *Lays of My Home* (1843), *Songs of Labor* (1850), and other volumes In 1857 he began contributing to the newly founded *Atlantic Monthly* From that year he published a series of volumes of verse which continued his delineation of New England life, history, and legend, the most notable being *Snow-bound* (1866), an idyllic picture of his boyhood home and the most famous of all his poems, other volumes are *The Tent on the Beach* (1867) and *Maud Muller* (1867) Such ballads as "Barbara Frietchie," "Marguerite," and "Skipper Ireson's Ride" and such perennial favorites as "The Barefoot Boy" and the moving war poem "Laus Deo" gave him popularity in his time second to none save perhaps Longfellow Of his nearly 100 hymns, the best known is *Dear Lord and Father of Mankind* See biographies by S T Pickard (1894), T W Higginson (1902), F C Sparhawk (1925), Whitman Bennett (1941), and J A Pollard (1949), bibliography by T F Currier (1937)

Whittier, city (pop 16,115), S Calif, ESE of Los Angeles, founded 1887 by Quakers, inc 1898 The area produces citrus fruits, dairy products, and oil Tools and steel products are manufactured Whittier College (coeducational, 1888) and a state school for boys are here

Whittingham, Charles (hwĭ'tĭngəm, hwĭ'tĭng-um), 1767–1840, English printer He established a printery in London in 1789, removing to Chiswick and founding the Chiswick Press in 1810 He was assisted in his work by his nephew, also named **Charles Whittingham,** 1795–1876, who succeeded him The printery returned to London in 1852 For the London publisher William Pickering the Chiswick Press printed admirable editions of many books Pickering used as his device the Anchor and Dolphin of Aldus Manutius, professing himself a disciple, the Pickering edition of the English poets was called "Aldine" Before establishing the Kelmscott Press, William Morris began his active association with printing by having *The Roots of the Mountains* printed for him at the Chiswick Press in 1889 The younger Whittingham in 1844 revived the use of Caslon's old-style type, long out of fashion and disused Its subsequent wholesome influence on typographic taste was revolutionary

Whittington, Richard, d 1423, mayor of London He first made his fortune as a mercer and then entered London politics to become successively councilman, alderman, sheriff, and finally (1397) lord mayor, an office to which he was elected three times His wealth added to the importance of his

position, and he frequently supplied large loans to Henry IV and to Henry V, who put him in charge of finances for the completion of Westminster Abbey His large fortune he left to charitable institutions The famous story of Dick Whittington and his cat is far removed from the actual life of the lord mayor, who was born the son of a knight in Gloucestershire The legend of the poor orphaned scullion who turned back from running away when he heard the prophetic notes of the Bow bells is first recorded in a play, not now extant, which was licensed in 1605. See *The History of Sir Richard Whittington* (ed by H B Wheatley, 1885), Walter Besant and James Rice, *Sir Richard Whittington* (1894)

Whittredge, Worthington (hwĭt'rĭj), 1820–1910, American landscape and portrait painter, b Springfield, Ohio. He studied in Düsseldorf and Rome and spent 10 years abroad and then opened a studio in New York city His work is among the best of the Hudson River school His paintings include *Evening in the Woods, Camp Meeting, Trout Pool* (Metropolitan Mus), and *Trout Brook in the Catskills* (Corcoran Gall). A member of the National Academy of Design after 1861, he was its president in 1875–76

Whitworth, Sir Joseph, 1803–87, English mechanical engineer and inventor Having won a reputation for precision in toolmaking, he designed for the government an army rifle with hexagonal bore and invented a method of making heavier guns with compressed steel He was influential in causing the adoption in Great Britain of a standardized screw thread (the Whitworth thread) In 1869 he was made a baronet He left large sums to engineering schools and to charity.

WHO: see WORLD HEALTH ORGANIZATION

whooping cough, infectious disease of the air passages common in babies and young children It is caused by a bacterium (*Hemophilus pertussis*), and the disease is sometimes called pertussis Symptoms develop from a few days to about two weeks after infection During the first 10 days to two weeks after the onset, the symptoms are very similar to those of a cold in the head or of bronchitis, during this time the disease is highly communicable During the second stage paroxysms of coughing are characteristic, a series of coughs in rapid succession are followed by an effort to draw in breath, which results in a "whoop" The child sometimes becomes blue in the face (cyanotic) The usual three or four weeks of the sickness may cause severe debilitation from fever, vomiting, and poor appetite Of several diseases occurring during the first two years of life, whooping cough is one of the most serious, there is danger of pneumonia as a complication A vaccine is used to immunize children against the disease and also to lessen the severity if the disease has been contracted

whortleberry: see BLUEBERRY and HUCKLEBERRY.

whymper, Edward (hwĭm'pûr), 1840–1911, English illustrator and mountain climber, b London Sent to Switzerland to make sketches, he became interested in mountaineering and in 1865, after six failures, climbed the hitherto unscaled Matterhorn His exploit ended in a fall which killed four of the party, a memorable disaster in the history of mountaineering He made expeditions to Greenland and later to South America, where he participated in the 1880s in the first ascents of Chimborazo (20,577 ft) and other major Andean peaks His best-known book is *Scrambles amongst the Alps* (1871, 4th ed , 1936). See biography by Francis S Smythe (1940).

whyte-Melville, George John, 1821–78, British novelist and sportsman He was an ardent fox hunter and became an acknowledged authority on the subject. His first novel, *Captain Digby Grand* (1853), and most of his succeeding novels were colored by his affection for sport and the chase *Songs and Verses* (1869) contains some vivacious verses. His works include *Tilbury Nogo* (1854), *Kate Coventry* (1856), *Holmby House* (1860), *The Gladiators* (1863), *Contraband* (1871), and *Black but Comely* (1879). His *Riding Recollections* appeared in 1878

Wiarton (wī'ûrtun), town (pop. 1,749), S Ont , on Georgian Bay and NW of Owen Sound It has lumbering, woodworking, and a government fish hatchery.

Wibert: see GUIBERT OF RAVENNA.

Wichita (wĭ'chĭtô), city (pop 114,966), co seat of Sedgwick co , S Kansas, at the confluence of the Arkansas and the Little Arkansas, inc 1871 It is the chief commercial and industrial center of S Kansas After the establishment here of a Wichita Indian village (1863–65) and a trading post (1864), the city was founded in 1868 by settlers serving the Chisholm Trail In 1872 the railroad was extended to Wichita, and the city boomed as a cow town After 1880 it became the trade center of an agricultural and livestock region The city has flour mills, meat-packing plants, stockyards, grain elevators, oil refineries, airplane factories (greatly expanded in the Second World War), and other industries There are fine parks, an art museum, a municipal forum, an airport, Lawrence Stadium, and other civic projects. Friends Univ. (coeducational, 1898) and the Municipal Univ. of Wichita (coeducational; 1892) are here.

Wichita Falls, city (pop. 45,112), co. seat of Wichita co , N Texas, on the Wichita, or Big Wichita, river and NW of Fort Worth; inc 1889. The first settlers seem to have come in the 1870s, and there was an early dispute over land grants, but the little town beside the now-vanished falls did not begin to grow until the railroad came in 1882. It was a shipping point for cattle ranches and, early in the 20th cent , for wheat It rose to dizzying prosperity with the development of oil fields in the county (see ELECTRA and BURKBURNETT) and was a boom town in 1918 Irrigation, promoted since before Holliday Creek was dammed in 1900 to make Lake Wichita just outside the city, advanced in the 1920s. The Wichita was dammed to make two reservoirs, Lake Kemp and Diversion Lake The city, green with parks and neat with wide streets and clean buildings, lives on a balance of agriculture, oil, and ranching It has much commerce and a number of industries—oil refineries, foundries, factories making machinery and oil-well supplies, flour mills, chemical plants relying on oil, glassworks, and various other establishments Hardin College (junior) is municipally owned At Wichita Falls is a state mental hospital.

Wichita Indians, tribe of North American Indians of Caddoan linguistic stock They formerly occupied central Kansas and ranged into Oklahoma and Texas The Wichita probably were the people of Quivira, which Francisco Coronado visited in 1541 If so, Juan de Padilla, left by the expedition to undertake the Christianization of the Indians, was the earliest missionary among the Plains Indians Padilla, however, was killed by the Indians three years later In 1662 the Wichita were defeated by Diego Dionisio de Peñalosa By 1765 they had a village on the north fork of the Red River in Oklahoma Following a severe smallpox epidemic (it reduced them to some 2,500), they abandoned the village, moving to the present site of Fort Sill, later still they moved farther, and in the Civil War they removed for a time to Wichita, Kansas In 1872 they ceded all their lands to the United States Later they were settled on a reservation in W Oklahoma, there they number some 450 In culture the Wichita were "village" Indians of the Plains area, like their relatives the Pawnee The French called the Wichita *Panis pigues*, or Pawnee Picts, because the Wichita practiced tattooing The distinctive cultural mark of the Wichita was the conical grass house, which resembled a haystack They had a "horn dance" for agricultural fertility, and in later years they adopted the ghost dance See George Dorsey, *Mythology of the Wichita* (1904)

Wichita Mountains, low granite range in SW Oklahoma

Wick, burgh (pop 7,548), county town of Caithness, Scotland, at the mouth of the Wick river on Wick Bay, an inlet of N Moray Firth It includes Louisburgh and Pulteneytown Wick is a headquarters of herring fishing, exports farm produce, and has wool-weaving works "The Old Man of Wick" is the tower of an old castle to the south

Wickard, Claude Raymond (wĭ'kurd), 1893–, U.S Secretary of Agriculture (1940–45), b Carroll co , Ind , grad Purdue, 1915 A successful farmer, he was called to Washington in 1933 to become an official in the Agricultural Adjustment Administration In Feb , 1940, he became Undersecretary of Agriculture When Henry A Wallace resigned as Secretary, Wickard succeeded him and took charge of the nation's food program in the Second World War In 1945 Wickard resigned and became head of the Rural Electrification Administration.

Wickenburg, town (pop 995), S central Ariz , NW of Phoenix Founded after gold was discovered (1864), it was long a mining town but is today notable for the many dude ranches near by

Wickersham, George Woodward, 1858–1936, American lawyer and government official, b Pittsburgh, grad Univ of Pennsylvania law school, 1880 He began law practice in Philadelphia, and after moving (1892) to New York city, he became a prominent corporation lawyer As U S Attorney General (1909–13) under President W H Taft, he successfully prosecuted many corporations under the Sherman Anti-Trust Act. His book, *The Changing Order* (1914), deals with monopolies. He was in 1919 a member of the Industrial Conference Board, and after he was appointed (1924) by the League of Nations to help codify international law, Wickersham was (1925–26) a member of the committee to reorganize the New York state government In 1929 he was appointed by President Herbert Hoover to head the National Commission on Law Observance and Law Enforcement, which came to be called the Wickersham Commission The commission, which studied the Federal machinery of justice, concluded in its report of 1931 that the machinery for enforcing criminal law in the United States was inadequate and that facilities for the regulation of prohibition had considerably deteriorated.

Wickford, residential village (pop. 1,139) in North Kingstown, S R.I.; settled soon after 1650. Its 18th-century buildings include St. Paul's Episcopal Church. A state lobster hatchery is here.

Wickham, William of: see WILLIAM OF WYKEHAM.

wickiup (wĭ'kĕŭp"), dwelling of North American Indians. It is a framework of arched poles covered by brush, bark, rushes, or mats. The wickiup is found among tribes in Arizona, New Mexico, Utah, Idaho, and California Sometimes the dwellings of nomadic or seminomadic tribes there are called wickiups even when made of more permanent materials The name is also spelled wikiup.

Wickliffe, John: see WYCLIF, JOHN.

Wickliffe (wĭ'klĭf) 1 Town (pop 1,039), co. seat of Ballard co , SW Ky , at the confluence of the Ohio and the Mississippi WSW of Paducah, in an area of clay pits, timber, and farms. A buried Indian city near by has yielded much valuable material. 2 Village (pop. 3,155), NE Ohio, near Cleveland; inc. 1916.

Wicklow (wĭ'klō), maritime county (782 sq. mi ; pop 60,451), E Ireland, in Leinster The county town is Wicklow. The Wicklow Mts. and their foothills occupy almost the entire area of the county. Lugnaquilla (3,039 ft) is the highest peak There are numerous lakes and picturesque glens (Glendalough, Avoca, Glen of the Downs, and Glenmalure) The Liffey and the Slaney rivers rise in Wicklow. The region is chiefly devoted to cattle grazing Granite and slate are quarried. The proximity to Dublin makes the region a popular one with tourists The people of the mountainous district were long able to maintain their independence of English control, and Wicklow was not organized as a shire until 1606

Wicklow, urban district (pop 3,197), county town of Co Wicklow, Ireland, on the Irish Sea and SSE of Dublin. It is a seaport and market for an area of potato growing and cattle and sheep raising.

Wiclif, John: see WYCLIF, JOHN

Widdemer, Margaret (wĭ'dĭmûr), 1880–, American poet and novelist, b. Doylestown, Pa Her first published poem, "The Factories," on child labor, was widely quoted Other books of verse are *Old Road to Paradise* (1918), *Collected Poems* (1928), and *Hill Garden* (1937) Besides many short stories she has written novels, which include *The Rose Garden Husband* (1915), *Gallant Lady* (1926), and *Constantia Herself* (1945)

Widener, Peter Arrell Brown (wĭd'nur), 1834–1915, American financier and philanthropist, b Philadelphia He made a moderate fortune in the meat business and became active in local Republican politics With W L Elkins he invested heavily in Philadelphia street railways, the two eventually controlled all in the city Their investments were extended to Chicago, Baltimore, and other cities, but attempts to dominate New York city transit failed His gifts to the city of Philadelphia included his handsome art collection A grandson, **Harry Elkins Widener,** 1885–1912, b Philadelphia, grad Harvard, 1907, became an eminent bibliophile He had the greatest Robert Louis Stevenson collection in existence After his death on the *Titanic* his library went by will to Harvard Univ , where it is installed with other collections in the Harry Elkins Widener Memorial Library, given by his mother

Widnes (wĭd'nĭs), municipal borough (1931 pop 40,619; 1947 estimated pop 46,840), Lancashire, England, on the Mersey opposite Runcorn and SE of Liverpool. It is of modern growth and manufactures paints, soap, chemicals, and steel goods

Widor, Charles Marie (sharl' mârē' vôdôr'), 1845–1937, French organist and composer. He was organist at St Sulpice from 1870 until his retirement in 1934 In 1890 he succeeded César Franck as professor of organ at the Paris Conservatoire and later became also professor of composition there Chief among his compositions are 10 symphonies for organ He composed operas, chamber music, orchestral suites, and piano concertos as well He published a supplement to Berlioz's treatise on orchestration and, with Albert Schweitzer, an edition of the organ works of Bach

Widsith (wĭd'sĭth), 7th-century Anglo-Saxon poem of 143 lines, preserved in the EXETER BOOK It describes the travels of an ideal Germanic minstrel and the kings and royal courts which he visited The many chronological discrepancies make it certain that it is not a record of actual experience See edition by Kemp Malone (1936)

Widukind (wĭ'dōōkĭnd) or **Wittekind** (wĭ'tukĭnd), 8th cent , leader of the Saxons against Charlemagne When Charlemagne, in 782, made refusal to submit to baptism a capital offense, the pagan Saxons resumed warfare against the Franks, and Widukind called the Slavic Wends to his aid. In the course of the war, Charlemagne is said to have ordered the massacre of 4,500 Saxon prisoners (783), but the Saxons fought on all the more fiercely. In 785 Charlemagne offered Widukind a safe-conduct in order to negotiate peace. Widukind met the emperor and accepted baptism; the Saxons were speedily subdued

Wiedemann, Gustav Heinrich (gōōs'täf hĭn'rĭkh vē'dümän), 1826–99, German physicist and chemist. He was professor at the Univ. of Leipsig from 1871 and succeeded (1877) J. C. Poggendorff

as editor of *Annalen der Physik und Chemie*. He investigated electricity and magnetism and discovered the Wiedemann effect, the twisting which occurs in a straight wire magnetized by the passage of an electric current.

Wieland, Christoph Martin (krĭs'tôf mär'tēn vē'länt), 1733–1813, German poet and author. He was at various times a civil servant, a professor at Erfurt, and a tutor to Charles Augustus of Saxe-Weimar; he founded and edited the *Teutsche Merkur* (1773–1810). From a pious poet he became a freethinker and was called the German Voltaire. Versatile and fertile, he exerted a powerful influence upon the course of German literature and may be said to have paved the way for the golden age that followed him. He defined the *Novelle*, or short prose narrative, and his services to literature include translations of Shakspere which, though not first-rate, did much to extend German understanding of that poet. His satirical representations of modern life under the guise of picturing ancient life entitle him to a high literary position. Among his best-known works are the cultural romance, *Geschichte des Agathon* (1766; Eng tr., *The History of Agathon* 1773), the verse narrative *Musarion* (1768); the satirical romance *Die Abderiten* (1774, Eng tr., *The Republic of Fools*, 1861), and his masterpiece, the epic *Oberon* (1780, Eng tr., 1798), in which his brilliance, lightness, and wit are shown at their best and which was the source of Weber's opera. Wieland's collected works (1818–28) fill 53 volumes.

Wieland, George Reber (wē'lŭnd), 1865–, American paleobotanist, b. Boalsburg, Pa., grad. Pennsylvania State College (B.S., 1893), Ph.D. Yale, 1900. From 1898 he taught at Yale. He acquired and gave to the government the site of the fossil cycad petrified forest which is now Fossil Cycad National Monument, South Dakota.

Wieland, Heinrich (hĭn'rĭkh vē'länt), 1877–, German chemist. He became professor and director of the chemical laboratories at the Univ. of Munich in 1925. For his study of acids in bile he received the 1927 Nobel Prize in Chemistry. He is noted also for his research on biological oxidation.

Wieliczka (vyĕlēch'kä), town (pop. 8,191), S Poland, 8 mi. SE of Cracow. Its salt mines, which have been worked since the 11th cent., are estimated to contain 2,000,000 tons of salt and include impressively carved chambers and chapels.

Wien, Wilhelm (vĭl'hĕlm vēn'), 1864–1928, German physicist. He was professor at the universities of Giessen (1899), Würzburg (1900–20), and Munich (from 1920). He received the 1911 Nobel Prize in Physics for his studies on the laws of heat radiation, he is noted also for his work on hydrodynamics, X rays, and the radiation of light and of electricity.

Wien, Austria: see VIENNA.

Wiener Neustadt (vē'nur noi'shtät), city (pop. 31,894), Lower Austria, 25 mi. S of Vienna. An important rail and industrial center, it has manufactures of locomotives and machinery. It was the birthplace of Maximilian I. The castle of the Babenbergs, dukes of Austria, built in 1192, became a military academy in 1752. The city was heavily damaged by air attacks in the Second World War.

Wiener Wald (vē'nŭr vält') [Ger., = Vienna forest], forested range, Lower Austria, W of Vienna. An outher of the Eastern Alps, it rises to 2,930 ft. in the Schöpfl. The best-known summit, however, is the KAHLENBERG, near Vienna. The beautiful forests, streams, and hills of the Wiener Wald have made it a favorite excursion area for the Viennese.

Wieniawski, Henri (vyĕnyäf'skē), 1835–80, Polish violinist and composer. After a series of European tours he was appointed (1860) court violinist to the tsar. He taught at the St. Petersburg Conservatory, 1862–69. Wieniawski toured the United States with Anton Rubinstein, 1872–73, and in 1874 succeeded Henri Vieuxtemps at the Brussels Conservatory. He composed two violin concertos and some salon pieces. His brother, **Joseph Wieniawski**, 1837–1912, was a noted pianist, a pupil of Liszt. He taught at the conservatories of Moscow and Brussels. The brothers made concert appearances together.

Wiertz, Antoine Joseph (ätwän' shōzĕf' vērts'), 1806–65, Belgian historical painter. He enjoyed such prestige that the government built him a studio in Antwerp, now the Wiertz Museum. He delighted in painting complicated, philosophical subjects and scenes from ancient history. Wiertz invented a type of mat painting and wrote a memoir on Flemish painting.

Wierzynski, Casimir, Pol. *Kazimierz Wierzyński* (käzhĭ'myĕsh vyĕzhĭ'nyŭskē), 1894–, Polish poet, editor, and reviewer. After serving in the First World War, he edited a sports magazine and then became dramatic reviewer for a newspaper. His *Olympic Laurel* won an international poetry prize in 1927. *Forgotten Battlefield* was translated into English (1944).

Wiesbaden (vēs'bä"dŭn, vĭs'–) city (pop. 105,953; with suburbs 188,370), capital of Hesse, W Germany, in former Hesse-Nassau, on the right bank of the Rhine and at the foot of the Taunus. It is one of the most famous watering places of Europe, with saline springs known since Roman times. It also is a trade center for Rhine wines, and it manufactures metal goods, chemicals, plastics, pharmaceuticals, and textiles. A Celtic settlement dating from the 3d cent. B.C., Wiesbaden (Latin *Aquae Mattiacorum*) became a Roman watering place; there are remains of the Roman water conduits and walls. It was chartered in the 13th cent. In 1866 it passed with the duchy of Nassau—of which it was the capital—to Prussia. After the First World War, Wiesbaden was occupied by French and later by British troops and was the seat (1918–29) of the Allied Rhineland Commission. The handsome city was more than half destroyed in the Second World War. Among the ruins are the ducal castle (19th cent.), the Kurhaus, and the theater. After the war Wiesbaden was made the capital of Hesse.

Wieser, Friedrich von (frē'drĭkh fŭn vē'zŭr), 1851–1925, Austrian economist and sociologist. He is noted for his formulas applying the principle of marginal utility to cost phenomena. He taught at Prague (1884–1903) and Vienna (1903–17, 1919–22) and served (1917–18) as Austrian secretary of commerce. His works include *Der natürliche Wert* (1889, [Eng tr., *Natural Value*, 1893) and *Theorie der gesellschaftlichen Wirtschaft* (1914, Eng tr., *Social Economics*, 1927).

wife: see HUSBAND AND WIFE and MARRIAGE.

wig, shortened form of periwig, an arrangement of artificial hair worn to conceal baldness, as a disguise, or as part of a costume, either theatrical, ceremonial, or merely fashionable. Wigs were used in ancient Egypt, Greece, and Rome. The Egyptians particularly wore ingenious hair structures and, on occasions, artificial beards. Caesar is said to have worn first a laurel wreath and later a wig to conceal his baldness. Roman ladies had wigs of the light hair which they admired, many of them made from the bright locks of captives. Ancient theatrical wigs and masks were highly significant, symbolic, and traditional. In Greek tragedy, black hair denoted the villain, fair, the hero. In early mystery plays the wigs and headdress were symbolic. The wig, important in fashionable European costume from the middle of the 16th cent. into the 18th, for both men and women, survives in England in the official dress of the lord chancellor, the speaker of the House of Commons, judges, barristers, and bishops. The fashion took its rise in France, in the court of Louis XIII, who was bald. In England the peruke was general among the cavaliers of Charles II's reign. The bagwig, holding up the back hair, was worn in the 18th cent. The best of modern wigs, toupees, and transformations are made of human hair. Theatrical wigs are generally made of goat or other animal hair.

Wigan (wĭg'un), county borough (1931 pop. 85,357, 1947 estimated pop. 85,200), Lancashire, England, on the Douglas and S of Preston. It is thought to be the site of the Roman station Coccium. The fine Church of All Saints has a Norman tower. Mab's Cross, Standishgate, is mentioned by Scott in *The Betrothed*. Wigan was taken by parliamentarians in 1643 and in 1651 and was visited by Cromwell in 1648 and by Prince Charles Edward in 1745. There are coal mines in the vicinity and the borough has cotton factories, engineering and machinery plants, and other industries. It was long noted for the manufacture of pottery and pewter and for bell founding.

Wiggin, Kate Douglas (Smith), 1856–1923, American author and educator, b. Philadelphia. Her childhood was spent in Maine. She organized the first free kindergartens on the Pacific coast (1878) and with her sister established a training school for kindergarten teachers. As part of her teaching career she wrote her first book, *The Story of Patsy* (1883). The most popular among her many later works for children were *The Birds' Christmas Carol* (1887), *Timothy's Quest* (1890), *Rebecca of Sunnybrook Farm* (1903), and *Mother Carey's Chickens* (1911). She married in 1881 Samuel B. Wiggin (d. 1889) and in 1895 George C. Riggs. See her autobiography, *My Garden of Memory* (1923), biography by her sister, Nora A. Smith (1925).

Wiggins, Carleton, 1848–1932, American cattle and landscape painter, b. Orange co., N.Y. His work shows the influence of his teacher, George Inness. Among his paintings are *A Young Holstein Bull* (Metropolitan Mus.), *Sheep and Landscape* (Brooklyn, N.Y., Mus.), *Evening after the Shower* (National Gall. of Art, Washington, D.C.), and *The Plow Horse* (Lotos Club, New York). He became a member of the National Academy of Design in 1906. His son, **Guy Carleton Wiggins,** 1883–, b. Brooklyn, N.Y., is a painter chiefly of New York street scenes. His works include *Metropolitan Tower* (Metropolitan Mus.), *Berkshire Hills, June* (Brooklyn Mus.), and *Columbus Circle, Winter* (National Gall. of Art, Washington, D.C.).

Wiggins, town (pop. 1,141), co. seat of Stone co., SE Miss., N of Gulfport, in a farm area.

Wigglesworth, Michael, 1631–1705, American clergyman and poet, b. England, grad. Harvard, 1651. He was brought to New England in 1638. A devoted minister at Malden, Mass., he also practiced medicine and wrote didactic poetry. His *Day of Doom* (1662?), Calvinistic theology in ballad meter, was extremely popular and was followed by *God's Controversy with New England* (written c.1662, printed 1873), *Meat Out of the Eater* (1670), and lesser writings. In 1663 he spent seven months in Bermuda for his health and all his life was handicapped by illness. See *The Day of Doom* (ed. by K.B. Murdock, 1929), memoir by J.W. Dean (2d ed., 1871).

Wight, Isle of (wīt), island (147 sq. mi., 1948 estimated pop. 93,640), off Hampshire, S England. It is separated from the mainland of HAMPSHIRE by the waters of the Solent and the Spithead. The island is 23 mi. long from the eastern foreland to the Needles (detached chalk formations at the western extremity) and 13 mi. wide. The Medina, which almost bisects the island, and the East and the West Yar are the chief rivers. Numerous small streams on the southern coast have cut a series of picturesque gullies in the soft rock. The climate is mild, and the scenery, as a result of the contrasting geological strata, is varied. Pleasant villages, such as Sandown-Shanklin, and a beautiful coast line make the island popular as a winter resort. Sheep raising and dairy farming are the chief occupations. The island was conquered by the Romans in A.D. 43 and settled later by the Jutes. It was annexed to the kingdom of Wessex in 661 and Christianized c. 700. The Isle of Wight was the headquarters of the Danes at the end of the 10th cent. William the Conqueror bestowed the lordship of the island on William Fitz-Osbern, and in 1293 it reverted to the crown. At Carisbrooke Castle, now in ruins, King Charles I was imprisoned (1647–48). In 1888 the island was established as a separate administrative county (administrative center, Newport). Queen Victoria's seaside home, Osborne House, is near the famous yachting center at Cowes on the northern side of the island, and Tennyson spent his later years at Freshwater.

Wigman, Mary, 1886–, German dancer. Her teachers were JAQUES-DALCROZE and Rudolph von Laban. According to her theory, movement that is *Tanz als Tanz*, or dance for its own sake, must evolve from emotion. Music for her dances was composed as the dance was created or after it had been created, and often she danced without musical accompaniment. Her abrupt, angular, and intense style was seen in *The Seven Dances of Life*, *Monotony*, and *Swinging Landscape*, which she composed. She established schools in Berlin and Dresden, and her work had a strong influence on the modern dance.

Wigmore, John Henry, 1863–1943, American jurist and legal educator, b. San Francisco, grad. Harvard (B.A., 1883, M.A. and LL.B., 1887). He taught (1889–92) Anglo-American law at Keio-Gijuku Univ., Tokyo. After 1893 he was a professor of law at Northwestern Univ., from 1901 to 1929 he was dean of the law faculty. Wigmore is especially noted for his monumental work usually known as *Treatise on Evidence* (4 vols., 1904, 3d ed., 10 vols., 1940). This work is at the same time a lawyer's manual of practice and an incisive and highly critical survey of the law of evidence. His shorter works on evidence include books usually cited as *The Code of Evidence* (3d ed., 1942) and *Students' Textbook of Evidence* (1935). Out of Wigmore's interest in comparative law came his *Panorama of the World's Legal Systems* (3 vols., 1928; reissued 3 vols. in 1, 1936).

Wigtown, county, Scotland: see WIGTOWNSHIRE.

Wigtown (wĭg'tun, –toun), burgh (pop. 1,261), county town of Wigtownshire, Scotland, on the west side of Wigtown Bay, an inlet of the Irish Sea, between Wigtownshire and Kirkcudbrightshire. The Martyrs' Memorial commemorates the drowning (1685) of two Covenanters.

Wigtownshire (wĭg'tunshĭr) or **Wigtown** (wĭg'tun), county (487 sq. mi., 1931 pop. 29,331, 1948 estimated pop. 32,120), SW Scotland, consisting of the western part of GALLOWAY. The county town is Wigtown. The coastline is irregular, and there are numerous lakes. The peninsula set off by Loch Ryan and Luce Bay is called the Rhinns of Galloway. Much of the county is hilly moorland, but the arable land (about half the area) is well cultivated. Agriculture is almost the sole industry. Sheep, cattle, and pigs are raised. Vestiges of early occupation include hill forts, standing stones, and Pictish crannogs. Portpatrick and Stranraer handle traffic to and from Northern Ireland.

wigwam (wĭg'wŏm), dwelling found among the Algonquian Indians of the Eastern Woodlands area of the United States. The wigwam was usually conical, arborlike, or domed. Some were small, accommodating a single family, others were large communal dwellings. They were covered with squares of bark, with reed mats, or with thatch. Sometimes the word is extended to mean almost all Indian habitations, including the earth lodge and sometimes even the tepee and the wickiup.

Wijnants, Jan: see WYNANTS, JAN.

Wiju, Korea: see SINUIJU.

Wilamowitz-Möllendorff, Ulrich von (ōōl'rĭkh fŭn vĭlämō'vĭts-mö'lündôrf), 1848–1931, German classical scholar He was professor at the universities of Greifswald (1876–83), Gottingen (1883–97), and Berlin (1897–1922). He was a prolific commentator and critic on a wide variety of subjects dealing with Greek antiquity, notably on Timotheus, Callimachus, Euripides, and Pindar

Wilber, city (pop 1,355), co seat of Saline co, SE Nebr, SSW of Lincoln, platted 1873, inc. 1879

Wilberforce, Samuel (wĭl'bŭrfôrs), 1805–73, English prelate, son of William Wilberforce From 1830 he served successively as a rector in the Isle of Wight, archdeacon of Surrey, and canon of Winchester until in 1845 he became bishop of Oxford He did not support the Oxford movement, he attempted to hold a middle course between the High Church and Low Church factions As a signer of the remonstrance against the appointment of R D Hampden to the bishopric of Hereford and as a participant in other controversies he was at times an unpopular figure, sometimes referred to as "Soapy Sam" A man of oratorical powers and of marked administrative ability, Bishop Wilberforce greatly improved the organization of his diocese and was instrumental in restoring to the English church convocations some of their earlier ecclesiastical authority In 1869, through Gladstone's influence, he was made bishop of Winchester With his brother Robert he wrote a biography (1838) of his father, his other works include *Agathos and Other Sunday Stories* (1839) and *History of the Protestant Episcopal Church in America* (1844) See biography by A R Ashwell and R G Wilberforce (3 vols., 1880–82)

Wilberforce, William, 1759–1833, British statesman and humanitarian He was elected to Parliament in 1780 and during the campaign formed a lifelong friendship with William Pitt, the younger, whose measures he generally supported in the House of Commons In 1784, during a tour of the Continent, he became converted to evangelicism—a decision which affected his entire outlook and public conduct, causing him to withdraw from gay society and even to consider giving up politics A few months later, however, he ended his seclusion and returned to Parliament At this time Wilberforce became interested in the rising abolition movement and with Thomas CLARKSON and others joined in the campaign for the abolition of the slave trade They finally secured the passage of a bill abolishing it in 1807 Thereafter his efforts were directed toward universal abolition of slavery, the bill was passed a month after his death Wilberforce always identified himself with the cause of reform, supporting parliamentary reform and Catholic Emancipation He wrote *A Practical View of the Prevailing Religious System of Professed Christians* (1797), a work which enjoyed wide popularity both in England and on the Continent See his correspondence (1840), biographies by R I Wilberforce and Samuel Wilberforce (1838) and Reginald Coupland (2d ed, 1945)

Wilberforce University, at Wilberforce, Ohio, near Xenia, Negro, partly state supported, coeducational, chartered and opened 1856 by Methodists Bought by the African Methodist Episcopal Church in 1863, Wilberforce Univ absorbed Union Seminary (opened 1847) It has colleges of education and of liberal arts, a theological seminary, a school of vocations, and a high school Both university and town (a Negro cultural center) were named for William Wilberforce

Wilbraham (wĭl'brŭhăm), town (pop 3,041), S Mass, settled 1730, set off from Springfield 1763 It produces paper. Wilbraham Academy for boys is here, and the town has a state game farm

Wilbur, Curtis Dwight, 1867–, American public official, b Boone co, Iowa, grad Annapolis, 1888, brother of Ray Lyman Wilbur He resigned from the navy in 1888 and began (1890) law practice in Los Angeles After he was (1903–18) county judge, he became associate justice (1919) and chief justice (1922) of the California supreme court, but resigned to serve as U S Secretary of the Navy (1924–29) Wilbur was (1929–1945) a U S circuit court judge

Wilbur, John, 1774–1856, American Quaker leader, b Hopkinton, R I He became the leader of the opposition to the evangelical principles of J B Gurney and Elias HICKS, and his disownment (1843) resulted in setting up a new New England Yearly Meeting His followers were called Wilburites See FRIENDS, SOCIETY OF See Rufus Jones, *The Later Periods of Quakerism* (1921)

Wilbur, Ray Lyman, 1875–1949, American public official and college president, b Boone co, Iowa, grad Stanford (B A, 1896, M A, 1897) and Cooper Medical College, San Francisco, 1899 After studying medicine abroad, Wilbur became a professor (1909–16) and dean (1911–16) of the medical school at Stanford Univ In 1916 he became president of Stanford In the First World War he served with the U S Food Administration and was (1929–33) Secretary of the Interior under President Herbert Hoover He retired as college president in 1943 *The March of Medicine* (1938) and *Human Hopes* (1940) are collections of his speeches and writings.

Wilbur, town (pop 1,011), E central Wash., NW of Spokane, in a wheat area, settled 1884.

Wilburton (wĭl'bŭrtun), city (pop. 1,925), co. seat of Latimer co, SE Okla, near the Ouachita Mts; settled 1890, inc 1902. It is a cattle and coal-mining center. Near by are a state park and a junior college, an Indian settlement project, and a colony of veterans of the Spanish-American War

Wilbye, John (wĭl'bē), 1574–1638, English madrigal composer, considered by some the outstanding English madrigalist of his time Extant only are two sets of his madrigals (1598, 1609)

Wilcox, Ella Wheeler, 1855–1919, American poet and journalist, b near Janesville, Wis Throughout her life she was a prolific contributor to periodicals For some years she wrote for the Hearst newspapers in New York, and her work was widely syndicated Her *Poems of Passion* (1883) and *Poems of Pleasure* (1888) were very popular See Jenny Ballou, *Period Piece* (1940)

Wild, Jonathan, 1683–1725, English criminal. He maintained a highly organized gang of thieves and long escaped punishment by posing as an instrument of justice and helping the authorities catch other criminals independent of, or rebellious to, his control He planned robberies and then secured rewards for helping owners recover "lost" property His thriving business required warehouses, branch offices, artisans to make alterations, and a vessel for trade with the Continent Long evading the law against receivers of stolen goods, he was finally convicted (1725) of receiving a reward for returning some stolen lace and was hanged at Tyburn Literary accounts of Wild's career, like those of Fielding and Defoe, are partly fiction See W R. Irwin, *The Making of Jonathan Wild* (1941)

wild allspice see SPICEBUSH.

wild canary see GOLDFINCH

wild carrot or **Queen Anne's lace,** plant (*Daucus carota*) usually biennial, from which the cultivated CARROT is considered to have been derived It is native to Europe and Asia but is naturalized and often weedy throughout North America The foliage is feathery, the root woody, and the tiny white flowers are in a lacy, flat-topped cluster until they wither, when the cluster becomes nest shaped—whence another of its names, bird's-nest The plant was formerly used as a diuretic and stimulant

wildcat see BOBCAT

wild cherry see CHERRY

Wilde, Oscar (Oscar Fingall O'Flahertie Wills Wilde) (wĭld), 1854–1900, British author and wit, b Dublin He studied at Trinity College, Dublin, and at Oxford, where the aesthetic teachings of Walter Pater and John Ruskin especially appealed to him, and he distinguished himself both for scholarship and for eccentricity in dress, tastes, and manners Because of his conspicuous activities he was satirized with other exponents of "art for art's sake" in *Punch* and in Gilbert and Sullivan's opera *Patience* In 1881 his *Poems* appeared He lectured in the United States in 1882 and had his drama *Vera* produced in New York in 1883 In 1884 he married and began writing for and editing periodicals Two collections of his fairy tales appeared, *The Happy Prince* (1888) and *A House of Pomegranates* (1891) His versatility was demonstrated in 1891 in four very different works—*Lord Arthur Savile's Crime and Other Stories*, essays on his theories of art in *Intentions*, the production of *The Duchess of Padua*, a verse tragedy, in New York, and *The Picture of Dorian Gray*, a novel said to epitomize the decadence in his period His talent for witty drawing-room comedy was displayed in *Lady Windermere's Fan* (1892), *A Woman of No Importance* (1893), *An Ideal Husband* (1895), and *The Importance of Being Earnest* (1895) A London production of his *Salomé* by Sarah Bernhardt was refused a license, the play was published in France in 1893 and its English translation in 1894 In 1895 Wilde brought action for libel against the marquess of Queensberry, who had objected to Wilde's friendship with his son, Lord Alfred Douglas Wilde soon dropped the suit, but information brought out at that trial was later used to convict him of immoral conduct He was sent to prison in 1895, and his experiences there inspired his most famous poem, *The Ballad of Reading Gaol* (1898), and the apologia published by his literary executor as *De Profundis* (1905) Released in 1897, he took the name Sebastian Melmoth and lived in France until his death Condemnation of Wilde's personal life has not prevented general recognition of his talent for witty and paradoxical, though hardly profound, writing See biographies by R H Sherard (1906, 1928) and Hesketh Pearson (1946), critical studies by Arthur Ransome (1912), Arthur Symons (1930), and Vincent O'Sullivan (1936)

Wildenbruch, Ernst von (ĕrnst' fŭn vĭl'dunbrōōkh), 1845–1909, German dramatist and novelist His father was a natural son of Prince Louis Ferdinand of Prussia, a Hohenzollern Wildenbruch traveled widely as a boy, fought in 1866 and 1870, studied law, and became an official, later a member of the foreign ministry. His work includes verse, plays, novels, and tales, the last possibly his best work The range of his subjects is wide, with the historical and patriotic predominating. His masterpiece is the double historical drama, *Heinrich und Heinrichs Geschlecht* (1895; Eng tr of Part I, *King Henry*, 1913–15), a play of rhetorical splendor and brilliance Very popular was *Die Rabensteinerin* (1907, Eng tr, *Barseba of Rabenstein*, 1909) His stories include *Der Meister von Tanagra* (1880, Eng. tr, *The Master of Tanagra*, 1886), *Kindertränen* [children's tears] (1883, Eng tr of one story, "The Captain's Last Child," 1909), and *Neid* (1900, Eng tr, *Envy*, 1921) Among his novels are *Das wandernde Licht* [the wandering light] (1893) and *Schwester-Seele* [sister souls] (1894) He was also a productive lyric poet.

Wildenvey, Herman (hĕr'man vĭl'dünvā), 1886–, Norwegian poet, whose family name is Portaas (pôr'tŏs) He has developed a verse line that is particularly suitable to lighter and gayer subjects, and most of his poetry is concerned with youth and beauty Among his collected verse are the volumes *Caresse* (1916), *The Lyre of Autumn* (1931), and *Palomele* (1946)

Wilder, Harris Hawthorne (wĭl'dur), 1864–1928, American zoologist, b Bangor, Maine, grad Amherst (B A, 1886), Ph D Univ of Freiburg, Baden, 1891 He was professor of zoology at Smith College from 1892 His researches were mainly in comparative anatomy, especially with reference to the evolution of vertebrates His works include *Man's Prehistoric Past* (1923), *The Pedigree of the Human Race* (1926), and the autobiographical *Early Years of a Zoologist* (1930)

Wilder, Marshall Pinckney, 1798–1886, American merchant and horticulturist, b Cheshire co, N H He introduced new fruits and flowers and hybridized many plants At his Dorchester, Mass, farm he tested about 1,000 varieties of pears Wilder helped found and held office in the American Pomological Society and the U S Agricultural Society He was active in establishing the Massachusetts Institute of Technology

Wilder, Thornton (Thornton Niven Wilder), 1897–, American author, b Madison, Wis, grad Yale, 1920, and studied at the American Academy in Rome He spent part of his youth in China From 1921 until 1928 he was a teacher in the Lawrenceville School and from 1930 until 1936 taught at the Univ of Chicago His first novel, *The Cabala* (1926), attracted some attention, and *The Bridge of San Luis Rey* (1927) won the 1928 Pulitzer Prize in fiction The plays *Our Town* (1938) and *The Skin of Our Teeth* (1942) won respectively the 1938 and 1943 Pulitzer prizes in drama Other works include *The Long Christmas Dinner and Other Plays in One Act* (1931) and the novels *The Woman of Andros* (1930), *Heaven's My Destination* (1934), and *The Ides of March* (1948), a story of Julius Caesar Whatever his literary form his plots are ingenious and his style polished

Wilderness campaign, May–June, 1864, of the Civil War After the GETTYSBURG CAMPAIGN, the Union Army of the Potomac under G G MEADE entered on no decisive campaign until early May, 1864 Then the Northern commander in chief, U S GRANT, led Meade's army across the Rapidan river into the Wilderness, a wild and tangled woodland c 10 mi W of Fredericksburg Grant planned to clear the Wilderness before trying to destroy the smaller Confederate Army of Northern Virginia under R E LEE But Lee advanced on the Federals while they were still in that area, causing Grant to face about and order an attack The nature of the terrain made the battle of the Wilderness (May 5–6, 1864) a disjointed but sanguinary fight After the repulse of a Union attack on May 6 through the opportune arrival of the 1st Corps under James Longstreet, Lee counterattacked, and the battle became stabilized Grant then pushed ahead by Lee's right, pointing for Spotsylvania Courthouse, c 12 mi to the southeast Lee, anticipating the move, was soon entrenched there In the battle of Spotsylvania Courthouse (May 8–19, 1864), Grant unsuccessfully hammered away at the Confederate lines The bloodiest fighting of this battle occurred on May 12 when the Union assault on the salient forming the Confederate center (the Bloody Angle) was repulsed after initial success Lee confronted Grant's next move from a position S of the North Anna river, so impregnable that even Grant did not attack June found the armies near Richmond Fearing that Lee might withdraw within the defenses of the capital, Grant made another unsuccessful frontal assault on his strongly entrenched enemy in the battle of Cold Harbor, June 3, 1864 The Union lost 7,000 men in a few hours—the most horrible slaughter of the war After several days of desultory trench fighting Grant then withdrew, crossed the James river, and moved against PETERSBURG He had lost about 60,000 men in the campaign, and although Lee's army sustained the proportionately larger loss of 20,000, it was hardly destroyed See D S Freeman, *R. E. Lee*, Vol III (1935), A. H. Burne, *Lee, Grant, and Sherman* (1939).

Wilderness Road, route taken by American pioneers of the Old Southwest, running down the Valley of Virginia to Fort Watauga (now in E Tennessee). From there in 1775 Daniel BOONE, leading the advance for the TRANSYLVANIA COMPANY, blazed the

trail further, through CUMBERLAND GAP, into Kentucky. Boone's road followed old buffalo traces and Indian paths, although much of it had to be cut through the wilderness For nearly 50 years, and especially after the American Revolution, it was one of the principal avenues of westward migration Many travelers fell victims to the Indians in the early years, and not until the 1790s, after Kentucky had become a state, was it made passable (but still difficult) for wagons Private contractors authorized to keep up sections of the road charged tolls for their use Impassable and deserted for much of the 19th cent, the Wilderness Road has been a section of U S 25, the Dixie Highway, since 1926 See Thomas Speed, *The Wilderness Road* (1886), A B Hulbert, *Boone's Wilderness Road* (1903), W A Pusey, *The Wilderness Road to Kentucky* (1921), R L Kincaid, *The Wilderness Road* (1947).

wild geranium: see GERANIUM

wild hyacinth · see CAMASS and SQUILL.

wildlife refuge, haven or sanctuary for animals, a portion of land or of land and water providing a suitable environment and protection from hunters Before the conservation movement was inaugurated and made effective, the populations of many birds and mammals had been alarmingly reduced and some birds had become extinct This resulted chiefly from the slaughter of the animals for hides or feathers, for food, and for sport, from the drainage of swamps and the destruction of forests and other breeding places, and from drought In the United States game laws, quite limited in their scope, however, were passed in various states from the latter part of the 17th cent Not until after about the middle of the 19th cent did legislation indicate much concern over the depletion of wildlife Individual crusaders and the National Audubon Society were influential in stimulating the national and state governments to take steps which resulted at length in the establishment of effective conservation programs In 1908 President Theodore Roosevelt called a conference of governors of the states and territories, some cabinet members, and others to consider the nation's natural resources, outcomes of the conference included the appointment of a national conservation commission and the setting up by most states of state conservation commissions The establishment of the National Park Service (by act of 1916) was a boon to wildlife preservation, since no hunting is permitted within the parks administered by the Service Milestones in the legislation which aided the bird-refuge movement include the passage of a treaty for the protection of migratory birds between the United States and Canada (1918), the Norbeck-Andresen Migratory-Bird Conservation Act (1929), which provided for the development of a system of refuges, an act (1934) requiring that hunters of migratory fowl purchase a stamp, the funds to be used for buying and developing land for refuges, and a treaty (1937) with Mexico for the protection of migratory birds In 1940 the Inter-American Convention on Nature Protection and Wildlife Preservation was an indication of progress in international conservation movements In the United States and its territories there were by 1947 a total of 291 Federal refuges These are administered by the Fish and Wildlife Service of the Dept of the Interior, this Service was established (1940) by consolidation of the Bureau of Biological Survey (est 1885 in the Dept of Agriculture) and the Bureau of Fisheries (est 1871 as an independent office) The work of the Service includes biological research, the administration and enforcement of Federal legislation related to wildlife, and numerous related projects Bird refuges and sanctuaries provide feeding, resting, wintering, and breeding grounds for migratory waterfowl as well as for non-game birds Among the many national waterfowl refuges are those on Lower Klamath Lake in Oregon and California and on Malheur Lake in Oregon. Island refuges for colonial birds are numerous in Oregon, Washington, and Florida Pelican Island near the east coast of Florida was, in 1903, made the first Federal wildlife refuge The National Audubon Society refuges are most numerous in Texas and Florida, where the heron and the ibis especially are protected. The Ramey Wildlife Refuge in Louisiana and the Roosevelt Bird Sanctuary at Oyster Bay, L I, N Y, are Audubon refuges Bird City at Avery Island, La, is privately maintained Hawk Mountain Sanctuary in E Pennsylvania is cared for by the Hawk Mountain Sanctuary Association The Singing Tower, a memorial to Edward Bok, is in the Mountain Lake Sanctuary (see IRON MOUNTAIN), Fla. The Aleutian Island Refuge is the most extensive of the general wildlife refuges Special refuges are maintained by the Fish and Wildlife Service for some big-game animals—bison, elk, antelope, mountain sheep, brown bear, and moose Deer and some other game animals find sanctuary on the general wildlife and the waterfowl refuges More protection is needed for caribou, moose, mountain goat, and grizzly bear Protection is afforded to wildlife in national parks and forests and on lands controlled by the Soil Conservation Service of the Dept. of Agriculture. Canada has national parks and a wildlife refuge system similar to that of the United States, and most of the provinces have wildlife refuges or game preserves Since 1935 many national parks have been established in Mexico Great Britain has, since early times, maintained parks, refuges, and game preserves, some of which are open to hunting at certain seasons Education of the public in methods of making better use of land outside of parks, refuges, and other special areas is important to the preservation of wildlife In all parts of the country the maintenance of suitable vegetation and the prevention of erosion, thereby preserving feeding and breeding grounds, is a means of preventing depletion of wildlife See W T Hornaday, *Thirty Years War for Wild Life* (1931), T G Bridges, *Wardens of the Wild* (1938), J N Gabrielson, *Wildlife Conservation* (1941) and *Wildlife Refuges* (1943), E H Graham, *The Land and Wildlife* (1947), E H Graham and W R Van Dersal, *Wildlife for America* (1949), E G Holt and W R Van Dersal, *Wildlife and Land Use Patterns* (U S Dept of Agriculture, Miscellaneous Publication 444)

wild rice, Indian rice, or **Canada rice,** tall, aquatic grass (*Zizania aquatica*), with long blades and terminal panicles Most authorities consider it to be an annual It grows best in shallow waters of the N United States and S Canada, certain varieties grow also in the Southern states Its seeds were one of the chief foods of certain Indian tribes especially in the Great Lakes region Indians of the Algonquian linguistic family, especially the Ojibwa and Menominee tribes, and certain Sioux tribes warred for centuries for control of the wild-rice fields The Ojibwa called the grain *manomin* [good grain], and the Menominee are believed to have been named for a variant of this word, it is said to have some 60 synonyms, from which a great number of geographical names have been derived The Indians gathered the seeds by pulling the grain heads over their canoes and flailing them with paddles, the seeds were sun-dried or parched over a slow fire to crack the hulls, then the grain was threshed by tramping, and winnowed The harvest was traditionally followed by a thanksgiving festival The seed is harvested today, especially in Minnesota, for the epicurean market and commands a high price Wild rice is sowed to provide food and shelter for fish and waterfowl and served as an ornamental grass in home garden ponds and bogs The seed is usually planted in the spring, it should be soaked in water overnight before being sowed

Wildspitze, Austria see ÖTZTAL ALPS

Wildwood **1** City (pop 1,346), N central Fla, S of Ocala, in a productive farm area It is a railroad center with repair shops **2** Resort city (pop 5,150), SE N J, on an island off Cape May, settled 1882, inc as a city 1911, when the boroughs of Wildwood (inc 1898) and Holly Beach City (inc 1893) were consolidated

Wiles, Irving Ramsay, 1861–, American portraitist, b Utica, N Y He studied with his father, Lemuel Maynard Wiles (1826–1905), with J Carroll Beckwith and William M Chase, and in Paris with Carolus-Duran His sitters include George Arnold Hearn (Metropolitan Mus), Gen Guy V King (West Point, N Y), General Martineau (state capitol, Albany, N Y), and Julia Marlowe He became a member of the National Academy of Design in 1897

Wiley, Harvey Washington, 1844–1930, American chemist, b Kent, near Madison, Ind, grad Hanover College, Hanover, Ind (B A, 1867), M D Indiana Medical College, 1871 He is known especially as a leader in securing pure-food legislation He was professor of chemistry at Purdue Univ and also state chemist of Indiana (1874–83), chief chemist of the U S Dept of Agriculture (1883–1912), and professor at George Washington Univ (1899–1914) He was largely responsible for the enactment of the Food and Drugs Act of 1906 and was charged with its administration Wiley's rulings were challenged, a special board was established to pass on his findings, and a congressional investigation followed, although Wiley was exonerated, he resigned in 1912 His works include *Principles and Practice of Agricultural Analysis* (3 vols, 1894–97, 3d ed revised, 1926) and *Foods and Their Adulteration* (1907, 3d ed, 1917) See his autobiography (1930)

Wilfrid, Saint, 634–709?, English churchman, b Northumbria, of noble parentage He was educated at Lindisfarne and Canterbury With BENEDICT BISCOP he traveled to Lyons and Rome in 653, St Wilfrid remained to study in each city In 661 he returned to England and became abbot of Ripon. Moved by St Wilfrid's eloquence, King Oswy at the Synod of Whitby (664) rejected Celtic usages, including the reckoning of Easter, and established instead the Roman custom That year Wilfrid was consecrated bishop of Ripon, in 669 his diocese was extended to include all of Northumbria with its see of York. There ensued a long controversy with the archbishop of Canterbury over division of dioceses in England It was compromised with the aid of the pope, and Wilfrid ended as bishop of Ripon and Hexham. He made many converts and was responsible for the vigorous growth of Roman usage Feast Oct 12.

Wilhelm. For German rulers thus named, see WILLIAM

Wilhelm II Coast, part of Antarctica, on the Indian Ocean Discovered (1902) by the German explorer, Erich von Drygalski, it was formerly known as Kaiser Wilhelm II Land

Wilhelmina (vĭl"hĕlmē'nə), 1880–, queen of the Netherlands (1890–1948), daughter and successor of William III Her mother, Emma of Waldeck-Pyrmont, was regent until 1898, when Wilhelmina commenced her active reign She married (1901) Prince Henry of Mecklenburg-Schwerin (d 1934), who played no active part in the government The Salic law then having application in Luxembourg, the personal union of that grand duchy with the Netherlands was abrogated at her accession Despite her very great influence on the government of the Netherlands, Queen Wilhelmina always conformed strictly to the constitutional limitations imposed on the monarch Her court was distinguished by its simplicity and its high moral tone The queen probably had a large share in the maintenance of Dutch neutrality through the First World War and in the grant of asylum to William II of Germany after the war When the Netherlands was invaded (May, 1940) by the Germans, Wilhelmina fled to England with her government She repeatedly visited the United States and Canada during the Second World War and made her formal return to the Netherlands in May, 1945 She retired from public life in May, 1948, and formally abdicated in favor of her daughter, Queen Juliana, in September, after celebrating the 50th anniversary of her reign amid rejoicings that reflected her great popularity

Wilhelmina, Mount, c 15,600 ft high, on W central New Guinea, in Netherlands New Guinea, highest peak of the Orange Range

Wilhelmshaven (vĭl"hĕlms-hä'fən), city (1939 pop 113,686; 1946 pop 89,717), Oldenburg, NW Germany, NW of Bremen and on the Jade Bay, an inlet of the North Sea It was in Hanover prov until 1937 Founded in 1869, Wilhelmshaven was, until 1945, the chief German naval base on the North Sea The naval installations were heavily damaged by Allied air attacks in the Second World War and were dismantled after the German surrender The industries were reoriented from naval construction to the production of heavy machinery, automobile chassis, electrical equipment, and textiles There are marine biological and geological institutes and an ornithological station

Wilkes, Charles (wĭlks), 1798–1877, American naval officer and explorer, b New York city, educated by his father In 1815 he entered the merchant service and received (1818) an appointment as a midshipman For his survey (1832–33) of Narragansett Bay he was designated (1833) head of the Dept of Charts and Instruments of the Navy In command of a government exploring expedition, Wilkes, then a lieutenant, set sail from Norfolk, Va, in 1838 with a squadron of six ships, he was accompanied by trained scientists They sailed around South America, did important research work in the S Pacific, and explored the Antarctic They reported the discovery of land, and although Wilkes's position was later to be found in error, the portion of the continent which he is believed to have explored was subsequently named Wilkes Land Wilkes explored Fiji in 1840, visited the Hawaiian group, and in May, 1841, entered the Strait of Juan de Fuca on the Pacific coast of the United States, explored the Pacific Northwest, and, after having completely encircled the globe, returned to New York in June, 1842 His *Narrative of the United States Exploring Expedition* (5 vols and an atlas) appeared in 1844 He edited the scientific reports of the expedition (20 vols and 11 atlases, 1844–74) and was the author of Vol XI (*Meteorology*) and Vol XIII (*Hydrography*) The impetuosity of his nature, for which he was twice court-martialed, was amply demonstrated when early in the Civil War, as commander of the *San Jacinto*, he stopped the British mail ship *Trent* and, contrary to all regulations, forcibly removed the Confederate commissioners John Slidell and James M Mason The incident almost involved the Union in a war with England (see TRENT AFFAIR) He was promoted to the rank of commodore in 1862 and commanded a squadron in the West Indies He was subsequently demoted but was finally made rear admiral on the retired list in 1866

Wilkes, John, 1727–97, English political leader. He studied at the Univ of Leiden, returned to England in 1746, and joined a society of rakes which included Sir Francis Dashwood, Charles Churchill, and John Montagu, 4th earl of Sandwich, they derisively styled themselves "the monks of Medmenham Abbey" By ample expenditure Wilkes secured a seat in Parliament (1757) With the aid of Churchill, he attacked the foreign policy of the government of John Stuart, 3d earl of Bute, in his periodical the *North Briton* (1762–63) Its vigorous attack silenced the Bute paper, the *Briton*, written by Tobias Smollett. In No 45 Wilkes even criticised the speech from the throne. So angered was

George III that he had Wilkes arrested (1763) on a general warrant and imprisoned. Declaring the warrant illegal, Judge Charles PRATT soon released Wilkes, who was, however, because of his writing in the *North Briton* and in a licentious parody, *An Essay on Woman*, expelled (1764) from Parliament and convicted of seditious libel He fled to Paris, but returned in 1768 and during the next year was repeatedly elected to Parliament from Middlesex and as often denied his seat because of the king's influence He was arrested as an outlaw, sentenced (1768) on the former charge against him, and served 22 months in prison In his struggle for the liberty of the individual, Wilkes was supported by such men as Edmund Burke and the unknown writer JUNIUS. Eventually his election opponent was illegally seated in his stead Wilkes organized a party for parliamentary reform and the protection of civil rights and championed the cause of the American colonists He became successively alderman (1769), sheriff (1771), and lord mayor (1774) of London, and in 1774 he again entered Parliament, where he fought for parliamentary reform His popularity waned after his forceful action as chamberlain of the city of London in suppressing the Gordon Riots of 1780 Profligate, but courageous and incorruptible, Wilkes became a symbol, both in England and in America, of opposition to tyranny See biographies by Horace Bleakley (1917), R W. Postgate (1929), and O A Sherrard (1930), George Nobbe, *The North Briton* (1939)

Wilkes-Barre (wilks'-bă"rĕ), city (pop 86,236), co seat of Luzerne co , E Pa , on the east bank of the Susquehanna and c 15 mi SW of Scranton, settled 1769, inc as a borough 1806, as a city 1871 In addition to extensive anthracite mining, the city manufactures wire products, locomotives, and machinery. It was named for John WILKES and Isaac BARRÉ, defenders of the colonies before Parliament The settlement was burned in 1778 by the British and Indians, just after the Wyoming Valley massacre, and was again burned in 1784 George Catlin was born here The city is the seat of Wilkes College

Wilkesboro (wilks'bŭrŭ), town (pop 1,309), co seat of Wilkes co , W central N C , on the Yadkin and W of Winston-Salem, founded c 1777, inc 1889 The area yields lumber, corn, wheat, and rye, and the town has woodworking plants

Wilkes Land, part of Antarctica, bordering the Indian Ocean, between Queen Mary Coast and King George V Land (now usually known as George V Coast) It is named for Charles Wilkes, a U S naval officer, who led an expedition (1838–42) to Antarctica

Wilkie, Sir David, 1785–1841, Scottish genre painter He studied in Edinburgh and at the Royal Academy and won early popularity with his admirable little scenes of everyday life After travel on the Continent he turned to portraiture and historical painting He enjoyed many honors and became painter in ordinary to George IV, he was knighted in 1836 Well-known examples of his work, including *The Blind Fiddler*, *The Village Festival*, and *Blind Man's Bluff*, are in the National Gallery, London

Wilkie, town (pop 1,425), W Sask , WNW of Saskatoon It is a railroad division point in a region of mixed farming and stock raising and has grain elevators

Wilkins, Sir George Hubert, 1888–, British explorer, b Australia He made a number of trips to Antarctica and to the arctic regions Valuable experience gained when he accompanied Vilhjalmur Stefansson's expedition (1913–18) to the arctic regions and Sir Ernest Shackleton's expedition (1921–22) to Antarctica prepared Wilkins to assume the leadership in the following years of a number of polar expeditions A pioneer in the method of air exploration, he flew (1928) from Point Barrow, Alaska, to Spitsbergen, his *Flying the Arctic* (1928) described his observations during the flight He was knighted that year He commanded an antarctic exploration (1928–29) when flights were made in the region of Palmer Peninsula, and in 1931 he headed a submarine expedition to the arctic regions, an exploit which is depicted in his *Under the North Pole* (1931) From 1933 to 1939 Wilkins was manager for Lincoln Ellsworth's transantarctic expeditions His *Thoughts through Space* (with H. M Sherman, 1942) recounts the attempts made by Wilkins and Sherman to communicate by mental telepathy during the period when Wilkins was searching (1938) for a group of Russian aviators lost in the arctic.

Wilkins, Mary Eleanor see FREEMAN, MARY E W

Wilkinsburg, residential borough (pop 29,853), SW Pa , near Pittsburgh, settled c 1800, inc 1887. Steel alloys are made here

Wilkinson, Ellen, 1892?–1947, English labor leader, b Manchester, of a working-class family She graduated from the Univ of Manchester and became a union organizer She fought for woman suffrage and for socialism, becoming a Labour party representative in Parliament in 1924 A vigorous speaker and courageous fighter, she was respected by her political opponents. She became minister of education in the cabinet in 1945

Wilkinson, James, 1757–1825, American general, b. Calvert co , Md. He abandoned his medical studies in 1776 to join the army commanded by Washington He first served as a captain in Benedict Arnold's unsuccessful Quebec campaign Later he was Gen Horatio Gates's deputy adjutant general in the Saratoga campaign There is debatable evidence that Wilkinson took credit for the heroism of another officer, in any event Gates gave him the honor of bringing to Congress the news of Burgoyne's defeat. Congress censured Wilkinson for delay in carrying the dispatch but rewarded him by promoting him brigadier general (1777) and making him secretary to the board of war (1778) Soon he was forced to resign because of his apparent involvement in the CONWAY CABAL He was (1799–81) clothier general of the army but resigned when charged with irregularities in his accounts Later (1782–83) he farmed in Bucks co , Pa , and was elected to the Pennsylvania legislature Wilkinson moved to Kentucky in 1784 It seems clear that shortly after he became a key figure in the Spanish Conspiracy—the plan to induce what was then the SW United States to split off and form a separate nation allied to Spain Wilkinson seems to have taken an oath of allegiance to Spain and to have received a Spanish pension of at first $2,000 a year, later $4,000 To the Spanish authorities in New Orleans he represented his agitation for the separation of Kentucky from Virginia as part of this scheme, there is no indication, however, that he revealed any such motivation to the Kentucky conventions, in which others had expressed sentiments in favor of a separate republic of Kentucky In 1791 Wilkinson reentered the army as a lieutenant colonel, and in 1792 he again attained the rank of brigadier general, serving under Anthony Wayne On Wayne's death (1796) Wilkinson became ranking army officer. At this time his duties included making treaties with Indian tribes along the southern border, and he was (1805–6) governor of Louisiana Territory Alarmed when he realized that his association with Aaron BURR was common knowledge, Wilkinson informed President Jefferson that Burr was plotting to disrupt the Union Wilkinson was the chief prosecution witness at Burr's trial and himself narrowly escaped indictment He was subsequently (1811) cleared by an army board of inquiry In the War of 1812 he signally failed in the campaign to take Montreal and was relieved of his command Once again an official inquiry left him untouched He wrote *Memoirs of My Own Times* (3 vols , 1816) in an attempt to answer his many critics He died in Mexico, where he spent his retirement See biographies by R O Shreve (1933), James R Jacobs (1938), and T R Hay and M R Werner (1941)

Wilkinson, Jemima, (jumī'mu), 1752–1819, American religious leader, b Cumberland, R I She had little formal learning but read much romantic literature As a girl she was powerfully impressed by the sermons of George WHITEFIELD and also wished to emulate the example of Ann LEE ("Mother Ann") She became very sick when she was about 20 and fell into a prolonged trance or coma On reviving, she maintained that she had died and her original soul had gone to heaven while her body was occupied by the "Spirit of Life," sent by God to warn the world of his impending wrath Calling herself the "Public Universal Friend," she preached widely through Connecticut and Rhode Island Her dignified manner—in strong contrast to that of other revivalists—and her magnetic personality and great beauty attracted a large group of followers (many educated), and she established churches at New Milford, Conn , and at Greenwich, R I She aroused much hostility by advocating celibacy, and she did not restrain enthusiastic followers from representing her as the Messiah To escape persecution she founded (c 1790) the colony of "Jerusalem" in Yates co , NW N Y (near the present Penn Yan), one of the earliest settlements in that region The existence of this prosperous community (it reached some 260 persons in 1800) helped pacify the neighboring Indians Dissension later developed in Jerusalem because the Friend continually demanded gifts of her followers and instituted humiliating punishments for breaking her rules She spent her last years in a luxurious house built far from the other dwellings. After her death the community dispersed See Carl Carmer, *Listen for a Lonesome Drum* (1936)

Wilkinson, Sir John Gardner, 1797–1875, English Egyptologist and explorer He went to Egypt in 1821, where he remained for 12 years engaged in travel and archaeological research He published his results in *Topography of Thebes and General Survey of Egypt* (1835) and *Manners and Customs of the Ancient Egyptians* (1837), for which work he was knighted. *Dalmatia and Montenegro* (1848) tells of his travels in the Balkans

Wilkinson, Marguerite (Bigelow), 1883–1928, American poet, b Halifax, N S , studied at Northwestern Univ The best known of her several books of verse were *Bluestone* (1920) and *Citadels* (1926). A host of readers enjoyed her well-chosen anthologies of poetry, *New Voices* (1919 and later editions) and *Contemporary Poetry* (1923 and later editions).

will, in law, document expressing the wishes of a testator concerning the disposition of his property after his death. The will may grant outright bequests to the heirs or provide for the establishment of trusts (see TRUST). No particular form of wording is necessary in a will, only a clear expression of intent. Wills ordinarily must be in writing, but in certain strictly defined circumstances (e g , those of soldiers and sailors in combat) the law may recognize an oral (nuncupative) will as reported by a witness. Written wills must be subscribed (i.e , signed after all the text) by the testator and must bear the signature of two, (or, in some jurisdictions, three) witnesses A person has capacity to make a will only when he is in sound mind and is not unduly influenced by an interested party In most states persons under 21 are deemed not to have this capacity All objections to a will must be made at the PROBATE, which precedes the distribution (administration) of the property The disposal of a decedent's estate by will was severely limited in England before the passage (1540) of the Statute of Wills. Today the laws respecting INHERITANCE still limit the testator's freedom (e.g., a married person must leave at least a prescribed percentage of his estate to his spouse).

will, in philosophy and psychology, a term used to describe that which is alleged to stimulate the motivation of purposeful activity. It is characteristic of the will that it can be observed only in one's self and can be attributed to others only by inference from their behavior There is no generally accepted explanation in psychology for the apparent freedom men enjoy to do what they will, i e , to originate the stimuli necessary to initiate a course of action Until recently the psychological discussions of the will have been closely related to the philosophical Disagreements have been extreme One approach has been the doctrine of determinism which denies the reality of the will Another type simply accepts the will as the faculty or function of the person which is the motive power of the personality This idea is generally based on intuitive grounds and is associated with Plato, Aristotle, Lucretius, St Thomas Aquinas, Descartes, and Kant Others have considered it the externalized result of the interaction of conflicting elements These include Spinoza, Leibniz, Hume, Herbart, Wundt, Spencer, and Münsterberg Still others have considered the will to be the manifestation of the personality striving to accomplish its purposes Among these are St Augustine, Duns Scotus, Hobbes, Schopenhauer, Nietzsche, William McDougall, and John Dewey Modern psychology has tended to consider the concept of the will as an unscientific principle The problems involved in dealing with it are largely absorbed in other areas of investigation, such as the psychology of adjustment, the study of unconscious motivation, the concept of attention, and the influence of endocrine balance

Willaert, Adrian (ad'rē-ăn vĭl'ărt), c 1480–1562, Flemish musician. In 1527 he became choirmaster at St Mark's, Venice Willaert was the founder of the Venetian school of composition, which created the madrigal He introduced antiphonal singing and pleaded for a tempered scale He left many motets, madrigals and songs, and a few Masses

Willamette (wĭlă'mĭt), river, c 300 mi long, rising in several headstreams in the Cascade Range, W Oregon It flows N past Eugene, Salem, Oregon City, and Portland to the Columbia river just NW of Portland The river is navigable for most of its course Its wide, fertile valley is a major fruit-growing region, and since it was first settled in the 1830s, it has been the most thickly populated area in the state There is diversified agriculture, manufacturing, and an important lumbering industry A Federal project was begun in 1938 to harness the river and its tributaries in the interests of flood control, navigation, and power production Fern Ridge Dam, in the Long Tom river, and Cottage Grove Dam, in the Coast Fork, were completed in 1941 and 1942, respectively Dams under construction (1950) include the Detroit, in the North Santiam river, Lookout Point (also called Meridian), in the Middle Fork, and Dorena, in the Row river

Willamette University, at Salem, Oregon; coeducational; opened 1844 as Oregon Institute, the oldest institution of higher learning in the Far West. Successor to an Indian school of Jason LEE, it was chartered and renamed in 1853. It has colleges of law, liberal arts, and music Its medical school, early in the region, is now closed

Willard, Archibald M., 1836–1918, American painter, b. Bedford, Ohio. He is known for only one painting, *The Spirit of '76*, which, exhibited at the Centennial Exposition, Philadelphia, 1876, was bought by Gen. John Henry Devereaux and presented to Marblehead, Mass. It hangs in Abbott Hall in Marblehead

Willard, Daniel, 1861–1942, American railroad executive, b. Windsor co., Vt. He entered railroad service in 1879 as a track laborer, served in various capacities with several railroads, and by 1899 had

risen to the position of assistant general manager of the Baltimore and Ohio. In 1901 he was hired by the Erie Railroad Company as assistant to the president and later held executive positions in several of the nation's railroads He was president of the Baltimore and Ohio Railroad Company from 1910 to 1941, and in the First World War he was appointed to responsible government positions In 1924 Willard was elected president of the board of Johns Hopkins Univ. See biography by Edward Hungerford (1938).

Willard, Emma (Hart), 1787–1870, American educator, pioneer in woman's education Born in Berlin, Conn., she attended and later taught in the local academy and in 1807 took charge of the Female Academy at Middlebury, Vt Two years later she married Dr John Willard In 1814 she opened a school in her home, where she taught subjects not then available to women In 1818 she addressed to the New York legislature an appeal for support of her *Plan for Improving Female Education*, and Governor Clinton invited her to move to New York state. Her school was opened (1819) at Waterford, but in 1821 the Troy Female Seminary was founded and under her leadership became famous, offering collegiate education to women and new opportunity to women teachers She wrote a number of textbooks, a journal of her trip abroad in 1830, and a volume of poems, including "Rocked in the Cradle of the Deep" In 1838 Mrs Willard retired from active management of the school, which was later renamed in her honor She devoted the remainder of her life to the improvement of common schools and to the cause of woman's education See Alma Lutz, *Emma Willard, Daughter of Democracy* (1929)

Willard, Frances Elizabeth, 1839–98, American temperance leader and reformer, b Churchville, N Y., grad Northwestern Female College, 1859 She was president of Evanston College for Ladies and dean of women at Northwestern Univ After leaving the university, she helped organize (1874) the WOMAN'S CHRISTIAN TEMPERANCE UNION and in 1879 became its president She devoted most of her life to the organization of women for the prohibition of alcoholic beverages, but was active in other reforms, especially in the cause of woman suffrage See her autobiography, *Glimpses of Fifty Years* (1889), biography by Mary Earhart (1944)

Willard, Josiah Flynt, see FLYNT, JOSIAH

Willard, village (pop 4,261), N Ohio NW of Mansfield Rubber products are made

Willcocks, Sir William, 1852–1932, British engineer, b India He worked on irrigation projects for the department of public works of India (1872–83) and of Egypt (1883–97) He designed and built the Aswan Dam (1898–1902) and in 1911 undertook a great irrigation work in Mesopotamia He was knighted in 1902 See his autobiography, *Sixty Years in the East* (1935)

Willcox, Walter Francis, 1861–, American statistician, b Reading, Mass He was professor of economics and statistics at Cornell Univ (1891–1931, retiring as emeritus) and was for many years connected with the U S Bureau of the Census His writings include *Introduction to the Vital Statistics of the United States*, 1900–1930 (1933)

Willems, Florent Joseph Marie (flôrĕnt' zhôzĕf' marē' vĭl'ums), 1823–1905, Belgian genre painter He was influenced by the old Dutch masters, and his subjects are usually of the 17th cent He settled in Paris c 1840 Among his paintings are *Preparing for the Promenade* (Metropolitan Mus), *Le Baisemain, Music Lesson, Wedding Dress,* and *Sealing the Love Letter*

Willemstad (vĭl'ŭmstät), city (pop 39,678), capital of CURAÇAO colony, Dutch West Indies, on Curaçao island Neat and attractive and faintly reminiscent of Holland, the city is the commercial center of the colony and a free port It is especially important as the transshipping point for oil sent across the Gulf of Venezuela from the city of MARACAIBO

Willesden (wĭls'dun), municipal borough (1931 pop 184,434, 1947 estimated pop 180,770), Middlesex, England, NW of London It is a railroad center

Willett, Marinus (murē'nŭs wĭl'ĭt), 1740–1830, American soldier, b Jamaica, N Y He was a member of the expeditions against Fort Ticonderoga and Fort Frontenac in 1758 and a leader of the Sons of Liberty in New York and, after the outbreak of the American Revolution, served under Richard Montgomery in the invasion of Canada. He won (1777) a victory over Barry St LEGER while second in command at Fort Stanwix, joined George Washington's army in New Jersey in 1778, and participated (1779) in the Clinton-Sullivan expedition against the Iroquois From 1780 until the end of the war he commanded New York troops in the Mohawk valley, and there his scouts managed to kill (1781) Walter BUTLER after a skirmish with Loyalists. Later Willett, a partisan of Aaron Burr and a Republican, held several local offices in New York city, where he served (1807–8) as mayor. Willett, an authority on Indian affairs, was sent (1790) to negotiate a treaty with the Creek Indians in Georgia.

William I, 1797–1888, emperor of Germany (1871–88) and king of Prussia (1861–88), second son of Frederick William III of Prussia and Queen Louise He fled to England in the Revolution of 1848, and upon his return (1849) he commanded the troops that crushed the republican insurrection in Baden When his brother Frederick William IV was declared insane William became (1858) regent, and on Frederick William's death William became king of Prussia. William immediately set about reorganizing and strengthening the army, and when he met the opposition of the legislature, he appointed BISMARCK his prime minister in 1862 From then until the emperor's death, Bismarck guided the destiny of Prussia and Germany. Opposition to the king's and Bismarck's military program was suppressed, and in 1864 Prussia began its career of military conquest in the war with Denmark over SCHLESWIG-HOLSTEIN This led to the AUSTRO-PRUSSIAN WAR of 1866, from which Prussia emerged the leading German power. William I commanded in person in the FRANCO-PRUSSIAN WAR of 1870–71, received the surrender of Napoleon III at Sedan, and was proclaimed (Jan 18, 1871) emperor of Germany in the Hall of Mirrors at Versailles (see GERMANY) Though William often disagreed with Bismarck's policies, he ultimately was always persuaded by his chancellor As a symbol of reborn German unity, he was immensely popular, but his reactionary policy drew upon him the hatred of the radical elements Two attempts on William's life (1878) enabled Bismarck to pass severe legislation against the Socialists William did not favor the Kulturkampf (Bismarck's struggle against the Roman Catholic Church), but gave it his tacit consent William's reign was crucial in European history, for it saw the rise of Germany to be the first power of continental Europe His son Frederick III succeeded him See Paul Wiegler, *William the First* (Eng tr , 1928)

William II, 1859–1941, German emperor and king of Prussia (1888–1918), son and successor of Frederick III and grandson of William I of Germany and of Queen Victoria of England He was early alienated from his liberal-minded parents by his belief in the divine nature of kingship, his love of military display, and his impulsiveness Much has been made of the fact that he had a withered left arm in order to explain these traits as a compensation for his physical weakness After completing his studies at the Univ of Bonn he entered the army and in 1881 married Princess Augusta Victoria of Schleswig-Holstein As emperor, William endeavored to maintain and, if possible, to extend the royal prerogative and to make Germany a major naval, colonial, and commercial power Friction soon developed between him and BISMARCK over questions of both domestic and foreign policy When the chancellor refused to revoke his order forbidding ministers to report to the emperor except in his presence he was forced to resign William thereafter was in general the dominating force in his own government In domestic affairs he attempted to forestall the rise of the Socialist parties both by repressive measures and by social reform, but was only partially successful The conduct of foreign affairs was his major interest, but he had no basic policy and was greatly influenced by his ministers The reinsurance treaty with Russia, which had been a chief feature of Bismarck's system of alliances was not renewed in 1890 Even though sincerely desirous to maintain friendly relations with Great Britain, William by his naval program and his colonial and commercial aspirations prevented an alliance between the two countries and drove England into the Entente Cordiale with France (see TRIPLE ALLIANCE AND TRIPLE ENTENTE) The German support of Russia in the Far East and the friendly relations between William and Nicholas II of Russia (as revealed in the "Willy-Nicky" correspondence) were counteracted by the encouragement William gave to Austria in its Balkan policy The already strained relations with France were further embittered by German interference in French colonial affairs in Africa, especially MOROCCO Alarmed at the growing isolation of Germany, William strengthened the Triple Alliance and secured Turkish adherence The emperor was fond of travel, but his state visits frequently caused ill feeling, as in the Moroccan Crisis His combined eloquence and impetuousness, which led him to speak or act unadvisedly on many occasions, were illustrated by his utterances concerning German imperialism and by his dispatch of the famous telegram of encouragement to S J P Kruger after the Jameson raid (1896) into the Transvaal The emperor looked upon the great military machine and the system of alliances he had created as the most effective method of preserving peace. Actually, they vastly contributed to the outbreak of the First WORLD WAR His influence on the actual conduct of the war was slight The collapse of the great German drive of 1918 presaged the end of the Hohenzollern dynasty. The last chancellor of the Second German Empire, Prince MAXIMILIAN OF BADEN, negotiated for an armistice, but clamor for the emperor's abdication began to be heard in Germany, especially after President Wilson had made it a prerequisite of peace negotiations Naval mutiny and civilian revolt were followed by republican proclamations in leading German cities William fled to Holland (Nov , 10, 1918) and two weeks later formally abdicated in his name and that of his family Though the Treaty of Versailles provided that William be tried for promoting the war, the Dutch government refused to extradite him, and he remained in retirement at Doorn There, after the death of Augusta Victoria, he married the widowed Princess Hermine of Schönaich-Carolath (1922) His memoirs appeared in English translation in 1922 and *My Early Life* in 1929

William, king of Albania see WILLIAM, PRINCE OF WIED

William I or **William the Conqueror,** 1027?–1087, king of England (1066–87) Born at Falaise the illegitimate son of Robert I, duke of Normandy, by Arletta, daughter of a tanner, he is sometimes called William the Bastard He succeeded to the dukedom in 1035 when his father died on his return journey from a pilgrimage to Jerusalem William and his guardians were hard pressed to keep down recurrent rebellions during his minority, and at least once the young duke barely escaped death In 1047 he received aid from HENRY I of France and established his power In turn he aided Henry against Geoffrey Martel, count of Anjou (1048–49) He visited England in 1051, when his cousin EDWARD THE CONFESSOR probably promised that William should succeed him as king Despite a prohibitive ecclesiastical decree, William married Matilda, daughter of Baldwin, count of Flanders, in 1053 The union, which greatly increased the duke's prestige, finally received papal dispensation in 1059. William's growing power brought him into conflict with Henry I of France whose invading armies he defeated in 1054 and 1058 The accession (1060) of the child PHILIP I of France, whose guardian was William's father-in-law, improved his position, and in 1063 he conquered the county of Maine In 1064 he released HAROLD, then earl of Wessex (who had been shipwrecked on the French coast, imprisoned, and surrendered to William), after extracting his promise to support the duke's claims to the English throne Upon hearing that Harold had been crowned king of England (1066), William secured the sanction of the pope, raised an army and transport fleet, sailed for England, and defeated and slew Harold at the battle of HASTINGS (1066) Overcoming what little resistance remained in Kent, he led his army into London, received the city's submission, and was crowned on Christmas Day. The Norman Conquest was thus quickly established He traveled about England compelling order, building castles and garrisoning them, and putting down rebellions, in the process of which he ravaged great sections of land, burning houses, crops, and cattle Titles to lands were called in and redistributed to the king's followers and supporters By 1071 the adherents of EDGAR ATHELING and their Scottish and Danish allies had been defeated and the major work of pacification completed William undertook church reform, replaced Stigand (whose title was dubious) with LANFRANC as archbishop of Canterbury, substituted foreign prelates for many of the English bishops, generally took command over the administration of church affairs, and established (1076) separate ecclesiastical courts After the rebellion of the earls of Norfolk and Hereford was crushed in 1075, the rest of William's reign was devoted more to continental quarrels than to English uprisings He fought with his factious son Robert (ROBERT II, called Robert Curthose) in 1079 and quarreled intermittently with France from 1080 until his death In 1085–86 at his orders a survey of England was taken, the results of which were embodied in the DOMESDAY BOOK By the Oath of Salisbury in 1086, William established the important precedent that loyalty to the king is superior to loyalty to any subordinate lord of the kingdom He invaded the Vexin in 1087, was fatally injured in a riding accident, and died at Rouen, directing that his son Robert should succeed him in Normandy and his son William in England In character chaste, earnest, and resourceful, William was not only one of the greatest of English monarchs but a pivotal figure in European history See also NORMAN CONQUEST. See E A Freeman, *History of the Norman Conquest* (5 vols , 1867 79), F W Maitland, *Domesday Book and Beyond* (1897), F M Stenton, *Anglo-Saxon England* (1947), biography by F. M Stenton (1908)

William II or **William Rufus** (rōō'fus), d 1100, king of England (1087–1100), called William Rufus or William the Red because of his ruddy complexion He was the second surviving and favorite son of William I, and he succeeded to the throne on his father's death His first act as king was to put down the effort of his uncle, Odo of Bayeux, to seat William I's oldest son, Robert, duke of Normandy (see ROBERT II), on the throne of England William next (1090) invaded Normandy, secured a portion of Robert's lands, and then united forces with him to regain lands which Robert had previously lost

He returned to England in 1091 or 1092, forced the Scottish king, Malcom III, to do him homage, and seized the city of Carlisle from the Scots for settlement by Englishmen William ruled England with a strong hand, exacted enormous moneys from his subjects on the flimsiest of pretexts, and inspired terror among the clergy by his sale of various churches and church lands In 1093 he quarreled with Robert over a treaty they had made in 1091, bribed Philip of France to withdraw his support from Robert, and paid his Norman adherents to wage the war for him In 1095 he quarreled with ANSELM over the question of the archbishop's prime allegiance to the crown or to the pope In 1096 William suppressed an English rebellion led by Robert of Mowbray, earl of Northumberland The same year a sum of money, raised mainly by stripping the shrines of the saints, was lent to Robert, who was leaving on crusade, and William occupied Normandy He returned to England in 1097 and failed to subdue the Welsh, but gained control over the Scottish throne by sanctioning a successful expedition of Edgar Atheling to dethrone Donald III, the Scottish king In 1098 William gathered a force, won the northern part of Maine in France, and attempted unsuccessfully to take the lands of the Vexin On hearing in England in 1099 that the former holder had regained the territory of Maine, he rushed overseas and recaptured the territory Before William could carry out his plan to occupy the duchy of Aquitaine (1100), he was killed by an arrow while on a hunting party, and the kingdom of England was seized by his younger brother, HENRY I See E A Freeman, *The Reign of William Rufus* (1882), J H Ramsay, *The Foundations of England* (1898), H W C Davis, *England under the Normans and Angevins* (1905)

William III, 1650–1702, king of England, Scotland, and Ireland (1659–1702), son of WILLIAM II of Orange, stadholder of the United Netherlands, and Mary, oldest daughter of Charles I of England He was born at The Hague after his father's death, and the office of stadholder was held in abeyance, while power fell into the hands of Jan de WITT A Dutch revolution was, however, precipitated by Louis XIV's invasion of the Netherlands (1672) at the beginning of the DUTCH WARS, and William was made stadholder, captain general, and admiral for life In the ensuing warfare with France, William made peace with England in 1674, suffered several defeats by the French, and made peace at Nymegen in 1678 In the meantime William's diplomatic position was strengthened by his marriage (1677) to the English princess, Mary, Protestant daughter of James, duke of York (later JAMES II) Successive conquests by France led William to form the coalition with Sweden, Austria, and Spain which was later known as the League of Augsburg and which was in 1688 to begin against Louis XIV the War of the GRAND ALLIANCE When William was unable to persuade James II to abandon his Catholic ally, Louis XIV, and join the league against France, he turned to the English opposition He let his Protestant preferences be known in England and had already been mentioned as a strong claimant to the throne After secret negotiations, he was invited to England by seven important nobles He crossed the channel (1688), with an army of 15,000, was joined by most of the important men of England, and allowed James to escape to France William called a convention and accepted its Declaration of Rights and the throne of England jointly with his wife (1689) This Glorious Revolution was accomplished in England without bloodshed It proved the decisive victory for Parliament in its long struggle with the crown, for William was forced to accept the BILL OF RIGHTS (1689) and the ACT OF SETTLEMENT (1701), greatly limiting the royal power and governing the succession Parliament had control of finances and the army In Scotland, the JACOBITES resisted violently, but after their defeat at Killiecrankie (1689) William was able to make Presbyterianism secure Rebellion continued sporadically, William blackened his reputation by allowing the bloody massacre of Glencoe (see CAMPBELL, JOHN 1ST EARL OF BREADALBANE), and he was to live in constant danger of plots against his life In Ireland, after his victory over the exiled James at the battle of the Boyne (1690), he completed the ruthless policy of "plantation" begun by James I and advanced by Cromwell, whereby Irish land was confiscated and given to English courtiers, soldiers, and adventurers, who often became absentee landlords By a rumous enforcement of the NAVIGATION ACTS he crippled certain Irish industries, and by a system of PENAL LAWS he increased the political, economic, and civil discrimination against Catholics William was constantly involved in the continental war which raged until 1697, when Louis XIV at the Peace of Ryswick recognized him as king of England The cost of the wars led to unpopular taxes in England, the Bank of England was chartered in 1694, and the policy of a permanent national debt begun William made no great effort to understand the English or their parties, but the necessity of having ministers who would work together led him to choose (1696) men of Whig persuasion and so to begin, unwittingly, the system of the responsible ministry He had in 1694 assented to the Triennial Act, which required a new election of Parliament every three years In 1695 he ceased to require the permission of a royal licenser for publications, thus taking a great step toward freedom of the press. A center of disaffection from c 1690 was the household of the queen's sister Anne (later Queen ANNE), who, with her favorites, the Marlboroughs, had been alienated by the hostile attitude of William and Mary His popularity diminished greatly after the death (1694) of the childless Queen Mary, and his concern near the end of his life with the Partition Treaties and with the War of the SPANISH SUCCESSION which involved England in another long duel with France did nothing to increase it When he died in March, 1702, after a fall from his horse, he was succeeded by Anne William's personality was cold, his personal life not admirable, and his public policy calculating A standard source for William's time is the history by Gilbert BURNET The standard biography is in Dutch, by Nicolaas Japiske (2 vols , 1930–33) See also W S Churchill, *Marlborough His life and Times*, Vol. I (1933), G N Clark, *The Later Stuarts* (1934); F C. Turner, *James II* (1948)

William IV, 1765–1837, king of England (1830–37), third son of George III and Queen Charlotte Dorothea He went to sea in 1779, served under Admiral Rodney in the action off Cape St Vincent (1780), and by 1786 was a captain William became duke of Clarence in 1789 and was advanced by 1799 to the rank of admiral, but saw little active service after 1790 Meanwhile in the House of Lords he opposed the antislavery movement and supported the extravagances of his oldest brother (later George IV) About 1791 he formed a liaison with Mrs Jordan, an actress, with whom he lived for over 20 years He married (1818) Adelaide, daughter of the duke of Saxe-Meiningen, and on the death (1827) of the duke of York, second son of George III, he became heir presumptive to the throne Made lord high admiral in 1827, he tried to run naval affairs without his council, contrary to law, and was forced to resign the next year In 1830 he succeeded George IV as king His most important public act was his promise to Earl GREY that he would, if necessary, create enough Whig peers to pass the REFORM BILL of 1832 This bill and such reforms as the education act, the new poor law, the municipal corporations act, and the abolition of slavery marked his reign, but his attitude was in general passive, and political leadership was left to the duke of WELLINGTON, Earl Grey, MELBOURNE, and Sir Robert PEEL Eccentric and given to ill-considered public utterances, William was only moderately popular He was succeeded by his niece, VICTORIA See biographies by Percy Fitzgerald (1884) and G E Thompson (1933)

William I, 1772–1843, first king of the Netherlands and grand duke of Luxembourg (1815–40), son of Prince William V of Orange, last stadholder of the Netherlands He commanded (1793–95) the Dutch army in the French Revolutionary Wars and after the French occupation of the Netherlands entered the Prussian and later the Austrian service He returned to the Netherlands in 1813, and the Congress of Vienna gave him (1815) the title king of the Netherlands His kingdom comprised present BELGIUM as well as the Netherlands, and he was further awarded the grand duchy of LUXEMBOURG in compensation for his family holdings in Germany, which he ceded to Prussia William soon alienated his Belgian subjects by attempting to make Dutch the official language, by granting disproportionate influence to the northern provinces, and by encroaching on the freedom of the Roman Catholic Church Political unrest in Belgium led to the revolution of 1830, which he stubbornly sought to suppress despite the intervention of England and France (see LONDON CONFERENCE) Belgium won its independence, but final recognition by William came only in 1839 When his Dutch subjects forced him to liberalize the constitution in 1840, he abdicated in favor of his son, William II Though his rule was reactionary, William fostered the development of Dutch agriculture, commerce, and industry

William II, 1792–1840, king of the Netherlands and grand duke of Luxembourg (1840–49), son and successor of William I. He served with Wellington in the Peninsular War, was wounded at Waterloo, and led the Dutch army in the Belgian revolution (1830), after his father had failed to approve his efforts at conciliation Called to the throne upon the abdication of his father (1840), William II was immediately confronted with a grave financial problem, which was solved by raising a voluntary loan among the people Demand for revision of the fundamental law became more insistent, but the king resisted the liberal movement, led by Jan Thorbecke, until the revolutionary spirit of 1848 forced him to grant the desired reforms. He was succeeded by his son, William III

William III, 1817–90, king of the Netherlands and grand duke of Luxembourg (1849–90), son and successor of William II. His long reign was unmarked by friction with the States-General, for, though opposed in principle to liberalism, William ruled as a constitutional monarch. He granted a parliamentary constitution to his Luxembourg subjects and succeeded in maintaining the neutrality of his grand duchy in the Franco-Prussian War (1870–71). J. R. THORBECKE was the leading liberal statesman during his reign and obtained the full emancipation of the Dutch Catholics With William's death the Dutch branch of the house of Orange-Nassau became extinct in its male descent, and the crown passed to his daughter, WILHELMINA

William, king of Scotland: see WILLIAM THE LION

William I (William the Bad), 1120–66, king of Sicily (1154–66), son and successor of Roger II. Despite his nickname, he was a wise lawgiver In 1160–61 he put down rebellions stirred up among his barons and in his cities by Pope ADRIAN IV and Emperor MANUEL I His son William II succeeded him.

William II (William the Good), c 1153–1189, king of Sicily (1166–89), son and successor of William I. He married (1177) Joan, daughter of Henry II of England As an ally of Pope Alexander III and the Lombard League he was at war with Emperor Frederick I He tried to resume the Norman conquest of the Byzantine Empire, taking Durazzo and Salonica, but was defeated by Isaac II. Childless, he willed the kingdom to his aunt, CONSTANCE, but he was succeeded by his cousin, TANCRED.

William I, 1781–1864, king of Württemberg (1816–64), son and successor of Frederick I Before his accession he fought with Napoleon in Russia (1812), and later against Napoleon with the allies (1814–15) He granted a liberal constitution in 1819, strove to protect the rights of the smaller German states against both Austria and Prussia, and promoted the ZOLLVEREIN

William or **Frederick William,** 1882–, former crown prince of Germany, son of William II In the First World War he commanded (1914) an army on the Western Front and was nominal commander in the German attack (1916) on VERDUN, where he ruthlessly sent thousands to certain death He fled to Holland in Nov , 1918, and there renounced his rights to the throne, but returned to Germany (1923) with the permission of the Weimar government fearing a Hohenzollern restoration, the former Allies protested, but, reassured by the German government, did not demand his expulsion. William was a supporter of the Hitler regime

William I, prince of Orange: see WILLIAM THE SILENT

William II, 1626–50, prince of Orange, stadholder of the United Provinces of the Netherlands (1647–50), son and successor of Frederick Henry He married (1641) Mary, eldest daughter of Charles I of England His ambitious projects brought him into conflict with the great merchants of Amsterdam He opposed the acceptance of the Treaty of Münster (1648), despite its recognition of the independence of the Netherlands, and he immediately began secret negotiations with France, having as his purpose the extension of his territory, the centralization of his government, and the restoration of his brother-in-law, Charles II, to the English throne The prompt resistance he encountered from the states of Holland was broken by William's imprisonment of its leaders (1650) He next turned his attention to external affairs and was negotiating a treaty with France when he died of smallpox He was succeeded by his posthumous son, the future William III of England

William III, prince of Orange: see WILLIAM III, king of England

William, prince of Wied (vēt), 1876–, king of Albania (1914), third son of William, prince of Wied, nephew of Elizabeth of Rumania A German army officer, he was elected ruler of Albania and he accepted, contrary to German advice Civil war soon made his position untenable, and he had no support among the large powers The coming of the First World War broke down all foreign aid A rebellion under Essad Pasha was successful, and in Sept , 1914, William was forced to retire, though he refused to abdicate

William, count of Holland, 1227?–1256, German king (1254–56), previously rival king (1247–54) to CONRAD IV The count of Holland was chosen to succeed Henry Raspe (d. 1247) as antiking in the midst of the quarrel between Emperor Frederick II and Pope Innocent IV Though recognized as king by most of the German princes after the death (1254) of Conrad IV, William's rule was never more than nominal and was never unchallenged Depending on the support of the Rhenish towns, he was the first German ruler to admit city delegates to a diet (1255). He was killed fighting against the Frisians

William, Fort. see FORT WILLIAM

William and Mary, College of, mainly at Williamsburg, Va , state supported since 1906, coeducational since 1918, chartered 1693, opened 1694 by Episcopalians under James BLAIR. It became a university in 1779 William and Mary traces descent from plans for a Univ. of Henrico, put aside after the Indian massacre of 1622. It was the second colonial college The college was closed when it was occupied in 1781 by Revolutionary troops, in the Civil War, and again in 1881–88 for lack of funds (see EWELL, BENJAMIN S.). Phi Beta Kappa was founded here in 1776. The elective

system (1779; suggested by Jefferson) and the honor system were introduced here There are departments of education and jurisprudence, the Marshall-Wythe School of Government and Citizenship, Richmond (Va) Professional Institute (schools of art, public health nursing, social work, and store service education), and Norfolk (Va) junior division The main building, oldest U S college building (1697), probably designed by Sir Christopher Wren, is restored to its original proportions and aspect Among noted students were Jefferson, Monroe, Tyler, and John Marshall Washington received his first surveyor's license here and later was a chancellor

William Henry, Fort, military fort at the southern end of Lake George, NE N Y , built (1755) by Sir William Johnson It was captured by Montcalm in 1757, although he had promised safe-conduct to the garrison, he was unable to control his Indian allies, who massacred or carried off into captivity a number of the fort's inhabitants The fort was destroyed by the French, but in 1758 James Abercromby (before he yielded his command to Jeffrey Amherst) began building another on the same site. For Fort William Henry in Maine, see PEMAQUID

William Jewell College: see LIBERTY, Mo

William of Champeaux (shămpō', shāpō'), d 1121, French scholastic philosopher He studied and taught in Paris There in 1109 he opened the monastic school of St Victor, which became famous later In 1113 he became bishop of Châlons-sur-Marne William is famous for a dispute in which Abelard worsted him Apparently he was an extreme realist, affirming that all members of a genus are of one substance, distinguished only by accidents. William was a friend (perhaps a teacher) of St Bernard of Clairvaux

William of Longchamp: see LONGCHAMP, WILLIAM OF

William of Malmesbury (mämz'–) d c 1143, English writer, monk of Malmesbury His most important work is the *Gesta regum Anglorum*, with its continuation, *Historia novella* Book V is contemporary history, especially valuable for the reigns of Henry I and Stephen He also wrote *Gesta pontificum Anglorum*, a source for early ecclesiastical history, *De antiquitate Glastoniensis ecclesiæ*, and several saints' lives The *Gesta regum* and its continuation were edited by William Stubbs (2 vols , 1887–89) See Montague Rhodes James, *Two Ancient English Scholars* (1931)

William of Newburgh, c 1136–c 1198, English chronicler, monk of Newburgh, Yorkshire He wrote the *Historia rerum Anglicarum*, a history of England from 1066 to 1198 While not entirely accurate in some details, the history is valuable and impartial, because William had an independent and critical mind See the translation of the history by Joseph Stevenson in his *Church Historians of England*, Vol IV (1856)

William of Occam or **William of Ockham** (both ŏ'kum), d c 1349, English scholastic philosopher, a Franciscan, sometimes called the Invincible Doctor He studied at Oxford and taught there until 1323 Then, deeply involved in the bitter quarrel between the more radical members of his order and Pope John XXII, he was summoned to Avignon and there imprisoned In 1328 William fled to Pisa and placed himself under the protection of the emperor He became a staunch supporter of Emperor Louis IV in the struggle with John XXII Like MARSILIUS OF PADUA, he violently opposed the temporal power of the pope and wrote numerous works on the subject, notably *Opus nonaginta dierum* [the work of 90 days] His *Dialogus* is a thorough discussion of political theories In the broader realm of philosophy he broke with the Thomistic intellectualism dominant in his time He argued that reality exists solely of individual things and that universals are merely the signs by which the mind represents reality to itself They are identified with abstract knowledge and do not touch reality, in contrast intuitive knowledge is our immediate experience of the individual, concrete thing and our formulation of that experience Logic, then, deals with signs rather than with realities This view came to be called terminalism By applying such ideas to metaphysics and psychology, Occam excluded from human intellectual knowledge many questions previously considered accessible to it, e g , immortality, the existence of God, and the existence of the soul Such matters, he believed, were the object of faith alone In his day Ockhamism grew very popular

William of Orange: see WILLIAM THE SILENT, WILLIAM II, prince of Orange, WILLIAM III, king of England

William of Tyre, b c 1130, d before 1185, historian and archbishop of Tyre Born in the Latin Kingdom of Jerusalem and possibly of French extraction, he completed his education in Europe, probably in France or Italy He soon returned to Palestine and in 1167 was appointed archdeacon of Tyre He was employed on various embassies by the king, AMALRIC I In 1170 he became tutor of Amalric's son and heir (later Baldwin IV). After Amalric's death he became (1174) chancellor of the kingdom, and in 1175 he was made archbishop of Tyre. He was present at the Lateran council in Rome in 1179 His chief importance lies in his historical work, his books are well written and accurate, especially that portion which deals with his own time Of his three known works only one is extant, the *History of Deeds Done beyond the Sea*, which treats of the Crusades and the Latin Kingdom down to 1184

William of Wykeham or **William of Wickham** (both: wĭ'kŭm), 1324–1404, English churchman and benefactor He was probably educated at Winchester Grammar School, and he entered the service of the royal court in 1347 He had charge of Edward III's additions to Windsor Castle and rapidly gained influence at court, becoming royal secretary and lord privy seal (1364) He received benefices in all parts of England, but was not ordained a priest until 1362 In 1367 he was consecrated bishop of Winchester and made lord chancellor His statesmanship seems to have been mediocre, and the debility of aging Edward III and the strife of factions made his position extremely difficult, in 1371 William resigned Opposing the party of John of Gaunt, he was one of the main instigators of the Good Parliament (1376) As a result he was charged with misuse of government funds, deprived of his temporalities, and harried for almost a year. On Richard II's accession he was exonerated and spent most of his remaining life in his episcopal duties From 1389 to 1391, however, he again served as chancellor His most lasting importance lies in his two great foundations, New College at Oxford (1379) and Winchester College (1394), one of the greatest of English public schools He rebuilt the Norman nave of Winchester Cathedral and repaired many churches of his diocese A conservative but conscientious churchman, William was a vigorous clerical reformer See biography by G C Heseltine (1932)

William Rufus: see WILLIAM II, king of England.

Williams, Bill see WILLIAMS, WILLIAM SHERLEY.

Williams, Edward see IOLO MORGANWG

Williams, Eleazer (ĕlē'zur), c 1787–1858, American missionary He was reputed to be either Louis XVII (the Lost Dauphin) or the great-grandson of Eunice Williams He was brought up in the home of Thomas Williams and educated in private schools in Massachusetts He became a Protestant Episcopal missionary among the New York Indians When the Oneida went (1822) to a reservation near Green Bay, Wis , he went with them and remained until 1850, when he returned to New York He did good work among the Indians and wrote in both their language and English Among other things he translated (1853) the Book of Common Prayer into Iroquois and wrote (1859) a *Life of Te-ho-ragwa-ne-gen* (Thomas Williams) An amazing likeness to the Bourbons, doubt as to his origin, and the actions of the prince de Joinville in seeking (1841) an interview with Williams were the basis of the story that he was the Lost Dauphin Eleazer was the form used by Williams himself, though the name occurs also as Eleazar, Lazar, and Lazau See John H Hanson, *The Lost Prince* (1854), E E Evans, *The Story of Louis XVII of France* (1893), William W Wight, *Eleazer Williams His Forerunners, Himself* (1896), Meade Minnigerode, *The Son of Marie Antoinette* (1934)

Williams, Emlyn, 1905–, Welsh actor and playwright, grad Christ Church, Oxford His best-known plays are *Night Must Fall* (1935), a psychological thriller, and *The Corn Is Green* (1941) The latter, a drama of Welsh mining life, is autobiographical

Williams, Ephraim, 1715–55, American soldier, founder of WILLIAMS COLLEGE, b Newton, Mass After several years as a sailor, he lived in Massachusetts and took part in defending the frontier against the Indians, and he was a captain in King George's War In recognition of his service he was given command of the Massachusetts posts W of the Connecticut river and 200 acres of land in Massachusetts, where Adams and Williamstown now stand Made a colonel in 1755, Williams was killed leading troops of Sir William Johnson's command in the first action of the battle of Lake George in the final French and Indian War His will directed that his property be used for establishing a free school Out of the academy thus founded at Williamstown, Williams College developed

Williams, Frankwood Earl, 1883–1936, American psychiatrist and psychoanalyst, b Cardington, Ohio, M D Univ of Michigan, 1912 A leader of the international mental hygiene movement, he edited (1917 32) *Mental Hygiene*, helped organize psychiatric work in the First World War, and served (1917–31) on the National Committee for Mental Hygiene He lectured in psychiatry and mental hygiene at Yale (1926–30) and at Columbia (1930–32) His works include *Mental Hygiene* (1929), *Adolescence* (1930), and *Russia, Youth, and the Present-Day World* (1934) He died at sea while returning to the United States from a visit to Russia

Williams, Frederick Ballard, 1871–, American landscape and figure painter, b Brooklyn, N Y He is represented in the Metropolitan Museum of Art and other leading American galleries

Williams, Sir George, 1821–1905, English merchant. In 1844 he founded the YOUNG MEN'S CHRISTIAN ASSOCIATION

Williams, Jesse Lynch, 1871–1929, American author, b Sterling, Ill , grad Princeton, 1892 He wrote numerous short stories, including *Princeton Stories* (1895), and several plays, one of which, *Why Marry?* (1917), received the 1918 Pulitzer Prize in drama Another play, *Why Not?* (1922), was adapted from his novelette *Remaining Time* (1916), and *Lovely Lady* was produced in 1925

Williams, John, 1664–1729, American clergyman, b. Roxbury, Mass , grad Harvard, 1683 In 1686 he became the first minister at Deerfield, Mass In the great Indian massacre at that frontier town in 1704, he was taken captive with his family Two of his children were murdered, and his wife was killed on the long journey to Canada In 1706 he and his children (except one, who remained with the Indians) were redeemed Williams returned to Deerfield His story of his adventures, *The Redeemed Captive Returning to Zion* (1707), is one of the best known of the many accounts of Indian captivity

Williams, John, 1796–1839, English missionary, called the Apostle of Polynesia Under the London Missionary Society he went (1816) to the Society Islands, where his work included the economic as well as religious education of the natives Discovering Rarotonga in 1823, he founded missions and schools there and translated parts of the Bible and other books into the Rarotongan tongue After a visit to England (1834–38), he returned to the South Seas in a newly outfitted ship for his missionary expeditions among the islands In the New Hebrides, in a region where he was not known and where he was planning to start a mission, he was killed by cannibals His *Narrative of Missionary Enterprise in the South Sea Islands* (1837) threw valuable light on little-known Polynesia See biography by B J Mathews (1915)

Williams, John Sharp, 1854–1932, American political leader, b Memphis, Tenn He studied law at the Univ of Virginia and was admitted (1877) to the bar He removed (1878) to Yazoo City, Miss , where he practiced law and engaged in cotton planting He served (1893–1909) as a Democrat in the House of Representatives, where he became (1903) minority leader In the U S Senate (1911–23), Williams—often characterized as a gentleman, planter, and scholar—effectively supported the Wilson administration with his eloquent speeches He wrote *Thomas Jefferson His Permanent Influence on American Institutions* (1913) See biography by G C Osborn (1943)

Williams, Ralph Vaughan see VAUGHAN WILLIAMS, RALPH

Williams, Robert R , 1886–, American chemist, b India, grad Univ of Chicago (B S , 1907), brother of Roger John Williams Research undertaken in 1910, while he was chemist (1908–15) at the Bureau of Science, Philippine Islands, culminated, during his association (1925–45) with the Bell Telephone Laboratories, New York city, in his isolation (1933) of Vitamin B_1 (thiamine) from a syrup of rice polishings In 1936 he synthesized the vitamin He became director of grants of the Research Corp , New York city, in 1945 He is noted also for his work in alkaphic and in rubber chemistry He wrote, with T D Spies, *Vitamin B_1 (Thiamin) and Its Use in Medicine* (1938)

Williams, Roger, c 1603–1683, clergyman, advocate of religious freedom, founder of RHODE ISLAND, b London A protégé of Sir Edward Coke, he was educated at Charterhouse and Cambridge (where he was graduated in 1627) and took Anglican orders He early espoused Puritanism and came to Boston in 1631 Williams was teacher and, after a two-year stay at Plymouth, minister of the Salem church His radical religious beliefs and political theories—he denied the validity of the Massachusetts charter and declared the civil magistrates had no power over matters of conscience—alarmed the Puritan oligarchy, and the General Court banished him in 1635 In the spring of 1636 he founded PROVIDENCE on land purchased from the Narragansett Indians To Providence, a democratic refuge from religious persecution, came settlers from England as well as Massachusetts There were four settlements in the Narragansett Bay area by 1643, when Williams went to England Through the influence of powerful friends such as the younger Sir Henry VANE, he obtained from the Long Parliament a patent (1644) uniting the Rhode Island towns of Portsmouth and Newport with his own Providence Plantations In 1651 William CODDINGTON secured a commission annulling the patent, but Williams, with John CLARKE, hastened again to England and had the patent of 1644 restored The patent's grant of absolute liberty of conscience was later confirmed by the royal charter of 1663 On his return in 1654, Williams was elected president of the colony and served three terms Always a trusted friend of the Indians (he wrote *Key into the Language of America*, 1643), he often used his good offices in maintaining peaceful relations with them But he was unable to prevent the outbreak of King Philip's War (1675–

76), in which he served as a captain of militia. Williams, though he remained a Christian, came to hold no particular creed His writings, reprinted in the *Narragansett Club Publications* (Providence, 1866–74), reveal the vigor with which he propounded his democratic and humanitarian ideals. *The Bloudy Tenent of Persecution for Cause of Conscience* (1644) was condemned by John COTTON, who was answered with *The Bloudy Tenent Yet More Bloudy* (1651). Other works are *Queries of Highest Consideration*, an argument for complete separation of Church and state, *The Hireling Ministry None of Christ's* (1652), and *George Fox Digg'd Out of His Burrowes* (1676), a polemic against Quaker teachings Of great personal charm and unquestioned integrity, Williams was admired even by those who, like both Winthrops, abhorred his liberal ideas See biography by S H Brockunier (1940) and biographies and studies by O S Straus (1894), E J Carpenter (1909), J E Ernst (1929), and Emily Easton (1930).

Williams, Roger John, 1893–, American chemist, b India, grad. Univ of Redlands, Redlands, Calif. (B S , 1914), Ph D Univ of Chicago, 1919, brother of Robert R Williams He taught chemistry at the Univ of Oregon (1920–32) and at Oregon State College (1932–39) and became professor at the Univ of Texas in 1939 and also director of the Biochemical Institute of Texas in 1941 He is noted for his work on the vitamin B complex and especially for his discovery of pantothenic acid He wrote *An Introduction to Organic Chemistry* (1927; 5th ed , 1948), *An Introduction to Biochemistry* (1931, 2d ed , 1948), *A Textbook of Biochemistry* (1938, 2d ed , 1942), *What to Do about Vitamins* (1945), and *The Human Frontier* (1946)

Williams, Samuel Wells, 1812–84, American missionary and Chinese scholar, b Utica, N Y In 1833 he went to Canton, China, to take charge of the mission press of the American Board of Commissioners for Foreign Missions Williams was Perry's interpreter in the Japanese expedition (1853–54) and acted as secretary and interpreter for the American legation in China until 1876, when he accepted a professorship of Chinese language and literature at Yale His chief work is his monumental *Syllabic Dictionary of the Chinese Language* (1874) He also wrote *Easy Lessons in Chinese* (1842) and *The Middle Kingdom* (1848) He collaborated on Elijah C Bridgman's *Chinese Chrestomathy* (1841)

Williams, Tennessee, 1914–, American dramatist, b Columbus, Miss , grad State Univ of Iowa, 1938 His original name was Thomas Lanier Williams He was included in *Five Young American Poets* of 1944 His three most successful plays, *The Glass Menagerie* (1945), awarded the New York Drama Critics' Prize for 1945, *A Streetcar Named Desire* (1947), winner of the 1946 Pulitzer Prize for drama, and *Summer and Smoke* (1949) are all penetrating studies of frustration, written with a sure sense of dramatic effectiveness His *27 Wagons Full of Cotton and Other One-Act Plays* appeared in 1946

Williams, Theodore Samuel (Ted Williams), 1918–, American baseball player, b San Diego, Calif He excelled at baseball while in high school, and at the age of 17 he began playing professional ball with the San Diego Padres of the Pacific Coast League In 1938 he tried out with the Boston Red Sox in spring training, and a year later he joined that club as a regular outfielder He batted well over 300 in 1939 and 1940, in 1941, besides batting 406 to win the batting championship, he also led the American League in home runs (37) In 1942 the tall, rangy left-hander was again top batter in the major leagues with a .356 average, while leading the American League in home runs (36) and runs batted in (137) In the Second World War he served (1942–45) as an air cadet in the U S navy Williams, a controversial personality to Bostonians, helped lead the Red Sox to a pennant in 1946 Though opposing teams frequently employed the "Williams shift"—moving fielders toward right field, where Williams customarily drives his base hits—Ted continued to lead the league in batting in 1947 with .343 and in 1948 with .369. In 1949 with .3427, he narrowly lost out to George Kell of the Detroit Tigers, who had a .3429 average Williams's skill at bat helped bring several victories to the American League in All Star play

Williams, William, c.1710–c. 1790, American painter, b England, first teacher of Benjamin West The facts of Williams's life are obscure, but he probably went to sea in his youth Benjamin West began taking lessons from him in Philadelphia c 1740 He painted scenery for the first Philadelphia theater in 1759. He later went to New York, was painting there in 1775, and probably returned to England c 1780 He died in a Bristol almshouse. Among his possessions was a manuscript, *The Journal of Llewellin Penrose, a Seaman*, which is supposed to be at least partly autobiographical It was published in 1815. Williams's paintings were richly colored and romantic in treatment Among the pictures known to be his are *Deborah Hall* (Brooklyn, N.Y , Mus), *Benjamin Lay* (Historical Society of Pennsylvania), and *John Wiley, His Mother, and Sisters*

Williams, William, 1717–91, Welsh poet and clergyman, called William Williams of Pantycelin. He is an important figure in Welsh literary history. A pioneer in the romantic movement, he wrote verse revolutionary in substance and form, substituting an intensely personal poetry for older conventional themes His hymns rank among the great masterpieces of religious poetry His best-known hymn is *Guide Me, O Thou Great Jehovah*, of which he wrote both Welsh and English versions

Williams, William, 1731–1811, American patriot, signer of the Declaration of Independence, b. Lebanon, Conn., grad. Harvard, 1751 He served in the French and Indian War and held many public offices before becoming a delegate (1776–78, 1783–84) to the Continental Congress

Williams, William Carlos, 1883–, American poet and physician, b Rutherford, N J., educated at Geneva, Switzerland, M D Univ of Pennsylvania (1906), and studied pediatrics at the Univ of Leipsig He has practiced medicine in Rutherford, N J , since 1910 A friend of Ezra Pound, Wallace Stevens, and Hilda Doolittle, he worked in the technique of imagism in his early *Poems* (1909) and *The Tempers* (1913) He gradually developed a poetic expression more stark, close to the idiom of speech, in which the natural rhythm gave strength to the free verse Volumes of his poetry include *Al Que Quiere* (1917), *Collected Poems, 1921–1931* (1934), *Complete Collected Poems* (really a selection, 1938), *The Wedge* (1944), *The Clouds* (1948), and *Selected Poems* (1949) Of his projected four-book poem, *Paterson*, the first three books appeared in 1946, 1948, and 1950 *A Dream of Love* is a verse play Though he is honored and best known as a poet, he has written essays, including those in *The Great American Grain* (1925), novels, among them *The White Mule* (1937), and short stories. See study by Vivienne Koch (1950)

Williams, William Sherley (Old Bill Williams), 1787–1849, American trader and trapper, b. Rutherford co , N C Much of his early life was spent in Missouri, where he was a traveling preacher Becoming (c 1822) an independent trapper, he accompanied (1825–26) a surveying party on the Santa Fe Trail, trapped in the Yellowstone country and in Texas, and went to California on an expedition in 1833–34 After that he spent much time in the mountain country and along the Santa Fe Trail In 1848 Williams, who was one of the most colorful of the mountain men, joined Frémont's fourth expedition at Bent's Fort as a guide Frémont, disregarding his advice, led the group towards the headwaters of the Rio Grande, where most of the party perished of cold and starvation Frémont retreated, blaming the episode on the guide Williams was killed by Ute Indians while retracing the path of the expedition See biography by Alpheus H Favour (1936)

Williams, town (pop 2,622), N central Ariz , W of Flagstaff, S of the Grand Canyon, on Bill Williams Mt It is a lumber and tourist town

Williamsburg. 1 Town (pop 1,308), SE Iowa, W of Iowa City, inc 1884 **2** City (pop 2,331), co seat of Whitley co , S Ky , on the Cumberland and NW of Middlesboro, in an area of coal mines, farms, gas wells, and timber Cumberland College (junior, coeducational) is here Cumberland Falls State Park is near **3** Town (pop 1,684), W Mass , in the Berkshires NW of Northampton, settled 1735, set off from Hatfield 1771 **4** Village (pop 1,194), SW Ohio, on the East Fork of the Little Miami and E of Cincinnati, settled 1795, inc 1800 There are chair factories here. **5** Borough (pop 1,898), S Pa , SE of Altoona, settled 1790, laid out 1795, inc 1827 It is the birthplace of Charles M Schwab **6** Historic city (pop 3,942), SE Va , SE of Richmond, between the James and the York, settled 1632 as Middle Plantation, laid out and name changed 1699 It was in 1722 the first city in Virginia to be incorporated The temporary seat of government after the burning of Jamestown (1676) in BACON'S REBELLION, the town became capital of Virginia in 1699 In 1693 it was chosen the site for the College of WILLIAM AND MARY Williamsburg was the scene of important conventions during the movement for American independence, but it declined after 1779, when the capital was moved to Richmond In the PENINSULAR CAMPAIGN of the Civil War occurred a rear-guard action here, May 5, 1862, between retreating Confederates and McClellan's forces In 1927 restoration of the city to its colonial aspect was begun, Dr W A R Goodwin (1869–1939), rector of the Bruton Parish Church, had interested John D. Rockefeller, Jr , in financing the undertaking Numerous buildings were restored and others rebuilt. Among the historic places here are the colonial capitol (reconstructed), Raleigh Tavern (reconstructed), rendezvous of Virginia Revolutionary patriots, the courthouse of James City co ; the Bruton Parish Church, and the governor's palace (reconstructed) The city is included in COLONIAL NATIONAL HISTORICAL PARK. An annual Garden Week is held, and the state general assembly meets in the old colonial capitol once during each biennial legislative session See W O. Stevens, *Old Williamsburg and Her Neighbors* (1938), publications of Colonial Williamsburg, Inc.

Williams College, at Williamstown, Mass., nonsectarian, for men; chartered 1785, opened as a free school 1791, became a college 1793, named for Ephraim WILLIAMS. The campus includes West College (1790), the Van Rensselaer Manor House (moved from Albany, N.Y), and the oldest U.S observatory (Hopkins, 1838). There are art and geology museums and a rare-book collection covering many fields Among distinguished presidents was Mark HOPKINS (1836–72). The first American mission grew out of the "haystack prayer meeting" here (1806). The first Institute of Politics, a model for others, was founded here in 1921.

William Smith College: see COLLEGES OF THE SENECA, THE.

Williamson, Alexander William, 1824–1904, English chemist. He taught (1849–87) at University College, London He studied the composition of ethers and devised a method (Williamson synthesis) of preparing ethers His writings include papers on etherification and on the composition of gases.

Williamson, Hugh, 1735–1819, American statesman, physician, and scientist, b. West Nottingham, Pa , grad College of Philadelphia (now the Univ of Pennsylvania), 1757. He studied theology, was a minister, then was (1760–63) professor of mathematics at the College of Philadelphia before studying medicine at Edinburgh and Utrecht. He practiced at Philadelphia and became interested in general science In England he obtained private letters written by Gov. Thomas HUTCHINSON, urging harsh measures against the patriots He later entered business in North Carolina and became surgeon general of that state in the American Revolution Elected to the state legislature (1782), he was also a member of the Continental Congress (1782–85, 1787), a delegate (1787) to the Federal Constitutional Convention, and a member of the Federal Congress (1789–93) After 1793 he engaged in scientific studies and wrote numerous scientific tracts See David Hosack, *A Biographical Memoir of Hugh Williamson* (1820)

Williamson, city (pop 8,366), co seat of Mingo co , S W Va , on the Tug Fork and SW of Charleston, in a coal-mining area, inc 1892

Williamsport. 1 Town (pop 1,222), co seat of Warren co , W Ind , on the Wabash near Attica, settled 1829 **2** Town (pop 1,772), NW Md , on the Potomac and SW of Hagerstown, laid out c 1786 Leather, silk, and limestone are produced **3** City (pop 44,355), co seat of Lycoming co , N central Pa , on the West Branch of the Susquehanna and c 70 mi N of Harrisburg on the Susquehanna Trail, settled 1772, laid out 1795, inc as a borough 1806, as a city 1867 It is a tourist center, a manufacturing city, and the trading and distributing center for an extensive agricultural and mining area Its manufactures include textiles, metal products, lumber products, and machinery George B Luks was born here It was the scene of several Indian massacres in colonial times and grew with the development of the lumber industry in the 19th cent Lycoming College (junior) is here

It is the seat of WILLIAMS COLLEGE and has several pre-Revolutionary houses It is a skiing center **3** Borough (pop 2,769), SE Pa , NE of Harrisburg, laid out 1869 It produces anthracite and textiles **4** Town (pop 1,477), central Vt , S of Barre, chartered 1781, first settled 1784 **5** Trade city (pop. 1,687), NW W Va., on the Ohio and S of Marietta, Ohio, in a farm area, settled 1787 There is a glass plant here

Williamsville, residential village (pop 3,614), W N Y., NE of Buffalo, settled c 1800, inc. 1869.

William Tell: see TELL, WILLIAM.

William the Conqueror: see WILLIAM I, king of England.

William the Lion, 1143–1214, king of Scotland (1165–1214), brother and successor of Malcolm IV, and grandson of David I The alliance with Louis VII which he made in 1168 began a long friendship between France and Scotland Soon afterward he went to aid the rebellion of the sons of Henry II of England. His capture by the English had the disastrous result that Henry forced him to sign the Treaty of Falaise (1174), making Scotland a feudal possession of England. He was released in 1175 and immediately asked the pope to declare the

Scottish church free of English domination. A quarrel with the pope delayed the decision, but in 1188 Pope Alexander III declared the Church of Scotland subject only to Rome. In 1189 William was able to buy annulment of the Treaty of Falaise from Richard I of England for 10,000 marks. William maintained an uncertain peace with England under King John and furthered somewhat the internal development of Scotland begun under David I, especially strengthening the courts and chartering royal burghs He was succeeded by his son, Alexander II

William the Silent or **William of Orange** (William I, prince of Orange), 1533–84, Dutch statesman, principal founder of Dutch independence A descendant of the Ottonian line of the house of Nassau, he was born at Dillenburg, near Wiesbaden, Germany, of Protestant parents However, William was reared a Catholic at the insistence of Emperor Charles V, whose favorite page he became He inherited the principality of Orange, in S France, in 1544 and was made (1555) stadholder of Holland, Zeeland, and Utrecht He served Philip II of Spain ably as a diplomat, particularly in the making of the Treaty of Cateau-Cambrésis (1559) Philip's encroachments on the liberties of the Netherlands and the introduction of the Spanish Inquisition by Cardinal Granvelle led him to turn against the king In 1563, with the help of counts Egmont and Hoorn, he succeeded in obtaining the removal of Granvelle, but under the regency of Margaret of Parma disorders grew in the Netherlands In 1566 the party of the Gueux was organized with William's connivance, and when Alba was sent to the Netherlands to quell the rebels, William withdrew to Germany He refused Alba's summons to appear before a tribunal, and his property was confiscated William and his brother, Louis of Nassau, raised an army to drive the Spanish out of the Netherlands They at first met defeat, but in 1576 the provinces of the Netherlands, taking advantage of the mutiny of the Spanish army under John of Austria, united under William's leadership in the Pacification of Ghent for the purpose of expelling the Spanish In 1573, chiefly for the sake of policy, William had become a Calvinist The struggle with Spain continued The Union of Utrecht (1579) proclaimed the virtual independence of the northern provinces, of which William was the uncrowned ruler, but the victories of the Spaniards under Alessandro Farnese forced William to seek French support by offering (1580) the rule over the Netherlands to Francis, duke of Alençon and Anjou Philip II denounced William as a traitor, and a large price was set on his head in 1581 William replied with his famous *Apologia*, in which he not only sought to vindicate his own conduct, but hurled violent accusations at the Spanish king, and in the same year the representatives of Brabant, Flanders, Utrecht, Gelderland, Holland, and Zeeland solemnly declared Philip deposed from sovereignty over those provinces William was chosen count of Holland and Zeeland, which had refused to accept Francis as sovereign William's support of the unpopular Francis resulted in the wane of William's own popularity during his last years He was assassinated at Delft by a French Catholic fanatic, while the struggle against Spain was still in a critical stage William married four times His first wife was Anne of Egmont and Büren (d. 1558), in 1561 he married Anne, daughter of Elector Maurice of Saxony, in spite of the opposition of Philip II and of Anne's parents, in 1575, two years before Anne's death, he married Charlotte de Bourbon, a French princess and a run-away nun, after securing the approval of several Protestant divines, in 1583 he married Louise de Coligny, daughter of Admiral Coligny From the first marriage Prince Philip William of Orange (d 1618) was born, from the second and fourth marriages issued William's successors as stadholders—Maurice of Nassau and Frederick Henry See biographies by Frederic Harrison (1897), Ruth Putnam (1911), and C. V. Wedgwood (1944)

Willibald, Saint (wĭl'lĭbôld), d 787?, English missionary in Germany He traveled in the East and was sent from Rome on a mission to aid St Boniface He was made first bishop of Eichstätt St Walburga was his sister, and St Wunebald, first abbot of Heidenheim, was his brother Feast of St Willibald July 7

Willibrord, Saint (wĭl'lĭbrôrd), 658–739, English Benedictine missionary, called the Apostle to the Frisians. He was brought up at Ripon by St Wilfrid and studied further (678–90) in Ireland From there he was sent with a few monks to Frisia to preach, under the protection of Pepin of Héristal. In 695 Willibrord went to Rome and was consecrated archbishop of the Frisians by Pope Sergius III, who gave him the name of Clement. Utrecht was established as his see; it became a center of English Christian culture on the Continent. He died at Echternach, in the monastery which he had founded (c.700) His work was continued by St. Boniface. Feast Nov 7.

Willimantic (wĭlĭmăn'tĭk), city (pop. 12,101) in Windham town, E Conn., a co. seat of Windham co., ESE of Hartford; inc. 1893. Cotton spinning dates from 1822. Willimantic, known as the Thread City, manufactures also yarns, airplane parts, and hardware. A state teachers college is here

Willing, Thomas, 1731–1821, American merchant and financier, b Philadelphia He studied law in London, entered his father's business, and later established with Robert Morris a prominent importing and exporting firm in Philadelphia He was elected mayor of Philadelphia in 1763 and was a justice of the Pennsylvania court (1767–1777) As a member of the Continental Congress (1775–76), he voted against the Declaration of Independence In 1780 Willing was active in raising money for the Continental army He was one of the founders of the Bank of North America and its first president (1781–1792) He also became (1791) first president of the Bank of the United States See B A Konkle, *Thomas Willing and the First American Financial System* (1937)

Willingdon, Freeman Freeman-Thomas, 1st **marquess of,** 1866–1941, British statesman He was (1900–1910) a Liberal member of Parliament He was governor of Bombay presidency (1913–19) and of Madras presidency (1919–24) and was governor general of Canada (1926–31) As viceroy and governor general of India (1931–36) he repressed passive-resistance campaigns of the Indian National Congress

Willington, town (pop 1,233), NE Conn , on the Willimantic river, inc 1727

Willis, Nathaniel Parker, 1806–67, American author, b Portland, Maine, grad Yale, 1827 Editor of two annuals, the *Legendary* and the *Token*, and founder (1829) and editor of the *American Monthly Magazine* in Boston, he was a veteran journalist by 1831, in that year he merged his magazine with George Pope Morris's *New-York Mirror* and went abroad to write for the *Mirror* and for English magazines In New York he had three plays produced (1838–39), of which *Bianca Visconti* won a prize and *Tortesa the Usurer* was praised by Poe As editor of the *Mirror* after 1840, he had many prominent contributors to it and to the *National Press*, later the *Home Journal*, which he and Morris founded in 1846 Willis's books, popular but ephemeral, were collections of his journalistic work, among them are *Pencillings by the Way* (1835), *Inklings of Adventure* (1836), and short stories in *Dashes at Life with a Free Pencil* (1845) Sara Payson Willis Parton was his sister See study by H A Beers (1885)

Willis, Robert, 1800–1875, English archaeologist and inventor He was professor of applied mechanics at Cambridge Univ , fellow of the Royal Society, and an authority on architectural history Of his 15 lectures on the architectural history of English cathedrals, seven were published (1844–1865) In 1857 he was awarded the cross of the Legion of Honor for a report on textile machinery His chief invention was the odontograph for mechanical draughtsmen, the first practical plan for constructing cycloidal toothed wheels in sets for universal gearing Among his books are *Principles of Mechanism* (1841), *Architectural History of the Monastery of Christ Church in Canterbury* (1869), and *The Architectural History of the University of Cambridge and of the Colleges of Cambridge and Eton* (4 vols , 1886), completed and published after his death by J Willis Clark

Willis, Thomas, 1621-75, English physician and anatomist He became professor at Oxford Univ in 1660 and in 1666 established a practice in London An authority on the brain and nervous system, he discovered the 11th cranial nerve and a circle of arteries at the base of the brain (the circle of Willis) He was the first to note the presence of sugar in the urine of diabetics His works, written in Latin, include *Of the Anatomy of the Brain*, illustrated by Sir Christopher Wren, published in 1664, and translated in *The Remaining Works . . . of Thomas Willis* (1681)

Williston, Samuel Wendell, 1852-1918, American paleontologist and entomologist, b Boston, grad Kansas State Agricultural College (B S , 1872) and Yale (M D , 1880, Ph D , 1885) He taught at Yale (1876–90), was professor and dean of the medical school at the Univ of Kansas (1890–1902), and was professor of paleontology at the Univ of Chicago (from 1902) Williston is known for his study of insects and of the paleontology of amphibians and reptiles His writings include *Water Reptiles of the Past and Present* (1914)

Williston, 1 City (pop. 5,790), co seat of Williams co , NW N Dak , on the Missouri, settled c 1880, inc 1904. It is the trade and shipping center of an irrigated farming area, with railroad repair shops and stockyards An agricultural experiment station of the state agricultural college is here 2 Town (pop. 1,107), SW S C , SSW of Columbia, in a truck-farming area 3 Town (pop. 1,021), NW Vt , SE of Burlington, on the Winooski; chartered 1763, first settled 1774, abandoned during the Revolution, inc 1786

Williston Park, residential village (pop 5,750), on W Long Island, SE N Y , near Mineola; inc 1926.

Willits, town (pop 1,625), W Calif , NNW of San Francisco, founded c 1865, inc. 1888 The region produces timber, livestock, and dairy products.

Willkie, Wendell Lewis, 1892–1944, American industrialist and political leader, Republican candidate for the presidency in 1940, b Elwood, Ind., grad Indiana Univ (B.A., 1913, LL B., 1916) He practiced law in Ohio (1914–23) and in New York (1923–33) before he became president (1933) of the Commonwealth and Southern Corp Although he had been a Democrat, antagonism to the New Deal led Willkie to enroll as a Republican in 1940 The same year he was nominated by the Republican party for the presidency, despite his lack of political experience and following In his campaign against Franklin D Roosevelt he endorsed the Roosevelt foreign policy but attacked the New Deal at home Although defeated in the election, he polled over 22,000,000 votes He later (1941–42) visited England, the Near East, Russia, and China as the President's personal representative and led the fight (1942–44) to liberalize the Republican party, mainly attacking isolationism. He wrote *One World* (1943) and *An American Program* (1944)

Wilmar (wĭl'mar), city (pop 7,623), co seat of Kandiyohi co , central Minn , W of Minneapolis, in a dairy and farm area, settled 1856, platted 1869, inc as a village 1874, as a city 1901 A state hospital for the insane is here

will-o'-the-wisp, phenomenon known also as *ignis fatuus* and jack-o'-lantern It is seen at night as a pale, flickering light over marshland There is no generally accepted explanation for it, it may result from the spontaneous ignition of gases (e g , methane) produced by the disintegration of dead plant or animal matter, or it may be a form of phosphorescence The eerie lights have given rise to many superstitions

Willoughby (wĭl'lŭbĭ), village (pop 4,364), NE Ohio, on the Chagrin river near Lake Erie and NE of Cleveland, settled c 1800 as Chagrin, renamed 1834 Rubber products and furniture are among its manufactures Near by is Kirtland Temple, a Mormon church built in 1833–36

Willoughby, Lake, beautiful lake, 5 mi long, NE Vt , in a high wooded area A state forest is near by, and the area is noted for recreation

willow, any tree or shrub of the large and widely distributed genus *Salix* Willows usually have long narrow leaves, and the male and female flowers are borne in catkins on separate plants The catkins sometimes are large and showy and appear before the leaves, as in the pussy willow The pussy willow (*Salix discolor*), of the NE United States and adjacent parts of Canada, and the weeping willow (*S babylonica*), native to Europe and Asia, are two popular decorative species The light soft wood of willows is used for making a high grade of charcoal, for boxes, and for wooden artificial limbs Willow bark is used for tanning leather, and the twigs of many species are valued commercially for basketry and wickerwork Such twigs and the bushes that yield them are often called osiers Willow bark and buds have been used medicinally Because of their ease of propagation by cuttings, their rapid growth, and their preferred habitat of river banks and moist sites, willows are valuable aids in erosion control Willows appear in legends of both the Orient (see WILLOW-PATTERN WARE) and the Occident

Willow Glen, Calif see San Jose

willow herb, name for several plants, among them the FIREWEED

willow-pattern ware, sometimes porcelain but frequently opaque pottery, originated in Staffordshire, England, c 1780 Thomas Minton, then an apprentice potter, developed and engraved the design after an old Chinese legend It portrays the garden of a rich mandarin whose young daughter elopes with his secretary The lovers, overtaken on the bridge by her father, are transformed by the gods into birds and flutter beyond his reach The scene with its willow tree covers the central part of plate, dish, or bowl, with a border of butterflies, daggers, a fret, or other motif The blue-and-white chinaware on which it appeared became immensely popular, and the design was reproduced with variations by many European potters and even in the Orient, where it is still constantly employed, most of the ware being exported to Western countries

Willows, city (pop 2,215), co seat of Glenn co , N central Calif , NNW of Sacramento, in an irrigated farming region of the Sacramento valley; inc 1886

Willow Springs, city (pop 1,530), S Mo , ESE of Springfield, in a farm and timber area of the Ozarks Mark Twain National Forest is near

Wills, Helen Newington, 1906-, American tennis player, b Alameda co , Calif She studied art at the Univ of California and later gave exhibitions of her paintings and etchings She gained international attention, however, by tennis playing She repeatedly won (1923–25, 1927–29) the U S women's singles crown while also taking (1927–29) the British women's singles title and other championships in France and Holland After her marriage (1929) to Frederick S Moody, Jr , she again won the U S. (1931) and the British (1932–33, 1935, 1938) singles titles Though she defaulted to Helen Hull Jacobs because of a leg injury in the 1933 finals of the U S. singles, she came back in 1935

and dramatically defeated Miss Jacobs in the Wimbledon finals match In 1937 Helen Wills Moody was granted a divorce, and in 1939 she married Aidan Roark, a polo player She is generally considered to have been the greatest woman tennis player of her time She wrote *Tennis* (1928) and *Fifteen-Thirty* (1937)

Willson, Beckles (Henry Beckles Willson), 1869–1942, Canadian author, b Montreal He was for a time a journalist in the United States and later in England Many of his numerous books are on Canadian and English affairs, these include *The Great Company* (1899), *The Truth about Newfoundland* (1901), *Canada* (1907), *Nova Scotia* (1911), *Quebec* (1913), *England* (1922), and biographies of George III (1907), Lord Strathcona (1902, 1915), and James Wolfe (1915)

Wills Point, city (pop 1,976), E Texas, E of Dallas, in a truck and cotton area

Willstätter, Richard (rĭkh'lärt vĭl'shtĕtur), 1872–1942, German chemist He was professor at the Kaiser Wilhelm Institute of Chemistry, Berlin (1912–16), and at the Univ of Munich (1916–25) He received the 1915 Nobel Prize in Chemistry for his work on chlorophyll and on anthocyanins (red, blue, and violet plant pigments) His later work was on the assimilation of carbonic acids in plants and on the chemical composition of enzymes

Willughby, Francis (wĭl'lŭbē), 1635–72, English naturalist He is known especially for his early systematic work on birds and fishes, in which he made some of the most important contributions before those of Linnaeus He toured the Continent with John Ray, collecting material for his *Ornithologia* (1676, in Latin), translated into English by Ray as *The Ornithology of Francis Willughby* (1678) Ray also published Willughby's *De Historia piscium* (1686)

Wilmerding (wĭl'murding), industrial borough (pop 5,662), SW Pa , ESE of Pittsburgh, inc. 1890 It manufactures railroad equipment

Wilmette (wĭlmĕt'), residential village (pop 17,226), NE Ill , northern suburb of Chicago, inc 1872 It has a Bahaist temple (see Bahaism)

Wilmington. **1** City (pop 112,504), co seat of New Castle co , NE Del , metropolis of the state on the Delaware river and tributary streams, the Christina and the Brandywine, inc as a borough 1809, as a city 1832 It is a port of entry Fort Christina, built here by the Swedes in 1638 (the site is now a state park with a memorial by Carl Milles, 1937), was maintained later by the Dutch, then the British, in 1682 William Penn came into possession Shipping and manufacturing grew, and in 1802 E I du Pont established a powder mill on the Brandywine Today the Du Pont Company's executive offices are here, the company maintains extensive facilities on its original site, and in near-by Edge Moor and Newport it manufactures pigments The Amalgamated Leather Companies plant is here, and there are shipyards and railroad shops A municipal marine terminal has been Wilmington's port since 1923 Numerous historic buildings are extant, among which is Old Swedes Church, built in 1698 Other points of interest are Rodney Square (civic center), Delaware Academy of Medicine, and Wilmington Art Center See Anna T Lincoln, *Wilmington, Delaware* (1937) **2** City (pop 1,921), NE Ill , S of Joliet, settled c 1839, inc 1875 It is a trade center in a farm and resort area of the Kankakee valley **3** Rural town (pop 4,645), NE Mass , NNW of Boston, settled 1639, inc 1730 **4** City (1940 pop 33,407, 1946 special census pop 47,483), co seat of New Hanover co , SE N C , a port of entry with a fine harbor on the Cape Fear River c 30 mi from its mouth, founded 1730 It is a railroad center as well as a port and handles cotton, fertilizer, and lumber In 1781 Cornwallis had his headquarters here During the Civil War it was an important Confederate port for blockade-runners until Fort Fisher (see Fisher, Fort) fell, Jan 15, 1865 The city has many old buildings and is the seat of a national cemetery **5** City (pop 5,971), co seat of Clinton co , SW Ohio, NE of Cincinnati, in a farm area, settled 1810, inc 1828 Wood-boring tools, air compressors, castings, and furnaces are made Wilmington College (coeducational) is here Near by is Fort Ancient State Park, with a prehistoric fortification and a museum **6** Town (pop. 1,221), S Vt , in the Green Mts W of Brattleboro, chartered 1751, settled c 1770 It includes Wilmington village (inc. 1855), which has woodworking mills

Wilmore, town (pop 1,228), central Ky , SSW of Lexington, in the bluegrass region Asbury College (coeducational) and a theological seminary are here.

Wilmot, David, 1814–68, American legislator, b Bethany, Pa He was admitted (1834) to the bar and practiced, in partnership with Galusha A Grow, at Towanda, Pa As a Democratic Congressman (1845–51) he became widely known as the author of the famous Wilmot Proviso, which helped build up the sectional animosity that led to the Civil War Ardently opposed to slavery, Wilmot became a leader of the Free-Soil party He helped to found the Republican party and was (1861–63) a Republican Senator, filling out the unexpired term of Simon Cameron. He then became (1863) judge of the U S Court of Claims. See biography by C B Going (1924).

Wilmot, Robert Duncan, 1809–91, Canadian statesman, b. Fredericton, N B At first a leading anti-confederationist in the New Brunswick parliament, he later became an advocate of confederation and sat in the London Conference (1866–67), which drafted Canadian union Wilmot was member of both provincial and dominion cabinets, Canadian senator (1867–80), and lieutenant governor of New Brunswick (1880–85).

Wilmot Proviso, 1846, amendment to a bill put before the U S House of Representatives. The bill provided appropriation of $2,000,000 to enable President James K Polk to negotiate a treaty with Mexico in settlement of the boundary question David Wilmot introduced an amendment to the bill that stipulated that none of the territory acquired in the Mexican War should be open to slavery In two successive sessions (1846, 1847) of Congress, the amended bill passed the House but was purposely ignored by the Senate. The Wilmot Proviso created great bitterness and proved to be an important step in crystallizing the sectional conflict between North and South In the election of 1848 the terms of the Wilmot Proviso, a definite challenge to proslavery groups, were ignored by the Whig party and the Democratic party, but they were adopted by the Free-Soil party Later the Republican party also championed the forbidding of slavery in new territories

Wilna, Elijah. see Elijah ben Solomon.

Wilno, Lithuania see Vilna

Wilson, Alexander, 1766–1813, American ornithologist, b Scotland He came to the United States c 1794 and taught in rural New Jersey and Pennsylvania Encouraged by William Bartram, he studied birds, learned to draw them, and began his *American Ornithology* (9 vols , 1808–14), the last two volumes were completed by his friend and biographer (1829), George Ord, after Wilson's death Wilson is known also for his poems and essays on nature

Wilson, Auguste Jane Evans, 1835–1909, American novelist, b Columbus, Ga She is remembered only for one sensational success, *St Elmo* (1866).

Wilson, Charles Thomson Rees, 1869–, British physicist He was Jacksonian professor of natural philosophy at Cambridge Univ (1925–34) Subjects of his research are atmospheric electricity, ions, and condensation nuclei He developed a method for studying, by means of the Wilson cloud chamber, the activity of ionized particles He shared with A C Compton the 1927 Nobel Prize in Physics

Wilson, Edmund, 1895–, American critic, b Red Bank, N J , grad Princeton, 1916 He was managing editor (1920–21) of *Vanity Fair* and later was on the staff of the *New Republic* (1926–31) and of the *New Yorker* (from 1944) An eclectic critic much interested in the theories of Marx and Freud, his major literary criticism is in *Axel's Castle* (1931), *The Triple Thinkers* (1938, enl ed , 1949), and *The Wound and the Bow* (1941) His social criticism is in *Travels in Two Democracies* (1936), *To the Finland Station* (1940), a history of the European revolutionary tradition, and *Europe without Baedeker* (1947) He has also written several short plays, poems, a novel (*I Thought of Daisy*, 1929), a miscellany (*Notebooks of the Night*, 1942), and short stories in *Memoirs of Hecate County* (1946) and has edited an anthology, *The Shock of Recognition* (1943)

Wilson, Edmund Beecher, 1856–1939, American zoologist, b Geneva, Ill , grad Yale (Ph B , 1878), Ph D Johns Hopkins, 1881 He taught (1885–91) biology at Bryn Mawr and from 1891 was at Columbia Univ (as professor of zoology from 1894 to 1928) He is known for his work in cytology, embryology, heredity, and experimental morphology His works include *General Biology* (with W T Sedgwick, 1887), *The Cell in Development and Heredity* (1896, 3d ed , 1925), and *The Physical Basis of Life* (1923)

Wilson, Ernest Henry, 1876–1930, Anglo-American horticulturist, b England, educated at the Royal College of Science, London He came to the United States in 1906 He was assistant director (1919–27) and keeper (from 1927) of the Arnold Arboretum, Harvard Univ Wilson traveled extensively in the Orient and introduced the regal lily and other Oriental plants into Western gardens His many writings include *The Cherries of Japan* (1916), *Plant Hunting* (1927), *China, Mother of Gardens* (1929), and *Aristocrats of the Trees* (1930).

Wilson, Francis, 1854–1935, American actor, b Philadelphia He started his musical-comedy career as Sir Joseph Porter in *Pinafore* From 1885 to 1889 he was star of the McCaull Opera Company, with which he achieved success in *Erminie*, at the Casino, New York Later Wilson organized a company of his own, presenting among other light operas *Cyrano de Bergerac* (1899) Under Charles Frohman he appeared in legitimate comedy, including his own play, *The Bachelor's Baby* (1909), and later turned to classical comedy He wrote biographies of Eugene Field (1898) and Joseph Jefferson (1906). See his autobiography (1924).

Wilson, Harold Albert, 1874–, American physicist, b. York, England, M.S. Univ. of Leeds, 1897, D Sc. Univ of London, 1900 He was professor of physics at Rice Institute (1912–24, 1925–47) and is known for his research in sound, heat, conduction, electrical properties of flames and incandescent solids, and electrical discharge through low-pressure gases He wrote *The Electrical Properties of Flames* (1912), *Experimental Physics* (1915), *Modern Physics* (1928; 3d ed., 1948), and *Mysteries of the Atom* (1934).

Wilson, Harry Leon, 1867–1939, American author, b Oregon, Ill He was from 1896 to 1902 editor of the humorous weekly *Puck* The best known of his amusing and slightly satirical novels of American life are *Bunker Bean* (1912), *Ruggles of Red Gap* (1915), and *Ma Pettengill* (1919) With Booth Tarkington he wrote the popular play *The Man from Home* (1908), and his novel *Merton of the Movies*, dramatized by Kaufman and Connelly in 1922, was a success on the stage and in moving pictures *Ruggles of Red Gap* was also popular in silent and in talking pictures

Wilson, Henry, 1812–75, U S Senator from Massachusetts (1855–73) and Vice President of the United States (1873–75), b Farmington, N H When he was 21, having completed his indenture to a farmer, he legally changed his name from Jeremiah Jones Colbath, and as Henry Wilson apprenticed himself to a cobbler at Natick, Mass Wilson became successful as a shoe manufacturer and as a politician, serving as a state legislator for most of the years 1841–52 Originally a Whig, he left that party in 1848 because of the slavery issue, bought and edited (1848–51) the Boston *Republican*, and made it a Free-Soil paper He was elected to the U S Senate as a Know-Nothing, but quit that party too, again over slavery, and was a leading radical Republican for the rest of his career During the Civil War he was chairman of the Senate committee on military affairs The "Natick cobbler," as he was called, was elected Vice President on the ticket headed by Ulysses S Grant in 1872, but died before finishing his term See biography by Elias Nason and Thomas Russell (1876)

Wilson, Sir Henry Hughes, 1864–1922, British field marshal, b Ireland He saw active service in Burma and South Africa before 1914 In the First World War he rose to prominence as a friend of Marshal Foch and other officers of the French high command, he was liaison officer between the British and French armies For a time (1915) he commanded an army corps in France, but his talents were not great in the field In 1917 he went on a military mission to Russia and returned to sit in the Allied Supreme War Council and become chief of the British imperial general staff After the war he was made field marshal He retired from the army in 1922 and was elected to Parliament from Northern Ireland Shortly afterward he was killed by Sinn Fein terrorists See biography by C E Callwell (1927)

Wilson, Henry Maitland Wilson, 1st **Baron,** 1881–, British field marshal His military career led him from the South African War through the Second World War Commander in Egypt in 1939, "Jumbo" Wilson became field commander under General Wavell in North Africa, led the ill-fated British expedition in Greece in 1941, and later the same year commanded operations in Syria He headed (1942–43) the Persia-Iraq command As chief of the Middle East command (1943) he led an unsuccessful expedition into the Dodecanese He served as supreme Allied commander in the Mediterranean in 1943–44 and was head of the British joint staff mission in Washington from 1945 to 1947 In 1946 he was created Baron Wilson of Libya and Stowlangtoft

Wilson, James, 1742–98, American jurist, signer of the Declaration of Independence, b near St Andrews, Scotland He studied at the universities of Glasgow and Edinburgh and, after coming to Pennsylvania in 1766, taught Latin at the College of Philadelphia He studied law there under John Dickinson and was later admitted to the bar in 1767 Becoming a successful lawyer within a few years, he also developed a political philosophy, expressed in his *Considerations on the Nature and Extent of the Legislative Authority of the British Parliament* (1774) He was a member of the Pennsylvania convention (1775) and in the same year was a delegate to the Continental Congress, where he strongly advocated independence Despite his ardent individualism, he vigorously opposed the inherently democratic principles of the Pennsylvania constitution of 1776 and lost (1777) his seat in Congress He became allied with the conservative faction and argued for it in the Congress of the Confederation (1782–83, 1785–87). In the meantime he was advocate general of the French government in the United States, wrote the argument for the Bank of North America, and was Pennsylvania's counsel in the dispute over the Wyoming Valley. Wilson is especially known for his part in the Federal Convention of 1787, where he displayed his keen understanding of political theory and constitutional law and worked to incorporate into the Constitution the principle that

sovereignty resides in the people He was one of the most influential men in drawing up the Constitution. He was active in drafting the Pennsylvania constitution of 1790 and served as Associate Justice of the U S Supreme Court (1789–98) He was the first professor of law (1790) at the College of Philadelphia (later the Univ of Pennsylvania). Wilson wrote a number of pamphlets, addresses, treatises, and lectures on law

Wilson, James, 1835–1920, American agriculturist and cabinet officer, b Ayrshire, Scotland He emigrated to the United States and settled (1851) in Connecticut, then moved (1855) to Tama co, Iowa, where he became a successful farmer A member of the Republican party, he was in the state legislature (1868–73) and in the U S Congress (1873–77, 1883–85) He also served (1877–83) on the Iowa Railway Commission Wilson was (1890–97) a director of the agricultural experiment station and professor of agriculture at Iowa Agricultural College As Secretary of Agriculture (1897–1913) under Presidents William McKinley, Theodore Roosevelt, and W H Taft, he greatly expanded the services of the department, experimental stations were set up over the country, and the aid of experts and scientists was enlisted to obtain information on agriculture

Wilson, James Grant, 1832–1914, American biographer and man of letters, b Edinburgh He was brought to the United States in 1833 After journalistic work in Chicago and service in the Union army in the Civil War, he settled in New York, as a writer and editor principally concerned with biography With John Fiske he edited *Appleton's Cyclopedia of American Biography* (6 vols, 1886–89, revised with supplementary volume, 1898–99) His immense output of other work included a biography of U S Grant and its revisions, compilations of military biographies, and editions of the poetry of Bryant and of Fitz-Greene Halleck

Wilson, John see NORTH, CHRISTOPHER

Wilson, Richard, 1714–82, English landscape painter, son of a Welsh clergyman He studied in London and early achieved some success as a portrait painter, but after a visit to Italy (1749–55) he devoted himself to landscape in the classical tradition of Claude Lorrain The exhibition of Wilson's *Niobe* in 1760 won him acclaim, and he was made a member and later librarian of the Royal Academy But his work did not become popular until after his death, and poverty and neglect embittered him Although Wilson did not depart from the classical tradition of the picturesque landscape with its Roman ruins and recumbent nymphs, his work shows considerable originality and breadth of treatment He exerted a strong influence on the subsequent English school of landscape painting *On the Wye* (National Gall, London) and *Italian Landscape* and *Lake Nemi* (both Metropolitan Mus) are well-known examples of his work

Wilson, William Bauchop, 1862–1934, American labor leader, U S Secretary of Labor (1913–21), b Blantyre, Scotland Coming as a child to the United States in 1870, he worked in Pennsylvania coal mines after 1871 and helped organize (1890) the United Mine Workers of America He was (1900–1908) secretary-treasurer of the labor union, and, as a Democrat, he served (1907–13) in the House of Representatives As chairman (1912–13) of the House labor committee, he helped draft the bill creating the Dept of Labor The first Secretary of Labor in U S history, William B Wilson organized the department and introduced machinery for mediation in labor disputes He played an important role in marshaling American labor in the First World War See R W Babson, *W B Wilson and the Department of Labor* (1919)

Wilson, William Lyne, 1843–1900, American legislator and university president, b Jefferson co, Va (now in W Va), grad Columbian College (now George Washington Univ), 1860 He was a private in the Confederate army in the Civil War, and after teaching (1865–71) Latin at Columbian College and practicing law (1871–82) in Charles Town, W Va, Wilson was (1882–83) president of the Univ of West Virginia He entered politics and served (1883–95) as a Democrat in the U S House of Representatives There he was (1893–95) chairman of the Committee on Ways and Means and exercised much influence in shaping policies He was active in the repeal of the Sherman Silver Purchase Act and gained wide notice through the Wilson-Gorman Tariff Act of 1894 Wilson introduced a tariff bill—backed by President Grover CLEVELAND—which substantially reduced rates on many raw materials and manufactured products and levied an income tax The bill passed the House unchanged, but largely through the efforts of Arthur P GORMAN it was considerably altered in the Senate, and Wilson's low-tariff principle was ignored The Wilson-Gorman Act was passed over Cleveland's veto and in 1895 the Supreme Court declared the income-tax provisions unconstitutional Wilson later served as Postmaster General (1895–97) and as president of Washington and Lee Univ. (1897–1900)

Wilson, Woodrow (Thomas Woodrow Wilson), 1856–1924, 27th President of the United States (1913–21), b. Staunton, Va., grad Princeton, 1879 He studied law at the Univ of Virginia and, admitted (1882) to the bar, practiced in Atlanta, Ga., for a year before going to Johns Hopkins to study political science and jurisprudence. After receiving (1886) his Ph D degree there, he taught history and political economy at Bryn Mawr (1885–88) and Wesleyan Univ (1888–90) He had already written significant books, e g, *Congressional Government* (1885), on political science, and after he became (1890) professor of jurisprudence and political economy at Princeton, he gained a reputation for his eloquent orations Popular with the student body, Wilson—a descendant of Presbyterian ministers on both sides of his family—was elected (1902) president of Princeton, becoming its first nonclerical head From the very start Wilson's strong democratic sentiments led him to introduce various reforms at Princeton These aroused great hostility, which reached a climax in his bitter struggle with the group headed by Dean Andrew F West Wilson lost out, but with prompting from George B M Harvey, a New York publisher with strong connections in the Democratic party, he ran for governor of New Jersey in 1910 soon after resigning his post at Princeton He won the election but quickly broke with the party leaders Despite much resistance from the regular Democrats, Wilson forced through the New Jersey legislature such reforms as an employer's liability act, the direct primary, a corrupt practices act, and the revitalization of the state public-utilities commission His gubernatorial record brought him to the forefront of national politics Though Champ CLARK was the leading contender for the presidential nomination at the Democratic convention of 1912, William Jennings BRYAN, prompted by Edward M HOUSE, swung the nomination over to Wilson The split in the Republican party, which divided into the regular Republicans supporting William H TAFT and the progressive (see PROGRESSIVE PARTY) Republicans backing Theodore ROOSEVELT, helped win the election for Wilson, who captured 435 electoral votes Wilson revived the custom, abandoned in 1801, of addressing Congress in person, and immediately called for a series of reforms, which he had called the "New Freedom" in his presidential campaign Congress responded, and the tariff was drastically revised (1913) downward (see UNDERWOOD, OSCAR WILDER) The FEDERAL RESERVE SYSTEM was instituted (1913), the La Follette Seamen's Act, regulating labor conditions aboard ship, became (1915) law, the Adamson Act, establishing an eight-hour day for railroad employees, was enacted (1916), and the Federal Farm Loan Act, providing for loans to cooperative farm associations, was passed (1916) Wilson continued the policy of curbing monopoly by creating (1914) the FEDERAL TRADE COMMISSION to investigate and expose unfair practices of corporations, pushed the passage (1914) of the CLAYTON ANTI-TRUST ACT, and instituted antitrust proceedings in 92 cases Further, the Seventeenth Amendment, providing for the direct popular election of U S Senators, the Eighteenth Amendment, which brought on PROHIBITION, and the Nineteenth Amendment, by which women received the vote, were all launched while Wilson was President In foreign affairs the Wilson administration was faced with mounting difficulties In Latin America, there was a series of problems that produced ill-feelings both at home and abroad, the heritage of the policies of earlier administrations In MEXICO, a revolution brought (Feb, 1913) Victoriano HUERTA to the presidency Wilson refused to recognize him and resorted to "watchful waiting" instead Unpleasant incidents followed in 1914 the arrest of U S sailors in Tampico and the landing of U S marines in Veracruz Mediation by Argentina, Brazil, and Chile (see A B C POWERS) failed to settle the aggravated situation, and shortly after HUERTA was driven from power, new troubles arose from the internal situation in Mexico The raid of Francisco ("Pancho") VILLA across the U S border resulted in the punitive expedition (1916) into Mexico led by John J PERSHING Border incidents continued, and relations between the two countries remained unfriendly Circumstances also combined to bring about the sending of U S marines to Haiti (1915), the Dominican Republic (1916), and Cuba (1917) Wilson also endeavored to settle the trouble with Colombia arising from the establishment of the republic of PANAMA In his Far Eastern policy—notably his refusal (1913) to support loans to China by American bankers—Wilson was openly against imperialism But the outbreak of the First WORLD WAR in Europe overshadowed all other problems Secretary of State William Jennings Bryan, who scrupulously favored neutrality, resigned (1915) and was succeeded by Robert LANSING, who tended to favor intervention on the side of the Allies Wilson during his first term nevertheless sought by all diplomatic means to maintain an impartial neutrality American public opinion, however, increasingly mounted against Germany, and the sinking (May 7, 1915) of the LUSITANIA by a German submarine aroused a storm of protest which persisted long after the incident After the sinking (March 24, 1916) of the American vessel *Sussex*, Wilson took a somewhat sharper tone toward Germany. Trouble over shipping also occurred with Great Britain in its effort to enforce the blockade of Germany In the 1916 election the Democratic campaign slogan, "He kept us out of war," helped return Wilson to the White House, Charles Evans HUGHES was defeated by a very close margin Wilson immediately attempted to mediate between the warring nations, but without success Relations with Germany were aggravated more and more, especially by the announcement (Jan 31, 1917) from Germany of a renewal of unrestricted submarine warfare Several more American vessels were sunk, and on April 2, 1917, Wilson asked Congress to declare war on Germany War was declared April 6 Wilson's ideal of the aim of the war was "the ultimate peace of the world" and "the liberation of its people" The war, he felt, was necessary to make the world "safe for democracy" Wilson's speeches, elaborating these war aims, did much to consolidate American opinion behind his policies The United States was organized for war with amazing rapidity, not only in military preparations but also on the home front The emergency measures of 1917–18 revolutionized American industry, the government management of railroads and the movement toward economic centralization left a lasting mark Government control of public information related to the war was instituted on a wide level Wilson's addresses, which had unusual nobility of style and fiery resolution, won world-wide admiration In his message to Congress on Jan 8, 1918, he outlined the FOURTEEN POINTS which he felt were necessary for the peace settlement He was generally looked upon in Europe as the future savior when the war drew to a close and preparations were being made for the peace conference Wilson himself headed the American delegation to the Paris Peace Conference, breaking all American precedents He was received in Europe with warm ovations and set about trying to create in the peace a new world society, which would be governed by the "self-determination of peoples," which would be free from secret diplomacy and wars, and which would have an association of nations to maintain international justice The conference was disillusioning to him He became involved in long and bitter wrangles with Georges CLEMENCEAU, Lloyd GEORGE, Vittorio ORLANDO, and the other representatives of European powers The resulting treaty (see VERSAILLES, TREATY OF) was far from the fulfillment of his dream, although he did secure the adoption of the Covenant establishing the LEAGUE OF NATIONS Yet he accepted the treaty as being the best obtainable After the treaty was signed, however, his popularity sank rapidly, and Wilson's accomplishments at Paris were received with mixed feelings in the United States In 1918 Republican majorities had been elected to both houses of Congress, and now the Senate quarreled over the ratification of the treaty and the proposed amendments The League of Nations was violently attacked by various Senators, and the debate in the Senate was bitter and violently political In the group that emerged as opponents of the League, Henry Cabot LODGE was outstanding Wilson sought popular support by making a wide speaking tour of the United States He was making his way east from the Pacific coast when fatigue and strain brought a sudden breakdown on Sept 26, 1919 He never entirely recovered, and for the remainder of his second term, Wilson, bitterly disillusioned, detached himself from the political scene Three years later he died His character and policies have been the subject of acrimonious debate, but even those who have doubted his wisdom have recognized him as one of the pivotal figures of American and world history His writings on history and jurisprudence include *Division and Reunion, 1829–1889* (1893), *George Washington* (1896), *A History of the American People* (5 vols, 1902), and *Constitutional Government in the United States* (1908) These books are distinguished by a wide knowledge of constitutional law and by a severe and polished literary style which also characterizes two books of his essays, *An Old Master and Other Political Essays* (1893) and *Mere Literature and Other Essays* (1893), Wilson's addresses, messages, and speeches, considered among the finest produced by an American, have been published and republished in various collections, see L S Turnbull, *Woodrow Wilson: a Selected Bibliography of His Published Writings, Addresses, and Public Papers* (1948) *The Woodrow Wilsons* (1937), by Eleanor Wilson McAdoo (his daughter) and Margaret Y Gaffey, is an intimate account of his family life See R S Baker, *Woodrow Wilson and the World Settlement* (3 vols, 1922) and *The Life and Letters of Woodrow Wilson* (8 vols, 1927–39), William Diamond, *The Economic Thought of Woodrow Wilson* (1943), Josephus Daniels, *The Wilson Era* (1944–46), T A Bailey, *Woodrow Wilson and the Lost Peace* (1944), *Woodrow Wilson and the Great Betrayal* (1945), and *Wilson and the Peacemakers* (1947) See also biographies by Josephus Daniels (1924), W A White (1925), G W. Johnson (1944), and A S Link (1945)

Wilson. 1 Unincorporated "company town" (pop. 1,326), Mississippi co., NE Ark., in a rich cotton region. 2 City (pop. 1,068), central Kansas, on the Smoky Hill River and near Ellsworth; founded 1871, inc 1883. It is in an agricultural and oil-producing region 3 Town (pop 19,234), co. seat of Wilson co , E N C., E of Raleigh, in the coastal-plains tobacco and cotton region, inc 1849 It is a commercial and industrial center, with textile and woodworking plants, and is one of the largest bright-leaf-tobacco markets in the world Atlantic Christian College (coeducational) is here 4 City (pop 1,700), S Okla , N of the Red River and W of Ardmore 5 Borough (pop 8,217), E Pa , near the Delaware at Easton, inc 1920

Wilson, Mount. 1 Peak, 5,700 ft. high, S Calif , in the San Gabriel Mts NE of Pasadena It is the site of Mt. Wilson Observatory (est 1904), operated jointly by the Carnegie Institution and the California Institute of Technology 2 Peak, 14,250 ft. high, SW Colo , in the San Miguel Mts of the Rockies, SW of Telluride

Wilson cloud chamber, device containing air or some other gas thoroughly cleansed of dust and saturated with water vapor, in which the paths of atoms or of subatomic particles can be made visible. The apparatus was originally devised by C. T. R. Wilson, with it he made early studies of alpha-ray tracks, and it has since been adapted to reveal many other significant phenomena in nuclear physics Such a chamber commonly consists of a cylindrical metal container or of a vertical glass cylinder covered with a glass plate and fitted at the lower end with a piston device When the piston is lowered, the sudden expansion of the enclosed saturated air causes the moisture to condense around any particle which is made to pass through the chamber As the particle moves through the gas, it forms a track or path of tiny water droplets If a camera is placed above the glass plate, such paths can be photographed By studying these paths and by observing collisions between particles within the chamber, much knowledge of the particles can be obtained

Wilson College: see CHAMBERSBURG, Pa

Wilson Creek, small stream, SW Mo , near Springfield, where a battle of the Civil War was fought, Aug 10, 1861 Sterling Price's Missouri militia and the Confederate forces were led by Ben McCulloch Nathaniel Lyon, the commanding Union general, divided his forces, sending Franz Sigel to turn the enemy right, he himself fell upon the left and front Sigel was routed, and after about five hours of hard fighting, during which both sides lost heavily, Lyon was killed at the head of his troops, who then retreated to Springfield

Wilson Dam: see TENNESSEE VALLEY AUTHORITY.

Wilson-Gorman Tariff Act: see WILSON, WILLIAM LYNE, and GORMAN, ARTHUR PUE

Wilson's thrush: see VEERY

Wilton, municipal borough (pop. 2,195), Wiltshire, England, NW of Salisbury It was an ancient capital of Wessex and the residence of Saxon kings, the scene in 871 of a battle between Alfred and the Danes, and the seat of a bishopric until 1050 It has annual sheep fairs. Wilton House, wherein Sir Philip Sidney wrote *Arcadia*, was partly designed by Inigo Jones Carpets (Wilton and others) have been made in Wilton for centuries

Wilton. 1 Town (pop 2,829), SW Conn , N of Norwalk, settled early in the 18th cent , inc 1801 2 Town (pop 1,146), E Iowa, N of Muscatine, inc. 1863 It is a rail and trade center in a farm area 3 Town (pop 3,228), W Maine, SW of Farmington, settled 1789 as Tyngtown, inc 1803 It has textile mills and food and lumber processing 4 Town (pop 1,855), S N H , on the Souhegan and W of Nashua; inc 1762 There are textile mills Charles Greeley Abbot was born here

Wiltshire (wĭlt'shĭr, -shûr) or **Wilts,** county (1,345 sq. mi , 1948 estimated pop 347,400), S England The county town is Salisbury More than half of Wiltshire is occupied by the great chalk Salisbury Plain and by the Marlborough Downs. Admunistratively organized as early as the 9th cent , the county is now one of the more sparsely inhabited of England, but its historical associations are among the richest At STONEHENGE, Avebury, and Silbury Hill are the largest and oldest monuments of the early British, dating back 4,000 years, and English history is closely associated with Salisbury, famous for its cathedral OLD SARUM, which flourished in pre-Roman times, was abandoned about the 13th cent Wilton, famous in the 19th cent. for its carpets, was once the capital of the powerful Saxon kingdom of Wessex, where many of King Alfred's battles against the Danes in the 9th cent. were fought His grandson, Athelstan, is buried at Malmesbury Abbey, and, according to legend, Queen Guinevere spent her last days in the nunnery at Amesbury Primarily a pastoral and agricultural county, Wiltshire affords large areas for sheep grazing, and the fertile valleys of the Lower Avon, the East Avon, and the Kennet rivers have extensive dairy farming Textiles, metal products, and pottery are manufactured Swindon, the leading industrial center, is known for its locomotive works. Among Wiltshire's famous sons or residents are Joseph Addison, John Dryden, John Gay, George Herbert, and Christopher Wren. See Arthur Mee, *Wiltshire* (1939).

Wimbledon, municipal borough (1931 pop. 59,524; 1947 estimated pop. 58,010), Surrey, England, SW of London, of which it is a residential suburb. It is the headquarters of tennis in England, and international matches are held; the first championship match was held here in 1877. Its cricket meets are also important, and there are golf courses (Royal Wimbledon Club) The town is supposed to have been the scene of the defeat of Aethelbert, king of Kent, by Ceawlin, king of Wessex, in 568. There are ancient earthworks called Caesar's Camp and British remains in the vicinity. Wimbledon Common is an extensive open space, and Wimbledon Park is noteworthy. George Eliot lived in the borough

Wimpffen, Emmanuel Félix de (ămänüĕl' fālĕks' dŭ vĕpfĕn', vĕfā'), 1811–84, French general. In the Franco-Prussian War he took command (1870) at SEDAN after Marshal MacMahon had been wounded, and he negotiated the French surrender after the disastrous end of the battle.

Wimpffen, Louis Félix de (lwĕ'), 1744–1814, French general He fought in the American Revolution, was one of the deputies of the nobles to the States-General of 1789, and after the outbreak of the French Revolutionary Wars defended (1792) Thionville for 55 days A moderate, he joined the Girondist insurrection of 1793 in Normandy. He returned to the army under the Consulate and fought in the Napoleonic Wars.

Winamac (wī'nŭmăk), town (pop. 1,835), co. seat of Pulaski co , NW Ind , on the Tippecanoe river and W of Rochester, settled 1837, inc. 1868

Winant, John Gilbert (wī'nunt), 1889-1947, American public official, ambassador to Great Britain (1941–46), b. New York city After studying at Princeton, he taught at St Paul's School in Concord, N H , until his election (1917) to the New Hampshire legislature. He served in the First World War, returning to state politics and serving (1925–26, 1931–34) as governor. He later was assistant director (1935–37) and director (1939) of the International Labor Office President Roosevelt in 1937 appointed him chairman of the Social Security Board, on which he served until 1939 His ambassadorship was notable for cordial Anglo-American relations, and he wrote *Letter from Grosvenor Square* (1947) He was (1946–47) U S representative on the United Nations Economic and Social Council In 1947 he committed suicide.

Winchell, Alexander (wĭn'chŭl), 1824–91, American geologist, b Dutchess co , N Y , grad Wesleyan Univ , 1847 He was state geologist of Michigan (1859–62), chancellor of Syracuse Univ (1873–74), and professor at the Univ of Michigan (1855–73, 1879–91). He is known for his discoveries of many new fossil genera and species and as a lecturer and writer on science. His works include *The Doctrine of Evolution* (1874), *World Life* (1883), and *Geological Studies* (1886).

Winchelsea (wĭn'chŭlsē), village, Sussex East, England It is 3 mi from the old town of Winchelsea, which like Rye was added under Richard I to the CINQUE PORTS as an "ancient town" and which was destroyed in 1287 by encroachment of the sea. Subsequent recession left the new town inland and revealed parts of the walls and gates of the old town. The Church of St Thomas à Becket dates from the 14th cent

Winchendon (wĭn'chŭndŭn), town (pop. 6,575), N Mass , in wooded country, near the N H line NW of Fitchburg, settled 1753, inc. 1764. Wooden and paper products are made here

Winchester (wĭn'chĭstûr, wĭn'chĕ"stûr), village (pop. 1,049), SE Ont , SE of Ottawa It has woolen and lumber mills.

Winchester (wĭn'chĭstûr), municipal borough (pop. 22,970) and county town, Hampshire, England, on the Itchen and SW of London. It was the Caer Went of the Britons, the Venta Belgarum of the Romans, and the Wintecesaster of the Saxons The city was the capital of the kingdom of WESSEX, which became the core of England before the Norman Conquest Winchester has memories of Egbert and Alfred, Edward the Elder and Harold It was a center of art and learning and, though London gradually gained political ascendancy after the Conquest, the castle at Winchester sheltered occasional meetings of Parliament, and the town continued as a generator of culture Through a mistake in etymology, Malory identified Winchester with CAMELOT It has held a position of great ecclesiastical influence, reflected in its magnificent cathedral, the largest Gothic church in Europe Founded (1079) by Bishop Walkelin, the cathedral represents many architectural periods. Here are buried William of Wykeham, Samuel Wilberforce, Isaak Walton, and Jane Austen The remains of Wolvesey Castle, where Queen Mary lived in 1554, are near the cathedral. The ruins of Hyde Abbey are in another part of the city. **Winchester College,** founded by William of Wykeham and chartered by him in 1382, had its opening ceremony in 1394. It is one of the great English public schools.

Winchester (wĭn'chĕ"stûr, wĭn'chĭstûr). 1 Town (pop. 8,482), NW Conn , in the Litchfield Hills; settled c.1750, inc. 1771. It includes WINSTED. 2 City (pop. 1,651), co. seat of Scott co., W central Ill., WSW of Springfield, in a farm area; platted 1830, inc. 1843. Here Stephen A. Douglas taught school, and Lincoln made his first speech on the Kansas-Nebraska issue. 3 City (pop. 5,303), co seat of Randolph co , E Ind., E of Muncie; settled 1819. It is a shipping center for grain and livestock and manufactures glass products. Northwest of the city are ancient Indian earthworks 4 City (pop. 8,594), co. seat of Clark co., N central Ky , E of Lexington, inc. 1793. It is a tobacco and livestock center in the bluegrass region. In the old courthouse Henry Clay made his last Kentucky speech The city is the site of Kentucky Wesleyan College and of the mansion and grave of Gov James A. Clark 5 Town (pop. 15,081), E Mass , N of Boston, settled 1640, inc. 1850. Leather manufacture is the chief industry. 6 Town (pop 2,275), extreme SW N H , on the Ashuelot, settled 1732, inc. 1753 It was deserted (1747–53) because of Indian raids There is an airport 7 Town (pop 2,760), co seat of Franklin co., S Tenn., WNW of Chattanooga; founded c.1814 Near by is Hundred Oaks Monastery Dairy farms and clover growing are important in the area 8 City (pop 12,095), N Va , in the Shenandoah Valley WNW of Washington, D.C., settled 1744 near an Indian village in Lord Fairfax's domain, inc as a town 1779, as a city 1874 It is 20 mi. from the northern entrance to Skyline Drive Winchester is the trade, processing, and shipping center for a farm area noted for apples; hosiery and rubber products are made George Washington began his career as a surveyor here Gen Daniel Morgan lived here and is buried in Mt Hebron Cemetery During the Civil War the city suffered severely, changing hands many times The courthouse of Frederick co is here Places of interest include the old First Presbyterian Church (1790, now an armory) and Shenandoah Valley Military Academy (1764). Winchester is the birthplace of Richard E. Byrd and of Willa Cather. An annual apple-blossom festival is held

Winchester College: see WINCHESTER, England

Winchilsea, Anne Finch, countess of (wĭn'chĭlsē), 1661–1720, English poet, daughter of Sir William Kingsmill In 1684 she married Heneage Finch, who became (1712) 4th earl of Winchilsea Her friendships extended to the foremost literary figures of the day, such as Pope and Nicholas Rowe Her best-known poems, "The Spleen" and "The Prospect of Death," written in imitation of Cowley, appeared in Charles Gildon's miscellany in 1701, *Miscellany Poems, Written by a Lady* followed in 1713 Wordsworth later pointed out that her use of images of external nature, notably in her poem "A Nocturnal Reverie," was unique in her own day See her complete poems (with introduction by Myra Reynolds, 1903) and selection ed by J M Murry (1928).

Winckelmann, Johann Joachim (yō'hän yōä'khĭm vĭng'kŭlmän), 1717–68, German classical archaeologist and historian of ancient art, in which field he was a noted authority A convert to Roman Catholicism in 1754, he went to Italy the following year. There he spent the rest of his life in study in the Vatican Library and in research in S Italy His chief book was *Geschichte der Kunst des Alterthums* [history of the art of antiquity] (1764) He greatly promoted the classic revival of the late 18th and early 19th cent

Winckler, Hugo (hōō'gō vĭng'klûr), 1863–1913, German Orientalist A professor at the Univ of Berlin, he was notable for his archaeological work He helped to excavate the Phoenician city of Sidon, and later it was Winckler who in excavations at Boghazkeui in 1906–7 discovered the cuneiform tablets in Hittite (or Kanesian), which added much to the knowledge of Hittite civilization.

Wind (wĭnd), river rising in W Wyoming in the Wind River Range and flowing southeast c 110 mi to join the Popo Agie at RIVERTON and form the Bighorn river. The Wind River Diversion Dam impounds waters for the Riverton project

wind, flow of air parallel to the earth's surface. The direction of wind is indicated by a wind vane (also called weather vane), in weather bureau stations the vane is usually connected to an electrical recording device. A wind is named according to the point of the compass from which it blows, i e , the direction toward which the arrow of the wind vane points. Wind velocity is commonly measured by means of a Robinson cup anemometer, an instrument with three or four small hollow metal hemispheres set so that they catch the wind and revolve about a vertical rod An electrical device records the revolutions of the cups and thus the velocity of the wind A scale of wind velocity was devised (c 1805) by Admiral Sir Francis Beaufort of the British navy. An adaptation of the Beaufort scale is used by the U.S. Weather Bureau, it employs numbers from 0 to 12, representing calm, light air, breeze (slight, gentle, moderate, fresh, and strong), gale (moderate, fresh, strong, and whole), storm, and hurricane. Zero (calm) is a wind velocity of less than 1 mi. per hour and 12 (hurricane) represents a velocity above 75 mi. per hour. Over some

areas of the earth, winds blow predominantly from one direction throughout the year; over other areas, the prevailing direction changes with the seasons; over still others, winds are so variable from day to day that no prevailing direction is evident These predominating wind directions, more pronounced in some regions than in others, are indicative of the general circulation of the atmosphere. This general circulation is directly related to the generalized distribution of atmospheric pressure over the earth's surface. Around the equator there is a belt of relatively low pressure known as the DOLDRUMS, where the heated air is expanding and rising, at about lat 30° N and S there are belts of high pressure known as the HORSE LATITUDES, regions of descending air, further poleward, near lat 60° N and S, are belts of low pressure, where the POLAR FRONT is located and where cyclonic activity is at a maximum; and lastly, there are the polar caps of high pressure The prevailing wind systems of the earth blow from the several belts of high pressure toward adjacent low pressure belts Because of the earth's rotation, the winds do not blow directly northward or southward to the lower pressure, but are deflected to the right in the Northern Hemisphere and to the left in the Southern Hemisphere, in accordance with Ferrel's law The wind systems obtaining are the TRADE WINDS, the prevailing westerlies, moving outward from the poleward sides of the horse-latitude belts toward the 60° latitude belts of low pressure (from the southwest in the Northern Hemisphere, from the northwest in the Southern Hemisphere), and the polar easterlies, blowing outward from the polar caps of high pressure and toward the 60° latitude belts of low pressure This zonal pattern of winds is displaced northward and southward seasonally, because of the tilting of the earth on its axis and the consequent migration of the belts of temperature and pressure In addition, it is considerably modified by the distribution of land and water, especially in the temperate regions, where temperature differences between land and water are greatest In winter, areas of high pressure tend to build up over cold continental land masses, while vigorous low-pressure development takes place over the adjacent, relatively warm oceans Exactly the opposite conditions obtain during the summer, although to a lesser degree These contrasting pressures over land and water areas are the cause of MONSOON winds, which reverse their direction with the seasons Superimposed upon the general circulation of winds are many lesser disturbances, such as the extratropical CYCLONE (the common storm of the temperate latitudes), the tropical cyclone or HURICANE, and the TORNADO, each of these storms moves generally along a path with the direction of the prevailing winds, but within itself maintains a circulatory wind pattern of its own Diurnal heating and cooling of land near a lake or ocean of fairly constant temperature causes air to blow toward the relatively warmer land in the daytime (sea breeze) and toward the relatively warmer water at night (land breeze) These breezes are shallow and seldom penetrate far inland or attain high velocity Similar daily changes occur on mountain slopes, the air in the valley being heated and expanded so that it moves up the slope in the daytime, the cold air settling into the valley at night Air tends to move lengthwise of a long valley, and the winds in such valleys may be deflected so that they blow at an angle to their normal course Friction with the earth's surface, eddies caused by surface irregularities, and inequalities of heating and radiation with consequent convection currents tend to reduce wind velocity near the surface of the earth and cause winds to blow in gusts In animistic religions the winds are connected with supernatural powers. In classical mythology Aeolus is the controller of the winds. The various winds, Boreas, Zephyr, Notus, and Argestes, were the children of Eos, goddess of the dawn, and her husband Astraeus, the Titan See also CHINOOK, CLIMATE, ROARING FORTIES, SANDSTORM, SIROCCO, WEATHER See William Ferrel, *A Popular Treatise on the Winds* (1898, 2d ed, 1904)

Windau, Latvia, see VENTSPILS

Windaus, Adolf (ä'dôlf vĭn'dous), 1876–, German chemist He was professor of chemistry and director of the chemistry laboratories at the Univ of Göttingen (1915–44). For his research on sterols (higher solid alcohols), especially in relation to vitamins, he received the 1928 Nobel Prize in Chemistry He later discovered and prepared synthetically vitamin D_3 (the chief antirachitic component of vitamin D)

Windber (wĭnd'bûr), industrial borough (pop 9,057), SW Pa, in the Alleghenies SE of Johnstown, laid out 1897, inc 1900 Coal, brick, lumber, and beer are produced here

Wind Cave National Park: see NATIONAL PARKS AND MONUMENTS (table).

Windelband, Wilhelm (vĭl'hĕlm vĭn'dŭlbänt), 1848–1915, German philosopher and historian of philosophy. A professor of philosophy at Freiburg, Strasbourg, and Heidelberg successively, he wrote a *History of Philosophy* (1892), which was translated into English in 1901.

Winder (wĭn'dûr), city (pop. 3,974), co. seat of Barrow co., N Ga., ENE Atlanta; settled as Jug Tavern, inc. 1893 as Winder It is a farm trade and industrial center, with textile mills

Windermere (wĭn'dûrmēr), largest lake in England Lying among wooded hills near Scafell and other mountains, between Lancashire and Westmorland, it is 10½ mi long, 210 ft. deep, and about a mile wide. It is fed by the Rothay, Brathay, and other small streams and drained by the Leven to Morecambe Bay. Its shores are indented to form little bays, and it has several islands It is a resort of tourists and fishermen, and steamers ply regularly along the lake Windermere and Ambleside are towns near the lake

windflower: see ANEMONE and PASQUEFLOWER

Wind Gap, industrial borough (pop. 1,377), E Pa, near the Delaware NW of Easton; inc 1893 Its industries include slate quarries and silk mills

Windham, William (wĭn'dŭm), 1750–1810, English statesman Wealthy and accomplished, he was a friend of Samuel Johnson, Edmund Burke, and other great men and was a leading Whig He was made conservative by the excesses of the French Revolution With Burke he became a follower of the younger William Pitt and served (1792–1801) as secretary at war, resigning with Pitt when the king prevented Catholic Emancipation He was secretary of state for war and colonies in the "ministry of all the talents" (1806–7) under Lord Grenville His influence was great, but his career inconspicuous See his diary for the years 1784–1810 (ed by Mrs H Baring, 1866), *The Windham Papers* (2 vols, 1913)

Windham (wĭn'dum) **1** Town (pop 13,824), E Conn, ESE of Hartford, inc 1692 It includes WILLIMANTIC At Windham Center (settled c.1688) are several old buildings **2** Town (pop 2,381), SW Maine, NW of Portland, settled 1737, inc 1762 It is the seat of a state reformatory. John A Andrew was born in Windham See F H Dole, *Sketches of the History of Windham, Maine, 1734–1935* (1935)

Windhoek (vĭnt'hōōk), town (pop 14,930), capital of South-West Africa It was settled (1890) by the Germans There is a dairy industry, and near by are hot springs

wind instrument, in music, any instrument whose tone is produced by a vibrating column of air In the ORGAN the column of air is set into vibration by mechanical means Others are blown by the player and are divided into two groups—the wood winds and the brass winds or brasses The wood winds include the FLUTE family, played without any reed, the CLARINET family, having single-reed mouthpieces, and the OBOE family, having double-reed mouthpieces (see also REED INSTRUMENT) The brass winds include the BUGLE, CORNET, OPHICLEIDE, TROMBONE, TRUMPET, and TUBA (all of which have a cup-shaped mouthpiece) and the FRENCH HORN (which has a funnel-shaped mouthpiece) In the brasses the lips of the player perform the function of reeds The BAGPIPE, SARRUSOPHONE, SAXHORN, and SAXOPHONE are hybrid wind instruments The wind passage of a wind instrument is called the bore and may be conical or cylindrical, its flared edge is called the bell See Adam Carse, *Musical Wind Instruments* (1939)

Windischgrätz or **Windisch-Grätz, Alfred, Fürst zu** (äl'frät fürst' tsōō vĭn'dĭshgrĕts'), 1787–1862, Austrian field marshal He was military governor of Bohemia when, in March, 1848, revolution broke out in the Hapsburg empire Given command in Vienna, he crushed the insurrection there, but because of the pressure of public opinion he was sent back to Bohemia Meanwhile Prague had fallen to the revolutionists, and Windischgrätz's wife and eldest son had been killed in the insurrection Windischgratz recaptured (June, 1848) Prague after bombarding it and set up a military dictatorship over Bohemia Vienna, where the revolutionists had again taken over, was also bombarded into submission (Oct, 1848) by Windischgrätz Together with Felix zu SCHWARZENBERG, Windischgrätz engineered the abdication (Dec 2, 1848) of Emperor Ferdinand in favor of Francis Joseph He was removed from command in 1849 when his campaign against the Hungarian revolutionists was checked at Godollo He later held various government posts

windmill, apparatus which harnesses wind power for a variety of uses, e g, pumping water, grinding corn, driving small sawmills, and driving dynamo machines Probably windmills were not known in Europe before the 12th cent, but after that time they were a familiar landmark in Holland, England, France, and Germany The typical Dutch windmill—also called the tower type in contrast to the German or post mill—has a huge tower of stone, brick, or wood, at the top is a revolving apparatus to which four to six arms are attached The arms, 20 to 40 ft. long, bear sails which are constructed of light wood or of canvas fastened to a frame. A small fan serves as a rudder to keep the wheel facing the wind The distinctive feature of the German mill is that the whole structure revolves on a central post Most American windmills have high towers of light steel girders, at the top is a wheel with many sheet-metal concave and "warped" vanes (sails), about 4 ft long The wheel is kept automatically facing the wind by a broad tail which is geared to the pumping shaft As a source of power the windmill is of little use where the air is generally calm. For this reason a supplementary source of power is often necessary Modern windmills are sometimes used on farms to generate electricity

Windom, William (wĭn'dŭm), 1827–91, American statesman, Secretary of the Treasury (1881, 1889–91), b. Waterford, Ohio. He studied law at Mt Vernon (Ohio) Academy and was admitted (1850) to the bar He was (1852–55) prosecuting attorney of Knox co, Ohio, and in 1855 he moved to Winona, Minn. He was a Republican member of the House of Representatives (1859–69) and of the Senate (1870–81, 1881–83) Windom, a strong advocate of the gold standard, resigned his seat to become Secretary of the Treasury in James Garfield's cabinet, and after the President's death, he was elected to fill his own unexpired term in the Senate From 1889 until he died, Windom was Secretary of the Treasury under President Benjamin Harrison.

Windom (wĭn'dŭm), city (pop 2,807), co. seat of Cottonwood co, SW Minn, on the Des Moines and WSW of Mankato, platted 1870, inc as a village 1875, as a city 1920 It is a farm trade center

window, in architecture, the casement or sash, fitted with glass, which closes an opening in the wall of a structure for admitting light and air It may have a square, round, or pointed head, may be single, double, or grouped, and, in relation to the wall, may be flush, recessed, or projected A projected window is called a bay window if polygonal, a bow window if semicircular, an ORIEL if it has corbeled brick or stone supports A mullioned window is divided by slender bars into panes, when the bars radiate from the center of a circular one it is called a wheel and takes the name of ROSE WINDOW when adorned with stained glass or figure design The long, narrow window of the English Perpendicular Gothic church is called a lancet, a lunette fills a somewhat crescent-shaped space under a vaulted intersection high upon a wall, and a fanlight is either a semicircular transom, usually over an entrance, or a small attic window (or often a pair flanking the chimney), both characteristic of the American colonial style A French window reaches the floor and has double casements opening as doors, originated in France in the late Renaissance, it was adopted on the Continent and in the Southern states in America The double-hung sashes (sliding up and down in the frame), first used in Renaissance England, attained wide popularity In Spain windows are frequently most ornate, with stone framework, an elaborate head, and a decorative iron grille In Indian and Byzantine windows a pierced slab of marble or alabaster often substitutes for glass Moslems used also cement frames in which colored glass was set in brilliant arabesques Carved and turned wood grilles are found in Syria and Egypt In China and Japan rice paper, protected by a sliding wooden shutter, often takes the place of glass Shell, also used in China, was employed by the Romans, as were thin panes of marble, mica, and horn In modern architecture windows have not only greatly increased in dwellings, but have reached a point where they often cover the exterior walls of factories and commercial buildings Steel casements and frames permit making windows much larger

windpipe or **trachea** (trā'kēù), membranous and cartilaginous tube about 4½ in long, the main air passage of the respiratory tract of vertebrates Its walls are supported by fibrous connective tissue and U-shaped rings of cartilage which are embedded in the connective tissue The windpipe lies in front of the esophagus Extending from the lower part of the larynx, it divides into a right and a left bronchus The mucous membrane lining helps to keep the air passage free from impurities Important nerves and blood vessels lie close to the windpipe In humans the windpipe is subject to infection as a result of colds The air tubes of insects and some other arthropod animals are also called trachea

Wind River Range (wĭnd), part of the Rocky Mts, W Wyo, running southeastward c 120 mi and constituting part of the Continental Divide Gannett Peak (13,785 ft) is the highest point in Wyoming, others in the range are Fremont Peak (13,730 ft), Mt Helen (13,600 ft), Wind River Peak (c 13,500 ft), and Mt Hooker (12,900 ft) A number of historic passes cross these mountains—South Pass at the southern end of the range, Washakie Pass, Indian Pass (alt 12,130 ft) near Fremont Peak, Green River Pass (alt 12,222 ft), Union Pass (alt 9,210 ft), and Togwotee Pass (alt 9,658 ft) at the northern end of the range

Windsor (wĭn'zur), family name of the royal house of Great Britain The name WETTIN, family name of Albert of Saxe-Coburg-Gotha, consort of Queen Victoria, was changed to the present name by George V in 1917 and adopted by all members of the family

Windsor, Edward, duke of, see EDWARD VIII, king of England

Windsor, Wallis Warfield, duchess of, 1894–, American-born English duchess, christened Bessie Wallis Warfield In 1914 she made her social debut in Baltimore, and in 1916 she married Earl Winfield Spencer, Jr , a naval lieutenant, from whom she was divorced in 1927 The next year she married Ernest Aldrich Simpson, an American-born London businessman She belonged to a small coterie to which the prince of Wales became attached The friendship between Mrs Simpson and the heir to the throne continued after the prince of Wales became EDWARD VIII In Oct , 1936, Mrs Simpson obtained a divorce decree *nisi* Rumors of a projected marriage of Edward and Mrs Simpson preceded the crisis of Dec , 1936, which resulted in the abdication of Edward On April 27, 1937, the Simpson divorce became final, and Mrs Simpson legally changed her name to Wallis Warfield On June 3 she married Edward, now duke of Windsor By special letters patent it was provided that the duchess of Windsor should not share her husband's royal rank

Windsor (wĭn'zur) **1** Town (pop 3,436), N N.S , NW of Halifax and on the Avon, at its mouth on an arm of Minas Basin of the Bay of Fundy It is a port, shipping gypsum, anhydrite, and limestone from adjacent quarries, it manufactures clothing, furniture, and fertilizers The town was founded (1703) by the French, who built dikes, and was called Piziquid until 1764, when the name was changed to Windsor Fort Piziquid, later known as Fort Edward, fell (1750) to the British and was important in the expulsion (1755) of the Acadians King's College, the first English university in Canada, was founded here in 1789 It was removed (1923) to Halifax, as part of Dalhousie Univ A monument commemorates the first agricultural fair in Canada, held here in 1765 Haliburton Memorial Museum, opened in 1940, is the former home of Thomas Chandler Haliburton **2** City (pop 105,311), S Ont , on the Detroit river opposite Detroit, Mich , with which it is connected by bridge, tunnel, and ferries It is an important industrial center, with automobile plants, steel mills, distilleries, and chemical industries It is the seat of Assumption College, affiliated with the Univ of Western Ontario In 1935 the suburbs East Windsor, Sandwich, and Walkerville were merged with Windsor **3** Town (pop 3,368), SE Que , on the St Francis and NNW of Sherbrooke, inc 1899 It has pulp, paper, and lumber mills and dairying Until 1899 it was called Windsor Mills

Windsor or New Windsor, municipal borough (pop 20,287), Berkshire, England, on the Thames In Elizabethan times about 70 inns enlivened the town, and at least one was mentioned in Shakspere Nell Gwyn and Jane Seymour lived in Windsor, and their residences are still points of interest Sir Christopher Wren built the town hall, and Grinling Gibbons did much of the wood carving in the Church of St John the Baptist The real importance of the town has always been connected with **Windsor Castle,** the chief residence of English rulers since William the Conqueror The castle was improved and rebuilt by successive sovereigns Edward III erected the Round Tower, and Edward IV began the construction of St George's Chapel, one of the most splendid churches of England, where the Knights of the Garter are installed with medieval ceremony In its vaults are buried several of England's kings Some of the vaults are now used as bombproof shelters and storage for art treasures, national archives, and museum collections The castle proper lies in the Home Park, and beyond it, separated by the Long Walk, tree-lined, is the Great Park In Frogmore, the royal mausoleum, are buried Queen Victoria and the prince consort On the castle grounds is a large lake, Virginia Water See W H St John Hope, *Windsor Castle* (1913)

Windsor. **1** Town (pop 1,811), N Colo , N of Denver, inc 1890 It has a beet-sugar factory **2** Town (pop 10,068), N Conn , where the Farmington joins the Connecticut Windsor was settled in 1633 under William Holmes, sent by the Plymouth Colony, this was the first English settlement in Connecticut A state experiment station (mainly for tobacco) and old buildings are in the town Loomis School for boys is in Windsor **3** City (pop. 1,005), central Ill , W of Mattoon, in a farm region, inc 1865 **4** City (pop 2,373), W Mo , SE of Kansas City, in a farm and coal region, settled 1855, inc 1873 Shoes are made here **5** Town (pop 1,747), co. seat of Bertie Co , NE N C , between Albemarle Sound and the Roanoke river, in a tobacco, lumber, peanut, cotton, and corn area, settled 1721, inc 1776 **6** Borough (pop 1,108), York co , SE Pa , near York, inc 1905 **7** Town (pop 4,155), SE Vt , on the Connecticut, chartered by Wentworth (N H) 1761 and by New York 1772, settled 1764 The convention that adopted a constitution and organized Vermont as an independent state (under that name) was held here in July, 1777, and in 1778 Vermont's first legislature met in the town The Old Constitution House was restored as an inn Asher Benjamin lived here and designed several houses Machinery and foundry and rubber products are made here The state prison is in the town See H S Wardner, *The Birthplace of Vermont* (1927)

Windsor Castle: see WINDSOR, Berkshire, England.

Windsor Locks, town (pop 4,347), N Conn , on the Connecticut above Windsor, inc. 1854. The old town (settled 1663) developed industrially after a canal, with locks, was built (1829) around the rapids here Paper tissues are among its products.

Windthorst, Ludwig (lōōt'vĭkh vĭnt'hôrst), 1812–91, German statesman As leader of the Catholic Center party, he became the foremost opponent of Bismarck in the KULTURKAMPF Remarkable for his wit and parliamentary skill, he ultimately induced Bismarck to seek a reconciliation with the Church

wind tunnel, apparatus for studying the effect of an airstream on certain objects The objects to be tested are held by a balancing device in the wind tunnel, and an observer can determine the path of air about them, the aerodynamic forces exerted upon them, and their reactions to those forces The wind tunnel includes power and wind-propelling elements, a test chamber, and an observation booth The object to be tested is held by the balance in a specified position in the test chamber while the wind forces and reactions are observed through ports and on recording gauges in the observation booth Wind tunnels are indispensable to the designing and testing of modern aircraft

Windward Channel, ocean passage, c 55 mi wide, between Cuba and Haiti

Windward Islands, southern group of the Lesser Antilles in the West Indies, curving generally S from the Leeward Islands toward NE Venezuela Excluding Barbados, Trinidad, and Tobago, which are in the region but are not part of the group, the Windward Islands consist of French MARTINIQUE and the **British Windward Islands** colony (821 sq mi , pop 251,285 The British islands comprise the colonies of DOMINICA, SAINT LUCIA, SAINT VINCENT, and GRENADA The Grenadines, an archipelago of tiny islands strung out between St Vincent and Grenada, are divided administratively between them Of volcanic origin, the islands are generally rugged, mountainous, and well forested, and they have many streams and lakes With an equable climate, ample rainfall, and rich soil, they produce a variety of agricultural crops (and by-products) for export—cacao, sugar, sea-island cotton, arrowroot, rum, spices, limes and lime products, logwood, and hides The deep and sheltered harbors encourage considerable interisland commerce Largely Negro in population, with some admixture of Carib, Portuguese, and East Indian, the islands are ruled by a small percentage of white families, chiefly British The culture varies from island to island, but the French influence is generally strong and many inhabitants speak French patois For some time after their discovery by Columbus, the Windward Islands were largely ignored and left to their aboriginal inhabitants, the Caribs But in the early 17th cent colonization was undertaken by the English and French, settlements and sovereignty overlapped The long struggle for dominance in the islands was a part of the world-wide Anglo-French conflict Two important naval battles were fought in the region—in 1782 Admiral Rodney defeated the French Admiral de Grasse off St Lucia, and in 1797 the Spanish allies of the French were defeated by the British off St Vincent (in this battle Nelson distinguished himself) The individual islands were taken and retaken by the opposing forces In 1815 the Congress of Vienna confirmed the present ownership

wine, alcoholic beverage made by the FERMENTATION of the juice of the grape Wines are distinguished by color, flavor, bouquet or aroma, and alcoholic content and are classified as natural or fortified, sweet or dry, still or sparkling, the differences depending on the variety of grape, climate, location and soil of vineyards, treatment of the grapes before and at the time of vintage, methods of manufacture, and after-handling For red wines the entire crushed grape is utilized, for white wines, the juice only In a natural wine all the alcohol present has been produced by fermentation In a fortified, or brandied, wine, further alcohol has been added or induced Light wines, e g , claret, Burgundy, sauterne, and hock, containing from 7 to 15 percent alcohol are natural wines Typical fortified wines such as sherry, port, Madeira, and Malaga vary in alcoholic strength from 16 to 35 percent In dry wines all or most of the sugars have been fermented away Natural effervescent or sparkling wines, bottled while still fermenting, retain a quantity of CARBON DIOXIDE CHAMPAGNE is the standard sparkling wine, but many light wines, Burgundy, Moselle, Asti, and others, are frequently rendered effervescent Carbonated wines are artificially charged In natural-wine making the grapes are gathered when fully ripe (sometimes, as for sauterne, when overripe) Mechanical extraction of the must or juice is displacing treading For red wines the must is fermented with the skins and pips, from which the newly formed alcohol extracts coloring matter and tannin Fermentation starts when wine yeasts (*Saccharomyces ellipsoideus*), existing on the skins of ripe grapes, come in contact with the must It may take from a few days to several weeks, according to the temperature and the amount of yeast present or introduced When the new wine has become still and fairly clear, it is run off into large casks, where it undergoes a complicated series of chemical processes including oxidation, precipitation of proteids, and formation, of esters which create a characteristic bouquet The wine is periodically fined (clarified), then racked into smaller casks. After some months, or for certain wines several years, the wine is ripe for bottling The very rare, superfine natural wines made in good vintage years from perfect grapes of the better varieties and possessing the unaccountable quality which vintners call "breed" are produced in commercial quantities in limited areas of the Bordeaux and Burgundy regions in France, of the Rhine valley in Germany, and around Tokaj, Hungary (see TOKAY) The fine SHERRY of Spain and PORT of Portugal are superior fortified wines Champagne is the only superfine sparkling wine So ancient that its origin is unknown, wine is mentioned in early Egyptian inscriptions and in the literature of many lands. The term wine is also applied to alcoholic beverages made from plants other than the grape, e g , elderberry wine, dandelion wine

French Wine France is noted as the greatest wine-producing area in the world, both in quantity and quality, and has developed superfine natural still wines and the finest sparkling wine—champagne The department of Bordeaux furnishes red wine known as claret and white wine, both dry except for sauterne The best-known Bordeaux wines are Médoc (red), classified and known by the vineyard names, as Château Lafite, Château Margaux, Château Latour, graves (red or white), sauterne (white), sweet, made from overripe grapes and including the noted Château Yquem, and St Emilion-Pomerol Burgundy wines, red and white, have more body than the Bordeaux Connoisseurs prize the Burgundies of the Côte d'Or, especially the white Montrachet, and red Clos Vougeot and Romanée The Chablis area produces fine, white Burgundy Good wines are made in the Loire valley (Vouvray), the Rhone valley (Hermitage), Alsace, and the Jura mts A great quantity of ordinary wine is produced in S France, much of it made into vermouth, distilled into brandy, or used for blending

German wine Fine German wines are generally light, dry, white wines made from the Riesling grape and characterized by a fresh, flowery bouquet Hock, corruption of Hochheimer, is an English term applied to all Rhine wines The best white hocks are from the Rheingau They include Johannisberger, Rüdesheimer, and Hochheimer Rheinhessen wines are full-bodied but shorter-lived, Niersteiner and Liebfraumilch are the best known The third Rhine district, the Palatinate, produces sweeter, less distinguished wines Rhine wines were formerly matured for many years in huge casks like the classic Heidelberg Tun, but are now aged in small casks for not more than three years The most northern viticultural area in the world, situated along the Moselle river and its tributaries the Saar and the Ruwer, furnishes extremely light, delicate wines Moselle wines are drawn off into green bottles, Rhine wines into brown Other good wines are made in Baden and in Bavaria, noted for Stein wine

Italian wine Italy is the second wine-producing country in the world, but few of its wines are of export quality Italian wines are frequently named for the grape rather than for the region of origin, hence a wine excellent in one locality may be inferior in another The best known is Chianti, red or white, and properly a Tuscan wine From Campania come the esteemed Lachryma Christi, Capri wines, and Falerno, descendant of Horace's Falernian Sicily makes Marsala, a sweet, amber-colored wine, usually fortified, and traditionally a favorite with the enlisted men of the British navy

American wine Excellent wines are made in the United States, although some American vintners have been satisfied with quantity production and with imitations of foreign wines Most American wines are blends The chief wine-producing area, California, makes European-type wines from grapes of the Old World species, *Vitis vinifera* Eastern wines, most of them from New York state —especially the Finger Lakes region—are made from native grapes such as Concords, Catawbas, and the southern scuppernong See H Warner Allen, *The Wines of France* (1924), Allan Taylor, *What Everybody Wants to Know about Wine* (1934), Frank Schoonmaker and Tom Marvel, *American Wines,* (1941), André Simon, *A Wine Primer* (1946), W V Cruess, *Principles and Practice of Wine Making* (2d ed , 1946)

Winebrenner, John (wĭn'brĕ"nûr), 1797–1860, American minister, founder of the CHURCHES OF GOD IN NORTH AMERICA, b Maryland In 1820 he was ordained pastor of the German Reformed Church at Harrisburg, Pa. His evangelistic methods aroused antagonism, in 1828 he was excluded from his denomination. Winebrenner traveled as an evangelistic preacher, setting up independent

churches. In 1830 he and a group of preachers organized the General Eldership of the Church of God His followers were sometimes called Winebrennerians.

Wineland: see VINLAND.

Wines, Enoch Cobb, 1806–79, American clergyman and prison reformer, b Hanover, N J After a varied career as a schoolmaster and preacher he became (1861) secretary of the Prison Association of New York and began his most important work His noted *Report on the Prisons and Reformatories of the United States and Canada* (1867) was partly responsible for the wave of prison reform in the 19th cent.

Winfield. 1 Town (pop 1,662), NW Ala , WNW of Birmingham, in a farm area It has a textile mill 2 City (pop 9,506), co seat of Cowley co , S Kansas, on the Walnut and SSE of Wichita, laid out 1870, inc 1872 It is a rail and trade center in a rich agricultural, stock-raising, and oil-producing area and owns its gas and power utilities Southwestern College (Methodist, coeducational, opened 1886) and a junior college are here Winfield is the site of the county fair Near by is the state school for the feeble-minded

Winfrid: see BONIFACE, SAINT.

Wingate, Orde Charles (ôrd), 1903–44, British general Born in the Himalayas, he was educated at Charterhouse and Woolwich Military Academy Wingate served with the Sudan defense force (1928–33) and on special duty in Palestine (1936–39) It was in Palestine that he first used guerrilla tactics against Arabs attempting to cut the Haifa pipeline In the Second World War, although only a major, he commanded (1941) the British and native troops who ousted the numerically superior Italians from Ethiopia and restored Emperor Haile Selassie to his throne Called to India and raised to the rank of brigadier in 1942, Wingate trained and led a force of raiders into Japanese-held Burma for a period of seven months (1943) He was made a major general and placed in command of a larger army, which was flown into Burma, but he was killed in an airplane accident two weeks after this operation began A colorful personality and an unorthodox campaigner, Wingate demonstrated the effectiveness and practicality of jungle guerrilla warfare by Western troops See Charles Rolo, *Wingate's Raiders* (1944), W G Burchett, *Wingate's Phantom Army* (1946)

Wingham (wĭng'ŭm), town (pop 2,030), S Ont , on the Maitland river and NE of Goderich It has tanneries and flour and woodworking mills, and manufactures stoves and furnaces

wings, the FLIGHT organs of the BIRD, the BAT, and the INSECT Birds' wings are feathered There is much variation in the size and shape of the wings, and the number of primaries and secondaries (the principal flight feathers) also varies Some birds have wings which enable them to rise suddenly and quickly from the ground, some birds' wings are adapted for soaring flight, other birds move their wings constantly, the speed of the movement varying in different species Among insects the number, the kind, and the venation (character of veins) of the wings is a basis for classification

Winisk (wĭnĭsk', wī'nĭsk), river of N Ontario, issuing from Winisk Lake and flowing 300 mi N and NE to Hudson Bay at Weenusk, or Winisk

Wink, city (pop 1,945), W Texas, S of the N Mexline and N of the Pecos, in an oil area, inc 1928

Winkelried, Arnold von (ar'nôlt fŭn vĭng'kulrēt), d 1386, Swiss hero, whose action at the battle of Sempach (July 9, 1386) is credited in legend with the Swiss defeat of the Austrians under Duke Leopold According to the legend, which is upheld by some historians, after the Swiss had failed to break through the Austrian ranks and the battle had reached a critical stage, Winkelried of Unterwalden threw himself against the Austrians and, gathering all the spears within his reach against his breast, fell dead, having made an opening in the enemy ranks through which his compatriots rushed to victory There has been considerable discussion regarding the truth of this legend, and in the latter half of the 19th cent the debate was referred to facetiously as "the second battle of Sempach " In 1886 a monument to Winkelried was erected on the battlefield

Winkler, village (pop 1,164), S Man , SW of Winnipeg, in a mixed farming region

Winnebago (wĭnĭbā'gō), village (pop 1,992), S Minn , N of Blue Earth, in a farm and dairy region, settled before 1865

Winnebago, Lake, c 28 mi long and 10½ mi at its widest point, E Wis , largest in the state The Fox river enters at Oshkosh and leaves at Menasha, Fond du Lac is at the south end

Winnebago Indians, tribe of North American Indians of the Siouan linguistic stock When Father Jean Nicolet discovered (1634) them the Winnebago lived in E Wisconsin, from Green Bay to Lake Winnebago Except for a war with the Illinois (1671) and one with the Ojibwa (1827), the Winnebago generally were peaceful towards their neighbors such as the Menominee, the Sac and Fox, and the Ottawa The Winnebago traded with, and were staunch supporters of, the French After the fall of French power, however, they allied themselves with the British; they fought against the colonists in the American Revolution and in the War of 1812. The Winnebago clandestinely participated in the Black Hawk War (1832) After numerous hardships, including a war with the Sioux (1862), and much loss of population the Winnebago finally settled on reservations in Nebraska and Wisconsin In 1843 they numbered some 4,500, but today they number some 2,800 Winnebago culture was of the Eastern Woodlands area with some Plains area traits Their many ceremonies were elaborate, e g , the buffalo dance held in the spring and the winter feast See Paul Radin, *The Winnebago Tribe* (1923)

Winnemucca (wĭnĭmŭ'kŭ), city (pop 2,485), co seat of Humboldt co , N Nev , on the Humboldt, inc 1917 Founded in 1850 as a trading post called French Ford, it was renamed in 1868 and became the center of a ranching and silver-mining area

Winner, Septimus, 1827–1902, American song writer, who used the pseudonym Alice Hawthorne He wrote *Listen to the Mocking Bird* and *Whispering Hope* See C E Claghorn, *The Mocking Bird* (1937)

Winner, city (pop 2,426), co seat of Tripp co , S S Dak , SSE of Pierre, founded after 1908 when the eastern part of the Rosebud Indian Reservation was opened to white settlement It is a shipping and trade center for a farm region

Winnetka (wĭnĕt'kŭ), residential village (pop 12,430), NE Ill , north suburb of Chicago, on Lake Michigan, inc 1869

Winnetka plan: see PROGRESSIVE EDUCATION

Winnfield, town (pop 4,512), parish seat of Winn parish, N central La , NNW of Alexandria, in a pine-woods region, inc 1855 Near by are salt mines and limestone quarries It is the birthplace of Huey Long

Winnipeg (wĭ'nĭpĕg), city (pop 229,045), provincial capital, SE Man , on the Red River at the mouth of the Assiniboine, S of Lake Winnipeg and SE of Lake Manitoba, inc 1873 It is the largest city of the Prairie Provs and one of the world's largest wheat markets A railroad, commercial, industrial, and distribution center, it has an airport, railroad shops, grain elevators, stockyards, meat-packing plants, flour mills, automobile assembly plants, and varied manufactures Hydroelectric power is brought to the city from a hydroelectric station on the Winnipeg river The city's history reflects the history of early French and British explorers and fur traders Vérendrye here built (1738) Fort Rouge, and other posts were built in the Red River region, which was fiercely contested later by the North West Company and the Hudson's Bay Company The conflict reached its height in the struggle over the RED RIVER SETTLEMENT The two companies were merged in 1821, and Fort Gibraltar, an old post of the North West Company on the site of Winnipeg, became the Hudson's Bay Company post, Fort Garry (see GARRY, FORT), which was important in traffic on the Red River, connecting with the settlements in present North Dakota Settlement grew up around the post, and Winnipeg came into being in the 1860s and grew rapidly after the arrival (1881) of the railroad The Univ of Manitoba (see MANITOBA, UNIVERSITY OF) is here, as are the provincial government buildings, a civic auditorium, and the ruins of Fort Garry St Boniface, just opposite, is connected by bridges over the Red River

Winnipeg, river of W Ontario and SE Manitoba, issuing from the north end of Lake of the Woods and flowing 200 mi in a winding course generally northwest through several lakes to the southeast end of Lake Winnipeg Rapids on its lower course have hydroelectric stations Its principal tributary is the English river The Winnipeg was first traveled by sons of Vérendrye and was much used by explorers and fur traders

Winnipeg, Lake, area 9,398 sq mi , 250 mi long and 55 mi wide, S central Man , N of Winnipeg It is a remnant of glacial Lake Agassiz It receives the Red, Winnipeg, and Saskatchewan rivers and lesser streams and is drained NE by the Nelson to Hudson Bay There are valuable pulp, timber, and fishing resources, and several summer resorts are on its shores The lake was discovered (1733) by the Vérendrye expedition and was an important route of early explorers and fur traders

Winnipegosis, Lake (wĭ'nĭpugŏ'sĭs), area 2,086 sq mi , 125 mi long and 25 mi wide, W Man , W of Lake Winnipeg and NW of Lake Manitoba It is a remnant of glacial Lake Agassiz It drains SE into Lake Manitoba and thence into Lake Winnipeg Lake Winnipegosis has important pike fisheries

Winnipesaukee, Lake (wĭ'nĭpusŏ'kē), 25 mi long and 12 mi wide, E central N H , largest in the state Irregular in shape, with many indentations, it is dotted with islands and surrounded by wooded hills It drains into the Merrimack river through its short outlet, the Winnipesaukee river. The region around the lake is a popular summer resort

Winnsboro. 1 Town (pop 2,834), parish seat of Franklin parish, NE La , SE of Monroe, founded c.1844, inc 1902. It is a trading center and has cotton gins and sawmills 2 City (pop. 3,181), co. seat of Fairfield co , N central S C., N of Columbia, in a farm and timber area, settled in the mid-18th cent., inc. 1785 Textiles and tire cord are made here 3 City (pop 2,092), E Texas, ENE of Dallas, in a dairy and farm area

Winona (wĭnō'nŭ, wī-) 1 City (pop 22,490), co. seat of Winona co , SE Minn , on the Mississippi and SE of St Paul, settled 1851, inc 1857 An early trading and lumber center, the city grew as river traffic increased and developed as a manufacturing and commercial center It has the oldest normal school W of the Mississippi, Winona State Teachers College (1860), and is the seat of St. Mary's College and the College of St Teresa James Earle Fraser was born here 2 City (pop 2,532), co seat of Montgomery co , N central Miss , E of Greenwood, in a farm and livestock area

Winooski (wĭnōō'skē), industrial city (pop 6,036), NW Vt , on the Winooski near Burlington, set off from Colchester 1922 Its development began with the building of mills at the falls here by Ira Allen and Remember Baker shortly after the Revolution Worsted and woolen fabrics are made St Michael's College is near by

Winooski, river, c 90 mi long, rising in NE Vermont and swinging southwest, then northwest, across the state, passing Montpelier and Waterbury and entering Lake Champlain near Burlington and Winooski Floods in 1927 caused terrific loss in its valley, and three flood-control dams were built, 1933–37, on its tributaries The system, though not then complete, prevented serious damage to most of the valley in the 1936 flood See R N Hill, *The Winooski Heartway of Vermont* (1949)

Winslow, Cameron McRae (wĭnz'lō), 1854–1932, American naval officer, b Washington, D C , grad Annapolis, 1875 He served on the *Nashville* in the Spanish-American War, and for his heroism off Cienfuegos, Cuba—where he commanded an expedition which cut the cables between Cuba and Europe—he was advanced five numbers in rank He was (1905) naval aide to President Theodore Roosevelt and in 1911 was promoted rear admiral He served (1911–13) as commander in the Atlantic Fleet and later (1915–16) was commander in chief of the Pacific Fleet

Winslow, Edward, 1595–1655, one of the founders of PLYMOUTH COLONY in New England, b Droitwich, Worcestershire, England One of the leading PILGRIMS who came to America on the *Mayflower* in 1620, Winslow negotiated (1621) the treaty of peace and friendship with the Indian chief MASSASOIT Sent back to England (1623–24) as agent of the colony, he wrote *Good Newes from New England*, which Samuel Purchas published in 1625 On his return to Plymouth he was elected an assistant of the colony and was continuously reelected until 1647, except for the years he served as governor (1633–34, 1636–37, and 1644–45), years in which William Bradford had declined to hold the governorship Winslow knew the wilderness better than anyone else in the colony and was apparently the first Englishman to visit (1632) CONNECTICUT He was also one of the Pilgrim leaders who undertook to discharge successfully the colony's debts to its English backers In England again (1635) he was imprisoned for a short time for his separatist beliefs and for performing the marriage ceremony in the colony On still another journey to England, to answer charges made against Plymouth Colony, he issued a vigorous defense in *Hypocrisie Unmasked* (1646) With the Puritan cause triumphant, he remained in England Sent by Oliver Cromwell on a mission to the West Indies, he died there of fever Josiah WINSLOW was his son See G F Willison, *Saints and Strangers* (1945)

Winslow, John Ancrum, 1811–73, American naval officer, b Wilmington, N C He was appointed a midshipman in 1827 He served in the Mexican War and was commissioned commander in 1855 In the Civil War, Winslow first served with the flotilla operating on the upper Mississippi Promoted captain in 1862, he commanded the *Kearsarge* (1863–64) in pursuit of CONFEDERATE CRUISERS in European waters On June 14, 1864, Winslow found the *Alabama*, under Raphael Semmes, at Cherbourg, and five days later, in one of the outstanding naval engagements of the war, the *Kearsarge* sank the celebrated raider For his victory Winslow was promoted commodore and received the thanks of Congress He commanded the Gulf squadron (1866–67), was made a rear admiral (1870), and was commander of the Pacific squadron (1870–72) See biography by J M. Ellicott (1902)

Winslow, Josiah, c 1629–1680, governor of Plymouth Colony, b Plymouth, son of Edward WINSLOW Educated at Harvard, he became assistant governor of Plymouth (1657–73) and then governor (1673–80), the first native-born governor of any American colony Winslow also served as the Plymouth commissioner to the New England Confederation and as commander in chief of the colonial forces in King Philip's War (see PHILIP) in 1675.

Winslow. 1 City (pop 4,577), E central Ariz , near the Little Colorado river and ESE of Flagstaff, in a stock-raising region, founded 1882, inc 1900. Near

by is Meteor Crater, a depression nearly a mile in diameter and 600 ft. deep, possibly made by a huge meteor long ago. **2** Town (pop 1,382), SW Ind , SE of Petersburg Bituminous coal is mined here. **3** Town (pop. 4,153), S Maine, on the Kennebec opposite Waterville, inc 1771 Fort Halifax near by was built by Capt John Winslow in 1754 Cassiterite is found in Winslow The town has pulp and paper mills.

Winsor, Justin, 1831–97, American librarian and historian He was superintendent (1868–77) of the Boston Public Library and afterwards librarian of Harvard Univ. In addition to important bibliographical work on Shakspere, Columbus, and the American Revolution, he edited the *Narrative and Critical History of America* (8 vols , 1884–89) and wrote *The Westward Movement* (1897).

Winstanley, Gerrard see DIGGERS

Winsted, city (pop 7,674) in Winchester town, NW Conn , a co seat of Litchfield co , at the confluence of the Still and the Mad rivers Hosiery and chain hoists are among its products Scythes were made here before 1800, and the city has produced clocks since 1807

Winston-Salem (wĭn'stŭn-sā'lŭm), city (pop 79,815), co seat of Forsyth co , central N C , W of Greensboro, in the piedmont It is an important industrial, transportation, and distributing center and a port of entry, with large tobacco industries and textile, hosiery, and furniture plants Salem was founded in 1766 by a Moravian colony (the Moravian Easter Sunday services here are widely known), Winston was founded about 1850 as the county seat, the two were united in 1913 The city is the seat of Salem College (Moravian, for women, 1772) and Winston-Salem Teachers College (Negro).

Wint, Peter de: see DE WINT, PETER

Winter, William, 1836–1917, American dramatic critic, biographer, and poet, b Gloucester, Mass , grad Harvard Law School, 1857 A member of the literary bohemians who met in Pfaff's Cellar in New York in the 1850s, he summed up his memories of them—Bayard Taylor, Walt Whitman, and others—in *Old Friends* (1909) He was a famous dramatic critic for the New York *Tribune* from 1865 to 1909 and during the latter part of that time was an opponent of the new realistic drama His many studies of actors—among them Henry Irving, Edwin Booth, Ada Rehan, and David Belasco —and his *Other Days* (1908) and *The Wallet of Time* (1913), theatrical reminiscences, are useful histories of the period His poetry was collected in 1909

winterberry, name for some of the shrubby species of the holly genus (*Ilex*) The Virginia winterberry (*Ilex verticillata*), or black alder, is native to the swamps and low grounds of the E United States and the Middle West and ranges N to Nova Scotia It has toothed but spineless thin leaves, hairy beneath and deciduous, a tea can be made from the leaves The fruits, said to be poisonous, are bright red (occasionally yellow) berries which persist into the winter The smooth winterberry (*I laevigata*) is similar but has mostly smooth leaves and orange-red or, rarely, yellow fruits It occurs in swamps from Maine to Virginia

Winter Garden, city (pop 3,060), central Fla , on Lake Apopka It is a packing and shipping center for a productive truck and citrus-fruit area

wintergreen or **checkerberry,** low evergreen plant (*Gaultheria procumbens*) of the heath family, native to sandy and acid woods (usually of evergreens) of E North America and frequently cultivated It has a creeping stem, erect branches, glossy oval leaves, and small waxy white flowers followed by crimson fruits The spicy leaves and fruits are edible, the leaves are a source of wintergreen oil (now mostly obtained from the sweet, or black, birch, *Betula lenta*, or synthetically) The oil (see METHYL) is used in medicine and as a flavoring A tea has often been made from the leaves, whence two of the many names of the plant, mountain tea and teaberry There are other species of *Gaultheria* found in W America (one called salal) and elsewhere Shinleaf (*Pyrola*) is sometimes called wintergreen.

Winterhalter, Franz Xaver (fränts' ksävär' vĭn'tur-hal"tur), 1806–73, German portrait painter, favorite painter of royalty in his day Most of the crowned heads of Europe sat for him, and his pictures of them are in leading European galleries Empress Eugenie is thought to have posed for his *Florinda* (Metropolitan Mus) His *Susannah and the Elders* is in the Seattle Art Museum

Winter Haven, city (pop. 6,199), central Fla , E of Tampa It is a market, processing, and shipping center for one of the state's chief citrus-fruit regions Winter Haven is also a boating resort. There are 97 lakes within a radius of 5 mi and a boat course of some 17 connected lakes

Winter Park, residential city (pop 4,715), central Fla , just N of Orlando, settled in the 1850s, inc. 1887 ROLLINS COLLEGE is here

Winterport, town (pop 1,572), S Maine, on the Penobscot below Bangor, inc. 1860.

Winters. 1 Town (pop 1,133), central Calif., W of Sacramento, in a farm area, inc. 1898 **2** City (pop. 2,335), W central Texas, SSW of Abilene, in a diversified farming area, settled c.1890, inc. 1909.

Winterset, city (pop. 3,631), co. seat of Madison co., SW Iowa, SW of Des Moines; founded 1846, inc. 1876. Near by is the original Delicious apple tree, planted in 1872.

winter sports: see BOBSLEDDING; HOCKEY; SKATING; SKIING, SNOWSHOES, TOBOGGANING.

Winterthur (vĭn'tûrtōōr"), town (pop 58,883), Zurich canton, Switzerland An important railroad center, it manufactures machinery (especially locomotives), cotton textiles, foodstuffs, and clothes It has a notable art gallery and a Gothic church. Winterthur was ruled by the counts of KYBURG (whose castle stands south of the town) until 1264, when it passed to the Hapsburgs. In 1467 it was bought by Zurich

Winthrop, John, 1588–1649, governor of the Massachusetts Bay colony, b Edwardstone, near Groton, Suffolk, England, of good family He studied at Trinity College, Cambridge, was admitted to Gray's Inn, and became a prosperous attorney with strong Puritan leanings As a member of the MASSACHUSETTS BAY COMPANY he favored the removal to New England and was chosen (1630) governor when that course was decided upon He arrived (1630) in the ship *Arbell* at Salem and shortly founded on Shawmut peninsula the settlement which became Boston He was—with the possible exception of John Cotton—the most distinguished citizen of Massachusetts Bay colony, serving as governor some 12 times He helped to shape the theocratic policy of the colony and opposed broad democracy It was while he was deputy governor and the younger Henry Vane was governor that Winthrop bitterly and successfully opposed the antinomian beliefs of Anne HUTCHINSON and her followers, who were supported by Vane The force of his influence on the history of Massachusetts was enormous Winthrop's journal, which was edited by J K Hosmer in 1853 as *The History of New England from 1630 to 1649*, is one of the most familiar of American historical sources. See R C Winthrop, *Life and Letters of John Winthrop* (1862), biography by J H Twichell (1892), *Winthrop Papers* (5 vols , 1929–47)

Winthrop, John, 1606–76, colonial governor in America, b Groton, Suffolk, England, son of the elder John Winthrop He was educated at Trinity College, Dublin, studied law at the Inner Temple, went on the expedition led (1627) by the 1st duke of Buckingham to La Rochelle, and emigrated to Massachusetts Bay in 1631 He represented (1634) the colony in England and in 1635 returned as governor of the new colony at Saybrook (now Old Saybrook), Conn , just when other towns were being settled in the Connecticut valley, by agreement he was recognized for a year as titular governor of all In 1646 he founded New London, and in 1657 and annually from 1659 to 1676 he was governor of Connecticut by election After the Stuart restoration he obtained a charter (1662) which led to the union (1664) of Connecticut and New Haven colonies, and he governed the colony as an administration practically independent of England He gathered a considerable library and by his interest in chemistry and other sciences helped to promote scientific study in the colonies See biography by T F. Waters (1899).

Winthrop, John (Fitz-John Winthrop), 1638–1707, colonial governor in America, b Ipswich, Mass ; son of the younger John Winthrop He is commonly called Fitz-John Winthrop to distinguish him from his father and his grandfather He left Harvard to serve in Richard Cromwell's parliamentary army, returned to America in 1663, served in King Philip's War, was a member of the council of Governor Andros, and served as commander of the unsuccessful invasion (1690) of Canada in King William's War He represented Connecticut in England from 1693 to 1697 and was elected governor in 1698, serving ably until his death

Winthrop, John, 1714–79, American scientist, b Boston, Mass , grad Harvard, 1732, descendant of John Winthrop (1588–1649). Because of his study of earthquakes, he is sometimes called the founder of seismology He made scientific observations of sunspots and other astronomical phenomena, lectured on electricity, and is called a founder of experimental science in America and the first important scientist to teach at Harvard

Winthrop, Robert Charles, 1809–94, American statesman, b Boston, grad Harvard, 1828. He studied law under Daniel Webster, was admitted (1831) to the bar, and was (1834–40) a Whig member of the Massachusetts legislature. He served (1842–50) in the House of Representatives, becoming speaker in 1847. Appointed (1850) to the Senate to complete Daniel Webster's unexpired term, he was defeated in 1851 by Charles Sumner He was generally considered a moderate in the sectional disputes leading up to the Civil War He gained a reputation as an orator and was the chief speaker at the laying of the cornerstone of the Washington Monument (1848) and again (1885) at its dedication After 1851 he chiefly devoted himself to literary and philanthropic work, and Winthrop College for women in South Carolina was named in his honor He wrote *The Life and Letters of John Winthrop* (1864–67), *Washington, Bowdoin, and Franklin* (1876), and *Memoir of Henry Clay* (1880).

Winthrop, Theodore, 1828–61, American author, b. New Haven, Conn., grad. Yale, 1848. He traveled extensively, studied law, and began to write, but all of his novels appeared after he was killed in the Civil War *Cecil Dreeme* (1861), *John Brent* (1862), and *Edwin Brothertoft* (1862) were at once popular. See *The Life and Poems of Theodore Winthrop* (ed. by his sister, L W. Thompson, 1884).

Winthrop. 1 Town (pop 2,508), SW Maine, W of Augusta; settled 1765 as Pond Town Plantation, renamed and inc 1771 In a lake region, the town became a resort It has woollen mills and oilcloth factories **2** Resort town (pop 16,768), E Mass , on a peninsula NE of Boston, settled 1635, set off from North Chelsea 1852 Several old houses survive. **3** City (pop 1,195), S Minn , N of New Ulm, settled 1881, inc as a village 1884, as a city 1910 It is a farm trade center.

Winthrop College, at Rock Hill, S C , for women; opened 1886 as a teachers' training school at Columbia, with aid from the Peabody Education Fund It was taken over by the state and chartered in 1891 Named Winthrop Normal and Industrial College of South Carolina in 1893, it moved in 1895 and was renamed in 1920 Winthrop cooperates with Clemson Agricultural College in home economics extension and research

Winton, industrial borough (pop 7,989), NE Pa , NE of Scranton, settled 1849, inc 1877 Its industries include silk mills and anthracite mines.

Winwood, Sir Ralph, 1563?–1617, English diplomat and statesman He acted as secretary (1599–1601) to Sir Henry Neville, the ambassador to France, and was Sir Henry's successor (1601–3) and agent to the States-General of the Netherlands (1603–14). At The Hague he showed himself an ardent enemy of Spain and Catholicism and assisted the Dutch as much as possible against Spain On his return to England (1614) he was made secretary of state, secured the friendship of the king's favorite, the earl of Somerset, and assumed leadership in the House of Commons in the Addled Parliament in the interests of the crown There he upheld James's subsidy demands and the *impositions*, but Parliament was dissolved without passing a single act Winwood helped secure the release of Sir Walter Raleigh from the Tower (1616) and urged him on his fatal expedition against the Spanish fleet and possessions By his death Winwood escaped the consequences of this act

wire. Metals and alloys used for wiremaking should have high tensile strength and ductility. They are selected also for their electrical conductivity, weight, melting point, or other properties, depending upon the use to which the wire is to be put For convenience, the many different sizes (diameters) in which wire is made are arranged in series of decreasing size and numbered, the number being known as the gauge or gage, the higher the gauge the smaller the diameter The number of gauges used and their size differ according to the kind of wire and the standards of the country In the United States the American wire gauge, known also as the Brown & Sharpe wire gauge and abbreviated B & S , is used as a standard, in the British Isles and Canada the (British or imperial) standard wire gauge, abbreviated S W G , is employed For steel wire the steel wire gauge (known also as the Washburn & Moen, the Roebling, or the American Steel & Wire Co 's wire gauge) is employed Wire is widely used for conducting electricity and in making fencing, screens, netting, springs, and mesh or cloth Very fine wire is used in various scientific instruments, e g , certain optical instruments, electrical measuring devices and apparatus, and medical instruments. A wire mesh is commonly used in glass (wire glass) to prevent shattering and increase strength and safety Wire rope (cable) is made by forming wires into strands which are then wound on a core Wire has been used since the 3d millennium B C In early times the metal was hammered into sheets, then cut in strips and shaped with hammer and file The modern method of drawing wire is believed to have been used commercially in Europe late in the 13th cent In this the metal is pulled, or drawn, through a number of holes, each smaller than the one preceding, until finally it is passed through one of the desired diameter Metal plates with such holes are known as drawplates or dies Success in drawing wire through the drawplate formerly depended upon the physical strength of the wiredrawer (or wiresmith), since machinery was not used until the introduction of power-driven cylinder blocks for pulling and coiling the wire

wireless: see RADIO.

wireworm, the larva of the elater or click beetle. The majority are hard and brown, but some species are soft and whitish They are destructive to crops, feeding on the roots, underground stems, and seeds. Corn, grasses, and small grains and potatoes, carrots, beets, and many other vegetables are attacked. Methods of control include letting the land lie fallow, crop rotation, and special methods of cultivation. See *Wireworms and Their Control on Irrigated Lands* (U S. Dept. of Agriculture, Farmers' Bul. 1866); bulletins of state experimental stations.

Wirt, William (wûrt), 1772–1834, American author and lawyer, b. Bladensburg, Md. He had little formal schooling but was admitted to the Virginia bar in 1791. He practiced law in Culpeper co. and in Richmond and Norfolk. His first book was an anonymous collection of sketches called *The Letters of a British Spy* (1803) Purporting to be the work of a "meek and harmless" noble visitor to America, it is a gentle rejoinder to the castigations of the United States by British travelers *The Rainbow* (1804) and *The Old Bachelor* (1810) are similar collections, attempting the style of Joseph Addison Wirt's *Life and Character of Patrick Henry* (1817) was the first of his books to appear under his own name The work presumed to give the text of Henry's speeches, which Wirt knew only from traditional accounts, it included some of the famous but debatable quotations from Henry Wirt won fame as the prosecutor in the trial (1807) of Aaron Burr for treason As U S Attorney General (1817–29) he initiated the practice of having his opinions published as precedents In 1832 he accepted the nomination for President of the ANTI-MASONIC PARTY in the belief that this would force the National Republican party also to support him in order to defeat Andrew Jackson The National Republicans, however, stood by Henry Clay (whom Wirt actually favored), and Wirt waged a very feeble campaign See memoirs by John P Kennedy (1849)

Wirt, William Albert, 1874–1938, American educator, b Markle, Ind, grad DePauw Univ (Ph B, 1898, Ph D, 1916) In 1907 he became superintendent of schools in Gary, Ind, where he developed a plan of school operation (see SCHOOL) known variously as the Gary plan, the platoon system, and Wirt's study-play school This system increases the utilization of the school plant by alternating classes between regular and special teachers

Wirtanen, Artturi Ilmari see VIRTANEN

Wirtemberg, Germany see WÜRTTEMBERG

Wirth, Karl Joseph (kärl' yō'zĕf virt'), 1879–, German statesman A leader of the Center party, he succeeded (1920) Erzberger as minister of finance When the Allies presented the reparations ultimatum of 1921, the cabinet fell, and Wirth became chancellor, pledging the fulfillment of treaty obligations Popular indignation at the League decision to partition Upper Silesia caused Wirth to resign, but he returned to office the same month (Oct., 1921) With his foreign minister, Rathenau, he represented Germany at the Genoa reparations conference of 1922 and while there signed the Treaty of Rapallo with Russia The currency inflation caused the fall of the Wirth ministry in Nov, 1922 Wirth was minister of occupied regions (1929–30) and minister of the interior in the Brüning government (1930–31)

Wisbech (wĭz'bēch), municipal borough (pop 12,006), Isle of Ely, England, a port on the Nene river and NE of Peterborough It has a museum and a church dating from the 14th cent There is a monument to Thomas Clarkson, who was born in Wisbech

Wisby (wĭz'bē), Swed *Visby* (vĭs'bē, Swed vēs'bü), city (pop 13,658), NW GOTLAND, Sweden, a port on the Baltic Sea It is a Lutheran episcopal see and the county seat of Gotland co Though now a popular resort, with a modern ice-free harbor and important sugar refineries and cement works, Wisby is chiefly significant for its history In pagan days it was a religious center, in the 11th cent German merchants came to the city, which became one of the first members of the HANSEATIC LEAGUE The ruins of 10 fine churches and the restored Cathedral of St Mary, erected in the city's heyday, indicate its former wealth and greatness An independent republic, Wisby was the commercial center of N Europe, coining its own money and developing an international maritime code Its decline began in 1280, when Sweden conquered Gotland while Wisby was at war with the peasants over trade privileges It was sacked (1361) and conquered (1362) by the Danes, who returned it to the Hanseatic League in 1370 For the next two centuries it was a pirate stronghold, while its trade was taken by Lübeck. It passed to Denmark in 1570 and to Sweden in 1645 Its churches and buildings decayed, and not until the 19th cent did the city begin to recover trade

Wiscasset (wĭskă'sĭt), town (pop 1,231), co seat of Lincoln co, S Maine, NE of Bath, settled 1663, inc. 1802 Its center, a resort and small port, has colonial homes and a brick courthouse built in 1824 The town flourished in the sailing-ship days

Wisconsin (wĭskŏn'sĭn, -zĭn), state (56,154 sq mi, 1940 pop 3,137,587, 1949 estimated pop 3,355,000), N central United States, admitted 1848 as the 30th state (a free state) MADISON is the capital, MILWAUKEE the largest city Water marks most of the boundary, to the east is Lake Michigan, to the north Lake Superior, and between the two Wisconsin is cut from the Upper Peninsula of Michigan partly by the Menominee river, to the west the St. Croix and the Mississippi mark most of the lines with Minnesota and Iowa; in the south the line of lat. 42° 30′ N marks the land boundary with Illinois The northern part of the state below the western end of Lake Superior—with its ore-shipping ports of Superior and Ashland—is cut by the Keweenaw and Gogebic Ranges, and its rough isolation is marked by glacial lakes of surprising beauty In the south too scenic lakes are plentiful The tempering effects of the water cannot, however, keep the winter climate of the north from being cold or the summer climate of the south from being warm with the hot winds of the Mississippi valley Though the average rainfall of 31 in is more or less uniform, the difference in the farm growing season is sharp, with 75 days in the far north and 175 days in the southwest The water parting marks another distinction with the eastern rivers of the Menominee, the Peshtigo, the Wolf, and the Fox flowing eastward and northeastward, while the Chippewa, the Flambeau, the Black, and the Wisconsin flow west to the Mississippi The close approach of the upper waters of the Fox, bound for Lake Michigan, and the Wisconsin, part of the Mississippi system, helped to make the Fox-Wisconsin portage (see PORTAGE, Wis) one of the great historic transportation links in American history The waterways of the Great Lakes have also been used since the days of the Indians and today are much used by shipping out of Milwaukee, Green Bay, and Superior The abundance of water also nurtured the forests that not so long ago covered all of the state except the southern prairie Reckless lumbering in the late 19th cent destroyed much of the forest cover, but there are still stands of stately white pine in the north and groves of hardwoods in the south, and conservation and reforestation methods, combined with the systems of national and state parks have kept in Wisconsin many areas of forest stillness and lands where still the blue shadows of trees fall upon icy winter waters and clean, unbroken snow Even the smaller trees are of value to the wood-pulp industry, and lumbering still remains profitable while cities like Oshkosh and La Crosse remember the brasher days of loggers in from the logging camps Today, however, much of Wisconsin has a more pastoral accent Dairying, replacing wheat growing, became highly important in the 1880s, and now much of Wisconsin's land is given over to the grazing of great dairy herds, and the cheese from Sheboygan and other Wisconsin cities is famous across the nation The plants to process dairy produce and earlier-founded sawmills and woodworking plants and flour mills for the once-great wheat crops, formed the base for industrial development, but that development expanded beyond small plants The metropolis of Milwaukee, although its fame is widely attributed in advertisements to one brand of beer, actually has a great range of business and industry—including among other things the making of large machines for large-scale engineering projects Other cities, too, such as the smaller southern lake ports of Racine and Kenosha are smoky with industry The riches of Wisconsin are as diverse as the hill-to-prairie scenery, but the variety in living within a wholly American unity has been gained only through centuries of history The Great Lakes offered an easy access from Canada, and Jean Nicolet, the first of the French explorers in Wisconsin, arrived at Green Bay in 1634 in search of the Northwest Passage He was followed by other traders and missionaries, among them the path-breaking RADISSON and Groseilliers, MARQUETTE and JOLLIET, who discovered the upper Mississippi, Aco and HENNEPIN, from the party of LA SALLE, and the redoubtable DULUTH Meanwhile Indian troubles, caused by the incursion of Indians driven westward into the Wisconsin lands of the Winnebago, the Menominee, the Ojibwa, and the earlier settled tribes Nevertheless, after Nicolas PERROT had formally claimed all the region for France in 1686 the fur trade flourished despite troubles (especially between the Fox Indians and the French), and the historic Fox-Wisconsin portage was used by generations of fur traders from Green Bay and Prairie du Chien Wisconsin, like the rest of the possessions of New France, fell to the British with the end of the French and Indian Wars British traders mingled with the French, and British control of the Indians was strong It was not relinquished when with the end of the American Revolution the Old Northwest passed (1783) to the United States and was made (1787) a part of the Northwest Territory Effective U S. control began only after the War of 1812 had been won The American Fur Company gained control of much of the fur trade, which continued long after the present Wisconsin was included (1818) in Michigan Territory but had begun to diminish before the Erie Canal had made the Great Lakes route easier for settlers coming from the East The lead mines in the present NE Iowa and SW Wisconsin had been long known before there was a rush to the area in the 1820s White settlers coming into Wisconsin interfered with the patterns of Indian life and helped to bring on the BLACK HAWK WAR. The Indians were subdued and largely driven forth, and the way was open for unimpeded founding of towns and exaggerated land booms. Farming was becoming the staple occupation before in 1836 Wisconsin was made a territory and the legislators were persuaded by James Duane Doty to choose the still unbuilt city of Madison as the capital The Panic of 1837 sobered land speculators, but by 1840 the population had risen to more than 130,000 The great immigration of Germans began, and some parts of Wisconsin assumed a tidy semi-German look that has persisted along with an astonishing survival of the German language, some of the liberal leaders who came after the failure of the Revolution of 1848 in Germany added to the intellectual development of the frontier Other contributions were made then and later by immigrants from other lands—Irish, Scandinavian, Russian Germans from the Volga, and Poles The resulting amalgam was typically American The need to improve communications for the growing population—despite the military road built from Green Bay to Prairie du Chien in 1835–38 and the many excellent harbors—was a factor in the move for statehood Wisconsin became a state but only after yielding up a claim to the strip of land about Chicago to Illinois and a claim to the Upper Peninsula to Michigan. Wisconsin in 1846 rejected the first proposed constitution but in 1848 accepted the second The state developed promptly with the building of roads and railroads and in another direction with the creation of a free public school system carried to the level of the Univ of Wisconsin The Civil War did not much disturb the economy, yet abolitionist groups had helped in the early formation of the Republican party and there was ill-feeling because many German immigrants (some of whom had left Germany because they opposed compulsory military service) were set against even voluntary war service After the war there was great development all over the West Wheat growing had been established as a major source of Wisconsin income before the war, and many acres, especially in the southern prairies, were golden with grain each year, and flour and grist mills in towns on the rivers and on Lake Michigan throve Dependence on wheat was doomed, however, largely by the development of wheat growing farther west, and Wisconsin had to go through a period of transition Lumbering, long prominent, became the basic industry and kept its first position as the forests were laid waste until the 20th cent The opening of iron mines in Minnesota and Michigan promoted the northern lake ports and opened industrial opportunities Dairying was encouraged by such men as William D Hoard, and the Wisconsin Dairymen's Association was founded in 1872 The distress of the farmers in the transition period of the '80s and '90s found vent in opposition to the railroad companies, which were fattened by enormous land grants, and to the big lumbermen and newly wealthy industrialists The trend toward liberal political views was already strong in Wisconsin, where Socialist thought was introduced early and was to hold sway in Milwaukee politics for many years after 1910, particularly under the mayoralty of Daniel HOAN In the period of economic stress the GRANGER MOVEMENT was popular, and in the 20th cent out of the ranks of the Republican party rose the elder Robert M LA FOLLETTE and the "Wisconsin idea," a philosophy of progressive legislation for public welfare that owed much to Charles MCCARTHY Belief in the extension of high civil-service standards, labor laws, and cooperative, nonpartisan action to solve labor problems were important in the political development that gave Wisconsin the reputation of being radical La Follette's son, Robert M La Follette the younger and Philip La Follette continued the policies of their father and conflicted with more conservative Republican leadership The conflict was fruitful for Wisconsin in sound laws and in social progress Though isolationism was strong in both the World Wars and there was some sympathy for National Socialism in Germany, Wisconsin generally remained a leader in national thought and was enriched by development in the Second World War The originality and influence of Wisconsin may be seen in the pioneering efforts of three native sons—Frederick Jackson Turner in history, Thorstein Veblen in economics, and Frank Lloyd Wright in architecture See Lawrence Martin, *The Physical Geography of Wisconsin* (1916), Joseph Shafer, *A History of Agriculture in Wisconsin* (1922), E L Kirkpatrick and Agnes M Boynton, *Wisconsin's Human and Physical Resources* (1936), William F Raney, *Wisconsin a Story of Progress* (1940), Federal Writers' Project, *Wisconsin A Guide to the Badger State* (1941), August W Derleth, *The Wisconsin* (1942); Frederick L Holmes, *Old World Wisconsin* (1944), E N Doan, *La Follette and the Wisconsin Idea* (1947), R E Gard, *Wisconsin Is My Doorstep* (1948)

Wisconsin, river, c 430 mi long, rising in NE Wisconsin at the Mich line and flowing generally SW across Wisconsin to the Mississippi near Prairie du Chien At PORTAGE it is connected by a short canal with the Fox river, and thus with Lake Michigan Its dells (see DELLS OF THE WISCONSIN) are famous See August W. Derleth, *The Wisconsin* (1942).

Wisconsin, University of, at Madison; land-grant and state supported, coeducational; chartered 1848, opened 1849. It has colleges of agriculture, engineering, and letters and science and schools of commerce, education, journalism, law, library science, music, nursing, pharmacy, and medicine There are state hygiene and U S forest-products laboratories, a U S weather bureau, an institute of pharmaceutical history, a state geology and natural history survey, an arboretum and wildlife refuge, a film library, a radio hall, a university press, and the noted Washburn Observatory The libraries include those of the state historical society (see DRAPER, LYMAN C), with a museum, and of the state academy of science, arts, and letters The campus on Lake Mendota has Indian mounds. The university has long been noted for graduate and research work, scientific equipment, and service to the state The Experimental College (1927–32) made influential findings (see MEIKLEJOHN, ALEXANDER) Noted administrations of the university were those of John Bascom and Charles K Adams

Wisconsin Dells, city (pop. 1,762) central Wis., on the Wisconsin and NW of Portage, in a dairy area, settled c 1850, inc 1925, called Kilbourn until 1931 It is the gateway to the unusual rock formations in The Dells along the river

Wisconsin Rapids, city (pop 11,416), co seat of Wood co., central Wis., on the Wisconsin and SE of Eau Claire Two towns here, Grand Rapids and Centralia, were consolidated in 1900, and the name was changed from Grand Rapids in 1920 It is a cranberry center and has paper mills

Wisdom, book of the Old Testament, placed in the Apocrypha in AV and after the Song of Solomon in the Western canon It is traditionally named the Wisdom of Solomon The book opens with an exhortation to seek wisdom, followed by a statement (2 1–20) of the attitude of worldly men Chapter 3 is a splendid passage on the immortality of the just and the rewards of the wicked, amplified in the next chapters Then there is another exhortation (6) and a transition to a section (7–8) praising wisdom, ending with a prayer for it (9) The rest of the book (10–19) is a history of God's care of the Jews from the beginning, with a remarkable, long parenthesis (13–15) on the natural origin of idolatry and its folly The style and content of the book lend themselves to quotation, thus there are not a few allusions in St Paul's letters to passages from Wisdom The book is probably of Alexandrian Jewish authorship, and some place the date in the two centuries before Christ Some see in it a composite work of three parts, 1–6, 7–9, and 10–19, of which the third is said to resemble a Passover haggada It is a supreme example of what is called wisdom literature, a critical term for the Jewish philosophical writings of the pre-Christian era The following other books of the Old Testament represent this type also Job, Proverbs, Ecclesiastes, and Ecclesiasticus For bibliography, see OLD TESTAMENT

Wisdom of Jesus the Son of Sirach (sĭr'ŭk) see ECCLESIASTICUS

Wise, Henry Alexander, 1806–76, American political leader and Confederate general, b Accomac, Va., grad Washington (now Washington and Jefferson) College, 1825 A lawyer, Wise was successively a Jackson Democrat, a Whig, and a Tyler Democrat in Congress (1833–44) He was minister to Brazil in 1844–47 One of his last official acts as governor of Virginia (1856–60) was to sign the death warrant of John Brown As a Confederate brigadier general in the Civil War he distinguished himself in Grant's first assault on Petersburg (1864) and in the retreat to Appomatox See biography by his grandson, B H Wise (1899)

Wise, Isaac Mayer, 1819–1900, American rabbi and scholar, b Bohemia, studied at the Univ of Vienna Liberal in his religious and political views, in 1846 he settled in the United States He was rabbi of a reform congregation in Albany, N Y., and from 1854 in Cincinnati, there he founded (1875) the Hebrew Union College, of which he was president until his death He organized the Union of American Hebrew Congregations in 1873. He was also president of the Central Conference of American Rabbis, which he established in 1889 He founded and edited two periodicals, the *American Israelite,* in English, and *Deborah,* in German. He wrote several novels, two plays, his reminiscences (1901), and many historical and religious works, including *History of the Israelitish Nation* (1854). See Dena Wilansky, *Sinai to Cincinnati* (1937); L M Franklin, *The Rabbi the Man and His Message* (1938)

Wise, John, 1652–1725, American clergyman, an able exponent of the democratic principles of modern Congregationalism, b Roxbury, Mass., grad Harvard, 1673 He was pastor at Ipswich, Mass., from 1680 until his death, but his influence extended far beyond the confines of his parish. For a short time, in 1687, he was deprived of his ministerial office by Governor Andros for having led his fellow townsmen in their refusal to pay taxes violating their charter rights. In 1689 he represented Ipswich in the Boston convention for reorganization of the colonial government. The following year found Wise serving as chaplain in the expedition against Quebec In opposition to Increase and Cotton MATHER, he resisted the plan to place individual churches under the jurisdiction of associations of ministers, stating his reasons in two pamphlets which carried great influence, *The Churches Quarrel Espoused* (1710) and *A Vindication of the Government of New England Churches* (1717) These expositions of democracy were reissued and widely read before the American Revolution and again before the Civil War In 1721 Wise published *A Word of Comfort to a Melancholy Country,* an argument for paper money

Wise, Stephen Samuel, 1874–1949, American reform rabbi, b Budapest, grad College of the City of New York, 1891, Ph D Columbia, 1901 He served as a rabbi in New York city from 1893 to 1900 and in Portland, Oregon, from 1900 to 1906 Returning to New York in 1907, he founded the Free Synagogue, of which he was rabbi until his death He worked for labor reforms, international peace, the problems of Jewish minorities in Europe, and the relief of refugees He was one of the foremost leaders of ZIONISM and of reformed Judaism Among the many organizations in which he was active were the American Jewish Congress, the International Jewish Congress, the Zionist Organization of America, and the Jewish Institute of Religion His writings include *The Great Betrayal* (with Jacob De Haas, 1930), *As I See It* (1944), and his autobiography, *Challenging Years* (1949)

Wise, Thomas James, 1859–1937, English bibliographer and book collector. His famous Ashley Library of rare editions and manuscripts was acquired by the British Museum in 1937 Wise also printed privately nearly 300 works of English authors, some of which were exposed as forgeries by John Carter and Graham Pollard in *An Enquiry into the Nature of Certain Nineteenth Century Pamphlets* (1934) See *Letters of Thomas J Wise to John Henry Wrenn* (ed by F E Ratchford, 1944), W G Partington, *Forging Ahead* (1939)

Wise, town (pop 1,226), extreme SW Va., in the Cumberlands near Kentucky, settled as Big Glades, later named Gladesville, named Wise 1924 It is a trade center for a mine and farm area The courthouse (1865) of Wise co here replaces one destroyed by Union troops in 1864

Wiseman, Nicholas Patrick Stephen, 1802–65, English prelate, cardinal of the Roman Church, b Seville, Spain, of Irish-English parentage He studied at Ushaw College, Durham, and at Rome, where he became known for his learning in Semitic languages During 1835–36 he stayed in England, where he preached, in 1836 he founded (with Daniel O'Connell) the *Dublin Review* In 1840 he was taken from his rectorship of the English College at Rome (which he had held since 1828) and made vicar apostolic of the central district of England He was very influential among Catholics In 1850 the pope set up a new hierarchy in England, Wiseman was created cardinal and was selected as archbishop of Westminster and primate He applied himself to allaying mutual suspicion between the older Catholic families and the newer converts and to lessening the anti-Catholic feeling in England He wrote many books, notably *Fabiola* (1854), a historical novel of early Christianity, and *Recollections of the Last Four Popes* (1858) Henry Edward MANNING was his assistant and successor See biography by Wilfrid Ward (1897)

Wise Men of the East, Magi (mā'jī) [see MAGI], or **Three Kings,** men who came from the East to adore the newborn Jesus Mat 2 They were the first to tell Herod of the birth A star (the Star of Bethlehem) had been a sign for them Christian tradition has been busy with them it has set their number as three, perhaps from their gifts of gold, frankincense, and myrrh, it has called them kings, perhaps from Ps 72 10,11 and Isa 49 7,23 considered as prophecies, and it has given them names, Caspar or Gaspar, Melchior, and Balthasar They are called sometimes the Three Kings of Cologne because there is a great shrine to them in the cathedral at Cologne The feast of the EPIPHANY commemorates their visit In art the visit is called the Adoration of the Magi

Wishart, George [wĭ'shŭrt), 1513?–1546, martyred Scottish reformer He was master of a grammar school in Montrose, teaching the New Testament in Greek In 1538 he fled the country to escape charges of heresy, he was in England for a short time, then on the Continent In 1544 he is thought to have returned to Scotland, where he traveled about, preaching Christianity as he conceived it The most eventful result of his preaching was the conversion of John KNOX Cardinal Beaton, seeking Wishart's death, instigated his arrest He was tried for heresy, convicted, and burned at St Andrews See biography by Charles Rogers (1876)

Wishaw, Scotland see MOTHERWELL AND WISHAW

Wishek (wĭ'shĕk), city (pop 1,112), S N Dak SE of Bismarck, in a farm area, inc 1930

Wislicenus, Johannes (yōhä'nŭs vĭslētsā'nōōs), 1835–1902, German organic chemist. He was professor at several institutions in Zurich (1861–72) and at the universities of Würzburg (1872–85) and Leipzig (from 1885). He is noted for his research on lactic acid and other organic compounds which advanced the development of stereochemistry, especially in the field of stereoisomerism (see ISOMERISM).

Wismar (vĭs'mär), city (pop 42,018), Mecklenburg, N Germany, on the Baltic Sea. It is a fishing port and an industrial center with shipyards, machinery manufactures, and agricultural processing plants Wismar was (1256–1306) the residence of the princes of Mecklenburg and later became one of the most flourishing cities of the Hanseatic League Under the Peace of Westphalia (1648) the city passed to Sweden, but in 1803 Sweden pledged it to Mecklenburg-Schwerin with the privilege of recall within 100 years In 1903 Sweden renounced all rights to the city Wismar, which had retained several Gothic churches and other fine medieval buildings, suffered considerable damage in the Second World War.

Wisner (wĭz'nur), city (pop 1,256), NE Nebr., NW of Omaha, on the Elkhorn and E of Norfolk. It is a shipping center for a livestock and farming area

Wissler, Clark, 1870–1947, American anthropologist, b Wayne co, Ind, grad Indiana Univ (B.A., 1897), Ph D Columbia, 1901. He was professor of anthropology (1924–40) at the Institute of Human Relations at Yale and was affiliated (1903–41) with the American Museum of Natural History His writings include *The American Indian* (1917), *Man and Culture* (1923), *Introduction to Social Anthropology* (1929), and *Indians of the United States* (1940)

Wissmann, Hermann von (hĕr'män fŭn vĭs'män), 1853–1905, German explorer in Africa He crossed (1880–82) Africa from Loanda to Zanzibar and, on behalf of Leopold II of Belgium, explored (1883–85) the Kasai river system in the Belgian Congo As German commissioner (1889–92) he suppressed an Arab revolt in German East Africa In the coastal area given up by the sultan of Zanzibar, he founded Moshi on the slopes of Mt Kilimanjaro He was (1895–96) governor of German East Africa His writings include *My Second Journey through Equatorial Africa* (1891, Eng tr, 1891)

Wistar, Caspar (wĭ'stur), 1761–1818, American physician, b Philadelphia, M D Univ of Edinburgh, 1786, grandson of Caspar Wistar (1696–1752), early Pennsylvania glassmaker He taught (1789–91) at the College and Academy of Philadelphia, then at the Univ of Pennsylvania organized (1791) by a merger of the college with another institution He wrote the first American textbook on anatomy, *A System of Anatomy* (2 vols, 1811–14), and left an anatomical collection which eventually passed to the Wistar Institute of Anatomy and Biology, founded by his great-nephew, Isaac J Wistar He was president (from 1815) of the American Philosophical Society, and his home was the weekly meeting place of students and scientists The genus *Wistaria* was named in his honor

Wistar, Isaac Jones, 1827–1905, American financier, b Philadelphia, great-nephew of Caspar Wistar His early manhood was spent adventurously in the West as a muleteer, trapper, and gold miner He played a large part in suppressing the vigilantes in California In the Civil War he was a brigadier general in the Union army and was wounded four times After the war he made his fortune by financing railroad building He established the Wistar Institute of Anatomy and Biology in Philadelphia with gifts of $1,000,000. See his autobiography (1914, reissued 1937)

wistaria (wĭstār'ēŭ) or **wisteria** (-tēr'-), any plant of the genus *Wistaria,* leguminous woody twining vines cultivated and highly esteemed for the beautiful pendent clusters of pealike flowers, lilac, white, or pink There are two species native to the United States and found mostly in the Southeast, but the showier Asiatic are usually cultivated Rambling or trained on trellises, porches, or as a standard, they are commonly spring blooming, one variety of the Japanese wistaria has clusters sometimes 3 ft long The pinnately compound leaves often open after the flowers

Wistar Institute of Anatomy and Biology, in Philadelphia, established in 1892 It is an independent research institution and has a museum It publishes learned journals

Wister, Owen (wĭ'stur), 1860–1938, American author, b Philadelphia, grad Harvard (B A, 1882, LL B, 1888) Between degrees he studied music in Paris In 1889 he was admitted to the bar in Pennsylvania Trips to the West for his health gave him material for short stories and for his greatest literary success, *The Virginian* (1902), a novel of Wyoming, a best seller which was dramatized and was several times made into moving pictures Though in some of his political writings he was bitingly satirical, he wrote a pleasant biography in 1930 of his long-time friend Theodore Roosevelt. Other books by Wister include the novel *Lady Baltimore* (1906) and the short stories *Red Men and White* (1896), *Lin McLean* (1898), and *Philosophy 4* (1903). A collected edition of his works appeared in 1928.

wisteria: see WISTARIA

Witbank (wĭt'bängk), town (pop. 12,727), Transvaal, Union of South Africa. It is a mining town in

the largest coal field of South Africa, and it is connected by rail with Johannesburg.

witchcraft, practice of sorcery or MAGIC. It is a well-known fact that when a new religion is adopted in a country, the gods of the old become the devils of the new As the Christian Church came into power in the Western world, it banned pagan religion and magic, although many of the common people and many of the clergy retained faith in it Thus witchcraft, a survival of pagan magic, came into disrepute Throughout the Middle Ages a long struggle was waged, without notable violence, but by the 14th cent, witchcraft had become elaborated into a complex system and the witch and wizard were universally believed to be malignant beings who practiced all forms of the black art The witch was believed to be able to change into a cat or a werewolf (see LYCANTHROPY) or to summon apparitions Religious persecution of supposed witches set in early in the 14th cent Trials, convictions, and executions became common throughout Europe Confessions were extorted under the influence of fear and hysteria. The persecution was tireless From 1450 to 1650 thousands were executed Burning, as for heresy, was common Suspicion fell on many because of interest in scientific experiment An accusation of witchcraft became an easy means of destroying an enemy or confiscating his estate The crusade lasted from the 14th to the 18th cent The American colonies shared in the fanaticism, which broke out in Massachusetts, Connecticut, and Virginia, and was particularly active in Salem, Mass., where in 1692 a score of persons were hanged The last execution took place in Scotland in 1722 See M A Murray, *Witchcraft in Western Europe* (1921), J W Wickwar, *Witchcraft and the Black Art* (1925), Montague Summers, *History of Witchcraft and Demonology* (1926), Charles Williams, *Witchcraft* (1941)

witch hazel, North American deciduous shrub or small tree (*Hamamelis virginiana*) native E of the Rockies It bears bright yellow flowers, usually in the late fall or in the winter at the same time that the fruit of the previous season's flowers is maturing The flowers are composed of four long and very narrow petals The ripening fruits discharge their seeds by an explosive action, often shooting them several feet Other plants were known in the Old World as witch hazel, but the American shrub seems to have been named for the resemblance of its leaves to the hazel, and, like hazel, the witch hazel branch has been used as a DIVINING ROD The native species, as well as Asiatic varieties which bloom in February or March, are cultivated to some extent Witch hazel is the source of an astringent obtained from the leaves and bark

witenagemot (wĭ"tunugĭmōt') [Old Eng., = meeting of counselors], a session of the counselors (the witan) of a king in Anglo-Saxon England Such a body existed in each of the Anglo-Saxon kingdoms Composed of the powerful earls, the higher churchmen, and the influential thanes, it was aristocratic, and its membership at any one time was dependent upon the appointments of the ruling king or his immediate predecessors These facts discredit the old argument that the witenagemot was similar to the later popular, democratic Parliament and make it clear that the witan were more analogous to the later privy councilors On the other hand, the witenagemot had considerable powers Although the number of members and the functions varied with each realm and each king, the counsel and assent of the group were usually sought by the king in matters of laws, taxes, foreign negotiations, national defense, and the bestowal of privileged estates Probably only rarely would the witan directly oppose the king, but their potential independence must have served as a check on the monarch Furthermore, although records are rather scarce, it appears probable that the witan, especially in Wessex, had the power to elect the king Since the kingship was largely hereditary, such a ceremony was usually perfunctory, but the witan upon occasion actually selected the king At the time of the Norman Conquest it probably bequeathed to the succeeding great council the idea of a limited monarchy

Wither, George (wĭ'dhûr), 1588–1667, English poet, b Hampshire, studied at Oxford For his satires, *Abuses Stript and Whipt* (1613), he was put in prison, where he wrote his pastorals in *The Shepherd's Hunting* (1615) Later works are *Fidelia* (1615) and *Fair Virtue* (1622), in the latter appears his lyric beginning, "Shall I, wasting in despair" About 1620 his writings took on a religious tone and, though copious, were less graceful He served in the Revolution as a Puritan captain and politician and was in disfavor after the Restoration

Witherspoon, Herbert (wĭ'dhûrspōōn), 1873–1935, American basso, b Buffalo, N Y, grad Yale, 1895, studied music with Edward MacDowell He studied both painting and singing in New York, London, Paris, and Berlin In 1898 he made his operatic debut, and from 1908 to 1916 he was leading basso of the Metropolitan Opera Company, afterward devoting his time to concerts and to teaching. He was president (1925–29) of the Chicago Musical College, director for a short time of the Chicago Civic Opera Company, and director (1932–33) of the Cincinnati Conservatory In 1935 he succeeded Giulio Gatti-Casazza as director of the Metropolitan Opera Company, but died shortly thereafter.

Witherspoon, John, 1723–94, Scottish-American Presbyterian clergyman and signer of the Declaration of Independence, b Yester, near Edinburgh, Scotland He was educated at the Univ of Edinburgh From 1745 to 1768 he occupied pastorates in Scotland A conservative in religion, he wrote *Ecclesiastical Characteristics* (1753) as an attack on those ministers who preached humanism instead of dogmatic truth, and in his *Serious Enquiry into the Nature and Effects of the Stage* (1757) he maintained that drama was not an innocent recreation but an arouser of immoral passion His intellectual prominence brought him the appointment in 1768 as president of the College of New Jersey (now Princeton Univ.) In the United States he promoted the growth of the Presbyterian Church (often heading the General Assembly) and healed schisms Despite his original feeling that the clergy should avoid politics, he accepted a position as delegate from New Jersey to the Continental Congress He sat in Congress almost continuously from 1776 to 1782 and wrote much in behalf of the Revolution His last years were spent in restoring the college and in participating in New Jersey politics His collected works appeared in nine volumes in 1815 See biographies by D. W. Woods (1906) and V L Collins (1925)

witness see EVIDENCE

Witos, Wincenty (vĕntsĕn'tĭ vē'tôs), 1874–1945, Polish politician He founded (1919) the Polish Peasant party and was three times premier (1920–21, 1923, 1926) His program, which called for agrarian reform, caused PILSUDSKI to carry out his coup d'état of 1926, which overthrew Witos Imprisoned (1930), Witos later fled to Czechoslovakia but returned to Poland in 1939

Witowt (vĭ'tôft), Lithuanian *Vytautas* (vētou'tăs), 1350–1430, grand duke of Lithuania (1392–1430), first cousin of Ladislaus Jagiello (King LADISLAUS II of Poland) His father had been deprived of his share in the inheritance on the death of Grand Duke Olgerd, and Witowt grew up as a refugee with the Teutonic Knights With the help of the knights he secured (1392) recognition as grand duke of Lithuania from Ladislaus, who, however, remained his suzerain His ambition to be crowned king of Lithuania was frustrated by his cousin, and relations between Witowt and Ladislaus were often strained Lithuania under Witowt reached its greatest extent—from the Baltic to the Black Sea—and its cultural flowering He sought to reduce the Tatars of the Golden Horde to vassalage, but was defeated by them in 1399 In 1410 he helped Ladislaus defeat the Teutonic Knights at Tannenberg

Witt, Cornelius de (dĭ wĭt', Dutch kôrnā'lĭûs du vĭt'), 1623–72, Dutch naval officer, brother of Jan de Witt Imprisoned on the charge of plotting against William of Orange, he was killed by a mob while his brother was visiting him

Witt, Jan de (yan'), 1625–72, Dutch statesman Like his father, Jacob de Witt, burgomaster of Dort, he became a leading opponent of the house of Orange and played a vital role in the three successive DUTCH WARS As leader of the republican party, he was elected (1653) grand pensionary, thus acquiring control of state affairs He represented the mercantile interests and accordingly encouraged industry and commerce He ended the disastrous war with England (first of the Dutch Wars) in 1654, but the Restoration in England constituted a danger to Dutch maritime and political freedom and led to the renewal of the war in 1665 The favorable terms of the Treaty of Breda (1667) were largely due to Jan de Witt In order to end the power of the house of Orange he secured passage of the Eternal Edict, which abolished the office of stadholder He helped form the TRIPLE ALLIANCE of 1668 against Louis XIV, thus ending the War of Devolution, the Treaty of AIX-LA-CHAPELLE (1668) was the climax of his career In 1672 Louis XIV invaded Holland and began the third of the Dutch Wars Jan de Witt sought to negotiate peace, but his offer was spurned by the French Popular feeling suddenly turned violently against him and in favor of William of Orange (later WILLIAM III of England), who by popular acclaim was made stadholder De Witt resigned, but was exonerated of treason charges However, when he visited his brother, Cornelius de Witt, in prison, a mob gathered outside, fought its way into the prison, and hacked the two brothers to pieces, hanging their scattered limbs on lamp posts Jan de Witt was one of the greatest of Dutch statesmen and patriots, a patron of the sciences, and a close friend of Spinoza

Witt, city (pop 1,490), S central Ill, SSE of Springfield, inc 1911

Witte, Count Sergei Yulyevich (sĭrgā' yōō'lyĭvĭch vĭ'tŭ), 1849–1915, Russian statesman A railroad engineer, he became minister of communications (1892) and minister of finance, commerce, and industry (1892–1903). He introduced the gold standard, reformed the finances, encouraged the development of Russian industries with the help of foreign capital, and opened up Siberia to large-scale colonization by having the TRANS-SIBERIAN RAILROAD built While these achievements greatly reduced the gap between the industrial development of Russia and that of Europe, it also created a new industrial proletariat, concentrated in a few large cities, and thus contributed to the Revolution of 1905 The Russian defeat in the Russo-Japanese War and the Revolution of 1905 resulted in Witte's return to favor, from which he had fallen in 1903 He secured unexpectedly favorable terms as negotiator at the Treaty of Portsmouth, N H, with Japan, was rewarded with title of count, and after his return to Russia drew up the manifesto of Oct. 17, 1905, by which Nicholas II promised constitutional government under an imperial DUMA Appointed premier (Oct, 1905), Witte sought to steer a middle course between the Social Democrats and the reactionaries After suppressing a workers' uprising in Moscow (Dec, 1905–Jan, 1906), he was dismissed (May, 1906), by Nicholas II, who now felt strong enough to restore a reactionary regime. He was succeeded as premier by Goremykin and, shortly afterward, by Stolypin

Wittekind, Saxon leader see WIDUKIND

Wittekind (wĭ'tŭkĭnd), **Widukind** (wĭ'dōōkĭnd), or **Wettekind** (wĕ'tŭkĭnd), d c 1004, Saxon historian, a monk, frequently called Wittekind of Corvey He wrote the *Res gestae Saxonicae*, a history of the Saxons from earliest times through the 10th cent.

Wittelsbach (vĭ'tulsbakh), German dynasty which ruled Bavaria from 1180 until 1918 It takes its name from the ancestral castle of Wittelsbach (destroyed 1209) in Upper Bavaria In 1180 Emperor Frederick I invested Count Otto of Wittelsbach with the much-reduced duchy of BAVARIA, of which he had deprived the Guelphic duke, Henry the Lion In 1214 Otto's grandson, Otto II, also received the Rhenish Palatinate After Otto's death (1253) the Wittelsbach possessions were divided between an elder branch, which received the Rhenish Palatinate and W Bavaria, and a younger branch, which received the rest The family possessions grew in the following century, and the Wittelsbachs reached their zenith when Duke Louis III, of the elder branch, became emperor as Louis IV (reigned 1314–47) LOUIS IV, who also temporarily attached BRANDENBURG to his dynasty, redivided (1329) the Wittelsbach lands in a partition which remained basic for more than four centuries. According to the division the elder branch, descended from Louis's brother Rudolf, received the Rhenish and the Upper Palatinate, while the younger branch, descended from Louis's first marriage, received Bavaria proper The electoral dignity was to alternate between the two branches, but in 1356 the Golden Bull settled it definitely on the Palatinate branch Both branches underwent several subdivisions Bavaria was subdivided into the duchies of Bavaria-Munich (ruled by the senior line of the Bavarian branch), Bavaria-Landshut, and Bavaria-Straubing until the early 16th cent, when Duke Albert IV reunited Bavaria and introduced succession by primogeniture (For the subdivisions of the Palatinate branch, which is not treated here in detail, see PALATINATE.) Louis IV's second marriage, with Margaret, countess of Hainaut, Holland, and Zeeland, produced a third branch of the Wittelsbach dynasty, this branch ruled the three countries until 1433, when Philip the Good of Burgundy (himself a descendant of Louis IV through his mother) seized them from Countess Jacqueline, his first cousin In the 16th and 17th cent the Bavarian Wittelsbachs championed the Catholic cause while the Palatinate branch was leading the Protestant princes As a result of the defeat of the elector palatine, known as FREDERICK THE WINTER KING of Bohemia, his electoral voice was transferred (1623) to Duke MAXIMILIAN I of Bavaria, who also received the Upper Palatinate, but a new electorate was created in 1648 for Frederick's son, to whom the Rhenish Palatinate was restored Elector Charles Albert of Bavaria was chosen (1741) emperor as CHARLES VII, but he never actually ruled, with the death (1777) of his son, Maximilian III, the Bavarian branch of the Wittelsbachs died out, and the Palatinate-Sulzbach line acceded in Bavaria in the person of Elector Charles Theodore, who died in 1799 without issue He was succeeded by the duke palatine of Zweibrücken, senior member of the Palatinate branch, who thus united all Wittelsbach lands under his sole rule and who in 1806 became king of Bavaria as MAXIMILIAN I His successors as kings of Bavaria were LOUIS I, MAXIMILIAN II, LOUIS II, OTTO I, and LOUIS III, who abdicated in 1918. A collateral line, descended from the counts palatine of Birkenfeld, became known as the ducal line after the creation of the Bavarian kingdom in 1806, its head went under the title of "duke in Bavaria"; Empress Elizabeth of Austria and Queen Elizabeth of the Belgians issued from the ducal line. The Wittelsbachs have intermarried for centuries with all the royal families of Europe A line of the Palatinate branch (see ZWEIBRÜCKEN) ruled Sweden from 1654 to 1741 Prince Rupert, son of King

Louis III and claimant to the Bavarian throne, also inherited, through a complicated succession, the claim of the STUART dynasty to the British throne

Witten (vĭ'tŭn), city (pop 69,384), Westphalia, NW Germany, on the Ruhr An industrial center of the Ruhr district, it was heavily damaged in the Second World War

Wittenberg (vĭt'ŭnbĕrk), city (pop 41,304), in the former Saxony prov of Prussia, E Germany, on the Elbe, after 1945 in Saxony-Anhalt Now a railroad and manufacturing center, the city has played a historic role of great importance Wittenberg was (1273–1422) the seat of the Ascanian dukes of Saxe-Wittenberg (see SAXONY), who in 1356 became electors of Saxony In 1423 Saxe-Wittenberg passed to the margraves of Meissen, of the house of Witten, who in 1425 were given electoral rank. Elector Frederick III founded (1502) the Univ of Wittenberg, which became the center of the Reformation when Martin LUTHER and Melanchthon taught here In 1517 Luther nailed his 95 theses on the door of the Schlosskirche [castle church], and in 1520 he burned the papal bull against him in the market place The first complete Lutheran Bible was printed (1534) at Wittenberg In 1547 Emperor Charles V captured Wittenberg after the battle of Mühlberg, where Elector John Frederick I of Saxony was captured By the Capitulation of Wittenberg, in the same year, John Frederick, representing the Ernestine line of the house of Wettin, ceded the electoral dignity and the duchy of Saxony to Maurice, of the collateral Albertine line; he also ceded the principality of Sagan and other territories to Bohemia, retaining only the Thuringian duchies for his line Primarily the focus of the Lutheran Reformation, 16th-century Wittenberg was also a center of German art, where Lucas Cranach, the elder, founded a school of painting The city declined after 1547, when Dresden, residence of the Albertine dukes, replaced it as Saxon capital The Univ of Wittenberg was absorbed by the Univ of Halle in 1817 Among the most notable buildings of Wittenberg are the Schlosskirche (15th cent), where Luther is buried, the town church, where Luther preached, and Luther's house, preserved as a museum

Wittenberg College: see SPRINGFIELD, Ohio

Witthaus, Rudolph August (wĭt'hous), 1846–1915, American toxicologist, b New York city, grad Columbia (B A, 1867), M D New York Univ, 1875, He taught at New York Univ (1876–98) and at Cornell Univ medical college (1898–1911) and was noted as a toxicological expert in criminal trials He wrote *The Medical Student's Manual of Chemistry* (1883, 7th rev ed, *Text-Book of Chemistry*, 1919) and, with T C Becker, *Medical Jurisprudence* (4 vols, 1894–96, rev ed, *Manual o Toxicology*, 1911)

Wittlin, Joseph, Pol Józef Wittlin (yōō'zĕf vĕt'lēn), 1896–, Polish poet, translator, and novelist A volume of anti-war poems appeared in 1920 His principal contribution to Polish literature is the novel *Salt of the Earth* (1936, Eng tr, 1939) He escaped from Poland in 1939 and later came to the United States

Wittstock (vĭt'shtŏk), town (pop 9,460), Brandenburg, NE Germany, NW of Berlin Here in 1636 the Swedes under Baner defeated the Saxon and imperial forces under Hatzfeld in an important battle of the Thirty Years War

Witwatersrand (wĭtwō'turərănd") [Afrikaans, = white water ridge] or **the Rand,** region, Transvaal, South Africa It includes a reef of gold-bearing conglomerate which is estimated to produce about one third of the world's gold The area is c 100 mi long and relatively narrow Almost entirely urban, it has a population exceeding 1,000,000 and includes over 400,000 Europeans Johannesburg (the largest city of South Africa), Springs, and Benoni are situated here Surface gold was discovered in 1884, and the news was made public in 1886 In the ensuing boom the main reef was reached in 1889, at a depth of 581 ft When the United States embarked (1934) on a program of unlimited gold purchase, profitable mining could be conducted at depths of even 12,000 ft Workers underground (nearly all of them are natives) exceed 200,000 See Lewis Nesbitt, *Gold Fever* (1936), Adèle Lezard, *The Great Gold Reef* (1937)

wizard: see WITCHCRAFT.

Wladimir. For Russian rulers thus named, see VLADIMIR

Wladislaw, Wladyslaw, and **Wladislas,** Pol *Władysław* For Polish kings thus named, see LADISLAUS

Wloclawek, Pol *Włocławek* (vwôtswä'vĕk), city (pop 48,126), Pomorze prov, NW Poland Founded in the 12th cent, it has since then been an episcopal see, its cathedral was built in the 14th cent Wloclawek was included (1815) in the Russian Empire and was known in Russian as Vlotslavsk It is a diversified industrial center of an agricultural region There are salt domes, lignite deposits, and sulphur springs in the vicinity

Wlodzimierz, Ukraine see VLADIMIR-VOLYNSKI

Woburn (wōō'bŭrn), market town (pop 951), Bedfordshire, England Near it is Woburn Abbey (seat of the duke of Bedford), an 18th-century mansion containing noteworthy art collections, on the site of a Cistercian abbey founded in 1145 by monks from Fountains Woburn was the site of one of the Eleanor Crosses (see ELEANOR OF CASTILE). An agricultural experimental station was established on the Bedford estate in 1876, control was given to the Rothamsted Experimental Station in 1926.

Woburn (wōō'bŭrn), city (pop 19,751), NE Mass, NNW of Boston; settled 1640, inc as a town 1642, as a city 1888 Glue, gelatin, and leather goods are the chief products

Wodehouse, Pelham Grenville (wōōd'hous), 1881–, English humorist He is popular in both England and America for his amusing stories, centering, in earlier volumes, about Psmith and, in later ones, about Bertie Wooster and his butler, the immutable Jeeves He has collaborated with others in plays and musical comedies as well In 1941, while he was a prisoner of the Germans, he made five broadcasts for his captors

Woden (wō'dĭn), the chief Germanic god, called by the Norse Odin and by Wagner Wotan Although his cult was important mainly in Germany and England, he is known mostly from Icelandic literature, which makes him the all-wise head of Asgard and Valhalla, patron of poetry, but virtually second in importance to strong-armed Thor, his son Frigg is his consort Odin has one eye, for he gave the other for some of his knowledge The fact that Odin is the host of dead heroes, but less interested in war than Thor, may mean that Thor, in the north, has taken over some of Odin's warlike qualities, the Woden of the more southerly Germans was especially god of battle He was identified with Mercury, probably because of his wisdom and magic, the Latin Mercury's day has become Woden's day or Wednesday

Wodrow, Robert (wōd'rō), 1679–1734, Scottish ecclesiastical historian His principal work is a huge compilation called *The History of the Sufferings of the Church of Scotland from the Restoration to the Revolution* (1721–*22*)

Woestijne, Karel van de (kä'rŭl vän du vōō'stĭnu), 1878-1929, Flemish symbolist poet and novelist He had also some name as a painter Poems of his are translated in Jethro Bithell, *Contemporary Flemish Poetry* (1917)

Woffington, Margaret (Peg Woffington), 1714?–1760, English actress, b Dublin Her charm and beauty as a child attracted attention, and at the age of 10 she acted Polly Peachum in a Lilliputian production of *The Beggar's Opera* She next obtained a reputation as a dancer in interludes and in 1737 made her first important appearance as Ophelia in Dublin Her greatest popular role was the "breeches" part, Sir Harry Wildair, in Farquhar's *Constant Couple*, which in 1740 led to her engagement by John Rich for Covent Garden From 1742 to 1748 she supported Garrick in such roles as Cordelia in *King Lear* and Lady Anne in *Richard III* at Drury Lane and Covent Garden and in Dublin She had grace, vivacity, and a certain archness which helped her to overcome an inadequate voice Her attachment to Garrick was the most notorious of her numerous affairs Ill-health compelled her to retire in 1757 Charles Reade's play *Masks and Faces* and his novel *Peg Woffington* are based on her life

Wöhler, Friedrich (frē'drĭkh vō'lur), 1800–1882, German chemist He studied under Leopold Gmelin and J J Berzelius and was professor at the Univ of Gottingen from 1836 He devised (1827) a new method for isolating aluminum and in 1828 used the method to isolate beryllium and yttrium His synthesis (1828) of urea, the first synthesis of an organic compound from inorganic material, marked a new era in organic chemistry and contributed greatly to the theory of isomerism His work on benzoic acid was important to the chemistry of metabolism His works on chemistry, widely used as texts, include *Outlines of Organic Chemistry* (1840, Eng tr, 1873)

Wohlgemuth, Michael. see WOLGEMUT, MICHAEL.

Woking (wō'kĭng), urban district (1931 pop. 29,931, 1947 estimated pop 44,740), Surrey, England, SW of London, on the Wey and on the Basingstoke Canal It is a resort. Near by are an Oriental institute and museum, a Mohammedan mosque, Brookwood cemetery, and the ruins of Newark priory.

Wolcot, John (wōōl'kut), pseud **Peter Pindar,** 1738–1819, English poet, a physician He satirized the Royal Academy in *Lyric Odes to the Royal Academicans* (1782–83), Boswell and Mme Piozzi in *Bozzy and Piozzi* (1786), and George III in *The Lousad* (1785–95) and other poems.

Wolcott, Edward Oliver (wōōl'kut), 1848–1905, American statesman and lawyer, b Longmeadow, Mass, grad Harvard Law School, 1871. Wolcott served as a private during the last months of the Civil War He moved (1871) to Colorado, where he was made (1876) district attorney and then was elected (1878) to the state senate; there he was the Republican leader. He developed a large law practice in Denver He was U.S Senator from 1889 to 1901 Although an advocate of bimetallism, he supported the Republicans against the Democrats in the 1896 presidential campaign. He was sent (1897) by McKinley to represent the United States at an international conference on bimetallism. See biography by T. F. Dawson (1911).

Wolcott, Oliver, 1726–97, American Revolutionary patriot, signer of the Declaration of Independence, b South Windsor (then in Windsor), Conn., grad Yale, 1747, son of Roger Wolcott He fought in King George's War and upon his return gave up the study of medicine to enter a legal and public career at Litchfield. He held several judicial posts and in 1775 was named an Indian commissioner to keep the Iroquois neutral. Wolcott was a general in the Saratoga campaign, a delegate to the Continental Congress (1775–78, 1780–84), and lieutenant governor (1786–96) and governor of Connecticut (1796–97)

Wolcott, Oliver, 1760–1833, American statesman, b Litchfield, Conn, grad. Yale, 1778, son of Oliver Wolcott (1726–97) He served in the American Revolution and later studied law In 1784 he and Oliver ELLSWORTH served as commissioners in adjusting Connecticut's claims against the United States Wolcott served in the Federal government under Alexander Hamilton, whom he succeeded (1795) as Secretary of the Treasury. He supported Hamilton against John Adams and gained considerable unpopularity, he was in 1800 forced to resign He continued to be prominent as a merchant, was a judge, the presiding officer at the Connecticut constitutional convention (1817), and governor of the state (1817–27)

Wolcott, Roger, 1679–1767, colonial governor of Connecticut, b Windsor, Conn A member of one of the most influential families in Connecticut, he was early an outstanding man in the colony In 1711 he joined in the expedition against Canada in Queen Anne's War (see FRENCH AND INDIAN WARS), and in King George's War he had the rank of major general and was second in command on the famous Louisburg expedition (1745) He was a judge and was prominent in the colonial assembly and the executive council before becoming governor (1750–54) He was the father of Oliver WOLCOTT. He wrote *Poetical Meditations* (1725), the first book of verse published in Connecticut The journal he wrote when on the Louisburg expedition was published (1916) by the Connecticut Historical Society

Wolcott 1 Town (pop 1,765), central Conn, NE of Waterbury, settled 1731, inc 1796. Bronson Alcott was born near by. **2** Village (pop 1,326), W central N Y., E of Rochester, in a fruit region, inc 1873

Wolf, Christian von: see WOLFF, CHRISTIAN VON

Wolf, Friedrich August (frē'drĭkh ou'gōōst vôlf), 1759–1824, German classical scholar and philologist He was professor of philosophy at Halle after 1783 and was a friend of Goethe and other leaders of German culture. He was in a sense the founder of modern philology, the "new science" which he favored as a means of gaining greater knowledge of the classical past He wrote a critical work, *Prolegomena ad Homerum* (1795), which not only opened the "Homer question" by suggesting that the Homeric works were of composite authorship but also by its methods pointed the way to the higher criticism of the Bible in the 19th cent After 1807, when the Univ of Halle was suppressed, Wolf lived in Berlin

Wolf, Hugo (hōō'gō vôlf), 1860–1903, Austrian composer of over 300 lieder, including settings of poems of Goethe and Mörike He wrote musical criticism in the Vienna *Salonblatt*, thereby making many enemies He died in an insane asylum See biography by Ernest Newman (1907)

Wolf, Max Franz Joseph Cornelius (maks' frănts' yō'zĕf kôrnā'lyōōs vôlf'), 1863–1932, German astronomer He became director (1893) of the Königstuhl Observatory near Heidelberg and professor (1902) at the Univ of Heidelberg In 1891 he introduced astronomical photography, which greatly facilitated the discovery of asteroids (or minor planets) He discovered (1884) Wolf's comet, which has a period of 7 7 years

Wolf, river, c 220 mi long, rising in NE Wisconsin and flowing swiftly S to the Fox, which it enters c 10 mi above Oshkosh It played a role in the logging industry

wolf, wild animal (genus *Canis*) of the dog family, formerly widely distributed chiefly in the Northern Hemisphere. Fossil remains of wolves found in limestone caves and in sedimentary deposits of both Europe and North America and in asphalt beds in California indicate that the wolves of the Pleistocene were larger than those of the present day. In appearance the wolf is somewhat similar to the German shepherd dog Wolves are carnivorous, and because they pursue and kill sheep, cattle, deer, and many other wild and domestic animals, man has for centuries hunted them. It is believed that wolves usually mate for life, and for a time after the young are born they live as a family unit, the male hunts and carries food to the female and young until they are able to hunt together. Generally after they are about a year old, wolves run in packs at various seasons during the year, their strength, speed of running, and the large numbers that often make up a pack result in widespread destruction of wild and domestic animals. The

European gray wolf (*Canis lupus*) and its subspecies formerly had a wide circumpolar distribution; it was found throughout most of Europe, Asia and North America It has a rough coat, grayish mixed with black and brown or yellow, erect ears, and a bushy tail. In body length the males range from 50 to more than 60 in ; they weigh over 100 lb Gradually the wolf was exterminated in most settled regions Some authorities distinguish the larger North American gray wolf (also called timber wolf and lobo) as a separate species rather than a subspecies of the European species In the Eastern Hemisphere wolves have been exterminated except in some forest and steppe regions, in North America wolves are confined chiefly to sections of Alaska, N and E Canada, the northern parts of Michigan, Wisconsin, and Minnesota, and portions of some of the prairie states There are, however, some with a more southerly range. The Texas red wolf (*C niger* or *C rufus*) is a small North American wolf apparently not directly related to European forms The coyote and jackal also belong to the genus *Canis* In arctic regions of North America is found a white wolf (*C tundrarum*), and a pale variety of the European wolf is found in N Siberia Some species of wolves remain in parts of China and Japan

Wolfe, Charles, 1791–1823, Irish poet He is remembered for his stirring poem, *The Burial of Sir John Moore* (1817)

Wolfe, Humbert, 1885–1940, English poet and critic, b Milan He entered the civil service in 1908, served in the ministry of munitions in the First World War, and later became deputy secretary of the ministry of labor His fragile verse appeared in *London Sonnets* (1919), *Kensington Gardens* (1924), *Requiem* (1927), *This Blind Rose* (1928), *Kensington Gardens in Wartime* (1940), and other volumes He was also known for his satires, *Lampoons* (1925) and *News of the Devil* (1926), and his translations of Greek epigrams His critical works include biographies of Tennyson and George Moore, *Dialogues and Monologues* (1929), and *Signpost to Poetry* (1931), *Now a Stranger* (1935) and *The Upward Anguish* (1938) are both autobiographical

Wolfe, James, 1727–59, British soldier His conduct was notable at the battle of Dettingen (1743) in the War of the Austrian Succession, at Falkirk and Culloden in the Jacobite rising of '45, and at the battle of Lawfeldt (1747), again on the Continent, after Lawfeldt he was publicly thanked by the duke of Cumberland Later he attracted Pitt's notice, and he was made (1758) second in command to Jeffrey Amherst in the French and Indian War By handling the siege operations ably he became the hero of Louisburg, and he was rewarded with the command of an expedition against Quebec, which he himself had urged After frontal attacks on the positions of MONTCALM at Quebec had failed, Wolfe took 5,000 men in boats down the St Lawrence by night and, having arrived at the Plains of ABRAHAM, forced an open battle with the French Wolfe was victorious, but in the hour of victory he fell Montcalm died within a few minutes of General Wolfe's death The fall of Quebec was decisive in giving New France to England One of Wolfe's men told afterward that as they were rowing to the attack on Quebec, Wolfe recited Gray's *Elegy*, and remarked at the end "Gentlemen, I would rather have written those lines than take Quebec" Thackeray draws Wolfe vividly in *The Virginians* See Francis Parkman, *Montcalm and Wolfe*, biography by W T Waugh (1934)

Wolfe, Thomas Clayton, 1900–1938, American novelist, b Asheville, N C , grad Univ of North Carolina, 1920, M A Harvard, 1922 He was an instructor (1924–30) at New York Univ , and thereafter wrote mostly in New York or abroad His first published writing (1924) was a short play concerning Carolina mountaineers, other plays, written probably by 1926, include a full-length drama, *Mannerhouse* (1948) His novels are in effect pieces of a Gargantuan whole, a treatment at once realistic and lyric of the American scene They are drawn in profuse detail from Wolfe's prodigious memory of his own experiences *Look Homeward, Angel* (1929) had as its sequel *Of Time and the River* (1935) Posthumously edited and published were *The Web and the Rock* (1939) and *You Can't Go Home Again* (1940) and the stories and fragments in *The Hills Beyond* (1941) Wolfe also wrote a short novel, *A Portrait of Bascome Hawke* (1932), and short stories in *From Death to Morning* (1935) and *Stories by Thomas Wolfe* (1944), he discussed his own work in *The Story of a Novel* (1936) See his letters to his mother (ed by J S Terry, 1943), study by H J Muller (1947), P J Johnson, *Hungry Gulliver* (1947), bibliography by G R Preston, Jr (1943)

Wolfeboro, town (pop 2,636), E N H., on SE Lake Winnipesaukee, settled c 1760 There are many summer homes and camps. In 1940 an American Seminar for European refugees was established at Brewster Academy here by the Friends

Wolfe City, town (pop 1,339), E Texas, NE of Dallas; inc. 1873 It is a trade and processing center of a farm area in the northeast corner of the state.

Wolfenbüttel (vôl'fənbü"tûl), town (pop 31,546), Brunswick, central Germany, on the Oker river and S of Brunswick It is the market center of a truck-gardening region Wolfenbüttel grew around a castle which became (c 1280) a favorite Guelphic residence, and it was the residence of the dukes of Brunswick-Wolfenbüttel (see BRUNSWICK, state) until 1753. The famous ducal library, founded in the 17th cent , contains about 350,000 volumes, some 3,000 incunabula, and more than 7,000 manuscripts Leibniz was librarian here, as was G E Lessing from 1770 to his death Lessing's house, where he wrote *Nathan the Wise*, still stands The former ducal palace (15th-18th cent) now houses several schools Wolfenbüttel has retained many 17th-century half-timbered houses

Wolff, Caspar Friedrich (käs'pär frā'drĭkh vôlf'), 1733–94, German biologist, a founder of observational embryology He reintroduced the theory of epigenesis to replace the current theory of preformation, and he directed attention to the comparative development of plants and animals Wolff carried on his research chiefly at the Academy of Sciences at St Petersburg

Wolff or Wolf, Christian von (krĭs'tyän fŭn vôlf'), 1679–1754, German philosopher One of the first to use the German language instead of Latin, he systematized and popularized the doctrines of Leibniz Wolff studied at Jena and taught at Leipzig before going to a professorship at Halle (1706–23) His doctrines of apparent fatalism aroused the Pietists to secure his banishment, which he spent as professor at Marburg (1723–40) Recalled to Halle by Frederick the Great in 1740, he became chancellor of the university in 1743 Wolff's major work was *Vernünftige Gedanken von Gott, der Welt, und der Seele der Menschen* (rational thoughts on God, the world, and the souls of men) (1719) The Leibnizian doctrine of preestablished harmony was more prominent than the monad theory in Wolff's presentation, though both were considerably moderated He is chiefly remembered for his broad concept of philosophy, his insistence on clarity and precision, and his devotion to the power of reason and mathematics See Harald Hoffding, *A History of Modern Philosophy* (Eng tr , 2 vols , 1900)

Wolff, Elisabeth (Bekker) (ālē'zäbĕt bĕ'kur vôlf'), 1738–1804, Dutch novelist She wrote in collaboration with her close friend, Agatha Deken (a'gatä dā'kun), 1741–1804 The best known of their works are two epistolary novels, *Historie van Mejuffrouw Sara Burgerhart* (1782–83) and *Historie van Willem Leevend* (1784–85) These sentimental novels of the growing romantic school are important in Dutch literature, the influence of Richardson and (to a lesser degree) of Fielding is very clear in them Elisabeth Wolff is called also Elisabeth Wolff-Bekker and Betje Wolff, Agatha Deken is also called Aagje Deken

Wolff, Frank Alfred (wŏlf), 1871–1946, American physicist and electrical engineer, b Baltimore, grad Johns Hopkins (B A , 1890, Ph D , 1893) He was professor at George Washington Univ from 1895 to 1908, from 1897 he was associated with the National Bureau of Standards

Wolf-Ferrari, Ermanno (ārman'nō vôlf'-fär-ra'rē), 1876–1948, German-Italian composer, b Venice, studied in Germany Most of his operas, which are in a modern *opera buffa* style, similar to that of the 18th cent , were first produced in Germany Best known are *The Secret of Suzanne* (1909) and *The Jewels of the Madonna* (1911), his one tragic opera

wolfhound, name applied to several breeds of dogs, especially to the Irish wolfhound and the Russian wolfhound (see BORZOI) The Irish wolfhound is an ancient breed and despite its name is believed not to have originated in Ireland In form it somewhat resembles the deerhound and the greyhound but is much heavier and more robust, it is less massive than the great Dane In early times it was used for hunting large game The tallest of all dogs, the males stand a minimum of 31 in at the shoulder and should weigh at least 120 lb Its harsh wiry coat overlies a dense undercoat In color it may be light cream, brindle, or various shades of gray, ranging to almost black

Wolf Point, city (pop 1,960), co seat of Roosevelt co , NE Mont , on the Missouri, settled 1878, inc 1915

wolfram (wŏol'frŭm), white, very hard metallic element (symbol=W, for physical constants, see ELEMENT, table) Formerly it was generally called tungsten, a name still sometimes used The metal is ductile, and wires made of it, even those of very small diameter, have extremely high tensile strength The element is used extensively for electric-lamp filaments because of its very high melting point and the fact that much less electricity is required in operation (than for carbon, for example) STELLITE, CARBOLOY, and steel alloyed with wolfram are of importance in industry because of their hardness and strength The element is resistant to ordinary acids and aqua regia, but dissolves in a mixture of hydrofluoric and nitric acids It forms compounds with carbon, chlorine, oxygen, sulphur, and some other elements The trioxide, occurring in nature as the mineral wolfram ochre, is the anhydride of wolframic acid (or tungstic acid). Scheelite (the calcium salt) and WOLFRAMITE are the chief minerals in which wolfram is present The element does not occur by itself in nature, but large deposits of the ores are found in various parts of the world, especially in Asia (chiefly in China and Korea), Europe, South America (chiefly in Bolivia and Brazil), and the United States It is usually prepared from the trioxide by reduction with carbon or hydrogen It has also been obtained directly from the ore by an electrolytic process The element was first isolated (1783) by the Elhuyar brothers from wolframic acid, discovered by Scheele (1781) and called by him tungstic acid, Scheele and T. O Bergman had suggested that a metal could probably be prepared from it

wolframite (wōol'frumīt"), reddish-brown to grayish-black lustrous mineral occurring in crystals of the monoclinic system It is the chief ore of the metal wolfram (or tungsten) The mineral is widely distributed in nature, being found in Europe (England, France, Spain, and Portugal), South America (Bolivia and Brazil), Asia (Burma and China), and the United States (Colorado, New Mexico, Arizona, and South Dakota)

Wolfram von Eschenbach (vôl'främ fŭn ĕ'shŭnbäkh), c 1170–c 1220, German epic poet He was a knight, it is known that he was at the court of Landgrave Hermann von Thüringen in 1203 and that he led a restless, roving life His only complete work and his most famous is the epic *Parzival*, a splendid poem of chivalry, notable for its lyric passages, its humor, and the profundity of its conception (see PARSIFAL) Wolfram's other works include two unfinished epic poems, *Willehalm* and *Titurel*, and lyrics He appears as a character in Wagner's *Tannhäuser* Wolfram is not only one of the greatest poets of the court epic and minnesong, but he also ranks very high among medieval poets of all countries See the interpretation of *Parzival* by M F Richey (1933) and the translation by Jessie Weston (1894)

wolfsbane · see ACONITE

Wolfville, town (pop 1,944), N N S , on the southwest shore of Minas Basin of the Bay of Fundy, at the mouth of the Cornwallis and E of Kentville It is a market center for a dairy and fruitgrowing area Acadia Univ (Baptist, coeducational, 1839) is here Just east is GRAND Pré

Wolfgemut or **Wohlgemuth, Michael** (both mĭkh'ĕl vôl'gumōōt), 1434–1519, German painter, wood carver, and engraver, the master of Albrecht Dürer He directed a flourishing workshop in Nuremberg with many assistants They specialized in carved and paneled altarpieces and retables for the churches The paintings are in the manner of the early Flemish Wolgemut also painted portraits and designed wood engravings for several books

Wolin, Pomerania see WOLLIN

Wollaston, John (wōō'lŭstŭn), English portrait painter Active in America from 1751 to 1769, he worked in New York, Pennsylvania, and the South and painted portraits of Martha Custis (Mrs Washington) and the Custis children His work is in museums of New York and Philadelphia

Wollaston, William Hyde, 1766–1828, English scientist He is known for his discovery (1802) of the dark lines (Fraunhofer lines) in the spectrum, for his invention of the reflecting goniometer (an instrument by which the angles of crystals are measured) and the camera lucida, for his method of making platinum malleable, and for his discovery of the elements palladium and rhodium (1803) He created an endowment with the Wollaston medal to be awarded annually by the Geological Society, London, for outstanding research Wollastonite a mineral compound of calcium, silicon, and oxygen, was named in his honor

Wollaston Lake, area 768 sq mi , NE Sask , NW of Reindeer Lake It is very irregular in shape and drains into the Churchill and Mackenzie river systems

Wolle, John Frederick (wŏ'lĭ), 1863–1933, American conductor, b Bethlehem, Pa He was a founder of the BACH CHOIR of Bethlehem After study in Germany, he became organist of the Moravian Church in Bethlehem, and as early as 1892 his choral union performed the St John Passion and the St Matthew Passion In 1900 (the 150th anniversary of Bach's death), with a Bach choir of 80 singers, he produced the Mass in B Minor For five years, annual Bach festivals were held, the choir grew to 300 voices and was assisted by many noted singers After an interruption of six years, during which Wolle occupied the chair of music at the Univ of California, annual festivals were resumed in 1911

Wollin (vôlēn') or **Wolin** (vô'lēn), island, area 95 sq mi , off the coast of Pomerania, in the Baltic Sea. It is separated from the mainland by the Stettiner Haff and from the neighboring island of Usedom by the Swine The chief town is Wollin or Wolin (pop 2,369) There are several bathing resorts In 1945 the island was transferred to Polish administration

Wollongong (wōō'lun-gŏng), municipality (pop 18,116), New South Wales, Australia, SW of Sydney A coal-mining center, it has large steel mills

Its port is near-by Port Kembla, which has copper refineries as well as steel mills.

Wollstonecraft, Mary (wo͝ol'stŭnkräft, kräft), 1759–97, English writer and feminist At 21 she earned a precarious living as a governess, but wrote a novel, *Mary a Fiction* (pub anonymously, 1788), which, though it attracted little notice, led to her employment as literary adviser to a London publisher She published in 1792 her *Vindication of the Rights of Woman*, the first great feminist document, a work which met with stormy opposition The same year she went to Paris to observe the progress of the French Revolution, remaining through the Reign of Terror In Paris she formed an attachment for Gilbert IMLAY, an American, who left her a year after the birth of a daughter, Fanny, in 1794 In 1795 Mary returned to her former employment in London In March, 1797, she married William Godwin She died in giving birth to a daughter, Mary, who became the wife of Shelley. Besides the *Vindication*, she wrote *Thoughts on the Education of Daughters* (1787), *A Vindication of the Rights of Men* (1790), and *Letters Written during a Short Stay in Sweden, Norway, and Denmark* (1796) See William Godwin, *Memoirs of Mary Wollstonecraft Godwin* (1798), biographies by E R Pennell (1885), Madeline Linford (1925), H R James (1932), and George Preedy (1937)

Wolseley, Garnet Joseph Wolseley, 1st Viscount (wo͝ol'zlē), 1833–1913, British general, b Ireland He fought in Burma (1852–53), the Crimea (1854–56), India (1857), and China (1860) Later he went to Canada where, as commander of the Red River expedition (1870), he suppressed Louis Riel's rebellion at Fort Garry After conducting the Ashanti campaign (1873–74) and reorganizing the administration Zululand (1879–80), he went to Egypt, brilliantly defeated Arabi Pasha at Tell-el-Kebir (1882), and led the vain attempt to relieve General C G Gordon at Khartoum (1884–85) He was a tireless advocate of an efficient modern army and of promotion on merit rather than seniority He wrote *The Story of a Soldier's Life* (1903) See biography by Sir F B Maurice and Sir George Arthur (1924)

Wolsey, Thomas (wo͝ol'zē), 1472?–1530, English statesman and prelate, lord chancellor (1515–29), archbishop of York (1514–30), cardinal of the Roman Church He was graduated young from Magdalen College, Oxford, and served for a while as master of the Magdalen College school He was ordained a priest in 1498 and the following year was made rector at Limington (Somerset) by Thomas Grey, marquess of Dorset, his first patron Wolsey's rise to influence was rapid In 1506 he entered the service of Henry VII as chaplain He acquitted himself with credit on diplomatic missions to Scotland and the Netherlands Upon Henry VIII's accession to the throne in 1509 Wolsey was appointed royal almoner and, in high favor with Henry, was made privy councilor (1511) He successfully organized the army for the invasion of France in 1513 and accompanied Henry on his campaign He helped negotiate the marriage of Mary Tudor, Henry's sister, to Louis XII of France In 1514 he was made bishop of Lincoln and then archbishop of York He had come by this time virtually to control English domestic and foreign policy for the young king His treaty with France was an early triumph By it England held the balance of power between France and the Hapsburgs In 1515 he was made lord chancellor and, at Henry's instance, cardinal After the accession of Charles V to the throne of the Holy Roman Empire (1520), Wolsey inclined his favor to the empire against France, because Charles controlled the Netherlands, England's important neighbor, and Charles's aunt KATHARINE OF ARAGON, was Henry's queen Wolsey twice failed—as a result, partly, of the jealous suspicions of Henry and Charles—to attain the papacy Wolsey's part in devising the heavy taxation in England and the subsequent forced loans and parliamentary "grants," is not clear The policy seems to have been of Henry's making, but Wolsey bore the brunt of the blame when the southern counties became sullen about their burdens Wolsey, whose income was from ecclesiastical sources, kept a great court, built several palaces, such as Hampton Court, and rivaled the king in pomp His enemies at court used the divorce of Katharine as a means to accomplish his ruin To this divorce Wolsey was at first opposed, but at Henry's urging he procured a trial in England from the pope Wolsey presided at the trial with Cardinal CAMPEGGIO, who delayed and temporized on instructions from Rome Wolsey incurred the enmity of Anne Boleyn, and even Henry turned against him In Oct , 1529, he lost the lord chancellorship and all his honors and privileges except the archbishopric He turned to his diocese, which he had never previously visited, and ruled it well for a few months, but he was arrested, probably unjustly, for treason, in Nov , 1530, and died at Leicester on his way to London Wolsey was one of England's ablest statesmen and was largely responsible for England's emergence as a first-rate power in the 16th cent The classic biography by George Cavendish was first published in 1641 See also biographies by Mandell Creighton (1888), A. F. Pollard (1929), and Hilaire Belloc (1930), Ernest Law, *England's First Great War Minister* (1916).

Wolstanton United (wo͝ol'stăntŭn, wo͝ol'stŭn), former urban district (1931 pop 30,525), since 1932 part of Newcastle-under-Lyme, Staffordshire, England, near the Potteries It has coal mines and potteries

Wolverhampton (wo͝ol'vûrhămp"tun) [probably from Wulfruna, sister of King Edgar, founder of the church], county borough (1931 pop 133,212, 1947 estimated pop 158,610), Staffordshire, England, NW of Birmingham It is on the edge of the Black Country, of which it is one of the principal centers, with great factories producing automobiles, aircraft, locomotives, ball bearings, chemicals, and electrical products St Peter's Church dates mostly from the 13th and 15th cent

wolverine or **glutton**, largest of the weasel family, found in the northern parts of North America, Europe, and Asia, usually in evergreen forests and mountains It is a heavy, short-legged animal, 3 to 3½ ft in total length, with long, dark brown fur banded on the flank with chestnut or yellowish white A solitary, strong, and greedy hunter, it will attack any animal except man It robs traps of bait and victims and steals food supplies in camps Its fur is used mainly in the north for lining parkas, since frost does not accumulate on the guard hairs

Wolyn, Ukraine see VOLHYNIA

Woman's Christian Temperance Union, founded at Cleveland, Ohio, in 1874 as a result of the temperance crusade which spread through the Middle West at that time Frances WILLARD was its second president (1879–98), she was responsible for the organization of the world W C T U in 1883 The organization has worked for public education against the use of alcohol, for legislation to prohibit the sale of liquor and harmful drugs, toward the abolishment of prostitution, and for an equal standard of purity for men and women Its official badge is a bow of white ribbon

Woman's Medical College of Pennsylvania, in Philadelphia, chartered and opened 1850 as the Female Medical College of Pennsylvania, renamed 1867

woman suffrage. The right of women to vote, throughout the latter part of the 19th cent an important phase of FEMINISM, was first seriously proposed at Seneca Falls, N Y , July 19, 1848, in a general declaration of the rights of women, prepared by Elizabeth Cady STANTON, Lucretia MOTT, and several others The early leaders of the movement in the United States—Susan B ANTHONY, Mrs Stanton, Lucretia Mott, Lucy STONE, Abby Kelley FOSTER, the Grimké sisters, and others—were usually advocates of abolition and temperance as well, when, however, after the close of the Civil War, the Fifteenth Amendment (1870) gave the franchise to newly emancipated Negro men, but not to the women who had helped win it for them, the suffragists, for the most part, confined their efforts to the struggle for the vote The National Woman Suffrage Association, led by Miss Anthony and Mrs Stanton, was formed in 1869 to agitate for an amendment to the Federal Constitution Another organization, led by Lucy Stone, the American Woman Suffrage Association, was organized the same year to work through the state legislatures The two societies were united in 1890 as the National American Woman Suffrage Association Later leaders included Anna Howard SHAW and Carrie Chapman CATT Several of the states and territories (with Wyoming first, 1869) granted suffrage to the women within their borders, when in 1913 there were 12 of these, the National Woman's party, under the leadership of Alice Paul, Lucy Burns, and others, resolved to use the voting power of the women enfranchised to force through Congress a suffrage resolution and secure ratification from the state legislatures In 1920 the Nineteenth Amendment to the Constitution granted nation-wide suffrage to women The movement in England began with Chartism, but it was not until 1851 that a resolution in favor of female suffrage, drawn up by the Sheffield Female Political Association, was presented in the House of Lords by the earl of Carlyle John Stuart Mill was the most influential of the English advocates, his *Subjection of Women* (1869) is one of the earliest, as well as most famous, works of propaganda Among the leaders in the early English suffrage movement were Lydia Becker, Barbara Bodichon, Emily DAVIES, and Dr Elizabeth Garrett ANDERSON, Jacob Bright presented a bill for woman suffrage in the House of Commons in 1870 The local suffrage societies united in 1897 into a National Union, of which Mrs Henry FAWCETT was president until 1919 In 1903 a militant suffrage movement sprang up under the leadership of Mrs Emmeline PANKHURST and her daughters, their organization was the Women's Social and Political Union The militant suffragists or "suffragettes" were determined to keep their objective prominent in the minds of both legislators and public. This they did by heckling candidates for office and other political speakers, by street meetings, and by many other forms of propaganda. The leaders were frequently imprisoned, many of them had recourse to a HUNGER STRIKE. When the First World War broke out, the suffragettes ceased all militant activity and devoted their powerful organization to the uses of the government. After the war a limited suffrage was granted with an age limit of 30, in 1928 voting rights for men and women were equalized In Europe, Finland and Norway were the first countries to grant woman suffrage, in France women voted in the first election (1945) after the Second World War Belgium granted suffrage in 1946. In the British dominions, New Zealand granted suffrage in 1893, Australia in 1902, Canada in 1917 (except in Quebec, where it was postponed until 1940) In Latin American countries woman suffrage was granted in Brazil (1934), Salvador (1939), Santo Domingo (1942), Guatemala (1945), and Argentina and Mexico (1946) In the Philippines women have voted since 1937, in Japan since 1945 See *The History of Woman's Suffrage* (ed by E C Stanton and others, 6 vols , 1881–1922), Emmeline Pankhurst, *My Own Story* (1914), Millicent Fawcett, *What I Remember* (1925), Roy Strachey, *Struggle* (1930)

Womelsdorf (wo͝om'mulzdôrf), industrial borough (pop 1,450), SE Pa , between Harrisburg and Reading, settled 1723, inc 1833 Its manufactures include brick and textiles Old Zion Church, built in 1727, is here

Women's Army Corps see WAC

women's clubs, particularly strong in the United States, became an important phase of American town and village life in the latter part of the 19th cent One of the earliest clubs was Sorosis, organized (1868) in New York city by Mrs Croly (Jennie June) In 1890 a convention called in New York by Sorosis resulted in the General Federation of Women's Clubs Each state has its own federation, in which local clubs are represented The early women's clubs were chiefly cultural and social in purpose, but the entry of women into public life has been reflected in the programs of their clubs, which show an increasing interest in questions of social welfare and international concern Many town libraries which were later supported by taxes were started by women's clubs, and many sanitary reforms have been initiated by them See D C Fisher, *Why Stop Learning* (1927), I B Munro and W M Munro, *Handbook for Clubwomen* (1942)

Wonders, Seven: see SEVEN WONDERS OF THE WORLD

Wonsan (wŭn'sän'), Jap *Gensan*, city (1944 pop 112,952), N Korea, a port on Korea Bay with a sheltered natural harbor There are fish canneries and sake breweries The port was opened to foreign trade in 1883

Wood or à Wood, Anthony, 1632–95, English antiquary His painstaking researches into the history of Oxford resulted in two great works, *The History and Antiquities of the University of Oxford* (in Latin, 2 vols , 1674, in English, tr by him but not published until 1792–96), and *Athenæ Oxonienses* (2 vols , 1691–92, rev and enl ed , 1721), containing biographies of noted Oxford graduates For statements in the second work concerning the 1st earl of Clarendon he was expelled from Oxford at the instance of the 2d earl Wood's own *Life and Times* (comp from his papers by Andrew Clark, 5 vols , 1891–1900) has also appeared in an abridged edition by Llewelyn Powys (1932)

Wood, Charles Erskine Scott, 1852–1944, American writer, b Erie, Pa , grad West Point, 1874 He served in the army until he resigned in 1884 in protest against the Washington administration of Indian affairs Having taken a law degree at Columbia Univ in 1883, he practiced in Portland, Oregon, until 1919 He wrote extensively (1899–1911) for the *Pacific Monthly*, but his best-known work, satiric sketches collected as *Heavenly Discourse* (1927), first appeared in the magazine the *Masses* Much later, in 1937, *Earthly Discourse* followed His poetry includes *A Masque of Love* (1901), *The Poet in the Desert* (1915), his best work, several times revised, *Maia a Sonnet Sequence* (1918), with his wife, Sara Bard Field, and *Poems from the Ranges* (1929)

Wood, Clement, 1888–, American writer, b Tuscaloosa, Ala , grad Univ of Alabama, 1909, LL B Yale, 1911 Among his many works are books on the craft of poetry, biographies, including a critical one of Amy Lowell (1926), novels, and a rhyming dictionary (1943) His most famous poem is the title piece of his collected poems, *The Glory Road* (1936)

Wood, Edward Frederick Lindley: see HALIFAX, EDWARD FREDERICK LINDLEY WOOD, 1ST EARL OF.

Wood, Fernando, 1812–81, mayor of New York city (1854–57, 1859–61), b Philadelphia. He became a successful shipping merchant and a Tammany leader in New York city. Wood was elected mayor in 1854 and reelected in 1856, but he displeased Democratic leaders in dispensing patronage Defeated (1857) by the Tammany candidate, he formed Mozart Hall, a rival organization, and won in 1859. Pro-Southern, Wood suggested at the beginning of the Civil War that New York establish

itself as an independent city. He was a leading Peace Democrat. As a Congressman (1841–43, 1863–65, 1867–81) he reflected the views of the city's moneyed interests. See biography by S. A Pleasants (1948).

Wood, Grant, 1892–1942, American painter, b Anamosa, Iowa, studied at the Art Institute of Chicago (1912–14) and in Paris (1920–22). His paintings of Middle Western life were originally inspired by German primitive painting. In 1933 his *American Gothic* won him national recognition. His work is deliberately stylized and meticulously executed. As a teacher at the State Univ of Iowa and director of PWA projects, several of which he designed, Wood played an active part in his community. He is represented in museums of Chicago, Cedar Rapids, Iowa, Lincoln and Omaha, Nebr., in the Whitney Museum, New York, and by a series of murals at Iowa State College, Ames, Iowa. See Darrell Garwood, *Artist in Iowa* (1944).

Wood, Mrs. Henry, 1814–87, English novelist, whose maiden name was Ellen Price. Her melodramatic and sensational romance *East Lynne* (1861), dramatized, became a permanent stock piece for more than a generation. Most of her work appeared first in the magazine *Argosy*, which she bought in 1867. See L. P. Stebbins, *A Victorian Album* (1946).

Wood, Jethro, 1774–1834, American inventor, b either in Dartmouth, Mass., or in Washington co., N.Y. In 1814, while a farmer in Cayuga co., N.Y., he patented a cast-iron plow in which he later embodied improvements (patented 1819). He used in the improved model replaceable cast-iron parts and a moldboard from which the shape of the modern moldboard is derived. Litigation concerning his patent rights impoverished him. See biography by Frank Gilbert (1882).

Wood, John, 1705?–1754, English architect, called Wood of BATH. When he went (1727) to Bath from Yorkshire to begin his career as a road surveyor, the city was at its height as a center of fashion. Foreseeing the possibilities of a spacious architectural setting for this gay life, Wood devised civic layouts on a grand scale and succeeded in finding financial support for his project. His executed schemes exhibit entire streets and terraces formally arranged in continuous rows, curves, or circles. He designed Queen's Square, North and South Parade, Royal Crescent, and the Circus. The last two were carried to completion after his death by his son, John Wood, Jr. (d. 1782), who also built the Assembly Rooms. Wood of Bath also designed the mansion of Prior Park, near Bath, his handsomest detached building. His work, by its charm and imagination, set a standard for the architects who later worked at Bath, and it remains an inspiration for modern city planners.

Wood, John George, 1827–89, English clergyman and author. He was ordained (1854) in the Church of England but devoted his life chiefly to writing and lecturing (in England and America) on natural history, which he was influential in popularizing.

Wood, Leonard, 1860–1927, American general and administrator, b Winchester, N.H., M.D. Harvard, 1884. He practiced medicine in Boston and entered the army in 1885 as an assistant surgeon and in 1891 was promoted captain and full surgeon. At the outbreak of the Spanish-American War he joined Theodore Roosevelt in organizing a volunteer cavalry outfit—the ROUGH RIDERS—and as their commander he participated in the attack on Santiago de Cuba. He was military commander of Santiago (1898–99) and as military governor (1899–1902) of Cuba until the republic was formed, he cooperated in improving sanitary conditions on the island. He was sent (1903) to the Philippines, was promoted (1903) major general, and commanded (1906–8) American military forces there. He returned (1908) to the United States and served (1910–14) as chief of staff in the U.S. army. He was commander (1914–17) of the Dept. of the East and led the movement for preparedness in America. His insistence on the creation of civilian training camps displeased the Wilson administration, after the U.S. entry into the First World War, Wood was refused a commission on the European front. Though failing to win the Republican nomination for President in 1920, he was appointed governor general of the Philippines. Distrusting the natives' capacity for self-government, he reversed the lenient policy of his predecessor, F. B. Harrison. Wood liquidated the economic enterprises of the Philippine government, assumed wide powers of control, allowed little prerogative to the legislature, and surrounded himself with military advisers. Until Wood died in 1927, unrest was widespread among the Filipinos, and in 1925 the Philippine senate unanimously voted to hold a plebiscite on independence. The report of the Thompson Commission, sent to the islands in 1926, sharply criticized Wood's rule. See biography by Hermann Hagedorn (1931).

Wood, Robert Williams, 1868–, American physicist, b. Concord, Mass., grad. Harvard (B.A., 1891). After studying abroad he became professor at Johns Hopkins in 1901 and research professor in 1938. Internationally known for his work in optics and spectroscopy, he made important researches in resonance radiation and in the use of absorption screens in astronomical photography and devised a vastly improved diffraction grating. He wrote *Physical Optics* (1905), *Researches in Physical Optics* (2 parts, 1913–19), and also the nonsense verses *How to Tell the Birds from the Flowers* (1907). See biography by William Seabrook (1941).

Wood, Thomas Waterman, 1823–1903, American portrait and genre painter, b. Montpelier, Vt., studied with Chester Harding. He became a member of the National Academy of Design in 1871 and was its president (1891–99) and president (1878–87) of the American Water Color Society. At the Metropolitan Museum is his *War Episodes*, three paintings in one frame (*Contraband, Recruit, Veteran*). His subjects were chiefly Negroes of the Civil War period. The Wood Gallery of Art in Montpelier has Wood's collection, including copies of old masters.

wood, botanically, the elements of the secondary xylem which comprises the bulk of the stem in shrubs and trees and is produced by the CAMBIUM. Wood, or xylem, consists of cells with firm thickened walls and serves both for mechanical support and for conduction of the SAP. The central part of a tree trunk is the older, and the cells become nonfunctional as growth produces new xylem tissue, this older wood is termed the heartwood as opposed to the outer sapwood which still functions for conduction. The heartwood is usually darker in color and more durable than the sapwood. HARDWOOD (from the broad-leaved trees, such as oak and maple) is porous, owing to the presence of long, conducting vessels, whereas softwood (from the conifers, e.g., pine and spruce) is nonporous. Although it is usually lighter than water, wood has great strength, elasticity, and durability. It is easily worked and joined, is a poor conductor of heat and electricity, polishes well, and is comparatively resistant to decay and to many chemicals. Trees cut for use as timber or lumber must usually be properly seasoned—dried in air or in a kiln—in order to obtain wood in its best state. Proper seasoning reduces the weight, prevents warping, often increases the strength, and prepares the wood for painting and for use as fuel. Wood has been valued since antiquity for fuel and for building purposes. Although wood has been supplanted in many of its former uses by synthetic materials, it is still extensively used for construction work and is the principal material for furniture, floors, handles, railway ties, and innumerable other things. It is largely used in the manufacture of paper. Wood distillation yields charcoal, methyl alcohol, wood tar, acetate of lime, and wood gas. The woods of different species of trees, though sometimes difficult to distinguish, vary considerably in weight, strength, and appearance. Thus balsa is prized for its light weight, oak for its strength and decorative value, and walnut, teak, mahogany, and cherry for beauty of grain and color. See Herbert Stone, *Textbook of Wood* (1921), Arthur Koehler, *Properties and Uses of Wood* (1924), S. J. Record, *Identification of the Timbers of Temperate North America* (1934), H. P. Brown and A. J. Panshin, *Commercial Timbers of the United States* (1940), H. D. Tiemann, *Wood Technology* (2d ed., 1944), H. E. Desch, *Timber: Its Structure and Properties* (2d ed., 1947).

wood alcohol: see METHYL ALCOHOL.

Woodberry, George Edward, 1855–1930, American poet, critic, and teacher, b. Beverly, Mass., grad. Harvard, 1877. He was professor of English at the Univ. of Nebraska (1880–82) and at Columbia (1891–1904). Typical of his work as a minor poet is *The Ideal Passion. Sonnets* (1917). Besides much literary criticism, he wrote scholarly biographies of Poe and Hawthorne. See his *Selected Letters* and *Selected Poems* (both 1933).

Woodbine. **1** Town (pop. 1,467), W Iowa, on the Boyer river and NNE of Council Bluffs; in a farm area, inc. 1877. Large apple orchards are near by. **2** Borough (pop. 2,111), SE N.J., N of Cape May, near Belleplain State Forest, inc. 1903.

woodbine, name for several vines, among them HONEYSUCKLE and VIRGINIA CREEPER.

Woodbridge, Frederick James Eugene, 1867–1940, American philosopher, b. Windsor, Ont., grad. Amherst, 1889, and Union Theological Seminary, 1892, and studied (1892–94) at the Univ. of Berlin. He taught philosophy at the Univ. of Minnesota (1894–1902) and at Columbia (1902–12), was dean of the faculties of political science, philosophy, pure science, and fine arts at Columbia (1912–1929), and was Roosevelt professor at the Univ. of Berlin (1931–32). He was editor of *Archives of Philosophy* and the *Journal of Philosophy, Psychology, and Scientific Methods*. Among his many books are *The Purpose of History* (1916), *The Realm of Mind* (1926), *Nature and Mind* (1937), and *An Essay on Nature* (1940), his last book, which sums up his philosophy that "Nature is the domain in which both knowledge and happiness are pursued."

Woodbridge, village (pop. 1,044), S Ont., on the Humber and NW of Toronto, in a farm area.

Woodbridge. **1** Town (pop. 2,262), SW Conn., NW of New Haven, settled before 1660, inc. 1784. **2** Township (pop. 27,191), NE N.J., N of Perth Amboy; settled 1665 by colonists mainly from Massachusetts and led by John Woodbridge, inc. 1669. It had a sawmill in 1682 and in 1751 a printing press. Local clays are used in Woodbridge's important brick, tile, terra-cotta, and firebrick industries.

Wood Buffalo National Park, 17,300 sq. mi., chiefly in NE Alberta, but partly in S Mackenzie dist. of the Northwest Territories, est. 1922. It lies between the west end of Lake Athabaska and the south side of Great Slave Lake and is crossed by the Peace river. A vast, unfenced region of forests, plains, and lakes, it is the largest game preserve in North America, containing a herd of buffalo, bear, beaver, caribou, deer, moose, and waterfowl.

Woodburn (wōd'bûrn), city (pop. 1,982), NW Oregon, NE of Salem in the Willamette valley. In a berry-raising district, it has canneries, inc. 1889. The Oregon State Training School is here.

Woodbury, Charles Herbert, 1864–1940, American marine painter, b. Lynn, Mass., grad. Massachusetts Institute of Technology, 1886, and studied painting at Julien's academy, Paris. For many years he had a school at Ogunquit, Maine. His vigorous portrayals of the Atlantic coast include *Ogunquit, Maine* (Metropolitan Mus.), *Off the Florida Coast* (Mus. of Fine Arts, Boston), *The Cliff* (Carnegie Inst., Pittsburgh), and *North Atlantic* (Worcester, Mass., Art Mus.). He wrote *Painting and the Personal Equation* (with E. W. Perkins, 1922) and *The Art of Seeing* (1925).

Woodbury, Levi, 1789–1851, American cabinet officer and jurist, b. Hillsboro co., N.H., grad. Dartmouth, 1809. Important as a politician and jurist in New Hampshire, he served as governor (1823–24). As a Democrat, he was Senator from 1825 to 1831, when President Andrew Jackson, whom he firmly supported, appointed him Secretary of the Navy. In 1834 when Henry Clay obtained the Senate's rejection of Roger B. Taney, who had been appointed in 1833, Woodbury was chosen U.S. Secretary of the Treasury and inherited all the difficulties of initiating the new treasury scheme in the face of the friends of the United States Bank (see SUBTREASURY). He continued as Secretary until the end of President Martin Van Buren's term (1841). Again a Senator (1841–45), Woodbury defended the Independent Treasury System in debate. He was appointed in 1846 to succeed Joseph Story as Associate Justice of the Supreme Court, and on the bench he generally concurred with the decisions of Chief Justice Taney. Many of his speeches and his writings (3 vols., 1852) have been published.

Woodbury **1** Town (pop. 1,998), W Conn., W of Waterbury, settled 1672, chartered 1674. A community of dairy farmers, it has a sprinkling of retired and vacationing urbanites. Among its old buildings are five churches, the Jabez Bacon House (1762), and Glebe House (c. 1750). **2** City (pop. 8,306), co. seat (since 1787) of Gloucester co., SW N.J., S of Camden, settled 1683, inc. as a borough 1854, as a city 1870. Woodbury is a farm trade center. Its 18th-century buildings include the Cooper House, where Cornwallis stopped in 1777, and a Friends' meetinghouse. R. T. McKenzie designed the World War memorial. The county historical society has collections in the John Lawrence House (1765).

Woodbury Heights, borough (pop. 1,137), SW N.J., S suburb of Woodbury, settled c. 1770, inc. 1915.

wood carving as an art form includes any kind of sculpture in wood, from the decorative bas-relief on small objects to life-size figures in the round. The woods used include pine, pear, walnut, willow oak, ebony, and others; the tools consist of gouges, chisels, wooden mallets, and pointed instruments. Designs are applied on the wood by pencil, chalk, or stencil, and the wood is cut directly after the design. In very recent years wood carving has joined sculpture in stone and brass as a purely fine art. Formerly, however, wood carving was more functional and closely allied to architecture and cabinetmaking. The earliest wood artifacts were probably the little masks and grotesque statuettes of gods and goddesses of African Negro tribes. In the Mohammedan countries of North Africa no carving in the round is found, partly through prohibitions in the Koran. The region abounds, however, in carvings on furniture, boxes, flasks, and rifle stocks. In Egypt inlaid work is highly developed, both on furniture and in mosaic ceilings and floors. In Japan and China much imagination has gone into wooden carvings decorating the temples. Large Japanese masks, made for the inaugural rites for the Great Buddha in 752, are preserved and attest to the delicate work. After the 15th cent. woodworking was also applied to mansions and, in China, to simpler dwellings. In Europe wood carving was most highly developed in Scandinavia, and examples have been preserved of 10th- and 11th-century work. In England the Gothic period produced extremely fine wood carving, especially on choir stalls and rood screens. Though the Puritans destroyed much of this, enough has been preserved to show its intricate and beautiful workmanship. In France wood carving was also a part of religious art, and here the carved altarpieces were especially notable. In Flanders and Germany of the 15th and

16th cent great altarpieces and other monumental wood sculptures were created, Nuremberg and Swabia being among the most active centers In Italy wood carving flourished during Gothic times in Pisa, Siena, and Florence, as well as in the southern monasteries, during the Renaissance it remained an adjunct of the general Italian artistic development. After the Renaissance wood carving went into an imperceptible decline It had a revival in the early 18th cent when Grinling Gibbons in London carved for Sir Christopher Wren's buildings The development of machinery and the trend toward streamlining have made wood carving as a craft a very minor medium See F S Maver, *A Handbook of Ornament* (1893), Alfred Maskell, *Wood Sculpture* (1911), H H Grimmwood, *An Introduction to Decorative Woodwork* (1936)

woodchuck or **ground hog**, stocky, chiefly herbivorous rodent of the MARMOT family, native to North America Its body is about 14 in long and is covered with thick, brownish-gray fur, it looks somewhat like a tiny bear It nests and hibernates in winter in burrows of many compartments According to an old superstition the ground hog is said to leave its burrow on Feb 2, Candlemas Day, and to return underground for six weeks if it sees its shadow, thus a sunny Feb 2 supposedly means six more weeks of winter

Woodcliff Lake, borough (pop 1,037), NE N J, near the N Y line, inc 1910

woodcock, nocturnal game bird of the snipe family Its plumage of blended browns and black afford it protective coloration in swamps and woods The unusually large eyes are set far back in the head With its long bill, which has a flexible upper mandible, it probes in soft earth for earthworms, its chief food, and insects The American woodcock is called whistling, wood, and mud snipe In spring the male indulges in a performance which combines dancing, soaring flight, and song The European woodcock is similar to the American but larger

wood engraving, in contrast to copper or steel engraving and etching (which are intaglio), has its designs cut in relief, the portions to appear dark left standing, while those to print white are gouged out of the wood block The block itself is commonly the same height as type (⅞ in) Two distinct methods are recognized, the so-called black-line or positive method, in which the wood is cut with the grain, and the white-line method, in which the cutting is done across the grain, in the former the emphasis of the cutter is on the lines themselves, in the latter on the gouged-out spaces The white-line method allows for much more subtlety of line and for the more plastic expression of varying half tones The tools of wood engraving include chisels, V-shaped and curved gouges, and, most important, a simple sharp knife Woodcuts were used in ancient Egypt and Babylonia for impressing intaglio designs into unpressed bricks and by the Romans for stamping letters and symbols The Chinese used wood blocks for stamping patterns on textiles In Europe woodcuts appeared at the beginning of the 15th cent, when they were used on playing cards and simple prints and for the BLOCK BOOK which preceded printing At that time the artist and the craftsman were one, the same man designing the cut and carving the block The first authentically dated woodcut is a *St Christopher* of 1423 After the invention of the printing press, woodcuts, being inked in the same way as type, lent themselves admirably to illustrating books Albrecht Pfister first put them to this use c 1460 Further examples of early woodcuts are in the Bibles that appeared in the late 15th cent and in the French Lyons edition (1493) of the works of Terence Rome's first book with woodcuts appeared in 1467, but Venice became the center of Italian wood engraving In the 16th cent in France woodcuts served frequently to illustrate Books of Hours In Germany, Dürer and Hans Holbein, the younger, were the most eminent woodcut masters of the Renaissance Neither of these artists cut their own blocks but were fortunate in having sensitive craftsmen to execute their designs Dürer's *Life of the Virgin* (1509 10) and *Great Passion* (1510–11) and Holbein's *Dance of Death* are among their best-known works. Lucas Cranach, the elder, and Hans Baldung also worked in wood engraving, employing a chiaroscuro technique originated by Jobst de Negker of Augsburg There was a decline in wood engraving with the increasing popularity of line engraving on metal, even in the Netherlands, where woodcuts lasted longest, they were almost obsolete by the 18th cent In England, however, Thomas Bewick popularized white-line engraving, in contrast to the black-line which had been universal before, and started a revival Paul Gustave Doré was the best-known master in this medium in the 19th cent In America wood engraving was practiced from the 19th cent by such masters as Alexander Anderson, William James Linton, and Timothy Cole The advances in photography and photographic processes slowly edged out woodcuts as a means of book illustration, and the art again fell into disuse toward the close of the 19th cent. But in the 20th cent. it had another revival as a valid art form, the artists again taking pride in being themselves the engravers as well as the designers. See W. A. Chatto, *A Treatise on Wood Engraving, Historical and Practical* (1881); D P Bliss, *A History of Wood Engraving* (1928); E. W Watson, *The Relief Print* (1945)

Woodford, urban district (pop 23,946), Essex, England, NE of London It is a residential suburb near Epping Forest

Wood Green, residential municipal borough (1931 pop 54,181, 1947 estimated pop. 52,890), Middlesex, England, N of London

Woodhull, Victoria (Claflin), 1838–1927, American lecturer and journalist, b Homer, Ohio She married Dr Canning Woodhull in 1853 and was divorced 11 years later She became a speculator in Wall St and later, with her sister, Tennessee Claflin (who shared most of her adventures), proprietor of *Woodhull and Claflin's Weekly* (1870), a sensational journal which supported, among other reforms, woman suffrage In 1872 the People's party, representing extreme radical organizations, nominated Mrs Woodhull for President of the United States For some years she lectured on many subjects, including woman's rights and spiritualism, in 1883 she married John Biddulph Martin, an Englishman, and thereafter lived in England See Emanie L Sachs, *The Terrible Siren* (1928)

Woodin, William Hartman (wo͝od'dĭn), 1868–1934, U S Secretary of the Treasury (1933), b Berwick, Pa After studying engineering at Columbia Univ, he entered (1892) the railroad-equipment firm founded by his grandfather and became its president in 1899 President of the American Car and Foundry Company after 1916, he steadily expanded his industrial holdings Woodin, a Republican, was appointed U S Secretary of the Treasury by President F D Roosevelt and helped restore the nation's financial activities during the banking holiday of March, 1933 He resigned the post in Nov, 1933, because of ill-health

Woodlake, city (1940 pop 1,146, 1946 special census pop 2,466), S central Calif, SE of Fresno, settled 1914, inc 1939 Sequoia National Park is near by

Woodland. 1 City (1940 pop 6,637, 1948 special census pop 9,042), co seat of Yolo co, N central Calif, NW of Sacramento, founded 1855, inc 1874 It is a processing and trade center in the fertile Sacramento valley The noted Woodland Clinic Hospital is here **2** Town (pop 1,298), NE Maine, W of Caribou, inc 1880 **3** Village, SE Maine see BAILEYVILLE

Woodlark Island, volcanic island, c 40 mi long, SW Pacific, 175 mi SE of New Guinea, in the Territory of Papua The island contains gold In the Second World War it was made an Allied air base in 1943

wood louse, name applied to various small isopod crustaceans Included are terrestrial forms of the genera *Oniscus* and *Porcellio* which commonly inhabit damp places in gardens, the pill bug of the genus *Armadillidium*, and some marine isopods Some wingless insects of the family Atropidae which are commonly called book lice and deathwatches are sometimes known as wood lice

Woodlynne (wo͝od'lĭn"), borough (pop 2,861), SW N J, southern suburb of Camden, laid out 1892, inc 1901

woodpecker, a climbing bird found, in nearly 400 species, in most parts of the world Usually the males have red or orange patches on the head and barred and spotted black or brown plumage with light under parts Woodpeckers have chisellike bills for boring into trees and a long, sticky, barbed tongue for extracting insects Their spiny tails are an aid in climbing and resting on vertical surfaces A tattoo on a tree trunk is the characteristic call Among the North American woodpeckers are the sociable downy woodpecker (about 6½ in long), the similar but larger hairy woodpecker, the pileated woodpecker (about 17 in long), which is similar to the nearly extinct ivory-billed woodpecker, the redheaded and the three-toed woodpeckers, the California woodpecker, which makes small holes in trees for storing acorns, the FLICKER, and the SAPSUCKER The piculets are tiny Old and New World woodpeckers (3-5 in long) found chiefly in South America

wood pulp: see PAPER

Wood-Ridge (wo͝od'-rĭj"), borough (pop 5,739), NE N J, E of Passaic, settled before the Revolution, inc 1894

Woodring, Harry Hines, 1890–, U S Secretary of War (1936–40), b Montgomery co., Kansas He entered (1907) the banking business in Kansas, served in the First World War, and was (1931–33) governor of Kansas Harry H Woodring served (1933–36) as Assistant Secretary of War before becoming Secretary He resigned in opposition to President F D Roosevelt's foreign policy and was succeeded by Henry L. STIMSON.

Wood River city (pop 8,197), SW Ill, on the Mississippi above East St Louis, founded 1907, inc. as a village 1911, as a city 1923 The city has oil refineries, a tannery, and a planing mill.

Woodruff, Lorande Loss, 1879–1947, American biologist, b. New York city, grad Columbia (B.A., 1901, Ph.D., 1905). He was at Yale from 1907, as professor of biology from 1915 to 1922 and of protozoology from 1922. In his special studies in the life history of the protozoa, he maintained a race of paramecia through more than 20,000 generations, He wrote *Foundations of Biology* (1922, 6th ed. 1941) and *Animal Biology* (1932) and edited *Development of the Sciences* (1923, 2d series, 1941).

Woodruff, textile town (pop. 3,508), NW S C, S of Spartanburg, in a farm area; inc. 1876

Woodruff Place, town (pop 1,434), central Ind, within the boundary of Indianapolis, platted 1872, inc 1876 It is a residential suburb with no business buildings

Woods, Albert Fred, 1866–1948, American plant pathologist, b Belvidere, Ill, grad Univ of Nebraska, 1890. He was director (1926–34) of scientific work at the U.S. Dept of Agriculture He gave special attention to problems of plant nutrition, oxidation processes of plants, enzymes in plant cells, and plant resistance to disease

Woods, Leonard, 1774–1854, American Congregational theologian, b. Princeton, Mass, grad Harvard, 1796. In the controversy with the Unitarians William Ellery Channing, Henry WARE, and others, Woods gained prominence as a champion of orthodox Calvinistic views He was professor of theology at Andover Theological Seminary (1808–46) and published (1885) a history of that institution Among his controversial works are *A Reply to Dr Ware's Letter to Trinitarians and Calvinists* (1821) and *Remarks on Dr Ware's Answer* (1822) He was also the author of *Lectures on Church Government* (1844), *Lectures on Church Scriptures*, and *Theology of the Puritans* (1851)

Woods, Robert Archey, 1865–1925, American social worker, b Pittsburgh, grad Amherst, 1886 After six months at Toynbee Hall, London, in 1890 he helped found (1891) the South End House, Boston, of which he was head until his death He lectured on social ethics at the Episcopal Theological School, Cambridge, Mass (1896–1914), was president of the Boston Social Union (1908–25), and materially aided in the development of the National Federation of Social Settlements, of which he was secretary from 1911 to 1923 and president for the two succeeding years He served as trustee of Amherst College from 1910 to 1920 He wrote *English Social Movements* (1891) and *The Neighborhood in Nation Building* (1922) See biography by Eleanor H Woods (1929)

Woodsboro, city (pop 1,420), S Texas, near Refugio NNE of Corpus Christi, inc 1928 The farming and ranching area has some oil and gas

Woodsfield, village (pop 2,442), co seat of Monroe co., SE Ohio, NE of Marietta, settled 1815, inc 1834

Woods Hole (wo͝odz" hōl'), village (pop 549) in Falmouth town, SE Mass, at the southwestern extremity of Cape Cod A U S fish and wildlife station is here and includes laboratories, hatcheries, and an aquarium Woods Hole is the site also of an important marine biological institute and of the Oceanographic Institution (1930, endowed by the Rockefeller Foundation), which maintains the research ship *Atlantis*

wood sorrel see OXALIS

Woodstock. 1 Town (pop 3,593), W N B, on the St John and W NW of Fredericton, in a lumbering, dairy, and fruitgrowing region Lead, copper, and zinc are mined here, and there are plants making furniture and farm machinery It is the seat of the provincial agricultural college **2** City (pop 12,461), S Ont, WSW of Toronto It is an industrial center, manufacturing pianos, organs, furniture, hardware, tools, and textiles, and has lumber and feed mills It is the seat of St Alphonsus Seminary (theological) The surrounding country has mixed farming and stock raising

Woodstock, municipal borough (1931 pop 1,484, 1943 estimated pop 1,955), Oxfordshire, England, on the Glyme river and NW of Oxford Woodstock is the site of a castle in which the Black Prince was born and in which Queen Mary imprisoned her sister, Princess Elizabeth It is the reputed site of the dwelling built for "Fair Rosamond" by Henry II and is the scene of Scott's novel Woodstock BLENHEIM PARK is near by

Woodstock. 1 Town (pop 1,912), NE Conn, at the Mass line, settled 1686, inc 1690 **2** City (pop 6,123), co. seat of McHenry co, NE Ill, NW of Chicago, inc 1852. It manufactures automobile parts and typewriters The Todd School for boys, founded in 1848, is here **3** Town (pop 1,983), SE N.Y., in the foothills of the Catskills NW of Kingston It is an artists' colony (founded 1902) in a summer resort region The Art Students League has a summer school here **4** Town (pop. 2,512) co. seat of Windsor co, E Vt, winter and summer resort on the Ottauquechee and W of White River Junction, chartered 1761, settled shortly after. There are many fine old homes and a famous village green Hiram Powers, George P. Marsh, and John Cotton Dana were born in the town. See Harold S Dana, *History of Woodstock* (1921). **5** Town (pop. 1,546), N Va., SW of Winchester in the Shenandoah Valley, settled 1752, inc. 1872. It is a farm trade center with processing plants. The courthouse of Shenandoah co. here dates from 1791.

Near the town is an observation tower on top of Massanutten Mt., from which the famous seven horseshoe bends of the Shenandoah river may be viewed.

Woodstown, borough (pop. 2,027), SW N J , SW of Camden; inc. 1882. It is a farm trade center Woodstown was settled before 1725 by Friends, and there is an 18th-century meetinghouse.

Woodsworth, James Shaver, 1874–1942, Canadian clergyman, politician, and reformer, b near Toronto, grad. Manitoba Univ (B.A., 1896) and Victoria Univ (B D , 1900) While serving in the ministry of the Methodist Church, in which he was ordained in 1896, he became interested in social welfare work He was secretary (1913–16) of the Canadian Welfare League and director (1916–17) of the Bureau of Social Research for the governments of Manitoba, Saskatchewan, and Alberta. In 1918 he resigned from the ministry and became a longshoreman in Vancouver In the Winnipeg strike of 1919, he was arrested on a charge of sedition, later withdrawn Supported by the Independent Labour party, he entered the Canadian House of Commons in 1921 He is generally regarded as the founder of the Co-operative Commonwealth Federation (1932), of that new Canadian party, he became chairman of the national council and parliamentary leader until he retired (1940) from the House of Commons. See biography by Olive Ziegler (1934)

Woodville, Elizabeth, c 1437–1492, queen consort of Edward IV of England She was the daughter of Richard Woodville (later Earl Rivers) Her first husband, Sir John Grey, was killed at the second battle of St Albans (1461) in the Wars of the Roses By him she was the mother of Thomas Grey, marquis of Dorset, one of whose descendants was the ill-fated Lady Jane Grey In 1464 Elizabeth was secretly married to Edward IV despite other plans for the king by the powerful Richard Neville, earl of Warwick Her father was made earl, and members of his family were raised to positions of power Warwick, deeply angered, regained power by a popular rising he directed in 1469 and had Earl Rivers beheaded Edward, however, did not trust Warwick, and the earl allied himself with the Lancastrians, headed by Margaret of Anjou Warwick and his party drove (1470) Edward from England and restored the imbecile Henry VI Elizabeth took sanctuary in Westminster until her husband recaptured his throne in 1471 At the death of Edward IV (1483) Elizabeth and the Woodvilles claimed the throne for her son, the young Edward V The strong faction headed by Richard, duke of Gloucester, defeated the Woodvilles Elizabeth again took sanctuary in Westminster, and her sons Edward V and Richard were surrendered to Richard of Gloucester He, after a brief period as protector to Edward V, put both boys in the tower, usurped the throne as Richard III, had the "princes in the tower" killed, and declared void (1484) Elizabeth's marriage to Edward IV The daughter of Edward IV and Elizabeth, however, who was also Elizabeth, became queen by her marriage to Henry VII in 1486

Woodville 1 Town (pop 1,433), co seat of Wilkinson co , extreme SW Miss , near the La line SSE of Natchez, inc 1811 **2** Village (pop 1,219), N Ohio, SE of Toledo, founded c 1836 Limestone deposits here are used extensively for its lime factories **3** Town (pop 1,521), co seat of Tyler co , E Texas, N of Beaumont, in a pine-woods region, settled c 1847, inc 1929

Woodward, Robert Simpson (wo͝od'wûrd), 1849–1924, American scientist and educator, b Rochester, Mich , grad Univ of Michigan (C E , 1872) He served the U S Geological Survey (1884–90) and other government surveys, was professor (1893–1905) at Columbia Univ and dean (1895–1905) of its Faculty of Pure Science, and was president (1905–20) of Carnegie Institution His investigations covered numerous problems in mechanics, astronomy, and geodesy He devised an accurate and inexpensive method of determining the base line in triangulation He wrote *Smithsonian Geographical Tables* (1893, 3d ed , 1929) and *Probability and Theory of Errors* (1906)

Woodward, city (pop 5,406), co seat of Woodward co , NW Okla , on the North Canadian river, settled 1893 It is a market for livestock, agricultural and dairy products, and has several small industries and a U S agricultural experiment station. A state park is near by

Woodworth, Samuel, 1784–1842, American poet, playwright, and journalist, b Scituate, Mass He edited (1823–24) the *New-York Mirror* and wrote "The Old Oaken Bucket" His play *The Forest Rose* (1825) was one of the longest-lived American plays before the Civil War and had a famous Yankee character, Jonathan Ploughboy.

woof: see WEAVING

Wool, John Ellis, 1784–1869, American general, b Newburgh, N.Y He became a captain in the War of 1812 and distinguished himself at Queenstown and Plattsburg. By 1841 he had risen to a brigadier generalcy, and for his services in the Mexican War under Gen. Zachary Taylor, particularly at Buena Vista, he was brevetted major general At the beginning of the Civil War, Wool held Fort Monroe for the Union He was promoted major general in 1862 and retired in 1863.

wool, fiber from the fleece of the domestic sheep, after cotton the most important It consists of the cortex, overlapping scales (sharper and more protruding than those of hair) which may expand at their free edges causing fibers to intermesh (see felt), elasticum, the inner layer, and a core When soaked, the elasticum and core contract, shrinking the fiber. Elasticity resulting from the molecular structure of wool and resiliency from its crimp make wool fabrics crease resistant Fine wool will stretch one third its length Wool is warm because its fibers are nonconductors of heat and its crimp permits it to enmesh still air It is highly absorbent and releases moisture slowly Its tensile strength is one fourth greater than that of cotton A protein compound of complex chemical composition, it is soluble in hot caustic soda. No known wild animals are wool bearing The supposed ancestors of the domestic sheep had long hair and a soft, downy undercoat, which under domestication gradually became wool, while the long hair disappeared In this development, breeding, feed, climate, and protection were influential, as shown by an atavistic return of neglected sheep to long hair and rudimentary wool Wool was probably the first fiber to be woven into a textile, as herding flocks was the first step upward from savagery In tombs and ruins of Egypt, Nineveh, and Babylon, in lake dwellers' huts and the barrows of early Britons, among the relics of the Peruvians, fragments of woolen fabrics are found The Romans as early as 200 B C began to improve their flocks, which became the progenitors of the famed Spanish Merino sheep The Britons kept sheep and wove wool long before the Roman invasion, but the establishment by the Romans of a factory at Winchester probably improved their methods William the Conqueror brought into England skilled Flemish weavers Henry II encouraged wool industries by laws, cloth fairs, and guilds of weavers Edward III brought weavers, dyers, and fullers from Flanders England became the great wool-producing country of Europe Wool was the staple of its industry until cotton began to overshadow it in the 18th cent In the American colonies sheep raising started in Jamestown Stringent English laws against exporting wool, in the attempt to force upon the colonies the use of English cloth, early drove the settlers to the raising of sheep George Washington imported sheep and brought spinners and weavers from England Early in the 19th cent imported Merinos greatly improved the existing stock Spinning and weaving were early established in New England, at first in the homes, later in small factories The first factory in America using water power to weave wool was established (1788) at Hartford, Conn , and was encouraged by tax exemption and a bounty on each yard woven The United States now produces about 10 percent of the world supply of wool, chiefly in Texas, Montana, Wyoming, Utah, Oregon, Idaho, New Mexico, Colorado, California, and Ohio New England is a center of cloth manufacture, New York and Pennsylvania, of carpet and rug production, largely from wool imported from Asia, the American being too fine and soft Other important wool producers include Australia, Argentina, New Zealand, the USSR, South Africa, Uruguay, Great Britain, China, and India Wool is classed as fine, usually short-staple wool of Merino fineness and including Delaine, combable fibers 2 in or more in length, medium, or mutton, 2½ to 6 in long, e g , Cheviot and Southdown, long, 10 to 15 in , loosely crimped, e g , the Lincoln and Cotswold, and carpet, 1 to 15 in long, strong, coarse, and usually blended for uniformity For industrial purposes the fiber of the camel, Angora goat (see mohair), Cashmere goat, llama, alpaca, and vicuña is classed as wool Sheep are sheared with mechanical clippers The fleece is classed as lamb's wool, or first clip, hog wool, clipped from sheep 12 to 14 months old, wether wool, from older animals, taglocks, the ragged, discolored portion, and pulled wool, usually weakened when recovered by sweating or chemical processes from sheep slaughtered for mutton The wool is sorted as to fineness, crimp, length of fiber, and felting qualities Dirt, suint, and lanolin are removed by a soap-alkali scouring; by the expensive naphtha solvent method, which retains the full strength and softness of the fiber, or by freezing and shaking Wool may be carbonized to remove vegetable matter It is bleached and dyed as raw stock, yarn, or in the piece, is oiled to withstand processing, and is often blended Woolen goods are woven from carded short-staple fibers into soft yarns adapted to fulling and napping Worsted fabrics such as whipcord, gabardine, and serge have a hard, smooth texture Originally made only from long-staple fibers, worsted yarn is now spun also from medium or short fibers The fibers are carded, the resulting sliver gilled to straighten the fibers and double them for uniformity, subjected to successive combings to remove nails (short ends) and lay the fibers parallel; then drawn into roving and spun, usually by the rapid, continuous ring method, and twisted The same weaves may be used as for woolens although the twill weave is usual, but the pattern is not obscured by the napping, fulling, and shearing processes commonly employed in finishing woolens In the United States, by the Wool Products Labeling Act of 1939, the term *wool* may be applied only to fabrics made entirely of new wool, the term *reprocessed wool,* to wool recovered from unused articles and waste, *reused wool,* to wool reclaimed from used articles The trade designates fleece wool as virgin wool, salvaged wool, as shoddy Salvaged wool may legitimately be used to add strength to soft new wool or to produce a cheaper product Spun rayon and the synthetic casein product, Aralac, are used for imitations of wool and for blending See M S Woolman and E A B McGowan, *Textiles* (3d ed , 1943), M D Potter, *Fiber to Fabric* (1945), Werner Von Bergen and H R Mauersberger, *American Wool Handbook* (2d ed , 1948)

Woolf, Virginia (Stephen), 1882–1941, English novelist and essayist, b London, daughter of Sir Leslie Stephen In 1912 she married Leonard Woolf, a critic and writer on economics, with whom she set up the Hogarth Press in 1917 As a novelist she can be described as an impressionist Her early books, *The Voyage Out* (1915) and *Night and Day* (1919), were traditional in method, but she used the stream-of-consciousness technique masterfully in *Jacob's Room* (1922), *Mrs Dalloway* (1925), *To the Lighthouse* (1927), and *The Waves* (1931) Other experimental novels are *Orlando* (1928), *The Years* (1937), and *Between the Acts* (1941) She was a discerning critic, and some of the best essays of the period are in her *Common Reader* (1925), *The Second Common Reader* (1933), *The Death of the Moth and Other Essays* (1942), and *The Moment and Other Essays* (1948) The essays in *A Room of One's Own* (1929) and *Three Guineas* (1938) are concerned with the need of women for independence and opportunity for creative work Her biography of Roger Fry (1940) is a careful study of a friend Some of her short stories from *Monday or Tuesday* (1921) reappear with others in *A Haunted House* (1944) She drowned herself because she feared a mental breakdown All her posthumously published works are edited by her husband See studies by Winifred Holtby (1932), E M Forster (1942), David Daiches (1942), Joan Bennett (1945), Deborah Newton (1946), and Bernard Blackstone (1949)

Woollcott, Alexander (wo͝ol'kut), 1887–1943, American author, b Phalanx, near Red Bank, N J , grad Hamilton College, 1909 One of the best-known literary and dramatic critics of his time, he exerted great influence on popular literary taste as the "Town Crier" (1929–40) in a weekly radio broadcast He was the model for *The Man Who Came to Dinner,* a play by Kaufman and Hart, in which he himself acted on the West Coast His works include *While Rome Burns* (1934) and *Long, Long Ago* (1943) His letters were published in 1944 See biography by S H Adams (1945)

Woollett, William (wo͝o'lĭt), 1735–85, English line engraver He is best known for his faithful reproductions of the paintings of Richard Wilson, Benjamin West, and Claude Lorrain His *Death of General Wolfe,* after West, is famous Woollett combined etching and dry point with engraving

Woolley, Mary Emma, 1863–1947, American educator, b South Norwalk, Conn , grad Brown, 1894 She was from 1886 to 1891 instructor at Wheaton Seminary From 1895 to 1900 she taught biblical history and literature at Wellesley College, and from 1901 to her retirement in 1937 was president of Mt Holyoke College She was active also in the cause of foreign missions and of world peace and was appointed in 1931 a delegate to the Disarmament Conference that met in Geneva in 1932 She wrote several historical monographs, including *Early History of the Colonial Post Office* (1894), and magazine articles on current affairs

Woolman, John, 1720–72, American Quaker leader, b near Mt Holly, N J In early life a tailor and shopkeeper, Woolman was recorded a minister (1743) by the Burlington, N J , Meeting Thereafter he made many journeys throughout the colonies, preaching and teaching He died at York on a visit to England An ardent humanitarian, he was always keenly aware of social injustice, his was one of the first voices raised against Negro slavery His writing, like his life, is informed with a simple and beautiful devotion Among his published works are *Some Considerations on the Keeping of Negroes* (1754, 1762), *Considerations on the True Harmony of Mankind* (1770), and *A Plea for the Poor* (1770) Woolman is best remembered, however, by his immortal journal (1774, ed by J G Whittier, 1871, and Amelia M Gummere, 1922) See Janet Whitney, *John Woolman, American Quaker* (1942)

Woolner, Thomas (wo͝ol'nûr), 1825–92, English Pre-Raphaelite sculptor and poet He is best known for his faithful portrait statues, busts, and medallions of famous contemporaries, among them Darwin,

Huxley, John Stuart Mill, Newman, Carlyle, Dickens, and Captain Cook He also produced numerous imaginative works His poem "My Beautiful Lady" appeared (1850) in the Pre-Raphaelite magazine, the *Germ* Several volumes of his poems were later published

Woolsey, Sarah Chauncey: see COOLIDGE, SUSAN.

Woolson, Constance Fenimore, 1840–94, American writer, b Claremont, N H , grandniece of James Fenimore Cooper She grew up in Cleveland, Ohio, and wrote notable short stories about that region and about Mackinac, where she spent her summers, in *Castle Nowhere* (1875), the early part of her best-known novel, *Anne* (1882), is laid at Mackinac She lived later in the South in South Carolina, which is the setting of *Rodman the Keeper* (1880), short stories, in North Carolina, where the novel *For the Mayor* (1883) is laid, and in Florda, which she used in *East Angels* (1886) and *Jupiter Lights* (1889), both novels Her later years were spent in England and Italy See her works and letters published by Clare Benedict as *Five Generations* (1929–32), critical biography by J D Kern (1934)

Woolwich (wo͝ol'ĭj, -ĭch), metropolitan borough (1931 pop 146,881, 1948 estimated pop 142,800) of SE London, England, on the Thames just E of Greenwich It is the site of the Royal Military Academy (founded 1741), the Royal Arsenal, and related institutions There are extensive barracks and warehouses and a great hospital The docks were closed in 1869, but are used for military stores The Rotunda has a museum of implements of warfare and models of fortifications, including Gibraltar The district suffered considerable air-raid damage in 1940

Woolwich (wo͝ol'wĭch"), town (pop 1,144), S Maine, on the Kennebec opposite Bath, inc 1759 It was first settled in 1638 but was destroyed in the Indian wars Resettlement was made in 1734

Woolworth, Frank Winfield, 1852–1919, American merchant, b Jefferson co , N Y He established in 1879 a five-cent store at Utica, N Y , which failed, and the same year he started a successful five-and-ten-cent store at Lancaster, Pa Woolworth opened many others and soon extended business throughout the United States and to several foreign countries In 1911 the F W Woolworth Company was incorporated with ownership of over 1,000 "five-and-tens," and Woolworth became director of various financial firms He had the Woolworth Building erected in New York city in 1913, then the highest building in the world (792 ft 1 in) See J K Winkler, *Five and Ten* (1940)

Woonsocket (wo͞onsŏ'kĭt, wo͞on-) **1** Textile city (pop 49,303), N R I , on both sides of the Blackstone river, set off from Cumberland 1867, made a city 1888 The site was occupied before 1675 The people are predominantly of French Canadian descent **2** City (pop 1,050), co seat of Sanborn co , SE S Dak , S of Huron, in a grain, dairy, and livestock area, settled 1883, inc 1888

Wooster, David (wo͝os'tur), 1711–77, patriot general in the American Revolution, b Fairfield co , Conn , grad Yale, 1738 He was a captain of Connecticut troops in the expedition (1745) against Louisburg, and later the same year he commanded a British cartel-ship headed for France He returned to America as an officer in the British army and served as brigadier general in the last of the French and Indian Wars Wooster resigned from the British army upon the outbreak of the American Revolution, was one of the promoters of the Ticonderoga expedition (1775), and was one of the eight brigadier generals of the Continental army He led Connecticut troops in the Quebec campaign After the death of Richard MONTGOMERY, Wooster was put in command (1776) of American forces at Quebec but was soon recalled by the Continental Congress because of his ineptitude In 1776 he was placed in command of the Connecticut militia, and he was mortally wounded in battle near Danbury, Conn , against the raiders of William Tryon

Wooster (wo͝os'tur), city (pop 11,543), co seat of Wayne co , N central Ohio, SW of Akron, settled 1807, inc 1817 In a dairy, livestock, and farm area, it has varied manufactures, including fire-fighting equipment The annual Wayne County Fair is held here Near by is the Ohio agricultural experiment station The **College of Wooster** (Presbyterian, coeducational), called a university until 1914, was chartered in 1866 and opened in 1870 It had a pioneer medical school (now at Western Reserve Univ) There are excellent facilities for scientific work

Worcester, Charles Somerset, 1st **earl of** (wo͝os'tur), c.1460–1526, English nobleman. An illegitimate son of Henry Beaufort, 3d duke of Somerset, he rose rapidly in the service of Henry VII He was admiral of a fleet in 1488, was sent on embassies to France in 1498 and 1502, and in 1506 was created Baron Herbert of Ragland He became lord chamberlain under Henry VIII and in 1514 was created earl of Worcester In 1525 he took part in arranging the treaty between France and England after the battle of Pavia

Worcester, Dean Conant, 1866–1924, American zoologist, b Thetford, Vt , grad Univ of Michigan, 1889. He went on two scientific expeditions (1887–88, 1890–93) to the Philippines and taught (1893–99) at the Univ of Michigan From 1899 till 1901 he served as a member of the U S Philippine Commission, and subsequently (1901–13) as secretary of the interior of the Philippine government His writings include *The Philippine Islands and Their People* (1898) and *The Philippines, Past and Present* (1913, rev ed , 1930)

Worcester, Edward Somerset, 6th **earl and** 2nd **marquess of,** 1601–67, English soldier and inventor Known as Lord Herbert after 1628, he received the title earl of Glamorgan in 1644 and succeeded as 2d marquess of Worcester in 1646 Charles commissioned him in 1640 to levy forces against the Scots and in 1644 made him a general of the armies and admiral of a fleet Glamorgan, himself a Catholic, exceeded his instructions when he signed (1645) on Charles's behalf a treaty with the Irish Roman Catholics which would have given them freedom of worship Thus treaty proved so offensive to the Protestant royalists that Charles repudiated it Worcester was imprisoned briefly in 1646, was banished by the House of Commons (1648–52), and was reimprisoned for two years on his return Most of his estates were returned to him at the Restoration He was interested in mechanical experiments, which he described in a long treatise A steam engine which he invented proved impractical See Henry Dircks, *Life, Times, and Scientific Labours of the 2nd Marquess of Worcester* (1865)

Worcester, Elwood, 1862?–1940, American Episcopal clergyman, b Massillon, Ohio, grad Columbia, 1886, Ph D Univ of Leipzig, 1889 He was professor of philosophy and psychology and chaplain at Lehigh Univ (1890–96) and rector of St Stephen's Church, Philadelphia (1896–1904), and of Emmanuel Church, Boston (1904–29) In Boston he initiated the Emmanuel movement, which was an attempt to combine faith healing and psychotherapy with medicine Samuel McComb was associated with him in the movement Worcester's books include *Religion and Medicine* (with McComb and I H Coriat, 1908), *The Christian Religion as a Healing Power* (1909), and *Body, Mind, and Spirit* (1931), both written with McComb *Life's Adventure* (1932) is Worcester's autobiography

Worcester, Henry Somerset, 3d **marquess of,** 1629–1700, English nobleman He was known by the family name of Herbert during the Protectorate, which he was friendly with Oliver Cromwell After Cromwell's death he demanded a free Parliament and welcomed the restoration of Charles II Thereafter he received many honors and was created duke of Beaufort (1682) In command at Bristol, he prevented James, duke of MONMOUTH, from attacking the city, but surrendered possession to William of Orange, after whose accession as William III, Worcester retired to his estate of Badminton

Worcester, John Tiptoft, earl of, c 1427–1470, constable of England, a Yorkist party leader in the Wars of the ROSES He studied at University College, Oxford, and was created earl of Worcester in 1449 Under Richard, duke of YORK, he was appointed treasurer of the exchequer (1452) and lord deputy of Ireland (1456–57) From 1457 to 1461 he was abroad on a tour which included an embassy to the pope and a trip to the Holy Land Most of the time was spent in Italy at Padua and Florence, and he was one of the first Englishmen familiar with the learning of the Italian Renaissance He returned to become constable of England (1462) under EDWARD IV In 1463 he was commissioned to prevent the escape of Margaret of Anjou by keeping guard at sea, but his naval operations were entirely unsuccessful As constable he tried and sentenced to death Sir Ralph Grey and many others of the Lancastrian party in 1464 He again became lord deputy of Ireland (1467) and had the earl of Desmond executed—and, it is claimed, his two sons as well He was again appointed constable in March, 1470 When Edward fled England in October and Henry VI was restored, Worcester fled He was captured, condemned by John de Vere, earl of Oxford (whose father and brother Worcester had sentenced to death in 1462), and executed Hated by the Lancastrians, he was called "the butcher of England" His translation of Cicero's *De amicitia* was printed by Caxton in 1481. See biography by R J Mitchell (1938)

Worcester, Joseph Emerson, 1784–1865, American lexicographer, b Bedford, N H , grad Yale, 1811 His early work included gazetteers and a book on geography, but he is remembered for his *Comprehensive Pronouncing and Explanatory Dictionary of the English Language* (1830) and its final revision, *A Dictionary of the English Language* (1860) Conservative and British in standards of pronunciation, he opposed the American interpretations of Noah Webster, and his dictionary was a successful rival to Webster's until late in the 19th cent.

Worcester, Noah, 1758–1837, American Congregational clergyman, b Hollis, N H He was pastor (1787–1810) at Thornton, N H , from 1813 to 1818 he was the first editor of the *Christian Disciple*, a Unitarian periodical He is, however, best remembered for his work in behalf of peace. His *Solemn Review of the Custom of War* (1814), under the pseudonym Philo Pacificus, had world-wide circulation and led to the establishment of peace societies. Worcester was secretary of the Massachusetts Peace Society (founded 1815), and he founded and edited (1819–28) a magazine, *The Friend of Peace.*

Worcester, Thomas Percy, earl of, c.1344–1403, English soldier. He served with considerable success in the wars with France and Spain, especially as admiral of the fleet of the north, a position to which he was appointed by Richard II in 1378 He served several times as diplomat, accompanying Geoffrey Chaucer to Flanders in 1376 and heading the English embassy to France to treat for peace in 1392 He apparently assented to Richard's tyrannies in 1397 and was created earl of Worcester in that year However, in the quarrel (1398) of his brother, Henry Percy, 1st earl of NORTHUMBERLAND, and his nephew, Henry Percy called Hotspur, with Richard II, he was probably drawn to sympathize with his kinsmen He accompanied Richard to Ireland in 1399 as admiral but upon their return to England joined his kinsmen and Henry of Lancaster HENRY IV at his accession confirmed Worcester's past privileges and made him admiral In 1401 he became seneschal after resigning as admiral, and in 1402 he was made lieutenant of South Wales and tutor to the prince of Wales, he resigned the following year In July, 1403, he surprised the king and nation by joining his brother and nephew in open revolt against the crown Captured in the subsequent battle of Shrewsbury, Worcester was beheaded

Worcester, county, England see WORCESTERSHIRE

Worcester (wo͝os'tur), county borough (1931 pop 50,546, 1947 estimated pop 61,350) and city, seat of Worcestershire, England, on the east bank of the Severn The site was occupied in ancient British and in Roman times and became the seat of a bishopric probably in 679 St Wulfstan (d 1095) built the cathedral in the 11th cent , the present building, wherein are held, alternately with Hereford and Gloucester, the Festivals of the Three Choirs, is chiefly 14th cent , with a Norman crypt and tombs There are several old parish churches and timbered houses, the Commandery was a hospital in the 11th cent The last city to yield to Parliament in 1646, Worcester was the scene of Cromwell's final victory and the complete rout of Charles II and the Scots, Sept 3, 1651 (the battle of Worcester) The making of porcelain, gloves, and sauce are long-established industries, to which metal goods and machines have been added

Worcester, town (pop 18,963), W Cape Prov , Union of South Africa It is connected by rail with Cape Town and has light industries

Worcester, city (pop 193,694), a co seat of Worcester co , central Mass , on the Blackstone river First settled in 1668, it was attacked by Indians, permanent settlement was made in 1713 Worcester was made a city in 1848 In Shays's Rebellion the courthouse was besieged (1786) by insurgents The canalization of the Blackstone (1828) marked the beginning of Worcester's rapid industrial development Its products include machinery, steel, electrical supplies, paper, textiles, and abrasives The city is a port of entry It is the seat of CLARK UNIVERSITY, Worcester Polytechnic Institute (for men, 1865), College of the Holy Cross (Jesuit, for men, 1843), and a state teachers college There are a fine arts museum and museums of history and of natural history At Memorial Auditorium is held the annual music festival inaugurated in 1858 Edward Everett Hale was a pastor here, 1842 56, Clara Barton was born near by Lake Quinsigamond is in the vicinity See Albert Farnsworth and G B O'Flynn, *Story of Worcester, Massachusetts* (1934)

Worcester College: see OXFORD UNIVERSITY

Worcestershire (wo͝os'tursher, -shur) or **Worcester,** county (700 sq mi , 1948 estimated pop 512,100), W central England The county town is Worcester One of the smaller English counties, Worcestershire is largely hilly country The Malvern, Cotswold, Clent, and Lickey hills, partially or entirely within the county, are the most important ranges The area is watered by the Severn and by the Avon, the valley of the Avon is known as the Vale of Evesham The county is famous for its orchards and affords much pasturage for sheep It became an administrative unit in 1041 after the recovery of Mercia from the Danes and was important in the Middle Ages as a monastic center The northern part of the county, rich in iron and coal deposits, verges into the industrial Midlands area known as the Black Country The growth of the steel and iron industry, in such towns as Dudley, has brought a considerable increase in population of recent years See *Victoria History of Worcestershire* (4 vols , 1901–24), Arthur Mee, *Worcestershire* (1938)

Worcester ware began to be manufactured in 1752, when the Lowdin pottery was moved from Bristol to Worcester Soft paste was employed, and tea services, vases, armorial mugs, and portrait plaques with underglaze decoration became popular Modeled and painted floral and medallion motives, Chinese landscapes, and the transfer print in blue,

black, or purple were modes of ornamenting early Worcester ware. A more florid treatment, with grounds of color (especially blue) and gilt as foils for birds of brilliant plumage, was effected in 1768 by artists formerly at Chelsea factories, after 1783 deterioration in design was noticeable

Worde, Wynkyn de: see WYNKYN DE WORDE.

Worden, John Lorimer (wûr'dun), 1818-97, American naval officer, b Westchester co , N Y He was appointed a midshipman in 1834 and saw extensive duty both afloat and ashore before the Civil War In April, 1861, after delivering secret orders to the squadron at Pensacola, Worden was captured by the Confederates and held prisoner for seven months Shortly after his exchange, he assumed command of the new ironclad *Monitor* In the famous battle of MONITOR AND MERRIMAC, Worden was wounded in the face and temporarily blinded While commanding the *Montauk* of the South Atlantic Blockading Squadron (1862–63), he further distinguished himself (Jan –Feb 1863) in operations about Fort McAllister, Savannah. Later Worden, promoted rear admiral in 1872, was (1869–74) superintendent of Annapolis and commanded (1875–77) the European squadron

Wordsworth, Christopher, 1774-1846, English clergyman, educator, and writer, youngest brother of the poet William Wordsworth He was master of Trinity College, Cambridge, from 1820 to 1841 Most noted of his books is *Ecclesiastical Biography* (6 vols , 1810) His second son, **Charles Wordsworth,** 1806–92, became a prelate in Scotland From 1847 to 1854 he was warden of Trinity College, Glenalmond, Perthshire In 1853 he was consecrated bishop of St Andrews, Dunkeld, and Dunblane He was deeply interested in reuniting the churches of England and Scotland His many books include *Shakespeare's Knowledge and Use of the Bible* (1864) See his *Annals of My Early Life, 1806–40* (1891) and *Annals of My Life, 1847–56* (ed by W E Hodgson, 1893) **Christopher Wordsworth,** 1807–85, English prelate and scholar, was the youngest son of Christopher Wordsworth Ordained a priest in 1835, he was headmaster (1836–44) of Harrow and thereafter canon and then archdeacon of Westminster until in 1869 he was consecrated bishop of Lincoln He wrote *Athens and Attica* (1836) and other works of classical scholarship, but he is most noted for his editing of the whole Bible, with commentaries– the New Testament (1856–60) and the Old Testament (1864-70) See biography by J H Overton and Elizabeth Wordsworth (1888)

Wordsworth, William, 1770-1850, English poet, b. Cockermouth In 1791 he graduated from Cambridge and traveled abroad While in France he fell in love with Annette Vallon, who bore him a child The events of the French Revolution strongly influenced him, and Wordsworth returned to England (1792) imbued with the principles of Rousseau and republicanism In 1793 were published *An Evening Walk* and *Descriptive Sketches*, poems written in the 18th-century manner The outbreak of the Reign of Terror prevented his return to France, and after receiving several small legacies, he settled with his sister Dorothy in Dorsetshire There he became the intimate friend of Samuel Taylor Coleridge and, probably under his influence, a student of David Hartley's empiricist philosophy Together the two poets wrote *Lyrical Ballads* (1798), a famous effort to use "a selection from the real language of men" in poetry, it included Wordsworth's poem "Tintern Abbey" In 1799 he and his sister moved to the Lake District of England, where they lived the remainder of their lives A second edition of the *Lyrical Ballads* (1800), which included a critical essay outlining Wordsworth's poetical principles, was unmercifully attacked by critics In 1802 he married Mary Hutchinson His long autobiographical poem *The Prelude* was completed in 1805, though it was not published until after his death His *Poems in Two Volumes* (1807) included the "Ode to Duty," the "Ode Intimations of Immortality," and a number of famous sonnets The tragic "White Doe of Rylstone" appeared the same year Thereafter Wordsworth's creative powers diminished and he turned for inspiration to classical models, some notable poems, however, were produced after this date, including *The Excursion* (1814), "Laodamia" (1815), *Memorials of a Tour of the Continent, 1820* (1822), "Yarrow Revisited" (1834), and others. In 1842 he was given a civil list pension, and the following year, having long since put aside radical sympathies, he succeeded his friend Robert Southey as poet laureate. Wordsworth's personality, as well as his poetry, was deeply influenced by his love of nature, especially by the actual sights and scenes of the Lake Country, in which he spent most of his mature life A profoundly earnest and sincere thinker, Wordsworth displayed a high seriousness comparable, at times, to Milton's but tempered with human tenderness and love of simplicity His earlier work shows the poetic beauty of commonplace things and people, as in "Margaret," "Peter Bell," and "The Idiot Boy", his use of the language of ordinary speech was criticised as ridiculous, but it helped to rid English poetry of the more artificial conventions of 18th-century diction Among his other well-known poems are "Lucy" ("She dwelt among the untrodden ways"), "The Solitary Reaper," "Perfect Woman," "Daffodils," "The Rainbow," and the sonnet "The World Is Too Much with Us" Often prolix, prosaic, and lacking dramatic power, Wordsworth's work is raised by its spirit, by its flashes of rich poetic beauty, and by its underlying reality and strength to a position high among the writings of English poets See editions by W A Knight of Wordsworth's poetical works (8 vols , 1882–86, 1896) and prose works (1896) and by Ernest de Selincourt of *The Prelude* (1926), the poems (1940–), and the *Letters of William and Dorothy Wordsworth* (6 vols , 1935 39), biographies by W A Knight (1889), G M Harper (rev ed , 1929), Herbert Read (1930), and G W Myer (1943), letters of the poet's daughter, Dora (ed by H P Vincent, 1940) Wordsworth's sister, **Dorothy Wordsworth,** 1771–1855, devoted and constant companion of her famous brother, is known principally for her poems and her journals, which have proved invaluable for later biographies and studies of the poet These journals, the first of which was started in 1798, are written in delicate, exquisite diction, describing the Wordsworth household, friends, and travels See edition by Ernest de Selincourt (1942) See also her poetry (ed by Hyman Eigerman, 1940), biographies by C M Maclean (1932) and Ernest de Selincourt (1933)

Work, Hubert, 1860–1942, American public official, b Indiana co , Pa After graduating in medicine at the Univ of Pennsylvania in 1885, he practiced in Colorado and founded (1896) a hospital for mental and nervous diseases in Pueblo, Colo He became important in the state Republican party after 1908 and later, after service in the First World War, he became (1920) a member of the Republican National Committee He was First Assistant Postmaster General (1921 22) and Postmaster General (1922–23) Work served (1923–28) as Secretary of the Interior and reorganized the department after Albert FALL was implicated in the Teapot Dome scandal In 1928 he managed Herbert Hoover's successful election campaign

work In physics, the term indicates the mechanical action of some force upon some object in which a resistance such as that caused by friction, gravity, inertia, or the pressure of air or water is overcome When a force is applied through any distance, work is done Motion is one essential factor of work, FORCE is the other Work, the product of the two, is therefore expressed in terms of both distance and force For example (using English-system units), when a 10-pound object is lifted 5 ft , the work done on the object is said to be 50 foot-pounds, or (using metric-system units) when a 60-gram weight is lifted 30 centimeters, the work done is 1,800 gram-centimeters The ability or capacity to do work is defined as ENERGY, and machines are devices so made as to yield a mechanical advantage in operation and to transform one form of energy into another They cannot, however, create energy (since energy can be neither created nor destroyed), nor can they do more work than is put into them In fact, since some work is always done to overcome friction or other resistance and consequently is not shown in the work output of a machine, the work done by a machine (with the possible exception of the lever) is never as great as the work put into it The efficiency of a MACHINE, i e , the ratio between the amount of apparent work done by the machine and the amount put into it, is always less than one The element of time does not enter into the scientific concept of work, for a 10-pound weight can be lifted 5 ft in 5 hr or 5 min and the work done (the product of the force and the distance) still remains the same On the other hand, POWER involves the time element and is the rate at which work is done For example, one HORSEPOWER is the ability to do work at the rate of 33,000 foot-pounds per minute The work done by a machine in operation for a certain time can, therefore, be determined by multiplying its power (if constant) by the time of operation The unit measurements of work include the ERG, the JOULE, the foot-pound and the gram-centimeter, as already described, and the kilogrammeter (a kilogram acting through a distance of one meter) The CALORIE, the BRITISH THERMAL UNIT, and the kilowatt-hour (see WATT) can be converted into work units The relationship between mechanical energy (as measured by work done) and heat is called the mechanical equivalent of heat

Workington, municipal borough (1931 pop 24,751, 1947 estimated pop 28,400), Cumberland, England, at the mouth of the Derwent on Solway Firth NE of Whitehaven It has a good harbor and docks, and coal mines are in the vicinity There are shipbuilding yards, engineering works, steel mills, and tanneries Mary Queen of Scots stopped at Workington Hall on her flight from Langside in 1568. In accordance with an old custom, a sort of street football game, with hundreds of players on each side, is held on Easter Tuesday in Workington.

Workman, Fanny (Bullock), 1850–1925, American mountain climber, b Worcester, Mass With her husband, William Hunter Workman (1847–1937), a retired physician, she made five expeditions to various parts of the Himalayas between 1899 and 1912 They explored and mapped a number of glaciers and achieved several first ascents of more than 20,000 ft In 1906 she scaled one of the Nun Kun peaks in Kashmir, thus reaching a height of 23,300 ft and establishing the world mountaineering record for women She also took part in many other mountaineering expeditions throughout the world She and her husband collaborated in writing several books, including *Ice-bound Heights of the Mustagh* (1908), *Peaks and Glaciers of Nun Kun* (1909), *The Call of the Snowy Hispar* (1910), and *Two Summers in the Ice Wilds of Eastern Karakoram* (1917)

workmen's compensation. Responsibility for injuries suffered by employees varies in different countries and in different states of the United States The common-law relationship between master and servant has been discarded in most countries In this relationship the employee is assumed to agree to run all ordinary risks of the employment, including those due to the negligence of fellow employees In present-day legislation the only positive duty of the employer is to furnish a reasonably safe place to work, suitable appliances, rules and instructions when they are reasonably necessary, and reasonably competent foremen and superintendents He is liable for his own or employees' acts of negligence, for his own gross negligence, and for extraordinary risks of work He is not liable for accidents occurring outside the place of work, for those which have not arisen directly out of employment, or for those in which blame cannot be fixed To secure compensation, the employee has to prove that the employer has not fulfilled this minimum duty In the United States all states but one have now adopted some means of compensation Some states have increased the employers' liability by provisions which employers have tried to evade by forcing employees to waive the conditions upon being hired But states have forbidden such contracts, imposing in some cases penalties upon those found guilty, and some have passed compulsory compensation laws Private insurance companies offer employers' compensation insurance, some states have made such insurance compulsory, and a few have created state insurance funds to secure payments even when the employer is insolvent Most states similarly provide for public employees, although some limit this coverage to workers engaged in dangerous occupations Federal statutes apply to those engaged in interstate commerce, with some classes of employment excluded (e g , railroad employees, masters and crews on vessels) The English law, enacted in 1897 and supplemented in 1900, 1906, 1923 (a consolidated act was passed in 1925), and 1937, requires the payment of compensation for almost all industrial accidents In France all noninsured employers are taxed for a state fund which guarantees compensation payments Some American states provide for compensation for occupational diseases See W F Dodd, *Administration of Workmen's Compensation* (1936), A T Wilson and Hermann Levy, *Workmen's Compensation* (1939)

Work Projects Administration (WPA), established in 1935 by executive order of President F D Roosevelt as the Works Progress Administration and redesignated in 1939, when it was transferred to the Federal Works Agency Created when unemployment was widespread, the WPA—headed by Harry L HOPKINS until 1938—was designed to increase the purchasing power of persons on relief by employing them on useful projects WPA's building program included the construction of 116,000 buildings, 78,000 bridges, and 651,000 mi of road and improvement of 800 airports Also a part of WPA's diversified activities were the Federal Art Project, the Federal Writers' Project, and the Federal Theatre Project Close to 10,000 drawings, paintings, and sculptured works were produced through WPA, and many public buildings (especially post offices) were decorated with murals The experiments in theatrical productions were highly lauded and introduced fresh ideas Musical performances under the project averaged 4,000 a month The most notable product of writers in WPA was a valuable series of guidebooks WPA also conducted an education program and supervised the activities of the NATIONAL YOUTH ADMINISTRATION WPA employed a total of 8,500,000 persons, and total Federal appropriations for the program amounted to almost $11,000,000,000 There was sharp criticism of the WPA by a Senate committee report in 1939, the same year the WPA appropriation was cut, while several projects were abolished and others were curtailed A strike of thousands of WPA workers in 1939 to prevent a cut in wages on building projects was unsuccessful Steadily increasing employment, much speeded before and during the Second World War, caused further drastic cuts in WPA appropriations and payrolls, and in June, 1943, the agency officially went out of existence.

Worksop (wûrk'sŭp, wûr'sŭp), urban district (1931 pop 26,285; 1947 estimated pop 29,730), Nottinghamshire, England, in the Dukeries district Estates in the vicinity include Worksop Manor, on the site of a mansion, burned in 1761, in which Mary Queen of Scots was imprisoned, Clumber Park, Welbeck Abbey, and Thoresby Park There are remains—a Norman nave, a Lady chapel, and a 14th-century gatehouse—of an Augustinian priory founded in 1103 The town is a coal-mining center and has foundries, chemical works, and glassworks

World Bank see INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

World Council of Churches, formally constituted by representatives from 150 Protestant and Orthodox denominational bodies of some 44 countries, assembled at Amsterdam in 1948 The idea of a world fellowship of churches took concrete form in 1937, when two ecumenical conferences—on life and work and on faith and order—elected a joint committee to formulate plans for a world council of churches This provisional committee met at Utrecht in 1938, but it was not until after the Second World War that the constitution of its drafting was formally ratified at the first assembly of the World Council of Churches in 1948 The constitution provides for a permanent organization in which the constituent churches are officially represented, the administrative responsibility being lodged in a central committee of 90 members, elected by the assembly The council, which has no legislative power over its member churches, provides an opportunity for its constituents to act together in matters of common concern, such as the spread of evangelism, interchurch aid and reconstruction, the study of religious and social issues, international affairs, the enlargement of opportunities in church life for women and young people, and the growth of ecumenical consciousness among church members The council maintains an ecumenical institute near its headquarters at Geneva, Switzerland The Conference of U S A Member Churches of the World Council of Churches, in which nearly every major Protestant denomination in the United States participates, held its first meeting in 1949 at Evanston, Ill See bulletins and publications of the World Council of Churches, K S Latourette, *The Emergence of a World Christian Community* (1949)

World Court, popular name of the Permanent Court of International Justice, which sat at The Hague It came to an end in 1945, when its functions were transferred to the newly created INTERNATIONAL COURT OF JUSTICE provided by the Charter of the United Nations The World Court was organized pursuant to Article 14 of the Covenant of the League of Nations The protocol establishing it was ratified by the requisite number of states in 1921, and finally some 50 states adhered The United States never joined the court, because the Senate refused to ratify the protocol without reservations The court was empowered to render judgments in disputes between states which were voluntarily submitted to it and to give advisory opinions in any matter referred to it by the Council or the Assembly of the League Its functions, thus, were judicial rather than purely arbitral and diplomatic, as were those of the older HAGUE TRIBUNAL (the Permanent Court of Arbitration) It was also distinguished from that body by having a permanent group of judges instead of a panel from which judges might be selected to hear a particular dispute The court had originally 11 judges and 4 deputy judges, but in 1931 its composition was changed to 15 regular judges Judges were elected for nine-year terms by the Council and the Assembly concurrently, they were selected from a list of nominees of the Hague Tribunal regardless of nationality, except that not more than one citizen of a country might sit on the bench at any one time There was always an American jurist on the court To assure impartiality, the judges were paid salaries and were forbidden to engage in governmental service or in any legal activity except their judicial work In the course of its existence the court rendered 32 judgments and 27 advisory opinions An important judgment was that which affirmed (1933) Danish sovereignty over the north coast of Greenland and disallowed Norway's claim. The advisory opinions of the court were important in developing international law A notable opinion declared (1931) that the proposed customs union of Germany and Austria would violate Austria's pledge to remain independent The court virtually ceased to function after the German occupation of the Netherlands in 1940 See Manley O Hudson, *The Permanent Court of International Justice, 1920–1942* (rev ed, 1943)

World Health Organization (WHO), agency of the United Nations, established in 1948, with its headquarters at Geneva. WHO admits all sovereign states (including those which do not belong to the United Nations) to full membership and it admits territories that are not self-governing to associate membership It is governed by the World Health Assembly, consisting of the entire membership, which meets at least once a year, and by an executive board elected by the UN Assembly Technical committees and regional organizations have been established to further the purpose of WHO, namely "the attainment by all peoples of the highest level of health" In 1950 there were regional organizations in the E Mediterranean region, in SE Asia, and in the Americas WHO accomplished notable work in checking cholera, malaria, and tuberculosis Studies were made of mental health, of the standardization of health statistics, and of other problems of world-wide scope For a time WHO seemed exempt from the disputes between the USSR and the United States which had caused friction in other branches of the United Nations In 1949, however, the USSR, Belorussia, and the Ukraine resigned on the grounds that WHO was inefficient. In 1950 there were 64 member nations

World's Columbian Exposition, held at Chicago, Ill, May–Nov, 1893, in commemoration of the 400th anniversary of the discovery of America by Christopher Columbus Authorized by Congress (1890), planned and completed by a commission headed by Thomas W Palmer, the grounds along the Lake Michigan shore were dedicated Oct 12, 1892 The exposition, known as the White City, was composed of 150 buildings of Romanesque, Greek, and Renaissance architecture constructed of staff, a material resembling marble Among the architects were McKim, Mead, and White, who designed the Agricultural Building, and Adler and Sullivan, who initiated functional architecture with the Transportation Building Daniel H Burnham supervised the designing and construction, Frederick Law Olmstead, the landscaping The exposition attracted thousands of Americans whose values were influenced by the foreign exhibitions, the architectural style, and the general cultural tone of the panorama

world's fair. see EXPOSITION

world soul, Latin *anima mundi,* in philosophy, a term to denote a universal spirit or soul which functions as an organizing principle While many early Greek philosophers saw the world as of one principle, it was Plato who first stated that this concept held the same relation to the world as the human soul did to the body Schelling used the term as a unifying principle, coordinating the organic and the inorganic in life World soul is prominent in Oriental philosophy Brahma is a world soul as conceived in the *Upanishads* (see VEDANTA), and Hinduism is a religion whose theoretical basis is a world soul

World's View, granite hill, Southern Rhodesia, c 30 mi S of Bulawayo It was designated by Cecil Rhodes as the resting place for those who served Great Britain well in Africa Here are buried Rhodes and Sir Leander Starr Jameson

World War, First, 1914-18 Among the basic causes that led to this largest conflict the world had until then seen, were the imperialistic and economic rivalries set in motion, in the 19th cent, by the territorial and economic expansion of the British, German, and Russian empires The Industrial Revolution and the growth of nationalism in Europe were powerful factors in promoting these rivalries The Franco-Prussian War of 1870–71 had deprived France of Alsace and Lorraine and left it thirsting for revenge It also had unified Germany, where after the dismissal (1890) of Bismarck, Emperor WILLIAM II embarked on colonial and naval policies that clashed with British interests The EASTERN QUESTION, created by the decay of the Ottoman Empire, also brought the opposition between German and Anglo-French interests into focus (as in the matter of the BAGHDAD RAILWAY), and led to nationalistic rivalries in the Balkans, where PAN-SLAVISM, encouraged by Russia, menaced the existence of the multinational AUSTRO-HUNGARIAN MONARCHY The international crises over MOROCCO and over BOSNIA AND HERCEGOVINA, the BALKAN WARS of 1912–13, and many lesser incidents were fateful symptoms of the explosive state of Europe, and they were accompanied by a general armaments race Nevertheless, Europe on the eve of the war was rocked in a false sense of security and permanency Prosperity and material progress seemed insured forever, the existence of national frontiers was hardly noticeable to travelers, at no time in European history since the Roman Empire had economic and cultural interchange met fewer obstacles Two opposing coalitions had emerged in the diplomatic shifts that began in 1879—the TRIPLE ALLIANCE AND TRIPLE ENTENTE—but they seemed evenly balanced, moreover the dynastic and personal ties of the rulers of Europe cut across the alliances and favored peaceful settlements of disputes at the highest level. It may be said that in 1914 no statesman or ruler desired a general conflict, yet many toyed with the idea of limited or local war The spark that set off the powder keg was the assassination (June 28, 1914) of Archduke FRANCIS FERDINAND, heir to the throne of Francis Joseph of Austria-Hungary, at Sarajevo by a Serbian nationalist Weeks passed before Austria-Hungary took a step, during these weeks the Austrian militarist faction, headed by the foreign minister Count BERCHTOLD, had won a victory over the moderates, and on July 23 a nearly unacceptable ultimatum was addressed to Serbia. The Russian foreign minister, SAZONOV, assured Serbia of Russian support The Serbian reply promised compliance with all points of the ultimatum except the infringement on Serbian sovereignty in the provision for the presence of Austro-Hungarian officials on Serbian soil in order to investigate and punish the secret organization allegedly responsible for the archduke's murder Austria-Hungary and its ally, Germany, still believed in the possibility of localizing the conflict, they rejected a European conference proposed by the English foreign minister, Lord GREY OF FALLODON, and on July 28 Austria-Hungary declared war on Serbia Russia ordered partial, then general, mobilization (July 29–30) A German ultimatum to Russia (July 31), demanding cessation of military preparations along the German border, remained unanswered, and on Aug 1 Germany declared war on Russia Convinced that France was about to join Russia in the war, Germany on Aug 3 also declared war on France and invaded Luxembourg and Belgium The uncertain attitude of England had encouraged German hopes for British neutrality, but on Aug 4, as a result of German violation of Belgian neutrality, England declared war on Germany Within the following weeks Montenegro and Japan joined the Allies (i e, England, France, Russia, Belgium, and Serbia), and the Ottoman Empire joined the Central Powers (i e, Germany and Austria-Hungary) The war now was general Whether or not it might have been avoided or localized and which persons or nations were most responsible for its outbreak are questions that have been debated among historians ever since

From the Marne to Verdun The German strategy, planned by SCHLIEFFEN, did not contemplate a two-front war It was, moreover, weakened from the start when forces were detached from the all-important right wing, which was supposed to smash through Belgium, in order to reinforce the left wing in Alsace-Lorraine Nevertheless, the Germans quickly occupied most of BELGIUM and advanced on Paris In Sept, 1914, the first battle of the Marne (see MARNE, BATTLE OF THE) took place For reasons still controversial, a general German retreat was ordered, and the Germans entrenched themselves behind the Aisne river The race for the Channel ports bogged down in the first battle of YPRES (Oct–Nov, 1914), and grueling trench warfare began along the entire Western Front For the next three years the battle line remained virtually stationary It ran, approximately, from Ostend past Armentières, Douai, Saint-Quentin, Rheims, Verdun, and Saint-Mihiel to Lunéville Meanwhile, on the Eastern Front, the Russians under Rennenkampf and Samsonov had invaded East Prussia but were decisively defeated by the Germans under HINDENBURG, LUDENDORFF, and MACKENSEN at TANNENBERG and the MASURIAN LAKES (Aug–Sept, 1914) The Germans advanced on Warsaw, but further south a Russian offensive drove back the Austrians, who lost Przemysl in March, 1915 However, by the autumn of 1915 combined Austro-German efforts had driven the Russians out of most of Poland and were holding a line extending from Riga to Chernovtsy Grand Duke Nicholas was relieved of his supreme command of the Russian forces The Russians counterattacked in 1916 in a powerful drive directed by BRUSILOV, by the year's end, however, the offensive had collapsed and had cost Russia 1,000,000 men Soon afterward the RUSSIAN REVOLUTION eliminated Russia as a useful ally Against Serbia and Montenegro the Austro-Hungarians were unsuccessful for the first year In Oct, 1915, Bulgaria joined the Central Powers, while the Austrians received German reinforcements Invaded on one side by the Austro-German forces under Mackensen and on the other by the Bulgarians, Serbia and Montenegro had fallen by the end of the year Another blow to the Allied cause was the failure of the GALLIPOLI CAMPAIGN (1915) against Turkey The Allies, however, won a diplomatic battle when Italy, after denouncing its partnership in the Triple Alliance and after being promised vast territorial gains, entered the war on the Allied side in May, 1915 Austro-Italian fighting along the Isonzo was inconclusive until late 1917, when the Italian rout at CAPORETTO made Italy a liability rather than an asset to the Allies Except in Africa, where the British were dealing successful blows to the German colonies, the year 1916 opened with a dark outlook for the Allies The stalemate on the Western Front had not been affected in 1915 by the second battle of Ypres, in which the Germans used poison gas for the first time, nor by the French offensive in Artois, in which a slight advance of the French under Pétain was paid for by the loss of 400,000 men, nor by the offensive of JOFFRE in

Champagne, nor by the British advance toward Lens and Loos In Feb., 1916, the Germans tried to break the deadlock by massing a huge assault on VERDUN. The French, rallying with the cry, "They shall not pass!" held fast despite enormous losses, and in July the British and French took the offensive along the Somme, where tanks were used for the first time by the British By November, they had gained a few miles and lost 600,000 men By December, a French counteroffensive at Verdun had restored the approximate positions of Jan., 1916 Yet, despite signs of exhaustion on both sides, the war went on, drawing ever more nations into its maelstrom Portugal and Rumania joined the Allies in 1916, Greece, involved in the war by the Allied SALONICA CAMPAIGNS on its soil, declared war on the Central Powers in 1917

American Intervention and Allied Victory The neutrality of the United States was seriously imperiled in 1915 by the sinking of the LUSITANIA At the end of 1916 the Germans, whose surface fleet had been bottled up since the indecisive battle of Jutland (see JUTLAND, BATTLE OF), announced that it would begin unrestricted SUBMARINE warfare In protest, the United States broke off relations with Germany (Feb, 1917), and on April 6 it entered the war, followed by several Latin American republics The military effect of American participation was at first negligible, but the moral effect was decisive The war on the Western Front continued both stationary and bloody Against Turkey, England scored a major success when T E LAWRENCE stirred the Arabs to revolt Baghdad fell (March, 1917) and ALLENBY took Jerusalem (Dec, 1917) The first troops of the American Expeditionary Force, commanded by General PERSHING, landed in France in June, 1917, but they were not used at the front for several months and did not engage in important action until May, 1918, when they were rushed to the CHATEAU-THIERRY area to help stem a new German offensive A unified Allied command in the West had been created in April, 1918, it was headed by FOCH, but under him the national commanders (HAIG for Britain, ALBERT I for Belgium, and Pershing) retained considerable authority At the same time Admiral Sir Roger KEYES blocked the German fleet at Zeebrugge and Ostend However, the Central Powers had gained new strength through the Treaty of BREST-LITOVSK (March, 1918) with Russia, the resources of the Ukraine seemed at their disposal, thus enabling them to balance to some extent the effects of the Allied blockade, their forces could now be concentrated against the West The critical German counteroffensive, known as the second battle of the Marne, was stopped just short of Paris (July–Aug, 1918) At this point Foch ordered a general counterattack which soon pushed the Germans back to their initial line (the so-called Hindenburg Line) The Allied push continued, with the British advancing in the north and the Americans forging through the Argonne While the Germans were thus losing their last forces, Bulgaria invaded by the Allies under FRANCHET D'ESPEREY, capitulated on Sept 30, and Turkey concluded an armistice on Oct 30 Austria-Hungary, in process of disintegration, surrendered on Nov 4 after the Italian victory at VITTORIO VENETO German resources were exhausted and German morale collapsed President Wilson's FOURTEEN POINTS were accepted by the new German chancellor, MAXIMILIAN, PRINCE OF BADEN, as the basis of peace negotiations, but it was only after revolution had broken out in Germany that the armistice was at last signed (Nov 11) at Compiègne Germany was to evacuate immediately all territory W of the Rhine, and the Treaty of Brest-Litovsk was declared void Thus the war ended without a single truly decisive battle having been fought, and Germany lost the war while its troops were still occupying territory from France to the Crimea Thus paradox became important in later German history, when nationalists and militarists sought to blame the defeat on traitors on the home front rather than on the utter exhaustion of the German war machine and war economy.

Aftermath The First World War and the resulting peace treaties (see VERSAILLES, TREATY OF, SAINT-GERMAIN, TREATY OF, TRIANON, TREATY OF, NEUILLY, TREATY OF, SÈVRES, TREATY OF) radically changed the face of Europe and precipitated political, social, and economic changes which were partially responsible for the Second World War Yet when the war ended, the immense suffering it had caused gave rise to a general revulsion to any kind of war, and a large part of mankind placed its hopes in the newly created LEAGUE OF NATIONS Warfare itself had been revolutionized (see AIR POWER, CHEMICAL WARFARE, MECHANIZED WARFARE) To compute the total losses caused by the war is impossible About 10,000,000 dead and 20,000,000 wounded is a conservative estimate Starvation and epidemics raised the total in the immediate post-war years There is a tremendous amount of general and specialized literature on the First World War. Classic accounts of the background of the war are S B. Fay, *The Origins of the World War* (rev. ed., 1930) and B. E. Schmitt, *The Coming of the War* (1930). Two short guides to the military history are C. J. H Hayes, *Brief History of the Great War* (1920) and B H Liddell Hart, *The Real War* (1930)

World War, Second, 1939–45. The underlying social, economic, and ideological causes of this second global conflict will remain controversial as long as they continue to disturb the stability of the world More direct causes were contained in germ in the peace settlements of 1919–20. Defeated GERMANY, disappointed ITALY, and ambitious JAPAN were anxious to regain or increase their power; all three eventually adopted forms of dictatorship (see NATIONAL SOCIALISM and FASCISM) that made the state supreme and called for expansion at the expense of their neighbors These three self-styled "have not" countries also set themselves up as champions against Communism, thus gaining at least partial tolerance of their doings from the Western democracies, the "haves." The LEAGUE OF NATIONS, weakened from the start by the defection of the United States, was unable to promote disarmament (see DISARMAMENT CONFERENCES), while the long economic depression that swept over the world in the late 1920s sharpened national rivalries, increased fear and distrust, and made the masses susceptible to the promises of demagogues. The failure of the League to stop the Second CHINO-JAPANESE WAR in 1931 was followed by a fateful crescendo of treaty violations and acts of aggression In 1935 Adolf HITLER recreated the German army; in 1936 he remilitarized the Rhineland, in 1935–36 Benito MUSSOLINI conquered ETHIOPIA for Italy, from 1936 to 1939 civil war raged in Spain, where Germany and Italy helped Francisco FRANCO to victory, in March, 1938, Germany annexed Austria, and in Sept, 1938, Great Britain and France topped their "appeasement policy" toward the AXIS (as the combination of Germany, Italy, and Japan was called) by sacrificing CZECHOSLOVAKIA to Germany in the MUNICH PACT When Germany occupied (March, 1939) all Bohemia and Moravia, and when Italy seized (April, 1939) ALBANIA, England and France abandoned "appeasement" and set about creating an "antiaggression" front and speeding rearmament However, they had alienated the USSR by excluding it from the Munich Pact, and they had countenanced the disintegration of the LITTLE ENTENTE and the BALKAN ENTENTE In the summer of 1939 Germany menaced POLAND, which was included in the front, but the Russo-German nonaggression pact of Aug 23 removed German fear of a possible two-front war, and on Sept 1, 1939, Germany invaded Poland, cutting short diplomatic talks England and France declared war on Germany on Sept 3, and shortly all the members of the British Commonwealth, except Ireland, were also at war The fighting in Poland was brief The German *Blitzkrieg* [lightning war], making use of new techniques of air warfare and armored forces, crushed the Polish defenses, and the conquest was almost complete when Russian forces entered (Sept 17) E Poland While this campaign ended with the partition of Poland and while the USSR defeated Finland in the FINNISH-RUSSIAN WAR (1939–40), the British and the French behind the MAGINOT LINE spent an inactive winter, content with blockading Germany by sea

From Norway to Moscow The inactive period ended with the surprise invasion (April 8–9, 1940) of DENMARK and NORWAY by the Germans Denmark offered no resistance, Norway was conquered by June 10 On May 10 German forces overran Luxembourg and invaded the NETHERLANDS and BELGIUM, on May 11 they broke through Sedan into France Their columns raced to the English Channel and cut off Flanders, and the Allies were evacuated from DUNKIRK (May 26–June 4) General WEYGAND had replaced GAMELIN as supreme Allied commander, but was unable to stop the Allied debacle in the "battle of France" On June 22 FRANCE signed an armistice with Germany, followed by an armistice with Italy, which had entered the war on June 10 ENGLAND, the only remaining Allied power, resisted, under the inspiring leadership of Winston CHURCHILL, the German attempt to bomb it into submission While Germany received its first setback in the "battle of Britain," fought entirely in the air, the theater of war was widened by the Italian attack on the British in Africa (see NORTH AFRICA, CAMPAIGNS IN) and by the Italian invasion (Oct 28, 1940) of GREECE. HUNGARY, RUMANIA, and BULGARIA joined the Axis late in 1940, but YUGOSLAVIA resisted German pressure, and on April 6, 1941, Germany launched an attack on Yugoslavia and Greece and won rapid victory In May, CRETE fell Great Britain gained a new ally on June 22, 1941, when Germany (joined by Italy, Rumania, Hungary, Slovakia, and Finland), invaded Russia (see UNION OF SOVIET SOCIALIST REPUBLICS) The USSR, after several costly initial defeats, rallied successfully under the leadership of Premier STALIN, who had assumed the military command. By the end of 1941 encircled LENINGRAD began its long resistance to its besiegers, Marshal TIMOSHENKO had halted the German sweep through the Ukraine, and a Russian counteroffensive broke the two-pronged drive on Moscow.

The War Comes to the United States Though determined to maintain its neutrality, the UNITED STATES was gradually drawn closer to the war by the force of events To save England from collapse the Congress voted LEND-LEASE aid early in 1941, in Aug, 1941, President F D ROOSEVELT met Churchill on the high seas, and together they formulated the ATLANTIC CHARTER as a general statement of democratic aims To protect its shipping from the attacks by German submarines, the United States occupied (April, 1941) GREENLAND and later shared in the occupation of ICELAND, but despite repeated warnings the attacks continued, in October, the U S destroyer *Reuben James* was sunk While relations with Germany thus became increasingly strained, the aggressive acts of Japan in INDO-CHINA and THAILAND provoked futile protests from the United States Efforts to reach a peaceful settlement were ended on Dec 7, 1941, when Japan without warning attacked PEARL HARBOR, the PHILIPPINE ISLANDS, and MALAYA War was declared (Dec 8) on Japan by the United States, Great Britain, the Netherlands, Australia, Canada, New Zealand, and several Latin American countries Within a few days Germany and its allies (but not Finland) declared war on the United States The first phase of the war in the Pacific was disastrous for the Allies Japan swiftly conquered the Philippines (where gallant resistance ended at Corregidor), Malaya, BURMA, INDONESIA, and many Pacific islands, destroyed an Allied fleet in the Java Sea, and reached, by mid-1942, its furthest points of advance in the ALEUTIAN ISLANDS and in NEW GUINEA Australia became the chief Allied base for the countermoves against Japan, directed by Gen Douglas MACARTHUR, Admiral NIMITZ, and Admiral HALSEY The first Allied naval successes against Japan were scored in the battles of the CORAL SEA and of MIDWAY In April, 1942, Col J H DOOLITTLE led the first air raid on Japan On land the Allies took the offensive on New Guinea and landed (Aug 7, 1942) on GUADALCANAL in the SOLOMON ISLANDS

The Turning Point Despite the slightly improved Allied position in the Pacific, the late summer of 1942 was perhaps the darkest period of the war In North Africa, the Axis forces under ROMMEL were sweeping into Egypt, in Russia, they had penetrated the Caucasus and launched a gigantic offensive against STALINGRAD In the Atlantic, even to the shores of the United States and in the Gulf of MEXICO, German submarines were sinking Allied ships at an unprecedented rate, offsetting the effects of lend-lease Yet the Axis war machine showed signs of use, while the United States was merely beginning to put its potential into motion and while RUSSIA still had huge reserves and was receiving lend-lease aid through IRAN and MURMANSK The first decisive blow, however, was leveled at the Axis by Britain, when B L MONTGOMERY routed Rommel at ALAMEIN in North Africa (Oct, 1942). The next blow was the American invasion of Algeria (Nov 7–8, 1942), the Americans and British were joined by "Free French" forces of General de GAULLE and by regular French forces that had passed to the Allies after the surrender of Admiral DARLAN After heavy fighting in Tunisia, Africa was cleared of Axis forces by May 12, 1943 Meantime, in Russia, the heroic stand of Stalingrad and a Russian counteroffensive resulted in the surrender (Feb 2, 1943) of 330,000 Axis troops at Stalingrad and was followed by a nearly uninterrupted Russian offensive In the Mediterranean, the Allies followed up their African victory by the conquest of Sicily (July–Aug, 1943) and the invasion of Italy, which surrendered on Sept 3 In the Balkans, particularly in YUGOSLAVIA, "underground" armies began to wage major warfare against the Germans In the Atlantic, the submarine threat was virtually ended by the end of 1943 The Allies, who had signed (Jan 1, 1942) the UNITED NATIONS declaration, were drawn more closely together by the CASABLANCA CONFERENCE, at which they pledged themselves to continue the war until the unconditional surrender of the Axis, and by the MOSCOW CONFERENCES, the QUEBEC CONFERENCE, the CAIRO CONFERENCE, and the TEHERAN CONFERENCE The invasion of Germany-held France was decided upon, and Gen Dwight D EISENHOWER was put in charge of the operation *Allied Victory* By the beginning of 1944 air warfare had turned overwhelmingly in favor of the Allies, who wrought unprecedented destruction on such German centers as COLOGNE, HAMBURG, and BERLIN and on communications and industries throughout German-held Europe This air offensive prepared the landing (June 6, 1944) of the Allies in N France (see NORMANDY CAMPAIGN) and a secondary landing (Aug. 15) in S France The campaign in ITALY, with hard-won battles at CASSINO and ANZIO before the fall of Rome (June 4, 1944), continued slowly, but in France and Belgium the Allied victory was almost complete by Sept. 30, 1944 The use of robot bombs by the Germans proved as futile an effort as their counteroffensive in Belgium under Gen. Gerd von RUNDSTEDT (see

BATTLE OF THE BULGE). On the Eastern Front Russian armies swept (1944) through the Baltic States, E Poland, Belorussia, and the Ukraine and forced the capitulation of Rumania (Aug 23), FINLAND (Sept 4), and Bulgaria (Sept 10) Having evacuated the Balkan Peninsula, the Germans resisted in Hungary until Feb , 1945, but Germany itself was pressed The Russians entered East Prussia and Czechoslovakia (Jan , 1945) and conquered Germany to the Oder On March 7 the Western Allies—whose chief commanders in the field were Omar N BRADLEY and Montgomery—crossed the Rhine after having smashed through the strongly fortified Siegfried Line German collapse came after the Western and Russian armies met (April 25) at Torgau in Saxony, and after Hitler died among the ruins of Berlin, which was falling to the Russians under ZHUKOV and KONEV The unconditional surrender of Germany was signed at Rheims on May 7, and was ratified at Berlin on May 8 In the Pacific, after the completion of the campaigns in the Solomon Islands (late 1943) and New Guinea (1944), the Allied advance moved inexorably in two lines that converged toward Japan through scattered island groups—the Philippines, the MARIANAS ISLANDS, OKINAWA, and IWO JIMA At the YALTA CONFERENCE, the USSR secretly promised its aid against Japan, which refused to surrender after the Allied appeal made at the POTSDAM CONFERENCE On Aug 6, 1945, the first atomic bomb devastated HIROSHIMA, on Aug 9, the second bomb was dropped on NAGASAKI and the USSR invaded Manchuria On Aug 14 Japan announced its surrender, formally signed aboard the U S battleship *Missouri* in Tokyo Bay on Sept 2

The Reckoning Although hostilities came to an end in Sept , 1945, the new world crisis caused by the postwar opposition between the USSR and the United States—the two chief powers to emerge from the war— made a settlement difficult As of March, 1950, peace treaties had been signed with Italy, Rumania, Hungary, Bulgaria, and Finland, but not with Germany, Japan, and Austria Despite the birth of the United Nations, the world remained politically unstable and only slowly recovered from the incalculable physical and moral devastation wrought by the war Civilians and soldiers suffered alike in indiscriminate bombings that wiped out entire cities Modern methods of warfare, together with the deliberate attempt of the Germans to exterminate whole racial groups (particularly the JEWS), famines, and epidemics brought death to tens of millions and made as many more homeless The suffering and degradation of the war's victims were of proportions that passed the understanding of those who had been spared Political consequences, besides the eclipse of Germany and Japan as world powers, were the reduction of England and France to powers of the second rank, the emergence of former colonial countries (e g , India, Pakistan, and Indonesia) as independent states, and the renewal of civil war in CHINA The technique of warfare itself was revolutionized (see AIR POWER, AMPHIBIOUS WARFARE, ATOMIC BOMB, CHEMICAL WARFARE, JET PROPULSION, MECHANIZED WARFARE, MINE, ROCKET) Conventions of warfare were violated on a large scale (see HOSTAGE, PRISONERS OF WAR, WAR CRIMES) The steady stream of official publications and individual memoirs concerning the Second World War was still flowing in 1950 Among notable accounts are G C Marshall, *General Marshall's Report* (1945), R W Shugg and H A DeWeerd, *World War II* (1946), Walter Karig, ed , *Battle Report* (4 vols , 1944–48), S E Morison, *History of United States Naval Operations in World War II* (Vols I–V 1946–49), D D Eisenhower, *Crusade in Europe* (1948), J F C Fuller, *The Second World War* (1949), and the war memoirs of W S Churchill (*The Gathering Storm*, 1948; *Their Finest Hour*, 1949, *The Grand Alliance*, 1950)

worm, name applied to several phyla of elongated, soft-bodied invertebrates The segmented worms, e g , the EARTHWORM and the marine worms of the genus *Nereis*, belong to the phylum Annelida or Annulata The flat worms of the phylum Platyhelminthes include parasites such as the TAPEWORM, the FLUKE, and the free-living *Planaria* Round or thread worms constitute the phylum Nemathelminthes, among which are nematodes such as the HOOKWORM, *Filaria*, the cause of filariasis, which may result in ELEPHANTIASIS, *Trichinella*, the cause of TRICHINOSIS, *Ascaris*, an intestinal parasite of man, horses, and pigs, the pinworm, a parasite common in children, the Guinea worm of the central parts of Africa and Asia which burrows into human flesh, and various species of nematode worms which are agricultural pests The rotifers are microscopic, multicellular animals related to the worms They are found chiefly in stagnant fresh water, although a few exist in sea water The SHIPWORM is a mollusk. The larvae of some insects are popularly called worms

Wormleysburg (wûrm'lēzbûrg), borough (pop. 1,454), S Pa , on the Susquehanna and near Harrisburg, laid out 1815.

Worms (wûrms, Ger. vôrms), city (pop 47,074), Rhenish Hesse, W Germany, on the Rhine. It is the export center for Liebfraumilch wines and has varied manufactures One of the most venerable historic centers of Europe, Worms was more than half destroyed in the Second World War Originally a Celtic settlement, called Borbetomagus by the Romans, it was captured and fortified by Drusus in 14 B C It became the capital of the first kingdom of Burgundy in the 5th cent , the scene of much of the *Nibelungenlied* is laid here at the Burgundian court Worms was an early episcopal see, and its bishops ruled some territory on the right bank of the Rhine as princes of the Holy Roman Empire until 1803, when the bishopric was secularized and passed to Hesse-Darmstadt The city itself, however, early escaped episcopal control, it was the first German town to be created (1156) a free imperial city Numerous important meetings were held here The best known of these were the episcopal synod of 1076, which declared Pope GREGORY VII deposed, the conference which led in 1122 to the Concordat of Worms, the diet of 1495 (see MAXIMILIAN I, emperor), and the diet of 1521 (see WORMS, DIET OF) The city suffered heavily in the Thirty Years War It was annexed to France in 1797 and passed to Hesse-Darmstadt at the Congress of Vienna (1814–15) Occupied (1918–30) by French troops after the First World War, it was again included in the French zone of occupation in 1945 and was incorporated in the new state of Rhineland-Palatinate Among the heavily damaged buildings were the Romanesque basilica and other medieval churches Worms had one of the oldest Jewish settlements in Germany Its Romanesque-Gothic synagogue, founded in 1034, was destroyed by the Nazis in 1938

Worms, Concordat of, 1122, agreement reached by Pope Calixtus II and Emperor Henry V to put an end to the struggle over INVESTITURE By its terms the emperors gave up the right to invest bishops or abbots, which was exclusively reserved to the papacy, but they retained authority to prevent the election of bishops and of abbots who were not to their liking The Concordat of Worms was not a concordat in the usual sense, but rather a double proclamation on the part of the pope and of the emperor The compromise between spiritual and temporal power which it achieved remained essentially the basis of all subsequent concordats

Worms, Diet of, 1521, most famous of the imperial diets held at Worms, Germany. It was opened in Jan 28, 1521, by Emperor CHARLES V After disposing of other business, notably the question of the REICHSREGIMENT, it took up the question of the recalcitrant behavior of Martin LUTHER Charles was induced to summon Luther, who arrived at Worms under a safe-conduct on April 16 At the diet Luther was asked if he would retract his teachings condemned by the pope After a day's meditation he refused For a week various theologians argued with him, but he would not retire from his ground Finally, on April 26, the emperor, seeing the dispute was fruitless, ordered Luther to leave the city The diet had as its chief effect the widening of the gap between the Roman Catholic Church and the new Reformed beliefs

wormwood, Old World perennial herb or shrubby plant (*Artemisia absinthium*), often cultivated in gardens and escaped in North America It has silvery gray, deeply incised leaves and tiny yellow composite flower heads Wormwood oil has been utilized since ancient times as an insect repellent, particularly for moths, until recently it was used for intestinal worms and for other medicinal purposes It was also employed in brewing but is best known for the bitter principle which is an ingredient of ABSINTHE Because of this intense bitterness wormwood has long symbolized any bitterness felt by man and is often so represented in the Bible. This is the common wormwood, but other artemisias, some American, are also called wormwood, still others include southernwood, TARRAGON, artemisia silver king, old woman, Roman wormwood, SAGEBRUSH, and the Levant wormseed which yields SANTONIN

worsted: see WOOL

Worth, Charles Frederick, 1825–95, Anglo-French dress designer, for over a generation the leading arbiter of women's styles Born in England, he settled (1846) in Paris, becoming designer for a wholesale silk house In 1858, with a partner, he set up as a ladies' tailor in the Rue de la Paix. Empress Eugénie's patronage established his reputation for original designs

Worth, William Jenkins, 1794–1849, American general, b Hudson, N Y He served with distinction on the Niagara frontier in the War of 1812, being severely wounded at the battle of Lundy's Lane (1814) Remaining in the army after the war, Worth became commandant of cadets and instructor of infantry tactics at West Point (1820–28), even though he was not a West Point man Promoted colonel in 1838, he was brevetted brigadier general for his subsequent services against the Seminole Indians In the Mexican War, Worth first fought under Zachary Taylor in the northern campaign that ended with the capture of Monterrey Some observers said that he was the real victor of the campaign, although Taylor received all the glory. Later under Winfield Scott he further distinguished himself in the victorious advance from Veracruz to Mexico city, especially at Cerro Gordo and Churubusco He was the first to enter Mexico city, receiving the surrender of the capital. In 1848 he was given command of the Dept of Texas, but his career was cut short by cholera Worth had no superior as a leader in battle, but faulty temperament, well exemplified in his ungrateful and insubordinate conduct towards Scott, who had been his benefactor, injured his reputation. Fort Worth, Texas, was named for him See J. H. Smith, *The War with Mexico* (1919)

Wortham (wûr'dhŭm), town (pop 1,267), E central Texas, S of Corsicana and NE of Waco, inc 1910 It is the trade center for a farm area with some oil

Wörthersee, Austria see MARIA WÖRTH.

Worthing (wûr'dhĭng), municipal borough (1931 pop 46,224, 1947 estimated pop 67,790), Sussex West, England, on the English Channel W of Brighton It is a seaport and a resort. Protected by the South Downs, it has a mild climate (figs grow out of doors) The growing of flowers and fruits in greenhouses is a specialty The museum contains remains of late Neolithic flint mines worked at Cissbury Ring near by Many traces of Roman occupation are found in the vicinity, notably at Highdown Hill, where excavation in 1937 disclosed a complete Roman bath system

Worthington (wûr'dhĭngtŭn) **1** Residential town (pop 1,729), SW Ind , on the White River and NE of Vincennes **2** City (pop 5,918), co seat of Nobles co , SW Minn , near the Iowa line, in a lake region It is a farm trade center **3** Village (pop 1,569), central Ohio, N of Columbus, laid out 1804 Several historic churches remain Near by is the Pontifical College Josephinum

Wortman, Denys (wûrt'mn), 1887–, American caricaturist and draughtsman, b Saugerties, N Y. He studied for short periods at Stevens Institute of Technology and Rutgers Univ and from 1906 to 1909 at the New York School of Fine and Applied Art From 1924 to 1930 he contributed daily drawings to the New York *World* under the title "Metropolitan Movies." After 1930 his work appeared under the same caption in the New York *World-Telegram* and in some 40 newspapers served by the United Features Syndicate Wortman's drawings are distinguished for their fine draughtsmanship and brilliant characterization They depict tramps, New York East Side and Greenwich Village types, and amusing phases of the city's clothing business

Wotan see WODEN

Wotton, Sir Henry, 1568–1639, English poet and diplomat He was secretary to the earl of Essex and later became a favorite of James I, who knighted him and appointed him ambassador to Venice He was provost of Eton from 1624 until his death His poetic fame rests largely on two poems, "Character of a Happy Life" and his tribute to Elizabeth, queen of Bohemia, beginning, "You meaner beauties of the night," which was first printed with music in East's *Sixth Set of Books* (1624) Wotton also wrote a number of prose tracts His biography (1651) was written by his friend Izaak Walton See also *Life and Letters* (ed by L P Smith, 1907)

wound, break in the skin or in the mucous membrane of the body resulting from external injury. The chief types of wounds are abrasions (superficial wounds made by rubbing or scraping off portions of the body surface), incised wounds (cuts made with a sharp object), lacerated wounds (wounds involving torn or mangled tissues), and punctures or penetrating wounds Except for internal injuries resulting from deep wounds, the greatest dangers are excessive bleeding and infection Since blood vessels are cleanly severed in incised wounds, bleeding is commonly profuse, but the danger from infection is smaller than in other wounds because there is less tissue injury and germs tend to be carried out by the bleeding Immediate treatment by a physician is advised in some cases of wounds, these include extensive wounds, punctured or lacerated wounds, wounds causing profuse bleeding, infected wounds, and wounds in which a foreign body is embedded First-aid treatment consists in controlling bleeding and in preventing infection If bleeding is severe, apply pressure at point of bleeding, use a TOURNIQUET (for method, see separate article) if necessary. If bleeding is not severe or after it has been checked, apply an antiseptic in the wound and on the surrounding skin and cover the wound with a sterile dressing, iodine should not be covered until dry Washing of wounds except by a physician may introduce germs, grease or dirt can be removed from the surrounding skin with alcohol, working outward from the wound Treat for SHOCK (see separate article) if necessary Gunshot wounds are especially liable to infection from pus-producing bacteria or from the organisms of gas gangrene or of tetanus BURNS AND SCALDS and BITES AND STINGS require special treatment (see separate articles)

Wouwerman, Philips (fĭ'lĭps vou'vûrmăn), 1619–68, Dutch painter of Haarlem, best known for his spirited scenes of battles, encampments, cavalry skirmishes, and hunts. Of these he painted over

800, of varying excellence but all characterized by brilliant color, vivacity, and excellent composition. Figures and landscape are given almost equal prominence and are skillfully combined He is represented in many important European galleries. The Metropolitan Museum contains *The Halt*. His brothers Pieter Wouwerman (1623–82) and Jan Wouwerman (1629–66) imitated his style, Pieter with considerable success.

Wrangel or **Wrangell, Baron Ferdinand Petrovich von** (both răng'gul, Rus fyĕrdyĕnánt' pĕtrô'vĭch vôn vrän'gĕl), 1794–1870, Russian naval officer, arctic explorer, and administrator He had made several journeys around the world before he commanded a Russian naval expedition (1820–23) which explored the arctic regions Wrangel Island and Wrangell Island are both named for him Wrangel was governor (1829-34) of the Russian colonies in Alaska and opposed the sale of that territory to the United States In 1849 he became vice admiral His diaries of his arctic expedition have been translated into German and English

Wrangel, Friedrich Heinrich Ernst, Graf von (frē'drĭkh hĭn'rĭkh ĕrnst' gräf' fŭn vrang'ul), 1784–1877, Prussian field marshal He fought in the Napoleonic Wars, commanded the German federal army in the Schleswig-Holstein campaign of 1848, suppressed, in the same year, the revolutionists in Berlin, and held nominal command of the Austro-Prussian troops in the war with Denmark in 1864

Wrangel, Karl Gustaf (kärl' gōō'stăf vrang'gĕl), 1613 76, Swedish general and admiral After distinguishing himself in land campaigns in the Thirty Years War, he succeeded to command of the fleet at Fehmarn and defeated (1644) the Danes In 1646 he became field marshal, succeeded Torstenson as commander in chief of the Swedish army in Germany, and overran Bavaria with the French general, Turenne Wrangel was created count of Salmis and of Solvesborg in 1651 He commanded in the Polish wars as admiral and general and successfully invaded Denmark (1657-58) After the peace of 1660, he was covered with numerous honors and was made regent and tutor of Charles XI

Wrangel, Baron Piotr Nikolayevich (răng'gul, Rus pyô'tur nyĭkulī'uvĭch vrän'gĕl), 1878–1928, Russian general After serving in the Russo-Japanese War and in the First World War he joined (late 1917) the anti-Bolshevik armies in S Russia After the rout, early in 1920, of the DENIKIN forces, Wrangel succeeded Denikin in command and soon whipped the demoralized remains of the White Army into shape He was for a while successful on the Crimean front, but the armistice of the Soviet government with Poland enabled the Communists to concentrate larger forces against him Wrangel was forced back into the Crimea and in Nov , 1920, he had to evacuate his forces to Constantinople The Russian civil war thus came to an end Wrangel died in exile at Brussels

Wrangel Island or **Wrangell Island** (both răng'gul, Rus vrän'gĕl), Rus *Ostrov Vrangelya*, island, 75 mi long and 45 mi wide, off Khabarovsk Territory, Russian SFSR (NE Siberia), in the Chukchi Sea (which fringes the Arctic Ocean) It is separated from the mainland by Long Strait Generally barren, frozen, and rocky, it has a government arctic station and trading post and is a breeding ground for polar bears, seals, and other creatures of the arctic regions The island was sought by Ferdinand von Wrangel during his arctic expedition of 1820–23, he had heard of it from Siberian natives, but he did not succeed in finding it It was finally discovered (1867) by Thomas Long, captain of an American whaling ship, who named it for Wrangel, later, George W De Long, in his ill-fated expedition of 1879-81, discovered that it was an island and not a part of the mainland, as at first believed In 1911 a group of Russians made a landing on the island, and in 1921 Vilhjalmur Stefansson sent a small party to Wrangel with a view to claiming it for Great Britain His *Adventure of Wrangel Island* (1925), written with J I Knight, relates the story of the attempted settlement In 1924 the Russian government notified other governments of its intention to protect its claim to the island, and in 1926 it established the first permanent colony there The Russian freighter *Chelyuskin*, trying to discover (1933) whether an ordinary cargo ship could navigate the Northeast Passage, was crushed in the ice off Wrangel Island Marooned on the island, the party was later rescued, many by airplane *The Voyage of the Chelyuskin* (Eng tr , 1935), written by members of the expedition and by the aviators who came to their aid, recounts the experience

Wrangell, Baron Ferdinand Petrovich von: see WRANGEL, BARON FERDINAND PETROVICH VON

Wrangell Island (răng'gul), 30 mi long and 5 to 14 mi. wide, off SE Alaska, in the Alexander Archipelago, south of the mouth of the Stikine river It was occupied in 1834 by Russians, who named it for Baron Ferdinand von Wrangel The town of Wrangell (pop 1,162), on the northern coast, grew out of a fort built to prevent encroachment by the Hudson's Bay Company traders. From 1867 to 1877 it was a U.S. military post, and later it became an outfitting point for hunters and explorers as well as for miners using the Stikine river route to the Yukon. Lumbering, fishing, and fur farming are carried on in the area Wrangell Institute, a Federal vocational school for natives, is near by.

Wrangell Island, Siberia see WRANGEL ISLAND

Wrangell Mountains, S Alaska, extending c.100 mi SE from the Copper river to the Yukon border, where they meet the St. Elias Mts The highest peaks include Mt. Sanford (16,208 ft), Mt Blackburn (16,140 ft), and Mt. Wrangell (14,005 ft).

Wrath, Cape, northwestern extremity of Scotland, with lofty cliffs It has a lighthouse

Wray, John see RAY, JOHN.

Wray (rā), town (pop 2,061), co seat of Yuma co , NE Colo , near the Nebr line, in a farm area, inc. 1906 Near by is Beecher Island battleground with a memorial to a battle with Indians in 1868

wreck, in law, goods washed ashore as distinguished from goods lost at sea, i e , FLOTSAM, JETSAM, AND LIGAN In England the king had title to wreck subject to a claim of the owner of the goods advanced within a year and a day The English law limited wreck to goods washed up on the seashore or on the shores of tidal rivers In the United States, however, the term is also applied to goods washed up on the shores of inland lakes and of rivers American law respecting the title to wreck varies Subject always to a prompt claim of the owner, title is variously in the holder of the land on which the goods come to rest, in the state, or in the finder See SALVAGE and SHIPWRECK

Wrede, Karl Philipp von (kärl' fē'lĭp fŭn vrā'du), 1767–1838, Bavarian general He became commander in chief of the Bavarian army in 1805, cooperated with the French against Austria, occupied Innsbruck, and contributed to Napoleon's victory at Wagram (1809) Just before the battle of Leipzig (1813) he negotiated the Treaty of Ried between Austria and Bavaria and fought with the Allies against Napoleon Created prince and field marshal in 1814, Wrede represented his country at the Congress of Vienna

Wrekin, the (rē'kĭn), solitary volcanic hill, 1,335 ft high, Shropshire, England

Wren, Sir Christopher, 1632 1723, English architect He was professor of astronomy at Gresham College, London, from 1657 to 1661, when he became Savilian professor of astronomy at Oxford Though now known chiefly as an architect, Wren was a celebrated mathematician in his time In 1665 he spent six months in Paris studying architecture After the great fire of 1666 he prepared a masterly plan for the reconstruction of London, never executed He designed, however, many new buildings, the greatest being SAINT PAUL'S CATHEDRAL From 1670 to 1711 he executed 52 London churches, most of which still stand, notable for their varied and original designs and for their fine spires They include St Stephen, Walbrook, St Martin, Ludgate, St Bride, Fleet Street, and St Mary-le-Bow, the latter containing the type of spire in receding stages generally associated with Wren's name Among his numerous secular works are the Sheldonian Theatre and Queen's College library, both at Oxford, the library of Trinity College, Cambridge Univ , the garden façade of Hampton Court Palace, Chelsea Hospital, portions of Greenwich Hospital, and the buildings of the Temple, London Wren also built residences in London and in the country, and these, as well as his public works, received the stamp of his distinguished style All of his buildings exhibit elegance, vigor, originality, and dignity In 1673 Wren was knighted He was buried in the crypt of St Paul's, where, in 1923, a memorial service was held on the 200th anniversary of his death See studies by Archibald Malloch (1923), Cecil Witaker-Wilson (1932), and Geoffrey Webb (1937)

wren, small bird of both hemispheres but most numerous in the tropical regions of America The plumage is usually brown or reddish above and white, gray, or buff, often streaked, below The bill is rather long, and the tail is usually upturned Wrens are valuable insect destroyers Among the fine singers are the canyon, the Carolina, and the winter wrens The eastern and western house wrens often nest in boxes built for them and in crannies about dwellings North America also has the cactus, the rock, and the marsh wrens The common European wren is a winter wren

Wrens (rĕnz), town (pop 1,192), E Ga , SW of Augusta, founded 1884 with the railroad's coming It is a trade and processing center in a farm area

Wrentham (rĕn'thŭm), town (pop 4,674), SE Mass , SW of Boston, settled 1669, inc 1673 Metal products are made here The former home of Helen Keller and Anne Sullivan Macy was made a rest home for workers There is a state school for mentally handicapped children

wrestling, sporting contest between two unarmed men, depending on grappling and gaining body grips in order to secure a fall, i e , pinning the opponent's shoulders to the floor Wrestling was probably known to prehistoric man and was a popular and honored sport among several ancient peoples, especially among the Greeks. The pancratium—involving wrestling and boxing—became part of the Olympic games in 648 B C. The Romans changed in some ways the rough-and-tumble Greek style, thus originating Greco-Roman wrestling Wrestling tournaments were frequently conducted in medieval Europe, and today Greco-Roman wrestling—which does not include tackling, tripping, or leg holds and consists chiefly of ground wrestling—is still the most popular form on the European continent and in Latin America. Greco-Roman wrestling also gained headway in England and was introduced early in the United States In the mid-19th cent a form of wrestling which combined upright and ground action took root on the American frontier Tackling, tripping, leg holds and various other rough features were allowed, and this form came to be known as catch-as-catch-can wrestling It rapidly displaced Greco-Roman wrestling in the United States and also became popular in England After the First World War professional wrestling contests in the United States deteriorated and became "exhibitions," i e , promoters presented the public with "fixed" bouts and histrionic performances Feigned competition and rude antics have replaced skill and sportsmanship However, amateur wrestling, under the guidance of the Amateur Athletic Union, has maintained excellent standards in the United States It has become a major sport in many schools, colleges, and universities throughout the country and includes both Greco-Roman and catch-as-catch-can contests Amateur wrestling is conducted on a stuffed mat (24 ft square, 3 in thick), which is covered with soft material and is surrounded by auxiliary mats Contestants are classified according to weight and three periods of 3 min each usually comprise a match—which is begun with the wrestlers on their feet A fall ends the match, and should the match be complete without anyone's shoulders being pinned, then the referee decides on points Wrestling matches were introduced into the modern Olympic games in 1904 See J C Meyers, *Wrestling* (1931), H A Stone, *Wrestling, Intercollegiate and Olympic* (1939), National Collegiate Association, *Official NCAA Wrestling Guide, 1950* (1949)

Wrexham (rĕk'sum), municipal borough (1931 pop. 18,569, 1943 estimated pop 25,740), Denbighshire, Wales, SW of Chester It is a livestock market in a farming, manufacturing, and coal-mining district It is the seat of the Roman Catholic bishopric of Menevia, which includes all of Wales except Glamorganshire St Giles's Church was rebuilt in 1472 after a fire, and the present structure dates mostly from the 16th cent Bishop Heber wrote *From Greenland's Icy Mountains* in the vicarage Elihu Yale is buried in the churchyard

Wright, Sir Almroth Edward, 1861–1947, British pathologist He was professor of pathology at the Army Medical School, Netley (1892–1902), and professor of experimental pathology, Univ of London, and principal of the Institute of Pathology and Research, St Mary's Hospital, London (1902–46) In 1906 he was knighted An authority on vaccine therapy, he developed a system of antityphoid inoculation and a method of measuring protective substances in human blood (opsonins) His works include *Pathology and Treatment of War Wounds* (1942), *Researches in Clinical Physiology* (1943), and *Studies on Immunisation* (2 vols , 1943–44)

Wright, Carroll Davidson, 1840–1909, American statistician, b Dunbarton, N H His varied experience included a term (1872–73) in the Massachusetts senate As U S commissioner of labor he organized the Bureau of Labor Statistics and stimulated objective research on labor problems From 1902 until his death he was president of Clark College at Worcester, Mass His books include *The Industrial Evolution of the United States* (1887) and *Battles of Labor* (1906)

Wright, Elizur (ĭl'zur), 1804–85, American actuary and antislavery leader, b near Canaan, Conn , grad Yale, 1826 He taught (1829–33) mathematics at Western Reserve College In 1833 he became corresponding secretary of the American Anti-Slavery Society, a post he left (1839) to assume editorship of the *Massachusetts Abolitionist* While editing (1846–52) the Boston *Weekly Chronotype* he became interested in life-insurance reform and began lobbying in the Massachusetts legislature Through his work an act was passed (1858) compelling insurance companies to hold reserve funds to be applied against policies Two later rulings—the nonforfeiture law of 1861 forbidding a company to appropriate the reserve funds and the legislation (1880) that requires companies to pay in cash the value of lapsed policies—were also directly due to Wright He served (1858–66) as state supervisor for insurance legislation before taking positions as a private actuary His vigorous campaigning in this field as well as his development of actuarial tabulations earned him the title of "father of life insurance" See biography by P. G Wright and E Q Wright (1937)

Wright, Frances, 1795–1852, British-American reformer, later Mme Darusmont, b. Scotland As a

girl she became a freethinker and political liberal She looked to America as a haven of freedom and in 1818, with her young sister, set out for the United States Her tragedy, *Altorf*, was successfully presented in New York in 1819 An enthusiastic account of her travels, *Views of Society and Manners in America* (1821), brought her the friendship of Jeremy Bentham and General Lafayette In 1824 she made her second trip to America, in the course of which she visited the communistic Rappite colonies at Economy and Harmony and Robert Owen's settlement at New Harmony. The influence of these, combined with her plan for gradual emancipation of slaves through purchase and colonization, resulted in her idea for the founding of NASHOBA, a colony near Memphis, Tenn After the failure of Nashoba, she devoted herself completely to her activities as a lecturer and as editor, with Robert Dale OWEN and others, of the *Free Enquirer* She advocated universal education, equality of women, religious freedom, abolition, and workers' rights In 1831 she married William Phiquepal Darusmont (or D'Arusmont), but the marriage was dissolved in 1835 Mme Darusmont's last years were spent in Cincinnati See biographies by W R Waterman (1924) and A J G Perkins and Theresa Wolfson (1939)

Wright, Frank Lloyd, 1869–, American architect, b Richland Center, Wis After studying civil engineering at the Univ of Wisconsin, he worked seven years in the office of Denkmar Adler and Louis H Sullivan in Chicago Wright's first independent commission was the Winslow residence (1893) Establishing himself in Oak Park, Ill , he built there a series of residences with low horizontal proportions and strongly projecting eaves which exhibited a distinct character, it was termed his prairie style From the beginning he practiced radical innovation both as to structure and aesthetics and many of these methods have since become internationally current At a time when poured reinforced concrete and steel cantilevers were generally confined to commercial structures, Wright did pioneer work in integrating machine methods and materials into a true architectural expression He was the first to produce open planning in houses, in a break from the traditional closed volume, and to achieve a three-dimensional form by the use of walls and roofs as mere enclosing planes For the Millard house (1923) at Pasadena, Calif , he worked out a new method, known as textile-block slab construction, consisting of double walls of precast concrete blocks tied together with steel reinforcing rods set into both the vertical and the horizontal joints The Larkin Soap Factory (1903), Buffalo, N Y , and Oak Park Unity Temple (1904), near Chicago, were early monumental works which exerted wide influence Among other notable works are the Imperial Hotel (1916–20), Tokyo, Japan, which withstood the effects of the 1923 earthquake, Midway Gardens (1913), Chicago, Willets house (1903), Highland Park, Ill , Coonley house (1908) in Illinois, and Wright's own residence "Taliesin" (1911) at Spring Green, Wis Among his later projects are the Johnson factory and residence, Racine, Wis , "Fallingwater house," Bear Run, Pa , and "Taliesin West," near Phoenix, Ariz Wright's architectural philosophy has been expressed by him in lectures and in writings, including essays published in the *Architectural Record* and collected as *On Architecture* (1941), *When Democracy Builds* (1945), and *Genius and the Mobocracy* (1949), an evaluation of the work of Sullivan His influence was felt in Europe, the architecture of Holland having been particularly affected by it Volumes illustrative of his work were published there, as well as in France and Germany He received (1948) the gold medal of the American Institute of Architects See his autobiography (1932, rev ed , 1943)

Wright, Henry, 1878?–1936, American architect and community planner, b Lawrence, Kansas, studied architecture at the Univ of Pennsylvania He was widely recognized as a leader in the movements for better site planning and housing and for the building of better communities His early professional years were spent in Kansas City, Mo , and in St. Louis, where he had a part in the landscaping for the Louisiana Purchase Exposition (1904) and helped organize (1909–10) the St Louis City Plan Association He served (1918) as town planner for the Housing Division of the U S Emergency Fleet Corporation Among the housing projects which he helped design were Sunnyside, L I , and Radburn, N J He was consultant to the New York state commission of housing and regional planning His *Rehousing Urban America* (1935) is an outstanding technical work

Wright, Horatio Gouverneur, 1820–99, Union general in the Civil War, b Clinton, Conn , grad West Point, 1841 Chief engineer of Gen. Samuel P Heintzelman's division at the first battle of Bull Run and of the Port Royal (S C) expedition, he was made (Sept , 1861) a brigadier general of volunteers Wright led the expedition which captured Jacksonville and other Florida coastal towns in 1862 and then commanded the Dept of the Ohio. In May, 1863, he joined the Army of the Potomac as a divisional commander in the 6th Corps. In the WILDERNESS CAMPAIGN he succeeded to command of the corps when Gen John SEDGWICK was killed (May, 1864) at Spotsylvania Courthouse and was promoted major general of volunteers after the fighting at the Bloody Angle The 6th Corps was rushed to defend Washington from the attack of Confederate Gen Jubal A EARLY in July and later fought under Gen Philip H Sheridan in the Shenandoah Valley At Petersburg in April, 1865, Wright's men were the first to break through the Confederate lines He was promoted (1879) brigadier general and chief of engineers in the regular army and was retired in 1884

Wright, Joseph, 1855–1930, English philologist He taught at Oxford and in 1901 succeeded Max Müller as professor of comparative philology there His greatest work was his *English Dialect Dictionary* (6 vols , 1898–1905), but he also worked in many other fields and wrote comparative grammars of Old English, Gothic, Greek, Middle English, and modern English See biography by E M Wright (2 vols , 1932, abridged ed , 1934)

Wright, Luke Edward, 1846–1922, American public official, b Giles co , Tenn He studied law at the Univ of Mississippi, practiced in Memphis, Tenn , and served (1880–88) as attorney general of Tennessee He quit the Democratic party in 1896 Appointed (1900) a member of the Philippine Commission, he became civil governor (1904) and governor general (1904) of the Philippine Islands He later was ambassador to Japan (1906–7) and Secretary of War (1908–9) under President Theodore Roosevelt

Wright, Orville, 1871–1948, and **Wilbur Wright,** 1867–1912, American airplane inventors, brothers Orville was born in Dayton, Ohio, and Wilbur near New Castle, Ind Their interest in aviation aroused in the 1890s by Otto Lilienthal's glider flights, they studied many works on aviation Both excellent mechanics, they used the facilities of the bicycle repair shop and factory which they operated (1892–1904) at Dayton Ohio, for the construction of their early aircraft With the encouragement and advice of Octave CHANUTE, they made improvements in the GLIDER, testing their machines annually (1900–1902) at Kitty Hawk, N C , the place selected on the advice of the U S Weather Bureau During this period they made valuable tables of wind pressure and drift Orville designed an engine which Ehen constructed and attached to their improved glider On Dec 17, 1903, they made at Kitty Hawk the first controlled and sustained flights in a power-driven AIRPLANE Of their four flights on that day, the first, made by Orville, lasted 12 sec , and the fourth, by Wilbur, covered 852 ft in 59 sec The brothers continued their experiments at Dayton and built several biplanes Record-breaking flights in 1908 by Orville in the United States and by Wilbur in France brought them world-wide fame In 1909 the U S government accepted the Wright machine for army use, and the brothers established the Wright Company, with Wilbur as president, for the manufacture of airplanes After Wilbur Wright's death, Orville succeeded him as president of the company, but in 1915 he sold his interest in order to devote his time to research and consulting work Because of a controversy over the Smithsonian Institution's labeling of S P Langley's 1903 plane, Orville sent (1928) the first Wright plane to South Kensington Museum, London, to which he bequeathed the plane However, six years later he requested the return of the machine to the United States The airplane was returned in 1948 and is exhibited at the Smithsonian Institution The house where Orville was born and the bicycle-shop laboratory were moved to Greenfield Village, established by Henry Ford See E E Freudenthal, *Flight into History* (1949)

Wright, Patience Lovell, 1725–86, American sculptor, b Bordentown, N J Her portraits, modeled in wax, were the earliest recorded attempts at sculptural expression in the American colonies They were highly praised there and in England, where she lived after 1772 and where she modeled likenesses of the king, the queen, and other notables It is said that in the Revolution she rendered service to the Americans by reporting British plans and preparations Her full-length likeness of William Pitt was placed in a glass case in Westminster Abbey One of her daughters married the painter, John Hoppner Her son, **Joseph Wright,** 1756–93, American portrait painter, first worked in London, where he had been taken as a child There he painted the prince of Wales (later George IV) Before returning to America he worked in Paris, befriended by Franklin, whose letters of introduction gave him a propitious start in his native land Among his sitters were General and Mrs. Washington, John Jay (N Y. Historical Society); and President Madison In 1792 he was made die-sinker at the U S Mint, Philadelphia

Wright, Richard, 1908–, American Negro author, born on a Mississippi plantation After a difficult and underprivileged childhood, he managed to get work with the Federal Writers' Project in Chicago in 1935 and later in New York. He has written powerfully of the Negro struggling in a hostile environment in *Uncle Tom's Children* (1938), four stories; in *Native Son* (1940), a novel successfully dramatized in 1941, and *Black Boy: a Record of Childhood and Youth* (1945), an autobiography.

Wright, Russel, 1905–, American industrial designer, b Lebanon, Ohio, notable for his introduction of modern functional forms in furniture and ceramics He was largely responsible for the popularity of light-colored or bleached wood in furniture and of aluminum as a decorative material His simple, sturdy forms of china were widely used and imitated

Wright, Silas, 1795–1847, American statesman, b Amherst, Mass , grad Middlebury (Vt) College, 1815 He was admitted (1819) to the bar and began practicing law at Canton, N Y In the 1820s he put up much opposition to the faction headed by De Witt Clinton and soon became one of the leaders of the ALBANY REGENCY Having served (1824–27) in the state senate, he became (1827) a member of the U S House of Representatives and was (1829–33) comptroller of New York state In the U S Senate (1833–44), Wright consistently supported President Andrew Jackson, voted for the annexation of Texas, upheld the subtreasury system, and strongly opposed slavery In 1844 he defeated Millard FILLMORE for governor of New York in a close contest Wright vetoed a canal improvement bill, opposed calling the constitutional convention of 1846, and used the militia in the antirent riots See biographies by J D Hammond (1848), J S Jenkins (1849), and R H Gillet (1874)

Wright, Thomas, 1810–77, English antiquary He wrote numerous monographs on historical and literary subjects and edited an immense volume of Anglo-Saxon and medieval literature for various rich patrons and learned societies He edited many manuscripts with Halliwell-Phillipps Wright's work was carelessly done and has gross errors, but he was a pioneer in his field

Wright, Wilbur see WRIGHT, ORVILLE

Wright, Willard Huntington, pseud **S S Van Dine,** 1888–1939, American art critic and mystery-story writer, b Charlottesville, Va He attended St Vincent and Pomona colleges in California, took post-graduate courses at Harvard, and studied art in Paris and Munich From 1907 he was literary critic, first for the Los Angeles *Times* and later for *Town Topics*, he edited (1912–14) the *Smart Set* Before 1923, when he had a severe breakdown, he wrote nine books, chiefly of art criticism, including *Modern Painting* (1915), *The Creative Will* (1916), and *The Future of Painting* (1923) After his recovery he began writing detective stories under his pseudonym They were immensely successful both as books and as moving pictures His erudite detective, Philo Vance, resembled Wright himself The best of these include *The Benson Murder Case* (1926), *The Canary Murder Case* (1927), and *The Bishop Murder Case* (1929)

Wrightstown, borough (pop 241), central N J , SE of Trenton Fort Dix, U S army post, is here

writ, in law, order issued in the name of the sovereign or the state in connection with a judicial or an administrative proceeding Usually the writ requires the person to whom the command is issued to report at a fixed time (the return day) with proof of compliance or a justification of disobedience Apparently the exchequer was the first royal office in England to issue writs in transacting its business The common law courts, which administered justice for the king, found their required authorization to take a case in the original writ issued out of the chancery The original writ (or original process) was essentially an order to the defendant to satisfy the plaintiff's demand or stand trial Orders issued in the course of the trial (e g , to produce a witness) were writs of mesne (middle) process At the end of the case the successful plaintiff would be awarded a writ of execution (a type of final process) to carry the judgment into effect The original writs were always extremely limited in number The Statute of Westminster (1285), which permitted the chancery to vary the terms of the existent writs slightly but forbade the issuance of new writs, in time worked great hardships However, the principle "no writ, no right" was at least partially overcome by the development of EQUITY as a separate system of justice By the 18th cent the use of original writs fell into disuse and cases were initiated by service of a summons Several of the prerogative writs (writs issued as a matter of sovereign right) still survive, notably HABEAS CORPUS and MANDAMUS. The term *writ* usually is not applied to other types of compulsory process in current use

writer's cramp occurs in many professions in which repeated skilled movements of hands or feet are in-

volved There is no actual abnormality in the muscles It is a neurotic symptom due to fatigue of the nervous system.

writing, visual recording of LANGUAGE The norm of writing is phonemic; i.e., it attempts to symbolize all significant sounds of the language and no others (see PHONETICS). When the goal is established as one letter for one phoneme (and vice versa), the result is a complete ALPHABET Few alphabets attain this phonemic ideal, but some ancient ones (e.g., Sanskrit) and some modern new ones (e.g., the Cherokee syllabary) have been very successful. The contemporary important writing not of alphabetic type is that in Chinese characters, in which thousands of symbols are used, each representing a theoretical syllabic unit The system is so distant from the language that the same characters are used in writing mutually unintelligible dialects An analogous use of characters is the Arabic numerals, the symbols of different words in different languages (see NUMBER). In some languages, as English and French, the modern freezing of spelling has removed the writing more and more from the language and has produced unusual effects, such as the teaching of spelling for years in school and the growth of fallacies like the "silent" letter (a letter is really either the symbol of a sound or it is unnecessary) and the "long" as opposed to the "short" vowel in English (ā is a diphthong of ĕ and y and has nothing to do with ă) An analogous fallacy teaches that Chinese is a monosyllabic language Writing was invented independently in Egypt (see HIEROGLYPHIC), Mesopotamia (see CUNEIFORM), China, and among the MAYA in Central America There are a few doubtful cases, as at Easter Island Ancient writing is best known from inscriptions, but the use of perishable materials, mainly palm leaf, papyrus, and paper, began in ancient times See ACCENT, HANDWRITING, INSCRIPTION, LETTERING. See *The Story of Writing* (pub by the American Council on Education, 1932), Edward Johnston, *Writing & Illuminating & Lettering* (revised printing, 1945)

Wrocław, Lower Silesia see BRESLAU

Wrong, George MacKinnon, 1860–1948, Canadian historian He was professor of history at the Univ of Toronto from 1894 until his retirement in 1927 He was the author of many works on early colonial American and Canadian history, these include *The Fall of Canada* (1914), *The Conquest of New France* (1918), *Washington and His Comrades in Arms* (1921), *The Rise and Fall of New France* (1928), and *Canada and the American Revolution* (1935) With H H Langton he edited *Chronicles of Canada* (32 vols, 1914–16)

wrought iron: see IRON

Wu (wo͞o), rivers in China **1** Chekiang prov, flowing c 90 mi E to the China Sea, one of the main commercial arteries of the province **2** Rising in W Kweichow prov and flowing c 500 mi NE to the Yangtze in SE Szechwan prov

Wuchang or **Wu-ch'ang** (both wo͞o'chäng'), city (pop 204,634), capital of Hupeh prov, China, at the junction of the Han and Yangtze rivers Wuchang is served by the Canton-Peiping RR, the main north-south line of China Cotton spinning is the chief industry The first outbreak of the revolution of 1911, which led to the Chinese republic, occurred here

Wuhing (wo͞o'hĭng'), Mandarin *Wu-hsing*, city (pop 45,145), N Chekiang prov, China Cloth is manufactured The city was formerly called Huchow

Wuhsien, China see SOOCHOW

Wuhu or **Wu-hu** (both wo͞o'ho͞o'), city and county (pop 356,173), Anhwei prov, China The city is a port on the Yangtze river and accommodates ocean-going vessels

Wulfila: see ULFILAS

Wulfstan, d 1023, English churchman, archbishop of York (1003–1023) and bishop of Worcester, whose Latin name was Lupus He is buried at Ely Homilies are attributed to him, but most of them are doubtful, from them as from those of Ælfric written for Wulfstan, many details of English law were derived. A homily on the millennium in English alliterative prose, styled *Lupi sermo ad Anglos* [Wulfstan's address to the English], is usually ascribed to him

Wundt, Wilhelm Max (vĭl'hĕlm mäks' vo͝ont'), 1832–1920, German physiologist and psychologist From 1875 he was professor at Leipzig, where in 1878 he founded the first laboratory for experimental psychology While his doctrines have been superseded, his experimental method remains a permanent contribution He was also the founder of the science of folk psychology His works include *Elements of Folk Psychology* (1912, Eng tr., 1916), *Introduction to Psychology* (1911, Eng. tr., 1912), and *Principles of Physiological Psychology* (1874; Eng tr, 1904)

Wupatki National Monument: see NATIONAL PARKS AND MONUMENTS (table)

Wu P'ei-fu (wo͞o' pā'-fo͞o'), 1873–1939, Chinese general and political leader He had a distinguished military career under the Ch'ing dynasty and was an important figure in the republic. For the most part Wu supported Yüan Shih-kai during his presidency. After Yüan's death (1916) Wu almost continuously warred with other military leaders, notably Chang Tso-lin, for the control of N China In 1927 he was defeated by the Kuomintang armies under Chiang Kai-shek and retired. The Japanese could not persuade Wu to become the head of the puppet government they had established for NE China in 1939

Wupper (vo͝o'pûr), river, c.65 mi long, NW Germany It is formed by several headstreams and winds in a tortuous course N and SW past Wuppertal, Remscheid, and Solingen into the Rhine Its middle course is, next to the near-by Ruhr district, the chief industrial concentration of the Rhineland.

Wuppertal (vo͝o'pûrtäl), city (1939 pop 401,672, 1946 pop 325,846), in the former Rhine Prov of Prussia, on the Wupper and E of Düsseldorf Adjoining Solingen and Remscheid, Wuppertal is a vast industrial agglomeration formed in 1929 by the merging of the cities of Barmen and Elberfeld and several lesser towns It produces textiles (cloth, silk, velvet, linen, artificial fiber, ribbons, lace, and trimmings), iron, steel, dyes, pharmaceuticals, musical instruments, and processed foods As a seat of the I G Farben chemical industry and as a major production center for ball and roller bearings during the Second World War, Wuppertal suffered many severe air attacks and was half destroyed Both Elberfeld and Barmen date from the 12th cent Elberfeld pioneered in legislation for poor relief by a system which it adopted in 1852 and which was widely imitated Almoners (who now would be called social workers), serving without salary, investigated each case, gave emergency aid, made recommendations through their district supervisor to a central board, and continued to exercise guardianship over the recipients of relief while aiding them to regain economic independence

Württemberg, Germany see WÜRTTEMBERG

Wurts, Alexander Jay, 1862–1932, American electrical engineer, b Carbondale, Pa, grad Yale (Ph B, 1883) He worked for the Westinghouse Company (1887–98, 1904–5) and the Nernst Company (1898–1904), and was professor at Carnegie Institute of Technology from 1905 He discovered the five nonarcing metals and invented devices for lightning arresters

Württemberg (wûr'tumbûrg", Ger vür'tumbĕrk"), former state (7,532 sq mi, 1939 pop 2,896,920), SW Germany Stuttgart was the capital Württemberg borders on Baden in the northwest, west, and southwest, on Hohenzollern and Switzerland (from which it is separated by the Lake of Constance) in the south, and on Bavaria in the east and northeast After the Second World War, Württemberg was partitioned between the American and French zones of occupation and was incorporated into the new states of Württemberg-Baden and Württemberg-Hohenzollern (see separate articles) Drained by the NECKAR and the upper DANUBE, Württemberg is a hilly, partly forested, partly cultivated region, famed for the loveliness of its landscape It includes the Swabian Jura in the south and part of the BLACK FOREST in the west The country is largely agricultural, producing grain, fruit, wine, and livestock STUTTGART is the only large manufacturing center, but the many middle-sized cities—such as ULM, ESSLINGEN, HEILBRONN, TÜBINGEN, REUTLINGEN, RAVENSBURG, and FRIEDRICHSHAFEN—have important and varied manufactures, particularly of textiles, machinery, and precision instruments The southern part of Württemberg is the core of the medieval duchy of SWABIA, Württemberg N of Stuttgart was part of Franconia Franconia broke up into numerous fiefs in the 10th cent, and Swabia suffered the same fate in the 13th cent when the house of Hohenstaufen became extinct Among the local lords who obtained immediacy under the Holy Roman Empire were the counts of Württemberg, whose original domains were centered around Esslingen In the following centuries the counts considerably expanded their territory, but aside from Stuttgart they held no important towns, most of the Swabian cities (e.g., Ulm, Hall, Gmünd, Esslingen, and Rottweil) having won independence as free imperial cities They also acquired the principality of MONTBÉLIARD in France and several places in Alsace The various territories were subdivided among the branches of the family, but in 1482 Count Eberhard V declared the indivisibility of the holdings Eberhard was raised to ducal rank in 1495 In 1519, however, the SWABIAN LEAGUE of cities, fearing the rising power of Württemberg, expelled Duke Ulrich I from his domains and sold the duchy to the newly elected Emperor Charles V Ulrich, a turbulent individual, never ceased in his attempts to recover his lands In 1524 he helped the rebelling peasants in the great PEASANTS' WAR, and in 1525 he invaded Württemberg with an army of Swiss mercenaries The Swiss cantons, however, soon summoned their troops home, and Ulrich had to flee again A Protestant convert, Ulrich secured (1534) the help of Philip of Hesse and, through Philip, of Francis I of France; at the same time the Württembergish peasants were rising against the unpopular government of King (later Emperor) Ferdinand I. At the battle of Lauffen (1534) Ulrich and Philip routed Ferdinand's troops. Ferdinand was obliged to restore Württemberg to Ulrich, although nominally Ulrich was to hold the duchy as a fief from Austria Immediacy under the empire was restored only in 1599. With Ulrich's return, Lutheranism was introduced However, large parts of S Württemberg were still in the hands of the house of Hapsburg and of a number of powerful abbeys; these were incorporated with Württemberg only later As a result, a large minority of the present population is Roman Catholic Württemberg was repeatedly the scene of fighting in the wars of the 17th and 18th cent. Duke Frederick II, through his alliance with Napoleon I, obtained the rank of elector in 1803 and became king of Württemberg as Frederick I in 1806, after joining the Confederation of the Rhine Between 1801 and 1810 his territories were more than doubled and reached their final frontiers He retained both his royal title and his lands at the Congress of Vienna, after having passed (1813) from the French to the allied camp WILLIAM I, his successor, granted a liberal constitution in 1819 During the reign (1864–91) of King Charles, Württemberg sided against Prussia in the Austro-Prussian War of 1866, joined in the Franco-Prussian War of 1870–71, and became (1871) a member of the German Empire His successor, William II, abdicated in 1918, and Württemberg joined (1919) the Weimar Republic Württemberg was formerly also spelled Würtemberg and Wirtemberg

Württemberg-Baden (-bä'dun), state (6,062 sq mi, pop 3,675,273), SW Germany, formed in 1945 in the American zone of occupation Stuttgart is the capital The state comprises the northern parts of the former states of BADEN and WÜRTTEMBERG Among the chief cities are Stuttgart and Ulm in Württemberg, and Mannheim, Karlsruhe, and Heidelberg in Baden The state joined (1949) the West German federal republic

Württemberg-Hohenzollern (-hō"ŭntsô'lûrn), state (4,018 sq mi, pop 1,118,822), SW Germany, formed in 1946 in the French zone of occupation Tübingen is the capital Bordering on Switzerland and Austria in the south, the state comprises S WÜRTTEMBERG, the former Prussian province of HOHENZOLLERN, and the district of LINDAU, formerly in Bavaria The state joined (1949) the West German federal republic

Wurtz, Charles Adolphe (sharl' ädôlf' vürts'), 1817–84, French chemist He was professor at the Sorbonne (1852–75), at the Faculty of Medicine, Paris (1853–75), and at the Faculty of Sciences, Paris (1875–84) Noted for his research in organic chemistry, he discovered methyl and ethyl amines (1849), glycol (1856), and aldol condensation (1872) He developed (1855) a method of synthesizing hydrocarbons by treating alkyl halides with sodium (Wurtz reaction) which was adapted by Rudolf Fittig to the preparation of mixed aliphatic and aromatic hydrocarbons (Wurtz-Fittig reaction or synthesis) Wurtz also invented a bulbed fractionating column known as the Wurtz column or Wurtz tube He wrote influential works in support of the atomic theory and on medical and biological chemistry and the noted *Dictionnaire de chimie pure et appliquée* (3 vols, 1868–78, supplement, 1880–86)

Würzburg (wûrts'bûrg, Ger vurts'bo͝ork), city (1939 pop 107,515; 1946 pop 55,604), capital of Lower Franconia, NW Bavaria, on the Main It is the center of a wine-producing region and has manufactures of machine tools, chemicals, and textiles Until its virtual destruction in the Second World War, Würzburg was a treasury of German architecture It was created an episcopal see by St Boniface in 741 After the breakup (10th cent) of the duchy of Franconia, its bishops ruled a vast territory on both sides of the Main as princes of the Holy Roman Empire In the 15th cent they assumed the title dukes of Eastern Franconia, of which they held a major part In the PEASANTS' WAR the bishop temporarily lost (1524–25) his territory to the rebels, but held out at his fortress of Marienberg against Götz von Berlichingen The splendor-loving prince-bishops transformed (17th–18th cent) Würzburg into one of the finest residences of Europe and founded (1582) the Univ of Würzburg, where Rontgen and Virchow taught in the 19th cent Secularized after the Treaty of Lunéville (1801), Würzburg passed (1803) to Bavaria, was made (1805) a separate electorate in favor of the dispossessed grand duke of Tuscany, and reverted (1815) to Bavaria Among the totally or partially destroyed landmarks were the episcopal residence (1720–44), one of the jewels of baroque architecture, the Romanesque cathedral (11th–13th cent), and numerous medieval, baroque, and rococo structures

Wusih (wo͞o'shē'), Mandarin *Wu-hsi*, city and county (pop 1,102,942), Kiangsu prov, China. The city is near Tai lake and is on a railroad which connects Shanghai with much of N China Wusih is an important industrial center, cotton and silk are spun and woven

Wyandot Indians. see HURON INDIANS.

Wyandotte (wī'ŭndŏt), industrial city (pop. 30,618), SE Mich, on the Detroit river and S of Detroit, inc 1867. Salt deposits here supply the city's ex-

tensive chemical industry Other manufactures include metal toys and novelties and rubber and dairy products. Bessemer steel was first commercially produced in the city in 1864 by W. F. DURFEE A Wyandot Indian village was here in the 19th cent

Wyandotte Cave, S Ind , c 35 mi W of Louisville, Ky , and just N of the Ohio river. It has many miles of passages and several large and beautiful chambers The cave is one of the largest in the United States Corydon is near

Wyant, Alexander Helwig (wī'ănt), 1836–92, American landscape painter, b Tuscarawas co , Ohio, studied in Cincinnati and in Germany He was influenced by Inness, who became his friend Wyant achieved distinction for his subtle, delicate treatment of scenes in the Adirondacks and Catskills and of peaceful, rolling countryside views He is best represented in the Metropolitan Museum, which has 10 paintings, including his early masterpiece *The Mohawk Valley, Landscape in the Adirondacks, Broad Silent Valley, An Old Clearing. Landscape with Distant Mountains,* and *Evening* His water colors include *Sunset on the Prairie* and *An October Day* Wyant became a member of the National Academy of Design in 1869, he was a founder of the American Water Color Society.

Wyatt, Benjamin Dean see WYATT, JAMES

Wyatt, Sir Francis, 1588–1644, British colonial governor of Virginia (1621–26, 1639–42) Wyatt, married to a niece of Sir Edwin Sandys of the London Company, brought with him the first written constitution for an English colony He fared well at first, but in 1622 occurred the disastrous Indian attack which took the lives of some 350 settlers Virginia became a royal colony in 1624, but, at the crown's request, Wyatt stayed on as governor until 1626, when Sir George YEARDLEY, whom he had succeeded, resumed the office Sent over again in 1639, he was replaced by Sir William BERKELEY.

Wyatt, James, 1746–1813, English architect Though he may be considered a forerunner of the Gothic revival, he failed to acquire any knowledge of true Gothic principles of design and construction To make place for his spurious reconstructions he removed much Renaissance work from English cathedrals, wherefore Pugin christened him the Destroyer He was appointed surveyor at Westminster Abbey in 1776, did restorations at Lincoln, Salisbury, and other cathedrals, and built the new buildings at Magdalen College, Oxford He designed many residences in various parts of England, and his White's Club (1776) was among the first of the palatial club buildings in London His son and pupil, **Benjamin Dean Wyatt,** 1775–1850?, succeeded him as surveyor (1813–27) of Westminster Abbey He began the rebuilding of Drury Lane Theatre and wrote *Observations on the Design for the Theatre Royal, Drury Lane* (1813) He designed clubs and residences, among them York House (1825–26) Unlike his father, Wyatt adhered to the Georgian classic style

Wyatt, Sir Thomas, 1503?–1542, English poet and statesman Knighted in 1537 by Henry VIII, he was sent on diplomatic missions to Spain, France, Flanders, and Italy Anne Boleyn was believed to have been his mistress As poet, he wrote the first sonnets in English, modeled chiefly after Petrarch, as well as lyrics, rondeaus, satires, and a version of the penitential psalms He introduced into English Renaissance love poetry a genuinely personal quality Many of his poems appeared in 1557 in Richard Tottel's miscellany Selected poems were edited by Alan Swallow (1949) His son, **Sir Thomas Wyatt,** d 1554, was a famous conspirator In Jan , 1554, when Queen Mary's intention to marry Philip II of Spain was announced, Wyatt joined a group of gentlemen who were planning a general insurrection against the queen His allies in other parts of the country were arrested or dispersed, but Wyatt raised a small army in Kent A body of troops was sent against him at Rochester, and Wyatt's force dispersed the government's He set out for London and arrived early in February, but defections and the loyalty of Londoners to the queen prevented him from capturing the queen and taking the city He surrendered and was hanged as a traitor It was supposed that Princess Elizabeth was involved, but Wyatt's last statement exonerated her

Wycherley, William (wĭ'chûrlē), 1640?–1716, English Restoration dramatist, b near Shrewsbury, educated in France and at Queen's College, Oxford. His first comedy, *Love in a Wood* (performed 1671), won him the favor of the duchess of Cleveland, mistress of Charles II In his next plays—*The Gentleman Dancing-Master* (performed 1672), *The Country Wife* (1675), and *The Plain Dealer* (performed 1676)—Wycherley added to the witty, artificial dialogue characteristic of Restoration comedy a realistic, coarse satire He lost court favor by his marriage to the countess of Drogheda and was penniless after her death until he was pensioned by James II Young Pope helped Wycherley edit his poems for publication See Wycherley's complete works (ed by Montague Summers, 4 vols., 1924), study by Willard Connely (1930), Bonamy Dobrée, *Restoration Comedy* (1924).

Wyclif, Wycliffe, Wickliffe, or **Wiclif, John** (all wĭ'klĭf), c.1328–1384, English reformer A Yorkshireman by birth, Wyclif studied and taught theology and philosophy at Oxford He was later made rector at Fillingham (1361), at Ludgershall (1368), and at Lutterworth (1374). His belief in the doctrine that Christ is man's only overlord and that power should depend on a state of grace made him a natural champion of the people against the abuses of the Church and an advocate of the poverty of the clergy He early associated himself with the anticlerical party in the nation and in 1374 was sent to Bruges to represent the English crown in negotiations over payment of tribute to the Holy See From 1377 he made many and vigorous attacks in both Latin and English on orthodox church doctrines, especially that of transubstantiation Through his own preaching in the vernacular at Oxford and London and the itinerant teaching of his "poor priests," he spread the doctrine that the Scriptures are the supreme authority and that the good offices of the Church are not requisite to grace He was condemned as a heretic in 1380 and again in 1382, and his followers were persecuted, but he was not molested in his retirement at Lutterworth, where he died in 1384 The Wyclif Bible is a great landmark in the history of the BIBLE and of the English language This first and literal translation of the Latin Vulgate Bible into English was probably partly his own and partly the work of his followers, notably Nicholas Hereford, the smoother revision of c 1395 was directed by Wyclif's follower John Purvey Wyclif's important part seems to have been his insistence on the authority of the Scriptures and the right of all men to have access to them In England the LOLLARDS formed the link between Wyclif and the Protestant Reformation, on the Continent he was a chief forerunner of the Reformation, through his influence on John HUSS, the Bohemian reformer, and through Huss on Luther and the Moravians See editions of most of his works by the Wyclif Society, biography by H B Workman (1926), G M Trevelyan, *England in the Age of Wycliffe* (1909), M M Gammack, *John Wyclif and the English Bible* (1936)

Wycombe, England see HIGH WYCOMBE

Wye, river of Wales and England, rising on Plinlimmon mt , Wales, near the source of the Severn and flowing 130 mi past Rhayader, Builth, and Hay, in Wales, and Hereford, Monmouth, and Chepstow, in England, to the estuary of the Severn It is noted for its beautiful valley, especially the part which forms the Gloucestershire-Monmouthshire boundary A tributary of the Thames and of the Derwent in Derbyshire are also called Wye

Wyeth, John Allan (wī'ĭth), 1845–1922, American surgeon, b Marshall co , Ala , M D Univ of Louisville, 1869, and Bellevue Medical College, 1873 He served in the Civil War and for 15 months was a prisoner After teaching at Mt Sinai Hospital, New York, he helped found and organize (1882) the New York Polyclinic Medical School and Hospital, becoming professor of surgery and president of the faculty there Besides numerous works on surgery he wrote *Life of General Nathan Bedford Forrest* (1899) and the autobiographical *With Sabre and Scalpel* (1914)

Wyeth, Nathaniel Jarvis, 1802–56, American explorer and trader in the Far West, b Cambridge, Mass A businessman of Boston, he was fired with a desire to go to Oregon by the eloquence of Hall J KELLEY When Kelley's plans for an expedition were long delayed, Wyeth formed one of his own and in 1832 went across the continent, at the same time sending a ship around Cape Horn Disaster was the result, and after spending the winter at Fort Vancouver with Dr. John MCLOUGHLIN, Wyeth returned to Boston In 1834 he outfitted a new expedition, with grandiose plans for fur-trading posts, a salmon fishery, a colony, and other developments He founded Fort Hall (July, 1834) and built Fort William on the Columbia, but, though the ship did reach the Columbia and was used in trade, he was unsuccessful in competition with McLoughlin In 1836 he returned to the East, discouraged His journals and letters have been edited by F C Young (1899)

Wyeth, Newell Convers (wī'ĭth), 1882–1945, American painter and illustrator, b Needham, Mass , studied with Howard Pyle Among his many well-known murals are those in the Missouri state capitol, the New York Public Library, and the National Geographic Society (Washington, D C) His illustrations for many juvenile classics are noted His son, **Andrew Wyeth,** 1917–, b Chadd's Ford, Pa , is a well known water-color painter Among his works are *Afternoon* and *Christina's World*

Wykeham, William of: see WILLIAM OF WYKEHAM

Wylie, Elinor (Hoyt) (wī'lē), 1885–1928, American poet and novelist, b Somerville, N J. She won the Julia Ellsworth Ford Prize in poetry with her volume *Nets to Catch the Wind* (1921), she continued to shape her subtle and ironic fancy with sure intent in three more books of verse—*Black Armour* (1923), *Trivial Breath* (1928), and the posthumously published sonnet sequence, *Angels and Earthly Creatures* (1929) Her four novels exhibit a sardonic talent for evoking curious personalities. These are *Jennifer Lorn* (1923), *The Venetian Glass Nephew* (1925), *The Orphan Angel* (1926), and *Mr Hodge and Mr Hazard* (1928). At 20 she married Philip Hichborn, but in 1910 she eloped with Horace Wylie, after Hichborn's death she married Wylie in 1915, and though they were divorced in 1921, she continued to write as Elinor Wylie She was married in 1923 to William Rose Benét, poet and editor, who edited her collected poems in 1932 and her collected prose in 1933 See also her *Last Poems* (1943), biography by her sister, Nancy Hoyt (1935)

Wyman, Jeffries, 1814–74, American anatomist and physician, b. Chelmsford, Mass., M.D Harvard, 1837 He practiced in Boston and lectured on comparative anatomy at the Lowell Institute, of which he became curator (1840) In 1847 he was appointed professor of anatomy at Harvard, and in 1866 he began to organize and develop the Peabody Museum of Archaeology and Ethnology, of which he was curator (1866–74)

Wymore (wī'môr), city (pop 2,457), SE Nebr , S of Beatrice and on the Big Blue river near the Kansas line, founded 1871 It is a farm trade center and railroad division point

Wynants or **Wijnants, Jan** (both yän' vī'nänts) c 1625–c 1684, Dutch landscape painter He worked chiefly in Amsterdam and Haarlem. His pictures of dunes and forest scenes show a love and knowledge of nature and are vigorously painted, somewhat after the manner of Ruisdael The little figures in his paintings are the work of others, often of his pupil Adrian van de Velde Works by Wynants are rather rare, but he is represented in many European galleries His *Cornfield in the Dunes* (Metropolitan Mus) is characteristic

Wyndham, Sir Charles (wĭn'dum), 1837–1919, English actor-manager, whose real name was Charles Culverwell He made his debut in New York in 1861 and first appeared on the London stage in 1862 His forte was light comedy In 1899 he opened Wyndham's Theatre, London, where he produced and acted in the outstanding works of Henry Arthur Jones He was knighted in 1902

Wynkyn de Worde (wĭng'kĭn dŭ wôrd', wûrd'), d 1535, English printer, whose name originally was Jan van Wynkyn He was born at Worth in Alsace and probably accompanied William Caxton to England in 1476 He assisted in the work of Caxton at Westminster and at Caxton's death succeeded him His independent work began in 1491 and continued until his death At first he used only types that Caxton had used, but to these he later added other type faces He printed in all more than 700 books See H R Plomer, *Wynkyn de Worde and His Contemporaries* (1925)

Wynn, Ellis, 1671–1734, Welsh writer and clergyman He translated Jeremy Taylor's *Holy Living* in 1701, and in 1703 was published Wynn's masterpiece, *Visions of the Sleeping Bard,* the three visions being those of the World, Death, and Hell His edition (1710) of the Book of Common Prayer is still in use He is the great master of modern Welsh prose The name also appears as Wm and Wynne

Wynne (wĭn), city (pop 3,633), co seat of Cross co , NE Ark , on Crowley's Ridge, founded 1863 It ships peaches, cotton, and lumber

Wynnewood (wĭn'wood), city (pop 2,318), S Okla , on the Washita river and SE of Oklahoma City It is the trade center of a rich agricultural and livestock-raising area and has a cottonseed-oil mill and a small oil refinery

Wynyard (wĭn'yurd), town (pop 1,084), E Sask , near Quill Lakes at the foot of the Touchwood Hills and E of Saskatoon It is a resort in farming country and has grain elevators

Wyoming (wī-ō'mĭng), state (97,914 sq mi , 1940 pop 250,742, 1949 estimated pop 284,000), W United States, admitted 1890 as the 44th state CHEYENNE is the capital, CASPER and LARAMIE are also cities of considerable size The state is an exact rectangle 367 mi from east to west and 277 mi from north to south, it is bounded on the north by Montana, on the east by South Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah Wyoming, generally translated from its Indian origin as "large plains," more aptly fits an alternative interpretation, "end of the plains " In E Wyoming the level or rolling country of the Great Plains covered with grasses, cactus, and sage is really a plateau a mile high, interrupted by upspringing peaks Only in the central section is the sweep of plains unbroken, and across this stretch the wagon trains rolled westward over the Oregon Trail The low, wooded Black Hills give way in the west to eroded badlands, and the badlands extend to the banks of the Powder river, which, "a mile wide and an inch deep," wanders through some of the most noted cattle country of the United States Beyond the Powder the tall-grass country ends in the wooded slopes of the lofty BIGHORN MOUNTAINS This was the hunting ground of the Crow Indians until the Sioux, following the buffalo, pushed the Crow into the mountain fastness In turn the Sioux fell before the relentless advance of the white men, who made their way across the region northward to Montana over the Bozeman Trail or eastward to the gold fields in the

Black Hills. Cattle supplanted the buffalo, and today farms and ranches prosper on some of the fertile and beautiful plains In SE Wyoming the generally higher tablelands are less sharply interrupted by the Laramie and Medicine Bow ranges Across this region the travelers to the Pacific coast made their way when the Indian wars of the '60s endangered travel on the regular Oregon Trail Trains followed wagons and coaches as the Union Pacific laid its tracks on the southerly course The pattern of interwoven plains and mountains of E Wyoming is broken by the Continental Divide, which angles across the state from the northwestern corner Pathfinders found a natural gateway through the mountains in the broad, grassy SOUTH PASS, where the trail of the mountain men and the wagon tracks of the party led (1832) by Capt B L E de BONNEVILLE were later deepened by the carts of the Mormon hegira and the wagons of the California gold seekers Northward the mountains are everywhere, their peaks towering above slopes green with fir, spruce, and pine Clear, icy lakes, which nestle in the high valleys, give rise to tumbling streams fringed with flowering shrubs Within sight of South Pass the bold summits of Wind River Range are guardians of the Far West, reaching the highest altitude in the state at Gannett Peak (13,785 ft.) To the north are the Gros Ventre and Absaroka ranges and west, near the Idaho border, the glorious Tetons (see TETON RANGE) rise above a lake and valley country of incomparable beauty In the northwest corner of the state lies YELLOWSTONE NATIONAL PARK, the oldest and largest of the national parks, with its geysers and hot springs vying in popularity with the assorted wonders of the Grand Canyon of the Yellowstone and with tourist-wise brown bears From the tops of all the ranges snows melt to feed many rivers which dash out in all directions—the Snake beginning and winding its way around and into Idaho on its long journey to the Columbia, the Yellowstone traveling N and E into the Missouri, and the Green, which finally joins the mighty Colorado This wealth of surface water supplements the scant rainfall (averaging about 14 in yearly) Some of the water is trapped by man for power and irrigation, and the MISSOURI RIVER BASIN PROJECT would reclaim many more thousands of arid acres Generous sunshine, which lends the delight of blue skies and sharp shadows to plains and mountains, intensifies the short growing season of the high altitudes Dry farming, which produces hay and small cereals, is supplemented by the more diversified yield of irrigated fields From reclaimed land in the west come sugar beets to provide material for large refineries Petroleum is the other major source of industrial development Although wells have been drilled in Wyoming since the 1860s, the oil boom did not begin until 1910 Since that time the Salt Creek field, near ill-famed Teapot Dome, has produced well Wyoming is rich in other energy-producing minerals, with extensive deposits of low-grade coal and an abundance of natural gas Although the inaccessibility of many areas makes the development of mineral resources difficult, considerable amounts of gold, iron, copper, and various clays are mined Both farming and mining are secondary to the main occupation of stock raising Perhaps more than any state today Wyoming is primarily the home of the cowboy Huge herds of cattle were first driven up from Texas and during years of adequate rainfall wintered well on the open range The boom of the bonanza years of the 1870s and 1880s collapsed after the fierce winter of 1887 destroyed huge herds Today the ranches are smaller and the basis of ownership has broadened Over much of the state sparse grasses make it necessary for each animal to have a large grazing area, and there is a growing movement toward cooperative grazing tracts Peace has been made between conflicting sheep and cattle interests and, while Wyoming may not be as wild as it was in its frontier days, it is a great deal woolier Sheep graze on areas unfit for cattle, and both sheep and cattle range by permit in the national forests Horses, a prized essential of ranching, are carefully raised and trained Around the rodeo, the roundup, and the frontier celebrations have been built many recreational attractions which add greatly to the already high tourist interest in national parks and monuments Incomparable scenery and the adventure of ranch life have guaranteed the success of dude ranching, resulting in a new source of revenue Historically Wyoming has been a battleground of conflicting claims, the fight between the sheep ranchers and cattle men being the most recent Many Indian tribes, displaced from their former homes in the east or west, waged internecine warfare for control of the rich buffalo ranges and later made their last futile bid for freedom from white domination At one time Spain, France, and England claimed portions of the state and acquisition of the territory by the United States was completed through four major annexations—the Louisiana Purchase, cession by the republic of Texas in 1836, division after Texas annexation in 1845, and the international agreement with Great Britain concerning the Columbia river country (see OREGON)

Variety of government continued even when the United States held all the territory, for until Wyoming was proclaimed a territory in 1868, the region was under a succession of different territorial units From the Louisiana Purchase to the achievement of territorial status, early development was closely linked to the fur trade and the great westward migrations The first authentic accounts of the state were provided by the intrepid John COLTER Colter trapped in the Wyoming mountains for several years, returning to St Louis in 1810 with fantastic accounts of the steaming geysers and vast canyons of the Yellowstone His tales were ridiculed and his new-found wonders were labeled Colter's Hell Colter returned west, and other fur traders made their way into Wyoming The overland party on its way to found ASTORIA on the Columbia went through Teton Pass in 1811 The next year Robert Stuart returning from Astoria crossed South Pass and followed much of the route that was to be the Oregon Trail As yet only the hardiest and most self-sufficient could survive Indian attacks and rugged isolation With the expeditions of William H ASHLEY the MOUNTAIN MEN entered the country, and some of the most famous of those early explorers—Thomas FITZPATRICK, James BRIDGER, and Jedediah S SMITH—crossed and recrossed the land Many of their rendezvous were held in the present Wyoming Attracted by the fur trade, Captain Bonneville organized an impressive expedition of 110 men and 20 wagons, the first wagons to cross through South Pass The route west was open Soon caravans set out from Independence, headed toward the western horizons of Oregon The great movement brought the beginnings of Wyoming, for fur-trading posts became stations on the Oregon Trail Two of the most celebrated posts of the West were in Wyoming—Fort Laramie (see FORT LARAMIE NATIONAL MONUMENT) and Fort Bridger (see FORT BRIDGER STATE PARK) The hosts of the westward-trending pioneers changed character but swelled in numbers Farmers going to Oregon were followed by Mormons seeking their Zion in present Utah and by the hordes rushing to find earthly gold in the California of 1849 Along the Oregon Trail graves marked the toll taken by disease, starvation, Indian attacks, and the too early onset of winter snows Stagecoach and freight lines were established, and in 1860–61 the pony-express riders made their heroic way across Wyoming on their way between Sacramento and St Joseph, Mo Nothing could stop the westward movement, and when the Indians threatened, the military was called in to suppress them The 1860s and '70s were bloody years, particularly in the valley of the Powder, which was controlled by the Sioux Treaties were made and broken by both parties, and Sioux wars persisted until after the massacre of Custer's force on the Bighorn in near-by Montana in 1876 Meanwhile S Wyoming, relatively free from Indian attack, enjoyed boom days brought by the completion of the Union Pacific Towns, including Cheyenne, were platted beside the tracks, and trading thrived on the demands of the road crews and the new settlers Cattle were herded up over the Texas or Long Trail, and soon Cheyenne became the center of a vast cattle industry Wyoming earned its title of the Equal Rights State when, in 1869, it granted the privileges of citizenship to women as well as men After Indian rebellion had been crushed, cattle were moved to grasslands throughout the state But the days of dangerous living were not over Cattle rustling became so general that the authorities were unable to cope with it, and jury members became fearful of returning a just verdict against criminals The Wyoming Stock Growers Association was organized in 1873 to protect the cattle-owners, and the members frequently created vigilante groups to administer their own justice The warfare reached its height in the Johnson co cattle war of 1892 The Hole-in-the-Wall gang broadened their activities to include bank and train robberies as well as cattle stealing Gradually the open range became a thing of the past, as vast acres were fenced and winter pastures were established Another source of violence came with the influx of sheep The cattlemen made frantic efforts to exclude the close-nibbling sheep from the precious grasslands Homesteaders also met with opposition, although many of them left as soon as they realized the country was not suited to small acreage cultivation Though development was rapid in some ways (e g, the Univ of Wyoming was founded in 1887), only gradually did the citizens recognize the peculiar needs of their state The Carey Act of 1894, providing for the reclamation and settlement of land, pointed up the need for conservation and efficient use of water The establishment of national parks protected the timberlands and extensive grazing areas Water power was harnessed to furnish electricity for the needs of farms and industries In spite of these developments life in Wyoming today remains to a good extent a gamble, requiring of the dwellers in the high plains the qualities of frontiersmen—self-sufficiency, physical strength, and a sense of adventure These characteristics breed a strong individualism, which contrasts sharply with the more conservative attitudes held by the leaders of the important corporate groups The result is generally a vigorous and fluid society which frequently expresses ambivalent positions A general resentment against government interference contrasts with a desire for the protection of the wool and beet-sugar industries Politics seems capable of producing men of statesmanlike stature or men concerned almost entirely with special interests If the West is, as Frederick J Turner asserted, "a form of society, rather than an area," it is to be hoped that Wyoming can achieve a reasonable security without sacrificing the dynamic and democratic attitudes which have played such an important part in its development See Robert Follansbee, *Surface Waters of Wyoming and Their Utilization* (1923), Christian S Dietz, *The Developed and Undeveloped Mineral Resources of Wyoming* (1929), Charles E. Winter, *Four Hundred Million Acres the Public Lands and Resources* (1932), Mrs Frances Beard, ed., *Wyoming from Territorial Days to the Present* (3 vols., 1933), Charles Guernsey, *Wyoming Cowboy Days* (1936), Struthers Burt, *Powder River Let 'er Buck!* (1938), Federal Writers' Project, *Wyoming a Guide to Its History, Highways, and People* (1941)

Wyoming 1 City (pop 1,360), N central Ill., N of Peoria, in a farm area, inc 1865 2 Village (pop 4,466), SW Ohio, north suburb of Cincinnati, settled 1865, inc 1874 3 Industrial borough (pop 4,728), NE Pa., on the Susquehanna near Wilkes-Barre, inc 1885 Its manufactures include silk and metal products A monument commemorates the massacre (1778) of Connecticut settlers in the Wyoming Valley in the American Revolution

Wyoming, University of, at Laramie, land-grant and state supported, coeducational, chartered 1886, opened 1887 It includes colleges of agriculture, commerce and industry, education, engineering, law, and liberal arts and a school of pharmacy It has a state chemistry laboratory, a trade school, and a Rocky Mt herbarium It offers a range-management curriculum, including soil conservation and forest services A school of religion is affiliated The university owns valuable oil lands

Wyoming Valley, in Luzerne co, NE Pennsylvania, on the northern branch of the Susquehanna river Wilkes-Barre is the metropolis of this rich anthracite region The valley was the scene of a long contest between Connecticut and Pennsylvania over conflicting land claims based on 17th-century charters After the SUSQUEHANNA COMPANY purchased (1754) land (which had been surveyed by John Jenkins) here from the Indians at the Albany Congress, a temporary settlement of the region in 1762–63 led to the first permanent settlement in 1769 and the building soon after of Forty Fort John Durkee was prominent in early Connecticut settlement The PENNAMITE WARS between the Connecticut and Pennsylvania settlers ensued, but rapid settlement of the area continued In 1774 Connecticut set up the town of Westmoreland, from which representatives were sent to the Connecticut legislature In 1778 the Connecticut settlers, under Zebulon BUTLER, were defeated by John BUTLER and a party of Tories and Indians, and the noted massacre, subject of Thomas Campbell's poem, *Gertrude of Wyoming* (1809), followed The land quarrel continued and was a subject before the Continental Congress When a court of arbitration decided in favor of Pennsylvania in 1782, more fighting occurred Finally, through the Compromise Act of 1799, the Pennsylvania legislature secured a means of settlement with the Connecticut claimants and the trouble was gradually solved The Connecticut settlers contributed several changes to the valley including the establishment of free public schools long before Pennsylvania provided them See H E Hayden, *A Bibliography of the Wyoming Valley* (1885)

Wyomissing (wīōmĭ'sĭng), industrial borough (pop 3,320), SE Pa., on the Schuylkill opposite Reading, inc 1906 Textiles and brick are made

Wyspiański, Stanisław, Pol. *Stanisław Wyspiański* (stänēs'wäf vēspyän'skyē), 1869–1907, Polish poet, dramatist, and painter He was forced to give up painting because of the loss of his arm His works include *The Wedding* (1901), his best-known play, *November Night* (1904), inspired by the insurrection of 1831, and several plays on Greek themes, of which *Meleager* was translated into English in 1933

Wyss, Johann David (vĭs'hän dä'vēt vēs'), 1743-1818, Swiss author of *The Swiss Family Robinson* This story of a shipwrecked family was written for his children It was published (1813) by his son, **Johann Rudolf Wyss,** 1781-1830, a professor of philosophy at the Univ of Bern and author of the Swiss national anthem The first English translation, now very rare, was published (1814) in a small edition by Mary Jane Godwin. A larger edition appeared in 1820

Wythe, George (with), 1726–1806, American jurist, signer of the Declaration of Independence, b Elizabeth City co., Va He attended the College of William and Mary, read law, and was admitted to the bar in 1747 Wythe was a member (1754–55, 1758–68) and clerk (1769–75) of the house of burgesses and drafted a remonstrance against the

Stamp Act (1765). He was thereafter an opponent of British measures and a delegate to the Continental Congress (1775–76). In 1776, he was aided by Thomas Jefferson and Edmund Pendleton in revising the laws of Virginia. He was a member of the Federal Constitution Committee (1787) and exercised much influence in getting ratification of the Constitution in 1788. His greatest contribution to state and nation was possibly as professor of law at the College of William and Mary (1779–90), for his teachings influenced many men, especially John Marshall, Thomas Jefferson, James Monroe, and Henry Clay. Wythe was one of the greatest of early U.S. lawyers. He served as judge in the Virginia chancery court from 1778 to 1788 and as sole chancellor from 1788 to 1801.

Wytheville (with'vĭl), town (pop. 4,653), SW Va., SW of Roanoke and on a high plateau in the bluegrass section, in a fertile farm area; founded 1792, inc. 1839. It has stockyards and flour, lumber, and textile mills. The courthouse of Wythe co. is here

X

X, 24th letter of the ALPHABET. In English it has no peculiar sound, but stands for the combination ks or gz or, initially, for the sound of z. In words from Greek, X transliterates the 14th Greek letter, xi (sī or ksī), a letter perhaps quite unrelated to the Roman x in form. The formal Greek correspondent of x was chi (kī), hence it is used in phonetics to represent a velar fricative like ch in *loch*. As the initial of the name Christ, X has become a symbol for it, e.g., in Xmas and in the monogram XP (chi rho). In Roman numerals X stands for 10, in mathematics x symbolizes an unknown quantity.

Xanthippe or **Xantippe** (both zănтĭ'pē), 5th cent. B.C., Athenian woman, wife of Socrates. Legend had made of her the classic shrew.

Xanthus (zăn'thŭs), ancient city of Lycia, W Asia Minor, now in Turkey. It was on the Xanthus river, also called the Scamander. It was besieged and taken by the Persians (c. 546 B.C.) and centuries later (c. 42 B.C.) by the Romans, both times the inhabitants destroyed their city before surrendering. Sir Charles Fellows excavated the ruins. Many works of art from Xanthus are now in the British Museum.

Xantippe. see XANTHIPPE.

Xauen (hou'ăn) or **Sheshawen** (shĭshô'wŭn), town (pop. 12,397), Spanish Morocco, S of Tetuán. It is a Moslem holy city, and its people have resisted Christian visitors fanatically. Its history is, therefore, little known. It was founded c. 1471 as a bulwark against the Portuguese in Ceuta. It is famous for its crafts. The name also appears in other spellings, such as Sheshauen.

Xavier, Saint Francis. see FRANCIS XAVIER, SAINT.

Xavier University. see CINCINNATI, Ohio, and NEW ORLEANS, La.

Xe, chemical symbol of the element XENON.

Xenia (zē'nēă), city (pop. 10,643), co. seat of Greene co., SW Ohio, SE of Dayton, laid out 1803. It is a trade and industrial center in a farm area. Rope and twine and furniture are made. The Ohio Soldiers' and Sailors' Orphans' Home is here. WILBERFORCE UNIVERSITY is northeast. Whitelaw Reid was born near by.

Xenocrates (zĭnŏ'krutēz), 396–314 B.C., Greek philosopher, b. Chalcedon, successor of Speusippus as head of the ACADEMY. He was a pupil and disciple of Plato, whom he accompanied to Sicily in 361 B.C. Metaphysics and ethics were his principal themes, and though he was not a great thinker, his ascetic life and noble character were a great influence on his pupils. He held that both mathematical objects and the Platonic Ideas are substances, while also identifying them as one and the same. Thus he is referred to by Aristotle as the follower of Plato who "made ideal and mathematical number the same."

Xenon (zē'nŏn), rare gaseous element, heavy, colorless, odorless, tasteless, and chemically inert (symbol=Xe, for physical constants, see ELEMENT, table). Xenon is present in minute quantities in the atmosphere. According to the periodic law it is grouped with the inert gases helium, neon, argon, krypton, and radon. The element was discovered (1898) by Sir William Ramsay and M. W. Travers, being obtained from the part of liquid air remaining after the evaporation of the helium and argon.

Xenophanes (zĭnŏf'ŭnēz), c. 570–c. 480 B.C., Greek philosopher of Colophon. He is reputed to have founded the ELEATIC SCHOOL, although his teachings only carry a tenuous suggestion of the line of reasoning. Parmenides, the true founder of the school, was to take. It was Xenophanes' expression of the unity of all existence, "all is one," that gave impetus to the Eleatics. Xenophanes attacked the anthropomorphic gods of Greece, postulating a god who was at once one, immovable, and omnipresent. His attempt to explain the nature of his god was consistent with the philosophic explorations of his predecessors—the search for unity out of apparent multiplicity.

Xenophon (zē'nŭfŭn), c. 430 B.C.–c. 355 B.C., Greek historian, b. Athens. He was one of the well-to-do young disciples of Socrates before leaving Athens to join the Greek force (the Ten Thousand) that was in the service of CYRUS THE YOUNGER of Persia. They fought well at the disastrous battle of CUNAXA (401 B.C.). The Ten Thousand then fought their way back, going through an unknown and hostile land, harried by the Persians under Tissaphernes. After the Greek generals had been treacherously killed, Xenophon was chosen as one of the leaders of the heroic retreat. He tells the story in the most celebrated of his works, the ANABASIS. After his return Xenophon, a great admirer of the military, disciplined, and aristocratic life of the Spartans, was in the service of Sparta. He accompanied Agesilaus II on the campaign that ended in victory over the Athenians and Thebans at Coronea (394). Xenophon thus was opposed to his compatriots, who passed a sentence of banishment on him. Sparta gave him an estate at Scillus in the region of Elis, where he spent years in writing. Among his works other than the *Anabasis* are the *Hellenica*, a continuation of the history of Thucydides to 363 B.C., works on Socrates presenting a sharply different picture from that of Plato, *Memorabilia*, *Oeconomicus* (a dialogue on managing a household and a farm), the *Apology* (on the death of Socrates) and the *Symposium* (a pleasant dialogue), a eulogy of Agesilaus, a dialogue on despotism, called after Hiero I of Syracuse; the *Cyropaedia*, a romantic and didactic account of the education of Cyrus the Younger, and essays on hunting, horsemanship, the ideal cavalry officer, and the constitutional practices of Sparta. He is, however, remembered almost solely for the superb narrative of the *Anabasis*.

Xerxes I (Xerxes the Great) (zûrk'sēz), d. 465 B.C., king of Persia (485–465 B.C.). His name in Old Persian is Khshayarsha, in the Bible AHASUERUS. He was the son of DARIUS I and Atossa, daughter of Cyrus the Great. After bringing Egypt once more under Persian rule, Xerxes prepared for an invasion of Greece by cutting a canal through the isthmus of Athos and constructing a bridge of boats across the Hellespont. Setting out from Sardis, he marched through Thrace and Macedonia, and, despite the bravery of LEONIDAS and his 300 Spartans, overthrew the Lacedaemonians at Thermopylae (480 B.C.). He then occupied and pillaged Athens. His fleet was destroyed at Salamis (480 B.C.). Leaving an army under his general, Mardonius, he retired into Asia. He was slain by the captain of his bodyguard and was succeeded by his son ARTAXERXES I. See PERSIAN WARS. See Jacob Abbott, *Xerxes* (1901); P. M. Sykes, *History of Persia* (1930), A. T. Olmstead, *History of the Persian Empire* (1948).

Xerxes II, d. 424 B.C., king of ancient Persia (424 B.C.), son of Artaxerxes I. After a reign of 45 days he was murdered by his brother Sogdianus.

Ximenes. For Spaniards thus named, see JIMÉNEZ.

Xingu (zĭng"gōō'), river, c. 1,200 mi. long, rising in Mato Grosso. It flows N across Pará state into the Amazon at the head of the Amazon delta. The Xingú passes through wild, partly unexplored country, and only in its lower course is it navigable.

Xochimilco (sōchēmēl'kō), city (pop. 14,370), central Mexico. It is a southern suburb of Mexico city. Xochimilco is famous for its canals lined with poplars and with flowers. The Indians established rafts covered with soil (called *chinampas*) in Lake Xochimilco. The rafts became islands rooted to the lake bottom and continued to supply vegetables and flowers for the city. Boating on the canals is a popular diversion for tourists and for the people of Mexico city. In late years decline in the water supply has threatened Xochimilco.

X ray, Roentgen ray, or **Röntgen ray** (both, rĕnt'gĭn, rūnt'gĭn, rŭnt'ĭn), invisible RADIATION of much shorter wave length than visible light rays. Unlike cathode rays (see RAY, in physics), from which they are produced, they are not deflected by a magnet or an electric charge. They are commonly produced in tubes or bulbs called consequently X-ray tubes. These consist essentially of a glass container (from which the air has been almost completely exhausted) in the walls of which are sealed two electrodes (the anode and the cathode) and in which is also present a piece of wolfram (or tungsten), platinum, or other substance. When an electric current of high voltage is applied, streams of electrons (cathode rays) flow from the cathode, pass through the tube, and strike the plate of wolfram or platinum (called the anticathode), where the X rays are given off. These rays are able to penetrate various thicknesses of a great many substances (e.g., flesh, wood, hard rubber, and other substances) but are stopped by other materials of great density, such as lead. Their ability to penetrate materials varies, depending upon the amount of exhaustion of the tube in which they are produced and the voltage applied to the tube. The so-called "hard" rays (those of great penetrating ability) are formed in tubes of a high degree of exhaustion to which a high voltage is applied; the "soft" rays (those of less penetrating ability) in tubes of less exhaustion to which a lower voltage is applied. This penetrating property of X rays is used in making X-ray pictures (radiographs or skiagraphs), the darkness of the shadows produced upon the photographic plate depending upon the degree to which the different substances can be penetrated by the rays. An interesting practical application of X rays is seen in their use in examining merchandise for defects, jewels thought to be imitation, and "old master" paintings of questioned authenticity. X rays destroy living tissue and can cause severe burns when human flesh is exposed to their action for too long a time. Their destructive power is used in X-ray therapy (see RADIOTHERAPY). They cause certain substances held in their path to give off light (to fluoresce) and the FLUOROSCOPE is based upon this activity. The use of X rays has been of great importance in studying the structure and nature of crystals (e.g., in the work of W. H. Bragg and W. L. Bragg). By the use of different chemical elements in the X-ray tube, rays of different length are produced. By means of X-ray spectra so formed, MOSELEY was able to arrange the chemical elements in the order found in the new periodic table (see PERIODIC LAW). X rays were discovered by Roentgen in 1895 and were so named by him. In his honor they are often called Roentgen (or Röntgen) rays.

Xuthus (zū'thŭs), in Greek mythology, son of HELLEN. He married CREUSA, daughter of ERECHTHEUS, and his son Achaeus was the ancestor of the ACHAEANS, a branch of the Hellenic people.

xylene (zī'lēn) or **xylol** (zī'lōl, -lŏl, -lôl), colorless, oily liquid, used extensively as a solvent and composed of a mixture of three isomeric (see ISOMERISM) compounds of carbon and hydrogen which belong to the benzene series of hydrocarbons. The three forms of xylene are known as orthoxylene (melt. pt. = −28°C., boil. pt. =144°C., density = 0.874 g. per c.c. at 20°C.), metaxylene (melt. pt. = −54°C., boil. pt. =139°C., density=0.864 g. per c.c. at 20°C.), and paraxylene (melt. pt. =13°C., boil. pt. =138°C., density=0.861 g. per c.c. at 20°C.). They are prepared from coal and wood tar and from some petroleum. Their separation from one another is difficult because of the proximity of their boiling points.

xylophone (zī'lufōn, zĭ'-) [Gr., =wood sound], musical instrument, having graduated wooden slabs which are struck by the player with small mallets. The slabs are usually arranged like a keyboard, and the range varies from two to four octaves. When tubular resonators are attached to the bars, the instrument is called a marimba.

XYZ Affair, name usually given to an incident (1797–98) in Franco-American diplomatic relations. Relations between the new republics were already strained. The United States had in 1778 entered an alliance with France, but after the outbreak of the French Revolutionary Wars was both unable and unwilling to lend aid. The anti-French Federalists gained the upper hand in the United States, and there was considerable antagonism toward France, particularly after the GENÊT affair. The conclusion (1795) of Jay's Treaty with England, which partially vitiated the agreements with France, awoke French anger. American ships were taken by French privateers, grievances against the Bordeaux embargo of 1793 continued, and the countries drifted into a mutually hostile attitude. President George Washington had replaced Gouverneur Morris as minister to France by James Monroe, but later was persuaded by Secretary of War Timothy Pickering to replace Monroe with Charles Cotesworth PINCKNEY. In 1797 John ADAMS, the new President, sent John MARSHALL and Elbridge GERRY to join Pinckney. This three-man commission ran into trouble with the Directory and notably with TALLEYRAND. Indirect suggestions of loans and bribes to France came through Mme de Villette, a friend of Talleyrand and the landlady of Gerry and Marshall. Negotiations were carried on through her with X (Jean Conrad Hottinguer), Y (a Mr. Bellamy, an American banker in Hamburg), and Z (Lucien Hauteval, like Hottinguer, a Swiss). The proposal that the Americans pay Talleyrand £50,000 created an uproar when it was heard in the United States, where the pro-British party welcomed the chance to worsen Franco-American relations. Talk got nowhere and the mission broke up. Marshall coming home, Pinckney taking a sick daughter to S. France, and Gerry, a Republican and Francophile, remaining with Talleyrand. Trouble with France threatened grave effects. Vice Presi-

dent Thomas Jefferson told Victor Du Pont, French consul at Charleston, to warn Talleyrand against pushing the United States into war, and within a short time the offending French decrees of spoliation were withdrawn. Adams was already talking with William Vans Murray, U S. minister to the Netherlands, and Richard Codman, an American from Paris, when France made overtures through the Netherlands Adams, to the intense disgust of the Federalist leader, Alexander Hamilton, made Murray the U S minister to France and sent Oliver Ellsworth and William Richardson Davie to aid him The result was the Convention of Mortefontaine (Sept. 30, 1800), which settled the arguments

The affair contributed to American patriotic legend in the reply Pinckney is supposed to have made in response to a request for money, "Millions for defense, sir, but not one cent for tribute" This reply was certainly not made, but a better case can be made for the alternate version, "No, no, not a sixpence"

Y

Y, 25th letter of the ALPHABET It was a Latin importation of the eastern Greek upsilon (see U), which was pronounced like u, the Romans used it for Greek words. In English y is mainly symbolic of the semivowel occurring in *yet*, the same semivowel is the second member of the diphthongs a, e, i, and oi The modern ignorant use of y in *ye* for *the* (as in "Ye Olde Shoppe") is based on a misreading of an old sign for th In chemistry Y is the symbol of the element YTTRIUM

Y-. For Dutch names beginning thus, see IJ-.

Yablonovy Range (yä'blunôvĕ), mountain chain, RSFSR, in SE Siberia Forming part of the watershed between the Arctic and the Pacific, it extends from the Mongolian border in the southwest to the Olekma river in the northeast It is crossed by the Trans-Siberian RR near Chita Bolshoi Sarankakan is the highest point (5,280 ft.)

yacht (yät) [Dutch, =chase, hunt], any vessel, employing either sail or power, used only for pleasure or sport Yachts may be of schooner, cutter, cruiser, sloop, yawl, or other type and vary from less than 20 ft. to more than 100 ft in length Cruising yachts are usually fitted with Diesel or gasoline engines, while racing yachts are usually fore-and-aft rigged, the schooner and cutter are most popular Rules govern the size and style of sailing yachts competing in international and other races Since the first yacht club was organized in Cork, Ireland, in 1720, there have been many changes in the structure favored for racing yachts The tendency usually was to evolve a ship combining speed, seaworthiness, and habitability The forerunner of the Royal Yacht Squadron was formed at Cowes, England, in 1812, and in 1851 it offered a silver cup as prize for a race of 60 mi around the Isle of Wight The famous 100-foot schooner yacht *America* (owned by members of the New York Yacht Club) crossed the Atlantic to win the cup This cup, the most highly prized international yachting trophy, has since remained in the United States, successfully defended in many meets, in 1937 by Harold S Vanderbilt with the *Ranger*, against T O M Sopwith (England) with the *Endeavor II* The most famous challenger for this trophy, called the *America*'s Cup, was Sir Thomas LIPTON, who contended in five meets with five boats named *Shamrock* Yacht racing is carried on over marked courses with an imaginary line as a starting point and finishing point or from place to place as in the California-to-Hawaii race Before the race the yachts jockey for position, the object of each helmsman being to cross the starting line at full speed immediately after the starting gun is fired Since all boats do not start at the same time, the winner is determined by his time for the course, not by finishing position When the yacht is running with the wind, every sail is used, and, whenever possible, additional spinnaker sails (large triangular balloon sails) are set When the wind is abeam, the yacht is close hauled as much as possible, and when sailing into the wind tacking must be resorted to The rules of yacht racing are most stringent, and the skill and judgment of the helmsman is a large factor in success Recently, many small yachts have been designed, with the *Star* class gaining great popularity

Yadkin, river see PEE DEE, river

Yahata, Japan see YAWATA

Yahweh (yä'wĕ, yä'vĕ), modern reconstruction of the ancient Hebrew ineffable name for GOD Other forms are Yahve, Yahveh, and Yahwe

Yaila Mountains, RSFSR. see CRIMEA

Yajur-Veda: see VEDA.

yak, mammal of Tibet and other parts of central Asia It is assigned by various authorities to either the genus *Bos* or *Poephagus* It is larger and more heavily built than most domestic cattle and has rather short, stout legs, high shoulders, and long hair growing on the flanks, legs, and tail and reaching nearly to the ground Its horns are large and curved In the wild state the animal is usually brownish black, but domesticated yaks are sometimes black, brownish, or reddish It can live on quite barren soil, where it feeds on the sparse vegetation which could not support other domestic animals. Domesticated yaks are used as a source of meat and milk; butter and cheese can be made from the milk and cream. It is also a valuable saddle and pack animal Its hair is used in making cloth, and its hide for leather.

Yakima (yă'kumô, -mu), city (pop. 27,221), co seat of Yakima co, S central Wash, on the Yakima river, settled 1861 The city is the commercial and industrial center of a great irrigated agricultural valley, famous for its fruits and vegetables and producing also grain and livestock There are canneries, packing plants, and lumber and flour mills A junior college is here, and an Indian reservation near by

Yakima, river, c 200 mi long, rising in central Washington in the Cascade Range It flows SE past Yakima to the Columbia river just above its confluence with the Snake river It supplies water for a Federal irrigation project, begun in 1906, which has helped to make the valley an important farming and fruitgrowing region

Yakima Indians, North American Indian tribe of Shahaptin linguistic stock In the early 19th cent they lived along the Columbia and the Yakima rivers, in central Washington They then numbered some 1,200 In 1855 an attempt by the United States to place the Yakima on a reservation resulted in a war Under a capable leader, Kamiakin, the Yakima continued warfare until 1859, when they were placed on a reservation in Washington The Yakima are now a settled, agricultural tribe, numbering some 3,000 Yakima culture was of the Plateau cultural area, they fished for salmon and gathered roots, berries, and nuts They excelled and still excel in basketmaking See H D Guie, *Tribal Days of the Yakimas* (1937)

Yakub I (yäkōōb'), 1160?–1199, ruler of Morocco (1184–99) He was known as Yakub al-Mansur [the victorious], after his victory over Alfonso VIII of Castile at Alarcos (1195) One of the most powerful of the ALMOHADES, he encouraged art and literature and constructed many public buildings, notably the Giralda at Seville, the Koutoubiya tower at Marrakesh, and numerous edifices at Rabat

Yakutat Indians, see TLINGIT INDIANS

Yakut Autonomous Soviet Socialist Republic (yŭkōōt'), autonomous republic (1,182,300 sq mi, 1946 estimated pop 450,000), RSFSR, in NE Siberia, between the Arctic Ocean in the north and the Stanovoi Range in the south Yakutsk is the capital Drained by the Lena and its tributaries, the Yakut ASSR has important natural resources which, however, are little exploited because of poor transportation Its main exports are furs, gold (mined extensively in the south, notably at ALDAN), and mammoth ivory There are extensive forests In the northeast rises the VERKHOYANSK RANGE In the central region, agriculture and cattle raising are the means of livelihood The climate, relatively warm in summer, reaches the extreme of cold in winter at VERKHOYANSK The Yakuts, a people belonging to the Turkic linguistic family, form c 80 percent of the population, they engage chiefly in fishing, trapping, and reindeer raising The rest of the inhabitants are mainly Russians (10 percent) and Evenki The autonomous republic was formed in 1922

Yakutsk (yŭkōōtsk'), city (1926 pop 10,558, 1939 pop 52,888), capital of Yakut ASSR, RSFSR, in E Siberia It is a river port on the Lena and a highway center in an agricultural region Founded in 1632, it was formerly a place of political exile

Yale, Elihu, 1649–1721, English merchant, b Boston The family moved to England c 1652, and Yale was educated in London He went to Madras in the service of the British East India Company c 1670 and rose in the ranks of the company He was appointed governor of Fort St. George at Madras in 1687 Because of scandals concerning his administration, he was removed in 1692 and returned to London in 1699 Through private trade while in the East he had amassed a large fortune In 1718 Cotton Mather wrote Yale suggesting that the Collegiate School at Saybrook, Conn., might be named for him in return for financial support Yale donated a parcel of goods, which when sold brought £562—the largest single gift to the college before 1837 The college, later moved to New Haven, took the name of Yale See F. B Dexter, *A Selection from the Miscellaneous Historical Papers of Fifty Years* (1918), biography by Hiram Bingham (1939)

Yale, Linus (lī'nus), 1821–68, American inventor, b. Salisbury, Herkimer co, N Y He invented numerous devices for the improvement of locks of various types and developed a compact pin-tumbler cylinder lock He founded (1868) at Stamford, Conn., a company to manufacture locks

Yale, village, SW British Columbia, at the head of navigation on the Fraser and at the south end of the Fraser river canyon The Hudson's Bay Company established Fort Yale here in 1848

Yale. 1 City (pop 1,489), S Mich, NW of Port Huron, settled 1859, inc as a village 1885, as a city 1905 Woolen goods and canned goods are made 2 City (pop 1,407), N central Okla., near the Cimarron river and W of Tulsa, in an oil-producing region, inc 1903

Yale University, at New Haven, Conn Chartered in 1701 and opened in 1702 as the Collegiate School of Connecticut at Killingworth (now Clinton), it was moved in 1707 to Saybrook (now Old Saybrook) and in 1716 to New Haven In 1718 the name was changed to Yale College to honor Elihu YALE, who had been persuaded by Jeremiah DUMMER to contribute to the College The stern Puritan school grew through the years to be a well-established seat of learning for young men long before the colony became a state The first rector, Timothy Cutler, was dismissed because his theological views were suspect, but among the early presidents were such distinguished men as Ezra STILES and the elder Timothy DWIGHT Special schools were established—medicine (1813), divinity (1822), law (1824), Sheffield Scientific School (1861), and fine arts (1869, the first in any U.S university) In 1887, when the younger Timothy DWIGHT was president, the name was changed to Yale University Today it is a large nonsectarian university Women students are admitted to many of the graduate and special schools Subordinate and allied divisions and institutions include schools of music, forestry, engineering, and nursing and the Institute of Human Relations (founded 1929) The Peabody Museum of Natural History has collections in anthropology, zoology, and paleontology, the Yale art gallery (1832) is rich in early American and pre-Renaissance Italian art, and the library has several notable collections, including incunabula, publications about the South Sea Bubble the Lowell Mason musical library, an Oriental collection, and the manuscript papers of Col E M House The observatory (1879) has a branch at the Univ of Witwatersrand, Johannesburg, South Africa Yale-in-China (Ya-li) in Changsha was founded in 1902 as an outgrowth of missionary activities, it was much damaged by the Japanese in the Second World War All the far-flung activities of the university still have their core in Yale College, which in 1933 was reorganized into a resident-college system The traditional rivalry with Harvard has continued, the annual Yale-Harvard boat race (since 1852) and the annual Yale-Harvard football game (since 1875) are looked-for events in the sports calendar The Yale sports program is wide, and several of the athletic coaches have been prominent, notably Walter Camp in football and Robert J H Kiphuth in swimming The Yale Univ Press, which has its own printing plant and publishes the quarterly *Yale Review* as well as many varied books, was established in 1908 See Timothy Dwight, *Memories of Yale Life and Men, 1845–1899* (1903), Edwin Oviatt, *The Beginnings of Yale* (1916), F B Dexter, ed., *Documentary History of Yale University 1701–1745* (1916), H S Canby, *Alma Mater* (1936)

Yalta (yôl'tŭ, yal'tu, Rus yal'tŭ), city (pop 78,838), S Crimea, RSFSR, on the Black Sea, ESE of Sevastopol, in a subtropical region of orchards, vineyards, and tobacco fields. It is one of the chief health resorts of the USSR and has many hotels, sanatoriums, and rest homes—many of these being villas built by the nobility before the Russian Revolution Near by is the town and palace of LIVADIYA The city dates from ancient Greek times

Yalta Conference, meeting (Feb 4–11, 1945), at Yalta, Crimea, USSR, of Winston Churchill, F D Roosevelt, and Joseph Stalin It is also called the Crimean Conference A number of decisions were made, some were kept secret for a time for military or political reasons, and the complete text of all the agreements was not disclosed until March 25, 1947 Although the decisions were those of the major belligerents, Great Britain, the United States, and the USSR, it was agreed that the adherence of France would be invited The Yalta conferees confirmed the policy adopted at the Casablanca Conference of demanding Germany's unconditional surrender Plans were made for dividing Germany into four zones of occupation (American, British, French, and Russian) under a unified control commission in Berlin Reparations in kind were to be collected from Germany for two years after surrender in order to destroy German

military power. The determination to punish war criminals was reasserted The conferees decided to ask China and France to join them in sponsoring the founding conference of the United Nations to be held in San Francisco on April 25, 1945, and agreement was reached on using the "veto" system of voting in the projected Security Council The Council of Foreign Ministers was established and was directed to meet whenever necessary The USSR secretly agreed to enter the war against Japan within three months of Germany's surrender and was promised N Sakhalin and the Kurile Islands The secret agreement respecting the disposal of Japan's holdings also provided that the port of Talien (Dairen) should be internationalized, that Port Arthur should be restored to its status before the Russo-Japanese War (1904 5) as a Russian naval base, and that the Manchurian railroads should be under joint Chinese-Soviet administration China later protested that it was not informed of these decisions concerning its territory and that its sovereignty was infringed

Yalu (yä'lōō'), river, NE Asia, rising in the Changpai mts in Sungkiang prov, China, and flowing c 500 mi SW to the Bay of Korea at Antung For most of its course the river forms the boundary of Korea and China In places it can be navigated by shallow-draft vessels, but the chief commercial use is for floating timber to sawmills

Yalung or **Ya-lung** (both yä'lōōng'), river rising in the Kunlun range in S Tsinghai prov, China, and flowing c 700 mi S across Sikang prov to the Yangtze at the border of Yünnan prov

yam, any of several tropical twining plants of the genus *Dioscorea*, cultivated for the starchy, tuberous roots that have long been used as food The tubers often weigh 30 lb or more They are baked, boiled, ground into flour, or fed to livestock In the United States the yam is grown for food in the southernmost part only, but farther north the wild yam (sometimes used medicinally) is indigenous, and another species, the cinnamon vine, is cultivated as a decorative plant In the South the SWEET POTATO is often called yam

Yama see HINDUISM

Yamada, Japan see UJI-YAMADA

Yamagata, Aritomo, Prince (ärē'tōmō yämä'gatä), 1838–1922, Japanese soldier and statesman, chief founder of the modern Japanese army A samurai of Choshu, he took part in the Meiji restoration that gave power to Mutsuhito, then studied military science in France and Germany He took an active part in the acquisition of Formosa, of Korea, and of the Japanese interests in Manchuria He was chief of staff in the Russo-Japanese War and was made a field marshal The leader of the military faction in the ruling oligarchy, he was the rival of Prince Ito, the great civilian statesman, and favored authoritarian government After Ito's death Yamagata's authority was paramount in Japan until his own death in 1922, though it was challenged by a fellow clansman, Taro Katsura Yamagata was president of the privy council (1893–95, 1905–9, 1909–22) He accepted the post of prime minister and served (1889–91, 1898–99), but he disdained party politics and preferred to exercise his authority as an elder statesman (genro) He was responsible for the rule that only active officers could serve as war or navy minister, a rule that made the army able to wreck any cabinet

Yamagata (yä"mä'gätō), city (1940 pop 69,184, 1947 pop 98,632), capital of Yamagata prefecture, N Honshu, Japan It is a silk-reeling center

Yamaguchi (yämä'gōōchē), city (1940 pop 34,579, 1947 pop 97,975), capital of Yamaguchi prefecture, SW Honshu, Japan A great castle city from the 14th to the 16th cent and site of a mission established (1550) by St Francis Xavier, it is today a commercial center The prefecture includes Shimonoseki and Ube

Yamal-Nenets National Okrug (yümal'-nyĕ'nyĭts, ō'krōōk), administrative division (258,800 sq mi, 1946 estimated pop 40,000), RSFSR, in NW Siberia, partly N of the Arctic Circle Salekhard is the capital The northernmost part of the region is the large Yamal Peninsula, between the Kara Sea in the west and Ob Bay (see OB) in the east With a tundra vegetation, the peninsula (like much of the rest of the area) is used for reindeer raising Fur trapping and fishing also are important sources of livelihood The population consists mainly of Nentsy, Khanty, and Komi (formerly known, respectively, as Samoyedes, Ostyaks, and Zyrians).

Yamamoto, Gombei, Count (gōmbā' yämä'mōtō), 1852–1933, Japanese admiral He was navy minister (1898 1906), contributing much to Japan's naval triumph in the Russo-Japanese War Yamamoto was later (1913–14, 1923–24) prime minister. His first cabinet fell because of a scandal concerning the construction of battleships His second took office the day after the great earthquake of 1923 Immediately the arrest of over 1,000 persons, chiefly Socialists, was ordered Party conflicts over reconstruction brought about its downfall.

Yamamoto, Isoroku (ēsō'rōkōō"), 1884–1943, Japanese admiral. He became vice navy minister in 1936. In 1941, at the time of the attack on Pearl Harbor, he was commander in chief of the combined fleet and first fleet He was killed in action in 1943

Yamanashi (yämä'nä'shē), prefecture, central Honshu, Japan see KOFU, the capital

Yamasee Indians, Yamasi Indians (both yă'mŭsē, yă'-), or **Yemasee Indians** (yĕ'-), tribe of North American Indians of the Natchez-Muskogean linguistic stock In the late 16th cent when Spanish missions were established among them, the Yamasee lived in S Georgia and N Florida They remained under Spanish rule until 1687, when they revolted and fled to South Carolina They were friends of the English colonists, but in 1715 they killed some English traders. The English, therefore, drove the Yamasee out of South Carolina and back into Florida From that time they were known as friends of the Spanish and enemies of the English In 1727 their village near St Augustine was attacked and destroyed by the English There are very few Yamasee left The Yamasee belonged to the Southeastern cultural area

Yamashita, Tomoyuki (tōmō'yōōkē yämash'tä), 1885–1946, Japanese general He commanded the army which took Singapore (Feb, 1942) In March, 1942, he relieved Homma in the Philippines and took Bataan (April) and Corregidor (May) He also commanded during the unsuccessful defense (Oct, 1944 Aug, 1945) of the Philippines against the invading Allies under Douglas MacArthur On Sept 2, 1945, he surrendered near Baguio, Luzon In October he went on trial before a military commission in Manila for atrocities committed by soldiers under his command He was found guilty (Dec 7) His appeal to the U S Supreme Court to intervene failed (Feb 4, 1946), and Yamashita was hanged Feb 23, 1946

Yamaska (yümä'skŭ), river of S Quebec, rising near the Vt border and flowing 110 mi NW and N past Farnham and St Hyacinthe to the St Lawrence at Lake St Peter, ENE of Sorel Its chief tributaries are the Centre Yamaska and North Yamaska

Yambo (yäm'bō) or **Yenbo** (yĕn'bō), town (pop c 3,000), Saudi Arabia, in the Hejaz It is the port of Medina The name appears also as Yanbu

Yambol (yäm'bōl), city (pop 30,311), E Bulgaria It is an agricultural center and a railroad junction, and it produces foodstuffs, cotton textiles, and leather There are manganese deposits near by Another spelling is Jambol

Yamburg, RSFSR see KINGISEPP

Yamdena, Indonesia see TANIMBAR ISLANDS

Yancey, William Lowndes, 1814–63, American leader of SECESSION, b Warren co, Ga Educated (1830–33) at Williams College, he was admitted (1834) to the bar in Greenville, S C, but soon moved to Alabama There he became an outstanding lawyer, was elected to the state house of representatives (1841) and the state senate (1843), and served in Congress (1844–46) Yancey wrote (1848) the Alabama Platform, which demanded of Congress the positive protection of slavery in the territories Adopted by several Southern states under his militant leadership, Yancey's doctrine soon became the creed of the whole South As extreme a "fire-eater" as William Lloyd Garrison was an abolitionist, he even advocated the reopening of the African slave trade After the Compromise of 1850 he retired into the background, but the events of 1860 once more brought him to the fore At the national convention of the Democratic party in Charleston, he expressed the Southern demands in one of his greatest speeches, and when the Northern delegates, led by Stephen A Douglas, refused to accept the "Yancey platform," practically all his Southern colleagues followed him out of the convention. Later the Southern Democrats nominated John C Breckinridge for President Yancey wrote the Alabama ordinance of secession, and the whole separatist movement was due more to him than any other one Southerner After the organization of the Confederacy, Jefferson DAVIS, then only provisional president, sent Yancey, a potential rival for the permanent office, to Europe as a Confederate commissioner Failing to secure recognition from England and France, he returned in 1862, was elected to the Confederate senate, and served there till his death See biography by J W DuBose (1892)

Yangchow or **Yang-chou** (both yäng'chō', yäng'jō'), officially *Kiangtu*, city (pop 127,104), SW Kiangsu prov, China It was one of the capitals of the Sui dynasty An ancient wall surrounds the city, which is noted for its buildings Yangchow is identified as the place which Marco Polo governed

Yangku, China see TAIYÜAN

Yangtze or **Yang-tze** (both yäng'sē', yäng'dzŭ) [Chinese, = son of the sea], river rising in SW Tsinghai prov, China, and flowing c 3,200 mi to the East China Sea It is the longest river of China The headstreams of the river rise at an altitude of c 16,000 ft. The turbulent upper section of the Yangtze, the Kinsha [Chinese, = golden sands], runs on a precipitous southerly course through Tsinghai and Sikang provs. and then turns east to follow a twisting path across Yünnan prov and into Szechwan prov, where, at Ipin, its junction with the Min river begins the Yangtze proper. The spectacular Yangtze gorges, a serious hazard, and at times a bar, to navigation, extend from Ipin, past Chungking, to Ichang in Hupeh prov. The river proceeds E through Hupeh, passing, at the junction with the Han river, the great industrial cities of Wuchang, Hanyang, and Hankow It then dips into Kiangsi prov and continues NW through Anhwei prov, passing Anking and Wuhu, and E through Kiangsu prov, past Nanking, to empty into the sea near Shanghai It is estimated that the Yangtze and its tributaries drain more than 700,000 sq mi Navigable by ocean liners from its mouth to Ichang and by smaller vessels to Ipin, the river is perhaps the major east-west trade artery of China and the route by which much of the country's foreign trade travels Along the Yangtze's banks the industry of central China (second in importance only to that of Manchuria) is concentrated The river furnishes water to irrigate the valley and the vast plains which it has built up, and the deposition of silt in the ever-growing delta (occupying a large part of Kiangsu prov) makes for one of the principal rice-growing areas in China The Yangtze, unlike the Yellow River, is not a persistent threat to agriculture and human life, because devastating floods are rare

Yankee, term used by Americans generally in reference to a native of New England and by non-Americans, especially the British, in reference to any American of any section According to H L Mencken the word is from the Knickerbocker Dutch and was apparently derived either from *Janke*, diminutive of *Jan*, or from *Jankees* (pronounced *Yoncase*), a combination of *Jan* and *kees* (cheese), thus signifying *John Cheese* As early as 1683 *Yankey* was a common nickname among the pirates of the Spanish Main, always, however, it was borne by Dutchmen There is no satisfactory explanation, reports Mencken, of how it came to be applied to the Englishmen of colonial America and particularly to New Englanders By 1765 it was in use as a term of contempt or derision, but by the opening of the American Revolution, New Englanders were proud to be called Yankees The popularity of the marching song *Yankee Doodle* probably had much to do with the term's subsequent wide usage In the Civil War it was applied disparagingly by the Confederates to Union soldiers and Northerners generally, and with Southern hatred for the North rekindled by the Reconstruction period it survived long after the war was over, usually in the form *damyankee* (one word) In the First World War, the English began calling American soldiers, both Southerners and Northerners, Yankees, the Southerners, Mencken says, "seem to have borne the affliction philosophically" At that time too the shortened form *Yank* became popular in the United States, with George M Cohan's war song *Over There* contributing largely to its increased usage However, *Yank*, too, was known in the 18th cent, as early as 1778, and the Confederates also used that form in the Civil War Yankee and Yank were again popular designations for the American soldier in the Second World War The terms have now lost their insulting connotation See H L Mencken, *The American Language* (4th ed, corrected, enlarged, and rewritten, 1936)

Yankee Doodle, song beginning, "Yankee Doodle went to town, A-riding on a pony," which was especially popular with the American troops during the American Revolution and is still included in collections of patriotic and old familiar songs The origin of title, tune, and words is uncertain The tune was evidently first known as an instrumental piece and appeared in print in the latter part of the 18th cent An account in a magazine of 1824 (which was for many years accepted as true) attributed the words to Dr Richard Shuckburg, a surgeon on the staff of the British army, who was said to have written the verses in 1755 as a joke on the motley group of soldiers in the adjoining provincial camp in Albany Although this is evidently inaccurate in detail, it is possible that Dr Shuckburg did write some of the verses, at least, at a later date It seems probable that the song was first used by the British in derision of the colonial soldiers and that it was later adopted by the Americans as their favorite marching song, although O G T Sonneck considers the words too gentle for actual derision and thinks they may have been written by Edward Bangs in the provincial camp near Cambridge, Mass, in 1775 or 1776 See O G T Sonneck, *Report on "Yankee Doodle"* (1909), J T Howard, *Our American Music* (rev ed, 1946), Sigmund Spaeth, *A History of Popular Music in America* (1948)

Yankton, city (pop 6,798), co seat of Yankton co, extreme SE S.Dak, on the Missouri above the mouth of the James and SSW of Sioux Falls Settled in 1858 as a fur-trading post, it was laid out in 1859 and incorporated in 1869, commission government was established in 1910. It was the Dakota territorial capital from 1861 to 1883 In a grain and livestock region, Yankton is a railroad center and shipping point, with grain elevators, creameries, cement works, and other industries. It is the site of Yankton College (coeducational, 1881) and of the state hospital for the insane.

Yankton Indians and Yanktonai Indians: see SIOUX INDIANS.

Yannina, Greece: see IOANNINA.

Yaoundé (yäōōndā'), town, capital of French Cameroons It is connected by rail with the coast. There is trade in cacao and palm products

Yap (yäp, yip), island group (39 sq mi , pop 2,744), W Pacific, in the W Caroline Islands It is 275 mi NE of Palau and consists of 4 large and 10 small islands surrounded by a coral reef Composed of older crystalline rocks, Yap is geologically different from the other Caroline Islands It is known for the stone money used by the Micronesian natives An important communications center, Yap has cable and radio stations In the Second World War it was the site of a Japanese air base, but was not invaded by U S forces

Yaphank (yāp'hăngk), unincorporated village on E central Long Island, SE N Y , NE of Patchogue Camp Upton here was a U S army induction center in the First and Second World Wars

Yaqui Indians (yä'kē), people of Sonora, Mexico, settled principally along the Yaqui river Their language is of the Uto-Aztecan stock (see LANGUAGE, table) They engage in weaving and agriculture, many work in the cotton regions of Sonora and S Arizona They have a clan system of government The Yaqui have proved themselves warlike and usually unfriendly toward Western encroachments on their lands To control their capacity to resist, the Mexican government resettled many groups in different parts of the country, some, to escape subjugation, have at various times emigrated to Arizona

Yardley, borough (pop 1,459), SE Pa , on the Delaware and near Trenton, N J , settled 1682 It has textile mills

Yare (yär), stream of Norfolk, England Its lower course widens into the BROADS and unites with the Waveney to form the estuarine Breydon Water

Yarkand (yärkänd'), Mandarin *So-chu,* river, rising in the mountains of SW Sinkiang prov , China, and flowing c 300 mi NE to the Kashgar river The city of Yarkand (pop c 25,000) is on the river It is in an oasis bordering the Taklamakan, and it is a center for trade with India and with the USSR Most of the inhabitants are Turkic-speaking, only a few are Chinese

Yarmouth (yär'muth), city (pop 7,790), SW N S , on the Atlantic at the entrance to the Bay of Fundy It is a port, with shipping connections to Boston and New York, and an industrial center, with shipbuilding, fishing, fish curing, lumbering, foundries, a cotton mill, and plants making boxes and other wood products Irish moss and strawberries are shipped from here, and the city is a summer resort and tourist center The region was visited (1604) by Champlain, who named it Cap Fourchu, and it became a French fishing settlement In 1759 a few settlers came here from Yarmouth, Mass , and called it after their former home The city was founded in 1761, when a larger group of settlers came from Sandwich, Mass They were followed (1767) by Acadians from the Grand Pré district and, later, by United Empire Loyalists

Yarmouth. 1 Small port, on the Isle of Wight, England, near the western end of the island and on the Solent at the mouth of the Yar rivulet **2** Officially **Great Yarmouth,** county borough (pop 56,771), Norfolk, England, a port on a long, narrow peninsula between the North Sea and Breydon Water (estuary formed by the Yare and Waveney rivers) The site was early occupied, there are vestiges of the ancient walls Yarmouth is a resort and is also important for its fishing, the Yarmouth bloater (prepared herring) is famous The harbor is protected, and Yarmouth Roads provide safe anchorage off the coast The Church of St Nicholas, the largest parish church in England, was founded by Bishop Herbert de Losinga early in the 12th cent Of interest are the "rows," or narrow lanes, about 145 in number, many of them only 3 to 5 ft wide, in the older part of the town. The old tollhouse contains a library and museum The borough figures in Dickens's *David Copperfield*

Yarmouth. 1 Town (pop 2,214), SW Maine, NNE of Portland, settled 1636, inc 1680 It includes the resort and fishing village of Yarmouth on Casco Bay. North Yarmouth Academy is in Yarmouth town The coast settlement was several times raided in the Indian wars of the 17th and 18th cent **2** Resort town (pop 2,286), SE Mass , on Cape Cod E of Barnstable, settled and inc 1639 The Thacher House (1680) is preserved

yarn, FIBERS or filaments formed into a continuous strand for use in weaving TEXTILES or for the manufacture of thread Staple fibers, as cotton, linen, and wool, are made into yarns by CARDING, COMBING (for fine, long staples only), drawing out into roving, then SPINNING Continuous filaments, as SILK, rayon, or nylon, are twisted directly into yarn or may be cut into short lengths and prepared like staple fibers Yarns are twisted to give them strength and smoothness Two or more strands twisted together form ply yarns In slub yarns areas are left untwisted to vary the diameter, thus producing ornamental effects Complex yarns, as bouclé and ratiné, are made by twisting together yarns of different tensions or diameters The relation between the weight of the raw fiber of staple varns and the yarn length is expressed by the yarn number; the finer the yarn, the higher the number In filament yarns the yarn number, expressed in deniers, increases with the coarseness of the yarn See Zelma Bendure and G B Pfeiffer, *America's Fabrics* (1946), M S Woolman and E A B McGowan, *Textiles* (3d ed , 1943)

Yaroslavl (yŭrusl'vŭl), city (1926 pop 114,282, 1939 pop 298,065), capital of Yaroslavl oblast, N central European RSFSR, on the upper Volga It is a major river port and industrial center, producing automobiles, synthetic rubber, asbestos, machinery, and cotton textiles Founded in 1024, it was the capital after 1218 of a principality which was absorbed by Moscow in 1463 In the 16th and 17th cent it developed as an important trade center on the route from the White Sea to the Near East and was the seat of an English trading station, where the first modern Russian ships were built (1564–65) Its old kremlin was destroyed (1918) in the civil war However, the city has preserved its 12th-century monastery and several churches of the 17th cent , a period of artistic flowering Yaroslavl has an art gallery, several museums, agricultural, medical, and technical schools, and the oldest theater in Russia (founded 1747)

Yarra (yă'ru), river of S Victoria, Australia, rising in the Great Dividing Range and flowing 115 mi generally W past Melbourne to Hobson's Bay (inlet of Port Phillip Bay) It is navigable 5 mi below Melbourne by small steamers It was formerly called the Yarra Yarra

Yarrow or **Yarrow Water,** stream of Scotland It rises near the point where the counties of Peebles, Selkirk, and Dumfries meet and flows through Loch of the Lowes and St Mary's Loch in Selkirkshire to Ettrick Water near its confluence with the Tweed The name is sometimes confined to that portion of the stream below St Mary's Loch Yarrow valley is celebrated for its beauty

yarrow, strong-scented Eurasian perennial (*Achillea millefolium*), called also milfoil, long naturalized in North America It has a flat-topped cluster of small composite flowers, usually white (rarely purple) but sometimes pink or red, the red being often cultivated in gardens The leaves are small and carrotlike Yarrow was a love charm of high repute, and its generic name resulted from the use Achilles is said to have made of the plant in healing the wounds of his soldiers and stopping bleeding—a use that has been continued locally to the present time American Indians used the plant somewhat similarly for applications, particularly for earache When yarrow is fed to cows, the milk is inferior Other species of the genus are also called yarrow, one western American species is sometimes considered a variety of *Achillea millefolium*

Yasnaya Polyana (yä'snĭă pŭlyä'nŭ), village, central European RSFSR, 7 mi S of Tula Here Leo TOLSTOY was born and had his estate, where he spent the later years of his life Briefly occupied (1941) by the Germans in the Second World War, Tolstoy's home was looted and subjected to acts of vandalism It was restored and is now again a museum and the literary shrine of Russia

Yass-Canberra. see AUSTRALIAN CAPITAL TERRITORY

Yates, Richard, 1815-73, Civil War governor of Illinois (1861–65), b Warsaw, Gallatin co , Ky , grad Illinois College, 1835 He studied law at Transylvania Univ , was admitted (1837) to the bar, and became a lawyer and Whig politician in Jacksonville, Ill A state legislator (1842–46, 1848–50) and U S Congressman (1851–55), he failed of reelection because of his adherence to the new Republican party As governor Yates was active in raising troops (he gave Ulysses S Grant his first Civil War commission) and managed to hold in check the powerful pro-Southern group in Illinois In the U S Senate from 1865 to 1871, he was a conforming radical Republican See W B Hesseltine, *Lincoln and the War Governors* (1948)

Yates Center, city (pop 2,176), co seat of Woodson co , SE Kansas, W of Fort Scott, inc 1884 It is a trade center and shipping point for a hay-producing area Stone quarries are near by

Yauco (you'kō), town (pop 9,985), SW Puerto Rico It is a trading and processing center for an agricultural region producing principally sugar and coffee There are also light manufactures

Yavapai Indians (yä'vupī'), North American Indian tribe belonging to the Yuman linguistic stock They are a nomadic tribe of the Southwest area, mainly in W Arizona In the historic period they were under the protection of the Apache, and the Yavapai are sometimes called the Mohave Apache They numbered 1,000 in 1873 The Yavapai are of interest principally as the supposed descendants of the tribes that created the interesting remains in the Verde valley The Yavapai are sometimes called the Yampais There are 47 on a reservation in Arizona See E W Gifford, *The Southwestern Yavapai* (1932)

Yavari, river see JAVARI

Yawata (yä"wä'tä) or **Yahata,** city (1940 pop 261,309, 1947 pop. 167,829), Fukuoka prefecture, N Kyushu, Japan. The principal industrial center of the island, with steel mills and with coal mines near by, it was heavily bombed (1945) in the Second World War

yawl, usually a small fore-and-aft rigged sailing vessel, similar to a CUTTER but with the addition of a small mizzenmast and sail

Yaxartes, river see SYR DARYA

Yazd, Iran see YEZD

Yazoo (yă'zōō), river formed in W central Mississippi by the junction of the Tallahatchie and Yalobusha rivers It meanders 178 mi SW to the Mississippi river at Vicksburg

Yazoo City, city (pop 7,258), co seat of Yazoo co , W central Miss , NNW of Jackson and on the Yazoo founded 1824, inc 1830 It is a trade and processing center in a cotton area

Yazoo land claims. After the American Revolution speculation in land reached new heights, especially in GEORGIA In 1789 that state sold vast tracts of its western lands, also claimed by the Indians, Spain, and the United States, to the South Carolina Yazoo, Virginia Yazoo, and Tennessee Yazoo companies (so named because much of the land was in the Yazoo river region) Georgia subsequently refused to yield title to the lands when it was offered payment in its own worthless paper money In 1795 the Georgia legislature was bribed into passing an act (the Yazoo act) which sanctioned the sale of even larger holdings to four new groups of speculators—the Georgia, Georgia Mississippi, Upper Mississippi, and Tennessee companies Spain's acceptance, in the same year, of lat 31°N as its northern boundary (see WEST FLORIDA CONTROVERSY), enhanced the value of the lands and the companies set about reselling them However, the corruption which accompanied passage of the Yazoo act was soon detected, and in 1796 a newly elected legislature repudiated it Georgia offered to restore the purchase price to the companies, but large numbers of investors, among them many New Englanders, declined to accept payment and pressed their land claims The confusion resulting from this situation was doubtless a strong factor in Georgia's cession (1802) of all its lands W of the Chattahoochee to the United States for $1,250,000 By the terms of the cession agreement the Yazooists were to receive 5,000,000 acres or the money received from their sale, an arrangement they rejected The Yazoo frauds, as they were called, came to be a vexing issue in national politics Congress, prodded by John Randolph, declined to give the speculators any relief But, in 1810, the U S Supreme Court, in *Fletcher vs Peck,* held that their land claims were valid since the Yazoo act of 1795 constituted a contract binding on Georgia even though it was conceived in fraud Bolstered by this decision, the speculators were later awarded over $4,000,000 by Congress See C H Haskins, *The Yazoo Land Companies* (1891)

Yb, chemical symbol of the element YTTERBIUM

Yeadon (yē'dun), borough (pop 8,524), Delaware co , SE Pa , W of Philadelphia, inc 1894

year see CALENDAR

Yeardley, Sir George (yärd'lē), c 1587–1627, British colonial governor of Virginia With Sir Thomas GATES he was shipwrecked (1609) in the Bermudas, but managed to reach Virginia in 1610 Acting governor (1616–17) in the absence of Sir Thomas DALE, he was appointed governor and knighted in 1618 Under Yeardley, acting on instructions of the London Company, the first representative assembly in the New World was convened at Jamestown in 1619, and this and other improvements made him exceptionally popular among the colonists Relieved at his own request in 1621, he remained in Virginia as the leader of Southampton Hundred In 1626 he replaced Sir Francis WYATT, who had succeeded him and was again governor until his death See P A Bruce, *The Virginia Plutarch* (1929)

yeast, name applied to certain microscopic fungi and to commercial products consisting of masses of dried yeast cells or of yeast mixed with a starchy material and pressed into yeast cakes Although a number of fungi are sometimes called yeasts, the true yeasts are unicellular, oval or round, and reproduce chiefly by budding Under certain conditions some yeast cells secrete a thickened wall, and the cytoplasm of the single cell within divides to form four or eight cells or spores, known as ascospores, which emerge when the wall ruptures In a few species two cells fuse before undergoing spore formation Yeasts, especially those of the genus *Saccharomyces,* have long been of commercial importance because they are the chief agents in alcoholic FERMENTATION Because of this they are essential to the making of BEER, wine, and industrial alcohol Wild yeasts, those found in nature and probably carried by insects from the soil to fruits, are frequently active in the fermentation process In breadmaking the yeasts act upon the carbohydrates in the dough, forming carbon dioxide and alcohol, which are driven off in the baking process, the escaping carbon dioxide causes the bread to rise Since early times yeast has been used in treating various ailments Brewer's yeast has a high content of thiamine and other vitamins of the

B-complex group. There is some evidence that the human body benefits by these vitamins when active dry yeast is eaten but that the vitamin-B content of fresh baker's yeast is not available to the human body Fungi of the genus *Torula* are among those often called yeasts although they are not true yeasts *Torula utilis* is used in the production of protein foods

Yeats, William Butler (yāts), 1865–1939, Irish poet and playwright, b Dublin The son of the painter John Butler Yeats, William also studied (1883–86) painting in Dublin until he realized that poetry instead was to be his art As a boy he had gone to school in London and also spent much time in Co Sligo, Ireland He was fascinated by the legends of Ireland and by the occult His first work, the drama *Mosada* (1886), reflects his concern with magic, but by the time he wrote his long poems in *The Wanderings of Oisin* (1889) the intense nationalism of the Young Ireland movement was strongly reflected in his choice of subject matter, and he was already using symbolism as a poetic medium In London in 1887 he had come under the influence of the theosophists and of Mme Blavatsky, and later of the Rosicrucians There he also helped found the Rhymers' Club, which included Ernest Dowson, Lionel Johnson, and others Yeats's efforts to foster Irish nationalism were inspired for years by Maud Gonne, an Irish patriot for whom he had a hopeless passion In 1898 with George Moore and Edward Martyn he founded the Irish literary Theatre in Dublin, their first production (1899) was of Yeats's *The Countess Cathleen* (written 1889–92) Yeats helped produce the plays, collaborated with Lady Augusta Gregory in the comedy *The Pot of Broth* (produced 1902) and in other plays, and induced J M Synge to return to Ireland and write plays for their theater Others of Yeats's plays which they produced were *Cathleen Ni Houlihan* (1902), and—after the ABBEY THEATRE was opened—*The Hour Glass* (1904), *The Land of Heart's Desire* (1904), and *Deirdre* (1907). In the meantime he had been writing prose tales, collected in *The Celtic Twilight* (1893) and in the symbolic *The Secret Rose* (1897) He had edited William Blake's works in 1893, and his own *Poems* were collected in 1895 His poetry in his middle years showed a reaction from transcendentalism to satire and a certain realism in *In the Seven Woods* (1903) and *The Green Helmet and Other Poems* (1910) In 1917 he married, and his occultism was encouraged by his wife's power of automatic writing His prose *A Vision* (1937, privately printed 1926) is the basis of much of his poetry in *The Wild Swans at Coole* (1917) and *Four Plays for Dancers* (1921) He was a respected public figure by this time, a member (1922–28) of the Irish senate, and winner of the 1923 Nobel Prize in Literature His poetry became less mystical, and some of his best work was his last, in *The Tower* (1928) and *Last Poems* (1940) All of Yeats's work shows interesting and important revision from earlier to later versions Yeats is the greatest lyric poet Ireland has produced and one of the major figures of 20th-century literature See his autobiography (3 vols in one, 1938), *Collected Poems* (1933), *Collected Plays* (1934), and *Letters on Poetry to Dorothy Wellesley* (1940), authorized biography by Joseph Hone (1946), critical biographies by Richard Ellmann (1948) and A N Jeffares (1949), James Hall and Martin Steinmann, ed , *The Permanence of Yeats* (1950)

Yeddo or **Yedo,** Japan see TOKYO

Yegorevsk (yĭgô'ryufsk), city (pop 56,340), central European RSFSR, ESE of Moscow It is a cotton-milling center and has clothing manufactures Near by are important phosphorite quarries. A variant spelling is Egorevsk

Yehoash see BLOOMGARDEN, SOLOMON.

Yelets (yĭlyĕts'), city (pop 50,888), S central European RSFSR It is a rail junction and agricultural processing center Founded in 1146, it was the northernmost point reached (1395) by Tamerlane It was fortified in 1592 and became an important grain center in the late 19th cent In the Second World War it was held (1941) by the Germans A variant spelling is Elets

Yell, parish (52,136 acres, pop 1,883), comprising Yell island and the small Hascosay island, off N Scotland, in the Shetland Islands The inhabitants of Yell island are mainly crofters and fishermen, and Mid Yell is a small port. The island has several brochs (prehistoric round stone towers) and ruined chapels

Yellow Book, English illustrated quarterly periodical published in book form in London (1894–97) Henry HARLAND was literary editor, and Aubrey BEARDSLEY, whose exotic and provocative drawings brought immediate attention to the publication, was art editor until 1896 The *Yellow Book,* its cover that of the yellowback French novel, was a miscellany of short stories, articles, poetry, and drawings It was able to draw material from writers with wide differences of style and viewpoint, but its emphasis was on the bizarre, the "modern," and the aesthetic The *Yellow Book* was an arsenal of "art for art's sake" It numbered among its contributors Oscar Wilde, Max Beerbohm, John Davidson, George Moore, Richard Le Gallienne, William Butler Yeats, Ernest Dowson, Stephen Phillips, and, later, Arnold Bennett and H G Wells See Holbrook Jackson, *The Eighteen Nineties* (1927)

yellow fever, infectious disease generally conceded to be caused by a filtrable virus and transmitted through the bite of certain mosquitoes The incubation period varies but is commonly about six days The disease is characterized by fever, chills, and muscular pain and, if the attack does not end before the critical stage of the disease, by jaundice and by black vomit (commonly containing coagulated blood) The death rate is very high, but survivors of the disease are generally immune Immunization can be obtained also by vaccination with an attenuated culture of living virus. Yellow-fever epidemics were first identified in the 17th cent in the West Indies, and later many severe epidemics occurred especially in tropical regions of the Western Hemisphere. The disease was long endemic in many places in the S United States, Central and South America, Mexico, the West Indies, and Africa In 1900 a commission headed by Walter REED and including James CARROLL, Jesse Lazear, and Aristides Agramonte proved in Havana the contention of C J FINLAY that the mosquito is the carrier of yellow fever Basing his work on the discoveries of this commission, W C GORGAS was notably successful in eradicating the disease in the Panama Canal Zone and other areas through mosquito-control measures Following the development of a vaccine for immunization and the control, in most areas where yellow fever was endemic, of the *Aedes aegypti* mosquito which was believed to be the sole carrier of the virus, the disease was thought to be under control However, a jungle fever that caused many deaths especially in Brazil was identified in the 1930s as yellow fever and was found to be carried by another species of mosquito, later identified as *A trisseriatus* Methods for the control of this form are being studied The fight against yellow fever cost the lives of many scientists including Jesse Lazear, Hideyo Noguchi, and Adrian Stokes See Paul de Kruif, *Microbe Hunters* (1926), C M Wilson, *Ambassadors in White* (1942)

yellowhammer see FLICKER

Yellowhead Pass, 3,711 ft high, in the Rocky Mts , on the boundary between Alberta and British Columbia and W of Jasper, Alta It is used by the Canadian National Railways

yellow jacket see WASP

Yellowknife, town (pop c 2,300), S Mackenzie dist , Northwest Territories, on the north shore of Great Slave Lake and at the mouth of the Yellowknife river The town was founded (1935) after the discovery here of rich deposits of gold and silver It is the largest town in the Northwest Territories and a mining, supply, and transportation center, with an airport, radio and meteorological stations, a public school, and a post of the Royal Canadian Mounted Police Mining production began in 1938, and the town grew rapidly as new mines were opened, until the Second World War caused a drop in demand for gold, with a consequent loss of population and prosperity to Yellowknife Since 1943 some mines have reopened. Transportation is chiefly by air, but a railhead is reached by the Slave and Athabaska rivers to Waterways Alta

yellow poplar see TULIP TREE

Yellow River, Hwang (hwĭng), or **Hoangho** (hwăng' hô'), Mandarin *Huang* [yellow], river rising at an elevation of c 17,000 ft in the Kunlun range in S Tsinghai prov , China, and flowing c 2,700 mi to the Pohai, an arm of the Yellow Sea In length it is second only to the Yangtze On its predominantly eastward course through Tsinghai and Kansu provs it makes a steep and turbulent descent Running N through Ninghsia prov and along the Ningh-Suiyuan border and then E through Suiyuan prov , it is navigable in places to small vessels Then, on its swift southerly course along the Shensi-Shansi border, the river gathers most of the yellow silt (loess), which colors it After being joined by the Wei river, the Yellow River flows E through Honan prov , where it can be navigated by small steamers Its final course to the Pohai is along a narrow silt-choked channel extending NE through Shantung prov. The silt continually builds up a delta, which provides fertile soil for grains and cotton There are no large cities on the banks of the Yellow River, because only relatively short stretches are navigable and because disastrous floods always threaten Silt depositation, the principal cause of the flooding, continually elevates the river bed (in places 60 to 70 ft above the countryside) and necessitates raising the dikes If the pressure of water in the channel becomes abnormally high the dikes may be breached and masses of water cascaded over a large area, this has happened so frequently that the river is called "China's Sorrow" From the 2d millennium B.C to A D. 1947 there were eight major shifts in the river's eastern course

Yellow Sea or **Hwang-hai,** Mandarin *Huang-hai* [yellow sea], arm of the Pacific Ocean, between China and Korea The Pohai and the bays of Liaotung and Korea are its chief inlets.

Yellow Springs, village (pop 1,640), SW Ohio, near the Little Miami river S of Springfield, settled c.1820, inc. 1856 ANTIOCH COLLEGE is here.

Yellowstone, river rising in NW Wyoming in the Absaroka Range and flowing northward into Yellowstone National Park, where it flows through Yellowstone Lake (alt. c.7,731 ft.; area 139 sq mi), forms great falls, and traverses a deep canyon The river enters Montana and flows generally NE to the Missouri near old Fort Union, just within North Dakota In its course of 671 mi. the Yellowstone receives the Bighorn, Powder, and many smaller rivers Its waters have been used for irrigation since the late 1860s. Private irrigation developments are established the length of the river, with public projects near Miles City and Billings The Bureau of Reclamation operates several projects which are being incorporated into the Yellowstone sub-basin division of the MISSOURI RIVER BASIN PROJECT These are the Huntley project, near Billings, the Lower Yellowstone project (see SIDNEY), and the Buffalo Rapids project. Plans for future development are based almost entirely on control of the BIGHORN river basin

Yellowstone National Park, c 3,458 sq mi , NW Wyoming (2,039,216.98 acres) and adjacent parts of Montana (142,501 57 acres) and Idaho (31,488 acres), est 1872 It lies mainly on a broad plateau in the Rocky Mts , on the Continental Divide, c 8,000 ft above sea level, surrounded by mountains rising from 2,000 ft to 4,000 ft above the tableland The whole area is volcanic Most of the plateau is formed from once molten lava, and volcanic activity is still evidenced by hot springs and GEYSERS, of which there are over 3,000 The more prominent geysers have no equals in size, power, and variety of action, of these, Old Faithful is probably the best known Petrified forests are also numbered among the park's wonders Forests of evergreens and a great variety of flowers and other plant life flourish in the park, which is one of the largest wildlife sanctuaries in the world Bear, mountain sheep, deer, moose, bison, and many smaller animals make their home here, together with over 200 species of birds The Yellowstone river, with its spectacular canyon and waterfalls, crosses the park, and Yellowstone Lake is the largest in North America at so great an altitude (c 7,731 ft) The park has headquarters at Mammoth Hot Springs, its main season is from about June 20 to Sept 10 John COLTER was probably the first white man to set foot in this region (1807) See publications of the National Park Service, Dept of the Interior, A D Howard, *Yellowstone through the Ages* (1938), C M Bauer, *Yellowstone Its Underworld* (1948), H M Chittenden, *Yellowstone National Park* (rev ed , 1949)

Yellow Tavern, locality, Va , c 7 mi N of Richmond, where a battle of the Civil War was fought, May 11, 1864 Union cavalry under P H SHERIDAN defeated the Confederate troopers of J E. B STUART, who was mortally wounded

yellow tuft see ALYSSUM.

yellowwood, leguminous tree of which two species are native to China, one to Japan, and one to the SE United States The American species (*Cladrastis lutea*) is cultivated as far north as Massachusetts, chiefly for ornament It has pinnately compound leaves, and the fragrant white flowers are borne in terminal panicles A yellow dye is obtained from the wood West Indian SATINWOOD and various other trees are often called yellowwood

Yemasee Indians see YAMASEE INDIANS

Yemen (yĕ'mun), kingdom (75,000 sq mi ; pop. c 3,500,000), SW Arabia, on the most southerly part of the Red Sea coast Sana is the capital Yemen is bounded by Saudi Arabia on the north, Aden protectorate on the south, and the desert expanses of the Rub al Khali on the east The Arabic name, Al Yemen, means the right hand and describes the country's position as one stands before the Kaaba in Mecca *facing* east As the right hand is the lucky side in Arab folklore, the name was rendered Arabia Felix [fortunate Arabia] by European geographers However, the name was probably applied to a much larger area than the present Yemen Except for the narrow coastal strip, the country is predominantly high Elevations up to 10,000 ft are found in the maritime range and in the central watershed These mountains precipitate moisture from the prevailing inshore winds and give many parts of Yemen, unlike most of Arabia, sufficient water for agriculture In the plain between the principal ranges the heavy evening mists are ideal for raising coffee, the Mocha variety is chiefly grown Fruits and grains are also raised in abundance Nearly all the population is settled, and nomadism is found only in the lowlands The small surplus production of coffee and hides is shipped abroad, chiefly through the ports of Hodeida and Mocha The earliest historical records indicate an active early trade between Yemen and the Somali coast in Africa. In a later period (8th–4th cent ? B C.) Yemen may have belonged to SHEBA. During this time there were perhaps extensive migrations from Palestine, some authorities, however, believe that the large Jewish community was established when, in the 4th cent. A.D.,

the Himyaritic kings adopted Judaism. The Himyaritic domain had been founded in the 1st cent. B.C. It was soon temporarily eclipsed by Ethiopia from 300 to 378, and a second Ethiopian occupation (525–70) brought the line to an end (see AKSUM) In 570 the Ethiopians were ousted by the Persian king Khosru I, who installed a line of viceroys. With the acceptance of Islam by the viceroy Badhan in 628, the history of Yemen was absorbed into that of all Arabia. Thereafter the area was the scene of much struggle for several hundred years In the 10th cent., following domination of all Arabia by the Karmathians, a new power rose in Yemen, the Zeidi sect of Islam This sect traced the descent of its IMAM from a great-grandson of Ali, the son-in-law of Mohammed the Prophet The kings of Yemen are the imams of the Zeidi line Zeidi rule was contested by Turkish occupation from the mid-16th to the mid-17th cent and again from 1849 until 1918 In 1918, with the end of the First World War, the Turks were expelled. The most recent threat to Yemen occurred in 1934, when it was conquered by Saudi Arabia, the occupation was, however, soon ended and the frontier was definitely demarcated In 1948 the king was killed in a revolt, but his line was soon restored Yemen is a member of the Arab League In 1947 it was admitted to the United Nations In 1949–50 most of the Jewish population was evacuated to Israel See Walter B Harris, *A Journey through Yemen* (1893), Hugh Scott, *In the High Yemen* (rev. ed , 1947)

Yen, James Y. C. (yĕn), Mandarin *Yen Yang-chu*, 1893–, Chinese educator, educated at Yale and Princeton universities Yen devised a simplified form of Chinese writing consisting of 1,000 characters and suitable for instructing adult illiterates He became prominent for his work with the national association of mass education, which was organized to reduce illiteracy and encourage modern methods of farming and agricultural marketing

Yenakiyevo (yĕnûkĕ'uvŭ), city (1926 pop 24,329, 1939 pop 88,246), SE Ukraine. It is an industrial center of the Donets Basin, with iron works, steel mills, and a chemical plant

Yenan or **Ye-nan** (both yĕ'nän'), city and county (pop 29,856), N Shensi prov , China From 1935 until 1947, when it was lost to the Nationalists, the city was the *de facto* capital of the Chinese Communists, who had established arsenals, several colleges, and a military academy here. In 1948 the Communists regained the city

Yenbo, Saudi Arabia see YAMBO

Yenikale Strait, RSFSR see KERCH STRAIT

Yenisei (yĕnĭsā', Rus yĕnyĭsyā'), river, 2,490 mi. long, RSFSR, in central Siberia It rises in the E Sayan Mts in the Tuva Autonomous Oblast and in a westward, then a northerly, course flows past Minusinsk, Krasnoyarsk, Yeniseisk, and Igarka to enter the Kara Sea through Yenisei Bay and Yenisei Gulf. Precipitous in its upper course, it has an average width of 4 mi in its lower section Among its tributaries are the Angara, the Stony Tunguska, and the Lower Tunguska, and it is joined by a canal system with the Ob During ice-free months navigation is possible from Minusinsk (April–Nov , 1,720 mi upstream), from Yeniseisk (May–Oct , 1,195 mi upstream), and from Igarka (June–Oct , 270 mi upstream) It is used for transporting lumber, grain, and construction materials

Yenping (yĕn'pĭng'), Mandarin *Nan-p'ing*, city, N Fukien prov , China, at the head of the Min river. It is the commercial center of a tea-growing area

Yentai or **Yen-t'ai** (both yĕn'tī'), city, N Shantung prov , China, a port on the Pohai Soybeans and cloth are exported. The city is also called Chefoo

yeoman (yō'mŭn), class in English society The term has always been ill-defined, but generally it means landowning farmers below the gentry The yeoman was a small freeholder of the feudal manor with certain obligations of service With the decline of the feudal system, he remained as a small landowner until the agrarian revolution and Industrial Revolution of the 18th cent deprived him of his land and of the opportunity to engage profitably in home industry, with which he supplemented his subsistence farming A workingman without a master, early admitted to political rights, the yeoman was thought to give great strength to English society. This impression was partially due to his effective performance as an infantryman from Crécy (1346) to Waterloo (1815). The patriot armies of the American Revolution were largely drawn from the yeoman class. In military and naval organizations, the term has come to signify a rank or function; the naval yeoman is a petty officer with duties of a clerical nature. Yeomanry is a designation of a part of the county volunteer forces of Great Britain, originated in 1761 and now part of other territorial forces.

Yeomen of the Guard, bodyguard, now ceremonial in function, of the sovereign of England. When originated by Henry VII in 1485, the duties of the guardsmen as defenders of the king's person and as household functionaries were very real. Until 1748 they accompanied the king in battle. For a time purchased by civilians, positions in the corps were restricted in 1848 to veterans of the army and marines. Sometimes called the Beefeaters from their fine physiques, the Yeomen of the Guard still wear the scarlet, blue, and gold uniform of the 15th cent and carry halberds A comic opera, *The Yeomen of the Guard*, by W S. Gilbert and Arthur Sullivan, was first produced in 1888

Yeovil (yō'vĭl), municipal borough (pop. 19,077), Somerset, England, on the Yeo river The Perpendicular Church of St John is sometimes called the "Lantern of the West" There are a number of picturesque old houses. Yeovil is a market town and a leathermaking center. Glovemaking has been a local specialty since the 16th cent , farm machinery and engines are also made

Yerba Buena Island (yûr'bŭ bwā'nu), 300 acres, W Calif , in San Francisco Bay, the midpoint of the SAN FRANCISCO–OAKLAND BAY BRIDGE It was formerly called Goat Island.

yerba mate: see MATE

Yerkes, Charles Tyson (yûr'kēz, -kus), 1837-1905, American financier, b Philadelphia He began his business career as a clerk in a Philadelphia grain commission house Becoming a broker in 1858, he prospered, but in 1871 he was convicted of misappropriating city funds and was imprisoned He regained his financial position through stock-market activities and became interested in the Philadelphia street railway system He moved (1881) to Chicago, where by 1886 he had gained control of, and developed, the city transportation system In 1892 Yerkes furnished the Univ of Chicago the funds for the Yerkes Observatory, established (1897) at Williams Bay, Wis , near the Wisconsin–Illinois line

Yerkes, Robert Mearns, 1876 , American psychologist, b Bucks co , Pa , grad Harvard (B A , 1898, Ph D., 1902). He taught (1901–17) at Harvard, served (1919–24) on the National Research Council, and from 1924 to 1944 was at Yale, where he was known for his work in comparative psychology, animal behavior (especially of anthropoids), and psychobiology With E L Thorndike and J B Watson he was one of the first to establish in America the experimental study of animal behavior His works include *Introduction to Psychology* (1911), *The Mental Life of Monkeys and Apes* (1916), *The Mind of a Gorilla* (2 parts, 1926–27), and *The Great Apes* (with Ada Yerkes, 1929)

Yermak or **Ermak** (both yĕrmäk'), d 1584 or 1585, Russian conqueror of Siberia The leader of a band of independent Cossacks, he spent the early part of his career plundering the tsar's ships on the Volga, and he later entered the service of the boyar family of the Stroganovs in Perm With a small following of Cossacks, advancing in river boats and relying on the superiority of their firearms, he penetrated across the Urals and conquered (1582) the Tatar khanate of SIBIR He then turned over the country to Tsar Ivan IV and asked him for aid Yermak perished in an encounter with the Tatars, but his Cossacks continued their spectacularly swift advance across Siberia

Yersin, Alexandre Émile John (ălĕksä'dru āmēl' zhôn'yĕrsĕ'), 1863–1943, French bacteriologist, of Swiss descent He studied with Pasteur and worked on diphtheria antitoxin with P P É Roux at the Pasteur Institute, Paris Yersin discovered (1894) the bacillus of bubonic plague (independently of Kitasato) and prepared a serum to combat the disease He was director of the Pasteur Institute at Nhatrang (SE Annam) and inspector general of the Pasteur Institutes at Saigon, Hanoi, and Dalat (S of Nhatrang)

Yesenin, Sergei Aleksandrovich (sĭrgā' ŭlyĭksän' druvĭch yĭsyä'nĭn), 1895–1925, Russian poet He was the most popular poet of the early revolution and the object of a considerable cult He had great lyric talent and a fine feeling for nature, especially the natural beauty of Russia Of peasant origin, he accepted the revolution when it promised to be the peasant's deliverer but repudiated it when it proved to be a dictatorship He belonged to the imaginist school and stood for the absolute independence of the artist and poet Besides lyrics, he wrote the epic *Pugachev* (1922), a verse tragedy of the peasant rebel of the reign of Catherine II In 1922 he married Isadora Duncan and with her toured the United States and Europe After a separation he married a granddaughter of Leo Tolstoy In 1925 he committed suicide

Yesil Irmak (yĕshĭl' ırmak'), anc *Iris*, river, 260 mi long, rising c 50 mi NE of Sivas, N Turkey It flows WNW, then NE, past Tokat and Amasya into the Black Sea near Samsun. It is also spelled Yeshil Irmak

Yesso: see HOKKAIDO.

Yevpatoriya, RSFSR see EUPATORIA

yew, name for evergreen trees or shrubs of the genus *Taxus*, somewhat similar to hemlock but bearing red berrylike fruits instead of true cones Of somber appearance, with dark green leaves, the yew since antiquity has been associated with death and funeral rites A species of yew (*Taxus baccata*) provided the long bows of English archers In North America the most common species is a low, spreading shrub (*T canadensis*), called also ground hemlock, which is native to Canada and to the NE United States Most species are poisonous. Yews are often trimmed into hedges.

Yezd (yĕzd), city (pop. 60,066), central Iran, in the Yezd region, largely a desert area An old city, with narrow winding streets, it contains a fort and a mosque, both dating from the 12th cent The Zoroastrian community (over 4,000) here is the largest in Iran Situated at the junction of several roads and caravan routes, Yezd has an important trade in cotton, carpets, pistachios, and opium Textiles and felt goods are the chief manufactures There is a good underground water system. The name also appears as Yazd

Yezo see HOKKAIDO.

Yggdrasill (ĭg'drusĭl), in Norse legend, the great tree of the world Its roots reached the upper and lower worlds At its top was an eagle, at its bottom a serpent, and a squirrel ran between them to arouse strife It is probably a late idea in Norse mythology

Yiddish [Ger *judisch* = Jewish], language spoken by the Jews of Eastern Europe and by immigrants from those countries in the United States and elsewhere Descended from the German of the Middle Ages, with many Hebrew and Aramaic words, it has wandered far from the German spoken today and has absorbed words and expressions from whatever country the Jews reside in, most recently and most richly in the United States The Hebrew characters are used, and the spelling is full of variations Hebrew being the language of the learned Jews and of literature, Yiddish was long scorned as a medium for authors There were a few Yiddish translations of religious material for women and for the ignorant, and folk literature appeared in Yiddish between the 15th and the 19th cent But literature in Yiddish did not begin to flourish until the middle of the 19th cent The father of modern imaginative Yiddish literature is Solomon Jacob ABRAMOVICH He was followed by the humorist Sholom ALEICHEM, the mystical I L PERETZ, Mordecai Spector, and Linetzky, who is famous for his autobiographical *Polish Boy* Journals and newspapers in Yiddish began to make an appearance, these, more cultural and educational than most newspapers, furnished an outlet for Jewish authors Yiddish journalism owes its fullest development to the immigrant Jews in the United States, where Abraham CAHAN founded the Jewish *Daily Forward* in 1897 The most prominent American Jewish writers are Sholem ASCH, David PINSKI, playwright, novelist, and short-story writer, the poets A Reisen and Yehoash (see BLOOMGARDEN, SOLOMON), and the lyricist and folklorist Mannie Leib Yiddish drama was born when Goldfadden, the playwright, founded a theater in Odessa in 1878 Next to Goldfadden in Yiddish theatrical annals stands the name of Jacob Gordin The Yiddish stage borrowed much from the Russian Ansky, author of *The Dybbuk*, and Singer, author of *Yoshe Kalb*, have given conclusive proof that Yiddish can be a beautiful, as well as an interesting and colorful, literary medium There is practically no Yiddish literature outside of Russia, Poland, and the United States See Israel Abrahams, *Chapters on Jewish Literature* (1899) Meyer Waxman, *A History of Jewish Literature* (3 vols , 1930–36)

Yin, dynasty of China see SHANG

Yingchwan or **Ying-ch'uan** (both yĭng'chwän'), city (pop 38,634), capital of Ninghsia prov , China, on the Yellow River

Yingkow or **Ying-k'ou** (both yĭng'kou', yĭng'kō'), city (pop 180,871), W Liaoning prov , China, on the Liao river The city is on the South Manchurian RR, and it manufactures and exports soybean products It is sometimes called Newchwang

Yoakum (yō'kum), city (1940 pop 4,733, 1947 estimated pop 5,700), S Texas, E of San Antonio, inc 1891 Founded as a railroad town in 1887, it declined later but now has a flourishing tannery and leather factory, other smaller industries, and the trade of a tomato-growing area

yodel or **yodle** (both yō'dul), type of vocalization usually associated with the Swiss but practiced throughout the Alps and even, as an importation, in the mountains of Kentucky It is characterized by sudden shifts from the natural singing voice to falsetto

yoga (yō'gu) [Sanskrit, = union, cognate with English *yoke*], mystical system of India A late development of HINDUISM, yoga essentially seeks to liberate the individual from the wholly illusory world of phenomena A person's karma (i e , the rewards and punishments allotted to him in one existence on the basis of good and evil conduct in previous existences) sets a limit—which yoga can enlarge—to his capacity for such liberation, nevertheless in some cases several lifetimes of effort will be needed to complete the process The spiritual state which follows liberation may take either of two forms The yogi (or yogin) whose philosophy is pantheistic seeks union with the universal soul For those yogis who are atheistic (possibly a minority) a state of absolute isolation from all other souls and of perfect self-knowledge is the aim The ultimate state, insofar as it includes a sensory aspect, has been described by both schools as a white inner illumination All types of yoga use much the same exercises Bodily purity, attained by purgation and cleanliness, is the first stage Concentration of thought and gaze on one part of the body (e g , the tip of the

nose, the navel) follows, with the purpose of excluding worldly thoughts. Later there are physical feats, including arduous postures, which strengthen one for the performance of breathing practices. These include breathing through either nostril at will and retention of the breath for periods up to half an hour At first it is while the breath is held that illumination is attained, but in time the adept can achieve this state effortlessly Most of the greater yogis deplored using yoga for magical ends, but it is this aspect which usually attracts the interest of the West The magic which yoga is traditionally believed to accomplish includes changing one's size, traveling through the air, clairvoyance, clairaudience, prophecy, and even eternal life However baseless may be the claim of some yogis to work wonders, there is no doubt of their extraordinary physical endurance See K T Behanan, *Yoga* (1937), Theos Bernard, *Hatha Yoga* (1944)

yoghurt see FERMENTED MILK

Yoho National Park (yō'hō), 507 sq mi, SE British Columbia, in the Rocky Mts at the Alta border, est 1886 It lies W of the Continental Divide, adjoining Banff and Kootenay national parks, and contains lakes, glaciers, waterfalls, and high mountains with a number of peaks over 10,000 ft high Park headquarters are at Field, which is a center for mountain climbing

Yokkaichi (yōk-ki'chē), city (1940 pop 63,732, 1947 pop 112,433), Mie prefecture, S Honshu, Japan, a port on Ise Bay Its products include a kind of porcelain known as banko ware, cotton textiles, and cement

Yokohama (yō"kaha'ma, yōka'hamu), city (1940 pop 968,091, 1947 pop 814, 379), capital of Kanagawa prefecture, central Honshu, Japan, a port on the west shore of Tokyo Bay This city of steel, chemical, and automobile plants, oil refineries, and shipyards was only a fishing village when it was visited (1854) by Commodore Matthew C Perry on his epochal voyage, as a result of that visit Yokohama was opened (1859) to foreign trade It became a major foreign-trade port, exporting a large quantity of Japan's silk as well as canned fish and other products In 1941 the ports of Yokohama and Tokyo were combined under the name Keihin Virtually destroyed (1923) by earthquake and fire, Yokohama's reconstruction was quickly started and complete Extensive harbor improvements were made, and an enlarged city of wide streets and boulevards and fine concrete buildings arose from the ruins In 1945 it was heavily bombed in the Second World War Kanagawa prefecture includes the industrial cities of Kawasaki and Yokosuka, and the religious center, Kamakura The urban belt in the eastern part of the prefecture merges with Tokyo to the north

Yokosuka (yōkō'sōōka), city (1940 pop 193,358, 1947 pop 252,923), Kanagawa prefecture, central Honshu, Japan, on Tokyo Bay Site of an important naval base, with shipyards, arsenals, and ironworks, the city is also known for the tomb of William Adams, first Englishman to visit Japan

Yokut Indians (yō'kōōt), tribe of North American Indians of S California Their culture was essentially that of the California cultural area, and their basketry and pictographs are notable The Yokut today are principally at the Tule River Reservation, in SE California, though there are small groups elsewhere The Yokut or Mariposan languages belong to the Penutian linguistic family. See H F Hughes, *The Valley of the Yokuts* (1940).

Yom Kippur, see ATONEMENT, DAY OF

Yonge, Charlotte Mary (yŭng), 1823–1901, English novelist Her writing as well as her life was restricted by the rigid High Church tenets of her upbringing In spite of then religiosity her books were long popular because of the excellence of their characterization and dialogue *The Heir of Redclyffe* (1853), a novel, and *The Daisy Chain* (1856), a book for girls, are best known She edited the *Monthly Packet* from 1851, and many of her stories first appeared there. See biography by Georgina Battiscombe (1943)

Yonkers (yŏng'kurz), residential city (pop 142,598), SE N Y, in Westchester co, on the east bank of the Hudson, in a hilly region just N of Van Cortlandt Park of New York city, inc as a village 1855, as a city 1872 Factories and mills dot the Nepperhan, which flows through the northwestern part of the city and defines the industrial section. Yonkers makes its living from various manufactures, among which are carpets, cable, and wire E G. Otis brought (1854) the elevator industry here The city was included in the land grant made (1646) by the Dutch West India Company to the New Netherland lawyer, Adriaen Van der Donck (called by the title Jonkheer, from which the city derived its name). Frederick PHILIPSE built a manor hall of PHILIPSE MANOR here Yonkers is the seat of the BOYCE THOMPSON INSTITUTE FOR PLANT RESEARCH. Tibbetts Brook Park is within the city limits.

Yonne (yŏn), department (2,881 sq mi, pop 266,014), N central France, named for a tributary of the Seine It occupies parts of Burgundy, Champagne, and Orléanais. AUXERRE (departmental capital) and Sens are the chief towns.

Yorck von Wartenburg or **York von Wartenburg, Hans, Graf,** (both· hăns' grăf' yôrk' fŭn vär'tŭnbôrk), 1759–1830, Prussian field marshal. He commanded the Prussian auxiliary corps in the campaign of Napoleon I against Russia (1812), but when he realized that the expedition was doomed to failure he withdrew on his own responsibility from the fighting and concluded the Convention of Tauroggen with the Russians (see TAURAGE) King Frederick William III of Prussia subsequently approved his act, and Prussia entered the coalition against Napoleon Yorck defeated (1813) a French force at Wartenburg in Saxony, and thus earned his title

Yoritomo (Yoritomo Minamoto) (yōrē'tōmō mēnä'mōtō), 1147?–1199, Japanese warrior and dictator After a prolonged struggle he led his clan, the Minamoto, to victory over the Taira in 1185 Being now the military master of Japan, he obtained (1192) from the emperor the title of SHOGUN, established his capital at Kamakura, and rewarded his followers with estates strategically located throughout the country Aided by scholars drawn from the imperial court, he set up an administrative network which, though originally designed only to consolidate the power of the Minamoto family over its own vassals, soon became the only effective central government The system of centralized feudalism established by Yoritomo ended a long period of civil wars and endured for approximately 150 years

York, Alvin Cullum, 1887–, American soldier, b Fentress co, Tenn, He was reared on a backcountry farm in Tennessee In the First World War, Sergeant York was credited with killing 20 German soldiers, capturing 132 others, and taking a hill in an engagement (Oct 8, 1918) in the Argonne Forest He received the highest decorations of the American and French governments and became a popular hero After the war he established a school for Tennessee mountaineers See his autobiography (1928) T J Skeyhill, *Sergeant York, Last of the Long Hunters* (1930)

York, Cardinal see STUART, HENRY BENEDICT MARIA CLEMENT

York, Edmund of Langley, duke of, 1341–1402, fifth son of Edward III of England He accompanied his father into France (1359), was made (1362) earl of Cambridge, served on expeditions to Spain and France, and married (1372) Isabel, daughter of Peter the Cruel, king of Castile He joined John de Montfort, duke of Brittany, in an attack on the French in 1375, became a regency councilor on the accession of Richard II, and in 1381–82 made a fruitless expedition to help the treacherous Ferdinand of Portugal against John I of Castile He served against the Scots in 1385, in which year he was created duke of York, and acted as regent in 1394, 1396, and 1399, while Richard was abroad When Henry of Lancaster landed in England in July, 1399, to claim the throne, the regent opposed him halfheartedly and finally veered to his support When Henry was crowned as Henry IV, York retired from court The royal house of York takes its name from his creation as duke of York

York, Edward, duke of, 1373?–1415, English nobleman, elder son of Edmund of Langley, later duke of York In 1390 Edward was made earl of Rutland, and in 1394 he was created earl of Cork while he was with his cousin Richard II on an expedition to Ireland He acted for the king in the marriage negotiations for the hand of Isabella of France For his help in the proceedings (1397) against the lords appellant Richard gave him the lands of the attainted Thomas of Woodstock, duke of Gloucester, and the title duke of Albemarle He finally espoused the cause of HENRY IV against Richard in 1399, but he was reduced in rank However, in 1401 he was restored and made lieutenant of Aquitaine In 1402 he succeeded to the dukedom of York on his father's death Discontent over lack of funds to occupy his post of lieutenant of South Wales led him to join in an unsuccessful plot to kill the king and to kidnap the young Edward Mortimer, earl of March, heir by lineage to Richard II. York was imprisoned (1405) but was later released and made a privy councilor Subsequently he served the king in Wales and France and was killed while fighting for Henry V at Agincourt

York, Frederick Augustus, duke of, 1763–1827, second son of George III of England He entered the army as a colonel at the age of 17, and studied his profession in Germany His marriage (1791) to Frederica, daughter of Frederick William II of Prussia quickly ended in separation In the French Revolutionary Wars he commanded (1793–95) the unsuccessful English forces in Flanders. Despite his failures in the field, he was influential in reforming army abuses at home As commander in chief of the army he led another disastrous expedition (1799) to the Netherlands against France. He resigned his command in 1809 after he was acquitted of selling army commissions through his mistress, Mary Anne Clarke He became heir presumptive to the throne on the death of his father (1820), but died before his brother, George IV.

York, Richard, duke of, 1411–60, English nobleman. He was descended from Edward III through his father, Richard, earl of Cambridge, grandson of that king, and also through his mother, Anne Mortimer, great-granddaughter of Lionel, duke of Clarence, who was the third son of Edward III. Richard was brought up as the king's ward, having become duke of York on the death of his uncle, Edward, in 1415 He was knighted by Henry VI (1426), served the king in the wars in France (1430–31), and was made (1436) lieutenant general of France and Normandy He became associated with the Neville family by his marriage (1438) to Cicely Neville, daughter of the earl of Westmorland He served again as lieutenant general in France from 1441 to 1446 with little success Because the death (1447) of Humphrey, duke of Gloucester, placed York in line for the throne, he was sent out of the country as lieutenant of Ireland (1449) The next year York returned to struggle unsuccessfully against the growing power of Queen MARGARET OF ANJOU and Edmund Beaufort, duke of SOMERSET The birth of Henry VI's son (1453) displaced him as heir to the throne After brief ascendancy as protector during the king's insanity (1454), York resorted to force (see ROSES, WARS OF THE) and won the first battle of St Albans (1455) where Somerset was killed However, except for York's second brief protectorship, the queen's faction regained power The Yorkist victory at Northampton (1460) enabled York to enter London and claim the throne. A compromise which allowed him to succeed to the throne on the king's death was arranged, but the opposition of the queen led to the battle of Wakefield, in which York was slain His son, Edward of York, however, made a timely entrance into London and seized the throne as EDWARD IV (1461)

York, county borough (1931 pop 84,813, 1947 estimated pop 105,970) and city, Yorkshire, England, at the confluence of the Ouse and Foss rivers It is not included administratively in any of the three ridings of Yorkshire York may have been a British settlement, for the district was occupied by the ancient tribe of Brigantes As Eboracum, it was the chief station of the British province of the Roman Empire Emperor Hadrian visited York in 120 and built an earthen rampart to keep out the Picts and the Celts The emperors Severus and Constantius I died here, and here Constantine I was proclaimed emperor In 314 a bishop of York is mentioned, and in the 7th cent Paulinus, the first archbishop, was consecrated York is the ecclesiastical center of the north of England, second only to Canterbury in the Church of England In the 8th cent York was one of the most famous centers of education in Europe Alcuin was born here c 735 and became the headmaster of St Peter's School, now one of the oldest schools in England The Cathedral of St Peter, commonly known as York Minster, occupies the site of the wooden church in which King Edwin was baptized by Paulinus on Easter Day in 627 The present edifice dates from the Saxon and Norman period The Abbey of St Mary (Benedictine) dates from the 11th cent Monks from St Mary's founded FOUNTAINS ABBEY The present York Castle, with Clifford's Tower, near the river, is on the site of a castle built by William the Conqueror in 1068 The ancient city is enclosed by walls dating in part from Norman times, but mainly of the 14th cent Four of the gates, including Micklegate and Monk Bar, remain Other features of York include the Roman Multangular Tower, the medieval guildhall, St William's College (1453), and the palace of the archbishops of York The York Plays, the most extensive cycle of English MIRACLE PLAYS which has survived, reached their height in the 15th cent The Council of the North was established in York in 1537 after the suppression of the Pilgrimage of Grace, and the city was taken by the parliamentarians after the battle of Marston Moor in 1644 The city manufactures chocolate, leather goods, beet sugar, glass, flour, scientific instruments, and machinery

York. 1 Rail town (pop. 1,783), W Ala, near the Miss line W of Demopolis, in a farm and lumbering area 2 Town (pop 3,283), SW Maine, NE of Kittery Its villages, chiefly resorts, include York Harbor and York Beach It was settled in 1624 as Agamenticus, was chartered by Gorges in 1641 as the "City of Gorgeana," and in 1652 was incorporated as the town of York The stone jail built in 1653 is now a historical museum, a colonial church, a garrison house, and other old buildings are preserved The early settlement suffered much in the Indian wars, being nearly destroyed in 1692 York is said to have been the site of the first sawmill (c 1624) and the first pile drawbridge (the pre-Revolutionary Sewall Bridge, rebuilt in 1933) in what is now the United States See C. E Banks, *History of York, Maine* (3 vols , 1931–35) 3 City (pop 5,383), co seat of York co , SE Nebr , in a prairie region W of Lincoln, platted 1869, inc. 1872. It is the trading center for a large farming area and manufactures brick, metal, and dairy products. York College (coeducational) is here, and a state reformatory for women is near by. 4 City (pop. 56,712), co. seat of York co., SE Pa., on Codorus

Creek (kŭdô'rŭs) and SSE of Harrisburg; laid out 1741, inc as a borough 1787, as a city 1887. In the Pennsylvania Dutch region, it is the trading and distributing center for an agricultural area. Its factories produce machinery, cement, textiles, and metal products The city has many colonial houses and churches In the Revolution, York was a meeting place (1777–78) of the Continental Congress. It was occupied by the Confederates in 1863 **5** Town (pop 3,495), co seat of York co , N S C , SW of Charlotte, N C , settled in the 1750s It is a processing center for a farm area and has textile mills The town is the winter home of a circus.

York, Cape, promontory, NW Greenland, in N Baffin Bay, W of Melville Bay The Cape York meteorites were discovered by R E Peary, who brought the largest (about 100 tons) to the Museum of Natural History, New York City In 1932 a monument to Peary was erected at Cape York

York, house of, royal house of England, dating from the creation of Edmund of Langley, fifth son of Edward III, as duke of York in 1385 The claims to the throne of Edmund's grandson, Richard, duke of York, in opposition to the incumbent sovereign, Henry VI, head of the house of LANCASTER, resulted in the Wars of the ROSES, so called later because the badge of the house of York was a white rose, and a red rose became that of the house of Lancaster. Richard's claim to the throne came not only from direct male descent from Edmund, but also through his mother Anne, daughter of Roger Mortimer, 4th earl of March, grandson of LIONEL, duke of Clarence, who was the third son of Edward III The royal members of the house of York were Edward IV, Edward V, and Richard III The marriage of the Lancastrian Henry VII to Elizabeth, eldest daughter of Edward IV, united the houses of York and Lancaster Henry was the first of the TUDOR kings

Yorke Peninsula, South Australia, between Spencer Gulf and Gulf St Vincent It is 160 mi long and 35 mi wide

Yorker Brethren · see RIVER BRETHREN

York Factory, fur-trading post, N Man , at the mouth of the Hayes on Hudson Bay and just east of the mouth of the Nelson at PORT NELSON The name was used for very early (late 17th cent) posts here, which changed hands and location somewhat during the struggle between England and France for control of the rich fur trade of the region After York Factory was destroyed (1690) to prevent its occupation by the French, it was rebuilt and became permanently British at its present location after the Peace of Utrecht (1713) The present post (built 1788–90 after destruction by the French) is a major warehouse for the Hudson's Bay Company

York Plays see MIRACLE PLAY

Yorkshire (yôrk'shĭr), **York,** or **Yorks,** county (6,081 sq mi , 1931 pop 4,389,679, 1948 estimated pop 4,539,603), N England The county town is York Largest of the English counties, it is divided into three administrative sections, or ridings East Riding (1948 estimated pop 500,100), with its administrative center at Beverley, North Riding (1948 estimated pop 495,883), with its administrative center at Northallerton, West Riding (1948 estimated pop 3,543,620), with its administrative center at Wakefield The city of York is not included in any of these divisions The county borders on the North Sea between the Humber river and estuary on the south and the Tees river on the north It extends westward almost to the Irish Sea The terrain is varied The Pennine Chain in the west rises to 2,600 ft in Mickle Fell The great fertile Yorkshire plain lies to the east The moors and the sea coast have much stern beauty The principal rivers are the Ouse, the Swale, the Nidd, the Derwent, and the Aire There are rich coal deposits in West Riding and elsewhere, and in the Cleveland district iron is mined West Riding is part of the great English industrial area that extends into neighboring Lancashire, Derbyshire, and Nottinghamshire The cities of this district, such as Sheffield, Leeds, Barnsley, and Bradford, have extensive iron and steel industries, textile mills, chemical plants, and coal mines and quarries (limestone and sandstone) Hull, on the Humber, is one of England's chief ports The county is largely engaged in stock raising and agriculture in the less industrialized areas Yorkshire figures prominently in British history. There are numerous prehistoric remains, including barrows and huge monoliths. The city of York (Eboracum) was a Roman capital in N Britain After the Roman withdrawal in the 5th cent. there were Danish and Saxon invasions and the region became a part of the kingdom of Northumbria. In the Middle Ages, Yorkshire became the center of British ecclesiastical life. In the early 16th cent. there were more than 100 abbeys, priories, nunneries, and friaries. The dissolution of these houses under Henry VIII was met with great resistance, notably in the Pilgrimage of Grace (1536), which centered around York. There are beautiful remains of the Cistercian houses of Rievaulx, Jervaulx, Fountains, Kirkstall, and Bylands, and Benedictine establishments at Whitby, Selby, and St. Mary's, York. The scholarly and religious traditions of medieval Yorkshire were handed down to such later Yorkshiremen as John Wyclif, Miles Coverdale, and Roger Ascham Literary associations extend back to Cædmon, first of the Anglo-Saxon poets Robin Hood's legendary exploits are recalled by many place names The county was the home of Laurence Sterne, and the Brontë sisters lived at the quiet village of Haworth. See *Victoria History of the County of York* (3 vols , 1907–13) and *Victoria History of North Riding* (2 vols., 1914–23)

Yoruba (yŏ'rōōbä), people of SW Nigeria, numbering some 3,800,000 They speak a Sudanic language (see LANGUAGE, table) There is little certain knowledge concerning the Yoruba before the early 18th cent , when they had established an empire in approximately their present territory In the 19th cent their domain was broken into smaller holdings under the impact of Moslem tribes, chiefly the Haussa, and large numbers of the Yoruba were converted to Islam The Yoruba, who depended primarily on agriculture rather than stock raising for their livelihood, were unusual among Negro tribes for living in rather large cities, including Lagos, Ibadan, and Abeokuta.

Yosai, Kikuchi (kēkōō'chē yōsī'), 1788–1878, Japanese painter of the conservative native school. He made masterly use of black and white.

Yosemite National Park (yōsĕ'mĭtē), 756,440 62 acres, central Calif., c 200 mi E of San Francisco; est. 1890. It lies on the western slope of the Sierra Nevada, in a region of great beauty Enclosed within the park is the famed Yosemite Valley, surrounded by cliffs and pinnacles Peaks within the park with a height above 7,000 ft include Basket Dome, Clouds Rest, Eagle Peak, El Capitan, Glacier Point, Half Dome, Liberty Cap, North Dome, Profile Cliff, Sentinel Dome, and Taft Point The park has beautiful lakes, rivers, streams, and waterfalls, the most noted of which is Yosemite, with an over-all drop of 2,425 ft Other lovely waterfalls are Ribbon (1,612 ft), Bridalveil (620 ft), Illilouette (370 ft), and Vernal (317 ft) Three groves of sequoias are within the park's limits, Mariposa, Merced, and Tuolumne There are fine growths of other trees and over 1,000 varieties of flowering plants The scenic Hetch Hetchy Valley holds the reservoir which supplies water to San Francisco See John Muir, *The Yosemite* (1912), Carl Parcher Russell, *One Hundred Years in Yosemite* (1947), Katherine A Taylor, *Yosemite Trails and Tales* (1948).

Yoshida, Shigeru (shōgā'rōō yō'shēdä), 1878–, Japanese statesman He was minister to Sweden (1928), ambassador to Italy (1930–32) and to Great Britain (1936–39), and munitions minister (1945) A member of the Shidehara cabinet and head of the Liberal party after the war, he became premier in May, 1946, when the first post-war election gave the Liberals a plurality in the diet His coalition cabinet, with Liberal and Progressive support, was generally unpopular, especially with labor, and resigned in May, 1947 After the merger of the conservative parties into a single Democratic Liberal party headed by Yoshida, he was elected premier by the diet in Oct , 1948, and collected the first single-party cabinet since the war Yoshida's party fell in Dec , 1948, but was reinstated in the ensuing general election in 1949

Yoshihito (yōshē'hētō), 1879–1926, emperor of Japan (1912–26) The son of MUTSUHITO, he succeeded to the throne in 1912, but became mentally incompetent, and his son HIROHITO was made regent in 1921

Youatt, William (yōō'ăt), 1776–1847, English veterinary surgeon He established (c 1813) a veterinary clinic, lectured on diseases of animals, founded (1828) and edited a practical magazine, the *Veterinarian*, and wrote many standard treatises, including *The Horse* (1831) and *Cattle* (1834)

Youghal (yôl) [Irish,=yew wood], urban district (pop 4,805), Co Cork, Ireland, on Youghal Bay of the Atlantic at the mouth of the Blackwater and E of Cork It is a fishing port and a seaside resort The parish church incorporates part of a collegiate church founded in 1464 There are remains of a 13th-century Dominican monastery The town was chartered by King John in 1209, ravaged by the earl of Desmond in 1579, fortified and defended by the earl of Cork in 1641, and visited by Oliver Cromwell in 1649 Sir Walter Ralegh was mayor in 1588 and 1589, according to tradition he planted the first potato in Ireland in the garden of his home, "Myrtle Grove" The town was formerly known for the fine lace made at its convent

Youghiogheny (yŏkŭgā'nē), river, c 150 mi long, rising in the Alleghenies near the W Va–Md border and flowing N and NW into Pennsylvania to join the Monongahela at McKeesport Its waters are impounded for flood control by a Federal dam near Confluence, Pa

Youmans, Edward Livingston (yōō'mŭnz), 1821–87, American scientist, b Coeymans, near Albany, N Y Although nearly blind, he spent an active and successful life in the study and popularizing of science He lectured, wrote much, planned the "International Scientific Series" (publications of the works of important scientists in several languages), and founded (1872) the *Popular Science Monthly*, a magazine which he edited until his death He wrote *Chemical Atlas* (1854) and *Hand-Book of Household Science* (1857) and edited *Correlation and Conservation of Forces* (1864)

Young, Arthur, 1741–1820, English agriculturist and author Although his own experiments in farming were usually unsuccessful, his writings hastened the progress of scientific agriculture He traveled extensively, always carefully observing the methods and conditions of farming, and wrote in quick succession many authoritative agricultural commentaries, among them three accounts of tours in England (1768–1770) and *Tour in Ireland* (1780) In 1784 he established the periodical *Annals of Agriculture* and edited it through 1808, though never financially successful, it was widely influential His *Travels during the Years 1787, 1788, 1789 and 1790* (1792–94, ed by C E Maxwell, 1929) is recognized as a classic description of France in that period He became (1793) secretary to the newly created board of agriculture, helped make a survey of England, and wrote the able *General Report on Enclosures* (1808), advocating land enclosure He was blind in his later years See his autobiography (first pub 1898, ed by M Betham Edwards), biography to 1787 by C S Haslam (1930).

Young, Arthur, 1866–1943, American cartoonist, b Stephenson co , Ill , studied art in Chicago and New York and at Julien's Academy, Paris He was better known as Art Young Noted for his lively satire and whimsical humor, he drew cartoons for

Puck and *Life* which showed imagination, wit, and technical skill His talents were always at the service of the radical movements in which he believed, and he was tried for sedition, with the editors of the old *Masses*, for his work in that paper Several series of his drawings have been published, including *Trees at Night* (1927) and his trenchant commentary on modern life, *Art Young's Inferno* (1934), showing the capitalists in possession of hell. See his *On My Way* (1928), *The Best of Art Young* with introduction by Heywood Broun, 1936).

Young, Brigham, (brĭ'gŭm), 1801–77, American leader of the Church of Jesus Christ of Latter-Day Saints, b Whitingham, Vt Brigham Young was, perhaps, the greatest molder of Mormonism, his influence having a greater effect even than that of Joseph Smith in shaping the formation of the Mormon church He was a painter and glazier in Mendon, Monroe co., N Y., when he was first attracted to the new religion He was not baptized until 1832 He led a group to the Mormon community at Kirtland, Ohio, and in 1835 he became one of the Council of Twelve (the Apostles) He did not, however, become a highly important factor in the church until the Mormons were persecuted in their new Missouri Zion He was one of the few Mormon leaders not placed under arrest, and his abilities as an organizer came to the fore He was one of the chief figures in the move to Nauvoo, Ill Sent as missionary to England, he converted many to Mormonism and started the movement that resulted in bringing many English immigrants to strengthen the new church After Joseph Smith's assassination (1844), Young was the chief factor in maintaining the unity of the church in the Council of Twelve From that time forward he was the dominant man in Mormonism He led the great migration West in 1846–47 and was the director of the settlement at Salt Lake City The Mormon state in Utah revolved about him He exercised supreme control in the cooperative theocracy, and to his genius as much as anything else was due the phenomenal growth of a prosperous community In the early years he watched with patriarchal care the most minute details of the lives of the Mormons, guarding, guiding, directing, counseling He headed the church and after the creation of the U S provisional government, he was also territorial governor and superintendent of Indian affairs He built up Salt Lake City and the surrounding Mormon communities When trouble arose between the United States and the Mormons, out of the general outcry elsewhere against the Mormon practice of polygamy and a general fear and hatred of Mormon power, he defied the American government, especially in the vain and fruitless military expedition against the Mormons called the "Utah war" or the Mormon campaign (1857–58) He lost his post as governor, but his wise statesmanship avoided a real break with the United States In his old age he was arrested on charges growing out of polygamy and a charge of murder based on the accusations of one of his henchmen But his influence continued, increased rather than diminished, until his death His name was known not only throughout the United States, but also abroad The number of his plural wives and the extent of his fortune were the objects of curiosity and idle rumor everywhere The exact number of his wives is still a matter of argument He seems to have been married in the course of his life to 27 women, though never to so many at the same time, he was survived by 17 wives Nevertheless, the malicious accusations of sensuality leveled against him by people who were ignorant of even the basic principles of Mormon doctrine were anything but justified His life was rigidly moral, his character above reproach. The most serious charge that can be brought against him is that of condoning the massacre at MOUNTAIN MEADOWS He did not instigate that crime, but it seems probable that he did protect its perpetrators, though the whole question is somewhat obscure See Susa Young Gates (his daughter) and Leah E Widtsoe, *The Life Story of Brigham Young* (1930), M R Werner, *Brigham Young* (1939), Leah Widstoe, *Brigham Young the Man of the Hour* (1947)

Young, Charles Augustus, 1834–1908, American astronomer, b Hanover, N.H., grad Dartmouth, 1853. He discovered the reversing layer of the solar atmosphere and was a pioneer in the study of the spectrum of the sun's corona. He also experimented in photographing the solar prominences in full sunlight He was professor (1857–66) of astronomy, natural philosophy, and mathematics at Western Reserve College (now Western Reserve Univ) and professor of astronomy and natural philosophy at Dartmouth (1866–77) and at Princeton (1877–1905). In 1870 he went to Spain to observe the solar eclipse, and in 1874 to China to observe the transit of Venus His works include *The Sun* (1881, rev ed, 1896), *The Elements of Astronomy* (1890, rev ed, 1919), and *Lessons in Astronomy* (1891, rev. ed, 1918).

Young, Denton T., 1867–, American baseball player, commonly known as Cy Young, b Tuscarawas co, Ohio He played with the Canton (Ohio) club of the Tri-State League before he pitched (1890–98) for the Cleveland Indians, then in the National League He later hurled for the St. Louis Cardinals (1899–1900) of the National League, the Boston Red Sox (1901–8) and the Cleveland Indians (1909–11) of the American League, and the Boston Braves (1911) of the National League. He pitched more games (about 900) and for more years (22) in the major leagues than any other pitcher. Young, known for his excellent control and his ability to outwit batters, won the most games (511) and pitched the most no-hit games (3) of all pitchers. In 1904 he pitched a perfect game—no-hit, no-run, no opposing batter reaching first base At the age of 44, Cy Young retired from active play. He was elected to the National Baseball Hall of Fame in 1937

Young, Edward, 1683–1765, English poet and dramatist A long poem, *The Last Day* (1713), was followed by *The Force of Religion; or, Vanquished Love* (1713), suggested by the execution of Lady Jane Grey Then came three tragedies, *Busiris* (1719), *The Revenge* (1721), and *The Brothers* (1728), the last of which was withdrawn from rehearsal after Young had taken holy orders in 1727. The satire *Love of Fame, or, The Universal Passion* appeared in 1725–28 He became rector of Welwyn in Hertfordshire in 1730 His masterpiece is *The Complaint, or, Night Thoughts on Life, Death, and Immortality* (1742–44, commonly known as *Night Thoughts*), a poem in blank verse which identifies Young with the so-called "graveyard school" of English poets The imagination and somber eloquence of this piece rank it with the finest of the period See H C Shelley, *The Life and Letters of Edward Young* (1914)

Young, Ella Flagg, 1845–1918, American educator, b Buffalo, N Y She was identified with the Chicago public school system for 53 years, as teacher, principal, and superintendent of schools (1909–15) From 1899 to 1905 she was professor of education at the Univ of Chicago, and from 1905 to 1909 principal of the Chicago Normal School (later Chicago Teachers College) She was a leader in woman-suffrage work, first woman president (1910–11) of the National Education Association, and author of *Ethics in the School* (1902) and *Some Types of Modern Educational Theory* (1902) See J T McManis, *Ella Flagg Young and a Half-Century of the Chicago Public Schools* (1916)

Young, Ewing, d 1841, American trader and explorer, early settler of Oregon Reputedly born in E Tennessee, he became a trader in the Southwest, going out from Taos on various trapping expeditions He went to California and back, accompanied by Kit Carson (1829–31), and returned to California in 1831 Persuaded by Hall J KELLEY to go to Oregon, he settled (1834) in the Willamette valley and was prominent among the early settlers there On bad terms with Dr John MCLOUGHLIN and also with the Methodist missionaries, he nevertheless helped much to promote American interest in the disputed Oregon area See E L Sabin, *Kit Carson Days* (1935)

Young, Geoffrey Winthrop, 1876–, English writer, an authority on mountaineering He was educated at Cambridge and later studied in Switzerland and France Before 1914 he made an impressive record of new and difficult ascents in the Alps In the First World War he commanded British ambulance units in Belgium, France, and Italy and was several times decorated Though he lost a leg, he continued mountain climbing He wrote *Mountain Craft* (1920, 7th ed, 1949) He also wrote poetry See his autobiography, *On High Hills* (1927)

Young, James, 1811–83, Scottish industrial chemist He patented (1850) a process for the destructive distillation of bituminous substances which he used in the manufacture of illuminating and lubricating oils, naphtha, and paraffin

Young, John Russell, 1840–99, American journalist, b Ireland He was brought to Pennsylvania in 1841 He started his newspaper career with the Philadelphia *Press* and was a *Press* correspondent at the beginning of the Civil War; by 1862 he was managing editor of the *Press* and by 1866 he was editor of the New York *Tribune* He was sent abroad on government missions and by the New York *Herald* in the 1870s, one of them the trip he later reported in *Around the World with General Grant* (1879) He was minister to China (1882–85) and was made Librarian of Congress in 1897. See his *Men and Memories* (1901)

Young, John Wesley, 1879–1932, American mathematician, b Columbus, Ohio, grad Ohio State Univ. (Ph B., 1899), Ph D Cornell Univ, 1904 He was professor at Dartmouth from 1911 to 1932. From 1907 to 1925 he served on the council of the American Mathematical Society and as ed tor of its *Bulletin* His published works include *Lectures on Fundamental Concepts of Algebra and Geometry* (1911) and *Plane Trigonometry* (1919) He also edited a series of mathematical texts, and with Oswald Veblen he wrote *Projective Geometry* (2 vols., 1910–18)

Young, Mahonri Mackintosh (mŭhŏn'rē), 1877–, American sculptor, painter, and etcher, b. Salt Lake City, studied at the Art Students League and at Julien's academy, Paris; grandson of Brigham Young. His statuettes of laborers, cowboys, and prize fighters and his larger works show strength and simplicity and fine workmanship. In the Metropolitan Museum are the bronzes *Stevedore* and *Man with Pick;* in the Newark (N.J.) Public Library, *A Laborer* and *The Rigger*. He made the Hopi and Apache groups for the American Museum of Natural History, New York, and the *Sea Gull Monument* for Salt Lake City, Utah.

Young, Owen D., 1874–, American lawyer and corporation official, b. Herkimer co, N.Y., grad. St Lawrence Univ., 1894, and Boston Univ law school, 1896. He lectured in Boston Univ. (1896–1903) and practiced law in Boston. He moved to New York city in 1913, became general counsel for the General Electric Company, and later served (1922–39) as chairman of the board The creation of the Radio Corp of America was chiefly the result of his efforts, and he was associated with other large corporations With Charles G Dawes he was a U.S representative at the reparations conference of 1924 As chairman of the reparations conference of 1929, he forwarded the Young Plan. See biography by Ida M Tarbell (1932)

Young, Thomas, 1773–1829, English physicist and physician He practiced in London (1799–1814) and was elected to the staff of St. George's Hospital, London, in 1811 His lectures while professor of natural philosophy (1801–3) at the Royal Institution, London, published as *A Course of Lectures on Natural Philosophy and the Mechanical Arts* (1807), introduced the modern physical concept of energy An authority on the mechanism of VISION and on optics, he stated (1807) a theory of color vision now known as the Young-Helmholtz theory, studied the structure of the eye, and described astigmatism. He is especially noted for reviving the wave theory of LIGHT as opposed to the corpuscular theory, advancing as proof a demonstration based upon the principle of interference of light, which he had earlier discovered He applied (1809) the wave theory to refraction and dispersion phenomena Young's versatility is evidenced by his contributions to the theory of tides, his participation in the deciphering of the Rosetta stone, his explanation (1804) of capillarity, and his establishment of a coefficient of elasticity, YOUNG'S MODULUS See biography by H B Williams (1930)

Younger, Cole (Thomas Coleman Younger), 1844–1916, American desperado, b Jackson co., Mo After the Civil War he joined the outlaw band of Jesse JAMES, with whom he had served as a Confederate guerrilla under William C Quantrill He became a trusted and influential member of the gang With two of his brothers, James and Robert, Cole was captured after the unsuccessful attempt to rob the bank at Northfield, Minn (1876), and all three were sentenced to life imprisonment Another brother, John, had been shot to death in 1874 Largely through the efforts of Capt Warren C Bronaugh, a Confederate veteran, who alleged that the brothers had been driven into crime by persecution of their family during the Civil War, Cole and James were paroled in 1901 Robert had died in prison in 1889 James committed suicide in 1902, but Cole Younger, completely pardoned in 1903, returned to Missouri, where he lectured, traveled with a wild West show, and worked peacefully at various jobs. See his autobiography (1903), W C Bronaugh, *The Youngers' Fight for Freedom* (1906), Robertus Love, *The Rise and Fall of Jesse James* (1926)

Young-Helmholtz theory. see VISION

Younghusband, Sir Francis Edward, 1863–1942, British explorer, b India He entered the army in 1882, and in 1887 with H E M James he explored Mongolia, traveling from Peiping to the Altai and then to Kashgar, whence they reached India by way of Yarkand and the Mustagh Pass (19,000 ft.) of the Karakoram range, which they were the first Europeans to cross Suspicious of Russian encroachments into Tibet, Lord Curzon, the Indian viceroy, sent Younghusband with a military expedition into Tibet in 1904, where he forced a treaty upon the Dalai Lama, opening Tibet to Western trade Later he surveyed the Brahmaputra and the Sutlej rivers and the upper reaches of the Indus He thrice tried and failed to scale Mt Everest. His books include *Heart of a Continent* (1898); *India and Tibet* (1912), and *Everest the Challenge* (1936).

Young Men's Christian Association (Y M.C.A.), organization having for its object the improvement of conditions and opportunities for young men Concerned primarily with their spiritual and social well-being, it also includes attention to their physical and intellectual needs The first association was launched (1844) in London by Sir George Williams among young men in business. Other associations throughout Great Britain, formed upon its example, became affiliated with it. In 1851 the movement took root in America. Following the lead of Montreal and Boston, a number of other cities soon had their own Y.M.C.A.'s and in 1854 the first convention of North American associations took place at Buffalo. At that meeting was established an international committee to serve and advise the associations in Canada and the United States, joined in an alliance under its supervision. A world conference in Paris in 1855 brought to-

gether delegates representing seven nationalities. From these beginnings has developed an organization with branches on every continent. City and rural associations differ in their activities because of the different requirements of their members, but in all of them the greatest emphasis falls on Bible study and other religious features. Libraries and reading rooms, classes, lectures, and clubs are provided as well as housing facilities and summer camps. From the time when the New York association led the way in adding physical training, that has been a prominent department of the work, particularly in cities. As early as 1858 student organizations were formed, the first in the Univ. of Michigan and the Univ. of Virginia. An intercollegiate association was started in 1877. The Student Volunteer Movement for Foreign Missions and the World's Student Christian Federation are notable outgrowths. Summer conferences, held first at Northfield, Mass., since 1886 have spread throughout the country. Special provision for work among boys, now an essential part of Y.M.C.A. endeavor, was first made in 1869 in Salem, Mass. A separate division to meet the particular needs of railroad employees started in Cleveland, Ohio, in 1872, developed into a great and useful branch and stimulated effort in other industrial fields. Associations for Negroes date from 1853, for Indians, from 1879. Thorough training for secretaries and physical directors and other association workers is furnished in colleges founded for the purpose in Springfield, Mass. (1885), and Chicago (1890), as well as in various centers where summer sessions are held. During the Civil War several branches of the association organized the U.S. Christian Commission for the welfare of soldiers in camps and hospitals. Since that time the Y.M.C.A. has taken an active part in social service in every war. In the First World War it cared for prisoners, provided recreation and guidance for the armed forces, and cooperated with the Red Cross in relief work. In the Second World War it combined with the Y.W.C.A. and other agencies to form the United Service Organizations (USO) for recreation and welfare activities. See *Yearbook* of the association; International Survey Committee, *International Survey of the Young Men's and Young Women's Christian Associations* (1932); G. S. Eddy, *A Century with Youth* (1944); G. M. Fisher, *Public Affairs and the Y.M.C.A.* (1948).

Young Plan, program for settlement of German REPARATIONS debts after the First World War. It was presented by the committee headed (1929–30) by Owen D. YOUNG. After the DAWES PLAN was put into operation (1924), it became apparent that Germany could not meet the huge annual payments, especially over an indefinite period of time. Thus the Young Plan—which set the total reparations at $26,350,000,000 to be paid over a period of 58½ years—was adopted by the Allied powers in 1930 to supersede the Dawes Plan. Designed to substitute a definite settlement under which Germany would know the exact extent of German obligations and to reduce the payments appreciably, the Young Plan divided the annual payment, set at about $473,000,000, into two elements—an unconditional part (one third of the sum) and a postponable part (the remainder). The annuities were to be raised through a transportation tax and from the budget. No sooner had the plan gone into effect than Germany felt the full impact of economic depression, and a moratorium was called for the fiscal year 1931–32. After Hitler took over Germany, he repudiated the unpaid reparations debt.

Young Pretender see STUART, CHARLES EDWARD.

Young's modulus [for Thomas Young], number representing (in pounds per square inch or dynes per square centimeter) the ratio of stress to strain for a wire or bar of a given substance. According to Hooke's law the strain is proportional to stress, and therefore the ratio of the two is a constant which is commonly used to indicate the elasticity of the substance.

Youngstown, city (pop. 167,720), co. seat of Mahoning co., NE Ohio, on the Mahoning river near the Pa. line, in an extensive coal and iron region, founded 1797. It is one of the largest iron and steel centers in the country. The exploitation of coal and iron resources began here early in the 19th cent., and after the opening of the Pennsylvania and Ohio Canal (1839), the arrival of the railroad (1853), and the establishment of steel plants in the 1890s, the city grew rapidly. It is the seat of Butler Art Institute and of Youngstown College (Y.M.C.A., coeducational, 1888).

Youngsville, borough (pop. 1,909), NW Pa., on a branch of the Allegheny river and W of Warren, settled 1795. It produces brick and furniture.

Young Turks. see OTTOMAN EMPIRE.

Young Women's Christian Association (Y.W.C.A.), organization designed to promote the welfare of women and girls by offering opportunities for their development spiritually, socially, intellectually, and physically. The movement is undenominational. In London in 1855 Lady Kinnaird brought together a group whose object was to provide homes for young women workers. In another part of England at about the same time a prayer union was founded. Joining in 1877 and including extensions of the movement in Scotland and Ireland, they took the name Young Women's Christian Association. By 1884, when a united central council was established, there were further extensions in the British colonies and on the Continent. Meanwhile in New York city a Union Prayer Club, organized in 1858 by Mrs. Marshall O. Roberts and later known as the Ladies' Christian Union, in 1860 opened a boardinghouse for young self-supporting women. Boston had a Young Women's Christian Association in 1866. At Hartford, in 1871, a conference was held at which 23 city societies of the kind met. When they organized (1875–77), they became the International Board of Women's Christian Associations. Student groups of young women in colleges of the Middle West, beginning (1873) with the one at Normal, Ill., formed state associations, in 1886 one of these joined in the International Committee (changed to the American Committee after the separation of the Canadian section in 1899). In 1906 a new national body, the Young Women's Christian Associations of the United States, was created by the affiliation of the American Committee with the International Board. National headquarters have been in New York city since 1912. In 1892 a conference representing societies in Europe, America, and other parts of the world was held in London, and in 1894 a World's Young Women's Christian Association was formed, its headquarters are now in Geneva, Switzerland. Fifty countries are related to this organization. In the United States the unit of organization is the local association in cities, towns, rural communities, and student centers. There are Y.W.C.A. buildings in all cities of appreciable size, and strong emphasis is laid on the importance of trained secretaries. The main object is the building of a better society by interpreting Christianity in terms adequate to life today. The programs of activities are broad and varied to meet the many-sided needs of all groups of women and girls. Branches have been established for Negroes, Indians, and the foreign-born. See *Directory* of the association; International Survey Committee, *International Survey of the Young Men's and Young Women's Christian Associations* (1932); M. S. Sims, *The Natural History of a Social Institution* (1936).

Youngwood, industrial borough (pop. 2,546), SW Pa., 30 mi. SE of Pittsburgh, inc. 1902. It has a scientific-instruments factory and railroad shops.

youth-and-old-age see ZINNIA.

youth movement, name given to organized efforts on the part of young people, especially after the First World War, to promote certain ideals and purposes in which they felt their interests as a group to be particularly involved. The term is also applied loosely to the activities of groups organized for youth, rather than by youth, for the purpose of furthering traditional religious and cultural ideals, as well as the activities of public agencies such as the Civilian Conservation Corps and the National Youth Administration. Before 1914 millions of young people were members of such youth-serving organizations as the Young Men's Christian Association, the Young Women's Christian Association, the Boy Scouts, the Girl Scouts, and the Camp Fire Girls. Among the few groups before the 1920s which were initiated and led by young people, usually by students in the colleges and universities, was the Intercollegiate Socialist Society, founded in 1905 by Jack London and Upton Sinclair, to "promote an intelligent interest in the study of socialism." The background of these groups was the disturbing economic and social changes, produced by changes in technology, which increased in scope after the turn of the century. After the First World War the distrust and questioning of the ideas of the older generation were intensified by the disorganization of civilized life consequent on the war. The disillusionment was especially great among the young men in the defeated countries. An expression of the new outlook was the work camps set up in European devastated areas, there the European university students spent their vacations in hard physical labor, rebuilding houses and roads and constructing recreation centers in impoverished communities. Many American students joined these camps, others raised funds and set up depots for supplies and relief stations in Central Europe. European students were "adopted" or aided to emigrate. These activities were organized in the International Student Service, of which the National Student Federation of America, organized in 1925, became the American branch, after the advent of Hitler it aided student political refugees to escape from Germany. A perennial interest of college youth groups was peace and disarmament, but none of the problems that engaged the attention of adults was foreign to them. With the deepening of the depression in the 1930s, unemployment became a major concern of all the youth groups. After the Conference of Students and Politics at Washington, D.C., in 1933 a large number of idealistic liberal and radical groups was formed, among which the more important were the American Student Union, the United Student Peace Congress, and the United Christian Youth Movement. The Student Union, a left-wing group, initiated the student "strike" as a technique for expressing opposition to war. The Peace Committee, a federation of practically all the youth groups, stood for the elimination of compulsory military drill in the colleges and for American neutrality in international affairs and maintained the right of individual youth to refuse military service in time of war. The Youth Congress began as a federation of religious youth groups, labor unions, and student societies and called for betterment of economic conditions for American youth through support of the trade-union movement and social legislation. To get rid of war, class hatred, unemployment, and lack of opportunity for youth, the United Christian Youth Movement, which is estimated to have reached 10,000,000 young people, proposed to "build a world of brotherhood, where God-given resources are used to serve all mankind." Like the adult organizations of the period, the youth groups were torn by internal divisions, the deepest being between Communists on the one hand and Socialists and liberals on the other, but all opinions were represented and tolerated. As the youth movement progressed, the old youth-serving organizations broadened their programs to permit initiative and choice of interests on the part of their youth members. A youth-serving movement of a new kind was the so-called youth hostel movement, developed to enable young people with much leisure and meager funds to tour scenic parts of various countries on foot or by bicycle, hostels or hotels being established at convenient intervals, where they could obtain inexpensive lodging and food at the end of each day. In some cities such as Toledo, Ohio, local youth movements effected political reforms. Measures proposed by youth groups were embodied by Congress in the act creating the Civilian Conservation Corps, designed to give employment and vocational training to underprivileged young men. The American youth movement never succumbed to the idea of using violent means to attain its ends. In Europe the work camps of the post-war period developed into a national labor service, which in Germany was made compulsory. In their 19th year German youth were required to devote eight months to tasks set by the state, eventually they were indoctrinated with totalitarian ideals and became a mainstay of the Nazi government. After the Second World War much youth interest was centered in such international activities as that represented by the World Conference of Christian Youth at Oslo in 1948 and the World Assembly of Youth in London in 1949. See Randolph S. Bourne, *Youth and Life* (1913); Miriam Van Waters, *Youth in Conflict* (1926); P. R. Hanna, ed., *Youth Serves the Community* (1936); Russell Sage Foundation, *Youth Movements Here and Abroad* (1936).

Ypres, John Denton Pinkstone French, 1st earl of see FRENCH, JOHN DENTON PINKSTONE, 1ST EARL OF YPRES.

Ypres (ē'prŭ), Flemish *Ieper* (ē'pur), town (pop. 16,448), West Flanders prov., NW Belgium. Now a relatively unimportant textile center and agricultural market, Ypres was, during the Middle Ages, one of the most powerful cities of Flanders, rivaling Ghent and Bruges. Like its rivals, it throve on its great cloth industry, but it was handicapped by the lack of a maritime outlet of its own. Its decline became marked in the 16th cent. Proximity to the French frontier has exposed Ypres to the ravages of war for many centuries. It was (1914–18) the center of one of the most hotly contested theaters of the First World War. Here in the first battle of Ypres (Oct.–Nov., 1914) the British and Belgians stopped the German thrust toward the Channel ports of Dunkirk and Calais along a line running just east and south of the city. In the second battle of Ypres (April–May, 1915), a planned Allied offensive was halted when the Germans used poison gas for the first time in the war. In the third battle (July–Nov., 1917) the British under Haig sacrificed some 400,000 men to push their line 5 mi. to the east, a Pyrrhic victory of the first order, this was also known as the battle of Passchendale. In April, 1918, the Germans struck against Ypres from the south but failed to take the town, and in early Oct., 1918, the British began their victorious eastward advance, which ended only with the armistice of Nov. 11. Ypres was thoroughly devastated in the war, but it was rebuilt. Among the restored buildings are the Gothic cathedral and the magnificent cloth hall (both originally built in the 13th cent.). On the ramparts of the fortifications built (1689) by Vauban, a British memorial gate, designed by Sir Reginald Blomfield, was erected. Outside the city walls there are some 40 military cemeteries.

Ypsilanti (ĭpsĭlăn'tē), prominent Greek family of PHANARIOTS. An early distinguished member, **Alexander Ypsilanti,** c. 1725–1807, was dragoman of the Sublime Porte and hospodar (governor) of Walachia (1774–77, 1796–98) and of Moldavia (1787). Captured (1790) by the Austrians in the Russo-Turkish War of 1787–92, he was imprisoned for two years in the Spielberg at Brno (Brünn). He was executed by the sultan for an alleged conspiracy. His son, **Constantine Ypsilanti,** 1760–1816,

became hospodar of Moldavia in 1799 and of Walachia in 1802 He was deposed in 1806 for his pro-Russian sympathies, but he was restored (1807) to the government of Walachia by the Russians, who had occupied that principality in their war with Turkey Constantine Ypsilanti encouraged the anti-Turkish rebellion in Serbia and was raising an army to free Greece when the Treaty of Tilsit (1807) between Russia and France cut short his plans He took refuge in Russia, where he died His elder son, **Alexander Ypsilanti**, 1792–1828, accompanied his father into exile and became a general in the Russian army He headed the secret organization, Hetairia Philike, which sought Greek independence With strong Russian support, he raised (1821) a revolt at Jassy, the capital of Moldavia, and proclaimed the independence of Greece The Phanariot hospodar of Moldavia and the Greeks in the two Danubian Principalities rallied to him, but the Rumanian population, which had suffered long enough under Phanariot rule, rose against the Greeks Russia, on the pressure of Metternich, disavowed Ypsilanti, who was disastrously defeated by the Turks He sought asylum in Austria, but was imprisoned there until 1827 He died at Vienna Ypsilanti's uprising marked the end of the rule of the Danubian Principalities by Greek hospodars, who were replaced by native Rumanian princes At the same time it helped in the success of the simultaneous Greek rebellion in the Peloponnesus by diverting the Turkish forces, and it thus marked the beginning of the Greek War of Independence Alexander's younger brother, **Demetrios Ypsilanti**, 1793–1832, was to play a prominent role in that war Like his brother, he had served in the Russian army, and he took part in Alexander Ypsilanti's uprising at Jassy In the same year he left Moldavia for Morea, as the Peloponnesus was then called, and helped the insurgent Greeks in the capture (1821) of Tripolis (then called Tripolitza), the chief Turkish fortress in Morea He stubbornly resisted the forces of Ibrahim Pasha in 1825 and in 1828 was made commander of the Greek forces in E Greece His differences with the Greek president, Capo d'Istria, led to his resignation in 1830

Ypsilanti (ĭpsĭlăn'tē), city (pop 12,121), SE Mich., on the Huron river and E of Ann Arbor, settled 1823, inc as a village 1832, as a city 1858 Indian trails crossed this site, an Indian village and a French trading post (1809–c 1819) were here It is a residential, commercial, farm trade, and industrial center, manufacturing stoves, automobile parts, paper, and other products A state normal school and Cleary College are here

Yreka (wĭrē'kŭ) or **Yreka City**, town (pop 2,485), co seat of Siskiyou co., N Calif., inc 1857 It boomed as a mining camp after the discovery of gold (1851) at Yreka Flat Some mining is still carried on The area has dairy, stock, and grain farms

Ys or Is (both ēs), in Breton legend, a city drowned in the Baie des Trépassés, off the southern cape of Finistère Its fate was a punishment for its wickedness There are similar stories told in many countries The story was used by the composer Lalo for his opera *Le Roi d'Ys* (1888)

Ysaye, Eugène (ûzhĕn' ēzaē'), 1858-1931, Belgian violinist, one of the greatest violinists of his time, pupil of Wieniawski and Vieuxtemps He became professor of music at the Brussels Conservatoire in 1886 In 1894 he made his American debut, and in 1895 he founded the Société des Concerts Ysaye, which he also conducted He was conductor (1918–20) of the Cincinnati Symphony Orchestra In his memory a contest, the Concours International Eugène Ysaye, was established in 1937 by Queen Elisabeth of Belgium See biography by Antoine Ysaye and Bertram Ratcliffe (1947)

Yser (ēzĕr'), river, 48 mi long, N France and NW Belgium, in Flanders It rises NE of Saint-Omer and flows generally NE into the North Sea at Nieuport, connecting a network of canals It was the scene of desperate fighting in the First World War, when the German drive toward Calais was stopped here (late 1914) by the Allies The small section of Belgium W of the Yser remained in Allied hands throughout the First World War

Yseult (ēsōlt'), name of two characters in Arthurian legend see TRISTRAM AND ISOLDE

Ysleta (ĭslē'tŭ, ĭslā'tŭ), unincorporated town (pop c 2,000), extreme W Texas, on the Rio Grande just below El Paso The oldest settlement in Texas, it was founded near a mission established (1681 or 1682) here after the Pueblo revolt Other religious establishments were founded near by at about the same time, notably the one at Socorro and the chapel at San Elizario

Yssel, Netherlands see IJSSEL

Ystad (ü'stad), city (pop 12,343), Malmohus co, S Sweden, a Baltic port Known to the Hanse merchants for the near-by herring fisheries, it flourished in the Middle Ages. Medieval architecture is well preserved. There are iron foundries, steel mills, and milk condenseries.

Ystradyfodwg, Wales. see RHONDDA.

ytterbium (ĭtûr'bēum), rare chemical element, a metal of the RARE EARTHS (symbol=Yb; for physical constants, see ELEMENT, table) present with other elements of the group in various minerals, especially gadolinite Its discovery is accredited to Marignac, who separated (1878) a substance which he called ytterbia This substance, upon investigation later (1907) by others, proved to contain another element (lutetium) in addition to that now known as ytterbium The element forms some colorless salts, but has no commercial value

yttrium (ĭ'trēum), rare chemical element, a metal of the RARE EARTHS (symbol=Y, for physical constants, see ELEMENT, table) In 1794 Johan Gadolin investigated the rare mineral from Ytterby, in Sweden, which was named gadolinite for him, Mosander later obtained yttrium oxide from it, and finally Wöhler obtained the impure metal as a dark gray powder with a metallic luster Yttrium is present in gadolinite, euxenite, and xenotime It has no commercial use

yüan (yüän'), dynasty of China, which ruled from 1260 to 1368 It was a division of the great empire conquered by the MONGOLS KUBLAI KHAN, who founded the dynastic line, swept down from N China and in 1279 accomplished the final defeat of the Sung dynasty In its early period the Yüan dynasty developed a fine postal system and an extensive network of roads and canals reaching to the distant Mongol domains of Turkistan, Persia, and S Russia There was continuous overland contact with the West and exchange of products, and in this period gunpowder and printing seem to have been introduced to Europe from China Of the occasional European travelers attracted to the Yüan country and its great capital at Cambuluc (now Peiping) the best known is Marco POLO From the early years of occupation some Chinese administrators were used by the Yüan rulers, but their influence never became dominant The traditional Confucian ideals of Chinese government were also discouraged by the suspension (until 1315) of the system of civil service examinations Since scholarship was unremunerative its place was partly taken by much writing of novels and plays The Yüan dynasty, without the support of either the Chinese masses or the literati, speedily collapsed under the impact of revolts in Mongolia and in S China The native Ming dynasty followed

Yuan or **Yüan** (both yüän'), river, Hunan prov, China, flowing c 500 mi to Tungting lake The name also appears as Yuen

Yüan Shih-kai (yüän'shē'-kī'), 1859–1916, president of China (1912–16) From 1880 to 1885 he was the Chinese resident in Korea, then an imperial dependency He supported the dowager empress, Tz'u Hsi, against the Emperor, Kuang Hsü, and she rewarded him with the highest imperial honor, the vicegerency of Chihli (now Hopeh) Yuan was entrusted with defending the empire against the revolution of 1911, but on his advice the abdication of Emperor Hsüan T'ung (Henry Pu Yi) was procured on Feb 12, 1912 A few days later, SUN YAT-SEN, who had been elected the first president of China two months before, resigned in Yüan's favor Opposition to Yüan's dictatorial methods soon developed, and he had to suppress several revolts In 1914 he dissolved the parliament and in 1915 he declared himself emperor on the basis of an allegedly rigged plebiscite, but he died before the often-postponed ceremony of enthronement, and the republic was restored

Yuba City (yōō'bŭ), town (pop 4,968), co seat of Sutter co, N central Calif, N of Sacramento and on the Feather river, in the fertile Sacramento valley, laid out 1849, inc 1878 Like Marysville, on the opposite side of the Feather, the town boomed during the gold rush Today it is a processing center for the fruits (especially peaches), vegetables, and dairy products of the area

Yucatan (yōōkŭtän'), Span *Yucatán* (yōōkätän'), peninsula, area c 70,000 sq mi, mostly in SE Mexico, separating the Caribbean from the Gulf of Mexico It comprises the states of Yucatan and CAMPECHE, the territory of QUINTANA ROO, BRITISH HONDURAS, and part of PETÉN, Guatemala The peninsula is almost entirely a low, flat, limestone tableland, rising to c 500 ft in the interior drainage basin of Petén To the north and west the plain continues as the Campeche Bank, stretching under shallow water c 150 mi from the low, sandy shoreline The northern part of the eastern coast of the peninsula rises in low cliffs, and the southern is indented by bays and paralleled by islands and cays Short, transverse ranges of hills cross the peninsula at scattered intervals The only rivers are those flowing E and NW from Petén In the northern half of the tableland, where rainfall is light and absorbed by the porous limestone, water for the inhabitants, who are predominantly Maya, and for livestock comes from underground rivers and wells (*cenotes*) and surface pools (*aguadas*) Cold winds blow from the north in winter, and the land has the tropical dry and rainy seasons, but generally in the north the climate is hot and dry and in the south hot and humid Most of the northern half, though covered with only a few inches of subsoil, is one of the most important henequen-raising regions of the world (see SISAL HEMP), the uncultivated area is under a dense growth of scrub, cactus, sapote wood, and mangrove thickets. Maize, sugar cane, tobacco, cotton, and coffee are also grown. Magnificent forests of mahogany, vanilla, logwood, and dyewood are in SW Campeche, Petén, and British Honduras, and this area teams with tropical life, including the jaguar, the armadillo, the iguana, and the Yucatan turkey Centuries before the Spanish came, Yucatan was the seat of a great civilization (see MAYA). Probably the first white men to arrive were the survivors of a Spanish caravel that foundered off Jamaica in 1511 All died except two—Gonsalo de Guerrero, who joined the Maya, and Gerónimo de Aguilar, who was rescued by Cortés in 1519 and became his interpreter Later (1524–25) Cortés made an epic march across the base of the peninsula to Honduras Francisco FERNÁNDEZ DE CÓRDOBA had in 1517 already skirted the coast, and in the following year Juan de GRIJALVA had explored the same coast The conquest of the Maya was begun in 1527 by Francisco de MONTEJO but was not completed until 1546, when his son, Francisco de Montejo the younger, crushed the revolt of a coalition of Mayan tribes. See Robert S Chamberlain, *The Conquest and Civilization of Yucatan, 1517–50* (1949)

Yucatan, Span *Yucatán*, state (14,868 sq mi, 1946 estimated pop 463,885), SE Mexico, occupying most of the northern part of the Yucatan peninsula It lies between Campeche and Quintana Roo It became a state when Mexico won independence (1821), but seceded from 1839 to 1843 There were severe Indian uprisings in 1847 and in 1910 The principal industry is cultivation and preparation of henequen—mostly exported to the United States Roads and rail lines connect many of the larger towns with the capital, MÉRIDA

yucca (yŭk'ŭ), any plant of the genus *Yucca*, stiff-leaved stemless or treelike plants native to North and Central America and the West Indies In the United States they occur chiefly in the Southwest Yuccas in flower produce a large stalk of white or purplish blossoms They are pollinated by the yucca moth, and in its absence they rarely fruit a striking example of interdependence since the moth cannot reproduce without yuccas (the eggs are laid during pollination and the larvae feed upon some of the developing seeds) The leaves are usually stiff and spearlike, often with marginal threads Several species are known as Adam's-needle, particularly those that are hardy and are cultivated in the North, most common of which is *Yucca filamentosa* The Joshua tree (*Yucca brevifolia*) is a picturesque treelike species of desert regions, the Spanish bayonet (*Yucca aloifolia*) is another that is treelike in form, and the Spanish dagger (*Yucca gloriosa*) is stemless or has a short trunk The fruits and sometimes the flowers of several species of yucca were used as food by Indians Certain species are called SOAP PLANT because of the use of their roots for soap, particularly *Yucca baccata* and *glauca* The fibers of some kinds have been utilized The wood of several of the arborescent types is light but tough and desirable for splints A yucca is the state flower of New Mexico

Yucca House National Monument see NATIONAL PARKS AND MONUMENTS (table)

Yudenich, Nikolai Nikolayevich (nyĭkulī' nyĭkulī'ûvĭch yōōdyĕ'nyĭch), 1862-1933, Russian general He served in the Russo-Japanese War and in the First World War, and after the Bolshevik Revolution of 1917 he took command of a counter-revolutionary army in the Baltic states In Oct, 1919, Yudenich led his army against Leningrad (then Petrograd), but he was driven back into Estonia He died in exile at Paris

Yuen, river, China see YUAN

Yugoslavia (yōō"gōslä'vēŭ, -slăvēŭ), Serbo-Croatian *Jugoslavija* (yōō"gōsla'vēä), federal republic (99,079 sq mi, pop 15,751,953), SE Europe, largely in the Balkan Peninsula Belgrade is the capital Yugoslavia is bounded by Italy, Trieste, and the Adriatic Sea in the west, by Austria and Hungary in the north, by Rumania and Bulgaria in the east, and by Greece and Albania in the south The constitution of 1946 created a union of six people's republics, corresponding roughly to ethnic and historic divisions, they are SERBIA (with BELGRADE and SUBOTICA as chief cities), CROATIA (with ZAGREB), SLOVENIA (with LJUBLJANA), BOSNIA AND HERCEGOVINA (with SARAJEVO), MACEDONIA (with SKOPLJE), and MONTENEGRO (with CETINJE) The Adriatic coast, known as DALMATIA, is dotted with numerous ports (notably POLA, FIUME, ZARA, SIBENIK, SPLIT, and DUBROVNIK), and there are many islands (e g, CHERSO, KRK, BRAC, HVAR, and KORCULA) About four fifths of Yugoslavia is mountainous, with an average altitude of 1,500–2,000 ft The chief mountain chain, the DINARIC ALPS, runs parallel to the Adriatic coast In the northwest, the Julian Alps culminate at 9,394 ft in the TRIGLAV Yugoslavia is traversed, in the northeast, by the Danube, and its main rivers—the Drave, the Save, the Morava, the Timok, and the Theiss—are Danubian tributaries Despite recent attempts to speed industrialization, Yugoslavia remains predominantly an agricultural country. Besides corn, wheat, hemp, flax, and cotton, it raises important fruit crops and has extensive vineyards. Livestock raising, especially of

sheep, is a vital part of Yugoslav economy Yugoslavia is rich in mineral deposits, notably coal, copper, iron, mercury, lead, zinc, and bauxite There are many mineral spas and well-known resorts, such as Bled and Abbazia The Yugoslav [i e , South Slav] people consists of four groups—Serbs (43 percent), Croats (34 percent), Slovenes (7 percent), and Macedonians (7 percent), the remainder being chiefly nationals of neighboring countries Linguistically, the four groups are very closely related, but historic and cultural factors have kept them separate and account for tensions and rivalries The Croats and Slovenes, long associated with Hungary and with Austria, use the Roman rather than the Cyrillic alphabet and constitute the vast majority of the Roman Catholics in Yugoslavia (37 percent of the total population in 1931) The rest of the Yugoslavs mostly belong to the Orthodox Eastern Church (49 percent in 1931) and to Islam (11 percent in 1931), the majority of the Moslems live in Bosnia and Hercegovina Church and state are separated Higher education is centered at the universities of Belgrade, Zagreb, and Ljubljana The Yugoslav state came into existence as a result of the First World War (The earlier histories of its six component republics are treated separately, under their respective names) In 1914 only Serbia (which then included the Yugoslav part of Macedonia) and Montenegro were independent states, Croatia, Slovenia, and Bosnia and Hercegovina belonged to the AUSTRO-HUNGARIAN MONARCHY The movement for unification (see PAN-SLAVISM) was led by Serbia and was the direct occasion for the outbreak of the First WORLD WAR In 1915 Serbia and Montenegro were overrun by the Central Powers, but the Serbian troops eventually were evacuated to Allied-held Corfu Here, on Corfu, representatives of the South Slavic peoples proclaimed (July, 1917) their proposed union under the Serbian king, PETER I Montenegro adhered to the union in Nov , 1918, and on Dec 4, 1918, the "Kingdom of the Serbs, Croats, and Slovenes" was formally proclaimed Its name was changed to Yugoslavia only in 1929 The Paris Peace Conference (see SAINT-GERMAIN, TREATY OF, and TRIANON, TREATY OF) recognized the new state and enlarged its territory at the expense of Austria and Hungary King ALEXANDER, who had been regent from 1918 for his invalid father, ascended the throne on Peter I's death (1921) In order to protect itself against Hungarian and Bulgarian demands for treaty revisions, Yugoslavia early entered into alliances with Czechoslovakia and Rumania, the three states forming the LITTLE ENTENTE in close cooperation with France With its western neighbor, Italy, relations were strained from the first over the FIUME question Though this was settled in 1924, Italian nationalists continued to entertain hopes of appropriating part or all of Dalmatia, which had been secretly promised to Italy in 1915 as a price for its entry into the war Yugoslav nationalists, on the other hand, claimed parts of Venezia Giulia on ethnic grounds, and relations remained tense Internal problems were still more acute Late in 1920 the Serbian statesman, PASHITCH, became premier and obtained the centralized constitution of 1921 The Croats, led by RADITCH, demanded autonomous rights and refused until 1924 to take seats in the national Skuptchina [parliament] Even then the Serbian centralists refused to make an earnest compromise with the Croatian autonomists, and in 1928 Raditch was assassinated in the legislature When the Croats set up a separate parliament at Zagreb, King Alexander proclaimed (Jan , 1929) a dictatorship, dissolved the parliament, and changed (Oct , 1929) the name of the kingdom The royal dictatorship officially ended in 1931, but the new parliamentary constitution provided for an electoral procedure that insured victory for the government party Troubles with Croatian and Macedonian nationalists continued and culminated (1934) in the Alexander's assassination at Marseilles, France His son, PETER II, succeeded under the regency of Alexander's cousin, Prince Paul The Croatian problem had been eagerly exploited by Hungary and Italy, which encouraged particularist movements against the Serbian centralists Prince Paul's gradual rapprochement with the AXIS powers thus had the paradoxical effect of leading to the restoration (1939) of a more democratic government and the establishment of Croatian autonomy In March, 1941, the Yugoslav premier, Dragisha Cvetkovich, signed the adherence of Yugoslavia to the Axis, but two days later a bloodless military coup d'état ousted the regent The new government repudiated the treaty with the Axis and signed (April 5, 1941) a nonaggression pact with the USSR. On April 6, German troops, assisted by Bulgarian, Hungarian, and Italian forces invaded Yugoslavia. Striking swiftly, the Germans joined (April 10) with the Italians in Albania, a week later organized resistance was over A Croatian puppet state was proclaimed under the leadership of Ante Pavelich, chief of the Ustachi (a Croatian terrorist organization, see CROATIA) Dalmatia, Montenegro, and Slovenia were divided among Italy, Hungary, and Germany Serbian Macedonia was awarded to Bulgaria Serbia was set up as a puppet state under German control Fearful atrocities were committed by the Axis occupation forces and by the Ustachi While Peter II established a government in exile in London, many Yugoslav troops continued to resist in their mountain strongholds Most important among these were at first the *chetniks* under MIKHAILOVICH, but in 1942 the "Army of National Liberation" under the Communist TITO was organized in Bosnia In 1943 civil war broke out between the two factions, of which the second had become by far the more important The surrender (1943) of Italy enabled the partisans to make further gains Tito was supported by the USSR, and his spectacular successes, which immobilized entire German armies, won him the support of Great Britain as well King Peter was forced to transfer the military command from Mikhailovich to Tito In Sept., 1944, Russian and Allied forces made contact with Tito's army, and by late October the Germans had been expelled from Yugoslavia Tito's council of national liberation, which was the effective government of Yugoslavia, was merged (Nov , 1944) with the royal government, while the return of Peter from exile was to be determined by plebiscite In March, 1945, Tito became premier, in Nov , 1945, national elections—from which the opposition abstained—resulted in victory for the government The constituent assembly, taking the electoral result as a verdict against the monarchy, proclaimed a "Federal People's Republic " The constitution of 1945 gave wide autonomy to the six newly created republics, but the actual power remained in the hands of Tito and the Communist party, which controls the People's Front, a coalition of all legal parties The Allied peace treaty (1947) with Italy awarded Yugoslavia the eastern part of VENEZIA GIULIA, but it set up Trieste, also claimed by Yugoslavia, as a free territory (see TRIESTE, FREE TERRITORY OF) Until 1948 Marshal Tito's regime in Yugoslavia was—at least on the surface—in close harmony with the USSR and with the newly created COMINFORM, in which the Yugoslav Communist party was a leading member A vigorous program of socialization, reconstruction, and industrialization was inaugurated Opposition was crushed or intimidated The trial and condemnation (1946) of Archbishop Stepinac symbolized the government's attack on the Roman Catholic Church, like the execution (1946) of Mikhailovich, it provoked indignation in non-Communist countries Yugoslav foreign policy was aggressive and militaristic, particularly with regard to the Trieste question Yugoslavia was also accused of interfering in the Greek civil war. In the summer of 1948 the breach between the Yugoslav and Russian Communist parties came into the open The USSR and the Cominform accused Tito of being hostile to the USSR, of deviating from the Communist program, of being a militaristic and nationalist dictatorship, and of suppressing criticism by terroristic means Against these attacks, and against open efforts by the Cominform (from which Yugoslavia was expelled), to overthrow it, the Tito government stood firm, denying the charges and accusing the USSR of seeking control over Yugoslavia Relations with Russia, Hungary, Rumania, Bulgaria, and Albania became increasingly strained Yugoslavia, now virtually isolated, was forced to adopt a friendlier attitude toward the Western powers, without, however, altering its domestic policy The cessation of trade with the nations of E Europe threatened its entire industrial program, for Yugoslavia had largely relied on the USSR and on Czechoslovakia for the supply of basic capital equipment Two personal accounts of Yugoslavia are Louis Adamic, *Nation's Return* (1934), and Rebecca West, *Black Lamb and Grey Falcon* (1941) A factual survey is R J Kerner, ed , *Yugoslavia* (1949).

Yugoslav literature, writings of the South Slavs in the Serbian, Croatian, and Slovenian dialects The Serbian and Croatian spoken languages are much alike, but the Serbs use the Cyrillic alphabet, while the Croatians and Slovenians use the Roman Ecclesiastical works in Old Slavonic (see OLD SLAVONIC LITERATURE) were produced in the Middle Ages, but under Turkish and later Austrian domination Yugoslav culture was suppressed Nevertheless, although there was no written literature, a large body of oral poetry developed Except for a 16th-century flowering of learning in Dubrovnik, of which *Osman*, the Croatian epic of Ivan GUNDULIC, was the chief blossom, Yugoslav literature belongs to the modern period In Serbia it had its origin in the exhortation of Dositej Obradovic (1739-1811), "Write as you speak!" and its principal inspiration in the great folk ballad cycles composed after the defeat (1389) of the Serbians by the Turks at Kossovo Among the Croatians a literary movement known as Illyrianism (which took its name from the state envisaged after the defeat of Austria by Napoleon at Wagram in 1809) was influential in stimulating South Slav letters Among those active in the movement were the Croatian philologist Ljudevit Gai (1809-72) and the Slovene scholar Jernej Kopitar (1780-1844) Among the Serbs it was not until 1847 that a literary language based on the popular speech was finally established, largely through the efforts of the great folklorist Vuk Stefanovich KARAJICH Poetry was the form most cultivated by the early South Slav writers, and their themes were usually taken from native ballads Among these poets were the Montenegrin prince-bishop Petar Petrovic Njegos (1813-51), author of the verse drama *The Mountain Wreath* (1847, Eng tr , 1930), the Slovene poets France Preseren (1800-1872) and Fran Levstik (1831-87), and the Croatian Ivan Mazuranic (1814-90), author of the epic *The Death of Smail Aga* (1846, Eng tr , 1925) Others of the romantic school were Petar PRERADOVIC, Djura Jaksic (1832-78), Jovan Jovanovic-Zmaj (1833-1903), and Laza Kostic (1841-1910), who translated Shakspere With the rise of realism in the latter half of the 19th cent the novel came to be cultivated, often by writers who were also poets and dramatists Outstanding among these novelists were the Serbs Jakov Ignatovic (1824-88) and Josip Juraj Kunic (1850-1904), and the Croatian Evgenij Kumicic (1826-1923) At the end of the century there was a reaction against naturalism and a growing interest in the psychology of human motives and in ethical problems—a trend chiefly inspired by the Russians, especially Dostoyevsky and Leo Tolstoy Among these novelists was the Croatian Ksaver Sandor Gjalski (1854-1935), who in a series of some 20 novels depicted the whole range of contemporary Croatian life In the drama historical themes predominated, as in the works of the Croatian Ivo Vojnovic (1857-1929), many of which are available in English In Croatia later dramatists and poets broke with this cult of the historic and concerned themselves with human motives, among these were Milan Begovic (1876-) and Josip Kosor (1879-) Serbian drama was long romantic in the manner established by its founder, Jovan Sterija-Popovic (1806-56), but contemporary problems were treated in the comedies of Branislav Nusic (1864-1938), who was also a noted novelist, short-story writer, and essayist In Slovene drama realism appeared early, largely through the influence of Ibsen, whose chief disciples were Josip Stritar, Josip Vosnjak (1834-1911), and Anton Medved (1869-1919) Realistic comedy reached a high level in the dramas of Ivan Cankar (1876-1918), Slovenia's leading literary figure, whose best-known work is *Thr. Scandal in St Florian's Vale* (1908), In poetry the Yugoslavs have been much influenced by French trends, as in the case of the Parnassians Vojislav Ilic (1862-94), Aleksa Santic (1868-1924), Silvije Strahimir Kranjcevic (1865-1908), and Anton Askerc (1865-1912) Symbolist influence is apparent in the poetry of the Serbs Jovan Ducic (1874-1943) and Milan Rakic (1876-1938), of the Slovene Oton Zupancic (1878-), and the Croatian Vladimir Nazor (1876-) In the field of criticism the outstanding figures are Bogdan Popovic (1864-1945) and Jovan Skerlic (1877-1914), both Serbian Publishing houses in Novi Sad, Zagreb, and Ljubljana did much to cultivate Yugoslav letters Of paramount importance also was the influence of the Croatian prelate Juraj Strossmayer (1815-1905), a founder of the Yugoslav Academy established (1867) in Zagreb See Bela Bartok and A B Lord, ed , *Serbo-Croatian Folk Songs* (1950)

Yukawa, Hideki (hē'dĕkē yōōkä'wä), 1907-, Japanese physicist, grad Kyoto Univ , 1929, Ph D, Osaka Univ , 1938 He received the 1949 Nobel Prize in Physics for predicting the existence of the MESON In 1939 he became professor of physics at Kyoto Univ In 1948 he came to the United States, where he spent a year at the Institute for Advanced Study and was visiting professor at Columbia Univ for the academic year 1949-50.

Yukon (yōō'kŏn), territory (205,346 sq mi , with water surface 207,076 sq mi , 1941 pop 4,914, 1948 estimated pop 8,000), NW Canada The capital, Dawson, is at the confluence of the Klondike and Yukon rivers This triangular territory is bounded on the north by the Arctic Ocean, on the east by the Mackenzie dist , Northwest Territories, on the south by British Columbia, and on the west by Alaska The Rocky Mts form its eastern border The Coast Range in the west reaches the highest peak in Canada, Mt Logan (19,850 ft), in the southwest corner of the territory Although the majority of the territory is a watershed for the Yukon river and its tributaries, the northern and southeastern regions drain into the Mackenzie system Immediately south of the desolate arctic coast the country is uninhabited and generally unknown The other parts of the territory possess much natural beauty, with snow-fed lakes backed by perpetually white-capped mountains and forests and streams abounding with wildlife The climate is continental, but the long winters are tempered by low humidity and infrequent winds From June to October the day lengthens to 20 hr., the warm sun brings out a profusion of wild flowers and enables the hardier grains and vegetables to mature The few settlements—Dawson, White Horse, Selkirk, Ogilvie, and Forty mile—are situated on the river banks Transportation is largely dependent on aircraft, supplemented by the Yukon's one railroad from White Horse to Skagway

on the Pacific, by the recently constructed Alaska Highway, and by river travel during the summer months The mining of gold, silver, copper, lead, and coal is the leading industry, with fur trapping and fishing as lesser occupations The territory's brief history began with the explorations of Robert Campbell, fur trader for the Hudson's Bay Company in the 1840s Some trading posts were built, and before long prospectors began to search for treasure With the famous gold strike on the Klondike in the '90s over 30,000 adventurers pushed across the icy barriers in search of gold-lined streams, a chapter of history recorded in the writings of Robert Service and Jack London From a population of 27,219 in 1901 the numbers were reduced to 8,512 by 1911 In 1937 the territorial residents successfully opposed a plan to include the Yukon in the province of British Columbia. During the Second World War the Canol oil project, near White Horse, started by the United States in 1942, opened in 1944, and abandoned in 1945, proved a controversial political subject and gained for the Yukon over 100 mi of much-needed highway The Yukon is governed by a controller appointed by the dominion government and a popularly elected council of three members It elects one member of the dominion Parliament See M L M P Black, *My Seventy Years* (1938), W R Curtin, *Yukon Voyage* (1938), James Wickersham, *Old Yukon* (1938), Felice Fieldhouse, *Yukon Holiday* (1940); J H Bond, *From Out of the Yukon* (1948)

Yukon, city (pop 1,660), central Okla, near Oklahoma City It is an agricultural and flour-milling center

Yukon, river of Yukon and Alaska, formed by the Lewes (upper Yukon) and Pelly rivers at Fort Selkirk, Yukon From there it flows W and N to Dawson, then NW across the Alaska border to Fort Yukon, thence generally southwest until in a wide swing north it enters the Bering Sea through several channels S of Norton Sound Its chief tributaries are the White, Stewart, Klondike, Porcupine, Chandalar, Tanana, Kovukuk, and Innoko rivers It is navigable during the open season to White Horse, on the Lewes With its headstreams, the Yukon is c 2,000 mi long, one of the longest rivers in North America, draining most of Yukon and Central Alaska Much of the history, exploration, and development of the region centers around the river system Its lower reaches were explored (1836–37, 1843) by Russians, and in 1843 Robert Campbell of the Hudson's Bay Company explored the upper reaches During the Klondike gold rush (1897-98) the Yukon was a major route to the gold fields On its banks are fur-trading posts, missions, Eskimo villages, and towns with modern airports serving vast areas See Frederick Schwatka, *Along Alaska's Great River* (1898), Hudson Stuck, *Voyages on the Yukon and Its Tributaries* (1917), Charles Sheldon, *The Wilderness of the Upper Yukon* (2d ed, 1919), A T Walden, *Dog-Puncher on the Yukon* (1928), W R Curtin, *Yukon Voyage* (1938)

Yukon, Fort. see FORT YUKON, Alaska.

Yule see CHRISTMAS

Yuma (yōō'mu) **1** City (pop 5,325), co seat of Yuma co, SW Ariz, on the east bank of the Colorado near the confluence of the Gila; laid out 1854, inc. 1871. Early missions were built in the region by Fathers Eusebio Kino and F T H. Garcés, but there was no white settlement until after Fort Yuma was built (1850) on the west bank of the river to protect overlanders to California The town, with its legendary heat, was a river port and center for a gold-mining boom after 1858 It is today the center of the Yuma project, which, under the Federal reclamation service, has by the Laguna Dam (completed 1909) and the ALL-AMERICAN CANAL system turned more than 100,000 acres of hot desert land to the growing of fruits, grains, truck, and alfalfa **2** Town (pop 1,606), NE Colo, ENE of Denver, in a grain, dairy, and stock area, inc 1887

Yuma Indians, North American Indian tribe of Yuman linguistic stock They formerly lived in SW Arizona They were probably in part descended from the prehistoric peoples whose buildings in Arizona have been of much interest to archeologists The Yuma suffered much in warfare with the Maricopa, the Pima, and other tribes In 1853 the Yuma numbered some 3,000 In 1883 a reservation was created for them, but the next year they were removed to the California side of the Colorado river In 1886 the Yuma formally surrendered their lands to the United States Today they live on a reservation in California, where they number some 1,000 See A L Kroeber, *Yuman Tribes of the Lower Colorado* (1920), Leslie Spier, *Yuman Tribes of the Gila River* (1933)

Yuman (yōō'mŭn), linguistic stock of North American Indians (see LANGUAGE, table) Tribes who speak (or spoke) Yuman include the Yuma, Mohave, Maricopa, Yavapai, and Cocopa See HOKAN

Yunca (yōōng'ku) or **Yunga** (yōōng'gu), name loosely applied by the Inca and by Spanish colonial historians to Indian cultures of the Peruvian coast, notably CHIMU and NAZCA, before the Inca conquest in the 15th cent

yungas (yōōng'gas), region of lowland valleys in the eastern piedmont of the Andes, extending from the Peru-Bolivia border SE into central Bolivia They receive excessive rainfall, are generally under 3,000 ft in altitude, and are warm and humid Though isolated and very difficult of access, the yungas yet assumed economic importance in the early 20th cent as a major source of rubber and quinine before development of Far Eastern areas At present, some cocoa, coffee, and sugar are raised

Yünnan or **Yün-nan** (both yün'năn', yŭ'ōōn'năn'), province (162,342 sq mi, pop 9,157,068), SW China, bordering Burma and Indo-China The capital is Kunming The surface is mainly a high plateau very much dissected by unnavigable rivers, which flow through deep gorges, the rivers include the Kinsha (upper Yangtze), the Lantsan (Mekong), and the Salween Temperate climate and adequate rainfall during the growing season assure good harvests on what little land is sufficiently level for cultivation, wheat, rice, tea, tobacco, and fruits are grown On the steep slopes livestock is raised and timber is cut The main potential economic resource of Yünnan is its mineral wealth, it has, besides the chief copper-mining area of China, large deposits of coal, zinc, tin, and antimony. Inadequate transportation, however, keeps the province poor. The one important railroad runs from Kunming to Haiphong, Indo-China, and good motor roads are few. Many isolated localities make Yünnan an "ethnological garden" About half the people are Chinese; the rest are Tibetans and aborigines, mostly Lolos, Miaos, and Lissu.

Yünnanfu, China see KUNMING

Yurok Indians (yōō'rŏk), North American Indian tribe who in the mid-19th cent occupied NW California, particularly the region around Klamath river They were of the California cultural area but had some Pacific Northwest coast culture traits; they subsisted on salmon and acorns and had deerskin and woodpecker dances Their property laws were strong By 1855 a reservation was set aside for them They then numbered some 2,500 Today, living on a reservation in California, they number 950 The Yurok and their southern neighbors, the Wiyot, speak languages of the Ritwan linguistic stock (see ALGONQUIAN). See Thomas Waterman, *Yurok Geography* (1920)

Yuste, San Jerónimo de (sän hārō'nēmō dā yōō'stā), former monastery, c 20 mi. E of Plasencia, Cáceres prov, W Spain, in Estremadura Emperor Charles V retired here after his abdication (1556) and here died two years later

Yusuf ibn Tashufin (yōō'sōōf I'bun tāshōōfēn'), d 1106, Berber leader of the ALMORAVIDES in their invasion of Spain He became Almoravide ruler of the Berbers in Africa, continued the conquest of Morocco, took Algeria, and founded (1062) Marrakesh, which became his capital When the petty Moorish kings of Spain appealed to him for help against the Christians, he entered S Spain with the help of local kings decisively defeated (1080) ALFONSO VI of Leon and Castile Then he went back to Morocco, but returned in 1090 Turning conqueror as Tarik had done in 711, he annexed the Moorish territories of Spain, except Saragossa, to his own empire He was succeeded by his son Ali

Yuzovka, Ukraine see STALINO

Yverdon (ēvĕrdō'), Ger *Iferten* (ē'fĕrtun), town (pop 10,865) Vaud canton, Switzerland, at the south end of the Lake of Neuchâtel Its medieval castle housed Pestalozzi's school in 1806 Typewriters are manufactured

Yves (ēv) or **Ives, Saint** (īvz), 1253–1303, Breton lawyer and priest, called also St Ivo Hélory He was advocate of the bishop of Rennes and then of Tréguier In 1284 he was ordained As a parish priest he was zealous in protecting the poor and orphans and was noted for justice and kindliness He is the pastor saint of lawyers. A medieval Latin verse about him is famous

> Sanctus Ivo erat Brito,
> advocatus et non latro,
> admirandus populo.

[St Ives was a Breton, a lawyer, and not a thief, a rare wonder in the eyes of the people]

Yvetot (ēvtō'), town (pop 5,789), Seine-Inférieure dept, N France, in Normandy, NW of Rouen The lords of Yvetot held their petty seigniory in old and wore the title king from the 14th to the 16th cent Béranger's song, *Le Roi d' Yvetot*, translated by Thackeray, made the town known around the world.

Z

Z, 26th and last letter of the ALPHABET, representing the voiced correspondent of voiceless s Its original is the Greek zeta (zā'-, zē'-), which the Romans borrowed and added to their alphabet

Zaanaim (zā"unā'ĭm), same as ZAANANNIM

Zaanan (zā'u-) [Heb, =rich in herds], town, perhaps the same as ZENAN Micah 1 11

Zaanannim (zā"unān'-), unidentified landmark Joshua 19 33 Zaanaim Judges 4 11

Zaandam (zān"dăm'), municipality (pop 41,429), North Holland prov, Netherlands, 6 mi NNW of Amsterdam It is a lumber center, famous for its many windmills Peter I (Peter the Great) of Russia stayed here in 1697 to learn shipbuilding, which at the time was a flourishing industry of Zaandam

Zaavan (zā'u-), grandson of Seir the Horite Gen 36 27 Zavan 1 Chron 1 42

Zab (zăb, zāb), name applied to the Great Zab and the Little Zab, the principal tributaries of the Tigris

Zabad (zā'-) [Heb, =gift] **1, 2** Two of David's chief men 1 Chron 2 36, 11 41 They are perhaps the same, ZABUD may be also **3** Ephraimite 1 Chron 7 21 **4** See JOZACHAR **5, 6, 7** Israelites who had married foreign wives Ezra 10 27,33,43

Zabbai (zā'bī, zŭbā'ī) **1** Israelite with a foreign wife Ezra 10 28 **2** Father of BARUCH **3**

Zabbud (zā'bŭd) [Heb, =given], one who returned with Ezra from the Captivity Ezra 8.14.

Zabdi (–dī) [Heb, =my servant]. **1** David's vintager 1 Chron 27.27 **2** Grandfather of Achan. Joshua 7 1,17,18 Zimri. 1 Chron 2 6. **3** Benjamite 1 Chron 8 19 **4** Levite. Neh. 11.17. Apparently the same as ZICHRI 1.

Zabdiel (zăb'dēĕl) [Heb, =my gift is God] **1** Father of JASHOBEAM **2** Official under Nehemiah Neh 11 14

Zabrze, Upper Silesia see HINDENBURG

Zabud (zā'-) [Heb, =gift], priest under Solomon, perhaps the same as ZABAD **1** or **2** 1 Kings 4 5

Zabulon (zā'bŭlun), same as ZEBULUN

Zacatecas (sakatā'kas), state (28,125 sq mi, 1946 estimated pop 985,995), N central Mexico Lying on the central plateau, Zacatecas is a state of semi-arid plains and mountains The Sierra Madre Occidental dominates the western half, and a transverse spur (often over 10,000 ft high) of the same range, crossing the state from west to east, divides it Rainfall is light, and vegetation scanty The absence of large rivers (except the Juchipila) to support irrigation makes the state relatively unimportant agriculturally, but there are some crops —subsistence foods, tobacco, sugar cane, maguey, and guayule (for rubber) Extensive grazing lands make cattle raising a major activity, but the greatest industry is mining With gold, silver, mercury, copper, iron, zinc, lead, bismuth, antimony, and salt, Zacatecas is second only to Guanajuato in mineral wealth produced After the territory, which at first also included AGUASCALIENTES, had been opened (1530) but not colonized, it became a refuge for the Indians defeated in the MIXTÓN WAR Their depredations on NUEVA GALICIA led to an expedition in 1546 to conquer them. The discovery of silver shortly afterward caused a silver rush that all but depopulated Nueva Galicia Among the towns subsequently established were FRESNILLO and the capital, **Zacatecas** (pop. 21,846) The city, at an altitude of slightly over 8,000 ft, is in a deep ravine surrounded by arid hills It is well drained, and the temperate climate is healthful Many old colonial buildings make it attractive and picturesque, the streets generally are cobbled, narrow, tortuous, steep, and frequently broken by stone steps A distributing center for the mining country, the city also has cigar and rubber factories, and fine serapes are made there Because of its strategic location, Zacatecas was a key point in the wars and revolutions of MEXICO during the 19th cent and the first quarter of the 20th cent

Zaccai (zā'kī, sukā'ī) [Heb, =pure], family which returned from exile Ezra 2 9, Neh 7 14

Zacchaeus or **Zaccheus** (both zăkē'us) [Gr, =Heb ZACCAI], publican of Jericho short of stature, who climbed a tree to see Jesus Luke 19 1–10

Zacchur (zā'kur), Simeonite 1 Chron 4 26

Zaccur (zā'kur) [Heb, =mindful]. **1** Father of a spy sent into Canaan Num 13 4 **2** Leader of temple singers 1 Chron 25 2,10, Neh 12.35 **3** Signer of the covenant Neh 10 12 Additional mention of this name is in 1 Chron 24 27; Neh 3 2; 13 13. These passages may, in one or two cases, refer to the same person

Zachariah (zā"kurī'ū) [Heb, =ZECHARIAH] **1** Died c.749 B C., king of Israel, son and successor of Jeroboam II After ruling six months he was murdered by Shallum, who seized the throne. **2** Kings 14 29, 15.8–12. **2, 3** Same as ZECHARIAH **2** and **5**, respectively

Zacharias (zăkurī'ŭs) or **Zachary, Saint** (zā'kurē), pope (741–52) a Calabrian Greek; successor of St.

Gregory III and predecessor of Stephen II (who died before consecration) and of Stephen III An illustrious pope, he did much to strengthen the authority of the Holy See. By his personal prestige he forced Luitprand, king of the Lombards, to restore some towns he had taken from the pope He sanctioned the assumption by PEPIN THE SHORT of the Frankish crown, thus beginning the cordial relations between Pepin's house and the papacy. St Zacharv's correspondence is extant, the letters to St. Boniface confirming the ecclesiastical settlements in Germany are notable Feast March 22

Zacharias (zăk″kurĭ′us) [Gr from Heb ZECHARIAH] or **Zachary** (zăk′kurē) [Eng from Heb] **1** Priest to whom an angel appeared and foretold the birth of his son, John the Baptist Luke 1 5–80 He and Elisabeth, his wife, are saints of the Roman Catholic Church, their day being Nov 5 **2** Martyr prophet, the same as ZECHARIAH **2 3** Book of the Old Testament, often called ZECHARIAH

Zacher (zä′kur) [Heb ,=memory], Benjamite 1 Chron 8 31 Zechariah 1 Chron 9 37

Zacynthus, see ZANTE

Zadar, Yugoslavia see ZARA

Zadok (zā′dŏk) [Heb ,=just] **1** Founder of a prominent priestly family 2 Sam 8 17, 1 Kings 2 26, 1 Chron 6 8,52, 9 11, 18 16, Ezra 7 2, Neh 11 11 **2** One of David's men 1 Chron 12 28 **3** Grandfather of Jotham 2 Kings 15 33 **4** Sealer of the covenant Neh 10 21 **5** High priest 1 Chron 6 12 **6, 7** Builders of the wall Neh 3 4,29 **8** Scribe Neh 13 13 The last two may be the same

Zagan, Lower Silesia see SAGAN

Zagazig (zagăzēg′), city (pop 59,793), N Egypt, in the Nile delta It is a rail and canal junction and a cotton-ginning center Near by is the ancient ruined city of BUBASTIS

Zaghlul Pasha, Saad (sad′ zaglōōl′ pa′shā), c 1850–1927, Egyptian nationalist leader, of peasant stock He was arrested in 1882 for participating in an abortive revolt After he became a member of the bar, his great abilities were recognized and he was made minister of education (1906) and minister of justice (1910) At the end of the First World War he became the acknowledged leader of the struggle to throw off British control of Egypt He headed (1918) the WAFD delegation, which vainly sought passports to present its views in England Because of his agitation Zaghlul was deported in 1919, but in 1921 he was permitted to return He was prime minister in 1924, but the opposition of Great Britain and of the Egyptian court soon compelled him to resign He presided (1926 27) over the Egyptian parliament Zaghlul founded the Wafd party to help attain the democratic system of government in which he firmly believed

Zagorsk (zăgôrsk′), city (pop 21,564), central European RSFSR, NNE of Moscow It is a handicraft center, producing home-made toys Chartered in 1762, it was known as Sergievski Posad (or Sergievski Posad) until the Revolution of 1917 and as Sergiyev (or Sergiev) until c 1930 It is the site of the Troitsko-Sergiyevskaya Lavra, one of the most famous Russian monasteries, founded in 1340 The Lavra, now a museum, contains the Troitski Cathedral (1427), the Uspenski Cathedral (16th cent), with the tomb of Boris Godunov, and a treasure chamber with rich tapestries and many objects of liturgical art

Zagreb (zä′grĕb), Ger *Agram* (a′gram), Hung *Zágráb* (zô′grŏb), city (pop 290,417), capital of Croatia, NW Yugoslavia, on the Sava It is a cultural center, with a university (founded 1669), several professional schools and academies, and several fine museums and art galleries, and it is the seat of a Roman Catholic archbishop, an Orthodox archbishop, a Protestant bishop, and a grand rabbi Among its industries are manufactures of tobacco, paper, textiles, metal goods, and chemicals Zagreb was originally a residential suburb of the ancient Roman town of Andautonia It was made an episcopal see of the Western Church in 1093, and it was merged in the 16th cent with near-by Gradec, which had been a free royal city under the Hungarian crown since 1242 The part of Croatia in which Zagreb is situated escaped Turkish domination A fine modern city, Zagreb has its historic center in the old Kaptol district, with the Catholic cathedral (begun 1093) and the Catholic archiepiscopal palace (18th cent) The Catholic see of Zagreb was left vacant after the imprisonment (1946) of Archbishop Stepinac on the charge of treason

Zagros (zä′grŏs), mountain range, W Iran, extending from northwest to southeast in several parallel ridges It has an average elevation of c 9,000 ft , with some peaks rising to more than 13,000 ft. A wild, well-wooded region, it is intersected by deep, fertile valleys In ancient geography the mountains formed the boundary between Assyria and Media.

Zaham (zā′hăm) [Heb.,=loathing], son of Rehoboam and Abihail. 2 Chron. 11.19

Zaharias, Mildred Babe Didrikson: see DIDRIKSON, MILDRED BABE.

Zaharoff, Sir Basil (Basileios Zacharias) (zä′hŭrŏf), 1850–1936, international financier and munitions manufacturer Zaharoff, often called the Mystery Man of Europe because of the secrecy surrounding his personal and business affairs, was born of Greek parents in Anatolia, Turkey He was educated in England and, after becoming the representative of munitions manufacturers, played an important, though unofficial, role in world affairs He is generally considered the greatest armament salesman the world has known His name is best known, however, in connection with the British munitions manufacturers, Vickers-Armstrong For his services to the Allies in the First World War, Zaharoff was knighted by George V and decorated by the French government He was, however, sharply criticized and accused of fomenting warfare and exerting a baneful influence on politics by secret intrigue through his association with European statesmen, notably Lloyd George See biographies by Richard Lewinsohn (1929), Guies Davenport (1934), and Robert Neumann (1934)

Zähringen (tsā′ĭngun), noble German family Taking its name from a now ruined castle near Freiburg in Breisgau, Baden, it can be traced to the 10th cent The family held extensive fiefs in Baden and W Switzerland until 1218, when the main line died out with Duke Berthold V, one of the most powerful nobles of his time Berthold founded many towns, notably Bern, which on his death became a free imperial city Berthold's domains passed largely to the related KYBURG and HAPSBURG families A younger branch continued in N Baden It split (16th cent) into the branches of Baden-Baden and Baden-Durlach, reunited in 1771 Charles Frederick of Baden was raised to grand ducal rank in 1806 and acquired all Baden such as it existed before 1945 Grand Duke Frederick II abdicated in 1918

zaibatsu (zī′bätsōō) [Jap ,=money clique], great family trusts of modern Japan The leading *zaibatsu* are Mitsui, Mitsubishi, Sumitomo, and Yasuda They gained a position in Japanese economy with no exact parallel elsewhere After the Meiji restoration they assisted the new government financially and in return received a privileged position in the economic development of Japan Later they helped in financing strategic semi-official enterprises in Japan and abroad In 1937 four *zaibatsu* concerns controlled directly one third of all bank deposits, one third of all foreign trade, half of Japan's shipbuilding and maritime shipping, and most of the mining, metallurgy, heavy engineering, chemical, paper, brewing, sugar, canning, and other industries They maintained close relations with the major political parties After Japan's surrender in 1945 the breakup of the *zaibatsu* was announced as a major aim of the Allied occupation, and steps in this direction were inaugurated

Zaïmis, Alexander (zä′ēmēs), 1855–1936, Greek statesman The son of Thrasyboulos Zaïmis, twice premier of Greece, he entered politics as a young man and joined (1890), the cabinet of his uncle, Delyannis, as minister of justice At the conclusion of the disastrous war with Turkey, he became premier for the first time (1897–99) He was again premier in 1901-2, was high commissioner in Crete (1906-11), and was three times premier during the First World War between 1915 and 1917 He pursued a policy of "armed neutrality" in the war, did not interfere with the Allied landing at Salonica, and made way for VENIZELOS on the abdication of King Constantine, when the neutrality policy had become untenable Zaïmis headed (1926–28) a coalition cabinet and in 1929 was elected president of Greece, succeeding Paul Kondouriotis, he was reelected in 1935 His presidency was marked by the struggle between the republicans and the royalists, whose respective leaders, Venizelos and Panavoti TSALDARIS, alternated as premiers In 1935 General Kondylis, who had put down the Venizelist uprising, ousted Tsaldaris and held a plebiscite which resulted in the recall of King George II Zaïmis died in exile at Vienna Zaïmis was famous for his cautious and sometimes inscrutable ways, and he accepted changes with philosophical indifference

Zaindeh Rud see ZAYINDA RUD

Zair (zā′ĭr) [Heb ,=small], place, associated with Joram's campaign against Edom 2 Kings 8 21

Zaisan, Lake (zīsän′), fresh-water lake, area 720 sq mi , E Kazakh SSR, in the Altai Mts It is traversed by the Irtysh river

Zakopane (zakôpē′nĕ), health resort and winter sports center (pop 13,752), S Poland, at the foot of the TATRA mts It was the site (1929, 1939) of the world skiing championship competition

Zalaph (zā′lăf), father of a worker on the wall of Jerusalem Neh 3 30

Zaleucus (zulū′kus), fl c 650 B C , Greek lawgiver of Epizephyrian Locris, in Italy According to tradition, his was the earliest codification of Greek law References to Zaleucus' code, which was widely adopted in Italy, indicate that it embodied the *lex talionis* and other severe features exemplified in the later Greek code of DRACO

Zampieri, Domenico see DOMENICHINO

Zamzummims (-zŭm′-), Ammonite name for the REPHAIMS Deut 2 20

Zanardelli, Giuseppe (jōōzĕp′pā dz mardĕl′lē), 1826–1903, Italian politician As minister of justice (1881–83, 1887–91) he prepared a new penal code which was approved in 1890 and remained in force until 1931 As prime minister (1901–3) he tried to introduce social reforms and to protect the labor movement

Zancle see MESSINA, Sicily

Zane, Ebenezer, 1747–1812, American pioneer and land speculator, b near what is now Moorefield, Hardy co , W Va (then Virginia) With his brothers Silas and Jonathan, he went west in 1769 and established the settlement at Wheeling, of which he became the leader The Zanes distinguished themselves in warfare with the Indians in the American Revolution, defending Fort Henry in the Wheeling region from attacks in 1777 and 1782 It was in one of these attacks that a sister, Elizabeth Zane, is supposed to have distinguished herself by heroism under fire In 1796 Ebenezer obtained from Congress permission to blaze a trail through Ohio to Kentucky With Jonathan Zane and John McIntire (Ebenezer's son-in-law), he opened the noted Zane's Trace from Wheeling to Maysville, Ky Zane started settlement along the trace In 1799 McIntire and Jonathan Zane began the settlement of Zanesville, Ohio.

Zanella, Giacomo (jä'kōmō dzänĕl'lä), 1820–88, Italian poet and critic He was an ecclesiastic and a patriot and wrote some excellent verse, which includes "La veglia" [the vigil], a reflective poem upon religion and science; odes to Dante and upon the Suez Canal, and a number of sonnets He also translated various English and American poets His verse is polished, reflective, tinged with melancholy, and informed with a deep faith His complete poems were published in 1928 Various prose works include a history of Italian literature (1880). Zanella was for a time the tutor of Fogazzaro

Zanesville, city (pop 37,500), co seat of Muskingum co, E central Ohio, E of Columbus and on the Muskingum at its junction with the Licking, platted 1799 on a site staked out by Ebenezer Zane in 1797 The area has deposits of clay, coal, oil, gas, sand, and limestone Zanesville is a trade and industrial center and is noted for its pottery A two-year interval as state capital (1810–12, Chillicothe was capital 1803–10 and 1812–16) and location on the waterways and the National Road spurred Zanesville's growth The rivers are spanned here by a Y bridge, with three approaches, replacing similar wooden structures. The city has an art institute

Zangwill, Israel, 1864–1926, English author, b London He became a journalist and founded *Ariel*, a humorous paper Zangwill wrote *Children of the Ghetto* (1892), later dramatized and performed in England and America, and *Dreamers of the Ghetto* (1898), a series of biographical studies Other well-known works are *Merely Mary Ann* (1893) and *The Melting Pot* (1914), both dramatized A prominent territorialist leader (see ZIONISM), he wrote *The Principle of Nationalities* (1917) and *Chosen Peoples* (1918) Uneven in value, Zangwill's novels attempt to portray Jewish life with reality

Zankoff or **Zankov, Alexander** see TSANKOV.

Zankoff or **Zankov, Dragan** see TSANKOV

Zanoah (zənō'ə) **1** Town, SW Palestine Joshua 15 34, Neh 3 13, 11 30 It has been located c 15 mi W of Bethlehem **2** Town near Hebron Joshua 15 56 In 1 Chron 4 18 Jekuthiel is called the father (or founder) of Zanoah

Zante (zän'tē), Gr *Zakynthos* (zukĭn'thōs), Latin *Zacynthus*, island (157 sq mi, pop 41,165), off S Greece, in the Ionian Sea, one of the Ionian Islands It produces currants, wine, olive oil, citrus fruit, and wheat Sheep and goat raising and fishing are important occupations The town of Zante (pop 11,513) lies on the east shore and is a port and a trade center It was traditionally founded by Zacynthus, son of the Arcadian chief Dardanus The Achaeans were early colonists of the island

Zanzibar (zăn'zĭbar, zănzĭbär'), British protectorate (1,020 sq mi, pop 263,000) off the coast of Tanganyika, E Africa It comprises two islands, which are of coral origin, Zanzibar (640 sq mi, pop 148,000) and PEMBA The rainfall is moderate, and the climate is hot Tropical fruits are grown in abundance and there are light industries Zanzibar's economic mainstay is its production of cloves, it supplies the bulk of the world demand The history of Zanzibar reflects its position as a springboard to the east coast of Africa, and from ancient times it has been closely connected with India and the areas of the Persian Gulf and the Red Sea In the early Moslem era the east African littoral became the prize of contending states, and rival Arab and Persian sultanates were established in the islands Portugal gained control in 1503, and used Zanzibar as a base for territorial gains on the mainland In 1652 Oman (or Muscat) Arabs seized Zanzibar from the Portuguese After the domain of Oman weakened, the capital was transferred (1824) to Zanzibar city Great prosperity attended the change, and the Arabs pushed deep into the mainland in their quest for slaves, gold, and ivory At this period the clove was introduced and commercial treaties with European countries and with the United States were concluded After Zanzibar was declared independent of Oman (1856), a struggle for control of the islands ensued, and in 1890 they became a British protectorate Great Britain satisfied Germany's claim to them by ceding Helgoland Today the governing power is shared by the sultan of Zanzibar and the British resident The city of Zanzibar (pop 44,359), capital of the protectorate, is on Zanzibar island Its commodious harbor brought it great prosperity in the 19th cent Today it is the residence of the sultan, and it is noted for its buildings and its handicrafts See W H Ingrams, *Zanzibar Its History and Its People* (1931)

Zapata, Emiliano (āmēlya'nō sapä'tä), c 1879–1919, Mexican revolutionist, b Morelos, of almost pure Indian blood A tenant farmer, he occupied a social position between the peon and the ranchero, but he was a born leader who felt keenly the injustices suffered by his people About 1908, because of his attempt to recover village lands taken over by a rancher, he was impressed into a brief service in the army Late in 1910, as MADERO rose against Porfirio DÍAZ, Zapata took up arms with the cry of "Land and Liberty" With an army of Indians recruited from plantations and villages, he began to seize the land by force Zapata supported Madero until he thought that land reform had been abandoned, then turned and formulated his own agrarian program This program, outlined in the Plan of Ayala (Nov, 1911), called for the return of the land to the Indian In defense of his plan, Zapata held the field against successive federal governments under Madero, Victoriano HUERTA, and Venustiano CARRANZA The peasants rallied to Zapata's support, and by the end of 1911 he controlled most of Morelos, later he enlarged his power to cover Guerrero, Oaxaca, Puebla, and at times even the Federal District After the overthrow of Madero, Zapata in the South and Carranza, OBREGÓN, and VILLA in the North were the chief leaders against Huerta When Carranza seized the executive power, Zapata and Villa warred against him Zapata's forces occupied Mexico city three times in 1914–15 (once with the followers of Villa), but finally retired to Morelos, where Zapata resisted until he was treacherously killed by an emissary of Carranza To his enemies, Zapata was the apotheosis of nihilism and his movement was only large-scale banditry To the Indians, he was a savior and the hero of the revolution Though his attacks at times seemed to be mere banditry, his objective was not loot he was single in purpose His movement, *zapatismo*, was the Mexican agrarian movement in its purest and simplest form, and the agrarian movement was one of the chief aims and chief results of the revolution And as *zapatismo* became synonymous with *agrarismo*, so did it with *indianismo*, the Indian cultural movement which is the basis of nationalism in Mexico Though an illiterate commander of illiterate men, Zapata was one of the most significant figures in Mexico from 1910 to 1919 Even while he lived he became legendary, celebrated in innumerable tales and ballads His grave is revered by the Indians of S Mexico See Frank Tannenbaum, *The Mexican Agrarian Revolution* (1929) and *Peace by Revolution* (1933), Ernest Gruening, *Mexico and Its Heritage* (1928), H H Dunn, *The Crimson Jester* (1934), E N. Simpson, *The Ejido* (1937)

Zaphnath-paaneah (zăf'năth-pā"unē'ə), Egyptian name of JOSEPH

Zaphon (zā'fŏn) [Heb, =north], unidentified place, E of the Jordan Joshua 13 27

Zapolya, John see JOHN I, king of Hungary

Zapolya, John Sigismund see JOHN II, king of Hungary

Zapolya, Stephen (stē'fənvō), Hung *Zápolya István* (shtē'vän) or *Szapolyai István* (sä'pōlvoi), d 1499, palatine of Hungary (1492–99), of a noble Transylvanian family An able general of King Matthias Corvinus, he repulsed the Turks and conquered the archduchy of Austria, of which he was appointed governor in 1485 After Matthias's death he supported Uladislaus II His son became king of Hungary as John I

Zaporozhe or **Zaporozhye** (both zäpurō'zhē), city (1926 pop 55,744, 1939 pop 289,188), capital of Zaporozhe oblast, S Ukraine, on the Dnieper, opposite the island of Khortitsa It is a major industrial center, the site of the DNEPROGES dam and power station, an important rail junction, and a river port There are steel mills, coking plants, machinery plants, and aluminum and magnesium works The city consists of old Zaporozhe (called Aleksandrovsk before the Bolshevik Revolution) and of new industrial Zaporozhe, developed in the 1930s and adjoining the Dneproges installations and the port of Imeni Lenina It suffered heavily in the Second World War, when it was held (1941–43) by the Germans The island of Khortitsa, in the Dnieper, was the headquarters (called *sech*) of the **Zaporozhe Cossacks** from the 16th to the 18th cent The Zaporozhe Cossacks formed a virtually independent republic, headed by a hetman, which occupied most of the S Ukraine except the Black Sea littoral, a possession of the khans of Crimea (The word *Zaporozhe* signifies "beyond the rapids," i e, of the Dnieper river) At the time when the Cossacks established themselves here in the mid-16th cent, the territory nominally belonged to the Polish-Lithuanian kingdom, but the Polish kings allowed the Cossacks complete self-government in exchange for their defense of that border region (Ukraine means border) against the Tatars and the Turks By the end of the 16th cent, however, the Polish government and the Polish landowners sought to gain fuller control over the Cossacks The progress of serfdom and the persecution of the Orthodox Church after 1596 (when the Uniate Ruthenian Church was founded) provoked repeated rebellions among the Zaporozhe Cossacks, whose organization was equalitarian and democratic and who staunchly adhered to the Orthodox faith In 1648 began a general uprising under the hetman Bohdan CHMIELNICKI, who in 1654 persuaded the Cossacks to transfer their allegiance to the Russian tsars The resulting war ended in 1667 with the Treaty of Andrusov, by which the left bank of the Dnieper and Kiev were ceded to Russia The Russian government encroached upon the Cossacks' privileges as much as the Poles had, and rebellions continued in what was left of the Zaporozhe territory, but when Hetman MAZEPPA joined Charles XII of Sweden against Russia in the Northern War he found little support and shared in Charles's rout at Poltava (1709). Cossack independence in the Ukraine was virtually ended by Peter I at that time and was completely abolished (1775) by Catherine II, who later settled the many Zaporozhe Cossacks in the newly conquered KUBAN area

Zapotec (sä'pŭtĕk), Indian people of Mexico, primarily in S Oaxaca and on the Isthmus of Tehuantepec The Zapotec languages comprise their own linguistic family Nothing is known of the origin of the Zapotec Unlike most Indian tribes of Middle America, they had no tradition or legends of migration, but believed themselves to have been born direct from caves, rocks, trees, and jaguars The early Zapotec were a sedentary, agricultural, city-dwelling people who worshiped a pantheon of gods headed by the rain god, Cosijo, who was represented by a fertility symbol combining the earth-jaguar and sky-serpent symbols common in Mexican Indian cultures A priestly hierarchy regulated religious rites, which sometimes included human sacrifice The Zapotec worshiped their ancestors and, believing in a paradisaical underworld, stressed the cult of the dead Their great religious center was MITLA A highly developed civilization was flourishing at MONTE ALBÁN possibly more than 2,000 years ago In art, architecture, hieroglyphics, and calendar the Zapotec had a strong cultural affinity with the MAYA of the Old Empire and, particularly after c 1300, with the TOLTEC Coming from the north, the MIXTEC replaced the Zapotec at Monte Albán and then at Mitla, the Zapotec captured TEHUANTEPEC from the Zoquean and Huavean tribes of the Gulf of Tehuantepec By the middle of the 15th cent both Zapotec and Mixtec were struggling to keep the AZTEC from gaining control of the commercial routes to Chiapas and Guatemala Under their greatest king, Cosijoeza, the Zapotec withstood a long siege on the rocky mountain of Guengola, overlooking Tehuantepec, and successfully maintained political autonomy by an alliance with the Aztec until the arrival of the Spanish The Zapotecs today are mainly of two groups, those of the southern valleys in the mountains of Oaxaca and those of the southern half of the Isthmus of Tehuantepec The social fabric of Zapotec life—customs, dress, songs, and literature—though predominantly Spanish, shows a strong nationalistic pride in the Zapotec heritage, particularly in JUCHITAN

Zapotlán el Grande, Mexico see GUZMÁN

Zara or **Zarah** (both zā'rə), same as ZERAH **1**

Zara (zä'rə), Serbo-Croatian *Zadar* (zä'dar), city (pop 14,847), Croatia, NW Yugoslavia, in Dalmatia and on the Adriatic Sea It is a port and a Roman Catholic archiepiscopal see A Roman colony from the time of Augustus, it was settled by the South Slavs in the 7th cent and was conquered by Venice in 1000 Zara having been seized by the Hungarians, the doge ENRICO Dandolo of Venice persuaded the leaders of the Fourth Crusade (see CRUSADES) to reconquer the city for Venice The Crusaders took Zara in Nov, 1202, after a five-day siege and sacked the city, an act for which they were condemned by Pope Innocent III Hungary continued to dispute Zara with Venice, which obtained permanent possession of the city only in 1409 The Treaty of Campo Formio (1797) gave Zara to the Hapsburg monarchy, and from 1815 to 1918 Zara was the capital of the Austrian crownland of Dalmatia Zara passed to Italy by the Treaty of Saint-Germain (1919), was occupied (1945) by Yugoslav forces at the end of the Second World War, and was formally ceded to Yugoslavia by the Italian peace treaty of 1947 The city has several medieval churches

Zaragoza, Spain see SARAGOSSA

Zarathushtra or **Zarathustra** see ZOROASTER.

Zareah (zārē'ə), variant of ZORAH

Zared (zā'rĕd) see ZERED

Zarephath (zā'rĕfăth) or **Sarepta** (sərĕp'tə), ancient town, SW Syria, on the coast about one third of the distance from Sidon to Tyre It was never important Elijah stayed at Zarephath in the drought 1 Kings 17 8–24, Luke 4 26

Zaretan (zā'rĕtăn), **Zartanah** (–tä'–), or **Zarthan** (zär'thən) [all Heb, =cool], unlocated place in the valley of the Jordan, associated with the crossing of the Jews and with Jeroboam Variants, all probably referring to the same place, are Zereda, Zeredathah, and Zererath Joshua 3 16, Judges 7 22, 1 Kings 4 12, 7 46, 11 26; 2 Chron 4 17

Zareth-shahar (zā'rĕth-shā'här) [Heb, =brightness of the dawn], unlocated place E of the Dead Sea. Joshua 13 19

Zarhite, patronymic of the family of ZERAH **1.**

Zaria (zä'rēu), town (pop 21,953), N central Nigeria, founded 16th cent It is a rail junction serving the Bauchi tin mines

Zatec, Czech *Žatec* (zhä'tĕts), Ger. *Saaz* (säts), ancient town (pop 12,620), NW Bohemia, Czechoslovakia It is the center of the chief hop-growing region Saaz hops are reputedly the best in the world.

Zatthu (zā'thū) or **Zattu** (zā'tū), family returned from exile Ezra 2 8, 10 27, Neh. 7.13, 10.14.

Zavan (zā'–), variant of ZAAVAN.

Zawiercie (säv'yĕr'chĕ), city (pop 21,225), Silesia prov., SW Poland, on the Warta river and 24 mi NE of Katowice It manufactures chemicals, metal products, and cotton textiles Zawiercie passed to Prussia in 1795 and to the Russian Empire in 1815 It reverted to Poland in 1921

Zayas, Alfredo (älfrä'dhō sä'yäs), 1861–1934, president of Cuba (1921–25) He was one of the leaders of the Liberal party from the founding of the republic and was vice president (1909–13) under José Miguel Gómez He was defeated for the presidency in 1912 and 1916 by Mario G Menocal He and Gómez quarreled violently, and it was with Menocal's help that Zayas defeated Gómez for the presidency in 1920 The election was denounced as fraudulent, and the United States intervened to prevent civil war In the chaotic conditions following the collapse of the sugar market, Enoch J Crowder, representing the United States, restored financial order, but as soon as some balance was attained Zayas indulged in an administration that was almost universally criticized as weak, wasteful, and corrupt When he failed to get the presidential nomination in 1924 he supported Gerardo Machado.

Zayinda Rud (zīn'du rŭd') or **Zaindeh Rud** (zīn'du), river, c 300 mi long, W central Iran, flowing ESE past Isfahan to a swamp 75 mi W of Yezd

Zaza (zä'-), Jerahmeelite 1 Chron 2 33

Zea, Francisco Antonio (fransĕ'skō antō'nyō sä'a), 1770–1822, Colombian botanist and revolutionist, b Medellín He was associated with Mutis in botanical studies Zea, like Antonio Nariño, was arrested (1795) for distributing copies of *The Rights of Man* and was for a time imprisoned in Spain He returned to aid Bolívar in the liberation of South America After becoming (1819) vice president of Venezuela, he resigned and accepted the presidency of the Congress of Angostura (see Ciudad Bolívar), and was later vice president of Greater Colombia Appointed special diplomatic agent to Europe, he was not highly successful, he negotiated disadvantageous loans and gained recognition of his country only from the United States He died in Bath, England Zea wrote a history of Colombia and works on botany

Zea see Maize

Zealand (zē'lund), Dan *Sjælland* (shĕl'lan), Ger *Seeland*, island (2,709 sq mi, pop 1,482,978), Denmark, the largest of the Danish isles, between the Kattegat and the Baltic Sea It is separated from Sweden by the Oresund and from the island of Fyn by the Great Belt The Danish capital, Copenhagen, and the historic cities of Roskilde and Elsinore are on Zealand The island is generally low, rising to its maximum height at 413 ft in the northeast, and it is a fertile agricultural district Wheat growing, dairy farming, cattle breeding, and fishing are the chief occupations Its northern shore is indented by the many-branched Ise Fjord

Zealots (zĕ'luts), Jewish faction traced back to the revolt of the Maccabees Its English name is derived from its fervent veneration of the Torah and its detestation of heathens The Zealots were organized as a party during the reign (37 B C – 4 B C) of Herod the Great, whose idolatrous practices they resisted Later (A D c 6), when Cyrenius, the Roman governor of Syria, attempted to take a census, the Zealots, under Judas of Galilee, arose in revolt against what they considered a plot to subjugate the Jews Thereafter the Zealots expressed their opposition by sporadic revolts and by violence against Jews who conformed to Roman ways In time certain elements of the Pharisees joined them The Zealots disappeared from history after failure of the revolt in which Jerusalem was destroyed (A D 70) One of the apostles, St Simon, had been a Zealot In the Bible he is variously called by the Greek name Zelotes (Luke 6 15, Acts 1 13) and by the Aramaic name Canaanite or Cananaean [both Aramaic, =zealous or jealous] (Mat 10 4, Mark 3 18)

Zebadiah (zĕb"budī'u) [Heb, =gift of God] **1** Ally of David at Ziklag 1 Chron 12 7 **2** Officer of David 1 Chron 27 7 **3** Teacher of the Law 2 Chron 17 8 **4** High official of Jehoshaphat 2 Chron 19 11 Additional mention of this name is in 1 Chron 8 15,17, 26 2, Ezra 8 8, 10 20

Zebah (zē'bu), Midianite king conquered by Gideon Judges 8 1, Ps 83 11

Zebaim (zĕbā'ĭm), qualifier of the name Pochereth Ezra 2 57, Neh 7 59

Zebedee (zĕb'budē) [Gr, for Zebadiah], father of James and John His wife Salome attended Jesus Mat 4 21, 20 20, 27 56, Mark 15 40

Zebina (zĕbī'nu), Israelite who had married a foreign wife Ezra 10 43

Zeboiim (zĕbō'ĭm) or **Zeboim** (zĕbō'ĭm), one of the Cities of the Plain See Sodom

zebra [Ethiopic], African animal of the horse genus, one of the most beautiful of animals Its form is essentially that of a small horse with slender legs and small hoofs Its stripes are a striking characteristic Different species of zebra are most readily recognized by differences in the color, width, and pattern of these stripes The colors that occur are black, white, and shades of brown The zebra is a good example of protective coloration. Its stripes obscure its form and suggest the shadows of brush in sunlight or moonlight The art of camouflage in war is said to have been learned in part from the zebra Intelligent attempts to tame the zebra have been successful, but under the saddle or in harness it has not competed successfully with the horse Its hybrids with the horse and the ass have proved less useful than the mule It has been hunted for its flesh and its hides, which are used for leather and for rugs, and it is threatened with extinction, the fate of its near relative the quagga It is found in small herds in mountains and on plains

zebu (zē'bū), domestic cattle (*Bos indicus*) of parts of E Asia, India, and Africa Characteristically it has a large fatty hump (sometimes two humps) over the withers In color it is usually fawn, gray, black, or bay In India it has been used as a riding and draught animal Zebus were introduced into the United States about the middle of the 19th cent and again in the early 20th cent They are well established in the Gulf states, where they are interbred with domestic cattle to produce an animal which has greater resistance to heat and to ticks than the ordinary domestic cattle and better flesh than the zebu

Zebudah (zĕbū'du, zĕ'būdu) [Heb, =given], wife of Josiah and mother of Jehoiakim 2 Kings 23 36

Zebul (zē'bŭl) [Heb, =dwelling], governor of Shechem, supporter of Abimelech Judges 9 28–41

Zebulon (zĕb'bylun, –byōō–), town (pop 1,070), E central N C , E of Raleigh, in a tobacco area

Zebulun (zĕb'bŭlun, zĭbū'lŭn), son of Jacob and Leah, eponymous ancestor of one of the 12 tribes of Israel Its allotment was in N Palestine W of Mt Carmel Of this tribe was the judge Elon Apart from their bravery in the battle against Sisera, the Zebulunites played a minor part in Israel's history Gen 30 20, 46 14, Num 26 26, Deut 33 19,20, Joshua 19 10, Judges 5 14,18 Zabulon, Mat 4 13,15, Rev 7 8

Zechariah (zĕ"kurī'u) [Heb, =God has remembered] **1** Prophet and author of the book of Zechariah **2** Prophet who was stoned to death with the connivance of King Jehoash for his public rebuke of idolatry 2 Chron 24 15–22 In Mat 23 35 and Luke 11 51 it is apparently this martyred Zacharias (NT Zacharias) to whom Jesus referred See also Berechiah **7** **3** Prophet in the reign of Uzziah 2 Chron 26 5 **4** King the same as Zachariah **1** **5** Maternal grandfather of King Hezekiah 2 Chron 29 1 Zachariah 2 Kings 18 2 **6** Musician under David 1 Chron 15 24 **7** One of Isaiah's witnesses Isa 8 2 **8** Prince of King Jehoshaphat 1 Chron 17 7 **9** Son of Jehoshaphat 2 Chron 21 2 **10** Ruler of the Temple 2 Chron 35 8 **11** Father of Iddo **1** **12** Korahite doorkeeper 1 Chron 9 21, 26 2,14 **13** Merarite doorkeeper 1 Chron 26 11 **14** Musician under David 1 Chron 15 18,20 **15** Chief man in the Exile Ezra 8 16 **16** Father of Jahaziel **2** **17, 18** Kohathites 1 Chron 24 25, 2 Chron 34 12 **19** Reubenite 1 Chron 5 7 **20, 21** Heads of families which returned from the Exile Ezra 8 3,11 **22, 23** Asaphites 2 Chron 29 13, Neh 12 35 **24** Priest in the return Neh 12 41 **25** Grandfather of Athaiah **26** Ancestor of Asaiah **4** **27** Ancestor of Adaiah **4** **28** One who had a foreign wife Ezra 10 26 **29** Same as Zacher Zacharias, Zachariah, and Zachary are forms of the name Zechariah

Zechariah (zĕ"kurī'u) [Heb, =God remembers] or **Zacharias** (zăk"kurī'us), book of the Old Testament, 11th of the books of the Minor Prophets, dated in 519 and 517 B C at Jerusalem The prophet was associated with Haggai in a movement to restore the Temple Ezra 4–5 The book, after an introduction (1 1–6), proceeds with eight visions (1 7–6 8), prophetic of the restitution of Israel and of a Messianic kingdom, with a symbolic crowning of the high priest (6 9–15) A sermon follows (7–8) on the observance of the commandments and the rewards for so doing The rest of the book (9–14), very different in tone, consists of prophecies of trouble and eventual redemption for Jerusalem Many critics attribute the latter portion of the book to a later date For bibliography, see Old Testament

Zedad (zē'dăd), unidentified landmark on the northern boundary of Palestine Num 34 8, Ezek 47 15

Zedekiah (zĕd"dukī'u) [Heb, =justice of God] **1** Died after 586 B C , last king of Judah (c 595–586 B C) He was the third son of Josiah to occupy the throne, the others being Jehoahaz and Jehoiakim Zedekiah, whose name was originally Mattaniah, succeeded Jehoiachin, Jehoiakim's son He was set on the throne as the puppet of Nebuchadnezzar, but he allowed the patriot party to sway him into allying himself with the Egyptian Pharaoh, Apries (Hophra) This violated an agreement with Nebuchadnezzar, and the Chaldaeans came to Palestine and destroyed the kingdom of Judah Zedekiah was carried with his people into captivity in Babylonia (586 B C) Jeremiah was contemporary with Zedekiah 2 Kings 24 17–25 7, 1 Chron 3 15, 2 Chron 36 10–13, Jer 38, 39, 52 **2** False prophet of Ahab 1 Kings 22 11, 24 **3** Hebrew false prophet in Babylonia Jer 29 21,22 **4** Prince of Judah Jer 36 12

Zeeb (zē'ĕb), one of the two Midianite princes killed while invading Israel Judges 7.25, 8 3, Ps 83 11

Zeebrugge (zā'brŭ"gu), outer port of Bruges, West Flanders prov, Belgium, on the North Sea It is administratively part of the Bruges commune and is connected with Bruges by a canal 9 mi long The original port of Bruges having completely silted up, Zeebrugge was developed c 1900 It was occupied (1914) by the Germans in the First World War and was used by them as a submarine base In April, 1918, by a brilliant naval raid, the British destroyed the mole and blocked the harbor by sinking three concreted old cruisers at its mouth A similar operation was undertaken at Ostend Sir Roger J B Keyes commanded both raids

Zeeland, Paul van, see Van Zeeland, Paul.

Zeeland (zē'lund, Dutch zā'lant), province (651 sq mi, pop 258,516), SW Netherlands, bordering on Belgium (Antwerp prov) in the south and on the North Sea in the west Middelburg is the capital The province consists of a mainland strip and of several islands, grouped at the mouth of the Scheldt estuary on the North Sea Chief among the islands are Walcheren (with Middelburg and Flushing), North and South Beveland, Schouwen-Duiveland, and Tholen Much of the land is below sea level and protected by dikes Agriculture, dairying, fishing, and oyster fishing are the chief occupations Zeeland, a part of Holland from the 10th cent later became a separate county, but it continued to be ruled by the counts of Holland, and its history was largely identical with that of Holland In 1579 Zeeland joined the Union of Utrecht as one of the United Provinces of the Netherlands

Zeeland (zē'lund), city (pop 3,007), S Mich , NE of Holland in a farm area, settled 1847 by Dutch, inc as a village 1875, as a city 1907 It is the center of the baby-chick industry in this region Furniture and other products are made Paul de Kruif was born here

Zeeman, Pieter (pē'tur zā'man), 1865–1943, Dutch physicist He was professor of physics at the Univ of Amsterdam from 1900 and director of the Physical Institute, Amsterdam, from 1908 In 1896 he discovered the Zeeman effect He shared the 1902 Nobel Prize in Physics with H A Lorentz His works include *Researches in Magneto-Optics* (1913)

Zeeman effect [for Pieter Zeeman], the effect produced upon the spectrum of a beam of light as a result of its passage through a magnetic field Each spectrum line is split into two or more lines.

Zehsis, Latvia, see Cesis

Zeigler (zī'glur), city (pop 3,006), S Ill , N of Herrin, in a farm and coal area, inc 1914

Zeisberger, David (tsīs'bûrgur), 1721–1808, American Moravian missionary, b Moravia While a youth, he was indentured to an importer in Holland and later fled to London, where he met Graf von Zinzendorf who enabled him to join a Moravian colony in Georgia Zeisberger removed (c 1739) to Pennsylvania with the colony and entered on missionary service The later well-known J G E Heckewelder was his assistant After a few years Zeisberger helped ally the Iroquois with the English against French aggressions on the continent He worked effectively among the Pennsylvania Indians His mission (1772) at Schoenbrunn, Ohio (see Schoenbrunn Memorial State Park), was destroyed, and he was taken prisoner in the American Revolution, yet Zeisberger later set up other missions in Ohio and one in Canada His numerous writings include a spelling book, an Indian grammar and dictionary, and a history of the Indians

Zeiss, Carl (zīs', Ger kärl' tsīs'), 1816–88, German manufacturer of optical instruments In 1846 he founded at Jena a factory that became world famous following Zeiss's entering into a partnership (1866) with Ernst Abbe

Zeist (zīst), municipality (pop 40,207), Utrecht prov, central Netherlands, 5 mi E of Utrecht It is a residential area and has manufactures of pharmaceuticals and furniture A settlement of the Moravian Brethren was established here in 1746

Zela (zē'lu), ancient city of Pontus, NE Asia Minor Here in 47 B C Julius Caesar defeated Pharnaces, king of Pontus, recording the victory in his famous dispatch, "Veni, vidi, vici" [I came, I saw, I conquered]

Zelah (zē'lu), unidentified town, central Palestine The family tomb of Saul was here Joshua 18 28, 2 Sam 21 14

Zelaya, José Santos (hōsā' sän'tōs sälä'yä), 1853–1919, president of Nicaragua (1894–1909) Although a leader of the Liberal party, he kept power by playing the Liberal and Conservative parties against each other and established an unswerving dictatorship Although he developed railroad and steamer transportation, coffee growing, and education, he nevertheless drained his country's resources for his own profit He seized (1894) the Mosquito Coast by force, thus ending British control He fomented revolutions in neighboring countries and tried to reestablish the Central American Federation with himself as head His ambitions created intense opposition which led to the Washington Conference of 1907 and the establishment of the Central American Court of Justice The United States was very antagonistic to him, and the presence of U S cruisers helped rebel forces to overthrow and exile him.

Zelek (zē'lĕk) [Heb.,=cleft], one of David's guard. 2 Sam 23 37, 1 Chron 11.39.

Zelienople (zĕ"lēunō'pūl), borough (pop 2,117), W Pa., c 25 mi NNW of Pittsburgh, laid out c 1802, inc 1840 Clay, lumber, and metal products are made here

Zell am See (tsĕl' ăm zā'), mountain resort (pop 6,949), Salzburg, W central Austria, on the Zellersee or Zeller Lake

Zeller, Eduard (ā'dōōārt tsĕ'lur), 1814–1908, German philosopher He taught at Marburg (1849), Heidelberg (1862–72), and Berlin (1872–95) He achieved fame with the publication of his *History of Greek Philosophy* (1844–52, Eng tr in separate sections, 1868–97)—a standard textbook

Zelophehad (zēlŏf'ēhăd) [Heb.,=shadow of fear], Manassite who had no sons and whose daughters received his inheritance, thus establishing a legal precedent Num 26 33, 27 1–7, 36 2, Joshua 17 3, 1 Chron 7 15

Zelotes (zēlō'tēz) [Gr.,=zealot], name of St Simon See also Zealots

Zelzah (zĕl'zu), unlocated place, between Jerusalem and Bethlehem 1 Sam 10 2

Zemaraim (zĕ"murā'ĭm), Palestinian town and highland, probably near Jericho Joshua 18 22, 2 Chron 13 4

Zemarite (zĕ'murīt), name of a tribe, apparently connected with Assyria Gen 10 18, 1 Chron 1 16

Zemgale, Latvia see Latvia

Zemira (zĕmī'rū), descendant of Benjamin 1 Chron 7 8

zemstvo (zĕmst' vō) [Rus., from *zemlya*=land], local assembly which functioned as a body of provincial self-government in Russia from 1864 to 1917 The introduction of the zemstvo system was one of the major liberal reforms of the reign of Alexander II Each county elected representatives, who had control over education, public health, roads, and aid to agriculture and commerce The county zemstvos elected executive committees, which formed provincial assemblies, and these in turn elected an executive committee for the province A similar system was introduced (1870) for town governments Elections were held on the basis of three class groups —private landowners, peasant communes, and urban population Although under that electoral system the landowners predominated over the peasants and townspeople, the zemstvos accomplished imposing progress in the fields of education and health within the half century of their existence The zemstvo was the stronghold of the Russian liberals and constitutionalists, who after the February Revolution of 1917 democratized the elective system and sought to make the zemstvos the basis of the new regime When the Bolsheviks came to power in Nov., 1917, the functions of the zemstvo were taken over by the soviet

Zemzem see Mecca

Zenan (zē'-) [Heb.,=rich in herds], town, SW Palestine Joshua 15 37 See Zaanan

Zenas (zē'năs), Cretan lawyer and follower of Paul Titus 3 13

Zen Buddhism (bōō'dĭzm, bŭ'dĭzm), Buddhist sect which became especially strong in Japan It originated in India as the Dhyana school founded by the semilegendary Boddhidarma (fl 516–534?) It later entered China as the Ch'an school and in the 14th cent was adopted in Japan Zen differed from most schools of Buddhism in disregarding the canonical books (see Pali literature) and in emphasizing that only by self-knowledge and introspection could truth be attained At a certain point the effect of such discipline would be a sudden intuition of the ineffable principle underlying the universe In accordance with this doctrine, the monasteries of Zen monks offered no didactic instruction, but by riddles and derision they sought to awake a questing attitude in their pupils Zen, with its eschewing of metaphysical subtleties and its arduous discipline, gained great support from the dominant military class in Japan, and it was much resented by the older Buddhist sects Zen monks became prominent in government administration and in the development of a system of public schools The refinement of Japanese esthetic sensibility is in part attributable to the influence of Zen See Daisetz Suzuki, *Essays in Zen Buddhism* (3 series, 1927–34) and *Introduction to Zen Buddhism* (1936)

Zend (zĕnd), term formerly used for the language of the *Avesta* (see Zoroastrianism)

Zenger, John Peter (zĕng'ur), 1697–1746, American journalist, b Germany He emigrated to America in 1710 and was trained as a printer by William Bradford (1663–1752) Zenger began publication of the New York *Weekly Journal* in 1733 to oppose Bradford's newspaper the New York *Gazette* and the policies of Gov William Cosby Zenger's newspaper, backed by several prominent lawyers and merchants, truculently attacked the administration, and Zenger was arrested on libel charges and imprisoned In the celebrated trial that followed Zenger was defended by Andrew Hamilton, who established truth as a defense in cases of libel. The trial, which resulted in the publisher's acquittal, helped to further freedom of the press in America. See biography by Livingston Rutherford (1904).

zenith (zē'nĭth) [from Latin through Arabic], in astronomy, that point in the celestial sphere that is intersected by the plumb line at the observer's position, when it is extended upward. The zenith therefore is vertically overhead from the observer, is 90° from the celestial horizon, and is 180° from the nadir, or directly opposite to it The space measured by the angle between the zenith and any object in the heavens is called the zenith distance The geocentric zenith is the point in the celestial sphere cut by a line which passes through the center of the earth and the observer

Zenjan (zĕnjan') or **Zinjan** (zĭnjan'), city (pop 39,450), NW Iran, in the Khamseh region It is midway between Teheran and Tabriz and is connected with Teheran by a rail line destined ultimately to reach Tabriz

Zeno (zē'nō), d 491, Roman emperor of the East (474–91) He was the successor of Leo II and the son-in-law of Leo I During his reign he had to suppress several revolts and was once driven from his throne for a period of 20 months (475–76) by the usurper Basiliscus One of his first acts was to conclude a peace with the Vandal king, Gaiseric (476) He generally supported Orthodox Christianity and attempted to reconcile the Monophysites to the degrees of the Council of Chalcedon through his *Henotikon*, a compromise which only provoked fresh controversy Zeno was forced to recognize the *de facto* rule of Odoacer in Italy and to grant him the title of patrician He freed the East from the raids of the Ostrogoths by encouraging the invasion of Italy by Theodoric the Great (488) Zeno was succeeded by Anastasius I

Zeno, Apostolo (apō'stōlō dzā'nō), 1668–1750, Italian poet and critic He was the predecessor of Metastasio as court poet to Emperor Charles VI and wrote verse for opera His lyric verse was of good quality, but his chief distinction was gained as critic and biographer Among his works are biographies of Italian authors in the form of prefaces to editions of their works, a dissertation upon Italian eloquence, and a drama, *Merope* He founded the first Italian literary journal, the *Giornale dei letterati* (1710) His letters were published in Italian in 1752

Zenobia (zĭnō'bēu), d after A D 272, queen of Palmyra She was of Arab stock and was the wife of Septimius Odenathus He was murdered, probably through her contrivance, and she obtained rule of his lands in the name of her son She expanded the territories further to rule E Asia Minor, Syria, N Mesopotamia, and even Egypt Her ambition outran her prudence, and after she had dared to call her son emperor, the Romans under Aurelian marched against her, took (A D 272) Palmyra, and captured her She was brought to Rome and graced Aurelian's triumph Later she was pensioned and lived in retirement at Tibur Zenobia by her beauty and intelligence attracted much admiration and sympathy, but her name has also been a symbol of ruthless arrogance

Zeno of Citium (zē'nō, sĭ'shēum), c 336–c 264 B C, Greek philosopher, founder of Stoicism Zeno went to Athens, where he was influenced by the Cynics, whose ethics he attempted to put on a metaphysical and logical foundation He also integrated many ideas of Heraclitus, Plato, and Aristotle into his system, thus laying the groundwork for a consistent philosophy Zeno taught in the Painted Porch at Athens (Stoa Poecile), hence his school's name He put an end to his life when he was found to be incurably ill

Zeno of Elea (ē'lēu), c 490–c 430 B C, Greek philosopher of the Eleatic school He undertook to support the doctrine of Parmenides by demonstrating that motion and multiplicity are impossible The substance of his argument against multiplicity was that a whole must be composed of ultimate indivisible units, or it must be divisible ad infinitum If the whole is divisible ad infinitum, there is a contradiction involved in the assumption that an infinite number of parts can be added up to a finite total The essence of his argument against motion was that a moving body can never come to the end of a line, as it must first cover half the line, then half the remainder and so on ad infinitum The purport of these arguments was to demonstrate, through logical reasoning, the error of common-sense notions of reality According to Aristotle, Zeno was the first to employ the dialectical method There has been a renewal of interest among contemporary philosophers and mathematicians in the problems of infinity and continuity which Zeno raised

Zenta, Yugoslavia see Senta

Zephaniah (zĕf"ənī'u) [Heb.,=God guards] **1** Prophet, author of the book of Zephaniah **2** Father of Hen **3** Father of Josiah **4** Singer 1 Chron 6 36 **5** Important priest at the time of the Captivity 2 Kings 25 18, Jer 21 1, 29.25, 52 24–27.

Zephaniah (zĕf"ənī'u) [Heb.,=God guards] or **Sophonias** (sōfŏnī'ŭs), book of the Old Testament, ninth of the books of the Minor Prophets, the message of a contemporary (late 7th cent B C.) of Jeremiah and King Josiah It consists of a denunciation of Judah for idolatry and wealth, then turns to judge other nations too, it ends with a prediction of salvation and the return from captivity of a remnant of Israel. Some critics regard the last chapter, especially the last part (3 14–20) as a post-exilic addition. For bibliography, see Old Testament

Zephath (zē'făth), original name of Hormah.

Zephathah (zĕf'fŭthŭ) [Heb.,=watchtower], valley, Palestine, of unknown location 2 Chron. 14 10.

Zephi (zē'fī) or **Zepho** (-fō), duke of Edom. Gen 36.11,15; 1 Chron 1 36

Zephon (zē'fŏn) [Heb.,=a lookout], son of Gad. Num 26 15 Ziphion Gen 46 16

Zephyr (zĕ'fur), Greek personification of westerly winds He was gentle, and his mythical role was that of peacemaker

Zephyrhills, town (pop 1,252), W central Fla., NE of Tampa, in a timber area, founded c 1911 and settled by Union veterans, inc 1914

Zeppelin, Ferdinand, Graf von (zĕ'pŭlĭn, Ger fĕr'dēnänt graf' fŏn tsĕ"pulēn'), 1838–1917, German army officer and airship inventor and builder He entered the Prussian army in 1858, served as Prussian military attaché (1863), and served also in the American Civil War with the Union army, in the Seven Weeks War, and in the Franco-Prussian War In 1891 he retired with the rank of lieutenant general to devote himself to the building of motor-driven airships He invented the first rigid airship, built the first one in 1900, and in 1906 built one that had a speed of 30 mi per hour In 1908 he established at Friedrichshafen the Zeppelin Foundation for the development of airship navigation and for the manufacture of airships He made the zeppelin type of dirigible balloon

Zer (zŭr), unidentified fortified city, SW of the Sea of Gahlee Joshua 19 35

Zerah (zē'ru) [Heb.,=rising] **1** Younger of the twin sons of Judah and his daughter-in-law Tamar Num 26 20, 1 Chron 2 6, 9 6, Neh 11 24 Zarah Gen 38 30, 46 12 Zara Mat 1 3 The following patronymics are apparently derived from his name Zarhite (Num 26 13,20, Joshua 7 17, 1 Chron 27 11), Izrahite (1 Chron 27 8), Ezrahite (1 Kings 4 31 and in titles of Pss 88 and 89) **2** Duke of Edom Gen 36 13 17, 1 Chron 1 37 **3** Father of an Edomite king Gen 36 33, 1 Chron 1 44 **4** Same as Zohar **2** **5** Levite 1 Chron 6 21, 41 **6** Leader of an Ethiopian invasion of Judah defeated by King Asa, c 900 B C 2 Chron 14 He is not otherwise known in history

Zerahiah (zĕ"ruhī'u) [Heb.,=God has caused to spring forth] **1** Priestly ancestor of Ezra 1 Chron 6 6,51, Ezra 7 4 **2** Companion of Ezra in captivity Ezra 8 4

Zeravshan (zyĕrŭfshän'), river, 400 mi long, Tadzhik SSR and Uzbek SSR It rises in the E Turkestan Range, a branch of the Pamir-Alai mountain system, flows westward through an irrigated cotton-growing area, past Samarkand and Bukhara, and disappears in the desert near the Amu Darya, N of Chardzhou The **Zeravshan Mountains,** forming the southern watershed of the river, rise to 18,480 ft There are extensive coal, antimony, and wolfram deposits

Zered (zē'rĕd) or **Zared** (zā'rĕd) [both Heb.,=forest], stream, E of the Dead Sea, perhaps a southern affluent of the Arnon Num 21 12, Deut 2 13

Zereda (zĕ'rēdu, zĭrē'du), **Zeredathah** (zĕrē'duthu), and **Zererath** (zĕ'rĕrăth, zĕrē'-) see Zaretan

Zeresh (zē'-), Haman's wife Esther 5 10,14, 6 13

Zereth (zē'rĕth), descendant of Judah 1 Chron 4 7

Zeri (zē'rī), temple musician see Izri

Zermatt (tsĕrmät'), winter and summer resort, Valais canton, Switzerland Facing the Matterhorn, it is one of the most popular Alpine centers in Switzerland

zero, that one of the 10 digits which signifies nothing The symbol is 0, and its introduction into the Western place system of writing numbers, the decimal system, was the crowning achievement in the development of a number system in which calculation with large numbers was feasible Without it, modern astronomy, physics, and chemistry would be impossible The lack of such a symbol was one of the serious drawbacks of Greek mathematics The West is probably indebted to the Arabs for it, having obtained it from the Hindus, they passed it on to European mathematicians in the latter part of the Middle Ages The Mayas of Central America and probably the Babylonians also invented zero With the extension of a number system to negative as well as positive numbers, zero became the name for that position on the scale of integers between −1 and +1 It is used in this sense in speaking of zero degrees on the Fahrenheit and centigrade temperature scales Absolute zero is a term used by physicists and chemists to indicate the theoretically lowest possible temperature, i e, the temperature at which no heat whatever is present—a use reminiscent of zero as a symbol for nothing Unlike other numbers, zero has certain peculiar properties in connection with the four fundamental operations Zero added to or subtracted from any number leaves the number unchanged Any number multiplied by zero gives zero Zero multiplied by or divided by any number (other than zero) is still zero. But there is no number which is the value of a number divided by zero.

Zeromski, Stephen, Pol. *Stefan Żeromski* (stĕ'fän shĕrôm'skĕ), 1864–1925, Polish novelist and dramatist. He participated in Polish conspirational activities in Warsaw and for a time lived abroad Zeromski was an ardent fighter for intellectual freedom *Ashes* (1904, Eng tr, 1928), a novel of the Napoleonic period, and *Faithful River* (1912), a story of the uprising of 1863, are well-known novels. *My Little Quail Has Fled* (1924) is a comedy.

Zeror (zē'rôr), ancestor of Saul. 1 Sam 9 1

Zeruah (zĕrū'ä) [Heb ,=leprous], mother of Jeroboam 1 Kings 11 26

Zerubbabel (zĕrŭb'ŭb)), fl 520 B C, prince of Judah of the house of David, a governor of Jerusalem He led a company of those returning from exile after the favorable edict of Cyrus (538 B C) He was a contemporary of Haggai and Zechariah, under whose stimulating encouragement he finished the rebuilding of the Temple He was an ancestor of St Joseph Ezra 2 2, 3 2,8, Hag, 1–2, Zech 4 9, 10 Zorobabel Mat. 1 12,13, Luke 3 27. Some consider him identical with SHESHBAZZAR

Zeruiah (zĕrōō'i'ŭ) [Heb ,=tribulation of the Lord], sister of David and mother of Joab 2 Sam 2.18, 1 Chron 2 16

Zetham (zē'thăm), descendant of Gershom. 1 Chron 23 8, 26 22

Zethan (zē'thăn), descendant of Benjamin. 1 Chron 7 10

Zethar (zē'thur), chamberlain of King Ahasuerus Esther 1 10

Zetkin, Klara (klä'rä tsĕt'kēn), 1857–1933, German Communist leader A schoolteacher, she early joined the Social Democratic party and became prominent in the organization of a Socialist Women's movement She founded (1892) the Social Democratic organ, *Gleichheit*, which she edited until 1916 In 1919 she was one of the chief founders of the German Communist party Despite her many differences with the official Communist policy of Stalin, she was a Communist member of the Reichstag from 1919 until 1932, when, as the oldest member, she presided at the opening of the Reichstag During that period she spent much of her time in Russia Klara Zetkin was a profound student of Marxist thought and wrote several works on Socialism and on women's rights She was noted for her fiery eloquence Her *Reminiscences of Lenin* have been translated (1929)

Zetland, Scotland see SHETLAND

Zeus (zōōs, zūs), in Greek religion, the supreme god He was the son of the Titan Cronus, and his mother, Rhea, had him to keep his father from eating him In the battle called the Titanomachy, Zeus led the rebels in their successful revolt against Cronus He and his brothers then divided up the universe, Poseidon getting the sea, Hades the underworld, and Zeus heaven and earth Zeus ruled in the Silver Age Zeus married his sister Hera, who was by him mother of Hephaestus, Ares, and Hebe Athena is said in some legends to have sprung from his head, in others to be the daughter of Metis Metis was one of the local goddesses who became associated with Zeus in legend as he became the generally accepted supreme god Others were Themis, mother of Horae and the Fates, Dione, mother of Aphrodite, Eurynome, mother of the Graces, Mnemosyne, mother of the Muses, Maia, mother of Hermes, Demeter, mother of Persephone, and Leto, mother of Artemis and Apollo He is also the father of Ate Others of his loves were Danae, Leda, Alcmene, Semele, Thetis, and Io The name Zeus and cognates in various Indo-European languages means "sky" Being a weather-god he had the attributes of thunder and lightning, with which he exercised his authority, and rain, by means of which he made the earth fertile He wore the aegis Zeus was the father god, the symbol of power, rule, law, and enforced morals, he ruled in patriarchal majesty in his court of Mt Olympus His legends consequently are numerous and contradictory As the father and the upholder of morality he punished those who defied him, e g , Capaneus, Laocoon, and Prometheus Zeus had many children by mortal women and nymphs, including Perseus, Dardanus, and Amphion The Romans, of course, equated Zeus with their own supreme god, Jupiter or Jove, and elaborated many of the legends of Zeus-Jupiter. See A B Cook, *Zeus* (3 vols , 1914–40)

Zeuss, Johann Caspar (yō'hän käs'pär tsoos''), 1806–56, German philologist His greatness rests largely on his establishment of the basis for all Celtic inquiry in his *Grammatica celtica* (1853, in Latin). Totally neglected by the academic world, he was still teaching in a high school when he died

Zeuxis (zūk'sĭs), fl 5th cent B C., Greek painter According to tradition he settled in Ephesus, was an intimate, possibly a pupil, of Apollodorus, and aided in the development of the technique of light and shadow. As none of his paintings survive, they are known only through ancient writings. Pliny speaks of his competing with Parrhasius for realistic illusion

Zeven, Germany see KLOSTER-ZEVEN, CONVENTION OF.

Zeya (zā'ä, Rus. syä'ŭ), river, 810 mi long, RSFSR, in Far Eastern Siberia. It rises in the SE Stanovoi Range and flows south to join the Amur at Blagoveshchensk. It carries gold in its upper reaches and in its lower course flows through a rich agricultural area, the Zeya-Bureya Plain. The city of Zeya (pop over 10,000) lies on its course

Zeyer, Julius (yōō'lĭōs zā'ĕr, tsī'ur), 1841–1901, Czech poet, novelist, and dramatist After traveling widely in his youth, he settled down to a life of seclusion in a remote Bohemian village and there produced quantities of prose and verse, the themes of which were taken from various foreign literatures, ancient and modern. Two dramas, *Radúz and Mahulena* (1898) and *A Legend of Ern* (1886), appeared in English in *Poet Lore* (1923, 1938) He also wrote an autobiographical novel, *Jan Maria Ploshar* (1891)

Zgierz (zgyĕsh), town (pop 21,690), Poland, 6 mi N of Lodz It is noted for manufacture of textiles

Zhdanov, Andrei Aleksandrovich (ŭndrā' ŭlyĭksän'druvĭch zhdä'nôf), 1896–1948, Russian political leader and general He was made secretary of the Leningrad district of the Communist party in 1934 and in 1939 became a member of the Politburo He was a general in the war with Finland, and in the Second World War he commanded, with Voroshilov, the defense of Leningrad He headed (1944–47) the Soviet-British control commission for Finland In 1947 Zhdanov organized the Cominform (Communist Information Bureau)

Zhdanov (zhdä'nôf), city (1926 pop 63,920, 1939 pop 222,427), SE Ukraine, a port on the Sea of Azov and at the mouth of the Kalmius river It was called Mariupol until 1948 Zhdanov is a major industrial center, with steel mills, machinery plants, chemical works, shipyards, and various manufactures Coal, salt, and grain are the chief exports The city was founded in the late 19th cent by Crimean Greeks

Zhiguli Mountains (zhĭgōō'lyĭ'), wooded range, E European RSFSR, in the Samara bend of the VOLGA It rises to 1,217 ft and is rich in mineral resources, notably petroleum, which is brought by pipe line to Kuibyshev

Zhitomir (zhĭtô'mĭr), city (1939 pop 95,090), capital of Zhitomir oblast, Ukraine, WSW of Kiev, in Volhynia It is a road and railroad junction and a lumber and grain center Dating from 1240, it passed (14th cent) to Lithuania, was returned to Russia in the second Polish partition (1793), and became an important commercial center Zhitomir was the scene of fighting in the Second World War The Germans, who held it from 1941 to 1944, massacred virtually the entire Jewish population, which constituted 40 percent of the total

Zhukov, Georgi Konstantinovich (gyôr'gĕ kŏnstuntyē'nuvĭch zhōō'kôf), 1896?–, Russian general He was almost unknown until 1932, when he entered the principal Soviet military school, the Frunze Academy He commanded tank forces in the fighting (1938–39) between Japan and the USSR on the Manchurian border and in the war with Finland Promoted a full general in 1940, he was appointed chief of the general staff and vice commissar for defense in Feb , 1941 He retired (Oct , 1941) as chief of staff and replaced Timoshenko as commander of the central front against the Germans Appointed first vice commissar for defense in the summer of 1942, he also replaced Timoshenko as commander of the southwestern front and accomplished the encirclement of the Germans at Stalingrad early in 1943 He cooperated with Marshal Voroshilov in lifting the siege of Leningrad (Jan , 1943) Promoted marshal (1943), he led the offensive of 1944 and the final assault on Germany in 1945 He captured Berlin (April, 1945) and became commander of the Russian occupation zone in Germany When the Russian armed forces were unified in Feb , 1946, Zhukov was given command of the ground forces In 1947 he was relieved and placed in command of the Odessa military district

Zhukovsky, Vasily Andreyevich (vŭsē'lyĭ ŭndrā'uvĭch zhōōkôf'skĭ), 1783–1852, Russian poet He wrote fine lyrics and odes but is remembered chiefly for his translations Through these he introduced into Russia the works of English, French, and German poets and also gave Russian verse a new quality of ease, flexibility, and grace Tsar Alexander II was strongly influenced by his ideas

Zia (zī'ŭ), descendant of Gad 1 Chron 5 13

Zia (zē'ŭ), North American Indian pueblo, central N Mex It is on Jemez Creek, 30 mi NW of Albuquerque Its 269 inhabitants are Pueblo Indians of the Keresan linguistic stock They raise grain and chili The Mission of Nuestra Señora de la Asunción was built in 1692 The annual fiesta in honor of Our Lady of the Assumption is held on Aug 15

Ziba (zī'bu), servant of Saul 2 Sam 9, 16 1–4, 19 17,29

Zibeon (zĭ'bēun) [Heb ,=dyed] **1** Grandfather of Esau's wife Aholibamah Gen 36 2 **2** Son of Seir and father of Anah Gen 36 20,24, 1 Chron 1 38, 40 They may be the same person

Zibia (zĭ'bēu) [Heb.,=roe], descendant of Benjamin. 1 Chron 8 9

Zibiah (zĭ'bēu) [Heb ,=roe], mother of Joash of Judah. 2 Kings 12 1, 2 Chron 24 1.

Zichri (zĭ'krī) [Heb ,=remembered] **1** Levite. 1 Chron. 9 15 Apparently the same as ZABDI **2** Ephraimite hero 2 Chron. 28 7 **3** Priest after the return to Jerusalem Neh 12 17 **4, 5, 6, 7, 8, 9, 10, 11, 12** Israelites mentioned once only in genealogies Ex 6 21, 1 Chron 8 19,23,27, 26 25, 27 16, 2 Chron 17 16, 23 1, Neh 11 9

Ziddim (zĭ'dĭm), unlocated fortified city, W of the Sea of Galilee Joshua 19 35

Zidkijah (zĭdkī'jŭ) [Heb ,=justice of God], sealer of the covenant Neh 10 1

Ziegfeld, Florenz (flō'rŭnz zēg'fĕld), 1869–1932, American theatrical producer He imported military bands from Europe for the World's Columbian Exposition, Chicago, 1893 From 1907 he produced the *Ziegfeld Follies*, an elaborate revue featuring a variety of performers and a chorus of beautiful girls His other spectacular productions include *Sally, Rio Rita, Kid Boots, Show Boat,* and *Bitter Sweet* He married Anna Held in 1897, and Billie Burke in 1914

Zielona Gora, Lower Silesia see GRÜNBERG

Zieten, Hans Joachim von (hänz' yō'kĭhĭm fŭn tsē'tun), 1699–1786, Prussian general One of the ablest cavalry officers of Frederick II, he fought in the War of the Austrian Succession and in the Seven Years War, in which he helped win the battles of Lobositz, Prague, and Leuthen

ziggurat (zĭ'gōōrăt), form of temple common to the Babylonians and Assyrians, the ancient inhabitants of the Tigris-Euphrates basin The ziggurat was a square, pyramidal structure, whose faces were inclined ramps in several stories mounting to the shrine at the summit The summit served also for the astrological observations which were important in the temple ritual The core of the temple was of sun-baked bricks, the facings being of colored enameled bricks About the ziggurat were grouped accessory buildings including priests' abodes

Ziha (zī'hu) [Heb ,=dry], Nethinim family Ezra 2 43, Neh 7 46, 11 21

Ziklag (zĭ'klăg), place of ancient Palestine, probably S of Beersheba, given to David when he was in flight from Saul There David stayed a while Joshua 15 31, 19 5, 1 Sam 27 6, 7, 30 14, 26, 2 Sam 1 1, 4 10, 1 Chron 12 1, 20, Neh 11 28

Zilahy, Louis (zĭ'lôhĭ), Hung *Zilahy Lajos* (lô'yôsh), 1891–, Hungarian novelist He studied law at the Univ of Budapest and later was correspondent for various newspapers His three major novels, *Two Prisoners* (1932, Eng tr, 1932), *The Deserter* (1932, Eng tr, 1932), and *The Dukays* (Eng tr, 1948), have been translated into English

Zilhah (zĭ'lu) [Heb ,=shadow], a wife of Lamech Gen 4 19–24

Zillebeke (zĭ'lŭbā"ku), village (pop 1,590), West Flanders prov , NW Belgium, near Ypres It was the scene of severe fighting in the First World War

Zillertal Alps (tsĭ'lurtal"), range of the E Alps astride the Austro-Italian border and extending 35 mi NE into the Tyrol It rises to 11,555 ft in the Hochfeiler, on the international line The Zillertal, in the Tyrol, is a valley noted for its magnificent scenery

Zilpah (zĭl'pu), Leah's maid, mother of two of Jacob's sons Gen 30 9–13

Zilthai (zĭl'thĭ, zĭlthā'ĭ) [Heb ,=shady] **1** Descendant of Benjamin 1 Chron. 8,20 **2** Captain who came to David at Ziklag 1 Chron 12 20

Zimbabwe (zĭmbä'bwā) [Bantu,=stone houses], ruined city, Southern Rhodesia It was discovered by white explorers in 1871, and by some was believed to be the biblical Ophir The structures probably date from about the 15th cent, and they seem to have been the work of a Bantu people Ruins include a massive wall, the "temple", a strong fortress, the "acropolis", and dwellings in a near-by sheltered valley

Zimbalist, Efrem (ĕ'frum zĭm'bullst), 1889–, Russian-American violinist, b. Rostov-on-Don, pupil of Leopold Auer at the St Petersburg Conservatory He made his debut in Germany in 1908, toured Europe, and made his American debut in 1911 In 1914 he married Alma Gluck He joined the faculty of the Curtis Institute of Music, Philadelphia, in 1928, and in 1941 became its director In 1943 he married Mary Louise Curtis Bok He is the composer of violin music, chamber music, and a light opera *Honeydew* (1920)

Zimmah (zĭ'mu) [Heb ,=purpose], Levitical family 1 Chron. 6 20,42, 2 Chron 29 12

Zimmern, Sir Alfred Eckhard (zĭ'murn), 1879–, English historian He wrote *The Greek Commonwealth* (1911), a masterly study in the social history of ancient Athens, and he was also prominent in international affairs, he assisted the League of Nations in official capacities and later helped organize UNESCO He was professor of international relations at Oxford (1930–44), lectured at various American universities, and was director of the School of International Relations at Geneva (1925–39) He wrote *The Third British Empire* (1926), *Solon and Croesus* (1928), *The League of Nations and the Rule of Law* (1936), and other works on international relations and Greek history

Zimran (zĭm'răn) [Heb ,=celebrated], son of Abraham and Keturah Gen 25 2, 1 Chron 1 32

Zimri (zĭm'rī) [Heb ,=one who is sung] **1** Died c 885 B C , king of Israel (c 885 B C) for a few days He was one of Elah's generals, he killed the king and

held the throne until OMRI rebelled. 1 Kings 16.8–19 **2** Israelite killed with COZBI **3** Same as ZABDI **2** **4** Descendant of Saul 1 Chron 8 36, 9 42 **5** In an obscure passage the name, apparently, of a tribe Jer. 25 25.

Zin, wilderness through which the Israelites wandered, probably S of the Dead Sea Num 13 21, 20 1, 27 14, 33 36; 34 3, 4, Deut. 32 51; Joshua 15 1,3

Zina (zī'nä), variant of ZIZAH

zinc, silvery, bluish-white metallic element (symbol = Zn, for physical constants, see ELEMENT, table) It is brittle and crystalline at ordinary temperatures, but when heated to between 110°C and 150°C, it becomes ductile and malleable so that it can be rolled into sheets Zinc forms a number of compounds with other elements With oxygen it forms zinc oxide, often called zinc white With chlorine, zinc forms a chloride, a white crystalline, deliquescent substance, used for preserving wood, stiffening paper, and preparing metal for soldering (as a flux) Zinc sulphide (zinc and sulphur) is a component of LITHOPONE and of certain radium paints The crystalline sulphate is known commonly as WHITE VITRIOL An important use of the metal itself is in the preparation of a number of alloys, e g , in BABBITT METAL, BRASS, and GERMAN SILVER and sometimes in BRONZE Iron is galvanized by being dipped in molten zinc or coated by electroplating Zinc is very often used for the negative plates in electric cells Chief sources of the metal are the sulphide ore, zinc blende or SPHALERITE (called also blende or "black Jack"), zincite, an oxide, willemite, a silicate, smithsonite, the zinc carbonate, and franklinite Aside from franklinite, which occurs in abundance only near Franklin, N J , zinc ores are widely and abundantly distributed throughout the world The United States is the leading producer The metallurgy of zinc depends upon the ore used Zinc has a low vaporizing temperature (907°C) and therefore can be prepared by distillation When the oxide is mixed with coal and heated in a furnace in special cylinders, the carbon (coal) combines with the oxygen of the oxide and the escaping zinc vapor is caught in so-called receivers fastened at the end of the cylinders Zinc thus prepared is called spelter In recent years an increasing amount of zinc has been prepared by electrolysis of a solution of the roasted ore in acid to which certain other minerals have been added The metal was known in ancient times

zinc white, white powder, used commonly as a white pigment in paints Chemically, it is zinc oxide It is less opaque than white lead but does not become dark in the presence of sulphur compounds, e g , when exposed to the hydrogen sulphide of the atmosphere It is used also as a filler in tires, other rubber goods, linoleum, oilcloth, and other products and in making white rubber goods and white glass A pure grade of zinc white is sometimes called Chinese white It is used medically in ointments

Zinjan, Iran see ZENJAN

zinnia, any species of the genus *Zinnia* (or *Crassina*), plants chiefly native to Mexico though some reach as far north as Colorado The common zinnia of gardens (*Zinnia elegans*), called also youth-and-old-age, is a rather coarse, easily cultivated, annual plant, popular as a cut flower for its warm colors—ranging from white and yellow to red and purple—and for its bold, stiff aspect It has a composite head of flowers of few rays ("single") or many ("double") There are various forms in cultivation, including dwarfed and curled kinds Zinnia is the state flower of Indiana

Zinoviev, Grigori Evseyevich (grĭgô'rē yĭfsyā'uvĭch zēnô'vyĕf), 1883–1936, Russian Communist leader He sided with the Bolshevik wing of the Russian Social Democratic party after 1903, was forced to flee abroad in 1908, and returned after the February Revolution of 1917 Having risen high in the party ranks, he became a member of the Politburo in 1918 and president of the Comintern in 1919 On Lenin's death (1924) he was, with Stalin and Kamenev, one of the triumvirate to succeed the dead leader With Kamenev he joined (1925) TROTSKY in opposing Lenin's policy, and he was expelled from the Communist party in 1927 Having recanted, he was readmitted in 1928, but did not regain his former influence Arrested in connection with the assassination (1934) of KIROV, Zinoviev—along with KAMENEV and other former leaders—was publicly tried in 1936 for having taken part in Trotsky-inspired plots against Stalin and the Soviet government Like his fellow defendants, Zinoviev confessed himself guilty of all charges and was executed The so-called **Zinoviev letter** was published in 1924 by several English newspapers and purported to be a secret letter written by Zinoviev (then head of the Comintern) It contained instructions for a Communist uprising in England Though later proved a forgery, the Zinoviev letter was effective in bringing about the defeat of Ramsay MacDonald and the Labour party in the British elections that year, and it resulted in a cooling of British-Russian relations.

Zinovievsk, Ukraine see KIROVOGRAD

Zinsser, Hans (zĭn'sur), 1878–1940, American bacteriologist, b. New York city, grad. Columbia (B A , 1899, M D., 1903). He was professor of bacteriology at Stanford Univ (1911–13), Columbia (1913–23), and Harvard Medical School (from 1923) A noted epidemiologist, he was a leader in combating typhus and served with the American Red Cross sanitary commission during the 1915 typhus epidemic in Serbia and with the League of Nations sanitary commission (1923) in Russia He isolated the germ of the European type of typhus and developed (1940), with his colleagues at Harvard, a method for mass production of the vaccine He wrote a popular work on typhus, *Rats, Lice, and History* (1935), several textbooks, including *A Textbook of Bacteriology* (1911, 9th ed revised, 1948), *Infection and Resistance* (1914, 4th ed revised, *Resistance to Infectious Disease*, 1931, 5th ed revised, *Immunity*, 1939), and the autobiographical *As I Remember Him* (1940)

Zinzendorf, Nikolaus Ludwig, Graf von (zĭn'zundôrf, Ger nē'kōlous lōōt'vĭkh gräf' fŭn tsĭn'tsundôrf), 1700–1760, bishop of the refounded Moravian Church, b Dresden Reared under Pietistic influences, he was early in sympathy with the persecuted Moravian Brethren, to whom he offered refuge (1722) on his Saxony estates The colony was called Herrnhut It was Zinzendorf's purpose that the Herrnhutters should be a group within the Lutheran Church, influencing others toward deeper religious experience, but he yielded to their insistence upon refounding their ancient church He was ordered (1736) to leave Saxony because of his religious activities, and thereafter, for many years, he traveled about, spreading the views of the reorganized Moravian Church, of which he became bishop in 1737 In London he was cordially received (1737) by John Wesley In America (1741–43) he was active in the noted Moravian settlement at Bethlehem, Pa , and in establishing congregations in other places in E Pennsylvania He made attempts to gather the German sects of that colony into a unified church In 1748 Zinzendorf was allowed to return to Herrnhut, where he remained until his death His many works include a number of hymns See Willston Walker, *Great Men of the Christian Church* (1908)

Zion (zī'un) or **Sion** (sī'un), part of JERUSALEM It is defined in the Bible as the City of David 2 Sam 5 7 Tradition names the southwestern hill of the city as Zion, but there is controversy about the identity The name is a symbol of Jerusalem, of the Promised Land, of the Messianic hope of Israel (hence the term *Zionism*), and, among Christians, of heaven

Zion, city (pop 6,555), extreme NE Ill , on Lake Michigan N of Chicago, inc 1902 It was founded in 1901 by John Alexander DOWIE of the Christian Catholic Apostolic Church and had a theocratic government until 1935 The tabernacle burned in 1937 Lace and food products are made in the city A Passion play is presented annually

Zionism, movement for reconstituting a Jewish nation Since the destruction of their state by Rome in A D 70, the Jews have yearned to be restored to Palestine The persecutions which they endured combined with their sense of religious identity to keep them a distinct group wherever they dwelt The faith that the Messiah would deliver Israel from its exile remained always fresh, and repeatedly Jews followed false Messiahs, such as SABBATAI ZEVI While some colonies of pious scholars had always lived in Palestine on the charity of their brethren abroad, the bulk of Jewry took no practical steps to reenter Zion, feeling that this would be sacrilegious The growth of a liberal attitude towards Jews in the 18th and 19th centuries led to some degree of assimilation with national cultures This alarmed certain Jewish leaders, notably Moses MENDELSSOHN (1729–86), who perceived a threat to religious culture, they asserted that Western learning must be associated with a heightened awareness of Jewish values This attitude prepared for the impact of nationalism on Jewish thought in Western Europe The typical late-19th-century view was that the Jews were an inchoate nation requiring mainly its own territory (not necessarily Palestine) to be realized The Jews of Eastern Europe, however, refused to abandon their traditional aspirations for Palestine The Zionist movement was weak, disunited, and largely theoretical until Theodor HERZL called the first World Zionist Congress at Basel in 1897 The meeting set up Zionist organizations in most countries where there were large Jewish populations and established the right of any Jew to vote for delegates to the congresses by paying a "shekel" (registration fee) Since 1946 some 2,500,000 Jews purchased "shekels" for each congress American Jews furnish most of the money for Zionist activities other than conducting the congresses The first issue to split the Zionist movement was whether Palestine was essential to the Jewish state A majority of the delegates to the 1905 congress felt that it was essential and rejected the British offer of a homeland in Uganda, E Africa The opposition, the Territorialists led by Israel Zangwill, withdrew on the grounds that an immediate refuge for persecuted Jews was needed The Zionist movement, largely under the leadership of Chaim WEIZMANN, then devoted itself largely to political work but obtained few concessions from the Turkish sultan, who ruled Palestine. The Zionists did achieve a signal success in 1917, when Great Britain was at war with Turkey as one of the Central Powers The British government issued the Balfour Declaration (see BALFOUR, ARTHUR JAMES), which promised to help establish a national home for the Jewish people in Palestine Great Britain was given a mandate of Palestine in 1923, in part to implement the Balfour Declaration Jewish colonization vastly increased in the early years of the mandate (see PALESTINE for the period up to 1945), but soon the British made certain interpretations of the declaration which the Zionists felt were too limiting There were disputes in the Zionist movement on how to counter the British position The Revisionists favored immediate declaration of a Jewish state even if force were needed In their uncompromising stand (but not in their threat of violence) they were usually joined by the Mizrachi (orthodox religious party) The most conciliatory faction was comprised of the General Zionists (representing the original national organizations), who generally remained friendly to Great Britain The Labor Zionists, who favored a socialist economy in Palestine, were often allied with the General Zionists on questions concerning the mandate After the Second World War the Zionist movement intensified its activities The sufferings of the European Jews and of Jews in Arab lands demanded the opening of a refuge The stiffening opposition of the Arab countries increased the urgency At this time the World Zionist Congress was split, with the Revisionists and the Mizrachi demanding all Palestine (even including Jordan) and the Labor and General Zionists reluctantly accepting the United Nations plan to partition Palestine (see ISRAEL) After the Jewish state was proclaimed (May 14, 1948) the World Zionist Congress was separated entirely from the Israeli government This gave Israel absolute sovereignty and answered the criticism of those who maintained that Israel was a country to which Zionists throughout the world owed allegiance See Nahum Sokolow, *History of Zionism, 1600 1918* (1919), Israel Cohen, *The Zionist Movement* (1945), Chaim Weizmann, *Trial and Error* (1949)

Zionites see CHRISTIAN CATHOLIC APOSTOLIC CHURCH IN ZION

Zion National Park, 94,241 06 acres, SW Utah, est 1919 It includes a gorge 1,500 to 2,500 ft deep and is an area of great scenic grandeur and beauty, noted for its vivid coloring and spectacular rock formations Dazzling white rock in the upper reaches makes the red of Vermilion Cliffs more startling There is a highway to Mt Carmel The area was first set aside as Mukuntuweap National Monument in 1909 Adjoining Zion National Park on the northwest is the undeveloped Zion National Monument (33,920 75 acres, est 1937)

Zionsville, town (pop 1,314), Boone Co , central Ind , NNW of Indianapolis Pharmaceuticals are made

Zior (zī'ôr) [Heb , = smallness], hill town, S Palestine Joshua 15 54

Ziph (zĭf) **1** Judahite 1 Chron 4 16 **2** Unidentified city, S Palestine Joshua 15 24 **3** City, S Palestine, SSE of Hebron Here David hid in his flight from Saul Joshua 15 55, 1 Sam 23 14,15,19, 26 1,2, title of Ps 54

Ziphah (zī'fu), son of Jehaleleel 1 Chron 4 16

Ziphion (zĭ'fēŏn), variant of ZEPHON

Ziphron (zĭ'frŏn), unlocated landmark, extreme N Palestine Num 34 9 This is possibly the same as SIBRAIM

Zippor (zĭp'pôr) [Heb , = sparrow], father of Balak, king of Moab Num 22 2

Zipporah (zĭ'purù) [Heb , = female sparrow], daughter of Jethro and wife of Moses Ex 2 16–22 4 18–26, 18 1-6

zirconium (zurkō'nēum), metallic element appearing as a black amorphous powder or a dark gray crystalline solid (symbol = Zr, for physical constants, see ELEMENT, table) It forms compounds with various other elements, e g , with oxygen (the oxide, zirconia), with silicon and oxygen, with fluorine, and with zinc and potassium and zinc and oxygen The element occurs in various minerals, e g , zircon, baddeleyite, and eudialyte The resistance of the oxide, zirconia, to intense heat makes it useful for laboratory vessels and for furnace linings It is used also in alloys with copper and nickel and especially with iron and silicon (for use in making various steels) When added to steel, it acts as a purifying agent, removing substances deleterious to the uniform strength of the finished product The oxide, zirconia, was discovered by M H Klaproth in 1789 in the mineral zircon The element was not isolated until 1824 by J J Berzelius

Zistersdorf (tsĭs'tursdôrf"), town (pop 3,044), Lower Austria, NNE of Vienna Although it was long known that there were oil deposits in the vicinity, the large oil fields were developed only recently, notably in the Second World War Much equipment was removed after 1945 by the Russian occupation authorities.

Zita (zē'tŭ, Ger. tsē'tä), 1892–, empress of Austria and queen of Hungary The daughter of Duke Robert of Parma, she was married (1911) to Archduke Charles Francis, who in 1916 became emperor as CHARLES I She exercised great influence over her husband and was blamed for Charles's letter to her brother, SIXTUS OF BOURBON-PARMA, during the First World War and for Charles's attempts to regain his throne after the war After her husband's death (1922), Zita brought up her numerous family in Belgium She never renounced her ambition to see her son, Archduke OTTO, crowned king of Hungary and possibly emperor of Austria From 1940 to 1949 Empress Zita lived in the United States and in Canada

zither (zĭ'thur), stringed musical instrument, derived from the psaltery and the dulcimer It has a flat sound box over which are stretched from 30 to 45 strings, these are plucked with the fingers and a plectrum In the 18th cent one or both sides began to be curved to produce greater sonority During the baroque era it was generally used by peasants of Central Europe The term *zither* is also used as a generic term for various instruments, including the dulcimer, the psaltery, and several Oriental instruments

Zittau (tsĭ'tou), city (pop 45,084), Saxony, E Germany, in Lusatia, near the Lusatian Neisse and near the Czech border It is a textile-milling center and has manufactures of automobiles and machinery An old Slavic settlement, Zittau was chartered as a city in the 13th cent It has a 12th-century church

Zituni, Greece: see LAMIA

Ziz, pass or wadi, up which an allied army moved from the Dead Sea towards Jerusalem to attack Jehoshaphat 2 Chron 20 16

Ziza (zī'zŭ) **1** Simeonite who participated in a raid on the pasture lands of Gedor 1 Chron 4 37 **2** Son of Rehoboam and Maachah 2 Chron 11 20

Zizah (zī'zu), descendant of Gershom 1 Chron. 23 11 In verse 10 he is called Zina

Zizka, John (zĭs'ku), Czech *Jan Žižka* (yän' zhĕsh'-ka), d 1424, Czech soldier and Hussite leader Before the HUSSITE WARS, which gave his military genius the opportunity to develop fully, Zizka served under various lords, he fought (1410) on the Polish side in the battle of Tannenberg, where the Teutonic Knights were defeated When the Hussite Wars broke out in 1420, Zizka was about 60 years old and was blind in one eye Having joined the Taborites (the radical Hussite wing), Zizka made Tabor in Bohemia into an almost impregnable fortress and led (July, 1420) the Taborite troops in their victory over Emperor SIGISMUND at Visehrad (now a part of Prague) In the following years he successfully withstood the anti-Hussite crusades and reduced one Catholic stronghold after another, continuing to command in person although he had become totally blind in 1421 He did not hold with the extreme religious views of the Taborites, and in 1423 he founded his own "Union," which, however, remained in close alliance with the Taborites In the same year the tension between the Taborites and the moderate Utraquists, whose stronghold was at Prague, flared into open conflict, and late in 1424 Zizka led his army against Prague in order to compel that city to adhere to his uncompromising anti-Catholic policy An armistice averted the outbreak of civil war between the two Hussite parties, which now decided on a joint expedition into Moravia under Zizka's command Zizka died suddenly during the campaign Although Zizka's fame as a general is overshadowed by that of other commanders, he ranks among the great military innovators of all time The bulk of his army consisted of peasants and townspeople, untrained in arms Zizka did not attempt to make them adopt the conventional armament and tactics of the time, but let them make use of such weapons as iron-tipped flails and armored farm wagons, surmounted by small cannons of the howitzer type His armored wagons, when used for offense, cut easily through the enemy lines, firing as they went, and thus enabled him to cut superior forces into pieces When used for defense, the wagons were arranged into an impregnable barrier surrounding the foot soldiers, they also served to transport his men Zizka thus fully anticipated modern motorized and tank warfare, but despite its obvious superiority over his enemies' tactics Zizka's method was ignored by military leaders for 400 years, and it is only in recent times that his military genius has been fully appreciated

Zlatoust (zlŭtŭōst'), city (1926 pop 48,621, 1939 pop 99,272), RSFSR, in the southern Urals, c 65 mi W of Chelyabinsk A major metallurgical center, it produces quality steels and precision castings It was founded in 1754 as a processing center for iron and copper and was destroyed (1774) by the rebels under Pugachev During the Napoleonic campaign of 1812 it developed as an armament-manufacturing center Its plants were reconstructed and modernized in the 1930s

Zlin, Czech *Zlín* (zlēn), city (pop 45,737), Moravia, Czechoslovakia, E of Brno It is the center of the Czech shoe industry, founded here in 1913 by Thomas Bata, and it also produces other leather goods and rubber. Under the Bata family Zlin grew into an almost self-sufficient factory community, with its own consumer-goods industries, broad educational facilities, and model housing projects, and it represented industrial paternalism at its benevolent best Branches of the Bata shoe industry were opened throughout the world After the Second World War the Bata industries were nationalized, and Zlin itself was renamed Gottwaldov in honor of Klement Gottwald, first Communist president of Czechoslovakia

Zn, chemical symbol of the element ZINC

Znojmo (snoi'mō), Ger *Znaim* (tsnīm'), city (pop. 19,695), S Moravia, Czechoslovakia It produces pottery, stoneware, machinery, and processed food (notably pickles) Founded in the 13th cent, it has several fine Gothic churches and a 15th-century city hall Here in the Napoleonic Wars an armistice was signed (1809) by the Austrians and the French after the French victory at Wagram

Zoan, see TANIS, EGYPT

Zoar (zō'ur), at first named **Bela** (bē'-), the one of the Cities of the Plain (see SODOM) to escape destruction Lot and his daughters took refuge here. Gen 14 2,8, 19 19–20, Isa 15 5, Jer 48 34

Zoar (zôr, zō'ur), village (pop 208), E central Ohio, on the Tuscarawas river, near New Philadelphia, inc 1884 It was founded by a group of Separatists from S Germany who fled religious persecution and emigrated (1817), under the leadership of Joseph Michael BIMELER, to America The Quakers received them kindly in Philadelphia and assisted them in obtaining land in Ohio The village of Zoar was laid out, a communistic system was adopted to solve economic difficulties, and a strict moral and religious life was maintained Flour and textile mills and other small industries were established, and the commune flourished The Zoarites aided in the building of the Ohio and Erie Canal After Bimeler's death (1853), the society declined, and in 1898 the communistic mode of life was abandoned See E O Randall, *History of the Zoar Society* (1899), C R Dobbs, *Freedom's Will* (1947)

Zoba or **Zobah** (both zō'bu), Aramaean state, NE of Palestine, at the time of Saul, David, and Solomon It waged war on Israel 1 Sam 14 47, 2 Sam 8 10, 10 19, 1 Chron 18 3–7, 2 Chron 8 3 Aramzobah in title of Ps 60

Zobebah (zōbē'bu) [Heb, =slow-moving], descendant of Judah 1 Chron 4 8

zodiac (zō'dĭăk), in astronomy, an imaginary zone, or belt of the sky, about 16° in width 8° on each side of the ecliptic (the apparent annual path of the sun) The orbits of the sun, the moon, and the five planets, as known to the ancients who originated the zodiac, were included within the band of 16° The stars in the zone were arranged in constellations, and since most of these had the figures of animals, the name *zodiac*, derived from the Greek *zoion* [animal] was given There are 12 constellations, and each has its corresponding sign The zodiac exists only as a convenient means of indicating the positions of the heavenly bodies The point chosen from which to calculate positions is that point at which the sun crosses the equinoctial from south to north, the vernal equinox It is known as the first point of Aries and is one of two equinoctial points where the line of intersection of the ecliptic and the celestial equator meets the celestial sphere The constellations, with the symbols representing the corresponding signs of the zodiac, in order eastward, are

Aries (Ram) ♈	Libra (Balance) ♎
Taurus (Bull) ♉	Scorpio (Scorpion) ♏
Gemini (Twins) ♊	Sagittarius (Archer) ♐
Cancer (Crab) ♋	Capricornus (Goat) ♑
Leo (Lion) ♌	Aquarius (Water-Bearer) ♒
Virgo (Virgin) ♍	Pisces (Fishes) ♓

The first six lie in the half of the band north of the celestial equator, the others in the half south of that line Because of the PRECESSION OF THE EQUINOXES, each of the zodiacal signs has, in the passing of 2,000 years, moved backward 30° and now is in the constellation west of that to which it properly corresponds For instance, the sign Aries is in the constellation Pisces The entire circuit of the heavens, to restore coincidence of signs and constellations, will require about 25,800 years Our zodiac is believed to have had its origin among the Babylonians at least as early as 2000 B C The Greeks passed it on to the Western world Many minor planets discovered in the 19th cent and found to be moving in orbits that extend far outside the zodiac are called ultrazodiacal planets

Zoë (zō'ē), d 1050, Byzantine empress (1028–50), daughter and successor of Constantine VIII Her first husband and associate in power, ROMANUS III, was murdered (1034) in his bath, probably with the connivance of Zoe and of her lover Michael She married Michael (who thus became Emperor Michael IV) a few hours later, on a Good Friday, with the blessings of the patriarch of Constantinople Michael, who was her junior by 30 years and of low birth, proved a capable ruler, who eliminated Zoe from state affairs Much of the government was exercised by Michael's elder brother John, a eunuch of the court and a thoroughly corrupt man, but an able administrator and diplomat On Michael's death (1041), his nephew, Michael V, became joint ruler with Zoë He promptly sent his uncle John into disgrace and in 1042 exiled Zoë to a convent, but the people rose in rebellion, Zoë was recalled, and Michael was blinded and banished. At the same time Zoë's younger sister, Theodora, was removed from the convent where she had lived until then and was crowned joint empress A few months later (June, 1042), Zoë married for the third time Her husband, Constantine IX, of a distinguished Byzantine family, ruled jointly with the two sisters until Zoe's death Under their threefold rule the Byzantine court was the scene of continuous debauchery and scandals and the provinces were disturbed by rebellions, but at the same time a considerable cultural revival took place at Constantinople The chief event of the period, however, was the final schism between the Eastern Church and the Western Church, which was precipitated by the attack of Michael Cerularius, patriarch of Constantinople, on the papacy and which was consummated when Pope LEO IX excommunicated (1504) the patriarch After Zoë's death in 1050, Constantine continued to rule jointly with Theodora, he died in 1055, and Theodora in 1056, Michael VI, a Byzantine nobleman who was chosen her successor, was forced to abdicate in 1057 in favor of Isaac I, founder of the Comnenus dynasty

Zoega, Georg or **Jorgen** (gĕôrg' sōā'gä, yôr'gun), 1755–1809, Danish archaeologist and numismatist He is considered, with Winckelmann and E Q Visconti, a founder of scientific archaeology After his conversion to Roman Catholicism in 1783, he lived in Rome, serving as Danish consul general from 1798 to 1809 Under the patronage of Cardinal Borgia, and pensioned by Denmark, he was able to make valuable researches in coins and manuscripts, he became skilled in the deciphering of hieroglyphics, as evidenced in his work (1797) on the origin of obelisks His chief work was the *Catalogus codicum Copticorum manuscriptorum Museo Borgiano* (1810)

Zog (zŏg), 1895–, king of Albania Originally Ahmed Zogu, he came of a Moslem family and served in the Austrian army in the First World War He became Albanian minister of the interior in 1920, minister of war in 1921, and premier in 1922 A revolution in 1924 led to his flight, but he returned in 1925 with Yugoslav backing and became premier again Although a constitution was adopted, he governed as virtual dictator Ahmed Zogu soon abandoned his Yugoslav backers and turned to Italy for financial aid, by the Treaty of Tirana of Nov , 1927, Albania concluded a military alliance with Italy, which received extensive economic concessions in exchange for further loans In 1928 Zog was proclaimed king as Zog I A new Italian loan (1931) helped Zog to modernize his country but led to such an increase of Italian influence that liberal opposition became aroused Zog attempted to resist Italian encroachments but the appearance (1934) of an Italian fleet at Durazzo forced him into submission Albania became a virtual Italian protectorate On April 7, 1939, Albanian independence ceased altogether when Italy invaded and quickly subdued Albania, of which Victor Emmanuel III of Italy was proclaimed king Zog, who had married the Hungarian countess Geraldine Apponyi in 1938, fled abroad with his queen and his two-day old son Victor Emmanuel abdicated as king of Albania in 1943, but Zog remained in exile after the Second World War, when a Communist government gained control over Albania and proclaimed it (1946) a republic

Zohar (zō'-) [Heb, =whiteness] **1** Father of the owner of the cave of MACHPELAH **2** Son of Simeon gen 46 10, Ex 6 15 Zerah 1 Chron 4 24

Zoheleth (zōhē'lĭth), commemorative or sacred stone near EN-ROGEL 1 Kings 1 9

Zoheth (zō'hĕth), son of Ishi 1 Chron 4 20.

Zoilus (zō'lŭs), c 400 B C – c 320 B C, Greek rhetorician of Macedonia He is called Homeromastix [scourge of Homer], because of his denunciations of Homer as a purveyor of fables His name has come to signify a carping critic

Zola, Émile (āmēl' zōlä'), 1840–1902, French novelist, b Paris He was a professional writer and earned his living by journalism and by his novels About 1870 he became the apologist and most typical example of French naturalism This literary school, grown out of the realism typified by FLAUBERT and founded on an unskeptical faith in science, held that the novel should be scientific in a strict sense Inspired by a passion for accuracy and by an assurance that he saw life as it is, Zola composed novels precisely descriptive of social milieus Characters tend to become marionettelike, and the details are often sordid in their completeness Zola had an ardent zeal for social reform Of his many novels, the chief are among the 20 comprising the series *Les Rougon-Macquart* (1871–93), an account of the decay of a family as the effect of heredity and environment, with especial emphasis on alcoholism, disease, and degeneracy Perhaps the best known of these are *L'Assommoir* (1877, Eng tr , *The Dram-Shop*), on lower-class life in Paris, *Nana* (1880), and *Germinal* (1885, Eng tr , 1901), on coal mining in

N France, a "proletarian" novel He also began the socialistic *Quatre Evangiles* [four gospels], of which he finished *Fécondité* (1899, Eng tr , *Fruitfulness*, 1900), *Travail* (1901, Eng tr , *Labor*, 1901), and *Vérité* (1903, Eng tr , *Truth* 1903) Zola was anti-Catholic and wrote many diatribes against the clergy and the Church His part in the DREYFUS AFFAIR (notably his article, "J'accuse," 1898) was his most conspicuous public action, and he became the especial object of the hatred of the anti-Dreyfus party Prosecuted for libel (1898), he escaped to England, where he remained for a few months He was accidentally asphyxiated in his rooms See E A Vizetelly, *Emile Zola, Novelist and Reformer* (1904), Matthew Josephson, *Zola and His Time* (1928), Henri Barbusse, *Zola* (Eng tr , 1933)

Zollverein (tsôl'vurin') [Ger ,=customs union] The political unification of Germany in 1871 was preceded by a large measure of economic unification, furthered by a series of tariff conventions Friedrich List first popularized the idea of a combination to abolish the customs barriers which were inhibiting trade among the numerous states of the German Confederation Prussia abated internal customs in 1818 and formed (1818–28) a North German Zollverein, which in 1834 became the German Zollverein after merging with two similar unions, the South German Zollverein and the Central German trade union, both founded in 1828 Customs barriers of member states were leveled, and a uniform tariff was instituted against nonmembers The customs at foreign frontiers were collected on joint account, and the proceeds were distributed in proportion to the population and resources of the member states A rival customs union, the *Steuerverein* of central Germany, was also organized in 1834 A series of treaties (1851–54) joined it to the Zollverein, which now comprised Luxembourg and all German states except Austria, the two Mecklenburgs, and the Hanseatic towns Prussia, despite the insistence of several states, was unwilling to admit Austria to the union, but the two countries negotiated a separate tariff treaty After the Austro-Prussian War (1866) a new agreement was reached by the members of the union The newly formed NORTH GERMAN CONFEDERATION entered the Zollverein in a body and the other German states also negotiated customs treaties with victorious Prussia The constitution (1867) of the new Zollverein provided for a federal council of customs (*Zollbundesrat*), comprised of personal representatives of the several rulers, and for an elected customs parliament (*Zollparlament*) In both bodies Prussia exercised predominant influence In 1871 the laws and regulations of the Zollverein passed into the legislation of the German Empire Alsace-Lorraine entered the imperial customs area in 1872, and the Hanseatic cities joined in 1888

Zolnay, George Julian (zōl'nā), 1863–1949, American sculptor, b Hungary, studied in Bucharest and in Vienna He came to the United States in 1892 and was an art commissioner at the World's Columbian Exposition, Chicago He was founder and president of the St Louis Artists Guild Besides Confederate monuments at St Louis and at Nashville, Tenn , his works include the Pierre Laclede monument, St Louis, Industrial Memorial, New Bedford, Mass , Jefferson Davis, Richmond, Va , and a bust of Poe, Univ of Virginia

Zomba (zŏm'bu), town (pop 6,850), capital of Nyasaland, founded c 1880 by European planters Cotton, tobacco, and coffee are exported

Zombor, Yugoslavia see SOMBOR

zone [Gr ,=girdle], in geography an area with a certain physical unity which distinguishes it from other areas The division of the earth into five climatic zones probably originated with Parmenides (5th cent B C), who recognized a torrid or tropical zone, two temperate zones, and two frigid or arctic zones, his classification was adopted by Aristotle and is still in use The zones are based on latitude the torrid zone lies between 23½° N and 23½° S, the temperate zones between these parallels and the polar circles, and the frigid zones from the polar circles to the poles Later geographers have recognized that CLIMATE is affected by such conditions as altitude, distance from water, prevailing winds, and ocean currents Some modern geographers have used other bases for zoning Wladimir Koppen, for example, c 1888 divided the earth into 15 climatic zones according to vegetation A Supan c 1900 adopted the isotherms of 68°F (normal annual temperature) and 50°F (average for the warmest month) for the temperate and frigid zones instead of the parallels of 23½ and the polar circles, he subdivided these five zones into 35 climatic provinces A J Herbertson's thermal division (1904) found favor among geographers

Zonguldak (zŏng"gōōldak'), city (pop 32,978), N Turkey, in Anatolia, a port on the Black Sea Zonguldak prov , of which it is the capital, has extensive coal deposits

zoning, devising and enacting of regulations by which a municipal government can have proper control over the uses of any separate piece of property It has become, in the United States, a widespread method of controlling city construction and removing congestion and other defects of existing city plans. England, Germany, and Sweden preceded the United States in zoning for the purpose of controlling building in new areas adjoining cities The zoning resolution adopted by New York city in 1916 was the first in America and has profoundly affected New York architecture, while the standard which it set was quickly followed by other cities It was reenacted in 1924 and in 1927 By this law New York is divided into use districts height districts, and area districts The first are of four classes, residential, business, retail, and unrestricted Such zoning makes it possible to control the character of neighborhoods and to maintain residential sections free from objectionable encroachments The height districts determine the straight unbroken height of the street face of a building according to the width of the street on which it stands and are in eight classes, with heights ranging from ¼ times the street width to 2½ times Above this determined height any additional stories must range themselves back of an imagined sloping line drawn from the center point of the street This restriction has produced the so-called set-back buildings with their receding stories and terraces With certain limitations, a tower, equal in floor area to not more than 25 per cent of the property, may rise to an indefinite height The area districts, of which there are six classes, establish minimum dimensions for yards and courts and maximum areas of buildings with relation to the areas of their sites The height and area limitations serve to insure light and air for the occupants of city buildings In the United States the state legislatures hold the power to authorize zoning, after which the separate cities frame and enact their own zoning ordinances To accomplish more than the mere amelioration of conditions, zoning should be closely integrated with a CITY PLANNING program See F B Williams, *The Law of City Planning and Zoning* (1922), Harland Bartholomew, *Urban Land Uses* (1932), E M Bassett, *Zoning* (rev ed , 1940)

zoological garden, public or private park where living animals and birds are kept for exhibition and study The menageries and aviaries of China, Egypt, and Rome were famous in ancient times From the late medieval period many rulers had private menageries, some of which later formed the nucleus of public exhibits Nearly all large cities now have zoological reserves Notable ones include those of London (Regent's Park), Paris (Jardin des Plantes and Jardin d'Acclimatation, Bois de Boulogne), Berlin (Tiergarten), New York (Bronx Park), Chicago (Lincoln Park and Brookfield), Cincinnati, Philadelphia, and San Diego (Balboa Park) During the Second World War it became necessary to destroy many animals in European parks because of the possibility of escape and the lack of proper food Although some of the exotic animals exhibited are born in captivity, most are captured in their native habitats A modern trend is the exhibition of animals, not in cages, but in enclosures simulating their natural habitat

zoology, branch of BIOLOGY concerned with the study of animal life The science began with man's early observations of animals and with his attempts to classify them by grouping apparently related forms Aristotle worked out an early system of classification Most of the early classifications were based either on external resemblances or on similarity of environment of the animals (e g , those living on land, in the sea, and in the air) Finally the system of binomial nomenclature, now generally used throughout the world, was adopted, this system designates each known kind of plant and animal by two Latin names, the first indicating the genus and the second designating the species The introduction of the system is commonly attributed to Linnaeus, however, the earlier work of John RAY contributed greatly to the development of the Linnaean system Gradually the scope of zoology enlarged Studies in embryology and internal morphology revealed much about the growth and true relationships of animals Physiology was also developed early as a branch of zoology, however, a more exact understanding of physiological processes was dependent, to a considerable extent, upon its later integration with the chemical and other physical sciences Increased use of the microscope and of the experimental method contributed to the expansion of the field into its many branches Andreas Vesalius, Georges Cuvier, and Claude Bernard are among the many who contributed to the growth of experimental zoology Lamarck and Charles Darwin stimulated the science through promulgation of their theories Modern zoology has been marked by great progress in genetics and cytology, as well as in physiology and biochemistry

Zophah (zō'fu), Asherite 1 Chron 7 35,36

Zophai (zō'fī), variant of ZUPH 1.

Zophar (zō'fär), comforter of Job. Job 2 11.

Zophim (zō'fĭm) [Heb ,=those who watch], unlocated spot probably in the vicinity of Mt. Pisgah, associated with Balaam Num. 23 14

Zoppot (tsō'pōt), Pol. *Sopot* (sō'pôt), town (pop 26,917), N Poland, on the Baltic and NW of Danzig A seaside resort formerly belonging to the territory of the Free City of Danzig, it was the site of a fashionable gambling casino It was transferred to Polish administration in 1945.

Zorach, William (zōr'ăk), 1887–, American sculptor and painter, b Eurburg, Lithuania His family emigrated to America when he was four and settled near Cleveland He worked for a lithograph company there until 1908, studying nights at the Cleveland School of Art There followed two years at the National Academy of Design, New York, and another two in France, where he was in touch with current art trends In 1912 he returned to Cleveland for one more year of commercial lithography and the following year exhibited at the Armory Show in New York From then on his work, first in painting and later in sculpture, was widely shown and increasingly popular In 1924 Zorach held his first exhibition of sculpture In 1932 he won the Logan medal and purchase prize at the Chicago International Water Color Exhibition Highly successful as a water-colorist, Zorach is best known as a sculptor Without formal training in this particular field he evolved a very personal and monumental style which placed him among the foremost sculptors of his day His work is in many private and public collections His *Spirit of the Dance* (Radio City Music Hall, New York) is a characteristic kneeling figure, cast in aluminum He taught at the Art Students League of New York See monograph by P S Wingert (1938)

Zorah (zō'ru) or **Zoreah** (zōrē'u), Samson's native town, SW Palestine, c 15 mi W of Jerusalem Its inhabitants are Zorathites or Zareathites, and the town is called also Zareah Joshua 15 33, 19 41; Judges 13 25, 16 31, 18 2,8,11, 1 Chron 4 2, 2 Chron 11 10, 1 Chron 2 53, Neh 11 29

Zorites (zō'rīts), name of unknown significance appearing at 1 Chron 2 54

Zorn, Anders Leonhard (an'durs lā'ōnard sôrn'), 1860–1920, Swedish painter, etcher, and sculptor His early and sustained success was phenomenal. From 1881 he traveled all over Europe, painting celebrities and winning awards His first oil painting, *Fisherman from St Ives*, was acquired by the Luxembourg Museum, Paris He maintained a studio in London until 1887 and thereafter in Paris, but throughout his life he returned constantly to his native Mora, Sweden, and his last years were spent there On a visit to America in 1903 he painted some 60 portraits Zorn painted landscape and genre, but excelled in figure painting and portraits His studies of nude young peasant women are famous for their vivacity and warmth of color *Mora* (Worcester, Mass , Art Mus) is a fine example Portraits by Zorn are in the Uffizi and the Metropolitan Museum and in many private collections in Europe and America They are distinguished for their cool brilliance and forceful characterization His spirited etchings include excellent portraits of many famous writers

Zorndorf (tsôrn'dôrf) village, Brandenburg, NNE of Küstrin, after 1945 under Polish administration Here in 1758 Frederick II of Prussia defeated the Russians in the Seven Years War The Polish name is Sarbinowo

Zoroaster (zō"rōăs'tur), religious teacher of ancient Persia The name by which he is ordinarily known is derived from the Greek form of Zarathushtra (or Zarathustra) [old camel?], his Persian name According to a tradition accepted by some scholars he lived from 660 to 583 B C Others believe that 570 B C and 500 B C are his approximate dates Zoroaster was probably born in NW Persia His youthful studies were crowned between the ages of 30 and 40 by the revelation of a new religion At first his attempts to proselyte failed, but in time he converted King Vishtaspa (who may have been Hystaspes, the father of Darius) The religion then spread rapidly through Vishtaspa's kingdom Firdausi states that Zoroaster was killed in a holy war against Bactria (Balkh) See A V Williams Jackson, *Zoroaster* (1898), Ernst Herzfeld, *Zoroaster and His World* (1947)

Zoroastrianism (zō"rōăs'trōōnĭzm), religion founded by Zoroaster, but with many later accretions Its scriptures are the *Avesta* or the *Zend Avesta* [Pahlavi *avesta*=law, *zend*=commentary] The *Avesta* consists of much-corrupted texts with many interpolations, it is written in an old form of Iranian, possibly coeval with the inscriptions of Darius Except for some additional minor fragments, it comprises five books—the *Yasna*, a liturgical work, which includes the *Gathas*, probably the oldest part of the *Avesta* and perhaps in part written by Zoroaster, the *Vispered*, a supplement to the *Yasna*, the *Yashts*, hymns of praise, a set of minor texts, and the *Vendvidad*, a code of purity resembling Leviticus in the detail of its ordinances When Zoroastrianism was revived under the Sassanidae, a religious literature in Pahlavi (a middle Persian dialect used as a priestly language) was written to supplement the *Avesta* In its origin Zoroastrianism appears to have been a reform of the nature religion of Persia It was concerned with increasing the harvest and with protecting and treating kindly the domestic animals whose labors accomplished the production of food. At first there were no enclosed temples, but only outdoor altars. Gradually

certain practices which Zoroaster appears to have deplored, such as the use of haoma (an intoxicant) in prayer and the sacrifice of bulls in connection with the cult of the god Mithra (a lesser god in Zoroastrianism) became features of the religion It is not surprising, however, that former customs should be thus revived, because Zoroaster appears to have incorporated in his religion the old Persian pantheon, although very much refined Instead of tolerating the worship of all the deities, however, he divided them into those who were beneficent and truthful and those whose malevolence and falseness made them abhorrent Heading the good spirits was Ahura Mazdah (also Ormazd or Ormuzd) [sovereign knowledge] Six (or possibly more) attendant deities, the Amesha Spentas, surround him These personalized representations of abstract qualities are Vohu Manah [good thought], Asha Vahishta [highest righteousness], Khshathra Vairya [divine kingdom], Spenta Armaiti [pious devotion], Haurvatat [salvation], and Ameretat [immortality] In time the Amesha Spentas became archangelic in character and less abstract The evil spirits, the *daevas* or *divs*, were headed by Ahriman (also Angra Mainyu) The war between these two supernatural hosts is the subject matter of the fully developed cosmogony and eschatology of Zoroastrianism The entire history of the universe, past, present, and future, the religion teaches, is divided into four periods, each of 3,000 years In the first period there was no matter, the second preceded the coming of Zoroaster, and in the third his faith is propagated The struggle between good and evil rages during these first nine millennia, and men help Ahura Mazdah or Ahriman depending on whether their conduct is good or evil Each person after death crosses the Chinvato Peretav [bridge of the separator], which spans hell If he is reprobate, the bridge narrows and he tumbles to perdition, but if he is worthy of salvation he finds a wide road to the realm of light In the fourth period of the universe a savior, Saoshyant, will appear, the dead will rise for their final reward or punishment, and good will reign eternally Zoroastrianism should be considered quasi-dualistic, rather than (as sometimes described) wholly dualistic, since it predicts the ultimate triumph of Ahura Mazdah This god may be represented in the form of the pure natural substances which he has created, notably fire, but also water and earth The special veneration shown to fire and its use in religious ceremonies has led to the erroneous belief that the Zoroastrians were fire worshipers The care taken to avoid contaminating these substances led to great elaboration of the purification ritual The priests, successors to the pre-Zoroastrian MAGI, acquired great power by their command of the techniques of purification The priests also had great influence on the government in the first period of Zoroastrianism, that under the Achaemenidae, when it was probably the state religion Alexander's conquest of Persia brought disruption, it was followed by 500 years during which little is known of the religion, except that an offshoot, MITHRAISM (stemming from the worship of Mithra), was taking hold further west The Sassanidae restored Zoroastrianism as part of its general revival of Achaemenian culture, and at times persecuted heretical cults, notably MANICHAEISM Islam overwhelmed Persia in the mid-7th cent and all other creeds were virtually abolished There are, however, persons who practice Zoroastrianism to this day—the Ghebers in Iran (the largest community is at Yezd) and the PARSIS in India The religion may have affected Judaism (particularly during the time of the Captivity) and, through GNOSTICISM, Christianity See bibliography under ZOROASTER, James Darmesteter and L H Mills, *The Zend-Avesta* (1880), A V Williams Jackson, *Zoroastrian Studies* (1928)

Zorobabel (zôrŏb'ŭbl), variant of ZERUBBABEL

Zorrilla de San Martín, Juan (hwän' zôrē'ya dā sän" märtēn'), 1857–1931, Uruguayan romantic poet His first book of poems, *Notas de un himno*, was published in 1876, but he first attained prominence (1879) with his patriotic verse "La leyenda patria" and is best known for *Tabaré* (1888), an epic romance The simple plot concerning the tragic story of Tabaré, a half-breed Charrúa Indian, is enhanced by the rich music, the descriptive art, and the freshness of the verse He was also a newspaper editor and a diplomat

Zorrilla y Moral, José (hōsā' thōrē'lyä ē môral'), 1817–93, Spanish poet and dramatist, b Valladolid. He is one of the great romantic writers of Spain, and his fame rests upon the drama *Don Juan Tenorio* (1844), one of the best-loved plays of Spanish literature He visited France in 1850 and went to Mexico in 1855 As a traditional poet, he gathered and reconstructed a large number of legends in *Cantos del trovador* (1841), *Granada* (1852), and other volumes Besides *Don Juan*, his plays include *El zapatero y el rey* [the shoemaker and the king] (1840–42) He also wrote an entertaining autobiography, *Recuerdos del tiempo viejo* (1880–83)

Zosimus (zŏ'simŭs, zō'–), fl 450, Greek historian. He lived at Constantinople. Strongly anti-Christian in approach, he wrote a history of the Roman Empire from the reign of Augustus to 410.

Zr, chemical symbol of the element ZIRCONIUM

Zrenjanin (zrĕnyä'nēn), city (pop 40,517), N Serbia, Yugoslavia, in the fertile Vojvodina It has flour mills, dairy plants, vegetable canneries, and breweries, and it manufactures agricultural machinery It was known as Nagybecskerek until its transfer (1918, confirmed 1920) from Hungary to Serbia, and it was subsequently named Veliki Beckerek and Petrovgrad

Zrinyi (zrĭn'yē), noble Hungarian family of Croatian origin **Nicholas Zrinyi**, 1508–66, distinguished himself in the defense of Vienna (1529) against Sultan Suleiman I, took part in the campaign of Ferdinand I against John Zapolya, who claimed the Hungarian crown as John I, and was appointed (1542) ban (viceroy) of Croatia He is famous for his defense of Szigetvar against the army of Suleiman I and was killed there while attempting a sortie His great-grandson, **Nicholas Zrinyi**, 1616–64, was made ban of Croatia in 1647 He campaigned successfully against the Turks and was the acknowledged national leader of the Hungarians when he died in a hunting accident He was as distinguished poet, one of the first to use Hungarian as a literary language Besides lyric poetry, he also wrote an epic poem on the defense of Szigetvar by his ancestor and several prose works on political subjects, modeled in style on Machiavelli His brother, **Peter Zrinyi**, 1621–71, became ban of Croatia in 1665 Disappointed by the absolutist policy of the Hapsburgs, who owed their success in Hungary largely to the Zrinyi family, he joined (1671) with several other Hungarian magnates in a conspiracy against Emperor Leopold I The plot, backed by Louis XIV of France, was ill organized and easily suppressed Zrinyi was executed His daughter, Helen Zrinyi (d 1703), married Francis I RAKOCZY and, after Rakoczy's death, Emeric THOKOLY She was the mother of the Hungarian national hero, Francis II Rakoczy

Zschokke, Johann Heinrich Daniel (yō'hän hĭn'rĭkh dä'nyĕl chō'ku), 1771–1848, German author and social reformer He lived in Aarau, Switzerland, where he held various political offices A prolific author of prose and verse, he wrote *Des Schweizerlands Geschichte für der Schweizerfolk* (1822, Eng tr, *Popular History of Switzerland*, 1838), historical novels in the manner of Scott, and the educational story *Das Goldmacherdorf* (1817, Eng tr, *Goldenthal*, 1853) M G Lewis ("Monk" Lewis) translated his novel *Abällino* (1794) as *The Bravo of Venice* (1804) His *Stunden der Andacht* [hours of devotion] (1809–16), a collection of pious verse, has found numerous English translators

Zsigmondy, Richard (rĭkh'ärt shĭg'mōn"dē), 1865–1929, Austrian chemist He was professor and director of the institute of organic chemistry at the Univ of Gottingen from 1908 For his researches in colloidal chemistry and for developing in this connection the ultramicroscope, he received the 1925 Nobel Prize in Chemistry He wrote *Colloids and the Ultramicroscope* (1905, Eng tr, 1909)

Zuar (zōō'ar) [Heb, =smallness], father of an Issacharite chief Num 1 8, 2 5, 7 18,23, 10 15

Zubly, John Joachim (tsōō'blē zōō'), 1725–81, American clergyman, prominent in colonial affairs, b St Gall, Switzerland Emigrating to South Carolina sometime after his ordination (1744) to the Presbyterian ministry in London, he became a pastor in Savannah, Ga, in 1760 While he did not approve of the plan for separation from the mother country, he agreed with the patriots in their opposition to the oppressive acts of the British government and was a member of the provincial congress of Georgia and a delegate to the Continental Congress (1775) Charged in Congress with having expressed questionable views and revealed plans in his letters to Sir James Wright, royal governor of Georgia, Zubly fled back to Georgia and avowed his stand as a Loyalist He was banished from Georgia in 1777 In South Carolina for a time, the pastor was finally allowed upon the restatement of Wright in the governorship of Georgia, to return to the city and to his church labors Among his writings are several political pamphlets including *The Stamp Act Repealed* (1766) and *The Law of Liberty* (1775)

Zuccarelli, Francesco (franchĕs'skō tsōōk-karĕl'lē), 1702–88, Florentine landscape painter and decorator He twice visited London, where he decorated the Opera House and was well known through popular engravings of his scenes on the Thames He was a charter member of the Royal Academy His meticulous paintings of landscapes with ruins and small figures are best seen in the Reale Palace, Venice

Zuccaro (tsōōk'karō) or **Zucchero** (tsōōk'kārō), family of Roman painters **Ottaviano Zuccaro** (ôt-tävyä'nō), fl 1st half of 16th cent, though a less successful artist, was the able teacher of two celebrated sons **Taddeo Zuccaro** (tädā'ō), 1529–66, won recognition by his decorative paintings in the Mattei Palace, Rome, and subsequently great popularity He became painter to Popes Julius III and Paul IV and for Cardinal Farnese executed frescoes at his Caprarola palace Among his other works are *Diana* (Uffizi), *The Magdalene* (Pitti Palace, Florence); *Christ in the Tomb* (cathedral, Rheims); and *The Dead Christ* (Villa Borghese) He is buried in the Pantheon close to the tomb of Raphael **Federico Zuccaro** (fādārā'gō), 1543–1609, was associated with his brother for years He completed Vasari's unfinished *Last Judgment* (cathedral, Florence) and for Pope Gregory XIII developed the decorations of the Pauline Chapel, Rome, designed by Michelangelo A misunderstanding resulted in his departure for Flanders. After sojourning there and in Holland, he went to England, where he painted Queen Elizabeth and Mary Stuart Returning to Rome, he completed Taddeo's unfinished work and finally carried through the Pauline Chapel commission he had deserted Subsequently he executed decorations in the Escorial for Philip II of Spain His easel paintings include *Descent of Christ into Limbo* (Milan) and *The Golden Age* (Uffizi) He published a work on art and founded the St Luke Academy, Rome, of which he was president and to which he left his estate

Zucchi, Antonio (äntō'nyō tsōō'kē), 1726–95, Venetian painter Robert and James Adam made Zucchi's acquaintance in Venice, traveled with him in Italy, and persuaded him (c 1766) to come to England to collaborate upon their architectural works Zucchi executed many wall and ceiling decorations for their interiors, notably at Kenwood, Osterley Park, and Harewood House He was elected associate of the Royal Academy in 1770 In 1781 he married Angelica Kauffmann and moved with her to Italy, where he spent the rest of his life

Zuccoli, Luciano (lōōchä'nō tsōōk'kōlē), 1870–1929, Italian novelist His novels, which picture various aspects of Italian upper-class life, were written for popular consumption One of the best is *Le cose più grande di lui* (1922, Eng tr, *Things Greater than He*, 1926) Others are *Il maleficio occulto* [the hidden crime] (1901) and *La freccia nel fianco* [the arrow in the flank] (1913)

Zug (tsōōk), canton (93 sq mi, pop 36,643), Switzerland It is a mountainous area with meadows, forests, and pastures The inhabitants are German-speaking Owned by the counts of Kyburg and later (after 1273) by the Hapsburg family, Zug joined the Swiss Confederation in 1352 and again in 1364, after a brief period of forced Hapsburg domination A Catholic canton, Zug joined the SONDERBUND (1845–47) On the Lake of Zug, area 14½ sq mi, is the capital, **Zug** (pop 12,372), which has preserved much of its late Gothic architecture It manufactures machinery and metalware

Zügel, Heinrich von (hīn'rĭkh fŏn tsī'gul), 1850–1941, German animal and genre painter He taught (1895) at the Munich Academy He was the foremost German painter of cattle of his day His *Oxen Fording a Stream* is in the Metropolitan Museum

Zugspitze (tsōōk'shpĭt"tsŭ), mountain, 9,721 ft high, in the Bavarian Alps and on the Bavarian-Austrian border, highest peak of Bavaria and of Germany A rack-and-pinion railroad connects the popular resort of Garmisch-Partenkirchen, at its foot, with the summit

Zuhair (zōōhīr'), fl 6th cent, Arabian poet He is often considered the greatest writer of Arabic poetry in pre-Islamic times, and he is represented in the MUALLAQAT His poems deal with raids and other subjects of nomadic desert life

Zuider Zee (zī'dur zē', zā', Dutch zoi'dur zā'), former shallow inlet of the North Sea, c 80 mi long, indenting the N and central Netherlands Once a lake, it was joined to the North Sea by a great flood in the 13th cent A vast drainage project, begun in 1920, split the old Zuider Zee into the IJSSELMEER, S of the Ijsselmeer dam, and the Waddenzee, between the West Frisian Islands and the dam

Zuloaga, Ignacio (ēgnä'thyō thōōlō'ä'gä), 1870–1945, Spanish painter, a native of the Basque country He lived chiefly in Paris after 1889, but his paintings are Spanish in subject His figures, often of Basque peasants or of bullfighters, are usually richly colored against a somber background Among his paintings are *Daniel Zuloaga and His Daughters* (Luxembourg Mus, Paris), *Uncle David and His Family* (Mus of Fine Arts, Boston), portrait of Paderewski (Steinway Hall, New York), a self-portrait, *The Family of a Gypsy Bullfighter*, and others (Hispanic Society, New York), and *Victims of the Fiesta* (Metropolitan Mus)

Zululand (zōō'lōōländ"), district (10,427 sq mi, pop 398,940), NE Natal, Union of South Africa, on the Indian Ocean It rises from a low coastal plain to the foothills of the Drakensberg range Tribal reservations occupy most of the area, and the native population is 387,113 Zululand was annexed by Great Britain in 1887 and it became part of Natal in 1897 A large element of the population are **Zulu** They belong to the southern branch of the Bantu-speaking peoples, the MATABELE are a Zulu offshoot Although some maize is grown, the Zulu economy depends primarily on raising cattle Marriage, which may be polygamous, is usually contracted by giving gifts of cattle (the *lobola*) to the bride's family The Zulu ordinarily do not live in villages, but in fenced compounds (kraals), where an extended family, under the headship of the oldest man, occupies beehive-shaped huts and where the

cattle are kept penned Today Zulu society has deteriorated, with many of the men going to work in the cities and mines The Zulu rose to power in the early 19th cent under Chaka, who reduced many tribes to vassalage His warlike successors soon encountered the Boer settlers who came into Natal on the Great Trek (see TREK) Dingaan, the Zulu chief, ambushed and slaughtered some 500 Boers in 1838 In revenge he and many of his followers were killed in battle by Andries PRETORIUS The succeeding chief, Mpanda, became a vassal of the Boer republic of Natal His son, CETEWAYO, resumed warfare and ignored a British ultimatum that he submit to their rule Great Britain launched an attack in 1878, and after suffering several grave defeats, finally triumphed in July, 1879 Since 1907 there have been no major Zulu disturbances See A T Bryant, *Olden Times in Zululand and Natal* (1929)

Zumárraga, Juan de (hwän' dā thōōm'rägä), 1468–1548, Spanish churchman, first bishop of MEXICO, a Franciscan Going to Mexico in 1528, he became prominent in governmental affairs and opposed Nuño de GUZMÁN and the *audiencia* He was officially made protector of the Indians and exerted strenuous efforts to convert the natives and to end human sacrifice He even destroyed valuable Indian manuscripts and remains He was important in founding the college of Santa Cruz de Tlatteloleo for the education of the Indians A close friend and able assistant of Viceroy Antonio de MENDOZA, he helped to improve conditions in New Spain Zumárraga was instrumental in bringing the first printing press to the New World and wrote religious manuals which were among the early products of the press

Zumbrota (zŭmbrō'tŭ), village (pop 1,386), SE Minn , NNW of Rochester and on the Zumbro, in a farming area In the fairgrounds is a covered bridge built c 1863

Zungaria see DZUNGARIA

Zuni (zōō'nyē, zōō'nē), North American Indian pueblo, W N Mex , 33 mi S of Gallup This 2,700 inhabitants are Pueblo Indians who speak the Zuni, or Zunian, language The language comprises its own stock The Zuni have a high material culture They are a sedentary people, who farm irrigated land and are noted for basketry, pottery, turquoise jewelry, weaving, and ceremonial dances Their chief festival is the Shalako, which represents Zuni deities in the act of blessing new homes It is held in late November or early December The original seven Zuni villages are usually identified with the mythical Seven Cities of Cibola, which were given much fame by Marcos de Niza, and in 1540 Francisco Vásquez de Coronado attacked the villages, thinking that they had vast stores of gold The villages were abandoned in the Pueblo revolt of 1680 The present pueblo was built (c 1695) on the site of one of the original seven villages The name commonly appears as Zuñi See M C Stevenson, *The Zuñi Indians* (1905), Aileen Nusbaum, *The Seven Cities of Cibola* (1926), E W Parsons, *Hopi and Zuñi Ceremonialism* (1933), Ruth Benedict, *Zuni Mythology* (1935), F H Cushing, *My Adventures in Zuñi* (1941)

Zunz, Leopold (lā'ōpôlt tsōōnts'), 1794–1886, German-Jewish scholar His critical research laid the foundation of the scientific study of Judaism Part II of his *Synagogale Poesie des Mittelalters* (1855) was translated as *The Suffering of the Jews during the Middle Ages* (1907)

Zuph (zŭf) **1** Ancestor of Samuel 1 Sam 1 1, 1 Chron 6 35 In verse 26 he is called Zophai **2** Unlocated district near Jerusalem, associated with Saul 1 Sam 9 5 See RAMATHAIM-ZOPHIM

Zur (zŭr) [Heb , =rock] **1** Prince of Midian killed by the Jews Num 25 15, 31 8, Joshua 13 21 **2** Son of Jehiel 1 Chron 8 30, 9 36

Zurbarán, Francisco de (fränthē'skō dā thōōrbärän'), 1598–1662, Spanish religious painter of the naturalistic school of Seville, b Badajoz He was the son of a poor farmer, who sent him to study with a painter of Seville His early work, however, shows the prevalent influence of Caravaggio and Ribera Zurbarán early gained a high reputation, painting chiefly for the churches and convents of Andalusia About 1630 he was appointed painter to Philip IV He excelled in painting scenes of monastic life The work of Zurbarán is distinguished for its beautiful and reserved color, clear luminosity, vigorous realism, and magistral simplicity of design Although severely ascetic, his paintings have a gentle and unforced sweetness, rare in a Spanish realist They have always enjoyed a very high repute in Spain, but are less known outside that country Many remain in the churches and convents of Andalusia Among the best known are *The Apotheosis of St Thomas Aquinas*, *Miracle of St Hugo*, and *Virgin Blessing Various Saints* (all Seville), *Franciscan Monk* (National Gall , London), *Portrait of a Lady* (of which one version is in the Prado, another in the Metropolitan Mus), *Doctor of the University* (Gardner Mus , Boston), and *Carthusian Monk Reading* and *Magdalene* (Hispanic Society, New York)

Zurich (zŏŏ'rĭk), Ger *Zürich* (tsü'rĭkh), canton (668 sq mi , pop 674,505), Switzerland. Agricultural in the north, it also has meadowlands, forests, and numerous industrial towns, notably WINTERTHUR and its capital, **Zurich** (pop 333,395) Zurich is the largest Swiss city both in population and in economic importance, its industrial products include automobiles, radios, clothes, paper, foodstuffs, and textiles, it is also a printing and publishing center The site was occupied as early as the Neolithic period by lake dwellers Settled by the Helvetii, it was conquered (58 B.C) by the Romans, and after the 5th cent passed successively to the Alemanni, the Franks, and Swabia A free imperial city after 1218, it accepted (1336) a corporative constitution which lasted till 1798 and joined (1351) the Swiss Confederation Its claim to TOGGENBURG led to a ruinous war (1443–50) with the other confederates In the 16th cent Zurich, under the influence of ZWINGLI, became the leading power of the Swiss REFORMATION and once more provoked an internal war The Catholic victory at Kappel (1531) ended Zurich's political leadership In 1799 Zurich was the scene of two battles of the French Revolutionary Wars (see HELVETIC REPUBLIC) Zurich developed as an intellectual and scientific center in the 18th and 19th cent , it has a university (founded 1832), a world-famous polytechnical school, and several museums Two churches—the Gross-Münster (11th–13th cent) and the Fraumünster (13th–15th cent)— the 17th-century town hall, and numerous old residences contrast harmoniously with many fine modern structures The city is beautifully situated on the Limmat and Sihl rivers and at the northern end of the **Lake of Zurich** (c 25 mi long and c 2 mi wide), which is noted for its peaceful scenery

Zuriel (zū'rēĭl, zūrī'ŭl) [Heb , =God is my rock], chief Merarite Num 3 35

Zurishaddai (zū'rĭshä'dāī) [Heb , =the Almighty is my rock], father of a Simeonite chief Num 1 6, 2 12, 7 36,41, 10 19

Zutphen (zŭt'fun), municipality (pop 21,505), Gelderland prov , E central Netherlands, on the Ijssel and NE of Arnhem It is a dairy and lumber center Zutphen has retained a 12th-century Gothic church and many fine buildings of the 17th and 18th cent It was an important Spanish stronghold in the Dutch struggle for independence Sir Philip Sidney died (1586) in a skirmish under its walls in an unsuccessful attempt by his uncle, the earl of Leicester, to take it from the Spanish Zutphen fell to the Dutch under Maurice of Nassau in 1591

Zuzims (zū'-), unknown people Gen 14 5

Zweibrücken (tsvī'brŭkun), Fr *Deux-Ponts* (dŭpō'), city (pop 23,099), Rhenish Palatinate, W Germany, on the border of the Saar Territory The destruction of 80 percent of its buildings in the Second World War severely curtailed its industries (metal, leather, and textile manufactures) First mentioned in 1170, Zweibrücken was chartered in 1352 and passed (1385) to the PALATINATE branch of the Bavarian house of Wittelsbach In 1410 it became the seat of the counts (later dukes) palatine of Zweibrücken under a cadet line of the Palatinate branch Charles X of Sweden was the nephew of John II, duke palatine of Zweibrücken, his son, Charles XI of Sweden, inherited Zweibrücken in 1681, and the duchy remained in personal union with Sweden until the death (1718) of Charles XII The Zweibrücken line continued in Sweden until the death (1741) of Charles XII's sister, Ulrica Leonora, and in Zweibrücken until 1733, when the related Palatinate-Birkenfeld line acceded On the death (1799) of Elector Charles Theodore of Bavaria, who had reunited all the Wittelsbach lands except Zweibrücken, the duke palatine of Zweibrücken, his next of kin, succeeded him as elector of Bavaria, thus completing the reunion of the family territories, as Maximilian I became (1806) the first king of Bavaria In the meantime, however, the duchy of Zweibrücken itself had been annexed (1797) to France It was restored to Bavaria at the Congress of Vienna (1814–15) and since then has shared the history of the Rhenish Palatinate

Zweig, Arnold (ärnôlt tsvīkh'), 1887–, Austrian novelist His best-known work is the great war novel, *Der Streit um den Sergeanten Grischa* (1927, Eng tr , *The Case of Sergeant Grischa*, 1927) A Zionist, he was denationalized by the Nazis and his property was confiscated He now lives and works in Palestine, the setting of his novel *De Vriendt keert heim* (1933, Eng tr , *De Vriendt Goes Home*, 1933) His best writing is characterized by a broad humanity, realism, and an ironic style Among other works are the short stories *Claudia* (1912, Eng tr , 1930) and the novels *Erziehung vor Verdun* (1935, Eng tr , *Education before Verdun*, 1936), and *The Axe of Wandsbek* (1946, in Eng tr only)

Zweig, Stefan (shtĕf'ăn), 1881–1942, Austrian biographer, poet, dramatist, and novelist Born in Vienna of a well-to-do Jewish family, he was part of the literary circle of that highly civilized city until the First World War shocked him out of his comfortable life His poetic drama *Jeremias* (1917; produced in New York, 1939, by the Theatre Guild) was passionately anti-war After the war he lived in Salzburg until driven into exile by the Nazis in 1933 Although his first published works had been poetry, he is best known for the long list of biographies written in his maturity. The subjects of these include his friend Romain Rolland (1921), Marie Antoinette (1932), Erasmus (1934), Mary Stuart (1935), Magellan (1938), and Balzac (posthumously pub 1946) Among his works of fiction are *Ungeduld des Herzens* (1938; Eng tr., *Beware of Pity*, 1939) and *Schachnovelle* (1944, Eng tr , *The Royal Game*, 1944) He and his second wife committed suicide in Brazil See his autobiography, *The World of Yesterday* (1943), biography by his first wife, Friderike Zweig (1946)

Zwickau (tsvĭ'kou), city (pop 122,862), Saxony, E Germany, S of Leipzig, in an important coal-mining region It is a major industrial center, producing textiles, machinery, automobiles, chemicals, mining equipment, pianos, and paper Chartered in 1212, it was a free imperial city from 1290 to 1323, when it passed to the margraves of Meissen Zwickau was (1520–23) the center of the Anabaptist movement of Thomas MÜNZER It was repeatedly plundered in the Thirty Years War Among its notable buildings are its 15th-century basilica, the Church of St Catherine (14th cent), and the city hall (15th cent) Robert Schumann was born here.

Zwicky, Fritz (tsvĭ'kē), 1898–, Swiss-American astrophysicist, b Bulgaria, educated at Zurich Associated with the California Institute of Technology since his arrival in the United States in 1925, he became professor of astrophysics in 1942 The discoverer of a number of supernovae and novae, he suggested an explanation for their occurrence He is known also for his study of jet propulsion, cosmic rays, crystals, and slow electrons and ions in gases

Zwingli, Huldreich or **Ulrich** (hōōl'drĭkh tsvĭng'lē, ōōl'rĭkh), 1484–1531, Swiss Protestant reformer Zwingli received a strong classical education, considerably influenced by the humanists, Erasmus and Mirandola His devotion to learning and his passion for individual freedom, developed through contact with the self-governing traditions of the Swiss cantons, were strong determining factors in his life In 1506 he was ordained and appointed pastor of Glarus While still accepting a stipend from the Church, he became people's vicar at Einsiedeln in 1515 Zwingli was deeply imbued with the Swiss desire for greater independence, an aim jeopardized by the conflicting claims for alliance presented by France and the pope At this time and throughout his life Zwingli believed it a pastoral duty to give guidance in political matters and instruction in morality to the entire Christian congregation As authority for the discharge of these duties he accepted the Bible and not the Church When he became vicar at the Grossmünster of Zurich in 1518 he found the democratic institutions of the community well adapted to the promotion of his beliefs In 1519 he successfully opposed the dispensing of indulgences in the city and soon was preaching against clerical celibacy, monasticism, and many other church practices With his expression of opposition to Lenten observances in 1522 the Zwinglian form of the Reformation was well under way, and with the publication of *Archeteles* in the same year, he made clear his belief in freedom from the control of the Catholic Church Opposed by church authorities, he was supported by the civil powers, and it was decided to settle the question at a public disputation before the general council at Zurich in 1523 Zwingli presented his doctrines in 67 theses He argued for acceptance of the Bible as the sole basis of truth and the denial of all authority and practices contrary to, or not included in, the Scriptures The council publicly approved the Zwinglian position and instructed all priests in the canton to follow his doctrine By 1525 the break with the old order was well advanced images and pictures had been removed from the churches, the language and services were simplified, the Lord's Supper was observed as a commemorative feast and not a sacrament, convents were abolished, and programs of educational and social reform were initiated The reformer had already publicly celebrated his marriage, thus crowning his arguments against the enforced celibacy of the clergy Doctrinal disputes, for some time focused on conflicting interpretations of the Eucharist (see LORD'S SUPPER), had divided the Lutheran Protestants and the Zwinglian adherents of S Germany and German Switzerland In 1529 Philip of Hesse endeavored to achieve harmony within the Protestant ranks by calling together the disputants in the Marburg Colloquy Zwingli and OECOLAMPADIUS, Luther and MELANCHTHON, were present, but no agreement was reached As Calvinism gradually superseded Zwinglian doctrine, the same general division held Within Switzerland dissension was severe Zwingli had in view a church founded upon the republican basis of the congregation, and his plans included political reform to establish Protestantism in Europe His influence had been used in persuading Bern to follow Zurich in revolting from Rome But the Forest Cantons of Switzerland had remained true to the Church and had formed an alliance to resist the Reformation After a truce in 1529, Zurich imposed a trade embargo on those cantons The can-

tons retaliated with war, and at the battle of Kappel, Zwingli was killed. His body was mutilated as that of a traitor. It was partly on the groundwork laid by Zwingli that Jean Calvin built a comprehensive theological system, and the Consensus Tigurinus (1549) marks the departure of the Swiss Reformation from Zwinglian to Calvinist doctrine. Among Zwingli's important colleagues was BULLINGER, his son-in-law and successor, who aided in formulating Zwingli's theological teachings in the First Helvetic Confession (1536). See R. E. Davis, *Problem of Authority in the Continental Reformers* (1946).

Zwolle (zwŏ'lə), municipality (pop. 46,845), capital of Overijssel prov., N central Netherlands. It produces chemicals, clothing, and metal goods. An old town, Zwolle has a 15th-century city hall and the fine 15th-century Gothic Church of St. Michael. Near by is the 14th-century monastery where Thomas à Kempis lived.

Zwolle (zwŏ'lē), town (pop. 1,500), W La., near the Texas line, settled 1896. Since 1928 the oil industry has replaced lumber in importance.

Zworykin, Vladimir Kosma (zwŏ'rĭkĭn), 1889–, American physicist, b. Russia, educated in Russia, at the Collège de France, and at the Univ. of Pittsburgh (Ph.D., 1926). He was naturalized in 1924. On the staff of the Radio Corp. of America after 1929, he became vice president and technical consultant of the corporation in 1947. His important researches in electronics enabled him to develop with his co-workers the Iconoscope, or electric eye, of the television apparatus and the Kinescope, a cathode-ray tube, in the television receiving apparatus. A group under his direction produced an electron microscope (1939), which has since been improved. Zworykin is co-author of *Photocells and Their Application* (1930, rev. ed., 1934), *Television* (1940), *Electron Optics and the Electron Microscope* (1945), and *Photoelectricity and Its Application* (1949).

Zyrardow, Pol. *Żyrardów* (zhĭrär'dŏŏf), city (pop. 20,186), central Poland, SW of Warsaw. It is a center of the Polish textile industry.

Zyrians: see KOMI.

1953 SUPPLEMENT TO THE COLUMBIA ENCYCLOPEDIA

EACH YEAR brings many changes in the quick pace of modern events Therefore it is both convenient and useful to improve any general encyclopedia every few years with supplementary material This present supplement takes up the account of events from the time that *The Columbia Encyclopedia*, Second Edition, had to leave off as it went to press in May, 1950, and carries them through July 2, 1953

The Second Edition appeared in 1950, but when it was put into the hands of the printer the warfare in Korea had not yet begun That notable event has been but one of many important happenings in the intervening time In this Supplement we have attempted to sketch the course of history Many of the notable people given space in the Encyclopedia have died or have gained new importance We here note all such deaths and chronicle, in so far as space will permit, the progress of men into greater positions—or, in a few cases, decline into lesser positions New figures have arisen in science, politics, the military life, literature, and music For them new short biographies appear

The appearance of the 1950 Census of the United States supplied new population figures to replace those given in the Second Edition We have therefore appended a list of the new figures in a separate section of this Supplement

Material in the Encyclopedia is not repeated in the Supplement Pronunciations given for new entries here follow the system demonstrated on the page facing page one of the Encyclopedia Words in SMALL CAPITALS are cross-references to other articles in the Supplement (not to articles in the main book)

Copyright 1953 by Columbia University Press

33689

Aanrud, Hans, d 1953

Abderhalden, Emil, d 1950

Abdullah, king of Jordan, was assassinated in 1951 He was succeeded by TALAL

Acheson, Dean Gooderham, was, as Secretary of State, much attacked by members of Congress U S policy in the Korean war, particularly the attitude toward Formosa, aroused much opposition In addition, there were the questions of unrest in the Middle East, East-West relations in Berlin, and other problems of relations with the Soviet Union Acheson was criticized for his earlier friendly attitude toward Alger Hiss and was attacked for his handling of the loyalty and security policy of the Dept of State In his term he aided the establishment of the North Atlantic Treaty Organization and the security pact contracted with Australia and New Zealand In 1953 he was succeeded by John Foster Dulles

Adamic, Louis, d 1951 He was found shot through the head in his farmhouse, which had been set afire His death was officially declared suicide

Adenauer, Konrad (kōn'rät ä'dunou"ur), 1876 , German statesman A member of the Catholic Center party, he was dismissed as lord mayor of Cologne by Hitler in 1933 and was twice imprisoned by the Nazi regime After the Second World War he founded (1945) the Christian Democratic Union He became chancellor of the [West] German Federal Republic in 1949 and in 1951 also became minister of foreign affairs A foremost advocate of West European cooperation, he became a leading figure in the EUROPEAN COAL AND STEEL COMMUNITY and secured German ratification of the EUROPEAN DEFENSE COMMUNITY treaty and the Allied peace contract with West Germany in 1953 He visited the United States in April, 1953

Afghanistan Tension between Afghanistan and Pakistan over the Pushtunistan question continued in the years after 1950 In 1952, King Zahir, while reiterating a hope for friendly relations with other countries, continued support of Pushtunistan independence Relations with India continued good A four-year trade agreement with the USSR was signed in 1950, and in 1951 a Point Four aid agreement was concluded with the United States

Aiken, Conrad A collection of his short stories was published in 1950, and *Ushant an Essay*, autobiographical in character, appeared in 1952

Aitken, Robert Grant, d 1951

Akihito (äkē'hētō), 1933-, Japanese prince, son of Emperor Hirohito He was officially named heir apparent to the Japanese throne in Nov , 1952 In 1953 he sailed to England, where he attended the coronation of Queen Elizabeth II On his way there he went through Canada and visited New York city

Alda, Frances, d 1952

Alder, Kurt (äl'dur), 1902- German chemist, educated at Berlin and at Kiel He was a member of the laboratory research staff of the Bayer Dye Works (1936–40), in 1940 he became professor of chemistry and director of the chemical institute of the Univ of Cologne The 1950 Nobel Prize in Chemistry was awarded jointly to Alder and to Otto Diels for their discovery of a process for the synthetic production of complex chemical compounds

Alessandri, Arturo, d 1950

Altamira y Crevea, Rafaël, d. 1951

Anglo-Egyptian Sudan. The quarrel between Great Britain and Egypt over the future of the Sudan grew sharper after May, 1950, and Sudanese desire for independence became more vocal On Oct 22, 1952, the British voted to give the Sudan a constitution permitting local self-government A pact between the Sudan and Egypt (Oct 29, 1952) set the date Dec. 31, 1955, as the final one for the Sudan to decide whether to become independent or join Egypt This was followed by an agreement (Feb 12, 1953) between Great Britain and Egypt providing that the Sudan should decide its own future within three years Naguib of Egypt declared, however, that he would repudiate this pact if the Sudanese were to join the British Commonwealth

Annapurna (ŭn-näpōōr'nu) massif of central Nepal Himalayas, N central Nepal, at 28°35'N 84°E It is 35 mi long and rises in the west to Annapurna I (26,502 ft) and in the east to Annapurna II (26,041 ft) Annapurna I was first climbed in 1950 by the French expedition led by Maurice Herzog Herzog's book, *Annapurna* (1953, Eng tr), gives the altitude as 26,493 ft , but the figure 26,502 is based on the use of a more exact mutual conversion factor

Arab League The Arab collective security pact prepared in 1950 had by 1952 been ratified by all members Jordan's treaty negotiations (1950) with Israel ended under threats of expulsion from the league, which gained promises from all members to make no separate agreements with Israel The league's official attitude toward Jordan's annexation of Arab Palestine was that the territory was being held by Jordan only pending final determination of its status Wariness of the expansionist ambitions of Jordan relaxed somewhat with the death of Abdullah In Feb , 1951, plans for joint foreign policy, national defense, and economic and resource policies were proposed Economic rather than military pressure was exerted upon Israel by league members, although there were skirmishes, particularly along the Israel-Syria border The Arab League expressed its support of the UN Charter In May, 1953, Libya joined the league as its eighth member, and an economic friendship pact was signed by all the eight members

Argentina continued after 1950 under the domination of Juan Domingo Perón, who was reelected president (for six-year term) in 1951 Opposition newspapers (notably *La Prensa*) were made powerless in 1951 Chaco province was renamed Presidente Perón and both La Pampa province and La Plata city were renamed Eva Perón in 1952

atomic energy The United States, Canada, and Great Britain agreed (Nov , 1950) to make available to the public all information concerning the construction and operation of low-power nuclear reactors In Jan , 1952, the United Nations General Assembly, after vigorous debate, adopted a resolution to combine the United Nations Atomic Energy Commission and the Commission for Conventional Disarmament to form the United Nations Disarmament Commission with representatives of the 11 nations on the Security Council and Canada Under the sponsorship of UNESCO, representatives of 12 European states met at Geneva (Feb , 1952) to consider an agreement for bringing about international cooperation in nuclear research The Council of Representatives (with headquarters in Geneva), comprised of delegates from the states signing the agreement, was commissioned to report on its work after 18 months, one ultimate goal is the creation of an international nuclear research laboratory In the United States the National Security Resources Board submitted a plan for civil defense, the Civil Defense Administration, first created (Dec , 1950) by executive order within the Office for Emergency Management, was later established as an independent government agency Its functions include studies of methods of protection against and treatment of casualties caused by atomic and other weapons Research in nuclear physics progressed in several directions Early in 1950 the atomic energy program was recast in line with President Truman's directive to continue work on all forms of weapons including the hydrogen bomb, some of the tests made near Eniwetok atoll were said to have advanced research in thermonuclear weapons and therefore probably included testing of hydrogen-bomb materials Other atomic tests were conducted at Frenchman's Flat and Yucca Flat, Nevada, in 1951 and 1952 The United States announced the development, in 1951, of a tactical atomic bomb, a compact weapon for battlefield use against ground troops, and, in 1952, of a massive (85-ton) but maneuverable artillery weapon Late in 1951 the U S Atomic Energy Commission announced the first successful production of electric power from atomic energy Construction of the first atomic-powered submarine, the *Nautilus*, was under way by 1952 High-energy accelerators—cyclotrons, synchrotrons, and betatrons—were further developed in new designs and with increased power for accelerating particles to be used in bombarding atoms, by 1952 the billion-volt acceleration range had been reached

Attlee, Clement Richard, resigned as British prime minister as a result of the defeat of the Labour party in the elections of Oct 1951 He became the leader of the opposition though his position as party head was challenged by Aneurin Bevan

Austin, Warren Robinson, retired as permanent U S representative to the United Nations in Jan 1953, and was succeeded by Henry Cabot Lodge Jr

Australia Economic problems occupied much attention in Australia after 1950 The growth of inflation caused much uneasiness, but deflationary measures caused some unpopularity for the Liberal government of Robert Gordon Menzies, giving the Labour party hope of gaining the 1953 elections The fall in the wool market in 1952 caused some hardship and demonstrated anew Australia's continuing dependence on cattle breeding and agriculture despite the growth of industry The discovery of uranium deposits had already made Australia conscious of atomic-energy possibilities long before a commission was appointed in 1952 This new interest was emphasized when atomic explosions were held by Great Britain at an island off the Australian west coast in Oct , 1952 Australia continued its close connection with the Commonwealth of Nations and rejoiced at the coronation of Elizabeth II as "queen of Australia" June 2, 1953 For defense matters and development, however, Australia drew closer to the United States The members of the Pacific pact organization (ANZUS, for Australia, New Zealand, and the United States) had its first meeting in Aug , 1952

Austria Repeated attempts by the Western powers to reach agreement with the USSR on a peace treaty with Austria had yielded no result as of July 1 1953 Austria continued under four-power occupation and under a Catholic-Socialist coalition cabinet In June, 1953, the USSR resumed full diplomatic relations with Austria and eased its occupation policy

aviation see JET PROPULSION

Azuela, Mariano, d 1952

Bankhead, Tallulah Brockman, 1903-, American actress b Huntsville, Ala , daughter of William Brockman Bankhead She appeared on the stage in 1918, and from 1923 to 1930 she was highly successful in London In New York her greatest triumphs were in such plays as *The Little Foxes* and *The Skin of Our Teeth* She also appeared in the movies (e g , *Lifeboat*, 1944) and on radio and television Her beauty and wit, as well as her uninhibited behavior, have created a legend both on and off the stage In 1952 her autobiography appeared, entitled, appropriately enough, *Tallulah*

Barker, Sir Herbert Atkinson, d 1950

Barkley, Alben William. In 1951 he completed 38 years of continuous service in the U S Congress A candidate for the Democratic presidential nomination in 1952, he withdrew when labor leaders refused to endorse him His term as Vice President

of the United States expired in Jan , 1953

baseball The New York Yankees continued to dominate the major leagues, winning for the fourth consecutive time in 1952 both the American League pennant and the world series National League champions defeated in the world series by the Yankees were the Brooklyn Dodgers (1949 and 1952), the Philadelphia Phillies (1950), and the New York Giants (1951) In Sept , 1951, major league clubowners elected Ford C Frick, president of the National League, to succeed Albert B (Happy) Chandler as commissioner of baseball For the first time in 50 years a major-league franchise was shifted when in March, 1953, the Boston Braves, with the consent of the other National League teams moved to Milwaukee American League clubowners turned down the petition of the St Louis Browns to move to Baltimore

Baudouin (bōdōăN') 1930 , king of the Belgians (1951–) He succeeded on the abdication of his father Leopold III

Bauer, Harold, d 1951

Baxter, Gregory Paul, d 1953

Belgian Congo In 1950 a ten-year plan for economic and social development of the colony was put into force

Belgium King Leopold III abdicated in 1951 in favor of his son, King Baudouin In 1952 Belgium became a charter member of the EUROPEAN COAL AND STEEL COMMUNITY

Benelux, customs union of Belgium, the Netherlands and Luxembourg effective since 1948

Benét, William Rose, d 1950

Ben-Gurion, David (bĕn-gōō'rĭŏn) 1886– Israeli statesman, first prime minister of Israel (1948–), b Poland Fleeing to Palestine after pogroms of 1905, he was long an active Zionist and was pro-British in the First World War, in which he helped to organize the Jewish Legion

Benson, Ezra Taft, 1899–, U S Secretary of Agriculture (1953–), b Whitney, Idaho, grad Brigham Young Univ , M S Iowa State College 1927 He was an extension economist and marketing specialist at the State University of Iowa (1930–38) and executive secretary of the National Council of Farmer Cooperatives (1939–44) In 1943 he was appointed a member of the Quorum of Twelve Apostles, governing the Mormon Church

Benson, Frank Weston, d 1951

Ben-Zvi, Itzhak (ĭtsh'hăk bĕn-tsvē') 1884 Israeli statesman and Orientalist b Russia An active Zionist, he emigrated to Palestine in 1907 and later became a leader of the Mapai (Labor) party He succeeded Chaim Weizmann and became second president of Israel in 1952

Beria, Lavrenti Pavlovich (bĕr'ĭ-ă), 1899?–, Russian Communist leader, b Georgia In charge of the secret police from 1938, vice premier from 1941, and a member of the Politburo (after 1952, presidium) of the central committee of the Communist party, he became vice premier and minister of internal affairs in the Malenkov cabinet after Stalin's death but was in July, 1953, ousted from office and arrested

berkelium, chemical element (symbol=Bk), of atomic number 97 Announcement was made (Jan , 1950) of its production in the cyclotron at the Univ of California as a result of irradiating with helium ions an isotope of americium

Berlin, Irving His musical comedy *Call Me Madam* (1950) was highly successful both on stage and as a moving picture

Bernstein, Leonard (bûrnstĭn'), 1918 , American composer and conductor, b Lawrence, Mass , grad Harvard, 1939, and Curtis Institute of Music 1941 He has been highly successful in several fields of musical composition the Jeremiah Symphony (1942), the ballet *Fancy Free* (1944), and the musical comedies *On the Town* (1945) and *Wonderful Town* (1953) Among American orchestras he has conducted are the New York Philharmonic and the Boston and Pittsburgh symphony orchestras

Bethlen, Count Stephen, was unofficially reported to have died in a Russian prison in 1950

Bevan, Aneurin, increased his strength in the British Labour party by opposing the party's policy of advocating defense spending and British cooperation with the United States in foreign policy Bevan favored instead coming to terms with the USSR and devoting primary attention to economic and social ills in Great Britain

Bevin, Ernest, d 1951 Because of ill-health he resigned as foreign minister in March, 1951, and became lord privy seal Herbert Morrison succeeded him as foreign minister

Birmingham, George A see HANNAY, JAMES OWEN

Bjerknes, Vilhelm Friman Koren, d 1951.

Black, Hugh, d 1953

Blackwell, Alice Stone, d 1950

Blackwood, Algernon, d 1951

Bloch, Felix, 1905 , American physicist, b Switzerland, grad Federal Technical Institute in Zurich, 1927, Ph D Univ of Leipzig, 1928 He lectured on theoretical physics at Leipzig (1932) After coming to the United States he was associate professor at Stanford Univ from 1936 In 1939 he was naturalized From 1942 to 1945 he was engaged in research related to the war effort The 1952 Nobel Prize in Physics was awarded jointly to Bloch and E M Purcell for their independent development of the nuclear resonance or nuclear induction method of measuring magnetic fields of atomic nuclei.

Bolton, Herbert Eugene, d 1953

Bondfield, Margaret Grace, d 1953.

Bonsels, Waldemar, d 1952

Booth, Evangeline Cory, d 1950

Booth, Shirley, 1907 , American actress, b New York city Her real name is Thelma Booth Ford Experience in stock companies preceded her first appearance on Broadway in 1925 In 1935 she won great success in *Three Men on a Horse* An actress of great range, she has had opportunity to show her abilities in comedy, drama, and musical comedy in such productions as *My Sister Eileen*, *The Philadelphia Story*, *Tomorrow the World*, *A Tree Grows in Brooklyn*, and *The Time of the Cuckoo* Her part in *Come Back, Little Sheba* in 1950 brought her acclaim and awards In 1952 she received the best-actress award of the Academy of Motion Picture Arts and Sciences for the film version of that play

Borgese, Giuseppe Antonio, d 1952, in Italy, to which he had returned in 1948

Bourassa, Henri, d 1952

Bowles, Chester Bliss, was U S Ambassador to India (1951–53)

boxing After Joe Louis retired (March 1, 1949) *Ezzard Charles* defeated Joe Wolcott (real name Arnold Cream) on June 22, 1949, and was recognized as world heavyweight champion by the National Boxing Association Charles then outpointed (Sept 27 1950) Louis, who came out of retirement, to win universal recognition as champion Charles successfully defended his title (1950–51) against Nick Barone, Lee Oma Wolcott, and light heavyweight champion Joey Maxim before Wolcott knocked him out in the seventh round on July 18, 1951 Wolcott, the oldest man ever to hold the title, defeated Charles again, on points (June 5, 1952), but lost the championship to Rocky MARCIANO by a knockout in the 13th round on Sept 23, 1952 The hard-hitting Marciano knocked out Wolcott again on May 15, 1953, in the first round Outside the heavyweight ranks, the most prominent boxer was RAY ROBINSON

Bradley, Omar Nelson His book, *A Soldier's Story* (1951), is an account of his experiences in Africa and Europe in the Second World War It was announced that he was to be succeeded in Aug , 1953, as chairman of the joint chiefs of staff by Arthur William Radford

Branson, Edwin Bayer, d 1950

Brazil Getulio Vargas returned to power after his election as president in 1951

Bridges, Harry In June, 1953, the U S Supreme Court dismissed the indictment for perjury against Bridges, thus voiding his prison sentence and absolving him of the charges on which he had been indicted The court found that the statute of limitations applicable to the case had run out and that Bridges's indictment had thus come too late

Britten, Benjamin His later operas include *Billy Budd* (1951) and *Gloriana* (1954)

Brockway, Howard, d 1951

Brownell, Herbert, Jr , 1904–, U S Attorney General (1953), b Peru, Nebr , grad Univ of Nebraska, 1924, LL B Yale 1927 Admitted to the bar in 1927, he practiced law in New York city He managed Thomas E Dewey's campaigns for the governorship of New York in 1942 and for the Presidency in 1944 and 1948 From 1944 to 1946 he was chairman of the Republican National Committee He played an important part in securing the nomination and election of President Dwight D Eisenhower in 1952 and was later appointed to a cabinet post

Buber, Martin (bōō'bĕr), 1878–, Jewish philosopher, b Vienna His mystic and theological writings, many of them on the teachings of the Hasidim, have had influence both in and outside Judaism A militant Zionist, he became a professor at the Hebrew university in Jerusalem in 1938 His *Good and Evil* was published in the United States in 1953

Bulganin, Nikolai Aleksandrovich (nyĭkŭlī' ŭlyĭksăn'drŭvĭch bōōlgä'nĭn), 1895?–, Russian Communist leader After playing a vital part in the defense of Moscow (1941) in the Second World War, he was made a marshal He was minister of the armed forces (1947–49), became vice premier in 1949, and in 1953 entered the Malenkov cabinet as defense minister and vice premier

Bunche, Ralph Johnson, was awarded the Nobel Peace Prize in 1950

Burgess, Gelett, d 1951

Burma, Union of Troubles with Communist rebels and Karen nationalists continued to plague Burma after 1950 Campaigns were undertaken against the Communists with some success in 1951 and 1952, but the group of rebels in the Shan states remained powerful in 1953 The government made attempts to placate the Karen insurgents, and in 1952 an autonomous Karen state was set up, but the plan was rejected by the Karens as insufficient There was also some trouble with Moslem insurrectionists who wished independence or union with a Moslem state, but this was minor. More serious was the presence of the Chinese Nationalist 13th Army Group, which was forced across the Yunnan border by the Communist victory in 1950 and continued fighting in the border strip, making forays across into China in 1951 Burma was particularly anxious to be rid of this group because of the resentment of Red China Finally Burma referred the matter to the United Nations, which in April, 1953, requested the Nationalists either to leave Burma or be interned By early July they had done neither, but it was expected that they would be removed to Formosa The transition period for the 1947 constitution ended with the elections of 1951–52 In the parliament the Anti-Fascist People's Freedom League was triumphant Ba U was chosen by the parliament to be first president of Burma (1952).

Busch, Adolf, d 1952

Busch, Fritz, d 1951

Bustamante, Antonio Sánchez de, d 1951

Byrnes, James Francis, was elected governor of South Carolina in 1950

Cahan, Abraham, d 1951

californium, chemical element (symbol=Cf) of atomic number 98, first produced (1950) in the cyclotron at the Univ of California by bombarding an isotope of the element curium with alpha particles It is highly radioactive, having a half life of 45 minutes

Cambodia In 1952, King Norodom Sihanouk, with French permission, dissolved the cabinet and took over the government himself The considerable enmity this aroused in Cambodia was dispelled when the king took a very strong stand for Cambodian independence In 1953 he underwent a voluntary week-long exile in Thailand as protest against the French Returning home, he seized the capital and demanded full independence, threatening hostile action if it were not granted The situation remained unsolved as of July 1, 1953 An added concern of Norodom's was the threatening position of Communist troops, who had recently invaded neighboring towns

Canada Important new sources of uranium were discovered in 1951 and 1952, and further moves toward exploitation of the vast iron deposits in the Ungava region of Quebec and Labrador were undertaken Western Canada's oil fields rapidly expanding from Alberta into other provinces, gave indication of becoming a major petroleum area of the world, an oil pipeline which will ultimately extend from Edmonton to the Great Lakes was under construction in 1953 In 1952 an international joint commission authorized the United States and Canada to build power projects on the St Lawrence, but as of May, 1953, the United States had not made arrangements for its part of the construction Canada's role in the world community was symbolized by the installation (1952) of Lester B Pearson, Canadian minister of external affairs and chairman (1951–52) of NATO, as president of the General Assembly of the United Nations Vincent Massey took office as governor general of Canada in 1952, succeeding Earl Alexander He was the first Canadian to be appointed to this post

Capote, Truman (kăpō'tĭ), 1924–, American author, b New Orleans His first novel, *Other Voices, Other Rooms* (1948), attracted attention both for its subject matter and its delicate style His later works include *Tree of Night* (1949), a collection of short stories, *Local Color* (1950) a group of travel pieces, and *The Grass Harp* (1951), a novel (later adapted into a play)

Capper, Arthur, d 1951

Carmona, Antonio Oscar de Fragoso, d 1951 Francisco Higino Craveiro Lopes was elected to succeed him as president of Portugal

Carol II, d 1953 in exile at Estoril, Portugal

Carpenter, John Alden, d 1951

Cary, Joyce (Arthur Joyce Lunel Cary), 1888–, English author His novels, notable for brilliant characterization, include the comic trilogy made up of *Herself Surprised* (1941), *To Be a Pilgrim* (1942), and *The Horse's Mouth* (1944)

Casals, Pablo In 1950 he emerged from retirement to play and direct at the Prades music festivals in S France

Central America. The Organization of Central American States was formed in 1951 to help solve common problems

Chernov, Viktor, d 1952, in exile in New York city.

Chiang Kai-shek Having resumed the presidency of the Chinese Nationalist forces, he established firm leadership (amounting to dictatorship) in the Kuomintang party, the government, and the armed forces on Formosa He reorganized all of them, with U S aid (though some in the United States questioned the wisdom of that aid) He repeatedly promised that he would eventually lead the Nationalist armies back to conquer the mainland He also promised that in case of victory he would retain the land reforms inaugurated by the Communists in China He himself instituted land reforms on Formosa and also initiated a few limited democratic political reforms

Chile. Carlos Ibáñez del Campos was inaugurated president in 1952

China. The Communist forces had before the end of 1950 established themselves firmly over the entire Chinese mainland and on many of the islands off the coast. FORMOSA remained in Nationalist hands, and there Nationalist armed forces were being massed and trained. No major conflicts between Nationalists and Communists took place, however, save for unsuccessful Communist attacks on the small Nationalist-held islands of Quemoy and Ta Chen. Guerrillas continued to combat the Communists, and a Nationalist army group driven into Burma by the conquest in 1950 made forays over the Yunnan border, while Burma tried vainly to dislodge the force. At the end of 1950 Chinese Communist forces entered TIBET. Chinese "volunteers" were already fighting then for the North Koreans in the warfare in KOREA, and Chinese forces there were greatly increased as the struggle went on to July, 1953. Supposedly, losses in this war prevented full-scale Chinese intervention elsewhere (e.g., Indo-China). Though the Communist government had been recognized by Great Britain and India, attempts in 1950 to have the Nationalist representatives at the United Nations replaced by Communist representatives failed in the face of opposition from the United States and other Western Powers, and after the Chinese entered the Korean war these attempts halted. Of internal conditions in China not too much was known to the outside world since only meager information was released. The land-reform program and nationalization were both forwarded on a wide scale, with considerable hardship for many individuals. An organization of the Chinese abroad formed a group to protest the mistreatment of then families in China and had a conference in Formosa in 1952. A five-year plan on the Russian model was announced as going into force early in 1953. Relations with the USSR were very close, and Russia returned the Chinese-Changchun Railway and Dairen to China early in 1953, Port Arthur was continued under joint occupation until Red China and the USSR should sign a peace treaty with Japan. Neither the Chinese Communists nor the Nationalists were represented at the peace conference in San Francisco (1951), but Japan later signed a separate treaty with the Nationalists.

Christy, Howard Chandler, d. 1952.

Churchill, Sir Winston Leonard Spencer, became British prime minister again after the Conservative victory in the general elections of Oct., 1951. The attention of his government was riveted on improvement of economic conditions. In foreign affairs, with Anthony Eden as foreign minister, British policy stressed friendship with the United States and ironing out of difficulties in the Commonwealth of Nations and of troubles with Iran and Egypt. He was knighted in 1953. On June 27, 1953, it was announced that the aging prime minister would be compelled to rest for a month to regain his health. Two more volumes were added to his *Second World War—The Hinge of Fate* (1950) and *Closing the Ring* (1951). A biography by Robert Lewis Taylor appeared in 1952.

Clark, Mark Wayne. His memoirs of the Second World War, *Calculated Risk*, were published in 1950. In 1952 he succeeded Matthew B. Ridgway as supreme commander of United Nations forces in Korea and also as commander of U.S. forces in the Far East.

Cockcroft, Sir John Douglas, 1897–, British physicist, educated at the Univ. of Manchester and at St. John's College, Cambridge. He was a fellow of St. John's College (1928–46) and professor of natural philosophy at Cambridge (1939–46). After serving (1941–44) as chief superintendent of the Air Defence Research and Development Establishment, he directed (1944–46) the atomic energy division of the National Research Council of Canada and became (1946) the director of the British Atomic Energy Research Establishment. The 1951 Nobel Prize in Physics was awarded jointly to Cockcroft and E. T. S. Walton for their pioneer work in transmuting atomic nuclei by bombarding elements with artificially accelerated atomic particles. He was knighted in 1948.

Collins, Edward Trowbridge, d. 1951.

Conklin, Edwin Grant, d. 1952.

Connolly, Maureen, 1934–, American tennis player, b. San Diego, Calif. She took her first tennis lessons when she was 10 and later developed rapidly under the direction of Eleanor Tennant, famous women's coach. Entering serious tournament competition in 1949, she won a host of championships, including the national junior singles (1949, 1950). A member of the victorious U.S. Wightman Cup teams in 1951 and 1952, she defeated Shirley Fry to win the U.S. national singles at Forest Hills in 1951, the second youngest woman to take the title (May Sutton, the 1904 champion, was younger). Maureen won the U.S. championship again in 1952, the Wimbledon championship (1952, 1953), and the Australian championship (1953). Considered the greatest woman tennis player since Helen Wills, she was named woman athlete of the year by sports-writers in both 1951 and 1952.

Corbett, Gail Sherman, d. 1952.

Coxey, Jacob Sechler, d. 1951.

Cripps, Sir Stafford, d. 1952. Because of ill-health he resigned in Oct., 1950, as chancellor of the exchequer.

Croce, Benedetto, d. 1952.

Cuba. Fulgencio Batista y Zaldívar returned to power by a coup in 1952 and later the same year was elected president.

Czechoslovakia continued after 1950 under its Communist regime. Late in 1952 several high government and party officials were executed in a sensational "purge," which had strong anti-Semitic overtones. Pres. Klement Gottwald died suddenly in 1953 and was succeeded in office by Antonin Zapotocky.

Dacron, trade name for a synthetic textile fiber having notable resilience and strength and wrinkle-resistant and shrinkage-resistant qualities. It can be used alone or blended with other fibers.

Dakin, Henry Drysdale, d. 1952.

Damrosch, Walter Johannes, d. 1950.

Davidson, Jo, d. 1952.

Dawes, Charles Gates, d. 1951.

Day, Clive, d. 1951.

Day, Edmund Ezra, d. 1951.

Defense Mobilization, Office of (ODM), created by executive order of President Harry S. Truman in Dec., 1950. Charles Edward Wilson was appointed first director. He was empowered to direct, control, and coordinate all mobilization activities of the executive branch of the government, including jurisdiction over production, procurement, manpower, stabilization, and transport activities. The aim of ODM was essentially that of making policy, the Defense Production Administration (DPA) and the Economic Stabilization Agency (ESA) were the principal agencies empowered to carry out the policies formulated by the director. In March, 1952, Wilson resigned as the result of a disagreement with President Truman over the proposed settlement of a steel-wage dispute. John R. Steelman was named acting director and was replaced in September by Henry H. Fowler. Arthur S. Flemming became head under the Eisenhower administration in 1953. In Feb., 1953, President Eisenhower merged ODM and DPA.

Democratic party. The Republican victory under Dwight D. Eisenhower in 1952 ended the 20-year rule of the Democratic party, and the break in the voting of the once "solid South" seemed to forecast a two-party system there. Adlai E. Stevenson was the Democratic presidential candidate in 1952, after his defeat he remained ostensibly the leader of the party.

Denmark. In the general elections of 1950 the Social Democrats suffered a severe setback. An Agrarian-Conservative coalition cabinet took over. Important changes in the Danish constitution were ratified by popular referendum in 1953. The succession to the throne was opened to females. The Rigsdag was abolished and its lower chamber, the Folketing, became the sole parliamentary body. Greenland received the status of a member of the commonwealth. Further, the constitution authorizes the transfer of certain sovereign functions to international authorities subject to approval by five sixths of the Folketing. As a member of the North Atlantic Treaty Organization (since 1949), Denmark received economic aid from the United States. See also GREENLAND.

Devonshire, Edward William Spencer Cavendish, 10th duke of, d. 1950.

Dewey, John, d. 1952.

Dewey, Thomas Edmund, was reelected governor of New York in 1950. His book, *Journey to the Far Pacific*, observations of his tour in the Far East in 1951, was published in 1952.

Diels, Otto, 1876–, German chemist. He taught chemistry at the Univ. of Kiel from 1916, becoming emeritus professor in 1945. The 1950 Nobel Prize in Chemistry was awarded jointly to Diels and to Kurt Alder for discovery of a process for synthetic production of complex chemical compounds.

Dolin, Anton, 1904–, English ballet dancer and choreographer, b. Sussex, England. His real name is Patrick Healey-Kay. He made his professional debut in an acting part in 1916, but later studied dancing and joined the Diaghilev company in 1923. He left this company in 1924, danced in musical revues, and formed his own company with Vera Nemchinova. In 1935 he formed a company with Alicia Markova which lasted until 1937. Later he and Markova were principal dancers with the Ballet Theatre in New York, and they again formed a company together in 1945. He is author of *Divertissement* (1931), a book of reminiscences, *Ballet Go Round* (1938), his autobiography, and *Alicia Markova Her Life and Art* (1953).

Donaldson, Jesse Monroe, resigned his post as U.S. Postmaster General in Jan., 1953.

Donegan, Horace William Baden, 1902–, American Episcopal bishop, b. England. He was rector (1933–47) of St. James Church, New York city, and was made bishop of the diocese of New York in 1950.

Dougherty, Denis J., d. 1951.

Douglas, Norman, d. 1952.

Dufy, Raoul, d. 1953.

Duggan, Stephen, d. 1950.

Dulles, John Foster, was a delegate to the United Nations General Assembly in 1950. In 1951, as ambassador-at-large, he negotiated a peace treaty with Japan. He succeeded Dean Acheson as Secretary of State in 1953.

Dunn, Gano, d. 1953.

Durkin, Martin Patrick, 1894–, U.S. Secretary of Labor (1953–); b. Chicago. Beginning as a steamfitter's apprentice in Chicago, he eventually became general president of the United Association of Journeymen Plumbers and Steamfitters of the United States and Canada. Prior to his appointment to President Eisenhower's cabinet. Since he was a Democrat, his appointment caused some consternation in Republican circles.

Dykstra, Clarence Addison, d. 1950.

Eames, Emma, d. 1952.

ECSC see EUROPEAN COAL AND STEEL COMMUNITY.

EDC see EUROPEAN DEFENSE COMMUNITY.

Eden, Anthony, again became British foreign minister after the Conservative victory in the elections of Oct., 1951, which made Winston Churchill prime minister. In 1952 he married Clarissa Churchill (his second wife). Early in 1953 illness forced him to surrender his post momentarily.

Egypt. Trouble between Great Britain and Egypt over the Suez Canal and Sudan regions continued to rise after May, 1950, and in Oct., 1951, the Egyptian government invalidated the Anglo-Egyptian treaty of 1936. Riots and skirmishes occurred in the disputed areas, and there were anti-British demonstrations all over Egypt. The struggle between King Farouk and the Wafdist government grew bitter. In Jan., 1952, the king dismissed the cabinet. Political uprisings followed, climaxed when Mohammed NAGUIB in July, 1952 headed a coup d'état that put the military in power. Farouk abdicated in favor of his infant son, Ahmed Fuad II. Naguib with much popular support became prime minister Sept. 7, 1952 and pledged himself to clean up the government and politics, break up the great landed estates, and institute democratic measures. Formation of political parties was forbidden, and in Jan., 1953, a drive was begun against Communists, and a three-year period of transition to democracy was instituted. A pact was signed with Great Britain on Feb. 12, 1953, providing for self-determination in the Sudan but Naguib continued to call for "unity of the Nile Valley" (see ANGLO-EGYPTIAN SUDAN). On May 5, 1953, a constitutional committee decided to abolish the monarchy. A republic was established with Naguib becoming the first president in June, 1953.

Eichelberger, William Snyder, d. 1951.

Einstein, Albert, announced in 1953 that he had completed work on his unified field theory (see article on Einstein in main volume).

Eisenhower, Dwight David. In Dec., 1950 he obtained a leave of absence from his duties at Columbia Univ. to become the supreme commander of the Allied Powers in Europe. He resigned this post in April, 1952, after completing the organization of the defense forces in the North Atlantic Treaty Organization. Nominated as the Republican presidential candidate in 1952, he was elected President of the United States, assuming office in Jan., 1953, and resigning as president of Columbia Univ.

Elizabeth II. Princess Elizabeth succeeded to the British throne on the death of George VI, Feb. 6, 1952. Her coronation was celebrated with great splendor on June 2, 1953. In 1950 she had borne her second child, Princess Anne. See Marion Crawford, *Elizabeth the Queen* (1952).

Ellsworth, Lincoln, d. 1951.

Eluard, Paul, d. 1952.

Emmet, Lydia Field, d. 1952.

Eniwetok. Tests of atomic weapons presumably including the hydrogen bomb were carried out here in April and May, 1951 and Nov., 1952. Some tests were designed not only to increase knowledge of nuclear detonations but also to determine the effects of atomic blasts, burns, and radiation on living things and the effects of explosions of atomic weapons on aircraft and various other structures and materials.

Eritrea. On Aug. 11, 1952 Ethiopia and Eritrea were united under an East African Federation Act. On Sept. 11 of that year, Ethiopian emperor Haile Selassie signed the Ethiopian-Eritrean Federation Act, and Eritrea became an independent nation within the federation.

Erskine, John, d. 1951.

Ethiopia. Italo-Ethiopian relations continued to improve and Ethiopia received the new Italian ambassador in 1952. Ethiopia and Eritrea were united as federated states in 1952.

European Coal and Steel Community (ECSC), limited economic federation of six sovereign countries: France, West Germany, Belgium, Netherlands, Luxembourg, and Italy. It is sometimes called the Schuman Plan, after Robert Schuman, the French foreign minister who proposed it in 1950. The 50-year treaty creating the ECSC became effective in 1952 and resulted in the pooling of the steel and coal resources of the member countries. All restric-

tions among its members on exports, imports, and currency exchange affecting coal, scrap iron, and iron ore were lifted The first international tax —a levy on coal and steel production in the member countries—took effect in 1953 With its executive headquarters at Luxembourg, the organization consists of a high authority" (executive branch), a council of ministers (one minister from each member country), an assembly (elected or appointed representatives of the member countries), and a court of justice, with jurisdiction in conflicts between the high authority and member states The ECSC is second only to the United States as a producer of coal and steel Its formation represented a major step toward European unification

European Defense Community (EDC) defensive alliance for the creation of a European army It was signed in 1952 by France West Germany, Belgium the Netherlands Luxembourg, and Italy but was ratified only by West Germany as of July 1, 1953 To become effective after ratification by all six members, the EDC would create a European army, closely coordinated with the North Atlantic Treaty Organization and would establish a council of ministers, an assembly and a commissariat, thus forming a military counterpart to the European Coal and Steel Community The treaty also provides for the eventual adoption of a federal constitution and a common parliament for the member countries Opposition to ratification was particularly strong in France because of French fear of a rearmed Germany

European Recovery Program The Economic Cooperation Administration (ECA) administered the program until 1951 when its activities were transferred to the Mutual Security Agency (see MUTUAL SECURITY PROGRAM)

Eva Perón The city of La Plata Argentina was renamed in honor of President Peron's wife after her death in 1952

Everest, Mount A British expedition under Col Sir John Hunt conquered Mt Everest on May 29, 1953, when Sir Edmond P Hillary, a New Zealander, and Tensing Norkay, a Sherpa guide, reached the summit here they planted flags of the United Nations, Great Britain India, and Nepal The ascent was made from the south or Nepalese side This team was the 11th (including two Swiss in 1952) to attempt the ascent in 30 years Dissension has arisen between India and Nepal over the citizenship of Tensing and there is movement in India to rename the peak Tensing Though it is the highest peak in the world, the exact altitude of Everest is not known, since earth movements are constantly raising its height

Farouk I Farouk's troubles with the Wafd continued after May, 1950 and he dismissed the Wafdist cabinet in Jan, 1952 A series of political upheavals followed and Gen Mohammed Naguib seized power in the coup d'état of July 23 1952 Farouk was forced to abdicate in favor of his son, Ahmed Fuad II and fled into exile In 1953 Egypt was declared a republic

Farwell, Arthur, d 1952

Faulhaber, Michael von, d 1952

Faulkner or **Falkner, William,** received the 1949 Nobel Prize in Literature His novel *Requiem for a Nun* was published in 1951

Feisal II or **Faisal II** ascended the throne of Iraq upon coming of age in May, 1953, ending the long regency of his uncle, Emir Abdul Illah

Fernald, Merritt Lyndon, d 1950

Ferrer, José Vicente, 1912 American actor and producer, b Santurce, Puerto Rico, grad Princeton, 1933 After his debut in 1935 he appeared in many plays, including *Charley's Aunt Othello* (as Iago), *Cyrano de Bergerac Twentieth Century* (revival), and *The Shrike* In addition to directing and producing plays, he also acted in motion pictures (e g, *Joan of Arc Moulin Rouge*) In 1951 he received the award as best actor from the Academy of Motion Picture Arts and Sciences for his performance in the film version of *Cyrano de Bergerac*

Flaherty, Robert Joseph, d 1951

Flanagan, John, d 1952

Fletcher, John Gould, d 1950

Ford Foundation, incorporated Jan 15, 1936 for the general purpose of advancing human welfare The principal funds for the project were contributed by Henry Ford and his son Edsel Ford In 1950 a greatly expanded program of action was undertaken with five major purposes to support activities contributing to world peace and the establishment of a world order of law and justice, to support activities designed to secure greater allegiance to the basic principles of freedom and democracy to support activities designed to advance the economic well-being of people everywhere, to support activities which strengthen and improve educational facilities and methods, to support scientific activities designed to increase the knowledge of factors influencing or determining human conduct The world's largest philanthropic trust, the foundation has made generous contributions to such programs as the advancement of education, adult education, a television-radio workshop, the resettlement of refugees, scientific research into human behavior, aid to refugees and exiles of the Soviet Union, aid for backward areas abroad, and a study of civil liberties Paul G Hoffman, who assumed the duties of president of the Foundation in 1951, resigned that post in Feb, 1953

Formosa As the headquarters of the Chinese Nationalists under Chiang Kai-shek after they were driven from the Chinese mainland by the Communists, Formosa saw much development after 1950 Agricultural and industrial production flourished, and there were export surpluses of rice, sugar, tea, and other products The Nationalist army, based on Formosa, grew larger and was being trained under U S advice U S economic help was extended to the island through the Economic Cooperation Administration and the later Mutual Security Administration A land-reform program (the "375 Land Rental Reduction") was made into law in 1951 and was in its first phase successful Political freedom was extended on a limited and local scale, and in Nov, 1951, the first general election in the history of the island was held Immediately after the outbreak of warfare in Korea, President Truman had ordered the 7th U S Fleet to "neutralize" Formosa with a blockade This blockade was lifted by order of President Eisenhower on Feb 2 1953 thus apparently opening the way for a Nationalist attack on the Chinese mainland Formosa in 1951 suffered a severe earthquake, several cities were rocked

France Cabinets in the Fourth Republic proved no more stable than they had been in the Third Republic In June, 1953, the 19th cabinet took office An important internal political development was the thorough defeat in the municipal elections of 1953 of General de Gaulle's party which the general declared dissolved The French Union was rocked by Arab nationalist agitation in North Africa and bitter warfare went on in Indo-China with the Communist-led Viet Minh forces France became a charter member of the EUROPEAN COAL AND STEEL COMMUNITY in 1952 Fear of a rearmed Germany and disagreement with West Germany over the future status of the Saar Territory caused the French national assembly to delay ratification of the EUROPEAN DEFENSE COMMUNITY treaty French economy suffered from steadily progressing inflation

Freeman, Douglas Southall, d 1953 At that time five volumes of his biography of George Washington had been published

Fremstad, Olive Nayan, d 1951

Fry, Christopher, 1907– English playwright b Bristol He had taught briefly, acted edited a magazine, and directed a repertory company before gaining acclaim for verse plays noted for their wit and imagery their poetic fantasy and lyricism He has been compared to the Elizabethans for his richness of language, although some critics have complained of occasional obscurity and an overelaborate phrasing and invention *The Lady's Not for Burning* was highly successful Other plays include *A Phoenix Too Frequent, Venus Observed, The Boy with a Cart Thor, with Angels,* and *A Sleep of Prisoners*

Garrey, Walter Eugene, d 1951

Gaulle, Charles de, declared his party (RPF) dissolved as a political party after its setback in the French municipal elections of 1953 However, he remained a leading figure of the opposition

Gauss, Christian, d 1951

Genth, Lilian Mathilde, d 1953

George VI, d 1952

Gerard, James Watson, d 1951

Germany In 1952 the Federal Republic of Germany (or the West German government) signed a peace contract with the United States Great Britain and France The contract transferred virtually all authority from the Allied high commissioners to the German federal government at Bonn and to the state governments The contract was linked with the formation of the EUROPEAN COAL AND STEEL COMMUNITY (ECSC) and the EUROPEAN DEFENSE COMMUNITY (EDC), in which Germany was to participate Despite vigorous opposition (especially from the Social Democrats), Chancellor Adenauer secured full ratification of the contract and the EDC treaty by the federal parliament, but the constitutionality of the agreements remained to be examined by the West German constitutional court The industrial recovery of West Germany was remarkable, by 1953, Germany was once again one of the world's leading industrial powers Allied restrictions on West German industrial production were lifted when the ECSC went into effect (1952) Meanwhile the German Democratic Republic (Russian-occupied East Germany) was virtually sealed off from the rest of Germany by its Communist rulers Though both East and West professed a desire to see Germany reunited, there appeared to be no common basis for a four-power agreement on a general peace treaty with Germany However in June, 1953, the USSR revised its German policy, appointing a civilian commissioner to replace the military commander in the occupation zone and suspending its stringent "sovietization" policy An uprising and general strike against the Communist government began shortly afterward in East Berlin and spread to other industrial centers. The riots were swiftly put down by Russian armored troops, acting under martial law, but strikes continued into July, 1953, while the East German government tried, hastily and belatedly, to compromise with the workers' demands for increased food rations and shorter working hours.

Gide, André Paul Guillaume, d 1951

Gleizes, Albert Léon, d 1953

golf. Honors in what are probably the five best-known golf tournaments, professional and amateur, were dominated by two golfers in 1950-53, only Ben Hogan of the United States and Bobby Locke of South Africa winning more than once Hogan took the U S Open in 1950, 1951, and 1953, Julius Boros winning in 1952, while in 1950 and 1952 Locke won the British Open, which was taken by Max Faulkner in 1951 and by Ben Hogan in 1953 The other winners were U S Professional Golfers Association (P G A)—Chandler Harper (1950), Sam Snead (1951), Jim Turnesa (1952), U S Amateur—Sam Urzetta (1950), Billy Maxwell (1951), Jack Westland (1952), British Amateur Frank Stranahan (1950), Dick Chapman (1951), Harvie Ward (1952), all Americans An Irishman, Joe Carr, won the British Amateur in 1953 Beverly Hanson (1950), Dorothy Kirby (1951) and Mrs Jacqueline Pung (1952) were winners of the National Women's Amateur championship An outstanding woman professional golfer was Louise Suggs who in the first five months of 1953 earned over $15,000, a one-year record in women's Professional Golf Association competition In international team play, Americans men retained the Ryder Cup and the Walker Cup from the British in 1951 but British women in 1952 defeated Americans for the Curtis Cup for the first time since this competition began in 1932 The Americas Cup a new international amateur series began at Seattle in 1952, was won by the U S team, which defeated Canadian and Mexican teams

González Martínez, Enrique, d 1952

Goose Bay, village SE Labrador, on Goose Bay It has a large air base and radio station built in the Second World War for transatlantic transport

Graves, Henry Solon, d 1951

Great Britain General elections in Oct 1951, returned the Conservatives to power under Winston Churchill (who became Sir Winston Churchill in 1953) The new government struggled with the problems that had faced the Labour government, not only improving Britain's position in the world balance of trade and bettering economic conditions Britons continued to live under heavy rationing of food and materials Moves were made to denationalize some of the recently nationalized industries In foreign affairs Great Britain continued to cooperate with the United States especially in "the cold war" with the USSR and other Communist nations and in Korea Troubles beset the British Commonwealth of Nations Attempts were made to put down Communist activity in Malaya Quarrel with IRAN rose to great heat after Iranian nationalization of the petroleum fields and refineries There were difficulties also with EGYPT especially over the status of the Anglo-Egyptian Sudan and British soldiery at the Suez Canal Kenya and the Union of South Africa had severe internal troubles England itself suffered one of the greatest natural disasters in its modern history with the great floods on the eastern shores early in 1953 King George VI died Feb 6 1952, and his daughter succeeded him as Elizabeth II Her coronation on June 2, 1953, was the cause of great ceremonial rejoicing in the nation

Greece The government's campaign against the Communist guerrillas was victoriously concluded by 1950 The Greek Rally party of Field Marshal Papagos won the elections of 1952 Greece was admitted into the North Atlantic Treaty Organization in 1951 and signed a defensive alliance with Yugoslavia and Turkey in 1953

Green, Henry, pseud of **Henry Vincent Yorke,** 1905 English novelist, an industrialist His novels, somewhat experimental in style, combine the comic spirit with a sympathetic detachment. Among them are *Living* (1929), *Loving* (1945), *Back* (1946), *Nothing* (1950), *Doting* (1952)

Green, William, d 1952 He was succeeded as president of the A F of L by George Meany

Greenland. Under the revised Danish constitution of 1953 Greenland changed its status from colony to member of the Danish commonwealth, with representation in the Folketing In 1951 an agreement between Denmark and the United States resulted in the transfer of American military bases in Greenland to Danish authority but permitted their use by the United States New bases (notably at Thule) were built under the North Atlantic Treaty Organization

Greenman, Jesse More, d 1951

Grew, Joseph Clark In 1952 appeared his two-volume book, *Turbulent Era,* the story of his 40 years in the diplomatic service

Gromyko, Andrei Andreyevich, was appointed ambassador of the USSR to England in 1952. Recalled in 1953, he was made chief deputy foreign minister

Gruenther, Alfred Maximilian, 1899–, U S general, b Platte Center, Nebr , grad West Point, 1919 Known as a brilliant staff officer, he was chief of staff to Dwight D Eisenhower in London (1942–43), chief of staff of the 5th Army (1943 44), and chief of staff of the 15th Army Group under Mark W Clark (1944–45) He was then deputy chief of staff for plans until General Eisenhower chose him as chief of staff of the North Atlantic Treaty Organization in 1951 He continued in this post under Matthew B Ridgway and succeeded Ridgway as supreme commander of the Allied Powers in Europe in May, 1953

Guiana, British. A new constitution was inaugurated in 1952

Gustavus V, d 1950

Gustavus VI (Gustavus Adolphus), 1882–, king of Sweden (1950) He succeeded his father, Gustavus V

Gustavus Adolphus see GUSTAVUS VI

Hammarskjold, Dag (dŭg' hăm'ərshŭld), 1905 , Swedish statesman, secretary general of the United Nations (1953) A political economist, he entered government service in 1930 and held important posts, becoming assistant foreign minister in 1949 and deputy foreign minister in 1951 He represented Sweden at the UN and was elected (April 7, 1953) to succeed Trygve Lie

Hamsun, Knut, d 1952

Hand, Learned, 1872 , American jurist b Albany, N Y , grad Harvard (B A , 1893, M A 1894, LL B 1896) He was judge of the Federal District Court (1909–24) and of the U S Court of Appeals (1924 51) *The Spirit of Liberty,* a collection of his papers and addresses, was published in 1952

Hannay, James Owen, pseud **George A Birmingham,** d 1950

Harriman, William Averell, was director of the Mutual Security Agency (1951–53)

Hughes, William Morris, d 1952

Humphrey, George Magoffin, 1890–, U S Secretary of the Treasury (1953) b Cheboygan, Mich , LL B Univ of Michigan, 1912 Admitted to the bar in 1912, he became general counsel for M A Hanna and Company of Cleveland, a vast business and industrial enterprise After 1929 he was president of the company In 1948 and 1949 he was chairman of the industrial advisory committee to the Economic Cooperation Administration A strong supporter of Sen Robert A Taft, Humphrey was regarded as a conservative when given his cabinet post by President Dwight D Eisenhower

Hussein I, 1935–, king of Jordan He succeeded his father, TALAL, in 1952 and ascended the throne upon coming of age in May, 1953

Hutcheson, Ernest, d 1951

hydrogen bomb see ATOMIC ENERGY

Iceland President Bjornsson died in 1952 Asgeir Asgeirsson, a Social Democrat, was elected to succeed him

Ickes, Harold LeClaire, d 1952

Impellitteri, Vincent Richard (ĭmpĕl'ĭtĕr'ē) 1900–, mayor of New York city (1950) b Isnello, Italy, grad Fordham Law School, 1924 He was brought to the United States in 1901 and was naturalized in 1922 Admitted to the bar in 1925, he engaged in private practice and then became assistant district attorney of New York county (1930 37) A member of Tammany Hall, though not particularly prominent, he was chosen by William O Dwyer as candidate for president of the City Council in 1945 Re-elected in 1949 Impellitteri functioned as acting mayor while O Dwyer was absent from his post In 1950 Impellitteri sought the mayoralty as an independent candidate and was successful During his term in office he was afflicted with many problems, primarily an inadequate budget shortage of schools, transportation difficulties, corruption in the police department, and racketeering in New York's dock industry

Inchon, another name for Chemulpo, Korea It was the scene (1950) of a great landing of U S forces in the Korean war (see KOREA)

India Indo-Pakistan tension over the KASHMIR question continued in 1951 and 1952 but settlement seemed imminent in early July, 1953 Although the food situation was eased somewhat by programs of rural reform and foreign aid it continued serious in 1953 Nation-wide elections in 1952 brought the triumph of Prime Minister Jawaharlal Nehru's Indian National Congress Agitation by Communists occupied some of the government's attention In the United Nations, India pursued a policy of neutrality in disagreements among the big powers In 1953, India agreed to serve with Sweden and Switzerland as a neutral negotiator in the Korean prisoner-exchange dispute

Indo-China The war against Communist rebels in VIET NAM continued into 1953 without a solution The situation was further complicated when, in early 1953 the Communists spread the conflict into the neighboring state of Laos and threatened Cambodia The desire of the three states for more independence than that granted in 1950 was considered in 1953 by the French who offered to negotiate for a broadening of the states' liberties Cambodia, demanding complete independence, threatened hostile action if it were not granted

Indonesia On Aug 4, 1950, the principle of federalism was discarded and Indonesia became a unitary state Attempts to settle the disputed claims for New Guinea led to protracted but fruitless negotiations with the Dutch in 1951 and 1952 In 1950 the young nation became a member of the United Nations The questions of putting down Communism, of accepting U S aid for development and of establishing relations with Red China and independent Japan as well as other Asiatic states caused much discussion and dissension within Indonesia In 1952 the falling markets for many Indonesian exports caused some uneasiness, which continued in the middle of 1953

International Trade Organization (ITO), proposed special agency of the United Nations to administer and implement a code of principles or rules of fair dealing in international trade The code is contained in the Havana Charter (1947 48) An interim commission was established to prepare the ground for ITO

Ipatieff, Vladimir Nikolaevich, d 1952

Iran On April 28, 1951, intense nationalism, fostered by both the National Front party and the Communist Tudeh party, resulted in nationalization of the British-owned oil industry by Premier MOSSADEGH The Anglo-Iranian Oil Company's holdings were seized and its employees were expelled from the country The subsequent British blockade of Iran led to virtual collapse of the oil industry, severely affecting the economy Iran broke off diplomatic relations with Britain in 1952 Despite U S mediation, the problem remains unsolved in July 1953 Animosity between pro-Shah and pro-Mossadegh factions erupted into open street fighting in Feb , 1953 The premier was forced at one point to seek sanctuary in the parliament building The Mossadegh-appointed chief of state police was found murdered in 1953, and several Majlis leaders were accused of the crime Early July, 1953, saw Mossadegh still in power and the Shah still on the throne

Iraq After 1950 began to carry out a comprehensive national development program, largely financed by income from oil royalties It is intended to control floods, restore the ancient Tigris-Euphrates irrigation network, improve agricultural methods, supply power, and stimulate mining and industry U S technical assistance was extended for these purposes as well as for a land-reform program for resettling landless peasants on more than 200,000,000 acres of former government land In Jan , 1953, election reform brought the first direct vote for parliament Since 1950 most of Iraq's Jews have emigrated to Israel King FEISAL II ascended the throne in 1953

Israel Since 1950 the problems of an unfavorable trade balance, floods of immigrants, and the need for foreign capital investment and additional industries were met with increasing success Larger irrigated acreages increased the agricultural output, despite serious droughts Industrial expansion was marked and new mineral resources were exploited The imposition of rationing and financial measures (including partial devaluation of the currency) was helpful in reducing the import-export imbalance Inflation and the high cost of living remained serious problems Relief and resettlement proceeded under lessening but still great pressure from newcomers In this as well as in the promotion of agriculture and industry, the U S Technical Cooperation Administration gave some aid Israeli-Arab relations remained hostile the Arab economic blockade continued to be a handicap and charges and counter-charges were made over border incidents The United Nations Palestine Conciliation Commission reported virtually no progress in its negotiations In 1950 Great Britain granted *de jure* recognition Treaties of friendship and trade were made with a number of nations A period of strained relations with the USSR during which Israel changed the Soviet Union with anti-Semitism and criticized the USSR's refusal to permit Jews to emigrate to Israel culminated in early 1953 in Russia's severance of diplomatic relations Reparations agreement with the West German government provided for compensation to cover the losses of Jews during the Hitler regime Upon the death in 1952 of Chaim Weizmann Itzhak BEN-ZVI became Israel's second president David BEN-GURION remained as prime minister at the head of a coalition despite cabinet crises, notably over the issue of religious education

Italy continued after 1950 under the premiership of Alcide de Gasperi Late in 1950 the government began on a modest scale to put into effect a long-needed agrarian reform in S Italy, where landless peasants were enabled to acquire parts of the great estates The project for a general land reform was, however dropped In June, 1953 De Gasperi's Christian Democrats and their middle-of-the-road allies won a narrow electoral victory, Communists, royalists, and neo-Fascists showed marked gains Italy became a charter member of the EUROPEAN COAL AND STEEL COMMUNITY in 1952

Japan The central event in the history of Japan in the years 1950 53 was the signing of a peace treaty with most of the opponents in the Second World War Thus the Allied occupation came to an end, and Japan took full status as an independent nation again The treaty was signed at a conference in San Francisco in Sept 1951, it went into effect April 28, 1952 India Burma, and Yugoslavia refused invitations to the peace conference, and delegates of the USSR, Czechoslovakia, and Poland refused to sign the treaty The treaty had been foreshadowed even before 1950 with the return of many administrative powers to the Japanese The disagreements of U S and Soviet representatives on the Far Eastern Commission were bitter, and the Soviet delegate absented himself from the meetings for months It became clear that the Russians and the Americans would not agree on any peace terms for Japan and that the United States would move to draw up a peace not acceptable to the USSR The outbreak of warfare in Korea strengthened this determination, as Japan became a base for United Nations forces going to and from Korea With the replacement of Gen Douglas MacArthur by Gen Matthew Ridgway in April, 1951, there were some fears that U S policy toward Japan might change, but these proved unfounded U S forces remained

in Japan after the occupation as a protective force (until Japanese defense could be rebuilt) under a special agreement After the new treaty came in force, new elections were held Oct 1 1952 The conservatives already in power kept their supremacy, with Shigeru Yoshida remaining as premier There was dissension in the ranks of his Liberal party (a conservative group despite the name), and in April, 1953, Yoshida was forced to hold new elections His power was greatly weakened but he was again premier The policy of 'depurging" those who had been deprived of civil rights for war activities had begun before the peace treaty was signed and most war criminals were released by 1953 The government took strong action against the Communists under the occupation and continued that policy later, but in early 1953, particularly in a May Day demonstration, the Communists led in anti-American and anti-Western demonstrations Measures to control "subversive" activities were fought by labor unionists and liberals as a threat to freedom of speech and thought Japanese claims that the USSR had failed to repatriate thousands of Japanese prisoners of war deepened anti-Russian sentiment This was shown also by the separate peace treaty with Nationalist China (April 28, 1952) and slacking of trade with Red China A separate peace treaty with India was also signed in 1952 one with the Philippines was still being negotiated in July, 1954 The boom caused by the beginning of the Korean war ended in 1952 and the Japanese were making strong efforts to rebuild their world trade in 1953

Jaques-Dalcroze, Émile, d 1950

Jeffries, James J, d 1953

Jensen, Johannes Vilhelm, d 1950

Jessup, Philip Caryl, was appointed a delegate to the United Nations General Assembly in 1951 and an alternate delegate in 1952 In Jan 1953, he resigned as ambassador at large and returned to his teaching duties at Columbia Univ

jet propulsion Achievement of supersonic speed by aircraft marked a new era in aviation history In the United States speeds of more than 1,200 miles per hour had been reached by mid-1951 in the U S navy's supersonic experimental plane, the Douglas *Skyrocket* British jet-propelled planes had already been reported (1948) to have attained supersonic speeds The American rocket plane Bell *X-1* had, in 1947, exceeded the speed of sound but it could not take off under its own power or make sustained flights The Russians were using supersonic speeds at least nearly as early as Britain and the United States

Kefauver, Carey Estes (kē'fə-vər), 1903–, U S Senator from Tenn (1949–), b Madisonville, Tenn, grad Univ of Tennessee, 1924, LL B Yale, 1927 Admitted to the bar in 1926, he became a Chattanooga lawyer and in 1939 was elected to the U S House of Representatives, where he served until he entered the Senate in 1949 His victory in the senatorial race was conspicuous because it ended the domination of Tennessee politics by "Boss" Edward H Crump of Memphis In this campaign Kefauver wore a coonskin cap, which came to be regarded as his symbol As chairman of the Senate crime investigating committee in 1950 and 1951, Kefauver attracted nation-wide publicity *Crime in America* (1951) was Kefauver's own book on the results of this investigation In 1952 he unsuccessfully sought the Democratic presidential nomination

Kendall, Edward Calvin, 1886–, American biochemist, b South Norwalk, Conn, grad Columbia (B S, 1908, Ph D, 1910) At St Luke's Hospital, New York city, he did research on the thyroid gland (1911–14) In 1914 he became head of the biochemistry section at the Mayo Clinic and, in 1921, professor of physiological chemistry at the Mayo Foundation (affiliated with the Univ of Minnesota) He shared, with Philip S Hench and Tadeus Reichstein, the 1950 Nobel Prize in Physiology and Medicine for his work on the hormones of the cortex of the adrenal glands Kendall isolated and identified a series of compounds from the adrenal cortex, prepared cortisone by partial synthesis (with Merck & Co, Inc), and, with Dr P S Hench, Dr H F Polley, and Dr C H Slocumb, investigated the effects of cortisone and of ACTH (a pituitary gland hormone) on rheumatoid arthritis Other contributions include the isolation of thyroxine (1914) and the crystallization of glutathione and establishment of its chemical structure

Kennan, George Frost, 1904 , U S diplomat, b Milwaukee Wis, grad Princeton, 1925 Beginning his diplomatic career as vice consul in Geneva in 1925, Kennan served in diplomatic posts at Hamburg, Riga Berlin, Vienna, Prague, and Moscow In 1947 he was on the policy-planning staff of the Dept of State, later (1949–50) he was adviser to the Secretary of State It was he who formulated the policy of "containment" of the Soviet Union He was appointed ambassador to the USSR in 1952, but his recall was demanded by the Soviet government as a result of remarks he made regarding the isolation of diplomats in Moscow and the hate campaign Soviet propagandists were conducting against the United States In April, 1953, his retirement from the diplomatic service was announced He wrote *American Diplomacy 1900–1950* (1951)

Kenny, Elizabeth, d 1952

Kenya Mid-1952 saw the rise of the Mau Mau (Hidden Ones) secret society dedicated to driving the white man from Kenya British troops were sent to stem the tide of terrorism and by July 1953, the terrorists had largely been bottled up in central Kenya

Kenyon, Sir Frederic George, d 1952

Kimpton, Lawrence Alpheus, 1910–, American educator, chancellor of the Univ of Chicago b Kansas City, Mo, grad Leland Stanford Univ (A B 1931, A M, 1932), Ph D Cornell Univ, 1935 He was dean (1936–41) of Deep Springs Junior College, Calif and dean (1942–43) of the college of liberal arts, Univ of Kansas City At the Univ of Chicago he was chief administrative officer (1943–44) of the metallurgical laboratory engaged in developing the atomic bomb From 1947 to 1950 he was associated with Stanford Univ, serving as the dean of students and a professor of philosophy In 1951 he returned to the Univ of Chicago to take over the duties of chancellor, succeeding Robert M Hutchins

King, William Lyon Mackenzie, d 1950

Kirby, Rollin, d 1952

Kirk, Grayson Louis, 1903–, American educator, president of Columbia Univ, b Jeffersonville, Ohio, grad Miami Univ, 1924 M A Clark Univ, 1925 Ph D Univ of Wisconsin, 1930 He taught (1929–40) at the Univ of Wisconsin before he became an associate professor of government at Columbia Univ in 1940 After 1942 he was a full professor of government there and after 1947 was also a professor of international relations Made vice president and provost of Columbia in 1950, he was appointed acting president during the absence of Dwight D Eisenhower Upon Eisenhower's resignation in 1953, Kirk officially became the head of the university He is the author of *Philippine Independence* (1936), *Contemporary International Politics* (with W R Sharp, 1940), and *The Study of International Relations in American Colleges and Universities* (1947)

Koiso, Kuniaki, d 1950, in a U S army hospital, still a prisoner

Kollontai, Aleksandra Mikhailovna, d 1952

Korea The situation between the Northern People's Republic of Korea (Communist) and the southern Republic of Korea, both claiming rule over the whole country, grew more tense in 1950 On June 25, 1950, it was transformed into open warfare when North Korean troops crossed the boundary (lat 38°N) with the intention of winning the south by conquest The South Koreans, caught by surprise, reeled back Seoul had fallen by June 29, and the ROK (Republic of Korea) troops retreated southward rapidly The United Nations, however, acted quickly to declare North Korea the aggressor and to send support to the South Koreans (the USSR took no part in these decisions) UN troops had arrived in Korea in some force by early July, and Gen Douglas MacArthur was named UN commander These troops (entirely U S forces at first, but later composed of forces from many nations, with Americans remaining by far the predominant group) and South Koreans held a perimeter 50 mi above the southern port of Pusan and were by Sept, 1950, ready to launch a counterattack A surprise landing at Inchon farther to the N on Sept. 15 caught the North Koreans between two fires, many were captured as they fled northward By early October UN troops reached and crossed the 38th parallel and were soon threatening to take the whole peninsula Early in November large masses of "volunteer" troops from Communist China came to the aid of the North Koreans The UN troops were pushed back with great loss, and the 10th Corps was by late November preparing for evacuation at the port of Hungnam, this rescue operation was completed by Dec 24, 1950 On Jan 4, 1951, Seoul had again been lost to the Communists, and the front was not stabilized until late that month In Feb and March, 1951, UN forces retook South Korea, and a new Chinese drive launched in April was met stoutly and successfully The UN had meanwhile (on Feb 1) declared China an aggressor In April, 1951, MacArthur was replaced as commander (see MACARTHUR, DOUGLAS) by Gen Matthew B Ridgway (who was succeeded as commander of the 8th Army by Gen James Van Fleet). In 1952 the supreme Korean command was given to Gen Mark Clark Air warfare in 1951 quickened as the Chinese used many Russian-built jet fighters (MIG-15s) and Korea was the first scene of extensive air battles between jet planes On the sea the UN forces were unchallenged by any opposition In ground warfare the lines became roughly stabilized in 1951, but constant fierce actions in the mountains of central Korea took much blood, and peaks changed hands often from 1951 to July, 1953 Meanwhile negotiations for a truce, begun early in July, 1951, dragged slowly along Conflicts over many items of the agenda led to halts, as did accusations that one side or the other had violated the demilitarized area where the talks were going on—first at Kaesong, later at Panmunjom— some accusations verified on both sides The most stubborn block in negotiations appeared in the Communist refusal to accept the principle of voluntary repatriation of war prisoners and the matching UN refusal to force any unwilling prisoners to return to their Communist homelands Feelings on this question was made more bitter by difficulties with the Communist prisoners in UN hands, particularly riots on Koje Island in 1952 These reached a high point when the prisoners captured the UN prison commander, and he was ransomed with promises Sporadic trouble continued in 1953 Talks broke down completely in Oct, 1952 and were not resumed for months Then more or less suddenly the two sides agreed on an exchange of sick and wounded prisoners, an exchange which took place late in April, 1953 Continuing negotiations led to agreement that prisoners who did not exercise their right to repatriation should be placed in the hands of five neutral nations (Sweden, Switzerland, Poland, Czechoslovakia, and India) Thus early in June the way was open to a truce, to be followed by a political conference, but the opposition of South Korea to the agreement halted negotiations President Syngman Rhee of the Republic of Korea insisted upon guarantees from the UN, the most important being that, if no agreement had been reached to unify Korea in 90 days after the truce went into effect, UN troops would join South Koreans in forcing that unification Otherwise he threatened that the South Korean army would continue the war As an earnest of his threat the South Koreans unilaterally freed some 27,000 North Korean and Communist prisoners of war on June 28 Attempts to win Rhee to a workable compromise had not been successful early in July

Koussevitzky, Serge, d 1951

Kuniyoshi, Yasuo, d 1953

La Follette, Robert Marion, Jr, d by suicide, 1953

Lagerkvist, Par Fabian. His novel *Barabbas* (1950) appeared in English translation in 1951 He was awarded the 1951 Nobel Prize in Literature

Laos was recognized by France as an independent associated state on Feb 6, 1950 More independence was demanded in 1953, and negotiations with the French government seemed likely Laos was drawn into the war against the Viet Minh rebels when, in early 1953, Communist troops invaded the state and threatened the capital French and Laotian forces appeared to have the situation under control in mid-1953

La Plata, Argentina see EVA PERÓN

Lebanon. Long-standing disputes with Syria over customs duties came to a head in 1950, and the customs union between Syria and Lebanon was abrogated With improving relations, the union was restored in March, 1952 Some tension between the nations still remained in 1953, when there were border troubles Political changes in 1952 saw the elevation of Camille Shamun to the presidency There were demonstrations in 1951 caused by the

assassination of the former premier, Riad es Solh, in Jordan and by Lebanese approval of Egyptian abrogation of the 1936 Anglo-Egyptian treaty
Lebanon reiterated its hostility towards Israel in talks with U S officials in 1953
Lehman, Herbert Henry, was in 1950 reelected to the U S Senate
Lenormand, Henri René, d 1951
Lewis, Sinclair, d. 1951
Liaquat Ali Khan, d 1951 He was assassinated by an Afghan fanatic, who was seeking to strike a blow for the autonomy of the Pathan tribes
Liberia. In May, 1951, were held the first elections in which women and aboriginal property owners were allowed to vote In 1951, with U S aid, Liberia began developing an army, and a draft was instituted in 1952
Libya In Dec , 1951, Libya became an independent, constitutional monarchy under King Idris I
Lie, Trygve Halvdan. His resignation as secretary general of the United Nations took effect in 1953 He was succeeded by Dag Hammarskjold
Linlithgow, Victor Alexander John Hope, 2d marquess of, d 1952
Litvinov, Maxim Maximovich, d Dec 31, 1951
Lodge, Henry Cabot, Jr , 1902 , U S Senator from Massachusetts (1937 44, 1947 53), U S representative at the United Nations (1953-), b Nahant, Mass , grad Harvard, 1924, grandson of Henry Cabot Lodge He entered the newspaper field, first with the Boston *Evening Transcript* and then with the New York *Herald Tribune* until 1931 From 1933 to 1936 he was a member of the Massachusetts General Court Elected to the U S Senate in 1936, he served until his resignation to enter the army In the Second World War he was a major, then a lieutenant colonel, in the 1st American Tank Detachment in Libya, he also served in the Mediterranean and European theaters In 1946 he was reelected to the U S Senate but lost his seat in the election of 1952 Lodge was appointed head of the U S mission to the United Nations by President Dwight D Eisenhower
Long, William Joseph, d 1952
Louis, Joe He retired as the undefeated world heavyweight champion on March 1, 1949, but returned to competition the next year, allegedly because of a need to meet his income tax payments Ezzard Charles outpointed him in 15 rounds at New York on Sept 27 1950, to become universally recognized as the new champion Louis then defeated several lesser heavyweights before Rocky Marciano knocked him out in the eighth round on Oct 26 1951 This defeat only the third in his remarkable professional career of 71 fights and only the second time he had ever been knocked out, sent Joe into retirement again
Lower California officially became Mexico's 29th state Dec 10, 1951 The capital is Tijuana
Luxembourg became a charter member of the EUROPEAN COAL AND STEEL COMMUNITY in 1952
MacArthur, Douglas, was in July, 1950, appointed commander of UN military forces in South Korea, while keeping his command of Allied forces in Japan He was the center of controversy in 1951 when President Harry S Truman dismissed him from his posts in the Far East because opposing the policy of the Truman administration, MacArthur advocated an attack on Red China Although mentioned for the presidential race in 1952, he refused to become a candidate for nomination In July, 1952, he became chairman of Remington Rand, Inc
McCarthy, Joseph Raymond, 1909- , U S Senator (1947), b near Appleton, Wis , grad Marquette Univ , 1935 He practiced law in Wisconsin after 1935 and became (1939) a circuit judge Enlisting in the U S Marines in 1942, he was discharged as a captain in 1945 He was elected (1946) as Republican senator from Wisconsin by defeating Robert M La Follette, Jr As a senator he was a member of several committees, but it was his dogged pursuit of those he classified as Communists and subversives that won him wide attention The methods he used in his investigations were much disputed by the public In 1952 he was reelected to the Senate
McFee, Henry Lee, d 1953
McGrath, James Howard, resigned as U S Attorney General in April, 1952, in a controversy with President Harry S Truman over a proposed investigation of the Dept of Justice James Patrick McGranery was named successor
McIntyre, James Francis Aloysius, 1886- , American prelate, cardinal of the Roman Church, b New York city He was educated at Cathedral College and St Joseph's Seminary At first employed in a firm in Wall St , he was drawn to the religious life and ordained a priest in the Roman Catholic Church in 1921 From 1921 to 1923 he held his first assignment as assistant in St Gabriel's Church, New York city He was appointed assistant in the chancery office of the New York diocese in 1923 and became chancellor in 1934 He was created a domestic prelate in 1936 After serving as an auxiliary bishop of New York (1940-48, with the titular bishopric of Cyrene), he became archbishop of Los Angeles in Feb , 1948. In 1953 he was created a cardinal
McKay, Douglas, 1893- , U S Secretary of the Interior (1953-), b Portland, Oregon, grad Oregon State College, 1917 Starting as an automobile salesman in 1920, he shortly became sales manager of his firm and established (1927) his own agency in Salem and was mayor of Salem (1933 34) Between 1935 and 1949 he served four terms as state senator In 1948 McKay was elected to fill the unexpired term of Earl Snell as governor of Oregon and was reelected in 1950 In Nov , 1952, he was made Secretary of the Interior in President Eisenhower's cabinet
McMillan, Edwin Mattison, 1907 , American physicist, b Redondo Beach, Calif , grad California Institute of Technology (B S , 1928) Ph D Princeton, 1932 Associated with the Univ of California after 1932, he became professor of physics in 1946 and a member of the staff of the Radiation Laboratory of the university, in 1945 He shared with Glenn T Seaborg the 1951 Nobel Prize in Chemistry for their contributions to the chemistry of transuranium elements McMillan is codiscoverer of the elements neptunium and plutonium He devised methods of increasing the atom-splitting power of the cyclotron
Malan, Daniel François (mălän'), 1874 , South African political leader, prime minister of the Union (1948), head of the Nationalist party He was a minister of the Dutch Reformed Church before becoming (1914) a newspaper editor and politician in Capetown He was elected to Parliament in 1917 and later led a delegation to the Versailles Conference in an attempt to get independence for South Africa He served (1924 33) in the cabinet of J B M Hertzog, resigning when Hertzog formed a coalition with Gen J C Smuts The Nationalist victory in the 1948 elections made Malan prime minister, and his position was strengthened by victories in the 1950 and 1953 elections He put the Nationalist policy of *apartheid* [racial segregation] into vigorous practice against the opposition of the Supreme Court
Malaya Communist guerrillas continued after May, 1950, to strike with terrorist raids, which upset conditions in the federation generally The government conducted warfare against them with varying success, but the guerrilla risings were still continuing in July, 1953 One incident of violence was the assassination of the high commissioner, Sir Henry Gurney, on Oct 6, 1951 World attention was also drawn to Malayan conditions when in May, 1953, Hungary offered to return a British prisoner to Britain, if a gaol guerrilla leader captured in Malaya were released the British somewhat reluctantly refused Measures other than armed expeditions were also taken against the Malayan Communists In 1952 several hundred thousand Chinese "squatters" were resettled in new villages, mainly to keep them from supplying food to the guerrillas Perhaps more important were the first steps to widen civil rights among the different racial groups A law granting common Malayan citizenship to about three quarters of the population became effective in 1952 The fall in the world rubber market caused serious economic troubles and falling wages in 1952 and early 1953
Malenkov, Georgi Maksimilianovich (gĕôr'gē mäksēmēl'yänəvĭch mälyĕn'kôf'), 1901 , Russian Communist leader A favorite of Stalin, he rose to be secretary of the central committee of the Communist party, directed war production in the Second World War, and became deputy premier in 1946 In 1953, after Stalin's death, he became premier of the USSR During the first months of his administration he appeared to be following a conciliatory policy toward the Western powers and to be relaxing the reign of terror which had reached a climax at the time of Stalin's death His apparent departure from Stalinist policies provoked much speculation abroad as did the dismissal and arrest of Beria in July, 1953
Malik, Yakov Aleksandrovich (mä'lĭk), 1906- , Russian diplomat He was ambassador to Japan (1942-45), was appointed deputy foreign minister for Far Eastern affairs (1946), and served as chief delegate of the USSR to the United Nations (1948-52) and as ambassador to England (1953)
Maniu, Iuliu, was unofficially reported dead in prison in 1951
Mann, Thomas His novel *The Holy Sinner*, based on Hartmann von Aue's religious legend *Gregorius*, appeared in 1951
Mannerheim, Baron Carl Gustav Emil, d 1951, in Switzerland
Marciano, Rocky (märshä'nō), 1924 , American pugilist, world heavyweight champion, b Brockton, Mass His real name is Rocco Francis Marchegiano He served in the army in the Second World War and on returning to civilian life in 1947 tried for a career in professional baseball Failing in this, he turned to boxing He won all but three of his 30 amateur fights and in July, 1948, turned professional in a bout at Providence, R I Brought along carefully by the shrewd New York promoter Al Weill (now officially his manager), the hard-hitting, personable Marciano disposed easily of all his opponents except Roland La Starza, over whom he gained a disputed split decision In becoming the second boxer ever to knock out Joe Louis (Max Schmeling was the first), a feat he accomplished in the eighth round on Oct 26, 1951, he won his chance to challenge the champion Joe Wolcott In their fight at Philadelphia on Sept 23, 1952, Wolcott was ahead on points when Marciano knocked him out in the 13th round to become the new champion On May 15, 1953, at Chicago, he knocked out Wolcott again, in the first round Hardly a graceful boxer (although his style has improved), Marciano has been compared to Dempsey and Louis for the power of his punching
Margaret Rose, 1930- , British princess, daughter of King George VI and only sister of Elizabeth II
Markova, Alicia, 1910 , English ballerina b London Her real name is Lilian Alicia Marks She made her first appearance with the Dolmbey Ballet in 1925 Joining the Vic-Wells Company in 1932 as the star dancer, she left to form her own company in 1935 with Anton Dolin In 1938 she joined a newly created Ballet Russe, but left in 1941 to join the Ballet Theatre She gained note for her mastery of precision and style, a dancing combination of perfection of form and movement with an ethereal grace See biography by Anton Dolin (1953)
Marlowe, Julia, d 1950

Pepper, Claude Denson, was defeated for the Democratic nomination to the U S Senate from Florida in 1950

Perón, Juan Domingo, president of Argentina since 1946, was reelected to a six-year term in 1951. His wife, Eva Duarte de Perón, died in 1952

Perrine, Charles Dillon, d 1951

Perth, James Eric Drummond, 16th **earl of,** d 1951.

Pétain, Henri Philippe, d 1951 Several weeks before his death his sentence was commuted from life imprisonment in a military fortress to detention in a villa

Phumiphon (pōōm'ēpŏn), 1927- , king of Thailand (1946-) He was at school in Switzerland when his brother, King Ananda, was killed (1946) under circumstances that have never been cleared up Phumiphon ruled under a regency until 1950, when he was crowned and took power in his own right He was married in 1950 and a son and heir apparent was born in 1952 His name in fuller form is Phumiphon Adundet

Poland adopted a new constitution in 1952, largely modeled on the 1936 constitution of the USSR

Poor, Charles Lane, d 1951

Portugal continued after 1950 under the government of Antonio Oliveira de Salazar President Carmona died in 1951 and was succeeded by Gen Francisco Higino Craveiro Lopes

Powell, Cecil Frank, 1903- English physicist, educated at Cambridge Univ Associated with the Univ of Bristol from 1928 he became professor of physics in 1948 He received the 1950 Nobel Prize in Physics for his research on cosmic rays and mesons and for his methods of photographing nuclear processes

Proctor, Alexander Phimister, d 1950

Prokofiev, Sergei Sergeyevich, d 1953 His final symphony, the Seventh, appeared in 1952

Puerto Rico A new constitution giving the island commonwealth status was ratified in 1952, Luis Munoz Marin was reelected governor There is an active movement for statehood

Purcell, Edward Mills, 1912- American physicist, b Taylorville, Ill grad Purdue Univ (B S, 1933), Ph D Harvard 1938 From 1938 he taught at Harvard, becoming professor in 1949 During the Second World War he carried on research that contributed to the development of radar The 1952 Nobel Prize in Physics was awarded jointly to Purcell and Felix Bloch for their independent development of the nuclear resonance or nuclear induction method of measuring the magnetic fields of the nuclei of atoms

Quemoy (kwmoi'), Mandarin *Kwmen* or *Chin-men*, island (60 sq mi pop 82,822), in Formosa Strait, off Fukien prov In the island group are also Little Quemoy (Lesu), Tan and Little Tan The chief town is Quemoy The rocky and sandy islands produce meager crops of wheat, rice, and sweet potatoes In 1949 many Nationalist Chinese retreating before the victorious Communists took refuge here Two large-scale Communist attempts to take the territory were stalwartly beaten back From Sept, 1951, to July, 1953, no further attempts were made

Radiguet, Raymond (rä'mō radēgā'), 1903-23, French author In his brief career he produced two accomplished novels—*Le Diable au Corps* (1923, Eng tr, *The Devil in the Flesh*, 1932) and *Le Bal du comte d'Orgel* (1924, Eng tr, *Count's Ball*, 1929, *Count d'Orgel*, 1953)

Randall, James Garfield, d 1953 The third volume of his *Lincoln the President* appeared in 1952

Reichstein, Tadeus (rīk'shtīn), 1897- , Swiss organic chemist, b Poland, educated at the technical school in Zurich After teaching chemistry at the technical school (1922-38), he became (1938) head of the department of pharmacy at the Univ of Basel For his work on the hormones of the cortex of the adrenal glands he shared with Edward C Kendall and Philip S Hench the 1950 Nobel Prize in Physiology and Medicine

Renner, Karl, d 1950 Theodor Korner succeeded him as president of Austria

Repplier, Agnes, d 1950

Republican party The 1952 presidential election in the United States returned the Republican party to power after 20 years of Democratic rule The landslide vote given Dwight D Eisenhower for the presidency made deep inroads into the Democratic

"solid South" stronghold and also enabled the Republicans to win control of both houses of Congress by a narrow margin

Reuther, Walter Philip. He was elected president of the C.I.O. in Dec., 1952, following the death of Philip Murray

Revillagigedo Islands, archipelago in the Pacific, off Colima, W Mexico. A volcano on San Benedicto Island rose suddenly in 1952

Rhee, Syngman, 1875–, Korean statesman, president of the Republic of Korea (1948–). Early an advocate of Korean independence, he led a demonstration against the Japanese in 1897 and was condemned to life imprisonment but was released under an amnesty. Rhee went to the United States, where he studied at Harvard and Princeton, then he spent some time in Hawaii. In 1919 a group of conspirators for Korean independence made him president of a government in exile, and he never ceased working for the cause. When Korea was taken in the Second World War, he became a leader in South Korea under U.S. occupation, and in 1948 he became first president of the Republic of Korea, which claimed the right to rule over all Korea but was opposed by the Communist People's Republic of Korea in the north. In the hardships of the Korean war (see Korea) he continued to govern. When in June, 1953, a truce was being negotiated which he felt would deprive South Korea of the right to establish rule over a united country, he refused to agree and threatened to continue the war. To prove the seriousness of this stand, South Koreans on June 28, 1953, unilaterally released 27,000 North Korean and Communist prisoners of war. Attempts of U.S. President Eisenhower to win him over by correspondence and by a special envoy, Assistant Secretary of State Walter S. Robertson, had not been successful early in July 1953. Some groups have criticized Rhee as autocratic and lacking a mandate from his people

Rhodesia, Northern see Rhodesia, Southern

Rhodesia, Southern. A Central African federation plan concerning Northern and Southern Rhodesia and Nyasaland was approved by the British House of Commons in early 1953, but the idea continued to meet opposition among large sections of the native population

Ridgway, Matthew Bunker, 1895–, U.S. general, b. Fort Monroe, Va., grad. West Point 1917. In 1939 he was assigned to the War Plans Division of the War Dept. General Staff. In the Second World War he was made (1942) assistant division commander and then commanding general of the 82d Infantry Division, when this became the 82d Airborne Division. Ridgway remained in command and led his men in the invasions of Sicily, Italy, and France. In 1946 he became a member of the military staff committee of the United Nations. Appointed (1950) commander of the U.S. 8th Army in Korea, he replaced (1951) Douglas MacArthur as commander of United Nations forces in Korea and of the Allied occupation forces in Japan. In June 1952, Ridgway replaced Dwight D. Eisenhower as supreme commander of the Allied Powers in Europe, a position he held until he was appointed Army chief of staff in 1953

Rigsdag see Denmark

Robins, Elizabeth, d. 1952

Robinson, Boardman, d. 1952

Robinson, Ray, 1921–, American pugilist, b. Detroit. His real name is Walker Smith, and he is widely known as Sugar Ray. He began boxing after three years of high school in New York city. Having won all his amateur fights (about 100), including the Golden Gloves featherweight title, Robinson turned professional in Oct., 1940, and was equally successful. In the U.S. army (1943–44) in the Second World War, he was a sergeant in Joe Louis's boxing troupe. By 1946 he was considered the leading welterweight (champion Marty Servo had retired), and when, in Dec., 1946, he defeated Tommy Bell in 15 rounds, he was formally recognized as the welterweight champion. Sugar Ray held that title for five years, taking on all comers, both in the United States and in Europe where he became a great favorite. Voted the outstanding boxer of 1950 and now lacking respectable opposition among welterweights, Robinson moved up to the middleweight class and on Feb. 14, 1951, scored a technical knockout in the 13th round over champion Jake LaMotta to become the new titleholder. This was his fifth victory in six bouts with LaMotta. He lost the middleweight title to Randy Turpin in a 15-round upset at London on July 10, 1951, but regained it from the British champion in New York on Sept. 12, by a technical knockout in the 10th round. In 1952 he outpointed Carl (Bobo) Olson and knocked out Rocky Graziano, middleweights, before challenging light heavyweight champion Joey Maxim on June 25. Sugar Ray was far ahead on points when, collapsing from the terrific 104-degree heat, he was unable to come out for the 14th round. On Dec. 18, 1952, he announced his retirement. A magnificent boxer and hard puncher, he has been rated the best pugilist, pound for pound, of his era.

Rodgers, Richard. Among his recent works is *The King and I* (1951)

Roland Holst, Henriëtte (van der Schalk), d. 1952

Romberg, Sigmund, d. 1951

Rommel, Erwin. His memoirs and correspondence of the Second World War were published in 1953 (*The Rommel Papers*, ed. by B. H. Liddell Hart)

Roosevelt, Eleanor, was in Jan., 1953, replaced as U.S. representative on the United Nations Human Rights Commission by Mrs. Oswald Bates Lord

Rosenberg Case. In March, 1951, Julius Rosenberg, electrical engineer, and his wife, Ethel Greenglass Rosenberg, were found guilty of conspiring to transmit atomic secrets to the USSR, partially on the evidence of her brother. Husband and wife were executed June 19, 1953. The case excited much discussion, and the executions occurred only after many efforts at prevention

Ross, Edward Alsworth, d. 1951

Rostovtzeff, Michael Ivanovich, d. 1952

Ruhr. The international authority for the Ruhr district was liquidated in 1952 when the European Coal and Steel Community became effective

Rumania continued after 1950 under Communist rule. A cabinet shake-up in 1952 brought former premier Peter Groza to the presidency, George Gheorghiu-Dej became premier, Anna Pauker lost her post as foreign minister

Rundstedt, Karl Rudolf Gerd von, d. 1953. He had been released from British custody in 1949

Saarinen, Eliel, d. 1950

Saar Territory. While France supported the autonomous government of the Saar Territory, the West German government protested the political and economic separation of the area from Germany. Elections late in 1952 gave the supporters of the status quo (i.e., continued economic union with France) a large majority. However the principal pro-German parties, being barred from the polls, could signify their wishes only by abstention or by casting invalid ballots. Although the pro-French government polled a majority of the total registered vote, the German government challenged the validity of the outcome. The Franco-German dispute over the Saar was a major obstacle to French ratification of the European Defense Community treaty

Salinas, Pedro, d. 1951, in the United States

Santayana, George, d. 1952. His volume of essays on politics, *Dominations and Powers*, appeared in 1951, the third and final volume (*My Host the World*) of his autobiographical *Persons and Places* was issued in 1953

Sarton, George, 1884–, American science historian, b. Belgium, grad. Univ. of Ghent (B.S., 1906, Sc.D., 1911). He came to the United States (1915) and became a naturalized citizen (1924). Known internationally for his contributions to the history of science, he founded and edited two periodicals devoted to the history and philosophy of science—*Isis* (founded 1912) and *Osiris* (founded 1936). He taught the history of science at Harvard (1916–18, 1920–51) and was a research associate of the Carnegie Institution of Washington (1918–19). Among his works are *Introduction to the History of Science* (3 vols., 1927–48), *The History of Science and the New Humanism* (1931, rev. ed., 1937), *The Study of the History of Science* (1936), *The Study of the History of Mathematics* (1936), *The Life of Science* (1948), *Science and Tradition* (1951), *A Guide to the History of Science* (1952), *A History of Science: Ancient Science through the Golden Age of Greece* (1952)

Schnabel, Artur, d. 1951

Schönberg, Arnold, d. 1951

Schuman, Robert, resigned as foreign minister in 1953. For the Schuman Plan, see European Coal and Steel Community

Seaborg, Glenn Theodore, 1912–, American chemist, b. Ishpeming, Mich., grad. Univ. of California at Los Angeles (B.A., 1934), Ph.D. University of California at Berkeley, 1937. He began teaching at the Univ. of California in 1937 and became professor in 1945. From 1942 to 1946 he was associated with the metallurgical laboratory of the Univ. of Chicago. For discoveries concerning the chemistry of transuranium elements he shared with Edwin M. McMillan the 1951 Nobel Prize in Chemistry. Known for his work in nuclear chemistry and physics and artificial radioactivity, Seaborg is codiscoverer of the elements plutonium (and its isotope plutonium 239), americium, curium, berkelium, and californium

Severing, Wilhelm Karl, d. 1952

Sforza, Carlo, Conte, d. 1952

Shaw, George Bernard, d. 1950

Sherrington, Sir Charles Scott, d. 1952

Shidehara, Kijuro, Baron, d. 1951

Shinn, Everett, d. 1953

Simenon, Georges (zhôrzh' sēmnô'), 1903–, Belgian author. Spectacularly prolific, he has written countless detective stories, many with Inspector Maigret as their hero. His later psychological novels, e.g., *Tropic Moon* (Eng. tr. 1944), *Heart of a Man* (Eng. tr., 1951), *Act of Passion* (Eng. tr., 1952), and *Satan's Children* (Eng. tr., 1954)—are remarkable for their relentless impact, brevity, and sparse style. Simenon made his home in the United States after the Second World War. He writes in French

Simkhovitch, Mary Kingsbury, d. 1951

Sloan, John, d. 1951

Smuts, Jan Christiaan, d. 1950

Snyder, John Wesley. He was succeeded by George M. Humphrey as U.S. Secretary of the Treasury in Jan., 1953. Snyder then became vice president of Willys-Overland Motors, Inc.

South Africa, Union of. The elections of 1950 and 1953 gave further support to Prime Minister Daniel F. Malan's Nationalist party policy of *apartheid*—racial segregation and discrimination. His chastisement measures, such as use of the Suppression of Communism Act (1950) to silence critics, caused some unrest but he thrust forward in opposition. The Supreme Court had invalidated some of the segregation laws, and in 1953 a bill was passed taking final decision in constitutional cases from the Supreme Court and giving power to a "high court" of the Malan-dominated Parliament. Native opposition to the racial laws began to take the form of passive resistance, a course encouraged by such anti-Malan groups as the Torch Commandos (a veterans' organization). The Liberal party was organized in 1953 to oppose *apartheid*. Malan's announced intention of making South Africa a republic instead of a British dominion. Strong nationalist sentiments also caused the breakdown of negotiations with the United Nations concerning the administration of South-West Africa, the South African delegate walked out of Security Council discussions

Spain continued after 1950 under the dictatorship of Francisco Franco. Royalists won important cabinet posts in 1951, but no further move was made toward Bourbon restoration (as of July 1, 1953). Late in 1950 the United Nations General Assembly voted to lift the ban on full diplomatic relations between its members and the Franco government. The United States, France, and Great Britain soon exchanged ambassadors with Madrid, and the U.S. Congress authorized a loan to Spain (1950). In 1951 began negotiations between the United States and Spain with the object of reaching a military alliance. In exchange for military aid Spain was to allow the establishment of American air and naval bases. The prospective alliance was sharply opposed by France and Great Britain, and in 1952 the negotiations entered a stage of suspended animation, which continued in 1953

Spalding, Albert, d. 1953. He wrote a historical novel, *A Fiddle a Sword and a Lady* (1953)

Sprague, Oliver Mitchell Wentworth, d. 1953

Stahlberg, Kaarlo Juho, d. 1952

Stalin, Joseph Vissarionovich, d. March 5, 1953, of a cerebral hemorrhage. His favorite, Georgi Malenkov, succeeded him as premier of the USSR. Subsequent changes in Soviet policy were claimed to have been planned by Stalin. Stalin's body was entombed next to Lenin's in the mausoleum on Red Square, in Moscow. Outside Russia, Stalin's death was taken as a turning point in world affairs—though its effect was still immeasurable in July, 1953

Stassen, Harold Edward, was an unsuccessful candidate for the Republican presidential nomination in 1952. In Jan., 1953, he replaced W. Averell Harriman as director of the Mutual Security Agency, at the same time resigning his post as president of the Univ. of Pennsylvania

Steinbeck, John Ernst. His novel *East of Eden* was published in 1952

Stephens, James, d. 1950

Stevenson, Adlai Ewing, 1900–, American political leader, b. Los Angeles, Calif., grad. Princeton, 1922, J.D. Northwestern Univ. 1926, grandson of Adlai Ewing Stevenson. Admitted to the bar in 1926, he practiced law in Chicago. From 1941 to 1944 he was an assistant to the U.S. Secretary of the Navy. He was the head of an economic mission to Italy in 1944 and served with a War Dept. mission to Europe in 1944. An adviser to the conference which adopted the charter of the United Nations, he was a member of the U.S. mission to the UN General Assembly in 1946 and 1947. He became governor of Illinois in 1948. A somewhat reluctant Democratic presidential nominee in 1952, he lost the election to Dwight D. Eisenhower but emerged as the leader of the Democratic party. In 1953 he embarked on a five-month tour that took him around the world

Stimson, Henry Lewis, d. 1950

Strauss, Lewis Lichtenstein, 1896–, American public official and financier, b. Charleston, W.Va., grad. Medical College of Virginia and Jewish Theological Seminary. Associated with Kuhn, Loeb and Company since 1919, as a partner after 1929, he resigned in 1946. He was a member of the Atomic Energy Commission from 1946 to 1950 and returned as its chairman in 1953. He is a member of the U.S. Naval Reserve, in which he became a rear admiral in 1945

Stravinsky, Igor Feodorovich. His opera *The Rake's Progress* had its American première in 1953.

Strong, George Templeton, 1820–75, American diarist and lawyer, b. New York city, grad. Colum-

bia, 1838 He was admitted to the bar in 1841 He was made a trustee of Columbia in 1853, helped found its law school, and was a strong supporter of the School of Mines In the Civil War he served as treasurer of the U S Sanitary Commission A staunch Republican, he worked to found the Union League Club He was also a vestryman of Trinity Church and president of the Philharmonic Society In 1952 his diary, edited by Allan Nevins and Milton H Thomas, was published in four volumes It covers a period of forty years and is a rich source of social and political history

Suez Canal. Egyptian objection to the British occupation of the Canal Zone grew stronger after May, 1950 In 1951 Egypt was accused in the United Nations of interfering with transit and restricting goods in the zone, and in Oct , 1951, Egypt repudiated the Anglo-Egyptian pact of 1936 Clashes and riots followed Talks between the British and the Egyptians broke down on May 6, 1953, and tension was strong early in July

Summerfield, Arthur Ellsworth, 1899–, U S Postmaster General (1953–), b Pinconning, Mich He was a real estate broker from 1919 to 1924 In 1924 he became an oil distributor in Flint, and in 1929 he also went into the automobile field His outfit, the Summerfield Chevrolet Company, became one of the largest retail automobile agencies in the United States He entered politics in Michigan in 1940 when he organized a campaign committee which helped carry the state for Wendell Willkie His reorganization of the Republican party's fund-raising methods in Michigan attracted wide attention Elected a committeeman to the Republican National Committee in 1944, he held various positions in that organization until his election to the national chairmanship in July, 1952 He played a strategic role in securing the presidential nomination for Dwight D Eisenhower in 1952 and was subsequently given a cabinet post in the Eisenhower administration

supersonic speed see JET PROPULSION

Sweden King Gustavus V died in 1950 and was succeeded by his son Gustavus VI

Synge, Richard Laurence Millington, 1914 , British biochemist, b Scotland, educated at Winchester College and Trinity College, Cambridge After serving as biochemist in the wool industries (1938–41), he became (1943) biochemist at the Lister Institute of Preventive Medicine in London and (1948) biochemist at the Rowett Research Institute at Bucksburn, Aberdeenshire He was awarded jointly with Archer J P Martin the 1952 Nobel Prize in Chemistry for his work in developing paper partition chromatography, a method of separating and identifying chemical substances in a mixture

Syria. Increasing Syrian nationalism caused lessening interest in the Greater Syria" plan, which was abandoned by Abdullah's successor in Jordan, King Talal, who signed a Syria-Jordan friendship pact in March, 1952 Israeli-Syrian animosity was marked by violence in 1950 and 1951, and there were repeated debates in the United Nations between Israel and the Arab states Tension on the Syrian-Lebanese border occupied the attention of the government from 1950 to 1953 Despite a trade agreement, some bad feeling still remained in July, 1953 Syrian politics were marked by frequent changes A new government which came into power by a coup d'état on Nov 29, 1951, headed by Col Fawzi Silo and the Syrian "strong man," Col Adib el Shishakly, was still in power in July, 1953

Taft, Robert Alphonso, continued his opposition to Democratic policies particularly in foreign affairs He condemned the Korean policy of the Truman administration, opposed the stand on Formosa, and objected to Secretary of State Dean Acheson Taft was a leading candidate for the Republican presidential nomination in 1952 but lost to Dwight D Eisenhower He continued his leadership in the Senate by holding the position of Senate majority floor leader, but in June 1953, because of ill health he was forced to turn over the floor leadership to Sen William F Knowland His *Foreign Policy for Americans* appeared in 1951

Talal (tä läl'), 1909 , king of Jordan (1951–52) The son and successor of Abdullah, he had ruled for only a few months when a recurring mental disorder forced the appointment of a regency council In Aug , 1952, parliament removed him from the throne His son succeeded as HUSSEIN I

Taschereau, Louis Alexandre, d 1952

tennis. Pancho Gonzales followed Jack Kramer into the professional ranks late in 1949, and the United States lost international tennis supremacy to Australia Led by Frank Sedgman and Kenneth McGregor, the Australians wrested the Davis Cup from the Americans at Forest Hills in 1950 and were again victorious at Sydney in 1950 and 1951 Sedgman also won the following singles championships Australia (1950), the United States (1951, 1952, he was the first foreigner to take this title since Fred Perry in 1936), and Wimbledon (1952) McGregor defeated Sedgman for the Australian singles championship in 1952 As a doubles team Sedgman and McGregor were practically invincible, winning the Australian and Wimbledon championships in 1951 and 1952 and the U S championship in 1951 Early in 1953 the pair turned professional to tour the world, playing matches against Jack Kramer and Pancho Segura Outstanding American players in these years were Dick Savitt, who won the Australian and Wimbledon singles championships in 1951, and Vic Seixas, who teamed with the Australian Mervyn Rose to win the U S doubles championship in 1952 and won the Wimbledon singles championship in 1953 While Australia dominated the men's game, the United States, with Maureen CONNOLLY and Doris Hart, continued its long supremacy in women's amateur tennis

Thailand King Phumiphon in 1950 was crowned and began to rule in his own right His royal power was great and was made even greater by political change in 1951 The political maneuver of a number of marines in kidnaping the prime minister, Luang Pibul Songgram, earlier in the year was abortive but a military coup late in November was successful The old constitution of 1932 was restored, and the legislature was again unicameral with half its members nominated by the crown This change went into effect in 1952, Pibul Songgram again became premier Efforts were made to improve agricultural and industrial conditions, with some economic and technical aid from the United States under an agreement of 1950 The fall in rubber prices in 1952 affected the economy unfavorably, though Thailand was not hurt as much as some rubber-producing countries, because exports of rice held up The government was firmly opposed to Communism and took steps to put down Communist activities In foreign affairs Thailand was oriented toward the Western Powers When the North Koreans invaded South Korea in 1950 Thai forces were sent very promptly to join the United Nations troops fighting there Early in May, 1953, when the Communist Viet Minh forces threatened the border of Laos and Thailand, the government removed Indo-Chinese from the area and asked the United States for ammunition supplies which were promptly sent By July no actual trouble had occurred

Theiler, Max, (mīks' tī'lər), 1899–, South African–American research physician, b Pretoria, educated at the Univ of Cape Town, St Thomas's Hospital (London), and the London School of Tropical Medicine Theiler's research on yellow fever, begun while he was connected with the department of tropical medicine of Harvard Medical School (1922–30), was continued at the Rockefeller Foundation, of which he became a staff member in 1930 He received the 1951 Nobel Prize in Physiology and Medicine for his discoveries concerning the nature of yellow fever and how to combat it With his co-workers Theiler produced a yellow fever vaccine known as 17-D

Thorpe, James, d 1953

Tibet Late in 1950 Chinese Communists entered the country and established dominance there, almost without resistance—a conquest signalized by a pact between the Dalai Lama and China on May 27, 1951 The Panchen Lama returned under Communist protection from his long exile in China

tidelands oil The controversial issue of ownership of submerged land and resources along the U S coast line has been a thorny political problem for years Revolving around the question of territorial waters, the issue also involves the old question of states' rights The states involved maintained that the submerged lands and the resources contained therein within the three-mile marginal belt over which a state has control by international law belonged by rights to the particular state (Both Texas and Florida claim ownership up to 10½ miles off-shore because of previous seaward boundaries) The U S Supreme Court consistently maintained that the submerged lands were the property of the federal government Confusing the whole issue was the question of just what kind of demarcation line could be drawn between the lands claimed by the states and those claimed by the federal government President Harry S Truman, who had vetoed efforts to turn the submerged lands over to the states, declared the lands a naval petroleum reserve just before he left office in 1953 One of the first acts of the Eisenhower administration, which had promised action on the matter, was to pass (May, 1953) a bill giving the coastal states title to submerged lands within their historic boundaries Assigned to the states was the right to develop resources, oil companies which had been marking time awaiting a decision immediately set about efforts to find oil and gas deposits Denounced by some Democrats for giving land and sources away, the measure promised more political repercussions

Tilden, William Tatem, Jr , d 1953

Tito, Josip Broz, became president of Yugoslavia under the new constitution of Jan , 1953 He made an official visit to the United Kingdom early in the same year An official biography appeared in English in 1953 (Vladimir Dedijer, *Tito*) See also YUGOSLAVIA.

Torrence, Ridgely, d. 1950.

transistor, electronic device useful as a voltage and current amplifier and for performing other functions of which vacuum tubes are capable It was announced in 1948 that the transistor had been invented by John Bardeen and W H. Brattain, working under the direction of William Shockley at the Bell Telephone Laboratories A transistor is made of germanium or some other crystalline semiconducting material (a substance that, depending on the impurities present or on its treatment, assumes properties of a conductor or a nonconductor). The point-contact transistor consists of a germanium crystal with two fine wires placed a few thousandths of an inch apart on its surface, a small input power is enormously amplified over the surface of the germanium In the junction transistor, developed more recently by William Shockley, a minute bar of germanium electrically negative at both ends and with a positive layer of germanium sandwiched between is embedded in plastic, with a wire extending to the outside from each of the three areas, the transistor action takes place within the germanium over the whole of the junctions or areas of contact of the three layers In transistors as in vacuum tubes, currents depend on the motion of electrons, but the transistor operates instantly with no warm-up period, the power needed for operation is extremely small, and the problem of the intense heat developed in devices using vacuum tubes does not exist Other advantages of the transistor are its durability, its high resistance to shock and vibration, and its small size coupled with high efficiency, all of which point to its incorporation in telephone and cable systems, and in radios, television sets and other devices which can be produced in sizes much smaller than the use of vacuum tubes permits

Trieste, Free Territory of By 1953, the United Nations Security Council still was unable to agree on the choice of a governor for the Free Territory of Trieste The area remained divided into a Yugoslav-occupied zone and a zone occupied by British and American troops The Trieste problem continued to vex Yugoslav-Italian relations despite attempts of the Western powers to promote a compromise solution

Truman, Harry S In Nov , 1950, he escaped an assassination attempt by two Puerto Ricans In that year also he ordered the development of the hydrogen bomb, sought the passage of a civil rights program, and sent U S forces to join the United Nations in blocking aggression in Korea In 1951 he was embroiled in a disagreement with Douglas MacArthur, which resulted in the general's dismissal A peace treaty with Japan came into force in 1952, as did defense pacts with Japan, the Philippines, and Australia and New Zealand He did not seek renomination in 1952, instead he backed Adlai E Stevenson for the Democratic nomination Truman turned over his office in Jan , 1953, to his successor, Dwight D Eisenhower, and retired to his home in Missouri to write his memoirs

Tudor, Antony, 1909–, English choreographer, b London Before 1938, when he came to the United States at the invitation of the Ballet Theatre, he danced leading roles and created ballets for several English companies His ballets use the modern idiom Among his most popular works are *Lilac Garden, Gala Performance, Pillar of Fire, Dark Elegies,* and *Undertow*

Tunisia Agitation for independence, begun in Dec , 1951, continued into 1952 France submitted a plan for gradual advance toward Tunisian independence, which was rejected by the bey The first nation-wide elections in April, 1953, saw election of pro-French candidates in rural regions and an effective Nationalist boycott of the polls in Tunis On July 1, 1953, the day after resumption of Franco-Tunisian talks on home rule was announced, the pro-French Prince Azzedine Bey, heir presumptive to the throne, was assassinated

Turkey was admitted into the North Atlantic Treaty Organization in 1951 Turkish contingents joined the United Nations forces in Korea in 1950 and played an increasingly important part in the fighting In 1953 Turkey signed a defensive alliance with Greece and Yugoslavia The Democratic party continued to govern under President Celal Bayar American economic aid contributed to industrial development, and denationalization of industries continued

Union of Soviet Socialist Republics. Relations with the Western powers, particularly with the United States, worsened considerably after the outbreak of war in Korea (1950), which the West ascribed to Soviet instigation The Soviet Union continued to push its rearmament Internal conditions, because of increasing secrecy and censorship, became a matter of speculation for the outside world Meanwhile, Stalin and his government advanced their "peace offensive" against the Western governments and strengthened their hold over the various satellite countries in the Soviet orbit Late in 1952 the All-Union Communist Party Congress met for the first time in 13 years and authorized the reor-

tanization of the top level of the party structure. The Politburo and Orgburo of the central committee of the Communist party were replaced by a single presidium, membership of the party secretariat was doubled Stalin's death (March, 1953) was followed by the orderly transfer of power to Georgi Malenkov Molotov, Beria, and Bulganin assumed the next-highest posts, Marshal Voroshilov replaced Shvernik as president The new government pledged itself to continue Stalin's policies However, it soon became apparent that a change in tactics, at least, had begun Whether, as the government claimed, the revised policy had been planned in advance by Stalin or whether it represented a new departure was as yet uncertain by mid-1953 A group of physicians, mostly Jews, who had been accused of, and had confessed to, a plot against the lives of high Communist leaders, were released on the ground that their confessions had been extorted from them by the secret police This act, unprecedented in Soviet Russia, was followed by a partial amnesty for prisoners New peace overtures were made to the West and appeared serious in intent Occupation policies in Austria and E Germany were eased However, the anti-Communist uprisings in E Germany and the overthrow and arrest of Beria put further "softening" of Soviet policy in doubt

United Nations. Relations in the UN Security Council between the Soviet bloc and representatives of the "free powers" continued strained and hostile after May, 1950, with the USSR using the veto power to thwart any moves not to Communist advantage Disagreements continued on such matters as control of armaments, admission of new members, unification of Germany and the question whether representation should be from Communist China rather than Nationalist China The UN had still to contend with disturbances in Kashmir and between Israel and the Arab states The most significant occurrence of the body's history took place when, in June 1950, North Korean troops crossed the 38th parallel to attack South Korea and UN forces were sent to the aid of the South Koreans The UN objective was unequivocally described as the establishment of a unified, independent and democratic Korea The Chinese Communists who entered the war on the North Korean side in 1951, were labeled aggressors by the UN Cease-fire negotiations, intermittently held after July 1951, looked hopeful of solution in 1953 (see Korea) In 1950, the UN voted independence for Libya and the unification of Eritrea and Ethiopia Trygve Lie announced his resignation as secretary general on Nov 10, 1952 and was replaced on March 31 by Sweden's Dag Hammarskjold The covenant on human rights prepared by the Commission on Human Rights was rejected by U S Secretary of State Dulles in 1953

United States Foreign affairs cast a looming shadow over all U S life as the mutual hostility of the Western Powers (led by the United States) and the Communist Powers (led by the USSR) continued in the "cold war" The most serious occurrence was the outbreak of fighting in Korea, when North Korean Communists invaded the Republic of Korea on June 25 1950 The United Nations promptly declared North Korea the aggressor and sent aid to invaded South Korea (the USSR and other Communist nations not concurring) Most of that aid was contributed by the United States, and the cost of the years of fighting that followed was great in supplies, money and American blood The war effort was successfully backed by the U S people, but there was much bitter criticism of the conduct of affairs, directed particularly against President Truman, Secretary of State Dean Acheson, and the late President Franklin Delano Roosevelt Considerable discord occurred over Truman's dismissal of Gen Douglas MacArthur, who had bluntly advocated attacks on Communist China (chief supplier of aid to the North Koreans) in contradiction of the official policy The long and discouraging delays in the truce talks that had begun in July, 1951, also bred criticism, by early July, 1953, the truce talks still had not ended, though there was much hope for a successful end (see Korea) Difficulties with the Communist countries also strongly affected relations with all other countries (e g , Great Britain, France, Western Germany, see also North Atlantic Treaty and European Defense Community) The same condition was reflected in the building-up of U S defense forces and experiments in use of atomic energy in Nevada and at Eniwetok. Internally, opposition to Communism led to much action against "subversive" activities Most notable was the operation of the Senate investigating subcommittee which, under the direction of Sen Joseph R McCarthy, undertook to root out pro-Communist activities in many fields The U S public was solidly in favor of thwarting Communist influence in the United States, but there was widespread criticism of McCarthy's activities as a threat to freedom of speech and democratic thought. The attack on Communism was, however, much wider than the Senatorial investigation Many volunteer groups undertook to attack pro-Communism, and the trial of Julius and Ethel Rosenberg, who were convicted of betraying atomic-energy secrets to the USSR, caused excitement that rose to a crescendo with their execution in June, 1953 U S attitudes towards Asiatic nations, such as that shown in the signing of a peace treaty with Japan in 1951 and that in extension of aid to many countries, were also affected by opposition to Communism This opposition to Russia was not a true issue in the great political event in the United States, the presidential election of 1952, for both major candidates were agreed in opposition to Communism though not agreed on the policies to be adopted In November the election swept the Republican candidate, Dwight D Eisenhower, into office by victory over his Democratic opponent, Adlai E Stevenson The new administration took office in Jan , 1953, and adopted a policy of relying on the American businessman for a major role in administration Two months later the death of the Russian leader, Joseph V Stalin, brought a change in Russian-American relations, but just how far and in what direction Russian policy under the new leader, Malenkov, had changed was not clear early in July, 1953 The major world problem was still the relation of East and West, Communist and non-Communist nations

Universal Military Training (UMT) Although the United States has used selective service to conscript men in times of war, particularly during the First and Second World Wars, it has never had a system of military training for all male citizens However, such a system was urged as part of the preparedness program instituted after the Second World War as a means of insuring that enough trained men would be on hand if need for them should suddenly arise The question of UMT aroused much controversy Although President Harry S Truman urged the passage of a bill authorizing UMT, Congress compromised by passing a draft bill in 1948 this was extended in 1951 Dwight D Eisenhower also declared himself in favor of UMT in 1953 but said that no program would be advisable while the draft was in force

Uruguay A nine-man federal council was installed in 1952 taking over the duties of the presidency Andrés Martínez Trueba, who was serving as president, became council chairman

Vail, James Garrett, d 1951, in Delhi, India, where he was director of social service for a committee of the Society of Friends

Vandenberg, Arthur Hendrick, d 1951 *The Private Papers of Senator Vandenberg* appeared in 1952

Vandenberg, Hoyt Sanford, resigned as chief of the U S Air Force in 1953 Nathan F Twining was named to succeed him

Van Doren, Carl, d 1950

Van Fleet, James Alward, 1892–, American general, b Coytesville, N J , grad West Point, 1915 He fought in the First World War and later served in the Canal Zone and at Fort Benning Ga As a colonel he trained the 8th Infantry Regiment of the 4th Division in the Second World War and led it in the landing on Utah Beach in Normandy He was soon a major general, commanding the 90th Division and later the 3d Corps From 1948 to 1950, as a lieutenant general, he headed the American military mission to Greece In 1951 Van Fleet succeeded Gen Matthew B Ridgway as commander of the 8th Army in Korea, including all United Nations forces there, though Gen Mark Clark took supreme command Van Fleet retired from the army in April, 1953

Vaughan, Thomas Wayland, d 1952

Vavilov, Sergei Ivanovich, d 1951

Viebig, Clara, d 1952

Viet Nam The war of French and Viet Namese troops against the Communist Viet Minh rebels continued into 1953 without solution More complications arose when the rebels invaded neighboring Laos in 1953 Viet Namese demands for broadened independence received a hearing from the French, and some progress toward that goal seemed likely in July 1953

Vishinsky, Andrei Yanuarievich, yielded his post of foreign minister of the USSR to Molotov in the cabinet reshuffle following Stalin's death (1953) He was made permanent Soviet delegate to the United Nations and deputy foreign minister.

Von Schrenk, Hermann, d 1953

Voronoff, Serge, d 1951

Voroshilov, Kliment Yefremovich, became chairman of the presidium of the supreme council of the USSR (i e , president of the USSR) in 1953

Wagner, Robert Ferdinand, d 1953

Waksman, Selman Abraham He won the 1952 Nobel Prize in Physiology and Medicine for his work in the discovery of streptomycin and of its value in treating tuberculosis

Walton, Ernest Thomas Sinton, 1903–, Irish physicist, educated at Methodist College (Belfast), Trinity College (Dublin), and Cambridge Univ He became a fellow of Trinity College in 1934 and professor of natural and experimental philosophy there in 1946 The 1951 Nobel Prize in Physics was awarded jointly to Walton and Sir John Cockcroft for their pioneer work in transmuting atomic nuclei by bombarding elements with artificially accelerated atomic particles

Walton, Sir William Turner, created knight 1951.

Warfield, David, d 1951

Wavell, Archibald Percival Wavell, 1st Earl, d 1950.

Weeks, Sinclair, 1893–, U.S Secretary of Commerce (1953), b West Newton, Mass , grad Harvard, 1914 A banker and then a manufacturer of metal goods he was active in Republican circles in Massachusetts and became prominent in national political circles, acquiring a reputation for fund raising He served from Feb to Dec 1944, in the U S Senate with an interim appointment to replace Henry Cabot Lodge, Jr In charge of raising funds for the 1952 presidential campaign of Dwight D. Eisenhower, Weeks was given a cabinet post

Weinman, Adolph Alexander, d 1952

Weizmann, Chaim, d 1952 He was succeeded as president of Israel by Itzhak Ben-Zvi

West Indies, British All the islands of the British West Indies (except the Bahamas and the Virgin Islands) agreed in 1953 to join in the British Caribbean Federation, which will finally be a self-governing unit in the British Commonwealth

White, Bouck, d 1951

Wieland, George Reber, d 1953

William or **Frederick William,** former crown prince of Germany, d 1951

Wilson, Charles Edward, 1886–, American government official and industrialist, b New York city He began working for the Sprague Electrical Works in 1899, moving successively through the accounting production, engineering, and marketing departments The General Electric Company absorbed Sprague in 1918, Wilson was elected executive vice president of General Electric in 1937 and moved into the presidency in 1940 In the Second World War he accepted a position on the War Production Board, soon becoming executive vice chairman His managerial abilities were applied to the problems of production quotas and the channeling of material to the proper uses He resigned in 1944 in a disagreement over plans for reconversion Wilson assumed again his post with General Electric returning to the government in 1950 to become director of the Office of Defense Mobilization In this job he had control of all mobilization activities, with powers second only to those of the President A disagreement with President Harry S Truman on a steel-wage dispute led to Wilson's resignation (1952)

Wilson, Charles Erwin, 1890 , American industrialist, U S Secretary of Defense (1953) b Minerva, Ohio grad Carnegie Institute of Technology, 1909 He was an electrical engineer with Westinghouse Electric and Manufacturing Company from 1909 to 1919 and designed the first automobile starters made by Westinghouse In 1919 he joined General Motors Corporation, becoming president of Delco Remy Corporation, a subsidiary in 1926 Vice president of General Motors from 1929 to 1939 he became executive vice president and finally president in 1941 Until 1949 he concentrated on production planning and labor relations In the Second World War he supervised the gigantic war-production activity in which General Motors was engaged He is credited with formulating the cost-of-living wage formula which that corporation inserted in its contract in 1948 He is often confused with another industrialist and government official Charles Edward Wilson

Wood, Clement, d 1950

Yorke, Henry Vincent see Green, Henry

Yugoslavia The years 1950-52 were marked by continued tension with the USSR and Russian-dominated Rumania Hungary, Bulgaria and Albania Relations with the Vatican also remained tense and the Trieste problem was a cause of friction with Italy The Yugoslav people were reduced to near-starvation by a series of calamitous droughts Yugoslavia obtained economic and military aid from Western countries (especially the United States) Though it did not enter the North Atlantic Treaty it was increasingly drawn into the Western camp and in 1953 concluded a defensive alliance with Greece and Turkey Its stringent nationalization and collectivization program was partly abandoned, partly eased in 1952-53, government planning, which had been on the whole unsuccessful, was decentralized and modified Nevertheless the Communist party retained firm control and its new policies were described as further steps toward socialism In Jan 1953, a new constitution was adopted, but the federal structure of the country was left unchanged Marshal Tito was elected president In June, 1953, normal diplomatic relations with the USSR were resumed on Russian initiative, but the Yugoslav government disclaimed any rapprochement with the USSR

Zhukov, Georgi Konstantinovich, was appointed deputy defense minister of the USSR in the Malenkov cabinet of 1953

CENSUS OF THE UNITED STATES, 1950

This list includes all places, incorporated and unincorporated, which had a population of 1,000 or more in 1950. It also includes all available figures for places of less than 1,000 which were given articles in *The Columbia Encyclopedia*, Second Edition
